352. In addition to their LTV analysis, the *Allstate v. CitiMortgage* plaintiffs undertook a sophisticated analysis to determine whether a given borrower actually occupied the property as claimed. *Allstate v. CitiMortgage* Complaint, ¶¶118-129. As part of the *Allstate v. CitiMortgage* plaintiffs' analysis of over 9,000 mortgage loans underlying their Certificates, they reviewed tax records, credit records, bills, property records and lien records, to determine whether a borrower was actually living in the property subject to the loan. The results of the *Allstate v. CitiMortgage* plaintiffs analysis demonstrates that the percentage of owner-occupied properties disclosed by Citi in their prospectuses was consistently false and that the true rate was much lower. The following chart shows the results of their analysis:

Trust	Percentage of Owner-Occupied Properties Represented in Prospectus	Estimated Actual Percentage of Owner-Occupied Properties in the Pool	Prospectus Overstatement
CMLT 2006-04	69.6%	57.7%	11.9%
CMLT 2007-WFHE2	94.2%	81.8%	12.3%
CMALT 2006-A7	88.4%	75.2%	13.2%
CRMSI 2007-02	98.7%	93.7%	5.0%
CRMSI 2006-03	98.6%	96.0%	2.6%
CRMSI 2007-01	99.2%	96.1%	3.1%

353. In addition to Allstate, Citi has been sued by the FHFA. *FHFA, et al. v. Citigroup, Inc., et al.*, No. 1:11-cv-06196 (S.D.N.Y. Sept. 2, 2011).

354. The FHFA performed a similar analysis to determine whether the owner-occupancy rates disclosed in the prospectuses for Citi securitizations at issue there were accurate. According to the FHFA's review, most of the Citi securitizations understated the percentage of non-owner-occupied properties (*FHFA v. Citigroup* Complaint (Dkt. No. 1), ¶¶109-112):

Trust (with Supporting Loan Group)	Reported Percentage of Non-Owner Occupied Properties	Actual Percentage of Non-Owner-Occupied Properties	Prospectus Understatement of Non-Owner Occupied Properties
CMLT 2005-10 (Group 1-3)	27.65%	39.98%	11.73%
CMLT 2005-7 (Group 1-2)	14.95%	30.32%	15.37%
CMLT 2005-HE3 (Group 1)	7.92%	21.17%	13.25%
CMLT 2005-HE4 (Group 1)	14.65%	27.94%	13.29%
CMLT 2006-AR2 (Group I-1)	11.25%	25.25%	14.01%
CMLT 2006-AR5 (Group 1-2)	10.74%	27.43%	16.69%
CMLT 2006-WF1 (Group I)	41.92%	48.17%	6.25%
CMLT 2006-WF2 (Group I)	39.90%	47.45%	7.55%`
CMLT 2007-AR7 (Group 2)	63.77%	68.80%	5.03%

5. Citi Knew that Underwriting Standards Were Being Abandoned

355. Citi had actual knowledge that the loans it securitized in the Trusts sold to Union Central did not comply with the stated underwriting guidelines contained in the Offering Materials, and that the quantitative and qualitative data contained in the Offering Materials was materially false and misleading. Indeed, Citi used this knowledge to profit from the defective loans it securitized by taking short positions on securities sold to its clients, and by pocketing discounts on defective loans sold by the very originators whose operations Citi sustained through its warehouse funding.

a. Citi Had a Company-Wide Practice of Securitizing Loans that Had Not Been Properly Underwritten

356. Unbeknownst to Plaintiffs, Citi had a company-wide practice of originating and acquiring home loans without using proper underwritten practices to determine whether the borrower had the willingness and intent to repay the loans. Citi's CEO during the relevant time period subsequently admitted to the FCIC that Citi employed a factory line system to securitize toxic mortgages. Similarly, other high-ranking executives have now admitted that Citi was aware during the relevant time period that 80% of its loans were not properly underwritten. Indeed, it was Citi's business strategy to securitized these high risk loans to get them off its books to avoid the risk of default, but it failed to disclose to investors that these loans had never been properly underwritten.

b. Based on Its Own Review of the Underlying Loans, Citi Defendants Had Actual Knowledge of the Defective Loans They Securitized

357. Citi's Offering Materials represented that Citi reviewed the adequacy of the loan seller's underwriting guidelines, including its mortgage loan origination processes, systems and quality control procedures. Citi represented that its "[t]hird-party originators must be experienced in originating mortgage loans of the types in the pool in accordance with accepted practices and prudent guidelines." In addition to the originators' own review of acquired loans, the Offering Materials also stated that Citi would re-underwrite sample pools of the loans it purchased to determine whether they were originated in compliance with applicable underwriting guidelines:

> For mortgage loans acquired in a bulk purchase from a financially sound mortgage loan originator, the affiliated originator will review the selling originator's underwriting policies and procedures for compliance with the affiliated originator's or Fannie Mae/Freddie Mac underwriting standards and will credit score each loan. The affiliated originator will also conduct a limited mortgage loan file review. . . .
>
> . . . In purchasing third-party loans, CitiMortgage will review a sample of the loans to determine whether they generally conform to CitiMortgage's underwriting standards. CitiMortgage will fully or partly credit score or re-underwrite the third-

party loans to determine whether the original underwriting process adequately assessed the borrower's ability to repay and the adequacy of the property as collateral, based on CitiMortgage's underwriting standards.

358. Citi had knowledge that at least two of its regular third-party originators failed to adhere to underwriting standards. In 2007 Citi acquired Argent and Ameriquest Mortgage Co. Due diligence in these acquisition processes would have alerted Citi to the deteriorated standards used by these two companies, which the OCC later ranked as the third and ninth worst originators, respectively, for the period of 2005 through 2007. Argent originated more than 20% of the mortgage loans in the CMLTI 2007-10 Trust.

c. Based on a Third-Party Review, Citi Had Actual Knowledge of the Defective Loans They Were Securitizing

359. The FCIC received testimony and reports from Clayton, a third-party due diligence firm hired "to identify, among other things, whether the loans met the originator's stated underwriting guidelines." Documents recently released by Clayton, including its internal "Trending Report" released by the government in conjunction with testimony given in September 2010, confirm that there were rampant underwriting violations in the loan pools contained in the Certificates. These documents reveal that from January 2006 through June 2007, Citi received regular reports from Clayton regarding its defective loans, and 42% of the loans Clayton reviewed for Citi "failed to meet guidelines." These loans were not subject to any proper "exceptions," as they did not have any "compensating factors." Rather, these loans were plainly defective. Nevertheless, Citi knowingly waived in 31% – almost a third of these defective loans into its RMBS trusts. Such waivers were never disclosed to Union Central or any of the investors who purchased Citi Certificates, and Citi continued using, and indeed, funding these originators.

360. Moreover, since Clayton reviewed only a sample of the loans, the invariable conclusion for Defendants was that there were thousands of additional defective loans which Clayton had not reviewed. Yet Citi purposefully concealed the information provided by Clayton from investors while, at the same time, it used the Clayton information about the defective loans to force loan originators to accept lower prices for the loan pools. Thus, Clayton's underwriting analyses were not used for the benefit of the investors, but exploited by Citi for greater profits at investors' expense.

361. That Citi waived through almost a third of the loans that Clayton's analyses said should be rejected is significant evidence that Citi was aware of the deteriorated quality of the loans and the underwriting for its RMBS trusts. Clayton's data demonstrates that underwriting guidelines were being routinely violated, and that Citi was well aware this was occurring.

362. Indeed, Citi conducted due diligence on all the originators from which it purchased loans, and on the loans included in the offerings, reviewed compliance with the approved underwriting guidelines. The results of these reviews the originators would have confirmed that the loan originators were routinely violating the stated underwriting standards and that a large number of the loans Citi securitized did not comply with the stated underwriting standards.

d. Citi Used Its Knowledge of Defective Loans to Secure Further Profits for Itself at the Expense of Investors

363. Citi's due diligence reviews were not used to protect investors from defective loans. Rather, Citi forced loan originators to accept lower prices for the loan pools, therefore providing further profit for Citi. According to the September 2010 FCIC testimony of Clayton's former president, D. Keith Johnson, the investment banks would use the exception reports to force a lower price for itself, and not to benefit investors at all:

> I don't think that we added any value to the investor, the end investor . . . to get down to your point. I think only our value was done in negotiating the purchase between the seller and securitizer. Perhaps the securitizer was able to negotiate a lower price, and could maximize their buying but we added no value to the investor and to the rating agencies.

364. Citi continued purchasing bad loans from originators as part of its massive, profit-generating RMBS machine. One profit center was Citi's warehouse lending channel, where it provided "warehouse" lines of credits to lenders who would use these funds to originate loans that Citi would then acquire from the warehouse lender.

365. Because Citi would only be paid back on its warehouse lines of credit if the warehouse lenders monetized the loans they were originating, Citi would acquire these loans from the warehouse lenders and then securitized them so as to monetize the transaction. This incentive structure created a system whereby Citi needed to purchase and securitize the loans it acquired in the warehouse channel in order for it to be repaid on its lines of credit, regardless of the quality of the loans being originated by the warehouse lenders.

366. Citi needed to accept these loans with little or no objection to keep the warehouse channel supplied with capital to pay fees and interest owed on the lines of credit. Citi also wanted to protect its business relationships with the recipients of the warehouse credit lines in order to ensure a steady flow of loans for securitization. In addition, mortgage originators would not maintain a relationship with a bank that consistently kicked out large numbers of loans. As a result, Citi accepted loans from originators in the warehouse channel regardless of the quality of those loans.

367. Citi's position as a source of "warehouse" lines of credit gave it unique knowledge of the conditions under which mortgage loans were originated. The lines of credit allowed Citi to control the origination practices of these lenders and gave Citi an inside look into the true quality of the loans they originated. As one industry publication explained, warehouse lenders like Citi have

"detailed knowledge of the lender's operations." Kevin Connor, *Wall Street and the Making of the Subprime Disaster*, at 11 (Nov. 2007).

e. Citi Willfully Abandoned Prudent Loan Underwriting to Increase Profits and Grow Its Business

368. According to Bowen, Citi engaged in these wrongful practices in order to accomplish Citi management's mandate for increased growth and market share of the its real estate lending segment.

369. CitiMortgage was one of Citi's primary in-house mortgage originators who originated mortgages in the subject Trusts. Beckmann, President and COO of CitiMortgage, told *Mortgage Banking Magazine* in December 2006 that in a single quarter in 2006, CitiMortgage grew from "fifth-largest to third-largest [mortgage banking company] in the rankings," surpassing Chase Home Loans and Washington Mutual. He exclaimed, "We are growing at double-digit growth rates in an industry that is contracting a bit." To accomplish this extraordinary growth in the RMBS market, Citi actively abandoned prudent loan underwriting and due diligence practices.

370. Meanwhile, as Citi pushed for greater volumes of mortgage loans, it "dramatically reduce[d] the number of employees" in the name of efficiency, resulting in what Bowen described as a "challenging underwriting environment."

371. Citi's forsaken loan quality in its aggressive drive for growth is confirmed by the assessment of the Federal Reserve Bank of New York. In its annual report of inspection for 2007 sent to Citi's Board of Directors on April 15, 2008, the Federal Reserve downgraded Citi's performance from satisfactory to fair. Among other criticisms, it found that "senior management at the firm allowed its drive for additional revenue growth to eclipse proper management of risk, while Risk Management failed to serve as an effective check against these decisions."

372. Citi's former CEO Prince admitted his unease with the abandonment of proper underwriting practices.[4] In a memoir, former Treasury Secretary Hank Paulson detailed the account of a dinner party held in June 2007 with several captains of Wall Street, including Jamie Dimon of J.P. Morgan, Lloyd Blankfein of Goldman Sachs and Prince. Paulson wrote: "All were concerned with excessive risk taking in the markets and appalled by the erosion of underwriting standards." But it was Prince who "asked whether, given the competitive pressures, there wasn't a role for regulators to tamp down some of the riskier practices." As the former Treasury secretary put it, "[b]asically, [Prince] asked: 'Isn't there something you can do to order us not to take all of these risks?'"

373. Abandonment of prudent loan underwriting would result in substantial damages to investors once the bubble burst – a bubble that was being fueled by the systemic lack of proper loan underwriting practices. Notwithstanding its awareness of the situation, Citi continued its wrongful loan origination and securitization practices because in the short run there was money to be made. Just prior to the ensuing financial meltdown brought about by these wrongful practices, Prince described Citi's strategy for its leveraged loan business: "When the music stops, in terms of liquidity, things will be complicated. But as long as the music is playing, you've got to get up and dance. We're still dancing." Citi reaped enormous profits applying this cavalier strategy to its structured finance business, including the RMBS that Plaintiffs purchased.

374. For years Citi's securitization "factory" was a boon to the bottom line of many of its different businesses. For example, CMLTI and CMSI, as depositors, received as payment a

---

[4] Citi's CEO Prince received a $38 million severance package following the announcement that Citi's total subprime exposure was $55 billion – $42 billion more than it had told investors just three weeks earlier – and for which Citi would have to post an $8 to $11 billion loss.

percentage of the total dollar amount in the securitized trust offering. CGMI, as underwriter, received a commission based on the amount of Certificates sold to investors. Meanwhile, Citigroup increased its earnings.

375. When the music stopped, however, Citi's wrongful abandonment of prudent loan underwriting caused serious and widespread financial damage to Plaintiffs and other investors. Indeed, Citi's loan underwriting practices were so atrocious and widespread that even Citi itself still held a significant number of bad loans on its books that it had failed to securitize and sell to investors. As a result, Citi itself had to write down $1.6 billion of these bad mortgage loans.

f. Citi Admitted to Underwriting Quality Control Failures in a Settlement with the Government

376. Citi's abandonment of prudent loan underwriting was so widespread and ingrained within its corporate culture that it even engaged in these wrongful practices in connection with underwriting and originating mortgage loans that were insured by the U.S. Department of Housing and Urban Development ("HUD"), even through it owed a fiduciary duty to HUD.

377. The U.S. government brought an action against Citi on behalf of HUD relating to Citi's longstanding practice of failing to conduct proper due diligence in connection with its mortgage loan practices. Thus, the federal government alleged in *United States of America ex rel. Sherry A. Hunt v. Citigroup, Inc., et al.*, No. 11-cv-05473 (S.D.N.Y. Feb. 15, 2012) (Dkt. No. 12), that starting in 2004, when Citi moved its quality control department "in-house," and lasting at least until 2011, Citi failed to conduct adequate reviews of mortgages it had originated that were insured by the Federal Housing Administration ("FHA"), an entity of HUD.

378. In the government's case against Citi, the government allegations drew on the experiences and statements of Sherry A. Hunt, a Citi whistleblower with first-hand knowledge:

> Citi's quality control reports became – and remain – a battleground within Citi, with those in Citi's business production units applying what they describe as 'brute force' to pressure Citi's quality control managers to downgrade their findings. Indeed, Citi's own director of quality control described the business personnel's conduct as 'nothing short of abuse and bordering on fraudulent actions.'

379. That the business production units pressured the quality control department to ignore poorly underwritten loans meant Citi failed to maintain an adequate self-reporting system for fraud or other material underwriting violations, as required by HUD. Thus, as the government alleged, its records showed that "[f]rom 2005 to 2010, Citi failed to report even a ***single loan*** that it had originated or underwritten itself. Instead, in the rare cases where Citi did actually self-report a loan, the loan was always one that Citi had purchased from another lender" (emphasis in original).

380. The U.S. government further alleged that Citi's quality control program failed to prevent reckless lending and pressured quality-control managers to change negative reviews of a poorly underwritten mortgage. In particular, it alleged:

> Since 2004, Citi has endorsed nearly 30,000 mortgages for FHA insurance, totaling more than $4.8 billion in underlying principal obligations. Of those loans, 9,363 (or more than 30% percent [sic]) have defaulted. Citi's default rate soared to more than 47% for loans originated in 2006 and 2007. In other words, nearly every other loan Citi endorsed for FHA insurance in the critical years leading up to the financial crisis defaulted, resulting in foreclosures and evictions and ultimately depressed real estate values, all to the detriment of the national housing market and the national economy. Moreover, of the loans Citi originated in 2007, over 10.5% went into early payment default. HUD has already paid nearly $200 million in insurance claims on loans that Citi originated or underwrote since 2004. A substantial percentage of those claims resulted from loans that were ineligible for FHA insurance and never should have been insured.

381. In February 2012, Citi settled with the government for $158.3 million. As part of the settlement, Citi admitted that during the period January 1, 2004 to the date the settlement was signed, "CitiMortgage failed to comply fully with all HUD-FHA requirements with respect to certain loans" and "CitiMortgage endorsed for FHA mortgage insurance . . . certain loans that did not meet underwriting requirements contained in HUD's handbooks and mortgagee letters, and therefore were

not eligible for FHA mortgage insurance." Citi's admitted underwriting failures in regards to FHA loans are representative of its firm-wide conduct and practice of abandoning prudent loan underwriting.

g. Citi Sought to Profit from Lack of Proper Underwriting by Shorting Related RMBS

382. Citi sought to further profit from its knowledge that mortgage loans it had securitized or packaged into securities were likely to default because they had not been properly underwritten. Based on Citi's inside knowledge of these wrongful practices, it secretly sold short the very same securities it was selling to investors without disclosing it was taking a short position in these investments because it was expected that they would decline in value once the underlying poorly underwritten loans began to go into default.

383. Based on this wrongful conduct, the SEC brought a complaint against Citi on October 19, 2011 which details Citi's practice of creating collateralized debt obligation ("CDO") securities that were backed by residential mortgages, where Citi expected these mortgages to default, and Citi was secretly shorting these securities in order to profit from this undisclosed adverse information. The SEC alleges Citi's "marketing materials failed to disclose to investors that Citigroup had exercised significant influence over the selection of $500 million of the assets in the . . . investment portfolio, and that Citigroup had retained a short position in those assets." By effectively shorting mortgages it knew were poorly underwritten, Citi knowingly stacked the deck in its favor so it could gain hundreds of millions of dollars when the bad mortgages ultimately flopped.

6. Citigroup Global Markets Inc.'s Liability as an Underwriter of the Citi Certificate

384. CGMI made the false and misleading statements alleged above, which were contained in the Prospectus Supplements endorsed and used by CGMI in the sale of certificates to investors.

385. As underwriter, CGMI edited, drafted and controlled the content of the Citi Trusts' Offering Materials, including with respect to the material misstatements and omissions alleged above. In connection with its due diligence conducted in connection with the offering of the Certificates to Plaintiffs, CGMI received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject Trusts. As underwriter, CGMI then used and disseminated these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

386. CGMI, an affiliate of the other Citi Defendants, engaged in the concerted action of issuing RMBS, and had knowledge that Citi, as alleged herein, failed to adhere to underwriting standards when it pooled mortgage loans for its RMBS, including for the Citi Trusts. It also participated in providing distorted information to the rating agencies that was purposefully manipulated to meet the targeted rating. Further, CGMI, knew or was reckless in not knowing, of the defective loans in the Citi Trusts as a result of its due diligence performed as an underwriter for the Citi Trusts. CGMI had access to the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans Citi deposited in the Citi Trusts had a practice of routinely and systematically disregarding the stated underwriting standards.

387. CGMI also knew that mortgage loans deposited into the Citi Trusts were not properly underwritten because CGMI was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to Citi's corporate-wide abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged herein. In addition to the Citi Trusts, CGMI underwrote and sold many other Citi RMBS to investors and had in that context gained inside knowledge of the poor quality loan underwriting.

7. UBS's Liability as an Underwriter of the Citi Certificate

388. UBS Securities was also a maker of the false and misleading statements alleged above regarding the CMSI 2007-5 Trust, which were contained in the Prospectus Supplement endorsed and used by UBS Securities in the sale of certificates to Union Central.

389. As underwriter, UBS Securities edited, drafted and controlled the content of the CMSI 2007-5 Trust Offering Materials, including with respect to the material misstatements and omissions alleged above in §V.B. In connection with its due diligence on the offering of the Certificates sold to Plaintiffs, UBS Securities received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject Trusts. As underwriter, UBS Securities then used and disseminated these false and misleading Offering Materials to plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

390. UBS Securities also knew that mortgage loans deposited into the CMSI 2007-5 Trust were not properly underwritten because UBS Securities was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged in Section V.G. In addition to the CMSI 2007-5 Trust, UBS Securities underwrote and sold many other defective RMBS to investors, as Plaintiffs allege below, and had in that context gained inside knowledge of the poor quality loan underwriting used in connection with the CMSI 2007-5 Trust.

C. Goldman Sachs

1. Goldman's Securitizations

391. Union Central purchased Certificates sponsored by Goldman Sachs on February 27, 2007. Union Central made the following two purchases representing a total investment of approximately $11 million:

CUSIP	Description	Issuing Entity	Issue Date	Purchase Date
36298NBZ6	GSR 2006-7F M1	GSR Mortgage Loan Trust 2006-7F	7/1/2006	02/27/2007
3622X7AU0	GSR 2006-9F M1	GSR Mortgage Loan Trust 2006-9F	10/1/2006	02/27/2007

392. GSR Mortgage Loan Trust 2006-9F was a $1.31 billion deal comprising 2,539 purportedly fixed-rate mortgages with either 30-year or 15-year terms. GSR Mortgage Loan Trust 2006-7F was a $606.9 million deal comprising 983 purportedly fixed-rate mortgages with primarily 30-year terms.

2. False and Misleading Statements in Goldman's Offering Materials

a. False and Misleading Statements About Compliance With Underwriting Standards

393. As sponsor of the securitizations, Goldman either originated the underlying mortgages through its Conduit Program, or purchased the underlying mortgage loans from other originators, primarily Bank of America, Countywide, National City, SunTrust Mortgage and Washington Mutual. The Offering Materials represented that each of the loan sellers applied underwriting standards which were designed to ensure that borrowers could repay their loans.

(1) Bank of America

394. The Goldman Offering Materials described the underwriting guidelines BofA used to originate the loans that it sold to the trust. According to the Offering Materials, all origination

channels required borrowers to provide sufficient information to allow Bank of America to evaluate the capacity of the borrower to repay the loan and the adequacy of the collateral:

> Regardless of the channel in which the loan was originated, a mortgage application is completed containing information that assists in evaluating the mortgagor's credit standing, capacity to repay the loan and adequacy of the mortgaged property as collateral for the loan.
>
> * * *
>
> Each mortgage loan underwritten to Bank of America's general underwriting standards is underwritten in accordance with guidelines established in Bank of America's Product and Policy Guides (the "Product Guides"). These underwriting standards applied by Bank of America in originating or acquiring mortgage loans are intended to evaluate the applicants' repayment ability, credit standing, and the adequacy of the mortgage property as collateral for the mortgage loan. The underwriting standards as established in the Product Guides are continuously updated to reflect prevailing conditions in the residential market, new mortgage products, and the investment market for residential mortgage loans.

(2) Countrywide

395. The Goldman Offering Materials described the underwriting guidelines Countrywide used to originate the loans that it sold to the trust. According to the Offering Materials, Countrywide's loan underwriting was designed to evaluate the capacity of the borrower to repay the loan and the adequacy of the collateral:

> Countrywide Home Loans' underwriting standards are applied by or on behalf of Countrywide Home Loans to evaluate the prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral.

(3) National City

396. The Goldman Offering Materials described the underwriting guidelines National City used to originate the loans that it sold to the trust. According to the Offering Materials, National City's loan underwriting was designed to evaluate the capacity of the borrower to repay the loan and the adequacy of the collateral:

> National City's underwriting standards are applied to evaluate the prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral.

397. The Goldman Offering Materials also described policies, procedures, and quality control programs in place at the bank to ensure compliance with National City's underwriting and other standards:

> National City Mortgage utilizes comprehensive, detailed policies and procedures available to all employees through the company's Intranet. These policies and procedures consist of operations policies and procedures manuals, underwriting manuals, product guidelines, the index of credit policy statements and the company's responsible lending policy.
>
> Corporate asset quality measures including statistical audits, targeted reviews, investor audits, quality and compliance reviews for branches with higher defect rates and production action plans are applied across the organization.

(4) SunTrust Mortgage

398. The Goldman Offering Materials described the underwriting guidelines which SunTrust Mortgage used to originate the loans that it sold to the trust. According to the Offering Materials, SunTrust Mortgage's loan underwriting was designed to evaluate the capacity of the borrower to repay the loan and the adequacy of the collateral:

> SunTrust underwriting guidelines generally follow standard Fannie Mae guidelines. They are designed to evaluate the borrower's capacity to repay the loan, to evaluate the credit history of the borrower, to verify the availability of funds required for closing and cash reserves for fully documented loans, and to evaluate the acceptability and marketability of the property to be used as collateral.

(5) Washington Mutual

399. The Goldman Offering Materials described the underwriting guidelines which Washington Mutual used to originate the loans that it sold to the trust. According to the Offering Materials, Washington Mutual's loan underwriting was designed to evaluate the capacity of the borrower to repay the loan and the adequacy of the collateral:

> WaMu's underwriting guidelines generally are intended to evaluate the prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral.

(6) Statements Regarding Goldman's Review of Underwriting Standards

400. Goldman assured investors that it was an active and experienced securitization sponsor who since 2001 had successfully sponsored the securitization of approximately $130 billion of residential mortgage loans with various risk profiles.

401. The Offering Materials stated that Goldman had conducted a thorough review of these loan sellers prior to acquiring any mortgage loans:

> Prior to acquiring any mortgage loans, GSMC will conduct a review of the related mortgage loan seller. GSMC's review process consists of reviewing select financial information for credit and risk assessment and underwriting guideline review, senior level management discussion and background checks. The scope of the loan due diligence will depend on the credit quality of the mortgage loans.

402. In addition, Goldman represented that it reviewed the adequacy of the loan seller's underwriting guidelines, including its mortgage loan origination processes, systems and quality control procedures:

> The underwriting guideline review considers mortgage loan origination processes and systems. In addition, such review considers corporate policy and procedures relating to the [Home Owner's Equity Protection Act] and state and federal predatory lending, origination practices by jurisdiction, historical loan level loss experience, quality control practices, significant litigation and material investors.

b. False and Misleading Statements About Appraisals and LTV Ratios

403. The Goldman Offering Materials represented that the underlying mortgaged properties would provide adequate security for the mortgage loans, based in part on the appraised value of the properties securing the mortgage loans underlying the Certificates. The adequacy of the mortgaged properties as security for repayment of the loans will have generally been determined by appraisals, conducted in accordance with pre-established guidelines.

404. Each securing property was to be appraised by a qualified, independent appraiser, and each appraisal was required to satisfy applicable government regulations and be on forms acceptable to Fannie Mae and Freddie Mac. As required by Fannie Mae and Freddie Mac, and as represented

by the underwriting standards set forth in certain of the Prospectus Supplements, the appraisals were to be in conformity with the USPAP, as adopted by the Appraisal Standards Board of the Appraisal Foundation. The Registration Statements expressly stated that "All appraisals [must] conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation."

405. As represented in the Goldman Offering Materials, the LTV ratio of a mortgage loan at any time is the fraction, expressed as a percentage, the numerator of which is the outstanding principal balance of the mortgage loan and the denominator of which is the collateral value of the related mortgaged property. The collateral value of a mortgage property, other than with respect to housing contracts and certain mortgage loans the proceeds of which are used to refinance an existing loan, is the lesser of: (a) the appraised value determined in an appraisal obtained by the originator at origination of such loan; or (b) the sales price for such property.

406. The Goldman Prospectus Supplements also provided information regarding the weighted average LTV ratio of the loans underlying the Certificates. The 2006-9F Prospectus Supplement stated that the weighted average original LTV ratio for all mortgage loans was 70.41%. The 2006-7F Prospectus Supplement stated that the weighted average original LTV ratio for all mortgage loans was 73%.

c. False and Misleading Statements About Debt-to-Income Ratios

407. The Goldman Offering Materials contained numerous statements regarding the evaluation of DTI ratios for the borrowers whose loans populated the trusts. Absent compensating factors, the Offering Materials described the manner in which the loan originators evaluated DTI ratios for borrowers.

408. For example, with respect to both Goldman Trusts, the Offering Materials described Countrywide's practices as follows:

> [A] prospective borrower must generally demonstrate that the ratio of the borrower's monthly housing expenses (including principal and interest on the proposed mortgage loan and, as applicable, the related monthly portion of property taxes, hazard insurance and mortgage insurance) to the borrower's monthly gross income and the ratio of total monthly debt to the monthly gross income (the "debt-to-income" ratios) are within acceptable limits.
>
> * * *
>
> Under its underwriting guidelines, Countrywide Home Loans generally permits a debt-to-income ratio based on the borrower's monthly housing expenses of up to 33% and a debt-to-income ratio based on the borrower's total monthly debt of up to 38%.

409. The Goldman Offering Materials described Bank of America's practices as follows:

> As part of the underwriting evaluation, the applicant's "Debt-to-Income Ratio" is calculated as the amount of the monthly debt obligations (including the proposed new housing payment and related expenses such as property taxes and hazard insurance) to his or her gross monthly income. Bank of America's Debt-to-Income Ratio guidelines are based on the loan instrument, loan term, Credit Score, loan-to-value ratio, property type, and occupancy characteristics of the subject loan transaction.

410. The Goldman Offering Materials described Washington Mutual's practices as follows:

> In evaluating a prospective borrower's ability to repay a mortgage loan, the loan underwriter considers the ratio of the borrower's mortgage payments, real property taxes and other monthly housing expenses to the borrower's gross income (referred to as the "housing-to-income ratio" or "front end ratio"), and the ratio of the borrower's total monthly debt (including non-housing expenses) to the borrower's gross income (referred to as the "debt-to-income ratio" or "back end ratio").

411. The DTI ratios were a material part of the underwriting process, and specific DTI ratios for the loans underlying the Goldman Certificates were set forth in their Offering Materials.

d. False and Misleading Statements About Owner-Occupancy

412. The Offering Materials contained specific disclosures about the occupancy-rate status of the loans underlying the Certificates.

413. The Series 2006-7F Offering Materials stated that 912 out of the 983 loans, or 92.7% of the aggregate principal balance of the mortgage loans, were for owner-occupied properties. The remaining 71 loans were purportedly for second homes. No loans were described being for investment properties.

414. The Series 2006-9F Offering Materials stated that 2,136 out of the 2,359 loans, or 90.93% of the aggregate principal balance of the mortgage loans, were for owner-occupied properties. 171 of the remaining loans were for second homes and 52 were for investment.

e. False and Misleading Statements About Ratings

415. The Offering Materials for both Trusts stated that the issuance of the Certificates was conditioned on obtaining the ratings as set forth in the Prospectus Supplement. Further, the ratings reflected the likelihood that investors would receive the distributions to which they were entitled:

> It is a condition to the issuance of the securities of each series offered by this prospectus and by the related prospectus supplement that the nationally recognized statistical rating agency or agencies specified in the prospectus supplement shall have rated the securities in one of the four highest rating categories.
>
> Ratings on mortgage-backed securities address the likelihood of receipt by securityholders of all distributions on the underlying mortgage loans or other assets. These ratings address the structural, legal and issuer-related aspects associated with such securities, the nature of the underlying mortgage loans or other assets and the credit quality of the guarantor, if any.

416. The Offerings Materials also set forth the specific ratings for the Certificates purchased by Union Central. Both certificates were rated AA+ by Fitch.

417. In obtaining these ratings for the subject Certificates, Goldman concealed the adverse information alleged herein from the rating agencies. Had the rating agencies known the true value of

the loans underlying the Certificates, the Certificates would have been rated significantly lower, or not at all.

3. Goldman's Statements Were Knowingly False and Misleading

418. Goldman knew, or was reckless in not knowing, that the statements identified above were materially false and misleading and/or omitted material facts necessary to make the statements made not misleading. As set forth herein, the Goldman Defendants had actual knowledge that the stated underwriting guidelines were not being adhered to and, rather than provide truthful information and disclosures to Union Central and other investors, it used that knowledge to reap massive profits for itself by betting against the very home mortgage securities Goldman was selling to investors.

a. Goldman Knew that Underwriting Standards Had Been Abandoned

419. While the Offering Materials set forth detailed underwriting guidelines which were supposed to have been used to evaluate borrowers, the value of the underlying property and whether to make the loans, in fact the stated underwriting guidelines had been abandoned by the loan originators.

420. The originators abandoned the fundamental principle that underwriting was supposed to meaningfully evaluate the borrowers' ability to repay the debt, and the lender and/or investors' ability to recover against the pledged collateral in the event of a default. Instead, the originators, using Goldman's own financing and encouraged by Goldman and other investment banks' insatiable appetite for acquiring loans regardless of their quality, approved loans which they knew were based on falsified information and which did not comply with any of the stated underwriting guidelines.

421. Countrywide had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to Goldman for inclusion in the subject Trusts, as alleged above at §IV.I.2.

422. Washington Mutual had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to Goldman for inclusion in the subject Trusts, as alleged above at §V.A.

423. SunTrust had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to Goldman for inclusion in the subject Trusts, as alleged at §V.G.5.

424. National City had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to Goldman for inclusion in the subject Trusts, as alleged above at §IV.I.10.

425. Other parties who have had access to the actual loan files in Goldman loan securitization from the relevant time period have confirmed that improperly underwritten loans were routinely securitized by Goldman during this period. A review of Goldman origination standards in connection with a similar 2007 home equity trust, issued by Goldman around the same time as those sold to Plaintiffs in this case, reflects Goldman's wrongful practice of including loans in securitizations regardless of whether they met the required quality levels that would have been maintained if originators had used proper loan underwriting practices. In 2011, CIFG Assurance North America, Inc. sued Goldman for fraud and breach of contract. *CIFG Assurance N.Am. v. Goldman, Sachs & Co.*, Index No. 652286/2011 (Sup. Ct. N.Y. Aug. 16, 2011) (Dkt. No. 1-1). Generally, CIFG alleges that Goldman made numerous false and misleading statements in connection with an RMBS for which CIFG provides insurance. CIFG hired an outside consultant to conduct an analysis of 491 non-performing loans within the loan portfolio. The consultant

determined that approximately 80% of the loans in the sample "did not comply with [Goldman's] representations and warranties."

(1) Skyrocketing Default Rates Are Evidence of Abandonment of Underwriting Standards

426. The Certificates purchased by Union Central were supposed to be stable, long-term investments backed by investment-grade credit ratings. However, the extraordinary number of defaults on the mortgage loans underlying Union Central's Certificates is prima facie evidence that the stated underwriting standards and loan characteristics represented in the Offering Materials were materially false and misleading.

427. The following chart sets forth the delinquency, bankruptcy or foreclosure amounts, as well as collateral cumulative losses, for the Certificates purchased by Union Central as of June 2010:

Certificate	Original Deal Size	Delinquent, Bankruptcy Foreclosure, REO Actual Bal.	Collateral Cumulative Losses
2006-7F	$609,955,387	$84,657,748	$6,429,957
2006-9F	$1,397,058,850	$115,003,783	$10,713,540

428. Had the loans been issued in accordance with the stated underwriting guidelines, and had the loans in fact had the characteristics described in the Offering Materials, the rate of delinquency, bankruptcy and foreclosure would be far lower than the current rates. Indeed, Moody's maximum expected collateral losses for the life of the GSR 2006-7F Certificate was only $2.44 million. Moody's maximum expected collateral losses for the life of the GSR 2006-9F Certificate was $5.52 million.

(2) Appraisals and LTV Ratios Were Inflated

429. The descriptions of appraisal standards, as well as the LTV ratios derived from such appraisals, were materially false and misleading. Undisclosed in the Offering Materials, and in

violation of any legitimate appraisal standards, many of the loans underlying the Certificates had been approved through the use of manipulated appraisals that guaranteed that the collateral property would be valued at a price sufficient to support the loan. Such practices have been confirmed through modeling by other parties who experienced similar Goldman RMBS issued in the same time period as Plaintiffs, and it demonstrates that appraisals used in connection with Goldman securitizations in 2006 were routinely inflated.

430. For instance, the plaintiffs in *Allstate Ins. Co. v. Goldman, Sachs & Co., et al.*, Index No. 652273/2011 (Sup. Ct. N.Y. Aug. 15, 2011), conducted an AVM analysis of a sample of the property underlying the Goldman offerings at issue in that litigation. *Allstate v. Goldman* Complaint (Dkt. No. 1), ¶¶100-111. The *Allstate v. Goldman* plaintiffs' analysis demonstrates that the valuation of the loans underlying the certificates were materially and consistently inflated, and therefore that the stated LTV ratios were materially overstated, which in turn greatly increased the risk of default for the loans underlying the certificates. For example, the loan pools at issue in that case, *i.e.*, GSAA 2006-13, GSAMP 2006-HE7 and GSAMP 2006-HE5, were issued around the same time as those sold to plaintiffs and they similarly contained false representations regarding the loans' LTV ratios. Specifically, the GSAA 2006-13, GSAMP 2006-HE7 and GSAMP 2006-HE5 trusts were represented to have weighted average LTV ratios of 74%, 77% and 80.5% respectively. However, the *Allstate v. Goldman* plaintiffs' analysis showed the actual weighted average LTV ratios were significantly higher at 82%, 89% and 88.3% respectively.

431. Similarly, while none of the certificates where supposed to contain loans that had a LTV ratio over 100%, the *Allstate v. Goldman* plaintiffs' analysis found that a significant number of loans had LTV ratios of over 100% – in other words, the value of the loan was more than the value of the property. With respect to the GSAA 2006-13, GSAMP 2006-HE7 and GSAMP 2006-HE5

certificates, the *Allstate v. Goldman* plaintiffs found LTV ratios greater than 100% in 7.6%, 24.6%, 20.6% of the loans in those respective trusts.

432. Consistent with *Allstate v. Goldman*'s analysis showing Goldman Defendants routine practice of securitizing loans with misstated LTV ratios, the FHFA performed a similar review to determine if the LTV ratios disclosed in the forty Goldman securitizations at issue in its case against Goldman were accurate. *FHFA v. Goldman Sachs & Co., et al.*, No. 11-CV-6198 (S.D.N.Y. Sept. 2, 2011). The FHFA found that for every securitization they analyzed, the percentage of loans having LTV ratios 80% or less was overstated. Further, the percentage of loans having LTV's of over 100% ranged from 2% to as high as 23%. *FHFA v. Goldman* Complaint (Dkt. No. 1), ¶¶113-118

433. As alleged above, Goldman had inside knowledge regarding the lack of proper underwriting practices, including that its loan originators used flawed appraisals that overstated property values in order to meet the targeted loan amount regardless of true valuation considerations.

434. Many of the loans in the subject Trusts had overstated property valuations, thereby decreasing stated LTV ratios, as a result of the manipulation of the appraisals conducted on the underlying properties. Instead of conducting appraisals designed to accurately value the subject property in compliance with the USPAP, Goldman accepted appraisals conducted on the underlying properties that, if they were conducted at all, were designed to hit valuation targets to allow loans to be funded and sold in RMBS.

(3) Debt-to-Income Ratios Were Falsified

435. The statements contained in the Offering Materials regarding the acceptability and evaluation of DTI ratios, as well as many of the specific DTI ratios disclosed, were materially false and misleading. In fact, Goldman and the originators knew that borrowers routinely falsified their stated incomes in order to have loans approved.

436. In the case of stated income loans, for example, Goldman and the originators knew that many borrowers claimed incomes that did not come anywhere near a reasonable level for their stated occupations.

437. Plaintiffs have examined certain of the loans contained in the 2007-7F and 2006-9F Trusts and found numerous examples of loans where DTI ratios were falsified and where obvious signs of fraud or misrepresentations were either accepted or ignored.

438. The 2006-7F Trust included a $560,000 loan to refinance a primary residence in Modys, Maryland in May 2006. Prior to the refinancing, the borrower had competed three cash-out transactions in 2001, 2003 and then 2004. While the 2006-7F securitization reported a DTI ratio for this borrower of 38%, the borrower's DTI was in fact no less than 142%.

439. The 2006-7F Trust included a $617,250 loan for a primary residence in Aledo, Texas in May 2006. The property in question was disclosed as being a primary residence, in spite of the fact that the borrower had purchased two separate properties in the three months prior to Aledo property and obtained loans for over $1 million for the two prior properties. Public records indicate that the borrower was a 23-year old with a high school education residing in Maryland. All three properties had early payment defaults and had to be sold in foreclosure.

440. The 2006-7F Trust included a $700,000 loan for a cash-out refinance on a primary residence in Santa Clarita, California in May 2006. The 2006 cash-out refinance was the third cash-our transaction completed by the borrowers since 2002. The refinancings appear to have been attempts to prop up a failing business which reported losses of over $125,000 in 2006, the year that the loan was originated. Given the borrowers' negative income, their DTI ratio would have been infinite.

(4) Owner-Occupancy Rates Were Falsified

441. In addition to the examples above relating to Goldman's misrepresentations regarding the owner-occupancy rates of subject properties underlying the Trusts, the *Allstate v. Goldman* plaintiffs' loan-level analysis of thousands of loans securitized by Goldman at the same time as the loan securitizations at issue here, further reveals Goldman's widespread practice of including loans in its securitizations without accurately disclosing the true owner-occupancy rates with respect to the underlying loans.

442. The *Allstate v. Goldman* plaintiffs undertook a sophisticated analysis to determine whether a given borrower actually occupied the property as claimed. *Allstate v. Goldman* Complaint, ¶¶90-99. For each offering, the *Allstate v. Goldman* plaintiffs "analyzed between 1,444 and 1,600 randomly-selected loans from within the collateral pool." They then analyzed tax records, credit records, bills, property records and lien records, to determine whether a borrower was actually living in the property subject to the loan.

443. The results of the *Allstate v. Goldman* plaintiffs' analysis demonstrates that the percentage of owner-occupied properties disclosed by Goldman in their prospectuses was consistently false and that the true rate was much lower. The following chart shows the results of their analysis:

Certificate	% Represented in Prospectus	Actual %	Overstatement
GSAMP 2006-HE7	91.9%	82.2%	9.7%
GSAMP 2006-HE5	92.2%	82.1%	10.1%
GSAMP 2006-S4	88.0%	75.3%	12.7%
GSAMP 2006-S3	94.0%	81.6%	12.4%
GSAA 2006-13	77.8%	69.5%	8.3%

444. In addition to *Allstate*, Goldman has been sued by the FHFA. *FHFA v. Goldman*, No. 11-CV-6198 (S.D.N.Y.).

445. The FHFA performed a similar analysis to determine whether the owner-occupancy rates disclosed in the Prospectuses for the forty Goldman securitizations at issue there were accurate. According to the FHFA's review, most of the Goldman securitizations understated the percentage of owner-occupied properties by approximately 8%-12%.

b. Goldman Knew that Underwriting Standards Were Being Abandoned

446. Goldman had actual knowledge that the loans it securitized in the Trusts sold to Union Central did not comply with the stated underwriting guidelines contained in the Offering Materials, and that the quantitative and qualitative data contained in the Offering Materials was materially false and misleading. Indeed, Goldman utilized this knowledge to profit from the defective loans it securitized by taking short positions on securities sold to its clients, and by pocketing discounts on defective loans sold by the very originators whose operations Goldman sustained through its warehouse funding.

(1) Goldman Had Actual Knowledge of the Defective Loans They Were Securitizing

447. Documents recently released by Clayton confirm that there were rampant underwriting violations in the loan pools contained in the Goldman Certificates. As the FCIC described, in the internal Clayton "Trending Report" made public by the government in conjunction with testimony given in September 2010, Goldman Sachs received regular reports regarding defective loans, and 23% of the loans Clayton reviewed for Goldman "failed to meet guidelines." These loans were not subject to any proper "exceptions," as they did not have any "compensating factors." Rather, these loans were plainly defective.

448. Despite such a high level of nonconforming loans, Goldman nevertheless continued utilizing, and indeed funding, the same originators who had supplied these defective loans for Goldman's securitizations and it "waived in" to its pools 29% of those toxic loans that Clayton had identified as being outside the guidelines. These baseless waivers were never disclosed to Union Central or any of the investors who purchased Goldman certificates.

449. Clayton's data demonstrates that underwriting guidelines were being routinely violated, and that Goldman was informed of such violations. Indeed, Goldman conducted due diligence on all the originators from whom it purchased loans, and for loans included in the offerings, to determine whether there was compliance with the approved underwriting guidelines. The results of these reviews confirmed that the loan originators were routinely violating the stated underwriting standards and that a large number of the loans Goldman securitized did not comply with the stated underwriting standards.

450. The Offering Materials stated that Goldman conducted due diligence on the lenders who originated the loans, and reviewed their underwriting standards:

> Prior to acquiring any mortgage loans, GSMC will conduct a review of the related mortgage loan seller. GSMC's review process consists of reviewing select financial information for credit and risk assessment and underwriting guideline review, senior level management discussion and background checks. The scope of the loan due diligence will depend on the credit quality of the mortgage loans.

451. In addition, the Offering Materials represented that Goldman reviewed the adequacy of the loan seller's underwriting guidelines, including its mortgage loan origination processes, systems and quality control procedures:

> The underwriting guideline review considers mortgage loan origination processes and systems. In addition, such review considers corporate policy and procedures relating to HOEPA and state and federal predatory lending, origination practices by jurisdiction, historical loan level loss experience, quality control practices, significant litigation and material investors.

452. The Offering Materials also stated that Goldman would re-underwrite sample pools of the loans it purchased to determine whether they were originated in compliance with applicable underwriting guidelines. For example, in both Prospectus Supplements, Goldman explained that it had the option to re-underwrite a sample of the RMBS loan pool:

> We may, in connection with the acquisition of mortgage loans, re-underwrite the mortgage loans based upon criteria we believe are appropriate depending to some extent on our or our affiliates' prior experience with the lender and the servicer, as well as our prior experience with a particular type of loan or with loans relating to mortgaged properties in a particular geographical region. A standard approach to re-underwriting will be to compare loan file information and information that is represented to us on a tape with respect to a percentage of the mortgage loans we deem appropriate in the circumstances.

453. The Senate PSI Report confirms that Goldman routinely conducted due diligence on the mortgage loan pools that it purchased and securitized. Specifically, it noted: "Goldman, either directly or through a third party due diligence firm, routinely conducted due diligence review of the mortgage loan pools it bought from lenders or third party brokers for use in its securitizations." These reviews revealed to Goldman that its loan originators Countrywide, Washington Mutual, SunTrust and others had abandoned prudent loan underwriting practices.

(2) Goldman Used Its Knowledge of Defective Loans to Secure Further Profits for Itself at the Expense of Investors

454. Goldman did not use its due diligence reviews to protect investors from defective loans. Rather, Goldman used its knowledge that loans in its securitization were of extremely poor quality due to the lack of proper underwriting to force loan originators to accept lower prices for the loan pools, thereby providing itself even greater profits when it sold the defective loan pools to investors such as Plaintiffs. According to the September 2010 FCIC testimony of Clayton's former president, D. Keith Johnson, the investment banks would use the exception reports to force a lower price for itself, and not to benefit investors at all:

> I don't think that we added any value to the investor, the end investor . . . [t]o get down to your point. . . . I think only our value was done in negotiating the purchase between the seller and securitizer. Perhaps the securitizer was able to negotiate a lower price, and could maximize their buying but we added no value to the investor and to the rating agencies.

FCIC Staff Int'v with D. Keith Johnson, Clayton Holdings, LLC (Sept. 2, 2010), *available at* http://fcic.law.stanford.edu/resource/interviews; *see also* Senate PSI Report at 484 n.2036 ("Goldman or a third party due diligence firm it hired typically examined a sample of the loans. Based on the number of problem loans found in the sample, Goldman or the due diligence firm extrapolated the total percentage of problem loans likely to be contained in the pool. This information was then factored into the price Goldman paid for the pool.").

455. Despite the large number of defective loans Goldman knew were being produced by its originators, Goldman continued purchasing loans from such originators as part of its massive RMBS machine that generated records profits for Goldman. Indeed, Goldman provided "warehouse" lines of credits to many originators which were used to fund the defective loans which were ultimately sold to Goldman. Such warehouse loans were repaid when the originator's loan pool was sold to Goldman for securitization. As the FCIC discussed:

> Under Paulson's leadership, Goldman Sachs had played a central role in the creation and sale of mortgage securities. From 2004 through 2006, the company provided billions of dollars in loans to mortgage lenders; most went to the subprime lenders Ameriquest, Long Beach, Fremont, New Century, and Countrywide through warehouse lines of credit, often in the form of repos. During the same period, Goldman acquired $53 billion of loans from these and other subprime loan originators, which it securitized and sold to investors.

456. Goldman's position as a source of "warehouse" lines of credit gave it unique knowledge of the conditions under which mortgage loans were originated. The lines of credit allowed Goldman to control the origination practices of these lenders and gave Goldman an inside look into the true quality of the loans they originated. As one industry publication explained,

warehouse lenders like Goldman have "detailed knowledge of the lender's operations." Kevin Connor, *Wall Street and the Making of the Subprime Disaster*, at 11 (Nov. 2007).

457. Such warehouse lines gave Goldman the inside knowledge regarding the loans that were generated using Goldman funds. Because of its financial arrangements with warehouse lenders, Goldman was incentivized to buying the loans that secured its warehouse lines regardless of their quality and the results of Goldman's due diligence. Indeed, Goldman needed to purchase the loans with little or no objection to keep the lenders supplied with capital to pay fees and interest owed on the lines of credit. It was also important to Goldman that it protect its business relationships with warehouse lenders in order to ensure a steady flow of loans for securitization.

458. According to a former Goldman Sachs Client Relationship Manager, who from 2005 to 2008 served as a liaison between Goldman personnel who bought loans for securitization and the loan originators, Goldman freely purchased loans for securitization that they knew were "bad loans." According to this former employee, Goldman did so because they knew they would be able to pass the risk of default or non-payment to the buyers of the certificates, thereby making a profit while avoiding the risk.

(3) Goldman Shorted the Very RMBS It Was Selling to Its Clients

459. Goldman's scienter is also demonstrated by the way in which it treated the financial products it sold to investors such as Union Central. The FCIC Report found that Goldman used a variety of pejorative terms to describe the products it sold to its customers, including characterizing certain deals as "junk," "dogs," "big old lemons," and "monstrosities." Indeed, putting its money where its mouth was, Goldman began an aggressive campaign to profit from the failure of the toxic RMBS it sold to investors such as Union Central.

460. In 2006, Goldman began to take an increasingly negative view of the housing market. Goldman's sophisticated and powerful proprietary models analyzed trends in the performance of hundreds of thousands of mortgages that collateralized its RMBS, and those models and the superior access to data regarding the underlying mortgage positions on its books gave Goldman unique knowledge that those securities were not as safe as their offering materials and ratings represented to investors. In fact, Goldman's models and data showed that the RMBS [would] decline up to 70 percent from their face amounts. In his book, *Money and Power: How Goldman Sachs Came to Rule the World,* 494-95 (2011) William D. Cohan explained:

> [Goldman's RMBS] model could analyze all the underlying mortgages and value the cash flows, as well as what would happen if interest rates changed, if prepayments were made, or if the mortgages were refinanced. The model could also spit out a valuation if defaults suddenly spiked upward . . . . [Goldman's] proprietary model was telling [Goldman] that it would not take much to wipe out the value of tranches of a mortgage-backed security that had previously looked very safe, at least in the estimation of the credit-rating agencies that had been paid (by Wall Street) to rate them investment grade. . . . By tweaking the various assumptions based on events that seemed increasingly likely, [Goldman's] models were showing a marked decrease in the value of mortgage-related securities. "[Goldman's] models said even if you don't believe housing prices are going to go down, even if we apply low-probability scenarios about it going negative . . . there's no way this stuff can be worth anywhere near one hundred [cents on the dollar]". . . . [Goldman's] models had them pegged anywhere between 30 cents and 70 cents.

461. According to a former Goldman employee, these models as well as other information in Goldman's exclusive possession showed "the writing on the wall in this market as early as 2005," Gretchen Morgenson & Louise Story, "Banks Bundled Bad Debt, Bet Against It and Won," *N.Y. Times*, Dec. 24, 2009, and into the "the early summer of 2006," Senate PSI Report at 398. Goldman exploited its asymmetric access to, and possession of, information about the weakness in the mortgage loans collateralizing the Certificates it marketed and sold.

462. To reduce its massive financial exposure to the subprime mortgage market, Goldman began looking for ways to short the market (*i.e.*, to make investments which would rise in value

and/or make payments to Goldman as the subprime mortgage market declined). Its shorting strategies included the purchase of credit default swap protection on the very RMBS positions it sold into the market. Goldman bet that the RMBS would decline in value and/or default, thereby requiring its swap counterparty to pay Goldman.

463. As a recent magazine article explained, "Goldman was like a car dealership that realized it had a whole lot full of cars with faulty brakes. Instead of announcing a recall, it surged ahead with a two-fold plan to make a fortune: first, by dumping the dangerous products on other people, and second, by taking out life insurance against the fools who bought the deadly cars." Matt Taibbi, "The People vs. Goldman Sachs, *Rolling Stone*, May 26, 2011, *available at* http://www.rollingstone.com/politics/news/the-people-vs-goldman-sachs-20110511.

464. As the Senate PSI Report explained, throughout 2006 and 2007, Goldman used its shorting strategy as a way to reduce its own mortgage risk while continuing to create and sell mortgage-related products to its clients. In 2006, Goldman made a massive $9 billion bet that a similar mortgage-backed asset it sold to investors like Union Central would collapse. Senate PSI Report at 419. The $9 billion short bet was placed in 2006 by Goldman's mortgage department. Goldman's net short position in 2007 rose as high as $13.9 billion. *Id.* at 430. Goldman "sold RMBS and CDO securities to its clients without disclosing its own net short position against the subprime market or its purchase of CDS contracts to gain from the loss in value of some of the very securities it was selling to its client."

465. For example, on March 9, 2007, Goldman's Sparks wrote: "Our current largest needs are to execute and sell our new issues – CDOs and RMBS – and to sell our other cash trading positions. . . . I can't overstate the importance to the business of selling these positions and new issues." A leading structured finance expert reportedly called Goldman's practice "the most cynical

use of credit information that I have ever seen," and compared it to "buying fire insurance on someone else's house and then committing arson." FCIC Report; Senate PSI Report. As the Senate PSI found and stated in their Report, Goldman "sold RMBS securities to customers at the same time it was shorting the securities and essentially betting that they would lose value."

466. According to the FCIC Report, Goldman's mortgage business earned a record $266 million in the first quarter of 2007, "driven primarily by short positions, including a $10 billion short position on the bellwether ABX BBB index, whose drop the previous November had been the red flag that got Goldman's attention."

(4) Government Investigation

467. Goldman has been the subject of numerous criminal and regulatory probes related to its mortgage securitization and securities underwriting practices. *See* Susan Pulliam, Kara Scannell, Aaron Lucchetti, Serena Ng, "Wall Street Probe Widens," *Wall St. J.*, May 13, 2010 at A1 (reporting on federal criminal and regulatory investigations of whether Goldman and others "misled investors about their roles in mortgage-bond deals"). These investigations further confirm that Goldman's misrepresentations were not mere isolated, innocent mistakes, but the result of the company's widespread corporate practices and policies that amounted to reckless or intentional misconduct.

468. For example, Goldman's misconduct prompted the Attorney General of Massachusetts to examine whether Goldman:

- failed to ascertain whether loans purchased from originators complied with the originators' stated underwriting guidelines;
- failed to take sufficient steps to avoid placing problem loans into securitization pools;
- failed to correct inaccurate information in securitization trustee reports concerning repurchases of loans; and
- failed to make available to potential investors certain information concerning allegedly unfair or problem loans, including information obtained during loan due

diligence and the pre-securitization process, as well as information concerning Goldman Sachs' practices in making repurchase claims relating to loans in and out of securitizations.

469. Goldman settled with the Commonwealth of Massachusetts, paying it $60 million. In announcing the settlement, the Massachusetts Attorney General stated that Goldman did not take "sufficient steps to avoid placing problem loans in securitization pools." Goldman was also required to forgive all or portions of the balances on many loans it had bought and securitized, which resulted in tens of millions of dollars in additional expenses to Goldman for its wrongful practices.

470. Similarly, the Senate PSI Report concluded that Goldman "knowingly sold high risk, poor quality mortgage products to clients around the world, saturating financial markets with complex, financially engineered instruments that magnified risk and losses when their underlying assets began to fail." The Senate PSI Report also found: "Goldman originated and sold RMBS securities that it knew had poor quality loans that were likely to incur abnormally high rates of default."

471. On September 1, 2011, the Federal Reserve Board sanctioned Goldman Sachs for "a pattern of misconduct relating to deficient practices" in its former mortgage unit, Litton Loan Servicing LP. ("Litton"), including those involving "robo-signing" – a practice often necessitated by the failure to execute and transfer loan documents when depositing loans in RMBS Trusts. As a result of this sanction, Goldman must retain an independent consultant to review certain foreclosure proceedings initiated by Litton. The Federal Reserve has also announced that it believes monetary sanctions are appropriate against Goldman and plans to announce monetary penalties. Goldman's "pattern of misconduct" is further evidence that Goldman Sachs knew of the weakness in the mortgage loans collateralizing the securitizations and had both an ability and willingness to exploit it.

472. On February 27, 2012, Goldman announced in a Form 10-K that it had received a Wells notice from the Securities and Exchange Commission, notifying it that the SEC intends to bring an enforcement action against them. According to media reports, the Wells notice related to mortgage securitizations similar, if not identical, to the loan securitizations that Goldman sold to Plaintiffs.

4. Goldman, Sachs & Co.'s Liability as an Underwriter of the Goldman Certificates

473. Goldman Sachs made the false and misleading statements alleged above, which were contained in the Prospectus Supplements endorsed and used by Goldman Sachs in the sale of Certificates to investors.

474. As underwriter, Goldman Sachs edited, drafted and controlled the content of the Goldman Trusts' Offering Materials, including with respect to the material misstatements and omissions alleged above. In connection with its due diligence conducted in connection with the offering of the Certificates to Plaintiffs, Goldman Sachs received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject Trusts. As underwriter, Goldman Sachs then used and disseminated these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

475. Goldman Sachs, as a subsidiary within Goldman, had knowledge that Goldman, as alleged in §V.C: (1) failed to adhere to underwriting standards when it pooled mortgage loans for its RMBS, including for the Goldman Trusts; and (2) provided distorted information to the rating agencies that was purposefully manipulated to meet the targeted rating. Further, Goldman Sachs, knew or was reckless in not knowing, of the defective loans in the Goldman Trusts as a result of its due diligence performed as an underwriter for the Goldman Trusts. Goldman Sachs had access to

the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans Goldman deposited in the Goldman Trusts had a practice of routinely and systematically disregarding the stated underwriting standards.

476. Goldman Sachs also knew that mortgage loans deposited into the Goldman Trusts were not properly underwritten because Goldman Sachs was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with its securitization of loans, as alleged herein. In addition to the Goldman Trusts, Goldman Sachs underwrote and sold many other such RMBS to investors and had in that context gained inside knowledge of the poor quality loan underwriting being routinely employed and accepted by its affiliates.

D. IndyMac

1. The IndyMac Securitization

477. Union Central purchased a Certificate sponsored by IndyMac on September 17, 2007. Union Central made the following purchase representing a total investment of approximately $3.8 million:

CUSIP	Description	Issuing Entity	Issue Date	Purchase Date
456652AM8	IMJA 2007-A1 B1	Indymac IMJA Mortgage Loan Trust 2007-A1	6/1/2007	9/17/2007

478. IndyMac IMJA 2007-A1 was a $260 million deal comprising 407 purportedly conventional fixed-rate mortgages with 30-year terms.

2. False and Misleading Statements in IndyMac's Offering Materials

a. False and Misleading Statements About Compliance with Underwriting Standards

479. IndyMac stated in its Offering Materials for IMJA 2007-A1 that the majority of the Trust's loans with IMJA 2007-A1 Trust were originated through IndyMac's Conduit program, or were purchased from "Mortgage Professionals," who were required to comply with IndyMac's underwriting guidelines. The Offering Materials represented that all loan sellers were both initially and periodically reviewed thereby giving IndyMac direct notice of their practices:

> IndyMac Bank approves each mortgage loan seller prior to the initial transaction on the basis of the seller's financial and management strength, reputation and prior experience. Sellers are periodically reviewed and if their performance, as measured by compliance with the applicable loan sale agreement, is unsatisfactory, IndyMac Bank will cease doing business with them.

480. The Offering Materials described the underwriting guidelines which IndyMac utilized in originating and purchasing the loans that it deposited in the Trust:

> Mortgage loans that are acquired by IndyMac Bank are underwritten by IndyMac Bank according to IndyMac Bank's underwriting guideline.
>
> * * *
>
> IndyMac Bank's underwriting criteria for traditionally underwritten mortgage loans includes an analysis of the borrower's credit history, ability to repay the mortgage loan and the adequacy of the mortgaged property as collateral. Traditional underwriting decisions are made by individuals authorized to consider compensating factors that would allow mortgage loans not otherwise meeting IndyMac Bank's guidelines.

b. False and Misleading Statements About Appraisals and LTV Ratios

481. The Offering Documents represented that the underlying mortgaged properties would provide adequate security for the mortgage loans, based in part on the appraised value of the properties securing the mortgage loans underlying the Certificates.

482. The Offering Materials stated that appraisals were generally required to be made in accordance with the USPAP:

> To determine the adequacy of the property to be used as collateral, an appraisal is generally made of the subject property in accordance with the Uniform Standards of Profession Appraisal Practice. The appraiser generally inspects the property, analyzes data including the sales prices of comparable properties and issues an opinion of value using a Fannie Mae/Freddie Mac appraisal report form, or other acceptable form. In some cases, an automated valuation model (AVM) may be used in lieu of an appraisal. AVMs are computer programs that use real estate information, such as demographics, property characteristics, sales prices, and price trends to calculate a value for the specific property. The value of the property, as indicated by the appraisal or AVM, must support the loan amount.

483. As represented in the Offering Documents, the LTV ratio of a mortgage loan at any time is the fraction, expressed as a percentage, the numerator of which is the outstanding principal balance of the mortgage loan and the denominator of which is the collateral value of the related mortgaged property. The collateral value of a mortgage property, other than with respect to housing contracts and certain mortgage loans the proceeds of which are used to refinance an existing loan, is the lesser of: (a) the appraised value determined in an appraisal obtained by the originator at origination of such loan; or (b) the sales price for such property.

484. The Prospectus Supplements also provided information regarding the weighted average LTV ratio of the loans underlying the Certificates. The Offering Materials stated that the average original LTV ratio for all mortgage loans was 68.27%, and that all but one loan had an LTV ratio below 80%.

c. False and Misleading Statements About Debt-to-Income Ratios

485. The Offering Materials specifically set forth the DTI ratios for each of the loans included in the IMJA 2007-A1 Trust. With one exception, no borrowers were reported as having DTI ratios in excess of 50%.

d. False and Misleading Statements About Owner-Occupancy

486. The IMJA 2007-A1 Offering Materials contained specific disclosures about the occupancy-rate status of the loans underlying the certificates.

487. The Offering Materials stated that 395 out of the 407 loans, or 96.5% of the aggregate principal balance of the mortgage loans, were for owner-occupied properties. Nine loans were purportedly for second homes. Three loans were described being for investment properties.

e. False and Misleading Statements About Ratings

488. The Offering Materials for the Certificates stated that the ratings of the Certificates as set forth in the Prospectus was a condition for their issuance, and that the ratings reflected the likelihood that investors would receive the distributions to which they were entitled:

> It is a condition to the issuance of the Class B-1, Class B-2 and Class B-3 Certificates that they be rated at least AA, A and BBB, respectively, by S&P.
>
> The ratings assigned by S&P to mortgage pass-through certificates address the likelihood of the receipt of all distributions on the Mortgage Loans by the certificateholders under the agreements pursuant to which the certificates are issued. S&P's ratings take into consideration the credit quality of the mortgage pool . . . .

489. The Offering Materials also set forth the specific ratings for the Certificates purchased by Union Central. The Certificates were rated AA by S&P.

3. Defendants' Statements Were Knowingly False and Misleading

490. IndyMac knew, or was reckless in not knowing, that the statements identified above were materially false and misleading and/or omitted material facts necessary to make the statements made not misleading. As set forth herein, IndyMac Defendant had actual knowledge that the stated underwriting guidelines were not being adhered to.

a. Underwriting Standards Had Been Abandoned

491. While the Offering Materials set forth detailed underwriting guidelines that were supposed to be applied in evaluating borrowers and loans, in fact the stated underwriting guidelines had been abandoned by the loan originators.

492. IndyMac abandoned the fundamental principle that underwriting was supposed to meaningfully evaluate the borrowers' ability to repay the debt, and the lender and/or investors' ability to recover against the pledged collateral in the event of a default. Instead, IndyMac approved loans which they knew were based on falsified information and which did not comply with any of the stated underwriting guidelines. IndyMac's former CEO, Michael Perry ("Perry") admitted, according to a complaint filed by the FDIC, that IndyMac had failed to engage in '"common sense underwriting,"' instead relying on other underwriting methods that were open to rampant manipulation.

493. According to the FDIC, Perry also admitted that IndyMac's loosening of credit guidelines and lending standards were to blame for IndyMac's spectacular decline in 2007 and 2008. "In an April 19, 2007 e-mail . . . . Perry confirmed: 'Yes, we loosened our credit guidelines too much over the past year or so . . . ." Complaint, *FDIC v. Michael Perry*, No. 11-5561 (C.D. Cal. July 6, 2011).

494. The FDIC also describes a handwritten list by Perry of "'Big Mistakes'" made at IndyMac, further demonstrating the falsity of the Offering Materials statements. The list of '"Big Mistakes,"' included "[g]iving up on documenting income," "[s]econdary selling loans that they knew did not meet our reps and warranties (in particular conduit)," "[c]onduit justifying not investing in basic infrastructure, controls [and] discipline through strong volumes and profits," and "[l]ittle to no overall command and control of credit risk."

(1) Skyrocketing Default Rates Are Evidence of Abandoned Underwriting

495. The IndyMac Certificates purchased by Union Central were supposed to be stable, long-term investments backed by investment-grade credit ratings. However, the extraordinary default rates on the mortgage loans underlying those Certificates is prima facie evidence that the stated underwriting standards and loan characteristics represented in the IndyMac Offering Materials were materially false and misleading.

496. The following chart sets forth the delinquency, bankruptcy or foreclosure amounts, as well as collateral cumulative losses, for the Certificates purchases by Union Central as of June 2010:

Certificate	Original Deal Size	Delinquent, Bankruptcy Foreclosure, REO Actual Bal.	Collateral Cumulative Losses
2007-1	$262,509,068	$25,498,892	$5,460,863

497. Had the loans been issued in accordance with the stated underwriting guidelines, and had the loans in fact had the characteristics described in the Offering Materials, the rate of delinquency, bankruptcy and foreclosure would be far lower than the current rates.

(2) Appraisals and LTV Ratios Were Inflated

498. The IndyMac Offering Materials' descriptions of appraisal standards, as well as the LTV ratios derived from such appraisals, were materially false and misleading. Undisclosed in those Offering Materials, and in violation of any legitimate appraisal standards many of the loans underlying the Certificates had been approved through the use of manipulated appraisals that falsely guaranteed that the collateral property would be valued at a price sufficient to support the loan.

499. An Audit Report on the failure of IndyMac published by the Department of Treasury's Office of Inspector General found serious problems with IndyMac's auditing practices:

> We also found weaknesses with property appraisals obtained to support the collateral on the loans. For example, among other things, we noted instances where IndyMac officials accepted appraisals that were not in compliance with the Uniform Standard of Professional Appraisal Practice (USPAP). We also found instances where IndyMac obtained multiple appraisals on a property that had vastly different values. There was no evidence to support, or explain why different values were determined. In other instances, IndyMac allowed the borrowers to select the appraiser. As illustrative of these problems, the file for one 80/20, $1.5 million loan we reviewed contained several appraisals with values ranging between $639,000 and $1.5 million. There was no support to show why the higher value appraisal was the appropriate one to use for approving the loan.

500. A lawsuit filed against IndyMac further confirms that IndyMac violated its underwriting guidelines by artificially inflating the appraised values of properties. In *Cedeno v. IndyMac Bancorp, Inc.*, et al., No. 06-CV-6438 (JGK) (S.D.N.Y. July 20, 2007), the plaintiff, a residential home mortgage borrower, sued IndyMac and alleged that it had improperly and systematically selected and coerced various appraisal professionals so as to generate greater loan volumes. These appraisers would perform faulty and defective appraisal services that inflated the value of residential properties and thereby allowed IndyMac to complete more real estate transactions and obtain greater profits.

501. Cedeno, in her Amended Class Action Complaint (filed on July 20, 2007), alleged, based on confidential witnesses, that "IndyMac threatened and retaliated against appraisers and management firms that failed to give in to pressure to meet the target appraisal values by IndyMac and to inflate the appraisal values." The practice of encouraging inflated appraisal values resulted in borrowers incurring more mortgage debt than necessary and/or more mortgage debt than the borrower could afford. In order to accomplish this, IndyMac had to override stated lending practices and internal/operational controls, as described in the *Cedeno* Complaint:

> Specifically, Defendants allowed Production Personnel to improperly influence Credit\Valuation Personnel. Production Personnel threatened and intimidated Credit\Valuation Personnel to approve inflated appraisals received from outside appraisal companies or appraisal management firms. Contrary to Defendants'

representations to Plaintiff and members of the Class, Defendants failed to provide the necessary insulation and separation between Production Personnel and Credit/Valuation Personnel.

According to a confidential witness, IndyMac executives, including the chief appraiser, were aware and allowed the improper influence Production Personnel placed on their own Credit\Valuation Personnel to choose appraisers and to approve appraisals obtained from third party appraisal companies or appraisal management firms willing to supply IndyMac with inflated appraisals.

Indeed, according to this confidential witness, Credit/Valuation Personnel at IndyMac were told not to reject inflated or otherwise improper appraisals and were threatened or told by Production Personnel that they would be terminated if they failed to do so.

According to another confidential witness, IndyMac was in fact operating its appraisal review department under pressure to make the values that IndyMac's loan officers and processing department were pushing. This confidential witness further stated that employees of IndyMac exerted pressure to make sure loans would be approved regardless of accurate appraisal values.

502. As set forth in §§IV.F. and V.2.b., IndyMac was a party to the Defendant-wide practice of pressuring appraisers to misstate appraisals in order to ensure that loans were funded regardless of the quality of the underlying collateral. Instead of conducting appraisals designed to accurately value the subject property in compliance with the USPAP, many of the appraisals conducted on the underlying properties in the IndyMac Trust were designed to hit valuation targets that would allow loans to be funded.

(3) Debt-to-Income Ratios Were Falsified

503. The statements contained in the Offering Materials regarding the acceptability and evaluation of DTI ratios, as well as many of the specific DTI ratios disclosed, were materially false and misleading. In fact, IndyMac knew that borrowers routinely falsified their stated incomes in order to have loans approved.

504. Confidential witnesses cited in a securities class action complaint against IndyMac, *Tripp v. IndyMac*, No. 07-1635 (C.D. Cal. Feb. 16, 2010) confirm these IndyMac practices.

According to one confidential witness, "loan sales representatives solicited 'fraudulent' letters from CPAs in connection with the purported verification of customer income." This witness allegedly stated that "it was obvious that the letters were fraudulent, and that he/she repeatedly reported the fraud" to upper management and was ignored.

505. Another confidential witness in the *Tripp* case described so-called '"Disneyland Loans,"' approved by IndyMac. The *Tripp* Complaint (Dkt. No. 227) alleges: "These loans were called Disneyland Loans, referring to a loan issued to a Disneyland cashier who claimed in his/her application that he/she earned $90,000 a year . . . . As another example of a particularly egregious 'Disneyland Loan,' [the confidential witness] related the story of a $500,000 loan that was issued for 'swamp lands' in Florida, to a 26 year old first time home buyer with a reported income of $26,000 per year and $15.00 in a bank account."

506. Plaintiffs have examined certain of the loans contained in the 2007-A1 Trust and found numerous examples of loans where DTI ratios were falsified and where obvious signs of fraud or misrepresentations were ignored by IndyMac.

507. The 2007-A1 Trust included a $550,040 loan to refinance a primary residence in Totowa, New Jersey in March 2007. While the 2007-A1 securitization reported a DTI ratio for this borrower of 44.7%, the borrower's DTI was in fact no less than 103%.

508. The 2007-A1 Trust included a $644,040 loan to refinance a primary residence in Carlsbad, California in March 2007. While the 2007-A1 securitization reported a DTI ratio for this borrower of 34%, the borrower's DTI was in fact no less than 819% in 2007 and no less than 92% in 2006.

509. The 2007-A1 Trust included a $575,500 loan to refinance a primary residence in Brooks, Georgia in March 2007. While the 2007-A1 securitization reported a DTI ratio for this

borrower of 29.8%, the borrower's DTI was in fact no less than 1457%. Further, while the mortgage loan schedule stated that the subject properties were to be owner occupied for one year, this borrower did not live in the subject property at the time the loan was issued or anytime thereafter.

510. The IMJA 2007-A1 Trust included a $650,000 loan to refinance a primary residence in Gaithersburg, Maryland in May 2007. While the 2007-A1 securitization reported a DTI ratio for this borrower of 38.5%, the borrower's DTI was in fact no less than 237%. Further, while the mortgage loan schedule stated that the subject properties were to be owner occupied for one year, this borrower moved out of the subject property five months prior to the refinance.

b. Defendants Knew that Underwriting Standards Were Being Abandoned

511. IndyMac had actual knowledge that the loans it securitized in the Trusts sold to Union Central did not comply with the stated underwriting guidelines contained in the Offering Materials, and that the quantitative and qualitative data contained in the Offering Materials was materially false and misleading.

(1) IndyMac Had Actual Knowledge of the Defective Loans They Were Securitizing

512. IndyMac performed monthly quality control audits of its loan production, starting as early as 1994 and continuing through at least August 2007. Each month, IndyMac's Post Production Quality Control ("PPQC") unit selected samples of IndyMac's total loan production and assessed each loan to determine whether the borrower or a third party, such as the mortgage broker or appraiser, misrepresented information in obtaining the loans.

513. A complaint filed by the SEC against IndyMac's former Executive Vice President and CFO, S. Blair Abernathy, provides significant detail about the operations of the PPQC. *SEC v. Abernathy*, No. 11-1308 (C.D. Cal. Feb. 11, 2011). According to the SEC, the PPQC identified

misrepresentations including the following categories: (1) occupancy; (2) appraisals; (3) income; (4) employment; (5) assets; (6) credit (undisclosed liabilities); and (7) transaction ("straw buyer").

514. Before finding that a misrepresentation had been made, the PPQC would develop actual proof that the information provided on the loan application was false. PPQC prepared monthly reports which were distributed within IndyMac. According to the SEC, the report detailed (1) the sample's defect rate, which ranged from 10% to 22% from September 2005 through August 2007; (2) compared the defect rate to prior periods; (3) stated the percentage of loans that contained misrepresentations – which ranged from 12% to 18% from January 2007 through August 2007. The PPCQ monthly reports also broke down the findings by business unit, including IndyMac's Conduit program. Finally, the PPQC reports attached spreadsheets that provided loan-by-loan detail of the PPQC's findings.

515. These PPQC reports provided IndyMac with actual knowledge that it had a widespread and systemic practice of making defective loans which did not comply with the underwriting standards set forth in the Offering Materials.

(2) The Office of Thrift Supervision Specifically Warned IndyMac that It Was Securitizing Defective Loans

516. IndyMac knew that loans originated through their Conduit program, which was the single largest source of loans for the IMJA 2007-A1 Certificates, were routinely defective. A lawsuit filed by the FDIC against IndyMac's former CEO, Perry, describes a January 8, 2007, OTS Report of Examination, which Perry reviewed regarding serious problems in IndyMac's Conduit division. In this report, the OTS found "significant internal control weaknesses with the Conduit Division. These Weaknesses were well documented in the [Bank's] 2006 and 2007 internal audit reports." The report stated:

> [R]equisite controls for loan production did not keep pace with growth, as evidenced by two consecutive "needs improvement internal audits. The Divisions lack of effective internal controls is well documented in the related 2006 and 2007 internal audits, with many repeat criticism noted. Specifically the Conduit Division failed to: (1) adequately monitor sellers and related exposure; (2) obtain trading approvals according to Bank policy; (3) ensure seller agreements were reviewed by legal staff and properly executed; (4) document compensating factors supporting the purchase of loans not meeting IndyMac guidelines; (5) perform minimum due diligence on all loan pools purchased; and (6) resolve collateral deficiencies identified on a pre-funding basis in a timely manner."

517. Indeed, IndyMac was aware in the period leading up to its sale of the Certificates to Union Central that loan delinquencies were skyrocketing. According to the FDIC, the Bank's Thrift Financial Reports showed "substantial increases in first lien delinquencies on loans 30-89 days past due and still accruing, increasing 128% from the second to the ***fourth*** quarter of 2006" (emphasis in original). "Further non-accrual loans also began to trend significantly upward indicated a low delinquency cure rate. Non-performing assets as a percentage of total assets increased 73% between the fourth quarter of 2006 and the first quarter of 2007."

4. UBS's Liability as an Underwriter of the IndyMac Certificates

518. UBS Securities made the false and misleading statements alleged above, which were contained in the Prospectus Supplement endorsed and used by UBS Securities in the sale of Certificates to Plaintiffs.

519. As underwriter, UBS Securities edited, drafted and controlled the content of the IMJA 2007-A1 Trust's Offering Materials, including with respect to the material misstatements and omissions alleged above in §V.D. In connection with its due diligence conducted in connection with the offering of the Certificates to Plaintiffs, UBS Securities received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject Trusts. As underwriter, UBS Securities then used and disseminated these false and

misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

520. UBS Securities also knew that mortgage loans deposited into the IMJA 2007-A1 Trust were not properly underwritten because UBS Securities was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged herein. In addition to the IMJA 2007-A1 Trust, UBS Securities underwrote and sold many other such RMBS to investors and had in that context gained inside knowledge of the poor quality loan underwriting.

5. HSBC's Liability as an Underwriter of the IndyMac Certificates

521. Defendant HSBC Securities (USA) Inc. ("HSBC Securities") is an SEC-registered broker-dealer and an indirect wholly-owned subsidiary of HSBC Holdings Plc. ("HSBC"). It is incorporated in Delaware and its principal place of business is 425 Fifth Avenue New York, NY.

522. HSBC Securities acted as the underwriter in the sale of Certificates from the IndyMac IMJA Mortgage Loan Trust 2007-A1. As underwriter, it drafted and disseminated the IMJA 2007-A1 Offering Materials, which contained false and misleading statements about the quality of the underlying mortgages and the underwriting performed by IndyMac and its originators.

523. HSBC Securities was privy to the defendant-wide practice of securitizing loans that had not been properly underwritten. According to the FCIC, HSBC was the largest subprime lender in the United States. The Dissenting Statement of three FCIC members included within the official FCIC Report reflects that HSBC and its affiliates engaged in the rampant practice of originating mortgage loans that borrowers could not repay:

> Fueled by cheap credit, firms like Countrywide, Washington Mutual, Ameriquest, and HSBC Finance originated vast numbers of high-risk, nontraditional mortgages that were in some cases deceptive, in many cases confusing, and often beyond borrowers' ability to repay.

524. Based upon knowledge of its own practices, as well as those of its competitors, and based on its due diligence investigation as an underwriter, HSBC Securities was well aware that the mortgage loans in the IMJA Mortgage Loan Trust 2007-A1 were defective because a large percentage of borrowers could not afford the subject loans which would not have been made if they had been properly underwritten.

525. Indeed, at the same time that HSBC Securities was represented to Plaintiffs that the subject loans had been properly underwritten, HSBC was making provisions for writing down the bad loans that it held on its own books. Based on HSBC Securities' knowledge of how those loans had been underwritten, it was internally aware that the widespread race to the bottom with respect to underwriting standards would result in substantial losses for whomever acquired the subject loans.

526. HSBC Securities' knowledge of the abandonment of prudent loan underwriting is further evidenced by FHFA allegations that HSBC systematically underwrote and issued RMBS that HSBC knew contained mortgage loans that did not meet underwriting standards. According to the *FHFA* Complaint, Fannie Mae and Freddie Mac purchased $6.2 billion RMBS put together by HSBC affiliates. *FHFA v. HSBC North America Holdings Inc.*, No. 1:11-cv-06189 (S.D.N.Y. Sept. 2, 2011). After conducting an AVM analysis, the FHFA found that HSBC understated the occurrence of non-owner occupied property by approximately 10% and for one trust HSBC understated owner-occupancy in as many as 13% of all the loans. *FHFA v. HSBC* Complaint (Dkt. No. 1), ¶¶93-96.

527. The FHFA's analysis found that HSBC understated the true percentage of loans with an LTV Ratio at 80% or less, often by twenty percentage points or more. *Id.*, ¶100. According to

the FHFA's analysis, HSBC understated the number of loans with LTV ratios over 100%. Contrary to what had been represented, the FHFA's analysis found all of those HSBC-affiliated RMBS contained at least 9.41% LTVs over 100%, including one trust with 39.51%. *Id.*, ¶¶98-101.

528. HSBC Securities' affiliate HSBC Bank USA also appears to have been involved in the improper marketing of RMBS that contained defective loans. It has been recently reported that HSBC Bank USA received subpoenas from the SEC and the U.S. Attorney's Office, Southern District of New York, as well as a Civil Investigative Demand from the Massachusetts State Attorney General, regarding its involvement in the issuance of RMBS.

529. HSBC paid $5.25 million to settle NCUA's suit arising out of HSBC's sale of RMBS to five failed corporate credit unions.

530. As a signatory to the Offering Materials, HSBC Securities represented that the statements in the IMJA 2007-A1 Trust Offering Materials were true. But it had access to the loan tapes, both for IMJA 2007-A1 Trust, and as a result, it knew, or was reckless in not knowing, that the loan originators routinely and systematically disregarded underwriting standards for the loans that were pooled into this securitization.

E. Morgan Stanley

1. Morgan Stanley's Securitizations

531. Union Central purchased a Certificate sponsored by Morgan Stanley on September 22, 2005, representing an investment of approximately $12.2 million:

CUSIP	Description	Issuing Entity	Issue Date	Purchase Date
61748HLS8	MSM 2005-5AR B1	Morgan Stanley Mortgage Loan Trust 2005-5AR	8/1/2005	9/22/2005

532. Morgan Stanley Mortgage Loan Trust 2005-5AR was a $1.49 billion deal comprising 4,637 purportedly hybrid adjustable rate mortgages with mostly 30-year terms.

2. False and Misleading Statements in Morgan Stanley's Offering Materials

a. False and Misleading Statements About Compliance With Underwriting Standards

533. As sponsor of the securitizations, Morgan Stanley either originated the underlying mortgages through its Morgan Stanley Mortgage Capital, Inc. ("MSMC") and Morgan Stanley Credit Corporation ("MSCC") entities, or purchased the underlying mortgage loans from other originators, primarily Countrywide, National City and Wachovia Mortgage Loans ("Wachovia").

534. The Offering Materials represented that all of the mortgage loans deposited in the Trusts were originated in accordance with MSMC, MSCC and National City's underwriting standards which were purportedly designed to ensure the soundness of the underlying loans and the willingness and ability of borrowers to repay them.

(1) Morgan Stanley

535. With respect to mortgages acquired from MSMC for deposit into the MSM 2005-5AR Trust, the Prospectus Supplement promised investors that the underwriting of those loans had collected various financial information about the borrowers to ensure that they could repay the loans:

> [E]ach mortgagor will have been required to complete an application designed to provide to the original lender pertinent credit information concerning the mortgagor. As part of the description of the mortgagor's financial condition, the mortgagor will have furnished information with respect to its assets, liabilities, income (except as described below), credit history, employment history and personal information, and furnished an authorization to apply for a credit report which summarizes the mortgagor's credit history with local merchants and lenders and any record of bankruptcy. The mortgagor may also have been required to authorize verifications of deposits at financial institutions where the mortgagor had demand or savings accounts.

536. The Prospectus Supplement for the MSM 2005-5AR Trust also promised investors that only borrowers who could replay the loans had received them:

> Based on the data provided in the application and certain verification (if required), a determination is made by the original lender that the mortgagor's

> monthly income (if required to be stated) will be sufficient to enable the mortgagor to meet its monthly obligations on the mortgage loan and other expenses related to the property such as property taxes, utility costs, standard hazard insurance and other fixed obligations other than housing expenses.

537. Further, the Offering Materials assured investors that all MSMC loans included in the securitization were issued in substantial compliance with the underwriting standards, and that any deviation from specific criteria was justified by sufficient compensation factors: "[C]ertain exceptions to the loan purchasing guidelines described herein are made in the event that compensating factors are demonstrated by a prospective borrower."

538. The Prospectus Supplement further represented that MSCC's loan underwriting had collected a variety of financial information about borrowers to ensure loans were only made to those who could repay them:

> [A] potential borrower may submit a written or telephone application which provides pertinent information about the applicant's ability to repay the proposed loan. Information supporting the potential borrower's assets, liabilities, income and expenses is required. Such information typically includes verification of income, deposits and mortgage payment history. Additionally, MSCC obtains and reviews a property appraisal, title policy, a credit bureau report of the applicant's credit history, analysis of income supporting repayment ability and proof of insurance coverage.

539. The Prospectus Supplement for the MSM 2005-5AR Trust also promised investors that only borrowers who could repay the loans had received them:

> A potential borrower's ability to make the proposed loan payments is measured by the applicant's income, credit, residence stability and assets. One test to determine this ability is the debt-to-income ratio, which is the borrower's total monthly debt service divided by total monthly gross income. MSCC typically allows for a debt-to-income ratio of 45%. Debt-to-income exceptions must be approved by the appropriate level underwriter, and supported by compensating factors.

(2) Countrywide

540. Morgan Stanley's Prospectus Supplement stated that all loans originated by Countrywide had been originated in compliance with their underwriting guidelines as well as applicable federal and state law:

> All of the mortgage loans originated or acquired by Countrywide Home Loans, Inc. have been originated or acquired in accordance with its credit, appraisal and underwriting standards. Countrywide Home Loans' underwriting standards are applied in accordance with applicable federal and state laws and regulations.

541. Further, the Prospectus Supplement stated that the Countrywide underwriting standards were designed to evaluate a potential borrower's ability to repay the loan:

> Countrywide Home Loans' underwriting standards are applied by or on behalf of Countrywide Home Loans to evaluate the prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral. Under those standards, a prospective borrower must generally demonstrate that the ratio of the borrower's monthly housing expenses (including principal and interest on the proposed mortgage loan and, as applicable, the related monthly portion of property taxes, hazard insurance and mortgage insurance) to the borrower's monthly gross income and the ratio of total monthly debt to the monthly gross income (the "debt to income" ratios) are within acceptable limits.

(3) National City

542. With respect to loans acquired from National City deposited in the Trust, the Prospectus Supplement represented that the loan originators had collected a variety of financial information about a borrower to ensure they could repay the loan:

> Generally, each mortgagor will have been required to complete an application designed to provide to the lender pertinent credit information concerning the mortgagor. The mortgagor will have given information with respect to its assets, liabilities, income (except as described below), credit history, employment history and personal information, and will have furnished the lender with authorization to obtain a credit report which summarizes the mortgagor's credit history.

543. The Prospectus Supplement also stated that its National City's underwriting standards were designed to ensure that borrowers could repay their loans, and that exceptions to those underwriting standards were granted only when compensating factors were present:

> The National City underwriting standards are applied to evaluate the prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral. These standards are applied in accordance with the applicable federal and state laws and regulations. Exceptions to the underwriting standards are permitted where compensating factors are present.

b. False and Misleading Statements About Appraisals and LTV Ratios

544. The Offering Documents represented that the underlying mortgaged properties would provide adequate security for the mortgage loans, based in part on the appraised value of the properties securing the mortgage loans underlying the Certificates.

545. Morgan Stanley's Offering Materials for the MSM 2005-5AR Trust represented that Morgan Stanley required and relied upon valid and accurate appraisals to determine the adequacy of the underlying collateral. For example, with respect to loans originated by MSMC, the Offering Materials stated:

> The adequacy of the mortgaged property as security for repayment of the related mortgage loan will generally have been determined by an appraisal in accordance with pre-established appraisal procedure guidelines for appraisals established by or acceptable to the originator. All appraisals conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and must be on forms acceptable to FNMA and/or FHLMC.

546. Similarly, the Morgan Stanley Offering Materials stated that "[t]he adequacy of the mortgaged property as security for the proposed mortgage loan will generally be determined by an appraisal acceptable to MSCC. Appraisals are conducted by independent appraisers acceptable to MSCC."

547. With respect to Countrywide's appraisal standards, the Offering Materials stated:

> [Countrywide] obtains appraisals from independent appraisers or appraisal services for properties that are to secure mortgage loans. The appraisers inspect and appraise the proposed mortgaged property and verify that the property is in acceptable condition. Following each appraisal, the appraiser prepares a report which includes a market data analysis based on recent sales of comparable homes in the area and, when deemed appropriate, a replacement cost analysis based on the current cost of constructing a similar home. All appraisals are required to conform to Fannie Mae or Freddie Mac appraisal standards then in effect.

548. With respect to National City's appraisal standards, the Offering Materials stated:

> Each National City mortgaged property has been appraised by a qualified independent appraiser. All appraisals are required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standard Board of the Appraisal Foundation. Each appraisal must meet the requirements of Fannie Mae and Freddie Mac. The requirements of Fannie Mae and Freddie Mac require, among other things, that the appraiser, or its agent on its behalf, personally inspect the property inside and out, verify whether the property was in good condition and verify that construction, if new, had been substantially completed. The appraisal generally will have been based on prices obtained on recent sales of comparable properties, determined in accordance with Fannie Mae and Freddie Mac guidelines. In certain cases an analysis based on income generated from the property or a replacement cost analysis based on the current cost of constructing or purchasing a similar property may be used.

549. With respect to Wachovia's appraisal standards, the Offering Materials stated:

> Appraisal reports must be ordered by Wachovia. Appraisals provided by the borrower or any other interested third party are not acceptable. Appraisals cannot be greater than 120 days old at closing. Any appraisal older than 120 days must be supported by a re-certification of value by the appraiser or by a new appraisal.
>
> Underwriters review appraisals in accordance with stated guidelines. Appraisal guidelines for jumbo loans are generally very similar to appraisal guidelines for conforming loans, i.e. standard Fannie Mae/Freddie Mac guidelines.
>
> Appraisals must be ordered from an appraiser who is approved by Wachovia. Underwriters must ensure that the appraisal has been provided by an appraiser on the approved appraiser list and that the appraiser does not appear on either the Wachovia Mortgage Corporation Watch or Suspended Appraiser List.

550. Morgan Stanley's Prospectus Supplement also contains misrepresentations concerning the LTV ratios of the mortgage loans underlying each securitization. Specifically, the weighted average original LTV ratio for Loan Groups 2-4, which corresponded to Plaintiffs' Certificate, were disclosed as being between 73%-76% when in fact they were much higher than that due to the inflated appraisals.

c. False and Misleading Statements of Borrowers' Debt-to-Income Ratios

551. Morgan Stanley's Offering Materials contained numerous statements regarding the evaluation of DTI ratios for the borrowers whose loans comprised the Trusts. Absent compensating

factors, the Offering Materials described the manner in which the loan originators evaluated DTI ratios for borrowers.

552. For example, the Morgan Stanley Offering Materials stated as follows:

> A potential borrower's ability to make the proposed loan payments is measured by the applicant's income, credit, residence stability and assets. One test to determine this ability is the debt-to-income ratio, which is the borrower's total monthly debt service divided by total monthly gross income. MSCC typically allows for a debt-to-income ratio of 45%. Debt-to-income exceptions must be approved by the appropriate level underwriter, and supported by compensating factors.

553. The Offering Materials described Countrywide's practices as follows:

> [A] prospective borrower must generally demonstrate that the ratio of the borrower's monthly housing expenses (including principal and interest on the proposed mortgage loan and, as applicable, the related monthly portion of property taxes, hazard insurance and mortgage insurance) to the borrower's monthly gross income and the ratio of total monthly debt to the monthly gross income (the "debt to income" ratios) are within acceptable limits.
>
> * * *
>
> Under its Standard Underwriting Guidelines, Countrywide Home Loans generally permits a debt-to income ratio based on the borrower's monthly housing expenses of up to 33% and a debt-to-income ratio based on the borrower's total monthly debt of up to 38%.

554. The DTI ratios were a material part of the loan underwriting process, and specific DTI ratios for the loans underlying the Certificates were utilized by the rating agencies to determine the ratings for the Certificates in the Trust.

d. False and Misleading Statements About Owner-Occupancy

555. The Offering Materials contained specific disclosures about the occupancy-rate status of the loans underlying the Certificates. The Offering Materials stated that 1,234 out of the 1,660 loans, or 78.08% of the aggregate principal balance of the mortgage loans, were for owner-occupied primary properties. The remaining 426 loans were purportedly for second homes or investment properties.

e. False and Misleading Statements About Ratings

556. The Offering Materials for the Certificates stated that the ratings of the Certificates as set forth in the Prospectus was a condition to their issuance, and that the ratings reflected the likelihood that investors would receive the distributions to which they were entitled:

> It is a condition of the issuance of the Certificates that they receive the respective ratings set forth on page iii of this prospectus supplement by [S&P] and Moody's].
>
> The ratings assigned to mortgage pass-through certificates address the likelihood of the receipt of all payments on the Mortgage Loans by the related Certificateholders under the agreements pursuant to which such certificates are issued. . . . Such ratings take into consideration the credit quality of the related Mortgage Pool, including any credit support providers, structural and legal aspects associated with such certificates, and the extent to which the payment stream on the Mortgage Pool is adequate to make the payments required by such certificates.

557. The Offerings Materials also set forth the specific ratings for the Certificates purchased by Union Central. The Certificates were rated AA by S&P and Aa2 by Moody's.

558. In obtaining these ratings for the subject Certificates, Morgan Stanley concealed the adverse information alleged herein from the rating agencies. Had the rating agencies known the true value of the loans underlying the Certificates, the Certificates would have been rated significantly lower, or not at all.

3. Morgan Stanley's Statements Were Knowingly False and Misleading

559. Morgan Stanley knew, or was reckless in not knowing, that the statements identified above were materially false and misleading and/or omitted material facts necessary to make the statements made not misleading. As alleged herein, the Morgan Stanley Defendants had actual knowledge of widespread abandonment of prudent underwriting guidelines with respect to the mortgage loans deposited in the Trust.

a. Underwriting Standards Had Been Abandoned

560. While the Offering Materials set forth detailed underwriting guidelines which were supposed to be applied in evaluating borrowers and loans, in fact the stated underwriting guidelines had been abandoned by the loan originators.

561. Morgan Stanley knew that the originators abandoned the fundamental principle that underwriting was supposed to meaningfully evaluate the borrowers' ability to repay the debt, and the lender and/or investors' ability to recover against the pledged collateral in the event of a default. Instead, the originators approved loans which they knew were based on falsified information and which did not comply with any of the stated underwriting guidelines.

562. Countrywide had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to Goldman for inclusion in the subject Trusts, as alleged above at §IV.I.2.

563. National City had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to Goldman for inclusion in the subject Trusts, as alleged above at §IV.I.10.

564. Morgan Stanley's practice of securitizing loans that did not meet the required underwriting standards has been confirmed by parties who have had direct access to the loan files for securitizations similar to and issued by Morgan Stanley at the same time as those sold to Plaintiffs. For example, MBIA is a New York-based monoline insurer that wrote insurance on a similar Morgan Stanley securitization, MSM 2007-9SL, covering any default of borrowers' payments of principal and interest on the loans in that Trust. MBIA conducted an investigation into the underwriting practices by examining the loan files after it experienced a large number of borrower defaults covered by its MSM 2007-9SL insurance policy. In carrying out its review of the

approximately 3,053 loan files, MBIA found that 96.6% of them did not comply with the required underwriting guidelines.

565. MBIA found the following widespread departures from the required underwriting guidelines consistent with the Morgan Stanley Defendants' standard operating procedure during the relevant period of securitizing poorly underwritten and imprudently granted loans:

(a) [DTI] ratio in excess of program guidelines;

(b) [Combined LTV] ratio in excess of maximum permitted guidelines;

(c) The credit score of the borrower does not meet program guidelines for [combined LTV] ratio and loan amount;

(d) Unreasonable stated income in application, *i.e.*, the borrower's or co-borrower's salary is unreasonable on the face of the application and/or is not substantiated by the borrower's or co-borrower's credit/asset profile;

(e) The appraisal conducted for the mortgaged property does not support the value of the property;

(f) 12 month seasoning requirements were not met, *i.e.*, the loan was not approved using the lower of the original purchase or appraised value of the property within the last 12 months;

(g) The appraisal of the property was not contained in the file;

(h) The borrower's full 12 month housing history was not verified;

(i) A minimum of one year's mortgage or rental payment history was not documented in the file;

(j) The credit report of the borrower was not contained in the file; and

(k) Missing sufficient down payment funds, closing costs and/or reserves.

566. Similar types of defects as those found by MBIA were also present in the Certificate purchased by Union Central, as has been confirmed by Plaintiffs' own investigation and as reflected by the pervasive nature of Morgan Stanley's misconduct during this period, as alleged herein.

(1) Skyrocketing Default Rates Are Evidence of Abandoned Underwriting

567. The Certificate purchased by Union Central was supposed to be a stable, long-term investment backed by investment-grade credit ratings. However, the extraordinary number of defaults of mortgage loans underlying Union Central's Certificate is prima facie evidence that Morgan Stanley's representations that the loans had been prudently underwritten were materially false and misleading.

568. The following chart sets forth the delinquency, bankruptcy or foreclosure amounts, as well as collateral cumulative losses, for each of the Certificate purchases by Union Central as of June 2010:

Certificate	Original Deal Size	Delinquent, Bankruptcy Foreclosure, REO Actual Bal.	Collateral Cumulative Losses
MSM 2005-5AR	$1,501,718,224	$151,456,158	$50,008,241

569. Had the loans been issued in accordance with the stated underwriting guidelines, and had the loans in fact had the characteristics described in the Offering Materials, the rate of delinquency, bankruptcy and foreclosure and cumulative losses would be far lower than the current rates. Indeed, Moody's maximum expected collateral losses for the life of the MSM 2005-5AR Certificate was only $15 million.

(2) Appraisals and LTV Ratios Were Inflated

570. The descriptions of appraisal standards, as well as the LTV ratios derived from such appraisals, were materially false and misleading. Undisclosed in the Offering Materials, and in violation of any legitimate appraisal standards, many of the loans underlying the Certificates had been approved through the use of manipulated appraisals that guaranteed that the collateral property would be valued at a price sufficient to support the loan. Such practices have been confirmed by

modeling performed by other litigants who experienced similar Morgan Stanley conduct, which demonstrates that appraisals used in connection with Morgan Stanley securitizations in 2006 were routinely inflated. For instance, the plaintiffs in *FHFA. v. Morgan Stanley, et al*., Index No. 652440/2011 (Sup. Ct. N.Y. Sept. 2, 2011), conducted an AVM analysis of a sample of the property underlying the Morgan Stanley offerings at issue in that litigation. *FHFA v. Morgan Stanley* Complaint (Dkt. No. 1), ¶¶98-102.

571. The FHFA's analysis demonstrates that the valuation of the loans underlying the certificates were materially and consistently inflated, and therefore that the stated LTV ratios were materially overstated, which in turn greatly increased the risk from default on the loans underlying the certificates. FHFA analyzed 33 Morgan Stanley securitizations issued between 2005 and 2007, including securitizations bearing substantially similar characteristics as the 2005-5AR Certificate purchased by Plaintiffs. For example, two of the transactions analyzed by the FHFA which were similar to Plaintiffs' securitization, MSM 2005-7 and MSM 2005-10, included representations that 97.49% and 97.71% respectively of the loans in those trusts had LTV ratios of less than 80%. However, FHFA's analysis showed the true percentage of loans having LTV ratios of 80% or less was a mere 56.29% and 64.07%.

572. While none of those certificates where supposed to contain loans that had an LTV ratio over 100%, the FHFA's analysis found that a significant number of loans had LTV ratios of over 100% – in other words, the value of loan was more than the value of the property. With respect to the MSM 2005-7 and MSM 2005-10 trusts, the FHFA found LTV ratios greater than 100% in 3.45% and 3.12% of the loans, respectively.

573. The Massachusetts Attorney General found similar misconduct by Morgan Stanley with respect to loans originated by New Century. In June 2010, the Massachusetts Attorney General

entered into an Assurance of Discontinuance ("AOD") with MS&Co. stemming from the Massachusetts' Attorney General's investigation into the financing, purchase, and securitization of residential mortgage loans by the Morgan Stanley Defendants and their affiliates during the period of late 2005 through early 2007. *In re Morgan Stanley & Co.*, No. 10-2538 (Mass. Dist. Cl. June 24, 2010). The Massachusetts Attorney General found that the Morgan Stanley Defendants partnered with one of the largest subprime lenders in the country, New Century, off-loading tens of thousands of loans the Morgan Stanley Defendants knew or should have known did not comply with their stated underwriting guidelines.

574. The Massachusetts Attorney General found during its due diligence that "Morgan Stanley employed so-called broker price opinions or 'BPOs' to check the value of the properties. In a BPO, a local broker evaluates the property and provides an indicated value and some additional information." According to the Massachusetts Attorney General, based on the BPO-checked value, "31% of the New Century loans on properties checked via BPOs in the valuation diligence process and securitized by Morgan Stanley in 2006 and 2007 had CLTV ratios" greater than 100%.

575. As set forth in §§IV.H.2. and IV.F., Morgan Stanley was a party to the Defendant-wide practice of pressuring appraisers to misstate appraisals in order ensure that loans were funded regardless of the quality of the underlying collateral.

(3) Debt-to-Income Ratios Were Falsified

576. The statements contained in the Offering Materials regarding the acceptability and evaluation of DTI ratios, as well as many of the specific DTI ratios that were disclosed, were materially false and misleading. In fact, Morgan Stanley knew that borrowers routinely falsified their stated incomes in order to have loans approved, and this adverse information was readily

apparent from even a cursory review of the loan files – files that Plaintiffs did not have, and still do not have, direct access to.

577. Plaintiffs have examined certain of the loans contained in the 2005-AR5 Trust and found numerous examples of loans where DTI ratios were falsified and where obvious signs of fraud or misrepresentations were ignored.

578. The 2005-5AR Trust included a $288,800 loan for the purchase of a primary residence in Fair Oaks, California in May 2005. While the 2005-5AR securitization reported a DTI ratio for this borrower of 43.4%, the borrower's DTI was in fact no less than 91%.

579. The 2005-5AR Trust included a $400,000 loan for a cash-out refinance of a primary residence in Washington, DC. in July 2005. While the 2005-5AR securitization reported a DTI ratio for this borrower of 27.81%, the borrower's DTI was in fact no less than 106%.

580. The 2005-5AR Trust included a $460,000 loan for the purchase of a primary residence in Bloomfield, New Jersey in May 2005. The borrower defaulted on the mortgage just four months later in October 2005. While the 2005-5AR securitization reported a DTI ratio for this borrower of 41.3%, the borrower in fact had no income in 2005 therefore their DTI ratio was infinite.

581. Plaintiffs' findings regarding the loans in the subject Trust are consistent with Morgan Stanley's practice during this time period of securitizing bad loans, and are consistent with the results of a Massachusetts Attorney General investigation. As a result of its investigation, the Massachusetts Attorney General discovered that Morgan Stanley routinely accepted mortgage loans for inclusion in securitizations despite misrepresentations of the stated income for mortgages purchased by MS&Co. from New Century:

> In 2005, Morgan Stanley employees were aware that stated income loans were among the riskiest newly originated subprime loans Morgan Stanley purchased

> and that such loans were among the most likely subprime loans to become delinquent or default. After rejecting a number of loans with overstated income in one New Century loan pool, one of Morgan Stanley's employees described the stated income method as overused to the point of abuse. Any inaccuracy in stated income, would affect the reported DTI ratios, because income is the denominator of the DTI ratio.

(4) Owner-Occupancy Rates Were Falsified

582. The FHFA has also performed loan-level analysis of thousands of loans securitized by Morgan Stanley at the same time as it securitized loans for the Certificates at issue here, and found that Morgan Stanley's RMBS Offering Materials routinely misstated the owner-occupancy rates of the loans underlying the certificates. In addition to their LTV analysis, the FHFA undertook a sophisticated analysis to determine whether a given borrower actually occupied the property as claimed. *FHFA v. Morgan Stanley* Complaint, ¶¶94-97. For each offering, the FHFA analyzed tax records, credit records, bills, property records and lien records, to determine whether a borrower was actually living in the property subject to the loan.

583. The results of the *FHFA v. Morgan Stanley* plaintiffs' analysis further confirms that Morgan Stanley had a practice of securitizing loans where the owner-occupancy-rate was being misstated in the Offering Materials. For each of the certificates at issue in the *FHFA v. Morgan Stanley* action, the percentage of owner-occupied properties was overstated by between 7% and 15%. With respect to the MSM 2005-7 and MSM 2005-10 certificates, the FHFA found owner-occupancy rates were overstated by 11.45% and 14.35% respectively.

(5) Ratings Were False

584. The rating agencies relied on the accuracy of the information provided by Morgan Stanley, including the underwriting standards and the data concerning DTI ratios, LTV ratios and owner-occupancy statistics, in assigned ratings to the securities. However, because the information

supplied by Morgan Stanley was materially false and misleading, the ratings assigned to the Certificates did not provide an accurate evaluation of the risk of default.

585. Indeed, as set forth below, Morgan Stanley knew that the ratings were materially false and misleading because they pressured the rating agencies to use outdated and inaccurate ratings models in order to ensure that the Certificates received the ratings they desired.

b. Morgan Stanley Knew that Underwriting Standards Were Being Abandoned

586. As alleged above, Morgan Stanley had actual knowledge that the loans it securitized in the Trusts it sold to Union Central did not comply with the stated underwriting guidelines contained in the Offering Materials, and that the quantitative and qualitative data contained in the Offering Materials was materially false and misleading. The Morgan Stanley Defendants had further knowledge that the underwriting standards were being abandoned for the loans in the subject Trust for the reasons alleged below.

(1) Morgan Stanley Had Actual Knowledge of the Defective Loans They Were Securitizing

587. Documents recently released by Clayton confirm that there were rampant underwriting violations in the loan pools contained in the Morgan Stanley Certificates. As the FCIC described in the internal Clayton "Trending Report" made public by the Government in conjunction with testimony given in September 2010, Morgan Stanley received regular reports regarding defective loans, and ***37%*** of the loans Clayton reviewed for Morgan Stanley "failed to meet guidelines." These loans were not subject to any proper "exceptions," as they did not have any "compensating factors." Rather, these loans were plainly defective.

588. Despite such a high level of defective loans, Morgan Stanley continued utilizing, and indeed funding, the same originators who had placed the nonconforming loans in the pools.

Furthermore, Morgan Stanley "waived in" to its pools ***56% of those toxic loans that Clayton had identified as being outside the guidelines***. This practice of completely disregarding loan underwriting standards was never disclosed to Union Central or any of the investors who purchased Morgan Stanley Certificates.

589. The Clayton data demonstrates that underwriting guidelines were being routinely violated, and that Morgan Stanley was informed of such violations. Morgan Stanley's secret "waiver" of rejected loans into its RMBS Trust without any compensating factors was an omission that rendered the Morgan Stanley Defendants' disclosures regarding their underwriting and due diligence processes materially misleading. As the FCIC Report concluded:

> [M]any prospectuses indicated that the loans in the pool either met guidelines outright or had compensating factors, even though Clayton's records show that only a portion of the loans were sampled, and that of those that were sampled, a substantial percentage of Grade 3 Event loans were waived in.
>
> * * *
>
> [O]ne could reasonably expect [the untested loans] to have many of the same deficiencies, at the same rate, as the sampled loans. Prospectuses for the ultimate investors in the mortgage-backed securities did not contain this information, or information on how few of the loans were reviewed, raising the question of whether the disclosures were materially misleading, in violation of the securities laws.

(2) Morgan Stanley Knew that Ratings Were False

590. The Certificate purchased by Plaintiffs received a AA credit rating from S&P and a Aa2 rating from Moody's, indicating the rating agencies' view of its risk profile based on the information provided by Morgan Stanley. The ratings were material to reasonable investors, including Union Central, because the ratings provided additional assurances that investors would receive the expected interest and principal payments. The Certificates would have been unmarketable to investors like Union Central and would not have been issued but for the provision of these ratings. As the Prospectus stated:

> It is a condition of the issuance of the Certificates that they receive the respective ratings set forth on page iii of this prospectus supplement by [S&P] and Moody's].

591. The Offering Materials represented that the rating agencies conducted an analysis designed to assess the likelihood of delinquencies and defaults in the underlying mortgage pools and issued ratings accordingly. The Morgan Stanley Offering Materials stated:

> The ratings assigned to mortgage pass-through certificates address the likelihood of the receipt of all payments on the Mortgage Loans by the related Certificateholders under the agreements pursuant to which such certificates are issued. . . . Such ratings take into consideration the credit quality of the related Mortgage Pool, including any credit support providers, structural and legal aspects associated with such certificates, and the extent to which the payment stream on the Mortgage Pool is adequate to make the payments required by such certificates.

592. These representations were false. The ratings given to the Morgan Stanley Certificates by S&P and Moody's were based on the loan profiles supplied to the agencies by the Morgan Stanley Defendants. But as discussed above, most (if not all) of the key components of that data were false because the Defendants failed to adhere to their disclosed underwriting standards and manipulated the appraisal of the properties underlying the mortgage pools. As a result, Morgan Stanley essentially pre-determined the ratings by feeding inaccurate information into the ratings system. This rendered misleading Morgan Stanley's representations concerning the ratings for the MSM 2005-5AR Trust because they failed to disclose that the ratings were based entirely on unreliable information provided by Morgan Stanley.

593. In addition, the Senate PSI recently released documents from the internal files of the Morgan Stanley Defendants detailing how the Morgan Stanley Defendants manipulated the credit rating agencies to achieve their desired rating results. The Senate PSI reported that investment banks, including Morgan Stanley, "were pressuring [the rating agencies] to ease rating standards" on RMBS. This included the banks' practice of blacklisting ratings analysts who refused to provide

favorable credit ratings to the toxic mortgage portfolios they were off-loading to investors such as Union Central.

