Celebrating **Black History Month**

Highlighting Black innovators in clean energy

**Annie Easley**

NASA Archive

February is Black History Month, a time to celebrate Black stories and achievements. Diverse perspectives drive innovation around the globe and many of the cutting-edge discoveries in clean energy can be attributed to Black Americans.

Annie Easley was one of the first African American computer scientists to work at NASA. She was considered a "human computer" because of her ability to perform complex calculations by hand for the majority white engineering staff.

Annie's calculations paved the way for early alternative energy endeavors that analyzed wind and solar energy projects and hybrid vehicle batteries. She was also a champion for equal employment opportunity and challenged discrimination in the workplace.

### How do you use your energy?

### Endres sows seeds of restoration for prairies

How do our customers use their personal energy for good? Ron Endres of Verona uses his energy to harvest, sort and prepare thousands of prairie seeds that he then donates to nonprofit conservation groups across Wisconsin. "When I go to a place where a prairie exists because of the work I did, it's the most incredible feeling," he said.

Alliant Energy works to make a difference in the communities we serve. We celebrate people who are putting their energy to work to make their community better. Read more about Endres and other local heroes in our blog at [alliantenergy.com/ronendres](http://alliantenergy.com/ronendres).