594. One of the strategies employed by the Morgan Stanley Defendants was to leverage past accommodations provided by the rating agencies to the Morgan Stanley Defendants arguing that because the agencies had loosened their standards in the past, they must do so again. As set forth in the Senate PSI Report:

> An exception made one time often turned into further exceptions down the road. In August 2006, for example, an investment banker from Morgan Stanley tried to leverage past exceptions into a new one, couching his request in the context of prior deals:
>
> When you went from [model] 2.4 to 3.0, there was a period of time where you would rate on either model. I am asking for a similar 'dual option' window for a short period. I do not think this is unreasonable.
>
> A frustrated S&P manager resisted, saying: "You want this to be a commodity relationship and this is EXACTLY what you get." But even in the midst of his defense, the same S&P manager reminded the banker how often he had granted exceptions in other transactions: "How many times have I accommodated you on tight deals? Neer, Hill, Yoo, Garzia, Nager, May, Miteva, Benson, Erdman all think I am helpful, no?"

595. The Senate PSI Report further details how the Morgan Stanley Defendants stonewalled the rating agencies once the agencies determined their ratings models needed to be more conservative and pressured the rating agencies not to apply more conservative standards to previously issued securities. The Senate PSI reported:

> Moody's and S&P updated their RMBS and CDO models with more conservative criteria in 2006, but then used the revised models to evaluate only new RMBS and CDO transactions, bypassing the existing RMBS and CDO securities that could have benefited from the new credit analysis. Even with respect to the new RMBS and CDOs, investment banks sought to delay use of the revised models that required additional credit enhancements to protect investment grade tranches from loss. For example, in May 2007, Morgan Stanley sent an email to a Moody's Managing Director with the following:
>
> "Thanks again for your help (and Mark's) in getting Morgan Stanley up-to-speed with your new methodology. As we discussed last Friday, please find below a

> list of transactions with which Morgan Stanley is significantly engaged already (assets in warehouses, some liabilities placed). We appreciate your willingness to grandfather these transactions [under] Moody's old methodology."

596. If the Morgan Stanley Defendants had not successfully delayed the implementation of the more stringent rating methodologies, investors such as Union Central would not have been misled into believing the securities they were purchasing were worthy of AA ratings. The delay caused damage not only to Union Central but to the entire financial system. As the Senate PSI reported:

> Instead [of applying the more stringent methodologies to previously issued securities when it became clear that those were the appropriate methodologies], the credit rating agencies waited until 2007, when the high risk mortgages underlying the outstanding RMBS and CDO securities incurred record delinquencies and defaults and then, based upon the actual loan performance, instituted mass ratings downgrades. Those sudden mass downgrades caught many financial institutions and other investors by surprise, leaving them with billions of dollars of suddenly unmarketable securities. The RMBS secondary market collapsed soon after, and the CDO secondary market followed.

597. The Morgan Stanley Defendants' misconduct in the ratings process is currently subject to a criminal investigation by the New York Attorney General. The SEC is also reportedly investigating the matter.

(3) Reports of Former Employees Show that Morgan Stanley Knew Its Statements Were False

598. Former employees of Morgan Stanley and its subsidiaries have provided further corroborating evidence that Morgan Stanley and its subsidiaries intentionally ignored signs of fraud and underwriting violations in the loans they securitized.

599. According to a former MSMC employee who worked as both a Quality Control Analyst and a Pre-Funding Quality Control and Fraud Investigations Manager from 2003 into 2006, MSMC failed to comply with their loan purchasing guidelines. This former employee was responsible for reviewing loans that MSMC considered acquiring for securitization and then

preparing an audit report that provided detailed pre-purchase information about the loans – including flagging any potential fraud in the origination of the loan (such as a borrower providing a salary that was excessive for a given job title) or other indicators that the loan was unlikely to be repaid.

600. According to the former employee, MSMC's automated due diligence system could examine many relevant data fields for potential red flags with respect to individual loans. However, the former employee explained that senior management, including MSMC's co-heads Kevin Rodman and Steve Rudner, were choosing to "turn off" an increasing number of data fields, making the reports less detailed. It also resulted in manipulating the percentage score issued by the automated system to make the loans look safer than they were.

601. MSMC also purchased loans that were riskier, *i.e.*, less likely to be repaid, than MSMC's guidelines permitted, as the loans exceeded MSMC's limit for LTV ratios. Further, loan originators presented MSMC with loans that the originator claimed to be Alt-A, but instead were riskier subprime loans disguised as Alt-A loans. These loans were securitized and represented to be Alt-A loans when they in fact Morgan Stanley knew they were not.

602. According to the former MSMC employee, MSMC was "production-based" and was more concerned with acquiring loans for securitization than whether borrowers could repay the loans. Contrary to MSMC's stated loan purchasing guidelines, MSMC was not concerned with determining whether borrowers' income was sufficient to repay the loans. In fact, MSMC failed to adhere to its loan purchasing guidelines in order to purchase as many loans as possible because it was worried that if MSMC did not purchase the loans a competitor would.

603. Morgan Stanley failed to disclose that its approved loan originators implemented policies designed to extend mortgages to borrowers regardless of whether they were able to meet their obligations under the mortgage, such as:

(a) Coaching borrowers to misstate their income on loan applications to qualify for larger mortgage loans under the underwriters' underwriting standards, including directing applicants to no-doc loan programs when their income was insufficient to qualify for full documentation loan programs;

(b) Steering borrowers to loans that exceeded their borrowing capacity;

(c) Encouraging borrowers to borrow more than they could afford by suggesting No Income No Assets ("NINA") and Stated Income Stated Assets ("SISA") loans when they could not qualify for full documentation loans based on their actual incomes;

(d) Approving borrowers based on "teaser rates" for loans despite knowing that the borrower would not be able to afford the "fully indexed rate" when the adjustable loan rate adjusted; and

(e) Allowing non-qualifying borrowers to be approved for loans under exceptions to the underwriters' underwriting standards based on so-called "compensating factors" without requiring documentation for or determining the validity of such compensating factors.

604. Further, Morgan Stanley failed to disclose that the originators of loans purchased by MSMC and the agents of these originators – such as mortgage brokers – were so aggressive in approving and funding the mortgage loans that many of the mortgage loans were made to borrowers who had either not submitted or had openly altered the required documentation. Moreover, in many instances the income/employment verifications that were purportedly completed by the originators were insufficient because the lenders' clerical staff typically did not have proper verification skills, the mortgage brokers or their agents often completed verifications that were suspect, and oftentimes verifications were provided by inappropriate contacts at the borrower's place of employment (*e.g.*, a friend of the borrower would complete the verification instead of human resources). Unbeknownst to investors, including Union Central, these undisclosed practices had the effect of dramatically increasing the risk profile of the Certificates.

605. Similarly, those borrowers who were required to submit stated income applications would include income levels which were routinely inflated to extreme levels, relative to their stated job titles, in order to get the mortgage loans approved and funded. For instance, a former MSMC

employee recalled MSMC purchasing loans extended to people whose stated occupation could not possibly provide the income stated on the loan application. The former MSMC employee provided a hypothetical but typical example of a borrower whose stated occupation was pre-school teacher but whose stated income was $200,000 per year. According to the former MSMC employee, when red flags such as these were raised, MSMC would often fail to consider the information and purchase the loan anyway. Indeed, the existence of this type of extreme stated income inflation was corroborated in a study cited by the Mortgage Asset Research Institute which found that almost all stated-income loans exaggerated the borrower's actual income by 5% or more, and more than half increased the amount by more than 50%.

606. Morgan Stanley knew that its appraisals were false and that therefore the stated LTV ratios were also false. According to the former MSMC employee, Morgan Stanley management ignored information indicating that the loans MSMC was considering for purchase were not originated pursuant to MSMC's stated loan purchasing guidelines. For example, the former employee red-flagged a number of loans purportedly made for completed homes in Maricopa County, Arizona because the homes had been sold numerous times within a short time span for ever increasing sales prices. When the former employee visited the purported location of these homes, she noted that there were no homes built there nor were there any other homes in the area. The employee determined that the "sales" of these "homes" were merely transactions back and forth between builders to artificially inflate their value. When the former employee notified her MSMC superiors of her findings, they failed to consider this information and purchased these bad loans (and many others) anyway.

607. A former MSCC employee provided similar evidence regarding the underwriting process employed by MSCC. According to a former MSCC Underwriter who worked at MSCC

from January 2006 to October 2007, an underwriter's role at MSCC was a "joke" because MSCC's goal for underwriters was to approve and close as many loans as possible rather than determine whether a borrower could repay the loan. The former underwriter explained that because most of MSCC's applicants were already Morgan Stanley clients with assets invested in Morgan Stanley, MSCC was "bending over backwards" to make sure the clients' loans were approved. MSCC was not concerned with the ability of these existing clients to repay their loans but merely wanted to retain them as clients. According to the former underwriter, MSCC feared that if MSCC did not approve loan applications submitted by its existing clients, the clients would withdraw the assets they had invested with Morgan Stanley and put them with another company such as Lehman Brothers or Goldman Sachs. Due to these concerns, MSCC was incredibly lax in its underwriting and did not scrutinize the prospective borrower's credit profile.

608. MSCC's loan underwriting policies were very problematic, according to the former underwriter. Once a loan application reached the underwriter, it was considered "unprofessional" to question the applicant's stated income relative to the applicant's stated job title. Thus, far from scrutinizing a borrower's information, underwriters who had reservations about an applicant's stated income level remained quiet and did not even check the applicant's stated income against information contained in publicly available websites such as salary.com. The former underwriter explained that stated income loans would close within three hours of application submission because there was nothing in the application to verify.

609. To ensure that loans were approved, MSCC put its underwriters on a strict quota system. According to the former underwriter, MSCC underwriters were expected to approve a certain number of loans each day, week and month. If they did not, the underwriters would be terminated. In addition, MSCC underwriters were incentivized to approve as many loans as possible

as opposed to detecting bad loans. For instance, an underwriter who approved 25% more loans than required by his or her quota would receive a bonus equal to 25% of his or her salary. Given this incentive system, the underwriters at MSCC rarely denied a loan application.

610. Similarly, while MSCC stated that appraisals were conducted by independent appraisers, the former MSCC employee reported that there was a conflict of interest with the appraisals used by MSCC. According to the MSCC employee, MSCC rarely required or paid for full appraisals, which are comprehensive and include a physical inspection of the interior and exterior of the home, as well as pictures. The majority of the time MSCC only required FAVs (field asset verification) or EAVs (estimated appraisal value). The MSCC employee explained that FAVs are also called "drive bys" because it only requires that a realtor drive by and look at the home from the outside and then make a comparison based upon other home values in the neighborhood. The EAV is based only on a comparison of the values of other homes in the neighborhood and no human eyes look at the home. The former employee reported that many of their appraisals were not performed by licensed appraisers, but rather by realtors who had an incentive to inflate the value of the appraisals to achieve higher commission on their future home sales.

(4) Other Actions Against Morgan Stanley Confirm the Former Employees' Accounts

611. The reports from former employees discussed above are consistent with reports from former Clayton and Morgan Stanley employees set forth in other actions pending against Morgan Stanley.

612. For example, plaintiffs in *Allstate Insurance Company et al. v. Morgan Stanley & Co. et al.*, Index No. 651840/2011 (Sup. Ct. N.Y. July 5, 2011), conducted interviews of several Clayton or Morgan Stanley employees whose statements provide additional evidence that the Morgan Stanley Defendants systematically disregarded their underwriting guidelines during the relevant period.

613. The *Allstate v. Morgan Stanley* plaintiffs spoke to a former Clayton official who worked as a Clayton due diligence underwriter from 2003 through 2007 and conducted due diligence on loans for the Morgan Stanley Defendants. This former Clayton official

> confirmed that Morgan Stanley made exceptions on loans with high DTIs, and purchased loans even though borrowers' DTI ratios were not based on the fully indexed rate, but on the initial teaser rate . . . . Morgan Stanley did not consider the borrower's ability to pay the full rate after the initial teaser rate expired, and would purchase and securitize interest-only loans in which borrowers were qualified at the initial start rate.

614. The *Allstate v. Morgan Stanley* plaintiffs also spoke to a former Morgan Stanley and Clayton employee with intimate knowledge of the Morgan Stanley Defendants' due diligence and loan purchasing practices who "confirmed that Morgan Stanley employees were well aware of the poor quality of loans Morgan Stanley purchased and securitized and said that Morgan Stanley transaction managers would discuss the impact of DTI levels at weekly meetings." This employee witness provided detailed information to the *Allstate v. Morgan Stanley* plaintiffs regarding the depth of the Morgan Stanley Defendants' misconduct:

> Morgan Stanley would itself degrade the quality of the RMBS by turning "full documentation" loans – which require the borrower to validate the income and other information in the loan application – into "stated income" loans, where such proof of income is not required, in order to pay a lower price to acquire the loan and increase its own profit. . . . [T]his was Morgan Stanley's way of exploiting the fact that it routinely purchased loans that never should have been originated in the first place, knowing that these originators would capitulate because they depended on Morgan Stanley's willingness to continue buying their product. Similarly, when a full documentation loan showed that the borrower's income was insufficient, Morgan Stanley would shred the documentation, and tell the originator to get a new, "stated" income, that made the loan appear reasonable. . . . Morgan Stanley did this to increase its own profits, which were dependent on the spread between what Morgan Stanley paid for a given loan pool and what it received from selling those loans into a securitization.

615. The *Allstate* plaintiffs also interviewed a former Morgan Stanley employee who served as a distressed asset manager at Morgan Stanley from January 2007 to June 2008. According

to this confidential witness, "all of the loans he looked at had some deficiencies." This confidential witness was formerly director of risk and compliance at Lydian Trust Securities ("Lydian") from June 2003 to October 2005. Lydian performed reviews of Morgan Stanley loans that were to be included in securitizations. According to the *Allstate* plaintiffs, this confidential witness said that

> Morgan Stanley was not concerned with underwriting compliance because Morgan Stanley knew that the defectively originated loans could be sold to investors. . . . Morgan Stanley executives met with Lydian and made clear to Lydian that Morgan Stanley wanted loans; Morgan Stanley wanted fulfillment. As such, [this confidential witness] explained that while auditing loans for Morgan Stanley, reporting deficiencies and exceptions on loans was pointless because Morgan Stanley was willing to accept loans on an exception basis. . . . [A]t least 80% of the loans that [this confidential witness] reviewed contained deficiencies and should not have been purchased.

4. Morgan Stanley & Co.'s Liability as an Underwriter of the Morgan Stanley Certificate

616. MS&Co. made the false and misleading statements alleged above, which were contained in the Prospectus Supplement endorsed and used by MS&Co. in the sale of certificates to investors.

617. As underwriter, MS&Co. edited, drafted and controlled the content of the MSM 2005-5AR Trust's Offering Materials, including with respect to the material misstatements and omissions alleged above. In connection with its due diligence conducted in connection with the offering of the Certificates to Plaintiffs, MS&Co. received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject trusts. As underwriter, MS&Co. then used and disseminated these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

618. MS&Co., as an affiliate of the other Morgan Stanley Defendants, had knowledge that Morgan Stanley, as alleged herein, (1) failed to adhere to underwriting standards when it pooled

mortgage loans for its RMBS, including for the MSM 2005-5AR Trust; and (2) provided distorted information to the rating agencies that was purposefully manipulated to meet the targeted rating. Further, MS&Co. knew, or was reckless in not knowing, of the defective loans in the MSM 2005-5AR Trust as a result of its due diligence performed as an underwriter for the MSM 2005-5AR Trust. MS&Co. had access to the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans Morgan Stanley deposited in the MSM 2005-5AR Trust had a practice of routinely and systematically disregarding the stated underwriting standards.

619. MS&Co. also knew that mortgage loans deposited into the MSM 2005-5AR Trust were not properly underwritten because MS&Co. was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged herein. In addition to the MSM 2005-5AR Trust, MS&Co. underwrote and sold many other RMBS sponsored by Morgan Stanley and had in that context gained inside knowledge of the Company-wide poor quality loan underwriting standards and practices.

F. RALI

1. Description of the RALI Certificates

620. Union Central purchased Certificates on several occasions in 2005 and 2006 from various Trusts whose depositor was defendant Residential Accredit.

621. The following purchases made by Union Central represent a total investment of over $31.5 million:

CUSIP	Certificate	Issuing Entity	Depositor	Underwriter(s)	Issue Date	Purchase Date
76110H5E5	RALI 2005-QA5 M-3	RALI Series 2005-QA5 Trust	Residential Accredit	RFS	4/1/2005	9/27/2005
7661118FQ6	RALI 2005-QA9	RALI Series	Residential	UBS Securities	8/1/2005	9/9/2005

	M-1	2005-QA9 Trust	Accredit	LLC ("UBS");		
761118AQ1	RALI 2005-QS7 M-3	RALI Series 2005-QS7 Trust	Residential Accredit	CGMI; RFS; UBS	6/1/2005	7/14/2005
761118BK3	RALI 2005-QS9 M-3	RALI Series 2005-QS9 Trust	Residential Accredit	Bear, Stearns & Co. Inc; UBS; RFS	6/1/2005	7/19/2005
761118JU3	RALI 2005-QS14 I-M-1	RALI Series 2005-QS14 Trust	Residential Accredit	Deutsche Bank Securities Inc. ("DB"); RFS; J.P. Morgan Securities Inc.	9/1/2005	11/13/2007
761118VP0	RALI 2006-QS2 II-M-1	RALI Series 2006-QS2 Trust	Residential Accredit	(RBS) Greenwich Capital Markets, Inc. ("RBS"); RFS	2/1/2006	11/13/2007
74922EBE8	RALI 2006-QS6 II-M-1	RALI Series 2006-QS6 Trust	Residential Accredit	DB; Lehman Brothers Inc.; RFS	6/1/2006	11/13/2007
74922RBF6	RALI 2006-QS18 II-M-1	RALI Series 2006-QS18 Trust	Residential Accredit	RBS; RFS; CGMI	12/1/2006	1/9/2007
74922RBG4	RALI 2006-QS18 II-M-2	RALI Series 2006-QS18 Trust	Residential Accredit	RBS; RFS; CGMI	12/1/2006	1/9/2007
74922RBH2	RALI 2006-QS18 II-M-3	RALI Series 2006-QS18 Trust	Residential Accredit	RBS; RFS; CGMI	12/1/2006	1/9/2007

2. False and Misleading Statements in RALI's Offering Materials

a. RALI Issued False and Misleading Statements About Compliance with Underwriting Standards

622. RALI falsely assured investors in each of the RALI Series Trusts' Offering Materials that it and its originators had complied with underwriting standards for the mortgages in the collateral pool.

623. The RALI Offering Materials falsely represented that RALI expected its originators to comply with underwriting procedures consistent with applicable law:

> The depositor [*i.e.*, defendant Residential Accredit] expects that the originator of each of the mortgage loans will have applied, consistent with applicable federal and state laws and regulations, underwriting procedures intended to evaluate the borrower's credit standing and repayment ability and/or the value and adequacy of the related property as collateral.

624. The Prospectuses also falsely represented the review done by the RFC, whose function was to gather the mortgages from the originators and sell them to the depositor (defendant Residential Accredit) to be placed in the collateral pool for the RMBS.

> The level of review by Residential Funding Corporation, if any, will vary depending on several factors. Residential Funding Corporation, on behalf of the depositor, typically will review a sample of the mortgage loans purchased by Residential Funding Corporation for conformity with the applicable underwriting standards and to assess the likelihood of repayment of the mortgage loan from the various sources for such repayment, including the mortgagor, the mortgaged property, and primary mortgage insurance, if any. . . . In addition, Residential Funding Corporation may conduct additional procedures to assess the current value of the mortgaged properties. Those procedures may consist of drive-by appraisals, automated valuations or real estate broker's price opinions. . . . In its underwriting analysis, Residential Funding Corporation may also consider the applicable Credit Score of the related mortgagor used in connection with the origination of the mortgage loan, as determined based on a credit scoring model acceptable to the depositor.

625. The Prospectuses for each of the other Certificates contained the same representations regarding RFC's underwriting before selling to Residential Accredit.

626. The RALI Offering Materials' statements also misled investors about defendant Residential Accredit's use of underwriting standards. For example, the RALI 2005-QA5 Prospectus represented:

> With respect to the depositor's underwriting standards, as well as any other underwriting standards that may be applicable to any mortgage loans, such underwriting standards typically include a set of specific criteria by which the underwriting evaluation is made. However, the application of the underwriting standards does not imply that each specific criterion was satisfied individually. Rather, a mortgage loan will be considered to be originated in accordance with a given set of underwriting standards if, based on an overall qualitative evaluation, the loan is in substantial compliance with the underwriting standards. For example, a mortgage loan may be considered to comply with a set of underwriting standards, even if one or more specific criteria included in the underwriting standards were not satisfied, if other factors compensated for the criteria that were not satisfied or if the mortgage loan is considered to be in substantial compliance with the underwriting standards.

627. The Prospectuses for each of the other Certificates contained the same misrepresentations about compensation factors.

(1) RALI's Expanded Criteria Program

628. The RALI Trusts were composed predominately of Alt-A mortgages. RALI promised investors that these mortgages conformed to their "Expanded Criteria Program" and that Program's "Seller's Guide" for underwriting. In fact, the Program's title was a misnomer. Instead of "expanding" criteria, the Program permitted a lax review requiring reduced criteria. Undisclosed to investors was the fact that RALI hid behind the Expanded Criteria Program's loosened standards in order to underwrite mortgages without regard to ***any*** criteria at all.

629. In choosing originators of mortgages under the purview of the Expanded Criteria Program, RFC was supposed to adhere to the qualifications in the program's Seller's Guide. According to the RALI 2005-QA5 Trust:

> In determining whether to approve a mortgage collateral seller, Residential Funding Corporation generally considers, among other things: the financial status of the mortgage collateral seller; the previous experience of the mortgage collateral seller in originating mortgage loans and its potential origination volumes; the prior delinquency and loss experience of the mortgage collateral seller (if available); the underwriting standards employed by the mortgage collateral seller and its quality control procedures; and, if applicable, the servicing operations of the mortgage collateral seller.

630. Describing the Expanded Criteria Program's underwriting standards, RALI represented in the RALI 2005-QA5 Trust:

> In accordance with the Seller Guide, the Expanded Criteria Program Seller is required to review an application designed to provide to the original lender pertinent credit information concerning the mortgagor. As part of the description of the mortgagor's financial condition, each mortgagor is required to furnish information, which may have been supplied solely in the application, regarding its assets, liabilities, income (except as described below), credit history and employment history, and to furnish an authorization to apply for a credit report which summarizes the borrower's credit history with local merchants and lenders and any record of bankruptcy. The mortgagor may also be required to authorize verifications of

> deposits at financial institutions where the mortgagor had demand or savings accounts. . . .
>
> Based on the data provided in the application and certain verifications, if required, a determination is made by the original lender that the mortgagor's monthly income, if required to be stated, will be sufficient to enable the mortgagor to meet its monthly obligations on the mortgage loan and other expenses related to the property, including property taxes, utility costs, standard hazard insurance and other fixed obligations.

631. RALI further represented in the Prospectus for RALI Series 2005-QA5:

> Prior to assigning the mortgage loans to the depositor, Residential Funding will have reviewed the underwriting information provided by the mortgage collateral sellers for most of the mortgage loans and, in those cases, determined that the mortgage loans were generally originated in accordance with or in a manner generally consistent with the underwriting standards described in the Seller Guide.

632. The above misrepresentations were repeated in the other RALI Prospectuses.

633. Finally, RALI also represented in its Offering Materials that it hired third parties to review compliance with its underwriting criteria: "A portion of the mortgage loans typically will be reviewed by Residential Funding Corporation or by a designated third party for compliance with applicable underwriting criteria."

b. RALI Issued False or Misleading Statements About Appraisals and LTV Ratios

634. RALI misrepresented the validity and accuracy of the appraisals used for loans packaged into RMBS it sold to Plaintiffs. In each of the RALI Trust's Offering Materials, RALI purported to describe the role of appraisals: "The adequacy of a mortgaged property as security for repayment of the related mortgage loan generally is determined by an appraisal in accordance with appraisal procedure guidelines described in the Seller Guide." In fact, any determination that the collateral was adequate for supporting the loan was false because appraisals were systematically inflated.

635. With respect to the RALI Series 2005-QA5 Trust, the Prospectus stated:

> The appraisal procedure guidelines generally require the appraiser or an agent on its behalf to personally inspect the property and to verify whether the property was in good condition and that construction, if new, had been substantially completed. The appraisal will have considered a market data analysis of recent sales of comparable properties and, when deemed applicable, an analysis based on income generated from the property or replacement cost analysis based on the current cost of constructing or purchasing a similar property. The appraiser is required to consider a market data analysis of recent sales of comparable properties and, when deemed applicable, an analysis based on income generated from the property, or replacement cost analysis based on the current cost of constructing or purchasing a similar property.

636. The Prospectuses for each of the Certificates contained the same representations regarding the manner in which appraisals were conducted with respect to loans underlying the Certificates.

637. The RALI Series 2005-QA5 Prospectus also stated:

> The underwriting standards applied by an originator typically require that the underwriting officers of the originator be satisfied that the value of the property being financed, as indicated by an appraisal or other acceptable valuation method as described below, currently supports and is anticipated to support in the future the outstanding loan balance.

638. Each of the other Prospectuses for the RALI Series Trusts contained the same representation regarding the originators' assessment of the appraisal value in relation to the loan.

639. Despite RALI's knowledge of distortions in the LTV ratios, due to inflated appraisals, the RALI Series Trusts' Prospectuses provided investors with the inaccurate weighted average LTV ratios of the underlying mortgage pools. The chart below sets forth the disclosed LTV ratios for the RALI Certificates:

Certificates	LTV Ratio[5]
RALI 2005-QA5 M-3	76.29%
RALI 2005-QA9 M-1	76.76%

[5] *Denotes that the relevant Class of Loans is supported by a sub-group of loans rather than the entire underlying pool. The LTV ratio is listed accordingly.

Certificates	LTV Ratio[5]
RALI 2005-QS7 M-3	77.03%
RALI 2005-QS9 M-3	76.55%
RALI 2005-QS14 I-M-1	67.33%*
RALI 2006-QS2 II-M-1	65.89%*
RALI 2006-QS6 II-M-1	66.90%*
RALI 2006-QS18 II-M-1, II-M-2, and II-M-3	64.89%*

640. RALI further represented in each Prospectus for the Trusts at issue: "Under the depositor's underwriting standards, a mortgage collateral seller is usually permitted to provide secondary financing to a mortgagor contemporaneously with the origination of a mortgage loan, provided that the combined LTV ratio is not greater than 100%."

c. RALI Issued False and Misleading Statements about the Underlying Borrowers' Ability to Support the Loans

641. RALI's Offering Materials contained misstatements concerning whether the borrowers for the underlying mortgages could maintain their loan payments in relation to their income.

642. For example, the Prospectus for RALI Series 2005-QA5 represented: "Once all applicable employment, credit and property information is received, a determination is made as to whether the prospective borrower has sufficient monthly income available to meet the borrower's monthly obligations on the proposed mortgage loan and other expenses related to the home, including property taxes and hazard insurance, and other financial obligations and monthly living expenses."

643. The other RALI Trusts made substantially the same representation. These statements were false because RALI discarded underwriting standards and failed to properly evaluate borrowers' ability to pay their mortgages.

d. RALI Issued False and Misleading Statements About Owner Occupancy

644. The Offering Materials contained specific disclosures about the occupancy status of the loans underlying the Certificates. The following chart sets forth the occupancy status disclosed by RALI with respect to the certificates:[6]

Certificates	Primary Residence	Secondary/ Vacation Residence	Investment Property	Total Number of Loans	Percentage of Owner Occupied Loans
RALI 2005-QA5 M-3	637	22	126	785	83.11%
RALI 2005-QA9 M-1	1,972	68	445	2,485	83.49%
RALI 2005-QS7 M-3	1,225	46	664	1,935	77.16%
RALI 2005-QS9 M-3	1,456	43	496	1,995	77.63%
RALI 2005-QS14 I-M-1*	517	38	237	792	69.59%
RALI 2006-QS2 II-M-1*	455	32	292	779	65.71%
RALI 2006-QS6 II-M-1*	380	20	163	563	74.79%
RALI 2006-QS18 II-M-1, II-M-2, and II-M-3*	373	30	116	519	76.90%

645. As alleged below, the data provided by RALI as set forth in the above table was materially misstated because owner-occupancy rates for the property that collaterized the loans in the Trust were materially lower than represented which greatly increase the risk of substantial default and loss on such loans.

e. RALI Issued False and/or Misleading Statements About the Removal of Mortgages

646. The Offering Materials represented that the trustees of the RALI Series Trusts reviewed the mortgage documents in order to remove any materially defective mortgages. The following statement is found in the Prospectus for RALI 2006-QS18, and is substantially similar to statements describing the trustee's removal power found in the other RALI Series Trusts' Prospectuses:

---

[6] *Denotes that the relevant Class of Loans is supported by a sub-group of loans rather than the entire underlying pool. The owner occupancy levels are listed accordingly.

> Within 45 days after receipt thereof, the trustee or the custodian, as applicable, will review the mortgage notes delivered to it. If any such mortgage note is found to be defective in any material respect, the trustee or the custodian shall promptly notify [RFC] or the designated seller, if any, and the depositor. If [RFC] or the designated seller, as the case may be, cannot cure the defect within 60 days. . . . RFC] or designated seller, as applicable will be obligated no later than 90 days after such notice . . . to either repurchase the related mortgage loan . . . from the trustee or substitute a new mortgage loan.

In fact, RALI knew that defective mortgage loans were not being removed from the Trusts.

f. RALI Issued False and/or Misleading Statements Regarding the Ratings of its Trusts

647. For RALI to sell its RMBS, it was necessary that its tranches be rated as disclosed in the Prospectuses. Each Prospectus contained substantially the same language making the sale of RMBS conditional on achieving the stated rating in the Prospectus for a tranche: "It is a condition of the issuance of the [specified Class of] Certificates that they be rated not lower than [the specified rating] by [S&P, Moody's or Fitch]."[7]

648. Since the sale of its RMBS was conditioned on achieving a certain rating, RALI solicited evaluations from credit rating agencies on the probability of default for the underlying mortgage pool. The representations regarding the three credit rating agencies' ratings were substantially the same among the RALI Series Trusts:

- *Moody's*: The ratings assigned by Moody's to the offered Certificates address the likelihood of the receipt by the offered certificateholders of all distributions to which they are entitled under the pooling and servicing agreement. Moody's ratings reflect its analysis of the riskiness of the mortgage loans and the structure of the transaction as described in the pooling and servicing agreement.

---

[7] For example, the Prospectus for RALI 2005-QA9 states: "It is a condition of the issuance of the Class M-1, Class M-2 and Class M-3 Certificates that they be rated not lower than 'AA,' 'A' and 'BBB,' respectively, by Standard & Poor's, and 'Aa2,' 'A2' and 'Baa2,' respectively, by Moody's." As another example, the Prospectus for RALI 2005-QS7 states: "It is a condition of the issuance of the Class M-1, Class M-2 and Class M-3 Certificates that they be rated not lower than 'AA,' 'A' and 'BBB', respectively, by Fitch."

- *S&P*: The ratings assigned by S&P to mortgage pass-through certificates address the likelihood of the receipt by certificateholders of payments required under the pooling and servicing agreement. S&P's ratings take into consideration the credit quality of the mortgage pool, structural and legal aspects associated with the Certificates, and the extent to which the payment stream in the mortgage pool is adequate to make payments required under the Certificates.

- *Fitch*: The ratings assigned by Fitch to mortgage pass-through certificates address the likelihood of the receipt by certificateholders of all distributions to which they are entitled under the transaction structure. Fitch's ratings reflect its analysis of the riskiness of the underlying mortgage loans and the structure of the transaction as described in the operative documents.

649. According to RALI's representations in its Prospectuses, the assigned credit ratings reflected the likelihood that investors like Union Central would receive the distributions to which they were entitled. Put simply, the rating was supposed to describe the riskiness of the investment in the tranche.

650. In reliance on the representations in the Prospectuses, Union Central purchased Certificates from RALI rated "investment grade," with many of the Certificates receiving an almost perfect rating – supposedly meaning that the obligor has a very strong capacity to meet its financial commitments. For example, S&P assigned "AA" to many of the RALI Series Trusts at issue. The following table sets forth the ratings of the Certificates when purchased by Union Central:

Certificate	Original Rating
RALI 2005-QA5 M-3	BBB
RALI 2005-QA9 M-1	AA
RALI 2005-QS7 M-3	BBB
RALI 2005-QS9 M-3	BBB
RALI 2005-QS14 I-M-1	AA
RALI 2006-QS2 II-M-1	AA
RALI 2006-QS6 II-M-1	AA
RALI 2006-QS18 II-M-1	AA
RALI 2006-QS18 II-M-2	A
RALI 2006-QS18 II-M-3	BBB

651. In obtaining these ratings for the subject Certificates, RALI concealed the adverse information alleged herein from the rating agencies. Had the rating agencies known the true value of

the loans underlying the Certificates, the Certificates would have been rated significantly lower, or not at all.

3. Defendants' Statements Were Knowingly False and Misleading

652. RALI knew, or was reckless in not knowing, that the statements identified above were materially false and misleading, and/or it had omitted material facts necessary to make the statements made not misleading. As set forth herein, RALI had actual knowledge that the stated underwriting guidelines were not adhered to and, rather than provide truthful information and disclosures to Union Central and other investors, used such knowledge to reap massive profits for itself.

a. RALI Abandoned Its Underwriting Standards

653. Despite the representations regarding compliance with the underwriting guidelines, in actuality, RALI's loan originators had – with the knowledge, if not approval, of RALI – abandoned the stated underwriting guidelines with respect to loans in the subject Trusts.

654. RALI's originators abandoned the fundamental principle that underwriting was supposed to meaningfully evaluate: (1) the borrowers' ability to repay the debt; and (2) the lender and/or investors' ability to recover against the pledged collateral in the event of a default. Instead, originators, using RALI's financing and encouraged by RALI and other investment banks' insatiable appetite for mortgages to feed their loan securitization businesses, approved loans they knew were based on falsified information and did not comply with any of the stated underwriting guidelines.

655. In fact, in its 2011 Form 10-K, Ally admitted that its underwriting practices were inadequate: "The total exposure of the applicable Mortgage Companies to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008, specifically the 2006 and 2007 vintages that were originated and sold prior to enhanced underwriting

standards and risk-mitigation actions implemented in 2008 and forward." In reaction to the damage done by its RMBS business, Ally discontinued its activities in "lending to real estate developers and homebuilders in the United States and the United Kingdom; purchasing, selling and securitizing nonconforming residential mortgage loans (with the exception of U.S. prime jumbo mortgage loans) in both the United States and internationally; and certain conforming origination channels closed in 2008 and our mortgage reinsurance business."

b. The Skyrocketing Default Rates on RALI Trusts Are Evidence of Abandoned Underwriting

656. The Certificates purchased by Union Central were supposed to be stable, long-term investments backed by investment-grade credit ratings. However, the extraordinary number of defaults on the mortgage loans underlying Union Central's Certificates is prima facie evidence that the stated underwriting standards and loan characteristics represented in the Offering Materials were materially false and misleading.

657. The following chart sets forth the delinquency, bankruptcy or foreclosure amounts, as well as collateral cumulative losses as of June 2010, for certain RALI Certificates purchased by Union Central:

Certificate	Original Deal Size	Delinquent, Bankruptcy, Foreclosure, REO Actual Balance	Collateral Cumulative Losses
RALI 2005-QA5	$236,761,800	$7,083,339	$4,564,844
RALI 2005-QA9	$650,482,392	$73,332,830	$10,602,032
RALI 2005-QS7	$369,979,162	$33,499,972	$5,883,848
RALI 2005-QS9	$370,978,359	$31,286,652	$3,712,571
RALI 2005-QS14 (Group 1)	$130,938,205	$4,267,392	$474,243
RALI 2006-QS2 (Group 2 and 3)	$131,448, 942	$8,456,630	$178,560
RALI 2006-QS6 (Group 2)	$106,652,100	$6,982,926	$407,716
RALI 2006-QS18	$104,211,498	$8,477,978	$1,364,709

658. Had the loans been issued in accordance with the stated underwriting guidelines, and had the loans in fact had the characteristics described in the Offering Materials, the rate of delinquency, bankruptcy and foreclosure would be far lower than the current rates. Moody's maximum expected collateral losses for the life of the certificates, where known, is set forth in the table below:

Certificate	Maximum Expected Loss
RALI 2005-QA5	N/A
RALI 2005-QS14	$589 221.92
RALI-2006-QS2	N/A
RALI-2006-QS6	NA
RALI 2005-QS7	$2 774 843.72
RALI 2005-QS9	$2 596 848.51
RALI-2005-QA9	$5 854 341.53
RALI-2006-QS18	N/A

c. RALI Used Inflated Appraisals and LTV Ratios

659. The RALI Offering Materials' descriptions of appraisal standards, as well as the LTV ratios derived from such appraisals, were materially false and misleading. Undisclosed in the Offering Materials, and in violation of any legitimate appraisal standards, RALI used appraisals that had been manipulated and inflated to guarantee that the collateral property would be valued at a price sufficient to support the loan.

660. Recent analyses using modeling performed by other parties who purchased RALI RMBS during the relevant period confirm that appraisals connected with RALI's securitizations in 2005-2006 were routinely inflated. For instance, the plaintiffs in *Mass. Mutual Life Ins. Co. v. Residential Funding Co.*, No. 3:11-cv-30035 (D. Mass. Feb. 9, 2011) ("*Mass. Mutual*"), conducted an AVM analysis of a sample of the property underlying the RALI offerings at issue in that litigation. *Mass. Mutual* Complaint (Dkt. No. 1), ¶¶74-181. The RALI securitizations at issue in the

Mass. Mutual case occurred at the same time and are essentially similar to the securitizations sold to Plaintiffs. The *Mass. Mutual* plaintiffs' analysis demonstrates that valuation of loans underlying their certificates were materially and consistently inflated, and as a result, the stated LTV ratios were materially overstated, which in turn greatly increased the risk of default on those loans.

661. The *Mass Mutual* Plaintiffs' AVM analysis revealed that all of the RALI loan pools at issue in the *Mass. Mutual* case should have disclosed significantly higher weighted average LTV ratios. The following chart summarizes the findings of the *Mass. Mutual* plaintiffs' forensic review:

Trust	Weighted Average LTV of the Collateral Loans as Represented in the Offering Materials	Actual Weighted Average LTV Per Forensic Review	Percentage of Collateral Loans with LTV of Greater than 90%	Actual Percentage of Collateral Loans with LTV of Greater than 90 Per Forensic Review
RALI 2005-QO3	73.84%	81.35%	0.51%	16.56%
RALI 2005-QO4	74.25%	83.71%	1.21%	19.81%
RALI 2006-QA6	76.97%	85.58%	1.01%	18.84%
RALI 2006-QO1	74.51%	84.06%	1.61%	24.71%
RALI 2006-QO3	74.31%	85.53%	1.22%	20.94%
RALI 2006-QO14	74.27%	83.10%	.92%	21.64%
RALI 2006-QO5	74.67%	84.15%	1.26%	19.54%
RALI 2006-QO6	74.66%	85.69%	1.56%	23.98%
RALI 2006-QO9	75.15%	89.46%	.54%	32.42%

662. The FHFA also brought a lawsuit against the RALI Defendants regarding more than $6 billion in RMBS purchased from Trusts sponsored and underwritten by RALI. *FHFA v. Ally Financial Inc., et al.*, No. 11-7010 (S.D.N.Y.) ("*FHFA v. RALI*") originally filed in the Supreme Court of the State of New York, Index No. 652441/2011 (Sept. 2, 2011). The FHFA performed a similar AVM review to determine the accuracy of the LTV ratios in the RALI Trusts at issue there. The FHFA found that for every securitization they analyzed, the percentage of loans having LTV

ratios 80% or less was overstated. Further, the percentage of loans having LTVs of over 100% ranged from 2% to as high as 23%. *FHFA v. RALI* Complaint, ¶¶99-104.

663. Property valuations were overstated, thereby decreasing stated LTV ratios, through the manipulation of the appraisals conducted on the underlying properties. Instead of conducting appraisals designed to accurately value the subject property in compliance with USPAP, many of the appraisals conducted on the underlying properties, if they were conducted at all, were designed to hit valuation targets that would allow loans to be funded and sold in RMBS.

664. As set forth in §§IV.F. and IV.H.2., RALI was a participant in the routine practice of pressuring appraisers to misstate appraisals in order to ensure that loans were funded regardless of the quality of the underlying collateral.

d. RALI Falsified Debt-to-Income Ratios

665. RALI's Offering Materials materially misstated the thoroughness of RALI's evaluation of whether the borrowers' income would be able to cover their mortgage debt. In addition, RALI systematically understated the DTI ratios provided in RALI's loan schedules, even though it knew the rating agencies relied on that misstated data for their ratings.

666. RALI and its originators knew that borrowers routinely falsified their stated incomes in order to have loans approved. In the case of stated income loans, for example, RALI and its originators knew that many borrowers claimed incomes that did not come anywhere near a reasonable level for their stated occupations.

667. Plaintiffs have examined certain of the loans contained in the RALI 2005-QA9, RALI 2005-QS7, RALI 2005-QS9, and RALI 2006 QS18 Trusts and found numerous examples of loans where DTI ratios were falsified and where obvious signs of fraud or misrepresentations were either accepted or ignored.

(1) RALI 2005-QA9

668. This Trust contained a loan from April 2005 meant to refinance what was claimed to be a primary residence in Draper, Utah. However, when the borrower went bankrupt ***within six months*** of completing the loan, the borrower listed a different primary address on the bankruptcy filings. That there was a failure by RALI to investigate the borrower's ability to keep up with its mortgage payments is clear here. Not only did bankruptcy occur immediately following the mortgage's closure, but the stated DTI is 33% on the mortgage loan schedule was significantly lower than the borrower's true DTI, which was in excess of 102% to 115%.

669. Another loan in this Trust was for refinancing a primary residence in Minneapolis, Minnesota in June 2005. Had RALI diligently investigated this loan file they would have found that within three months of the refinancing, the borrower had taken on two other debts that were over $100,000. Even more egregiously, based on public records, the borrower had negative income for 2005, reflecting a potentially ***infinite*** DTI, rather than the 38% reported in the loan schedule.

670. Plaintiffs' investigation uncovered another loan from this Trust that had potentially infinite DTI, though the loan schedule reported a DTI of 42%. This mortgage, dated May 2005, was meant to provide 100% financing for a couple's property in Lathrop, California. The mortgage was in the name of the wife. Because her name was on the purchase papers, only her income should have been considered to qualify her for the loan. However, public records list her occupation as a "homemaker" suggesting RALI failed to fully investigate the source of income that would support the mortgage. Even with the total income the couple reported from employment and unemployment disbursements, it should have been obvious that the income could not likely support the debt.

(2) RALI 2005-QS7

671. Another loan included in the Trust was dated May 2005 for a property in Memphis, Tennessee. Based on available public records, the loan was to refinance one of the thirty-nine investment properties from which the borrower ended up incurring over $2.5 million in secured debt owed. The borrower was a self-employed contractor who, despite any apparent prior experience in investing or managing property, went on a purchasing spree from 2003 to 2005 with a credit score of 632 and no reported income in 2005. Without an income, the borrower's DTI was infinite, not the reported 38%.

(3) RALI 2005-QS9

672. A mortgage included in this Trust was for the purchase in May 2005 of a home in Springfield, Illinois as an investment property. The filing used "stated/easy" documentation and listed a DTI of 28%. In fact, the borrower's DTI exceed 100%. The property was one among several properties purchased by the borrower over the preceding three years; however, preceding property purchases were apparently not disclosed on the filing. In addition, the borrower was an agent of the originator, which under typical underwriting guidelines, should have required full documentation since the transaction was not at arm's length. However, the borrower exploited the stated-doc loan to more easily obtain the property while the originator booked a profit on the transaction, and it was then securitized and sold to investors, including Plaintiffs.

673. This Trust also included a mortgage dated August 2004 for a property in Jasper, Georgia. The borrower's credit score was 655 and the recorded DTI was 41%. However, according to public records, the borrower's true DTI was 530%. Also, contrary to the representation on the loan schedule, the property was not owner occupied within sixty days of closing. Instead, the property continued to be under construction for more than six months.

674. Another loan refinanced a property in Bay City, Michigan in May 2005. Based on public records, the borrower's DTI was 86% rather than the 44% reported on the loan schedule. Yet another loan dated April 2005 to purchase property in Wesley Chapel, Florida listed a DTI of 35% when public records indicated a DTI as high as 132%. The borrower for that loan had to obtain a second lien on the property within one year of completing the mortgage put into the Trust.

(4) RALI 2006-QS18

675. The RALI 2006-QS18 Trust included the refinance in November 2006 of a home in Stone Mountain, Georgia. The lender was HomeComings, a RALI affiliate. Despite underwriting guidelines, the borrower had not had a stable and continuing income for the two years prior to the loan's extension. Additionally, underwriting guidelines generally disapprove a borrower who started a business within one month prior to the completion of the loan. This borrower, however, had apparently started a real estate investment business through an LLC within the month prior to completing the loan. Further demonstrating the lack of diligent underwriting, the borrower for this mortgage had a credit score of 643 and a DTI in excess of 136%, misstated as 41%. By the time the borrower filed for bankruptcy, the borrower held eighteen mortgages, including refinancings that the borrower would complete sometime within two months of obtaining the initial loan.

676. Another mortgage pooled into the Trust refinanced a property in Lawndale, California. The lender was HomeComings, and according to public records, the borrower had a credit score of 629 and an occupation involving janitorial services. The borrower already owned four properties at the time the loan was completed and had a reported DTI of 50% – well above the industry's accepted level. Yet even with the many red flags that a proper due diligence review should have revealed, the loan was allowed into the Trust.

677. RALI's rush to securitize mortgages resulted in granting loans to borrowers who could not keep up with payments on their mortgages. Further, RALI's failure to screen out bad loans meant that the false DTIs included in the loan schedules distorted the ratings assessed by the rating agencies for the Trusts. Investors, such as Plaintiffs, who had relied on the distorted ratings in purchasing the Certificates, suffered losses when the borrowers inevitably became delinquent.

e. RALI Falsified Owner-Occupancy Rates

678. In addition to the above examples which demonstrate that RALI's Offering Materials misrepresented the owner-occupancy rates of subject properties underlying the Trusts, other litigants' loan-level analysis of thousands of loans securitized by RALI at the same time as the Certificates at issue here, also show RALI's widespread practice of routinely misstating owner-occupancy rates with respect to the loans underlying RALI RMBS offerings during the relevant time period. In addition to their LTV analysis, the *Mass. Mutual* plaintiffs undertook a sophisticated forensic analysis to determine whether a given borrower actually occupied the property as claimed. *Mass. Mutual* Complaint, ¶¶182-203. The *Mass. Mutual* plaintiffs analyzed tax records, credit records, bills, property records and lien records, to determine whether a borrower was actually living in the property subject to the loan.

679. The results of the *Mass. Mutual* plaintiffs' analysis demonstrates that the percentage of owner-occupied properties disclosed by RALI in their Prospectuses was consistently false and that the true rate was much lower, and thus those RMBS investments were much less safe than RALI led investors to believe. This was highly material because borrowers are more likely to keep up with their payments on a property in which they live than on a second home or investment property. The following chart shows the results of their analysis:

Certificate	% Represented in Offering Materials as Primary Residences	Actual %	Overstatement
RALI 2005-QO3	84.16%	73.26%	10.90%
RALI 2005-QO4	79.62%	68.17%	11.45%
RALI 2006-QA6	72.96%	60.42%	12.54%
RALI 2006-QO1	81.65%	70.86%	10.79%
RALI 2006-QO3	84.66%	75.49%	9.17%
RALI 2006-QO4	84.37%	72.98%	11.39%
RALI 2006-QO5	85.31%	75.12%	10.19%
RALI 2006-QO6	85.57%	73.21%	12.36%
RALI 2006-QO9	83.86%	71.05%	12.81%

680. As part of its allegations against the RALI Defendants, the FHFA conducted a similar analysis that found RALI had vastly understated the percentage of non-owner-occupied properties. ¶98. The following chart summarizes these FHFA findings:

Certificate (with Supporting Loan Group)	% Represented in Offering Materials as Non-Owner Occupied Residences	Actual %	Understatement
RALI 2005-QO4 (Group I)	18.32%	30.52%	12.19%
RALI 2006-QO4 (Group I)	20.86%	32.62%	11.76%
RALI 2006-QO5 (Group I)	18.87%	29.53%	10.66%
RALI 2006-QO8 (Group II)	18.22%	29.00%	10.78%
RALI 2006-QO9 (Group II)	19.01%	30.22%	11.21%

681. RALI engaged in a consistent pattern of misconduct designed to make the mortgages underlying its securitizations appear to be much safer investments than they actually were. By concealing the fact that there were fewer owner-occupied properties in the Trusts – and therefore that there was a much greater likelihood that borrowers who defaulted on their loan would never cure the default but rather would abandon the property – RALI deceptively made the Trusts appear to be safer investments than they actually were.

f. RALI Knew that Its Originators Violated Underwriting Guidelines

682. While the RALI Offering Materials set forth detailed underwriting guidelines which were supposed to have been applied in evaluating borrowers whose loans were in the Trusts, in fact the stated underwriting guidelines had been abandoned by the loan originators.

683. RALI's originators abandoned the fundamental principle that underwriting was supposed to meaningfully evaluate the borrowers' ability to repay the debt, and the lender and/or investors' ability to recover against the pledged collateral in the event of a default.

684. HomeComings had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to RALI for inclusion in the subject Trusts, as alleged above at §IV.I.

685. Before placing the mortgages into pools for securitization, RALI knew that the quality of the loans did not meet prudent underwriting practices and standards because it also analyzed those loans to determine which ones it would securitize and get off its books. ResCap's 2006 Form 10-K described RALI's decision-making process with respect to whether to retain mortgages on its books or to get them off its book through securitizations sold to investors:

> Our portfolio of residential mortgage loans held for investment and interests that continue to be held from our securitization activities includes some residential mortgage loans we own directly, having decided to hold these loans in our portfolio instead of selling them through whole-loan sales or securitizations. A decision to retain certain assets in our portfolio is dependent upon a variety of factors, including the type of mortgage product, the interest rate environment, general economic conditions, the availability of efficient funding sources and other factors in the capital markets. These factors impact our assessment of the value of the asset and its ability to generate revenues over time.

686. RALI securitized a large percentage of its high-risk, bad loans that had not been properly underwritten and which it knew would go into default, result in losses and would not generate revenues over time, and to avoid this risk it purposefully put those assets into securitizations for investors.

687. RALI also had access to and reviewed the underlying mortgages and actual loan tapes for the loan securitizations sold to Plaintiffs. As part of that review process RALI learned the loans

had not been properly underwritten but it willfully disregarded that the loans did not meet the stated underwriting standards.

688. Indeed, RALI's wrongful loan securitization practice is also confirmed by others' investigations. MBIA Insurance found that "[a]t least 89% of the 4,104 delinquent or charged-off loans" of the RMBS it insured for RALI "were not originated in material compliance with GMAC Mortgage's Underwriting Guidelines." Complaint, *MBIA Insurance Corp. v. GMAC Mortgage, LLC (f/k/a/ GMAC Mortgage Corporation)*, Index No. 600837/2010 (Sup. Ct. N.Y. Apr. 1, 2010) (Dkt. No. 2), ¶6. In another complaint against Defendant RFC, MBIA found that less than 7% of 1,847 mortgage loans reviewed were originated in material compliance with RFC's representations and warranties. Complaint, *MBIA Insurance Corp. v. Residential Funding Co., LLC*, Index No. 603552/2008 (Sup. Ct. N.Y. Dec. 4, 2008) (Dkt. No. 1), ¶47.

689. Ally's 2011 Form 10-K discloses that as a result of its practice of securitizing bad loans Ally had paid out $91 million of original unpaid principal balance through settlements, repurchases, indemnification payments, and rescinded claims due to the junk mortgages it originated and underwrote as of year end 2011.

g. RALI Knew that Its In-House Originator Participated in Discriminatory/Predatory Lending

690. HomeComings, a wholly owned subsidiary of Defendant RFC, was the source of many of the underlying mortgages RALI packaged in the RALI Series Trusts. In a letter dated January 22, 2009, the Federal Trade Commission ("FTC") reported its findings from an "extensive" investigation conducted of HomeComings.[8] The FTC staff concluded that HomeComings had

---

[8] *See* http://www.ftc.gov/os/closings/090122homecomingfinancialclosingletter.pdf.

systematically set higher prices on mortgages for African-American and Hispanic borrowers.[9] The FTC's investigation found that "Homecomings originated the vast majority of its loans through independent brokers" who HomeComings permitted "to assess discretionary charges." Taking advantage of HomeComings' policy, brokers charged African-American and Hispanic borrowers "substantially more for home purchase and refinance loans than similarly-situated non-Hispanic whites" by tacking on higher fees charged at origination or by charging higher interest rates, from which brokers earned greater yield spread premiums from HomeComings. The FTC determined that the disparities based on race in discretionary charges were "substantial, statistically significant, and [could not] be explained by any legitimate underwriting or credit characteristics." By making these loans more expensive than they should have been, HomeComings increased the likelihood of default.

691. According to the FTC's letter, these practices violated federal law – in direct contravention of the representations RALI made in its Offering Materials that its originations complied with federal law. Furthermore, these violations properly should have been stopped by HomeComings' and RALI's quality control over the brokers and the mortgages processed for securitization. The fact that these wrongful practices could thrive within RALI's operations is further indication that RALI had discarded its underwriting standards to ensure the faster accumulation of mortgages, particularly those with higher interest rates, for its RMBS.

---

[9] The letter was to inform that the FTC staff had closed the investigation of HomeComings because it had ceased originating mortgages and its indirect parent company, ResCap, had indicated in a filing with the SEC that HomeComings would likely soon cease to be a going concern. In fact, Ally reported in its 2011 Form 10-K that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations." Furthermore, much of its former business has been extinguished.

h. RALI Purposefully Loosened Its Underwriting Standards to Grow Its Warehouse Lending Program

692. Defendant ResCap was the parent to RFC and Residential Accredit. Its mortgage business featured an enormous multi-billion dollar warehouse lending operation. Warehouse lending provided financing to originators who did not have access to saving deposits and other loan funding sources. It also provided access to and control over originators' underwriting practices. Using RALI's financing the originators were then able to make mortgage loans and sell them back to RALI.

693. Because of its financial arrangements with warehouse lenders, ResCap was essentially committed to buying the loans that secured its warehouse lines regardless of their quality and the results of ResCap's due diligence. ResCap purchased the loans with little or no objection to keep the lenders supplied with capital for paying the fees and interest owed on the lines of credit. It was also important to ResCap that it protect its business relationships with warehouse lenders in order to ensure a steady flow of loans for securitization.

694. Warehouse lenders like ResCap had the ability to put back a loan that failed to meet underwriting standards, but ResCap knew that too many rejections would financially starve those originators. As a result, ResCap was incentivized to accept defective mortgages for RALI securitizations.

695. In fact, ResCap reported in its 2005 Form 10-K filed with the SEC: "We believe we are the largest provider of warehouse lending facilities to correspondent lenders and other mortgage originators in the United States." ResCap claimed this leadership position again in its 2006 Form 10-K. ResCap's lucrative business was fueled by permitting the funding of more and more mortgages, which were then securitized and sold to investors, regardless of whether those loans had been properly underwritten.

696. Furthermore, RALI's position as a source of "warehouse" lines of credit gave it unique knowledge of the conditions under which mortgage loans were originated. The lines of credit allowed RALI to control the origination practices of these lenders and gave RALI an inside look into the true quality of the loans they originated.

(i) Government Investigations Confirm that RALI Failed to Properly Underwrite the Mortgages in the RMBS

697. RALI has been the subject of numerous criminal and regulatory probes related to its mortgage underwriting practices. These investigations further confirm that RALI's misrepresentations were not mere isolated, innocent mistakes, but the result of the company's reckless or intentional misconduct.

698. As Ally reported in its 2011 Form 10-K filed with the SEC, the Federal Reserve Board ("FRB") and FDIC conducted an examination of Ally and ResCap, among other related Ally entities. The FRB entered an FDIC Consent Order on April 13, 2011 requiring the Ally entities "to make improvements to various aspects of [their] residential mortgage loan-servicing business, including compliance programs, internal audit, communications with borrowers, vendor management, management information systems, employee training, and oversight by the boards of the Ally Entities." The Consent Order also requires Ally to "retain independent consultants to conduct a risk assessment related to mortgage servicing activities and, separately, to conduct a review of certain past residential mortgage foreclosure actions."

699. Government-sponsored Freddie Mac and Fannie Mae have also brought actions against Ally, requiring certain of the RALI Defendants to repurchase $285 million of original unpaid principal for mortgages originated in 2004-2008. In addition, certain RALI Defendants made one-time payments to Freddie Mac and Fannie Mae in exchange for a release from repurchase obligation

for mortgage loans sold to the GSEs prior to June 30, 2010. The agreement however, does not release RALI from private label RMBS. (According to the FCIC report, Freddie Mac put back $453 million delinquent loans to Ally.) Indeed, the FHFA, as conservator for Freddie Mac, has brought a lawsuit against RALI for its failed $6 billion investment in Ally Trusts. *FHFA v. RALI* Complaint.

700. Further, on June 29, 2011, the SEC and United States Department of Justice ("DOJ") issued subpoenas as part of an investigation involving Ally's issuance of RMBS. According to a news article on the investigation, the DOJ sought "documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." The SEC investigated "payments Ally received from mortgage originators in exchange for Ally agreeing not to make [the originators] buy the loans back if the borrowers didn't make payments."

701. RALI's abandonment of prudent loan underwriting also had a negative impact on its own financial condition because RALI was unable to securitize and remove from its own books all the bad loans it was originating and acquiring during 2005 through 2007. The United States government continues to control a 74% stake in Ally after bailing it out and as a result of its wrongful conduct. Meanwhile, in March 2012, despite $17 billion taxpayer dollars sunk into Ally, it failed the Federal Reserve's "stress-test."

4. Residential Funding's Liability as an Underwriter of the RALI Certificates

702. RFS made the false and misleading statements alleged above, which were contained in the Prospectus Supplement endorsed and used by RFS in the sale of certificates to investors.

703. As underwriter, RFS edited, drafted and controlled the content of the RALI Trusts' Offering Materials, including with respect to the material misstatements and omissions alleged above. In connection with its due diligence conducted in connection with the offering of the RALI

Certificates to Plaintiffs, RFS received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject Trusts. As underwriter, RFS then disseminated these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

704. RFS, as a subsidiary within RALI, had knowledge that RALI, as alleged herein, failed to adhere to underwriting standards when it pooled mortgage loans for its RMBS, including for the RALI Trusts, and provided distorted information to the rating agencies that was purposefully manipulated to meet the targeted rating. Further, RFS knew, or was reckless in not knowing, of the defective loans in the RALI Trusts as a result of its due diligence performed as an underwriter for the RALI Trusts. RFS had access to the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans RALI deposited in the RALI Trusts had a practice of routinely and systematically disregarding the stated underwriting standards.

705. RFS also knew that mortgage loans deposited into the RALI Trusts were not properly underwritten because RFS was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged herein. In addition to the RALI Trusts, RFS underwrote and sold many other RALI RMBS and had in that context gained inside knowledge of its improper loan securitization practices that were also used for the Trusts.

5. UBS's Liability as an Underwriter of the RALI Certificates

706. UBS Securities made the false and misleading statements alleged above, which were contained in the Prospectus Supplement endorsed and used by UBS Securities in the sale of certificates to investors.

707. As underwriter, UBS Securities edited, drafted and controlled the content of the RALI 2005-QA9, RALI 2005-QS7 and RALI 2005-QS9 Trusts' Offering Materials, including with respect to the material misstatements and omissions alleged above in §V.F. In connection with its due diligence conducted in connection with the offering of the Certificates to Plaintiffs, UBS Securities received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject trusts. As underwriter, UBS Securities then used and disseminated these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

708. UBS Securities also knew that mortgage loans deposited into the RALI 2005-QA9, RALI 2005-QS7 and RALI 2005-QS9 Trusts were not properly underwritten because UBS Securities was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged in Section V.G. In addition to the RALI 2005-QA9, RALI 2005-QS7 and RALI 2005-QS9 Trusts, UBS Securities underwrote and sold many other RMBS, including as alleged below in Section V.G., and had in that context gained inside knowledge of the poor quality loan underwriting.

6. Citigroup Global Markets, Inc's Liability as an Underwriter of the RALI Certificates

709. CGMI made the false and misleading statements alleged above, which were contained in the Prospectus Supplement endorsed and used by CGMI in the sale of Certificates to Plaintiffs.

710. As underwriter, CGMI edited, drafted and controlled the content of the RALI 2005-QS7 and RALI 2005-QS14 Trusts' Offering Materials, including with respect to the material misstatements and omissions alleged above in §V.F. In connection with its due diligence conducted

in connection with the offering of the Certificates to Plaintiffs, CGMI received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject Trusts. As underwriter, CGMI then used and disseminated these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

711. CGMI also knew that mortgage loans deposited into the RALI 2005-QS7 and RALI 2005-QS14 Trusts were not properly underwritten because CGMI was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged in Section V.B. In addition to the RALI 2005-QS7 and RALI 2005-QS14 Trusts, CGMI underwrote and sold many other such RMBS to investors and had in that context gained inside knowledge of the poor quality loan underwriting.

7. Deutsche Bank's Liability as an Underwriter of the RALI Certificates

712. DB Securities acted as the underwriter in the sale of Certificates from the RALI 2006-QS2 and RALI 2006-QS18 Trusts. DB Securities made the false and misleading statements alleged above, which were contained in the Prospectus Supplement endorsed and used by DB Securities in the sale of those Certificates to Plaintiffs.

713. As underwriter, DB Securities edited, drafted and controlled the content of the RALI 2006-QS2 and RALI 2006-QS18 Trusts' Offering Materials, including with respect to the material misstatements and omissions alleged above. In connection with its due diligence conducted in connection with the offering of the Certificates to Plaintiffs, DB Securities received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject Trusts. As underwriter, DB Securities then used and disseminated

these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

714. DB Securities knew, or was reckless in not knowing, of the defective loans in the RALI 2006-QS2 and RALI 2006-QS18 Trusts as a result of its due diligence performed as an underwriter of these RMBS offerings. DBS Securities had access to the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans RALI deposited in the RALI 2006-QS2 and RALI 2006-QS18 Trusts had a practice of routinely and systematically disregarding the stated underwriting standards.

715. During the relevant time period in 2006, DB Securities also routinely engaged in the wrongful practice of underwriting and selling to investors securitizations of toxic mortgages. As a result of this misconduct regarding other RMBS, DB Securities was made aware that loan originators in connection with the RALI 2006-QS2 and RALI 2006-QS18 Trusts had a practice of failing to comply with the stated underwriting standards.

716. DB Securities was a sophisticated market-maker and subsidiary of Deutsche Bank AG (Deutsche Bank), which provided DB Securities with institutional and inside knowledge regarding the quality of the underwriting for the mortgage loans in the RALI Trusts. Deutsche Bank was a major player in the RMBS market and participated in virtually every aspect of the securitization process. Deutsche Bank had subsidiaries that originated loans, including MortgageIT Inc. ("MortgageIT") and DB Home Lending LLC. Deutsche Bank provided warehouse financing to other loan originators where those loans were then acquired and securitized into RMBS. Deutsche Bank acted as sponsor, depositor, trustee and underwriter for RMBS, and it arranged, structured and marketed CDOs, as well as the credit default swaps ("CDSs") that shorted its structured products.

717. Deutsche Bank's loan underwriting standards were similarly defective. When Clayton reviewed a sample of Deutsche Bank's mortgage loans from January 2006 through June 2007, it rejected 35% of the loans outright because they failed to meet underwriting guidelines and did not have any compensating factors. But for the loans Clayton rejected outright, Deutsche Bank waived through the securitization process an astonishing 50% that ended up in its RMBS trusts sold to investors.

718. As an affiliate of Deutsche Bank, DB Securities was party to a corporate-wide practice and process of creating RMBS with loans that did not meet prudent underwriting standards and then selling those toxic RMBS to investors. DB Securities engaged in a similar process when selling the RALI 2006-QS2 and RALI 2006-QS18 Trust Certificates to Plaintiffs without disclosing the true facts surrounding the underlying loans.

719. As detailed in a complaint filed by the DOJ, Deutsche Bank was aware of serious lapses in MortgageIT's loan underwriting practices, including the chronic failure to verify basic information concerning its borrowers, such as income and employment status. *See United States v. Deutsche Bank AG, et al.*, No. 11-CIV-2976 (S.D.N.Y.). The DOJ alleges Deutsche Bank failed to review the early payment defaults on the subprime loans it originated, as it was required to by its fiduciary duty to HUD to maintain its Direct Endorsement Lender status. Deutsche Bank's poorly-underwritten HUD-guaranteed loans are reportedly expected to cost the government more than $1 billion.

720. In July 2010, the Financial Industry Regulatory Authority fined Deutsche Bank $7.5 million for misrepresenting the delinquency rates of mortgages that it securitized into RMBS during the 2006-2007 time period.

721. Deutsche Bank also profited from its awareness of the lack of proper loan underwriting. After Deutsche Bank packaged and sold mortgage loans with inferior – or no – underwriting into its RMBS and then re-packaged them into CDOs, Deutsche Bank simultaneously shorted certain of these deals by purchasing CDS on the very same mortgage-backed investment it was selling to investors. Greg Lippmann ("Lippmann"), Deutsche Bank's head CDO trader, and his team sold CDOs to clients while failing to disclose that Deutsche Bank had bet against those deals by purchasing CDSs on them.

722. At the same time that DB Securities was selling RALI 2006-QS2 and RALI 2006-QS18 Certificates to Plaintiffs, Deutsche Bank was betting against residential mortgages and mortgage- backed investments because it was well aware of the widespread problems with loan underwriting practices and that a high percentage of these types of poorly underwritten mortgage loans would fail. Deutsche Bank's internal documents reveal that by 2006, Lippmann was describing the CDO business as a "Ponzi scheme," and he recommended shorting deals that were made up of RMBS, which he described as "pigs," "horrible," and "crap." In a September 2006 internal communication Lippmann described the mortgage-backed product Deutsche Bank was selling to investors as the "crap we shorted." In a December 2006 internal e-mail regarding another RMBS transaction he wrote to a trader "DOESN'T THIS DEAL BLOW," to which the trader replied "yes it blows I am seeing 20-40% writedowns."

723. As a signatory to the Offering Materials, DB Securities represented that the relevant statements contained in the RALI 2006-QS2 and RALI 2006-QS18 Offering Materials were true and correct. But as the above facts indicate, DB Securities knew, or it was reckless in not knowing, that these Trusts were riddled with loans where originators had systematically disregarded prudent loan underwriting standards. Thereafter, the RALI depositor and sponsor and DB Securities underwriter

had jointly waived these bad loans through the securitization process. DB Securities knew the loans in the RALI 2006-QS2 and RALI 2006-QS18 Trusts had a high risk of defaulting, but it failed to accurately disclose the risks to Plaintiffs. As Deutsche Bank knew, or was reckless in not knowing, was highly likely based on its inside information, Plaintiffs suffered millions of dollars in losses when the bad loans subsequently failed.

8. RBS'S Liability as an Underwriter of the RALI Certificates

724. Defendant RBS Securities, Inc. ("RBS Securities"), formerly known as both Greenwich Capital Markets, Inc. and RBS Greenwich Capital, is a broker-dealer registered with the SEC. It is a Delaware corporation headquartered in Connecticut, and is a wholly owned subsidiary of Greenwich Capital Holdings, Inc., which is an indirect wholly owned subsidiary of The Royal Bank of Scotland Group plc ("RBS Group"). RBS underwrote the RALI 2006-QS6 Trust.

725. RBS Securities acted as the underwriter in the sale of Certificates from the RALI 2006-QS6 Trust. As underwriter, it drafted and disseminated the RALI 2006-QS6 Offering Materials, which contained false and misleading statements about the quality of the underlying mortgages and the underwriting standards applied by RALI and its loan originators in connection with the sale of Certificates to Plaintiffs.

726. RBS Securities knew, or was reckless in not knowing, of the defective loans in the RALI 2006-QS6 Trust as a result of its due diligence performed as an underwriter of this RMBS offering. RBS Securities had access to the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans RALI deposited in RALI 2006-QS6 Trust had a practice of routinely and systematically disregarding the stated underwriting standards.

727. RBS Securities also knew that mortgage loans deposited into the RALI 2006-QS6 Trust were not properly underwritten because RBS Securities was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged herein. In addition to the RALI 2006-QS6 Trust, RBS Securities had underwritten and sold many other such RMBS to investors and had gained inside knowledge of the poor quality loan underwriting in that context too.

728. RBS Securities also participated in the improper securitization and sale of these RMBS to Plaintiffs in order to grow its profits. In its 2006 Form 20-F Annual Report filed with the SEC, RBS Group touted that it "ranked first among managers of global asset-backed and mortgage backed securitizations."

729. As a result of their participation in the securitizing of improperly underwritten loans, such as those deposited in the RALI 2006-QS6 Trust, RBS Group and RBS Securities have subsequently faced significant litigation relating to such matters. In five lawsuits filed by the FHFA (against Ally, Countrywide, JP Morgan, Morgan Stanley and Nomura) RBS Securities is a named defendant based on its underwriting of RMBS for the sponsors of the RMBS at issue in those cases.

730. The National Credit Union Administration Board, an independent government agency, as the liquidating agent of the U.S. Central Federal Credit Union, has also brought suit against RBS Securities and other Defendants based on allegedly false statements made in RMBS offerings. *Nat'l Credit Union Admin. Bd. v. RBS Securities, Inc., et al.*, No. 2:11-cv-2340 (D. Kans. June 20, 2011).

731. In another lawsuit brought by Massachusetts Mutual Life Insurance Company against RBS Securities and its affiliates, it is alleged that of the 10 securitizations in which Mass. Mutual

purchased Certificates, approximately 25% or more of the loans had defaulted, with one securitization reaching a default level of more than 50%. Complaint, *Mass. Mutual v. RBS Fin. Prods. Inc. et al.*, 3:11-cv-30044 (D. Mass. Feb. 24, 2011), ¶6.

732. The *Mass. Mutual v. RBS* plaintiffs conducted an industry-standard AVM analysis of the underlying loans there in securitizations by RBS Securities affiliates, and it further indicates RBS Securities was party to a widespread corporate practice of selling RMBS offerings that were replete with bad loans made with deficient underwriting practices. The chart below summarizes the *Mass. Mutual v. RBS* plaintiffs' findings:

Trust	Sellers	Weighted Average LTV of Collateral Loans Represented in Offering Materials	Actual Values of LTV	% of Collateral Loans with LTV Greater than 90% As Represented in Offering Materials	Actual % with LTV Greater than 90%	% of Loans Liquidated, Foreclosed Upon, in Default or Delinquent
DSLA Mortgage Loan Trust 2005-AR3	Greenwich Capital Financial Products, Inc. ("GCFP") (Seller); Greenwich Capital Acceptance, Inc. ("GCA") (Depositor); RBS Securities (Underwriter)	71.62%	75%	0%	8.75%	16.53%
DSLA Mortgage Loan Trust 2005-AR6	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	73.63%	78.20%	1.44%	13.85%	24.58%
Harborview Mortgage Loan Trust 2005-8	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	77.54% (Group 1-A1)	83.64% (Group 1-A1)	6.52% (Group 1-a1)	23.59% (Group 1-A1)	22.01%
Harborview Mortgage Loan Trust 2005-13	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	77.60%	86.355	5.21%	18.04%	21.60%
HarborView Mortgage Loan Trust 2006-4	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	75.94%	87.87%	8.12%	24.04%	35.35%
Soundview Home Loan Trust 2006-WF1	GCFP (Sponsor); Financial Asset Securities Corp. (Depositor); RBS	82.74%	93.10%	(n/a)	(n/a)	35.97%

Trust	Sellers	Weighted Average LTV of Collateral Loans Represented in Offering Materials	Actual Values of LTV	% of Collateral Loans with LTV Greater than 90% As Represented in Offering Materials	Actual % with LTV Greater than 90%	% of Loans Liquidated, Foreclosed Upon, in Default or Delinquent
	Securities (Underwriter)					
HarborView Mortgage Loan Trust 2006-SB1	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	72.22%	81.49%	0.94%	19.75%	29.95%
RBSGC Mortgage Loan Trust 2007-A	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	73.38%	83.37%	7.17%	19.27%	24.62%
RBSGC Mortgage Loan Trust 2007-B	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	72.35% (Pool 1); 63.65% (Pool 2)	80.96% (Pool 1); 84.10% (Pool 2)	7.47% (Pool 1); 2.33% (Pool 2)	16.88% (Pool 1); 18.14% (Pool 2)	17.52%
HarborView Mortgage Loan Trust 2007-2	GCFP (Sponsor); GCA (Depositor); RBS Securities (Underwriter)	76.41%	90.42%	4.59%	34.38%	50.25%

733. In October 2010 the SEC commenced an inquiry into the document deficiencies and repurchase requests associated with RBS Group securitizations. The SEC converted the inquiry into a formal investigation in January 2011 and expanded its probe to include information related to early payment defaults. RBS Group also disclosed in its filings that the SEC had begun a non-public, formal investigation in March 2008 of the Group's sub-prime securities and RMBS exposures. In December 2010, the SEC expanded its investigation to include CDOs.

734. In June 2009 the Massachusetts Attorney General initiated an investigation that included RBS Group and sought information regarding residential mortgage lending practices and the sale and securitization of residential mortgage loans. In November 2011, RBS Group settled with the Massachusetts Attorney General for $52 million.

735. RBS Group also faces ongoing investigations led by the New York State Attorney General and the Nevada State Attorney General regarding similar RMBS issues.

736. As a signatory to the Offering Materials, RBS Securities represented that the relevant statements at issue herein contained in the RALI 2006-QS6 Trust were true. But as the above facts indicate, RBS Securities knew, or it was reckless in not knowing, that the RALI 2006-QS6 Trust was loaded with bad loans where originators had systematically disregarded underwriting standards and the depositor, sponsor and underwriter had all waived these bad loans through the securitization process. As a result of this fraudulent misconduct, these bad loans were destined to fail, just as they subsequently did, to serious detriment of Plaintiffs.

G. UBS

1. UBS's Securitizations

737. Union Central purchased three certificates sponsored by UBS between June 2005 and April 2006, representing an investment of approximately $13 million:

CUSIP	Description	Issuing Entity	Issue Date	Purchase Date
57643MKV5	MASTR 2005-1 B3	MASTR Asset Securitization Trust 2005-1	5/1/2005	6/10/2005
57643MMX9	MASTR 2006-1 B1	MASTR Asset Securitization Trust 2006-1	3/1/2006	4/6/2006
57643MLQ5	MASTR 2005-2 B1	MASTR Asset Securitization Trust 2005-2	10/1/2005	11/8/2005

738. The UBS Trusts were $273-$416 million deals comprising fixed-rate mortgages with mostly 30-year terms.

2. False and Misleading Statements in UBS' Offering Materials

a. False and Misleading Statements About Compliance with Underwriting Standards

739. As sponsor of the securitizations, the UBS Defendants either originated the underlying mortgages through UBS's own programs, or purchased the underlying mortgage loans from other originators, including Bank of America, JP Morgan Chase and SunTrust Mortgage. The

Offering Materials represented that each of the loan sellers applied underwriting standards which were designed to ensure that the borrower could repay the loan.

740. The UBS Prospectus Supplement for each Certificate stated that the originators had collected various financial information about a borrower to ensure that the borrower could repay the loan:

> Generally, each borrower will have been required to complete an application designed to provide to the original lender pertinent credit information concerning the borrower. . . .
>
> Based on the data provided in the application and certain verification (if required), a determination is made by the original lender that the borrower's monthly income (if required to be stated) will be sufficient to enable the borrower to meet its monthly obligations on the mortgage loan and other expenses related to the property such as property taxes, utility costs, standard hazard insurance and other fixed obligations other than housing expenses.

741. Similarly, with respect to MASTR 2006-1, the Offering Materials stated the following regarding SunTrust Mortgage's underwriting standards:

> SunTrust underwriting guidelines generally follow standard Fannie Mae guidelines. They are designed to evaluate the borrower's capacity to repay the loan, to evaluate the credit history of the borrower, to verify the availability of funds required for closing and cash reserves, and to evaluate the acceptability and marketability of the property to be used as collateral. . . .
>
> The real estate lending processes for one-to four-family mortgage loans follow standard procedures, designed to comply with applicable federal and state laws and regulations. SunTrust requires that the borrower's sources of income have the probability of continuance, are stable sources and are sufficient to support repayment of the mortgage loan requested. A borrower is required to complete an application designed to provide pertinent information about the borrower, the property to be financed and the type of loan desired.

b. False and Misleading Statements About Appraisals and LTV Ratios

742. The UBS Offering Documents represented that the underlying mortgaged properties would provide adequate security for the mortgage loans, based in part on the appraised value of the properties securing the mortgage loans underlying the Certificates. The Offering Materials for the

UBS Certificates represented that Defendants required and relied upon industry-standard appraisals to determine the adequacy of the underlying collateral. For example, the Offering Materials for each of the UBS Certificates stated:

> The adequacy of the mortgaged property as security for repayment of the related Loan will generally have been determined by an appraisal in accordance with pre-established appraisal procedure standards for appraisals established by or acceptable to the originator. All appraisals conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and must be on forms acceptable to Fannie Mae and/or Freddie Mac. . . . The appraisal procedure standards generally will have required the appraiser or an agent on its behalf to personally inspect the property and to verify whether the property was in good condition and that construction, if new, had been substantially completed.

743. Similarly, with respect to loans originated by SunTrust, the 2006-1 Prospectus stated:

> To determine the acceptability and marketability of the mortgaged property as collateral, generally an independent appraisal is made of each mortgaged property considered for financing. An appraiser is required to inspect the mortgaged property and verify that it is in acceptable condition and that construction, if recent, has been completed. The evaluation is based on the appraiser's estimate of value, giving appropriate weight to both the market value of comparable housing, as well as the cost of replacing the mortgaged property. The underwriting guidelines require that the value of the mortgaged property being financed, as indicated by the independent evaluation, currently supports and is anticipated to support in the future the outstanding loan balance and provides sufficient value to mitigate the effects of adverse shifts in real estate values, although there can be no assurance that such value will support the outstanding loan balance in the future.

744. The Prospectus also contains representations concerning the LTV ratios of the mortgage loans underlying each securitization. Specifically, the 2005-1, 2005-2 and 2006-1 Certificates disclosed LTV ratios of 66.5%, 65.9%, and 67.7%, respectively. These representations were false.

c. False and Misleading Statements About Debt-to-Income Ratios

745. The Offering Materials stated that in the course of the loan application process, borrowers were generally required to provide information regarding their assets, liabilities and

income in order to determine the borrowers' ability to repay the debt. For example, the Offering Materials for each of the Certificates stated:

> As part of the description of the borrower's financial condition, the borrower will have furnished information with respect to its assets, liabilities, income (except as described below), credit history, employment history and personal information, and furnished an authorization to apply for a credit report which summarizes the borrower's credit history with local merchants and lenders and any record of bankruptcy

746. Where provided, such information was converted into DTI ratios, which were a material part of the underwriting process, and specific DTI ratios for the loans underlying the Certificates were utilized by the rating agencies to determine the ratings for the certificates in the Trust.

d. False and Misleading Statements About Owner-Occupancy

747. The Offering Materials contained specific disclosures about the occupancy-rate status of the loans underlying the Certificates.

748. The Series 2005-1 Offering Materials stated that 490 out of the 506 loans, or 96.8% of the aggregate principal balance of the mortgage loans, were for owner-occupied properties. Fourteen of the remaining loans were purportedly for second homes and four were for investment.

749. The Series 2005-2 Offering Materials stated that 651 out of the 698 loans, or 94.5% of the aggregate principal balance of the mortgage loans, were for owner-occupied properties. Twenty-three of the remaining loans were for second homes and 23 were for investment.

750. The Series 2006-1 Offering Materials stated that 745 out of the 810 loans, or 92.6% of the aggregate principal balance of the mortgage loans, were for owner occupied properties. Forty-three of the remaining loans were for second homes and 22 were for investment.

e. False and Misleading Statements About Ratings

751. The Offering Materials for the UBS Certificates stated that the ratings of the Certificates as set forth in the Prospectus for a condition to their issuance, and that the ratings reflected the likelihood that investors would receive the distributions to which they were entitled:

> It is a condition to the original issuance of the offered certificates that each class of offered certificates will have received the ratings set forth on the table beginning on page S-6 of this prospectus supplement.
>
> * * *
>
> A securities rating addresses the likelihood of the receipt by the certificateholders of distributions on the offered certificates.
>
> * * *
>
> The ratings assigned by the Rating Agencies to mortgage pass-through certificates address the likelihood of the receipt of all distributions on loans by certificateholders under the agreements pursuant to which the certificates are issued. The ratings of the Rating Agencies take into consideration the credit quality of the related mortgage pool, including any credit support providers, structural and legal aspects associated with the certificates, and the extent to which the payment stream on the mortgage pool is adequate to make the payments required by the certificates.

752. The Offering Materials also set forth the specific ratings for the Certificates purchased by Union Central. The Series 2005-2 and 2006-1 Certificates were rated AA by S&P. The Series 2005-1 Certificates was rated BBB by Fitch.

753. In obtaining these ratings for the subject Certificates, UBS concealed the adverse information alleged herein from the rating agencies. Had the rating agencies known the true value of the loans underlying the Certificates, the Certificates would have been rated significantly lower, or not at all.

3. Defendants' Statements Were Knowingly False and Misleading

754. The UBS Defendants knew, or were reckless in not knowing, that the statements identified above were materially false and misleading and/or omitted material facts necessary to

make the statements made not misleading. As set forth herein, the UBS Defendants had actual knowledge that the stated underwriting guidelines were not being adhered to and, rather than provide truthful information and disclosures to Union Central and other investors, used such knowledge to reap massive profits for itself by betting against the very mortgage-backed products they were selling investors.

a. Underwriting Standards Had Been Abandoned

755. While the Offering Materials set forth detailed underwriting guidelines which were supposed to be applied in evaluating borrowers and loans, in fact the stated underwriting guidelines had been abandoned by the loan originators. Loan originators abandoned the fundamental principle that underwriting was supposed to meaningfully evaluate the borrowers' ability to repay the debt, and the lender and/or investors' ability to recover against the pledged collateral in the event of a default.

756. BofA had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to UBS for inclusion in the subject Trusts, as alleged above at §IV.I.1.

757. Greenpoint had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to UBS for inclusion in the subject Trusts, as alleged above at §IV.I.3.

758. SunTrust had abandoned all prudent underwriting practices with respect to the loans that it had originated and sold to UBS for inclusion in the subject Trusts, as alleged above at §IV.I.4.

(1) Skyrocketing Default Rates Are Evidence of Abandoned Underwriting

759. The Certificates purchased by Union Central were supposed to be stable, long-term investments backed by investment-grade credit ratings. However, the extraordinary default rates on the mortgage loans underlying Union Central's Certificates is prima facie evidence that the stated

underwriting standards and loan characteristics represented in the Offering Materials were materially false and misleading.

760. The following chart sets forth the delinquency, bankruptcy or foreclosure amounts, as well as collateral cumulative losses (the losses from defaulted loans that have already been realized by the Trusts), for each of the Certificates purchased by Union Central as of June 2010:

Certificate	Original Deal Size	Delinquent, Bankruptcy Foreclosure, REO Actual Bal.	Collateral Cumulative Losses
2005-1	$273,151,063	$ n/a	$ n/a
2005-2	$339,007,792	$13,751,324	$862,774
2006-2	$419,235,122	$23,134,724	$3,740,235

761. Had the loans been issued in accordance with the stated underwriting guidelines, and had the loans in fact had the characteristics described in the Offering Materials, the rate of delinquency, bankruptcy and foreclosure would be far lower than the current rates. Indeed, Moody's maximum expected collateral losses for the life of the 2005-2 Certificate was only $1.19 million. Moody's maximum expected collateral losses for the life of the 2006-1 Certificate was only $1.47 million.

(2) Appraisals and LTV Ratios Were Inflated

762. The descriptions of appraisal standards, as well as the LTV ratios derived from such appraisals, were materially false and misleading. Undisclosed in the Offering Materials, and in violation of any legitimate appraisal standards, a high percentage of loans underlying the Certificates had been approved through the use of manipulated appraisals that guaranteed that the collateral property would be valued at a price sufficient to support the loan. UBS's practice of using and permitting inflated appraisals in connection with its loan securitizations has been confirmed through

modeling performed by other litigants, which demonstrates that appraisals conducted with UBS securitizations in 2006 were routinely inflated.

763. For instance, the FHFA conducted an AVM analysis of a sample of the property underlying the 16 MASTR offerings at issue in their litigation against MASTR and UBS. Second Amended Complaint, *FHFA v. UBS Americas, Inc.*, No. 11-5201 (S.D.N.Y. July 27, 2011) (Dkt. No. 1), ¶¶289-295. AVM's are routinely used in the industry as a way of valuing properties during prequalification, origination portfolio review and servicing. The FHFA's analysis demonstrates that the valuation of the loans underlying those Certificates were materially and consistently inflated, and therefore that the stated LTV ratios were materially overstated, which in turn greatly increased the risk of default for the loans underlying the certificates.

764. For example, with respect to three of the certificates at issue in the FHFA's case, MABS 2005-WF1, MABS 2006-FRE2, and MABS 2006-NC2, the offering materials stated that the percentage of loans having an LTV ratio of 80% of less was 56.13%, 61.59%, 67.99% respectively. However, the FHFA's analysis showed the actual percentage of loans having an LTV ratio of 80% or less was much lower, at 47.09%, 35.05%, 41.59% respectively. While none of the certificates were supposed to contain loans that had an LTV ratio over 100%, the FHFA's analysis found that a significant number of loans indeed had LTV ratios of over 100% – in other words, the value of loan was more than the value of the property. With respect to the MABS 2005-WF1, MABS 2006-FRE2, and MABS 2006-NC2 Certificates, the FHFA found LTV ratios greater than 100% in 12.26%, 15.07%, and 14.36% of the loans, respectively.

765. Instead of conducting appraisals designed to accurately value the subject property in compliance with USPAP, many appraisals UBS sanctioned and accepted, if they were conducted at

all, were designed to hit valuation targets that would allow loans to be funded and securitized into RMBS so UBS could sell them to investors, including Plaintiffs.

766. Not only did UBS have access to the loan files and monitoring results that indicated to Defendants there were inflated appraisals used to support the loans in the subject UBS Trusts, but they were also privy as industry-insiders to the non-public information alleged in §V.G. regarding the widespread wrongful appraisal practices and the pressures that UBS's loan originators were applying to appraisers in an effort to close the loans and continue to feed UBS with raw material it needed to continue the highly profitable loan securitization businesses.

(3) Debt-to-Income Ratios Were Falsified

767. The statements contained in the UBS Offering Materials regarding the acceptability and evaluation of DTI ratios, as well as many of the specific DTI ratios disclosed, were materially false and misleading. In fact, UBS and the originators knew that borrowers routinely falsified their stated incomes in order to have loans approved.

(4) Owner-Occupancy Rates Were Falsified

768. In addition to the examples above which demonstrate that the Offering Materials misrepresented the owner-occupancy rates of subject properties underlying the Trusts, other litigants' loan-level analysis of thousands of loans securitized by UBS at the same time as the Certificates at issue here, have confirmed that UBS's RMBS Offering Materials routinely misstated the owner-occupancy rates of the loans underlying the Certificates. In addition to their LTV analysis, the FHFA undertook a sophisticated analysis to determine whether a given borrower actually occupied the property as claimed in the UBS Offering Materials. *FHFA v. UBS* Complaint, ¶¶283-288. For almost every MASTR offering at issue there, the FHFA analyzed at least 1,000

loans. The FHFA analyzed tax records, credit records, bills, property records and lien records, to determine whether a borrower was actually living in the property subject to the loan.

769. The results of the FHFA's analysis demonstrates that the percentage of owner-occupied properties disclosed by UBS in their prospectuses was consistently false and that the true rate was much lower. For the MASTR certificates at issue there, the FHFA found that the percentage of non-owner-occupied properties was understated by between 7%-13%.

(5) Defendants Knew that Underwriting Standards Were Being Abandoned

770. Based on its review of the loans in question, UBS had actual knowledge that the loans it securitized in the Trusts sold to Union Central did not comply with the stated underwriting guidelines contained in the Offering Materials, that the quantitative and qualitative data contained in the Offering Materials was materially false and misleading. UBS also accepted poorly underwritten loans in order to grow its securitization business.

b. UBS Had Actual Knowledge of the Defective Loans They Were Securitizing

771. Documents recently released by Clayton confirm UBS's practices resulting in there being rampant underwriting violations in the loan pools backing the UBS Certificates. As the FCIC described, in the internal Clayton "Trending Report" made public by the Government in conjunction with testimony given in September 2010, UBS received regular reports regarding defective loans, and ***13%*** of the loans Clayton reviewed for UBS "failed to meet guidelines." These loans were not subject to any proper "exceptions," as they did not have any "compensating factors." Rather, these loans were plainly defective.

772. Despite such a high level of nonconforming loans, UBS nevertheless continued utilizing, and indeed funding, the same originators who had placed the nonconforming loans in the pools and "waived in" to its pools 33% of those toxic loans that Clayton had identified as being

outside the guidelines. Such waivers were never disclosed to Union Central or any of the investors who purchased UBS Certificates.

773. The Clayton data demonstrates that underwriting guidelines were being routinely violated, and that UBS was informed of such violations.

774. In their zeal to securitize as many loans as possible, UBS securitized a substantial number of loans which they knew did not comply with the stated underwriting guidelines. Indeed, the due diligence that UBS did conduct gave them actual knowledge that many of the loans backing the Certificates failed to comply with the stated underwriting guidelines.

(1) UBS Succumbed to Competitive Pressure to Securitize Bad Loans

775. UBS's business plan and strategic effort to grow its loan securitization business was a key element driving UBS to acquire, securitize and sell mortgage loans regardless of whether those loans had been properly underwritten or whether borrowers had the willingness and ability to repay the debt.

776. By 2005 it was internally recognized within UBS that of all the businesses conducted by UBS's Investment Banking group, the biggest competitive gap was in Fixed Income – the business that acquired and securitized mortgages. In fact, it was a key point of internal discussion that UBS's Fixed Income positioning had declined vis-à-vis leading competitors since 2002.

777. In an effort to close this competitive gap, UBS made a concerted effort to grow its mortgage securitization business. To formulate a strategic and tactical plan to its increase market share of asset-backed securitization business, and in order to keep up with competitors, UBS hired a consulting firm who recommended to UBS's Investment Banking group – the group that operated in the United States through Defendant UBS Securities LLC – that they invest in developing RMBS

operations that focused on subprime and adjustable rate mortgage products. The consultant specifically recommended these areas as significant revenue growth opportunities.

778. At the same time that UBS was seeking to expand its Investment Banking group's loan securitization business, it was in the process of transferring its Mortgage Origination Services Group to the separate and newly created Dillon Read Capital Management ("DRCM") business unit. Because DRCM was not viewed as an outsourcing of the Investment Banking group's fixed income and securitization business, UBS Defendants needed even more mortgage securitizations to make up for the loss of the Mortgage Origination Services Group to DRCM. This transfer of securitization operations to DRCM put additional pressure on the UBS Defendants to acquire and securitize more mortgages to meet the targeted growth plan regardless of whether those loans had been properly underwritten.

779. UBS's strategic plan to grow its business by increasing fixed income market share with an expanded appetite for high-yield and subprime loans was partially reflected in UBS's Form 20-F SEC filing for year end 2005:

> We are seeking to expand our fixed income business further by pursuing opportunities in credit, high yield and asset-backed securities. We will expand our leveraged finance and high yield appetite and extend our client footprint in debt capital markets. Within asset-backed securities, we will match our strength in the agency business with non-agency and sub-prime business as well as developing local currency asset-backed and mortgage-backed securities.

780. UBS's Form 20-F SEC filing for year end 2005 identified its competitors for the available share of the loan securitization business: "As a global investment banking and securities firm, we compete against other major international players such as Citigroup, Credit Suisse, Deutsche Bank, Goldman Sachs . . . and Morgan Stanley." As alleged herein, these Defendants were all engaged in a competitive "race to the bottom" by secretly abandoning prudent loan underwriting

requirements for the loans they were acquiring, securitizing and selling to investors, including plaintiffs, during the 2005 to 2007 time period.

(2) UBS's Financial Incentives for Securitizing Defective Loans

781. The UBS Defendants had enormous financial incentives to complete as many RMBS offerings as quickly as possible without regard to the accuracy or completeness of the Registration Statements, and while concealing the adverse information that they were securitizing bad loans that had been waived through the due diligence process. For example, UBS Securities, as the underwriter, was paid a commission based on the amount it received from the sale of the Certificates to the public. Similarly, UBS Real Estate and MASTR received substantial revenues and additional fees from UBS Securities for the sale of the Certificates.

782. The UBS Defendants were successful in their efforts to grow profits by increasing loan securitizations regardless of the huge undisclosed risks presented by the wide-spread abandonment of prudent loan underwriting practices. As a result, in 2005 UBS increased its fixed income underwriting fees by 36% compared to fees earned from those operations in 2004. UBS's Form 20-F SEC filing for year-end 2006 reported that this increase in fixed income underwriting in 2005 was "due to significantly improved market conditions and our enhanced competitive position." The UBS Defendants benefited from this growth as net profits attributable to UBS shareholders grew by 75% during 2005.

783. 2006 was UBS's Investment Banking group's most profitable year ever, and pre-tax profits for that group grew by 15% over 2005 results. UBS attributed to this growth to "progress in our plan to expand our . . . mortgage-backed securities [and other lines of business]." UBS's Form 20-F SEC filing for year-end 2006 reported: "Overall, net fee and commission income now contributes 55% to total operating income in 2006." In addition, the 2006 Form 20-F reported:

"Fixed income activities saw stronger results driven by positive market conditions and improved performance in derivatives, mortgage-backed securities and commodities."

784. Pursuant to the UBS Defendants' conscious initiative to grow market share by expanding the mortgage and asset securitization business, UBS's balance sheet grew by approximately 17% in 2005 and 2006, and UBS's Investment Banking group's share of the total balance sheet assets was always over 80%. By late 2007, however, various regulators commenced investigations relating to UBS's involvement in the securitizations of residential mortgages, including the due diligence practices of UBS securities.

(3) UBS's Internal Investigation into Loan Securitization Practices

785. In order to facilitate its loan securitizations, UBS held and retained for its own account certain super-senior tranches of the RMBS trusts it was selling to investors. UBS took various steps in an effort to hedge the publicly undisclosed risk resulting from holding these securities on its own books, but those attempts were not entirely successful. For example, UBS purchased insurance on many of the RMBS tranches it was holding for its own account, but the insurer experienced financial difficulties and the ultimate lack of protection/coverage caused UBS to write down mortgage-backed securities it held on its books.

786. On December 24, 2007, Swiss regulators announced that the Swiss banking department charged with oversight of Swiss investment banks would be initiating a full investigation into how UBS incurred massive losses in connection with subprime mortgages in the United States. In April 2008, UBS AG presented Swiss banking regulators with a report detailing the reasons for its massive losses related to the United States subprime mortgage market. In that report, which was summarized in a shareholder report issued by UBS AV on April 21, 2008, UBS admitted that its

losses in the United States subprime mortgage market were due to a litany of errors including inadequate risk management and a focus on revenue growth.

787. UBS's report to shareholders identified management's "[f]ailure to demand a holistic risk assessment." The report went on to explain: "It appears that the focus of the IB [*i.e.*, Investment Bank group] was revenue growth and filling the gap to competitors. This contrasts with the level of debate at the same time within relevant Group governance committees such as the GRSC [*i.e.*, the Risk Subcommittee of the Group Executive Committee of UBS]."

788. With the subsequent publication of the FCIC Report and based upon the other factual information that has recently come to light, it is clear that UBS Investment Banking group not only failed to employ a "holistic risk assessment" in its drive to grow its loan securitization business and keep up with the competition, but UBS ignored the high-level internal debates, the internal reports and outside reports (including Clayton reports) all of which revealed to the UBS Defendants that the mortgages they were securitizing did not meet prudent loan underwriting standards. The UBS knew, or were reckless in not knowing, that there was a very high percentage of bad loans securitized and deposited in the Trusts that it sold to Plaintiffs.

4. UBS's Liability as an Underwriter of the UBS Certificate

789. UBS Securities made the false and misleading statements alleged above, which were contained in the Prospectus Supplement endorsed and used by UBS Securities in the sale of certificates to Plaintiffs.

790. As underwriter, UBS Securities edited, drafted and controlled the content of the UBS Trusts' Offering Materials, including with respect to the material misstatements and omissions alleged above. In connection with its due diligence conducted in connection with the offering of the Certificates to Plaintiffs, UBS Securities received, considered and understood the adverse

information alleged above regarding the lack of proper underwriting for the loans deposited in the USB Trusts. As underwriter, UBS Securities then used and disseminated these false and misleading Offering Materials to Plaintiffs in connection with the sale of the Certificates and in order to profit at Plaintiffs' expense.

791. UBS Securities, as a subsidiary within UBS, had knowledge that UBS, as alleged herein failed to adhere to underwriting standards when it pooled mortgage loans for its RMBS, including for the UBS Trusts. Further, UBS Securities, knew or was reckless in not knowing, of the defective loans in the UBS Trusts as a result of its due diligence performed as an underwriter for these Trusts. UBS Securities had access to the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans UBS deposited in the UBS Trusts had a practice of routinely and systematically disregarding the stated underwriting standards.

792. UBS Securities also knew that mortgage loans deposited into the UBS Trusts were not properly underwritten because UBS Securities was a knowledgeable insider in the mortgage securitization industry who, unlike Plaintiffs, was privy to the widespread abandonment of prudent loan underwriting practices in connection with the securitization of loans, as alleged herein. In addition to these Trusts, UBS Securities underwrote and sold many other such RMBS to investors and had in that context gained inside knowledge of the poor quality loan underwriting.

5. SunTrust's Liability as an Underwriter of the UBS Certificates

793. Defendant SunTrust Capital Markets, Inc., ("SCM") operates as the investment banking arm of SunTrust Banks Inc. ("STB"), of which it is a wholly owned subsidiary. Collectively, they are referred to as "SunTrust."

794. SCM acted as the underwriter in the sale of Certificates from the MASTR Asset Securitization Trust 2006-1. As underwriter, it drafted and disseminated the MASTR 2006-1 Offering Materials, which contained false and misleading statements about the quality of the underlying mortgages and the underwriting standards applied by UBS and its loan originators for that offering.

795. SCM knew that mortgages pooled into the MASTR RMBS had failed to meet underwriting standards because SCM engaged in the routine practice of underwriting and selling securitizations of toxic mortgages, such as those in the MASTR 2006-1 Trust. SCM also knew, or was reckless in not knowing, of the defective loans in the MASTR 2006-1 Trust as a result of its due diligence performed as an underwriter of that RMBS offering.

796. SCM had access to the detailed loan tapes and actual loan files, and its review of these materials showed it (or it was reckless in not understanding) that originators of the loans UBS deposited in MASTR 2006-1 Trust had a practice of routinely and systematically disregarding the stated underwriting standards.

797. Indeed, SunTrust Mortgage was an SCM affiliate and was a loan originator for the MASTR 2006-1 Trust. SCM knew of SunTrust's corporate-wide practice of effectively abandoning prudent loan underwriting in the pursuit of greater profits. SCM also understood that bad loans had been deposited in the MASTR 2006-1 Trust because SCM was aware that SunTrust Mortgage had originated many of the loans in the Trust and SCM knew, or was recklessly in not knowing, SunTrust Mortgage had a widespread practice of abandoning prudent underwriting standards when originating loans, as alleged at §III.I.4.

798. SCM also routinely performed due diligence on SunTrust Mortgage loans that had been securitized in other RMBS that SCM was underwriting and selling to investors. SCM's

experience with those other RMBS transactions provided it with further knowledge of SunTrust Mortgage's custom and practice of originating loans regardless of whether borrowers had the ability to repay the loans.

799. SCM had further awareness of the bad loans in the MASTR 2006-1 Trust because SCM and its affiliates participated in the widespread process of originating, securitizing and selling toxic loans. From 2006 to 2007, SunTrust expanded its RMBS business at an enormous rate – growing from $141 million RMBS in trading assets in 2006 to $939 million in 2007.

800. Other parties have also experienced the toxic quality of mortgages originated by SunTrust and its affiliates. For example, the FCIC Report explains that Fannie Mae performed a review of delinquent loans originated by a SunTrust affiliate. As a result of its review, from 2007 through 2010, Fannie Mae put back $898 million worth of mortgages for which SunTrust had breached its representations and warranties.

801. In addition, SunTrust agreed to a Consent Order with the Federal Reserve on April 13, 2011, in which SunTrust agreed to strengthen and improve its oversight, compliance, and risk management programs for its mortgage businesses.

802. As a signatory to the Offering Materials, SCM represented that the statements in the MASTR 2006-1 Offering Materials were true. But based on the above facts, it knew, or it was reckless in not knowing, that those representations were materially false and misleading.

VI. DISCLOSURES EMERGE ABOUT THE PROBLEMS UNDERLYING THE LOANS

803. Years and months after Plaintiffs made purchases of the Certificates, the credit rating agencies began to lower ratings on certain of the Certificates. Many of the Certificates were downgraded by the credit rating agencies from "investment grade" to "junk" status.

804. The ratings action represents only a partial picture of the rapid deterioration of the Certificates issued pursuant to the Trusts, as other performance measures of the Certificates showed substantial decay due to the prevalence of bad loans. No further interest or principal payments will be received on some of Union Central's Certificates, and as a result, Union Central has experienced a complete loss on these investments.

805. The table below sets forth the current pricing and current ratings (compared to original ratings) with respect to the Certificates purchased by Plaintiffs:

Certificate	Current Trading Price as a Percentage of Par[10]	Original Rating	Current Rating
• Citigroup Mortgage Loan Trust 2007-10 1B1	11%	AA	CCC
• Citicorp Mortgage Securities Trust, Series 2007-5 B1	6%	AA	CC
• Citicorp Mortgage Securities Trust, Series 2007-8 B1	10%	AA	CC
• IndyMac IMJA Mortgage Loan Trust 2007-A1 B1	0%	AA	D
• GSR Mortgage Loan Trust 2006-7F M1	1%	AA+	C
• GSR Mortgage Loan Trust 2006-9F M1	5%	AA+	C
• MASTR Asset Securitization Trust 2005-1 B3	2%	BBB	C
• MASTR Asset Securitization Trust 2005-2 B1	Sold at 30%	AA	CCC
• MASTR Asset Securitization Trust 2006-1 B1	3%	AA	D
• Morgan Stanley Mortgage Loan	Sold at 4%	AA	D

10 Per *Bloomberg*, April 2011.

Certificate	Current Trading Price as a Percentage of Par[10]	Original Rating	Current Rating
Trust 2005-5AR B1			
• RALI Series 2005-QA9 Trust M1	0% *	AA	D
• RALI Series 2005-QS7 Trust M3	0% *	BBB	D
• RALI Series 2005-QS9 Trust M3	0% *	BBB	D
• RALI Series 2005-QS14 Trust 1M1	18%	AA	D
• RALI Series 2005-QA5 Trust M3	0% *	BBB	C
• RALI Series 2006-QS6 Trust 2M1	4%	AA	D
• RALI Series 2006 QS18 Trust 2M1	0%	AA	D
• RALI Series 2006-QS18 Trust 2M2	0% *	A	D
• RALI Series 2006 QS18 Trust 2M3	0% *	BBB	D
• RALI Series 2006-QS2 Trust 2M1	7%	AA	D
• Washington Mutual Mortgage Pass-Through Certificates, WMALT Series 2005-3 B3	0% *	BBB	D

* No further interest or principal payments will be received on these Certificates.

806. However, even as problems in the mortgage loan portfolio became apparent, investors were not aware of Defendants' intentional misconduct until the findings of the FCIC investigation were revealed in part in 2010 and 2011.

807. The loan defaults and related drop in value for Plaintiffs' Certificates were caused by Defendants' wrongdoing. In fact, Defendants' failure to honor, enforce and apply prudent and

proper loan underwriting in their rush to securitize mortgages was a central contributor to the ensuring financial crisis. As the Senate PSI Report concluded: "Investment banks were the driving force behind the structured finance products that provided a steady stream of funding for lenders originating high risk, poor quality loans and that magnified risk throughout the U.S. financial system. The investment banks that engineered, sold, traded, and profited from mortgage related structured finance products were a major cause of the financial crisis."

VII. UNION CENTRAL'S RELIANCE ON DEFENDANTS' FALSE AND MISLEADING STATEMENTS

808. The Certificates for all offerings were issued pursuant to the Offering Materials, which contained the false and misleading statements set forth above.

809. In deciding to purchase the Certificates, Union Central relied on Defendants' false and misleading representations and omissions of material fact regarding the Certificates ratings and underwriting standards that had been applied to the loans backing the Certificates. But for Defendants' fraudulent representations and omissions, Union Central would not have purchased the Certificates.

810. Union Central reasonably relied upon Defendants' representations in the Offering Materials regarding loan quality and believe at the time that Defendants would not engage in the wrongful conduct alleged herein. Union Central did not know at the time it purchased the Certificates, and could not have known, that Defendants were knowingly and recklessly securitizing loans where originators were routinely abandoning the stated underwriting guidelines, leading to a drastic increase in the origination of defective loans. Nor did Union Central know that the property appraisals used by the originators and accepted by Defendants were falsely inflated. Union Central also did not know that Defendants and the originators knowingly accepted false information about material facts such as borrowers' stated income, which caused Defendants' representations to be

false as alleged above. Union Central did not know that Defendants' due diligence had identified significant problems with the originators' loans, and that Defendants' practice was to waive these bad loans into the Trusts. If Union Central had known these and other material facts regarding Defendants' fraudulent misrepresentations and omissions of material fact contained in the Offering Materials, Union Central would not have purchased the Certificates.

811. Defendants' misrepresentations and omissions of material fact caused Union Central to suffer losses on the Certificates because the Certificates were far riskier – and their rate of default far higher – than the Offering Materials represented them to be. The mortgage loans underlying the Certificates experienced defaults and delinquencies at a much higher rate due to the wholesale abandonment of loan-origination guidelines.

812. Union Central purchased each Certificate in reliance on the information contained in the applicable Offering Materials. In connection with the offers and sales of the Certificates to Union Central, Defendants provided directly or indirectly to Union Central's investment personnel or managers the Offering Materials and/or pitchbooks and other documentation containing information and data regarding the Certificates. Similar information was sent to and analyzed by Union Central's investment personnel and managers if the Certificates were sold to them in the secondary market.

813. Union Central reviewed and analyzed the Offering Materials provided directly or indirectly by Defendants with respect to each Certificate offering.

814. Union Central justifiably relied on the Offering Materials provided directly or indirectly by Defendants when purchasing the Certificates.

COUNT I

For Common Law Fraud Against All Defendants

815. Plaintiffs repeat and reallege the allegations set forth in the preceding paragraphs, inclusive, as if fully set forth herein.

816. This is a claim for common law fraud against all Defendants.

817. Defendants made materially inaccurate written representations and omissions in materials distributed to Plaintiffs with respect to the documents and trusts for which Defendants were responsible, as alleged and identified above.

818. The Individual Defendants are liable for the false statements made in connection with the Trusts for which they served as directors or officers.

819. The Underwriter Defendants and the other Defendants made the false and misleading statements contained in the Offering Materials, including regarding about the quality of the collateral underlying the RMBS. Such statements and the reasons why they are false and misleading are set forth with particularity above.

820. Defendants knew or recklessly disregarded the false and misleading nature of their representations and omissions. The bases for Defendants' knowledge or reckless disregard are set forth with particularity above.

821. Defendants made the materially misleading statements and omissions for the purpose of inducing Union Central to buy and retain the Certificates.

822. Union Central justifiably relied on Defendants' materially misleading statements and omissions, which went to the core of Union Central's investment decision on the Certificates: the risk attending such notes and the determination of whether the interest adequately compensated

investors. The Certificates would not have issued and would have been unmarketable but for Defendants' misleading statements and omissions.

823. Defendants' misrepresentations and omissions went to the credit quality of the Certificates and the underlying collateral assets. As a result of Defendants' misconduct alleged above, the value of the Certificates has subsequently collapsed. Only later, after the FCIC findings were disclosed, did Union Central begin to learn it had been defrauded.

824. Defendants continued throughout the relevant time period to conceal information about the credit quality of the Certificates and the collateral assets acquired by Union Central.

825. Defendants undertook to sell billions of dollars in Certificates to investors. Having elected to make representations to investors in order to sell Certificates to them, Defendants owed such investors a duty to disclose all material information, including adverse information.

826. Defendants were in a superior position to investors in the Certificates as a consequence of their selling and trading of assets, such as collateralized assets. Knowing that Plaintiffs purchased millions of dollars of RMBS from Defendants and knowing that Plaintiffs were sold Certificates that were represented to be secure and stable investments, Defendants had a duty to report to Plaintiffs that their due diligence investigation had found material defects in the loans which Defendants had disregarded.

827. Union Central has been injured as its Certificates are worthless or severely impaired.

COUNT II

Claim for Unjust Enrichment
Against All Defendants

828. Plaintiffs repeat and reallege the allegations set forth in the preceding paragraphs, inclusive, as if fully set forth herein.

829. The Defendants received substantial compensation for selling the Certificates to investors. On information and belief, these fees were derived from the volume of Certificates sold to Union Central and other investors. Thus, the more Certificates sold from the Trusts, the more money Defendants received. This economic incentive to sell the Certificates, even in the face of undisclosed, adverse information as to the quality of the loan underwriting, explains but does not justify the Defendants' failure to accurately report information about the collateral.

830. The Defendants directly contributed to the destruction of millions of dollars in investment value as a result of their structuring, rating and doing business with the Trusts. The Defendants stood in conflicted positions relative to the Certificates. The Defendants failed to exercise reasonable care in conducting their specific oversight roles with respect to the RMBS, but were paid substantial profits and fees from the securitizations.

831. New York has a public policy interest in fostering the integrity and transparency of financial markets since it is one of the leading financial centers in the world. The Defendants' ill-gotten gains should be disgorged in favor of Plaintiffs in order to protect and promote this public policy.

COUNT III

Claim for Aiding and Abetting Against All Defendants

832. Plaintiffs repeat and reallege the allegations set forth in the preceding paragraphs, inclusive, as if fully set forth herein.

833. This is a claim against Defendants for aiding and abetting the other Defendants' violations of law alleged herein.

834. This claim is alleged in the alternative to each Count against Defendants to the extent such claim does not proceed.

835. Defendants knew of each of the other Defendants' violations of laws and substantially assisted in such violations.

836. Plaintiffs were damaged thereby.

COUNT IV

For Violation of §10(b) of the 1934 Act and Rule 10b-5 Against RALI, Citi, Goldman, IndyMac, HSBC, Deutsche Bank, UBS Securities and RBS

837. Plaintiffs repeat and reallege the allegations set forth in the preceding paragraphs, inclusive, as if fully set forth herein.

838. This claim is brought under §10(b) of the 1934 Act, 15 U.S.C. §78j(b), and Rule 10b-5 promulgated thereunder by the SEC, 17 C.F.R. §240.10b-5, against RALI, Citi, Goldman, IndyMac, HSBC, Deutsche Bank, UBS Securities and RBS (the "§10(b) Defendants") with respect to their involvement in the following trusts: RALI Series 2006-QS2 Trust; RALI Series 2006-QS6 Trust; RALI Series 2006 QS14 Trust; RALI Series 2006 QS18 Trust; Citigroup Mortgage Loan Trust 2007-10; Citicorp Mortgage Securities Trust, Series 2007-5; Citicorp Mortgage Securities Trust, Series 2007-8; GSR Mortgage Loan Trust 2006-7F; GSR Mortgage Loan Trust 2006-9F; and IndyMac IMJA Mortgage Loan Trust 2007-A1, as alleged herein. The §10(b) Defendants: (a) employed devices, schemes, and artifices to defraud; (b) made untrue statements of material fact and/or omitted material facts necessary to make the statements made not misleading; and (c) engaged in acts, practices and a course of business that operated as a fraud and deceit upon Union Central, in violation of §10(b) of the 1934 Act and Rule 10b-5 promulgated thereunder.

839. The §10(b)Defendants, individually and in concert, directly and indirectly, by the use, means or instrumentalities of interstate commerce and/or the mails, engaged and participated in a continuous course of conduct to conceal non-public, adverse material information about the

securitizations from Union Central, as reflected in the misrepresentations and omissions set forth above.

840. The §10(b) Defendants each had actual knowledge of the misrepresentations and omissions of material facts set forth herein, acted with reckless disregard for the truth by failing to ascertain and to disclose such facts even though such facts were available to them or deliberately refrained from taking steps necessary to discover whether the material facts were false or misleading.

841. As a result of the §10(b) Defendants' dissemination of materially false and misleading information and their failure to disclose material facts, Union Central was misled into believing that the Certificates were more creditworthy investments than they actually were.

842. Union Central purchased the Certificates without knowing that the §10(b) Defendants had misstated or omitted material facts about the securitizations. In purchasing the Certificates, Union Central relied directly or indirectly on false and misleading statements made by the §10(b) Defendants and/or an absence of material adverse information that was known to the §10(b) Defendants or recklessly disregarded by them but not disclosed in the Offering Materials or their communications with Union Central. Union Central was damaged as a result of its reliance on the §10(b) Defendants' false statements and misrepresentations and omissions of material facts.

843. At the time of the §10(b) Defendants' false statements, misrepresentations and omissions, Union Central was ignorant of their falsity and believed them to be true. Union Central would not have purchased or otherwise acquired the Certificates had it known the truth about the matters discussed above.

844. Union Central filed this action within two years after discovery of the facts constituting the violation, including facts establishing scienter and other elements of Union Central's claim, and within five years after the violations.

845. By virtue of the foregoing, the §10(b) Defendants have violated §10(b) of the 1934 Act and Rule 10b-5 promulgated thereunder.

846. As a direct and proximate result of the §10(b) Defendants' wrongful conduct, Union Central has suffered damages in connection with the purchase and subsequent decline in value or default of the Certificates.

COUNT V

For Violation of §20(a) of the 1934 Act Against Citigroup, Goldman Sachs, Ally, CGMI, RFS, UBS Securities, HSBC, Deutsche Bank, RBS, Krueger, Costa, Sparks and Paradis

847. Union Central repeats and realleges the allegations above as if fully set forth herein.

848. This claim is brought under §20(a) of the 1934 Act against Citigroup, Goldman Sachs, Ally, CGMI, RFS, UBS Securities, HSBC, Deutsche Bank, RBS, Krueger, Costa, Sparks and Paradis (the "§20(a) Defendants") with respect to their involvement in the following trusts: RALI Series 2006-QS2 Trust; RALI Series 2006-QS6 Trust; RALI Series 2006 QS14 Trust; RALI Series 2006 QS18 Trust; Citigroup Mortgage Loan Trust 2007-10; Citicorp Mortgage Securities Trust, Series 2007-5; Citicorp Mortgage Securities Trust, Series 2007-8; GSR Mortgage Loan Trust 2006-7F; GSR Mortgage Loan Trust 2006-9F; and IndyMac IMJA Mortgage Loan Trust 2007-A1, as alleged herein.

849. Citigroup, Goldman Sachs, Ally controlled and had the authority to control the content of certain documents, including the Offering Materials. Because of their involvement in the everyday activities of their subsidiaries, including the Depositors and Sponsors, and because of their wide-ranging supervisory authority, these defendants reviewed or had the opportunity to review those documents prior to their issuance and therefore knew, or were reckless in not knowing, that those documents contained the alleged misrepresentations. These Defendants reviewed or could have reviewed these documents prior to their issuance or could have prevented their issuance or

caused them to be corrected so as to accurately and properly disclose all material adverse information.

850. As underwriters of the above trusts, CGMI, Goldman Sachs, RFS, UBS, HSBC, Deutsche Bank and RBS controlled the content of the Offering Materials, including with respect to the material misstatements and omissions alleged above. In connection with the due diligence conducted in connection with the offering of the Certificates to plaintiffs, CGMI, Goldman Sachs, RFS, UBS, HSBC, Deutsche Bank and RBS received, considered and understood the adverse information alleged above regarding the lack of proper underwriting for the loans deposited in the subject trusts. CGMI, Goldman Sachs, RFS, UBS, HSBC, Deutsche Bank and RBS then used and disseminated these false and misleading offering materials to plaintiffs in connection with the sale of the Certificates and in order to profit at plaintiffs' expense. As underwriters, including through their contractual rights and responsibilities with respect to the trusts, CGMI, Goldman Sachs, RFS, UBS, HSBC, Deutsche Bank and RBS had control over the trusts they underwrote, including over the false and misleading statements and omissions described in detail herein.

851. Krueger, Costa, Sparks, Paradis, by virtue of their status and their high-level positions, as well as their participation in and awareness of their respective organization's operations and public statements, were able to and did influence and control their organization's decision making, including controlling the content and dissemination of the documents that Union Central contend contained materially false and misleading information and on which Union Central relied.

852. The §20(a) Defendants directly or indirectly controlled the conduct of those respective Defendants' businesses and their representations to Union Central within the meaning of §20(a) of the 1934 Act. The §20(a) Defendants directly or indirectly controlled the content of the Registration Statements and Prospectus Supplements that they used to sell Union Central the

Certificates within the meaning of §20(a) of the 1934 Act. Therefore, Defendants are jointly and severally liable for the fraud alleged herein.

853. The §20(a) Defendants had the power to control or influence the particular transactions giving rise to the securities violation alleged herein, as set forth more fully above.

854. As set forth above, the §10(b) Defendants each violated §10(b) of the 1934 Act and Rule 10b-5 by their acts and omissions as alleged herein. By virtue of their positions as controlling persons, the §20(a) Defendants are also liable pursuant to §20(a) of the 1934 Act.

855. Union Central filed this action within two years after discovery of the facts constituting the violation, including facts establishing scienter and other elements of Union Central's claim, and within five years after the violations.

856. As a direct and proximate result of defendants' wrongful conduct, including the wrongful conduct of the §20(a) Defendants, Union Central suffered damages in connection with its purchases of the Certificates at issue herein.

COUNT VI

For Violation of §20(b) of the 1934 Act Against Citigroup, Goldman Sachs, Ally, CGMI, RFS, UBS, HSBC, Deutsche Bank, RBS, Krueger, Costa, Sparks and Paradis

857. Union Central repeats and realleges the allegations above as if fully set forth herein.

858. Defendants Citigroup, Goldman Sachs, Ally, CGMI, RFS, UBS, HSBC, Deutsche Bank, RBS, Krueger, Costa, Sparks and Paradis unlawfully engaged in manipulative practice in violation of Section 20(b) of the Exchange Act.

859. Citigroup, Goldman Sachs, Ally, CGMI, RFS, UBS Securities, HSBC, Deutsche Bank, RBS, Krueger, Costa, Sparks and Paradis: (a) employed devices, schemes, and artifices to defraud; (b) made untrue statements of material fact and/or omitted to state material facts necessary

to make the statements not misleading; and (c) engaged in acts, practices, and a course of business which operated as a fraud and deceit upon Plaintiffs.

860. Defendants Citigroup, Goldman Sachs, Ally, CGMI, RFS, UBS Securities, HSBC, Deutsche Bank, RBS, Krueger, Costa, Sparks and Paradis had the power and authority to cause the §10(b) to engage in the wrongful conduct complained of herein, which made the statements alleged herein materially false and misleading. By reason of such conduct, these defendants are liable pursuant to Section 20(b) of the Exchange Act.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs pray for relief and judgment as follows:

A. Awarding compensatory damages in favor of Plaintiffs against all Defendants, jointly and severally, for all damages sustained as a result of Defendants' wrongdoing, in an amount to be proven at trial, including interest thereon;

B. Awarding Plaintiffs their reasonable costs and expenses incurred in this action, including counsel fees and expert fees;

C. Awarding statutory damages; and

D. Awarding such additional equitable/injunctive or other relief as deemed appropriate by the Court.

JURY DEMAND

Plaintiffs hereby demand a trial by jury.

JURY TRIAL DEMANDED 98

The Western and Southern Life Insurance Company, Western-Southern Life Assurance Company, Columbus Life Insurance Company, Integrity Life Insurance Company, National Integrity Life Insurance Company, and Fort Washington Investment Advisors, Inc. (collectively, "Western & Southern"), by and through their attorneys, bring this action against Residential Funding Company, LLC (f/k/a Residential Funding Corporation); GMAC Mortgage, LLC; Residential Accredit Loans, Inc.; Residential Asset Mortgage Products, Inc.; Residential Funding Securities, LLC (f/k/a Residential Funding Securities Corporation) (collectively, "RFC" or the "RFC Defendants"); BNP Paribas Mortgage Corporation and BNP Paribas Mortgage Securities LLC (collectively the "TBW Defendants"); RBS Securities, Inc. (f/k/a Greenwich Capital Markets, Inc.), UBS Securities LLC, Deutsche Bank Securities Inc., Citigroup Global Markets, Inc., (the "Underwriter Defendants"); and Bruce J. Paradis; Davee L. Olson; David C. Walker; Kenneth M. Duncan; Ralph T. Flees; James G. Jones; David M. Bricker (collectively, the "Officer Defendants"), and allege, on knowledge as to its own acts and on information and belief as to the acts of others, as follows:

NATURE OF ACTION

1. This action arises out of the sale of certain residential mortgage-backed securities (the "Certificates") to Western & Southern. The Certificates were sold pursuant to public filings and offering materials (as more fully defined below, the "Offering Materials") that contained untrue statements and omissions of material facts, in violation of Sections 1707.41, 1707.43 and 1707.44 of the Ohio Revised Code. Western & Southern further states claims for civil conspiracy, common-law fraud, and negligent misrepresentation.

2. To take advantage of an exploding market for residential mortgage-backed securities, Defendants aggressively expanded their securitization of mortgage loans from 2003-

2007. Defendants wore multiple hats in connection with the offerings, acting in various capacities including sponsor, issuer, and underwriter. In their overlapping capacities, the Defendants were responsible for purchasing large blocks of mortgage loans, repackaging those loans into securities, and selling the newly-created securities to investors like Western & Southern. Defendants or their affiliates often continued to profit after closing such offerings by servicing the loans underlying the securitizations.

3. Defendants earned substantial profits securitizing the mortgage loans, but they did not have to bear the loss if the mortgage loans defaulted as long as they could continue to offload the risk onto investors such as Western & Southern.

4. In marketing the Certificates to Western & Southern, the Defendants represented that the loans backing the securities were underwritten in accordance with prudent underwriting standards that ensured only qualified borrowers were granted loans, borrowers could repay the underlying loans, and that the properties securing such loans were sufficient collateral. The Defendants further represented that the mortgage loans underlying each securitization had been validly assigned to the Trusts such that the Trusts would have the ability to foreclose upon a particular property in the event of a borrower's default.

5. In reality, however, the loans backing the Certificates deviated substantially from what was represented to Western & Southern. To generate an ever-growing volume of loans to sell to investors, the Defendants abandoned their underwriting guidelines, often purchasing loans issued to borrowers regardless of their ability to repay. The loans were often issued on the basis of overstated incomes, inflated appraisals, false verifications of employment, and other unjustified departures from the touted underwriting criteria.

6. Western & Southern commissioned a forensic loan-level review of Defendants' securitizations at issue in this action drawing on a database of 50 million active mortgages providing market-specific data for 98% of all United States ZIP codes and 3,100 counties in all 50 states and the District of Columbia. This coverage represents 99% of the U.S. population and 97% of all properties (145 million properties). The results of the forensic review demonstrate that Defendants materially misrepresented key metrics published in the Offering Materials which were relied upon by Western & Southern to evaluate the Certificates including loan-to-value ("LTV"), combined LTV ("CLTV") ratios, and owner occupancy statistics.

7. It has also recently come to light that despite representations to the contrary in the Offering Materials, Defendants did not properly assign many of the mortgages or properly transfer notes and loan files to the relevant securitization trusts. Indeed, the results of Western & Southern's forensic review show that ***Defendants made absolutely no attempt to assign 81% of the mortgages*** to the securitization trusts, contrary to assurances in the Offering Materials that each mortgage would be properly assigned. As a result, the affected mortgage loans cannot be foreclosed upon in any efficient manner (if at all) if a borrower defaults. As a result, Defendants or their agents have engaged in widespread foreclosure misconduct, filing false documentation with courts nationwide and forging assignments and transfer documentation in an attempt to cover up their misrepresentations and omissions regarding their failure to assign mortgages and properly transfer notes and loan files in accordance with their disclosures in the Offering Materials.

8. Defendants' representations concerning, among other matters, adherence to meaningful underwriting standards, the value of the collateral, and proper assignment practices were material to Western & Southern's decision to purchase the Certificates because the

Defendants were the exclusive source of information regarding the loans and properties backing the securities. Unlike Defendants, Western & Southern did not have access to loan files. Western & Southern therefore depended on the Defendants to perform the necessary due diligence to verify that the information presented to it and other investors was true and accurate.

9. The Defendants' misconduct has prompted several criminal and civil investigations. For example, the United States Department of Justice (the "DOJ") and Securities and Exchange Commission (the "SEC") have commenced parallel criminal and civil investigations of the RFC Defendants' securitization practices. And all fifty state Attorneys General are investigating the Defendants' and others' misconduct in attempting to foreclose upon properties which they have no right to foreclose upon due to their failure to properly assign the mortgages – a failure that was contrary to representations set forth in the Offering Materials.

10. All of the Certificates purchased by Western & Southern were triple-A rated, or the equivalent, at the time of Western & Southern's investment. Now most do not even qualify as investment grade. They are "junk." And in six of the ten securitizations in which Western & Southern purchased Certificates, over 20% of the loans backing the securities have now defaulted, been foreclosed upon, or are delinquent. In four of the ten securitizations, over 30% of the loans backing the securities have now defaulted, been foreclosed upon, or are delinquent. Under the Ohio Securities Act, Western & Southern is entitled to rescind its purchase of these securities and to damages with respect to its Ohio Securities Act and common-law claims.

PARTIES

I. Plaintiffs

11. Plaintiff The Western and Southern Life Insurance Company is an insurance company formed under the laws, and domiciled in, the State of Ohio, with its principal place of business in Cincinnati, Ohio. It sells life insurance and annuity products.

12. Plaintiff Western-Southern Life Assurance Company is an insurance company formed under the laws of, and domiciled in, the State of Ohio, with its principal place of business in Cincinnati, Ohio. It sells life insurance and annuity products.

13. Plaintiff Columbus Life Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of Ohio, with its principal place of business in Cincinnati, Ohio. It sells life, accident and health insurance and annuity products.

14. Plaintiff Integrity Life Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of Ohio, with its principal place of business in Cincinnati, Ohio. It sells life, accident and health insurance and annuity products.

15. Plaintiff National Integrity Life Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of New York, with its principal place of business in Goshen, New York. It sells life, accident and health insurance and annuity products.

16. Fort Washington Investment Advisors, Inc. is a registered investment advisor formed under the laws of the State of Ohio, with its principal place of business in Cincinnati, Ohio. Fort Washington Investment Advisors brings this action on behalf of Fort Washington Active Fixed Income LLC, a Delaware limited liability company with its principal place of business in Cincinnati, Ohio.

II. RFC Defendants

17. Defendant Residential Funding Company, LLC is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. Prior to approximately October 2006, Residential Funding Company, LLC operated as Residential Funding Corporation, a Delaware corporation with its principal place of business in Minneapolis, Minnesota. Residential Funding Company, LLC and its predecessor, Residential Funding Corporation, are referred to herein as "Residential Funding." Residential Funding was the Sponsor for five of the ten securitizations at issue in this action.

18. GMAC Mortgage, LLC ("GMAC Mortgage"), is a Delaware limited liability company with its principal place of business in Dauphin, Pennsylvania. GMAC Mortgage was the Sponsor for two of the ten securitizations at issue in this action.

19. Defendant Residential Accredit Loans, Inc. ("RALI") is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. RALI was the Depositor for three of the ten securitizations at issue in this action.

20. Defendant Residential Asset Mortgage Products, Inc. ("RAMP") is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. RAMP was the Depositor for two of the ten securitizations at issue in this action.

21. Defendant Residential Funding Mortgage Securities I, Inc. ("RFMSI") is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. RFMSI was the Depositor for two of the ten securitizations at issue in this action.

22. Defendant Residential Funding Securities, LLC is a Delaware limited liability company with its principal place of business in St. Paul, Minnesota. Prior to approximately April 2006, Residential Funding Securities, LLC operated as Residential Funding Securities

Corporation, a Delaware corporation with its principal place of business in Minneapolis, Minnesota. Residential Funding Securities, LLC and Residential Funding Securities Corporation are referred to herein as "Residential Securities." Residential Securities was the Underwriter for one of the eight securitizations at issue in this action.[1]

III. Underwriter Defendants

23. Defendant UBS Securities LLC ("UBS") is a Delaware limited liability company with its principal place of business in Stamford, Connecticut. UBS was the Underwriter for two of the ten securitizations at issue in this action, including the TBW offering that is part of this action.

24. Defendant RBS Securities, Inc. (f/k/a Greenwich Capital Markets, Inc.) ("RBS Securities") is a Delaware corporation with its principal place of business in Stamford, Connecticut. RBS Securities was the Underwriter for three of the ten securitizations at issue in this action.

25. Defendant J.P. Morgan Securities LLC is a Delaware limited liability company with its principal place of business in New York, New York. J.P. Morgan Securities LLC is the successor-in-interest to J.P. Morgan Securities Inc., which converted to a limited liability company on or about September 1, 2010. J.P. Morgan Securities Inc. and its successor-in-interest, J.P. Morgan Securities LLC, are referred to herein as "J.P. Morgan Securities." J.P. Morgan Securities acted as the Underwriter for one of the ten securitizations at issue in this action.

[1] On August 1, 2011, after this suit was filed, Residential Securities changed its name to Ally Securities LLC. For the sake of continuity, this Amended Complaint will refer to this entity as "Residential Securities."

26. Defendant Deutsche Bank Securities Inc. is a Delaware corporation with its principal place of business in New York, New York. Deutsche Bank Securities acted as the Underwriter for three of the ten securitizations at issue in this action.

27. Defendant Citigroup Global Markets, Inc. ("Citigroup") is a New York corporation with its principal place of business in New York, New York. Citigroup is an Underwriter for two of the ten securitizations at issue in this action.

IV. RFC Officer Defendants

28. Defendant Bruce J. Paradis joined Residential Funding in 1983, and served in several executive positions prior to becoming its President and Chief Executive Officer in 1994. During the relevant period, Paradis also served as President, Chief Executive Officer, and a director of RALI and RAMP. Paradis signed registration statements for six of the seven RFC securitizations at issue in this action.

29. Defendant Davee L. Olson served as an officer of Residential Funding for over 15 years. He served as a vice president of finance from 1987 until 1990, as a senior vice president of finance from 1990 until 1991, and as the Chief Financial Officer from 1991 to January 2005. Olson also served as a director of RALI, RFMSI, and RAMP during the relevant period. Olson signed registration statements for four of the seven RFC securitizations at issue in this action.

30. Defendant David C. Walker joined General Motors Acceptance Corporation, the parent company of Residential Funding, in 1985. He has served as managing director, Chief Financial Officer, and a member of the board of directors of GMAC Mortgage Group since January 2000, and as director of U.S. funding and securitization at GMAC from September 1998 until December 1999. Walker also served as a director of each of Residential Funding, RALI,

and RFMSI during the relevant period. Walker signed registration statements for two of the seven RFC securitizations at issue in this action.

31. Defendant Kenneth M. Duncan served as Acting Chief Financial Officer of each of Residential Funding, RALI, and RAMP during the relevant period. Duncan signed registration statements for five of the seven RFC securitizations at issue in this action.

32. Defendant Ralph T. Flees served as Controller and Principal Accounting Officer of RALI and RAMP during the relevant period. Flees signed registration statements for all of the RFC securitizations at issue in this action.

33. Defendant James G. Jones was President, CEO, and director of RAMP during the relevant period. Jones signed the registration statement for one securitization at issue in this action.

34. Defendant David M. Bricker was the Chief Financial Officer of RAMP during the relevant period. Bricker signed the registration statement for one securitization at issue in this action.

V. TBW Defendants

35. Defendant BNP Paribas Mortgage Corporation ("BNPPM") is a Delaware corporation with its principal place of business in New York, New York. BNPPM was the Seller for the TBW offering at issue in this action.

36. Defendant BNP Paribas Mortgage Securities LLC ("BNPPMS") is a Delaware corporation with its principal place of business in New York, New York. BNPPMS was the Depositor for the TBW offering at issue in this action.

VII. Relevant Non-Parties

37. The Certificates for each securitization relevant to this action were issued by a trust purportedly established by the Depositor. The ten issuing trusts (collectively, the "Trusts") were: RALI Series 2005-QS16 Trust ("RALI 2005-QS16"); RFMSI Series 2006-S2 Trust ("RFMSI 2006-S2"); RFMSI Series 2006-S12 Trust (RFMSI 2006-S12"); RALI Series 2006-QS3 Trust ("RALI 2006-QS3"); RALI Series 2006-QS6 Trust ("RALI 2006-QS6"); GMACM Home Equity Loan Trust 2007-HE1 ("GMAC 2007-HE1"); GMACM Home Equity Loan Trust 2007-HE2 ("GMAC 2007-HE2"); TBW Mortgage-Backed Trust Series 2006-5 ("TBW 2006-5"); Renaissance Home Equity Loan Trust 2007-1 ("RAMC 2007-1"); and Renaissance Home Equity Loan Trust 2007-2 ("RAMC 2007-2").

38. During the time that Western & Southern purchased the Certificates, non-party Taylor Bean & Whitaker Mortgage Corporation ("TBW") was one of the largest privately held mortgage lending companies in the United States and principally involved in the origination, purchase, sale, and servicing of residential mortgage loans. In August 2009, federal regulators raided TBW after it failed to submit a required annual financial report to the Federal Housing Administration ("FHA") and to disclose certain irregular transactions that raised concerns of fraud. Just days after the raid, the FHA barred TBW from underwriting any FHA-insured mortgages, and Ginnie Mae barred TBW from issuing mortgage-backed securities. TBW declared bankruptcy shortly thereafter.

39. Lee Farkas was the chairman of TBW, the sponsor for the TBW offering that is a part of this action. On April 21, 2011, Farkas was convicted of 14 counts of fraud and conspiracy in the management and operation of TBW in a criminal action brought by the United States government, captioned *United States v. Farkas*, Case No. 1:10-CR-200 (E.D. Va.). He

was subsequently sentenced to 30 years in prison. Farkas is also a defendant in a civil action brought by the SEC in the United State District Court for the Eastern District of Virginia, captioned *SEC v. Farkas*, Case No. 1:10-CV-667, alleging violations of the Securities Act of 1933 and the Securities Exchange Act of 1934 in the management and operation of TBW. Farkas masterminded and led TBW's origination and sale of low-quality mortgage loans to generate massive fees. Those fees were used, *inter alia*, to attempt cover up TBW's extraordinary operating expenses, which were approximately $150 million, almost daily.

40. Prior to its bankruptcy, non-party Delta Funding Corporation ("Delta Funding") was a consumer finance company that originated, securitized, and sold mortgage loans. Non-party Delta Funding was the Sponsor for RAMC 2007-1 and RAMC 2007-2.

41. Prior to its bankruptcy, non-party Renaissance Mortgage Acceptance Corp. ("Renaissance Mortgage") was a consumer finance company that served as the Depositor for securitizations sponsored by Delta Funding. Renaissance Mortgage was the Depositor for RAMC 2007-1 and RAMC 2007-2.

42. At all relevant times, the Defendants committed the acts, caused or directed others to commit the acts, or permitted others to commit the acts alleged in this Amended Complaint. Any allegations about acts of corporate defendants means that those acts were committed through their officers, directors, employees, agents, and/or representatives while those individuals were acting within the actual or implied scope of their authority.

JURISDICTION AND VENUE

43. This Court has jurisdiction over Western & Southern's claims, which are brought under the Ohio Securities Act, common law fraud, civil conspiracy, and negligent misrepresentation.

44. This Court has personal jurisdiction over the Defendants by virtue of their securities sales to Western & Southern in Ohio.

45. Venue is proper pursuant to Ohio Civ. R. 3(B) because, among other reasons, Hamilton County is the principal place of business of most of the plaintiffs.

SUBSTANTIVE ALLEGATIONS

I. THE MARKET FOR RESIDENTIAL MORTGAGE-BACKED SECURITIES

46. In the 1980s and 1990s, mortgage originators followed a traditional model for originating mortgage loans. Under the traditional model, they either held the mortgage loans they provided to borrowers through the term of each loan, or sold the mortgage loans to Fannie Mae or Freddie Mac.

47. Loans held by mortgage originators were typically conservative, first-lien loans to prime borrowers because the originator would profit if the borrower made timely interest and principal payments, but would bear the loss if the borrower defaulted and the property value was insufficient to repay the loan. As a result, the originator had economic incentives to establish the creditworthiness of the borrower and the true value of the underlying property by appraising it fairly before issuing the mortgage loan.

48. Loans sold to Fannie Mae and Freddie Mac had to meet specific guidelines meant to ensure that they were conservative loans made only to prime borrowers. By law, Fannie Mae and Freddie Mac can purchase only those mortgage loans that conform to certain regulatory guidelines. These loans are known in the industry as conforming loans, and are historically the most conservative loans with the lowest rates of delinquency and default. Mortgage loans that fail to meet the regulatory guidelines are known in the industry as non-conforming loans.

49. In the 1980s and 1990s, Fannie Mae and Freddie Mac securitized the loans they purchased from mortgage originators and sold the securities backed by the loans – referred to as residential mortgage-backed securities – to investors. Investors in these early mortgage-backed securities were provided protections not only because the underlying loans conformed to strict regulatory guidelines, but also because Fannie Mae and Freddie Mac guaranteed that investors would receive timely payments of principal and interest. Because Fannie Mae and Freddie Mac are government sponsored entities and were perceived to be implicitly guaranteed by the federal government, investors viewed the guarantees provided by Fannie Mae and Freddie Mac as diminishing credit risk, if not removing it altogether.

50. In the early 2000s, the demand for securities backed by mortgage loans increased. Private financial institutions stepped in to meet the demand by originating an ever-growing number of non-conforming loans, such as loans based on reduced documentation, loans issued to subprime borrowers, and adjustable loans where the initial "teaser" interest rate increases after a period of time. These loans were then securitized for sale to private investors. By 2001, $240 billion in residential mortgage-backed securities were issued through private securitizations. By 2006, that amount had increased by almost five times – to $1.033 trillion.

II. THE SECURITIZATION PROCESS

51. To create residential mortgage-backed securities, such as the Certificates purchased by Western & Southern, a process known as "mortgage securitization" is used. Mortgage loans are acquired from mortgage originators and pooled together, with securities constituting interests in the cash flow from the mortgage pools then sold to investors. The securities are also referred to as mortgage "pass-through" securities because the cash flow from

the pool of mortgages is passed through to the securities holders when payments are made by the underlying mortgage borrowers.

52. Each securitization involves several entities that perform distinct tasks. The first step in creating a residential mortgage-backed security, such as the Certificates, is the acquisition by the Depositor of an inventory of mortgage loans from a Sponsor or Seller, which either originates the loans or acquires the loans from other mortgage originators.

53. To create securities backed by the mortgage loans, the Depositor then forms one or more mortgage pools with the inventory of loans and creates tranches of interests in the mortgage pools with various levels of seniority. Interests in these tranches are then issued by the Depositor (who serves as the Issuer) through a trust in the form of bonds or certificates.

54. Each tranche has a different level of purported risk and reward, and, often, a different credit rating. The most senior tranches often receive the highest investment grade rating (triple-A). Junior tranches, which usually have lower ratings, are more exposed to risk but offer higher potential returns. The most senior tranches of securities will be entitled to payment in full before the junior tranches. Conversely, losses on the underlying loans in the asset pool – whether due to default, delinquency, or otherwise – are allocated first to the most subordinate or junior tranche of securities, then to the tranche above that. This hierarchy in the division of cash flows is referred to as the "flow of funds" or "waterfall."

55. The Depositor works with one or more of the nationally recognized credit-rating agencies to ensure that each tranche of the mortgage-backed securities receives the rating desired by the Depositor (and Underwriter). Once the asset pool is securitized, the certificates are issued to one or more Underwriters (typically Wall Street banks), who resell them to investors such as Western & Southern.

56. Because the cash flow from the loans in the mortgage pool of a securitization is the source of funds to pay the holders of the securities issued by the trust, the credit quality of the securities depends primarily on the credit quality of the loans in the mortgage pool, which often includes thousands of loans. Detailed information about the credit quality of the loans is contained in the loan files developed and maintained by the mortgage originators when making the loans.

57. For residential mortgage loans, such as the loans that backed the Certificates purchased by Western & Southern, each loan file normally contains documents including the borrower's application for the loan, verification of income, assets, and employment, references, credit reports, and an appraisal of the property that will secure the loan and provide the basis for other measures of credit quality, such as loan-to-value ratios and occupancy status. The loan file should also include notes from the person who underwrote the loan describing the loan's purported compliance with underwriting guidelines, and documentation of compensating factors that justified any departure from those standards.

58. Western & Southern and other investors do not have access to the loan files. Instead, the Sponsor, Depositor, and Underwriter are responsible for gathering and verifying information about the credit quality and characteristics of the loans that are supposed to be deposited into the trust, and presenting this information in the registration statements, prospectuses, prospectus supplements, loan tapes and data compilations (collectively, the "Offering Materials") prepared for potential investors. This due diligence process is a critical safeguard for investors and a fundamental legal obligation of the Sponsor, Depositor, and Underwriter.

59. The securitization process incentivized the Defendants to abandon or disregard underwriting standards so that they could originate and purchase huge volumes of low-quality loans to securitize.

60. As the private residential mortgage-backed securities market expanded, the traditional "originate to hold" model morphed into the "originate to distribute" model. Under the "originate to distribute" model, mortgage companies such as the Defendants no longer held the mortgage loans to maturity. Rather, they offloaded the risk of loss to the investors who purchased an interest in the securitized pool of loans.

61. The new distribution model was highly profitable for the Defendants and other mortgage companies. By securitizing and selling mortgage loans to investors through underwriters, mortgage companies received immediate payment for the loans, shifted the loans off their books, and were able to issue more loans. The securitization process enabled the mortgage companies to earn most of their income from transaction and loan-servicing fees.

62. Because the mortgage companies did not have to bear the risk of loss, they had an unchecked incentive to originate more and more loans to feed into the securitization machine. That incentive also caused the Defendants to abandon their disclosed underwriting guidelines to originate and purchase as many loans as possible for securitization.

63. According to *Inside Mortgage Finance*, the RFC Defendants or their affiliates issued (i) $42.336 billion of nonagency mortgage-backed securities in 2004, (ii) $56.93 billion in 2005, making them the fifth largest issuer in 2005; (iii) $66.19 billion in 2006, making them the fourth largest issuer in 2006; and (iv) $32.4 billion in 2007, which still made the RFC Defendants or their affiliates the eighth largest issuer in 2007.

64. TBW similarly took advantage of this exploding market by originating a large volume of mortgage loans in an effort to boost its fee revenue. In 2004, TBW originated approximately $9 billion in mortgage loans. In 2005, the amount had grown to approximately $11 billion. In 2006, the volume nearly doubled – to approximately $19 billion in mortgage loans. In 2007, the volume of mortgage loans that TBW originated grew again – to approximately $20 billion. During this time, TBW was consistently ranked by *National Mortgage News* among the top 10 residential mortgage wholesalers in the United Stated based on volume. By 2008, TBW was the largest non-depository mortgage lender in the United States.

65. Delta Funding and Renaissance Mortgage similarly increased their origination and securitizations during the relevant period. From 2005 through 2007, Delta Funding originated and securitized over $10 billion of loans, which was a substantial increase from prior years.

66. Unbeknownst to Western & Southern, the Defendants originated or purchased loans that were often issued without due regard for the borrowers' ability to repay the loans. The loans were often issued on the basis of overstated incomes, inflated appraisals, false verifications of employment, or exceptions to underwriting criteria that had no proper justification. The origination practices engaged in by the Defendants and the originators from which they purchased were in blatant disregard of Defendants' disclosed underwriting standards and any semblance of reasonable and prudent underwriting.

67. Similarly, the depositor Defendants and seller Defendants disregarded underwriting guidelines and failed to conduct adequate due diligence so that they could purchase and securitize as many loans as possible. The Underwriter defendants facilitated the securitizations and participated in the unlawful sale of the resulting securities to investors such as

Western & Southern without conducting adequate due diligence. Any due diligence conducted by these Defendants was deficient, having been done on an expedited basis, with only an unreasonably small percentage of the loan pool receiving any review.

III. WESTERN & SOUTHERN'S PURCHASES OF CERTIFICATES

68. Between 2005 and 2007, Western & Southern made the following purchases of Certificates from the following Defendants, representing a total investment of approximately $215.4 million:

Asset	Purchaser	Amount	Settle Date	Seller Defendants
RALI 2005-QS16 A4	Columbus Life Insurance Company	4,500,000.00	12/14/05	Residential Funding (Sponsor) RALI (Depositor) Citigroup (Underwriter)

IV. DEFENDANTS ABANDONED THEIR DISCLOSED UNDERWRITING STANDARDS TO FACILITATE THE SALE OF LOW-QUALITY LOANS TO INVESTORS

A. Defendants Touted Their Underwriting Standards

69. The fundamental basis upon which residential mortgage-backed securities are valued is the ability of the borrowers to repay the principal and interest on the underlying loans and the adequacy of the collateral for those loans. If the borrowers cannot pay and the collateral is insufficient, the securities experience losses. For this reason, the underwriting standards and practices of the mortgage originator that issued the loans backing the certificates – and the representations in the offering materials regarding those standards – are critically important to the value of the securities and to investors' decisions to purchase the securities.

70. Defendants represented in the Offering Materials that the loans underlying each securitization were underwritten in accordance with meaningful underwriting standards designed to properly qualify borrowers and ensure the borrowers' ability to repay the underlying loans and the sufficiency of the underlying properties as collateral. These representations were false. As set forth below in Sections IV(B)-(C) and VII-VIII, the mortgage loans underlying Western & Southern's Certificates did not comply with the underwriting standards the Offering Materials described because those standards were systemically ignored. In originating or acquiring the loans, the Defendants frequently ignored borrowers' actual repayment ability and the value, adequacy, and ability to realize on mortgaged property that was used as collateral. Systematic, bulk exceptions to underwriting standards were granted without proper compensating factors. Defendants failed to inform investors that they were systematically abusing the "exceptions" process in order to further circumvent their purported underwriting standards.

1. The RFC Defendants' Representations

71. The RFC Defendants represented in the Offering Materials that the loans underlying each securitization were underwritten in accordance with meaningful underwriting standards designed to ensure the borrowers' ability to repay the underlying loans and the sufficiency of the underlying properties as collateral.

72. The Offering Materials promised investors that the mortgage originators for the loans had collected a variety of financial information about a borrower to ensure that the borrower could repay the loan. For example, the Offering Materials for RFMSI 2006-S12 provided:

> As part of the application, the borrower is required to provide a current balance sheet describing assets and liabilities and a statement of income and expenses, as well as an authorization to apply for a credit report which summarizes the borrower's credit history with merchants and lenders and any record of bankruptcy. In addition, an employment verification is obtained which reports the borrower's current salary and may contain the length of employment and an indication as to whether it is expected that the borrower will continue that employment in the future.

RFMSI 2006-S12 Prospectus Supplement dated December 21, 2006 at 11-12.[2] The Offering Materials for each of the RFC Defendants' securitizations at issue in the present action contained the same or substantially similar representations as set forth in detail in Exhibit A.

73. The Offering Materials promised investors that only borrowers who could repay loans had received them. For example, Offering Materials for RFMSI 2006-S12 provided:

> Once all applicable employment, credit and property information is received, a determination is made as to whether the prospective borrower has sufficient monthly income available to meet the borrower's monthly obligations on the

[2] The RFC Defendants' affiliate Homecomings Financial Network, Inc. ("Homecomings"), originated or purchased approximately 8.2%, 14.9% and 26.4% of the group I loans, group II loans and group III loans, respectively in RFMSI 2006-S12. GMAC Mortgage originated approximately 0.5%, 10.3% and 14.7% of the group I loans, group II loans and group III loans, respectively. National City Mortgage originated 23.3% of the loans in loan group I. SunTrust Mortgage, Inc. originated 20.1% and 14.7% of the loans underlying loan group I and loan group II respectively. Provident Funding Associates, LP originated 14.7% of the loans in loan group II. No other party originated more than 10% of the underlying loans.

> proposed mortgage loan and other expenses related to the home, including property taxes and hazard insurance, and other financial obligations and monthly living expenses.

RFMSI 2006-S12 Prospectus Supplement at 12. The Offering Materials for each of the RFC Defendants' securitizations at issue in the present action contained the same or substantially similar representations as set forth in detail in Exhibit A.

74. The Offering Materials assured investors that loans underwritten pursuant to "reduced loan documentation" were subject to enhanced LTV and credit score requirements. For example, the Offering Materials for RFMSI 2006-S12 provided: "[I]n order to be eligible for a reduced loan documentation program, the LTV ratio must meet applicable guidelines, the borrower must have a good credit history and the borrower's eligibility for this type of program may be determined by use of a credit scoring model." RFMSI 2006-S12 Prospectus Supplement at 13. The Offering Materials for each of the RFC Defendants' securitizations at issue in the present action contained the same or substantially similar representations as set forth in detail in Exhibit A.

75. The Offering Materials promised investors that Residential Funding itself had reviewed the underwriting information to confirm compliance with underwriting standards. For example, Offering Materials for RFMSI 2006-S12 provided:

> Residential Funding Company, LLC, on behalf of the depositor, typically will review a sample of the mortgage loans purchased by Residential Funding Company, LLC for conformity with the applicable underwriting standards and to assess the likelihood of repayment of the mortgage loans.

RFMSI 2006-S12 Prospectus Supplement at 11. The Offering Materials for each of the RFC Defendants' securitizations at issue in the present action contained the same or substantially similar representations as set forth in detail in Exhibit A.

76. Finally, the Offering Materials promised investors that all loans were issued in substantial compliance with underwriting standards, and that any deviation from specific criteria was justified by sufficient positive compensating factors. For example, Offering Materials for RFMSI 2006-S12 provided:

> [A] mortgage loan will be considered to be originated in accordance with the underwriting standards described above if, based on an overall qualitative evaluation, the loan is in substantial compliance with the underwriting standards. For example, a mortgage loan may be considered to comply with the underwriting standards described above, even if one or more specific criteria included in the underwriting standards were not satisfied, if other factors positively compensated for the criteria that were not satisfied.

RFMSI 2006-S12 Prospectus Supplement at S-48. The Offering Materials for each of the RFC Defendants' securitizations at issue in the present action contained the same or substantially similar representations as set forth in detail in Exhibit A.

2. The TBW Defendants' Representations

77. TBW originated or acquired all of the mortgage loans underlying the TBW 2006-5 securitization. TBW 2006-5 Prospectus Supplement dated October 25, 2006 at 9. The Offering Materials represented to investors that the securitized loans were underwritten in accordance with meaningful underwriting standards designed to ensure that borrowers were able to repay the underlying loans and the properties purportedly securing those loans constituted adequate collateral.

78. For example, the Offering Materials promised investors that TBW had collected a variety of financial information about a borrower to ensure that the borrower could repay the loan:

> For the "Standard" documentation loan program, a prospective borrower is required to complete a detailed application providing pertinent credit information. The application contains a description of a borrower's assets and liabilities and a statement of income and expenses, as well as an authorization to apply for a credit

> report which summarizes the borrower's credit history with merchants and lenders and any record of bankruptcy. In addition, employment verification is obtained which reports the borrower's current salary and may contain the length of employment and an indication as to whether it is expected that the borrower will continue such employment in the future. If a prospective borrower is self-employed or if income is received from dividends and interest, rental properties or other income which can be verified from tax returns, the borrower may also be required to submit copies of signed tax returns. In addition, the borrower may be required to authorize verification of deposits at financial institutions where the borrower has accounts.

Id. at 28.

79. Even for loans issued to borrowers with reduced documentation, the Offering Materials promised investors that such loans still required verification that the borrower could repay the loan, and were limited in size:

> Non-Conforming Loans may also be originated under TBW's various types of reduced loan documentation policy, where income and assets may or may not be stated depending on certain TBW guidelines. For example, "Stated Income" allows self-employed borrowers to state his or her income, therefore not requiring the borrower to verify income. For these loans, a credit check, an appraisal, and verification of sufficient assets is required. These loans generally will not exceed a 75% loan-to-value ratio on primary residences and a 70% loan-to-value ratio on second homes.

Id.

80. Finally, the Offering Materials promised investors that the loans were issued in substantial compliance with underwriting standards, and that any deviation from specific criteria was justified by sufficient positive compensating factors:

> TBW's underwriting standards include a set of specific criteria pursuant to which the underwriting evaluation is made. However, the application of TBW's underwriting standards does not imply that each specific criterion was satisfied individually. Rather, a mortgage loan will be considered to be originated in accordance with a given set of underwriting standards if, based on an overall qualitative evaluation, the loan is in substantial compliance with those underwriting standards. For example, a mortgage loan may be considered to comply with a set of underwriting standards, even if one or more specific criteria included in those underwriting standards were not satisfied, if other factors

> compensated for the criteria that were not satisfied or if the mortgage loan is considered to be in substantial compliance with the underwriting standards.

Id.

3. The Renaissance Representations

a. RAMC 2007-1

81. All of the mortgage loans underlying RAMC 2007-1 were originated by Delta Funding. *See* RAMC 2007-1 Prospectus Supplement dated March 14, 2007 at 105. The Offering Materials represented to investors that the securitized loans were underwritten in accordance with meaningful underwriting standards designed to ensure that borrowers were able to repay the underlying loans and the properties purportedly securing those loans constituted adequate collateral.

82. The Offering Materials represented that the mortgage originator collected a variety of financial information about a borrower to ensure that the borrower could repay the loan:

> For loans to borrowers who are salaried employees, we require current employment information in addition to employment history. We verify this information based on one or more of the following items: written confirmation from employers, recent pay-stub, recent W-2 tax form, recent tax return, bank statements and telephone confirmation from the employer. For our limited income verification program, we require either six months of bank statements or a job letter to be submitted which contains substantially the same information one would find on a standard verification of employment form, including: job position; length of time on job; current salary; and the job letter should appear on the employer's letterhead and include the telephone number and signature of the individual completing the letter on behalf of the employer.

Id. at 110.

83. The Offering Materials assured investors that very few loans were underwritten based on stated income or reduced documentation and that when such loans were issued they

were subject to meaningful safeguards including enhanced credit rating and LTV requirements. For example, the Offering Materials provided:

> For our no income verification program, we require proof of self-employment in the same business for two years. We only offer our stated income program, which represents a very small percentage of our loans, for better credit quality borrowers where telephone verification is performed by an underwriter to verify that the borrower is employed. We usually require lower combined LTV ratios with respect to loans made under programs other than the full documentation program.

Id.

84. The Offering Materials also promised investors that Delta Funding's underwriters had reviewed the underwriting information to confirm compliance with underwriting standards:

> Our underwriters are trained to review all components of the loan to determine its compliance with our underwriting guidelines. . . . We assess a borrower's credit-worthiness primarily based on the borrower's mortgage history and credit score, and we generally adjust our pricing and LTV ratios based on many other risk parameters. . . . Qualification for a loan is based primarily upon our risk-based pricing model and guidelines, which we have developed over our 25-year history and our extensive database of prior loan performance.

Id.

85. Finally, the Offering Materials promised investors that all loans were issued in substantial compliance with underwriting standards, and that any deviation from specific criteria was justified by sufficient positive compensating factors:

> On a case-by-case basis, we may determine that the prospective borrower warrants an exception from the guidelines if sufficient compensating factors exist. Examples of compensating factors we consider include the following: low debt ratio; long-term stability of employment and/or residence; excellent payment history on past mortgages; or a significant reduction in monthly expenses.

Id.

b. RAMC 2007-2

86. All of the mortgage loans underlying RAMC 2007-2 were originated by Delta Funding. *See* RAMC 2007-2 Prospectus Supplement dated May 14, 2007 at 86. The Offering

Materials represented to investors that the securitized loans were underwritten in accordance with meaningful underwriting standards designed to ensure that borrowers were able to repay the underlying loans and the properties purportedly securing those loans constituted adequate collateral.

87. The Offering Materials represented that the mortgage originator collected a variety of financial information about a borrower to ensure that the borrower could repay the loan:

> For loans to borrowers who are salaried employees, we require current employment information in addition to employment history. We verify this information based on one or more of the following items: written confirmation from employers, recent pay-stub, recent W-2 tax form, recent tax return, bank statements and telephone confirmation from the employer. For our limited income verification program, we require either six months of bank statements or a job letter to be submitted which contains substantially the same information one would find on a standard verification of employment form, including: job position; length of time on job; current salary; and the job letter should appear on the employer's letterhead and include the telephone number and signature of the individual completing the letter on behalf of the employer.

Id. at 91.

88. The Offering Materials assured investors that very few loans were underwritten based on stated income or reduced documentation and that when such loans were issued they were subject to meaningful safeguards including enhanced credit rating and LTV requirements. For example, the Offering Materials provided:

> For our no income verification program, we require proof of self-employment in the same business for two years. We only offer our stated income program, which represents a very small percentage of our loans, for better credit quality borrowers where telephone verification is performed by an underwriter to verify that the borrower is employed. We usually require lower combined LTV ratios with respect to loans made under programs other than the full documentation program.

Id.

89. The Prospectus Supplement also promised investors that the Renaissance Underwriters themselves had reviewed the underwriting information to confirm compliance with underwriting standards: "Our underwriters are trained to review all components of the loan to determine its compliance with our underwriting guidelines." *Id*.

90. Finally, the Prospectus Supplement promised investors that all loans were issued in substantial compliance with underwriting standards, and that any deviation from specific criteria was justified by sufficient positive compensating factors:

> On a case-by-case basis, we may determine that the prospective borrower warrants an exception from the guidelines if sufficient compensating factors exist. Examples of compensating factors we consider include the following: low debt ratio; long-term stability of employment and/or residence; excellent payment history on past mortgages; or a significant reduction in monthly expenses.

Id.

B. Widespread Defaults and Downgrades Suggest That Defendants Abandoned Their Underwriting Standards

91. Even though the Certificates purchased by Western & Southern were supposed to be long-term, stable investments, just years after their issuance, a substantially high percentage of the mortgage loans backing the Certificates have defaulted, been foreclosed upon, or are delinquent, resulting in massive losses to the certificate holders, including Western & Southern. The following table contains the most recent performance data available for the loan pools:

Offering	Number of Months Since Issuance	Current Number of Loans in Pool	Total % of Current Delinquencies
RALI 2005-QS16	12	1,683	2.80
	24	1,456	7.21
	36	1,316	13.99
	48	1,151	23.68
	60	1,013	20.90

Offering	Number of Months Since Issuance	Current Number of Loans in Pool	Total % of Current Delinquencies

	24	4,273	34.76
	36	3,792	39.31
	48	3,478	34.84
	60	NA	NA

Offering	Number of Months Since Issuance	Current Number of Loans in Pool	Total % of Current Delinquencies
RAMC 2007-2 AF1	12	4,179	25.65
	24	3,659	37.40
	36	3,300	39.22
	48	3,056	33.20
	60	NA	NA

92. All of Western & Southern's investments initially received the highest possible Standard & Poor's rating—AAA—which has historically represented an expected loss rate of less than .05%. This is the same rating that until recently was typically given to bonds backed by the full faith and credit of the United States government, such as treasury bills. According to S&P's whitepaper, "Understanding Standard & Poor's Rating Definitions," an AAA rating represents an "extremely strong capacity to meet its financial commitments."

93. Now virtually all of the Certificates have been downgraded to junk-bond ratings, as can be seen in the following table:

Certificate Offering and Class	Original Moody's Rating	Current Moody's Rating	Original Fitch Rating	Current Fitch Rating	Original S&P Rating	Current S&P Rating
RALI 2005-QS16 A4	Aaa	Caa3	AAA	C	AAA	CCC
RALI 2006-QS3 1A12	Aaa	Caa3	AAA	D	AAA	D
RALI 2006-QS6 1A6	Aaa	Caa3	AAA	D	AAA	D
RFMSI 2006-S2 A2	--	--	AAA	CCC	AAA	CCC
RFMSI 2006-S12 3A9	Aaa	Caa1	AAA	CCC	AAA	B+/*-
GMACM 2007-HE1 A4	Aaa	B3/*-	--	--	AAA	B
GMACM 2007-HE2 A6	Aaa	Caa3	--	--	AAA	D
TBW 2006-5 A5A	Aaa	C	--	--	AAA	D
TBW 2006-5 A6	Aaa	Caa2	--	--	AAA	D
RAMC 2007-1 AF1	Aaa	B3	--	--	AAA	CCC
RAMC 2007-1 AF6	Aaa	Ca	--	--	AAA	CCC
RAMC 2007-2 AF1	Aaa	Caa1	--	--	AAA	CCC

94. The poor performance of the loan pools, the inability to efficiently work out loans or realize on the mortgage collateral and the rapidly dropping credit ratings of the Certificates have caused a massive decline in the market values of the Certificates. According to recent data, the Certificates have lost 39% of their market value.

95. The economic downturn cannot explain the abnormally high percentage of defaults, foreclosures, and delinquencies observed in the loan pools. Nor can it explain the inability to work out or modify the defaulted loans or efficiently foreclose on the mortgage collateral. Loan pools that were properly underwritten and contained loans with the represented characteristics would have experienced substantially fewer payment problems and substantially

lower percentages of defaults, foreclosures, and delinquencies. If loan documentation had been adequately prepared, maintained and delivered (such as assignments of notes and mortgages), the value of the underlying loans and collateral would have been better preserved.

C. Other Evidence That Defendants Systemically Disregarded the Underwriting Guidelines Touted in the Offering Materials

1. The RFC Defendants' Systemic Abandonment of Underwriting Standards

96. GMAC Mortgage came into existence in 1985 when GMAC Inc., then the finance subsidiary of General Motors, acquired a mortgage loan business. In 1990, GMAC Mortgage acquired RFC. GMAC further increased its mortgage business in 2000 by forming GMAC Bank (now Ally Bank). GMAC has been one of the largest MBS issuers in the country since the 1980s, and GMAC grew to be the fourth largest U.S. mortgage loan originator by 2006, issuing tens of billions of dollars of mortgages annually. The RFC Defendants or their affiliates originated a majority of the mortgage loans underlying the RFC securitizations subject to this action.

97. The RFC Defendants' abandonment of their underwriting guidelines and improper loan documentation has been the subject of multiple investigations and lawsuits. For example, the RFC Defendants' misconduct in connection with their mortgage-backed securitizations was featured in the January 2011 report of the Congressional Financial Crisis Inquiry Commission (the "FCIC Report"). The FCIC Report disclosed that a review of RFC loans by Fannie Mae and Freddie Mac uncovered over a billion dollar of loans originated by RFC that failed to comply with applicable underwriting guidelines during the relevant period. These loans were so materially deficient that the RFC Defendants had to repurchase them. According to the FCIC:

> In 2009 and 2010, Freddie put back significant loan volumes to the following lenders: Countrywide, $1.9 billion; Wells Fargo, $1.2 billion; Chase Home Financial, $1.1 billion; Bank of America, $476 million; ***and Ally Financial, $453 million***.
>
> Using a method similar to Freddie's to test for loan eligibility, Fannie reviewed between 2% and 5% of the mortgages originated since 2005—sampling at the higher rates for delinquent loans. From 2007 through 2010, Fannie put back loans to the following large lenders: Bank of America, $6.9 billion; Wells Fargo, $2.3 billion; JP Morgan Chase, $2.2 billion; Citigroup, $1.5 billion; SunTrust Bank, $898 million; ***and Ally Financial, $838 million***.

98. MBIA Insurance Corporation ("MBIA") had access to some of the complete loan files for certain of the RFC Defendants' securitizations including GMACM 2007-HE1, which is at issue in the present action. Its analyses were made public only in April 2010 in connection with the filing of the complaint in *MBIA Insurance Co. v. GMAC Mortgage, LLC (f/k/a GMAC Mortgage Corp.)*, No. 600837-2010 (N.Y.S. Sup. Ct.). MBIA's findings demonstrate that the essential characteristics of the mortgage loans underlying the Certificates sold to Western & Southern were misrepresented, and that the problems in the RFC Defendants' underwriting practices were systemic.

99. MBIA is a New York-based monoline insurer that wrote insurance on GMACM 2007-HE1, insuring that payments of principal and interest would be made to investors in that offering. MBIA conducted an investigation into certain loan files after it was asked to make payments on its GMACM 2007-HE1 insurance policies. (Western & Southern, as an investor, does not have access to such files.) For the offerings MBIA analyzed, the parties, type of collateral, structure, timing, and disclosures made were all substantially similar, if not identical, to those present here. MBIA's analysis is also probative of problems underlying Western & Southern's Certificates because the Defendants' problems were systemic.

100. MBIA reviewed approximately 4,104 defaulted loans included in the RFC Defendants' securitizations, including GMACM 2007-HE1. MBIA found that 89% of these loans were not in compliance with the RFC Defendants' stated underwriting guidelines. MBIA's review also found that "[a] significant number of mortgage loans were made on the basis of 'stated incomes' that were grossly unreasonable or were approved despite DTI or CLTV ratios in excess of the cut-offs stated in GMAC Mortgage's Underwriting Guidelines or in the Purchase Agreements or Prospectus Supplements. . . ."

101. Perhaps most notably, MBIA reported in June 2010 for the first time that the RFC Defendants utilized a "proprietary automated electronic loan underwriting program known as Assetwise." While use of such an automated program may not in itself be problematic, Assetwise was not programmed to require compliance with the RFC Defendants' stated underwriting guidelines. As a result, the RFC Defendants were including loans approved by Assetwise despite the fact that they did not comply with the applicable underwriting guidelines.

102. In a decision issued December 14, 2010, Justice Fried of the Supreme Court of the State of New York found that the results of MBIA's review were sufficient to establish for pleading purposes that the RFC Defendants fraudulently securitized loans, including loans underlying GMACM 2007-HE1.

103. Further, on June 29, 2011, the SEC and the DOJ launched investigations of, among other things, "potential fraud related to the origination and/or underwriting of mortgage loans" by the RFC Defendants. As an originator of residential mortgage loans for the GMAC entities, the scope of the SEC and the DOJ's investigation will likely include a review of compliance with the RFC Defendants' own loan origination underwriting guidelines.

2. TBW's Systemic Abandonment of Underwriting Standards

104. TBW was founded in 1982 and grew to be one of the largest privately held mortgage lending companies in the United States. TBW was principally involved in the origination, purchase, sale, and servicing of residential mortgage loans. TBW generally sold these loans in the secondary mortgage market to third-party investors, including Freddie Mac and commercial financial institutions, either individually, pooled, or as part of mortgage-backed securities. TBW originated and purchased billions of dollars in new residential loans on an annual basis. To fund its mortgage loan originations and acquisitions, TBW relied on various purchase facilities, credit lines, and financing vehicles, primarily with Colonial Bank and, starting in or about January 2005, Ocala Funding, LLC.

105. On August 4, 2009, the Special Inspector General for the Troubled Asset Relief Program and the FBI raided TBW's headquarters in Ocala, Florida. This raid led to the discovery of evidence that TBW defrauded both Freddie Mac and Ginnie Mae. The day after the raid, the Federal Housing Authority suspended TBW from making loans backed by the FHA. TBW is the largest lender ever to be suspended by the FHA.

106. On or about August 24, 2009, TBW filed for bankruptcy in the United States Bankruptcy Court for the Middle District of Florida in Jacksonville.

107. After the raid, it was revealed that TBW's misconduct was not limited to FHA backed loans and that TBW's meteoric growth was fueled by a total disregard for any semblance of underwriting standards or internal controls. For example, the *Ocala Star-Banner* reported as follows on August 11, 2009:

> Former Taylor Bean employees who spoke to the Star-Banner last week said they knew there were problems with many of the loans they made. They said the company they once worked for lacked the internal controls to ensure the information they had about borrowers was accurate.

> They said the company's computer programs keeping track of customer information was riddled with problems and too easily accessible by brokers outside the company, with no checks in place to make sure loan information was accurate.
>
> Some former employees said customer information was often inconsistent and inaccurate, leaving some in the company to wonder why many of Taylor Bean's homeowners ever were approved for a mortgage.

108. Many of the individuals who were responsible for the shoddy and fraudulent underwriting practices at TBW are currently incarcerated. TBW's former chairman, Lee Farkas, was convicted of 14 counts of fraud and conspiracy in the management and operation of TBW in a criminal action brought by the United States government, captioned *United States v. Farkas*, Case No. 1:10-CR-200 (E.D. Va.), and sentenced to 30 years in prison. Farkas masterminded and led TBW's origination and sale of low-quality mortgage loans to generate fees in an attempt to cover TBW's extraordinary operating expenses, which were approximately $150 million almost daily. Former TBW treasurer Desiree Brown was sentenced to six years in prison and former TBW president Raymond Bowman received 30 months incarceration. Catherine Kissick, a Colonial Bank executive who served as the go-between during the TBW fraud scheme, was sentenced to eight years in federal prison.

109. TBW's misconduct is also the subject a civil action brought by the SEC, captioned *SEC v. Farkas*, Case No. 1:10-CV-667 (E.D. Va.), alleging violations of the Securities Act of 1933 and the Securities Exchange Act of 1934 in the management and operation of TBW.

110. TBW could not have offloaded its toxic loans on investors such as Western & Southern without the involvement of Defendants BNPPM, BNPPMS, and UBS. BNPPM served as the Seller for TBW 2006-5, BNPPMS served as the depositor for TBW 2006-5. UBS served

as the Underwriter. These Defendants disregarded TBW's shoddy loan practices or failed to conduct adequate due diligence.

3. Delta Funding's Systemic Abandonment of Underwriting Standards

111. Prior to their bankruptcy, Delta Funding and Renaissance Mortgage were affiliated consumer finance companies that originated, securitized and sold mortgage loans. From 1991 through 2007 they issued 53 asset-backed securitizations, collateralized by approximately $20.7 billion in mortgage loans. Delta Funding and Renaissance Mortgage increased their origination of mortgage loans by 17% between 2006 and 2007, originating $3.4 billion of mortgage loans in the first nine months of 2007 before they abruptly ceased all origination activities.

112. Delta Funding was a notorious predatory lender. In an article published on August 19, 2011, the *New York Times* reported that the implications of Delta Funding's shoddy and fraudulent lending practices are reverberating through people's lives and the financial system. The *New York Times* reported the story of a woman named Mary Lee Ward who was the victim of Delta Funding's misconduct, in relevant part, as follows:

> Fifteen years ago, Ms. Ward says, she needed money for a lawyer to help keep her great-granddaughter from being put up for adoption. Like many others in her neighborhood, she turned to a subprime lender.
>
> She signed a contract with Delta Funding, a company she found advertised on a flier tucked in her mailbox. She borrowed $82,000 against her house, but claims she only ever received a payment of $1,000. Ms. Ward still displays a faded portrait of her great-granddaughter as a baby, even though she was unable to prevent the adoption and has long since lost contact with her.
>
> In 1999 and 2000, several state and federal agencies sued Delta Funding, accusing the company of predatory lending practices directed at elderly members of minority groups throughout Queens and Brooklyn. Those suits were settled with Delta denying wrongdoing. Lawyers from Common Law say the lender sent a letter to Ms. Ward in 2001 informing her that they were canceling her loan, but

> the loan never was canceled. Instead, the mortgage passed from financial institution to financial institution over the last 10 years.
>
> Unable to pay the growing debt, Ms. Ward was issued a judgment of foreclosure in 2008 and the property was put up for auction that July. The winning bidder, the real estate investment company 768 Dean Inc., has been trying to evict Ms. Ward ever since.

113. Delta Funding and Renaissance could not have unloaded their toxic loans to investors such as Western & Southern without the involvement of Defendants RBS Securities, Citigroup, and Deutsch Bank Securities, the Underwriters for RAMC 2007-1 and RAMC 2007-2. These Defendants knowingly disregarded Delta Funding's and Renaissance's shoddy loan practices or failed to conduct adequate due diligence.

V. MISREPRESENTATIONS CONCERNING TRANSFER OF TITLE TO THE ISSUING TRUSTS

114. The Defendants falsely stated in the Offering Materials that each underlying mortgage would be assigned to the relevant Trust and that notes and loan files would properly be transferred such that the Trust would have the right to foreclose upon property subject to each mortgage loan.

115. A fundamental step in the mortgage securitization process is the transfer to the issuing trust for each mortgage-backed securities offering of good title to the mortgage loans comprising the pool for that offering. This is necessary in order for the holders to be legally entitled to enforce the mortgage loans in case of default.

116. Two documents relating to each mortgage loan must be validly transferred to the trust as part of the securitization process – a promissory note and a security instrument (either a mortgage or a deed of trust).

117. The rules for these transfers are governed by the law of the state in which the property is located, by the terms of the pooling and servicing agreement ("PSA") for each securitization, and by the law governing the issuing trust (with respect to matters of trust law).

118. Generally, state laws and the PSAs require the promissory note and security instrument to be transferred by indorsement, in the same way that a check can be transferred by indorsement, or by sale. In addition, state laws generally require that the trustee have physical possession of the original, manually signed note in order for the loan to be enforceable by the trustee against the borrower in case of default.

119. In order to preserve the bankruptcy-remote status of the issuing trusts in mortgage-backed securities transactions, the notes and security instruments are generally not transferred directly from the mortgage loan originator to the trust. Rather, the notes and security instruments are generally initially transferred from the originator to the depositor, either directly or via one or more special-purpose entities. After this initial transfer to the depositor, the depositor transfers the notes and security interests to the issuing trust for the particular securitization. Each of these transfers must be valid under applicable state law in order for the trust to have good title to the mortgage loans.

120. In addition, the PSA generally requires the transfers of the mortgage loans to the trust to be completed within a strict time limit after formation of the trust in order to ensure that the trust is properly formed and that the trust qualifies as a tax-free real estate mortgage investment conduit.

121. The applicable state trust law generally requires strict compliance with the trust documents, including the PSA, so that failure to comply strictly with the timeliness, indorsement, physical delivery and other requirements of the PSA with respect to the transfers of the notes and

security instruments results in void transfers and the trust lacking good title to the mortgage loans.

A. Defendants' Representations

122. The Offering Materials represented that each mortgage represented a valid lien such that the issuing trust could foreclose upon the mortgage in the event of a borrower's default. For example, the RFMSI 2006-S12 Offering Materials promised that "the mortgage loans are secured by first liens on fee simple interests." RFMSI 2006-S12 Prospectus Supplement at S-40. The same or similar representations appeared in the Offering Materials relating to each of Defendants' other securitizations that are at issue in this action. *See* Exhibit A.

123. Defendants represented in the Offering Materials associated with each securitization that the underlying mortgage notes would be properly assigned to the Trusts and that the loan files would similarly be delivered to the Trusts. For example, the RFMSI 2006-S12 Offering materials assured investors that title would be transferred properly, providing:

> The depositor will, as to each mortgage loan other than mortgage loans underlying any mortgage securities, deliver to the trustee or the custodian, the mortgage note and any modifications or amendment thereto endorsed without recourse either in blank or to the order of the trustee or its nominee. In addition, the depositor will, as to each mortgage loan other than mortgage loans underlying any mortgage securities, deliver to the sponsor, the servicer, the master servicer, the trustee or the custodian, as selected by the depositor, a set of the remaining legal documents relating to each mortgage loan that are in possession of the depositor, which may include the following:
>
> - the mortgage, except for any mortgage not returned from the public recording office, with evidence of recording indicated thereon or a copy of the mortgage with evidence of recording indicated thereon or, in the case of a Cooperative Loan, on the related financing statement;
>
> - an assignment in recordable form of the mortgage, or evidence that the mortgage is held for the trustee through the MERS® System or a copy of such assignment with evidence of recording indicated thereon or, with respect to a Cooperative Loan, an assignment of the related proprietary lease or occupancy agreement; and

- if applicable, any riders or modifications to the mortgage note and mortgage or a copy of any riders or modifications to the mortgage note and mortgage, together with any other documents at such times as described in the related pooling and servicing agreement.

RFMSI 2006-S12 Prospectus Supplement at 25. The same or similar representations appeared in the Offering Materials relating to each of Defendants' other securitizations that are at issue in this action. *See* Exhibit B.

124. The Offering Materials further assured investors that when Defendants transferred mortgage loans using the Mortgage Electronic Registration System ("MERS"), such assignments were sufficient to ensure that the mortgage loans could be foreclosed upon in the event of a borrower's default. For example, the RFMSI 2006-S12 Offering Materials provided:

> [I]n accordance with the rules of membership of Merscorp, Inc. and/or Mortgage Electronic Registration Systems, Inc. or, MERS, assignments of the mortgages for the mortgage loans in the related trust will be registered electronically through Mortgage Electronic Registration Systems, Inc., or MERS® System. With respect to mortgage loans registered through the MERS® System, MERS shall serve as mortgagee of record solely as a nominee in an administrative capacity on behalf of the trustee and shall not have any interest in any of those mortgage loans.

RFMSI 2006-S12 Prospectus Supplement at 25. The same or similar representations appeared in the Offering Materials relating to each of Defendants' other securitizations that are at issue in this action. *See* Exhibit B.

125. These disclosures led investors to conclude that the Defendants had taken all steps necessary to ensure the Trusts could negotiate loan modifications with proper authority and, when necessary, foreclose upon any defaulted mortgage loan. Since the securities at issue in this case were supposedly secured, the representations concerning the Trusts' collateral are obviously material representations. In many instances, however, the collateral did not properly secure the underlying loans and could not be efficiently realized because the Defendants either lost, failed

to timely create or failed to timely deliver the paperwork necessary to prove title to the mortgages and the notes or properly constitute the Trusts as is required under state law.

B. Contrary to Defendants' Representations, They Did Not Properly Assign Large Numbers of Mortgages and Failed to Properly Transfer Notes and Mortgage Loan Files to the Trusts

126. In their zeal to offload toxic loans to investors such as Western & Southern, Defendants did not come close to complying with the strict rules governing assignment of mortgages and transfer of promissory notes and loan files. Indeed, Defendants lost much of the paperwork relating to the loans underlying their securitizations or made no attempt to assign mortgages and deliver the original mortgage notes to the issuing trusts as required under state law. Further, following creation of the Trusts they engaged in an attempt to cover up their failure to validly assign the mortgage notes by filing false documentation in courts nationwide and forging assignment documents in an effort to cover up their tracks. The cover-up made possible and facilitated the execution of additional securitizations which damaged investors such as Western & Southern.

1. A Forensic Review Commissioned By Western & Southern Establishes that Defendants Made Virtually No Effort to Assign Mortgages to the Relevant Trusts

127. Western & Southern commissioned an exhaustive review of public assignment records to determine if the chain of assignments is complete with respect to the mortgage loans underlying the securitizations subject to this action. The results of Western & Southern's review are shocking. Defendants made virtually no effort to assign mortgages to the issuing Trusts.

a. RALI 2005-QS16

128. Defendants represented that they assigned valid title to the Trusts for the 1,971 mortgages in connection with RALI 2005-QS16. Western & Southern was able to track

assignments for 1,442 of these mortgages through a review of public records. Of the 1,442 mortgages reviewed, ***Defendants made absolutely no attempt to assign 84% (or 1,204) of the mortgages to the Trust***. Of these 1,204 mortgages that were never assigned to the Trust, 233 (or 16% of the mortgages reviewed) were assigned to the originator or some other third-party. With regard to 971 mortgages (or 67% of the mortgages reviewed), MERS is listed as the beneficial owner, but the mortgage has not been assigned to MERS (or the Trust), which renders any MERS registration a complete nullity even assuming that MERS can be used to circumvent state recording laws when a mortgage is assigned to MERS (which is a highly dubious assumption). Only 187 mortgages were assigned to MERS and 18 of those assignments are invalid assignments because they are missing an intervening assignment. Western & Southern would need to access Defendants' and MERS' files to determine whether those assignments are valid or whether they are after-the-fact forgeries executed in the course of Defendants' cover up of their monumental documentation failure described below in Section V(B)(2).

129. While the Offering Materials for RALI 2005-QS16 represent that <u>all</u> mortgages were validly assigned to the Trust, Defendants only attempted to assign 51 of the 1,442 mortgages reviewed. 33 of these assignments are invalid because they are missing intervening assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

b. RALI 2006-QS3

130. Defendants represented that they assigned valid title to the Trusts for the 4,506 mortgages in connection with RALI 2006-QS3. Western & Southern was able to track assignments for 2,802 of these mortgages through a review of public records. Of the 2,802 mortgages reviewed, ***Defendants made absolutely no attempt to assign 85% (or 2,394) of the***

mortgages to the Trust. Of these 2,394 mortgages that were never assigned to the Trust, 419 (or 15% of the mortgages reviewed) were assigned to the originator or some other third-party. With regard to 1,973 mortgages (or 70% of the mortgages reviewed), MERS is listed as the beneficial owner, but the mortgage has not been assigned to MERS (or the Trust), which renders any MERS registration a complete nullity even assuming that MERS can be used to circumvent state recording laws when a mortgage is assigned to MERS (which is a highly dubious assumption). Only 264 mortgages were assigned to MERS and 16 of those assignments are invalid assignments because they are missing an intervening assignment. Western & Southern would need to access Defendants' and MERS' files to determine whether those assignments are valid or whether they are after-the-fact forgeries executed in the course of Defendants' cover up of their monumental documentation failure described below in Section V(B)(2).

131. While the Offering Materials for RALI 2006-QS3 represent that all mortgages were validly assigned to the Trust, Defendants only attempted to assign 144 of the 2,802 mortgages reviewed. 92 of these assignments are invalid because they are missing intervening assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

c. RALI 2006-QS6

132. Defendants represented that they assigned valid title to the Trusts for the 4,115 mortgages in connection with RALI 2006-QS6. Western & Southern was able to track assignments for 2,852 of these mortgages through a review of public records. Of the 2,852 mortgages reviewed, ***Defendants made absolutely no attempt to assign 84% (or 2,390) of the mortgages to the Trust***. Of these 2,390 mortgages that were never assigned to the Trust, 397 (or 14% of the mortgages reviewed) were assigned to the originator or some other third-party. With

regard to 1,993 mortgages (or 70% of the mortgages reviewed), MERS is listed as the beneficial owner, but the mortgage has not been assigned to MERS (or the Trust), which renders any MERS registration a complete nullity even assuming that MERS can be used to circumvent state recording laws when a mortgage is assigned to MERS (which is a highly dubious assumption). Only 301 mortgages were assigned to MERS and 15 of those assignments are invalid assignments because they are missing an intervening assignment. Western & Southern would need to access Defendants' and MERS' files to determine whether those assignments are valid or whether they are after-the-fact forgeries executed in the course of Defendants' cover up of their monumental documentation failure described below in Section V(B)(2).

133. While the Offering Materials for RALI 2006-QS6 represent that all mortgages were validly assigned to the Trust, Defendants only attempted to assign 161 of the 2,852 mortgages reviewed. 89 of these assignments are invalid because they are missing intervening assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

d. RFMSI 2006-S2

134. Defendants represented that they assigned valid title to the Trusts for the 553 mortgages in connection with RFMSI 2006-S2. Western & Southern was able to track assignments for 374 of these mortgages through a review of public records. Of the 374 mortgages reviewed, ***Defendants made absolutely no attempt to assign 91% (or 340) of the mortgages to the Trust***. Of these 340 mortgages that were never assigned to the Trust, 30 (or 8% of the mortgages reviewed) were assigned to the originator or some other third-party. With regard to 310 mortgages (or 83% of the mortgages reviewed), MERS is listed as the beneficial owner, but the mortgage has not been assigned to MERS (or the Trust), which, again, renders

any MERS registration a complete nullity even assuming that MERS can be used to circumvent state recording laws when a mortgage is assigned to MERS (which is a highly dubious assumption). Only 11 mortgages were assigned to MERS. Western & Southern would need to access Defendants' and MERS's files to determine whether those assignments are valid or whether they are after-the-fact forgeries executed in the course of Defendants' cover up of their monumental documentation failure described below in Section V(B)(2).

135. While the Offering Materials for RFMSI 2006-S2 represent that all mortgages were validly assigned to the Trust, Defendants only attempted to assign 23 of the 374 mortgages reviewed. Thirteen of these assignments are invalid because they are missing intervening assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

e. RFMSI 2006-S12

136. Defendants represented that they assigned valid title to the Trusts for the 2,375 mortgages in connection with RFMSI 2006-S12. Western & Southern was able to track assignments for 1,845 of these mortgages through a review of public records. Of the 1,845 mortgages reviewed, ***Defendants made absolutely no attempt to assign 91% (or 1,673) of the mortgages to the Trust***. Of these 1,673 mortgages that were never assigned to the Trust, 110 (or 9% of the mortgages reviewed) were assigned to the originator or some other third-party. With regard to 1,500 mortgages (or 83% of the mortgages reviewed), MERS is listed as the beneficial owner, but the mortgage has not been assigned to MERS (or the Trust), which, again, renders any MERS registration a complete nullity even assuming that MERS can be used to circumvent state recording laws when a mortgage assigned to MERS (which is a highly dubious assumption). Only 120 mortgages were assigned to MERS and 17 of those assignments are

invalid assignments because they are missing an intervening assignment. Western & Southern would need to access Defendants' and MERS' files to determine whether those assignments are valid or whether they are after-the-fact forgeries executed in the course of Defendants' cover up of their monumental documentation failure described below in Section V(B)(2).

137. While the Offering Materials for RFMSI 2006-S12 represent that all mortgages were validly assigned to the Trust, Defendants only attempted to assign 52 of the 1,845 mortgages reviewed. Twenty nine of these assignments are invalid because they are missing intervening assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

138. Western & Southern was unable to obtain data to conduct a similar forensic review of GMACM 2007-HE1 and GMACM 2007-HE2. However, Western & Southern's forensic review encompassed 9315 mortgage loans underlying the RFC Defendants' securitizations. This sample is sufficient to establish that the RFC Defendants' failure to assign mortgages to the securitization trusts was systemic and infected all of the RFC Defendants' securitizations including GMACM 2007-HE1 and GMACM 2007-HE2.

f. TBW 2006-5

139. Defendants represented that they assigned valid title to the Trusts for the 3,001 mortgages in connection with TBW 2006-5. Western & Southern was able to track assignments for 2,163 of these mortgages through a review of public records. Of the 2,163 mortgages reviewed, ***Defendants made absolutely no attempt to assign 88% (or 1,897) of the mortgages to the Trust***. Of these 1,897 mortgages that were never assigned to the Trust, 240 (or 11% of the mortgages reviewed) were assigned to the originator or some other third-party. With regard to 1,657 mortgages (or 77% of the mortgages reviewed), MERS is listed as the beneficial owner,

but the mortgage has not been assigned to MERS (or the Trust), which renders any MERS registration a complete nullity even assuming that MERS can be used to circumvent state recording laws when a mortgage is assigned to MERS (which is a highly dubious assumption). Only 13 were assigned to MERS and one of those assignments is invalid because it is missing an intervening assignment. Western & Southern would need to access Defendants' and MERS' files to determine whether those assignments are valid or whether they are after-the-fact forgeries executed in the course of Defendants' cover up of their monumental documentation failure described below in Section V(B)(2).

140. While the Offering Materials for TBW 2006-5 represent that all mortgages were validly assigned to the Trust, Defendants only attempted to assign 253 of the 2,163 mortgages reviewed. 178 of these assignments are invalid because they are missing intervening assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

g. RAMC 2007-1

141. Defendants represented that they assigned valid title to the Trusts for the 5,632 mortgages in connection with RAMC 2007-1. Western & Southern was able to track assignments for 4,116 of these mortgages through a review of public records. Of the 4,116 mortgages reviewed, ***Defendants made absolutely no attempt to assign 77% (or 3,185) of the mortgages to the Trust***. Of these 3,185 mortgages that were never assigned to the Trust, 257 (or 6% of the mortgages reviewed) were assigned to the originator or some other third-party. With regard to 2,928 mortgages (or 71% of the mortgages reviewed), MERS is listed as the beneficial owner, but the mortgage has not been assigned to MERS (or the Trust), which renders any MERS registration a complete nullity even assuming that MERS can be used to circumvent state

recording laws when a mortgage is assigned to MERS (which is a highly dubious assumption). Only one mortgage was assigned to MERS and it is an invalid assignment because it is missing an intervening assignment.

142. While the Offering Materials for RAMC 2007-1 represent that all mortgages were validly assigned to the Trust, Defendants only attempted to assign 930 of the 4,116 mortgages reviewed. 883 of these assignments are invalid because they are missing intervening assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

h. RAMC 2007-2

143. Defendants represented that they assigned valid title to the trusts for the 4,765 mortgages in connection with RAMC 2007-2. Western & Southern was able to track assignments for 3,586 of these mortgages through a review of public records. Of the 3,586 mortgages reviewed, ***Defendants made absolutely no attempt to assign 76% (or 2,728) of the mortgages to the Trust***. Of these 2,728 mortgages that were never assigned to the Trust, 253 (or 7% of the mortgages reviewed) were assigned to the originator or some other third-party. With regard to 2,475 mortgages (or 69% of the mortgages reviewed), MERS is listed as the beneficial owner, but the mortgage has not been assigned to MERS (or the Trust), which renders any MERS registration a complete nullity even assuming that MERS can be used to circumvent state recording laws when a mortgage is assigned to MERS (which is a highly dubious assumption).

144. While the Offering Materials for RAMC 2007-2 represent that all mortgages were validly assigned to the Trust, Defendants only attempted to assign 858 of the 3,586 mortgages reviewed. 800 of these assignments are invalid because they are missing intervening

assignments. Upon information and belief, a review of Defendants' files will reveal additional deficiencies with Defendants' purported assignments.

2. Defendants Have Participated in a Massive Cover Up Of Their Systemic Failure to Assign Mortgages and Properly Transfer Notes and Loan Files to the Trusts

a. RFC and GMAC Mortgage Have Filed False Foreclosure Documents in Courts Across the Country

145. RFC and/or GMAC Mortgage are the primary servicers for RALI 2005-QS16, RFMSI 2006-S2, RFMSI 2006-S12, RALI 2006-QS3, and RALI 2006-QS6. GMAC Mortgage is the servicer for GMACM 2007-HE1 and GMACM 2007-HE2. As the servicers for these securitizations, RFC and GMAC Mortgage were responsible for, among other things, collecting payments from borrowers, negotiating with borrowers over loan modifications, initiating and pursuing foreclosure proceedings, obtaining assignment documentation, and selling properties subject to foreclosure. RFC and GMAC Mortgage or their affiliates earn substantial servicing fees in connection with the servicing of loans underlying these securitizations.

146. The Board of Governors of the Federal Reserve System ("Board of Governors") issued a Consent Order dated April 13, 2011 finding that RFC and GMAC Mortgage failed to document mortgage loans properly and have attempted to cover up this failure. The Board of Governors found that RFC and GMAC Mortgage:

> (a) Filed or caused to be filed in state courts and in connection with bankruptcy proceedings in federal courts numerous affidavits executed by employees of the Mortgage Servicing Companies or employees of third-party providers making various assertions, such as the ownership of the mortgage note and mortgage, the amount of principal and interest due, and the fees and expenses chargeable to the borrower, in which the affiant represented that the assertions in the affidavit were made based on personal knowledge or based on a review by the affiant of the relevant books and records, when, in many cases, they were not based on such knowledge or review;

> (b) Filed or caused to be filed in courts in various states and in connection with bankruptcy proceedings in federal courts or in the local land record offices, numerous affidavits and other mortgage-related documents that were not properly notarized, including those not signed or affirmed in the presence of a notary; [and]
>
> (c) Litigated foreclosure and bankruptcy proceedings and initiated non-judicial foreclosures without always confirming that documentation of ownership was in order at the appropriate time, including confirming that the promissory note and mortgage document were properly endorsed or assigned and, if necessary, in the possession of the appropriate party . . . .

147. RFC and GMAC Mortgage stipulated to the Consent Order and, thus, admitted the Board of Governor's findings. The Consent Orders require the RFC Defendants to undertake a sweeping review of their foreclosure practices. Upon information and belief, this review will uncover substantial additional evidence demonstrating that the Defendants' representations concerning proper assignment of mortgages and delivery of mortgage files were false.

148. RFC and GMAC Mortgage have engaged in widespread foreclosure misconduct in an attempt to cover up the fact that the RFC Defendants failed to properly assign mortgages and transfer notes and mortgage loan files to the issuing trusts. This pervasive misconduct indicates a systemic failure that infected many mortgage-backed securitizations including the securitizations at issue in the present action. RFC and GMAC Mortgage utilize so-called "robo-signers" who execute tens of thousands of foreclosure affidavits a month, all necessarily false because they are allegedly based on their own personal knowledge, and many of them without proper documentation, including evidence of possession of the underlying mortgage note. The "robo-signers" sometimes attempt to execute assignments retroactive to the closing date of the relevant securitization in an attempt to circumvent state laws governing assignment. Such purportedly retroactive assignments are invalid.

149. One of GMAC Mortgage's "robo-signers" is Jeffrey Stephan, the leader of GMAC Mortgage's document execution unit. On December 10, 2009, Stephan testified in a

deposition taken in a foreclosure proceeding commenced by GMAC Mortgage in Circuit Court in Palm Beach County, Florida, that he "robo-signed" 10,000 foreclosure documents a month without reviewing them or verifying their accuracy. Stephan further testified under oath that the 13 individuals who reported to him similarly "do not go into the system and verify the information as accurate" before documents are executed in connection with foreclosures commenced by GMAC Mortgage. Stephan testified that this is standard practice for all loans serviced by the RFC Defendants or their affiliates.

150. Stephan also admitted that while he is not employed by MERS, he routinely represents in court filings and assignment documentation that he is a vice president of MERS.

151. Recently, an internal GMAC Mortgage document containing a record of Stephan's discussions with outside counsel was publicly released. The document provides additional evidence that the RFC Defendants have committed acts of forgery or otherwise filed false documentation in foreclosure proceedings nationwide in order to cover up their monumental failure to deliver valid title to the trusts. The document establishes that on April 4, 2010, Stephan explained to outside counsel that GMAC Mortgage sought to foreclose upon a mortgage on a property in New York City that was originated by Ameriquest and sold to a securitization trust. The mortgage was never assigned to the trust and Ameriquest went bankrupt in 2007. Stephan explained that GMAC wanted Ameriquest to agree to a retroactive assignment, but it was impossible to get Ameriquest to agree because it was defunct. As Stephan put it: "The problem is we do not have signing authority—are there any other options?" (Note that even if GMAC Mortgage could have obtained consent, this type of retroactive assignment is invalid because the Pooling and Servicing Agreements require that all assignments occur by the closing date of the securitization.)

152. Stephan and GMAC Mortgage apparently concuded that their only option was to create and file forged documentation. On July 7, 2010, GMAC Mortgage forged an assignment from Ameriquest to the relevant trust which stated that it was “effective as of” August 2005. This was a total fabrication that GMAC Mortgage filed in New York State court. Stephan was purportedly the Ameriquest officer who authorized the assignment. ProPublica, a public watchdog group, performed a review of hundreds of foreclosure cases in New York involving Ameriquest originated loans and found that the RFC Defendants had prepared many other similar forgeries. ProPublica reported as follows on July 27, 2011:

> A review of court records in New York identified hundreds of similar assignment documents filed in the name of Ameriquest after 2008 by GMAC and other mortgage servicers. . . .
>
> GMAC, whose parent company renamed itself last year as Ally Financial, was at the center of what became known as the robo-signing scandal. The uproar began last fall after revelations that mortgage servicing employees had produced flawed documents to speed foreclosures. GMAC and other banks have acknowledged filing false affidavits in which bank officials claimed "personal knowledge" of the facts underlying thousands of mortgages. But GMAC and other servicers say they've since tightened their procedures. They insist that their records were largely accurate and the affidavits amounted to errors of form, not substance.
>
> The issues surrounding the Ameriquest loan and others like it appear to be more serious.
>
> "This assignment of mortgage has all of the markings of GMAC finding that it lacked a needed mortgage assignment in order to foreclose and just making it up," said Thomas Cox, a Maine foreclosure defense attorney.
>
> In New York, it's a felony to file a public record with "intent to deceive."
>
> "It's fraud," said Linda Tirelli, a consumer bankruptcy attorney. "I want to know who's going to do a perp walk for recording this."
>
> No criminal charges have been filed in the robo-signing cases.
>
> Asked by ProPublica about the document, GMAC acknowledged Stephan did not have authority to sign on behalf of Ameriquest. The bank said it is still planning to push ahead with foreclosure on the homeowner, who remains in the property.

153. In October 2010, the Ohio Attorney General commenced a lawsuit against GMAC alleging the loan servicer and its agents filed fraudulent foreclosure affidavits to mislead courts in hundreds of Ohio cases. *See State of Ohio v. GMAC Mortgage, LLC et al.*, 3:10-cv-02537-JZ (N.D. Ohio 2010). After an extensive inquiry, the Ohio Attorney General concluded that:

> GMAC Mortgage has caused Assignments of Mortgage to be prepared and executed by agents of GMAC Mortgage that improperly purport to assign the note from MERS to the trustee and falsely claim that the GMAC Mortgage employee executing the Assignment has authority to assign the note on behalf of MERS.

154. The Ohio Attorney General further found that GMAC Mortgage conspired to specifically mislead Ohio courts noting:

> Stephan knew or should have known that these hundreds of affidavits would be filed in Ohio courts and relied upon by Ohio Common Pleas Judges in deciding whether the plaintiff in the particular case had a right to foreclose on Ohio residents.
>
> When Stephan executed an affidavit, he testified he did not ascertain who the current promissory note-holder was . . . even though his affidavits always stated or implied that plaintiff was the holder of the note. ***The agents of GMAC Mortgage prepared these affidavits to mislead the courts in Ohio on such matters as who kept the applicable records, who the holder of the note was, the amount due to whoever the holder of the note was, and whether proper notice alleging default had been sent to the borrower.***

155. The Ohio Attorney General made it abundantly clear that Stephan's actions were not isolated incidents and instead reflected a pervasive pattern of practice within RFC and GMAC Mortgage. As the Ohio Attorney General put it: "Ally and GMAC Mortgage had authority over and the right to control the actions of Stephan and benefited financially from the actions of Stephan. The actions of Stephan were part of the business plans of Ally and GMAC Mortgage."

156. The RFC Defendants' misconduct has been recognized by multiple courts. For example, GMAC Mortgage was sanctioned by the Maine state court in *Federal National*

Mortgage Association v. Nicolle Bradbury, BRI-RE-09-65 (Me. Dist. Ct., Bridgton Sep. 24, 2010) for its "robo-signing" cover up. In awarding the sanctions, the Honorable Keith A. Powers wrote:

> The facts underlying Defendant's motion are for the most part undisputed. Plaintiff does not dispute that its affiant, Jeffery Stephan, in his role as limited signing officer for GMAC, Plaintiff's servicing agent, signed the affidavit which Plaintiff submitted in support of its Motion for Summary Judgment without even reading it and without signing in the presence of a notary. These facts came into the record because the Defendant went to the time and expense of traveling to Pennsylvania to take Stephan's deposition. In that deposition, which took place on June 7, 2010, Stephan testified that he signs some 400 documents per day, and that the process he follows in signing summary judgment affidavits is consistent with GMAC's policies and procedures.
>
> The Court is particularly troubled by the fact that Stephan's deposition in this case is not the first time that GMAC's high-volume and careless approach to affidavit signing has been exposed. Stephan himself was deposed six months earlier, on December 10, 2009, in Florida. His Florida testimony is consistent with the testimony given in this case: except for some limited checking of figures, he signs summary judgment affidavits without first reading them and without appearing before a notary. Even more troubling, in addition to that Florida action, in May, 2006 another Florida court not only admonished GMAC, it sanctioned the Plaintiff lender for GMAC's affidavit signing practices. As part of its order, the Florida court required GMAC to file a Notice of Compliance, indicating its commitment to modify its affidavit signing procedures to conform to proper practices. The experience of this case reveals that, despite the Florida Court's order, GMAC's flagrant disregard apparently persists. It is well past the time for such practices to end.

157. Similarly, in *U.S. Bank N.A. v. Kimball*, No. 2010-169 (Vt. Jul. 22, 2011), U.S. Bank as trustee for one of the RFC Defendants' securitization trusts filed a foreclosure proceeding attaching a mortgage note that was not endorsed to the relevant issuing trust but that had attached to it an allonge (*i.e.*, a supplemental page) purportedly transferring the note from MERS to the trust. U.S. Bank also attached an "Assignment of Mortgage" executed by none other than Jeffrey Stephan, purportedly in his capacity as a vice president of MERS (despite the fact that he is not and has never been a vice president of MERS, and has never been authorized to

execute assignments on behalf of MERS). The homeowner challenged the foreclosure arguing that MERS did not have authority to assign the mortgage because it never owned the note and U.S. Bank had not demonstrated that the note was ever assigned to the trust. In an attempt to deceive the trial court, the RFC Defendants had their star "robo-signer," Jeffrey Stephan, execute an affidavit that purportedly swore to the alleged assignments. Stephan's affidavit did not make any representation as to when the purported transfer to the trust occurred. His affidavit also attached what appeared to be the same allonge that was previously filed by U.S. Bank. This allonge attempted to insert the missing intervening endorsement. The trial court rejected this attempt to "robo-sign" the defendant out of her house and the Vermont Supreme Court agreed noting as follows:

> It is neither irrational nor wasteful to expect the foreclosing party be actually in possession of its claimed interest in the note and have the proper supporting documentation in hand when filing suit. Nor is it irrationally demanding to expect the foreclosing party to provide adequate, satisfying proof.

158. As a direct result of the aforementioned blatant misconduct, in September 2010 the RFC Defendants had to suspend foreclosures in 23 states and undertake a review of internal procedures, publicly acknowledging that they systemically commenced foreclosure proceedings based on forged or otherwise improper documentation. And in January 2011, GMAC Mortgage agreed to dismiss 10,000 foreclosure proceedings filed in the State of Maryland because they relied upon forged or false documentation.

159. On September 27, 2010, the Connecticut Attorney General similarly ordered the RFC Defendants to halt foreclosures. At the time, Attorney General Richard Blumenthal stated as follows:

> I am demanding a freeze in all GMAC/Ally foreclosure actions to forestall horrendous, illegal harm against homeowners. The GMAC/Ally foreclosure steamroller should be stopped so the company can be held accountable. My

> office has already confirmed that some defective documents were filed in Connecticut.
>
> The bank's apparent failure to follow basic legal procedure — a potential fraud on the court — is appalling and unacceptable. Our investigation will enable strong legal action against GMAC/Ally, if warranted by the facts and the law. I will fight to assure that banks comply with clear legal requirements that protect homeowners from unfair foreclosures of their homes.
>
> My office will investigate whether other banks engaged in such practices because these failings involve much more than mere technicalities, as GMAC/Ally has claimed. As a consumer advocate and attorney, I am dismayed and shocked that the bank blatantly skirted legal requirements and procedural safeguards to increase the volume and pace of foreclosures.

160. In addition, on December 20, 2010, at the direction of New Jersey Chief Justice Stuart Rabner, General Equity Judge Mary C. Jacobson of the Superior Court of New Jersey issued an order to show cause to the RFC Defendants, Wells Fargo, Bank of America, JPMorgan Chase Bank, Onewest Bank, and Citibank. The order to show cause required GMAC and the others to "show cause at a hearing scheduled for January 19, 2011, why the court should not suspend the processing of all foreclosure matters involving [the banks] and appoint a Special Master to review their past and proposed foreclosure practices." *In the Matter of Residential Mortgage Foreclosure Pleading and Document Irregularities*, Docket No. F-059553-10 (Super. N.J. Dec. 20, 2011). A Special Master was subsequently appointed and the RFC Defendants and the other banks reportedly suspended foreclosures in New Jersey. On August 17 and August 19, 2011, after considering submissions by the parties, the Special Master recommended that all of the banks except the RFC Defendants be allowed to resume foreclosures and that the proposed restrictions in the order to show cause should not be enacted as against them. Judge Jacobson accepted the Special Master's reports. Apparently, and not surprisingly, the RFC Defendants' misconduct is so egregious the Special Master could not lift the suspension. Indeed, aside from referencing cursory and half-hearted remedial efforts the RFC Defendants claim to have

undertaken, their response to the order to show cause essentially relied on the argument that a state court does not have authority to suspend foreclosures despite the fact that the RFC Defendants committed fraud in New Jersey foreclosure proceedings by filing forged documents.

b. The Servicers of the TBW and Renaissance Securitizations have Attempted to Cover Up the Failure to Properly Transfer Notes and Assign Mortgages to the Trusts

161. Wells Fargo is the servicer and master servicer for TBW 2006-5. Wells Fargo is also the master servicer for RAMC 2007-1 and RAMC 2007-2. Ocwen Loan Servicing LLC is the servicer for RAMC 2007-1 and RAMC 2007-2. Both Wells Fargo and Ocwen earn lucrative fees in these roles.

162. The Office of the Comptroller of the Currency (the "OCC") issued a Consent Order dated April 13, 2011 finding that Wells Fargo tried to cover up the fact that the issuing Trusts did not have legal title sufficient to allow them to foreclose upon the underlying mortgage loans by engaging in fraudulent or improper foreclosure practices. The OCC found that Wells Fargo:

> (a) filed or caused to be filed in state and federal courts affidavits executed by its employees or employees of third-party service providers making various assertions, such as ownership of the mortgage note and mortgage, the amount of the principal and interest due, and the fees and expenses chargeable to the borrower, in which the affiant represented that the assertions in the affidavit were made based on personal knowledge or based on a review by the affiant of the relevant books and records, when, in many cases, they were not based on such personal knowledge or review of the relevant books and records;
>
> (b) filed or caused to be filed in state and federal courts, or in local land records offices, numerous affidavits or other mortgage-related documents that were not properly notarized, including those not signed or affirmed in the presence of a notary; [and]
>
> (c) litigated foreclosure proceedings and initiated non-judicial foreclosure proceedings without always ensuring that either the promissory note or the mortgage document were properly endorsed or assigned and, if necessary, in the possession of the appropriate party at the appropriate time . . . .

163. Wells Fargo stipulated to the Consent Order and, thus, admitted the OCC's findings. The Consent Order requires Wells Fargo to undertake a sweeping review of its foreclosure practices. Upon information and belief, this review will uncover substantial additional evidence demonstrating that the Defendants' representations concerning proper assignment of mortgages and delivery of mortgage files were false.

164. Wells Fargo employs an army of so-called "robo-signers" who execute tens of thousands of foreclosure affidavits a month, all necessarily false because they are allegedly based on the "robo-signers'" personal knowledge, and many of them without proper documentation, including evidence of possession of the underlying mortgage note. The "robo-signers" sometimes attempt to execute assignments retroactive to the closing date of the relevant securitization in an attempt to circumvent state laws governing assignment. Such purportedly retroactive assignments are invalid.

165. One of Wells Fargo's "robo-signers" is a woman named Xee Moua who admitted that she executes hundreds of foreclosure documents every day without reading them. *"Signer" Issue Raised for Wells Fargo*, WSJ (Oct. 15, 2010). Ms. Moua admitted she reviewed up to 500 on a daily basis.

166. After Ms. Moua disclosed Wells Fargo's widespread practice of filing false mortgage documents, Wells Fargo admitted that it had filed false foreclosure documentation in ***55,000*** foreclosure proceedings.

167. The Ohio Attorney General commenced an investigation in the wake of Ms. Moua's admission and asked Wells Fargo to voluntarily vacate all foreclosures based on improper paperwork.

168. Wells Fargo's misconduct was the subject of an investigative report that recently aired on the television program *60 Minutes*. *60 Minutes* reported that Wells Fargo and other servicers retained a firm named DOCx to falsify mortgage loan documentation in an effort to cover up the fact that there was a systemic failure to deliver mortgage loan documents and assign mortgage notes to issuing trusts in connection with securitization transactions, including Defendants' securitizations. "Robo-signers" employed by DOCx were required to "robo-sign" 340 documents an hour and 4,000 per day for Wells Fargo and other bank clients.

169. Ocwen, the servicer for RAMC 2007-1 and RAMC 2007-2, is similarly involved in widespread foreclosure misconduct in an effort to hide the fact that Defendants and others failed to properly assign mortgages and deliver mortgage files to issuing trusts. In fact, courts have expressly found that loans underlying RAMC 2007-1 and RAMC 2007-2 were not properly indorsed to the trusts and Ocwen has filed false or fraudulent documents in foreclosure proceedings in an attempt to foreclose upon loans underlying RAMC 2007-1 and RAMC 2007-2.

170. For example, in *HSBC Bank USA, N.A., as Indenture Trustee for the Registered Noteholders of Renaissance Home Equity Loan Trust 2007-1 v. Thompson*, App. Case No. 23761, Trial Ct. Case No. 07-CV9439, 2010 Ohio 4158, Ohio App. LEXIS 3525 (Ohio Ct. App., Montgomery County Sept. 3, 2010) ("*Thompson*") HSBC attempted to foreclose on a property as Trustee for RAMC 2007-1. The note HSBC offered to the court had not been endorsed to RAMC. Instead HSBC offered two allonges arguing that it was endorsed by one of Delta Funding's affiliates to Delta Funding. HSBC also offered an assignment of mortgage prepared by Ocwen that purported to provide an assignment of the mortgage from MERS to the trust. The assignment was purportedly signed by Scott Anderson, who represented that he was both a vice president of Ocwen and a vice president of MERS. The trial court held that the trust did not have

standing to foreclose because it could not prove that it was the owner of the note and because the purported assignment was a retroactive assignment and, thus, ineffective. The Court of Appeals of Ohio, Second Appellate District, Montgomery County, affirmed.

171. The *Thompson* court held that because the note was indorsed to the originator and not to the trust, the trust lacked standing to foreclose. The court noted that even if the allonges that HSBC offered demonstrated that the note was indorsed to the trust, the use of allonges in this manner is not permitted under Ohio law because there was no evidence that the allonges had been properly affixed to the note.

172. With regard to the assignment, the court found that it was properly excluded from evidence but noted that even if it was not excluded from evidence it was an obvious forgery and, thus, an ineffective assignment. The Court noted:

> Furthermore, even if we were to consider this "evidence," the mortgage assignment from MERS to HSBC indicates that the assignment was pre-pared by Ocwen for MERS, and that Ocwen is located at the same Palm Beach, Florida address. . . . In addition, Scott Anderson, who signed the assignment, as Vice-President of MERS, appears to be the same individual who claimed to be both Vice-President of MERS and Vice-President of Ocwen.

Thompson, Ohio App. LEXIS 3525 at *32.

173. Similarly, in *HSBC Bank USA, N.A. as Indenture Trustee for the Registered Noteholders of Renaissance Home Equity Loan Trust 2007-2 v. Taher*, Case No. 9320/2009, 2011 N.Y. Misc. LEXIS 3171 (N.Y. Supr. Kings County July 1, 2011) ("*Taher*") the court took Ocwen to task for its "robo-signing" and refused to foreclose upon a loan underlying RAMC 2007-2. In *Taher*, the Court held that HSBC was not entitled to foreclose upon the underlying property on behalf of RAMC 2007-2 because the purported assignment from MERS to the trust was invalid for multiple reasons. First, Delta Funding as originator, and not the Trust or MERS, was the party to whom the note was indorsed to – MERS cannot assign a mortgage if it never

held the note regardless of whether or not a mortgage has been assigned to MERS. Second, Delta Funding never authorized MERS to assign the mortgage and even if Delta Funding had provided such authorization MERS could not have assigned the mortgage because the mortgage had never been assigned to MERS.

174. The *Taher* court detailed Ocwen's misconduct at length and ordered the parties to show cause why the court should not sanction HSBC and its counsel for frivolous conduct for filing an affirmation that relied upon Ocwen to verify the accuracy of the documents submitted in the foreclosure proceeding. In discussing an affirmation submitted by Frank Cassara, the court noted:

> Mr. Cassara's affirmation, affirmed "under the penalties of perjury," that to the best of Mr. Cassara's "knowledge, information, and belief, the Summons and Complaint, and other papers filed or submitted to the Court in this matter contain no false statements of fact or law," is patently false. Moreover, the Court is troubled that: the alleged representative of plaintiff HSBC, Christina Carter, who according to Mr. Cassara, "confirmed the factual accuracy and allegations set forth in the Complaint and any supporting affirmations filed with the Court, as well as the accuracy of the notarizations contained in the supporting documents filed therewith," is not an employee of HSBC, but a robosigner employed by OCWEN LOAN SERVICING, LLC [OCWEN], whose signature on legal documents has at least three variations; the MERS to plaintiff HSBC assignment of the subject mortgage and note was executed by Scott W. Anderson, a known robosigner and OCWEN employee, whose signature is reported to have appeared in at least four different variations on mortgage assignments; and, the instant affidavit of merit was executed by Margery Rotundo, another robosigner, OCWEN employee and self-alleged employee of various other banking entities.

Taher, 2011 N.Y. Misc. LEXIS 3171 at *6.

175. The *Taher* court indicated that this was not the first time HSBC and Ocwen have attempted to deceive the court:

> HSBC has a history of foreclosure actions before me with affidavits of merit executed by Margery Rotundo [of Ocwen] and MERS to HSBC assignments executed by Scott Anderson [of Ocwen] that "contain serious irregularities that make them inherently untrustworthy."

Id.

176. With regard to Scott Anderson the court stated:

> While I have never personally met Mr. Anderson, his signatures have appeared in many foreclosure documents in this Court. His claims of wearing different corporate hats and the variations in the scrawls of initials used for his signature on mortgage documents has earned Mr. Anderson notoriety as a robosigner.

Id. at *12.

177. With regard to another Ocwen "robo-signer," Margery Rotundo, the court noted:

> In the instant action, Margery Rotundo executed the April 27, 2009 affidavit of merit and amount due. Ms. Rotundo has, in prior foreclosure cases before me, a history of alleging to be the Senior Vice President of various entities, including plaintiff HSBC, Nomura Credit & Capital, Inc. and an unnamed servicing agent for HSBC. In the instant action she claims to be the Senior Vice President of Residential Loss Mitigation of OCWEN, HSBC's servicing agent.

Id. at *20.

178. With regard to yet another Ocwen "robo-signer," Christina Carter, the court noted:

> Mr. Cassara, plaintiff's counsel affirmed that "On January 4, 2011 and January 5, 2011, I communicated with the following representative . . . of Plaintiff . . . Christina Carter . . . Manager of Account Management." This is disingenuous. Ms. Carter is not employed by plaintiff, but by OCWEN. She executed documents as an officer of MERS and as an employee of OCWEN. Ms. Carter's signature on documents is suspect because of the variations of her signature used.

Id. at *22-23.

179. Other reportedly notorious "robo-signers" purportedly based in Ocwen's offices in Palm Beach Florida include Oscar Taveras, Doris Chapman, Leticia Arias, Dana Moore, Jonathan Burgess, and Laura Buxton.

180. Ocwen's "robo-signing" practices have become so notorious that New York's Superintendent of Financial Services, Benjamin Lawsky, refused to allow Ocwen to acquire Litton Loan Servicing from Goldman Sachs & Co. unless Ocwen entered into a detailed

agreement requiring it to address its abominable business practices and virtually non-existent internal controls.

181. The agreement with the Superintendent, which was announced on September 1, 2011, requires Ocwen to:

> ensure that affidavits and sworn statements submitted in foreclosure proceedings are executed by individuals with actual personal knowledge of the matters set forth therein based upon the individuals' personal review of borrowers' loan files and other information relating to borrowers' loans. . .;
>
> ensure that any information set forth in an affidavit or sworn statement detailing a borrower's default and the right to foreclose is accurate, complete and reliable. . .; [and]
>
> ensure that notarized documents are signed by the affiant in the actual presence of a notary.

182. Ocwen was also forced by the New York Superintendent to agree to withdraw forged documents previously filed in foreclosure proceedings.

C. Defendants' Statements Regarding MERS Were Also Misleading

183. The Defendants' representations that their use of MERS was sufficient to ensure that each Trust would be able to foreclose upon the underlying collateral were also false. As multiple courts have held, because the actual mortgage note is typically not transferred to MERS, the use of the MERS System is a nullity. Accordingly, in February 2011, MERS instructed its lender members to stop foreclosing in the name of MERS in light of the overwhelming weight of legal authority holding that beneficial ownership of an underlying mortgage cannot be transferred to MERS.

184. Moreover, MERS' guidelines expressly contradict Defendants' contention in the Offering Materials that MERS would be the "beneficial owner" of each mortgage. MERS

Recommended Foreclosure Procedures 8 provides: "MERS does not create or transfer beneficial interests in mortgage loans or create electronic assignments of the mortgage."

VI. DEFENDANTS MANIPULATED THE RATINGS PROCESS

185. Each tranche of the Western & Southern Certificates received a credit rating indicating the rating agencies' view of its risk profile. As set forth in Section IV(B), the initial ratings given to the Certificates were typically AAA, or the highest available investment rating. The ratings were material to reasonable investors, including Western & Southern, because the ratings provided additional assurances that investors would receive the expected interest and principal payments. The Certificates would have been unmarketable to investors like Western & Southern and would not have been issued but for the provision of these ratings.

186. The Offering Materials represented that the rating agencies conducted an analysis designed to assess the likelihood of delinquencies and defaults in the underlying mortgage pools and issued ratings accordingly. For example, the Offering Materials for RALI 2005-QS16 represent the Certificates would be rated by Standard & Poor's Ratings Services, Moody's Investors Service, Inc., and Fitch Ratings and that:

> The ratings assigned by Fitch to mortgage pass-through certificates address the likelihood of the receipt by certificateholders of all distributions to which they are entitled under the transaction structure. . . . The ratings assigned by Standard & Poor's to mortgage pass-through certificates address the likelihood of the receipt by certificateholders of payments required under the pooling and servicing agreement. . . . The ratings assigned by Moody's to the Senior Certificates address the likelihood of the receipt by the Senior Certificateholders of all distributions to which they are entitled under the pooling and servicing agreement.

RALI 2005-QS16 Prospectus Supplement at S-86. Each of the Prospectus Supplements relating to the Defendants' other offerings that are part of this action provide identical or substantially similar disclosures. *See* Exhibit C. Each Prospectus Supplement also provides the ratings for each class of certificate issued based on ratings analyses done by multiple ratings agencies.

187. These representations were false. The ratings given to the Certificates by the major credit rating agencies were based on the loan profiles supplied to the agencies by the Defendants. But as discussed above and below, most (if not all) of the key components of that data were false because the Defendants failed to adhere to their disclosed underwriting standards, failed to assign title to the underlying mortgages properly and manipulated the appraisal of the properties underlying the mortgage pools. As such, Defendants essentially pre-determined the ratings by feeding inaccurate information into the ratings system. This rendered misleading Defendants' representations concerning the ratings and their significance because Defendants failed to disclose that the ratings would be based entirely on unreliable information provided by Defendants themselves.

VII. DEFENDANTS IMPROPERLY MANIPULATED THE APPRAISAL PROCESS AND MISREPRESENTED LTV RATIOS

A. Defendants Did Not Rely Upon Independent, Industry-Standard Appraisals

188. The Offering Materials for Defendants' offerings all represent that Defendants required and relied upon independent, industry-standard appraisals to determine the adequacy of the underlying collateral. *See* Exhibit D. These representations were false because: (i) the appraisers were not independent from the respective mortgage lenders, which pressured appraisers to value the mortgaged property at a pre-determined, preconceived, inflated, and false appraisal value; (ii) sales managers employed by the respective originators had and utilized the authority to override and inflate an appraiser's final professional valuation of the mortgaged property; and, as such, (iii) the appraisals failed to conform to industry standards.

189. That the Defendants' statements regarding appraisals were misleading is confirmed by Congressional testimony and other statements made by those in the industry about

the widespread corruption in the appraisal processes, including those used by the companies at issue here, during all times relevant to this Complaint.

190. For instance, Richard Bitner, a former executive of a subprime lender for fifteen years, testified in April 2010 that "the appraisal process [was] highly susceptible to manipulation," and that the rise in property values was in part due to "the subprime industry's acceptance of overvalued appraisals." Similarly, Patricia Lindsay, a former wholesale lender, testified in April 2010 that in her experience appraisers throughout the industry were "often times pressured into coming in 'at value,'" *i.e.*, at least the amount needed for the loan to be approved. The appraisers "fearing" for their "future business and their livelihoods" would choose properties "that would help support the needed value rather than finding the best comparables to come up with the most accurate value."

191. Jim Amorin, President of the Appraisal Institute, testified in April 2009 regarding the industry-wide problem that "in many cases, appraisers are ordered or severely pressured to doctor their reports to convey a particular, higher value for a property, or else never see work from those parties again . . . . [T]oo often state licensed and certified appraisers are forced into making a 'Hobson's Choice.'"

192. The FCIC Report recounts the similar testimony of Dennis J. Black, an appraiser with twenty-four years of experience who held continuing education services across the country. "He heard complaints from appraisers that they had been pressured to ignore missing kitchens, damaged walls, and inoperable mechanical systems. Black told the FCIC, 'The story I have heard most often is the client saying he could not use the appraisal because the value was [not] what they needed.' The client would hire somebody else."

B. Defendants Misrepresented the LTV and CLTV Ratios of the Underlying Mortgage Pools

193. Each prospectus also contains representations concerning the LTV and CLTV ratios of the mortgage loans underlying each securitization. The LTV is the ratio of a mortgage loan's original principal balance to the appraised value of the mortgaged property. The CLTV is the ratio of the amount of all liens against the property subject to the mortgage loans to the appraised value of the property.

194. These ratios were obviously material to Western & Southern and other investors because higher ratios are correlated with a higher risk of default. A borrower with a small equity position in a property has less to lose if he or she defaults on the loan. There is also a greater likelihood that a foreclosure will result in a loss for the lender if the borrower fully leveraged the property. LTV and CLTV are common metrics for analysts and investors to evaluate the price and risk of mortgage-backed securities.

195. As part of its investigation of the claims asserted herein, Western & Southern has analyzed the LTV and CLTV ratios of mortgage loans that secure each of the Certificates that it purchased.[3] Western & Southern tested the LTV and CLTV ratios as represented in the Offering Materials against the ratios that would have been calculated had the properties been valued at the time of loan origination in accordance with accepted and reliable appraisal practices (as was represented in the Offering Materials). To perform this analysis, Western & Southern has employed an industry-standard automated valuation model ("AVM") that reliably calculates the values of the subject properties as of the date of mortgage loan origination.

[3] Western & Southern was unable to obtain data sufficient to conduct a similar forensic review of GMACM 2007-HE1 and GMACM 2007-HE2. However, Western & Southern's forensic review encompassed all five of the remaining RFC Defendants' securitizations. This sample is sufficient to show that the RFC Defendants' similarly misstated the LTV, CLTV and owner occupancy statistics relating to GMACM 2007-HE1 and GMACM 2007-HE2.

196. The results of this analysis are stark misstatements in the LTV and CLTV ratio information as represented in the Offering Materials. Because the LTV and CLTV calculations are simply a ratio of loan amount to value, and because the loan amounts are unquestioned, the reason for the discrepancies is inescapable: the LTV and CLTV ratios represented in the Offering Materials were the result of inflated and unreliable appraisals. Had the appraisal practices comported with those represented in the Offering Materials, the resulting LTV and CLTV ratios would have been materially different from those represented in the Offering Materials.

197. The following summarizes five types of material LTV and/or CLTV ratio understatements contained in the Offering Materials: (i) the percentage of loans with over 100% LTV; (ii) the percentage of loans with over 90% LTV; (iii) the percentage of loans with over 80% LTV; (iv) the weighted average LTV ratio for the mortgage pool; and (v) the weighted average CLTV ratio for the mortgage pool. Each is a distinct and significant representation in the Offering Materials.

198. The 100% LTV representation is obviously significant because loans with over 100% LTV afford the lender no equity cushion and leave the lender with inadequate collateral from the outset of the loan. The Offering Materials consistently assured Western & Southern that there were no such loans in the mortgage pools. Unfortunately, as the following table indicates, the recalculated LTV ratios (which, based on the AVM, indicate what the reported LTV would have been had proper appraisal methods been employed) indicate that there were a material number of mortgage loans with LTV ratios in excess of 100%:

Offering	% of Loans with Greater than 100% LTV per the Prospectus	Recalculated % of Loans with Greater than 100% LTV	Prospectus Understatement
RALI 2005-QS16	0.00%	6.96%	6.96%
RALI 2006-QS3	0.00%	7%	7%
RALI 2006-QS6	0.00%	7.7%	7.7%
RFMSI 2006-S2	0.00%	6.68%	6.68%
RFMSI 2006-S12	0.00%	7.46%	7.46%
TBW 2006-5	0.00%	8.21%	8.21%
RAMC 2007-1	0.00%	18.05%	18.05%
RAMC 2007-2	0.00%	20.01%	20.01%

199. The following table lists the securities purchased by Western & Southern in which the LTV calculated using the AVM exceeds 90%, and lists the representation in the associated Offering Materials with respect to the percentage of the mortgages in the subject pool with LTVs greater than 90%. An LTV in excess of 90% represents an extremely risky mortgage for the investor, as the borrower has little equity in the property and there is a significant risk that upon foreclosure the collateral will be inadequate to pay the debt. Accordingly, for each of the securities listed in the following table, the statement regarding the mortgages in the subject pool with LTVs in excess of 90% was materially misleading:

Offering	% of Loans with Greater than 90% LTV per the Prospectus	Recalculated % of Loans with Greater than 90% LTV	Prospectus Understatement
RALI 2005-QS16	5.2%	18.08%	12.88%
RALI 2006-QS3	3.81%	16.15%	12.34%
RALI 2006-QS6	1.89%	17.29%	15.4%
RFMSI 2006-S2	0.79%	13.13%	12.34%
RFMSI 2006-S12	0.33%	14.09%	13.76%
TBW 2006-5	3.36%	18.53%	15.17%
RAMC 2007-1	15.98%	32.39%	16.41%
RAMC 2007-2	17.61%	36.67%	19.06%

200. The following table lists the securities purchased by Western & Southern in which the LTV calculated using the AVM exceeds 80%, and lists the representation in the associated Offering Materials with respect to the percentage of the mortgages in the subject pool with LTVs greater than 80%. The 80% LTV metric is very significant to an investor such as Western & Southern, because in traditional mortgage underwriting an LTV in excess of 80% was generally considered as affording the lender little value cushion to protect against borrower default and loss upon foreclosure. Accordingly, for each of the securities listed in the following table, the statement regarding the percentage of mortgages in the subject pool with LTVs in excess of 80% was materially misleading:

Offering	% of Loans with Greater than 80% LTV per the Prospectus	Recalculated % of Loans with Greater than 80% LTV	Prospectus Understatement
RALI 2005-QS16	15.08%	37.04%	21.96%
RALI 2006-QS3	10.41%	35.3%	24.89%
RALI 2006-QS6	5.3%	34.58%	29.28%
RFMSI 2006-S2	4.91%	29.33%	24.42%
RFMSI 2006-S12	1.47%	27.86%	26.39%
TBW 2006-5	6.57%	34.38%	27.81%
RAMC 2007-1	36.95%	50.25%	13.3%
RAMC 2007-2	39.12%	54.18%	15.06%

201. The following table lists mortgage pools securing the Certificates purchased by Western & Southern in which the representation contained in the related Offering Materials with respect to the weighted average LTV of the mortgage pool securing those Certificates was materially understated. The weighted average LTV representation is significant because it provides the investor with an important gauge as to the overall riskiness of the mortgage pool:

Offering	Weighted Average LTV as Stated in Prospectus	Recalculated Weighted Average LTV	Prospectus Understatement
RALI 2005-QS16	75.03%	82.77%	7.74%
RALI 2006-QS3	75.68%	84.41%	8.73%
RALI 2006-QS6	73.81%	83.99%	10.18%
RFMSI 2006-S2	70.93%	83.46%	12.53%
RFMSI 2006-S12	69.19%	82.98%	13.79%
TBW 2006-5	76.36%	87.34%	10.98%
RAMC 2007-1	74.54%	86.49%	11.95%
RAMC 2007-2	76.33%	89.81%	13.48%

202. The following table lists mortgage pools securing the Certificates purchased by Western & Southern in which the representation contained in the related Offering Materials with respect to the weighted average CLTV of the mortgage pool securing those Certificates was materially understated. The weighted average CLTV representation is significant because it provides the investor with an important gauge as to the overall riskiness of the mortgage pool:

Offering	Weighted Average CLTV as Stated in Prospectus	Recalculated Weighted Average CLTV	Prospectus Understatement
RALI 2005-QS16	78.35%	90.23%	11.88%
RALI 2006-QS3	81.5%	96.81%	15.31%
RALI 2006-QS6	81.64%	95.58%	13.94%
RFMSI 2006-S2	74.25%	89.38%	15.13%
RFMSI 2006-S12	72.44%	88.76%	16.32%
TBW 2006-5	85.08%	101.01%	15.93%
RAMC 2007-1	76.19%	89.11%	12.92%
RAMC 2007-2	77.22%	91.84%	14.62%

VIII. DEFENDANTS' REPRESENTATIONS REGARDING OWNER OCCUPANCY WERE FALSE

203. Residential real estate can be divided into the following occupancy status categories: primary residences, second homes, and investment properties. Mortgages on primary residences are less risky because they are less likely to default than mortgages on non-owner occupied residences. Thus, the percentage of loans in the asset pool of a securitization which are secured by mortgages on other than primary residences is a key indicator of the risk of certificates sold in the securitization. Occupancy status rates also influence prepayment patterns (which in turn affects the timing and payments on mortgage-backed securities).

204. For these reasons, the occupancy status of the collateral backing the mortgages in loan pools was material to Western & Southern's decision to invest in the Certificates. The Offering Materials for each of the securitizations subject to this action contained specific assertions as to the occupancy status rates of the mortgages in the subject pools.

205. The following table lists mortgage pools securing the Certificates purchased by Western & Southern, sets forth the assertion contained in the related Offering Materials with respect to the percentage of the mortgages that were on properties that were not the borrower's primary residence, and sets forth the non-primary residence occupancy status rates generated by a review of information contained in various public and private databases. The databases reviewed contain information regarding, *inter alia*, the address to which borrower's tax bills were sent, the addresses used by borrower's other creditors to send billings, whether borrowers claimed the property as a homestead under applicable law, and whether borrowers owned other properties of record and how the amount of the subject loan compared to the amounts of mortgage loans on other properties owned. As set forth in the following table, the occupancy status rates set forth in the Offering Materials for the securitizations listed below were materially misstated, and materially misled Western & Southern regarding the true risk of the Certificates it purchased:

Offering	**% of Mortgage of Non-Primary Residence per Prospectus**	**% of Mortgages on Non-Primary Residence per Database Review**	**Prospectus Understatement**
RALI 2005-QS16	29%	34.4%	5.4%
RALI 2006-QS3	32.8%	37.73%	4.93%
RALI 2006-QS6	30.4%	35.53%	5.13%
RFMSI 2006-S2	4.2%	9.04%	4.84%
RFMSI 2006-S12	4.6%	10.23%	5.63%
TBW 2006-5	32.8%	38.29%	5.49%
RAMC 2007-1	6.5%	13.3%	6.8%
RAMC 2007-2	6.5%	13.52%	7.02%

IX. WESTERN & SOUTHERN'S DETRIMENTAL RELIANCE AND DAMAGES

206. In making the investments, Western & Southern relied upon the Defendants' representations and assurances regarding the quality of the mortgage collateral underlying the Certificates, including the quality of their underwriting processes, the assignment of the underlying mortgages and transfer of notes and loan files, the ratings ascribed to the Certificates, the appraisal of the underlying properties, and statistics concerning owner occupancy. Western & Southern received, reviewed, and relied upon the Offering Materials, which described in detail the mortgage loans underlying each offering.

207. In purchasing the Certificates, Western & Southern justifiably relied on the Defendants' false representations and omissions of material fact detailed above, including the misstatements and omissions in the Offering Materials. These representations materially altered the total mix of information upon which Western & Southern made its purchasing decisions.

208. But for the misrepresentations and omissions in the Offering Materials, Western & Southern would not have purchased or acquired the Certificates as it ultimately did, because those representations and omissions were material to its decision to acquire the Certificates, as described above.

209. The false and misleading statements of material facts and omissions of material facts in the Offering Materials directly caused Western & Southern's damages because the Certificates were in fact far riskier than the Defendants described them to be. The loans underlying the Certificates experienced default and delinquency at extraordinarily high rates due to the abandonment of the disclosed underwriting guidelines. When the inevitable defaults followed, many of the underlying loans could not be foreclosed upon because the Defendants failed to assign the mortgages properly. Western & Southern's losses on the Certificates have

been much greater than they would have been if the loans were as Defendants described them to be.

210. There are several potential ways of valuing a mortgage-backed security. One of the potential ways that lower value can be measured – and part of the evidence that Western & Southern has been damaged – can be found in secondary-market pricing. Though the market may have temporarily "seized up" during the financial crisis, it has since partially recovered and there was and is a functioning secondary market for mortgage-backed securities such as the Certificates here. Numerous brokers are active in, and have trading desks specifically dedicated to, the secondary market for mortgage-backed securities, including without limitation Bank of America, Barclays, Goldman Sachs, Citigroup, Deutsche Bank, Morgan Stanley, Royal Bank of Scotland, J.P. Morgan, and Nomura.

211. According to data provided to the FCIC, between May 2007 and November 2008, Goldman Sachs alone bought and sold $17 billion worth of MBS cash securities, and $32 billion worth of credit default swaps linked to mortgage-backed securities, representing a total of 7,000 trades. These figures demonstrate the liquidity in the secondary market for mortgage-backed securities.

212. Western & Southern has incurred substantial losses in market value on the Certificates. Further, the income and principal payments that Western & Southern received have been less than Western & Southern expected under the "waterfall" provisions of the securitizations. Even in the context of the real estate crisis, the Certificates would have held most, if not all, of their value had the securities underlying the loans been as represented by the Defendants in the Offering Materials. This decreased value is evidenced collectively by, but need not be measured solely by, among other things: (a) the high rates of default and

delinquency of the Mortgage Loans; (b) the Certificates' plummeting credit ratings; and (c) lower-than-expected past and current income streams from the Certificates.

213. The drastic and rapid loss in value of Western & Southern's Certificates was primarily and proximately caused by the issuance of loans to borrowers who could not afford them, in contravention of the prudent underwriting guidelines described in the Offering Materials, and due to the failure to assign mortgage loans to each Trust in a manner sufficient to allow the Trust to foreclose upon the underlying property in the event of a default. Delinquencies and defaults were much higher than they would have been if the mortgage loans had been properly underwritten and remain higher than they should be due to the inability of each Trust to foreclose upon many defaulted properties.

X. LIABILITY OF THE OFFICER DEFENDANTS, SPONSORS, DEPOSITORS, AND UNDERWRITERS AS SELLERS, SALE PARTICIPANTS AND/OR CO-CONSPIRATORS

214. The Defendants that qualify as sellers of securities or that participated in the sale of securities under the Ohio Securities Act are the Sponsors (Residential Funding and GMAC Mortgage), the Depositors (RALI, RAMP, RFMSI, and BNPPMS), the Seller of TBW 2006-5 (BNPPM) and the Underwriter Defendants (Residential Securities, UBS Securities, RBS Securities, J.P. Morgan Securities and Deutsche Bank Securities), and the Officer Defendants (Defendants Paradis, Olson, Walker, Duncan, Flees, Jones, Bricker and Young). Each of these is liable for misrepresentations in the Offering Materials under ORC §§ 1707.41, 1707.43, 1707.44.

215. As the Sponsors and/or Sellers for the securitizations at issue, Residential Funding, GMAC Mortgage, and BNPPM originated or acquired the mortgage loans that were pooled together in the securitizations, and then sold, transferred, or otherwise conveyed title to those loans to the Depositors pursuant to Pooling and Servicing Agreements. Residential

Funding, GMAC Mortgage, and BNPPM had responsibility for preparing the Offering Materials that were used to solicit purchases of the Certificates and were identified on the Prospectuses and Prospectus Supplements. Residential Funding, GMAC Mortgage, and BNPPM profited from the sales of the Certificates.

216. As the Depositors for the securitizations at issue, RALI, RAMP, RFMSI, and BNPPMS purchased the mortgage loans from the Sponsors pursuant to the Pooling and Servicing Agreements. The Depositors then purportedly sold, transferred, or otherwise conveyed the mortgage loans to the Trusts, which held the loans as collateral for the Certificates. The Depositors shared responsibility for preparing the Offering Materials that were used to solicit purchases of the Certificates, and were identified on the Prospectuses and Prospectus Supplements. In addition, the Depositors were responsible for registering the offerings with the SEC. The Depositors profited from the sales of the Certificates.

217. The Trusts issued the Certificates that were sold to investors, including Western & Southern. The Trusts had no autonomy or assets of their own, but were mere agents of the Depositors created for the sole purposes of holding the pools of mortgage loans assembled by the Sponsors and Depositors and issuing the Certificates for sale to the investors.

218. As officers of the Depositors, the RFC Officer Defendants and the BNPPMS Officer Defendants participated in each sale by signing registration statements associated with the Certificates. Defendant Paradis signed registration statements for six of the seven RFC securitizations at issue in this action. Defendant Olson signed registration statements for four of the seven RFC securitizations at issue in this action. Defendant Walker signed registration statements for two of the seven RFC securitizations at issue in this action. Defendant Duncan signed registration statements for five of the seven RFC securitizations at issue in this action.

Defendant Flees signed registration statements for all of the RFC securitizations at issue in this action. Defendant Jones signed the registration statement for one securitization at issue in this action. Defendant Bricker signed the registration statement for one securitization at issue in this action.

219. The Sponsors, Depositors, and Trusts used the Underwriters Residential Securities, UBS Securities, RBS Securities, J.P. Morgan Securities, and Deutsche Bank Securities to market and sell the Certificates. The Underwriters were responsible for underwriting and managing the sale of Certificates, including screening the mortgage loans for compliance with the appropriate underwriting guidelines. The Underwriters reviewed and participated in the preparation and dissemination of the Offering Materials and profited from the sales of the Certificates.

220. The Sponsors, Depositors, Underwriters, and Trusts successfully solicited Western & Southern's purchase of the Certificates at issue and title in the Certificates was transferred to Western & Southern.

221. Defendants also conspired with each other and unnamed co-conspirators, including third party mortgage loan servicers Wells Fargo and Ocwen, to commit violations of the Ohio Securities Act in order to profit from the sale of the Certificates and/or profit from the servicing of the loans underlying the Certificates.

XI. DEFENDANTS FAILED TO CONDUCT ADEQUATE DUE DILIGENCE

222. Obviously, if Defendants had conducted reasonable due diligence they would have discovered that the Offering Materials included the material misrepresentations described above in Sections IV-VIII. Defendants could have and should have reviewed at least a significant sample of the mortgage loans underlying each offering. If they had, they would have

discovered that a substantial number of loans did not comply with the underwriting standards touted in the Offering Materials. Defendants could have, and should have, conducted independent analyses that would have alerted them to the fact that the Offering Materials misrepresented LTV and CLTV ratios, owner occupancy statistics, and that the ratings provided to the Certificates were overstated. Finally, even a cursory review of the handling of mortgage files and purported assignments would have revealed that no attempt was being made to assign mortgages to the Trusts or properly transfer notes and loan files.

223. That certain Underwriter Defendants are not affiliates of the Sponsors of the respective offerings makes no difference. Each of the Underwriter Defendants were aware that proper due diligence would have revealed the misrepresentations, but they nevertheless failed to conduct adequate due diligence or consciously disregarded the misstatements in the Offering Materials.

224. For example, the FCIC Report revealed that UBS allowed into securitizations a substantial number of mortgage loans that, as reported to it by third-party due diligence firms, did not conform to the applicable underwriting. Reports prepared for UBS Securities by the third party due diligence firm Clayton Holdings revealed that, in the period from the first quarter of 2006 to the second quarter of 2007, 20% of the mortgage loans UBS submitted to Clayton to review in residential mortgage-backed securities groups were rejected by Clayton as falling outside the applicable underwriting guidelines. Of the mortgage loans that Clayton found defective, 33% of the loans were subsequently waived in by UBS without proper consideration and analysis of compensating factors.

225. The FCIC similarly reported that RBS Securities systemically disregarded reports from Clayton that loans included in securitizations failed to comply with applicable underwriting

guidelines. Clayton's reports revealed that in the period from the first quarter of 2006 to the second quarter of 2007, 18% of the mortgage loans RBS Securities or its affiliates submitted to Clayton to review in residential mortgage-backed securities groups were rejected by Clayton as falling outside the applicable underwriting guidelines. Of the mortgage loans that Clayton found defective, 53% of the loans were subsequently waived in by RBS Securities without proper consideration and analysis of compensating factors and included in securitizations. RBS Securities' underwriting and due diligence practices with respect to mortgage-backed securities are being investigated by the SEC. In March 2008, the SEC launched an informal investigation into RBS Securities' underwriting of mortgage-backed securities. That investigation was upgraded, and became formal in March 2011.

226. Deutsche Bank Securities also utilized Clayton. Clayton's reports reveal that from January 2006 to June 2007, 35% of the mortgages Deutsche Bank Securities submitted to Clayton for review were rejected as outside underwriting guidelines. Of the mortgages that Clayton found defective, some 50% were subsequently "waived in" by Deutsche Bank Securities. Of the nine banks that FCIC investigated, Deutsche Bank was second both in the number of loans rejected by Clayton and in the number of loans it subsequently waived in.

227. J.P. Morgan securities also utilized Clayton. Clayton's reports reveal that from January 2006 to June 2007, 26% of the mortgages J.P. Morgan Securities submitted to Clayton for review were rejected as outside underwriting guidelines. Of the mortgages that Clayton found defective, some 51% were subsequently "waived in" by J.P. Morgan Securities Securities.

228. Citigroup's knowledge concerning origination practices went far beyond a general awareness that originators systematically were disregarding their own underwriting guidelines. In April 2010, Richard M. Bowen III, an executive of a Citigroup affiliate testified before the

FCIC that during the 2006-2007 time frame 60% to 80% of the RMBS Citigroup sold were defective and in contravention to the representations and warranties made to investors. According to the FCIC, Citigroup retaliated against this whistleblower by decreasing the number of his direct reports from 220 people to two, slashing his bonus, and giving him poor performance reviews. Citigroup also utilized Clayton. Clayton's reports reveal that from January 2006 to June 2007, 29% of the mortgages Citigroup submitted to Clayton for review were rejected as outside underwriting guidelines. Of the mortgages that Clayton found defective, some 31% were subsequently "waived in" by Citigroup.

XII. SCIENTER ALLEGATIONS APPLICABLE TO COMMON-LAW FRAUD CLAIMS

229. The allegations below are made in support of common-law fraud claims, not in support of Plaintiffs' Ohio Securities Act claims and negligent misrepresentation claims.

230. The same evidence discussed above not only shows that the representations were untrue, but that the Defendants *knew* they were falsely representing the underlying process and the risk profiles behind the Mortgage Loans. For instance:

- As set forth in Sections VII and VIII, the large discrepancies in basic information such as owner occupancy, LTV, and CLTV statistics, detailed above, evidence a systemic underwriting failure that Defendants could not possibly have been ignorant of, given that it controlled the entire securitization process.

- As set forth in detail in Section IV(C)(1), Fannie Mae and Freddie Mac discovered that the RFC Defendants sold them more than $1 billion of loans that failed to comply with applicable underwriting guidelines during the relevant period and the RFC Defendants were forced to repurchase them.

- As detailed in Section V(B), Western & Southern's forensic review confirms that Defendants made no attempt to properly assign 81% of the mortgage notes underlying the Certificates. Defendants could not have been ignorant of this fact because they controlled the securitization process.

- As detailed in Section V, Defendants or their affiliates or agents have engaged in an attempt to cover up their failure to validly assign the mortgage notes by filing false documentation in courts nationwide and forging assignment documents in an effort to cover up their tracks. Former head of the FDIC Shelia Bair recently described Defendants' misconduct as "pervasive" during an interview aired on the television program *60 Minutes*.

- As detailed in Section XI, the Underwriter Defendants' agent, Clayton, notified the Underwriter Defendants that large numbers of mortgage loans included in securitizations they underwrote did not comply with the applicable underwriting guidelines. But the Underwriter Defendants did nothing to rectify the situation. Instead, they included the non-compliant loans in securitizations sold to investors such as Western & Southern without requiring evidence of sufficient compensating factors.

FIRST CAUSE OF ACTION
(Violation of ORC § 1707.41)

231. Western & Southern realleges each allegation above as if fully set forth herein.

232. This claim is brought under Section 1707.41 of the Ohio Securities Act, ORC § 1707.41 against all Defendants. Defendants (a) offered securities for sale by a written or printed circular, prospectus, or advertisement; (b) Western & Southern purchased these securities relying on such written or printed circular, prospectus, or advertisement; and (c) such written or printed circular, prospectus, or advertisement contained untrue statements of material fact and/or omitted material facts necessary to make the statements made not misleading.

233. Defendants had knowledge of the untrue statements of material fact and omissions of material facts set forth herein by virtue of the fact that, at a minimum, Defendants failed to exercise reasonable diligence in ascertaining their falsity.

234. As a result of Defendants' dissemination of materially false and misleading information and their failure to disclose material facts, Western & Southern was misled into believing that the Certificates were more creditworthy investments than they actually were.

235. By virtue of the foregoing, Defendants violated ORC § 1707.41. As a direct and proximate result of the Defendants' wrongful conduct, Western & Southern has suffered damages in connection with the purchase and subsequent decline in value of the Certificates.

SECOND CAUSE OF ACTION
(Violation of ORC § 1707.44(B)(4))

236. Western & Southern realleges each allegation above as if fully set forth herein.

237. This claim is brought under the Ohio Securities Act, ORC § 1707.44(B), against all Defendants. Defendants made false representations concerning material and relevant facts, in the Offering Materials for the purpose of selling securities within the State of Ohio.

238. Defendants had knowledge of the misrepresentations and omissions of material facts set forth herein by virtue of the fact that, at a minimum, Defendants failed to exercise reasonable diligence in ascertaining their falsity.

239. As a result of Defendants' dissemination of materially false and misleading information and their failure to disclose material facts, Western & Southern was misled into believing that the Certificates were more creditworthy investments than they actually were.

240. By virtue of the foregoing, Defendants violated ORC § 1707.44(B)(4). As a direct and proximate result of Defendants' wrongful conduct, Western & Southern has suffered damages in connection with the purchase and subsequent decline in value of the Certificates.

THIRD CAUSE OF ACTION
(Violation of ORC § 1707.44(J))

241. Western & Southern realleges each allegation above as if fully set forth herein.

242. This claim is brought under the Ohio Securities Act, ORC § 1707.44(J), against all Defendants. Defendants knowingly made or caused to be made materially misleading false statements in the Offering Materials concerning the value of the Certificates.

243. Defendants had knowledge of the misrepresentations and omissions of material facts set forth herein by virtue of the fact that, at a minimum, Defendants failed to exercise reasonable diligence in ascertaining their falsity.

244. As a result of Defendants' dissemination of materially false and misleading information and their failure to disclose material facts, Western & Southern was misled into believing that the Certificates were more creditworthy investments than they actually were.

245. By virtue of the foregoing, Defendants have violated ORC § 1707.44(J). As a direct and proximate result of Defendants' wrongful conduct, Western & Southern has suffered damages in connection with the purchase and subsequent decline in value of the Certificates.

FOURTH CAUSE OF ACTION
(Violation of ORC § 1707.44(G))

246. Western & Southern realleges each allegation above as if fully set forth herein.

247. This claim is brought under the Ohio Securities Act, ORC § 1707.44(G), against all Defendants. Defendants knowingly engaged in acts prohibited under the Ohio Securities Act in connection with the sale of the Certificates to Western & Southern.

248. By virtue of the foregoing, Defendants violated ORC § 1707.44(G). As a direct and proximate result of Defendants' wrongful conduct, Western & Southern has suffered damages in connection with the purchase and subsequent decline in value of the Certificates.

FIFTH CAUSE OF ACTION
(Rescission pursuant to ORC § 1707.43)

249. Western & Southern realleges each allegation above as if fully set forth herein including but not limited the First, Second, Third and Fourth Causes of Action herein.

250. This claim is brought under the Ohio Securities Act, ORC § 1707.43, against all Defendants. As set forth in the First, Second, Third and Fourth Causes of Action herein,

Defendants made sales in violation of the Ohio Securities Act or participated in or aided the sellers in making such sale.

251. Western & Southern is entitled to void and rescind the sale of Certificates under ORC § 1707.43 and recover the full amount of consideration paid for the Certificates and all taxable court costs.

SIXTH CAUSE OF ACTION
(Negligent Misrepresentation)

252. Western & Southern realleges each allegation above as if fully set forth herein.

253. This is a claim for negligent misrepresentation against RALI, RAMP, RFMSI, and BNPPMS (the "Negligent Misrepresentation Defendants").

254. Western & Southern made 60 separate investments in ten Offerings of mortgage-backed securities that the Defendants securitized and sold. The Negligent Misrepresentation Defendants also originated or acquired, and underwrote, all the loans in the Offerings.

255. Because the Negligent Misrepresentation Defendants arranged the securitizations, they had unique and special knowledge about the loans in the Offerings. In particular, the Negligent Misrepresentation Defendants had unique and special knowledge and expertise regarding the quality of the underwriting of the loans underlying each securitization.

256. Because Western & Southern could not evaluate the loan files for the mortgage loans underlying its Certificates, and because Western & Southern could not examine the underwriting quality or servicing practices for the mortgage loans in the securitizations on a loan-by-loan basis, it was heavily reliant on the Negligent Misrepresentation Defendants' unique and special knowledge regarding the underlying mortgage loans when determining whether to make each investment of Certificates. Western & Southern was entirely reliant on the Negligent

Misrepresentation Defendants to provide accurate information regarding the loans in engaging in that analysis.

257. The Negligent Misrepresentation Defendants were aware that Western & Southern was seeking to compile a portfolio of conservative investments and that Western & Southern relied on the Negligent Misrepresentation Defendants' unique and special expertise and experience and depended upon the Negligent Misrepresentation Defendants for accurate and truthful information.

258. Based on their expertise, superior knowledge, and relationship with Western & Southern, the Negligent Misrepresentation Defendants owed a duty to Western & Southern to provide complete, accurate, and timely information regarding the mortgage loans and the offerings. The Negligent Misrepresentation Defendants breached their duty to provide such information to Western & Southern.

259. The Negligent Misrepresentation Defendants likewise made misrepresentations which they knew, or were negligent in not knowing at the time to be false, in order to induce Western & Southern's investment in the offerings. At the time they made these misrepresentations, the Negligent Misrepresentation Defendants knew, or at a minimum were negligent in not knowing, that these statements were false, misleading, and incorrect. Such information was known to the Negligent Misrepresentation Defendants but not known or readily known to Western & Southern, and the Negligent Misrepresentation Defendants knew that Western & Southern was acting in reliance on mistaken information.

260. Western & Southern reasonably relied on the information the Negligent Misrepresentation Defendants did provide and was damaged as a result of these misrepresentations. Had Western & Southern known the true facts regarding Defendants'

underwriting practices and the quality of the loans making up the securitizations, it would not have purchased the Certificates.

261. The Negligent Misrepresentation Defendants' material misrepresentations and omissions set forth above were made without any reasonable ground for believing that the representations were true.

262. By reason of the foregoing, the Negligent Misrepresentation Defendants are liable to Western & Southern for negligent misrepresentation.

263. As a result of the foregoing, Western & Southern has suffered damages according to proof.

SEVENTH CAUSE OF ACTION
(Civil Conspiracy)

264. Western & Southern realleges each allegation above as if fully set forth herein.

265. As set forth in the First, Second, Third, Fourth, and Fifth Causes of Action, Defendants violated the Ohio Securities Act and as set forth in the Eighth Cause of Action Defendants committed fraud.

266. Residential Funding, GMAC Mortgage, RALI, RAMP, RFMSI, the RFC Officer Defendants, J.P. Morgan Securities, RBS Securities, UBS Securities, and Deutsche Bank Securities all agreed to take the steps necessary to cause RALI 2005-QS16, RFMSI 2006-S2, RFMSI 2006-S12, RALI 2006-QS3, RALI 2006-QS6, GMAC 2007-HE1, and/or GMAC 2007-HE2 to issue Certificates pursuant to materially misleading Offering Materials fraud in order to profit from the sale of the Certificates and/or profit from the servicing of the loans underlying the Certificates.

267. TBW, BNPPMS, BNPPM, the BNP Officer Defendants, and Wells Fargo all agreed to take the steps necessary to cause TBW 2006-5 to issue the Certificates pursuant to

materially misleading Offering Materials in order to profit from the sale of the Certificates and/or profit from the servicing of the loans underlying the Certificates.

268. Delta Funding, Renaissance Mortgage, RBS Securities, Citigroup, Wells Fargo, and Ocwen all agreed to take the steps necessary to cause RAMC 2007-1 and/or RAMC 2007-2 to issue the Certificates pursuant to materially misleading Offering Materials in order to profit from the sale of the Certificates and/or profit from the servicing of the loans underlying the Certificates.

269. As set out above, each Defendant committed overt acts in furtherance of the conspiracy.

270. As a result of the foregoing, Western & Southern has suffered damages according to proof.

EIGHTH CAUSE OF ACTION
(Common-Law Fraud)

271. Western & Southern realleges each allegation above as if fully set forth herein.

272. This claim is brought against all Defendants.

273. The material representations set forth above were fraudulent, and the Defendants' representations fraudulently omitted material statements of fact.

274. Each of the Defendants knew their representations and omissions were false and/or misleading at the time they were made. Each of the Defendants made the misleading statements with intent to defraud Western & Southern.

275. Western & Southern justifiably relied on the Defendants' false representations and misleading omissions.

276. Had Western & Southern known the true facts regarding the Defendants' underwriting practices and quality of the loans making up the securitizations, it would not have purchased the Certificates.

277. As a result of the Defendants' false and misleading statements and omissions, as alleged herein, Western & Southern has suffered damages according to proof. The Defendants are liable to Western & Southern for common-law fraud.

PRAYER FOR RELIEF

WHEREFORE Western & Southern prays for relief as follows:

An award of damages against Defendants in favor of Western & Southern against all Defendants, jointly and severally, for all damages sustained as a result of Defendants' wrongdoing, in an amount to be proven at trial, but including at a minimum:

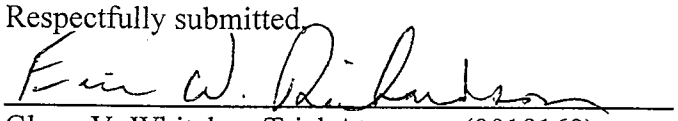
a. Rescission and recovery of the consideration paid for the Certificates, with interest thereon;

b. Western & Southern's monetary losses, including loss of market value and loss of principal and interest payments;

c. Attorneys' fees and costs;

d. Prejudgment interest at the maximum legal rate;

e. Punitive damages; and



f. Such other and further relief as the Court may deem just and proper.

JURY TRIAL DEMANDED

Plaintiffs hereby demand a trial by jury on all issues triable by jury.

Dated: Cincinnati, Ohio

No. 11-cv-9729 (PAC)

AMENDED COMPLAINT

RECEIVED
MAR 30 2012
U.S.D.C. S.D. N.Y.
CASHIERS

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"), Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"), Ally Bank, formerly known as GMAC Bank ("Ally Bank"), and GMAC Mortgage, LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with a financial guaranty insurance policy (the "2006-HE1 Policy" or the "Policy") issued by FGIC in relation to a GMACM-sponsored transaction (the "2006-HE1 Transaction" or the "Transaction"), in which GMACM Home Equity Loan Trust 2006-HE1 (the "2006-HE1 Trust" or the "Trust") issued and sold to investors over $1.2 billion aggregate principal amount of insured residential mortgage-backed securities (the

"2006-HE1 Notes"). As the sponsor of the 2006-HE1 Transaction, GMACM procured the Policy from FGIC in order to enhance the ratings and marketability of the 2006-HE1 Notes. GMACM fraudulently induced FGIC's agreement to provide this insurance through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices and the credit quality and characteristics of the tens of thousands of mortgage loans (individually the "Mortgage Loans," and collectively the "Loan Pool") that provided the collateral for the 2006-HE1 Notes. In short, the Mortgage Loans were different—and demonstrably worse—than GMACM had represented them to be. FGIC's issuance of the Policy enabled the 2006-HE1 Notes to receive a triple-A rating from the rating agencies, which in turn made the 2006-HE1 Transaction viable, and enabled GMACM and its affiliates to earn millions of dollars in transaction fees.

2. Since the closing of the 2006-HE1 Transaction, GMACM has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of the 2006-HE1 Transaction, GMACM has violated the essential terms of its agreement with FGIC. GMACM has also breached the essential terms of the other operative documents incorporated therein.

3. The wrongdoing committed by GMACM, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through its wholly-owned subsidiary, ResCap. Ally Financial is the ultimate parent of ResCap, which owns GMACM. Ally Financial, as the ultimate parent of ResCap and GMACM, has the practical ability, which it has repeatedly exercised, to direct and control the activities of these (and other) subsidiaries. In many instances—including in this Transaction—Ally Financial's direction and control was effected by using ResCap as an intermediary instrument to achieve its goals. For example, many of the

material contractual breaches committed by GMACM, concerning, primarily, FGIC's right to access information in GMACM's possession and GMACM's failure to repurchase or cure certain of the Mortgage Loans backing the 2006-HE1 Notes that FGIC sought to have repurchased, were carried out by ResCap, at the direction and control of Ally Financial.

4. GMACM was also substantially assisted in fraudulently inducing FGIC to issue the Policy by another Ally Financial subsidiary, Ally Bank, then doing business as GMAC Bank. Ally Bank and GMACM were the two principal originators of loans that became the collateral for the 2006-HE1 Transaction, and as such had intimate knowledge of the quality of the Loan Pool. In total, Ally Bank sold over $500 million in loans that it had originated or acquired to GMACM to be securitized in the 2006-HE1 Transaction. Further, Ally Bank agreed to serve as custodian of the 2006-HE1 Transaction—one of the critical parties charged with certain oversight and maintenance duties with respect to the 2006-HE1 Trust—and received certain key operative documents with respect to the Transaction. With knowledge of GMACM's material misrepresentations and omissions regarding the Mortgage Loans that collateralized the Transaction, Ally Bank separately made representations and warranties regarding those loans for the purpose of aiding GMACM's inducement of FGIC to issue the Policy. By assisting GMACM in inducing FGIC to issue the Policy, Ally Bank was able to collect substantial fees as Custodian and perpetuate its lucrative loan origination business.

5. Ally Bank has materially breached its own separate contractual agreement regarding its duties as Custodian of the 2006-HE1 Transaction, in particular by failing to ensure that essential documents were included in the loan file and failing to notify FGIC of breaches of representations and warranties by GMACM of which Ally Bank was aware.

6. The 2006-HE1 Transaction is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among GMACM and several other parties whereby tens of thousands of home equity loans and home equity revolving lines of credit were pooled together and transferred to the 2006-HE1 Trust, which then issued to investors securities (*i.e.*, the 2006-HE1 Notes) collateralized by those loans.

7. In March 2006, FGIC and several other parties entered into the 2006-HE1 Transaction. The 2006-HE1 Transaction was sponsored by GMACM. To facilitate the Transaction, GMACM pooled together over twenty-one thousand Mortgage Loans to provide collateral for the 2006-HE1 Notes. All of the Mortgage Loans were either originated or acquired by GMACM or Ally Bank.

8. After pooling the Mortgage Loans originated or acquired by GMACM and Ally Bank, GMACM transferred the Mortgage Loans directly or indirectly to another Ally Financial subsidiary, Residential Asset Mortgage Products, Inc. ("RAMP"). RAMP then deposited the Mortgage Loans it received from GMACM into the 2006-HE1 Trust. The 2006-HE1 Trust, in turn, issued the 2006-HE1 Notes to investors. The 2006-HE1 Trust was a legal entity created by GMACM solely for the purposes of the 2006-HE1 Transaction to hold the Mortgage Loans and to issue the 2006-HE1 Notes to investors in a registered public offering.

9. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the Trust are used to pay, among other things, principal and interest due on the 2006-HE1 Notes, and the fees and expenses of GMACM and other participants in the Transaction.

10. GMACM also acts as servicer of the 2006-HE1 Transaction (the "Servicer"). As Servicer, GMACM supervises the collection of borrower payments and performs other servicing

duties related to the Mortgage Loans. As discussed in more detail below, all of GMACM's servicing operations have since been integrated into ResCap. Yet another Ally Financial subsidiary, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was a co-manager of the 2006-HE1 Transaction. In addition, JPMorgan Chase Bank, N.A ("JPMorgan") agreed to act as indenture trustee of the Trust (the "Indenture Trustee").

11. GMACM, directed and controlled by Ally Financial, is, therefore, the hub of the 2006-HE1 Transaction: it is the sponsor of the securitization, the originator and seller of many of the Mortgage Loans, and the servicer of all the loans that collateralize the 2006-HE1 Notes. The primary victim of the 2006-HE1 Transaction—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by GMACM—is FGIC, which has already paid out tens of millions of dollars in losses under the Policy, with further material losses still to come.

12. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed notes ("RMBS Notes"). At the time of the 2006-HE1 Transaction, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Notes typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of principal losses allocated to the RMBS Notes. FGIC's insurance policies thus enhanced the credit quality, and marketability, of the insured securities.

13. To enhance the ratings and marketability of the 2006-HE1 Notes, and to increase the profit that GMACM would derive from the 2006-HE1 Transaction, GMACM sought to have FGIC issue the Policy to JPMorgan, as Indenture Trustee for the 2006-HE1 Notes for the benefit of the holders of the 2006-HE1 Notes.

14. To induce FGIC to issue the Policy, GMACM made material representations and warranties to FGIC about the manner in which the Mortgage Loans were selected and evaluated and their characteristics. Those representations and warranties were false when stated. FGIC reasonably relied on such warranties, among others, when deciding to enter into the 2006-HE1 Transaction. Additionally, those representations and warranties were false on the many occasions when they were restated by GMACM (for example, when GMACM added new loans to the Loan Pool). As a result, FGIC was fraudulently induced to enter the Transaction, and the credit risk assumed by FGIC in connection with the Transaction was far greater than it would have been had GMACM's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

15. GMACM received substantial assistance from Ally Bank in fraudulently inducing FGIC to issue the Policy. Ally Bank was aware of the material misrepresentations GMACM had made to FGIC, and further represented to FGIC that it would undertake duties to monitor and certify the accuracy and completeness of certain material aspects of the Mortgage Loan files, as well as inform FGIC of certain failures by GMACM to comply with its obligations under the 2006-HE1 Transaction documents. Ally Bank made these representations to FGIC despite its knowledge that GMACM had not complied—and would not comply—with its representations and warranties to FGIC. As such, Ally Bank actively aided and abetted GMACM's fraudulent inducement of FGIC to issue the Policy.

16. Moreover, both GMACM and Ally Bank received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policy. Ally Financial took actions and made statements to boost investor confidence in, and otherwise finance and support, its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations GMACM and Ally Bank had made to FGIC. As a result of its dominance over ResCap, Ally Bank, and GMACM, Ally Financial knew that the representations and warranties GMACM and Ally Bank made to FGIC, prior to and at the closing, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted GMACM's and Ally Bank's fraudulent inducement of FGIC to issue the Policy.

17. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policy in reliance on the (presumed) accuracy and truthfulness of GMACM's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and the resulting amount of claims presented to FGIC have been overwhelming. Had FGIC been told the truth about the nature of GMACM's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policy, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of GMACM's misconduct.

18. Further, as explained more fully below, following the closing of the 2006-HE1 Transaction, GMACM failed to properly give effect to a "Managed Amortization Event," as defined by the plain language of the transaction documents. GMACM subsequently improperly added approximately $580 million in additional mortgage loans (the "Subsequent Mortgage

Loans") to the 2006-HE1 Trust through subsequent transfers that it was not authorized to make. As a result, FGIC is being asked to pay significant losses incurred on a substantial number of loans that were added to the 2006-HE1 Trust after closing, in circumstances where the express terms of the operative documents for the 2006-HE1 Transaction (the "Operative Documents") precluded those loans from being added to the 2006-HE1 Trust.

19. In order to evaluate the extent of GMACM's breaches, FGIC has requested copies of the mortgage loan files and servicing notes for the Mortgage Loans. GMACM is obligated, under its agreements with FGIC, to provide those documents to FGIC. GMACM has refused to provide FGIC with the requested documentation, which, on information and belief, will further evidence material breaches by GMACM. This refusal to provide information in itself constitutes a material breach of GMACM's insurance agreement with FGIC.

20. Certain of the material contractual breaches committed by GMACM and Ally Bank—including, but not limited to, its refusal to honor FGIC's right to access information in GMACM's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

21. Through this Amended Complaint, FGIC seeks relief against GMACM, Ally Bank, ResCap, and Ally Financial for GMACM's fraudulent inducement of FGIC, and for GMACM's material breaches of its insurance agreement with, and contractual obligations owed to, FGIC in connection with the 2006-HE1 Transaction.

22. Further, FGIC seeks relief against Ally Financial and Ally Bank for aiding and abetting GMACM's fraudulent inducement, as well as for Ally Bank's material breaches of its contractual obligations to FGIC.

23. FGIC also seeks a declaration from the Court that Ally Financial, ResCap and GMACM were and continue to be alter egos of one another.

THE PARTIES

24. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

25. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial is the parent company of ResCap, GMACM, and all GMACM-affiliated entities relevant to this action.

26. Defendant GMACM is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. In the period relevant to this action, GMACM originated, acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

27. Since 2005, GMACM has been an indirect wholly-owned subsidiary of ResCap; prior to that time, GMACM was an indirect, wholly-owned subsidiary of Ally Financial.

28. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly-owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of GMACM and its business includes originating, acquiring, selling, and servicing mortgage loans.

29. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

30. Ally Bank (f/k/a GMAC Bank), an indirect, wholly-owned subsidiary of Ally Financial, was at all times relevant to this Amended Complaint a loan originator. To facilitate the 2006-HE1 Transaction, Ally Bank sold to GMACM over $500 million in mortgage loans that it had originated or acquired to be securitized in the Transaction. These loans comprised more

than 55% of the initial Mortgage Loans. GMAC Bank was renamed Ally Bank in May 2009. Ally Bank is an online bank chartered under Utah law.

JURISDICTION AND VENUE

31. This Court has subject matter jurisdiction over this suit pursuant to 28 U.S.C. § 1332 because there is complete diversity of citizenship between the parties and the amount in controversy exceeds $75,000, exclusive of interest and costs. This Court has personal jurisdiction over the defendants as the defendants have consented to this jurisdiction by virtue of having removed the New York state court action to this Court. Additionally, in an agreement at issue in this case, at least one of the defendants irrevocably submitted to the jurisdiction of this Court.

32. Venue is proper in this district under 28 U.S.C. § 1391 because a substantial part of the events giving rise to this claim occurred within this judicial district, and, in an agreement at issue in this case, at least one of the defendants agreed not to challenge venue in this Court. Further, the defendants have consented to this venue by virtue of having removed the New York state court action to this Court.

RELEVANT NON-PARTIES

33. RAMP, a special purpose vehicle, is an indirect, wholly-owned subsidiary of Ally Financial and a Delaware corporation with its principal place of business in Minnesota. To facilitate the 2006-HE1 Transaction, RAMP purchased mortgage loans from GMACM and another affiliate, Walnut Grove Mortgage Loan Trust 2003-A ("Walnut Grove"), and deposited those loans into the 2006-HE1 Trust. The trust then issued the 2006-HE1 Notes to the underwriters, including Ally Securities (then doing business as GMAC RFC Securities), to be sold to investors.

34. Ally Securities, an entity incorporated in Delaware, is an affiliate of GMACM and RAMP and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the 2006-HE1 Notes and, on information and belief, participated in the preparation of certain of the key offering documents for the 2006-HE1 Transaction.

35. Walnut Grove is a Delaware statutory trust established by an affiliate of GMACM. Beginning in 2003, GMACM sold to Walnut Grove second-lien mortgage loans that it had originated or acquired. To facilitate the 2006-HE1 Transaction, Walnut Grove sold certain of the Mortgage Loans to RAMP.

FACTUAL ALLEGATIONS

A. Ally Financial and its Subsidiaries

36. In the period relevant to this action, GMACM originated, acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Notes.

37. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including in large part GMACM, Ally Bank, and ResCap, led Ally Financial to seek a bailout by the federal government in 2008.

(1) GMACM, GMAC-RFC, and RFC

38. GMACM is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

39. Residential Funding Corporation, LLC ("RFC") is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate GMACM, RFC engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

40. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical Annual: Volume II* at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

41. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

42. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with GMACM. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential

> investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

43. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

44. Ally Financial's business model depended on securitizations, which were conducted by its business units, including GMACM. Pooling mortgage loans and selling them into securitizations enabled GMACM to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

45. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining whether a mortgage loan is in default based on the transaction documents, GMACM generally acted as servicer of its own securitizations. GMACM thereby earned servicing fees that normally amounted to 0.50% per annum of the aggregate principal balance of the mortgage loans, as well as collected fees in the range of 20%-36% of any subsequent recoveries from charged-off loans.

46. GMACM also enriched Ally Financial and its other subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the 2006-HE1 Transaction:

- Ally Bank gained fees for originating nearly 60% of the loans initially comprising the 2006-HE1 Trust, and proceeds from selling those loans to GMACM; Ally Bank also gained fees as custodian of the 2006-HE1 Trust for holding certain documents;

- Walnut Grove received the proceeds from selling certain of the Mortgage Loans to RAMP (after purchasing over 40% of the loans from GMACM);

- RAMP received payments for serving as the depositor of the Mortgage Loans to the 2006-HE1 Trust; and

- Ally Securities received fees for underwriting the 2006-HE1 Notes.

(3) Ally Financial, GMACM, and RFC Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

47. GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

48. Additionally, on September 2, 2011, the Federal Housing Finance Authority ("FHFA"), as conservator for Freddie Mac, filed suit in the Supreme Court of the State of New York, New York County against Ally Financial and several of its subsidiaries for claims arising in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in

certificates issued through twenty-one transactions similar to the transaction at issue here. Among other claims, FHFA brought suit for common law fraud against various Ally Financial subsidiaries and aiding and abetting fraud against Ally Financial for its intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the subject certificates.

49. The FHFA also alleges violations of state and federal securities laws by Ally Financial and several of its subsidiaries stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, FHFA also alleges aiding and abetting fraud against Ally Financial and certain of its affiliates for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs. In October 2011, Ally Financial and its co-defendants removed the FHFA action to the U.S. District Court for the Southern District of New York.

50. In addition, GMACM is currently facing a lawsuit brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court in which MBIA alleges that in connection with three transactions similar to the one at issue here, GMACM affirmatively misrepresented the credit quality of tens of thousands of mortgage loans, with a total original principal balance of more than $4 billion, as a means of unfairly shifting to investors and MBIA risks that GMACM should have borne itself. On December 15, 2010, the New York Supreme Court issued a ruling denying GMACM's motion to dismiss, which allowed both the breach of representations and warranties and fraud claims, among others, to proceed to trial.

51. GMACM's sister company, RFC, is also currently facing a lawsuit brought by MBIA in New York Supreme Court for, among other things, fraud and breach of representations and warranties in connection with RMBS transactions. In December 2009, the New York Supreme Court rejected RFC's motion to dismiss certain of the claims brought against it, allowing both the breach of contract and fraud claims, among others, to proceed.

52. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two pending suits in various jurisdictions pending against Ally Financial's mortgage-related business units and subsidiaries, arising from numerous mortgage-backed securities offerings. The plaintiffs in those suits have alleged, among other things, that Ally Financial's various mortgage subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. *See* Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011). Further, in its 2011 annual report, Ally Financial stated that it expects additional similar claims to be brought against Ally Financial and/or its subsidiaries in the future. *See* Ally Fin. Inc., Annual Report (Form 10-K), at 20 (Feb. 28, 2011).

53. Since the filing of its November 2011 quarterly report, moreover, Ally Financial and its subsidiaries have been sued by additional plaintiffs, including HSH Nordbank AG, which have alleged, inter alia, material misrepresentations and omissions about the loans backing RMBS securities issued by Ally Financial's affiliates.

54. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. During 2011, Ally

Financial and its subsidiaries have received repurchase claims from monoline insurers for $265 million worth of mortgages related to securitizations it consummated between 2004 and 2007. Ally Financial clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own U.S. Securities and Exchange Commission ("SEC") filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Annual Report (Form 10-K), at 98 (Feb. 28, 2012).

55. Indeed, according to Ally Financial's annual report, Ally Financial, GMACM's parent, also believes that "[t]he total exposure . . . to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008, specifically the 2006 and 2007 vintages that were originated and sold prior to enhanced underwriting standards and risk-mitigation actions implemented in 2008 and forward." Ally Fin. Inc., Annual Report (Form 10-K), at 224 (Feb. 28, 2012). The 2006-HE1 Transaction is, as its name implies, of the 2006 vintage, but also includes Mortgage Loans originated in 2007.

56. Additionally, Ally Financial also disclosed that the SEC served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. *See* Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

(4) The Mortgage Loan Servicing Misconduct of Ally Financial and GMACM Has Come Under Scrutiny and Resulted in Severe Sanctions

57. On February 9, 2012, the Federal Reserve Board announced that Ally Financial, its subsidiaries, and several other mortgage loan servicers would be required to pay $766.5

million in monetary sanctions for "unsafe and unsound processes and practices in residential mortgage loans servicing and foreclosure processing." Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2012). On February 12, 2012, the Federal Reserve Board imposed well over $200 million of this fine against Ally Financial, ResCap, and GMACM pursuant to an assessment order, which requires that the sanctions be paid into various borrower assistance programs and nonprofit programs established to help victims of improper servicing and foreclosure practices. *See In re Ally Fin. Inc.*, FRB Docket Nos. 12-006-CMP-HC & 12-006-CMP-DEO (Feb. 10, 2012) (the "Assessment Order"). According to the Federal Reserve Board, the sanction "takes into account the maximum amount prescribed for unsafe and unsound practices under the applicable statutory limits, the comparative severity of the institutions' misconduct, and the comparative sizes of the institutions' foreclosure activities." *See* Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2012).

58. Further, also on February 9, 2012, the U.S. Attorney General announced that Ally Financial will take part in a $25 billion settlement to resolve claims brought by the government in response to the "reckless and abusive mortgage practices" of Ally Financial and four similarly situated bank holding companies. *See* Eric Holder, U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012). Although the settlement releases Ally Financial from certain civil claims brought by the DOJ and multiple state attorneys general, *see id.*; National Mortgage Settlement, Servicing Standard Highlights, *available at* http://www.nationalmortgagesettlement.com (last visited Mar. 10, 2012), the settlement was not designed to resolve any other liabilities that Ally Financial has incurred through its improper

origination, securitization, and servicing practices, *see* National Mortgage Settlement, About the Settlement, http://www.nationalmortgagesettlement.com/about (last visited Mar. 10, 2012).

59. According to the U.S. Attorney General, the $25 billion settlement and $766.5 million sanction are just "the latest step forward" in holding Ally Financial and others accountable for "egregious mortgage loan servicing abuses." *See* Eric Holder, U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012).

60. Similarly, the New York Attorney General recently announced a $136 million settlement with the nation's five largest mortgage servicers—including GMAC/Ally Financial. *See* Press Release, Office of the New York Attorney General, Schneiderman Secures Major Settlement that Allows Sweeping Mortgage Investigations to Proceed (Feb. 9, 2012). As the New York Attorney General noted, the settlement principally addressed "foreclosure abuses" by GMAC/Ally Financial and other banks, and "[i]n addition to penalties for past abuses, the settlement includes direct relief to victims of wrongful foreclosure conduct" and "imposes strong national standards for mortgage servicing" that had previously been lacking. *Id.* Additionally, the New York Attorney General will lead the new Residential Mortgage-Backed Securities Working Group, a component of the interagency Financial Fraud Enforcement Task Force led by the DOJ, which "brings together the Department of Justice (DOJ), several state law enforcement officials, and other federal agencies to investigate those responsible for misconduct contributing to the financial crisis through the pooling and sale of residential mortgage-backed securities." *Id.*

61. In addition to these recent settlements and Assessment Order, the Federal Reserve Board and the Federal Deposit Insurance Corporation (the "FDIC") previously ordered Ally Financial, GMACM, and several other Ally Financial subsidiaries to adopt new procedures and

practices in relation to mortgage loan servicing. *See In re Ally Fin. Inc.*, FRB Docket Nos. 11020-B-HC & 11020-B-DEO, FDIC-11-123b (April 13, 2011) (the "Consent Order").

62. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries, including GMACM, have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

63. Furthermore, under the Consent Order, Ally Financial must direct GMACM and its other mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

64. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure processes of GMACM to request an independent review of their files. *See* Press Release, Fed. Reserve Bd., Federal Reserve Board Announces that Borrowers from Four Mortgage Servicers Can Request an Independent Review and Potentially Receive Compensation (Nov. 1, 2011). This independent review will determine whether errors and misrepresentations

in GMACM's foreclosure processes indeed caused financial harm to the borrower. *See id.* If the foreclosure process is found to have caused financial injury to the borrower, GMACM will then be required to provide full compensation. *See id.*

65. As a result of servicing misconduct, Ally Financial and other bank holding companies will now be required to adhere to new, heightened servicing standards. *See* Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2011). The Federal Reserve Board has ordered Ally Financial to remedy its servicing practices by, *inter alia*, "strengthen[ing] the coordination of communications with borrowers by providing borrowers the name of the person at the service who is their primary point of contact, establish[ing] limits on foreclosures where loan modifications have been approved, establish[ing] robust third party vendor controls, strengthen[ing] compliance programs, and provid[ing] appropriate remediation to borrowers who suffered financial injury as a result of errors by the servicers." *See id.*

66. Moreover, the servicing and foreclosure improprieties of Ally Financial and its subsidiaries is a matter of public record. According to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan Dep. *Fed. Nat'l Mortgage Ass'n v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Dist. Nine, Div. N. Cumberland) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

67. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.* at 51:15-23. Stephan further testified that when he signed an affidavit affirming that the foreclosure was proper, all he knew was the borrower's name and whether he had signing authority for the GMAC entity foreclosing on the property. *Id.* at 62:23-25, 63:2-6. Stephan testified that the process he followed in signing summary judgment affidavits was in accordance with the policies and procedures required by GMACM. *Id.* at 64:8-14.

68. Additionally, in October 2010, the Ohio Attorney General filed suit against GMACM and Ally Financial, alleging, *inter alia*, that employees of GMACM had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See Ohio v. GMAC Mortgage, LLC*, CI0201006984, Ct. C.P. Lucas Cnty. Although some of the claims brought by the Ohio Attorney General's suit have been resolved by the $25 billion multi-party settlement, many additional claims not encompassed by the settlement, including those relating to the improper assignment of mortgage notes, have survived. As of February 2012, the action remains pending in Ohio.

69. Similarly, in December 2011, the Massachusetts Attorney General filed suit against GMACM for, among other things, engaging in unfair and deceptive foreclosure practices. *See Massachusetts v. Bank of Am., N.A.*, 11-4363, Suffolk Cnty. Super. Ct. Days after filing suit,

the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial and GMACM for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Boston Globe, *Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices*, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

Id.

70. While the $25 billion settlement ultimately resolved certain claims brought by the Massachusetts Attorney General in this action, several claims relating to improper foreclosure practices and abuse of certain state recordation systems have survived and will continue to be prosecuted. *See* Press Release, Office of the Attorney General of Massachusetts, *Massachusetts Homeowners to Receive $318 Million in Relief as Part of State-Federal Agreement Over Unlawful Foreclosures and Loan Servicing*, Feb. 9, 2012.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and GMACM

71. Since as early as November 2011, Ally Financial has been considering filing for bankruptcy protection for ResCap, its wholly-owned subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports. GMACM is a wholly-owned, indirect subsidiary of ResCap.

72. Around that time, the financial industry was "betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering." Bloomberg News, *Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance*," Nov. 14, 2011.

73. As the article notes, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy. *See id.*

74. Indeed, Ally Financial warned in its 2011 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 19 (Feb. 28, 2012).

75. That risk ultimately came to pass as Ally Financial recently disclosed that the penalties assessed by the federal government and numerous state attorneys general regarding the foreclosure practices of Ally Financial and its subsidiaries "resulted in our Mortgage operations recording a $230 million charge in the fourth quarter of 2011." *Id.* at 31. As Ally Financial detailed in its previous public filing, the "[t]he majority of [the charge] was recorded at Residential Capital, LLC ('ResCap') . . . [which] resulted in a covenant breach in certain of ResCap's credit facilities." Ally Fin. Inc., Current Report (Form 8-K) (Jan. 31, 2012). Indeed, as Ally Financial more recently explained, "ResCap is required to maintain consolidated net worth . . . of $250 million at the end of each month under the terms of certain of its credit facilities. . . [and] as a result of the fourth quarter charge, ResCap's consolidated net worth was $92 million at December 31, 2011." Ally Fin. Inc., Annual Report (Form 10-K), at 31-32 (Feb. 28, 2012). ResCap's substantial shortfall, however, was "immediately remediated by Ally

through a capital contribution of $197 million, which was provided through forgiveness of intercompany debt during January 2012." *Id.*

76. Moreover, in February 2012, it was reported that Ally Financial had contacted buyout firms such as Fortress Investment Group LLC and Cerberus Capital Management LP regarding a potential sale of ResCap through a pre-packaged bankruptcy to be effectuated by the end of March as ResCap faces financing and liquidity deadlines. *See* Bloomberg News, *Ally's ResCap Said to Seek Buyers for Prearranged Bankruptcy*, Feb. 8, 2012.

77. According to the report, "[p]otential bidders are being told that a pre-packaged bankruptcy filing would allow the buyer to leave behind liabilities such as [RMBS] securitizations that have been the subject of litigation." *Id.* To that end, Ally Financial's CEO, Michael Carpenter, has stated that he will not pursue the aforementioned initial public offering for Ally Financial "until [these] legacy mortgage issues are resolved." *Id.* Nevertheless, a bondholder group representing holders of approximately $800 million in ResCap debt has expressed its desire to "fight [Ally Financial] tooth and nail" to oppose the bankruptcy, based in part on the belief that "Ally [Financial] can't legally separate itself from ResCap because it has stripped assets from the unit." Bloomberg News, *Paulson, Tepper Said Among Investors Urging Ally to Back ResCap*, Jan. 10, 2012.

78. Indeed, as Ally Financial has pointedly noted in its most recent annual report: "In light of ResCap's liquidity and capital needs combined with volatile conditions in the marketplace, there is substantial doubt about ResCap's ability to continue as a going concern." Ally Fin. Inc., Annual Report (Form 10-K), at 18 (Feb. 28, 2012).

B. Ally GMACM's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

79. To improve the marketability and ratings of the RMBS Notes issued as part of its securitizations, GMACM from time to time sought credit enhancement for the RMBS Notes from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the one FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Notes that, if there is a shortfall in cash available to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

80. For a trust that issues RMBS Notes, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS Notes. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the Loan Pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS investors. Such shortfalls result in claims on FGIC's policies.

(2) Securitization Sponsor's Disclosures and Representations and Warranties

81. The risk FGIC assumes when it agrees to issue a policy for RMBS Notes depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originators and the characteristics of the loans. If, for instance, GMACM and other loan originators employ substandard underwriting practices, the underlying

mortgage loans would be of inferior credit quality. Consequently, the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage portfolio as a whole, would be materially increased.

82. Accordingly, FGIC generally required securitization sponsors, like GMACM, to provide substantial representations and warranties about the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to monthly income ("DTI ratio"), the ratio of the mortgage loan principal balance to the value of the mortgaged property at origination—plus, in the case of a junior lien mortgage loan, the principal balance of the senior mortgage loan on the related mortgaged property—("CLTV ratio"), and the borrower's credit score ("FICO score"). Even where GMACM did not originate a particular loan, it nonetheless is typically required to make representations about that loan, thereby assuming the risk that those representations might not be accurate. GMACM's representations and warranties, including representations about the standards and procedures used to underwrite the loans, were intended to allow FGIC to assess the credit risk inherent in the mortgage loan pool before deciding to commit to the transaction.

83. GMACM's representations and warranties in its RMBS transactions regarding the characteristics of the loans included in the mortgage loan portfolios, and the underwriting standards used to evaluate those mortgage loans, are particularly vital because each loan pool comprised thousands of mortgage loans, each of which was in itself a complex legal transaction. Each loan file typically contains (or at least is supposed to contain) a mortgage application, a credit report, income and employment verifications, an appraisal, the lender's internal documentation and a wide variety of other documentation necessary to support proper loan underwriting decisions. Moreover, in seeking financial guaranty insurance from FGIC for the

2006-HE1 Transaction, GMACM demanded that FGIC commit to the pricing and other material terms within a very limited time frame. Both GMACM and FGIC understood and intended that FGIC would rely on the information supplied by GMACM as sponsor, as well as GMACM's representations and warranties concerning that information, in assessing the credit risk of the mortgage loan pool.

84. Further, on information and belief, for each of its securitizations, GMACM as sponsor supplied the same data it provided to FGIC to one or several rating agencies in order for those agencies to create expected loan level default and loss estimates. The loan level default and loss estimates were then used by the rating agencies to create cash flow projections and potential loss estimates for the entire transaction. Finally, the rating agencies delivered to the sponsor and to FGIC a private credit assessment for the transaction (sometimes referred to as a "shadow rating") without considering the effect of FGIC's policy. The shadow rating provided an overall evaluation of the likelihood of default on the securities FGIC would be insuring in the securitization. As sponsor, GMACM arranged for the shadow rating to be provided to FGIC knowing that it was an essential condition to FGIC's willingness to issue a financial guaranty insurance policy.

C. The GMACM 2006-HE1 Transaction

85. On March 30, 2006, GMACM pooled together and deposited many thousands of fixed and adjustable rate Home Equity (Revolving) Lines of Credit ("HELOCs") and Home Equity Loans ("HELs") into the GMACM Home Equity Loan Trust 2006-HE1. The 2006-HE1 Trust served as the Issuer of $1,274,156,000 in aggregate principal amount of 2006-HE1 Notes. Home equity loans are essentially second-lien mortgage loans, which are generally funded entirely at the closing of the loan. Home equity lines of credit are typically revolving credit lines

collateralized by second-lien mortgage loans, which can be drawn on at any time during an extended period, and repaid at any time, subject to a maximum repayment period.

86. The initial conveyance to the 2006-HE1 Trust by RAMP (acting as Depositor) contained over 12,500 HELOCs with an aggregate outstanding principal balance of approximately $593 million, and over 8,800 HELs with an aggregate principal balance of approximately $368 million. In all, the 2006-HE1 Trust contained at closing roughly 21,300 initial Mortgage Loans with an aggregate principal balance of approximately $961 million. Investors in the GMACM-sponsored 2006-HE1 Transaction were issued a single class of securities—the 2006-HE1 Notes (formally termed the GMACM Home Equity Loan-Backed Term Notes, Series 2006-HE1)—which were collateralized by the Mortgage Loans transferred to and held by the 2006-HE1 Trust. In addition, approximately $320 million was deposited into a pre-funding account at the closing, which was used to acquire additional Mortgage Loans in the 90 days following the closing.

87. To enhance the ratings and marketability of the 2006-HE1 Notes, GMACM sought a financial guaranty insurance policy from FGIC for the purpose of insuring the transaction for the benefit of the certificate holders. On March 30, 2006, GMACM and FGIC executed an Insurance and Indemnity Agreement (the "I&I Agreement"), under which FGIC agreed to and did issue Policy number 06030037 to insure the 2006-HE1 Notes. The I&I Agreement was signed by FGIC (the "Insurer" of the 2006-HE1 Transaction); GMACM (the "Sponsor", "Seller" and "Servicer" for the 2006-HE1 Transaction); RAMP (the "Depositor" for the 2006-HE1 Transaction); Walnut Grove (a "Seller" for the 2006-HE1 Transaction); and JPMorgan (the "Indenture Trustee" for the 2006-HE1 Transaction). The Bank of New York Trust Company, N.A., later became the successor in interest to JPMorgan as Indenture Trustee.

88. Also on March 30, 2006, Ally Bank (using its then-current name, GMAC Bank) entered into a Custodial Agreement whereby it agreed to serve as Custodian of the underlying mortgage loan notes on behalf of the 2006-HE1 Trust. FGIC is an express third party beneficiary of that agreement. *See* Custodial Agreement § 5.6.

89. The I&I Agreement provides that FGIC (the Insurer) is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." I&I Agreement § 2.02(k). "Operative Documents" are defined to include, among other documents: (i) the 2006 HE-1 Notes; (ii) the Mortgage Loan Purchase Agreement dated as of March 30, 2006 among GMACM, RAMP, Walnut Grove and JPMorgan (the "MLPA"); (iii) the Servicing Agreement dated as of March 30, 2006 among GMACM, the 2006-HE1 Trust and JPMorgan; (iv) the Indenture dated as of March 30, 2006 between the 2006-HE1 Trust and JPMorgan; and (v) the Custodial Agreement dated as of March 30, 2006 among GMACM, JPMorgan, and Ally Bank. I&I Agreement § 1.01. FGIC is referred to as the "Enhancer" under certain of the Operative Documents.

90. Pursuant to the I&I Agreement FGIC insured $1,274,156,000 aggregate principal amount of the 2006-HE1 Notes. The Policy improved the marketability of the 2006-HE1 Notes by mitigating risk for potential investors and making the 2006-HE1 Notes eligible to receive a credit rating of triple-A by the rating agencies at closing.

91. GMACM and the Depositor offered the 2006-HE1 Notes for sale pursuant to a prospectus, dated February 16, 2006 (the "Prospectus"), and a prospectus supplement, dated March 29, 2006 (the "Prospectus Supplement"), which touted the Policy and the "triple-A" initial rating of the 2006-HE1 Notes, which was made possible by the Policy. The Prospectus and Prospectus Supplement, together with certain preliminary offering documents, each as

further supplemented by any subsequent amendment or supplement thereto, and any other offering document that makes reference to the Policy, are referred to collectively as the "Offering Documents."

92. On March 30, 2006, an Ally Financial subsidiary, Ally Securities, sold the 2006-HE1 Notes to investors, and FGIC issued the Policy in accordance with the terms of the I&I Agreement.

93. The 2006-HE1 Transaction was structured in such a way as to permit GMACM to add Subsequent Mortgage Loans to the pool during a specifically defined Revolving Period, which enabled GMACM to continue to shift the credit risk of such loans to investors and to FGIC for a defined period after the closing, and to realize immediate gains on the loans it sold to the trust. GMACM represented and warranted to FGIC that the Subsequent Mortgage Loans would conform to the same contractual representations and warranties GMACM made about the loans and the underwriting of the loans that were in the pool at closing. *See* MLPA § 3.1(b). Those representations and warranties were critical to FGIC's acceptance of this feature of the 2006-HE1 Transaction.

94. As discussed more fully below, Subsequent Mortgage Loans were also expressly not permitted to be added to the pool following the occurrence of a Managed Amortization Event, which, as defined, was deemed to occur whenever the Funding Account carried an average daily balance of greater than $10 million in any three-consecutive-month period.

D. GMACM Fraudulently Induces FGIC to Insure the 2006-HE1 Notes with Substantial Assistance from Ally Financial and Ally Bank

(1) GMACM's Fraudulent Inducement of FGIC

95. FGIC's participation in the 2006-HE1 Transaction was an essential component of the 2006-HE1 Transaction and enhanced GMACM's ability to market the securitization

effectively. The Policy allowed GMACM to sell the 2006-HE1 Notes with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

96. In order to induce FGIC to write financial guaranty insurance for the 2006-HE1 Transaction, GMACM provided to FGIC, directly or indirectly, a variety of information.

97. *First* and foremost, GMACM provided to FGIC initial and final Prospectus Supplements summarizing, among other material information, the credit quality and characteristics of the Mortgage Loans, and GMACM's loan underwriting guidelines and loan origination criteria.

98. *Second*, GMACM provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in the 2006-HE1 Transaction, together with representations regarding material statistics about the Loan Pool as a whole.

99. *Third*, GMACM provided to FGIC credit ratings for the 2006-HE1 Notes determined without considering the effect of the Policy. These ratings, which GMACM procured from the credit rating agencies, are known as "shadow ratings."

100. *Fourth*, as discussed in detail below, GMACM provided to FGIC representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreement regarding the Mortgage Loans specifically and the Loan Pool generally.

101. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the 2006-HE1 Notes, FGIC relied in part upon representations and warranties regarding GMACM's loan underwriting standards made by GMACM in the Prospectus and Prospectus Supplement. The Prospectus, as supplemented by the Prospectus Supplement, was filed with the SEC and became effective on March 29, 2006. A Preliminary Prospectus

Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about March 28, 2006, in an email sent by Daniel Deaton, on behalf of GMACM. The Final Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about March 29, 2006, in an email sent by Jeffrey Wittenberg on GMACM's behalf.

102. In the Offering Documents, GMACM represented that, based on the data provided in the borrower's application and certain other applicable verifications, "a determination will have been generally made by the original lender that the borrower's monthly income would be sufficient to enable the borrower to meet its monthly obligations on the loan and other expenses related to the property." Prospectus at 29. Further, in the Prospectus Supplement, GMACM also represented to FGIC that:

> The mortgage loans were selected for inclusion in the mortgage pool from among mortgage loans originated or purchased in connection with [GMACM's] Underwriting Standards . . . based on [GMACM's] assessment of investor preferences and rating agency criteria.

Prospectus Supplement at S-33.

103. The Prospectus Supplement expressly states that GMACM's "underwriting standards with respect to the [Mortgage Loans, including the Home Equity Lines of Credit and Home Equity Loans] will generally conform to those published in the GMAC Mortgage Corporation underwriting guidelines, including the provisions of the GMAC Mortgage Corporation underwriting guidelines applicable to the GMAC Mortgage Home Equity Program." Prospectus Supplement at S-38, S-42.

104. GMACM publishes its loan underwriting standards in a document referred to in the Prospectus Supplement as "the GMAC Mortgage Corporation underwriting guidelines" (and referred to herein as the "Underwriting Guidelines"). Prospectus Supplement at S-38, S-39, S-42. In general, the Underwriting Guidelines specify documentation requirements, and substantive

criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan or line of credit. Depending upon the particular type of loan or line of credit, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories and/or evidence of closing funds, among other things. The substantive criteria for eligibility address material characteristics of the proposed loan, such as DTI ratios, CLTV ratios and occupancy status.

105. The Prospectus Supplement set forth, among other information, the following important characteristics of the Loan Pool: the ranges of and weighted average FICO scores, the ranges of and weighted average CLTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (*i.e.*, whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). *See* Prospectus Supplement at A-I-1 - A-I-14.

106. In particular, GMACM represented in the Prospectus Supplement that the loans had generally been originated with a maximum DTI ratio of 45% and a maximum CLTV ratio of 100%. *See* Prospectus Supplement at S-40, S-43. GMACM also represented that for each Mortgage Loan it had made a determination based upon all applicable employment, credit and property information regarding whether the prospective borrower had sufficient monthly income available to meet the borrower's monthly obligations. *See* Prospectus Supplement at S-41, S-45.

107. GMACM also represented in the Offering Documents that, with respect to occupancy status, 97.85% of the Mortgage Loans would be secured by the borrower's primary residence. Prospectus Supplement at A-1-4.

108. ***Loan Tapes.*** The loan tapes provided by GMACM set forth, for each loan in the Loan Pool, key characteristics such as the borrower's FICO score and DTI ratio and the CLTV ratio for the loan. GMACM also disclosed in the Prospectus Supplement—with respect to the Loan Pool as a whole—aggregate characteristics also relevant to the assessment of the credit risk of the pool, including weighted averages of FICO scores, DTI ratios and CLTV ratios.

109. ***Shadow Rating Letters***. GMACM, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. Based on the information supplied by GMACM, Moody's assessed the credit quality of the Loan Pool and assigned a shadow rating of Baa2 to the 2006-HE1 Notes, while S&P assigned the 2006-HE1 Notes a shadow rating of BBB. These shadow ratings met FGIC's minimum requirements. FGIC required these shadow ratings as an essential condition to its willingness to insure the 2006-HE1 Transaction.

(2) GMACM's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Bank

110. Ally Bank provided substantial assistance to its affiliate GMACM in fraudulently procuring the Policy from FGIC. As it originated or acquired nearly 60% of the Mortgage Loans, Ally Bank was well aware of the true characteristics of the majority of the Loan Pool. Moreover, as a result of its affiliate status with GMACM, and its role as Custodian for the 2006-HE1 Transaction—for which it received substantial fees—Ally Bank was aware of the representations and warranties GMACM made to FGIC regarding the nature of GMACM's business practices and the characteristics of the Mortgage Loans (including the many thousands of Mortgages Loans that were originated by Ally Bank).

111. With full knowledge that GMACM had not complied—and would not comply—with the representations and warranties it made to FGIC, and direct knowledge of the many

thousands of loans it had originated and sold to GMACM, which formed a substantial part of the collateral for the 2006-HE1 Transaction, Ally Bank represented to FGIC that, as Custodian, it would inform FGIC if it discovered any non-compliant Mortgage Loans or non-compliance with GMACM's obligations under the Operative Documents. By offering FGIC this false comfort, despite knowing that GMACM was fraudulently inducing FGIC to provide financial guaranty insurance for the 2006-HE1 Transaction, Ally Bank provided material assistance to GMACM's fraud.

(3) GMACM's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

112. Ally Financial provided substantial assistance to its subsidiaries GMACM and Ally Bank in fraudulently inducing FGIC to participate in the 2006-HE1 Transaction and, ultimately, issue the Policy. Ally Financial knew that the Mortgage Loans underlying the 2006-HE1 Transaction were of a substantially poorer quality than was represented to FGIC and other participants in the Transaction, including investors. Ally Financial further knew that the Mortgage Loans were not underwritten to the standards represented in the Offering Documents and warranted in the Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap, Ally Bank, and its other subsidiaries, Ally Financial knew that the representations and warranties GMACM made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

113. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to engender investor confidence in, and otherwise finance and support, its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of

Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

114. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

115. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries."

116. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

117. Ally Financial's corporate restructuring also allowed GMACM to explicitly represent and warrant to FGIC in the I&I Agreement that GMACM "is solvent, and will not be rendered insolvent by the Transaction. . . . [GMACM] shall not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." I&I Agreement § 2.01(m). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary GMACM.

118. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the 2006-HE1 Transaction—and other securitization transactions—were far

worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

119. Moreover, as a result of its domination and control over ResCap, GMACM, and Ally Bank, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of GMACM's representations and warranties to FGIC—and that they were untrue when stated—as well as the substantial assistance Ally Bank was rendering GMACM in aid of its fraudulent inducement of FGIC. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including GMACM, shared numerous directors and senior management as well. Similarly, William F. Muir, Ally Financial's President, has served in that capacity since at least 2004 (first at GMAC and then at Ally Financial) while also serving as President and Chairman of the Board of IB Finance Holding Company, LLC—the direct parent of Ally Bank—and as a director of Ally Bank.

120. David C. Walker is another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, including GMACM and RAMP. Walker

joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. In September 2005, shortly before the closing of the 2006-HE1 Transaction, Walker was a director at ResCap, GMACM, RFC, and RAMP, among other ResCap subsidiaries. In the 2006-HE1 Transaction, acting as a director of RAMP, Walker was a signatory to RAMP's May 1, 2005 "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors," which was included among the closing documents of the 2006-HE1 Transaction.

121. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, Ally Bank, and GMACM, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by GMACM was shared among and between GMACM and its parent ResCap, ResCap and its parent Ally Financial, and Ally Bank and its parent and affiliates. Indeed, at least one Ally Financial employee who was involved in the 2006-HE1 Transaction appeared on the Transaction's working group list and received all distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

122. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to GMACM in fraudulently inducing FGIC to participate in the Transaction and issue the Policy. Further, the issuance of the Policy, which

made the 2006-HE1 Transaction possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. GMACM's Representations, Warranties and Affirmative Covenants

123. In connection with the 2006-HE1 Transaction, GMACM, at the direction of Ally Financial, either directly or indirectly through ResCap, gave numerous representations, warranties and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way GMACM conducted its loan origination, selection, and evaluation process, the characteristics of the Mortgage Loans, and the accuracy and completeness of the information supplied to FGIC. These and other characteristics of the Mortgage Loans included in the Loan Pool at closing were detailed in a schedule attached to the Servicing Agreement, and, as to Subsequent Mortgage Loans, in similar schedules at the time of their transfer to the 2006-HE1 Trust (such schedules collectively, the "Mortgage Loan Schedule"). GMACM also promised to provide timely Mortgage Loan file information and to provide FGIC with a variety of information, including access to GMACM's books and records and to GMACM's Chief Financial Officer and its independent accountants.

124. GMACM's representations and warranties, and particularly GMACM's representation that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into the 2006-HE1 Transaction and to issue the Policy. Further, the I&I Agreement's incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and every one of the representations and warranties that GMACM made in connection with the 2006-HE1 Transaction.

125. FGIC, for its part, reasonably relied on the information available to it regarding the underlying Mortgage Loans and the representations and warranties provided by GMACM.

Since FGIC had neither the right under the Operative Documents, nor the practical ability, to review the tens of thousands of underlying Mortgage Loan files in the days available to it prior to the closing of the 2006-HE1 Transaction, GMACM knew that FGIC had no choice but to rely on GMACM's representations regarding the underlying loans in determining whether to issue the Policy. Further, FGIC had no reason to believe that these representations were not true and accurate.

126. Indeed, GMACM included more than 21,000 individual Mortgage Loans in the 2006-HE1 Transaction at closing. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation and other forms of documentation necessary to support each underwriting decision. Unlike GMACM, FGIC was under no contractual duty whatsoever to review the more than 21,000 Mortgage Loans. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by GMACM regarding its loan origination, selection, and evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on GMACM to conduct its underwriting processes according to the promised standards and FGIC had no basis to conclude that GMACM's representations and warranties were false. Thus, FGIC reasonably believed that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

127. Based on the information received by FGIC and the representations and warranties given by GMACM, FGIC entered into the I&I Agreement and agreed to issue the Policy to the Indenture Trustee for the benefit of the holders of the 2006-HE1 Notes. In return for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the

aggregate principal balance of the 2006-HE1 Notes. Specifically, FGIC received 0.12% per annum of the aggregate balance of the 2006-HE1 Notes for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties and affirmative covenants provided by GMACM.

128. As discussed below, GMACM's information, representations and warranties were materially false when disclosed and/or provided by GMACM. GMACM knew that this information, and its representations and warranties, were materially false when made. GMACM also knew that this information and the representations and warranties were essential to FGIC's decision to issue the Policy. Indeed, GMACM intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and issue the Policy. The issuance by FGIC of the Policy—induced by GMACM's fraudulent misrepresentations and substantial assistance by Ally Financial—made the 2006-HE1 Notes eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(1) Representations, Warranties and Affirmative Covenants Relating to the Operative and Offering Documents

129. Under Section 2.01 of the I&I Agreement, GMACM made the following representations and warranties, among others (emphasis added in each case):

> ♦ *Accuracy of Information.* **Neither the Operative Documents to which it is a party nor other information relating to the Mortgage Loans**, the operations of GMACM. . . or the financial condition of GMACM . . . furnished to [FGIC] . . . by GMACM . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made** . . . GMACM . . . has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change with respect to GMACM . . . Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to GMACM . . . that would render any of the Documents untrue or misleading in any material respect.

♦ *Compliance with Securities Laws.* The offering and sale of the Securities complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading** . . . .

♦ *Operative Documents.* **Each of the representations and warranties of GMACM . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects** [and] GMACM . . . hereby makes each such representation and warranty to, and for the benefit of, [FGIC] as if the same were set forth in full herein.

♦ *Solvency; Fraudulent Conveyance.* GMACM . . . is solvent and will not be rendered insolvent by the Transaction and . . . **GMACM . . . shall not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**, and . . . GMACM . . . does not intend to incur, or believe that it has incurred, debts beyond its ability to pay as they mature. . . . GMACM . . . is not transferring the Mortgage Loans . . . with any intent to hinder, delay or defraud . . . creditors.

130. *First*, in the I&I Agreement, GMACM represented and warranted to FGIC that "[n]either the Operative Documents to which it is a party nor other information relating to the Mortgage Loans. . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." I&I Agreement § 2.01(j). Through these Operative and Offering Documents, GMACM communicated several material facts about the characteristics of the mortgage loans sold to the 2006-HE1 Trust.

131. *Second*, in the I&I Agreement, GMACM represented and warranted that "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading." § 2.01(k). As discussed above, in the Prospectus Supplement, GMACM represented that all of the mortgage loans sold to the 2006-HE1 Trust had

been underwritten generally in accordance with GMACM's underwriting standards, including the GMAC Mortgage Home Equity Program. Prospectus Supplement at S-38, S-42.

132. *Third*, the I&I Agreement incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the "Operative Documents," as that term was defined in the I&I Agreement: "[e]ach of the representations and warranties . . . contained in the applicable Operative Documents . . . is true and correct in all material respects[.]" *See* I&I Agreement §§ 1.01, 2.01(l). The incorporation by reference of the Operative Documents into the I&I Agreement was intended to allow FGIC to rely on any representation and warranty that GMACM made to other entities, such as investors or the Indenture Trustee, in connection with the 2006-HE1 Transaction. Indeed, the I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. I&I Agreement § 2.02(k).

133. *Fourth*, GMACM also provided information to FGIC concerning Mortgage Loans in the 2006-HE1 Transaction. *See* I&I Agreement § 2.02(c)(iii). This information included loan tapes that set forth statistics about the Loan Pool. The loan tapes purported to describe key characteristics relevant to the assessment of risk, including DTI ratios, CLTV ratios, occupancy status and FICO scores. *See* MLPA § 2.1(d). On information and belief, the loan tape FGIC received at closing contains the same information as is contained in the Mortgage Loan Schedule referred to in the MLPA.

134. In turn, in the MLPA, GMACM represented that all the information in that Mortgage Loan Schedule "is true and correct in all material respects as of the date or dates respecting which such information is furnished." MLPA § 3.1(b)(i).

135. As a result of incorporating into the I&I Agreement the representations and warranties in the related Operative Documents, GMACM incorporated representations and

warranties regarding the underwriting of the Mortgage Loans included in the 2006-HE1 Transaction. These representations and warranties set forth the standards governing each Mortgage Loan, including, significantly, the representation that the Mortgage Loans had been underwritten in compliance with GMACM's underwriting guidelines. *See* MLPA § 3.1(xxxvii).

136. In particular, in the MLPA, GMACM represents and warrants, as to each Mortgage Loan:

- The information set forth in the Mortgage Loan Schedule with respect to each Mortgage Loan or the Mortgage Loans is true and correct in all material respects as of the date or dates respecting which such information is initially furnished;

- As of the Cut-Off Date or related Subsequent Cut-Off Date, no Mortgage Loan was 30 days or more delinquent in payment of principal or interest;

- With respect to the GMACM Initial Mortgage Loans or, as applicable, any Subsequent Mortgage Loans sold by GMACM, the related Mortgage File contains or will contain, in accordance with the definition of "Mortgage File" in Appendix A to the Indenture, each of the documents and instruments specified to be included therein;

- As of the Cut-Off Date or Subsequent Cut-Off Date, the Combined Loan-to-Value Ratio [("CLTV")] for each Mortgage Loan was not in excess of 100.00%;

- GMACM used no selection procedures that identified the Mortgage Loans as being less desirable or valuable than other comparable mortgage loans originated or acquired by GMACM under the GMACM Home Equity Program.

137. Moreover, in the I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—GMACM specifically covenants that it will "comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreement § 2.02(a).

(2) Representations, Warranties and Affirmative Covenants Regarding Access to Information and Servicing

138. The I&I Agreement also incorporates the representations and warranties that GMACM made in the Servicing Agreement in its capacity as Servicer. *See* I&I Agreement § 2.01(l). Under the I&I Agreement, GMACM covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the [Servicing Agreement]." I&I Agreement § 2.02(l). In the Servicing Agreement, GMACM covenanted, represented, and warranted that it would service the Mortgage Loans in the 2006-HE1 Transaction in a manner consistent with its own servicing guidelines. *See* Servicing Agreement § 3.01(a).

139. The I&I Agreement requires *inter alia* that GMACM furnish or cause to be furnished to FGIC "promptly upon receipt thereof, copies of all schedules, financial statements or other similar reports delivered to or by GMACM . . . [as well as] promptly on request such other data as [FGIC] may reasonably request." I&I Agreement § 2.02(c)(v),(A),(B).

140. The I&I Agreement further affords FGIC the express right "to conduct an ongoing review of GMACM's practices as Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices." I&I Agreement § 2.02(p). FGIC also has the express right to "inspect the books and records of GMACM . . . [and to] discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and with GMACM's consent, which consent shall not be unreasonably withheld or delayed, to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants." I&I Agreement § 2.02(e)(i)-(iii).

F. GMACM's Breaches of Its Representations, Warranties and Affirmative Covenants

141. As discussed above, FGIC relied on material representations and warranties made by GMACM regarding the manner in which the Mortgage Loans were originated, selected, and

evaluated, the characteristics of those loans, and the accuracy and completeness of information GMACM supplied to FGIC. Based on those representations and warranties, FGIC agreed to issue the Policy. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed below, the risk that FGIC assumed when it issued the Policy was many times greater than the risk disclosed by GMACM's representations and warranties. GMACM breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

142. The 2006-HE1 Transaction has performed poorly, and delinquencies and defaults for Mortgage Loans in the 2006-HE1 Transaction have been substantial. As of October 2011, a total of 4,763 mortgage loans, representing nearly 15% of the balance of the entire Loan Pool, had been liquidated or were delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue the Policy, which covers, *inter alia*, shortfalls in amounts paid to noteholders arising from liquidated Mortgage Loans, GMACM assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with GMACM's own representations and warranties.

143. The poor performance of the Mortgage Loans has reduced the cash flow to the 2006-HE1 Trust, which has caused, and will continue to cause, substantial claims to be presented to FGIC under the Policy to cover these shortfalls. As of March 2012, approximately $98 million in claims had been presented to FGIC in connection with the 2006-HE1 Transaction. FGIC expects tens of millions of dollars more in claims to be presented to it under the 2006-HE1 Transaction in the future.

144. As an increasingly high percentage of the 2006-HE1 Mortgage Loans enter delinquency and default, FGIC has uncovered a wealth of material breaches of GMACM's

representations and warranties regarding the characteristics of the loans and the standards to which they were underwritten.

(1) Breaches Identified Through Initial Review

145. When FGIC became concerned about the high delinquencies and default rates in the 2006-HE1 Transaction, FGIC requested that GMACM provide it with certain Mortgage Loan files underlying the 2006-HE1 Transaction.

146. FGIC selected for review 121 non-performing (*i.e.*, non-current or charged-off) loans that had resulted in a loss to the 2006-HE1 Trust. To perform this review, FGIC hired an independent outside consultant with particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

147. That review revealed that GMACM had breached one or more material representations and warranties on 103 of the 121 loans, or approximately 85% of the loans reviewed.

148. A small sample of these material breaches and underwriting violations are listed below:

- Loan Number 8253418290: due to an undisclosed second mortgage, the loan closed with a CLTV of 148.77%. In order for this mortgage loan to have been eligible for inclusion in the 2006-HE1 pool, the relevant guidelines for the particular type of loan underwritten permit a maximum CLTV ratio of 100%.

- Loan Number 8255068044: due to an income misrepresentation, the loan closed with a DTI of 106.49%. In order for this mortgage loan to have been eligible for inclusion in the 2006-HE1 pool, the relevant guidelines for the particular type of loan underwritten permit a maximum DTI ratio of 50%.

- Loan Number 8259971235: the borrower had a payment history evidencing multiple delinquencies on a prior loan within the prior year and the loan closed with a DTI of 58.83%. In order for this mortgage loan to have been eligible for inclusion in the 2006-HE1 pool, the relevant guidelines for the particular type of loan underwritten require that the borrower have made no late payments on any prior loans within the

twelve month period preceding the date of the mortgage loan. Further, the relevant guidelines permit a maximum DTI ratio of 50%.

- Loan Number 8601459619: the borrower never made a single payment on the loan and it was therefore delinquent at the time it was transferred to the 2006-HE1 Trust. GMACM represented and warranted to FGIC that no mortgage loan was 30 days or more delinquent in payment of principle or interest at the time of payment.

- Loan Number 8655697712: the loan closed with a DTI of 69.30% and a CLTV of 88.84%. In order for this mortgage loan to have been eligible for inclusion in the 2006-HE1 pool, the relevant guidelines for the particular type of loan underwritten permit a maximum DTI of 45% and a maximum CLTV of 85%.

149. These examples of underwriting violations—but a small smattering of the extensive defects among the Mortgage Loans—evidence significant breaches of the MLPA, under which GMACM represented and warranted that (i) the information set forth in the Mortgage Loan Schedule is true and correct in all material respects; (ii) no Mortgage Loan was 30 days or more delinquent as of March 1, 2006; (iii) each Mortgage File contains all required documents and instruments; (iv) the CLTV of each Mortgage Loan did not exceed 100%; and (v) GMACM selected the Mortgage Loans in accordance with its underwriting guidelines (*i.e.* the Home Equity Loan Program). *See* MLPA § 3.1. It is reasonable to conclude—based on what is now known by FGIC and as a result of what is being wrongly withheld from FGIC—that a substantial majority of the 27,400 initial and pre-funded Mortgage Loans (amounting to over $1.2 billion) held by the 2006-HE1 Trust, and the approximately 13,300 Subsequent Mortgage Loans (amounting to over $600 million), evidence similar breaches of GMACM's representations and warranties.

150. Following the discovery of these high defect rates and pursuant to the I&I Agreement and the MLPA, FGIC demanded that GMACM repurchase the non-compliant Mortgage Loans discovered during its repurchase review. GMACM has expressly refused to

repurchase a substantial number of non-conforming Mortgage Loans. This failure constitutes a material breach of the I&I Agreement and Operative Documents incorporated therein.

151. Moreover, on information and belief, GMACM is and has been aware that many of the Mortgage Loans, whether acquired at the closing or thereafter, were nonconforming and, thus, in breach of its own representations and warranties. Despite this knowledge, GMACM has failed to repurchase the nonconforming loans with conforming loans, as is required under the Operative Documents.

(2) Breaches Identified Through Additional Review

152. In 2010, as the 2006-HE1 Transaction continued to perform poorly, FGIC again retained a professional mortgage loan review team to identify, review, and evaluate a statistically significant sample of mortgage loans in the 2006-HE1 Transaction.

153. FGIC's independent loan consultant reviewed the 257 loan files FGIC did receive from GMACM. That review revealed that GMACM had breached one or more material representations with respect to 245, or an astounding 95%, of these loans.

154. Based on the information gathered from this random sample review, FGIC estimates a Transaction-wide defect rate as high as 88%.

(3) GMACM's Pervasive and Material Breaches of Its Representations and Warranties and Affirmative Covenants

155. As indicated above, FGIC ultimately obtained access to 378 Mortgage Loan files (the 121 files FGIC initially reviewed, as well as the 257 files it belatedly received from GMACM) which FGIC's independent consultant reviewed to evaluate and re-underwrite the Mortgage Loans. These reviews revealed that GMACM breached one or more material representations with respect to 348—approximately 92%—of the Mortgage Loans reviewed.

156. Moreover, despite its express obligations under the MLPA and the I&I Agreement, GMACM continues to refuse to repurchase or cure over 300 of the 348 non-compliant and defective loans that FGIC has asked GMACM to repurchase.

157. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicate the clear breach of GMACM's contractual representations, warranties and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans, including the guidelines to which the Mortgage Loans were underwritten. Specifically, GMACM has breached representation and warranties stating, for the 2006-HE1 Transaction, that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (*i.e.* the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of GMACM in the Operative Documents (including each representation and warranty in the MLPA) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- no Mortgage Loan was 30 days or more delinquent as of March 1, 2006 (or the date the loan was transferred to the 2006-HE1 Trust);
- each Mortgage File contains all required documents and instruments;
- the CLTV of each Mortgage Loan did not exceed 100%; and
- GMACM selected the Mortgage Loans in accordance with its underwriting guidelines (*i.e.* the Home Equity Loan Program).

158. Moreover, the true scope of the material underwriting failures is unknown given GMACM's refusal to provide FGIC with pertinent—and contractually required—information. This refusal in itself constitutes a breach of GMACM's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

(4) GMACM's Denial of Loan File Requests

159. As the 2006-HE1 Transaction continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blashko, a GMACM/ResCap employee GMACM via e-mail demanding that GMACM provide additional Mortgage Loan files to FGIC, including origination files, servicing notes, and custodian files, for a random sample of 431 2006-HE1 loans. Having received no response from GMACM to its earlier requests, FGIC sent a follow-up e-mail on February 3, 2011, regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information and belief, the request required authorization from officers at Ally Financial, and GMACM/ResCap's response was directed by officers at Ally Financial.

160. On February 14, 2011, and again on April 26, 2011, FGIC sent further follow-up letters requesting loan files.

161. In finally responding to FGIC's request for information, GMACM refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans"). Instead, it only provided FGIC with a small sampling (257 of 431) of the requested loan files, consisting largely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

162. Pursuant to the Servicing Agreement and the I&I Agreement, FGIC is entitled to reasonable access to the documentation regarding all of the Mortgage Loans. Section 2.02(p) of the I&I Agreement provides that "FGIC shall have the right, so long as any of the 2006-HE1 Notes remains outstanding, to conduct an ongoing review of GMACM's practices as Servicer through reviews of the Mortgage Loans . . . ." Notably, there is no limitation in the I&I

Agreement as to the nature of the Mortgage Loans files that are subject to review. Further, Section 2.02(c)(v) of the I&I Agreement states that "[p]romptly upon request," GMACM must provide to FGIC "such other data as [FGIC] may reasonably request relating to the Mortgage Loans . . . ."

163. On April 26, 2011, having still received none of the remaining performing 2006-HE1 Mortgage Loan files it requested, FGIC sent a further letter requesting the remaining loan files. To date, GMACM has not responded.

164. By producing only non-performing Mortgage Loan files, in contravention of the I&I Agreement, GMACM has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

(5) GMACM's Denial of Servicing Notes

165. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(iv) of the I&I Agreement, that GMACM furnish or cause to furnish the servicing notes for the Mortgage Loans.

166. GMACM, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to requests for servicing notes.

(6) GMACM's Denial of FGIC's Access to Books and Records, Servicing Officer, and GMACM's Independent Accountants

167. On November 21, 2011, in accordance with its express rights under Sections 2.02(e)(i),(ii), (iii) of the I&I Agreement, FGIC requested to (i) inspect the books and records of GMACM; (ii) discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and (iii) discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

168. To date, GMACM has failed to respond to this request, in violation of the I&I Agreement.

G. Ally Bank's Breaches of the Custodial Agreement

169. Under the Custodial Agreement, to which FGIC is an express third party beneficiary, *see* Custodial Agreement § 5.6, and through which Ally Bank received substantial fees, Ally Bank undertook several obligations to FGIC concerning the manner in which Ally Bank would ensure that the Mortgage Loans contained complete and accurate information and that GMACM was in compliance with its representations and warranties regarding the origination, selection, and characteristics of those loans.

170. Ally Bank agreed that it would "hold the Mortgage Notes and any Loan Agreement relating to any Subsequent Mortgage Loan," and that it would review the Mortgage Notes and deliver to FGIC a certification of "the completeness of the receipt of the Mortgage Notes." Custodial Agreement §§ 2.1, 2.2.

171. Ally Bank further agreed to notify FGIC of breaches of the MLPA by GMACM, by providing that: "Upon discovery by the Custodian of a breach of any representation or warranty made by [GMACM] in the Purchase Agreement . . .with respect to a Mortgage Loan . . . the Custodian shall give prompt written notice to [FGIC]." Custodial Agreement § 2.3.

172. An initial review of a small percentage of defective Mortgage Loans has revealed that in many instances the Mortgage Note was not included in the loan file. The lack of a Mortgage Note within a particular file constitutes a breach of the representations and warranties given by GMACM in the MLPA. Ally Bank should have been aware of the fact that Mortgage Notes were missing from certain Mortgage Loan files, and that this was a breach of the MLPA representations and warranties. Consequently, it should have notified FGIC pursuant to its own obligations under the Custodial Agreement. *See* Custodial Agreement §§ 2.1-2.3. Ally Bank

has, however, failed to provide FGIC with any notices regarding defects in any Mortgage Loan file, and has further provided inaccurate and/or incomplete certifications regarding the Mortgage Loans, thereby breaching the Custodial Agreement to which FGIC is an express third party beneficiary.

173. Moreover, Ally Bank had an obligation to notify FGIC of any breach by GMACM of the MLPA representations and warranties that it discovered, not just those pertaining to the Mortgage Note. Since Ally Bank originated nearly 60% of the Mortgage Loans in the 2006-HE1 Transaction—which have suffered astounding defect rates—it must have been keenly aware of the breadth and scope of the underwriting failures with respect to those loans. Ally Bank, thus, must have known that GMACM was in breach of the representations and warranties in the MLPA, and its failure to so notify FGIC was a further breach of the Custodial Agreement.

H. GMACM's Fraud

174. The material breaches of GMACM's representations and warranties, including the extensive underwriting failures by GMACM, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants GMACM made to FGIC to induce its participation in the Transaction. The extraordinarily high defect and default rate among the Mortgage Loans demonstrates not merely that GMACM breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the Policy, it (GMACM) would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because GMACM refuses to provide all of the

requested Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

175. All of the Mortgage Loans underlying the 2006-HE1 Transaction were originated or acquired by GMACM. As such, GMACM had the access and ability to evaluate the Mortgage Loan files and to determine if the loans were in substantial compliance with the applicable GMACM underwriting guidelines and if the loans breached other representations and warranties made by GMACM.

176. To induce FGIC to enter into the 2006-HE1 Transaction, GMACM provided FGIC with a loan tape, which contained false and misleading information regarding, among other things, the CLTV ratios, DTI ratios, occupancy status and FICO scores of the borrowers.

177. In addition, GMACM made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the 2006-HE1 Trust. GMACM was well aware that FGIC would not agree to insure the 2006-HE1 Notes unless GMACM obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, GMACM provided Moody's and S&P with the same false information regarding the credit quality of the underlying Mortgage Loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2006-HE1 Notes that met FGIC's minimum requirements—Baa2 and BBB, respectively. In this way, GMACM made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that GMACM would pass on to FGIC, and second, by causing shadow ratings of the 2006-HE1 Notes to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

178. GMACM was well aware that FGIC would rely on the shadow ratings—prepared with information supplied by GMACM—as the I&I Agreement specifically contemplated as a condition to issuance of the Policy that FGIC "shall have received confirmation that the Notes insured by the Policy are rated" by S&P and Moody's at a specified minimum level "without regard to the Policy." I&I Agreement § 3.01(k).

179. As noted, the issuance of the Policy enabled the 2006-HE1 Notes to receive triple-A ratings from the rating agencies. Moreover, the receipt of a triple-A rating for the 2006-HE1 Notes, which depended on the issuance of the Policy, which in turn depended on the shadow ratings formulated using (inaccurate) information supplied by GMACM, was a critical component of the Transaction. As GMACM expressly noted in the Prospectus Supplements: "It is a condition to the issuance of the notes that they be rated 'Aaa' by Moody's . . . and 'AAA' by Standard & Poor's[.]" Prospectus Supplement at S-108.

180. Had the information provided to the ratings agencies by GMACM been accurate and truthful, Moody's and S&P would almost certainly have assigned a very different (and lower) shadow rating to the 2006-HE1 Transaction, and FGIC in turn would not have issued the Policy on the agreed terms, or would have refused to issue the Policy altogether.

181. GMACM also made material misrepresentations to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the guidelines under and standards to which the Mortgage Loans were underwritten.

182. For example, in the Prospectus Supplement (and in the I&I Agreement by incorporation) GMACM assured FGIC that the Mortgage Loans "were originated generally in accordance with the underwriting standards of GMAC Mortgage Corporation." Prospectus

Supplement at S-33, S-36. GMACM provided FGIC with GMACM's Underwriting Guidelines themselves, which contained extensive underwriting standards and requirements.

183. In fact, as confirmed by the overwhelming defect rates in the Loan Pool described above, all of which are due to Mortgage Loans that are inconsistent with GMACM's own underwriting guidelines, GMACM was well aware at the closing of the 2006-HE1 Transaction that those representations were false. In other words, at the time of the closing of the 2006-HE1 Transaction, GMACM either (1) knew or should have known that its representations were materially false because GMACM had not, among other things, determined if the Mortgage Loans were originated "generally in accordance" with its own underwriting guidelines, or (2) had reviewed whether the Mortgage Loans were originated "generally in accordance" with its underwriting guidelines, had determined that they were not, but nonetheless materially misrepresented to FGIC that the Mortgage Loans were originated "generally in accordance" with those guidelines.

184. Moreover, GMACM represented to FGIC that, in the case of each loan within the Loan Pool, an underwriter had made an assessment that the borrower had the ability to repay his or her loan, after receiving and reviewing all applicable employment, credit, and property information. In fact, GMACM was not verifying the ability of borrowers to repay their loans in compliance with its own underwriting guidelines accurately or at all. As a result, GMACM misrepresented facts that were uniquely within its knowledge.

185. Moreover, the MLPA (and the I&I Agreement by incorporation) contained other false and misleading representations about the Mortgage Loans. In particular, GMACM misrepresented that, as of the closing: (i) the information set forth in the Mortgage Loan Schedule is true and correct in all material respects; (ii) no Mortgage Loan was 30 days or more

delinquent as of March 1, 2006; (iii) each Mortgage File contains all required documents and instruments; (iv) the CLTV of each Mortgage Loan did not exceed 100%; and (v) GMACM selected the Mortgage Loans in accordance with its underwriting guidelines (*i.e.* the Home Equity Loan Program). The true information regarding these loans—as known by GMACM—simply could not substantiate GMACM's assurances. In short, no amount of GMACM promising that the loans met certain standards, despite knowing otherwise, actually made those promises true.

186. GMACM knew that its representations were materially false and that these false representations were essential to FGIC's decision to issue the Policy. GMACM intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and to issue the Policy.

187. GMACM knew when making the representations and warranties regarding the Mortgage Loans to FGIC prior to FGIC agreeing to issue the Policy that GMACM never intended to honor those representations and warranties, as is evidenced, *inter alia*, by the extraordinary breadth and depth of the problems FGIC has uncovered with respect to the underwriting and characteristics of those loans, and the poor performance of the 2006-HE1 Trust. In short, in order to induce FGIC to issue the Policy, GMACM represented to FGIC that, if FGIC issued the Policy, GMACM would comply with its contractual representations and warranties, despite knowing that it had not complied—and would not comply—with those very same obligations.

188. GMACM's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC, including the receipt of a subpoena served in connection with GMACM's

suspected fraudulent origination and underwriting practices, as well as to a multitude of suits and the potential for more litigation to come.

189. Consistent with this pattern of behavior, GMACM defrauded FGIC into issuing the Policy, through its knowing misrepresentations.

I. Ally Bank Aids and Abets GMACM's Fraud

190. Ally Bank provided substantial assistance to GMACM in fraudulently inducing FGIC to issue the Policy. In its role as Custodian—for which it received substantial fees—Ally Bank undertook to provide "prompt written notice" to FGIC of any breaches of the representations and warranties in the MLPA that it discovered. The MLPA, *see supra* at ¶ 94, contained several representations and warranties regarding the characteristics of the underlying Mortgage Loans as well as loans subsequently transferred to the 2006-HE1 Trust.

191. As an originator of nearly 60% of the Mortgage Loans, Ally Bank was well aware of the true nature of the Loan Pool. Moreover, as a result of being a key part of the 2006-HE1 Transaction and its affiliate status with GMACM, Ally Bank must have been aware of the representations and warranties GMACM routinely made to financial guaranty insurers—and did make here to FGIC—regarding the nature of GMACM's business practices and the quality of the mortgage loans that collateralized its many RMBS transactions, including the 2006-HE1 Transaction.

192. Against this backdrop, Ally Bank represented to FGIC that, if the 2006-HE1 Transaction was consummated, it (Ally Bank) would hold and monitor certain key information and documentation regarding the Mortgage Loans, and would provide notice to FGIC of any breaches by GMACM of which it was aware with respect to GMACM's representations and warranties to FGIC. As must have been known to Ally Bank, those representations and warranties made by GMACM directly concerned the Mortgage Loans, including the 60% of

them that Ally Bank itself had originated. Ally Bank made these representations to FGIC with full knowledge that GMACM had not complied—and would not comply—with its relevant representations and warranties, and, accordingly, that they were false. By representing to FGIC that it would (a) hold and certify the accuracy of certain key information and documentation regarding the Mortgage Loans, the majority of which it had originated itself, and (b) inform FGIC of any failure by GMACM to comply with its obligations, Ally Bank materially aided GMACM's fraudulent inducement of FGIC to issue the Policy. The issuance of the Policy, which made the 2006-HE1 Transaction possible, inured to the significant financial benefit of Ally Bank, given that it collected substantial fees as Custodian and also perpetuated the market for its loan origination and sales business.

J. Ally Financial Aids and Abets GMACM's Fraud

193. Ally Financial provided substantial assistance to GMACM in fraudulently inducing FGIC to issue the Policy. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties GMACM made regarding the nature of GMACM's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

K. The Managed Amortization Event

194. As discussed below, under the plain language of the 2006-HE1 Transaction documents, GMACM failed to properly give effect to the existence of a "Managed Amortization Event." Accordingly, GMACM improperly added 12,712 new loans, having an aggregate principal amount of approximately $580 million, to the 2006-HE1 Trust through subsequent transfers.

(1) The Operative Documents Control the Occurrence of a Managed Amortization Event

195. Under the Operative Documents, GMACM, as Servicer of the 2006-HE1 Trust, is required to establish a Custodial Account in which it must deposit any payments made by borrowers on the Mortgage Loans (*i.e.*, the principal and interest payments made by mortgagors). *See* Servicing Agreement § 3.02(b).

196. Additionally, under the Operative Documents, the Indenture Trustee is required to establish a segregated trust account known as the Funding Account. *See* Servicing Agreement § 3.16(a). As Servicer of the 2006-HE1 Trust, GMACM is required, "on each Payment Date during the Revolving Period, . . . to withdraw from the Custodial Account and deposit into the Funding Account the aggregate amount of Principal Collections remaining after the purchase of all Additional Balances or Subsequent Mortgage Loans on or prior to such Payment Date." Servicing Agreement § 3.16(a).

197. A revolving period, in the context of a securitization, is generally the time during which cash available to the trust may properly be reinvested in new collateral for the pool rather than being used to repay the securities. Under the Operative Documents for the 2006-HE1 Transaction, the Revolving Period was defined as: "the period beginning on the Closing Date and ending on the earliest of (i) the Payment Date occurring in September 2007, (ii) the occurrence of a Managed Amortization Event or (iii) the occurrence of a Rapid Amortization Event." Indenture, Appendix A. As further described below, a "Managed Amortization Event" was defined as a period beginning on the first date when the balance of the particular account from which cash available to the trust may properly be reinvested in new loans for the pool, for any reason, exceeds a specified amount. *See id.*

198. In the 2006-HE1 Transaction, during the Revolving Period, GMACM could use the funds in the Funding Account, subject to certain conditions, to purchase:

> Subsequent Mortgage Loans that are HELOCs, if any, in an amount equal to (1) the aggregate Principal Balance of all such Subsequent Mortgage Loans purchased from such Seller during the related Collection Period or (2) if the Servicer has applied amounts on deposit in the Custodial Account representing Principal Collections for such Collection Period toward the purchase of Subsequent Mortgage Loans that are HELOCs, the excess if any, of the aggregate Principal Balance of all such Subsequent Mortgage Loans purchased from such Seller over such Principal Collections.

Servicing Agreement § 3.16(c)(i)(B).

199. In consideration for the payment of funds from the Funding Account, the Operative Documents require that the seller from whom the new loans are purchased transfer the new loans into the 2006-HE1 Trust. *See* MLPA § 2.2(a). The MLPA also requires GMACM to deliver to FGIC, within five days after the transfer, a copy of the Mortgage Loan Schedule reflecting the Subsequent Mortgage Loans in electronic format. *See* MLPA § 2.2(c). Further, if a Subsequent Mortgage Loan is outside certain criteria, GMACM is required to seek and obtain FGIC's agreement to the transfer of the mortgage loan to the 2006-HE1 Trust as a Subsequent Mortgage Loan, subject to certain conditions, including that GMACM must increase the over-collateralization amount for 2006-HE1 Trust in order to reduce FGIC's potential exposure. *See* MLPA § 2.2(d).

200. Significantly, GMACM may transfer Subsequent Mortgage Loans only if "the Revolving Period shall not have terminated." MLPA § 2.2(b)(v). The Revolving Period ends, *inter alia*, upon "the occurrence of a Managed Amortization Event." Indenture, Appendix A.

201. A Managed Amortization Event, as defined in the current version of the Indenture, is "deemed to occur if . . . for any three month consecutive period, the average of the daily

balances on deposit in the Funding Account for such three consecutive months is greater than $10,000,000." Indenture, Appendix A.

(2) The Initial Managed Amortization Event Definition

202. The currently operative version of the Managed Amortization Event definition was included in the Indenture in or around May 2006—approximately six weeks after the initial closing date of the 2006-HE1 Transaction.

203. At the closing of the 2006-HE1 Transaction on March 30, 2006, the Prospectus Supplement issued by GMACM in conjunction with the offering of the 2006-HE1 Notes and dated March 29, 2006, defined a Managed Amortization Event as "the event deemed to occur on any date on which the amount on deposit in the Funding Account equals or exceeds $10,000,000." Prospectus Supplement at S-64. As relevant here, then, the Operative Documents strictly limited the transfer of Subsequent Mortgage Loans to the 2006-HE1 Trust by creating an iron-clad requirement: that the Revolving Period shall not have terminated due to a Managed Amortization Event having been triggered by the Funding Account having a balance of greater than $10,000,000.

204. In April 2006, the Funding Account held an ending balance of nearly $15,000,000. As such, under the then-operative definition, a Managed Amortization Event would have been triggered almost as soon as the 2006-HE1 Transaction closed. FGIC was not aware, and GMACM did not provide notice, of the fact that the Managed Amortization Event had been triggered. Accordingly, GMACM has breached the I&I Agreement sections 2.02(a).

(3) GMACM Changes the Managed Amortization Event Definition After a Managed Amortization Event Has Already Occurred

205. Sometime in or around late April to early May 2006, GMACM approached FGIC in an effort to change the definition of Managed Amortization Event under the Operative

Documents. Ultimately, FGIC agreed to GMACM's proposed change, as reflected in Appendix A to the Indenture, such that the Managed Amortization Event was deemed triggered "if, beginning in June 2006, for any three month consecutive period, the average of the daily balances on deposit in the Funding Account for such three consecutive months is greater than $10,000,000." Although GMACM never executed a formal amendment to the Operative Documents, and did not obtain the consent of either the relevant credit rating agencies or the Indenture Trustee, the altered Indenture, together with its Appendix A containing the governing definitions, was filed with the SEC on or about May 17, 2006, and is dated "as of March 30, 2006 [i.e., the closing date]."

206. Assuming that the revised definition was operative on or about May 17, 2006, the Operative Documents still strictly limit the transfer of Subsequent Mortgage Loans to the 2006-HE1 Trust, although the altered—but still inflexible—requirement is that the Revolving Period shall not have terminated due to a Managed Amortization Event having been triggered by the existence of a three-consecutive-month period in which the Funding Account held an average daily balance of greater than $10,000,000.

(4) A Managed Amortization Event Occurs Under GMACM's Modified Definition

207. In the three-consecutive-month period from May 2006 to July 2006, the Funding Account held an average daily balance of greater than $10,000,000, such that a Managed Amortization Event was deemed to have occurred as of July 2006.

208. Accordingly, by operation of clear and express provisions in the Operative Documents, the Revolving Period automatically (and without the need for any action by any party) ended at the time that such Managed Amortization Event occurred. Once the Revolving Period ended, GMACM was prohibited from transferring any new loans to the 2006-HE1 Trust.

209. Notwithstanding this fact, GMACM failed to calculate and give effect to the fact that a Managed Amortization Event had occurred in July 2006, ending the Revolving Period, and continued to improperly transfer Subsequent Mortgage Loans into the 2006-HE1 Trust. *See* MLPA § 2.2(b)(v); Indenture, Appendix A.

210. Notwithstanding the termination of the Revolving Period, GMACM improperly sold and added to the 2006-HE1 Trust, through fifteen (15) Subsequent Transfers, an aggregate principal amount of $578,445,325.61 in improper Subsequent Mortgage Loans.

211. The below table sets forth the amount of principal balance in each of the fifteen (15) improper Subsequent Transfers that GMACM effected:

Month	Subsequent Transfer Amount ($)
Jul-06	32,099,929.96
Aug-06	37,199,985.80
Sep-06	38,299,997.82
Oct-06	42,999,999.71
Nov-06	37,499,997.95
Dec-06	27,101,022.31
Jan-07	53,937,029.04
Mar-07	67,749,920.19
Apr-07	44,924,807.40
May-07	36,359,900.58
Jun-07	34,560,875.41
Jul-07	36,821,863.84
Aug-07	33,499,999.50
Sep-07	29,099,337.99
Oct-07	26,290,658.11
Total	**578,445,325.61**

212. Further, the Subsequent Mortgage Loans transferred into the 2006-HE1 Trust have performed much worse than the initial and pre-funded Mortgage Loans. As of October 1, 2011, approximately 20% of the balance of the over $578 million in improperly transferred Subsequent Mortgage Loans has been charged-off, defaulted, or was severely delinquent, as

compared to approximately 12.7% of the balance of the earlier Mortgage Loans as of the same time period.

213. With respect to each Subsequent Transfer for which FGIC received the required Subsequent Transfer Agreement, GMACM restated therein all applicable representations and warranties regarding the mortgage loans and that it was complying with the requirements of the Operative Documents, including that its actions were not in contravention of any of those agreements. GMACM further certified that it had satisfied each condition precedent to effecting a Subsequent Transfer even though this was untrue as the occurrence of a Managed Amortization Event in July 2006 had ended the Revolving Period and precluded any Subsequent Transfers.

214. In short, Subsequent Mortgage Loans were improperly transferred to the 2006-HE1 Trust despite the fact that a Managed Amortization Event had already triggered the termination of the Revolving Period. GMACM had no authority to execute such transfers. As such, under the express terms of the Operative Documents, the subsequently transferred loans were not properly transferred to the 2006-HE1 Trust in accordance with the terms of the 2006-HE1 Transaction, constituting yet another breach of the I&I Agreement. Moreover, the Subsequent Transfer Agreements, which were executed by GMACM and purported to permissibly transfer Subsequent Mortgage Loans to the 2006-HE1 Trust, were improper on their face due to the occurrence of the Managed Amortization Event prohibiting any subsequent transfers of Mortgage Loans. Consequently, GMACM committed multiple breaches of representations and warranties made in the MLPA stating that all Subsequent Transfer Agreements are valid and that their execution does not constitute a material breach of any agreements to which GMACM is a party. *See* MLPA § 3.1(a)(iv),(vii). Pursuant to the terms of the I&I Agreement, because GMACM has breached multiple representations and warranties

contained in section 3.1 of the MLPA, GMACM is obligated to repurchase all Subsequent Mortgage Loans improperly transferred to the 2006-HE1 Trust. *See* I&I Agreement § 2.01(l).

L. GMACM's Breach of Obligations as Servicer

215. GMACM, as Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for the 2006-HE1 Transaction, including, but not limited to, its obligations to follow proper servicing procedures.

216. GMACM took responsibility for the servicing of the Mortgage Loans and had certain related contractual obligations under the I&I Agreement and the Servicing Agreement with respect to the 2006-HE1 Transaction. Under the I&I Agreement, GMACM covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the [Servicing Agreement]." I&I Agreement § 2.02(l). Under the Servicing Agreement, GMACM is liable to FGIC for the servicing and administering of the Mortgage Loans, and in doing so is required to "follow such collection procedures as shall be normal and usual in its general mortgage servicing activities and consistent with the procedures the Servicer employs in servicing all other Mortgage Loans in the servicing portfolio with characteristics similar to those of the Mortgage Loans." Servicing Agreement §§ 3.02(a), 6.01.

217. During 2007, the servicing operations of GMACM were integrated into ResCap. Since the time of the integration, on information and belief, GMACM breached these obligations by, among other things, being deficient in its borrower contact, collections, and loss mitigation standards, and by failing to honor FGIC's contractual rights to information. In particular, an onsite review of the Ally Financial servicing arm's headquarters, including those of GMACM, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis, revealed *inter alia*: (i) inadequate call center staffing—staffing unable to handle increased incoming and outgoing

call volumes; (ii) call center staffing turnovers as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when GMACM does not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; and (v) severely infrequent use of alternative loss mitigation strategies as compared to the industry GMACM, as servicer, also had an obligation to notify FGIC of any material breaches of representations and warranties, and to cause GMACM, as seller, to repurchase the affected Mortgage Loans.

218. On information and belief, GMACM has failed to remedy any of its deficient servicing practices.

219. In addition, GMACM disclosed to FGIC for the first time in March 2009 that it classified loans into one of three categories or "Risk Tiers" under a servicing protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

220. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. GMACM disclosed to FGIC that all of the mortgage loans in FGIC-insured, GMACM-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the 2006-HE1 Transaction, were placed in the lowest category of risk. For such mortgage loans, regardless whether they were (i) first- or second-lien, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities—all of which are factors that require more attentive

servicing—delinquent borrowers were called at a later stage of delinquency and less frequently than loans in higher risk categories. As the purchaser of the Mortgage Loans, however, GMACM clearly knew that such Mortgage Loans, by their very nature, required particularized servicing before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by GMACM to ensure that the Mortgage Loans were serviced and administered in accordance with "procedures as shall be normal and usual in its general mortgage servicing activities" constitutes a breach of the Servicing Agreement and the I&I Agreement. *See* Servicing Agreement §§ 3.02(a), 3.04; I&I Agreement § 2.02(l).

221. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, GMACM has failed to provide such information in breach of Section 2.02(c)(v) of the I&I Agreement.

M. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

222. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns GMACM and RFC. Ally Financial—as the ultimate parent of ResCap, GMACM, Ally Bank, and RFC—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC.

223. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC. Ally Financial exercised its direction and control in connection with the 2006-HE1 Transaction. At times, Ally

Financial performed such direction and control by using ResCap as an instrument to effect its goals.

224. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries." *See In re Ally Fin. Inc.*, FRB Docket Nos. 11020-B-HC & 11020-B-DEO, FDIC-11-123b (April 13, 2011) (emphasis added).

225. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of GMACM Directly and Indirectly Through its Control of ResCap

226. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

227. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

228. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

229. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement").

230. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

231. On December 1, 2006, Ally Financial had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

232. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[1] Since incorporation, the ownership of ResCap has not changed—Ally Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

233. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial and ResCap shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the proposed 2005 operating agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement") (emphasis added).

234. Moreover, on April 26, 2007, "ResCap Investor Relations" announced the release of Ally Financial's 2007 first quarter financial results to investors in an email bearing the ResCap logo. That announcement stated that Ally Financial's financial results were found on both Ally Financial's and ResCap's websites.

---

[1] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the SEC on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

235. Moreover, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, and RAMP, among other Ally Financial subsidiaries.

236. Similarly, as noted above, William F. Muir, Ally Financial's President, has also served as President and Chairman of the Board of IB Finance Holding Company, LLC—the direct parent of Ally Bank—and as a director of Ally Bank.

237. Ally Financial's domination and control of its subsidiaries, and in particular its use of ResCap to effectuate that control, is further evidenced by John Ruckdaschel, who, according to publicly available information, has served as in-house counsel at Ally Financial since October 2006. According to an e-mail sent from ResCap to FGIC, Ruckdaschel has served as "internal legal counsel for all [] securitizations" since at least May 2008. Although purportedly an Ally Financial employee, Ruckdaschel also sent and received e-mail using a ResCap e-mail address. Further, an employee of ResCap specifically instructed FGIC that all "official letters" regarding several Ally Financial subsidiaries—including GMACM, RAMP and others—should be sent not to the relevant (and supposedly independent) subsidiary, but rather to Ruckdaschel, Ally Financial's internal counsel. Additionally, Ruckdaschel received correspondence relating to the Operative Documents at issue in this Transaction.

238. As further evidence of Ally Financial's domination over ResCap, the 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

239. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand

behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

240. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part of our plan and a key part of our value creation." *Id.* (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

241. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citibank, which

provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept. 19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id.*

242. Indeed, Ally Financial's 2011 annual report states that "ResCap remains heavily dependent on [Ally Financial] and its affiliates for funding and capital support." Ally. Fin. Inc., Annual Report (Form 10-K), at 128 (Feb. 28, 2012).

243. Additionally, Annual Reports prepared by Ally Financial further note its pursuit of strategic alternatives with ResCap, and highlight the extent to which Ally Financial manipulated its control over its subsidiaries to enhance its own financial health. According to Ally Financial: "On December 31, 2009, we announced that due to our ongoing strategic review of how to best deploy GMAC's current and future liquidity, we decided to pursue strategic alternatives with respect to ResCap and committed to a plan . . . related to management's intent to sell certain ResCap related assets and businesses. . . . In order to maximize value, we will consider a variety of options including one or more sales, spin-offs, or other potential transactions . . . [that we believe] should minimize the impact of any significant future losses related to ResCap's legacy mortgage business . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3-4 (Feb. 26, 2010).

244. There is also substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

245. Further, Ally Financial has established a "Mortgage Repurchase Reserve" to account for the potentially significant liabilities stemming from repurchase demands made on its mortgage-related subsidiary business units. The balance of the Mortgage Repurchase Reserve was $825 million as of the fourth quarter of 2011. *See* Ally Financial's 4Q 2011 Earnings Presentation at 16. Although these repurchase demands are generally made on Ally Financial's subsidiaries—such as GMACM—in discussing the reserve on an earnings call, Ally Financial CFO Jim Mackey made clear that it was Ally Financial that was recording "repurchase expense[s]" related to mortgages, as he stated that Ally Financial "had lower mortgage repurchase expense of $44 million." Ally Financial's Q4 2011 Earnings Call at 4 (Feb. 2, 2012).

246. Similarly, in discussing Ally Financial's Mortgage Repurchase Reserve on Ally Financial's third quarter 2011 earnings call, Mackey further described losses attributable to mortgage loan repurchases as belonging to Ally Financial, when he stated: "Our mortgage repurchase reserve is [as it then stood] $829 million . . . . Our loss experience improved during the quarter due to the fact that we had fewer mortgage insurance rescission payments that we experienced last quarter and that did not repeat this quarter." Ally Financial's Q3 2011 Earnings Call at 6 (Nov. 2, 2011) (emphases added). On the same call, Ally Financial CEO Carpenter explained that "we have routinely repurchased problem loans voluntarily and by contract . . . ." *Id.* at 8 (emphasis added).

247. Additionally, as discussed above, Ally Financial recorded a $230 million charge in the fourth quarter of 2011, $212 million of which was recorded at its controlled subsidiary, ResCap. As a result of the penalties assessed against ResCap by government regulators, and the fact that ResCap failed to maintain sufficient tangible net worth to comply with the requirements of the terms of certain credit facilities, Ally Financial propped up its subsidiary ResCap with a

$197 million capital contribution in the form of intercompany debt forgiveness. *See* Ally Fin. Inc., Form 10-K, at 31-32 (Feb. 28, 2012).

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

248. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited March 27, 2012).

249. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured, including this Transaction. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

250. The origination and securitization of mortgage loans by ResCap and its subsidiaries have long been integral parts of Ally Financial's core business. In its 2006 Annual Report, Ally Financial (then reporting as GMAC LLC) stated that "[w]e are a leading real estate finance company focused primarily on the residential real estate market. Our business activities

include the origination, purchase, servicing, sale and securitization of residential mortgage loans." GMAC LLC, Annual Report (Form 10-K), at 3 (Mar. 13, 2007) (emphasis added). Ally Financial further stated that "we utilize asset and mortgage securitizations and sales as a critical component of our diversified funding strategy." *Id.* at 5 (emphasis added).

251. Ally Financial continued to publicly report on its own business and that of its subsidiaries in later filings on an integrated basis: "We engage in the origination, purchase, servicing, sale, and securitization of consumer (i.e., residential) mortgage loans and mortgage-related products. Mortgage operations include the Residential Capital, LLC (ResCap) legal entity, [and] the mortgage operations of Ally Bank . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3 (Feb. 26, 2010). More recently, continuing to discuss its various mortgage operations as a single enterprise, Ally Financial stated that "[o]ur Origination and Servicing operations is one of the leading originators of conforming and government-insured residential mortgage loans in the United States. We are one of the largest residential mortgage loan servicers in the United States and we provide collateralized lines of credit to other mortgage originators." Ally Fin. Inc., Annual Report (Form 10-K), at 4 (Feb. 28, 2012).

252. Moreover, as discussed above, Ally Financial—at least in the view of certain of ResCap's bondholders—is believed to have stripped assets from its subsidiary.

253. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed GMACM and RFC as part of its own business. For example, in its investor presentation from 2007, ResCap declares that GMACM and RFC "are owned and *operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally

Financial was not directly controlling GMACM and RFC, it was using ResCap as an instrument to do so.

254. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

255. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one GMACM has with respect to the 2006-HE1 Transaction as Servicer.

256. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in

ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

257. In another example, Larry Hipp, a member of ResCap's Risk Analyst/Investor Repurchase Department, communicated with FGIC regarding rescission requests using an Ally Financial email address, but in those very same emails, lists his ResCap contact information, including a ResCap email address. In addition, Ally Financial/ResCap used to send FGIC secure communications bearing a "GMAC ResCap" header, but those secure communications now have an Ally Financial header.

258. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

> Q: Could you please state your name for the record.
> A: My name is Jeffrey Stephan.
> Q: Okay. And who do you work for?
> A: GMAC, LLC [Ally Financial].
> Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
> A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
> Q: Okay.
> A: It's GMCA [sic] Mortgage Corporation.
> Q: Okay.
> A: I'm not sure how you would word that.
> Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
> A. Yes.
> Q. -- that formerly existed?
> A. Yes.
> Q. So these entities no longer currently exist?

A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

N. FGIC's Contractual Remedies Under The I&I Agreement

259. The I&I Agreement provides FGIC with broad remedies for GMACM's breaches of its representations and warranties. The breadth of these remedies provided further material inducement for FGIC to issue the Policy. Specifically, Section 5.02(b) of the I&I Agreement provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this Insurance Agreement, the Indenture or the other Operative Documents, or existing at law or in equity.

260. Moreover, the I&I Agreement provides that, upon an "Event of Default" – which is defined to include when "[a]ny representation or warranty" by GMACM in the I&I Agreement or the Operative Documents is materially untrue or incomplete – FGIC can "take whatever action at law or in equity as may appear necessary or desirable in its judgment to collect the amounts, if any, then due under [the I&I Agreement] or any other Operative Document or to enforce performance and observance of any obligation, agreement or covenant of [GMACM]." I&I Agreement §§ 5.01(a), 5.02(a).

261. In addition, GMACM agreed in Section 3.04(a) of the I&I Agreement:

> to pay, and to protect, indemnify and save harmless [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages costs or expenses (including reasonable fees and expenses of attorneys . . .) of any nature arising out of or relating to the breach

> by GMACM of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the Transaction contemplated by the Operative Documents . . . .

I&I Agreement § 3.04(a).

262. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, GMACM agreed to repurchase or substitute Mortgage Loans that did not conform to GMACM's representations and warranties, and to indemnify FGIC for claims and losses arising from GMACM's breach of any representation or warranty. *See* I&I Agreement §§ 3.03(b), 3.04(a).

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Declaratory Relief Regarding GMACM's Indemnification Obligations)

263. FGIC re-alleges and incorporates by reference paragraphs 1 through 262 of this Amended Complaint.

264. The I&I Agreement is a valid and binding agreement between the parties.

265. FGIC has performed its obligations under the I&I Agreement.

266. GMACM's representations and warranties were material to FGIC's decision to insure the 2006-HE1 Notes and to issue the 2006-HE1 Policy.

267. GMACM's pervasive and material breaches of its representations and warranties, from the very inception of the Transaction and in the years since, constitute a material breach of the I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

268. Pursuant to Section 3.04(a) of the I&I Agreement, GMACM must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or related to the

transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by GMACM of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

269. As explained above, GMACM has breached numerous representations, warranties, and covenants in the 2006-HE1 Offering and Operative Documents. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

270. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

271. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM must jointly and severally indemnify and reimburse FGIC for all sums arising out of the 2006-HE1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2006-HE1 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2006-HE1 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

272. In addition, FGIC seeks a declaration that GMACM must indemnify FGIC for all sums arising out of the 2006-HE1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2006-

HE1 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2006-HE1 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Fraudulent Inducement — I&I Agreement)

273. FGIC re-alleges and incorporates by reference paragraphs 1 through 272 of this Amended Complaint.

274. GMACM induced FGIC to enter into the I&I Agreement and to issue the Policy by making false representations and warranties about its business practices and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

275. As explained above, GMACM knowingly made materially false statements to FGIC, and/or omitted material facts from its statement to FGIC, with the intent to induce reliance by FGIC.

276. GMACM intended for FGIC to rely on GMACM's material false statements and/or omissions. FGIC had no reason to believe that GMACM's representations were false, and reasonably and justifiably relied on GMACM's material false statements and/or omissions regarding information uniquely in the possession of GMACM when it decided to enter into the I&I Agreement and to issue the Policy for the 2006-HE1 Notes.

277. As a result of GMACM's material false statements and material omissions from its statements, FGIC entered into the I&I Agreement, issued the Policy, and thereby agreed to

insure Notes backed by a pool of Mortgage Loans that was, in actuality, materially different from the Loan Pool that GMACM represented would collateralize the 2006-HE1 Transaction.

278. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

279. As a result of GMACM's material false statements and material omissions from its statements, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

280. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

281. Alternatively, GMACM is liable for such damages.

THIRD CAUSE OF ACTION

**(As Against Ally Financial and Ally Bank:
Aiding and Abetting Fraudulent Inducement — I&I Agreement)**

282. FGIC re-alleges and incorporates by reference paragraphs 1 through 281 of this Amended Complaint.

283. As explained above, Ally Financial provided substantial assistance to its subsidiary GMACM in fraudulently inducing FGIC to issue the Policy.

284. GMACM could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

285. Ally Financial knew that GMACM fraudulently induced FGIC to issue the Policy for the 2006-HE1 Transaction.

286. Ally Financial's statements materially aided GMACM's fraudulent inducement.

287. As a result of Ally Financial's aiding and abetting GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

288. Moreover, as explained above, Ally Bank provided substantial assistance to its affiliate GMACM in fraudulently inducing FGIC to issue the Policy.

289. Ally Bank originated nearly 60% of the Mortgage Loans (amounting to over $500 million in loans), which form a substantial part of the collateral for the 2006-HE1 Transaction. Ally Bank was therefore aware of the characteristics of the Loan Pool. Ally Bank was also an affiliate of GMACM and served as Custodian of the 2006-HE1 Transaction, for which it received substantial fees. As such, Ally Bank was aware of the material misrepresentations GMACM had made to FGIC to fraudulently induce FGIC to issue the Policy. Ally Bank further represented to FGIC that it would undertake duties to monitor and certify the accuracy and completeness of the Mortgage Loan files, as well as inform FGIC of failures by GMACM to comply with its obligations under the Operative Documents. Ally Bank made these representations to FGIC despite its knowledge that GMACM had not complied—and would not comply—with its representations and warranties.

290. Ally Bank's representations to FGIC materially aided GMACM's fraudulent inducement of FGIC to issue the Policy.

291. As a result of Ally Bank's aiding and abetting of GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

292. Ally Bank and Ally Financial are separately liable for their respective damages as set forth in this cause of action.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract—Representations, Warranties, and Affirmative Covenants)

293. FGIC re-alleges and incorporates by reference paragraphs 1 through 292 of this Amended Complaint.

294. The I&I Agreement is a valid and binding agreement between the parties.

295. FGIC has performed its obligations under the I&I Agreement.

296. As explained above, GMACM has materially breached its representations and warranties under Section 2.01 of the I&I Agreement.

297. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

298. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

299. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

300. Alternatively, GMACM is liable for such damages.

FIFTH CAUSE OF ACTION

(As Against Ally Bank: Breach of Custodial Agreement)

301. FGIC re-alleges and incorporates by reference paragraphs 1 through 300 of this Amended Complaint.

302. The Custodial Agreement is a valid and binding agreement between the parties thereto.

303. FGIC is an express third party beneficiary of the Custodial Agreement.

304. As explained above, Ally Bank has materially breached its obligations under Sections 2.1, 2.2, and 2.3 of the Custodial Agreement.

305. Ally Financial, acting directly and/or indirectly through ResCap, directed Ally Bank's actions as set forth in this cause of action.

306. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Repurchase Obligation)

307. FGIC re-alleges and incorporates by reference paragraphs 1 through 306 of this Amended Complaint.

308. The I&I Agreement is a valid and binding agreement between the parties.

309. FGIC has performed its obligations under the I&I Agreement.

310. Pursuant to the terms of the I&I Agreement, and the provisions of the MLPA incorporated therein, FGIC has demanded that GMACM repurchase non-complying Mortgage Loans. GMACM has refused to repurchase numerous such Mortgage Loans.

311. GMACM has breached the I&I Agreement, and the provisions of the MLPA incorporated therein, by failing to repurchase those Mortgage Loans that violated GMACM's representations and warranties that FGIC has noticed to GMACM.

312. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

313. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

314. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

315. Alternatively, GMACM is liable for such damages.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Material Breach of the Operative Documents — Indemnification for Improper Subsequent Transfers or, Alternatively, Declaration of Repurchase Obligation)

316. FGIC re-alleges and incorporates by reference paragraphs 1 through 315 of this Amended Complaint.

317. The I&I Agreement is a valid and binding agreement between the parties.

318. FGIC has performed its obligations under the I&I Agreement.

319. GMACM has breached the I&I Agreement, and the provisions of the MLPA and the Operative Documents incorporated therein, by executing improper Subsequent Transfers to the 2006-HE1 Trust despite the occurrence of a Managed Amortization Event having triggered the termination of the Revolving Period.

320. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

321. FGIC has been damaged in an amount to be proven at trial as a result of the improper transfer of Mortgage Loans to the 2006-HE1 Trust.

322. FGIC is entitled to indemnification for any claim it has paid or which it may be required to pay arising from a Subsequent Mortgage Loan that was improperly transferred to the 2006-HE1 Trust after the occurrence of a Managed Amortization Event triggered the termination of the Revolving Period.

323. FGIC therefore seeks a declaration that GMACM must reimburse and indemnify FGIC for all sums arising out of the 2006-HE1 Transaction for which FGIC has or will become liable and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented, as a result of the improper transfer of Subsequent Mortgage Loans to the 2006-HE1 Trust.

324. In the alternative, FGIC has been damaged in an amount to be proven at trial because it has paid or remains liable for certain claims arising from Subsequent Mortgage Loans that GMACM was obligated to repurchase as a result of their improper transfer to the 2006-HE1

Trust after the occurrence of a Managed Amortization Event (i) triggered the termination of the Revolving Period and (ii) invalidated all later Subsequent Transfer Agreements.

325. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

326. Alternatively, GMACM is liable for such damages.

EIGHTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract – Declaratory Relief Regarding Access to Information)

327. FGIC re-alleges and incorporates by reference paragraphs 1 through 326 of this Amended Complaint.

328. The I&I Agreement is a valid and binding agreement between the parties.

329. FGIC has performed its obligations under the I&I Agreement.

330. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, GMACM agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the 2006-HE1 Transaction. FGIC further has the right to conduct reviews of GMACM's practices as Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(p) of the I&I Agreement.

331. As discussed above, pursuant to the I&I Agreement, FGIC made numerous reasonable written requests that GMACM furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by GMACM, and others, concerning the Mortgage Loans.

332. GMACM has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

333. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

334. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, GMACM agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of GMACM; (ii) discuss the affairs, finances and accounts of GMACM with GMACM's Chief Financial Officer; and (iii) discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

335. On November 21, 2011, FGIC made a reasonable written request that GMACM permit FGIC or its authorized agent to conduct an inspection of the books and records of GMACM, as well as permit FGIC to (i) discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, and (ii) with GMACM's consent, which consent shall not be unreasonably withheld or delayed, discuss the affairs, finances, and accounts of GMACM with GMACM's independent accountants.

336. GMACM has failed to make available such persons or to produce such information.

337. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreement, Section 2.02(e)(i)-(iii).

338. Pursuant to Section 2.02(c)(v) of the I&I Agreement, GMACM agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [Servicing Agreement]."

339. FGIC made a reasonable request for servicing notes on December 9, 2010.

340. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

341. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

342. Accordingly, FGIC seeks a declaration that GMACM has failed to comply with Sections 2.02(c)(v), 2.02(e)(i)-(iii), and 2.02(p) of the I&I Agreement, and an order requiring GMACM to promptly remedy those breaches and therefore comply with FGIC's requests and notices to GMACM pursuant to the relevant provisions, as detailed above.

NINTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Servicer Obligations)

343. FGIC re-alleges and incorporates by reference paragraphs 1 through 342 of this Complaint.

344. The I&I Agreement is a valid and binding agreement between the parties.

345. FGIC has performed its obligations under the I&I Agreement.

346. Moreover, as explained above, GMACM has breached its affirmative covenant under the I&I Agreement to service all Mortgage Loans in all material respects in compliance with the Servicing Agreement.

347. GMACM's breaches of the I&I Agreement has caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on Policies and other losses and expenses.

348. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

349. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

350. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

351. Alternatively, GMACM is liable for such damages.

TENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Declaratory Relief)

352. FGIC re-alleges and incorporates by reference paragraphs 1 through 351 of this Complaint.

353. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this complaint.

354. For the reasons set forth in paragraphs 222 through 258, among others, Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other.

355. FGIC has been damaged as a result of the actions Ally Financial, ResCap and GMACM.

356. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other, and therefore are jointly and severally liable for each other's liabilities.

ELEVENTH CAUSE OF ACTION

(As Against GMACM: Attorneys' Fees and Costs)

357. FGIC re-alleges and incorporates by reference paragraphs 1 through 356 of this Amended Complaint.

358. The I&I Agreement is a valid and binding agreement between the parties.

359. FGIC has performed its obligations under the I&I Agreement.

360. Pursuant to Section 3.03(c) of the I&I Agreement, GMACM agreed to reimburse FGIC for any and all costs or expenses "including reasonable attorneys' . . . fees and expenses" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreement, GMACM agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or relating to the 2006-HE1 Transaction.

361. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of GMACM's failure to provide Mortgage Loan files, Servicing Reports, and financial information and its breach of the representations and warranties contained in Section 2.01 of the I&I Agreement and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreement.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant GMAC Mortgage Company, LLC, with respect to (1), (2), (4), (5), (6), and (8) through (17) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4), (5), (6), (8) through (14), (16) and (17), below, and in its favor and against Ally Bank, with respect to (3), (7), (16), and (17) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (6), (8) through (14), (16) and (17) below and the following relief:

(1) A declaration that, pursuant to GMACM's obligations under the I&I Agreement, GMACM must solely and/or Ally Financial, ResCap, and GMACM must jointly and severally reimburse and indemnify FGIC for all

sums arising out of the 2006-HE1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement: (i) for all sums it has paid to date under the Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and (iv) an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal, rescissory, equitable and punitive damages, to be proven at trial, for GMACM's fraudulent inducement of FGIC to enter into the 2006-HE1 Transaction and to issue the Policy;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's and Ally Bank's aiding and abetting of GMACM's fraudulent inducement of FGIC to enter into the 2006-HE1 Transaction and to issue the Policy;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for GMACM's material breaches of the 2006-HE1 Transaction;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for GMACM's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreement and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that GMACM must repurchase all Mortgage Loans that are in breach of GMACM's representations and warranties in the 2006-HE1 Transaction, and an order giving effect to that declaration;

(7) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for Ally Bank's material breaches of its obligations under the Custodial Agreement;

(8) Further or alternatively, a declaration that GMACM reimburse and indemnify FGIC for all sums arising out of the 2006-HE1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts due or claims that may be presented for payment by FGIC under the Policy as and when such sums

fall due or such claims are presented, as a result of Subsequent Mortgage Loans that were improperly transferred to the 2006-HE1 Trust, and an order giving effect to that declaration;

(9) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for GMACM's improper transfer of Subsequent Mortgage Loans to the 2006-HE1 Trust;

(10) Further or alternatively, a declaration that GMACM must repurchase the Mortgage Loans that were improperly transferred to the 2006-HE1 Trust, and order giving effect to that declaration;

(11) Further or alternatively, a declaration that GMACM must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2006-HE1 Transaction, and an order giving effect to that declaration;

(12) Further or alternatively, a declaration that GMACM must allow FGIC to inspect the books and records of GMACM, to discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, and to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants, and an order giving effect to that declaration;

(13) Further or alternatively, a declaration that GMACM must cause to be provided servicing notes for the 2006-HE1 Transaction when requested by FGIC;

(14) Further or alternatively, a declaration that Ally Financial, ResCap, and GMACM are alter egos of each other;

(15) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreement and other Operative Documents, as defined in the I&I Agreement;

(16) An award of prejudgment interest at the statutory rate; and

(17) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

Pursuant to 28 U.S.C. § 1441, Defendants Residential Capital, LLC ("Residential Capital") and Residential Funding Company, LLC ("Residential Funding") (collectively "Defendants") respectfully give notice of the removal this action, entitled *Financial Guaranty Insurance Company v. Ally Financial, Inc. F/K/A GMAC, LLC; Residential Capital, LLC F/K/A Residential Capital Corporation; Residential Funding Company, LLC F/K/A Residential Funding Corporation*, Index No. 653623/2011 (Supreme Court of the State of New York, County of New York), from the Supreme Court of the State of New York, County of New York, to the United States District Court for the Southern District of New York based upon the following grounds:

1. Upon information and belief, this action was commenced on or about December 27, 2011, in the Supreme Court of the State of New York, County of New York. A copy of the Summons and Complaint was served on Defendant Residential Capital's appointed agent, Corporation Service Company, on December 29, 2011. A copy of the Summons and Complaint was served on Defendant Residential Funding's appointed agent, Corporation Service Company, on December 29, 2011.

2. This Notice of Removal is being filed within thirty (30) days of the date Defendants' appointed agents received service of the Summons and Complaint. This Notice of Removal includes a short and plain statement of grounds for removal together with a copy of all process, pleadings, and orders served upon Defendants in this action attached hereto as Exhibit A.

3. This Court has original jurisdiction over this action under 28 U.S.C. § 1332(a) and this action may be removed to this Court by Defendants pursuant to 28 U.S.C. §

1441(a), in that it is a suit constituting a dispute between citizens of different states and the matter in controversy exceeds the sum of the value of $75,000, exclusive of interest and costs.

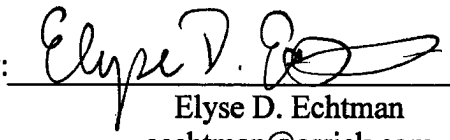
a. This suit constitutes a dispute between citizens of different states. As alleged in the Complaint, Plaintiff Financial Guaranty Insurance Company ("Plaintiff") is, and has been at all relevant times, a citizen of New York. Complaint ¶18. As of the date Plaintiff filed suit and currently, Defendant Residential Funding is a Delaware limited liability company. Complaint ¶20. The citizenship of a limited liability company is determined by the citizenship of its members. *Handelsman v. Bedford Vill. Assocs. Ltd. P'ship*, 213 F.3d 48, 51-52 (2nd Cir. 2000). Where the members are themselves limited liability companies, a court looks to the citizenship of their members, and continues this process until it reaches the ultimate incorporated or individual members. *See e.g., Quantlab Financial, LLC v. Tower Research Capital LLC*, 715 F.Supp.2d 542, 546-47 (S.D.N.Y. 2010); *Lindley Contours, LLC v. AABB Fitness Holdings, Inc.*, 414 Fed. Appx 62, 64 (9th Cir. 2011); *Onepoint Solutions, LLC, v. Borchert*, 486 F.3d 432, 347 n.4 (7th Cir. 2007). Residential Funding's sole member at all relevant times has been GMAC-RFC Holding Company, LLC, a Delaware limited liability company. GMAC-RFC Holding Company, LLC's sole member at all relevant times has been Residential Capital, LLC, a Delaware limited liability company. Residential Capital's sole member at all relevant times has been GMAC Mortgage Group LLC, a Delaware limited liability company. GMAC Mortgage Group LLC's sole member at all relevant times has been Ally Financial, Inc. Ally Financial, Inc. is incorporated under the laws of Delaware with its principal place of business in Michigan. Complaint ¶19. Accordingly, Residential Funding is, and has been at all relevant times, a citizen of Delaware and Michigan, the principal place of business and state of incorporation for the ultimate incorporated member. Similarly, Defendant

Residential Capital is, and has been at all relevant times, a citizen of Delaware and Michigan, as its ultimate incorporated member is also Ally Financial, Inc. Finally, defendant Ally Financial, Inc. is, and has been at all relevant times, a citizen of Delaware and Michigan. Thus, the citizenship of all parties are diverse as defined by 28 U.S.C. § 1332(a). Moreover, no defendant is a citizen of New York, the state in which the action is pending and the domicile of the Plaintiff, and none of the parties or companies identified above, other than Plaintiff, has its principal place of business in the State of New York.

b. This action involves a matter in controversy exceeding the sum or value of $75,000, exclusive of costs, in that the compensatory damages sought by the Plaintiff include, among other items, indemnification for and damages in the amount of claims made against Plaintiff's insurance policy for "more than $28 million in claims" presented to Plaintiff, and "tens of millions of dollars more in claims to be presented" under Plaintiff's policy in the future. Complaint ¶¶ 122; Prayer for Relief.

4. Venue lies in the United States District Court for the Southern District of New York because the state-court action was filed in this district. 28 U.S.C. § 1441(a).

5. As required by 28 U.S.C. § 1446(d), Defendants are serving a copy of this Notice of Removal on Plaintiff and will file a copy of the Notice of Removal with the Clerk of the Supreme Court of the State of New York, County of New York.



6. All Defendants have consented to removal of the instant action. Defendant Ally Financial, Inc. will be filing a separate notice of consent.

WHEREFORE, Defendants submit this Notice of Removal of this action from the Supreme Court of the State of New York, New York County, to the United States District Court for the Southern District of New York and pray this action stand so removed.

Dated: New York, New York
January 13, 2012

Respectfully submitted,

Financial Guaranty Insurance Company

SUPREME COURT OF THE STATE OF NEW YORK
COUNTY OF NEW YORK

FINANCIAL GUARANTY INSURANCE COMPANY, **Plaintiff,** **-against-** **ALLY FINANCIAL, INC. F/K/A GMAC, LLC; RESIDENTIAL CAPITAL, LLC F/K/A RESIDENTIAL CAPITAL CORPORATION; RESIDENTIAL FUNDING COMPANY, LLC F/K/A RESIDENTIAL FUNDING CORPORATION,** **Defendants.**	)	**Index No. _____** **COMPLAINT**

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"), Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"), and Residential Funding Company, LLC, formerly known as Residential Funding Corporation ("RFC"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with a financial guaranty insurance policy (the "Policy") issued by FGIC in relation to an RFC-sponsored transaction (the "2005-EFC7 Transaction" or the "Transaction") in which RAMP Series 2005-EFC7 Trust (the "2005-EFC7 Trust") issued and sold to investors $698,175,000 aggregate principal amount of insured

residential mortgage-backed securities (the "2005-EFC7 Certificates"). As the sponsor of the 2005-EFC7 Transaction, RFC procured the Policy from FGIC in order to enhance the ratings and marketability of the 2005-EFC7 Certificates. RFC fraudulently induced FGIC's agreement to provide this insurance through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices, the credit quality and characteristics of the thousands of mortgage loans (individually the "Mortgage Loans," and collectively the "Loan Pool") that provided the collateral for the 2005-EFC7 Certificates, and the underwriting criteria through which the Mortgage Loans were acquired and evaluated. In short, the Mortgage Loans were different—and demonstrably worse—than RFC had represented them to be. Indeed, RFC's misrepresentations with respect to the 2005-EFC7 Transaction have been so egregious that a federal government agency has alleged fraud and state and federal securities law violations against RFC relating to the 2005-EFC7 Transaction. FGIC's issuance of the Policy enabled the 2005-EFC7 Certificates to receive an initial triple-A rating from the rating agencies, which in turn made the 2005-EFC7 Transaction viable, and enabled RFC and its affiliates to earn millions of dollars in transaction fees.

2. Since the closing of the 2005-EFC7 Transaction, RFC has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of the 2005-EFC7 Transaction, RFC has violated the essential terms of its agreement with FGIC. RFC has also breached the essential terms of the other operative documents incorporated therein.

3. The wrongdoing committed by RFC, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through ResCap. Ally Financial is the ultimate parent of ResCap, which owns RFC. Ally Financial, as the ultimate parent of ResCap and RFC,

has the practical ability, which it has repeatedly exercised, to direct and control the activities of its subsidiaries, including ResCap and RFC. At times, Ally Financial's direction and control was effected by using ResCap as an instrument to achieve its goals.

4. The 2005-EFC7 Transaction is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among RFC and several other parties. To facilitate the Transaction, RFC pooled together the Mortgage Loans that it had purchased from the originator, EquiFirst Corporation ("EquiFirst"), a nationwide mortgage lender at that time. The Mortgage Loans consisted of 4,282 first-lien and junior-lien mortgage loans acquired by RFC from EquiFirst prior to the closing of the 2005-EFC7 Transaction.

5. Following its acquisition of the Mortgage Loans, RFC transferred the Mortgage Loans to another Ally Financial subsidiary, Residential Asset Mortgage Products, Inc. ("RAMP"). RAMP then deposited the Mortgage Loans it received from RFC into the 2005-EFC7 Trust. The trust, in turn, issued certificates representing the beneficial interest in the 2005-EFC7 Trust. The 2005-EFC7 Trust was a legal entity created by RFC solely for the purposes of the 2005-EFC7 Transaction to hold the Mortgage Loans and to issue the 2005-EFC7 Certificates to investors in a registered public offering.

6. RFC also acts as master servicer of the 2005-EFC7 Transaction (the "Master Servicer"), and another Ally Financial affiliate, HomeComings Financial LLC ("HomeComings"), is the subservicer. As Master Servicer, RFC supervises the activities of the subservicer, including the collection of borrower payments, and performs other servicing duties related to the Mortgage Loans. As discussed in more detail below, all of HomeComings' and RFC's servicing operations have since been integrated into ResCap. Yet another Ally Financial subsidiary, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was the joint

lead manager of the underwriters for the 2005-EFC7 Transaction. In addition, U.S. Bank National Association ("U.S. Bank") agreed to act as trustee of the Trust (the "Trustee").

7. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the Trust are used to pay, among other things, principal and interest due on the 2005-EFC7 Certificates, and the fees and expenses of RFC and other participants in the Transaction.

8. RFC, directed and controlled by Ally Financial, is, therefore, the hub of the 2005-EFC7 Transaction: it is the sponsor of the securitization, an acquirer and seller of the Mortgage Loans, and the master servicer of the Transaction. The primary victim of the 2005-EFC7 Transaction—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by RFC—is FGIC, which has already been presented with over $28 million in claims under the Policy, with further material losses still to come.

9. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed certificates ("RMBS Certificates"). At the time of the 2005-EFC7 Transaction, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Certificates typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of realized losses on the Mortgage Loans collateralizing the insured securities. FGIC's insurance policies thus enhanced the credit quality, and marketability, of the insured securities.

10. To enhance the ratings and marketability of the 2005-EFC7 Certificates, and to increase the profit that RFC would derive from the 2005-EFC7 Transaction, RFC sought to have FGIC issue the Policy to U.S. Bank as Trustee for the benefit of the holders of the 2005-EFC7 Certificates.

11. As an essential element of the 2005-EFC7 Transaction, RFC made material representations and warranties to FGIC about the manner in which the Mortgage Loans were selected and evaluated and their characteristics to induce FGIC to enter into the Transaction. RFC represented, among other things, that the Mortgage Loans were acquired and evaluated under RFC's own underwriting guidelines. Prospectus Supplement at S-32. Those representations and warranties were false when stated, and FGIC reasonably relied on such warranties, among others, when deciding to enter into the 2005-EFC7 Transaction. As a result, FGIC was fraudulently induced to enter the Transaction, and the credit risk assumed by FGIC in connection with the Transaction was far greater than it would have been had RFC's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

12. RFC received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policy. Ally Financial took actions and made statements to finance, support, and boost investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations RFC had made to FGIC. As a result of its dominance over ResCap and RFC, Ally Financial knew that the representations and warranties RFC made to FGIC, prior to and at the closing, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted RFC's fraudulent inducement of FGIC to issue the Policy.

13. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policy in reliance on the (presumed) accuracy and truthfulness of RFC's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and therefore the amount of claims presented to FGIC, have been overwhelming. Had FGIC been told the truth about the nature of RFC's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policy, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of RFC's misconduct.

14. In order to evaluate the extent of RFC's breaches, FGIC has requested copies of the mortgage loan files and servicing notes for the Mortgage Loans. RFC is obligated, under its agreements with FGIC, to provide those documents to FGIC. RFC has refused to provide FGIC with the requested documentation, which, on information and belief, will further evidence material breaches by RFC. This refusal to provide information in itself constitutes a material breach of RFC's insurance agreement with FGIC.

15. Certain of the material contractual breaches committed by RFC—including, but not limited to, FGIC's right to access information in RFC's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

16. Through this Complaint, FGIC seeks relief against RFC, ResCap, and Ally Financial for RFC's fraudulent inducement, and for its material breaches of its insurance agreement with FGIC and other contractual obligations owed to FGIC in connection with the 2005-EFC7 Transaction.

17. FGIC seeks a declaration from the Court that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other. Further and alternatively, FGIC seeks relief against Ally Financial for aiding and abetting RFC's fraudulent inducement.

THE PARTIES

18. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

19. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial specializes in automotive financings, residential mortgage financings and services, and insurance services. Ally Financial is the parent company of ResCap, RFC, and all RFC-affiliated entities relevant to this action.

20. Defendant RFC is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. In the period relevant to this action, RFC acquired and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

21. Since 2005, RFC has been an indirect wholly-owned subsidiary of ResCap; prior to that time, RFC was an indirect, wholly-owned subsidiary of Ally Financial.

22. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly-owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of RFC and is a leading real estate finance company, the business of which includes acquiring, selling and servicing mortgage loans.

23. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

JURISDICTION AND VENUE

24. This Court has jurisdiction over this suit pursuant to CPLR §§ 301 and 311-a. RFC is a registered, foreign, limited liability company within the State of New York. RFC has appointed an agent for service of process in this State and transacts business within this State. Also, in an agreement at issue in this case, RFC irrevocably submitted to the jurisdiction of this Court. Ally Financial and ResCap likewise regularly transact business in this State, and the acts giving rise to the claims in this case occurred in this State.

25. Venue is proper in New York County pursuant to CPLR § 503. FGIC, as plaintiff, has designated New York County as the place of trial. RFC, a party to this action, has designated New York County as its county of residence in the State of New York, and has agreed not to challenge venue in this Court. Furthermore, substantial activity giving rise to the claims in this case occurred within New York County.

RELEVANT NON-PARTIES

26. GMAC Mortgage LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. GMACM is an indirect wholly-owned subsidiary of ResCap, which in turn is a wholly-owned subsidiary of Ally Financial.

27. RAMP, a special purpose vehicle, is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. To facilitate the 2005-EFC7 Transaction, RAMP purchased the Mortgage Loans from RFC and deposited them into the 2005-EFC7 Trust, which then issued the 2005-EFC7 Certificates to underwriters to be sold to investors.

28. Ally Securities, an entity incorporated in Delaware, is an affiliate of RFC and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding

Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the 2005-EFC7 Certificates and, on information and belief, participated in the preparation of the Prospectus and Prospectus Supplement.

29. RFC acquired all of the Mortgage Loans for the 2005-EFC7 Transaction from EquiFirst, a mortgage originator headquartered in Charlotte, North Carolina. EquiFirst is no longer in business.

30. HomeComings, *f/k/a* HomeComings Financial Network, Inc., has continually served as primary servicer of the Mortgage Loans. HomeComings is a wholly-owned subsidiary of RFC.

FACTUAL ALLEGATIONS

A. Ally Financial and its Subsidiaries

31. In the period relevant to this action, RFC acquired, sold and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Certificates.

32. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including ResCap and RFC, led Ally Financial to seek a bailout by the federal government in 2008.

(1) RFC, GMACM, and GMAC-RFC

33. RFC is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

34. GMACM is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate RFC, GMACM engaged in the business of originating, acquiring, servicing and securitizing mortgage loans during the period relevant to this action.

35. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical Annual: Volume II* at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

36. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

37. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with RFC. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

38. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id*. at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id*.

(2) Ally Financial's Securitization Business

39. Ally Financial's business model depended on securitizations, which were conducted by its business units, including RFC. Pooling mortgage loans and selling them into securitizations enabled RFC to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

40. RFC, in addition to securitizing mortgage loans originated by itself or other Ally Financial subsidiaries, also earned fees by securitizing mortgage loans it acquired from third parties. RFC would typically acquire such mortgage loans and then deposit them into a securitization trust (usually through an affiliate). RFC would then procure underwriters, trustees, and (in the case of insured securities) financial guaranty insurers, and cause the securitization trust to sell securities collateralized by the relevant mortgage loans. In many instances, RFC profited from the difference between the cost it incurred to acquire mortgage loans and the price at which it sold them for deposit into the securitizations.

41. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining

whether a mortgage loan is in default based on the transaction documents, RFC typically also sought (as it did here) to be appointed as the Master Servicer for the 2005-EFC7 Transaction. Moreover, RFC appointed its subsidiary, HomeComings, to act as subservicer. For acting as Master Servicer to the 2005-EFC7 Transaction, RFC gained substantial additional compensation.

42. RFC also enriched Ally Financial and its subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the 2005-EFC7 Transaction: (i) HomeComings gained fees servicing the Mortgage Loans; (ii) RAMP, which established the 2005-EFC7 Trust and acted as depositor of the Mortgage Loans, charged fees to cover its operating expenses; and (iii) Ally Securities received fees for underwriting the 2005-EFC7 Certificates.

(3) Ally Financial, RFC, and GMACM Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

43. The Federal Housing Finance Authority ("FHFA") has alleged fraud and state and federal securities law violations against RFC relating to this same 2005-EFC7 Transaction. On September 2, 2011, the FHFA, as conservator for Freddie Mac, filed suit in this Court against RFC for fraud, aiding and abetting fraud, and violating state and federal securities laws in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in RMBS issued through twenty-one RFC-sponsored transactions, including the 2005-EFC7 Transaction.

44. The FHFA also alleges violations of state and federal securities laws by RFC and its parent, Ally Financial, and their affiliates, stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and

other offering documents. Additionally, FHFA also alleges aiding and abetting fraud against RFC's affiliates and Ally Financial for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs.

45. In addition, RFC is currently facing a lawsuit brought by MBIA Insurance Corporation in this Court for, among other things, fraud and breach of representations and warranties in connection with insured RMBS transactions. On December 22, 2009, this Court issued a ruling on RFC's motion to dismiss which allowed both the breach of contract and the fraud claims, among others, to proceed.

46. DZ Bank AG also filed a summons with notice in New York Supreme Court on December 13, 2011, against Ally Financial, ResCap, RFC, RAMP, and other Ally Financial subsidiaries for common-law fraud, fraudulent inducement, negligent misrepresentation, and aiding and abetting fraud, in connection with the 2005-EFC7 Transaction. The summons with notice alleges material misrepresentations and omissions regarding the standards used to underwrite, and key statistical characteristics of, the Mortgage Loans in the 2005-EFC7 Transaction. The claims arise from DZ Bank AG's purchase of $289.8 million in securities issued by Ally Financial subsidiaries, including a portion of the 2005-EFC7 Certificates.

47. IKB Deutsche Industriebank AG also filed a summons with notice in New York Supreme Court on December 16, 2011, against Ally Financial, ResCap, RFC, and other Ally Financial subsidiaries for, *inter alia*, Securities Act violations, common law fraud, fraudulent

inducement, and aiding and abetting fraud. The claims arise from the purchase of $4 million in securities underwritten and issued by Ally Financial subsidiaries in a similar RMBS transaction.

48. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two pending suits against Ally Financial's mortgage-related subsidiaries. The plaintiffs in those suits have alleged, among other things, that Ally's various subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011).

49. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. In the first nine months of 2011 alone, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $254 million worth of mortgages related to securitizations it consummated between 2004 and 2007. It clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own SEC filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 88 (Nov. 4, 2011).

50. According to its most recent quarterly report, Ally Financial believes its "exposure to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008 . . . ." Ally Fin. Inc., Quarterly Report (Form

10-Q), at 146 (Nov. 4, 2011). The 2005-EFC7 Transaction is, as the name implies, of the 2005 vintage.

51. Additionally, Ally Financial also disclosed that the U.S. Securities and Exchange Commission served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

52. Furthermore, RFC's sister company GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." *Id.* (emphasis added).

(4) The Mortgage Loan Servicing Practices of Ally Financial and Its Subsidiaries Have Come Under Scrutiny for Deficiencies

53. The Board of Governors of the Federal Reserve System (the "Federal Reserve Board") and the Federal Deposit Insurance Corporation (the "FDIC") have ordered Ally Financial and several of its subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See* Consent Order, FRB Docket No. 11020-B-HC (April 13, 2011) (the "Consent Order").

54. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to

properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

55. Furthermore, under the Consent Order, Ally Financial must direct its mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id.* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

56. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure process of at least one Ally Financial subsidiary to request an independent review of their files and, if warranted, receive compensation for the financial harm they suffered as a result of any errors, misrepresentations, or other deficiencies. *See* Press Release, Federal Reserve Board (November 1, 2011).

57. Moreover, according to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan Dep., *Federal National Mortgage Association v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Div Nine, No. Cumb.) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming

> personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

58. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.*

59. The Ohio Attorney General, in October 2010, filed suit against Ally Financial and its subsidiaries, alleging, *inter alia*, that employees of Ally Financial subsidiaries had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See State of Ohio v. GMAC Mortgage LLC*, CI0201006984, Court of Common Pleas, Lucas County, Ohio (Toledo). And in December 2011, the Massachusetts Attorney General filed a similar suit against an Ally Financial subsidiary (GMACM) for, among other things, engaging in unfair and deceptive foreclosure practices. *See Commonwealth of Massachusetts v. Bank of America NA*, 11-4363, Suffolk County Superior Court (Boston).

60. Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial for allegedly carrying out illegal foreclosures and submitting false documents related to

property seizures. *See* Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices, Boston Globe, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and RFC

61. Ally Financial is considering filing for bankruptcy protection for ResCap, its wholly-owned, indirect subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports, as of November 9, 2011. RFC is a wholly-owned, indirect subsidiary of ResCap.

62. Bloomberg News reported that "[d]erivatives traders are betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering," in an article entitled, "Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance," dated November 14, 2011. According to the article, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy.

63. Indeed, Ally Financial warned in its 2010 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 21 (Feb. 25, 2011).

B. RFC's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

64. To improve the marketability and ratings of the RMBS Certificates, issued as part of its securitizations, RFC from time to time sought credit enhancement for the RMBS Certificates from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the one FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Certificates that, if there is a shortfall in cash available to it to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

65. For a trust that issues RMBS Certificates, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS Certificates. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the Loan Pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS Certificate investors. Such shortfalls result in claims on FGIC's policy.

(2) Securitization Sponsor's Representations and Warranties

66. The risk FGIC assumes when it agrees to issue a policy for RMBS Certificates depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originator and the characteristics of the loans. If, for instance, a loan originator employs substandard underwriting practices, the underlying mortgage loans would be of inferior credit quality. Consequently, the credit risk—the risk of delinquency or

default—of the underlying mortgages, and of the mortgage portfolio as a whole, would be materially increased.

67. Accordingly, FGIC generally required securitization sponsors like RFC to provide substantial representations and warranties about the underlying mortgage loans, including representations about the standards and procedures used to underwrite the loans and the characteristics of the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to monthly income ("DTI ratio"), the ratio of the mortgage loan principal balance to the value of the mortgaged property at origination—plus, in the case of a junior lien Mortgage Loan, the principal balance of the senior Mortgage Loan on the related mortgaged property—("LTV ratio"), the borrower's credit score ("FICO score"), and the credit grade of the loan according to RFC's grading system ("Credit Grade"). Even where, as here, RFC did not originate the loans at issue, it nonetheless is typically required to make representations about those loans, thereby assuming the risk that those representations might not be accurate. RFC's representations and warranties were intended to allow FGIC to assess the credit risk inherent in the mortgage Loan Pool before deciding to commit to the transaction.

C. The RAMP 2005-EFC7 Transaction

68. In late 2005, RFC began to put together the 2005-EFC7 Transaction. RFC purchased thousands of residential mortgage loans originated by EquiFirst, pooled those loans, and deposited them in the 2005-EFC7 Trust (via RAMP). The trust then issued $698,175,000 aggregate principal amount of Class A Mortgage Asset-Backed Pass-Through Certificates, Series 2005-EFC7. The 2005-EFC7 Certificates consisted of five classes of senior certificates, all of which were insured by FGIC. The 2005-EFC7 Trust contained two groups of Mortgage Loans ("2005-EFC7 Group I" and "2005-EFC7 Group II"). 2005-EFC7 Group I contained 2,895 fixed- and adjustable-rate first-lien and junior-lien mortgage loans having an outstanding aggregate

principal balance of more than $517 million. 2005-EFC7 Group II contained 1,387 fixed- and adjustable-rate first-lien and junior-lien mortgage loans having an outstanding aggregate principal balance of more than $207 million. The Mortgage Loans purportedly were all either acquired and evaluated by RFC under its 'AlterNet' program (the "AlterNet Program"), or under its 'Negotiated Conduit Asset' program (the "NCA Program").

69. To enhance the ratings and marketability of the 2005-EFC7 Certificates, RFC sought a financial guaranty insurance policy from FGIC for the purpose of insuring the transaction for the benefit of the certificate holders. On December 28, 2005, FGIC and RFC executed an Insurance and Indemnity Agreement (the "I&I Agreement"), under which FGIC agreed to issue the Policy to insure the 2005-EFC7 Certificates, and FGIC accordingly issued its policy number 05030159. The I&I Agreement was signed by FGIC (the "Insurer" for the Transaction); RFC (the "Master Servicer" for the Transaction); RAMP (the "Depositor" for the Transaction); and U.S. Bank (the Trustee for the Transaction).

70. The I&I Agreement provides that FGIC is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." The "Operative Documents" are defined to include, among other documents: (i) the 2005-EFC7 Certificates; (ii) the Pooling and Servicing Agreement, dated December 1, 2005, among RFC, RAMP, and U.S. Bank (the "PSA"); and (iii) the Assignment and Assumption Agreement, dated as of December 28, 2005, between RFC and RAMP (the "A&A Agreement"). The PSA also provides that FGIC (the Certificate Insurer) "is an express third-party beneficiary of [the PSA]."

71. The Policy improved the marketability of the 2005-EFC7 Certificates by mitigating risk for potential investors and making the 2005-EFC7 Certificates eligible to receive an initial credit rating of triple-A by the rating agencies at closing.

72. RFC and the Depositor offered the 2005-EFC7 Certificates for sale pursuant to a prospectus, dated July 26, 2005 (the "Prospectus"), and a prospectus supplement, dated December 21, 2005 (the "Prospectus Supplement"), touting the Policy and the triple-A initial rating of the 2005-EFC7 Certificates made possible by the Policy. The Prospectus and the Prospectus Supplement, together with certain preliminary Offering Documents, each as further supplemented by any subsequent amendment or supplement thereto, and any other Offering Documents that makes reference to the Policy, are referred to collectively as the "Offering Documents."

73. On December 28, 2005, an Ally Financial subsidiary, Ally Securities, sold the 2005-EFC7 Certificates to investors, and FGIC issued the Policy in accordance with the terms of the I&I Agreement.

D. RFC Fraudulently Induces FGIC to Insure the 2005-EFC7 Certificates with Substantial Assistance from Ally Financial

(1) RFC's Fraudulent Inducement of FGIC

74. FGIC's participation in the 2005-EFC7 Transaction was an essential component of the 2005-EFC7 Transaction and enhanced RFC's ability to market the securitization effectively. The Policy allowed RFC to sell the 2005-EFC7 Certificates with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

75. In order to induce FGIC to write financial guaranty insurance for the 2005-EFC7 Transaction, RFC provided to FGIC, directly or indirectly, a variety of information.

76. First and foremost, RFC provided to FGIC initial and final Prospectus Supplements summarizing, among other material information, the credit quality and characteristics of the Mortgage Loans, and RFC's loan underwriting guidelines. RFC represented in the Prospectus Supplement that approximately 87% of the Mortgage Loans were

acquired and evaluated by RFC under its AlterNet Program and approximately 13% of the Mortgage Loans were acquired and evaluated by RFC under its NCA Program. Prospectus Supplement at S-32. RFC also provided FGIC with the underwriting guidelines of those programs.

77. Second, RFC provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in the 2005-EFC7 Transaction, together with representations regarding material statistics about the Loan Pool as a whole.

78. Third, RFC provided to FGIC credit ratings for the 2005-EFC7 Certificates determined without considering the effect of the Policy. These ratings, which RFC procured from the credit rating agencies, are known as "shadow ratings."

79. Fourth, RFC provided information regarding EquiFirst's practices and procedures for originating and servicing mortgage loans, and the prior performance of such loans.

80. Fifth, as discussed in detail in Section E, RFC provided representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreement regarding the mortgage loans specifically and the Loan Pool generally.

81. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the 2005-EFC7 Certificates, FGIC relied in part upon representations and warranties regarding RFC's loan underwriting standards made by RFC in the Prospectus and Prospectus Supplement. A Preliminary Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about December 16, 2005, in an email sent by Jeremiah Wagner of Mayer Brown (f/k/a Mayer, Brown, Rowe & Maw LLP) on behalf of RFC and RAMP. The Prospectus, as supplemented by the Prospectus Supplement, was filed with the SEC and became

effective on December 22, 2005. The Final Prospectus Supplement was transmitted to, among others, Jeffrey Kert of FGIC, on or about December 27, 2005, in an email sent by Jeremiah Wagner of Mayer Brown on RFC's and RAMP's behalf.

82. The Prospectus Supplement set forth, among other information, the following important characteristics of the Loan Pool: the ranges of and weighted average FICO scores and Credit Grades, the ranges of and weighted average LTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (*i.e.*, whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). Prospectus Supplement at II-1 – II-8, III-1 – III-8.

83. RFC represented in the Prospectus Supplement that "[a]pproximately 88.6%, 81.6% and 86.6% of the Group I Loans, Group II Loans and all mortgage loans, respectively, were acquired and evaluated by Residential Funding under its AlterNet Program and approximately 11.4%, 18.4% and 13.4% of the Group I Loans, Group II Loans and all mortgage loans, respectively, were acquired and evaluated by Residential Funding under its 'Negotiated Conduit Asset Program' or NCA program." Prospectus Supplement at S-32.

84. RFC publishes its loan underwriting standards in a document the Prospectus refers to as "Residential Funding's Client Guide" as modified from time to time (the "Client Guide"). In general, the Client Guide specifies documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan or line of credit. Depending upon the particular type of loan or line of credit, these requirements and criteria may include asset verification, income verification,

employment verification, bank statements, payment histories, and/or evidence of closing funds, among other things.

85. RFC disclosed additional data relevant to the AlterNet Program and NCA Program. In particular, RFC provided FGIC with the AlterNet and NCA Guidelines. RFC also disclosed in the Prospectus Supplement the delinquency and foreclosure experience it had recorded for the AlterNet and NCA Programs for nine months ending in September 2005 and for the preceding three years. Prospectus Supplement at S-81, S-83.

86. The Prospectus Supplement also includes substantive criteria for eligibility addressing material characteristics of a proposed loan, such as DTI ratios, LTV ratios, occupancy status, and Credit Grades.

87. In particular, RFC represented in the Offering Documents that the loans in 2005-EFC7 Group I had been originated with a maximum monthly DTI ratio of 60% and a maximum LTV ratio of 100%. *See* Prospectus Supplement at II-3, II-8. RFC further represented that the loans in 2005-EFC7 Group II had been originated with a maximum monthly DTI ratio of 55% and a maximum LTV ratio of 100%. *See* Prospectus Supplement at III-3, III-8.

88. RFC also represented in the Offering Documents that, with respect to occupancy status, 94.48% of the loans in 2005-EFC7 Group I and 100% of the loans in 2005-EFC7 Group II would be secured by the borrower's primary residence. Prospectus Supplement at II-5; III-5.

89. ***Loan Tapes.*** RFC sent via email final schedules of the Mortgage Loans to FGIC on December 14, 2005. Those schedules (or "loan tapes") provided by RFC set forth, for each loan in the pool, key characteristics such as the borrower's FICO score, Credit Grades, DTI ratio, and the LTV ratios for the loan. RFC also disclosed in the Prospectus Supplement, with respect

to the pool as a whole, aggregate characteristics relevant to the assessment of the credit risk of the pool, including FICO scores, Credit Grades, DTI ratios, and LTV ratios.

90. ***Shadow Rating Letters***. RFC, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. Based on the information supplied by RFC, Moody's assessed the credit quality of the Loan Pool and assigned a shadow rating of Baa1 to the 2005-EFC7 Certificates, while S&P assigned the 2005-EFC7 Certificates a shadow rating of BBB+. These shadow ratings met FGIC's minimum requirements. FGIC required these shadow ratings as an essential condition to its willingness to insure the 2005-EFC7 Certificates.

91. ***EquiFirst.*** FGIC relied on RFC to conduct an appropriate inquiry into the business methods and practices and procedures of EquiFirst. FGIC also relied on RFC to provide FGIC with information about EquiFirst and the performance of loans that were originated and/or serviced by EquiFirst. For example, on August 3 and December 14, 2005, RFC provided FGIC with a variety of information concerning EquiFirst's performance in originating mortgage loans. RFC's affiliates had acquired and held portfolios of loans originated by EquiFirst in securitizations that were issued between 2002 and 2004. RFC provided FGIC with performance data regarding these EquiFirst-originated loans, purporting to show that such loans performed with delinquency and loss rates that were acceptable to FGIC. FGIC reasonably relied on such information and data in deciding to enter into the I&I Agreement and issue the Policy.

(2) RFC's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

92. Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to participate in the 2005-EFC7 Transaction and, ultimately, issue

the Policy. Ally Financial knew that the Mortgage Loans underlying the 2005-EFC7 Transaction were of a substantially poorer quality than was represented to FGIC and other participants in the Transaction, including investors. Ally Financial further knew that the Mortgage Loans were not underwritten to the standards represented in the Offering Documents and warranted in the Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap and its other subsidiaries, Ally Financial knew that the representations and warranties RFC made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

93. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to finance, support, and engender investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

94. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

95. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Exhibit 99.1.

96. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to

improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

97. Ally Financial's corporate restructuring also allowed RFC to explicitly represent and warrant to FGIC in the I&I Agreement that RFC "is solvent, and will not be rendered insolvent by the Transaction. . . . [RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." I&I Agreement § 2.01(a)(xiii). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary RFC.

98. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the 2005-EFC7 Transactions—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

99. Moreover, as a result of its domination and control over ResCap and RFC, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of RFC's representations and warranties to FGIC—and that they were untrue when stated. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of

its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including RFC, shared numerous directors and senior management as well.

100. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, and RFC, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by RFC was shared among and between RFC and its parent ResCap, as well as ResCap and its parent Ally Financial. Indeed, at least one Ally Financial employee who was involved in the 2005-EFC7 Transaction appeared on the Transaction's working group list and received all distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

101. Another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, including RFC and RAMP, is David C. Walker. Walker joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. In September 2005, shortly before the closing of the 2005-EFC7 Transaction, Walker was a director at ResCap, GMACM, RFC, and RAMP, among other ResCap subsidiaries. In the 2005-EFC7 Transaction, acting as a director of RAMP, Walker was a signatory to RAMP's May 1, 2005 "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors." Similarly, acting as a director of RFC he executed the

"Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors." Both of these documents were included in the closing documents of the 2005-EFC7 Transaction.

102. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to RFC in fraudulently inducing FGIC to participate in the Transaction and issue the Policy. Further, the issuance of the Policy, which made the 2005-EFC7 Transaction possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. RFC's Representations, Warranties and Affirmative Covenants

103. In connection with the 2005-EFC7 Transaction, RFC, at the direction of Ally Financial, either directly or indirectly through ResCap, made numerous representations, warranties, and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way the loans were selected and evaluated, the characteristics of the Mortgage Loans, and the accuracy of the information supplied to FGIC. RFC also promised to provide timely Mortgage Loan file information and to provide FGIC with a variety of information, including access to RFC's books and records and to RFC's Servicing Officer and its independent accountants.

104. RFC's representation, among others, that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into the 2005-EFC7 Transaction and to issue the Policy. Further, the I&I Agreement's incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely

upon each and every one of the representations and warranties that RFC made in connection with the 2005-EFC7 Transaction.

105. FGIC, for its part, reasonably relied on the information available to it regarding the underlying Mortgage Loans and the representations and warranties provided by RFC. Since FGIC had neither the right nor duty under the Operative Documents, nor the practical ability to review the thousands of underlying Mortgage Loan files in the days available to it prior to the closing of the 2005-EFC7 Transaction, RFC knew that FGIC had no choice but to rely on RFC's representations regarding the underlying loans in determining whether to issue the Policy. Further, FGIC had no reason to believe that these representations were not true and accurate.

106. RFC included 4,282 individual Mortgage Loans in the 2005-EFC7 Trust. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation, and other forms of documentation necessary to support underwriting decisions. Unlike RFC, FGIC was under no contractual duty whatsoever to review the Mortgage Loans. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by RFC regarding its evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on the fact that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

107. Based on the information received by FGIC and the representations and warranties given by RFC, FGIC entered into the I&I Agreement and agreed to issue the Policy to the Trustee for the benefit of the holders of the 2005-EFC7 Certificates. In return for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate

principal balance of the 2005-EFC7 Certificates, commensurate with the risk FGIC thought it was taking. Specifically, FGIC received 0.20% per annum of the aggregate balance of the 2005-EFC7 Certificates for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties, and affirmative covenants provided by RFC.

108. RFC's information, representations, and warranties were materially false when disclosed and/or provided by RFC. RFC knew that this information, and its representations and warranties, were materially false when made. RFC also knew that this information and the representations and warranties were essential to FGIC's decision to issue the Policy. Indeed, RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and issue the Policy. The issuance by FGIC of the Policy—induced by RFC's fraudulent misrepresentations and substantial assistance of Ally Financial—made the 2005-EFC7 Certificates eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(1) Representations, Warranties and Affirmative Covenants Relating to the Operative and Offering Documents

109. Under Section 2.01 of the I&I Agreement, RFC made the following representations and warranties, among others (emphasis added in each case):

- *Accuracy of Information*. **None of the Operative Documents nor any other material information relating to the Mortgage Loans**, the operations of RFC. . . or the financial condition of RFC . . . furnished to [FGIC] . . . by RFC . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made**. [RFC] has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change. Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to RFC . . . that would render any of the Documents untrue or misleading in any material respect.

- *Compliance with Securities Laws*. The offering and sale of the Class A Certificates complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading** . . . .

- *Operative Documents*. **Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects** . . . .

- *Solvency; Fraudulent Conveyance*. [RFC] is solvent, and will not be rendered insolvent by the Transaction. . . . **[RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**. [RFC] does not intend to incur, and does not believe that it has incurred, debts beyond its ability to pay as they mature. . . . [RFC] is not entering into the Operative Documents, or transferring any of its assets in connection with the Transaction, with any intent to hinder, delay or defraud any of its creditors.

110. *First*, in the I&I Agreement, RFC represented and warranted that "[n]one of the Operative Documents nor any other material information relating to the Mortgage Loans, the operations of RFC . . . or the financial condition of RFC . . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." I&I Agreement § 2.01(a)(x). Through these Operative and Offering Documents, as detailed above, RFC communicated several material facts about the characteristics of the mortgage loans sold to the 2005-EFC7 Trust.

111. *Second*, in the I&I Agreement, RFC also represented and warranted that the "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading. . . ." I&I Agreement § 2.01(a)(xi). As discussed above, in the Prospectus Supplement, RFC represented that the Mortgage Loans sold to the 2005-EFC7 Trust had been evaluated in conformity with RFC's underwriting standards.

112. *Third*, the I&I Agreement incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the respective related Operative Documents: "Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects . . . ." I&I Agreement § 2.01(a)(xii). The incorporation by reference of the Operative Documents into the I&I Agreement was intended to allow FGIC to rely on any representation and warranty that RFC made to other entities, such as investors or the Trustee, in connection with the 2005-EFC7 Transaction. Indeed, the I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. I&I Agreement § 2.02(k).

113. *Fourth*, RFC also provided information to FGIC concerning Mortgage Loans in the 2005-EFC7 Transaction. *See* I&I Agreement § 2.02(c)(iii). This information included loan tapes that set forth statistics about the Loan Pool. The loan tapes purported to describe key characteristics relevant to the assessment of risk, including DTI and LTV ratios, occupancy status, Credit Grades, and FICO scores. *See* PSA § 1.01. On information and belief, the loan tape FGIC received at closing contains the same information as is contained in the Mortgage Loan Schedule referred to in Section 4(a) of the A&A Agreement.

114. In turn, in the A&A Agreement, RFC represented that all the information in that Mortgage Loan Schedule "is true and correct in all material respects as of the date or dates respecting which such information is furnished." A&A Agreement § 4(a).

115. As a result of incorporating into the I&I Agreement the representations and warranties in the related Operative Documents, RFC incorporated representations and warranties regarding the underwriting of the Mortgage Loans included in the 2005-EFC7 Transaction. These representations and warranties set forth the standards governing each Mortgage Loan,

including, significantly, the representation that the Mortgage Loans had been evaluated in compliance with RFC's own underwriting guidelines.

116. In particular, in the A&A Agreement, RFC represented and warranted as to the Mortgage Loans:

- **Information in Mortgage Loan Schedule**: "The information set forth in the Mortgage Loan Schedule for such Mortgage Loans is true and correct in all material respects as of the date or dates respecting which such information is furnished." A&A Agreement § 4(a).

- **No Material Breach Or Default**: "[T]here is no default, breach, violation or event of acceleration existing under the terms of any Mortgage Note or Mortgage and no event which, with notice and expiration of any grace or cure period, would constitute a default, breach, violation or event of acceleration under the terms of any Mortgage Note or Mortgage . . . and no such default, breach, violation or event of acceleration has been waived by RFC or by any other entity involved in servicing a Mortgage Loan." A&A Agreement § 4(e).

- **Delinquent Loans**: "As of the Cut-off Date, 0.1% of the Group I Loans, 0.1% of the Group II Loans, and 0.1% of the Mortgage Loans, respectively, are 30 to 59 days Delinquent in payment of principal and interest and none of the Mortgage Loans are 60 or more days Delinquent in payment of principal and interest." A&A Agreement § 4(h).

117. Moreover, in the I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—RFC specifically covenants that it will "comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreement § 2.02(a), (k)

118. RFC also agreed that it had to receive FGIC's consent before modifying or amending any of the Operative Documents. The I&I Agreement provides, "[RFC] will not modify, waive, or amend, or consent to any modification, waiver or amendment of, any of the terms, provisions or conditions of the Operative Documents to which it is a party . . . without the

prior written consent of [FGIC], which consent shall not be unreasonably withheld, conditioned or delayed." § 2.03(b).

(2) Representations, Warranties and Affirmative Covenants Regarding Access to Information and Servicing

119. In addition to the representations and warranties referenced above, the I&I Agreement provides that RFC has the contractual obligation, as Master Servicer, to service the Mortgage Loans in compliance with the PSA and to provide FGIC with access to the underlying Mortgage Loans and servicing notes, and as Seller, to procure custodial interim certifications stating that all mortgage files were complete and properly transferred into the appropriate trust ("Interim Certification"). Specifically, the I&I Agreement provides:

- *Other Information*. (A) Promptly upon request, such other data as [FGIC] may reasonably request relating to the Mortgage Loans, the servicing of the Mortgage Loans . . . , the Transaction or the ability of any of RFC or the Depositor to perform its obligations under the Operative Documents, and (B) all information required to be furnished to the Trustee or the Holders, as the case may be. I&I Agreement § 2.02(c)(v).

- *Access to Records; Discussions with Officers and Accountants*. On an annual basis, or at any time when a Shortfall Event shall have occurred and be continuing, up*on the reasonable request of [FGIC], it will permit [FGIC] or its authorized agents, or cause [FGIC]* or its authorized agents to be permitted . . . to inspect the books and records of RFC . . . . to discuss the affairs, finances and accounts of RFC . . . as they relate to the Mortgage Loans, the Transaction or the ability to perform [its] obligations under the Operative Documents with a Servicing Officer . . . [and] if [FGIC] reasonably believes that a Material Adverse Change may have occurred and with RFC's consent, which consent shall not be unreasonably withheld or delayed, to discuss the affairs, finances and accounts of RFC . . . with the independent accountants of such Person; provided, however, that officers of RFC shall have the right to be present during such discussions. In addition, if requested by [FGIC], on an annual basis, or otherwise when reasonably requested by [FGIC], RFC will . . . cause the Custodian to deliver to [FGIC] an updated certification, in the form of the "Interim Certification" required under the Custody Agreement, with an exceptions list attached thereto, to enable [FGIC] to track the progress of recording of Mortgages and Assignments with respect to the Mortgage Loans. I&I Agreement § 2.02(e) (emphasis added).

- *Servicing of Mortgage Loans*. All Mortgage Loans will be serviced in all material respects in compliance with the [PSA]. I&I Agreement § 2.02(l).

- *Due Diligence*. If in [FGIC's] reasonable judgment circumstances so warrant, based on the performance of the Transaction, [FGIC] shall have the right, so long as the Class A Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices, at [FGIC]'s expense and in a reasonable manner convenient to both RFC and [FGIC]. This due diligence right is in addition to the access provided and the other rights provided for in Section 2.02(e) of this Insurance Agreement. I&I Agreement § 2.02(m).

F. RFC's Breaches of Its Representations, Warranties and Affirmative Covenants

120. As discussed above, FGIC relied on material representations and warranties made by RFC regarding the manner in which the Mortgage Loans were selected and evaluated, the characteristics of those loans, and the accuracy and completeness of information RFC supplied to FGIC. Based on those representations and warranties, FGIC agreed to issue the Policy. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed above, the risk that FGIC assumed when it issued the Policy was many times greater than the risk disclosed by RFC's representations and warranties. RFC breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

121. The 2005-EFC7 Transaction has performed poorly, and delinquencies and defaults for Mortgage Loans in the 2005-EFC7 Transaction have been substantial. As of November 2011, a total of 1,711 mortgage loans, representing 40.0% of the loans underlying the 2005-EFC7 Transaction, had posted a loss or were severely delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue the Policy, RFC assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with RFC's representations and warranties.

122. The poor performance of the Mortgage Loans has reduced the cash flow to the 2005-EFC7 Trust, which has caused and will continue to cause claims to be presented to FGIC under the 2005-EFC7 Policy to cover these shortfalls. Indeed, as of December 2011, more than $28 million in claims had been presented to FGIC in connection with the 2005-EFC7 Transaction. FGIC expects tens of millions of dollars more in claims to be presented to it under the 2005-EFC7 Transaction in the future.

(1) RFC's Denial of Loan File Requests

123. As the 2005-EFC7 Transaction continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blashko, an RFC/ResCap employee, via e-mail demanding that RFC provide 467 of the Mortgage Loan files. Having received no response from RFC to its earlier requests, FGIC sent a follow-up e-mail on February 3, 2011 regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information and belief, the request required authorization from officers at Ally Financial, and RFC/ResCap's response was directed by officers at Ally Financial.

124. On February 14, 2011, and again on April 28, 2011, FGIC sent further follow-up letters requesting loan files.

125. In finally responding to FGIC's request for information, RFC refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans"). Instead, it only provided FGIC with a portion of the requested loan files, consisting solely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

126. Pursuant to the PSA and the I&I Agreement, FGIC is entitled to reasonable access to the documentation regarding all of the Mortgage Loans. Section 2.02(m) of the I&I

Agreement provides that FGIC "shall have the right, so long as the [2005-EFC7] Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans . . . ." Notably, there is no limitation in the I&I Agreement as to the nature of the Mortgage Loan files that are subject to review. Further, Section 2.02(c)(v) of the I&I Agreement states that "[p]romptly upon request," RFC must provide to FGIC "such other data as [FGIC] may reasonably request relating to the Mortgage Loans . . . ."

127. By producing only non-performing Mortgage Loan files, in contravention of the I&I Agreement, RFC has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

(2) RFC's Denial of Interim Certification Requests

128. On June 21, 2011, FGIC demanded, pursuant to Section 2.02(e) of the I&I Agreement, that RFC promptly cause the Custodian under the 2005-EFC7 Transaction to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement for the Transaction, with an exceptions list attached thereto. An Interim Certification would enable FGIC to track the progress of the recording of mortgages and assignments with respect to the related Mortgage Loans.

129. Again on December 8, 2011, FGIC wrote RFC demanding the Interim Certification, noting that it had been over five months since FGIC's initial letter and that RFC had failed to respond.

130. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to these requests.

(3) RFC's Denial of Servicing Notes

131. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(iv) of the I&I Agreement, that RFC furnish or cause to furnish the servicing notes for the Mortgage Loans.

132. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to requests for servicing notes.

(4) RFC's Denial of FGIC's Access To Books and Records, Servicing Officer, and RFC's Independent Accountants

133. On December 1, 2011, in accordance with its express rights under Sections 2.02(e)(i)-(iii) of the I&I Agreement, FGIC requested to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances, and accounts of RFC with the Servicing Officer of RFC; and (iii) discuss the affairs, finances, and accounts of RFC with RFC's independent accountants.

134. To date, RFC has failed to respond to this request, in violation of the I&I Agreement.

(5) RFC's Refusal to Disclose Terms of Settlement Agreement with EquiFirst

135. On January 29, 2010, RFC entered into a settlement agreement with EquiFirst whereby EquiFirst paid $1.5 million in connection with certain mortgage loans that were originated by EquiFirst and that were purchased and securitized by RFC ("EquiFirst Settlement"). On information and belief, the mortgage loans subject to the settlement included Mortgage Loans in the 2005-EFC7 Transaction. Within days of the EquiFirst Settlement, FGIC requested that RFC provide information regarding this settlement.

136. Pursuant to Sections 2.02(c)(v) of the I&I Agreement, RFC agreed "[p]romptly upon request" to provide FGIC with data concerning the Mortgage Loans or the Transaction. Moreover, pursuant to Section 2.02(e)(ii) of the I&I Agreement, RFC agreed, upon FGIC's reasonable request and on an annual basis, among other times, to discuss the affairs of RFC as they relate to the Mortgage Loans or the Transaction.

137. To date, and in breach of Sections 2.02(c) and 2.02(e) of the I&I Agreement, RFC has refused to provide FGIC with any information concerning the EquiFirst Settlement other

than the amount of the settlement and the number of loans affected by the settlement. In particular, RFC has refused to provide material and necessary information regarding the EquiFirst Settlement, including (i) the specific loans in the 2005-EFC7 transaction which the EquiFirst Settlement covered and (ii) the terms of the EquiFirst Settlement as it related to the entire population of loans submitted by FGIC to RFC.

138. FGIC has made reasonable requests for information from RFC concerning the EquiFirst Settlement. To date, RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to disclose to FGIC material information concerning the settlement, including the information listed above.

139. In addition, pursuant to Section 2.02(f)(iv) of the I&I Agreement, RFC agreed to "promptly inform [FGIC] in writing of the occurrence" of any "Material Adverse Change," which is defined in the I&I Agreement as a material adverse change in the ability of any individual or entity—including RFC—to perform its obligations under any of the Operative Documents, including servicing obligations. If, as part of the EquiFirst Settlement, RFC agreed to limit its subsequent efforts to enforce EquiFirst's obligations with respect to the Mortgage Loans, then the settlement may constitute a Material Adverse Change, because, among other reasons, it materially and adversely affects RFC's ability to service, repurchase or cure defective Mortgage Loans. Alternatively, if RFC has voluntarily limited its efforts to enforce EquiFirst's obligations, then it has *ipso facto* breached its obligations to FGIC.

140. FGIC has requested information regarding the EquiFirst Settlement in order to determine whether the settlement is a Material Adverse Change. In contravention of FGIC's contractual rights, RFC has failed to provide such information to FGIC. Moreover, if the EquiFirst Settlement constitutes a Material Adverse Change, RFC had an obligation to promptly

inform FGIC of the circumstances surrounding the settlement in writing, which RFC has not done. Accordingly, FGIC reserves its rights to assert additional causes of action against RFC relating to the EquiFirst Settlement.

(6) Breaches Uncovered In Loan File Reviews

141. During the ordinary course of its business, FGIC evaluated a substantial number of Mortgage Loans from the 2005-EFC7 Transaction to determine whether they contained material breaches of the I&I Agreement and the Operative Documents necessitating repurchase under the related Operative Documents. To perform this review, FGIC hired an independent outside consultant, having particular skill, experience and expertise in the review, evaluation, and re-underwriting of mortgage loans.

142. The independent consultant's review revealed that approximately 55% of the Mortgage Loans reviewed by the outside consultant contained breaches of the representations and warranties in the I&I Agreement.

143. A small sample of these material breaches and underwriting violations are listed below:

- Loan number 10091344. The loan closed with a LTV ratio of 160.19%, far above the 95% maximum permitted under the underwriting guidelines.
- Loan Number 10090884: The loan closed with a LTV ratio of 80%, in violation of the 70% maximum allowed under the underwriting guidelines for this borrower's level of credit risk.
- Loan Number 10088604: The loan closed with a LTV ratio of 90%, above the 70% maximum permitted under the underwriting guidelines for this borrower's credit score. In addition, the credit report indicated that the borrower's cumulative adverse credit account over the past 24 months was $5,097, well above the $500 maximum permitted under the underwriting guidelines.
- Loan Number 10084578. The loan closed with the borrower's open and unpaid collections totaling $9,111, almost double the $5,000 maximum permitted under the

underwriting guidelines. The loan also closed with a LTV ratio fully 5% above the maximum permitted.

- Loan Number 10089404. The loan closed with a combined LTV ratio of 114.53%, in contrast with the 0% combined LTV ratio reported in the Mortgage Loan Schedule, and in violation of the 100% maximum allowed under the underwriting guidelines. The loan also closed with a DTI ratio of 82.55%, well above the 50% maximum permitted under the underwriting guidelines.

- Loan number 10086600. The loan closed with a DTI ratio of 123.17%, confirmed by the borrower's recent tax returns in the loan file, and in violation of the 50% maximum allowed under the underwriting guidelines. Moreover, the Mortgage Loan Schedule had reported that the DTI ratio was only 23%.

These examples of underwriting violations—but a small smattering of the extensive defects among the Mortgage Loans—evidence significant breaches of the A&A Agreement and the I&I Agreement.

144. Following the discovery of these high defect rates and pursuant to the I&I Agreement and the A&A Agreement, FGIC demanded that RFC repurchase the non-compliant Mortgage Loans discovered during its repurchase review. RFC has expressly refused to repurchase a substantial number of non-conforming Mortgage Loans. This failure constitutes a material breach of the I&I Agreement and Operative Documents incorporated therein.

145. Moreover, on information and belief, RFC is and has long been aware that many of the Mortgage Loans were non-conforming and breached its own representations and warranties. Despite this knowledge, RFC has failed to take steps to repurchase the non-conforming loans or replace them with conforming loans.

(7) Breaches Uncovered Using Loan Pool Data

146. In addition to the loan-level review discussed above, FGIC commissioned an independent consultant—a leading provider of financial, property and consumer information, such as property valuation services using automated property valuation tools—to test the

accuracy of RFC's representations and warranties relating to the Mortgage Loans regarding occupancy status and LTV ratios. The consultant extracted information and data relating to over 3,000 Mortgage Loans.

a. Breaches of Owner-Occupancy Representation and Warranty

147. RFC represented in the Offering Documents that 94.48% of the loans in 2005-EFC7 Group I and 100% of the loans in 2005-EFC7 Group II, or 96.05% of all Mortgage Loans, would be secured by the borrower's primary residence. Prospectus Supplement at II-5, III-5, and IV-5.

148. Based on the information provided, FGIC determined that for the Mortgage Loans only 83.3% were owner-occupied properties as a primary residence.

149. The Prospectus Supplement therefore materially overstated the percentage of Mortgage Loans in their respective pools that were owner-occupied as a primary residence. As such, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

150. FGIC has determined that the rate of Mortgage Loan non-performance (*i.e.*, loans that, as of November 2011, were delinquent for more than 90 days, in foreclosure, liquidated, or have posted a loss) in the 2005-EFC7 Transaction for loans that were determined after review to be non owner-occupied was 43.2%.

b. Breaches of LTV Ratio Representation and Warranty

151. The Prospectus Supplement also provided information relating to the LTV ratios of the underlying Mortgage Loans.

152. LTV information provided in the Prospectus Supplement provided that the loans had generally been originated with a maximum LTV ratio of 100% for first-lien loans and a maximum LTV ratio of 100% for junior-lien loans. Prospectus Supplement at II-3, III-3. LTV

information provided in the Prospectus Supplement included (1) the average weighted LTV ratio for the Mortgage Loans, and (2) the number and aggregate value of the Mortgage Loans with LTV ratios in a given percentage band (*e.g.*, the number of Mortgage Loans with LTV ratios of between 80% and 85%, between 85% and 90%, and so on). *See* Prospectus Supplement at II-3, III-3. The Prospectus Supplement reported that *none* of Mortgage Loans had a LTV ratio over 100 percent. *See* Prospectus Supplement at II-3, III-3.

153. Using an industry standard automated valuation model to calculate the value of the underlying property at the time the Mortgage Loan was originated, FGIC determined that 13.4% of the Mortgage Loans—as opposed to *none* of the loans, as reported in the Prospectus Supplement, had an original LTV ratio above 100%, and 24.2%—as opposed to fewer than 9%, as reported in the Prospectus Supplement—had an original LTV ratio above 95%. In addition, RFC represented in the Prospectus Supplement that the weighted average LTV ratio of the Mortgage Loans at origination was 82.29% for 2005-EFC7 Group I and 83.95% for 2005-EFC7 Group II, but FGIC determined that the actual weighted average LTV ratio of the Mortgage Loans at origination was approximately 87% for Group I, approximately 88% for Group II, and approximately 88% for the entire 2005-EFC7 deal. Thus, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

154. Moreover, FGIC has determined that the rate of Mortgage Loan non-performance (*i.e.*, loans that, as of November 2011, were delinquent for more than 90 days, in foreclosure, liquidated, or have posted a loss) in the 2005-EFC7 Transaction for loans where the automated valuation model indicated a LTV greater than 100% was over 50.9%.

155. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicates the clear breach of RFC's contractual representations, warranties and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans, including the guidelines to which the Mortgage Loans were underwritten. Specifically, RFC has breached representations and warranties stating, for the 2005-EFC7 Transaction, that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (*i.e*. the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of RFC in the Operative Documents (including each representation and warranty in the A&A Agreement) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- each Mortgage File contains all required documents and instruments, and;
- Approximately 87% of the Mortgage Loans were acquired and evaluated by RFC under its AlterNet Program and approximately 13% of the Mortgage Loans were acquired and evaluated by RFC under its Negotiated Conduit Asset Program.

156. It is reasonable to conclude—based on what is known by FGIC and as a result of what is being wrongly withheld from FGIC—that many of the 4,282 Mortgage Loans held by the 2005-EFC7 Trust at closing evidenced similar breaches of RFC's representations and warranties.

157. Indeed, based on the information gathered from FGIC's loan file review and the information extracted by FGIC's consultant relating to LTV ratios and owner-occupancy rates discussed above, FGIC believes that the Transaction-wide defect rate for the Mortgage Loans is likely to be at least 42%.

158. Moreover, the true scope of the material underwriting failures is unknown given RFC's refusal to provide FGIC with pertinent—and contractually required—information. This

refusal in itself constitutes a breach of RFC's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

G. RFC's Fraud

159. The material breaches of RFC's representations and warranties, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants RFC made to FGIC to induce its participation in the Transaction. The extraordinarily high defect and default rate among the Mortgage Loans demonstrates not merely that RFC breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the Policy, RFC would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because RFC refuses to provide all of the requested Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

160. All of the Mortgage Loans underlying the 2005-EFC7 Transaction were acquired by RFC. As such, RFC had the access and ability to evaluate the Mortgage Loan files and to determine if the loans were in substantial compliance with the applicable RFC underwriting guidelines and if the loans breached other representations and warranties made by RFC.

161. To induce FGIC to enter into the 2005-EFC7 Transaction, RFC provided FGIC with a loan tape, which contained false and misleading information regarding, among other things, the LTV and DTI ratios, occupancy status, Credit Grades, and FICO scores of the borrowers.

162. In addition, RFC made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the 2005-EFC7 Trust. RFC was well aware that FGIC would not agree to insure the 2005-EFC7 Certificates unless RFC obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, RFC provided Moody's and S&P with the same false information regarding the credit quality of the underlying mortgage loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2005-EFC7 Certificates that met FGIC's minimum requirements—Baa1 and BBB+, respectively. In this way, RFC made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that RFC would pass on to FGIC, and second, by causing shadow ratings of the 2005-EFC7 Certificates to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

163. RFC also made material misrepresentations to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the standards to which the Mortgage Loans were underwritten.

164. For example, RFC knowingly misrepresented that the Mortgage Loans were acquired and evaluated under RFC's own underwriting guidelines. In the Prospectus Supplement (and in the I&I Agreement by incorporation), RFC assured FGIC that "[a]pproximately 88.6%, 81.6% and 86.6% of the Group I Loans, Group II Loans and all mortgage loans, respectively, were acquired and evaluated by Residential Funding under its AlterNet Program and approximately 11.4%, 18.4% and 13.4% of the Group I Loans, Group II Loans and all mortgage loans, respectively, were acquired and evaluated by Residential Funding

under its 'Negotiated Conduit Asset Program' or NCA program." Prospectus Supplement at S-32. Moreover, the loan tape indicated that the loans were acquired and evaluated under those same guidelines. RFC also provided FGIC with the AlterNet and NCA guidelines themselves, which contained extensive underwriting standards and requirements.

165. In fact, RFC was well aware at the closing of the EFC7 Transaction that those representations were false. It was not until years after the Transaction closed that RFC admitted that the Mortgage Loans were not underwritten to RFC's underwriting guidelines. In 2009, FGIC sent RFC numerous repurchase requests after reviewing certain Mortgage Loans in the EFC7 Transaction. In those requests, FGIC cited material breaches of the I&I Agreement and the Operative Documents, including non-conformity to RFC underwriting guidelines, which rendered certain Mortgage Loans ineligible or non-conforming and required RFC to repurchase those loans. RFC responded to many of FGIC's repurchase requests by claiming that the Mortgage Loans *were* conforming because they were under EquiFirst's guidelines and not RFC's AlterNet guidelines.

166. For example, on September 1, 2009, FGIC sent RFC repurchase requests for loan numbers 10092024 and 10089338 because those loans were non-conforming under the applicable AlterNet Guidelines. In response to FGIC's repurchase request for loan number 10092024, RFC asserted that the loan *was* conforming because "EFC [EquiFirst] guidelines" allowed such a loan. RFC attached excerpts from EquiFirst's underwriting guidelines in support. In response to FGIC's repurchase request for loan number 10089338, RFC asserted that the loan *did* qualify because the "Equifirst Core Program" allowed such a loan. RFC again attached excerpts from EquiFirst's underwriting guidelines in support.

167. RFC's response also indicates that these loans were also not compliant with its representation, as reflected in the credit grades listed on the Mortgage Loan Schedule, that these loans were underwritten to AlterNet guidelines.

168. These admissions demonstrate that RFC did not acquire and evaluate the Mortgage Loans under RFC's underwriting guidelines, *i.e.*, under the AlterNet Program and NCA Program. Instead, as RFC implicitly conceded in the rescission letters, these loans were evaluated and acquired under EquiFirst's less demanding underwriting guidelines. Accordingly, RFC knew that its representations were materially false at the time of the closing or should have known that its representations were materially false because RFC had not, among other things, evaluated and acquired the Mortgage Loans under any RFC guidelines.

169. Moreover, the A&A Agreement and Prospectus Supplement (as incorporated by reference in the I&I Agreement) contained other false and misleading representations about the Mortgage Loans. In particular, RFC misrepresented that, as of the closing: (i) the information set forth in the Mortgage Loan Schedule was true and correct in all material respects; (ii) the Mortgage Loans met certain credit grades; (iii) there was no default breach, violation or event of acceleration existing under any Mortgage Note or Mortgage; and (iv) the weighted average LTV Ratio for the Mortgage Loans was 82.29% for 2005-EFC7 Group I and 83.95% for 2005-EFC7 Group II.

170. Therefore, at the time of the closing of the 2005-EFC7 Transaction, RFC either (1) knew or should have known that its representations were materially false because RFC had not, among other things, evaluated and acquired the Mortgage Loans under the AlterNet Program where it represented it did so, or (2) had evaluated the Mortgage Loans under the AlterNet Program, had determined that they did not meet the standards of those programs, but nonetheless

materially misrepresented to FGIC that the Mortgage Loans were evaluated and acquired in conformity with that program.

171. These representations were essential to FGIC's decision to issue the Policy. These representations and warranties were false when stated. RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and to issue the Policy. The true information regarding these loans, as detailed above, simply could not substantiate RFC's assurances. In short, no amount of RFC promising that the loans met certain standards actually made those promises true.

172. RFC's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC as well as to a multitude of suits and the potential for more litigation to come.

173. Consistent with this pattern of behavior, RFC defrauded FGIC into issuing the Policy, through its knowing misrepresentations.

H. Ally Financial Aids and Abets RFC's Fraud

174. Ally Financial provided substantial assistance to RFC in fraudulently inducing FGIC to issue the Policy. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties RFC made regarding the nature of RFC's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

I. The Federal Government Alleges Fraud Against RFC Relating to the 2005-EFC7 Transaction

175. As discussed above, the FHFA recently filed suit in the Supreme Court of New York against RFC for fraud, aiding and abetting fraud, and violating state and federal securities

laws in connection with its role in the public filing of offering documents which allegedly contained false and misleading statements.

176. In support of its claims, the FHFA performed a review of loan-level data for randomly-selected 2005-EFC7 Group II Mortgage Loans to assess whether the information provided in the Prospectus Supplement for the 2005-EFC7 Transaction was true and accurate. FHFA Complaint at ¶ 94. For each of the sampled loans, FHFA used an industry standard automated valuation model ("AVM")—on information and belief, similar to the approach used by FGIC—to calculate the value of the underlying property at the time the mortgage loan was originated. (Id. ¶ 99).

177. Similar to FGIC's findings with respect to 2005-EFC7, the FHFA's review of the sample data confirmed, on a statistically-significant basis, that the information provided in the 2005-EFC7 Prospectus Supplement concerning owner-occupancy and LTV ratios was materially false.

178. The FHFA's analysis determined that RFC overstated the true percentage of non-owner-occupied properties within the 2005-EFC7 underlying Group II Mortgage Loan Pool, overstated the true percentage of 2005-EFC7 underlying Group II Mortgage Loans with a LTV ratio at or below 80 percent, and falsely represented that none of the loans had a LTV ratio above 100%. FHFA Complaint ¶ 98 & Table 6; ¶ 102 & Table 7.

179. Moreover, the FHFA cites as untrue or misleading numerous misrepresentations concerning RFC's underwriting standards in the EFC7 Transaction, including RFC's representation that "[f]or those mortgage loans that Residential Funding purchased from sellers in [the AlterNet Program], each mortgage loan determined by Residential Funding to be acceptable for purchase would have been originated in accordance with or would have been

determined to be generally consistent with the provisions of [the Client Guide]." FHFA Complaint, Appendix A at 44 (quoting Prospectus Supplement at S-32).

J. RFC's Breach of Obligations as Master Servicer

(1) Failure to Remedy Subservicing Deficiencies and to Provide Information

180. RFC, as Master Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for the 2005-EFC7 Transaction, including, but not limited to, its obligations to follow proper servicing procedures, and to sufficiently monitor and manage the performance of the subservicer with respect to its duties under each Transaction.

181. RFC took responsibility for the servicing of the Mortgage Loans through its wholly-owned subsidiary HomeComings and RFC had certain related contractual obligations under the I&I Agreement and the PSA with respect to the 2005-EFC7 Transaction. Under the I&I Agreement, RFC covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the [PSA]." I&I Agreement § 2.02(l). Under the PSA, RFC is "obligated and liable to . . . [FGIC] for the servicing and administering of the [Mortgage Loans]," and in doing so is required to "follow [] such procedures as it would employ in its good faith business judgment and which are normal and usual in its general mortgage servicing activities[.]" PSA §§ 3.01(a), 3.04. As such, on each occasion that HomeComings failed to service and administer the Mortgage Loans in conformity with generally accepted servicing practices (including RFC's own servicing guidelines), RFC was liable "to the same extent and under the same terms and conditions as if the Master Servicer alone were servicing and administering the Mortgage Loans." PSA § 3.04.

182. During 2007, the servicing operations of GMAC Mortgage, GMAC-RFC, and HomeComings were integrated into ResCap. Since the time of the integration, on information and belief, HomeComings has been deficient in its borrower contact, collections and loss mitigation standards. An onsite review of the Ally Financial servicing arm's headquarters, including those of HomeComings and RFC, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis, revealed *inter alia*: (i) inadequate call center staffing—staffing unable to handle increased incoming and outgoing call volumes; (ii) call center staffing turnovers as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when HomeComings does not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; and (v) severely infrequent use of alternative loss mitigation strategies as compared to the industry.

183. On information and belief, RFC has failed to remedy any of the deficient servicing practices in which HomeComings is engaged as subservicer.

184. In addition, RFC disclosed to FGIC for the first time in March 2009 that it classified loans into one of three categories or "Risk Tiers" under a protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

185. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. RFC disclosed to FGIC that all of the mortgage loans in FGIC-insured, RFC-serviced transactions (over 90,000

mortgage loans), including all of the Mortgage Loans in the 2005-EFC7 Transaction, were placed in the lowest category of risk. For such mortgage loans, regardless whether they were (i) first- or second- lien, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities—all of which are factors that require more attentive servicing—delinquent borrowers were called at a later stage of delinquency and less frequently than loans in higher risk categories. As the purchaser of the Mortgage Loans, however, RFC clearly knew that such Mortgage Loans, by their very nature, required particularized servicing such as that provided by HomeComings before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by RFC to ensure that the Mortgage Loans were serviced and administered in accordance with "good faith" business practices constitutes a breach of the PSA and the I&I Agreement. *See* PSA § 3.01(a), 3.04; I&I Agreement § 2.02(l).

186. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, RFC has still failed to provide such information.

(2) RFC allowed Excessive Loan Modifications And Amended the PSA Without FGIC's Consent

187. RFC, as Master Servicer, agreed that it would "not modify, waive or amend, or consent to any modification, waiver or amendment of" the PSA without the prior written consent of FGIC. I&I Agreement § 2.03(b).

188. On August 10, 2009, RFC requested FGIC's consent in order to execute an amendment (the "Purported Amendment") to allow RFC to modify 100% of the Mortgage Loans

rather than what would otherwise be allowed under the PSA. FGIC requested that RFC provide FGIC with sufficient information, including RFC's policies and procedures used for underwriting and processing prospective mortgagors for the Home Affordable Modification Program ("HAMP"), to respond to RFC's request for FGIC's consent. RFC never provided that information. Despite the fact that FGIC never consented to the additional loan modifications, it appears that RFC nonetheless proceeded as if its Purported Amendment had been adopted in contravention of FGIC's contractual rights. *See* I&I Agreement § 2.03(b).

189. Thus, to amend the PSA, RFC had to receive FGIC's consent. FGIC never gave its consent. Therefore, RFC breached section 2.03(b) of the I&I Agreement.

190. On information and belief, RFC has collected significantly higher servicing fees as a result of adopting the Amendment and modifying particular Mortgage Loans.

191. FGIC has requested additional information in order to determine whether RFC is in breach of its servicing obligations. In contravention of FGIC's contractual rights, RFC has failed to provide such information, including servicing notes, to FGIC. On information and belief, RFC, as Master Servicer, also knew of material breaches of representations and warranties and did not notify FGIC thereof, or cause the repurchase of the Mortgage Loans affected thereby. Accordingly, FGIC reserves its rights to assert additional causes of action relating to RFC's servicing obligations.

K. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

192. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns RFC and GMACM. Ally Financial—as the ultimate parent of ResCap, RFC and GMACM—has the

practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, RFC and GMACM.

193. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, RFC and GMACM. Ally Financial exercised its direction and control in connection with the 2005-EFC7 Transaction. At times, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

194. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries." *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

195. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of RFC Directly and Indirectly Through its Control of ResCap

196. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

197. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations,

"welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

198. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[1] Since incorporation, the ownership of ResCap has not changed—Ally Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

199. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the proposed 2005 operating agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two

[1] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the Securities and Exchange Commission (the "SEC") on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

independent directors, *to be selected by GMAC*." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement") (emphasis added).

200. Moreover, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, and RAMP, among other Ally Financial subsidiaries.

201. The 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

202. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

203. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part

of our plan and a key part of our value creation." *Id*. (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

204. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citi, which provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept. 19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id*.

205. Moreover, there is substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

206. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home >

About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 9, 2011).

207. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

208. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed RFC and GMACM as part of its own business. For example, in its investor presentation from 2007, ResCap declares that RFC and GMACM "are owned *and operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial wasn't directly controlling RFC and GMACM, it was using ResCap as an instrument to do so.

209. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information

related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

210. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one RFC has with respect to the 2005-EFC7 Transaction as Master Servicer.

211. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

212. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

> Q: Could you please state your name for the record.
> A: My name is Jeffrey Stephan.
> Q: Okay. And who do you work for?
> A: GMAC, LLC [Ally Financial].
> Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
> A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
> Q: Okay.
> A: It's GMCA [sic] Mortgage Corporation.
> Q: Okay.
> A: I'm not sure how you would word that.
> Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
> A. Yes.
> Q. -- that formerly existed?
> A. Yes.
> Q. So these entities no longer currently exist?
> A. Right.
> Q. Okay. And how long then have you been employed by GMAC, LLC?
> A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

L. FGIC's Contractual Remedies Under The I&I Agreement

213. The I&I Agreement provides FGIC with broad remedies for RFC's breaches of its representations and warranties. Section 5.02(b) of the I&I Agreement provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this Insurance Agreement, the Pooling and Servicing Agreement or the other Operative Documents, or existing at law or in equity.

214. RFC also agreed in Sections 3.03(b) and 3.03(c) of the I&I Agreement:

> Anything in Sections 2.01(l) and 3.03(a) hereof or in any Operative Document to the contrary notwithstanding, the Insurer shall be entitled to full reimbursement from RFC for (i) any payment made under the Policy arising as a result of RFC's failure to substitute for or deposit an amount in respect of any defective Mortgage Loan as required pursuant to Section 4 and Section 5 of the Assignment Agreement, together with interest on any and all such amounts remaining unreimbursed . . . from the date such amounts became due until paid in full . . .

I&I Agreement § 3.03(b); and

> RFC agrees to pay to [FGIC] any and all reasonable charges, fees, costs and expenses that [FGIC] may reasonably pay or incur, including reasonable attorneys' and accountants' fees and expenses, in connection with (i) the enforcement, defense or preservation of any rights in respect of any of the Operative Documents, including defending, monitoring or participating in any litigation or proceeding . . . relating to any of the Operative Documents . . . .

I&I Agreement § 3.03(c).

215. In addition, RFC agreed in Section 3.04(a) of the I&I Agreement:

> to pay, and to protect, indemnify and save harmless, [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages, costs or expenses (including reasonable fees and expenses of attorneys . . .) of any nature arising out of or relating to the breach by RFC or the Depositor of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the transactions contemplated by the Operative Documents by reason of . . . . the breach by RFC or the Depositor of any representation, warranty . . . or covenant under any of the Operative Documents or the occurrence, in respect of RFC or the Depositor, under any of the Operative Documents of any "event of default" . . . .

I&I Agreement § 3.04(a) & (a)(iv).

216. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, RFC agreed to repurchase or substitute Mortgage Loans that did not conform to RFC's representations and warranties, and to indemnify FGIC for claims and losses arising from RFC's breach of any representation or warranty.

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Material Breach of the I&I Agreement—Declaratory Relief Regarding RFC's Indemnification Obligation)

217. FGIC re-alleges and incorporates by reference paragraphs 1 through 216 of this Complaint.

218. The I&I Agreement is a valid and binding agreement between the parties.

219. FGIC has performed its obligations under the I&I Agreement.

220. RFC's representations and warranties were material to FGIC's decision to insure the 2005-EFC7 Certificates and to issue the 2005-EFC7 Policy.

221. RFC's pervasive and material breaches of its representations and warranties constitute a material breach of the I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

222. Pursuant to Section 3.04(a) of the I&I Agreement, RFC must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by RFC of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

223. As explained above, RFC has breached numerous representations and warranties in the 2005-EFC7 Offering and Operative Documents, for example, those contained in Section

2.01 of the I&I Agreement. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

224. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

225. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must jointly and severally indemnify FGIC for all sums arising out of the 2005-EFC7 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the 2005-EFC7 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2005-EFC7 Policy as and when such sums fall due or claims are presented.

226. In addition, FGIC seeks a declaration that RFC must indemnify FGIC for all sums arising out of the 2005-EFC7 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the 2005-EFC7 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2005-EFC7 Policy as and when such sums fall due or claims are presented.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Fraudulent Inducement—I&I Agreement)

227. FGIC re-alleges and incorporates by reference paragraphs 1 through 226 of this Complaint

228. RFC induced FGIC to enter into the I&I Agreement and to issue the Policy by making false representations and warranties about its business practices and the Mortgage Loans,

and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

229. As explained above, RFC knowingly made materially false statements to, and/or omitted material facts from, FGIC with the intent to induce detrimental reliance by FGIC.

230. RFC intended for FGIC to rely on RFC's material false statements and/or omissions. FGIC had no reason to believe that RFC's representations were false, and reasonably and justifiably relied on RFC's material false statements and/or omissions regarding information uniquely in the possession of RFC when it decided to enter into the I&I Agreement and to issue the Policy for the 2005-EFC7 Certificates.

231. As a result of RFC's material false statements and omissions, FGIC entered into the I&I Agreement, issued the Policy, and thereby agreed to insure certificates backed by a pool of Mortgage Loans that was, in actuality, materially different from the Loan Pool that RFC represented would collateralize the 2005-EFC7 Transaction.

232. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

233. As a result of RFC's material false statements and omissions, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

234. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

235. In addition, RFC is separately liable for such damages.

THIRD CAUSE OF ACTION

(Alternatively Against Ally Financial: Aiding and Abetting Fraudulent Inducement—I&I Agreement)

236. FGIC re-alleges and incorporates by reference paragraphs 1 through 235 of this Complaint.

237. As explained above, Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to issue the Policy.

238. RFC could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

239. Both Ally Financial knew that RFC fraudulently induced FGIC issue the Policy for the 2005-EFC7 Transaction.

240. Ally Financial's statements materially aided RFC's fraudulent inducement.

241. As a result of Ally Financial's aiding and abetting RFC's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Representations, Warranties and Affirmative Covenants)

242. FGIC re-alleges and incorporates by reference paragraphs 1 through 241 of this Complaint.

243. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

244. FGIC has performed its obligations under the I&I Agreement.

245. As explained above, RFC has materially breached its representations and warranties under Section 2.01 of the I&I Agreement.

246. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

247. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

248. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

249. In addition, RFC is separately liable for such damages.

FIFTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Repurchase Obligation)

250. FGIC re-alleges and incorporates by reference paragraphs 1 through 249 in this Complaint.

251. The I&I Agreement is a valid and binding agreement between the parties.

252. FGIC has performed its obligations under the I&I Agreement.

253. Pursuant to the terms of the I&I Agreement, and the provisions of the Operative Documents incorporated therein, FGIC has demanded that RFC repurchase non-complying Mortgage Loans. RFC has refused to repurchase numerous such Mortgage Loans.

254. RFC has breached the I&I Agreement, and the provisions of the Operative Documents incorporated therein, by failing to repurchase those Mortgage Loans that violated RFC's representations and warranties that FGIC has noticed to RFC.

255. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

256. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

257. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

258. In addition, RFC is separately liable for such damages.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Declaratory Relief Regarding Access to Information)

259. FGIC re-alleges and incorporates by reference paragraphs 1 through 258 of this Complaint.

260. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

261. FGIC has performed its obligations under the I&I Agreement.

262. Pursuant to Section 2.02(c) of the I&I Agreement, RFC agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the 2005-EFC7 Transaction. FGIC further has the right to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(m) of the I&I Agreement.

263. As discussed above, pursuant to the I&I Agreement, FGIC made numerous reasonable written requests that RFC furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by RFC, and others, concerning the Mortgage Loans.

264. RFC has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

265. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

266. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, RFC agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer; and (iii) discuss the affairs, finances and accounts of RFC with RFC's independent accountants.

267. FGIC made a reasonable request to inspect the books and records, discuss the affairs, finances and accounts with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants on December 1, 2011.

268. RFC has failed to make available such persons or to produce such information.

269. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreement, Section 2.02(e)(i)-(iii).

270. Pursuant to Section 2.02(e) of the I&I Agreement, RFC agreed, on an annual basis or when reasonably requested by FGIC, to cause the Custodian to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the 2005-EFC7 Custodial Agreement to enable FGIC to track the progress of the recording of Mortgages and Assignments with respect to the Mortgage Loans.

271. FGIC made a reasonable request for the Interim Certification on June 21, 2011.

272. RFC has failed to cause the Interim Certification to be delivered to FGIC as requested. On December 8, 2011, FGIC again notified RFC of its failure to perform under the I&I Agreement, but RFC continued to fail to cause the Interim Certification to be delivered to FGIC.

273. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Interim Certification to be delivered to FGIC after receiving reasonable requests from FGIC.

274. Pursuant to Section 2.02(c)(iv) of the I&I Agreement, RFC agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [PSA]."

275. FGIC made a reasonable request for servicing notes on December 9, 2010.

276. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

277. Pursuant to Sections 2.02(c)(v) of the I&I Agreement, RFC agreed "[p]romptly upon request" to provide FGIC with data concerning the Mortgage Loans or the Transaction. Moreover, pursuant to Section 2.02(e)(ii) of the I&I Agreement, RFC agreed, upon FGIC's reasonable request and on an annual basis, among other times, to discuss the affairs of RFC as they relate to the Mortgage Loans or the Transaction.

278. FGIC has made reasonable requests for information from RFC concerning the EquiFirst Settlement.

279. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to disclose to FGIC information concerning the EquiFirst Settlement other than the amount of the settlement and the number of loans affected by the settlement.

280. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

281. Accordingly, FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must comply with Sections 2.02(c), 2.02(m) and 2.02(e) of the I&I Agreement.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Master Servicer Obligations)

282. FGIC re-alleges and incorporates by reference paragraphs 1 through 281 of this Complaint.

283. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

284. FGIC has performed its obligations under the I&I Agreement.

285. As explained above, RFC has materially breached its representations and warranties under section 2.03(b) of the I&I Agreement by purporting to amend the Operative Documents without FGIC's prior and necessary consent.

286. Moreover, as explained above, RFC has breached its affirmative covenant under the I&I Agreement to service all Mortgage Loans in all material respects in compliance with the PSA.

287. RFC's breaches of the I&I Agreement has caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on Policies and other losses and expenses.

288. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

289. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

290. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

291. In addition, RFC is separately liable for such damages.

EIGHTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Declaratory Relief)

292. FGIC re-alleges and incorporates by reference paragraphs 1 through 291 of this Complaint.

293. This is a claim for declaratory judgment pursuant to CPLR 3001 for the purpose of determining a justiciable controversy between FGIC and Ally Financial, ResCap, and RFC.

294. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this complaint.

295. For the reasons set forth in paragraphs 192 through 212, among others, Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

296. FGIC has been damaged as a result of the actions Ally Financial, ResCap and RFC.

297. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

NINTH CAUSE OF ACTION

(As Against RFC: Attorneys' Fees and Costs)

298. FGIC re-alleges and incorporates by reference paragraphs 1 through 297 of this Complaint.

299. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

300. FGIC has performed its obligations under the I&I Agreement.

301. Pursuant to Section 3.03(c) of the I&I Agreement, RFC agreed to reimburse FGIC for any and all costs or expenses "including reasonable fees and expenses of attorneys" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreement, RFC agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or relating to the 2005-EFC7 Transaction.

302. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of RFC's failure to provide Mortgage Loan files, the Interim Certification, Servicing Reports, and financial information and its breach of the representations and warranties contained in Section 2.01 of the I&I Agreement and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreement.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant Residential Funding Company, LLC, with respect to (1), (2), and (4) through (15) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4) through (12), (14), and (15) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (12), (14), and (15) below and the following relief:

(1) A declaration that, pursuant to RFC's obligations under the I&I Agreement, RFC must solely and/or Ally Financial, ResCap, and RFC must jointly and severally reimburse and indemnify FGIC for all sums arising out of the 2005-EFC7 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented, and an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal rescissory, equitable, and punitive damages, to be proven at trial, for RFC's fraudulent inducement of FGIC to enter into the 2005-EFC7 Transaction and to issue the Policy;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's aiding and abetting of RFC's fraudulent inducement of FGIC to enter into the 2005-EFC7 Transaction and to issue the Policy;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for RFC's material breaches of the 2005-EFC7 Transaction;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for RFC's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreement and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that RFC must repurchase all Mortgage Loans that are in breach of RFC's representations and warranties in the 2005-EFC7 Transaction, and an order giving effect to that declaration;

(7) Further or alternatively, a declaration that RFC must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2005-EFC7 Transaction, and an order giving effect to that declaration;

(8) Further or alternatively, a declaration that RFC must allow FGIC to inspect the books and records of RFC, to discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants, and an order giving effect to that declaration and to disclose information concerning the EquiFirst Settlement;

(9) Further or alternatively, a declaration that RFC must cause to be provided servicing notes for the 2005-EFC7 Transaction when requested by FGIC;

(10) Further or alternatively, a declaration that RFC must cause to be provided the custodial Interim Certification when requested by FGIC for the 2005-EFC7 Transaction stating that all mortgage files were complete and were properly transferred into the trusts, or noting any exceptions, and an order giving effect to that declaration;

(11) Further or alternatively, an award of legal and equitable damages, to be proven at trial, for RFC's purported amendment of the PSA without FGIC's consent;

(12) Further or alternatively, a declaration that Ally Financial, ResCap, and RFC are alter egos of each other;

(13) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreement and other Operative Documents, as defined in the I&I Agreement;

(14) An award of prejudgment interest at the statutory rate; and

(15) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

New York, New York 10017

Pursuant to 28 U.S.C. § 1441, Defendants Residential Capital, LLC ("Residential Capital") and Residential Funding Company, LLC ("Residential Funding") (collectively "Defendants") respectfully give notice of the removal this action, entitled *Financial Guaranty Insurance Company v. Ally Financial, Inc. F/K/A GMAC, LLC; Residential Capital, LLC F/K/A Residential Capital Corporation; Residential Funding Company, LLC F/K/A Residential Funding Corporation*, Index No. 653622/2011 (Supreme Court of the State of New York, County of New York), from the Supreme Court of the State of New York, County of New York, to the United States District Court for the Southern District of New York based upon the following grounds:

1. Upon information and belief, this action was commenced on or about December 27, 2011, in the Supreme Court of the State of New York, County of New York. A copy of the Summons and Complaint was served on Defendant Residential Capital's appointed agent, Corporation Service Company, on December 29, 2011. A copy of the Summons and Complaint was served on Defendant Residential Funding's appointed agent, Corporation Service Company, on December 29, 2011.

2. This Notice of Removal is being filed within thirty (30) days of the date Defendants' appointed agents received service of the Summons and Complaint. This Notice of Removal includes a short and plain statement of grounds for removal together with a copy of all process, pleadings, and orders served upon Defendants in this action attached hereto as Exhibit A.

3. This Court has original jurisdiction over this action under 28 U.S.C. § 1332(a) and this action may be removed to this Court by Defendants pursuant to 28 U.S.C. §

1441(a), in that it is a suit constituting a dispute between citizens of different states and the matter in controversy exceeds the sum of the value of $75,000, exclusive of interest and costs.

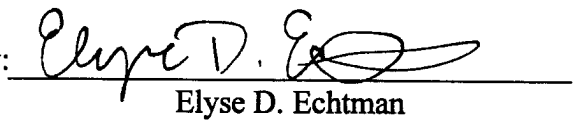
a. This suit constitutes a dispute between citizens of different states. As alleged in the Complaint, Plaintiff Financial Guaranty Insurance Company ("Plaintiff") is, and has been at all relevant times, a citizen of New York. Complaint ¶19. As of the date Plaintiff filed suit and currently, Defendant Residential Funding is a Delaware limited liability company. Complaint ¶21. The citizenship of a limited liability company is determined by the citizenship of its members. *Handelsman v. Bedford Vill. Assocs. Ltd. P'ship*, 213 F.3d 48, 51-52 (2nd Cir. 2000). Where the members are themselves limited liability companies, a court looks to the citizenship of their members, and continues this process until it reaches the ultimate incorporated or individual members. *See e.g., Quantlab Financial, LLC v. Tower Research Capital LLC*, 715 F.Supp.2d 542, 546-47 (S.D.N.Y. 2010); *Lindley Contours, LLC v. AABB Fitness Holdings, Inc.*, 414 Fed. Appx 62, 64 (9th Cir. 2011); *Onepoint Solutions, LLC, v. Borchert*, 486 F.3d 432, 347 n.4 (7th Cir. 2007). Residential Funding's sole member at all relevant times has been GMAC-RFC Holding Company, LLC, a Delaware limited liability company. GMAC-RFC Holding Company, LLC's sole member at all relevant times has been Residential Capital, LLC, a Delaware limited liability company. Residential Capital's sole member at all relevant times has been GMAC Mortgage Group LLC, a Delaware limited liability company. GMAC Mortgage Group LLC's sole member at all relevant times has been Ally Financial, Inc. Ally Financial, Inc. is incorporated under the laws of Delaware with its principal place of business in Michigan. Complaint ¶20. Accordingly, Residential Funding is, and has been at all relevant times, a citizen of Delaware and Michigan, the principal place of business and state of incorporation for the ultimate incorporated member. Similarly, Defendant

Residential Capital is, and has been at all relevant times, a citizen of Delaware and Michigan, as its ultimate incorporated member is also Ally Financial, Inc. Finally, defendant Ally Financial, Inc. is, and has been at all relevant times, a citizen of Delaware and Michigan. Thus, the citizenship of all parties are diverse as defined by 28 U.S.C. § 1332(a). Moreover, no defendant is a citizen of New York, the state in which the action is pending and the domicile of the Plaintiff, and none of the parties or companies identified above, other than Plaintiff, has its principal place of business in the State of New York.

b. This action involves a matter in controversy exceeding the sum or value of $75,000, exclusive of costs, in that the compensatory damages sought by the Plaintiff include, among other items, indemnification for and damages in the amount of claims made against Plaintiff's insurance policy for "more than $54 million in claims" presented to Plaintiff, and "tens of millions of dollars more in claims to be presented" under Plaintiff's policy in the future. Complaint ¶¶ 122; Prayer for Relief.

4. Venue lies in the United States District Court for the Southern District of New York because the state-court action was filed in this district. 28 U.S.C. § 1441(a).

5. As required by 28 U.S.C. § 1446(d), Defendants are serving a copy of this Notice of Removal on Plaintiff and will file a copy of the Notice of Removal with the Clerk of the Supreme Court of the State of New York, County of New York.



6. All Defendants have consented to removal of the instant action. Defendant Ally Financial, Inc. will be filing a separate notice of consent.

WHEREFORE, Defendants submit this Notice of Removal of this action from the Supreme Court of the State of New York, New York County, to the United States District Court for the Southern District of New York and pray this action stand so removed.

Dated: New York, New York
January 13, 2012

Respectfully submitted,

SUPREME COURT OF THE STATE OF NEW YORK
COUNTY OF NEW YORK

FINANCIAL GUARANTY INSURANCE COMPANY,	)	**Index No. _____**
Plaintiff,	)	
	)	**COMPLAINT**
-against-	)	
ALLY FINANCIAL, INC. F/K/A GMAC, LLC; RESIDENTIAL CAPITAL, LLC F/K/A RESIDENTIAL CAPITAL CORPORATION; RESIDENTIAL FUNDING COMPANY, LLC F/K/A RESIDENTIAL FUNDING CORPORATION,	)	
Defendants.	)	

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"); Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"); and Residential Funding Company, LLC, formerly known as Residential Funding Corporation ("RFC"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with a financial guaranty insurance policy (the "Policy") issued by FGIC in relation to an RFC-sponsored transaction (the "2005-NC1 Transaction" or the "Transaction") in which RAMP Series 2005-NC1 Trust (the "2005-NC1 Trust") issued and sold to investors $870,750,000 aggregate principal amount of insured residential mortgage-backed securities (the "2005-NC1 Certificates"). As the sponsor of the

2005-NC1 Transaction, RFC procured the Policy from FGIC in order to enhance the ratings and marketability of the 2005-NC1 Certificates. RFC fraudulently induced FGIC's agreement to provide this insurance through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices and the credit quality and characteristics of the thousands of mortgage loans (individually the "Mortgage Loans," and collectively the "Loan Pool") that provided the collateral for the 2005-NC1 Certificates. In short, the Mortgage Loans were different—and demonstrably worse—than RFC had represented them to be. Indeed, RFC's misrepresentations with respect to the 2005-NC1 Transaction have been so egregious that a federal government agency has alleged fraud and state and federal securities law violations against RFC relating to the 2005-NC1 Transaction.

2. FGIC's issuance of the Policy enabled the 2005-NC1 Certificates to receive an initial triple-A rating from the rating agencies, which in turn made the 2005-NC1 Transaction viable, and enabled RFC and its affiliates to earn millions of dollars in transaction fees.

3. Since the closing of the 2005-NC1 Transaction, RFC has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of the 2005-NC1 Transaction, RFC has violated the essential terms of its agreement with FGIC. RFC has also breached the essential terms of the other operative documents incorporated therein.

4. The wrongdoing committed by RFC, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through ResCap. Ally Financial is the ultimate parent of ResCap, which owns RFC. Ally Financial, as the ultimate parent of ResCap and RFC, has the practical ability, which it has repeatedly exercised, to direct and control the activities of

its subsidiaries, including ResCap and RFC. At times, Ally Financial's direction and control was effected by using ResCap as an instrument to achieve its goals.

5. The 2005-NC1 Transaction is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among RFC and several other parties. To facilitate the Transaction, RFC pooled together the Mortgage Loans that it purchased from the originators, New Century Financial Corporation ("New Century") and New Century's wholly owned subsidiary Home123 Corporation ("Home123," and together with New Century, the "Originators"), nationwide mortgage lenders at that time that have since gone bankrupt. The Mortgage Loans consisted of 4,613 first-lien and junior-lien mortgage loans originated by the Originators.

6. Following its acquisition of the Mortgage Loans, RFC transferred the Mortgage Loans to another Ally Financial subsidiary, Residential Asset Mortgage Products, Inc. ("RAMP"). RAMP then deposited the Mortgage Loans it received from RFC into the 2005-NC1 Trust. The trust, in turn, issued certificates representing the beneficial interest in the 2005-NC1 Trust. The 2005-NC1 Trust was a legal entity created by RFC solely for the purposes of the 2005-NC1 Transaction to hold the Mortgage Loans and to issue the 2005-NC1 Certificates to investors in a registered public offering.

7. RFC also acts as master servicer of the 2005-NC1 Transaction (the "Master Servicer"), and another Ally Financial affiliate, HomeComings Financial LLC ("HomeComings"), acts as subservicer. As Master Servicer, RFC supervises the activities of the subservicer, including the collection of borrower payments, and performs other servicing duties related to the Mortgage Loans. As discussed in more detail below, all of HomeComings' and RFC's servicing operations have since been integrated into ResCap. Yet another Ally Financial

subsidiary, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was one of the underwriters of the 2005-NC1 Transaction. In addition, U.S. Bank National Association ("U.S. Bank") agreed to act as trustee of the NC1-Trust (the "Trustee").

8. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the Trust are used to pay, among other things, principal and interest due on the 2005-NC1 Certificates, and the fees and expenses of RFC and HomeComings, as well as other participants in the 2005-NC1 Transaction.

9. RFC, directed and controlled by Ally Financial, is, therefore, the hub of the 2005-NC1 Transaction: it is the sponsor of the securitization, an acquirer and seller of the Mortgage Loans, and the Master Servicer of the Transaction. The primary victim of the 2005-NC1 Transaction—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by RFC—is FGIC, which has already been presented with over $54 million in claims under the Policy, with further material losses still to come.

10. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed certificates ("RMBS Certificates"). At the time of the 2005-NC1 Transaction, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Certificates typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of realized losses on the Mortgage Loans

collateralizing the insured securities. FGIC's insurance policies thus enhanced the credit quality and marketability of the insured securities.

11. To enhance the ratings and marketability of the 2005-NC1 Certificates, and to increase the profit that RFC would derive from the 2005-NC1 Transaction, RFC sought to have FGIC issue the Policy to U.S. Bank, as Trustee, for the benefit of the holders of the 2005-NC1 Certificates.

12. As an essential element of the 2005-NC1 Transaction, RFC made material representations and warranties to FGIC about the manner in which the Mortgage Loans were selected and evaluated as well as their characteristics to induce FGIC to enter into the Transaction. Those representations and warranties were false when stated, and FGIC reasonably relied on such warranties, among others, when deciding to enter into the 2005-NC1 Transaction. As a result, FGIC was fraudulently induced to enter the 2005-NC1 Transaction, and the credit risk assumed by FGIC in connection with the 2005-NC1 Transaction was far greater than it would have been, had RFC's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

13. RFC received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policy. Ally Financial took actions and made statements to finance, support, and boost investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations RFC had made to FGIC. As a result of its dominance over ResCap and RFC, Ally Financial knew that the representations and warranties RFC made to FGIC, prior to and at the closing, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted RFC's fraudulent inducement of FGIC to issue the Policy.

14. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policy in reliance on the (presumed) accuracy and truthfulness of RFC's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and therefore the amount of claims presented to FGIC, have been overwhelming. Had FGIC been told the truth about the nature of RFC's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policy, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of RFC's misconduct

15. In order to evaluate the extent of RFC's breaches, FGIC has requested copies of the mortgage loan files and servicing notes for the Mortgage Loans. RFC is obligated, under its agreements with FGIC, to provide those documents to FGIC. RFC has refused to provide FGIC with the requested documentation, which, on information and belief, will further evidence material breaches by RFC. This refusal to provide information in itself constitutes a material breach of RFC's insurance agreement with FGIC.

16. Certain of the material contractual breaches committed by RFC—including, but not limited to, FGIC's right to access information in RFC's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

17. Through this Complaint, FGIC seeks relief against RFC, ResCap, and Ally Financial for RFC's fraudulent inducement, and for its material breaches of its insurance agreement with FGIC and other contractual obligations owed to FGIC in connection with the 2005-NC1 Transaction.

18. FGIC seeks a declaration from the Court that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other. Further and alternatively, FGIC seeks relief against Ally Financial for aiding and abetting RFC's fraudulent inducement.

THE PARTIES

19. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

20. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial specializes in automotive financings, residential mortgage financings and services, and insurance services. Ally Financial is the parent company of ResCap, RFC, and all RFC-affiliated entities relevant to this action.

21. Defendant RFC is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. In the period relevant to this action, RFC acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

22. Since 2005, RFC has been an indirect wholly owned subsidiary of ResCap; prior to that time, RFC was an indirect, wholly owned subsidiary of Ally Financial.

23. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly-owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of RFC and is a leading real estate finance company, the business of which includes acquiring, selling and servicing mortgage loans.

24. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

JURISDICTION AND VENUE

25. This Court has jurisdiction over this suit pursuant to CPLR §§ 301 and 311-a. RFC is a registered, foreign, limited liability company within the State of New York. RFC has appointed an agent for service of process in this State and transacts business within this State. Also, in an agreement at issue in this case, RFC irrevocably submitted to the jurisdiction of this Court. Ally Financial and ResCap likewise regularly transact business in this State, and the acts giving rise to the claims in this case occurred in this State.

26. Venue is proper in New York County pursuant to CPLR § 503. FGIC, as plaintiff, has designated New York County as the place of trial. RFC, a party to this action, has designated New York County as its county of residence in the State of New York, and has agreed not to challenge venue in this Court. Furthermore, substantial activity giving rise to the claims in this case occurred within New York County.

RELEVANT NON-PARTIES

27. GMAC Mortgage LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. GMACM is an indirect wholly-owned subsidiary of ResCap, which in turn is a wholly-owned subsidiary of Ally Financial.

28. RAMP, a special purpose vehicle, is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. To facilitate the 2005-NC1 Transaction, RAMP purchased the Mortgage Loans from RFC and deposited them into the 2005-NC1 Trust, which then issued the 2005-NC1 Certificates to underwriters to be sold to investors.

29. Ally Securities, an entity incorporated in Delaware, is an affiliate of RFC and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding

Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the 2005-NC1 Certificates and, on information and belief, participated in the preparation of the Prospectus and Prospectus Supplement.

30. RFC acquired of the Mortgage Loans for the 2005-NC1 Transaction from New Century and Home123, a wholly owned subsidiary of New Century. New Century and Home123 filed for bankruptcy on April 2, 2007.

31. HomeComings (*f/k/a* HomeComings Financial Network, Inc.) has continually served as primary servicer of the Mortgage Loans. HomeComings is a wholly owned subsidiary of RFC.

FACTUAL ALLEGATIONS

A. Ally Financial and Its Subsidiaries

32. In the period relevant to this action, RFC acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Certificates.

33. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults, and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including ResCap and RFC, led Ally Financial to seek a bailout by the federal government in 2008.

(1) RFC, GMACM, and GMAC-RFC

34. RFC is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

35. GMACM is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate RFC, GMACM engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

36. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical Annual: Volume II* at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

37. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

38. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with RFC. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

39. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

40. Ally Financial's business model depended on securitizations, which were conducted by its business units, including RFC. Pooling mortgage loans and selling them into securitizations enabled RFC to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

41. RFC, in addition to securitizing mortgage loans originated by itself or other Ally Financial subsidiaries, also earned fees by securitizing mortgage loans it acquired from third parties. RFC would typically acquire such mortgage loans and then deposit them into a securitization trust (usually through an affiliate). RFC would then procure underwriters, trustees, and (in the case of insured securities) financial guaranty insurers, and cause the securitization trust to sell securities collateralized by the relevant mortgage loans. In many instances, RFC profited from the difference between the cost it incurred to acquire mortgage loans and the price at which it sold them for deposit into the securitizations.

42. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining

whether a mortgage loan is in default based on the transaction documents, RFC typically also sought (as it did here) to be appointed as the Master Servicer for the 2005-NC1 Transaction. Moreover, RFC appointed its subsidiary, HomeComings, to act as subservicer. For acting as Master Servicer to the 2005-NC1 Transaction, RFC gained substantial additional compensation.

43. RFC also enriched Ally Financial and its subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the 2005-NC1 Transaction: (i) RAMP, which established the 2005-NC1 Trust and acted as depositor of the Mortgage Loans, charged fees to cover its operating expenses; (ii) Ally Securities received fees for underwriting the 2005-NC1 Certificates; and (iii) RFC and HomeComings earned fees for servicing the Mortgage Loans.

(3) Ally Financial, RFC, and GMACM Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

44. On September 2, 2011, the Federal Housing Finance Authority (the "FHFA"), as conservator for Freddie Mac, filed suit in this Court against RFC for fraud, aiding and abetting fraud, and violating state and federal securities laws in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in RMBS issued through twenty-one RFC-sponsored transactions, including the 2005-NC1 Transaction.

45. The FHFA also alleges violations of state and federal securities laws by RFC and its parent, Ally Financial, and their affiliates, stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, FHFA also alleges aiding and abetting fraud against RFC's affiliates and Ally Financial for their intentional and substantial assistance in rendering

material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs.

46. In addition, RFC is currently facing a lawsuit brought by MBIA Insurance Corporation in this Court for, among other things, fraud and breach of representations and warranties in connection with insured RMBS transactions. On December 22, 2009, this Court issued a ruling on RFC's motion to dismiss which allowed both the breach of contract and the fraud claims, among others, to proceed.

47. DZ Bank AG also filed a summons with notice in New York Supreme Court on December 13, 2011, against Ally Financial, ResCap, RFC, RAMP, and other Ally Financial subsidiaries for common-law fraud, fraudulent inducement, negligent misrepresentation, and aiding and abetting fraud, in connection with the 2005-NC1 Transaction. The summons with notice alleges material misrepresentations and omissions regarding the standards used to underwrite, and key statistical characteristics of, the Mortgage Loans in the 2005-NC1 Transaction. The claims arise from DZ Bank AG's purchase of $289.8 million in securities issued by Ally Financial subsidiaries, including a portion of the 2005-NC1 Certificates.

48. IKB Deutsche Industriebank AG also filed a summons with notice in New York Supreme Court on December 16, 2011, against Ally Financial, ResCap, RFC, and other Ally Financial subsidiaries for, *inter alia*, Securities Act violations, common law fraud, fraudulent inducement, and aiding and abetting fraud. The claims arise from the purchase of $4 million in securities underwritten and issued by Ally Financial subsidiaries in a similar RMBS transaction.

49. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two pending suits against Ally Financial's mortgage-related subsidiaries. The plaintiffs in those suits have alleged, among other things, that Ally's various subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011).

50. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. In the first nine months of 2011 alone, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $254 million worth of mortgages related to securitizations it consummated between 2004 and 2007. It clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own SEC filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 88 (Nov. 4, 2011).

51. According to its most recent quarterly report, Ally Financial believes its "exposure to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008 . . . ." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 146 (Nov. 4, 2011). The 2005-NC1 Transaction is, as the name implies, of the 2005 vintage.

52. Additionally, Ally Financial also disclosed that the U.S. Securities and Exchange Commission served a subpoena on Ally Financial in June 2011, requesting documentation

regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

53. Furthermore, RFC's sister company GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." *Id.* (emphasis added).

(4) The Mortgage Loan Servicing Practices of Ally Financial and its Subsidiaries Have Come Under Scrutiny for Deficiencies

54. The Board of Governors of the Federal Reserve System (the "Federal Reserve Board") and the Federal Deposit Insurance Corporation (the "FDIC") has ordered Ally Financial and several of its subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See* Consent Order, FRB Docket No. 11020-B-HC (April 13, 2011) (the "Consent Order").

55. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

56. Furthermore, under the Consent Order, Ally Financial must direct its mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id.* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

57. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure process of at least one Ally Financial subsidiary to request an independent review of their files and, if warranted, receive compensation for the financial harm they suffered as a result of any errors, misrepresentations, or other deficiencies. *See* Press Release, Federal Reserve Board (November 1, 2011).

58. Moreover, according to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan Dep. *Federal National Mortgage Association v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Div Nine, No. Cumb.) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

59. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.*

60. The Ohio Attorney General, in October 2010, filed suit against Ally Financial and its subsidiaries, alleging, *inter alia*, that employees of Ally Financial subsidiaries had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See State of Ohio v. GMAC Mortgage LLC*, CI0201006984, Court of Common Pleas, Lucas County, Ohio (Toledo). And in December 2011, the Massachusetts Attorney General filed a similar suit against an Ally Financial subsidiary (GMACM) for, among other things, engaging in unfair and deceptive foreclosure practices. *See Commonwealth of Massachusetts v. Bank of America NA*, 11-4363, Suffolk County Superior Court (Boston).

61. Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices, Boston Globe, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request

> that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and RFC

62. Ally Financial is considering filing for bankruptcy protection for ResCap, its wholly owned, indirect subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports, as of November 9, 2011. RFC is a wholly-owned, indirect subsidiary of ResCap.

63. Bloomberg News reported that "[d]erivatives traders are betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering," in an article, entitled "Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance," dated November 14, 2011. According to the article, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy.

64. Indeed, Ally Financial warned in its 2010 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 21 (Feb. 25, 2011).

B. RFC's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

65. To improve the marketability and ratings of the RMBS Certificates issued as part of its securitizations, RFC from time to time sought credit enhancement for the RMBS Certificates from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the one FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of

the insured RMBS Certificates that, if there is a shortfall in cash available to it to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

66. For a trust that issues RMBS Certificates, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS Certificates. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the Loan Pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS Certificate investors. Such shortfalls result in claims on FGIC's policy.

(2) Securitization Sponsor's Representations and Warranties

67. The risk FGIC assumes when it agrees to issue a policy for RMBS Certificates depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originator and the characteristics of the loans. If, for instance, a loan originator employs substandard underwriting practices, the underlying mortgage loans would be of inferior credit quality. Consequently**,** the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage portfolio as a whole, would be materially increased.

68. Accordingly, FGIC generally required securitization sponsors like RFC to provide substantial representations and warranties about the underlying mortgage loans, including representations about the standards and procedures used to underwrite the loans and the characteristics of the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to monthly income ("DTI ratio"), the ratio of the mortgage loan principal balance to

the value of the mortgaged property at origination—plus, in the case of a junior lien Mortgage Loan, the principal balance of the senior Mortgage Loan on the related mortgaged property—("LTV ratio"), the borrower's credit score ("FICO score"), and the credit grade of the loan according to RFC's grading system ("Credit Grade"). Even where, as here, RFC did not originate the loans at issue, it nonetheless is typically required to make representations about those loans, thereby assuming the risk that those representations might not be accurate. RFC's representations and warranties were intended to allow FGIC to assess the credit risk inherent in the Loan Pool before deciding to commit to the transaction.

C. The RAMP 2005-NC1 Transaction

69. In late 2005, RFC began to put together the 2005-NC1 Transaction. RFC purchased thousands of residential mortgage loans originated by New Century and Home123, pooled those loans, and deposited them in the 2005-NC1 Trust (via RAMP). The trust then issued $870,750,000 aggregate principal amount of Class A Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2005-NC1. The 2005-NC1 Certificates consisted of five classes of senior certificates, all of which were insured by FGIC. The 2005-NC1 Trust contained two groups of Mortgage Loans (respectively, the "2005-NC1 Group I Mortgage Loans" and the "2005-NC1 Group II Mortgage Loans"). The 2005-NC1 Group I Mortgage Loans contained 2,075 fixed-rate and adjustable-rate first-lien and junior-lien mortgage loans having an outstanding principal balance of more than $481 million. The 2005-NC1 Group II Mortgage Loans contained 2,538 fixed-rate and adjustable-rate first-lien and junior-lien mortgage loans having an outstanding aggregate principal balance of more than $418 million. The Mortgage Loans purportedly were all either acquired and evaluated by RFC under its 'AlterNet' program (the "AlterNet Program"), or under its 'Negotiated Conduit Asset' program (the "NCA Program").

70. To enhance the ratings and marketability of the 2005-NC1 Certificates, RFC sought a financial guaranty insurance policy from FGIC for the purpose of insuring the transaction for the benefit of the certificate holders. On December 28, 2005, FGIC and RFC executed an Insurance and Indemnity Agreement (the "I&I Agreement"), under which FGIC agreed to issue a financial guaranty insurance policy to insure the 2005-NC1 Certificates, and FGIC accordingly issued its policy number 05030158. The I&I Agreement was signed by FGIC (the "Insurer" for the Transaction); RFC (the "Seller" and Master Servicer for the Transaction); RAMP (the "Depositor" for the Transaction); and U.S. Bank (the Trustee for the Transaction).

71. The I&I Agreement provides that FGIC is a third-party beneficiary of, and shall have all of the rights provided for, in the "Operative Documents." The "Operative Documents" are defined to include, among other documents: (i) the 2005-NC1 Certificates; (ii) the Pooling and Servicing Agreement, dated December 1, 2005, among RFC, RAMP, and U.S. Bank (the "PSA"); and (iii) the Assignment and Assumption Agreement, dated as of December 28, 2005, between RFC and RAMP (the "A&A Agreement"). The PSA also provides that FGIC (the Certificate Insurer) "is an express third-party beneficiary of [the PSA]."

72. The Policy improved the marketability of the 2005-NC1 Certificates by mitigating risk for potential investors and making the 2005-NC1 Certificates eligible to receive an initial credit rating of triple-A by the rating agencies at closing.

73. RFC and the Depositor offered the 2005-NC1 Certificates for sale pursuant to a prospectus, dated July 26, 2005 (the "Prospectus"), and a prospectus supplement dated December 22, 2005 (the "Prospectus Supplement"), touting the Policy and the triple-A initial rating of the 2005-NC1 Certificates made possible by the Policy. The Prospectus and the Prospectus Supplement, together with certain preliminary Offering Documents, each as further

supplemented by any subsequent amendment or supplement thereto, and any other Offering Documents that makes reference to the Policy, are referred to collectively as the "Offering Documents."

74. On December 28, 2005, an Ally Financial subsidiary, Ally Securities, and Credit Suisse, formerly known as Credit Suisse First Boston (the other underwriter for the 2005-NC1 Transaction), purchased from the 2005-NC1 Trust and sold to investors the 2005-NC1 Certificates, and FGIC issued the Policy in accordance with the terms of the I&I Agreement.

D. RFC Fraudulently Induces FGIC to Insure the 2005-NC1 Certificates with Substantial Assistance from Ally Financial

(1) RFC's Fraudulent Inducement of FGIC

75. FGIC's participation in the 2005-NC1 Transaction was an essential component of the 2005-NC1 Transaction and enhanced RFC's ability to market the securitization effectively. The Policy allowed RFC to sell the 2005-NC1 Certificates with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

76. In order to induce FGIC to write financial guaranty insurance for the 2005-NC1 Transaction, RFC provided to FGIC, directly or indirectly, a variety of information.

77. First, RFC provided to FGIC initial and final Prospectus Supplements summarizing, among other material information, the credit quality and characteristics of the Mortgage Loans, and RFC's loan underwriting guidelines. RFC represented in the Prospectus Supplement that approximately 75% of the Mortgage Loans "were acquired and evaluated by [RFC] under its AlterNet Program. . . . [and] each [M]ortgage [L]oan determined by [RFC] to be acceptable for purchase would have been originated in accordance with or would have been determined to be generally consistent with the provisions of the [Client] Guide. . . ." Prospectus Supplement at S-32.

78. Second, RFC provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in the 2005-NC1 Transaction, together with representations regarding material statistics about the Loan Pool.

79. Third, RFC provided to FGIC credit ratings for the 2005-NC1 Certificates determined without considering the effect of the Policy. These ratings, which RFC procured from the credit rating agencies, are known as "shadow ratings."

80. Fourth, RFC provided information regarding the performance of loans that were originally underwritten by New Century, generally complied with RFC's AlterNet Program or NCA Program at the time of purchase by RFC, and for which RFC was serving as the Master Servicer.

81. Fifth, as discussed in detail in Section E, RFC provided representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreement regarding the Mortgage Loans specifically and the Loan Pool generally.

82. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the 2005-NC1 Certificates, FGIC relied in part upon representations and warranties regarding RFC's loan underwriting standards made by RFC in the Prospectus and Prospectus Supplement. A Preliminary Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about December 14, 2005, in an email sent by Jacob P. Sheehan on behalf of RFC. The Prospectus, as supplemented by the Prospectus Supplement, was filed with the SEC on December 22, 2005. The Final Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about December 23, 2005, in an email sent by Jacob P. Sheehan on RFC's behalf.

83. The Prospectus Supplement set forth, among other information, the following important characteristics of the Loan Pool: the ranges of and weighted average FICO scores and Credit Grades, the ranges of and weighted average LTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (i.e., whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). Prospectus Supplement at IV-1 – IV-8.

84. RFC publishes its loan underwriting standards in a document the Prospectus refers to as "Residential Funding's Client Guide" as modified from time to time (the "Client Guide"). In general, the Client Guide specifies documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan or line of credit. Depending upon the particular type of loan or line of credit, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories, and/or evidence of closing funds, among other things.

85. RFC disclosed additional data relevant to the AlterNet Program to FGIC. In particular, RFC provided FGIC with the AlterNet Guidelines. RFC also disclosed in the Prospectus Supplement the delinquency and foreclosure experience it had recorded for the AlterNet Program for nine months ending in September 2005 and for the preceding three years. Prospectus Supplement at S-81, S-82.

86. The Prospectus Supplement also includes substantive criteria for eligibility addressing material characteristics of a proposed loan, such as DTI ratios, LTV ratios, occupancy status, and Credit Grades.

87. In particular, RFC represented in the Offering Documents that the Mortgage Loans had been originated with a maximum monthly DTI ratio of 60% and a maximum LTV ratio of 100%. *See* Prospectus Supplement at IV-3. Moreover, with respect to at least 94.11% of the Mortgage Loans, RFC represented that the maximum DTI ratio was 50%, and the maximum LTV ratio for 97.42% of the Mortgage Loans was 95%. *See* Prospectus Supplement at IV-3.

88. RFC represented in the Prospectus Supplement that, with respect to occupancy status, 87.88% of the Mortgage Loans would be secured by the borrower's primary residence. Prospectus Supplement at IV-5.

89. ***Loan Tapes.*** RFC sent via email final loan tapes to FGIC on December 27, 2005. The loan tapes provided by RFC set forth, for each loan in the pool, key characteristics such as the borrower's FICO score, Credit Grades, DTI ratio, and the LTV ratio for the loan. RFC also disclosed in the Prospectus Supplement, with respect to the pool as a whole, aggregate characteristics relevant to the assessment of the credit risk of the pool, including FICO scores, Credit Grades, DTI ratios, and LTV ratios.

90. ***Shadow Rating Letters***. RFC, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. After assessing the credit quality of the Loan Pool, based on the information supplied by RFC, Moody's assigned a shadow rating of Baa1 to the 2005-NC1 Certificates, while S&P assigned the 2005-NC1 Certificates a shadow rating of BBB. These shadow ratings met FGIC's minimum requirements. FGIC required these shadow ratings as an essential condition to its willingness to insure the 2005-NC1 Transaction.

91. ***The Originators – New Century and Home123.*** FGIC relied on RFC to conduct an appropriate inquiry into the business methods and practices and procedures of the Originators.

FGIC also relied on RFC to provide FGIC with information about the Originators and the performance of loans that were originated by either. On December 6, 2005, RFC provided FGIC with a variety of information concerning New Century's practices, procedures and performance in originating mortgage loans. RFC acquired and held a portfolio of loans from New Century that were originated by New Century and serviced by RFC. RFC provided FGIC with performance data regarding these New-Century-originated loans purporting to show that New Century loans were performing better than other originators' loans. FGIC reasonably relied on such information and data in deciding to enter into the I&I Agreement and issue the Policy.

(2) RFC's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

92. Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to participate in the 2005-NC1 Transaction and, ultimately, issue the Policy. Ally Financial knew that the Mortgage Loans underlying the 2005-NC1 Transaction were of a substantially poorer quality than was represented to FGIC and other participants in the Transaction, including investors. Ally Financial further knew that the AlterNet Mortgage Loans were not underwritten to the standards represented in the Offering Documents and warranted in the Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap and its other subsidiaries, Ally Financial knew that the representations and warranties RFC made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

93. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to finance, support, and engender investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until

GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

94. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

95. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Exhibit 99.1.

96. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

97. Ally Financial's corporate restructuring also allowed RFC to explicitly represent and warrant to FGIC in the I&I Agreement that RFC "is solvent, and will not be rendered insolvent by the Transaction. . . . [RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." I&I Agreement § 2.01(a)(xiii). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary RFC.

98. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the 2005-NC1 Transactions—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

99. Moreover, as a result of its domination and control over ResCap and RFC, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of RFC's representations and warranties to FGIC—and that they were untrue when stated. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including RFC, shared numerous directors and senior management as well.

100. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, and RFC, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by RFC was shared among and between RFC and its parent ResCap, as well as ResCap and its parent Ally Financial. Indeed, at least one Ally Financial employee who was involved in the 2005-NC1 Transaction appeared on the Transaction's working group list and received all

distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

101. Another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, including RFC and RAMP, is David C. Walker. Walker joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. In September 2005, shortly before the closing of the 2005-NC1 Transaction, Walker was a director at ResCap, GMACM, RFC, and RAMP, among other ResCap subsidiaries. In the 2005-NC1 Transaction, acting as a director of RAMP, Walker was a signatory to RAMP's May 1, 2005 "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors." Similarly, acting as a director of RFC he executed the "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors." Both of these documents were included in the closing documents of the 2005-NC1 Transaction.

102. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to RFC in fraudulently inducing FGIC to participate in the Transaction and issue the Policy. Further, the issuance of the Policy, which made the 2005-NC1 Transaction possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. RFC's Representations, Warranties, and Affirmative Covenants

103. In connection with the 2005-NC1 Transaction, RFC, at the direction of Ally Financial, either directly or indirectly through ResCap, made numerous representations, warranties, and affirmative covenants to FGIC. These representations and warranties were

material and concerned, among other things, the way the loans were selected and evaluated, the characteristics of the Mortgage Loans, and the accuracy of the information supplied to FGIC. RFC also promised to provide timely Mortgage Loan file information and to provide FGIC with a variety of information, including access to RFC's books and records and to RFC's Servicing Officer and its independent accountants.

104. RFC's representation, among others, that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into the 2005-NC1 Transaction and to issue the Policy. Further, the I&I Agreement's incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and every one of the representations and warranties that RFC made in connection with the 2005-NC1 Transaction.

105. FGIC, for its part, reasonably relied on the information available to it regarding the underlying Mortgage Loans and the representations and warranties provided by RFC. Since FGIC had neither the right nor duty under the Operative Documents, nor the practical ability, to review the thousands of underlying Mortgage Loan files in the days available to it prior to the closing of the 2005-NC1 Transaction**,** RFC knew that FGIC had no choice but to rely on RFC's representations regarding the underlying loans in determining whether to issue the Policy. Further, FGIC had no reason to believe that these representations were not true and accurate.

106. RFC included 4,613 individual Mortgage Loans in the 2005-NC1 Trust. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation, and other forms of documentation necessary to support underwriting decisions. Unlike RFC, FGIC was under no contractual duty whatsoever to review the Mortgage Loans.

Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by RFC regarding its evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on the fact that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

107. Based on the information received by FGIC and the representations and warranties given by RFC, FGIC entered into the I&I Agreement and agreed to issue the Policy to the Trustee for the benefit of the holders of the 2005-NC1 Certificates. In return for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the 2005-NC1 Certificates, commensurate with the risk FGIC thought it was taking. Specifically, FGIC received 0.20% per annum of the aggregate balance of the 2005-NC1 Certificates for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties, and affirmative covenants provided by RFC.

108. RFC's information, representations, and warranties were materially false when disclosed and/or provided by RFC. RFC knew that this information, and its representations and warranties, were materially false when made. RFC also knew that this information and the representations and warranties were essential to FGIC's decision to issue the Policy. Indeed, RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and issue the Policy. The issuance by FGIC of the Policy—induced by RFC's fraudulent misrepresentations and substantial assistance of Ally Financial—made the 2005-NC1 Certificates eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(1) Representations, Warranties, and Affirmative Covenants Relating to the Operative and Offering Documents

109. Under Section 2.01 of the I&I Agreement, RFC made the following representations and warranties, among others (emphasis added in each case):

- *Accuracy of Information*. **None of the Operative Documents nor any other material information relating to the Mortgage Loans**, the operations of RFC . . . or the financial condition of RFC . . . furnished to [FGIC] . . . by RFC . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made**. [RFC] has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change. Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to RFC . . . that would render any of the Documents untrue or misleading in any material respect.

- *Compliance with Securities Laws*. The offering and sale of the Class A Certificates complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading** . . . .

- *Operative Documents*. **Each of the representations and warranties of RFC** . . . **contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects** . . . .

- *Solvency; Fraudulent Conveyance*. [RFC] is solvent, and will not be rendered insolvent by the Transaction. . . . **[RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**. [RFC] does not intend to incur, and does not believe that it has incurred, debts beyond its ability to pay as they mature. . . . [RFC] is not entering into the Operative Documents, or transferring any of its assets in connection with the Transaction, with any intent to hinder, delay or defraud any of its creditors.

110. *First*, in the I&I Agreement, RFC represented and warranted that "[n]one of the Operative Documents nor any other material information relating to the Mortgage Loans, the operations of RFC . . . or the financial condition of RFC . . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any

material respect when made." I&I Agreement § 2.01(a)(x). Through these Operative and Offering Documents, as detailed above, RFC communicated several material facts about the characteristics of the mortgage loans sold to the 2005-NC1 Trust.

111. *Second*, in the I&I Agreement, RFC also represented and warranted that the "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading. . . ." I&I Agreement § 2.01(a)(xi). As discussed above, in the Prospectus Supplement, RFC represented that the Mortgage Loans sold to the 2005-NC1 Trust had been underwritten in substantial conformity with RFC's underwriting standards.

112. *Third*, the I&I Agreement incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the respective related Operative Documents: "Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects . . . ." I&I Agreement § 2.01(a)(xii). The incorporation by reference of the Operative Documents into the I&I Agreement was intended to allow FGIC to rely on any representation and warranty that RFC made to other entities, such as investors or the Trustee, in connection with the 2005-NC1 Transaction. Indeed, the I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. I&I Agreement § 2.02(k).

113. *Fourth*, RFC also provided information to FGIC concerning Mortgage Loans in the 2005-NC1 Transaction. *See* I&I Agreement § 2.02(c)(iii). This information included schedules (or "loan tapes") that set forth statistics about the Loan Pool. The loan tapes purported to describe key characteristics relevant to the assessment of risk, including DTI and LTV ratios,

occupancy status, Credit Grades, and FICO scores. *See* PSA § 1.01. On information and belief, the loan tape FGIC received at closing contains the same information as is contained in the mortgage loan schedule, referred to in Section 4(a) of the A&A Agreement.

114. In turn, in the A&A Agreement, RFC represented that all the information in that mortgage loan schedule "is true and correct in all material respects as of the date or dates respecting which such information is furnished." § 4(a).

115. As a result of incorporating into the I&I Agreement the representations and warranties in the related Operative Documents, RFC incorporated representations and warranties regarding the underwriting of the Mortgage Loans included in the 2005-NC1 Transaction. These representations and warranties set forth the standards governing each Mortgage Loan, including, significantly, the representation that each Mortgage Loan had been underwritten in compliance with RFC's underwriting guidelines.

116. In particular, in the A&A Agreement, RFC represented and warranted as the Mortgage Loans:

- **Information in Mortgage Loan Schedule**: "The information set forth in the Mortgage Loan Schedule for such Mortgage Loans is true and correct in all material respects as of the date or dates respecting which such information is furnished." § 4(a).

- **No Material Breach Or Default**: "[T]here is no default, breach, violation or event of acceleration existing under the terms of any Mortgage Note or Mortgage and no event which, with notice and expiration of any grace or cure period, would constitute a default, breach, violation or event of acceleration. . . , and no such default, breach, violation or event of acceleration has been waived by RFC or by any other entity involved in servicing a Mortgage Loan." § 4(e).

- **Delinquent Loans**: "As of the Cut-off Date. . . , 0.1% of the Mortgage Loans. . . are 30 to 59 days Delinquent in payment of principal and interest and none of the Mortgage Loans are 60 or more days Delinquent in payment of principal and interest." § 4(h).

117. Moreover, in the I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—RFC specifically covenants that it will "comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreement § 2.02(a), (k).

118. RFC also agreed that it had to receive FGIC's consent before modifying or amending any of the Operative Documents. The I&I Agreement provides, "[RFC] will not modify, waive or amend, or consent to any modification, waiver or amendment of, any of the terms, provisions or conditions of the Operative Documents to which it is a party . . . without the prior written consent of [FGIC], which consent shall not be unreasonably withheld, conditioned or delayed." § 2.03(b).

(2) Representations, Warranties and Affirmative Covenants Regarding Access to Information and Servicing

119. In addition to the representations and warranties referenced above, the I&I Agreement provides that RFC has the contractual obligation, as Master Servicer, to service the Mortgage Loans in compliance with the PSA and to provide FGIC with access to the underlying Mortgage Loans and servicing notes, and as Seller, to procure custodial interim certifications stating that all mortgage files were complete and properly transferred into the appropriate trust ("Interim Certification"). Specifically, the I&I Agreement provides:

- *Other Information*. (A) Promptly upon request, such other data as [FGIC] may reasonably request relating to the Mortgage Loans, the servicing of the Mortgage Loans . . . , the Transaction or the ability of any of RFC or the Depositor to perform its obligations under the Operative Documents, and (B) all information required to be furnished to the Trustee or the Holders, as the case may be. § 2.02(c)(v).

- *Access to Records; Discussions with Officers and Accountants*. On an annual basis, or at any time when a Shortfall Event shall have occurred and be continuing, *upon the reasonable request of [FGIC], it will permit [FGIC] or its authorized agents, or cause [FGIC] or its authorized agents to be permitted* . . . to inspect the

> books and records of RFC . . . ; to discuss the affairs, finances and accounts of RFC . . . as they relate to the Mortgage Loans, the Transaction or the ability to perform [its] obligations under the Operative Documents with a Servicing Officer . . . ; [and] if [FGIC] reasonably believes that a Material Adverse Change may have occurred and with RFC's consent, which consent shall not be unreasonably withheld or delayed, to discuss the affairs, finances and accounts of RFC . . . with the independent accountants of such Person; *provided, however*, that officers of RFC shall have the right to be present during such discussions. In addition, if requested by [FGIC], on an annual basis, or otherwise when reasonably requested by [FGIC], RFC will . . . cause the Custodian to deliver to [FGIC] an updated certification, in the form of the "Interim Certification" required under the Custody Agreement, with an exceptions list attached thereto, to enable [FGIC] to track the progress of recording of Mortgages and Assignments with respect to the Mortgage Loans. . . . § 2.02(e) (emphasis added).

- *Servicing of Mortgage Loans*. All Mortgage Loans will be serviced in all material respects in compliance with the [PSA]. § 2.02(l).

- *Due Diligence*. If in [FGIC's] reasonable judgment circumstances so warrant, based on the performance of the Transaction, [FGIC] shall have the right, so long as the Class A Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices, at [FGIC]'s expense and in reasonable manner convenient to both RFC and [FGIC]. This due diligence right is in addition to the access provided and the other rights provided for in Section 2.02(e) of this Insurance Agreement. § 2.02(m).

F. RFC's Breaches of Its Representations, Warranties, and Affirmative Covenants

120. As discussed above, FGIC relied on material representations and warranties made by RFC regarding the manner in which the Mortgage Loans were selected and evaluated, the characteristics of those loans, and the accuracy and completeness of information RFC supplied to FGIC. Based on those representations and warranties, FGIC agreed to issue the Policy. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed above, the risk that FGIC assumed when it issued the Policy was many times greater than the risk disclosed by RFC's representations and warranties. RFC breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

121. The 2005-NC1 Transaction has performed poorly; delinquencies and defaults for Mortgage Loans in the 2005-NC1 Transaction have been substantial, thus diminishing cash flow to the 2005-NC1 Trust, which caused and will continue to cause claims to be presented to FGIC under the Policy to cover these shortfalls. As of November 2011, a total of 1,933 Mortgage Loans, representing 42.6% of the loans underlying the 2005-NC1 Transaction had posted a loss or were severely delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue the Policy, RFC assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with RFC's representations and warranties.

122. The poor performance of the Mortgage Loans has reduced the cash flow to the 2005-NC1 Trust, which has caused and will continue to cause claims to be presented to FGIC under the Policy to cover these shortfalls. Indeed, as of December 2011, more than $54 million in claims had been presented to FGIC in connection with the 2005-NC1 Transaction. FGIC expects tens of millions of dollars more in claims to be presented to it under the 2005-NC1 Transaction in the future.

(1) RFC's Denial of Loan File Requests

123. As the 2005-NC1 Transaction continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blashko, an RFC/ResCap employee, via e-mail demanding that RFC provide 500 of the Mortgage Loan files. Having received no response from RFC to its earlier requests, FGIC sent a follow-up e-mail on February 3, 2011 regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information

and belief, the request required authorization from officers at Ally Financial, and RFC/ResCap's response was directed by officers at Ally Financial.

124. On February 14, 2011, and again on April 28, 2011, FGIC sent further follow-up letters requesting loan files.

125. In finally responding to FGIC's request for information, RFC refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans"). Instead, it only provided FGIC with a portion of the requested loan files, consisting solely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

126. Pursuant to the PSA and the I&I Agreement, FGIC is entitled to reasonable access to the documentation regarding all of the Mortgage Loans. Section 2.02(m) of the I&I Agreement provides that FGIC "shall have the right, so long as the [2005-NC1] Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans . . . ." Notably, there is no limitation in the I&I Agreement as to the nature of the Mortgage Loan files that are subject to review. Further, Section 2.02(c)(v) of the I&I Agreement states that "[p]romptly upon request," RFC must provide to FGIC "such other data as [FGIC] may reasonably request relating to the Mortgage Loans . . . ."

127. By producing only non-performing Mortgage Loan files, in contravention of the I&I Agreement, RFC has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

(2) RFC's Denial of Interim Certification Requests

128. On June 21, 2011, FGIC demanded, pursuant to Section 2.02(e) of the I&I Agreement, that RFC promptly cause the Custodian under the 2005-NC1 Transaction to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement, with an exceptions list attached thereto. An Interim Certification would

enable FGIC to track the progress of the recording of mortgages and assignments with respect to the related Mortgage Loans.

129. Again on December 8, 2011, FGIC wrote RFC demanding the Interim Certification, noting that it had been over five months since FGIC's initial letter and that RFC had failed to respond.

130. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to these requests.

(3) RFC's Denial of Servicing Notes

131. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(iv) of the I&I Agreement, that RFC furnish or cause to furnish the servicing notes for the Mortgage Loans.

132. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to requests for servicing notes.

(4) RFC's Denial Of FGIC's Access To Books and Records, Servicing Officer, and RFC's Independent Accountants

133. On December 1, 2011, in accordance with its express rights under Sections 2.02(e)(i)-(iii) of the I&I Agreement, FGIC requested to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances, and accounts of RFC with the Servicing Officer of RFC; and (iii) discuss the affairs, finances, and accounts of RFC with RFC's independent accountants.

134. To date, RFC has failed to respond to this request, in violation of the I&I Agreement.

(5) Breaches Uncovered In Loan File Reviews

135. As discussed above, RFC improperly refused to provide FGIC with any loan files for "performing loans" when such loans were demanded on several occasions. Accordingly, when it requested files for 500 of the Mortgage Loans for the 2005-NC1 Transaction in

December 2010, FGIC received only a portion of that sample and that portion consisted of only Mortgage Loans that RFC characterized as "non-performing."

136. After receiving the loan files for those non-performing Mortgage Loans, FGIC evaluated those Mortgage Loans to determine whether they contained material breaches of the I&I Agreement and the 2005-NC1 Operative Documents necessitating repurchase under the related Operative Documents. To perform this review, FGIC hired an independent outside consultant, having particular skill, experience and expertise in the review, evaluation and re-underwriting of mortgage loans.

137. The independent consultant's review revealed that approximately 79% of those Mortgage Loans supposedly underwritten in accordance with the AlterNet Program contained breaches of the representations and warranties in the I&I Agreement.

138. A small sample of these material breaches and underwriting violations are listed below:

- Loan Number 10235745: the loan was approved using stated income in the amount of $3,500 with a DTI ratio of 47%; however, a written verification of employment contained in the Mortgage Loan File reported the borrower's monthly income as $2,500, raising the DTI ratio to 67%, which exceed the maximum DTI ratio of 50% allowed under the program guidelines for the particular type of loan. In addition, the loan application indicated that the borrowers rented their residence for one year prior to purchasing the property, however the mortgage loan file did not contain written verification of this, as required by the program guidelines.

- Loan Number 10235901: the Mortgage Loan File only contained a single page of the Loan Application. Furthermore, there was no credit report, appraisal, income documentation or other documents necessary to determine whether the borrower met the relevant program guidelines for inclusion in the 2005-NC1 mortgage pool.

- Loan Number 10234487: the credit report contained in the loan file reflected that the borrower had several foreclosures within the past three years, making the loan ineligible under relevant program guidelines. The borrower only provided a letter indicating that his identity was stolen and that the mortgages were not taken out by him; however, the mortgage loan file did not contain a police report nor did it

contain a formal exception authorizing the loan to be approved.

139. These examples of underwriting violations—but a small smattering of the extensive defects among the Mortgage Loans—evidence significant breaches of the A&A Agreement and the I&I Agreement.

140. On information and belief, RFC is and has long been aware that many of the Mortgage Loans were non-conforming and breached its own representations and warranties. Despite this knowledge, RFC has failed to take steps to repurchase the non-conforming loans or replace them with conforming loans.

(6) Breaches Uncovered Using Loan Pool Data

141. In addition to the loan-level review discussed above, FGIC commissioned an independent consultant—a leading provider of financial, property and consumer information, such as property valuation services using automated property valuation tools—to test the accuracy of RFC's representations and warranties relating to the Mortgage Loans regarding occupancy status and LTV ratios. The consultant extracted information and data relating to 3,933 Mortgage Loans for occupancy status and 2,311 Mortgage Loans for LTV ratios.

a. Breaches of Owner-Occupancy Representation and Warranty

142. RFC represented in the Prospectus Supplement that, with respect to occupancy status, 87.88% of the Mortgage Loans would be secured by the borrower's primary residence. Prospectus Supplement at IV-5.

143. Based on the information provided, FGIC determined that for the Mortgage Loans only approximately 76% were owner-occupied as a primary residence.

144. The Prospectus Supplement therefore materially overstated the percentage of Mortgage Loans in their respective pools that were owner-occupied as a primary residence. As

such, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

145. FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that, as of November 2011, were delinquent for more than 90 days, in foreclosure, liquidated, or have posted a loss) in the 2005-NC1 Transaction for loans that were determined after review to be non-owner-occupied was 44.7%.

b. Breaches of LTV Ratio Representation and Warranty

146. The Prospectus Supplement also provided information relating to the LTV ratios of the underlying Mortgage Loans.

147. LTV information provided in the Prospectus Supplement provided that the loans had generally been originated with a maximum LTV ratio of 100%. *See* Prospectus Supplement at IV-3. LTV information provided in the Prospectus Supplement included (1) the average weighted LTV ratio for the Mortgage Loans, and (2) the number and aggregate value of the Mortgage Loans with LTV ratios in a given percentage band (e.g., the number of Mortgage Loans with LTV ratios of between 80% and 85%, between 85% and 90%, and so on). Prospectus Supplement at IV-3. The Prospectus Supplement reported that *none* of Mortgage Loans had a LTV ratio over 100 percent. *See* Prospectus Supplement at IV-3.

148. Using an industry standard automated valuation model to calculate the value of the underlying property at the time the Mortgage Loan was originated, FGIC determined that approximately 11.1% of the Mortgage Loans—as opposed to *none* of the loans, as reported in the Prospectus Supplement—had an original LTV ratio above 100%; and approximately 16% of the Mortgage Loans—as opposed to fewer than 2.58% of the loans, as reported in the Prospectus Supplement—had an original LTV ratio above 95%. In addition, RFC represented in the Prospectus Supplement that the weighted average LTV ratio of the Mortgage Loans at

origination was 81.64% for 2005-NC1 Group I and 79.19% for 2005-NC1 Group II, but FGIC determined that the actual weighted average LTV ratio of the Mortgage Loans at origination was approximately 86.1% for Group I and approximately 83.4% for Group II. Thus, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

149. Moreover, FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that, as of November 2011, were delinquent for more than 90 days, in foreclosure, liquidated, or have posted a loss) in the 2005-NC1 Transaction for loans where the automated valuation model indicated a LTV greater than 100% was over 52.5%.

150. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicates the clear breach of RFC's contractual representations, warranties, and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans, including the guidelines to which the Mortgage Loans were underwritten. Specifically, RFC has breached representations and warranties stating, for the 2005-NC1 Transaction, that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (i.e. the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of RFC in the Operative Documents (including each representation and warranty in the A&A Agreement) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- each Mortgage File contains all required documents and instruments, and;
- Approximately 75% of the Mortgage Loans were acquired and evaluated by RFC under its AlterNet Program and approximately 25% of the Mortgage Loans were acquired and evaluated by RFC under its NCA Program.

151. It is reasonable to conclude—based on what is known by FGIC and as a result of what is being wrongly withheld from FGIC—that many of the 4,613 Mortgage Loans held by the 2005-NC1 Trust at closing evidenced similar breaches of RFC's representations and warranties.

152. Indeed, based on the information gathered from FGIC's loan file review and the information extracted by FGIC's consultant relating to LTV ratios and owner-occupancy rates discussed above, FGIC believes that the Transaction-wide defect rate for the Mortgage Loans is likely to be at least 47.5%.

153. Moreover, the true scope of the material underwriting failures is unknown given RFC's refusal to provide FGIC with pertinent—and contractually required—information. This refusal in itself constitutes a breach of RFC's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

G. RFC's Fraud

154. The material breaches of RFC's representations and warranties, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants RFC made to FGIC to induce its participation in the Transaction. The extraordinarily high defect and default rate among the Mortgage Loans demonstrates not merely that RFC breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the Policy, RFC would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because RFC refuses to provide all of the requested Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

155. All of the Mortgage Loans underlying the 2005-NC1 Transaction were acquired by RFC. As such, RFC had the access and ability to evaluate the Mortgage Loan files and to determine if the loans were in substantial compliance with the applicable RFC underwriting guidelines and if the loans breached other representations and warranties made by RFC.

156. To induce FGIC to enter into the 2005-NC1 Transaction, RFC provided FGIC with a loan tape, which contained false and misleading information regarding, among other things, the LTV and DTI ratios, occupancy status, Credit Grades and FICO scores of the borrowers.

157. In addition, RFC made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the 2005-NC1 Trust. RFC was well aware that FGIC would not agree to insure the 2005-NC1 Certificates unless RFC obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, RFC provided Moody's and S&P with the same false information regarding the credit quality of the underlying mortgage loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2005-NC1 Certificates that met FGIC's minimum requirements—Baa1 and BBB, respectively. In this way, RFC made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that RFC would pass on to FGIC, and second, by causing shadow ratings of the 2005-NC1 Certificates to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

158. RFC also made material representations and warranties and affirmative covenants to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the standards to which the Mortgage Loans were underwritten.

159. For example, in the Prospectus Supplement (and in the I&I Agreement by incorporation) RFC assured FGIC that approximately 75% of the Mortgage Loans "were acquired and evaluated by [RFC] under its AlterNet Program. . . . [and] each [M]ortgage [L]oan determined by [RFC] to be acceptable for purchase would have been originated in accordance with or would have been determined to be generally consistent with the provisions of the [Client] Guide." Prospectus Supplement at S-32. As such, RFC represented to FGIC that, in the case of each loan within the pool, an underwriter had made an assessment that the borrower had the ability to repay his or her loan, after receiving and reviewing all applicable employment, credit, and property information, as provided for in the AlterNet Program guidelines.

160. Moreover, the A&A Agreement and Prospectus Supplement (and the I&I Agreement by incorporation) also contained false and misleading representations about the Mortgage Loans. In particular, RFC misrepresented that, as of the closing: (i) the information set forth in the Mortgage Loan Schedule was true and correct in all material respects; (ii) the Mortgage Loans met certain credit grades; and (iii) there was no default breach, violation or event of acceleration existing under any Mortgage Note or Mortgage.

161. Therefore, at the time of the closing of the 2005-NC1 Transaction, RFC either (1) knew or should have known that its representations were materially false because RFC had not, among other things, determined if the Mortgage Loans were in fact at least "generally consistent" with the AlterNet Program, or (2) had reviewed whether the Mortgage Loans were at least "generally consistent" with the AlterNet Program, had determined that they were not, but nonetheless materially misrepresented to FGIC that the Mortgage Loans were at least "generally consistent" with the AlterNet Program.

162. These representations were essential to FGIC's decision to issue the Policy. These representations and warranties were false when stated. RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and to issue the Policy. The true information regarding these loans simply could not substantiate RFC's assurances. In short, no amount of RFC promising that the loans met certain standards actually made those promises true.

163. RFC's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC as well as to a multitude of suits and the potential for more litigation to come.

164. Consistent with this pattern of behavior, RFC defrauded FGIC into issuing the Policy, through its knowing misrepresentations.

H. Ally Financial Aids and Abets RFC's Fraud

165. Ally Financial provided substantial assistance to RFC in fraudulently inducing FGIC to issue the Policy. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties RFC made regarding the nature of RFC's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

I. The Federal Government Alleges Fraud Against RFC Relating to the 2005-NC1 Transaction

166. As discussed above, the FHFA recently filed suit in the Supreme Court of New York against RFC for fraud, aiding and abetting fraud, and violating state and federal securities laws in connection with its role in the public filing of offering documents, which allegedly contained false and misleading statements.

167. In support of its claims, the FHFA performed a review of loan-level data for randomly-selected 2005-NC1 Group II Mortgage Loans to assess whether the information provided in the Prospectus Supplement for the 2005-NC1 Transaction was true and accurate. FHFA Complaint at ¶ 94. For each of the sampled loans, FHFA used an industry standard automated valuation model ("AVM")—on information and belief, similar to the approach used by FGIC—to calculate the value of the underlying property at the time the mortgage loan was originated. (Id. ¶ 99).

168. Similar to FGIC's findings with respect to 2005-NC1, the FHFA's review of the sample data confirmed, on a statistically-significant basis, that the information provided in the 2005-NC1 Prospectus Supplement concerning owner-occupancy and LTV ratios was materially false.

169. The FHFA's analysis determined that RFC overstated the true percentage of non-owner-occupied properties within the 2005-NC1 underlying Group II Mortgage Loan pool, overstated the true percentage of 2005-NC1 underlying Group II Mortgage Loans with an LTV ratio at or below 80 percent, and falsely represented that none of the loans had an LTV ratio above 100%. FHFA Complaint ¶ 98 & Table 6; ¶ 102 & Table 7.

J. RFC's Breach of Obligations as Master Servicer

(1) Failure to Remedy Subservicing Deficiencies and to Provide Information

170. RFC, as Master Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for each of the HSA Transactions, including, but not limited to, its obligations to follow proper servicing procedures, and to sufficiently monitor and manage the performance of the subservicer with respect to its duties under each Transaction.

171. RFC took responsibility for the servicing of the Mortgage Loans through its wholly owned subsidiary HomeComings and RFC had certain related contractual obligations under the I&I Agreement and the PSA with respect to the 2005-NC1 Transaction. Under the I&I Agreement, RFC covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the [PSA]." I&I Agreement § 2.02(l). Under the PSA, RFC is "obligated and liable to . . . [FGIC] for the servicing and administering of the [Mortgage Loans]," and in doing so is required to "follow[] such procedures as it would employ in its good faith business judgment and which are normal and usual in its general mortgage servicing activities." PSA §§ 3.01(a), 3.04. As such, on each occasion that HomeComings failed to service and administer the Mortgage Loans in conformity with generally accepted servicing practices (including RFC's own servicing guidelines), RFC is liable "to the same extent and under the same terms and conditions as if the Master Servicer alone were servicing and administering the Mortgage Loans." PSA §§ 3.01(a), 3.04.

172. During 2007, the servicing operations of GMAC Mortgage, GMAC-RFC, and HomeComings were integrated into ResCap. Since the time of the integration, on information and belief, HomeComings has been deficient in its borrower contact, collections and loss mitigation standards. An onsite review of the Ally Financial servicing arm's headquarters, including those of HomeComings and RFC, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis, revealed, *inter alia*: (i) inadequate call center staffing—staffing unable to handle increased incoming and outgoing call volumes; (ii) call center staffing turnovers as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when HomeComings does not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the

mortgaged property to discuss loss mitigation strategies with borrowers in default; and (v) severely infrequent use of alternative loss mitigation strategies as compared to the industry.

173. On information and belief, RFC has failed to remedy any of the deficient servicing practices in which HomeComings is engaged as subservicer.

174. In addition, RFC disclosed to FGIC for the first time in March 2009 that it classified loans into one of three categories or "Risk Tiers" under a protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

175. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. RFC disclosed to FGIC that all of the mortgage loans in FGIC-insured, RFC-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the 2005-NC1 Transaction, were placed in the lowest category of risk. For such mortgage loans, regardless whether they were (i) first- or second- lien, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities—all of which are factors that require more attentive servicing—delinquent borrowers were called at a later stage of delinquency and less frequently than, loans in higher risk categories. As the purchaser of the Mortgage Loans, however, RFC clearly knew that such Mortgage Loans, by their very nature, required particularized servicing such as that provided by HomeComings before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure

by RFC to ensure that the Mortgage Loans were serviced and administered in accordance with "good faith" business practices constitutes a breach of the PSA and the I&I Agreement. *See* PSA §§ 3.01(a), 3.04; I&I Agreement § 2.02(l).

176. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, RFC has still failed to provide such information.

(2) RFC allowed Excessive Loan Modifications And Amended the PSA without FGIC's Consent

177. RFC, as Master Servicer, agreed that it would "not modify, waive or amend, or consent to any modification, waiver or amendment of" the PSA without the prior written consent of FGIC. I&I Agreement § 2.03(b).

178. On August 10, 2009, RFC requested FGIC's consent in order to execute an amendment (the "Purported Amendment") to allow RFC to modify 100% of the Mortgage Loans rather than what would otherwise be allowed under the PSA. FGIC requested that RFC provide FGIC with sufficient information, including RFC's policies and procedures used for underwriting and processing prospective mortgagors for the Home Affordable Modification Program ("HAMP"), to respond to RFC's request for FGIC's consent. RFC never provided that information. Despite the fact that FGIC never consented to the additional loan modifications, it appears that RFC nonetheless proceeded as if its Purported Amendment had been adopted in contravention of FGIC's contractual rights. *See* I&I Agreement § 2.03(b).

179. Thus, to amend the PSA, RFC had to receive FGIC's consent. FGIC never gave its consent. Therefore, RFC breached section 2.03(b) of the I&I Agreement.

180. On information and belief, RFC has collected significantly higher servicing fees as a result of adopting the Amendment and modifying particular Mortgage Loans.

181. FGIC has requested additional information in order to determine whether RFC is in breach of its servicing obligations. In contravention of FGIC's contractual rights, RFC has failed to provide such information, including servicing notes, to FGIC. On information and belief, RFC, as Master Servicer, also knew of material breaches of representations and warranties and did not notify FGIC thereof, or cause the repurchase of the Mortgage Loans affected thereby. Accordingly, FGIC reserves its rights to assert additional causes of action relating to RFC's servicing obligations.

K. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

182. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns RFC and GMACM. Ally Financial—as the ultimate parent of ResCap, RFC and GMACM—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, RFC and GMACM.

183. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, RFC and GMACM. Ally Financial exercised its direction and control in connection with the 2005-NC1 Transaction. At times, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

184. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and the FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and

indirect subsidiaries." *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

185. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of RFC Directly and Indirectly Through its Control of ResCap

186. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

187. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

188. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[1] Since incorporation, the ownership of ResCap has not changed—Ally Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

189. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the proposed 2005 operating agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement") (emphasis added).

190. Moreover, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, and RAMP, among other Ally Financial subsidiaries.

[1] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the Securities and Exchange Commission (the "SEC") on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

191. The 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

192. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

193. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part of our plan and a key part of <u>our value creation</u>." *Id*. (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

194. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to

prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citi, which provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept. 19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id.*

195. Moreover, there is substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

196. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 9, 2011).

197. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a

GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

198. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed RFC and GMACM as part of its own business. For example, in its investor presentation from 2007, ResCap declares that RFC and GMACM "are owned *and operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial wasn't directly controlling RFC and GMACM, it was using ResCap as an instrument to do so.

199. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

200. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage

servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one RFC has with respect to the 2005-NC1 Transaction as Master Servicer.

201. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

202. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

Q: Could you please state your name for the record.
A: My name is Jeffrey Stephan.
Q: Okay. And who do you work for?
A: GMAC, LLC [Ally Financial].
Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.

Q: Okay.
A: It's GMCA [sic] Mortgage Corporation.
Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?
A. Yes.
Q. So these entities no longer currently exist?
A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

L. FGIC's Contractual Remedies Under The I&I Agreement

203. The I&I Agreement provides FGIC with broad remedies for RFC's breaches of its representations and warranties. Section 5.02(b) of the I&I Agreement provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this Insurance Agreement, the Pooling and Servicing Agreement or the other Operative Documents, or existing at law or in equity.

204. RFC also agreed in Sections 3.03(b) and 3.03(c) of the I&I Agreement:

> Anything in Sections 2.01(l) and 3.03(a) hereof or in any Operative Document to the contrary notwithstanding, the Insurer shall be entitled to full reimbursement from RFC for (i) any payment made under the Policy arising as a result of RFC's failure to substitute for or deposit an amount in respect of any defective Mortgage Loan as required pursuant to Section 4 and Section 5 of the Assignment Agreement, together with interest on any and all such amounts remaining unreimbursed . . . from the date such amounts became due until paid in full. . . .

I&I Agreement § 3.03(b); and

> RFC agrees to pay to [FGIC] any and all reasonable charges, fees, costs and expenses that [FGIC] may reasonably pay or incur, including reasonable attorneys' and accountants' fees and expenses, in connection with (i) the enforcement, defense or preservation of any rights in respect of any of the Operative

> Documents, including defending, monitoring or participating in any litigation or proceeding . . . relating to any of the Operative Documents . . . .

I&I Agreement § 3.03(c).

205. In addition, RFC agreed in Section 3.04(a) of the I&I Agreement:

> to pay, and to protect, indemnify and save harmless, [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages, costs or expenses (including reasonable fees and expenses of attorneys . . .) of any nature arising out of or relating to the breach by RFC or the Depositor of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the transactions contemplated by the Operative Documents by reason of . . . . the breach by RFC or the Depositor of any representation, warranty . . . or covenant under any of the Operative Documents or the occurrence, in respect of RFC or the Depositor, under any of the Operative Documents of any "event of default" . . . .

I&I Agreement § 3.04(a) & (a)(iv).

206. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, RFC agreed to repurchase or substitute Mortgage Loans that did not conform to RFC's representations and warranties, and to indemnify FGIC for claims and losses arising from RFC's breach of any representation or warranty.

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Material Breach of the I&I Agreement—Declaratory Relief Regarding RFC's Indemnification Obligation)

207. FGIC re-alleges and incorporates by reference paragraphs 1 through 206 of this Complaint.

208. The I&I Agreement is a valid and binding agreement between the parties.

209. FGIC has performed its obligations under the I&I Agreement.

210. RFC's representations and warranties were material to FGIC's decision to insure the 2005-NC1 Certificates and to issue the 2005-NC1 Policy.

211. RFC's pervasive and material breaches of its representations and warranties constitute a material breach of the I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

212. Pursuant to Section 3.04(a) of the I&I Agreement, RFC must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by RFC of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

213. As explained above, RFC has breached numerous representations and warranties in the 2005-NC1 Offering and Operative Documents, for example, those contained in Section 2.01 of the I&I Agreement. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

214. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

215. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must jointly and severally indemnify FGIC for all sums arising out of the 2005-NC1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the 2005-NC1 Policy and to the payment of all future amounts that

may fall due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or claims are presented.

216. In addition, FGIC seeks a declaration that RFC must indemnify FGIC for all sums arising out of the 2005-NC1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the 2005-NC1 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2005-NC1 Policy as and when such sums fall due or claims are presented.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Fraudulent Inducement—I&I Agreement)

217. FGIC re-alleges and incorporates by reference paragraphs 1 through 216 of this Complaint

218. RFC induced FGIC to enter into the I&I Agreement and to issue the Policy by making false representations and warranties about its business practices and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

219. As explained above, RFC knowingly made materially false statements to, and/or omitted material facts from, FGIC with the intent to induce detrimental reliance by FGIC.

220. RFC intended for FGIC to rely on RFC's material false statements and/or omissions. FGIC had no reason to believe that RFC's representations were false, and reasonably and justifiably relied on RFC's material false statements and/or omissions regarding information uniquely in the possession of RFC when it decided to enter into the I&I Agreement and to issue the Policy for the 2005-NC1 Certificates.

221. As a result of RFC's material false statements and omissions, FGIC entered into the I&I Agreement, issued the Policy, and thereby agreed to insure certificates backed by a pool of Mortgage Loans that was, in actuality, materially different from the Loan Pool that RFC represented would collateralize the 2005-NC1 Transaction.

222. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

223. As a result of RFC's material false statements and omissions, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

224. In addition, RFC is separately liable for such damages.

THIRD CAUSE OF ACTION

(Alternatively Against Ally Financial: Aiding and Abetting Fraudulent Inducement—I&I Agreement)

225. FGIC re-alleges and incorporates by reference paragraphs 1 through 224 of this Complaint.

226. As explained above, Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to issue the Policy.

227. RFC could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

228. Both Ally Financial knew that RFC fraudulently induced FGIC issue the Policy for the 2005-NC1 Transaction.

229. Ally Financial's statements materially aided RFC's fraudulent inducement.

230. As a result of Ally Financial's aiding and abetting RFC's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Representations, Warranties and Affirmative Covenants)

231. FGIC re-alleges and incorporates by reference paragraphs 1 through 230 of this Complaint.

232. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

233. FGIC has performed its obligations under the I&I Agreement.

234. As explained above, RFC has materially breached its representations and warranties under Section 2.01 of the I&I Agreement.

235. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

236. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

237. In addition, RFC is separately liable for such damages.

FIFTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Declaratory Relief Regarding Access to Information)

238. FGIC re-alleges and incorporates by reference paragraphs 1 through 237 of this Complaint.

239. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

240. FGIC has performed its obligations under the I&I Agreement.

241. Pursuant to Section 2.02(c) of the I&I Agreement, RFC agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such

other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the 2005-NC1 Transaction. FGIC further has the right to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(m) of the I&I Agreement.

242. As discussed above, pursuant to the I&I Agreement, FGIC made numerous reasonable written requests that RFC furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by RFC, and others, concerning the Mortgage Loans.

243. RFC has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

244. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

245. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, RFC agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer; and (iii) discuss the affairs, finances and accounts of RFC with RFC's independent accountants.

246. FGIC made a reasonable request to inspect the books and records, discuss the affairs, finances and accounts with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants on December 1, 2011.

247. RFC has failed to make available such persons or to produce such information.

248. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreement, Section 2.02(e)(i)-(iii).

249. Pursuant to Section 2.02(e) of the I&I Agreement, RFC agreed, on an annual basis or when reasonably requested by FGIC, to cause the Custodian to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement to enable FGIC to track the progress of the recording of Mortgages and Assignments with respect to the Mortgage Loans.

250. FGIC made a reasonable request for the Interim Certification on June 21, 2011.

251. RFC has failed to cause the Interim Certification to be delivered to FGIC as requested. On December 8, 2011, FGIC again notified RFC of its failure to perform under the I&I Agreement, but RFC continued to fail to cause the Interim Certification to be delivered to FGIC.

252. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Interim Certification to be delivered to FGIC after receiving reasonable requests from FGIC.

253. Pursuant to Section 2.02(c)(iv) of the I&I Agreement, RFC agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [PSA]."

254. FGIC made a reasonable request for servicing notes on December 9, 2010.

255. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

256. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

257. Accordingly, FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must comply with sections 2.02(c), 2.02(m) and 2.02(e) of the I&I Agreement.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Master Servicer Obligations)

258. FGIC re-alleges and incorporates by reference paragraphs 1 through 257 of this Complaint.

259. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

260. FGIC has performed its obligations under the I&I Agreement.

261. As explained above, RFC has materially breached its representations and warranties under section 2.03(b) of the I&I Agreement by purporting to amend the Operative Documents without FGIC's prior and necessary consent.

262. Moreover, as explained above, RFC has breached its affirmative covenant under the I&I Agreement to service all Mortgage Loans in all material respects in compliance with the PSA.

263. RFC's breaches of the I&I Agreement has caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on Policies and other losses and expenses.

264. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

265. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

266. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

267. In addition, RFC is separately liable for such damages.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Declaratory Relief)

268. FGIC re-alleges and incorporates by reference paragraphs 1 through 267 of this Complaint.

269. This is a claim for declaratory judgment pursuant to CPLR 3001 for the purpose of determining a justiciable controversy between FGIC and Ally Financial, ResCap, and RFC.

270. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this complaint.

271. For the reasons set forth in paragraphs 182 through 202, among others, Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

272. FGIC has been damaged as a result of the actions Ally Financial, ResCap and RFC.

273. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

EIGHTH CAUSE OF ACTION

(As Against RFC: Attorneys' Fees and Costs)

274. FGIC re-alleges and incorporates by reference paragraphs 1 through 273 of this Complaint.

275. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

276. FGIC has performed its obligations under the I&I Agreement.

277. Pursuant to Section 3.03(c) of the I&I Agreement, RFC agreed to reimburse FGIC for any and all costs or expenses "including reasonable fees and expenses of attorneys" in connection with the enforcement, defense or preservation of any rights in respect of any of the

Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreement, RFC agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or relating to the 2005-NC1 Transaction.

278. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of RFC's failure to provide Mortgage Loan files, the Interim Certification, Servicing Reports, and financial information and its breach of the representations and warranties contained in Section 2.01 of the I&I Agreement and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreement.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant Residential Funding Company, LLC, with respect to (1), (2), and (4) through (15) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4) through (12), (14), and (15) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (12), (14), and (15) below and the following relief:

(1) A declaration that, pursuant to RFC's obligations under the I&I Agreement, RFC must solely and/or Ally Financial, ResCap, and RFC must jointly and severally reimburse and indemnify FGIC for all sums arising out of the 2005-NC1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented, and an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal rescissory, equitable, and punitive damages, to be proven at trial, for RFC's fraudulent inducement of FGIC to enter into the 2005-NC1 Transaction and to issue the Policy;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's aiding and abetting of RFC's fraudulent inducement of FGIC to enter into the 2005-NC1 Transaction and to issue the Policy;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for RFC's material breaches of the 2005-NC1 Transaction;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for RFC's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreement and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that RFC must repurchase all Mortgage Loans that are in breach of RFC's representations and warranties in the 2005-NC1 Transaction, and an order giving effect to that declaration;

(7) Further or alternatively, a declaration that RFC must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2005-NC1 Transaction, and an order giving effect to that declaration;

(8) Further or alternatively, a declaration that RFC must allow FGIC to inspect the books and records of RFC, to discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants, and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that RFC must cause to be provided servicing notes for the 2005-NC1 Transaction when requested by FGIC;

(10) Further or alternatively, a declaration that RFC must cause to be provided the custodial Interim Certification when requested by FGIC for the 2005-NC1 Transaction stating that all mortgage files were complete and were properly transferred into the trusts, or noting any exceptions, and an order giving effect to that declaration;

(11) Further or alternatively, an award of legal and equitable damages, to be proven at trial, for RFC's purported amendment of the PSA without FGIC's consent;

(12) Further or alternatively, a declaration that Ally Financial, ResCap, and RFC are alter egos of each other;

(13) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreement and other Operative Documents, as defined in the I&I Agreement;

(14) An award of prejudgment interest at the statutory rate; and

(15) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

Pursuant to 28 U.S.C. § 1441, Defendants Residential Capital, LLC ("Residential Capital") and Residential Funding Company, LLC ("Residential Funding") (collectively "Defendants") respectfully give notice of the removal this action, entitled *Financial Guaranty Insurance Company v. Ally Financial, Inc. F/K/A GMAC, LLC; Residential Capital, LLC F/K/A Residential Capital Corporation; Residential Funding Company, LLC F/K/A Residential Funding Corporation*, Index No. 653621/2011 (Supreme Court of the State of New York, County of New York), from the Supreme Court of the State of New York, County of New York, to the United States District Court for the Southern District of New York based upon the following grounds:

1. Upon information and belief, this action was commenced on or about December 27, 2011, in the Supreme Court of the State of New York, County of New York. A copy of the Summons and Complaint was served on Defendant Residential Capital's appointed agent, Corporation Service Company, on December 29, 2011. A copy of the Summons and Complaint was served on Defendant Residential Funding's appointed agent, Corporation Service Company, on December 29, 2011.

2. This Notice of Removal is being filed within thirty (30) days of the date Defendants' appointed agents received service of the Summons and Complaint. This Notice of Removal includes a short and plain statement of grounds for removal together with a copy of all process, pleadings, and orders served upon Defendants in this action attached hereto as Exhibit A.

3. This Court has original jurisdiction over this action under 28 U.S.C. § 1332(a) and this action may be removed to this Court by Defendants pursuant to 28 U.S.C. §

1441(a), in that it is a suit constituting a dispute between citizens of different states and the matter in controversy exceeds the sum of the value of $75,000, exclusive of interest and costs.

a. This suit constitutes a dispute between citizens of different states. As alleged in the Complaint, Plaintiff Financial Guaranty Insurance Company ("Plaintiff") is, and has been at all relevant times, a citizen of New York. Complaint ¶20. As of the date Plaintiff filed suit and currently, Defendant Residential Funding is a Delaware limited liability company. Complaint ¶22. The citizenship of a limited liability company is determined by the citizenship of its members. *Handelsman v. Bedford Vill. Assocs. Ltd. P'ship*, 213 F.3d 48, 51-52 (2nd Cir. 2000). Where the members are themselves limited liability companies, a court looks to the citizenship of their members, and continues this process until it reaches the ultimate incorporated or individual members. *See e.g., Quantlab Financial, LLC v. Tower Research Capital LLC*, 715 F.Supp.2d 542, 546-47 (S.D.N.Y. 2010); *Lindley Contours, LLC v. AABB Fitness Holdings, Inc.*, 414 Fed. Appx 62, 64 (9th Cir. 2011); *Onepoint Solutions, LLC, v. Borchert*, 486 F.3d 432, 347 n.4 (7th Cir. 2007). Residential Funding's sole member at all relevant times has been GMAC-RFC Holding Company, LLC, a Delaware limited liability company. GMAC-RFC Holding Company, LLC's sole member at all relevant times has been Residential Capital, LLC, a Delaware limited liability company. Residential Capital's sole member at all relevant times has been GMAC Mortgage Group LLC, a Delaware limited liability company. GMAC Mortgage Group LLC's sole member at all relevant times has been Ally Financial, Inc. Ally Financial, Inc. is incorporated under the laws of Delaware with its principal place of business in Michigan. Complaint ¶21. Accordingly, Residential Funding is, and has been at all relevant times, a citizen of Delaware and Michigan, the principal place of business and state of incorporation for the ultimate incorporated member. Similarly, Defendant

Residential Capital is, and has been at all relevant times, a citizen of Delaware and Michigan, as its ultimate incorporated member is also Ally Financial, Inc. Finally, defendant Ally Financial, Inc. is, and has been at all relevant times, a citizen of Delaware and Michigan. Thus, the citizenship of all parties are diverse as defined by 28 U.S.C. § 1332(a). Moreover, no defendant is a citizen of New York, the state in which the action is pending and the domicile of the Plaintiff, and none of the parties or companies identified above, other than Plaintiff, has its principal place of business in the State of New York.

b. This action involves a matter in controversy exceeding the sum or value of $75,000, exclusive of costs, in that the compensatory damages sought by the Plaintiff include, among other items, indemnification for and damages in the amount of claims made against Plaintiff's insurance policy for "more than $174 million in claims" presented to Plaintiff, and "tens of millions of dollars more in claims to be presented" under Plaintiff's policy in the future. Complaint ¶¶ 123; Prayer for Relief.

4. Venue lies in the United States District Court for the Southern District of New York because the state-court action was filed in this district. 28 U.S.C. § 1441(a).

5. As required by 28 U.S.C. § 1446(d), Defendants are serving a copy of this Notice of Removal on Plaintiff and will file a copy of the Notice of Removal with the Clerk of the Supreme Court of the State of New York, County of New York.

6. All Defendants have consented to removal of the instant action. Defendant Ally Financial, Inc. will be filing a separate notice of consent.

WHEREFORE, Defendants submit this Notice of Removal of this action from the Supreme Court of the State of New York, New York County, to the United States District Court for the Southern District of New York and pray this action stand so removed.

Dated: New York, New York
January 13, 2012

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"); Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"); and Residential Funding Company, LLC, formerly known as Residential Funding Corporation ("RFC"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with five financial guaranty insurance policies (each a "Policy" and collectively the "Policies") issued by FGIC in relation to three RFC-sponsored transactions (each a "Transaction" and collectively the "HSA Transactions" or the "Transactions") in which RFMSII Series 2005-HSA1 Trust (the "2005-HSA1 Trust"), RFMSII

Series 2006-HSA1 Trust (the "2006-HSA1 Trust"), RFMSII Series 2006-HSA2 Trust (the "2006-HSA2 Trust" and together with the 2005-HSA1 and 2006-HSA1 Trusts, the "HSA Trusts"), issued and sold to investors a combined $1.2 billion aggregate principal amount of insured residential mortgage-backed securities (collectively, the "HSA Securities"). As the sponsor of the HSA Transactions, RFC procured the Policies from FGIC in order to enhance the ratings and marketability of the HSA Securities. RFC fraudulently induced FGIC's agreement to provide this insurance through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices, and the credit quality and characteristics of the thousands of mortgage loans that provided the collateral for the HSA Securities. In short, the mortgage loans were different—and demonstrably worse—than RFC had represented them to be. FGIC's issuance of the Policies enabled the HSA Securities to receive an initial triple-A rating from the rating agencies, which in turn made each of the HSA Transactions viable, and enabled RFC, its affiliates, and its parent Ally Financial to earn millions of dollars in transaction fees.

2. Since the closing of the HSA Transactions, RFC has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of each of the HSA Transactions, RFC has violated the essential terms of its agreements with FGIC. RFC has also breached the essential terms of the other operative documents incorporated therein.

3. The wrongdoing committed by RFC, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through ResCap. Ally Financial is the ultimate parent of ResCap, which owns RFC. Ally Financial, as the ultimate parent of ResCap and RFC, has the practical ability, which it has repeatedly exercised, to direct and control the activities of

its subsidiaries, including ResCap and RFC. Ally Financial's direction and control was, in many instances, effected by using ResCap as an instrument to achieve its goals.

4. Each of the HSA Transactions is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among RFC and several other parties. To facilitate each Transaction, RFC pooled together thousands of mortgages (respectively, the "2005-HSA1 Mortgage Loans," "2006-HSA1 Mortgage Loans," and "2006-HSA2 Mortgage Loans," and collectively the "Mortgage Loans"). Prior to the closing of each of the HSA Transactions, RFC purchased many of the Mortgage Loans from another Ally Financial subsidiary, HomeComings Financial, LLC ("HomeComings" f/k/a HomeComings Financial Network, Inc.)—which is wholly owned by RFC—while in each case the remainder of the Mortgage Loans were purchased from a number of non-affiliate originators.

5. Additionally, RFC acquired many of the Mortgage Loans from various originators through a so-called negotiated commitment, whereby RFC agreed to acquire mortgage loans that it knew did not conform to its own underwriting guidelines. RFC failed to disclose to FGIC that a substantial number of the Mortgage Loans had been acquired pursuant to such negotiated commitments, and in fact expressly represented to FGIC that *all* of the Mortgage Loans complied with the stricter RFC underwriting guidelines that RFC had provided to FGIC. In doing so, and in many other ways, RFC fraudulently induced FGIC to issue the Policies and breached the operative documents governing the HSA Transactions.

6. In each of the three Transactions, following its acquisition of the Mortgage Loans, RFC transferred the Mortgage Loans to another Ally Financial affiliate, Residential Funding Mortgage Securities II, Inc. ("RFMSII"). RFMSII then deposited the Mortgage Loans it received from RFC into the HSA Trust designated for the transaction. Each trust, in turn, issued

securities backed by the assets deposited into each of the respective HSA Trusts. Each of the HSA Trusts is a legal entity created by RFC solely for the purposes of the applicable HSA Transaction to hold the related Mortgage Loans and to issue the related HSA Securities to investors in a registered public offering.

7. RFC also acted as master servicer of the HSA Transactions ("Master Servicer"), in which capacity it would supervise the subservicer, including overseeing the collection of borrower payments and performing other servicing duties related to the Mortgage Loans. For each of the Transactions, RFC's wholly-owned, direct subsidiary HomeComings acted as subservicer of the loans. As discussed in more detail below, all of HomeComings's and RFC's servicing operations have since been integrated into ResCap. Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), yet another Ally Financial affiliate, acted as the joint lead manager of the underwriters of each of the HSA Transactions. J.P. Morgan Chase Bank National Association ("J.P. Morgan") agreed to act as trustee (the "Trustee") of each of the HSA Trusts. The Bank of New York Trust Company, N.A., later became the successor in interest to J.P. Morgan as Trustee.

8. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the HSA Trusts are used to pay, among other things, principal and interest due on the HSA Securities, and the fees and expenses of RFC and HomeComings, as well as other participants in the Transactions.

9. RFC, directed and controlled by Ally Financial, is at the hub of the HSA Transactions: it is the sponsor of the securitizations, an acquirer and seller of the Mortgage Loans, and the Master Servicer of each of the Transactions. The primary victim of the HSA Transactions—which turned out to be backed by inferior loans that did not meet the underwriting

standards or loan characteristics warranted by RFC—is FGIC, which has already been presented with over $174 million in claims under the Policies, with further material losses still to come.

10. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed securities ("RMBS"). At the time of the HSA Transactions, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of realized losses on the Mortgage Loans collateralizing the insured securities. FGIC's insurance policies thus enhanced the credit quality and marketability of the insured securities.

11. To enhance the ratings and marketability of the HSA Securities, and to increase the profit that Ally Financial and RFC would derive from the HSA Transactions, RFC sought to have FGIC issue the Policies to J.P. Morgan, as Trustee, for the benefit of the holders of the HSA Securities.

12. As an essential element of the HSA Transactions, RFC made material representations and warranties to FGIC about the manner in which the Mortgage Loans were selected and evaluated, and their characteristics, to induce FGIC to enter into the Transactions. RFC represented, among other things, that the "underwriting standards relating to the mortgage loans generally will conform to those published in [RFC's] client guide, and the provisions of the

guide applicable to the home equity program." *See* 2005-HSA1 Prospectus Supplement at S-31; 2006-HSA1 Prospectus Supplement at S-34; 2006-HSA2 Prospectus Supplement at S-43.

13. Those representations and warranties were false when stated, and FGIC reasonably relied on such warranties, among others, when deciding to enter into the HSA Transactions. As a result, FGIC was fraudulently induced to enter each of the Transactions, and the credit risk assumed by FGIC in connection with each Transaction was far greater than it would have been had RFC's representations and warranties been true, as demonstrated by the overwhelming number of claims that have subsequently been presented to FGIC.

14. RFC received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policies. Ally Financial took actions and made statements to finance, support, and boost investor confidence in its mortgage loan securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations RFC had made to FGIC. As a result of its dominance over ResCap and RFC, Ally Financial knew that the representations and warranties RFC made to FGIC, prior to and at the closings, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted RFC's fraudulent inducement of FGIC to issue the Policies.

15. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policies in reliance on the (presumed) accuracy and truthfulness of RFC's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and therefore the amount of claims presented to FGIC, have been overwhelming. Had FGIC been told the truth about the nature of RFC's underwriting and business practices and/or

the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policies, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of RFC's misconduct.

16. In order to evaluate the extent of RFC's breaches, FGIC has requested copies of the mortgage loan files, and servicing notes, for the 2005-HSA1 and 2006-HSA2 Mortgage Loans. RFC is obligated, under its agreements with FGIC, to provide those documents to FGIC. RFC has refused to provide FGIC with the requested documentation, which, on information and belief, will further evidence material breaches by RFC. This refusal to provide information in itself constitutes a material breach of RFC's insurance agreements with FGIC.

17. Certain of the material contractual breaches committed by RFC—including, but not limited to, FGIC's right to access information in RFC's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

18. Through this Complaint, FGIC seeks relief against RFC, ResCap, and Ally Financial for RFC's fraudulent inducement of, and for its material breaches of its insurance agreements with, FGIC in connection with the HSA Transactions.

19. FGIC further seeks a declaration that Ally Financial, ResCap, and RFC were and continue to be alter egos of one another. Further and alternatively, FGIC seeks relief against Ally Financial for aiding and abetting RFC's fraudulent inducement of FGIC, and for RFC's material breaches of its contractual obligations to FGIC.

THE PARTIES

20. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

21. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial specializes in automotive financings, residential mortgage financings and services, and insurance services. Ally Financial is the parent company of ResCap, RFC, and all RFC-affiliated entities relevant to this action.

22. Defendant RFC is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. In the period relevant to this action, RFC acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

23. Since 2005, RFC has been an indirect wholly owned subsidiary of ResCap; prior to that time, RFC was an indirect, wholly owned subsidiary of Ally Financial.

24. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly-owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of RFC and is a leading real estate finance company, the business of which includes acquiring, selling and servicing mortgage loans.

25. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

JURISDICTION AND VENUE

26. This Court has jurisdiction over this suit pursuant to CPLR §§ 301 and 311-a. RFC is a registered, foreign, limited liability company within the State of New York. RFC has appointed an agent for service of process in this State and transacts business within this State. Also, in an agreement at issue in this case, RFC irrevocably submitted to the jurisdiction of this Court. Ally Financial and ResCap likewise regularly transact business in this State, and the acts giving rise to the claims in this case occurred in this State.

27. Venue is proper in New York County pursuant to CPLR § 503. FGIC, as plaintiff, has designated New York County as the place of trial. RFC, a party to this action, has designated New York County as its county of residence in the State of New York, and has agreed not to challenge venue in this Court. Furthermore, substantial activity giving rise to the claims in this case occurred within New York County.

RELEVANT NON-PARTIES

28. GMAC Mortgage LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. GMACM is an indirect wholly-owned subsidiary of ResCap, which in turn is a wholly-owned subsidiary of Ally Financial.

29. RFMSII, a special purpose vehicle, is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. To facilitate the HSA Transactions, RFMSII purchased the Mortgage Loans from RFC and deposited them into the each of the HSA Trusts. The trusts then issued the HSA Securities to underwriters to be sold to investors.

30. Ally Securities, an entity incorporated in Delaware, is an affiliate of RFC and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as the joint lead manager of the underwriters of the HSA Securities and, on information and belief, participated in the preparation of the Prospectus and Prospectus Supplement.

31. HomeComings, a Delaware limited liability corporation, is the direct, wholly-owned subsidiary of RFC. Many of the Mortgage Loans in each of the Transactions were originated and sold to RFC by HomeComings, which also acted as the subservicer of each of the HSA Transactions.

FACTUAL ALLEGATIONS

A. Ally Financial and Its Subsidiaries

32. In the period relevant to this action, RFC acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS.

33. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults, and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including RFC, led Ally Financial to seek a bailout by the federal government in 2008.

(1) RFC, GMACM, and GMAC-RFC

34. RFC is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

35. GMACM is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate RFC, GMACM engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

36. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See* 2011 Mortgage Market Statistical Annual: Volume II at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *See id*.

37. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the Financial

Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States (the "FCIC Report"), published in January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

38. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with RFC. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

39. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

40. Ally Financial's business model depended on securitizations, which were conducted by its business units, including RFC. Pooling mortgage loans and selling them into securitizations enabled RFC to fund its ongoing mortgage loan originations and acquisitions,

earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

41. RFC, in addition to securitizing mortgage loans originated by itself or other Ally Financial subsidiaries, also earned fees by securitizing mortgage loans it acquired from third parties. RFC would typically acquire such mortgage loans and then deposit them into a securitization trust (usually through an affiliate). RFC would then procure underwriters, trustees, and (in the case of insured securities) financial guaranty insurers, and cause the securitization trust to sell securities collateralized by the relevant mortgage loans. In many instances, RFC profited from the difference between the cost it incurred to acquire mortgage loans and the price at which it sold them for deposit into the securitizations.

42. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining whether a mortgage loan is in default based on the transaction documents, RFC typically also sought (as it did here) to be appointed as the master servicer, appointing the mortgage loan originator or an affiliate to act as subservicer. For acting as Master Servicer to the HSA Transactions, RFC gained substantial additional compensation.

43. RFC also enriched Ally Financial and its subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the HSA Transactions: (i) RFMSII, which established the HSA Trusts and acted as depositor of the Mortgage Loans, charged fees to cover its operating expenses; and (ii) Ally Securities received fees for underwriting the HSA Securities.

(3) Ally Financial, RFC, and GMACM Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

44. On September 2, 2011, the Federal Housing Finance Authority (the "FHFA"), as conservator for Freddie Mac, filed suit in New York Supreme Court against RFC for fraud, aiding and abetting fraud, and violating state and federal securities laws in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in RMBS issued through twenty-one RFC-sponsored transactions similar to the HSA Transactions.

45. The FHFA also alleges violations of state and federal securities laws by RFC and its parent, Ally Financial, and their affiliates, stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, the FHFA also alleges aiding and abetting fraud against RFC's affiliates and Ally Financial for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the RMBS. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the RMBS, including lost principal and interest, as well as punitive damages and attorneys' fees and costs.

46. In addition, RFC is currently facing a lawsuit brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court for, among other things, fraud and breach of representations and warranties in connection with transactions that are markedly similar to those at issue here. The transactions giving rise to MBIA's claims against RFC were put together at or around the same time as the HSA Transactions here, and involve similar mortgage loan pools and securities. The transactions at issue in MBIA's suit include Home Equity Loan Trusts 2006-HSA4, 2006-HSA5, 2007-HSA1, 2007-HSA2, and 2007-HSA3. On December 22, 2009, the

Court issued a ruling on RFC's motion to dismiss, allowing both the breach of contract and the fraud claims, among others, to proceed.

47. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two pending suits against Ally Financial's mortgage-related subsidiaries. The plaintiffs in those suits have alleged, among other things, that Ally's various subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011).

48. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. In the first nine months of 2011 alone, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $254 million worth of mortgages related to securitizations it consummated between 2004 and 2007. It clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own SEC filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 88 (Nov. 4, 2011).

49. According to its most recent quarterly report, Ally Financial believes its "exposure to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008, specifically the 2006 and 2007 vintages that were originated and sold prior to enhanced underwriting standards and risk-mitigation actions

implemented in 2008 and forward." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 146 (Nov. 4, 2011). The Mortgage Loans in the 2006-HSA1 and 2006-HSA2 Transactions are, as the names imply, of the 2006 vintage, while those in the 2005-HSA1 Transaction are of the 2005 vintage.

50. Additionally, Ally Financial also disclosed that the U.S. Securities and Exchange Commission served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. *See* Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

51. Furthermore, RFC's sister company GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." *Id.* (emphasis added).

(4) The Mortgage Loan Servicing Practices of Ally Financial and Its Subsidiaries Have Come Under Scrutiny for Deficiencies

52. The Board of Governors of the Federal Reserve System (the "Federal Reserve Board") and the Federal Deposit Insurance Corporation (the "FDIC") has ordered Ally Financial and several of its subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See* Consent Order, FRB Docket No. 11020-B-HC (April 13, 2011) (the "Consent Order").

53. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

54. Furthermore, under the Consent Order, Ally Financial must direct its mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

55. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure process of at least one Ally Financial subsidiary to request an independent review of their files and, if warranted, receive compensation for the financial harm they suffered as a result of any errors, misrepresentations, or other deficiencies. *See* Press Release, Federal Reserve Board (November 1, 2011).

56. Moreover, according to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan Dep. *Federal*

National Mortgage Association v. Bradbury, BRI-RE-09-65 (Me. Dist. Ct., Div Nine, No. Cumb.) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

57. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.*

58. The Ohio Attorney General, in October 2010, filed suit against Ally Financial and its subsidiaries, alleging, *inter alia*, that employees of Ally Financial subsidiaries had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See State of Ohio v. GMAC Mortgage LLC*, CI0201006984, Court of Common Pleas, Lucas County, Ohio (Toledo). And in December 2011, the Massachusetts Attorney General filed a similar suit against an Ally Financial subsidiary (GMACM) for, among other things, engaging in unfair and deceptive foreclosure practices. *See Commonwealth of Massachusetts v. Bank of America NA*, 11-4363, Suffolk County Superior Court (Boston).

59. Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices, Boston Globe, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

Id.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and RFC

60. As of November 9, 2011, Ally Financial is considering filing for bankruptcy protection for ResCap, its wholly-owned, indirect subsidiary, which has reportedly lost $555 million since 2009 according to multiple published reports. RFC is a wholly-owned, indirect subsidiary of ResCap.

61. In an article, entitled "Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance," dated November 14, 2011, Bloomberg News reported that "[d]erivatives traders are betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering," According to the article, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy.

62. Indeed, Ally Financial warned in its 2010 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 21 (Feb. 25, 2011).

B. RFC's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

63. To improve the marketability and ratings of the RMBS issued as part of its securitizations, RFC from time to time sought credit enhancement for the RMBS from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the ones FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured securities that, if there is a shortfall in cash available to it to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

64. For a trust that issues RMBS, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the loan pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS Certificate investors. Such shortfalls result in claims on FGIC's policy.

(2) Securitization Sponsor's Representations and Warranties

65. The risk FGIC assumes when it agrees to issue a policy for RMBS depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originator and the characteristics of the loans. If, for instance, a loan originator employs substandard underwriting practices, the underlying mortgage loans would be of inferior credit quality. Consequently, the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage loan portfolio as a whole, would be materially increased.

66. Accordingly, FGIC generally required securitization sponsors like RFC to provide substantial representations and warranties about the underlying mortgage loans, including representations about the standards and procedures used to underwrite the loans and the characteristics of the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to month income ("DTI ratio"), the ratio of the mortgage loan principal balance or credit limit, as applicable, to the value of the mortgaged property at origination ("LTV ratio"), the ratio of the combined outstanding principal balances of the mortgage loan and all senior or subordinate mortgage loans secured by the mortgaged property to the value of the mortgaged property at origination ("CLTV ratio"), the borrower's credit score ("FICO score"), and the borrower's residual income, representing the borrower's gross monthly income less the borrower's monthly mortgage payment and other specified monthly debt payments ("Residual Income"). Even where, as here, RFC did not originate the loans at issue, it nonetheless is typically required to make representations about those loans, thereby assuming the risk that those representations might not be accurate. RFC's representations and warranties were intended to

allow FGIC to assess the credit risk inherent in the mortgage loan pool before deciding to commit to the transaction.

C. The HSA Transactions

1. The 2005-HSA1 Transaction

67. In late 2005, RFC began to put together the 2005-HSA1 Transaction. RFC purchased thousands of residential mortgage loans (the "2005-HSA1 Mortgage Loans") originated by either its wholly-owned subsidiary HomeComings or an unaffiliated originator, pooled those loans, and deposited them in the 2005-HSA1 Trust (via RFMSII). The trust then issued approximately $278 million aggregate principal amount of Home Equity Loan-Backed Term Notes, Series 2005-HSA1 (the "2005-HSA1 Notes"). The 2005-HSA1 Notes consisted of five tranches of Class I Notes and one tranche of Class II Notes, all of which would be insured by FGIC. The 2005-HSA1 Mortgage Loans consisted of 3,652 fixed-rate, closed-end home equity mortgage loans with an aggregate unpaid principal balance of $178,529,931, as well as 1,797 adjustable-rate revolving credit loans with an aggregate unpaid principal balance of $100,973,458.

2. The 2006-HSA1 Transaction

68. In early 2006, RFC began to put together the 2006-HSA1 Transaction. RFC purchased thousands of residential mortgage loans (the "2006-HSA1 Mortgage Loans") originated by either its wholly-owned subsidiary HomeComings or an unaffiliated originator, pooled those loans, and deposited them in the 2006-HSA1 Trust (via RFMSII). The trust then issued approximately $461 million aggregate principal amount of Home Equity Loan Pass-Through Certificates, Series 2006-HSA1 (the "2006-HSA1 Certificates"). The 2006-HSA1 Certificates consisted of five tranches of Class A certificates, all of which would be insured by

FGIC. The 2006-HSA1 Mortgage Loans consisted of 9,873 closed-end, fixed-rate home equity mortgage loans with an aggregate principal balance of $463,765,025.

3. The 2006-HSA2 Transaction

69. In early 2006, RFC began to put together the 2006-HSA2 Transaction. RFC purchased thousands of residential mortgage loans (the "2006-HSA2 Mortgage Loans") originated by either its wholly-owned subsidiary HomeComings or an unaffiliated originator, pooled those loans, and deposited them in the 2006-HSA2 Trust (via RFMSII). The trust then issued approximately $448 million aggregate principal amount of Home Equity Loan-Backed Term Notes, Series 2006-HSA2 (the "2006-HSA2 Notes" and together with the 2005-HSA1 Notes and the 2006-HSA1 Certificates, the "HSA Securities"). The 2006-HSA2 Notes consisted of five tranches of Class I Notes and one tranche of Class II Notes, all of which would be insured by FGIC. The 2006-HSA2 Mortgage Loans consisted of 6,085 fixed-rate, closed-end home equity mortgage loans with an aggregate unpaid principal balance of $300,004,823, as well as 2,580 adjustable rate revolving credit loans with an aggregate principal balance of $150,000,263.

4. The HSA Transactions Generally

70. To enhance the ratings and marketability of the HSA Securities, RFC sought multiple financial guaranty insurance policies from FGIC for the purpose of insuring the Transactions for the benefit of the certificate holders. For each of the HSA Transactions, FGIC and RFC executed an Insurance and Indemnity Agreement (respectively, the "2005-HSA1 I&I Agreement," the "2006-HSA1 I&I Agreement," and the "2006-HSA2 I&I Agreement," and collectively the "I&I Agreements"), under which FGIC agreed to issue one or more financial

guaranty insurance policies to insure the HSA Securities.[1] Each I&I Agreement was signed by FGIC (the Insurer for each Transaction); RFC (the Seller and Master Servicer of each Transaction); RFMSII (the Depositor for each Transaction); and J.P. Morgan (the Trustee for each Transaction).[2]

71. Each I&I Agreement provides that FGIC is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." With respect to the 2005-HSA1 and 2006-HSA2 Transactions, the "Operative Documents" are defined to include, among other documents: (i) the relevant HSA Securities; (ii) an Indenture, between J.P. Morgan and the relevant HSA Trust (respectively, the "2005-HSA1 Indenture" and the "2006-HSA2 Indenture"); (iii) a Servicing Agreement, among the relevant HSA Trust, RFC, and J.P. Morgan (respectively, the "2005-HSA1 Servicing Agreement" and the "2006-HSA2 Servicing Agreement"); and (iv) a Home Equity Loan Purchase Agreements, between RFC and RFMSII (respectively, the "2005-HSA1 HELPA" and the "2006-HSA2 HELPA").[3] The 2005-HSA1 and 2006-HSA2 Servicing Agreements also provide that FGIC, as Credit Enhancer, is an express third-party beneficiary thereof.

72. With respect to the 2006-HSA1 Transaction, the "Operative Documents" are defined to include, among other documents: (i) the 2006-HSA1 Certificates; (ii) a Pooling and

[1] With respect to the 2005-HSA1 Transaction, FGIC issued two policies: (1) for the Class I notes, policy number 05030160; and (2) for the Class II notes, policy number 05030161. With respect to the 2006-HSA1 Transaction, FGIC issued one policy: for the Class A certificates, policy number 06030003. With respect to the 2006-HSA2 Transaction: FGIC issued two policies: (1) for the Class I notes, policy number 06030022; and (2) for the Class II notes, policy number 06030026.

[2] The 2005-HSA1 I&I Agreement was executed on December 29, 2005; the 2006-HSA1 I&I Agreement was executed on January 27, 2006; and the 2006-HSA2 I&I Agreement was executed on February 24, 2006.

[3] The Indenture, Servicing Agreement, and HELPA for the 2005-HSA1 Transaction were each executed on December 29, 2005. The Indenture, Servicing Agreement, and HELPA for the 2006-HSA2 Transaction were each executed on February 24, 2006.

Servicing Agreement, among RFMSII, RFC, J.P. Morgan, N.A. (the "2006-HSA1 PSA," and together with the 2005-HSA1 and 2006-HSA2 Servicing Agreements, the "HSA Servicing Agreements"); and (iii) an Assignment and Assumption Agreement, between RFMSII and RFC (the "2006-HSA1 A&A Agreement," and together with the 2005-HSA1 HELPA and the 2006-HSA2 HELPA, the "HSA Purchase Agreements," each of which is an "HSA Purchase Agreement").[4] The 2006-HSA1 PSA provides that FGIC, as Credit Enhancer, is an express third party beneficiary of that agreement.

73. The Policies improved the marketability of the HSA Securities by mitigating risk for potential investors and making the HSA Securities eligible to receive an initial credit rating of triple-A by the rating agencies at closing.

74. RFC and RFMSII offered the HSA Securities for sale pursuant to a prospectus, (a "Prospectus," and for each Transaction respectively, the "2005-HSA1 Prospectus," the "2006-HSA1 Prospectus," and the "2006-HSA2 Prospectus"), and a prospectus supplement (a "Prospectus Supplement," and for each transaction respectively, the "2005-HSA1 Prospectus Supplement," the "2006-HSA1 Prospectus Supplement," and the "2006-HSA2 Prospectus Supplement"), each touting the respective Policies and triple-A initial rating of the respective HSA Securities made possible by those Policies.[5] The "Offering Documents" for each transaction consist of the related Prospectus and Prospectus Supplement, together with any

[4] The 2006-HSA1 PSA was executed on January 1, 2006, and the 2006-HSA1 A&A Agreement was executed on January 27, 2006.

[5] The 2005-HSA1 Prospectus is dated as of October 24, 2005; the 2006-HSA1 Prospectus is dated as of January 19, 2006; and the 2006-HSA2 Prospectus is dated as of January 19, 2006. The 2005-HSA1 Prospectus Supplement is dated as of December 22, 2005; the 2006-HSA1 Prospectus Supplement is dated as of January 25, 2006; and the 2006-HSA2 Prospectus Supplement is dated as of February 22, 2006.

related preliminary Offering Documents, as further supplemented by any subsequent amendment or supplement thereto, and any other related Offering Documents that make reference to a Policy.

75. Upon the closing of each HSA Transaction, Ally Securities, an Ally Financial subsidiary, acted as co-lead manager for a syndicate of underwriters that purchased from the respective HSA Trust and sold to investors the related HSA Securities, and FGIC, for its part, issued the related Policy or Policies in accordance with the terms of the related I&I Agreement.

D. RFC Fraudulently Induces FGIC to Insure the HSA Securities with Substantial Assistance from Ally Financial

(1) RFC's Fraudulent Inducement of FGIC

76. FGIC's participation in the HSA Transactions was an essential component of the HSA Transactions and enhanced RFC's ability to market the securitizations effectively. The Policies allowed RFC to sell the HSA Securities with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

77. In order to induce FGIC to write financial guaranty insurance for the HSA Transactions, RFC provided to FGIC, directly or indirectly, a variety of information.

78. First and foremost, RFC provided to FGIC initial and final Prospectus Supplements summarizing, among other material information, the credit quality and characteristics of the Mortgage Loans, and RFC's loan underwriting guidelines. RFC represented in each Prospectus Supplement that the "seller's underwriting standards relating to the mortgage loans generally will conform to those published in [RFC's] client guide, and the provisions of the guide applicable to the home equity program." 2005-HSA1 Prospectus Supplement at S-32; 2006-HSA1 Prospectus Supplement at S-36; 2006-HSA2 Prospectus Supplement at S-43.

79. Second, RFC provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in each HSA Transaction, together with representations regarding material statistics about the loan pool as a whole.

80. Third, for each Transaction, RFC provided to FGIC credit ratings for the HSA Securities determined without considering the effect of the relevant Policy. These ratings, which RFC procured from the credit rating agencies, are known as "shadow ratings."

81. Fourth, as discussed in detail below, RFC provided representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreements for each Transaction regarding the related Mortgage Loans specifically and the related loan pool generally.

82. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the HSA Securities, FGIC relied in part upon representations and warranties regarding RFC's loan underwriting standards made by RFC in the respective Prospectuses and Prospectus Supplements. For the 2005-HSA1 Transaction, a Preliminary 2005-HSA1 Prospectus Supplement was transmitted to, among others, Benjamin Perlman of FGIC, on or about December 19, 2005, in an email sent by Marie Athaide on behalf of RFC. The 2005-HSA1 Prospectus, as supplemented by the 2005-HSA1 Prospectus Supplement, was filed with the SEC and became effective on December 29, 2005. The Final 2005-HSA1 Prospectus Supplement was transmitted to, among others, Benjamin Perlman of FGIC, on or about December 22, 2005, in an email sent by Marie Athaide on behalf of RFC.

83. For the 2006-HSA1 Transaction, a Preliminary 2006-HSA1 Prospectus Supplement was transmitted to, among others, Benjamin Perlman of FGIC, on or about January

19, 2006, in an email sent by Marie Athaide on behalf of RFC. The 2006-HSA1 Prospectus, as supplemented by the 2006-HSA1 Prospectus Supplement, was filed with the SEC and became effective on January 27, 2006. The Final 2006-HSA1 Prospectus Supplement was transmitted to, among others, Benjamin Perlman of FGIC, on or about January 25, 2006, in an email sent by Marie Athaide on behalf of RFC.

84. For the 2006-HSA2 Transaction, a Preliminary 2006-HSA2 Prospectus Supplement was transmitted to, among others, Benjamin Perlman of FGIC, on or about February 15, 2006, in an email sent by Kara Moskowitz on behalf of RFC. The 2006-HSA2 Prospectus, as supplemented by the 2006-HSA2 Prospectus Supplement, was filed with the SEC and became effective on February 24, 2006. The Final 2006-HSA2 Prospectus Supplement was transmitted to, among others, Benjamin Perlman of FGIC, on or about February 23, 2006, in an email sent by Marie Athaide on behalf of RFC.

85. Each Prospectus Supplement sets forth generally, and among other information, the following important characteristics of the Mortgage Loan pool: the ranges of and weighted average FICO scores, the ranges of and weighted average CLTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (i.e., whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). *See* 2005-HSA1 Prospectus Supplement at II-1-II-23; 2006-HSA1 Prospectus Supplement at II-1-13; 2006-HSA2 Prospectus Supplement at II-1-II-20.

86. Each Prospectus Supplement expressly states: "[The] underwriting standards relating to the mortgage loans generally will conform to those published in [RFC's] client guide, and the provisions of the guide applicable to the home equity program." 2005-HSA1 Prospectus

Supplement at S-32 (emphasis added); 2006-HSA1 Prospectus Supplement at S-36 (emphasis added); 2006-HSA2 Prospectus Supplement at S-43 (emphasis added).

87. RFC publishes its loan underwriting standards in a document the Prospectuses refer to as "Residential Funding's Client Guide," which is modified from time to time (the "Client Guide"). In general, the Client Guide specifies documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan or line of credit. Depending upon the particular type of loan or line of credit, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories, and/or evidence of closing funds, among other things. The Client Guide also includes substantive criteria for eligibility, addressing material characteristics of a proposed loan, such as DTI ratios, LTV and CLTV ratios, occupancy status, and the borrower's Residual Income.

88. RFC represented that, in all instances, the Mortgage Loans had been originated pursuant to maximum monthly DTI and CLTV ratios, which typically did not exceed 55% and 100% respectively. *See* 2005-HSA1 Prospectus Supplement at II-4, II-11, II-16, II-22; 2006-HSA1 Prospectus Supplement at II-4, II-11; 2006-HSA2 Prospectus Supplement at II-3, II-9, II-14, II-19.

89. For each Transaction, RFC also represented that, with respect to occupancy status, between 91.71% and 97.81% of the Mortgage Loans would be secured by the borrower's primary residence. *See* 2005-HSA1 Prospectus Supplement at S-24, S-27; 2006-HSA1 Prospectus Supplement at S-30; 2006-HSA2 Prospectus Supplement at S-35, S-38.

90. ***Loan Tapes.*** RFC sent via email final loan tapes to FGIC for each of the Transactions. The 2005-HSA1 Transaction final loan tape was sent by RFC to FGIC on or about

December 20, 2005. The 2006-HSA1 Transaction final loan tape was sent by RFC to FGIC on or about January 23, 2006. The 2006-HSA2 Transaction final loan tape was sent by RFC to FGIC on or about February 21, 2006. These loan tapes set forth, for each loan in the pool, key characteristics such as the borrower's FICO score, Residual Income, DTI ratio, and the LTV and CLTV ratios for the loan. RFC also disclosed in the Prospectus Supplement, with respect to the pool as a whole, aggregate characteristics relevant to the assessment of the credit risk of the pool, including FICO scores, Residual Income, DTI ratios, and LTV and CLTV ratios.

91. ***Shadow Rating Letters***. RFC, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. Based on the information supplied by RFC, Moody's and S&P assessed the credit quality of the loan pool and assigned shadow ratings to each of the HSA Securities as set forth in the table below.

	Moody's	**S&P**
2005-HSA1 Class I	A3	BBB-
2005-HSA1 Class II-A	A2	BBB+
2006-HSA1 Class A	Baa1	BBB-
2006-HSA2 Class I	Baa2	BBB-
2006-HSA2 Class II-A	A3	BBB+

92. These shadow ratings met FGIC's minimum requirements. FGIC required these shadow ratings as an essential condition to its willingness to issue the Policies.

93. ***Negotiated Conduit Asset Program.*** As part of its securitization activities, RFC engaged in negotiated commitments with various mortgage loan originators, whereby RFC agreed to purchase from those originators mortgage loans that did not "comply with one or more of the criteria" stated in its standard programs, such as the home equity program. Client Guide at

6J.1. RFC's negotiated commitment program (referred to in the Client Guide as the "Negotiated Conduit Asset Program") by its plain language governs purchases by RFC that are considered by RFC to be "non-standard," and thus exceptions to the use of RFC's general underwriting criteria. *See id*. As the Prospectus for each of the HSA Transactions expressly notes: "The underwriting standards used in negotiated [commitment] transactions . . . may vary substantially from the underwriting standards contained in the [Client] Guide." 2005-HSA1 Prospectus at 17; 2006-HSA1 Prospectus at 18; 2006-HSA2 Prospectus at 18.

94. In similar (but distinct) transactions between RFC and FGIC, where mortgage loans purchased by RFC pursuant to negotiated commitments were to be included in a trust, RFC made significant and explicit disclosures regarding that fact. Nevertheless, neither the Prospectus Supplements provided to FGIC for each of the HSA Transactions, nor any other material provided by RFC, disclosed that any of the Mortgage Loans had been acquired by RFC pursuant to a negotiated commitment involving underwriting standards that do not conform—and are qualitatively inferior—to the underwriting standards set forth in RFC's Client Guide. On the contrary, the Offering Documents—which RFC held out to FGIC and warranted were true and accurate—expressly represented that the Mortgage Loans would comply with the superior underwriting standards applicable to RFC's home equity program as outlined in the Client Guide. *See* 2005-HSA1 Prospectus Supplement at S-32; 2006-HSA1 Prospectus Supplement at S-36; 2006-HSA2 Prospectus Supplement at S-43. In agreeing to issue the Policies, FGIC materially relied on the representations by RFC that the Mortgage Loans would conform to the more restrictive underwriting standards of the home equity program, and would not—as turned out to be the case—include mortgage loans purchased by RFC as exceptions to its general

underwriting criteria, utilizing inferior non-conforming underwriting standards, pursuant to separately negotiated agreements between RFC and third party originators.

(2) RFC's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

95. Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to participate in each of the HSA Transactions and, ultimately, issue the Policies. Ally Financial knew that the Mortgage Loans underlying each of the HSA Transactions were of a substantially poorer quality than was represented to FGIC and other participants in the Transactions, including investors. Ally Financial further knew that the Mortgage Loans were not underwritten to the standards represented in each Transaction's Offering Documents and warranted in each Transaction's Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap and its other subsidiaries, Ally Financial knew that the representations and warranties RFC made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

96. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to finance, support, and engender investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

97. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

98. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries."

99. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries were undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

100. Ally Financial's corporate restructuring also allowed RFC to explicitly represent and warrant to FGIC in the I&I Agreements that RFC "is solvent, and will not be rendered insolvent by the Transaction. . . . [RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." 2005-HSA1 I&I Agreement § 2.01(m) (emphasis added); 2006-HSA1 I&I Agreement § 2.01(a)(xiii) (emphasis added); 2006-HSA2 I&I Agreement § 2.01(m) (emphasis added). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary RFC.

101. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the HSA Transactions—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in

the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

102. Moreover, as a result of its domination and control over ResCap and RFC, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of RFC's representations and warranties to FGIC—and that they were untrue when stated. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including RFC, shared numerous directors and senior management as well.

103. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, and RFC, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by RFC was shared among and between RFC and its parent ResCap, as well as ResCap and its parent Ally Financial. Indeed, at least one Ally Financial employee who was involved in each of the HSA Transactions appeared on the Transactions' working group lists and received all distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

104. David C. Walker, another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, joined Ally Financial in 1985 and also

served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. In September 2005, shortly before the closing of the HSA Transactions, Walker was a director at ResCap, GMACM, RFC, and RFMSII, among other ResCap subsidiaries. In each of the HSA Transactions, Walker, acting as a Director of RFMSII, was a signatory to a "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors," which was included in the closing documents of each Transaction.

105. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to RFC in fraudulently inducing FGIC to participate in the HSA Transactions and issue the Policies. Further, the issuance of the Policies, which made each Transaction possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. RFC's Representations, Warranties, and Affirmative Covenants

106. In connection with the HSA Transactions, RFC, at the direction of Ally Financial, either directly or indirectly through ResCap, made numerous representations, warranties, and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way the loans were selected and evaluated, the characteristics of, and the underwriting standards used for, the Mortgage Loans, and the accuracy of the information supplied to FGIC. RFC also promised to provide timely Mortgage Loan file information and to provide FGIC with a variety of information, including access to RFC's books and records and to discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer and, under some circumstances, RFC's accountants.

107. RFC's representation, among others, that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into each HSA Transaction and to issue each Policy in connection therewith. Further, the I&I Agreements' incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and every one of the representations and warranties that RFC made in connection with the relevant HSA Transaction.

108. FGIC, for its part, reasonably relied on the information available to it regarding the underlying mortgage loans and the representations and warranties provided by RFC. Since FGIC had neither the right nor duty under the Operative Documents, nor the practical ability, to review the thousands of underlying Mortgage Loan files in the days available to it prior to the closing of each HSA Transaction, RFC knew that FGIC had no choice but to rely on RFC's representations regarding the underlying loans in determining whether to issue the Policies. Further, FGIC had no reason to believe that these representations were not true and accurate.

109. RFC included 23,987 individual Mortgage Loans in the HSA Trusts collectively. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation, and other forms of documentation necessary to support underwriting decisions. Unlike RFC, FGIC was under no contractual duty whatsoever to review the Mortgage Loans. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by RFC regarding its evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on the fact that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

110. In each instance, based on the information received by FGIC and the representations and warranties given by RFC, FGIC entered into the respective I&I Agreements and agreed to issue the relevant Policy or Policies to the Trustee for the benefit of the holders of the respective HSA Securities. In return for doing so, in each case, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the related HSA Securities, commensurate with the risk FGIC thought it was taking. Specifically, FGIC received a small percentage of the aggregate balance of the HSA Securities, ranging from 0.16% to 0.17%, for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties, and affirmative covenants provided by RFC.

111. In each case, RFC's information, representations, and warranties were materially false when disclosed and/or provided by RFC. RFC knew that this information, and its representations and warranties, in each instance, were materially false when made. RFC also knew that, with respect to each HSA Transaction individually, this information and the representations and warranties were essential to FGIC's decision in each instance to issue the related Policy or Policies. Indeed, RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreements and issue the Policies. The issuance by FGIC of the Policies—induced by RFC's fraudulent misrepresentations and substantial assistance of Ally Financial—made the HSA Securities eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(3) Representations, Warranties, and Affirmative Covenants Relating to the Operative and Offering Documents

112. In each of the HSA Transactions, under Section 2.01 of each I&I Agreement, RFC made the following representations and warranties, among others:

- *Accuracy of Information*. **None of the Operative Documents nor any other material information relating to the [Mortgage Loans]**, the operations of RFC . . . or the financial condition of RFC . . . furnished to [FGIC] . . . by RFC . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made**. [RFC] has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change. Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to RFC . . . that would render any of the Documents untrue or misleading in any material respect.

- *Compliance with Securities Laws*. The offering and sale of the [HSA Securities] complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading**.

- *Operative Documents*. **Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects**.

  Solvency; Fraudulent Conveyance. [RFC] is solvent, and will not be rendered insolvent by the Transaction . . . . **[RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**. [RFC] does not intend to incur, and does not believe that it has incurred, debts beyond its ability to pay as they mature . . . . [RFC] is not entering into the Operative Documents, or transferring any of its assets in connection with the Transaction, with any intent to hinder, delay or defraud any of its creditors.

I&I Agreements § 2.01.

113. *First*, in each I&I Agreement, RFC represented and warranted that "[n]one of the Operative Documents nor any other material information relating to the [Mortgage Loans], the operations of RFC . . . or the financial condition of RFC . . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." 2005-HSA1 I&I Agreement § 2.01(j); 2006-HSA1 I&I Agreement § 2.01(a)(x); 2006-HSA2 I&I Agreement § 2.01(j). Through these Operative and Offering

Documents, as detailed above, RFC communicated several material facts about the characteristics of the Mortgage Loans.

114. *Second*, in each I&I Agreement, RFC also separately represented and warranted that "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading . . . ." 2005-HSA1 I&I Agreement § 2.01(k); 2006-HSA1 I&I Agreement § 2.01(a)(xi); 2006-HSA2 I&I Agreement § 2.01(k). As discussed above, in each Prospectus Supplement, RFC represented that the Mortgage Loans sold to the HSA Trusts had been underwritten in conformity with RFC's underwriting standards and, specifically, those of the home equity program. *See* 2005-HSA1 Prospectus Supplement at S-32; 2006-HSA1 Prospectus Supplement at S-36; 2006-HSA2 Prospectus Supplement at S-43.

115. *Third*, the I&I Agreements incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the related Operative Documents: "Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects . . . ." 2005-HSA1 I&I Agreement § 2.01(l); 2006-HSA1 I&I Agreement § 2.01(a)(xii); 2006-HSA2 I&I Agreement § 2.01(l). The incorporation by reference of the Operative Documents into each I&I Agreement was intended to allow FGIC to rely on any representation and warranty that RFC made to other entities, such as investors or the Trustee, in connection with the relevant HSA Transaction. Indeed, each I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. *See* 2005-HSA1 I&I Agreement § 2.02(k); 2006-HSA1 I&I Agreement § 2.02(k); 2006-HSA2 I&I Agreement § 2.02(k).

116. *Fourth*, RFC also provided information to FGIC concerning the Mortgage Loans in each of the Transactions. *See* 2005-HSA1 I&I Agreement § 2.02(c)(iii); 2006-HSA1 I&I Agreement § 2.02(c)(iii); 2006-HSA2 I&I Agreement § 2.02(c)(iii). This information included schedules (or "loan tapes") that set forth statistics about the loan pool. The schedules purported to describe key characteristics relevant to the assessment of risk, including DTI, LTV and CLTV ratios, occupancy status, FICO scores, and Residual Income. *See* 2005-HSA1 Indenture, Appendix A; 2006-HSA1 PSA §1.01; 2006-HSA2 Indenture, Appendix A. On information and belief, the loan tape FGIC received at closing contains the same information as is contained in the schedule, referenced in the relevant HSA Purchase Agreement. In turn, in each HSA Purchase Agreement, RFC represented that all the information in those schedules was true and correct in all material respects as of the date on which the information was furnished. *See* 2005-HSA1 HELPA § 3.1(b)(ii),(c)(i); 2006-HSA1 A&A Agreement § 4(b); 2006-HSA2 HELPA § 3.1(b)(ii),(c)(i).

117. As a result of incorporating into each I&I Agreement the representations and warranties in the relevant Operative Documents, RFC incorporated representations and warranties regarding the underwriting of the Mortgage Loans included in each Transaction. These representations and warranties set forth the standards governing each Mortgage Loan, including, significantly, the representation that each Mortgage Loan had been underwritten in compliance with RFC's underwriting guidelines.

118. In particular, in the HSA Purchase Agreements, RFC represented and warranted, in sum and substance, as to the Mortgage Loans:

- **Information in Mortgage Loan Schedule**. The information set forth on the Mortgage Loan Schedule with respect to each Mortgage Loan is true and correct in all material respects as of the date or dates which such information is furnished.

See 2005-HSA1 HELPA § 3.1(b)(ii),(c)(i); 2006-HSA1 A&A Agreement § 4(b); 2006-HSA2 HELPA § 3.1(b)(ii),(c)(i).

- **No Material Breach or Default**. Other than with respect to a payment default, there is no material default breach, violation or event of acceleration existing under the terms of any Mortgage Note or Mortgage and no event which, with notice and expiration of any grace or cure period, would constitute a material default, breach, violation or event of acceleration under the terms of any Mortgage Note or Mortgage, and no such material default, breach, violation or event acceleration has been waived by RFC or by any other entity, involved in originating or servicing a Mortgage Loan. *See* 2005-HSA1 HELPA § 3.1(b)(xix), (c)(xxx); 2006-HSA1 A&A Agreement § 4(s); 2006-HSA2 HELPA § 3.1(b)(xix), (c)(xxx).

- **Delinquent Loans**. As of the Cut-off Date, no Mortgage Loan is 30 days or more Delinquent in payment of principal and interest. *See* 2005-HSA1 HELPA § 3.1(b)(i), (c)(viii); 2006-HSA1 A&A Agreement § 4(a); 2006-HSA2 HELPA § 3.1(b)(i), (c)(viii).

- **Conformity with Underwriting Guidelines.** All of the Mortgage Loans have been underwritten in substantial compliance with the criteria set forth in RFC's underwriting guidelines. *See* 2005-HSA1 HELPA § 3.1(b)(xxxvii), (c)(xli); 2006-HSA1 A&A Agreement § 4(kk); 2006-HSA2 HELPA § 3.1(b)(xxxvii),(c)(xli).

- **CLTV.** The ratio, expressed as a percentage, of (A) the sum of (i) the Principal Balance of such Mortgage Loan and (ii) any outstanding principal balance of all other mortgage loans, if any, secured by senior or subordinate liens on the related Mortgaged Property, to (B) the Appraised Value, or, to the extent permitted by the RFC's underwriting guidelines, the Stated Value of such Mortgaged Property, was not in excess of 100%. *See* 2005-HSA1 HELPA § 3.1(b)(x), (c)(xxxv); 2006-HSA1 A&A Agreement § 4(j); 2006-HSA2 HELPA § 3.1(b)(x), (c)(xxxv).

119. Moreover, in each I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—RFC specifically covenants that it would comply in all material respects with the terms and conditions of and perform its obligations under the relevant Operative Documents. *See* 2005-HSA1 I&I Agreement § 2.02(a),(k); 2006-HSA1 I&I Agreement § 2.02(a),(k); 2006-HSA2 I&I Agreement § 2.02(a),(k).

(4) Representations, Warranties, and Affirmative Covenants Regarding Access to Information and Servicing

120. In addition to the representations and warranties referenced above, the I&I Agreements provide that RFC has the contractual obligation, as Master Servicer, to service the Mortgage Loans in compliance with the HSA Servicing Agreements and to provide FGIC with access to the underlying Mortgage Loans and servicing notes, and, as Seller, to procure custodial interim certifications stating that all mortgage files were complete and properly transferred into the appropriate HSA Trust ("Interim Certification"). Specifically, each of the I&I Agreements provides FGIC, in sum and substance, with the following access to information rights:

- *Other Information*. RFC shall furnish to FGIC, promptly upon request, such data as FGIC may reasonably request relating to the Mortgage Loans, the servicing of the Mortgage Loans, the Transaction, or the ability of RFC to perform its obligations under the Operative Documents. *See* 2005-HSA1 I&I Agreement § 2.02(c)(v); 2006-HSA1 I&I Agreement § 2.02(c)(v); 2006-HSA2 I&I Agreement § 2.02(c)(v).

- *Access to Records; Discussions with Officers and Accountants*. On an annual basis, or at any time when a Shortfall Event shall have occurred and be continuing, upon the reasonable request of FGIC, RFC will permit FGIC or its authorized agents to inspect the books and records of RFC, discuss the affairs, finances and accounts of RFC as they relate to the Mortgage Loans, the Transaction, or the ability of RFC to perform its obligations under the Operative Documents with a Servicing Officer. If FGIC reasonably believes that a Material Adverse Change may have occurred and with RFC's consent, which consent shall not be unreasonably withheld or delayed, FGIC shall have the right to discuss the affairs, finances and accounts of RFC with RFC's independent accountants. In addition, if requested by FGIC, on an annual basis, or otherwise when reasonably requested by FGIC, RFC will cause the Custodian to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custody Agreement, with an exceptions list attached thereto, to enable FGIC to track the progress of recording of Mortgages and Assignments with respect to the Mortgage Loans. *See* 2005-HSA1 I&I Agreement § 2.02(e); 2006-HSA1 I&I Agreement § 2.02(e); 2006-HSA2 I&I Agreement § 2.02(e).

- *Due Diligence*. If in FGIC's reasonable judgment circumstances so warrant, based on the performance of the Transaction, FGIC shall have the right, so long as the HSA Securities remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans, reappraisals of

Mortgaged Properties and reviews of servicing practices, at FGIC's expense and in reasonable manner convenient to both RFC and FGIC. This due diligence right is in addition to the access provided and the other rights provided for in Section 2.02(e) of each I&I Agreement. *See* 2005-HSA1 I&I Agreement § 2.02(m); 2006-HSA1 I&I Agreement § 2.02(m); 2006-HSA2 I&I Agreement § 2.02(m).

- *Servicing of Mortgage Loans*. All Mortgage Loans will be serviced in all material respects in compliance with the HSA Servicing Agreements. *See* 2005-HSA1 I&I Agreement § 2.02(l); 2006-HSA1 I&I Agreement § 2.02(l); 2006-HSA2 I&I Agreement § 2.02(l).

F. RFC's Breaches of Its Representations, Warranties, and Affirmative Covenants

121. As discussed above, in relation to each of the three HSA Transactions, FGIC relied on material representations and warranties made by RFC regarding the manner in which the Mortgage Loans were selected and evaluated, the characteristics of those loans, and the accuracy and completeness of information RFC supplied to FGIC. Based on those representations and warranties, FGIC agreed in each case to issue the related Policy. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed below, the risk that FGIC ultimately assumed when it issued each Policy was many times greater than the risk it could have reasonably anticipated based on the information disclosed by RFC's representations and warranties. RFC breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

122. The HSA Transactions have performed poorly, and delinquencies and defaults for Mortgage Loans in each Transaction have been substantial. As of November 2011, a total of 1,419 mortgage loans, representing 26.0% of the loans underlying the 2005-HSA1 Transaction, had posted a loss or were severely delinquent, while 1,904 loans, representing 19.3% of the loans underlying the 2006-HSA1 Transaction and 2,062 loans, representing 23.8% of the loans underlying the 2006-HSA2 Transaction, had posted a loss or were severely delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby

inducing FGIC to issue each Policy, RFC assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with RFC's representations and warranties.

123. The poor performance of the Mortgage Loans has reduced the cash flow to each of the HSA Trusts, which has caused and will continue to cause claims to be presented to FGIC under all the Policies to cover these shortfalls. Indeed, as of December 2011, a total of more than $174 million in claims had been presented to FGIC in connection with the three HSA Transactions. FGIC expects tens of millions of dollars more in claims to be presented to it under the HSA Transactions in the future.

(1) RFC's Denial of Loan File Requests

124. As the HSA Transactions continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blaschko, an RFC/ResCap employee, via e-mail demanding that RFC provide FGIC with 960 Mortgage Loan files relating to the 2005-HSA1 Transaction and 963 Mortgage Loan files relating to the 2006-HSA2 Transaction. Having received no response to this request, FGIC sent a follow-up e-mail on February 3, 2011 regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information and belief, the request required authorization from officers at Ally Financial, and RFC/ResCap's response was directed by officers at Ally Financial.

125. On February 14, 2011, and again on April 26, 2011, FGIC sent further follow-up letters requesting loan files.

126. In finally responding to FGIC's request for information, RFC refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans").

Instead, it only provided FGIC with a portion of the requested loan files, consisting solely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

127. Pursuant to the I&I Agreements, FGIC is entitled to reasonable access to the documentation regarding the relevant Mortgage Loans. The relevant I&I Agreements provide that FGIC shall have the right, so long as the HSA Securities remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans. *See* 2005-HSA1 I&I Agreement § 2.02(m); 2006-HSA2 I&I Agreement § 2.02(m). Notably, there is no limitation in any of the I&I Agreements as to the nature of the Mortgage Loan files that are subject to review. Further, the relevant I&I Agreements state that promptly upon request, RFC must provide to FGIC such other data as FGIC may reasonably request relating to the Mortgage Loans. *See* 2005-HSA1 I&I Agreement § 2.02(c)(v); 2006-HSA2 I&I Agreement § 2.02(c)(v). By producing only non-performing Mortgage Loan files, in contravention of the relevant I&I Agreements, RFC has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

(2) RFC's Denial of Interim Certification Requests

128. On June 21, 2011, FGIC demanded, pursuant to Section 2.02(e) of the I&I Agreements, that RFC promptly cause the Custodians under each HSA Transaction to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement for the Transaction, with an exceptions list attached thereto. An Interim Certification would enable FGIC to track the progress of the recording of mortgages and assignments with respect to the related Mortgage Loans.

129. Again on September 30, 2011, FGIC wrote RFC demanding the Interim Certification, noting that it had been over three months since FGIC's initial letter and that RFC had failed to respond.

130. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to these requests.

(3) RFC's Denial of Servicing Notes

131. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(iv) of the 2005-HSA1 and 2006-HSA2 I&I Agreement, that RFC furnish or cause to furnish the servicing notes for the 2005-HSA1 and 2006-HSA2 Mortgage Loans.

132. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to requests for servicing notes.

(4) RFC's Denial Of FGIC's Access To Books and Records, Servicing Officer, and RFC's Independent Accountants

133. On December 8, 2011, in accordance with its express rights under Sections 2.02(e)(i)-(ii) of the 2005-HSA1 and 2006-HSA2 I&I Agreements, FGIC requested to (i) inspect the books and records of RFC; and (ii) discuss the affairs, finances, and accounts of RFC with the Servicing Officer of RFC. On December 13, FGIC sent a similar request pursuant to Sections 2.02(e)(i)-(ii) of the 2006-HSA1 I&I Agreement.

134. To date, RFC has failed to respond to these requests, in violation of the I&I Agreements.

(5) Breaches Regarding the Accuracy of the Offering Documents and the Underwriting Standards Employed for the Mortgage Loans

135. As discussed, RFC made a number of specific representations and warranties regarding the accuracy of the information contained in the Offering Documents for each of the HSA Transactions, as well as the characteristics of the Mortgage Loans. Specifically, irrespective of the source of origination, all of the Mortgage Loans in the HSA Transactions were expressly represented by RFC to comply with the underwriting standards of RFC's home equity program, as disclosed to FGIC in the Offering Documents for each Transaction. On this basis,

among other material (fraudulent) inducements, FGIC agreed to issue the Policies. As such, RFC has materially breached these obligations by, inter alia, including in the HSA Trusts mortgage loans that were purchased by RFC pursuant to negotiated commitments, and thus underwritten to standards far inferior to the general home equity program standards RFC represented in the Offering Documents.

136. In a series of correspondence in August 2009 between RFC and FGIC regarding FGIC's request that RFC repurchase Mortgage Loans that were purchased by RFC pursuant to negotiated commitments and, thus, not in compliance with the underwriting standards of the home equity program, RFC recognized that it had indeed included in the HSA Transactions such non-compliant mortgage loans. Nevertheless, RFC expressly "reject[ed] the repurchase of each and every loan [referenced by FGIC] where the basis of [FGIC's repurchase request] is based on the loans underwritten pursuant to a negotiated commitment." In doing so, RFC has confirmed its breach of the representations and warranties regarding the accuracy of the information detailed in the Offering Documents as it pertains to the underwriting standards that were supposed to have been used for each of the Mortgage Loans, namely that the RFC home equity program guidelines, as detailed in the Client Guide, would be used. Moreover, RFC has further breached its obligations to FGIC to repurchase non-conforming Mortgage Loans.

(6) Breaches Uncovered In Loan File Reviews

137. During the ordinary course of its business, FGIC evaluated a substantial number of Mortgage Loans to determine whether they contained material breaches of the HSA Transactions' I&I Agreements and Operative Documents necessitating repurchase under the related Operative Documents. To perform this review, FGIC hired an independent outside consultant, having particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

138. The independent consultant's review revealed that approximately 69% of the 2005-HSA1 Mortgage Loans, 60% of the 2006-HSA1 Mortgage Loans, and 59% of the 2006-HSA2 Mortgage Loans reviewed by the outside consultant contained breaches of the representations and warranties in the I&I Agreement. In addition, the review indicated that the defective loans comprised 72%, 68%, and 60% of the total balance of the 2005-HSA1 Mortgage Loans, 2006-HSA1 Mortgage Loans, and 2006-HSA2 Mortgage Loans reviewed by the outside independent consultant respectively.

139. Following the discovery of these high defect rates and pursuant to the HSA Purchase Agreements and the I&I Agreements, FGIC demanded that RFC repurchase the non-compliant Mortgage Loans discovered during its repurchase review. For each Transaction, RFC has expressly refused to repurchase a substantial number of non-conforming Mortgage Loans. This failure constitutes a material breach of the I&I Agreements and HSA Purchase Agreements.

140. Moreover, on information and belief, RFC is and has long been aware that many of the Mortgage Loans were non-conforming and breached its own representations and warranties. Despite this knowledge, and as noted above, RFC has failed to take steps to repurchase the non-conforming loans or replace them with conforming loans.

(7) Breaches Uncovered Using Loan Pool Data

141. In addition to the loan-level review discussed above, FGIC commissioned an independent consultant—a leading provider of financial, property and consumer information, such as property valuation services using automated property valuation tools—to test the accuracy of RFC's representations and warranties relating to the Mortgage Loans regarding occupancy status and CLTV ratios. The consultant extracted information and data relating to over 11,000 Mortgage Loans.

a. Breaches of Owner-Occupancy Representation and Warranty

142. RFC represented that 91.71% of the group one Mortgage Loans and 97.81% of the group two Mortgage Loans in the 2005-HSA1 Transaction would be secured by the borrower's primary residence. *See* 2005-HSA1 Prospectus Supplement at S-24, S-27. RFC represented that 94.09% of the Mortgage Loans in the 2006-HSA1 Transaction would be secured by the borrower's primary residence. *See* 2006-HSA1 Prospectus Supplement at S-30.

143. Based on the information provided, however, FGIC determined that, with respect to the 2005-HSA1 Transaction, only 85.6% of the Mortgage Loans were owner-occupied properties. With respect to the 2006-HSA1 Transaction, and based on the information provided, FGIC determined that only 83.6% of the Mortgage Loans were owner-occupied properties.

144. The Prospectus Supplements therefore materially overstated the percentage of Mortgage Loans in their respective pools that were owner-occupied. As such, RFC breached its representation and warranty that the information in the Prospectus Supplements did not contain any untrue statements of material fact.

145. FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that, as of November 2011, were delinquent for more than 90 days, in foreclosure, charged-off or liquidated) for loans that were determined after review to be non-owner-occupied was approximately 30.2% for the 2005-HSA1 Transaction and 26.6% for the 2006-HSA1 Transaction.

b. Breaches of CLTV Ratio Representation and Warranty

146. The HSA Prospectus Supplements also provided information relating to the CLTV ratios of the underlying Mortgage Loans.

147. CLTV information provided in the HSA Prospectus Supplements provided that the loans generally had been originated with a maximum CLTV ratio of 100%. *See* 2005-HSA1

Prospectus Supplement at S-7; 2006-HSA1 Prospectus Supplement at S-9. CLTV information provided in the HSA Prospectus Supplements included, *inter alia*, (1) the average weighted CLTV ratio for the Mortgage Loans, and (2) the number and aggregate value of the Mortgage Loans with CLTV ratios in a given percentage band (e.g., the number of Mortgage Loans with CLTV ratios of between 80% and 85%, between 85% and 90%, and so on). *See* 2005-HSA1 Prospectus Supplement at II-4, II-16; 2006-HSA1 Prospectus Supplement at II-4. The HSA Prospectus Supplements reported that *none* of the Mortgage Loans had a CLTV ratio over 100 percent. *See id.*

148. Using an industry standard automated valuation model to calculate the value of the underlying property at the time the Mortgage Loan was originated, FGIC determined that 16.14% of the 2005-HSA1 Mortgage Loans and 25.6% of the 2006-HSA1 Mortgage Loans—as opposed to *none* of the loans, as reported in the HSA Prospectus Supplements—had an original CLTV ratio above 100%. In addition, RFC represented in the 2005-HSA1 Prospectus Supplement that the weighted average CLTV ratio of the Mortgage Loans at origination was 93.25% for Group I loans and 89.39% Group II loans, but FGIC determined that the actual weighted average CLTV ratio of the Mortgage Loans at origination was approximately 101.39%. *See* 2005-HSA1 Prospectus Supplement at S-7. RFC represented in the 2006-HSA1 Prospectus Supplement that the weighted average CLTV ratio of the Mortgage Loans at origination was 93.33%, but FGIC determined that the actual weighted average CLTV ratio of the Mortgage Loans at origination was approximately 101.65%. 2006-HSA1 Prospectus Supplement at S-9. Thus, RFC breached its representation and warranty that the information in the HSA Prospectus Supplements did not contain any untrue statements of material fact.

149. Moreover, FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that were delinquent for more than 90 days, in foreclosure, charged-off or liquidated) in the 2005-HSA1 and 2006-HSA1 Transactions for loans where the automated valuation model indicated a CLTV greater than 100% was over 28.44%. This non-performance rate was almost 48.23% greater than the non-performance rate of those loans whose automated valuation model indicated a CLTV below 100%.

150. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicates the clear breach of RFC's contractual representations, warranties, and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans, including the guidelines to which the Mortgage Loans were underwritten. Specifically, for the HSA Transactions, RFC has breached representations and warranties stating that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (i.e. the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of RFC in the Operative Documents (including each representation and warranty in the HSA Purchase Agreements) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- each Mortgage File contains all required documents and instruments;
- the Mortgage Loans were underwritten in substantial compliance with RFC's underwriting guidelines; and
- the CLTV of each Mortgage Loan did not exceed 100%.

151. It is reasonable to conclude—based on what is known by FGIC and as a result of what is being wrongly withheld from FGIC—that many of the thousands of Mortgage Loans

held by the HSA Trusts at closing evidenced similar breaches of RFC's representations and warranties.

152. Indeed, based on the information gathered from FGIC's loan file review and the information extracted by FGIC's consultant relating to owner-occupancy rates discussed above, on information and belief, the Mortgage Loans across the HSA Transactions have suffered defect rates far in excess of what FGIC could have reasonably anticipated.

153. Moreover, the true scope of the material underwriting failures is unknown given RFC's refusal to provide FGIC with pertinent—and contractually required—information. This refusal in itself constitutes a breach of RFC's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

G. RFC's Fraud

154. The material breaches of RFC's representations and warranties, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants RFC made to FGIC to induce its participation in the Transactions. The extraordinarily high defect and default rate among the Mortgage Loans demonstrates not merely that RFC breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the relevant Policy, RFC would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because RFC refuses to provide all of the requested Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

155. All of the Mortgage Loans underlying the Transactions were acquired by RFC. As such, RFC had the access and ability to evaluate the Mortgage Loan files and to determine if

the loans were in substantial compliance with the applicable RFC underwriting guidelines and if the loans breached other representations and warranties made by RFC.

156. To induce FGIC to enter into the HSA Transactions, RFC provided FGIC with a loan tape, which contained false and misleading information regarding, among other things, the CLTV, LTV and DTI ratios, occupancy status, FICO scores, and Residual Income of the borrowers.

157. In addition, RFC made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the each HSA Trust. RFC was well aware that FGIC would not agree to insure the respective HSA Securities unless RFC obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, RFC provided Moody's and S&P with the same false information regarding the credit quality of the underlying mortgage loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the HSA Securities that met FGIC's minimum requirements. In this way, RFC made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that RFC would pass on to FGIC, and second, by causing shadow ratings of the HSA Securities to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

158. RFC also made material representations and warranties and affirmative covenants to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the standards and specific underwriting guidelines to which the Mortgage Loans were underwritten.

159. For example, in each Prospectus Supplement (and in each I&I Agreement by incorporation) RFC assured FGIC that the "underwriting standards relating to the [Mortgage

Loans] generally will conform to those published in [RFC's] client guide, and the provisions of the guide applicable to the home equity program." *See* 2005-HSA1 Prospectus Supplement at S-31; 2006-HSA1 Prospectus Supplement at S-36; 2006-HSA2 Prospectus Supplement at S-43. As such, RFC represented to FGIC that, in the case of each loan within the pool, an underwriter had made an assessment that the borrower had the ability to repay his or her loan, after receiving and reviewing all applicable employment, credit, and property information.

160. Moreover, the HSA Purchase Agreements—and the I&I Agreements for each Transaction by incorporation—also contained false and misleading representations about the Mortgage Loans. In particular, for the HSA Transactions, RFC misrepresented that, as of the closing: (i) the information set forth on the Mortgage Loan Schedule with respect to each Mortgage Loan was true and correct in all material respects as of the date which such information was furnished; (ii) other than with respect to a payment default, there was no material default breach or violation under the terms of any Mortgage Note or Mortgage; (iii) as of the Cut-off Date, no Mortgage Loan was 30 days or more Delinquent in payment of principal and interest; (iv) all of the Mortgage Loans had been underwritten in substantial compliance with the criteria set forth in RFC's underwriting guidelines; and (v) the CLTV for each Mortgage Loan did not exceed 100%.

161. Therefore, at the time of the closing of each of the HSA Transactions, RFC either (1) knew or should have known that its representations were materially false because RFC had not, among other things, determined if the Mortgage Loans did in fact conform to the standards of the home equity program contained in the Client Guide, or (2) had reviewed whether the Mortgage Loans were in conformity with the home equity program, had determined that they

were not, but nonetheless materially misrepresented to FGIC that each Mortgage Loan conformed to the home equity program as set forth in the Client Guide.

162. For each of the Transactions, these representations were essential to FGIC's decision to issue each HSA Policy. In each instance, these representations and warranties were false when stated. RFC, in each case, intentionally made these material misrepresentations to induce FGIC to enter into the relevant I&I Agreement and to issue the relevant Policy or Policies. The true information regarding these loans simply could not substantiate RFC's assurances. In short, no amount of RFC promising that the loans met certain standards actually made those promises true.

163. RFC's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC as well as to a multitude of suits and the potential for more litigation to come.

164. Consistent with this pattern of behavior, RFC defrauded FGIC into issuing the Policy, through its knowing misrepresentations.

H. Ally Financial Aids and Abets RFC's Fraud

165. Ally Financial provided substantial assistance to RFC in fraudulently inducing FGIC to issue each of the HSA Policies. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties RFC made regarding the nature of RFC's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

I. RFC's Breach of Obligations as Master Servicer

166. RFC, as Master Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the

relevant Operative Documents for each of the HSA Transactions, including, but not limited to, its obligations to follow proper servicing procedures, and to sufficiently monitor and manage the performance of the subservicer with respect to its duties under each Transaction.

167. RFC took responsibility for the servicing of the Mortgage Loans through its wholly-owned subsidiary HomeComings, and RFC had certain related contractual obligations under the I&I Agreements and the HSA Servicing Agreements with respect to the HSA Transactions. Under the I&I Agreements, RFC covenanted that "[a]ll [Mortgage Loans] will be serviced in all material respects in compliance with the [relevant HSA Servicing Agreement]." 2005-HSA1 I&I Agreement § 2.02(l); 2006-HSA1 I&I Agreement § 2.02(l); 2006-HSA2 I&I Agreement § 2.02(l). Under the HSA Servicing Agreements, RFC is "obligated and liable to . . . [FGIC] for the servicing and administering of the [Mortgage Loans]," and in doing so is required to "follow[] such procedures as it would employ in its good faith business judgment and which are normal and usual in its general mortgage servicing activities." 2006-HSA1 PSA §§ 3.01(a), 3.04; 2005-HSA1 Servicing Agreement §§ 3.01(a),(c); 2006-HSA2 Servicing Agreement §§ 3.01(a),(c). As such, on each occasion that HomeComings failed to service and administer the Mortgage Loans in conformity with generally accepted servicing practices (including RFC's own servicing guidelines), RFC was liable "to the same extent and under the same terms and conditions as if the Master Servicer alone were servicing and administering the [Mortgage Loans]." 2006-HSA1 PSA § 3.04; 2005-HSA1 Servicing Agreement § 3.01(c); 2006-HSA2 Servicing Agreement § 3.01(c).

168. During 2007, the servicing operations of GMAC Mortgage, GMAC-RFC, and HomeComings were integrated into ResCap. Since the time of the integration, on information and belief, HomeComings has been deficient in its borrower contact, collections and loss

mitigation standards. An onsite review of the Ally Financial servicing arm's headquarters, including those of HomeComings and RFC, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis revealed *inter alia*: (i) inadequate call center staffing (staff unable to handle increased incoming and outgoing call volumes); (ii) call center staffing turnover as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when HomeComings does not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; (v) with respect to second lien loans, a policy of extending largely nonrecoverable advances to delinquent borrowers; and (vi) severely infrequent use of alternative loss mitigation strategies as compared to the industry.

169. RFC, on information and belief, has failed to remedy any of the deficient practices in which HomeComings has engaged as subservicer.

170. In addition, RFC disclosed to FGIC that it classified loans into one of three categories or "Risk Tiers" under a protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

171. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. RFC disclosed to FGIC that all of the mortgage loans in FGIC-insured, RFC-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the Transactions, were placed in the lowest category of risk. For such mortgage loans, regardless of whether they were (i) secured by

second-lien mortgages, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities (all of which are factors that require more attentive servicing), delinquent borrowers were called at a later stage of delinquency, and less frequently, than loans in higher risk categories. As the purchaser of the Mortgage Loans, however, RFC clearly knew that the Mortgage Loans, by their very nature, required particularized servicing such as that provided by HomeComings before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by RFC to ensure that the Mortgage Loans were serviced and administered in accordance with "good faith" business practices constitutes a breach of the HSA Servicing Agreements and the I&I Agreements. *See* 2006-HSA1 PSA §§ 3.01(a), 3.04; 2005-HSA1 Servicing Agreement § 3.01(a),(c); 2006-HSA2 Servicing Agreement § 3.01(a),(c); 2005-HSA1 I&I Agreement § 2.02(l); 2006-HSA1 I&I Agreement § 2.02(l); 2006-HSA2 I&I Agreement § 2.02(l).

172. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, RFC has failed to provide such information.

173. On information and belief, RFC, as Master Servicer, also knew of material breaches of representations and warranties and did not notify FGIC thereof, or cause the repurchase of the Mortgage Loans affected thereby. Accordingly, FGIC reserves its rights to assert additional causes of action relating to RFC's servicing obligations.

J. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

174. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns RFC and GMACM. Ally Financial—as the ultimate parent of ResCap, RFC and GMACM—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, RFC and GMACM.

175. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, RFC and GMACM. Upon information and belief, Ally Financial exercised its direction and control in connection with the HSA Transactions. At times, upon information and belief, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

176. Ally Financial has recently admitted to the Federal Reserve Board and the FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries." *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

177. As further discussed below, Ally Financial's public statements and actions at or around the time of each Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of RFC Directly and Indirectly Through its Control of ResCap

178. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

179. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

180. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[6] Since incorporation, the ownership of ResCap has not changed—Ally Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

181. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial shared at least three common board members, including two individuals who were active participants with respect to

[6] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the Securities and Exchange Commission (the "SEC") on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the proposed 2005 operating agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement") (emphasis added).

182. Moreover, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, and RFMSII, among other Ally Financial subsidiaries.

183. The 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

184. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

185. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally

Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of GMAC, a strong ResCap with an investment grade rating is a key part of our plan of our value creation." *Id*. (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

186. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citi, which provided "funding of up to $13.8bln." A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap]" businesses.

187. Moreover, there is substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

188. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 9, 2011).

189. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

190. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed RFC and GMACM as part of its own business. For example, in its investor presentation from 2007, ResCap declares that RFC and GMACM "are owned *and operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally

Financial wasn't directly controlling RFC and GMACM, it was using ResCap as an instrument to do so.

191. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

192. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one RFC has with respect to the HSA Transactions as Master Servicer.

193. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18,

2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

194. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

Q: Could you please state your name for the record.
A: My name is Jeffrey Stephan.
Q: Okay. And who do you work for?
A: GMAC, LLC [Ally Financial].
Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
Q: Okay.
A: It's GMCA [sic] Mortgage Corporation.
Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?
A. Yes.
Q. So these entities no longer currently exist?
A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

K. FGIC's Contractual Remedies Under The I&I Agreements

195. The I&I Agreements provide FGIC with broad remedies for RFC's breaches of its representations and warranties. Each of the I&I Agreements state that, unless otherwise expressly provided, no remedy conferred in the relevant I&I Agreement is intended to be

exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under the relevant I&I Agreement or any other relevant Operative Document, or existing at law or in equity. *See* 2005-HSA1 I&I Agreement § 5.02(b); 2006-HSA1 I&I Agreement § 5.02(b); 2006-HSA2 I&I Agreement § 5.02(b).

196. In each of the HSA Transactions, RFC also agreed that, any provision in the relevant I&I Agreement or any Operative Document to the contrary notwithstanding, FGIC shall be entitled to full reimbursement from RFC for any payment made under any Policy arising as a result of RFC's failure to substitute for or deposit an amount in respect of any defective Mortgage Loan as required by the relevant HSA Purchase Agreement, together with interest on any and all such amounts remaining unreimbursed from the date such amounts became due until paid in full. *See* 2005-HSA1 I&I Agreement § 3.03(b); 2006-HSA1 I&I Agreement § 3.03(b); 2006-HSA2 I&I Agreement § 3.03(b).

197. Further, in each Transaction, RFC expressly agreed to pay to FGIC any and all reasonable charges, fees, costs and expenses that FGIC may reasonably pay or incur, including reasonable attorneys' and accountants' fees and expenses, in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents, including defending, monitoring or participating in any litigation or proceeding relating to any of the Operative Documents. *See* 2005-HSA1 I&I Agreement § 3.03(c); 2006-HSA1 I&I Agreement § 3.03(c); 2006-HSA2 I&I Agreement § 3.03(c).

198. In addition, in each of the HSA Transactions, RFC agreed to pay, protect, indemnify and save harmless FGIC from and against any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages, costs or expenses (including reasonable fees and expenses of attorneys) of any nature arising out of or relating to the

transactions contemplated by the Operative Documents by reason of the breach by RFC of any representation, warranty or covenant under any of the Operative Documents or the occurrence, in respect of RFC, under any of the Operative Documents, of any event of default. *See* 2005-HSA1 I&I Agreement § 3.04(a); 2006-HSA1 I&I Agreement § 3.04(a); 2006-HSA2 I&I Agreement § 3.04(a).

199. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, RFC agreed to repurchase or substitute Mortgage Loans that did not conform to RFC's representations and warranties, and to indemnify FGIC for claims and losses arising from RFC's breach of any representation or warranty.

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Material Breach of the I&I Agreement—Declaratory Relief Regarding RFC's Indemnification Obligation)

200. FGIC re-alleges and incorporates by reference paragraphs 1 through 199 of this Complaint.

201. The I&I Agreements are valid and binding agreements between the parties.

202. FGIC has performed its obligations under each of the I&I Agreements.

203. RFC's representations and warranties were material to FGIC's decision to insure the HSA Securities and to issue the Policies.

204. RFC's pervasive and material breaches of its representations and warranties constitute a material breach of each of the I&I Agreements that has deprived FGIC of the purpose of the parties' bargain.

205. Pursuant to the I&I Agreements, RFC must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by RFC of any of the representations or warranties contained in the I&I

Agreements or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by RFC of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

206. As explained above, RFC has breached numerous representations and warranties in the Offering and Operative Documents for the HSA Transactions, including for example, those contained in the I&I Agreements. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

207. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

208. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must jointly and severally indemnify FGIC for all sums arising out of the HSA Transactions for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the Policies and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policies as and when such sums fall due or claims are presented.

209. In addition, FGIC seeks a declaration that RFC must indemnify FGIC for all sums arising out of the HSA Transactions for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the Policies and to

the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policies as and when such sums fall due or claims are presented.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Fraudulent Inducement—I&I Agreement)

210. FGIC re-alleges and incorporates by reference paragraphs 1 through 209 of this Complaint

211. RFC induced FGIC to enter into the I&I Agreements and to issue the Policies by making false representations and warranties about its business practices and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

212. As explained above, RFC knowingly made materially false statements to, and/or omitted material facts from, FGIC with the intent to induce detrimental reliance by FGIC.

213. RFC intended for FGIC to rely on RFC's material false statements and/or omissions. FGIC had no reason to believe that RFC's representations were false, and reasonably and justifiably relied on RFC's material false statements and/or omissions regarding information uniquely in the possession of RFC when it decided to enter into the I&I Agreements and to issue the Policies for the HSA Securities.

214. As a result of RFC's material false statements and omissions, FGIC entered into the I&I Agreements, issued the Policies, and thereby agreed to insure securities backed by pools of Mortgage Loans that were, in actuality, materially different from the mortgage loan pools that RFC represented would collateralize the HSA Transactions.

215. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

216. As a result of RFC's material false statements and omissions, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

217. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

218. In addition, RFC is separately liable for such damages.

THIRD CAUSE OF ACTION

(Alternatively Against Ally Financial: Aiding and Abetting Fraudulent Inducement—I&I Agreement)

219. FGIC re-alleges and incorporates by reference paragraphs 1 through 218 of this Complaint.

220. As explained above, Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to issue the Policies.

221. RFC could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

222. Both Ally Financial knew that RFC fraudulently induced FGIC issue the Policies for the HSA Transactions.

223. Ally Financial's statements and actions materially aided RFC's fraudulent inducement.

224. As a result of Ally Financial's aiding and abetting RFC's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Representations, Warranties, and Affirmative Covenants)

225. FGIC re-alleges and incorporates by reference paragraphs 1 through 224 of this Complaint.

226. The I&I Agreements are valid and binding agreements between FGIC and RFC.

227. FGIC has performed its obligations under each of the I&I Agreements.

228. As explained above, RFC has materially breached its representations and warranties under the I&I Agreements.

229. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

230. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

231. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

232. In addition, RFC is separately liable for such damages.

FIFTH CAUSE OF ACTION
(As Against Ally Financial, ResCap, and RFC: Breach of Repurchase Obligation)

233. FGIC re-alleges and incorporates by reference paragraphs 1 through 232 of this Complaint.

234. The I&I Agreements are valid and binding agreements between the parties.

235. FGIC has performed its obligations under each I&I Agreement.

236. Pursuant to the terms of the I&I Agreements, and the provisions of the HSA Purchase Agreements incorporated therein, FGIC has demanded that RFC repurchase non-complying Mortgage Loans. RFC has refused to repurchase numerous such Mortgage Loans.

237. RFC has breached the I&I Agreements, and the provisions of the HSA Purchase Agreements incorporated therein, by failing to repurchase those Mortgage Loans that violated RFC's representations and warranties that FGIC has noticed to RFC.

238. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

239. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

240. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

241. In addition, RFC is separately liable for such damages.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Declaratory Relief Regarding Access to Information)

242. FGIC re-alleges and incorporates by reference paragraphs 1 through 241 of this Complaint.

243. The I&I Agreements are valid and binding agreements between FGIC and RFC.

244. FGIC has performed its obligations under each of the I&I Agreements.

245. Pursuant to the I&I Agreements, RFC agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the HSA Transactions. FGIC further has the right to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans pursuant to the I&I Agreements.

246. As discussed above, pursuant to the I&I Agreements, and with regard to requests for access to Mortgage Loan files pursuant to the 2005-HSA1 I&I Agreement and the 2006-HSA2 I&I Agreement, FGIC made numerous reasonable written requests that RFC furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by RFC, and others, concerning the Mortgage Loans.

247. RFC has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

248. RFC has failed to comply with its contractual obligations and breached the I&I Agreements, and with regard to requests for access to Mortgage Loan files RFC has failed to comply with its contractual obligations and breached the 2005-HSA1 I&I Agreement and the 2006-HSA2 I&I Agreement, by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

249. Pursuant to the I&I Agreements, RFC agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer; and (iii) discuss the affairs, finances and accounts of RFC with RFC's independent accountants.

250. FGIC made a reasonable request to inspect the books and records, discuss the affairs, finances and accounts with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants in December 2011.

251. RFC has failed to make available such persons or to produce such information.

252. RFC has failed to comply with its contractual obligations and breached the I&I Agreements by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreements.

253. Pursuant to the I&I Agreements, RFC agreed, on an annual basis or when reasonably requested by FGIC, to cause the Custodian to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreements for each of the HSA Transactions to enable FGIC to track the progress of the recording of Mortgages and Assignments with respect to the Mortgage Loans.

254. FGIC made a reasonable request for the Interim Certification on June 21, 2011.

255. RFC has failed to cause the Interim Certification to be delivered to FGIC as requested. On September 30, 2011, FGIC again notified RFC of its failure to perform under the I&I Agreements, but RFC continued to fail to cause the Interim Certification to be delivered to FGIC.

256. RFC has failed to comply with its contractual obligations and breached the I&I Agreements by failing to cause the Interim Certification to be delivered to FGIC after receiving reasonable requests from FGIC.

257. Pursuant to the I&I Agreements, RFC agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [HSA Servicing Agreements]."

258. FGIC made a reasonable request for servicing notes on December 9, 2010.

259. RFC has failed to comply with its contractual obligations and breached the I&I Agreements by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

260. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

261. Accordingly, FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must comply with the I&I Agreements as they relate to the matters in this cause of action.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Declaratory Relief)

262. FGIC re-alleges and incorporates by reference paragraphs 1 through 261 of this Complaint.

263. This is a claim for declaratory judgment pursuant to CPLR 3001 for the purpose of determining a justiciable controversy between FGIC and Ally Financial, ResCap, and RFC.

264. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this complaint.

265. For the reasons set forth in paragraphs 174 through 194, among others, Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

266. FGIC has been damaged as a result of the actions Ally Financial, ResCap and RFC.

267. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

EIGHTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Master Servicer Obligations)

268. FGIC re-alleges and incorporates by reference paragraphs 1 through 267 of this Complaint.

269. Each of the I&I Agreements is a valid and binding agreement between FGIC and RFC.

270. FGIC has performed its obligations under each of the I&I Agreements.

271. RFC has breached its affirmative covenants under the I&I Agreements to service all Mortgage Loans in all material respects in compliance with the HSA Servicing Agreements.

272. RFC's breaches of the I&I Agreements have caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on Policies and other losses and expenses.

273. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

274. RFC, ResCap, and Ally Financial are jointly and severally liable for such damages.

275. In addition, RFC is separately liable for such damages.

NINTH CAUSE OF ACTION

(As Against RFC: Attorneys' Fees and Costs)

276. FGIC re-alleges and incorporates by reference paragraphs 1 through 275 of this Complaint.

277. The I&I Agreements are valid and binding agreements between FGIC and RFC.

278. FGIC has performed its obligations under each of the I&I Agreements.

279. Pursuant to the I&I Agreements, RFC agreed to reimburse FGIC for any and all costs or expenses "including reasonable fees and expenses of attorneys" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to the I&I Agreements, RFC agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by RFC of any of the representations or warranties contained in each of the I&I Agreements or arising out of or relating to the HSA Transactions.

280. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of RFC's failure to provide Mortgage Loan files, the Interim Certification, Servicing Reports, and financial information, and its breach of the representations and warranties contained in the I&I Agreements and other representations, warranties, and covenants within the Operative Documents.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant Residential Funding Company, LLC, with respect to (1), (2), and (4) through (14) below, and in its favor and against Residential Capital, LLC, with

respect to (1), (2), (4) through (11), (13), and (14) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (11), (13), and (14) below and the following relief:

(1) A declaration that, pursuant to RFC's obligations under the I&I Agreements, RFC solely and/or Ally Financial, ResCap, and RFC must jointly and severally reimburse and indemnify FGIC for all sums arising out of the HSA Transactions for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policies and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policies as and when such sums fall due or such claims are presented, and an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal rescissory, equitable, and punitive damages, to be proven at trial, for RFC's fraudulent inducement of FGIC to enter into the HSA Transactions and to issue the Policies;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's aiding and abetting of RFC's fraudulent inducement of FGIC to enter into the HSA Transactions and to issue the Policies;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for RFC's material breaches of the HSA Transactions;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for RFC's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreements and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that RFC must repurchase all Mortgage Loans that are in breach of RFC's representations and warranties in the HSA Transactions, and an order giving effect to that declaration;

(7) Further or alternatively, a declaration that RFC must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2005-HSA1 Transaction and 2006-HSA2 Transaction, and an order giving effect to that declaration;

(8) Further or alternatively, a declaration that RFC must allow FGIC to inspect the books and records of RFC, to discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants, and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that RFC must cause to be provided servicing notes for the HSA Transactions when requested by FGIC;

(10) Further or alternatively, a declaration that RFC must cause to be provided the custodial Interim Certification when requested by FGIC for the HSA Transactions stating that all mortgage files were complete and were properly transferred into the trusts, or noting any exceptions, and an order giving effect to that declaration;

(11) Further or alternatively, a declaration that Ally Financial, ResCap, and RFC are alter egos of each other;

(12) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreements and other Operative Documents, as defined in the I&I Agreements;

(13) An award of prejudgment interest at the statutory rate; and

(14) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

New York, New York 10017

Pursuant to 28 U.S.C. § 1441, Defendants Residential Capital, LLC ("Residential Capital") and Residential Funding Company, LLC ("Residential Funding") (collectively "Defendants") respectfully give notice of the removal this action, entitled *Financial Guaranty Insurance Company v. Ally Financial, Inc. F/K/A GMAC, LLC; Residential Capital, LLC F/K/A Residential Capital Corporation; Residential Funding Company, LLC F/K/A Residential Funding Corporation*, Index No. 653493/2011 (Supreme Court of the State of New York, County of New York), from the Supreme Court of the State of New York, County of New York, to the United States District Court for the Southern District of New York based upon the following grounds:

1. Upon information and belief, this action was commenced on or about December 15, 2011, in the Supreme Court of the State of New York, County of New York. A copy of the Summons and Complaint was served on Defendant Residential Capital's appointed agent, Corporation Service Company, on December 19, 2011. A copy of the Summons and Complaint was served on Defendant Residential Funding's appointed agent, Corporation Service Company, on December 19, 2011.

2. This Notice of Removal is being filed within thirty (30) days of the date Defendants' appointed agents received service of the Summons and Complaint. This Notice of Removal includes a short and plain statement of grounds for removal together with a copy of all process, pleadings, and orders served upon Defendants in this action attached hereto as Exhibit A.

3. This Court has original jurisdiction over this action under 28 U.S.C. § 1332(a) and this action may be removed to this Court by Defendants pursuant to 28 U.S.C. §

1441(a), in that it is a suit constituting a dispute between citizens of different states and the matter in controversy exceeds the sum of the value of $75,000, exclusive of interest and costs.

a. This suit constitutes a dispute between citizens of different states. As alleged in the Complaint, Plaintiff Financial Guaranty Insurance Company ("Plaintiff") is, and has been at all relevant times, a citizen of New York. Complaint ¶18. As of the date Plaintiff filed suit and currently, Defendant Residential Funding is a Delaware limited liability company. Complaint ¶20. The citizenship of a limited liability company is determined by the citizenship of its members. *Handelsman v. Bedford Vill. Assocs. Ltd. P'ship*, 213 F.3d 48, 51-52 (2nd Cir. 2000). Where the members are themselves limited liability companies, a court looks to the citizenship of their members, and continues this process until it reaches the ultimate incorporated or individual members. *See e.g., Quantlab Financial, LLC v. Tower Research Capital LLC*, 715 F.Supp.2d 542, 546-47 (S.D.N.Y. 2010); *Lindley Contours, LLC v. AABB Fitness Holdings, Inc.*, 414 Fed. Appx 62, 64 (9th Cir. 2011); *Onepoint Solutions, LLC, v. Borchert*, 486 F.3d 432, 347 n.4 (7th Cir. 2007). Residential Funding's sole member at all relevant times has been GMAC-RFC Holding Company, LLC, a Delaware limited liability company. GMAC-RFC Holding Company, LLC's sole member at all relevant times has been Residential Capital, LLC, a Delaware limited liability company. Residential Capital's sole member at all relevant times has been GMAC Mortgage Group LLC, a Delaware limited liability company. GMAC Mortgage Group LLC's sole member at all relevant times has been Ally Financial, Inc. Ally Financial, Inc. is incorporated under the laws of Delaware with its principal place of business in Michigan. Accordingly, Residential Funding is, and has been at all relevant times, a citizen of Delaware and Michigan, the principal place of business and state of incorporation for the ultimate incorporated member. Similarly, Defendant Residential Capital is,

and has been at all relevant times, a citizen of Delaware and Michigan, as its ultimate incorporated member is also Ally Financial, Inc. Finally, defendant Ally Financial, Inc. is, and has been at all relevant times, a citizen of Delaware and Michigan. Thus, the citizenship of all parties are diverse as defined by 28 U.S.C. § 1332(a). Moreover, no defendant is a citizen of New York, the state in which the action is pending and the domicile of the Plaintiff, and none of the parties or companies identified above, other than Plaintiff, has its principal place of business in the State of New York.

b. This action involves a matter in controversy exceeding the sum or value of $75,000, exclusive of costs, in that the compensatory damages sought by the Plaintiff include, among other items, indemnification for and damages in the amount of claims made against Plaintiff's insurance policy for "more than $32 million in claims" presented to Plaintiff, and "tens of millions of dollars more in claims to be presented" under Plaintiff's policy in the future. Complaint ¶¶ 112; Prayer for Relief.

4. Venue lies in the United States District Court for the Southern District of New York because the state-court action was filed in this district. 28 U.S.C. § 1441(a).

5. As required by 28 U.S.C. § 1446(d), Defendants are serving a copy of this Notice of Removal on Plaintiff and will file a copy of the Notice of Removal with the Clerk of the Supreme Court of the State of New York, County of New York.

6. All Defendants have consented to removal of the instant action. Defendant Ally Financial, Inc. will be filing a separate notice of consent.

WHEREFORE, Defendants submit this Notice of Removal of this action from the Supreme Court of the State of New York, New York County, to the United States District Court for the Southern District of New York and pray this action stand so removed.

Dated: New York, New York
January 13, 2012

Financial Guaranty Insurance Company

SUPREME COURT OF THE STATE OF NEW YORK
COUNTY OF NEW YORK

FINANCIAL GUARANTY INSURANCE COMPANY, **Plaintiff,** **-against-** **ALLY FINANCIAL, INC. F/K/A GMAC, LLC; RESIDENTIAL CAPITAL, LLC F/K/A RESIDENTIAL CAPITAL CORPORATION; RESIDENTIAL FUNDING COMPANY, LLC F/K/A RESIDENTIAL FUNDING CORPORATION,** **Defendants.**	**Index No. _____** **COMPLAINT**

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"), Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"), and Residential Funding Company, LLC, formerly known as Residential Funding Corporation ("RFC"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with a financial guaranty insurance policy (the "Policy") issued by FGIC in relation to an RFC-sponsored transaction (the "2005-EMX5 Transaction" or the "Transaction") in which RASC Series 2005-EMX5 Trust (the "2005-EMX5 Trust") issued and sold to investors roughly $380 million aggregate principal amount of insured residential mortgage-backed securities (the "2005-EMX5 Certificates"). As the sponsor of the

2005-EMX5 Transaction, RFC procured the Policy from FGIC in order to enhance the ratings and marketability of the 2005-EMX5 Certificates. RFC fraudulently induced FGIC's agreement to provide this insurance through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices, and the credit quality and characteristics of the thousands of mortgage loans that provided the collateral for the 2005-EMX5 Certificates. In short, the mortgage loans were different—and demonstrably worse—than RFC had represented them to be. FGIC's issuance of the Policy enabled the 2005-EMX5 Certificates to receive an initial triple-A rating from the rating agencies, which in turn made the 2005-EMX5 Transaction viable, and enabled RFC and its affiliates to earn millions of dollars in transaction fees.

2. Since the closing of the 2005-EMX5 Transaction, RFC has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of the 2005-EMX5 Transaction, RFC has violated the essential terms of its agreement with FGIC. RFC has also breached the essential terms of the other operative documents incorporated therein.

3. The wrongdoing committed by RFC, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through ResCap. Ally Financial is the ultimate parent of ResCap, which owns RFC. Ally Financial, as the ultimate parent of ResCap and RFC, has the practical ability, which it has repeatedly exercised, to direct and control the activities of its subsidiaries, including ResCap and RFC. At times, Ally Financial's direction and control was effected by using ResCap as an instrument to achieve its goals.

4. The 2005-EMX5 Transaction is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among RFC and several other

parties. To facilitate the Transaction, RFC pooled together thousands of mortgages (the "Mortgage Loans"), which RFC had purchased from an affiliate of the originator, Mortgage Lenders Network USA, Inc. ("MLN"), a nationwide mortgage lender at that time. The Mortgage Loans consisted of 2,544 first-lien and junior-lien mortgage loans originated by MLN. After origination, the Mortgage Loans were transferred to Emax Financial Group, LLC ("Emax"), an MLN affiliate. RFC acquired the Mortgage Loans from Emax prior to the closing of the 2005-EMX5 Transaction.

5. Following its acquisition of the Mortgage Loans, RFC transferred the Mortgage Loans to another Ally Financial affiliate, Residential Asset Securities Corporation ("RASC"). RASC then deposited the Mortgage Loans it received from RFC into the 2005-EMX5 Trust. The trust, in turn, issued certificates representing the beneficial interest in the 2005-EMX5 Trust. The 2005-EMX5 Trust was a legal entity created by RFC solely for the purposes of the 2005-EMX5 Transaction to hold the Mortgage Loans and to issue the 2005-EMX5 Certificates to investors in a registered public offering.

6. RFC also acted as master servicer of the 2005-EMX5 Transaction, in which capacity it would collect the payments of the borrowers and perform other servicing duties related to the Mortgage Loans. Yet another Ally Financial affiliate, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was the sole underwriter of the 2005-EMX5 Transaction. U.S. Bank National Association ("U.S. Bank") agreed to act as trustee of the 2005-EMX5 Trust (the "Trustee").

7. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the Trust are used to pay, among other things, principal and interest due on the

2005-EMX5 Certificates, and the fees and expenses of RFC and other participants in the Transaction.

8. RFC, directed and controlled by Ally Financial, is, therefore, the hub of the 2005-EMX5 Transaction: it is the sponsor of the securitization, an acquirer and seller of the Mortgage Loans, and the master servicer of the Transaction. The primary victim of the 2005-EMX5 Transaction—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by RFC—is FGIC, which has already been presented with over $32 million in claims under the Policy, with further material losses still to come.

9. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed certificates ("RMBS Certificates"). At the time of the 2005-EMX5 Transaction, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Certificates typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of realized losses on the Mortgage Loans collateralizing the insured securities. FGIC's insurance policies thus enhanced the credit quality and marketability of the insured securities.

10. To enhance the ratings and marketability of the 2005-EMX5 Certificates, and to increase the profit that RFC would derive from the 2005-EMX5 Transaction, RFC sought to have FGIC issue the Policy to U.S. Bank, as Trustee, for the benefit of the holders of the 2005-EMX5 Certificates.

11. As an essential element of the 2005-EMX5 Transaction, RFC made material representations and warranties to FGIC about the manner in which the Mortgage Loans were selected and evaluated and their characteristics to induce FGIC to enter into the Transaction. RFC represented, among other things, that the Mortgage Loans "were in substantial conformity with the standards set forth in Residential Funding's AlterNet Program or are otherwise in conformity with the standards set forth in the description of credit grades set forth in this prospectus supplement." Prospectus Supplement at S-31; *see also* Prospectus Supplement at S-36. Those representations and warranties were false when stated, and FGIC reasonably relied on such warranties, among others, when deciding to enter into the 2005-EMX5 Transaction. As a result, FGIC was fraudulently induced to enter the Transaction, and the credit risk assumed by FGIC in connection with the Transaction was far greater than it would have been had RFC's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

12. RFC received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policy. Ally Financial took actions and made statements to finance, support, and boost investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations RFC had made to FGIC. As a result of its dominance over ResCap and RFC, Ally Financial knew that the representations and warranties RFC made to FGIC, prior to and at the closing, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted RFC's fraudulent inducement of FGIC to issue the Policy.

13. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims

presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policy in reliance on the (presumed) accuracy and truthfulness of RFC's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and therefore the amount of claims presented to FGIC, have been overwhelming. Had FGIC been told the truth about the nature of RFC's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policy, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of RFC's misconduct

14. In order to evaluate the extent of RFC's breaches, FGIC has requested copies of the mortgage loan files and servicing notes for the Mortgage Loans. RFC is obligated, under its agreements with FGIC, to provide those documents to FGIC. RFC has refused to provide FGIC with the requested documentation, which, on information and belief, will further evidence material breaches by RFC. This refusal to provide information in itself constitutes a material breach of RFC's insurance agreement with FGIC.

15. Certain of the material contractual breaches committed by RFC—including, but not limited to, FGIC's right to access information in RFC's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

16. Through this Complaint, FGIC seeks relief against RFC, ResCap, and Ally Financial for RFC's fraudulent inducement, and for its material breaches of its insurance agreement with FGIC and other contractual obligations owed to FGIC in connection with the 2005-EMX5 Transaction.

17. FGIC seeks a declaration from the Court that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other. Further and alternatively, FGIC seeks relief

against Ally Financial for aiding and abetting RFC's fraudulent inducement, and for RFC's material breaches of its contractual obligations to FGIC.

THE PARTIES

18. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

19. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial specializes in automotive financings, residential mortgage financings and services, and insurance services. Ally Financial is the parent company of ResCap, RFC, and all RFC-affiliated entities relevant to this action.

20. Defendant RFC is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. In the period relevant to this action, RFC acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

21. Since 2005, RFC has been an indirect wholly owned subsidiary of ResCap; prior to that time, RFC was an indirect, wholly owned subsidiary of Ally Financial.

22. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly-owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of RFC and is a leading real estate finance company, the business of which includes acquiring, selling and servicing mortgage loans.

23. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

JURISDICTION AND VENUE

24. This Court has jurisdiction over this suit pursuant to CPLR §§ 301 and 311-a. RFC is a registered, foreign, limited liability company within the State of New York. RFC has

appointed an agent for service of process in this State and transacts business within this State. Also, in an agreement at issue in this case, RFC irrevocably submitted to the jurisdiction of this Court. Ally Financial and ResCap likewise regularly transact business in this State, and the acts giving rise to the claims in this case occurred in this State.

25. Venue is proper in New York County pursuant to CPLR § 503. FGIC, as plaintiff, has designated New York County as the place of trial. RFC, a party to this action, has designated New York County as its county of residence in the State of New York, and has agreed not to challenge venue in this Court. Furthermore, substantial activity giving rise to the claims in this case occurred within New York County.

RELEVANT NON-PARTIES

26. GMAC Mortgage LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. GMACM is an indirect wholly-owned subsidiary of ResCap, which in turn is a wholly-owned subsidiary of Ally Financial.

27. RASC, a special purpose vehicle, is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. To facilitate the 2005-EMX5 Transaction, RASC purchased the Mortgage Loans from RFC and deposited them into the 2005-EMX5 Trust. The trust then issued the 2005-EMX5 Certificates to underwriters to be sold to investors.

28. Ally Securities, an entity incorporated in Delaware, is an affiliate of RFC and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the 2005-EMX5 Certificates and, on information and belief, participated in the preparation of the Prospectus and Prospectus Supplement.

29. RFC acquired all of the Mortgage Loans for the 2005-EMX5 Transaction from MLN, which originated and acted as the subservicer of the Mortgage Loans in the Transaction. MLN filed for bankruptcy on February 5, 2007.

FACTUAL ALLEGATIONS

A. RFC

30. In the period relevant to this action, RFC acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Certificates.

31. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults, and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including RFC, led Ally Financial to seek a bailout by the federal government in 2008.

(1) RFC, GMACM, and GMAC-RFC

32. RFC is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

33. GMACM is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate RFC, GMACM engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

34. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical*

Annual: Volume II at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

35. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

36. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with RFC. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

(2) Ally Financial's Securitization Business

37. Ally Financial's business model depended on securitizations, which were conducted by its business units, including RFC. Pooling mortgage loans and selling them into securitizations enabled RFC to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

38. RFC, in addition to securitizing mortgage loans originated by itself or other Ally Financial subsidiaries, also earned fees by securitizing mortgage loans it acquired from third

parties. RFC would typically acquire such mortgage loans and then deposit them into a securitization trust (usually through an affiliate). RFC would then procure underwriters, trustees, and (in the case of insured securities) financial guaranty insurers, and cause the securitization trust to sell securities collateralized by the relevant mortgage loans. In many instances, RFC profited from the difference between the cost it incurred to acquire mortgage loans and the price at which it sold them for deposit into the securitizations.

39. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining whether a mortgage loan is in default based on the transaction documents, RFC typically also sought (as it did here) to be appointed as the master servicer, appointing the mortgage loan originator or an affiliate to act as subservicer. For acting as master servicer to the 2005-EMX5 Transaction, RFC gained substantial additional compensation.

40. RFC also enriched Ally Financial and its subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the 2005-EMX5 Transaction: (i) RASC, which established the 2005-EMX5 Trust and acted as depositor of the Mortgage Loans, charged fees to cover its operating expenses; and (ii) Ally Securities received fees for underwriting the 2005-EMX5 Certificates.

(3) Ally Financial, RFC, and GMACM Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

41. On September 2, 2011, the Federal Housing Finance Authority (the "FHFA"), as conservator for the Federal Home Loan Mortgage Corporation ("Freddie Mac"), filed suit in this Court against RFC for fraud, aiding and abetting fraud, and violating state and federal securities laws in connection with its role in the public filing of offering documents containing false and

misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in RMBS issued through twenty-one RFC-sponsored transactions similar to the 2005-EMX5 Transaction.

42. The FHFA also alleges violations of state and federal securities laws by RFC and its parent, Ally Financial, and their affiliates, stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, FHFA also alleges aiding and abetting fraud against RFC's affiliates and Ally Financial for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs.

43. In addition, RFC is currently facing a lawsuit brought by MBIA Insurance Corporation in this Court for, among other things, fraud and breach of representations and warranties. On December 22, 2009, this Court issued a ruling on RFC's motion to dismiss which allowed both the breach of contract and the fraud claims, among others, to proceed.

44. DZ Bank AG also filed a summons with notice in New York Supreme Court on December 13, 2011, against Ally Financial, ResCap, RFC, RASC, and other Ally Financial subsidiaries for common-law fraud, fraudulent inducement, negligent misrepresentation, and aiding and abetting fraud, in connection with the 2005-EMX5 Transaction. The summons with notice alleges material misrepresentations and omissions regarding the standards used to underwrite, and key statistical characteristics of, the Mortgage Loans in the 2005-EMX5

Transaction. The claims arise from DZ Bank AG's purchase of $289.8 million in securities issued by Ally Financial subsidiaries, including a portion of the 2005-EMX5 Certificates.

45. As of November 4, 2011, there were twenty-two pending suits against Ally Financial's mortgage-related subsidiaries, according to Ally Financial's quarterly report for the third quarter of 2011. The plaintiffs in those suits have alleged, among other things, that Ally's various subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011).

46. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. In the first nine months of 2011 alone, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $254 million worth of mortgages related to securitizations it consummated between 2004 and 2007. It clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own SEC filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 88 (Nov. 4, 2011).

47. According to its most recent quarterly report, Ally Financial believes its "exposure to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008 . . . ." Ally Fin. Inc., Quarterly Report (Form

10-Q), at 146 (Nov. 4, 2011). The 2005-EMX5 Transaction is, as the name implies, of the 2005 vintage.

48. Additionally, Ally Financial also disclosed that the U.S. Securities and Exchange Commission served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

49. Furthermore, RFC's sister company GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." *Id.* (emphasis added).

(4) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and RFC

50. Ally Financial is considering filing for bankruptcy protection for ResCap, its wholly-owned, indirect subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports, as of November 9, 2011. RFC is a wholly-owned, indirect subsidiary of ResCap.

51. Bloomberg News reported that "[d]erivatives traders are betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering," in an article, entitled "Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance," dated

November 14, 2011. According to the article, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy.

52. Indeed, Ally Financial warned in its 2010 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 21 (Feb. 25, 2011).

B. RFC's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

53. To improve the marketability and ratings of the RMBS Certificates issued as part of its securitizations, RFC from time to time sought credit enhancement for the RMBS Certificates from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the one FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Certificates that, if there is a shortfall in cash available to it to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

54. For a trust that issues RMBS Certificates, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS Certificates. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the loan pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS Certificate investors. Such shortfalls result in claims on FGIC's policy.

(2) Securitization Sponsor's Representations and Warranties

55. The risk FGIC assumes when it agrees to issue a policy for RMBS Certificates depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originator and the characteristics of the loans. If, for instance, a loan originator employs substandard underwriting practices, the underlying mortgage loans would be of inferior credit quality. Consequently**,** the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage portfolio as a whole, would be materially increased.

56. Accordingly, FGIC generally required securitization sponsors like RFC to provide substantial representations and warranties about the underlying mortgage loans, including representations about the standards and procedures used to underwrite the loans and the characteristics of the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to month income ("DTI ratio"), the ratio of the mortgage loan principal balance to the value of the mortgaged property at origination ("LTV ratio"), the ratio of the combined outstanding principal balances of the mortgage loan and all senior mortgage loans secured by the mortgaged property to the value of the mortgaged property at origination ("CLTV ratio"), the borrower's credit score ("FICO score"), and the credit grade of the loan according to RFC's grading system ("Credit Grade"). Even where, as here, RFC did not originate the loans at issue, it nonetheless is typically required to make representations about those loans, thereby assuming the risk that those representations might not be accurate. RFC's representations and warranties were intended to allow FGIC to assess the credit risk inherent in the mortgage loan pool before deciding to commit to the transaction.

C. The RASC 2005-EMX5 Transaction

57. In late 2005, RFC began to put together the 2005-EMX5 Transaction. RFC purchased thousands of residential mortgage loans originated by MLN from Emax, pooled those loans, and deposited them in the 2005-EMX5 Trust (via RASC). The trust then issued $380 million aggregate principal amount of Class A Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2005-EMX5. The 2005-EMX5 Certificates consisted of three classes of senior certificates, all of which were insured by FGIC.

58. The Mortgage Loans comprised 2,544 fixed and adjustable-rate first-lien and junior-lien mortgage loans having an outstanding aggregate principal balance of $400,000,044. To enhance the ratings and marketability of the 2005-EMX5 Certificates, RFC sought a financial guaranty insurance policy from FGIC for the purpose of insuring the transaction for the benefit of the certificate holders. On December 16, 2005, FGIC and RFC executed an Insurance and Indemnity Agreement (the "I&I Agreement"), under which FGIC agreed to issue a financial guaranty insurance policy to insure the 2005-EMX5 Certificates, and FGIC accordingly issued its policy number 05030153. The I&I Agreement was signed by FGIC (the Insurer of the Transaction); RFC (the Seller and Master Servicer of the Transaction); RASC (the Depositor for the Transaction); and U.S. Bank (the Trustee for the Transaction).

59. The I&I Agreement provides that FGIC is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." The "Operative Documents" are defined to include, among other documents: (i) the 2005-EMX5 Certificates; (ii) the Pooling and Servicing Agreement (the "PSA"), dated December 1, 2005, among RFC, RASC, and U.S. Bank; and (iii) the Assignment and Assumption Agreement (the "A&A Agreement"), dated as of December 16, 2005, between RFC and RASC. The PSA also provides that FGIC (the Certificate Insurer) "is an express third-party beneficiary of [the PSA]."

60. The Policy improved the marketability of the 2005-EMX5 Certificates by mitigating risk for potential investors and making the 2005-EMX5 Certificates eligible to receive an initial credit rating of triple-A by the rating agencies at closing.

61. RFC and the Depositor offered the 2005-EMX5 Certificates for sale pursuant to a prospectus, dated May 2, 2005 (the "Prospectus"), and a prospectus supplement (the "Prospectus Supplement"), dated December 13, 2005, touting the Policy and the triple-A initial rating of the 2005-EMX5 Certificates made possible by the Policy. The Prospectus and the Prospectus Supplement, together with certain preliminary Offering Documents, each as further supplemented by any subsequent amendment or supplement thereto, and any other Offering Documents that makes reference to the Policy, are referred to collectively as the "Offering Documents."

62. On December 16, 2005, an Ally Financial subsidiary, Ally Securities, sold the 2005-EMX5 Certificates to investors, and FGIC issued the Policy in accordance with the terms of the I&I Agreement.

D. RFC Fraudulently Induces FGIC to Insure the 2005-EMX5 Certificates with Substantial Assistance from Ally Financial

(1) RFC's Fraudulent Inducement of FGIC

63. FGIC's participation in the 2005-EMX5 Transaction was an essential component of the 2005-EMX5 Transaction and enhanced RFC's ability to market the securitization effectively. The Policy allowed RFC to sell the 2005-EMX5 Certificates with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

64. In order to induce FGIC to write financial guaranty insurance for the 2005-EMX5 Transaction, RFC provided to FGIC, directly or indirectly, a variety of information.

65. First and foremost, RFC provided to FGIC initial and final Prospectus Supplements summarizing, among other material information, the credit quality and characteristics of the Mortgage Loans, and RFC's loan underwriting guidelines. RFC represented in the Prospectus Supplement that the Mortgage Loans "were in substantial conformity with the standards set forth in Residential Funding's AlterNet Program or are otherwise in conformity with the standards set forth in the description of credit grades set forth in this prospectus supplement." Prospectus Supplement at S-31; *see also* Prospectus Supplement at S-36.

66. Second, RFC provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in the 2005-EMX5 Transaction, together with representations regarding material statistics about the loan pool as a whole.

67. Third, RFC provided to FGIC credit ratings for the 2005-EMX5 Certificates determined without considering the effect of the Policy. These ratings, which RFC procured from the credit rating agencies, are known as "shadow ratings."

68. Fourth, RFC provided information regarding MLN's practices and procedures for originating and servicing mortgage loans, and the prior performance of such loans.

69. Fifth, as discussed in detail in Section E, RFC provided representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreement regarding the mortgage loans specifically and the loan pool generally.

70. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the 2005-EMX5 Certificates, FGIC relied in part upon representations and warranties regarding RFC's loan underwriting standards made by RFC in the Prospectus and

Prospectus Supplement. A Preliminary Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about December 6, 2005, in an email sent by Duane K. Beasley on behalf of RFC. The Prospectus, as supplemented by the Prospectus Supplement, was filed with the SEC and became effective on December 13, 2005. The Final Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about December 14, 2005, in an email sent by Duane K. Beasley on RFC's behalf.

71. The Prospectus Supplement set forth, among other information, the following important characteristics of the Mortgage Loan pool: the ranges of and weighted average FICO scores and Credit Grades, the ranges of and weighted average LTV and CLTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (i.e., whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). Prospectus Supplement at II-1 – II-11.

72. The Prospectus Supplement expressly states: "Prior to assignment to the depositor, [RFC] reviewed the underwriting standards for the mortgage loans and all of the mortgage loans were in substantial conformity with the standards set forth in Residential Funding's AlterNet Program or are otherwise in conformity with the standards set forth in the description of credit grades set forth in this prospectus supplement." Prospectus Supplement at S-31; *see also* Prospectus Supplement at S-36.

73. RFC publishes its loan underwriting standards in a document the Prospectus refers to as "Residential Funding's Client Guide" as modified from time to time (the "Client Guide"). In general, the Client Guide specifies documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a

particular mortgage loan or line of credit. Depending upon the particular type of loan or line of credit, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories, and/or evidence of closing funds, among other things.

74. RFC disclosed additional data relevant to the AlterNet Program to FGIC. In particular, RFC provided FGIC with the AlterNet Guidelines. RFC also disclosed in the Prospectus Supplement the delinquency and foreclosure experience it had recorded for the AlterNet Program for nine months ending in September 2005 and for the preceding three years. Prospectus Supplement at S-78, S-79.

75. The Prospectus Supplement and Prospectus Supplement also include substantive criteria for eligibility addressing material characteristics of a proposed loan, such as DTI ratios, LTV and CLTV ratios, occupancy status, and Credit Grades.

76. In particular, RFC represented in the Offering Documents that the loans had been originated with a maximum monthly DTI ratio of 55%, a maximum LTV ratio of 100% for first-lien loans, and a maximum CLTV ratio of 100% for junior-lien loans. *See* Prospectus Supplement at II-3, II-11. Moreover, with respect to at least 98.8% of the Mortgage Loans, RFC represented that the maximum DTI ratio was 50%, and the maximum CLTV ratio was 95%. *See* Prospectus Supplement at S-33, S-34 and II-7.

77. RFC also represented in the Offering Documents, as well as in the A&A Agreement, that 97.56% of the Mortgage Loans would be owner-occupied. Prospectus Supplement at II-6; A&A Agreement § 4(xxiii).

78. ***Loan Tapes.*** RFC sent via email final loan tapes to FGIC on December 12, 2005. The loan tapes provided by RFC set forth, for each loan in the pool, key characteristics such as

the borrower's FICO score, Credit Grades, DTI ratio, and the LTV and CLTV ratios for the loan. RFC also disclosed in the Prospectus Supplement, with respect to the pool as a whole, aggregate characteristics relevant to the assessment of the credit risk of the pool, including FICO scores, Credit Grades, DTI ratios, and LTV and CLTV ratios.

79. ***Shadow Rating Letters***. RFC, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. Based on the information supplied by RFC, Moody's assessed the credit quality of the loan pool and assigned a shadow rating of A3 to the 2005-EMX5 Certificates, while S&P assigned the 2005-EMX5 Certificates a shadow rating of A. These shadow ratings met FGIC's minimum requirements. FGIC required these shadow ratings as an essential condition to its willingness to insure the 2005-EMX5 Transaction.

80. ***MLN.*** FGIC, having had no prior experience with MLN, and having no direct contact with MLN, relied on RFC to conduct an appropriate inquiry into the business methods and practices and procedures of MLN. FGIC also relied on RFC to provide FGIC with information about MLN and the performance of loans that were originated and/or serviced by MLN. On November 30 and December 2, 2005, RFC provided FGIC with a variety of information concerning MLN's practices, procedures, and performance in originating and servicing mortgage loans.

81. RFC acquired and held a portfolio of loans from MLN that were originated and serviced between 2003 and 2005. RFC provided FGIC with performance data regarding these MLN originated loans purporting to show that such loans performed substantially better than RFC's own comparable mortgage loan portfolio.

82. In addition, the Prospectus Supplement included performance data for the mortgage loans acquired by RFC and serviced by MLN for the years 2003, 2004, and the first nine months of 2005.

(2) RFC's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

83. Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to participate in the 2005-EMX5 Transaction and, ultimately, issue the Policy. Ally Financial knew that the Mortgage Loans underlying the 2005-EMX5 Transaction were of a substantially poorer quality than was represented to FGIC and other participants in the Transaction, including investors. Ally Financial further knew that the Mortgage Loans were not underwritten to the standards represented in the Offering Documents and warranted in the Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap and its other subsidiaries, Ally Financial knew that the representations and warranties RFC made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

84. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to finance, support, and engender investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

85. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

86. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Exhibit 99.1.

87. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

88. Ally Financial's corporate restructuring also allowed RFC to explicitly represent and warrant to FGIC in the I&I Agreement that RFC "is solvent, and will not be rendered insolvent by the Transaction. . . . [RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary RFC. I&I Agreement § 2.01(xiii).

89. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the 2005-EMX5 Transactions—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in

the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

90. Moreover, as a result of its domination and control over ResCap and RFC, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of RFC's representations and warranties to FGIC—and that they were untrue when stated. For example, Thomas Marano served as an officer of Ally Financial as well as Chairman and CEO of ResCap, and Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a Director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including RFC, shared numerous directors and senior management as well.

91. As a result of the overlapping personnel, intertwined business operations, and the freeflow of information among Ally Financial, ResCap, and RFC, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by RFC was shared among and between RFC and its parent ResCap, as well as ResCap and its parent Ally Financial. Indeed, at least one Ally Financial employee who was involved in the 2005-EMX5 Transaction appeared on the Transaction's working group list and received all distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

92. Another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries is David C. Walker. Walker joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. In

September 2005, shortly before the closing of the 2005-EMX5 Transaction, Walker was a director at ResCap, GMACM, RFC, and RASC, among other ResCap subsidiaries. In the 2005-EMX5 Transaction, acting as a Director of RASC, Walker was a signatory to a "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors," which was included in the closing documents of the Transaction.

93. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to RFC in fraudulently inducing FGIC to participate in the Transaction and issue the Policy. Further, the issuance of the Policy, which made the 2005-EMX5 Transaction possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. RFC's Representations, Warranties, and Affirmative Covenants

94. In connection with the 2005-EMX5 Transaction, RFC, at the direction of Ally Financial, either directly or indirectly through ResCap, made numerous representations, warranties, and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way the loans were selected and evaluated, the characteristics of the Mortgage Loans, and the accuracy of the information supplied to FGIC. RFC also promised to provide timely Mortgage Loan file information and to provide FGIC with a variety of information, including access to RFC's books and records and to RFC's Servicing Officer and its independent accountants.

95. RFC's representation, among others, that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into the 2005-EMX5 Transaction

and to issue the Policy. Further, the I&I Agreement's incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and every one of the representations and warranties that RFC made in connection with the 2005-EMX5 Transaction.

96. FGIC, for its part, reasonably relied on the information available to it regarding the underlying mortgage loans and the representations and warranties provided by RFC. Since FGIC had neither the right under the Operative Documents, nor the practical ability, to review the thousands of underlying Mortgage Loan files in the four days available to it prior to the closing of the 2005-EMX5 Transaction, RFC knew that FGIC had no choice but to rely on RFC's representations regarding the underlying loans in determining whether to insure the 2005-EMX5 Transaction. Further, FGIC had no reason to believe that these representations were not true and accurate.

97. RFC included 2,544 individual Mortgage Loans in the 2005-EMX5 Trust. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation, and other forms of documentation necessary to support underwriting decisions. Unlike RFC, FGIC was under no contractual duty whatsoever to review the Mortgage Loans. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by RFC regarding its evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on the fact that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

98. Based on the information received by FGIC and the representations and warranties given by RFC, FGIC entered into the I&I Agreement and agreed to issue the Policy to the Trustee for the benefit of the holders of the 2005-EMX5 Certificates. In return for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the 2005-EMX5 Certificates, commensurate with the risk FGIC thought it was taking. Specifically, FGIC received 0.20% per annum of the aggregate balance of the 2005-EMX5 Certificates for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties, and affirmative covenants provided by RFC.

99. RFC's information, representations, and warranties were materially false when disclosed and/or provided by RFC. RFC knew that this information, and its representations and warranties, were materially false when made. RFC also knew that this information and the representations and warranties were essential to FGIC's decision to issue the Policy. Indeed, RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and issue the Policy. The issuance by FGIC of the Policy—induced by RFC's fraudulent misrepresentations and substantial assistance of Ally Financial—made the 2005-EMX5 Certificates eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(3) Representations, Warranties, and Affirmative Covenants Relating to the Operative and Offering Documents

100. Under Section 2.01 of the I&I Agreement, RFC made the following representations and warranties, among others (emphasis added in each case):

- *Accuracy of Information*. **None of the Operative Documents nor any other material information relating to the Mortgage Loans**, the operations of RFC . . . or the financial condition of RFC . . . furnished to [FGIC] . . . by RFC . . . including the Offering Documents . . . **contains any statement of a material fact**

which was untrue or misleading in any material respect when made. [RFC] has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change. Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to RFC . . . that would render any of the Documents untrue or misleading in any material respect.

- *Compliance with Securities Laws*. The offering and sale of the Class A Certificates complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading** . . . .

- *Operative Documents*. **Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects** . . . .

- *Solvency; Fraudulent Conveyance*. [RFC] is solvent, and will not be rendered insolvent by the Transaction. . . . **[RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**. [RFC] does not intend to incur, and does not believe that it has incurred, debts beyond its ability to pay as they mature. . . . [RFC] is not entering into the Operative Documents, or transferring any of its assets in connection with the Transaction, with any intent to hinder, delay or defraud any of its creditors.

101. *First*, in the I&I Agreements, RFC represented and warranted that "[n]one of the Operative Documents nor any other material information relating to the Mortgage Loans, the operations of RFC . . . or the financial condition of RFC . . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." I&I Agreement § 2.01(x). Through these Operative and Offering Documents, as detailed above, RFC communicated several material facts about the characteristics of the mortgage loans sold to the 2005-EMX5 Trust.

102. *Second*, in the I&I Agreement, RFC also represented and warranted that the "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances

under which they were made, not misleading." I&I Agreement § 2.01(xi). As discussed above, in the Prospectus Supplement, RFC represented that the Mortgage Loans sold to the 2005-EMX5 Trust had been underwritten in substantial conformity with RFC's underwriting standards.

103. *Third*, the I&I Agreement incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the respective related Operative Documents: "Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects . . . ." I&I Agreement § 2.01(xii). The incorporation by reference of the Operative Documents into the I&I Agreement was intended to allow FGIC to rely on any representation and warranty that RFC made to other entities, such as investors or the Trustee, in connection with the 2005-EMX5 Transaction. Indeed, the I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. I&I Agreement § 2.02(k).

104. *Fourth*, RFC also provided information to FGIC concerning Mortgage Loans in the 2005-EMX5 Transaction. *See* I&I Agreement § 2.02(c)(iii). This information included schedules or data tape that set forth statistics about the loan pool. The schedules purported to describe key characteristics relevant to the assessment of risk, including DTI, LTV and CLTV ratios, occupancy status, Credit Grades, and FICO scores. *See* PSA § 1.01. On information and belief, the loan tape FGIC received at closing contains the same information as is contained in the schedule, referred to in Section 4(xv) of the A&A Agreement. In turn, in the A&A Agreement, RFC represented that all the information in those schedules "is true and correct in all material respects as of the date or dates which such information is furnished." § 4(xv).

105. As a result of incorporating into the I&I Agreement the representations and warranties in the related Operative Documents, RFC incorporated representations and warranties

regarding the underwriting of the Mortgage Loans included in the 2005-EMX5 Transaction. These representations and warranties set forth the standards governing each Mortgage Loan, including, significantly, the representation that each Mortgage Loan had been underwritten in compliance with RFC's underwriting guidelines.

106. In particular, in the A&A Agreement, RFC represented and warranted as the Mortgage Loans:

- **Information in Mortgage Loan Schedule**: "The information set forth on the Mortgage Loan Schedule with respect to each Mortgage Loan is true and correct in all material respects as of the date or dates which such information is furnished." § 4(xv).

- **No Material Breach Or Default**: "[T]here is no default, breach, violation or event of acceleration existing under any Mortgage Note or Mortgage and no event which, with notice and expiration of any grace or cure period, would constitute a default, breach, violation or event of acceleration, and no such default, breach, violation or event of acceleration has been waived by RFC or by any other entity involved in originating or servicing a Mortgage Loan." § 4(xxviii).

- **LTV Ratio**: "The weighted average Loan-to-Value Ratio with respect to the Mortgage Loans, by outstanding principal balance at origination, is 83.80%." § 4(xviii).

- **Delinquent Loans**: "As of the Cut-off Date, 0. 1% of the Mortgage Loans are 30 or more days Delinquent in payment of principal and interest." § 4(xvi).

- **Credit Grades**: "No more than 61.41% of the Mortgage Loans have been classified by RFC as Credit Grade A4, no more than 26.69% of the Mortgage Loans have been classified by RFC as Credit Grade AX Mortgage Loans, no more than 10.71% of the Mortgage Loans have been classified by RFC as Credit Grade AM Mortgage Loans, no more than 1.18% of the Mortgage Loans have been classified by RFC as Credit Grade B Mortgage Loans, none of the Mortgage Loans have been classified by RFC as Credit Grade C Mortgage Loans and 0.01% of the Mortgage Loans have been classified by RFC as Credit Grade CM Mortgage Loans, in each case as described generally in the Preliminary Prospectus Supplement." § 4(xxx).

- **Occupancy Status**: "Approximately 93.87% of the [Mortgage Loans] (by outstanding principal balance as of the Cut-Off Date) are secured by the owner's primary residence." § 4(xxiii).

107. Moreover, in the I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—RFC specifically covenants that it would "comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreement § 2.02(a), (k).

108. RFC also agreed that it had to receive FGIC's consent before modifying or amending any of the Operative Documents. The I&I Agreement provides, "[RFC] will not modify, waive or amend, or consent to any modification, waiver or amendment of, any of the terms, provisions or conditions of the Operative Documents to which it is a party . . . without the prior written consent of [FGIC], which consent shall not be unreasonably withheld, conditioned or delayed." § 2.03(b).

(4) Representations, Warranties and Affirmative Covenants Relating to Access to Documents and RFC

109. In addition to the representations and warranties referenced above, the I&I Agreements provide that RFC, as Seller and Master Servicer, has the contractual obligation to provide FGIC with access to the underlying Mortgage Loans, servicing notes, and custodial interim certification stating that all mortgage files were complete and properly transferred into the appropriate trust ("Interim Certification"). Specifically, the I&I Agreement provides:

- *Other Information*. (A) Promptly upon request, such other data as [FGIC] may reasonably request relating to the Mortgage Loans, the servicing of the Mortgage Loans . . . the Transaction or the ability of any of RFC or the Depositor to perform its obligations under the Operative Documents, and (B) all information required to be furnished to the Trustee or the Holders, as the case may be. § 2.02(c)(v).

- *Access to Records; Discussions with Officers and Accountants*. On an annual basis, or at any time when a Shortfall Event shall have occurred and be continuing, *upon the reasonable request of [FGIC], it will permit [FGIC] or its authorized agents, or cause [FGIC] or its authorized agents to be permitted* . . . to inspect the books and records of RFC . . . . to discuss the affairs, finances and accounts of

> RFC . . . as they relate to the Mortgage Loans, the Transaction or the ability to perform [its] obligations under the Operative Documents with a Servicing Officer . . . [and] if [FGIC] reasonably believes that a Material Adverse Change may have occurred and with RFC's consent, which consent shall not be unreasonably withheld or delayed, to discuss the affairs, finances and accounts of RFC or the Depositor with the independent accountants of such Person; provided, however, that officers of RFC shall have the right to be present during such discussions. In addition, if requested by [FGIC], on an annual basis, or otherwise when reasonably requested by [FGIC], RFC will . . . cause the Custodian to deliver to [FGIC] an updated certification, in the form of the "Interim Certification" required under the Custody Agreement, with an exceptions list attached thereto, to enable [FGIC] to track the progress of recording of Mortgages and Assignments with respect to the Mortgage Loans. § 2.02(e) (emphasis added).

- *Due Diligence*. If in [FGIC's] reasonable judgment circumstances so warrant, based on the performance of the Transaction, [FGIC] shall have the right, so long as the Class A Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices, at [FGIC]'s expense and in reasonable manner convenient to both RFC and [FGIC]. This due diligence right is in addition to the access provided and the other rights provided for in Section 2.02(e) of this Insurance Agreement. § 2.02(m).

F. RFC's Breaches of Its Representations, Warranties, and Affirmative Covenants

110. As discussed above, FGIC relied on material representations and warranties made by RFC regarding the manner in which the Mortgage Loans were selected and evaluated, the characteristics of those loans, and the accuracy and completeness of information RFC supplied to FGIC. Based on those representations and warranties, FGIC agreed to issue the Policy. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed above, the risk that FGIC assumed when it issued the Policy was many times greater than the risk disclosed by RFC's representations and warranties. RFC breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

111. The 2005-EMX5 Transaction has performed poorly, and delinquencies and defaults for Mortgage Loans in the 2005-EMX5 Transaction have been substantial. As of November 2011, a total of 1,083 mortgage loans, representing 42.6% of the loans underlying the

2005-EMX5 Transaction, had posted a loss or were severely delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue the Policy, RFC assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with RFC's representations and warranties.

112. The poor performance of the Mortgage Loans has reduced the cash flow to the 2005-EMX5 Trust, which has caused and will continue to cause claims to be presented to FGIC under the Policy to cover these shortfalls. Indeed, as of November 2011, more than $32 million in claims had been presented to FGIC in connection with the 2005-EMX5 Transaction. FGIC expects tens of millions of dollars more in claims to be presented to it under the 2005-EMX5 Transaction in the future.

(1) RFC's Denial of Loan File Requests

113. As the 2005-EMX5 Transaction continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blashko, an RFC/ResCap employee, via e-mail demanding that RFC provide 500 of the Mortgage Loan files. Having received no response from RFC to its earlier requests, FGIC sent a follow-up e-mail on February 3, 2011 regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information and belief, the request required authorization from officers at Ally Financial, and RFC/ResCap's response was directed by officers at Ally Financial.

114. On February 14, 2011, and again on April 26, 2011, FGIC sent further follow-up letters requesting loan files.

115. In finally responding to FGIC's request for information, RFC refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans").

Instead, it only provided FGIC with a portion of the requested loan files, consisting solely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

116. Pursuant to the PSA and the I&I Agreement, FGIC is entitled to reasonable access to the documentation regarding all of the Mortgage Loans. Section 2.02(m) of the I&I Agreement provides that FGIC "shall have the right, so long as the [2005-EMX5] Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans . . . ." Notably, there is no limitation in the I&I Agreement as to the nature of the Mortgage Loan files that are subject to review. Further, Section 2.02(c)(v) of the I&I Agreement states that "[p]romptly upon request," RFC must provide to FGIC "such other data as [FGIC] may reasonably request relating to the Mortgage Loans . . . ."

117. By producing only non-performing Mortgage Loan files, in contravention of the I&I Agreement, RFC has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

(2) RFC's Denial of Interim Certification Requests

118. On June 21, 2011, FGIC demanded, pursuant to Section 2.02(e) of the I&I Agreement, that RFC promptly cause the Custodian under the 2005-EMX5 Transaction to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement for the Transaction, with an exceptions list attached thereto. An Interim Certification would enable FGIC to track the progress of the recording of mortgages and assignments with respect to the related Mortgage Loans.

119. Again on December 8, 2011, FGIC wrote RFC demanding the Interim Certification, noting that it had been over five months since FGIC's initial letter and that RFC had failed to respond.

120. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to these requests.

(3) RFC's Denial of Servicing Notes

121. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(iv) of the I&I Agreement, that RFC furnish or cause to furnish the servicing notes for the Mortgage Loans.

122. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to requests for servicing notes.

(4) RFC's Denial Of FGIC's Access To Books and Records, Servicing Officer, and RFC's Independent Accountants

123. On December 1, 2011, in accordance with its express rights under Sections 2.02(e)(i)-(iii) of the I&I Agreement, FGIC requested to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances, and accounts of RFC with the Servicing Officer of RFC; and (iii) discuss the affairs, finances, and accounts of RFC with RFC's independent accountants.

124. To date, RFC has failed to respond to this request, in violation of the I&I Agreement.

(5) Breaches Uncovered In Loan File Reviews

125. As discussed above, RFC improperly refused to provide FGIC with any loan files for "Performing Loans" when such loans were demanded on several occasions. Accordingly, when it requested files for 500 of the Mortgage Loans for the 2005-EMX5 Transaction in December 2010, FGIC received only a portion of that sample and that portion consisted of only Mortgage Loans that RFC characterized as "non-performing."

126. After receiving those loan files, FGIC evaluated them to determine whether they contained material breaches of the I&I Agreement and the 2005-EMX5 Operative Documents necessitating repurchase under the related Operative Documents. To perform this review, FGIC

hired an independent outside consultant, having particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

127. The independent consultant's review revealed that approximately 70% of the Mortgage Loans reviewed by the outside consultant contained breaches of the representations and warranties in the I&I Agreement.

128. A small sample of these material breaches and underwriting violations are listed below:

- Loan Number 10060154: the loan file is lacking a number of documents: a loan application, a loan approval, a credit report, an appraisal, income documentation, a verification of mortgage/verification of residence, a HUD-1 settlement statement, a hazard insurance policy, a flood certification, and a first lien note. All of the missing documentation was required under the relevant underwriting guidelines.

- Loan Number 10062240: the loan application indicated the loan is for an owner-occupied property. However, FGIC's investigation of tax records reflect that the tax bills were not sent to the borrower at the subject property address, indicating the borrower most likely did not occupy the subject property.

- Loan number 10048194: the loan file shows income misrepresentation. The loan application indicated that the borrower earned $7,083 per month as a sales representative with ATS Travel and that the co-borrower earned $2,500 per month as a sales associate with Hecht's Department Store. The loan file contained copies of the borrower's bank statement (the co-borrower's name was not listed on them), which reflected direct deposit payroll from CVS. The borrowers did not indicate on the loan application that either one of them was employed by CVS. Also, the monthly deposits made to the borrower's checking account, for less than $3,500 per month, were far less than the $7,083 per month in income he stated he earned. Prudent underwriting should not have qualified the loan as stated income documentation with the above mentioned discrepancies found on the bank statements.

- Loan Number 10059906: the loan file shows that the borrower had a foreclosure within the past three years, which violates the relevant underwriting guidelines.

- Loan Number 10047054: the loan was approved with a credit score of 511 and a LTV ratio of 89%. RFC represented that there was no loan program, however, that would permit a borrower to be approved with a FICO score under 520 and an LTV greater than 70%.

These examples of underwriting violations—but a small smattering of the extensive defects among the Mortgage Loans—evidence significant breaches of the A&A Agreement and the I&I Agreement.

129. On information and belief, RFC is and has long been aware that many of the Mortgage Loans were non-conforming and breached its own representations and warranties. Despite this knowledge, RFC has failed to take steps to repurchase the non-conforming loans or replace them with conforming loans.

(6) Breaches Uncovered Using Loan Pool Data

130. In addition to the loan-level review discussed above, FGIC commissioned an independent consultant—a leading provider of financial, property, and consumer information, such as property valuation services using automated property valuation tools—to test the accuracy of RFC's representations and warranties relating to the Mortgage Loans regarding occupancy status and LTV ratios. The consultant extracted information and data relating to 2,137 Mortgage Loans.

a. Breaches of Owner-Occupancy Representation and Warranty

131. RFC represented in the A&A Agreement and the Prospectus Supplement that 93.87% of the Mortgage Loans would be secured by the owner's primary residence. A&A Agreement § 4(xxiii); Prospectus Supplement at II-6.

132. Based on the information provided, FGIC determined that only 80.7% of the Mortgage Loans were owner-occupied properties.

133. The A&A Agreement and the Prospectus Supplement therefore materially overstated the percentage of Mortgage Loans in their respective pools that were owner-occupied.

As such, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

134. FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that, as of November 2011, were delinquent for more than 90 days, in foreclosure, or liquidated) in the 2005-EMX5 Transaction for loans that were determined after review to be non owner-occupied was approximately 59.1%. This non-performance rate was over 56% greater than the non-performance rate of those loans that were determined after review to be owner-occupied.

b. Breaches of LTV Ratio Representation and Warranty

135. The Prospectus Supplement also provided information relating to the LTV and CLTV ratios of the underlying Mortgage Loans.

136. LTV information provided in the Prospectus Supplement provided that the loans had generally been originated with a maximum LTV ratio of 100% for first lien loans and a maximum CLTV ratio of 100% for junior-lien loans. *See* Prospectus Supplement at II-3. LTV information provided in the Prospectus Supplement included (1) the average weighted LTV ratio for the Mortgage Loans, and (2) the number and aggregate value of the Mortgage Loans with LTV ratios in a given percentage band (e.g., the number of Mortgage Loans with LTV ratios of between 80% and 85%, between 85% and 90%, and so on). Prospectus Supplement at II-3. The Prospectus Supplement reported that *none* of Mortgage Loans had a LTV ratio over 100 percent. *See* Prospectus Supplement at II-3.

137. Using an industry standard automated valuation model to calculate the value of the underlying property at the time the Mortgage Loan was originated, FGIC determined that approximately 13% of the Mortgage Loans—as opposed to *none* of the loans, as reported in the Prospectus Supplement—had an original LTV ratio above 100%. FGIC also determined that approximately 22% of the Mortgage Loans—as opposed to fewer than 2%, as reported in the

Prospectus Supplement—had an original LTV ratio above 95%. In addition, RFC represented in the A&A Agreement that the weighted average LTV of the Mortgage Loans at origination was 83.80%, but FGIC determined that the actual weighted average LTV of the Mortgage Loans at origination was approximately 89%. Thus, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact, as well as its representations regarding weighted average LTV in the A&A Agreement.

138. Moreover, FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that were delinquent for more than 90 days, in foreclosure, or liquidated) in the 2005-EMX5 Transaction for loans where the automated valuation model indicated a LTV greater than 100% was over 53%. This non-performance rate was over 30% greater than the non-performance rate of those loans whose automated valuation model indicated a LTV below 100%.

139. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicates the clear breach of RFC's contractual representations, warranties, and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans, including the guidelines to which the Mortgage Loans were underwritten. Specifically, RFC has breached representations and warranties stating, for the 2005-EMX5 Transaction, that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (i.e. the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of RFC in the Operative Documents (including each representation and warranty in the A&A Agreement) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- each Mortgage File contains all required documents and instruments, and;

- the Mortgage Loans were in substantial conformity with the standards in RFC's AlterNet Program or in the description of the Credit Grades.

140. It is reasonable to conclude—based on what is known by FGIC and as a result of what is being wrongly withheld from FGIC—that many of the 2,544 Mortgage Loans held by the 2005-EMX5 Trust at closing evidenced similar breaches of RFC's representations and warranties.

141. Indeed, based on the information gathered from FGIC's loan file review and the information extracted by FGIC's consultant relating to LTV ratios and owner-occupancy rates discussed above, FGIC believes that the Transaction-wide defect rate for the Mortgage Loans is likely to be at least as 50%.

142. Moreover, the true scope of the material underwriting failures is unknown given RFC's refusal to provide FGIC with pertinent—and contractually required—information. This refusal in itself constitutes a breach of RFC's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

G. RFC's Fraud

143. The material breaches of RFC's representations and warranties, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants RFC made to FGIC to induce its participation in the Transaction. The extraordinarily high defect and default rate among the Mortgage Loans demonstrates not merely that RFC breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the Policy, RFC would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because RFC refuses to provide all of the

requested Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

144. All of the Mortgage Loans underlying the 2005-EMX5 Transaction were acquired by RFC. As such, RFC had the access and ability to evaluate the Mortgage Loan files and to determine if the loans were in substantial compliance with the applicable RFC underwriting guidelines and if the loans breached other representations and warranties made by RFC.

145. To induce FGIC to enter into the 2005-EMX5 Transaction, RFC provided FGIC with a loan tape, which contained false and misleading information regarding, among other things, the CLTV, LTV and DTI ratios, occupancy status, Credit Grades, and FICO scores of the borrowers.

146. In addition, RFC made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the 2005-EMX5 Trust. RFC was well aware that FGIC would not agree to insure the 2005-EMX5 Certificates unless RFC obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, RFC provided Moody's and S&P with the same false information regarding the credit quality of the underlying mortgage loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2005-EMX5 Certificates that met FGIC's minimum requirements—A3 and A, respectively. In this way, RFC made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that RFC would pass on to FGIC, and second, by causing shadow ratings of the 2005-EMX5 Certificates to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

147. RFC also made material representations and warranties and affirmative covenants to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the standards to which the Mortgage Loans were underwritten.

148. For example, in the Prospectus Supplement (and in the I&I Agreement by incorporation) RFC assured FGIC that "all of the mortgage loans were in substantial conformity with the standards set forth in Residential Funding's AlterNet Program or are otherwise in conformity with the standards set forth in the description of credit grades set forth in this prospectus supplement." Prospectus Supplement at S-31; *see also* Prospectus Supplement at S-36. As such, RFC represented to FGIC that, in the case of each loan within the pool, an underwriter had made an assessment that the borrower had the ability to repay his or her loan, after receiving and reviewing all applicable employment, credit, and property information, as provided for in the AlterNet Program guidelines.

149. Moreover, the A&A Agreement (and the I&I Agreement by incorporation) also contained false and misleading representations about the Mortgage Loans. In particular, RFC misrepresented that, as of the closing: (i) the information set forth in the Mortgage Loan Schedule was true and correct in all material respects; (ii) the Mortgage Loans met certain credit grades; (iii) there was no default breach, violation or event of acceleration existing under any Mortgage Note or Mortgage; and (iv) the weighted average LTV Ratio for the Mortgage Loans was 83.80%.

150. Therefore, at the time of the closing of the 2005-EMX5 Transaction, RFC either (1) knew or should have known that its representations were materially false because RFC had not, among other things, determined if the Mortgage Loans were in fact in "substantial conformity" with the AlterNet Program, or (2) had reviewed whether the Mortgage Loans were

in "substantial conformity" with the AlterNet Program, had determined that they were not, but nonetheless materially misrepresented to FGIC that the Mortgage Loans were in "substantial conformity" with the AlterNet Program.

151. These representations were essential to FGIC's decision to issue the Policy. These representations and warranties were false when stated. RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and to issue the Policy. The true information regarding these loans simply could not substantiate RFC's assurances. In short, no amount of RFC promising that the loans met certain standards actually made those promises true.

152. RFC's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC as well as to a multitude of suits and the potential for more litigation to come.

153. Consistent with this pattern of behavior, RFC defrauded FGIC into issuing the Policy, through its knowing misrepresentations.

H. Ally Financial Aids and Abets RFC's Fraud

154. Ally Financial provided substantial assistance to RFC in fraudulently inducing FGIC to issue the Policy. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties RFC made regarding the nature of RFC's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

I. RFC's Breach of Obligations as Master Servicer

155. RFC, as Master Servicer, agreed to indirectly service the Mortgage Loans, and had certain related contractual obligations under the I&I Agreement and the PSA with respect to

the 2005-EMX5 Transaction. Although RFC did not service the individual Mortgage Loans, it was still "obligated and liable to . . . [FGIC] for the servicing and administering of the Mortgage Loans in accordance with the [PSA]." PSA § 3.04. As such, RFC was liable "to the same extent and under the same terms and conditions as if the Master Servicer alone were servicing and administering the Mortgage Loans." PSA § 3.04.

156. In addition, under the I&I Agreement, RFC agreed that it would "not modify, waive or amend, or consent to any modification, waiver or amendment of" the PSA without the prior written consent of FGIC. I&I Agreement § 2.03(b). Similarly, the PSA provides that it "may be amended from time to time by the Depositor, the Master Servicer and the Trustee, with the consent of the Certificate Insurer . . . ." PSA § 11.01(a).

157. On August 10, 2009, RFC requested FGIC's consent in order to execute an amendment (the "Purported Amendment") to allow RFC to modify 100% of the Mortgage Loans rather than what would otherwise be allowed under the PSA. FGIC requested that RFC provide FGIC with sufficient information, including RFC's policies and procedures used for underwriting and processing prospective mortgagors for the Home Affordable Modification Program ("HAMP"), to respond to RFC's request for FGIC's consent. RFC never provided that information. Despite the fact that FGIC never consented to the additional loan modifications, it appears that RFC nonetheless proceeded as if its Purported Amendment had been adopted in contravention of FGIC's contractual rights. *See* I&I Agreement § 2.03(b).

158. Thus, to amend the PSA, RFC had to receive FGIC's consent. FGIC never gave its consent. Therefore, RFC breached section 2.03(b) of the I&I Agreement.

159. On information and belief, RFC has collected significantly higher servicing fees as a result of adopting the Amendment and modifying particular Mortgage Loans.

160. FGIC has requested additional information in order to determine whether RFC is in breach of its servicing obligations. In contravention of FGIC's contractual rights, RFC has failed to provide such information, including servicing notes, to FGIC. On information and belief, RFC, as Master Servicer, also knew of material breaches of representations and warranties and did not notify FGIC thereof, or cause the repurchase of the Mortgage Loans affected thereby. Accordingly, FGIC reserves its rights to assert additional causes of action relating to RFC's servicing obligations.

J. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

161. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns RFC and GMACM. Ally Financial—as the ultimate parent of ResCap, RFC and GMACM—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, RFC and GMACM.

162. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, RFC and GMACM. Ally Financial exercised its direction and control in connection with the 2005-EMX5 Transaction. At times, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

163. Ally Financial has recently admitted to the Board of Governors of the Federal Reserve System (the "Fed") and the Federal Deposit Insurance Corporation (the "FDIC") that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries." *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

164. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of RFC Directly and Indirectly Through its Control of ResCap

165. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

166. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

167. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[1] Since incorporation, the ownership of ResCap has not changed—Ally

[1] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the Securities and Exchange Commission (the "SEC") on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's

Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

168. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, ResCap and Ally Financial shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the 2005 Operating Agreement, which upon information and belief is still currently in effect, "*requires* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." (emphasis added).

169. Moreover, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, and RASC, among other Ally Financial subsidiaries.

170. The proposed 2005 operating agreement between ResCap and Ally Financial, which Ally Financial filed with the SEC, indicated that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See* Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement").

171. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand

(continued…)

corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

172. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of GMAC, a strong ResCap with an investment grade rating is a key part of our plan of our value creation." *Id.* (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

173. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citi, which provided

"funding of up to $13.8bln." A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap]" businesses.

174. Moreover, there is substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

175. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 9, 2011).

176. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

177. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed RFC and GMACM as part of its own business. For example, in its investor presentation from 2007, ResCap declares that RFC and GMACM "are owned *and operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial wasn't directly controlling RFC and GMACM, it was using ResCap as an instrument to do so.

178. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

179. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and Homecomings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual

relationships, such as the one RFC has with respect to the 2005-EMX5 Transaction as master servicer.

180. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

181. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

Q: Could you please state your name for the record.
A: My name is Jeffrey Stephan.
Q: Okay. And who do you work for?
A: GMAC, LLC [Ally Financial].
Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
Q: Okay.
A: It's GMCA [sic] Mortgage Corporation.
Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?
A. Yes.
Q. So these entities no longer currently exist?

A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

K. FGIC's Contractual Remedies Under The I&I Agreement

182. The I&I Agreement provides FGIC with broad remedies for RFC's breaches of its representations and warranties. Section 5.02(b) of the I&I Agreement provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this Insurance Agreement, the Pooling and Servicing Agreement or the other Operative Documents, or existing at law or in equity.

183. RFC also agreed in Sections 3.03(b) and 3.03(c) of each of the I&I Agreement:

> Anything in Sections 2.01(l) and 3.03(a) hereof or in any Operative Document to the contrary notwithstanding, the Insurer shall be entitled to full reimbursement from RFC for (i) any payment made under the Policy arising as a result of RFC's failure to substitute for or deposit an amount in respect of any defective Mortgage Loan as required pursuant to Section 4 and Section 5 of the Assignment Agreement, together with interest on any and all such amounts remaining unreimbursed . . . from the date such amounts became due until paid in full . . .

I&I Agreement § 3.03(b); and

> RFC agrees to pay to [FGIC] any and all reasonable charges, fees, costs and expenses that [FGIC] may reasonably pay or incur, including reasonable attorneys' and accountants' fees and expenses, in connection with (i) the enforcement, defense or preservation of any rights in respect of any of the Operative Documents, including defending, monitoring or participating in any litigation or proceeding . . . relating to any of the Operative Documents . . . .

I&I Agreement § 3.03(c).

184. In addition, RFC agreed in Section 3.04(a) of each of the I&I Agreement:

> to pay, and to protect, indemnify and save harmless, [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages, costs or expenses (including reasonable fees and expenses of attorneys . . .) of any nature arising out of or relating to the breach by RFC or the Depositor of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the transactions contemplated by the Operative Documents by reason of . . . . the breach by RFC or the Depositor of any representation, warranty . . . or covenant under any of the Operative Documents or the occurrence, in respect of RFC or the Depositor, under any of the Operative Documents of any "event of default" . . . .

I&I Agreement § 3.04(a) & (a)(iv).

185. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, RFC agreed to repurchase or substitute Mortgage Loans that did not conform to RFC's representations and warranties, and to indemnify FGIC for claims and losses arising from RFC's breach of any representation or warranty.

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Material Breach of the I&I Agreement—Declaratory Relief Regarding RFC's Indemnification Obligation)

186. FGIC re-alleges and incorporates by reference paragraphs 1 through 185 of this Complaint.

187. The I&I Agreement is a valid and binding agreement between the parties.

188. FGIC has performed its obligations under the I&I Agreement.

189. RFC's representations and warranties were material to FGIC's decision to insure the 2005-EMX5 Certificates and to issue the 2005-EMX5 Policy.

190. RFC's pervasive and material breaches of its representations and warranties constitute a material breach of the I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

191. Pursuant to Section 3.04(a) of the I&I Agreement, RFC must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by RFC of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

192. As explained above, RFC has breached numerous representations and warranties in the 2005-EMX5 Offering and Operative Documents, for example, those contained in Section 2.01 of the I&I Agreement. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

193. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

194. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must jointly and severally indemnify FGIC for all sums arising out of the 2005-EMX5 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the 2005-EMX5 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2005-EMX5 Policy as and when such sums fall due or claims are presented.

195. In addition, FGIC seeks a declaration that RFC must indemnify FGIC for all sums arising out of the 2005-EMX5 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity for all sums it has paid to date under the 2005-EMX5 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2005-EMX5 Policy as and when such sums fall due or claims are presented.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Fraudulent Inducement—I&I Agreement)

196. FGIC re-alleges and incorporates by reference paragraphs 1 through 194 of this Complaint

197. RFC induced FGIC to enter into the I&I Agreement and to issue the Policy by making false representations and warranties about its business practices and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

198. As explained above, RFC knowingly made materially false statements to, and/or omitted material facts from, FGIC with the intent to induce detrimental reliance by FGIC.

199. RFC intended for FGIC to rely on RFC's material false statements and/or omissions. FGIC had no reason to believe that RFC's representations were false, and reasonably and justifiably relied on RFC's material false statements and/or omissions regarding information uniquely in the possession of RFC when it decided to enter into the I&I Agreement and to issue the Policy for the 2005-EMX5 Certificates.

200. As a result of RFC's material false statements and omissions, FGIC entered into the I&I Agreement, issued the Policy, and thereby agreed to insure a pool of Mortgage Loans

that was, in actuality, materially different from the mortgage loan pool that RFC represented would collateralize the 2005-EMX5 Transaction.

201. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

202. As a result of RFC's material false statements and omissions, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

203. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

204. In addition, RFC is separately liable for such damages.

THIRD CAUSE OF ACTION

(Alternatively Against Ally Financial: Aiding and Abetting Fraudulent Inducement—I&I Agreement)

205. FGIC re-alleges and incorporates by reference paragraphs 1 through 203 of this Complaint.

206. As explained above, Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to issue the Policy.

207. RFC could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

208. Both Ally Financial knew that RFC fraudulently induced FGIC issue the Policy for the 2005-EMX5 Transaction.

209. Ally Financial's statements materially aided RFC's fraudulent inducement.

210. As a result of Ally Financial's aiding and abetting RFC's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract 2005-EMX5 Transaction—Representations, Warranties, and Affirmative Covenants)

211. FGIC re-alleges and incorporates by reference paragraphs 1 through 209 of this Complaint.

212. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

213. FGIC has performed its obligations under the I&I Agreement.

214. As explained above, RFC has materially breached its representations and warranties under Section 2.01 of the I&I Agreement.

215. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

216. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

217. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

218. In addition, RFC is separately liable for such damages.

FIFTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract 2005-EMX5 Transaction—Declaratory Relief Regarding Access to Information)

219. FGIC re-alleges and incorporates by reference paragraphs 1 through 217 of this Complaint.

220. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

221. FGIC has performed its obligations under the I&I Agreement.

222. Pursuant to Section 2.02(c) of the I&I Agreement, RFC agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such

other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the 2005-EMX5 Transaction. FGIC further has the right to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(m) of the I&I Agreement.

223. As discussed above, pursuant to the I&I Agreement, FGIC made numerous reasonable written requests that RFC furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by RFC, and others, concerning the Mortgage Loans.

224. RFC has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

225. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

226. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, RFC agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer; and (iii) discuss the affairs, finances and accounts of RFC with RFC's independent accountants.

227. FGIC made a reasonable request to inspect the books and records, discuss the affairs, finances and accounts with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants on December 1, 2011.

228. RFC has failed to make available such persons or to produce such information.

229. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreement, Section 2.02(e)(i)-(iii).

230. Pursuant to Section 2.02(e) of the I&I Agreement, RFC agreed, on an annual basis or when reasonably requested by FGIC, to cause the Custodian to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the 2005-EMX5 Custodial Agreements to enable FGIC to track the progress of the recording of Mortgages and Assignments with respect to the Mortgage Loans.

231. FGIC made a reasonable request for the Interim Certification on June 21, 2011.

232. RFC has failed to cause the Interim Certification to be delivered to FGIC as requested. On December 8, 2011, FGIC again notified RFC of its failure to perform under the I&I Agreement, but RFC continued to fail to cause the Interim Certification to be delivered to FGIC.

233. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Interim Certification to be delivered to FGIC after receiving reasonable requests from FGIC.

234. Pursuant to Section 2.02(c)(iv) of the I&I Agreement, RFC agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [PSA]."

235. FGIC made a reasonable request for servicing notes on December 9, 2010.

236. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

237. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

238. Accordingly, FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must comply with Sections 2.02(c), 2.02(m) and 2.02(e) of the I&I Agreement.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract 2005-EMX5 Transaction—Purported Amendment of the Operative Documents)

239. FGIC re-alleges and incorporates by reference paragraphs 1 through 237 of this Complaint.

240. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

241. FGIC has performed its obligations under the I&I Agreement.

242. As explained above, RFC has materially breached its representations and warranties under section 2.03(b) of the I&I Agreement and section 11.01(a) of the PSA by purporting to amend the Operative Documents without FGIC's prior and necessary consent. FGIC also reserves its rights to assert additional causes of action relating to RFC's servicing obligations.

243. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

244. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

245. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

246. In addition, RFC is separately liable for such damages.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Declaratory Relief)

247. FGIC re-alleges and incorporates by reference paragraphs 1 through 245 of this Complaint.

248. This is a claim for declaratory judgment pursuant to CPLR 3001 for the purpose of determining a justiciable controversy between FGIC and Ally Financial, ResCap, and RFC.

249. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this complaint.

250. For the reasons set forth in paragraphs 160 through 180, among others, Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

251. FGIC has been damaged as a result of the actions Ally Financial, ResCap and RFC.

252. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

EIGHTH CAUSE OF ACTION

(As Against RFC: Attorneys' Fees and Costs—2005-EMX5 Transaction)

253. FGIC re-alleges and incorporates by reference paragraphs 1 through 250 of this Complaint.

254. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

255. FGIC has performed its obligations under the I&I Agreement.

256. Pursuant to Section 3.03(c) of the I&I Agreement, RFC agreed to reimburse FGIC for any and all costs or expenses "including reasonable fees and expenses of attorneys" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreement, RFC agreed to

pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or relating to the 2005-EMX5 Transaction.

257. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of RFC's failure to provide Mortgage Loan files, the Interim Certification, Servicing Reports, and financial information and its breach of the representations and warranties contained in Section 2.01 of the I&I Agreement and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreement.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant Residential Funding Company, LLC, with respect to (1), (2), and (4) through (15) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4) through (12), (14), and (15) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (12), (14), and (15) below and the following relief:

(1) A declaration that, pursuant to RFC's obligations under the I&I Agreement, RFC solely and/or Ally Financial, ResCap, and RFC must jointly and severally reimburse and indemnify FGIC for all sums arising out of the 2005-EMX5 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented, and an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal rescissory, equitable, and punitive damages, to be proven at trial, for RFC's fraudulent inducement of FGIC to enter into the 2005-EMX5 Transaction and to issue the Policy;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's aiding and abetting of RFC's fraudulent inducement of FGIC to enter into the 2005-EMX5 Transaction and to issue the Policy;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for RFC's material breaches of the 2005-EMX5 Transaction;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for RFC's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreement and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that RFC must repurchase all Mortgage Loans that are in breach of RFC's representations and warranties in the 2005-EMX5 Transaction, and an order giving effect to that declaration;

(7) Further or alternatively, a declaration that RFC must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2005-EMX5 Transaction, and an order giving effect to that declaration;

(8) Further or alternatively, a declaration that RFC must allow FGIC to inspect the books and records of RFC, to discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants, and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that RFC must cause to be provided servicing notes for the 2005-EMX5 Transaction when requested by FGIC;

(10) Further or alternatively, a declaration that RFC must cause to be provided the custodial Interim Certification when requested by FGIC for the 2005-EMX5 Transaction stating that all mortgage files were complete and were properly transferred into the trusts, or noting any exceptions, and an order giving effect to that declaration;

(11) Further or alternatively, an award of legal and equitable damages, to be proven at trial, for RFC's purported amendment of the PSA without FGIC's consent;

(12) Further or alternatively, a declaration that Ally Financial, ResCap, and RFC are alter egos of each other;

(13) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreement and other Operative Documents, as defined in the I&I Agreement;

(14) An award of prejudgment interest at the statutory rate; and

(15) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

Exhibit 21

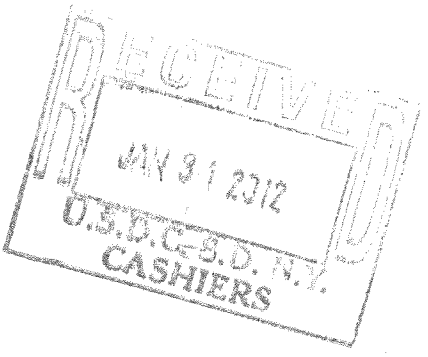
UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

---------- x

FINANCIAL GUARANTY INSURANCE COMPANY,

Plaintiff,

-against-



ALLY FINANCIAL, INC. F/K/A GMAC, LLC; RESIDENTIAL CAPITAL, LLC F/K/A RESIDENTIAL CAPITAL CORPORATION; ALLY BANK F/K/A GMAC BANK; GMAC MORTGAGE, LLC F/K/A GMAC MORTGAGE CORPORATION

Defendants.

---------- x

No. 12 CIV 0780

COMPLAINT

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"), Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"), Ally Bank, formerly known as GMAC Bank ("Ally Bank"), and GMAC Mortgage, LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), alleges as follows:

NATURE OF THE ACTION

1. This breach of contract action arises in connection with a financial guaranty insurance policy (the "Policy") issued by FGIC in relation to a GMACM-sponsored transaction (the "2005-HE1 Transaction" or the "Transaction"), in which GMACM Home Equity Loan Trust 2005-HE1 (the "2005-HE1 Trust" or the "Trust") issued and sold to investors over $991 million aggregate principal amount of insured residential mortgage-backed securities (the "2005-HE1

Notes"). As the sponsor of the 2005-HE1 Transaction, GMACM procured the Policy from FGIC in order to enhance the ratings and marketability of the 2005-HE1 Notes by, among other things, providing FGIC with certain material representations, warranties and affirmative covenants. In reliance on those representations, warranties and affirmative covenants FGIC issued the Policy, thereby enabling the 2005-HE1 Notes to receive a triple-A rating from the rating agencies. This, in turn, made the 2005-HE1 Transaction viable and enabled GMACM and its affiliates to earn millions of dollars in transaction fees. GMACM, however, has failed to honor its contractual obligations by materially breaching the essential terms of its agreement with FGIC and the essential terms of the other operative documents incorporated therein.

2. The breaches committed by GMACM, as detailed more fully below, were directed by Ally Financial, acting directly or indirectly through its wholly-owned subsidiary, ResCap. Ally Financial is the ultimate parent of ResCap, which owns GMACM. Ally Financial, as the ultimate parent of ResCap and GMACM, has the practical ability, which it has repeatedly exercised, to direct and control the activities of these (and other) subsidiaries. In many instances—including in this Transaction—Ally Financial's direction and control was effected by using ResCap as an intermediary instrument to achieve its goals.

3. The 2005-HE1 Transaction is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among GMACM and several other parties, pursuant to which the Trust acquired a pool of home equity lines of credit ("HELOCs" or "Mortgage Loans") and issued securities, including the 2005-HE1 Notes, which were intended to be repaid out of the cash flow from those HELOCs. The Transaction was sponsored by GMACM. To facilitate the Transaction, GMACM pooled together over eighteen thousand

Mortgage Loans to provide collateral for the 2005-HE1 Notes. All of the Mortgage Loans were either originated or acquired by GMACM or Ally Bank, another Ally Financial subsidiary.

4. After pooling the Mortgage Loans originated or acquired by GMACM and Ally Bank, GMACM transferred the Mortgage Loans directly or indirectly to another Ally Financial subsidiary, Residential Asset Mortgage Products, Inc. ("RAMP"). RAMP then deposited the Mortgage Loans it received from GMACM into the 2005-HE1 Trust. The 2005-HE1 Trust, in turn, issued the 2005-HE1 Notes to investors. Thereafter, the 2005-HE1 Trust used the periodic payments made by the borrowers under the Mortgage Loans to pay, among other things, principal and interest due on the 2005-HE1 Notes and the fees and expenses of GMACM and other participants in the Transaction.

5. The 2005-HE1 Trust was a legal entity created by GMACM solely for the purposes of the 2005-HE1 Transaction to hold the Mortgage Loans and to issue the 2005-HE1 Notes to investors in a registered public offering. Wells Fargo Bank, N.A. ("Wells Fargo") agreed to act as indenture trustee of the 2005-HE1 Trust (the "Indenture Trustee").

6. As well as being the Sponsor, GMACM also acts as servicer of the 2005-HE1 Transaction (the "Servicer"). As Servicer, GMACM supervises the collection of borrower payments and performs other servicing duties related to the Mortgage Loans. As discussed in more detail below, all of GMACM's servicing operations have since been integrated into ResCap.

7. GMACM, directed and controlled by Ally Financial, is, therefore, the hub of the 2005-HE1 Transaction: it is the sponsor of the securitization, the originator of most of the Mortgage Loans, the seller of the Mortgage Loans directly or indirectly to the 2005-HE1 Trust, and the servicer of the Mortgage Loans. The primary victim of the 2005-HE1 Transaction is

FGIC, which has already paid out tens of millions of dollars in losses under the Policy, with further material losses still to come.

8. In addition to originating some of the Mortgage Loans used in the 2005-HE1 Transaction, Ally Bank also entered into its own separate contractual agreement with FGIC regarding its duties as custodian of the Transaction. As custodian, Ally Bank (then doing business as GMAC Bank) was one of the critical parties to the Transaction, charged with certain oversight and maintenance duties with respect to the 2005-HE1 Trust for which it collected substantial fees. Like GMACM, however, Ally Bank has materially breached the terms of its agreements with FGIC, in particular by failing to ensure that essential documents were included in the loan file, such as the loan agreements.

9. Yet another Ally Financial subsidiary, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was an underwriter for the 2005-HE1 Transaction.

10. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed notes ("RMBS Notes"). At the time of the 2005-HE1 Transaction, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Notes typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of principal losses allocated to the RMBS Notes. FGIC's insurance policies thus enhanced the credit quality, and marketability, of the insured securities.

11. At GMACM's request, FGIC agreed pursuant to the Insurance and Indemnity Agreement, dated as of March 29, 2005 (the "I&I Agreement"), among FGIC, GMACM and the Trust (among others), to issue an insurance policy to insure the repayment of the 2005-HE1 Notes. On March 29, 2005, FGIC issued the Policy to Wells Fargo, as Indenture Trustee under the Indenture, dated as of March 29, 2005 (the "Indenture"), between the Trust and the Indenture Trustee, with respect to the insured securities. The Policy thus enhanced the credit quality, and marketability, of the 2005-HE1 Notes.

12. As explained more fully in this Complaint, the 2005-HE1 Trust was permitted to execute subsequent transfers of new collateral (in the form of additional Mortgage Loans) into the loan pool, in exchange for a portion of the payments made by borrowers under the Mortgage Loans, provided, however, that certain conditions precedent had been met—including, among other things, GMACM providing FGIC with proper notice, and an "Early Amortization Event" not having occurred (as this would close the period during which new mortgage loans could be added (the "Revolving Period")).

13. Following the closing of the 2005-HE1 Transaction, GMACM failed to recognize and give effect to the occurrence of an Early Amortization Event as defined by the plain language of the transaction documents. Such failure was a breach of its contractual obligations under the transaction documents.

14. In all, GMACM added approximately $851 million in additional Mortgage Loans (the "Subsequent Mortgage Loans") to the 2005-HE1 Trust through subsequent transfers that it was not permitted to make because, among other reasons, the Revolving Period had closed. As a result, FGIC is being asked to pay significant losses incurred on a substantial number of loans that should never have been added to the 2005-HE1 Trust under the express terms of the

transaction documents. GMACM also failed to give notice to FGIC of the occurrence of an Early Amortization Event or of the many occasions on which it executed subsequent transfers. This also resulted in the improper funding of certain 2005-HE1 Notes, which also increased FGIC's exposure under the Policy.

15. Accordingly, GMACM has committed multiple breaches of the contractual provisions governing transfers of Subsequent Mortgage Loans to the 2005-HE1 Trust.

16. Faced with substantial claims under the Policy, FGIC requested copies of the Mortgage Loan files and servicing notes for the Mortgage Loans. GMACM is obligated under its agreements with FGIC to provide these documents to FGIC. Notwithstanding its contractual obligations, GMACM has refused to provide FGIC with all of the requested documentation, which, on information and belief, will provide further evidence of GMACM's material breaches of representations and warranties. This refusal to provide information is itself a material breach of GMACM's contractual obligations to FGIC.

17. Through this Complaint, FGIC seeks relief against GMACM, Ally Bank, ResCap, and Ally Financial for GMACM's material breaches of the I&I Agreement and other contractual obligations owed to FGIC in connection with the 2005-HE1 Transaction.

18. Further, FGIC seeks relief against Ally Bank for its material breaches of its contractual obligations to FGIC.

19. FGIC also seeks a declaration from the Court that Ally Financial, ResCap, and GMACM were, and continue to be, alter egos of one another.

THE PARTIES

20. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

21. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial is the parent company of ResCap, GMACM, and all GMACM-affiliated entities relevant to this action.

22. Defendant GMACM is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. In the period relevant to this action, GMACM originated, acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

23. Since 2005, GMACM has been an indirect wholly-owned subsidiary of ResCap; prior to that time, GMACM was an indirect, wholly-owned subsidiary of Ally Financial.

24. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of GMACM and its business includes originating, acquiring, selling, and servicing mortgage loans.

25. Ally Bank (f/k/a GMAC Bank) is an indirect, wholly-owned subsidiary of Ally Financial, and was at all times relevant to this Complaint a loan originator. To facilitate the 2005-HE1 Transaction, Ally Bank sold to GMACM many of the Mortgage Loans, which it had originated or acquired to be securitized in the Transaction. GMAC Bank was renamed Ally Bank in May 2009. Ally Bank is an online bank chartered under Utah law.

JURISDICTION AND VENUE

26. This Court has subject matter jurisdiction over this suit pursuant to 28 U.S.C. § 1332 because there is complete diversity of citizenship between the parties and the amount in controversy exceeds $75,000, exclusive of interest and costs.

27. Venue is proper in this district under 28 U.S.C. § 1391 because a substantial part of the events giving rise to this claim occurred within this judicial district. Moreover, GMACM,

a party to this action, has agreed to submit to the jurisdiction of this Court, and has agreed not to challenge venue in this Court.

RELEVANT NON-PARTIES

28. RAMP, a special purpose vehicle, is an indirect, wholly owned subsidiary of Ally Financial and a Delaware corporation with its principal place of business in Minnesota. To facilitate the 2005-HE1 Transaction, RAMP purchased mortgage loans from GMACM and Walnut Grove Mortgage Loan Trust 2003-A ("Walnut Grove") and deposited those loans into the 2005-HE1 Trust. The Trust then issued the 2005-HE1 Notes to the underwriters, including Ally Securities (then doing business as GMAC RFC Securities), to be sold to investors.

29. Ally Securities, an entity incorporated in Delaware, is an affiliate of GMACM and RAMP and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the 2005-HE1 Notes and, on information and belief, participated in the preparation of certain of the key offering documents for the 2005-HE1 Transaction.

30. Walnut Grove is a Delaware statutory trust established by an affiliate of GMACM. Beginning in 2003, GMACM sold to Walnut Grove second-lien mortgage loans that it had originated or acquired. To facilitate the 2005-HE1 Transaction, Walnut Grove sold certain of the Mortgage Loans to RAMP.

FACTUAL ALLEGATIONS

A. Ally Financial and its Subsidiaries

31. In the period relevant to this action, GMACM originated, acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of

those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Notes.

32. The mortgage loans included in securitizations sponsored by GMACM have suffered extremely high rates of delinquencies, defaults and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including in large part GMACM, Ally Bank, and ResCap, led Ally Financial to seek a bailout by the federal government in 2008.

(1) GMACM, GMAC-RFC, and RFC

33. GMACM is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

34. Residential Funding Corporation, LLC ("RFC") is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate GMACM, RFC engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

35. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical Annual: Volume II* at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

36. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011. *See*

FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

37. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with GMACM. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

38. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

39. Ally Financial's business model depended on securitizations, which were conducted by its business units, including GMACM. Pooling mortgage loans and selling them into securitizations enabled GMACM to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

40. GMACM, in addition to securitizing mortgage loans originated by itself or other Ally Financial subsidiaries, also earned fees by securitizing mortgage loans it acquired from third parties. GMACM would acquire such mortgage loans and then deposit them (usually through an affiliate), along with mortgage loans it had originated, into a securitization trust. In many instances, GMACM profited from the difference between the cost GMACM incurred to originate or acquire mortgage loans, and the price at which it sold them for deposit into the securitizations.

41. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining whether a mortgage loan is in default based on the transaction documents, GMACM generally acted as servicer of its own securitizations. GMACM thereby earned servicing fees that normally amounted to—as it did in the 2005-HE1 Transaction—0.50% per annum of the aggregate principal balance of the mortgage loans, and also collected substantial fees amounting to a large percentage of any subsequent recoveries from charged-off or liquidated loans.

42. GMACM also enriched Ally Financial and its other subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the 2005-HE1 Transaction:

- Ally Bank gained fees for originating many of the loans initially comprising the 2005-HE1 Trust, and proceeds from selling those loans to GMACM; Ally Bank also gained fees as custodian of the 2005-HE1 Trust for holding certain documents;

- Walnut Grove received the proceeds from selling certain of the Mortgage Loans to RAMP;

- RAMP received payments for serving as the depositor of the Mortgage Loans to the 2005-HE1 Trust; and

- Ally Securities received fees for underwriting the 2005-HE1 Notes.

(3) Ally Financial, GMACM, and RFC Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

43. GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011) (emphasis added).

44. Additionally, on September 2, 2011, the Federal Housing Finance Authority ("FHFA"), as conservator for Freddie Mac, filed suit in the Supreme Court of the State of New York, New York County against Ally Financial and several of its subsidiaries for claims arising in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in certificates issued through twenty-one transactions similar to the transactions at issue here. Among other claims, FHFA brought suit for common law fraud against various Ally Financial subsidiaries and aiding and abetting fraud against Ally Financial for its intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the subject certificates. The FHFA also alleges violations of state and federal securities laws by Ally Financial and several of its subsidiaries stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, FHFA also alleges aiding and abetting fraud against Ally Financial and certain of its affiliates for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with

the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs.

45. Ally Financial also disclosed that the U.S. Securities and Exchange Commission (the "SEC") served a subpoena on Ally Financial, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. *Id.*

46. GMACM and RFC face numerous pending lawsuits brought by RMBS investors and insurers. For example, GMACM is currently facing a lawsuit brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court in which MBIA alleges that in connection with three transactions similar to the one at issue here, GMACM affirmatively misrepresented the credit quality of tens of thousands of mortgage loans, with a total original principal balance of more than $4 billion, as a means of unfairly shifting to investors and MBIA risks that GMACM should have borne itself. On December 15, 2010, the New York Supreme Court issued a ruling on GMACM's motion to dismiss which allowed both the breach of representations and warranties and fraud claims, among others, to proceed to trial.

47. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two pending suits against Ally Financial's mortgage-related subsidiaries. The plaintiffs in those suits have alleged, among other things, that Ally Financial's various subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011).

48. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. In the first nine months of 2011 alone, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $254 million worth of mortgages related to securitizations it consummated between 2004 and 2007. It clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own SEC filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 88, 159 (Nov. 4, 2011).

49. According to its most recent quarterly report, Ally Financial believes its "exposure to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008 . . . ." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 146 (Nov. 4, 2011). The 2005-HE1 Transaction is, as its name implies, of the 2005 vintage.

(4) The Mortgage Loan Servicing Practices of Ally Financial and GMACM Have Come Under Scrutiny for Deficiencies

50. The Board of Governors of the Federal Reserve System (the "Federal Reserve Board") and the Federal Deposit Insurance Corporation (the "FDIC") has ordered Ally Financial, GMACM, and several other Ally Financial subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See* Consent Order, FRB Docket No. 11020-B-HC (April 13, 2011) (the "Consent Order").

51. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries, including GMACM, have been accused, *inter alia*, of (1) failing to properly increase financial,

staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

52. Furthermore, under the Consent Order, Ally Financial must direct GMACM and its other mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id.* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

53. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure processes of GMACM to request an independent review of their files. *See* Press Release, Federal Reserve Board (November 1, 2011). This independent review will determine whether errors and misrepresentations in GMACM's foreclosure processes indeed caused financial harm to the borrower. *See id.* If the foreclosure process is found to have caused financial injury to the borrower, GMACM will then be required to provide full compensation. *See id.*

54. Moreover, according to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits

in thousands of foreclosure actions across the country. *See* Jeffrey Stephan Dep. *Federal National Mortgage Association v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Div Nine, No. Cumb.) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

55. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.* at 51:15-23. Stephan further testified that when he signed an affidavit affirming that the foreclosure was proper, all he knew was the borrower's name and whether he had signing authority for the GMAC entity foreclosing on the property. *Id.* at 62:23-25, 63:2-6. Stephan testified that the process he followed in signing summary judgment affidavits was in accordance with the policies and procedures required by GMACM. *Id.* at 64:8-14.

56. The Ohio Attorney General, in October 2010, filed suit against GMACM and Ally Financial, alleging, *inter alia*, that employees of GMACM had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See State of Ohio v. GMAC Mortgage LLC*, CI0201006984, Court of Common Pleas, Lucas County, Ohio (Toledo). And in December 2011, the Massachusetts Attorney General filed a similar suit against GMACM for,

among other things, engaging in unfair and deceptive foreclosure practices. *See Commonwealth of Massachusetts v. Bank of America NA*, 11-4363, Suffolk County Superior Court (Boston).

57. Indeed, as recently as January 31, 2012, Ally Financial reported that it was forced to record a charge of approximately $270 million in the fourth quarter of 2011, as a result of penalties expected to be imposed against ResCap by regulators and governmental agencies in connection with ResCap's improper foreclosure processes. *See* Ally Fin. Inc., Form 8-K, at 2 (Jan. 31, 2012).

58. Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial and GMACM for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices, Boston Globe, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and GMACM

59. Ally Financial is considering filing for bankruptcy protection for ResCap, its wholly-owned, indirect subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports, as of November 9, 2011. GMACM is a wholly-owned, indirect subsidiary of ResCap.

60. Bloomberg News reported that "[d]erivatives traders are betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering," in an article entitled "*Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance*," dated November 14, 2011. According to the article, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy.

61. Indeed, Ally Financial warned in its 2010 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 21 (Feb. 25, 2011). Additionally, on January 31, 2012, Ally Financial disclosed that it "will record a charge of approximately $270 million in the fourth quarter of 2011 for penalties expected to be imposed by certain of [its] regulators and other governmental agencies in connection with foreclosure related Matters . . . [t]he majority of [which] was recorded at Residential Capital, LLC ('ResCap') . . . . [This] resulted in a covenant breach in certain of ResCap's credit facilities." Ally Financial, Current Report (Form 8-K) (January 31, 2012).

B. GMACM's Securitizations and Financial Guaranty Insurance Generally

62. To improve the marketability and ratings of the RMBS Notes issued as part of its securitizations, GMACM from time to time sought credit enhancement for the RMBS Notes from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the one FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Notes that, if there is a shortfall in cash available to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

63. For a trust that issues RMBS Notes, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS Certificates. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the loan pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS investors. Such shortfalls result in claims on FGIC's policies.

C. The GMACM 2005-HE1 Transaction

64. On March 29, 2005, GMACM pooled together and deposited many thousands of HELOCs into the GMACM Home Equity Loan Trust 2005-HE1. The 2005-HE1 Trust served as the Issuer of $991,087,000 in aggregate principal amount of 2005-HE1 Notes. HELOCs are typically adjustable rate revolving credit line loans collateralized by second-lien mortgages, which can be drawn on at any time during an extended period, and repaid at any time, subject to a maximum repayment period.

65. The initial conveyance to the 2005-HE1 Trust by RAMP (acting as Depositor) contained over 18,100 Mortgage Loans (*i.e.*, HELOCs) with an aggregate outstanding principal balance of approximately $732 million. Investors in the GMACM-sponsored 2005-HE1 Transaction were issued six classes of securities—Class A-I Notes, Class A-2 Notes, and Class A-3 Notes, Class A-1 Variable Pay Revolving Notes ("VPRNs"), Class A-2 VPRNs, and Class A-3 VPRNs (collectively, the "2005-HE1 Notes")—which were collateralized by the Mortgage Loans transferred to and held by the 2005-HE1 Trust. In addition, approximately $243 million was deposited into a pre-funding account at closing, which was used to acquire additional Mortgage Loans in the 90 days following closing (the "Prefunding Period").

66. To enhance the ratings and marketability of the 2005-HE1 Notes, GMACM sought a financial guaranty insurance policy from FGIC for the purpose of insuring the transaction for the benefit of the certificate holders. On March 29, 2005, GMACM and FGIC executed the I&I Agreement, under which FGIC agreed to and did issue the Policy (number 05030011) to insure the 2005-HE1 Notes. The I&I Agreement was signed by FGIC (as the Insurer), GMACM (as a Seller and Servicer), RAMP (as the Depositor), Walnut Grove (as a Seller), and Wells Fargo (as the Indenture Trustee).

67. Also on March 29, 2005, Ally Bank (using its then-current name, GMAC Bank) entered into the 2005-HE1 Custodial Agreement (the "Custodial Agreement") whereby it agreed, among other things, to serve as Custodian of the underlying mortgage loan notes on behalf of the 2005-HE1 Trust. FGIC is an express third party beneficiary of that agreement. *See* Custodial Agreement § 4.6.

68. The I&I Agreement provides, in part, that FGIC is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." I&I Agreement § 2.02(k). "Operative Documents" are defined to include, among other documents: (i) the 2005 HE-1 Notes; (ii) the Mortgage Loan Purchase Agreement dated as of March 29, 2005 among GMACM, RAMP, Walnut Grove, the 2005-HE1 Trust, and Wells Fargo (the "MLPA"); (iii) the Servicing Agreement dated as of March 29, 2005 among GMACM, the 2005-HE1 Trust and Wells Fargo; (iv) the Indenture dated as of March 29, 2005 between the 2005-HE1 Trust and Wells Fargo; (v) the Custodial Agreement dated as of March 29, 2005 among GMACM, Wells Fargo, and Ally Bank; and (vi) any Subsequent Transfer Agreement in respect of Subsequent Mortgage Loans entered between GMACM and the 2005-HE1 Trust. *See* I&I Agreement § 1.01.

69. Pursuant to the I&I Agreement, FGIC—termed the "Enhancer" under certain of the Operative Documents—insured the 2005-HE1 Notes. The Policy improved the marketability of the 2005-HE1 Notes by mitigating risk for potential investors and making the 2005-HE1 Notes eligible to receive a credit rating of triple-A by the rating agencies at closing.

70. GMACM and the Depositor offered the 2005-HE1 Notes for sale pursuant to a prospectus, dated December 22, 2004 (the "2005-HE1 Prospectus"), a prospectus supplement, dated March 23, 2005 (the "2005-HE1 Prospectus Supplement"), and a Private Placement Memorandum for the VPRNs, dated March 29, 2005 (the "2005-HE1 PPM"), which touted the Policy and the "triple-A" initial rating of the 2005-HE1 Notes made possible by the Policy. The 2005-HE1 Prospectus, 2005-HE1 Prospectus Supplement, and 2005-HE1 PPM, together with certain preliminary offering documents, each as further supplemented by any subsequent amendment or supplement thereto and any other offering document that makes reference to the Policy, are referred to collectively as the "2005-HE1 Offering Documents."

71. On March 29, 2005, an Ally Financial subsidiary, Ally Securities, sold the 2005-HE1 Notes to investors, and FGIC issued the Policy in accordance with the terms of the I&I Agreement.

72. The 2005-HE1 Transaction was structured in such a way as to permit GMACM to add additional collateral in the form of Subsequent Mortgage Loans to the 2005-HE1 Trust during a specifically defined Revolving Period, which enabled GMACM to continue to shift the credit risk of such loans to investors and to FGIC for a defined period after closing, and to realize immediate gains on the loans it sold to the Trust. GMACM represented and warranted to FGIC that the Subsequent Mortgage Loans would conform to the same contractual representations and

warranties GMACM made about the characteristics and the underwriting procedures of the Mortgage Loans that were in the pool at closing. *See* MLPA § 3.1(b).

73. Nevertheless, by express contractual provisions, Subsequent Mortgage Loans were not permitted to be added to the pool following the occurrence of an Early Amortization Event. An Early Amortization Event was deemed to occur whenever, for three consecutive months, the average amount in the Funding Account which has not been used during a month to purchase Additional Balances or Subsequent Mortgage Loans is greater than 30% of such amount plus the amount which had been used during that month to purchase Additional Balances and Subsequent Mortgage Loans. Indenture, Appendix A. The "Funding Account" is an account held by the 2005-HE1 Trust and used, among other things, to purchase Additional Balances (*i.e.*, subsequent draws on the Mortgage Loans) and Subsequent Mortgage Loans during the Revolving Period. *See* Servicing Agreement § 3.16.

D. GMACM's Representations, Warranties and Affirmative Covenants

74. In connection with the 2005-HE1 Transaction, GMACM, at the direction of Ally Financial, either directly or indirectly through ResCap, made numerous representations, warranties and affirmative covenants to FGIC. Among other things, GMACM covenanted that it would comply with and perform its obligations under the Operative Documents. Moreover, GMACM promised to service the Mortgage Loans in accordance with the terms of the Operative Documents, provide timely Mortgage Loan file information, and provide FGIC with a variety of information, including access to GMACM's books and records and to GMACM's Servicing Officer and its independent accountants.

75. Based on the information received by FGIC and the representations and warranties given by GMACM, FGIC entered into the I&I Agreement and agreed to issue the Policy to the Indenture Trustee for the benefit of the holders of the 2005-HE1 Notes. In return

for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the 2005-HE1 Notes. Specifically, FGIC received 0.125% per annum of the aggregate balance of the 2005-HE1 Notes for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties and affirmative covenants provided by GMACM.

(1) Representations, Warranties and Affirmative Covenants Relating to the Operative and Offering Documents

76. Under Article II of the I&I Agreement, GMACM made the following representations, warranties, and covenants, among others. *First*, in the I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—GMACM specifically covenants that it will "comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreement § 2.02(a).

77. *Second*, in the I&I Agreement, GMACM represented and warranted to FGIC that "[n]either the Operative Documents to which it is a party nor other information relating to the Mortgage Loans. . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." I&I Agreement § 2.01(j). GMACM further represented and warranted that "[t]he Offering Document does not contain any untrue statement of a material fact and does not omit to state [any] material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading[.]" § 2.01(k).

78. *Third*, the I&I Agreement incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the "Operative Documents," as that term was defined in the I&I Agreement: "[e]ach of the representations and warranties . . . contained in the

applicable Operative Documents . . . is true and correct in all material respects[.]" *See* I&I Agreement § 2.01(l); *see also id.* § 1.01. The incorporation by reference of the Operative Documents into the I&I Agreement was intended to allow FGIC to rely on any representation and warranty that GMACM made to other entities, such as investors or the Indenture Trustee, in connection with the 2005-HE1 Transaction. Indeed, the I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. I&I Agreement § 2.02(k).

(2) Representations, Warranties, and Affirmative Covenants Regarding Access to Information and Servicing

79. The I&I Agreement also provides that "[a]ll the Mortgage Loans will be serviced in all material respects in compliance with the Servicing Agreement and the Indenture[.]" *See* I&I Agreement § 2.02(l). In the Servicing Agreement, GMACM covenanted, represented, and warranted that it would service and administer the Mortgage Loans in the 2005-HE1 Transaction in a manner consistent with its own servicing guidelines. *See* Servicing Agreement § 3.01(a).

80. The I&I Agreement requires, among other things, that GMACM furnish or cause to be furnished to FGIC "promptly upon receipt thereof, copies of all schedules, financial statements or other similar reports delivered to or by GMACM . . . [as well as] [p]romptly upon request such other data as [FGIC] may reasonably request." I&I Agreement § 2.02(c)(v).

81. The I&I Agreement further affords FGIC the express right "to conduct an ongoing review of GMACM's practices as Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices." I&I Agreement § 2.02(p). FGIC also has the express right to "inspect the books and records of GMACM . . . [and to] discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and with GMACM's consent, which consent shall not be unreasonably withheld or delayed, to

discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants[.]" I&I Agreement § 2.02(e).

E. GMACM's Breaches of Its Representations, Warranties and Affirmative Covenants

(1) GMACM Improperly Transferred Over $850 Million in Subsequent Mortgage Loans

82. As discussed below, GMACM improperly and repeatedly transferred Subsequent Mortgage Loans into the 2005-HE1 Trust long after the Operative Documents forbade it from doing so. Moreover, GMACM failed to give FGIC required information and data concerning the Subsequent Mortgage Loans, and/or to obtain FGIC's consent prior to transferring the Subsequent Mortgage Loans into the 2005-HE1 Trust. GMACM transferred loans with an aggregate principal amount of $851,740,479 to the 2005-HE1 Trust through these improper subsequent transfers (the "Subsequent Transfers").

a. "Revolving Period," "Subsequent Mortgage Loans" And An "Early Amortization Event"

83. Under the Operative Documents, GMACM, as Servicer of the 2005-HE1 Trust, is required to establish a Custodial Account in which it must deposit any payments made by borrowers on the Mortgage Loans (*i.e.*, the principal and interest payments made by mortgagors). Servicing Agreement § 3.02(b). Additionally, under the Operative Documents, the Indenture Trustee is required to establish a segregated trust account known as the Funding Account. Servicing Agreement § 3.16(a).

84. As Servicer of the 2005-HE1 Trust, GMACM is required, "[o]n each Payment Date during the Revolving Period, . . . to withdraw from the Custodial Account and deposit into the Funding Account . . . the aggregate amount of Principal Collections remaining after the

purchase of all Additional Balances or Subsequent Mortgage Loans on or prior to such Payment Date." Servicing Agreement § 3.16(a).

85. A revolving period, in the context of a securitization, is generally the time during which cash available to the trust may properly be reinvested in new collateral for the pool rather than being used to pay down the principal balance of the securities. Under the Operative Documents, the Revolving Period is defined in pertinent part as: "The period beginning on the Closing Date and ending on the earlier of (i) the Payment Date occurring in September 2006, [and] (ii) the occurrence of an event described in clause (iv) of the definition of Early Amortization Event[.]" Indenture, Appendix A.

86. During the Revolving Period and subject to certain conditions, GMACM, as Seller, could purchase Subsequent Mortgage Loans and transfer them into the 2005-HE1 Trust. MLPA § 2.2(a). GMACM could then be reimbursed with funds from the Custodial Account and/or the Funding Account. *See* MLPA § 2.2(a); Servicing Agreement § 3.16(c)(i)(B).

87. Even during the period in which GMACM is authorized under the Operative Documents to execute the purchase and transfer of Subsequent Mortgage Loans, it is required to seek and obtain FGIC's permission to do so prior to transferring those loans into the 2005-HE1 Trust. *See* MLPA § 2.2(b)(vi); 2005-HE1 Prospectus Supplement at S-43. In addition, the MLPA also requires GMACM to deliver to FGIC, within five days after the transfer, a copy of the Mortgage Loan Schedule reflecting the Subsequent Mortgage Loans in electronic format. *See* MLPA § 2.2(c).

88. Moreover, GMACM may only transfer Subsequent Mortgage Loans if "the Revolving Period shall not have terminated." MLPA § 2.2(b)(v). As detailed above, the

Revolving Period ends, *inter alia*, upon "the occurrence of an event described in clause (iv) of the definition of Early Amortization Event." Indenture, Appendix A.

89. An Early Amortization Event, as defined, is "[t]he occurrence of one of the following events: . . . (iv) if beginning in June 2005 (a) for three consecutive months, the average amount in the Funding Account which has not been used during a month to purchase Additional Balances or Subsequent Mortgage Loans is greater than 30% of such amount plus the amount which had been used during that month to purchase Additional Balances and Subsequent Mortgage Loans. . . ." Indenture, Appendix A.

b. An Early Amortization Event Occurs no later than January 2006

90. Under the Operative Documents, an Early Amortization Event occurred no later than January 2006. By that date, at the latest, for three consecutive months the average amount in the Funding Account which had not been used during a month to purchase Additional Balances or Subsequent Mortgage Loans was greater than 30% of such amount plus the amount which had been used during that month to purchase Additional Balances and Subsequent Mortgage Loans.

91. Because the condition specified in clause (iv) of the definition of "Early Amortization Event" was satisfied, at the latest, on one or more occasions by January 2006, an Early Amortization Event occurred by operation of the express terms of the Operative Documents in January 2006, or earlier.

c. GMACM Failed to Notify FGIC of the Occurrence of the Early Amortization Event and the Resulting "Material Adverse Change"

92. Under the Operative Documents, "[u]pon [GMACM's] becoming aware of any Early Amortization Event, [GMACM] shall forward to the Indenture Trustee a statement to such

effect, including the nature of such Early Amortization Event." Servicing Agreement § 4.01(a). In turn, the Indenture Trustee must then deliver by mail such notice to other parties to the Transaction, including FGIC. *Id.*

93. GMACM has failed to notify the Indenture Trustee of the occurrence of an Early Amortization Event, which occurred no later than January 2006, in breach of its obligations under the Servicing Agreement. Consequently, the Indenture Trustee failed to notify FGIC of the occurrence of the Early Amortization Event. Accordingly, GMACM has breached, and continues to breach, its obligations under the Servicing Agreement to provide notice of the occurrence of the Early Amortization Event.

94. Moreover, pursuant to the I&I Agreement, GMACM must promptly inform FGIC of the occurrence of any "Material Adverse Change." I&I Agreement § 2.02(f). A "Material Adverse Change" is defined in the I&I Agreement as "a material adverse change in the ability of such Person [*i.e.*, any individual or entity] to perform its obligations under any of the Operative Documents including any material adverse change in the business, financial condition, results of operations or properties of such Person on a consolidated basis with its subsidiaries which might have such effect." *Id.* § 1.01.

95. The occurrence of the Early Amortization Event resulted in an Event of Default under the Indenture, which is a Material Adverse Change under the I&I Agreement. *See* Indenture, Appendix A; I&I Agreement § 1.01. Therefore, GMACM had an obligation to promptly notify FGIC of this Material Adverse Change.

96. GMACM has failed to notify FGIC of the occurrence of this Material Adverse Change. Accordingly, GMACM has breached, and continues to breach, its obligations under the

I&I Agreement to provide prompt notice to FGIC of the occurrence of this Material Adverse Change.

d. Subsequent Transfers in Contravention of the Operative Documents

97. GMACM was permitted to transfer new loans to the 2005-HE1 Trust only during the Revolving Period. Accordingly, under the express provisions in the Operative Documents, the Revolving Period automatically (and without the need for any action by any party) ended when the Early Amortization Event occurred no later than January 2006. As of that point in time, the Revolving Period ended and GMACM was prohibited from transferring any new loans to the 2005-HE1 Trust.

98. Notwithstanding the fact that the Revolving Period had ended no later than January 2006, GMACM continued to improperly transfer Subsequent Mortgage Loans into the 2005-HE1 Trust after that date. In total, GMACM improperly added to the 2005-HE1 Trust, through at least nine (9) Subsequent Transfers starting on or after the January 2006 Payment Date, an aggregate principal amount of $397,444,259 in improper Subsequent Mortgage Loans.

99. The table below sets forth the aggregate outstanding principal balance of the Subsequent Mortgage Loans in each of the at least nine (9) improper Subsequent Transfers that GMACM effected:

Month	Subsequent Transfer Amount ($)
February 2006	**83,499,906**
March 2006	**35,799,998**
April 2006	**34,799,950**
May 2006	**45,499,830**
June 2006	**40,299,989**
July 2006	**41,299,967**
August 2006	**39,000,000**
September 2006	**35,999,999**
October 2006	**41,244,620**
Total	**397,444,259**

100. In short, Subsequent Mortgage Loans improperly transferred to the 2005-HE1 Trust despite the fact that an Early Amortization Event had already triggered the termination of the Revolving Period. GMACM had no authority to execute such transfers. As such, under the express terms of the Operative Documents, the subsequently transferred loans were not properly transferred to the 2005-HE1 Trust in accordance with the terms of the 2005-HE1 Transaction. Accordingly, GMACM breached the I&I Agreement by failing to comply with the Operative Documents.

e. Improper Transfer Following Natural Expiration of Revolving Period

101. As described above, the Revolving Period terminated, at the latest, on the Payment Date occurring in September 2006, even if there had been no Early Amortization Event. Nevertheless, GMACM improperly transferred approximately $41,244,620 in Subsequent Mortgage Loans into the 2005-HE1 Trust in October 2006. Therefore, in the alternative, even if an Early Amortization Event had not occurred no later than January 2006 and the Revolving Period had not then ended (which it did), GMACM improperly transferred Subsequent Mortgage

Loans beyond the scheduled close of the Revolving Period in September 2006, which is a separate breach of the I&I Agreement. *See* I&I Agreement § 2.02(a).

f. GMACM Failed to Obtain FGIC's Consent or Furnish Required Data and Documents In Transferring Subsequent Mortgage Loans

102. Separately and independently from its obligation to refrain from transferring Subsequent Mortgage Loans following an Early Amortization Event, GMACM must execute a Subsequent Transfer Agreement on or prior to each Subsequent Transfer of Subsequent Mortgage Loans. *See* MLPA § 2.2(b)(ii); MLPA Exhibit 2. In each Subsequent Transfer Agreement, GMACM must restate therein all applicable representations and warranties regarding the Mortgage Loans and certify that it is complying with the requirements of the Operative Documents, including that its actions are not in contravention of any of those agreements. *See* MLPA §§ 2.2(b)(ii), (iv); MLPA Exhibit 2. GMACM must also certify that it had satisfied each condition precedent to effecting a Subsequent Transfer. *See* MLPA § 2.2(b)(ii); MLPA Exhibit 2. As explained further below, GMACM has failed to provide either FGIC or the Indenture Trustee with any Subsequent Transfer Agreement in respect of the Subsequent Transfers.

103. In addition, pursuant to the MLPA, before it can transfer any Subsequent Mortgage Loan into the 2005-HE1 Trust, GMACM must: (i) deliver to FGIC a timely "Addition Notice" no later than seven Business Days prior to the Subsequent Transfer Date, (ii) deliver to FGIC an executed copy of the related Subsequent Transfer Agreement together with a Mortgage Loan Schedule listing the related Subsequent Mortgage Loans, and (iii) obtain the approval of FGIC for the sale of the related Subsequent Mortgage Loans within five Business Days of FGIC's receipt of an updated loan tape containing information on the Subsequent Mortgage

Loans. *See* MLPA § 2.2(b). GMACM failed to deliver such Addition Notices, Subsequent Transfer Agreements, and Mortgage Loan Schedules, or to obtain such approvals.

104. On November 2, 2011, FGIC sent a notice to GMACM stating that it may have transferred approximately $851,740,479 in Subsequent Mortgage Loans to the 2005-HE1 Trust without satisfying all of the conditions described above. FGIC advised it had no evidence that GMACM provided FGIC with the required notices, electronic tapes and other information, or had obtained FGIC's consent prior to the transfer. Specifically, FGIC had no record of receiving any Addition Notice, Subsequent Transfer Agreement, related Mortgage Loan Schedule, or electronic tape with respect to any Subsequent Mortgage Loan transferred. Nor did FGIC have any record of its approval for the sale of any Subsequent Mortgage Loan. Further, FGIC advised that it had made inquiries with the Indenture Trustee, and determined that the Indenture Trustee did not have any record of receiving any Addition Notice or copies of Subsequent Transfer Agreements in respect of the Subsequent Mortgage Loans.

105. To date, GMACM has failed to respond to this notice. FGIC has no records of the required notices, tapes, information, or approvals in respect of the Subsequent Mortgage Loans.

g. GMACM Selected Subsequent Mortgage Loans in a Manner Adverse to the Interests of FGIC by Reselling Loans to the Trust that GMACM Had Been Required to Repurchase

106. Separately and independently from its obligation to refrain from transferring Subsequent Mortgage Loans following an Early Amortization Event, or to provide the required notices, tapes, information, and approvals prior to the Subsequent Transfers, GMACM may not adversely select Subsequent Mortgage Loans to transfer into the 2005-HE1 Trust.

107. As discussed above, during the Revolving Period and subject to certain conditions, GMACM, as Seller, may purchase Subsequent Mortgage Loans and transfer them into the 2005-HE1 Trust. MLPA § 2.2(a). Among the conditions GMACM must satisfy in order to transfer

Subsequent Mortgage Loans to the 2005-HE1 Trust, GMACM must not "select[] such Subsequent Mortgage Loans in a manner that it reasonably believes is adverse to the interests of [FGIC] . . . ." MLPA § 2.2(b).

108. In its role as Servicer, GMACM also has the discretion to increase the credit limit on a given Mortgage Loan, subject to certain limitations, if such an increase is requested by the mortgagor. In order to maintain the integrity of the overall loan pool, however, GMACM is also required to repurchase, and thereby remove, any such Mortgage Loan from the 2005-HE1 Trust if GMACM agrees to such an increase. Specifically, pursuant to the Servicing Agreement, "[GMACM] shall repurchase any Mortgage Loan . . . [if] at the request of the Mortgagor, [GMACM] at its option and in its sole discretion agrees to an increase in the Credit Limit above the Credit Limit of such Mortgage Loan as of the related Cut-Off Date . . . ." Servicing Agreement § 3.15(b).

109. During the Revolving Period, GMACM increased the credit limits on certain Mortgage Loans held by the 2005-HE1 Trust. As a result, GMACM repurchased and removed some or all of these Mortgage Loans from the 2005-HE1 Trust (the "Repurchased Mortgage Loans").

110. Nevertheless, GMACM then resold those very same Repurchased Mortgage Loans back into the 2005-HE1 Trust, even though it knew that it had been required to remove (and had previously removed) the Repurchased Mortgage Loans from the 2005-HE1 Trust pursuant to the Servicing Agreement. In fact, in a June 9, 2008 e-mail to FGIC, GMACM conceded that it had resold the Repurchased Mortgage Loans back to the 2005-HE1 Trust. By selecting the Repurchased Mortgage Loans for resale back to the 2005-HE1 Trust—Mortgage Loans that GMACM knew it was required to remove from the Trust—GMACM not only

circumvented the intended operation of the Servicing Agreement, but also breached the MLPA by selecting "such Mortgage Loans in a manner . . . adverse to the interests of [FGIC]." MLPA § 2.2(b).

111. Accordingly, because it has failed to comply with conditions precedent before transferring the Subsequent Mortgage Loans, GMACM has breached and continues to breach Section 2.2(b) of the MLPA and Section 2.02(a) of the I&I Agreement.

h. Subsequent Transfers Damaged FGIC

112. Further, the Subsequent Mortgage Loans transferred into the 2005-HE1 Trust have performed much worse than the initial Mortgage Loans. As of January 1, 2012, approximately 16% of the balance of the over $397 million in improperly transferred Subsequent Mortgage Loans added in or after January 2006 has been charged-off, defaulted, or was severely delinquent, as compared to approximately 3% of the balance of the initial Mortgage Loans and other loans added during the Prefunding Period.

(2) GMACM Caused Funding of Variable Pay Revolving Notes Following the Early Amortization Event in Contravention of the Contracts

113. The 2005-HE1 Transaction was structured using what is known as a "soft-bullet" structure, whereby the principal balances of the Class A-I Notes, Class A-2 Notes, and Class A-3 Notes (collectively, the "Term Notes") were to be satisfied and retired sequentially with a single, "bullet" payment to each class on a specified payment date (the "Targeted Final Payment Date"). In order to fund this bullet payment, the Indenture Trustee was to request advances from existing holders of associated VPRNs and/or the Issuer was to issue and sell additional associated VPRNs in the amount of the principal balance of the Term Note that was scheduled to be retired (*i.e.*, Class A-1 VPRNs were to be funded to retire Class A-1 Notes, Class A-2 VPRNs were to be

funded to retire the Class A-2 Notes, Class A-3 VPRNs were to be funded to retire the Class A-3 Notes). The associated class of VPRNs would then be amortized over a specified term.

114. The Targeted Final Payment Date for the Term Notes was September 25, 2006 for the Class A-1 Notes. *See* Indenture, Appendix A. On or about this date, the Class A-1 VPRNs were funded and the Class A-1 Notes were retired.

115. Under the Operative Documents, "[u]pon [GMACM's] becoming aware of any Early Amortization Event, [GMACM] shall forward to the Indenture Trustee a statement to such effect, including the nature of such Early Amortization Event." Servicing Agreement § 4.01(a). Furthermore, "if an Early Amortization Event has occurred . . . the Indenture Trustee will not request an Advance and the Issuer will not issue any additional Variable Pay Revolving Notes." Indenture § 2.03.

116. An Early Amortization Event occurred no later than January 2006. As such, under the express terms of the Operative Documents, GMACM should have notified the Indenture Trustee of the Early Amortization Event. Notwithstanding this obligation, GMACM failed to notify the Indenture Trustee that the Early Amortization Event had occurred, thereby causing the Indenture Trustee to fund the Class A-1 VPRNs—with an aggregate principal amount of $423,800,000—on or about the Targeted Final Payment Date of September 25, 2006. The issuance of such Class A-1 VPRNs after the Early Amortization Event occurred constituted a breach of the Operative Documents.

117. The funding of Class A-1 VPRNs caused an improper outflow of funds from the 2005-HE1 Trust to the holders of the VPRNs, because the interest rate on the improperly issued Class A-1 VPRNs was higher than the interest rate of the Class A-1 Notes that were improperly retired. The funds applied to cover the higher interest rate on the Class A-1 VPRNs would have

otherwise been used to cover other liabilities of the Trust, including payment shortfalls on the remaining 2005-HE1 Notes. The failure to cover these shortfalls because of the higher interest rate of the Class A-1 VPRNs has resulted in additional claims on the Policy to the detriment of FGIC.

118. Accordingly, because it failed to notify the Trustee of the occurrence of an Early Amortization Event, and caused the Trust to issue Class A-1 VPRNs after the occurrence of such Early Amortization Event, GMACM has breached and continues to breach Section 4.01(a) of the Servicing Agreement and Section 2.02(a) of the I&I Agreement.

(3) GMACM's Denial of Loan File Requests

119. As the 2005-HE1 Transaction continued to perform poorly, on December 9, 2010, FGIC wrote to GMACM via e-mail demanding that GMACM provide additional Mortgage Loan files to FGIC, including origination files, servicing notes, and custodian files, for a random sample of 350 2005-HE1 loans. Having received no response from GMACM to its earlier requests, FGIC sent a follow-up e-mail on February 3, 2011, regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information and belief, ResCap's response required authorization from officers at Ally Financial, and GMACM/ResCap's response was directed by officers at Ally Financial.

120. On February 14, 2011, and again on April 26, 2011, FGIC sent further follow-up letters requesting loan files.

121. In finally responding to FGIC's request for information, GMACM refused to provide any loan files or other information relating to current or pre-paid loans ("Performing

Loans"). Instead, it only provided FGIC with only some of the requested loan files, consisting largely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

122. Pursuant to the Servicing Agreement and the I&I Agreement, FGIC is entitled to reasonable access to the documentation regarding all of the Mortgage Loans. Section 2.02(p) of the I&I Agreement provides that "FGIC shall have the right, so long as any of the [2005-HE1] Notes remains outstanding, to conduct an ongoing review of GMACM's practices as Servicer through reviews of the Mortgage Loans . . . ." Notably, there is no limitation in the I&I Agreement as to the nature of the Mortgage Loans files that are subject to review. Further, Section 2.02(c)(v) of the I&I Agreement states that "[p]romptly upon request," GMACM must provide to FGIC "such other data as [FGIC] may reasonably request. . . ."

123. On April 26, 2011, having still received none of the remaining performing Mortgage Loan files it requested, FGIC sent a further letter requesting the remaining loan files. To date, GMACM has not responded.

124. By producing only non-performing Mortgage Loan files, in contravention of the I&I Agreement, GMACM has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

125. As a result of the failure of GMACM to fulfill this contractually-sanctioned request, despite its obligation to do so, FGIC is unable to evaluate the full extent of potential breaches of the representations and warranties of GMACM, and in that regard reserves its rights to bring further claims. Moreover, on information and belief, GMACM is and has been aware that a substantial number of the Mortgage Loans, whether acquired at the closing or thereafter, were nonconforming and, thus, in breach of its own representations and warranties. Despite this

knowledge, GMACM has failed to repurchase the nonconforming loans or replace them with conforming loans, as is required under the Operative Documents.

(4) GMACM's Denial of Servicing Notes

126. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(v) of the I&I Agreement, that GMACM furnish the servicing notes for the Mortgage Loans.

127. GMACM, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to requests for servicing notes.

(5) GMACM's Denial of FGIC's Access To Books and Records, Servicing Officer, and GMACM's Independent Accountants

128. On January 20, 2012, in accordance with its express rights under Sections 2.02(e)(i),(ii), (iii) of the I&I Agreement, FGIC requested (i) to inspect the books and records of GMACM; (ii) to discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and (iii) to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

129. To date, GMACM has failed to respond to this request, in violation of the I&I Agreement.

F. Ally Bank's Breaches of The Custodial Agreement

130. Under the Custodial Agreement, to which FGIC is an express third party beneficiary, *see* Custodial Agreement § 4.6, and through which Ally Bank received substantial fees, Ally Bank undertook several obligations to FGIC concerning the manner in which Ally Bank would ensure that the Mortgage Loans contained complete and accurate information and that GMACM was in compliance with its representations and warranties regarding the origination, selection, and characteristics of those loans.

131. Ally Bank agreed that it would "hold the Loan Agreements [for the initial Mortgage Loans] and any Loan Agreement relating to any Subsequent Mortgage Loan," and that it would review the Loan Agreements and deliver to FGIC a certification of "the completeness of the receipt of the Loan Agreements." Custodial Agreement §§ 2.1, 2.2(b).

132. Ally Bank further agreed to notify FGIC of breaches of the MLPA by GMACM, by providing that: "Upon discovery by the Custodian of a breach of any representation or warranty made by [GMACM] in the Purchase Agreement . . . with respect to a Mortgage Loan . . . the Custodian shall give prompt written notice to [FGIC]." Custodial Agreement § 2.3.

133. An initial review of a small percentage of defective Mortgage Loans has revealed that in some instances the Mortgage Note or Second Lien Note (*i.e.*, the Loan Agreement) was not included in the loan file. The lack of a Loan Agreement within a particular file constitutes a breach of the representations and warranties given by GMACM in the MLPA. Ally Bank should have been aware of the fact that Loan Agreements were missing from certain Mortgage Loan files, and that this was a breach of the MLPA's representations and warranties. Consequently, it should have notified FGIC of such breaches pursuant to its own obligations under the Custodial Agreement. *See* Custodial Agreement §§ 2.1-2.3. Ally Bank has, however, failed to provide FGIC with any notices regarding defects in any Mortgage Loan file, and has further provided inaccurate and/or incomplete certifications regarding the Mortgage Loans, thereby breaching the Custodial Agreement to which FGIC is an express third party beneficiary.

134. Moreover, Ally Bank had an obligation to notify FGIC of any breach by GMACM of the MLPA representations and warranties that it discovered, not just those pertaining to the Loan Agreement, and its failure to so notify FGIC was a further breach of the Custodial Agreement.

G. GMACM's Breach of Obligations as Servicer

135. GMACM, as Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for the 2005-HE1 Transaction, including, but not limited to, its obligations to follow proper servicing procedures.

136. GMACM took responsibility for the servicing of the Mortgage Loans and had certain related contractual obligations under the I&I Agreement and the Servicing Agreement with respect to the 2005-HE1 Transaction. Under the I&I Agreement, GMACM covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the Servicing Agreement and the Indenture." I&I Agreement § 2.02(l). Under the Servicing Agreement, GMACM is liable to FGIC for the servicing and administration of the Mortgage Loans, and in doing so is required to "follow such collection procedures as shall be normal and usual in its general mortgage servicing activities and consistent with the procedures the Servicer employs in servicing all other Mortgage Loans in the servicing portfolio with characteristics similar to those of the Mortgage Loans." Servicing Agreement §§ 3.02(a), 6.01.

137. During 2007, the servicing operations of GMACM were integrated into ResCap. Since the time of the integration, on information and belief, GMACM breached these obligations by, among other things, being deficient in its borrower contact, collections, and loss mitigation standards, and by failing to honor FGIC's contractual rights to information. In particular, an onsite review of the Ally Financial servicing arm's practices, including those of GMACM, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis, revealed *inter alia*: (i) inadequate call center staffing—staffing unable to handle increased incoming and outgoing call volumes; (ii) call center staffing turnovers as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when GMACM does

not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; and (v) severely infrequent use of alternative loss mitigation strategies as compared to the industry. GMACM, as servicer, also had an obligation to notify FGIC of any material breaches of representations and warranties, and to cause GMACM, as seller, to repurchase the affected Mortgage Loans.

138. On information and belief, GMACM has failed to remedy any of its deficient servicing practices.

139. In addition, GMACM disclosed to FGIC for the first time in March 2009 that it classified loans into one of three categories or "Risk Tiers" under a servicing protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

140. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. GMACM disclosed to FGIC that all of the mortgage loans in FGIC-insured, GMACM-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the 2005-HE1 Transaction, were placed in the lowest category of risk. For such mortgage loans, regardless whether they were (i) first- or second- lien, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities—all of which are factors that require more attentive servicing—delinquent borrowers were called at a later stage of delinquency and less frequently than loans in higher risk categories. As the purchaser of the Mortgage Loans, however,

GMACM clearly knew that such Mortgage Loans, by their very nature, required particularized servicing before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by GMACM to ensure that the Mortgage Loans were serviced and administered in accordance with "procedures as shall be normal and usual in its general mortgage servicing activities" constitutes a breach of the Servicing Agreement and the I&I Agreement. *See* Servicing Agreement § 3.02(a); I&I Agreement § 2.02(l).

141. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, GMACM has failed to provide such information in breach of Section 2.02(c)(v) of the I&I Agreement.

H. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

142. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns GMACM and RFC. Ally Financial—as the ultimate parent of ResCap, GMACM, Ally Bank, and RFC—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC.

143. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC. Ally Financial exercised its direction and control in connection with the 2005-HE1 Transaction. At times, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

144. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries[.]" *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

145. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of GMACM Directly and Indirectly Through its Control of ResCap

146. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

147. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

148. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

149. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would

agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement").

150. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

151. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

152. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[1] Since incorporation, the ownership of ResCap has not changed—Ally

[1] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the Securities and Exchange

Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

153. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial and ResCap shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the proposed 2005 operating agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." 2005 Operating Agreement (emphasis added).

154. Moreover, on April 26, 2007, "ResCap Investor Relations" announced the release of Ally Financial's 2007 first quarter financial results to investors in an email bearing the ResCap logo. That announcement stated that Ally Financial's financial results were found on both Ally Financial's and ResCap's websites.

155. Another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, including GMACM and RAMP, is David C. Walker. Walker joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. In September 2005, around the closing of the 2005-HE1 Transaction,

---

(continued...)

Commission (the "SEC") on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

Walker was a director at ResCap, GMACM, RFC, and RAMP, among other ResCap subsidiaries.

156. Similarly, William F. Muir, Ally Financial's President, has served in that capacity since at least 2004 (first at GMAC and then at Ally Financial) while also serving as President and Chairman of the Board of IB Finance Holding Company, LLC—the direct parent of Ally Bank—and as a director of Ally Bank.

157. The 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

158. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

159. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the

strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part of our plan and a key part of our value creation." *Id.* (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

160. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citi, which provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept. 19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id.*

161. Moreover, there is substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

162. Additionally, as discussed above, Ally Financial recorded a $270 million charge in the fourth quarter of 2011, the majority of which was recorded at its controlled subsidiary, ResCap. In the wake of anticipated penalties to be assessed against ResCap by government regulators, and the fact that ResCap failed to maintain sufficient tangible net worth to comply

with the requirements of the terms of certain credit facilities, Ally Financial propped up its subsidiary ResCap with a $196.5 million capital contribution in the form of intercompany debt forgiveness. *See* Ally Fin. Inc., Form 8-K, at 2 (Jan. 31, 2012).

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

163. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Jan. 26, 2012).

164. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured, including this Transaction. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

165. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed GMACM and RFC as part of its own business. For example, in its investor presentation from 2007, ResCap declares that GMACM and RFC "are owned and

operated by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies."

166. Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial was not directly controlling GMACM and RFC, it was using ResCap as an instrument to do so.

167. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

168. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one GMACM has with respect to the 2005-HE1 Transaction as Servicer.

169. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

170. In another example, Larry Hipp, a member of ResCap's Risk Analyst/Investor Repurchase Department, communicated with FGIC regarding rescission requests using an Ally Financial email address, but in those very same emails, lists his ResCap contact information, including a ResCap email address. In addition, Ally Financial/ResCap used to send FGIC secure communications bearing a "GMAC ResCap" header, but those secure communications now have an Ally Financial header.

171. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

> Q: Could you please state your name for the record.
> A: My name is Jeffrey Stephan.
> Q: Okay. And who do you work for?
> A: GMAC, LLC [Ally Financial].
> Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
> A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
> Q: Okay.
> A: It's GMCA [sic] Mortgage Corporation.

Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?
A. Yes.
Q. So these entities no longer currently exist?
A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

I. FGIC's Contractual Remedies Under The I&I Agreement

172. The I&I Agreement provides FGIC with broad remedies for GMACM's breaches of its representations and warranties. The breadth of these remedies provided further material inducement for FGIC to issue the Policy. Specifically, Section 5.02(b) of the I&I Agreement provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this Insurance Agreement, the Indenture or existing at law or in equity.

173. Moreover, the I&I Agreement provides that, upon an "Event of Default" – which is defined to include when "[a]ny representation or warranty" by GMACM in the I&I Agreement or the Operative Documents is materially untrue or incomplete – FGIC can "take whatever action at law or in equity as may appear necessary or desirable in its judgment to collect the amounts, if any, then due under [the I&I Agreement] or any other Operative Document or to enforce performance and observance of any obligation, agreement or covenant of GMACM." I&I Agreement §§ 5.01(a), 5.02(a).

174. In addition, GMACM agreed in Section 3.04(a) of the I&I Agreement:

> to pay, and to protect, indemnify and save harmless [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages, costs or expenses (including reasonable fees and expenses of attorneys . . .) . . . of any nature arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the Transaction contemplated by the Operative Documents . . . .

I&I Agreement § 3.04(a).

175. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, GMACM agreed to repurchase or substitute Mortgage Loans that did not conform to GMACM's representations and warranties, and to indemnify FGIC for claims and losses arising from GMACM's breach of any representation or warranty. *See* I&I Agreement §§ 3.03(b), 3.04(a).

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Material Breach of the I&I Agreement – Declaratory Relief Regarding GMACM's Indemnification Obligation)

176. FGIC re-alleges and incorporates by reference paragraphs 1 through 175 of this Complaint.

177. The I&I Agreement is a valid and binding agreement between the parties.

178. FGIC has performed its obligations under the I&I Agreement.

179. GMACM's representations and warranties were material to FGIC's decision to insure the Notes and to issue the Policy.

180. GMACM's pervasive and material breaches of its representations and warranties, from the very inception of the Transaction and in the years since, constitute a material breach of the I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

181. Pursuant to Section 3.04(a) of the I&I Agreement, GMACM must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things, the breach by GMACM of any representation, warranty, or covenant under any of the related Operative Documents.

182. As explained above, GMACM has breached numerous representations, warranties, and covenants in the Offering and Operative Documents, for example, those contained in Section 2.01 of the I&I Agreement. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

183. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

184. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM must jointly and severally indemnify and reimburse FGIC for all sums arising out of the 2005-HE1 Transaction for which FGIC has or will become liable, or, alternatively, for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents, or, alternatively, in an amount to be determined at trial, and an order giving effect to such indemnification.

185. In addition, FGIC seeks a declaration that GMACM must indemnify and reimburse FGIC for all sums arising out of the 2005-HE1 Transaction for which FGIC has or will become liable, or, alternatively, for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative

Documents, or, alternatively, in an amount to be determined at trial, and an order giving effect to such indemnification.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Material Breach of the Operative Documents — Indemnification for Improper Subsequent Transfers, or, Alternatively, Repurchase of Improper Subsequent Transfers, or, Alternatively, Damages for all Losses Sustained from Improper Subsequent Transfers)

186. FGIC re-alleges and incorporates by reference paragraphs 1 through 185 of this Complaint.

187. The I&I Agreement is a valid and binding agreement between the parties.

188. FGIC has performed its obligations under the I&I Agreement.

189. GMACM has breached the I&I Agreement, and the provisions of the MLPA and the Operative Documents incorporated therein, by executing improper Subsequent Transfers to the 2005-HE1 Trust despite the occurrence of an Early Amortization Event having terminated the Revolving Period no later than January 2006, and—independently—after the stated date for the termination of the Revolving Period on the September 2006 Payment Date.

190. Moreover, GMACM has breached the MLPA by failing to provide FGIC with the required agreements, notices, information, and data, and failing to obtain from FGIC the required approvals, prior to transferring the Subsequent Mortgage Loans into the 2005-HE1 Trust.

191. In addition, GMACM has breached and continues to breach the Servicing Agreement by failing to notify the Indenture Trustee of the occurrence of the Early Amortization Event no later than January 2006. Further, GMACM has breached and continues to breach the I&I Agreement by failing to promptly notify FGIC of the same, which constitutes a Material Adverse Change.

192. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

193. FGIC has been damaged in an amount to be proven at trial as a result of the improper transfer of Mortgage Loans to the 2005-HE1 Trust.

194. FGIC is entitled to indemnification for any claim it has paid or which it may be required to pay arising from a Subsequent Mortgage Loan that was improperly transferred to the 2005-HE1 Trust.

195. FGIC therefore seeks a declaration that GMACM must reimburse and indemnify FGIC for all sums arising out of the 2005-HE1 Transaction for which FGIC has or will become liable and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented, as a result of the improper transfer of Subsequent Mortgage Loans to the 2005-HE1 Trust.

196. Further, FGIC seeks an order that GMACM must repurchase the Mortgage Loans that were improperly transferred to the 2005-HE1 Trust.

197. In the alternative, FGIC has been damaged in an amount to be proven at trial because it has paid or remains liable for certain claims arising from Subsequent Mortgage Loans that GMACM was obligated to repurchase as a result of their improper transfer to the 2005-HE1 Trust.

198. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

199. Alternatively, GMACM is liable for such damages.

THIRD CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Material Breach of the Operative Documents — Indemnification for Improper Funding of Variable Pay Revolving Notes Following Early Amortization Event, or, Alternatively, Damages for such Improper Funding)

200. FGIC re-alleges and incorporates by reference paragraphs 1 through 199 of this Complaint.

201. The I&I Agreement is a valid and binding agreement between the parties.

202. FGIC has performed its obligations under the I&I Agreement.

203. GMACM has breached the I&I Agreement, and the provisions of the Indenture and the Operative Documents incorporated therein, by failing to notify the Indenture Trustee that the Early Amortization Event had occurred, thereby causing the Indenture Trustee and Issuer to improperly fund the Class A-I VPRNs following the Early Amortization Event.

204. FGIC therefore seeks a declaration that GMACM must reimburse and indemnify FGIC for all sums arising out of the 2005-HE1 Transaction for which FGIC has or will become liable and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented, as a result of the improper funding of the VPRNs following the Early Amortization Event.

205. In the alternative, FGIC has been damaged in an amount to be proven at trial because it has paid or remains liable for certain claims as a result of the improper funding of the VPRNs following the Early Amortization Event.

206. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

207. Alternatively, GMACM is liable for such damages.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract – Declaratory Relief Regarding Access to Information)

208. FGIC re-alleges and incorporates by reference paragraphs 1 through 207 of this Complaint.

209. The I&I Agreement is a valid and binding agreement between the parties.

210. FGIC has performed its obligations under the I&I Agreement.

211. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, GMACM agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the 2005-HE1 Transaction. FGIC further has the right to conduct reviews of GMACM's practices as Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(p) of the I&I Agreement.

212. As discussed above, pursuant to the I&I Agreement, FGIC made numerous reasonable written requests that GMACM furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by GMACM, and others, concerning the Mortgage Loans.

213. GMACM has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

214. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

215. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, GMACM agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of GMACM; (ii)

discuss the affairs, finances and accounts of GMACM with GMACM's Servicing Officer; and (iii) discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

216. On January 20, 2012, FGIC made a reasonable written request that GMACM permit FGIC or its authorized agent to conduct an inspection of the books and records of GMACM, as well as permit FGIC to (i) discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, and (ii) with GMACM's consent, which consent shall not be unreasonably withheld or delayed, discuss the affairs, finances, and accounts of GMACM with GMACM's independent accountants.

217. GMACM has failed to make available such persons or to produce such information.

218. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreement, Section 2.02(e)(i)-(iii).

219. Pursuant to Section 2.02(c)(v) of the I&I Agreement, GMACM agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [Servicing Agreement]."

220. FGIC made a reasonable request for servicing notes on December 9, 2010.

221. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

222. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

223. Accordingly, FGIC seeks a declaration that GMACM has failed to comply with Sections 2.02(c)(v), 2.02(e)(i)-(iii), and 2.02(p) of the I&I Agreement, and an order requiring GMACM to promptly remedy those breaches and therefore comply with FGIC's requests and notices to GMACM pursuant to the relevant provisions, as detailed above.

FIFTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Servicer Obligations)

224. FGIC re-alleges and incorporates by reference paragraphs 1 through 223 of this Complaint.

225. The I&I Agreement is a valid and binding agreement between the parties.

226. FGIC has performed its obligations under the I&I Agreement.

227. As explained above, GMACM has breached its affirmative covenant under the I&I Agreement to service all Mortgage Loans in all material respects in compliance with the Servicing Agreement.

228. GMACM's breaches of the I&I Agreement have caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on the Policy and other losses and expenses.

229. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

230. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

231. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

232. Alternatively, GMACM is liable for such damages.

SIXTH CAUSE OF ACTION

(As Against Ally Bank: Breach of the Custodial Agreement

233. FGIC re-alleges and incorporates by reference paragraphs 1 through 232 of this Complaint.

234. The Custodial Agreement is a valid and binding agreement between the parties thereto.

235. FGIC is an express third party beneficiary of the Custodial Agreement.

236. As explained above, Ally Bank has materially breached its obligations under Sections 2.1, 2.2, and 2.3 of the Custodial Agreement.

237. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

238. Ally Bank is liable for such damages.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Declaratory Relief)

239. FGIC re-alleges and incorporates by reference paragraphs 1 through 238 of this Complaint.

240. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this complaint.

241. For the reasons set forth in paragraphs 142 through 171, among others, Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other.

242. FGIC has been damaged as a result of the actions Ally Financial, ResCap, and GMACM.

243. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other, and therefore are jointly and severely liable for each other's liabilities.

EIGHTH CAUSE OF ACTION

(As Against GMACM: Attorneys' Fees and Costs)

244. FGIC re-alleges and incorporates by reference paragraphs 1 through 243 of this Complaint.

245. The I&I Agreement is a valid and binding agreement between the parties.

246. FGIC has performed its obligations under the I&I Agreement.

247. Pursuant to Section 3.03(c) of the I&I Agreement, GMACM agreed to reimburse FGIC for any and all costs or expenses "including reasonable attorneys' . . . fees and expenses" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreement, GMACM agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or relating to the 2005-HE1 Transaction.

248. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of GMACM's failure to provide Mortgage Loan files, Servicing Reports, and financial information and its breach of the representations and warranties contained in Section 2.01 of the I&I Agreement and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreement.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant GMAC Mortgage Company, LLC, with respect to (1) through (3) and (5) through (14) below, and in its favor and against Residential Capital, LLC, with respect to (1) through (3), (5) through (11), (13), and (14), below, and in its favor and against Ally Bank, with respect to (4), (13), and (14) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (3), (5) through (11), (13), and (14) below and the following relief:

(1) A declaration that, pursuant to GMACM's obligations under the I&I Agreements, GMACM must solely and/or Ally Financial, ResCap, and GMACM must jointly and severally reimburse and indemnify FGIC for all sums arising out of the 2005-HE1 Transaction for which FGIC has or will become liable, or, alternatively, for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents, or, alternatively, in an amount to be determined at trial, and an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for GMACM's material breaches of the I&I Agreement and the Operative Documents incorporated therein;

(3) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for GMACM's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreement and frustration of the parties' bargain;

(4) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for Ally Bank's material breaches of its obligations under the Custodial Agreement;

(5) Further or alternatively, a declaration that GMACM reimburse and indemnify FGIC for all sums arising out of the 2005-HE1 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policy and to the payment of all future amounts due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented, as a result of Subsequent Mortgage Loans that were improperly transferred to the 2005-HE1 Trust, and the

improper funding of the VPRNs, and an order giving effect to that declaration;

(6) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for GMACM's improper transfer of Subsequent Mortgage Loans to the 2005-HE1 Trust and improper funding of the VPRNs;

(7) Further or alternatively, a declaration that GMACM must repurchase the Mortgage Loans that were improperly transferred to the 2005-HE1 Trust, and/or must reimburse the 2005-HE1 Trust for monies improperly distributed to the VPRNs, and order giving effect to that declaration;

(8) Further or alternatively, a declaration that GMACM must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2005-HE1 Transaction, and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that GMACM must allow FGIC to inspect the books and records of GMACM, to discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, and to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants, and an order giving effect to that declaration;

(10) Further or alternatively, a declaration that GMACM must cause servicing notes to be provided for the 2005-HE1 Transaction when requested by FGIC, and an order giving effect to that declaration;

(11) Further or alternatively, a declaration that Ally Financial, ResCap, and GMACM are alter egos of each other and are jointly and severely liable for each other's liabilities;

(12) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreement and other Operative Documents, as defined in the I&I Agreement;

(13) An award of prejudgment interest at the statutory rate; and

(14) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

Attorneys for Plaintiff
Financial Guaranty Insurance Company

Exhibit 22

JUDGE BAER

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

FINANCIAL GUARANTY INSURANCE COMPANY,	12 CV 1601
Plaintiff,	**COMPLAINT**
-against-	**Civil Action No.** _____
ALLY FINANCIAL, INC. F/K/A GMAC, LLC; RESIDENTIAL CAPITAL, LLC; RESIDENTIAL FUNDING COMPANY, LLC,	**ECF Filed**
Defendants.	

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"); Residential Capital, LLC ("ResCap"); and Residential Funding Company, LLC ("RFC"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with a financial guaranty insurance policy (the "Policy") issued by FGIC in relation to an RFC-sponsored transaction (the "2007-EMX1 Transaction" or the "Transaction") in which the RASC Series 2007-EMX1 Trust (the "2007-EMX1 Trust") issued and sold to investors $692,852,000 aggregate principal amount of insured residential mortgage-backed securities (the "2007-EMX1 Certificates"). As the sponsor of the 2007-EMX1 Transaction, RFC procured the Policy from FGIC in order to enhance the ratings

and marketability of the 2007-EMX1 Certificates. RFC fraudulently induced FGIC's agreement to provide this insurance through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices, and the credit quality and characteristics of the thousands of mortgage loans that provided the collateral for the 2007-EMX1 Certificates (individually the "Mortgage Loans" and collectively the "Loan Pool"). In short, the Mortgage Loans were different—and demonstrably worse—than RFC had represented them to be. Indeed, RFC's misrepresentations with respect to the 2007-EMX1 Transaction have been so egregious that a federal government agency has alleged fraud and state and federal securities law violations against RFC, ResCap and Ally Financial relating to the 2007-EMX1 Transaction.

2. FGIC's issuance of the Policy enabled the 2007-EMX1 Certificates to receive an initial triple-A rating from the rating agencies, which in turn made the 2007-EMX1 Transaction viable, and enabled RFC and its affiliates to earn millions of dollars in transaction fees.

3. Since the closing of the 2007-EMX1 Transaction, RFC has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of the 2007-EMX1 Transaction, RFC has violated the essential terms of its agreement with FGIC. RFC has also breached the essential terms of the other operative documents incorporated therein.

4. The wrongdoing committed by RFC, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through ResCap. Ally Financial is the ultimate parent of ResCap, which owns RFC. Ally Financial, as the ultimate parent of ResCap and RFC, has the practical ability, which it has repeatedly exercised, to direct and control the activities of

its subsidiaries, including ResCap and RFC. At times, Ally Financial's direction and control was effected by using ResCap as an instrument to achieve its goals.

5. The 2007-EMX1 Transaction is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among RFC and several other parties whereby the Mortgage Loans were pooled together and transferred to the 2007-EMX1 Trust, which then issued to investors securities (*i.e.*, the 2007-EMX1 Certificates) collateralized by those loans.

6. To facilitate the Transaction, RFC pooled together the Mortgage Loans, which RFC had previously purchased from an affiliate of the originator, Mortgage Lenders Network USA, Inc. ("MLN"), a nationwide mortgage lender at that time. The Mortgage Loans consisted of 4,051 first-lien and junior-lien mortgage loans originated by MLN. After origination, the Mortgage Loans were sold to Emax Financial Group, LLC ("Emax"), an MLN affiliate. RFC acquired the Mortgage Loans from Emax prior to the closing of the 2007-EMX1 Transaction.

7. Following its acquisition of the Mortgage Loans, RFC transferred the Mortgage Loans to another Ally Financial subsidiary, Residential Asset Securities Corporation ("RASC"). RASC then deposited the Mortgage Loans it received from RFC into the 2007-EMX1 Trust. The trust, in turn, issued certificates representing the beneficial interest in the 2007-EMX1 Trust. The 2007-EMX1 Trust was a legal entity created by RFC solely for the purpose of the 2007-EMX1 Transaction: to hold the Mortgage Loans and to issue the 2007-EMX1 Certificates to investors in a registered public offering.

8. RFC also acts as master servicer of the 2007-EMX1 Transaction (the "Master Servicer"), and two other Ally Financial subsidiaries—HomeComings Financial, LLC ("HomeComings") and GMAC Mortgage, LLC ("GMACM")—act as subservicers of the 2007-

EMX1 Transaction (the "Subservicers"). As Master Servicer, RFC supervises the activities of the Subservicers, including the collection of borrower payments, and performs other servicing duties related to the Mortgage Loans. As discussed in more detail below, all of HomeComings' and GMACM's servicing operations have since been integrated into ResCap. Yet another Ally Financial subsidiary, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was a joint lead manager of the underwriters of the 2007-EMX1 Transaction. U.S. Bank National Association ("U.S. Bank") agreed to act as trustee of the 2007-EMX1 Trust (the "Trustee").

9. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the Trust are used to pay, among other things, principal and interest due on the 2007-EMX1 Certificates, and the fees and expenses of RFC, GMACM and HomeComings, as well as other participants in the Transaction.

10. RFC, directed and controlled by Ally Financial, is, therefore, the hub of the 2007-EMX1 Transaction: it is the sponsor of the securitization, an acquirer and seller of the Mortgage Loans, and the Master Servicer of the Transaction. The primary victim of the 2007-EMX1 Transaction—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by RFC—is FGIC, which has already been presented with over $26.9 million in claims under the Policy, with further material losses still to come.

11. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed certificates ("RMBS Certificates"). At the time of the 2007-EMX1 Transaction, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by

FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Certificates typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of realized losses on the Mortgage Loans collateralizing the insured securities. FGIC's insurance policies thus enhanced the credit quality and marketability of the insured securities.

12. To enhance the ratings and marketability of the 2007-EMX1 Certificates, and to increase the profit that RFC would derive from the 2007-EMX1 Transaction, RFC sought to have FGIC issue the Policy to U.S. Bank, as Trustee, for the benefit of the holders of the 2007-EMX1 Certificates.

13. As an essential element of the 2007-EMX1 Transaction, RFC made material representations and warranties to FGIC about the manner in which the Mortgage Loans were selected and evaluated and their characteristics to induce FGIC to enter into the Transaction. RFC represented, among other things, that the Mortgage Loans "were in substantial conformity with the standards set forth in [RFC's] AlterNet Program or are otherwise in conformity with the standards set forth in the description of credit grades set forth in this prospectus supplement." Prospectus Supplement at S-57; *see also* Prospectus Supplement at S-60. Those representations and warranties were false when stated, and FGIC reasonably relied on such warranties, among others, when deciding to enter into the 2007-EMX1 Transaction. As a result, FGIC was fraudulently induced to enter into the Transaction, and the credit risk assumed by FGIC in connection with the Transaction was far greater than it would have been had RFC's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

14. RFC received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policy. Ally Financial took actions and made statements to finance, support, and boost investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations RFC had made to FGIC. As a result of its dominance over ResCap and RFC, Ally Financial knew that the representations and warranties RFC made to FGIC, prior to and at the closing, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted RFC's fraudulent inducement of FGIC to issue the Policy.

15. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policy in reliance on the (presumed) accuracy and truthfulness of RFC's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and therefore the amount of claims presented to FGIC, have been overwhelming. Had FGIC been told the truth about the nature of RFC's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policy, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of RFC's misconduct.

16. In order to evaluate the extent of RFC's breaches, FGIC has requested copies of the mortgage loan files and servicing notes for the Mortgage Loans. RFC is obligated, under its agreements with FGIC, to provide those documents to FGIC. RFC has refused to provide FGIC with the requested documentation, which, on information and belief, will further evidence

material breaches by RFC. This refusal to provide information in itself constitutes a material breach of RFC's insurance agreement with FGIC.

17. Certain of the material contractual breaches committed by RFC—including, but not limited to, FGIC's right to access information in RFC's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

18. Through this Complaint, FGIC seeks relief against RFC, ResCap, and Ally Financial for RFC's fraudulent inducement, and for RFC's material breaches of its insurance agreement with FGIC and other contractual obligations owed to FGIC in connection with the 2007-EMX1 Transaction.

19. FGIC seeks a declaration from the Court that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other. Further and alternatively, FGIC seeks relief against Ally Financial for aiding and abetting RFC's fraudulent inducement.

THE PARTIES

20. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

21. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial specializes in automotive financings, residential mortgage financings and services, and insurance services. Ally Financial is the parent company of ResCap, RFC, and all RFC-affiliated entities relevant to this action.

22. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of RFC and is a leading real estate finance company, the business of which includes acquiring, selling and servicing mortgage loans.

23. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

24. Defendant RFC is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. In the period relevant to this action, RFC acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

25. Since 2005, RFC has been an indirect wholly owned subsidiary of ResCap; prior to that time, RFC was an indirect, wholly owned subsidiary of Ally Financial.

JURISDICTION AND VENUE

26. This Court has subject matter jurisdiction over this suit pursuant to 28 U.S.C. § 1332 because there is complete diversity of citizenship between the parties and the amount in controversy exceeds $75,000, exclusive of interest and costs.

27. Venue is proper in this district under 28 U.S.C. § 1391 because a substantial part of the events giving rise to this claim occurred within this judicial district. Moreover, at least one of the defendants in this action, RFC, has agreed to submit to the jurisdiction of this Court, and has agreed not to challenge venue in this Court.

RELEVANT NON-PARTIES

28. GMACM is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. GMACM is an indirect wholly owned subsidiary of ResCap, which in turn is a wholly owned subsidiary of Ally Financial. GMACM has served as one of the two Subservicers.

29. HomeComings, formerly known as HomeComings Financial Network, Inc., is a limited liability company with its principal place of business in Minneapolis, Minnesota. It,

along with GMACM, has served as a Subservicer of the Mortgage Loans. HomeComings is a wholly owned subsidiary of RFC.

30. RASC, a special purpose vehicle, is a Delaware corporation with its principal place of business in Minneapolis, Minnesota. To facilitate the 2007-EMX1 Transaction, RASC purchased the Mortgage Loans from RFC and deposited them into the 2007-EMX1 Trust, which then issued the 2007-EMX1 Certificates to underwriters to be sold to investors.

31. Ally Securities, an entity incorporated in Delaware, is an affiliate of RFC and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2011, Ally Securities was known as Residential Funding Securities LLC, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the 2007-EMX1 Certificates and, on information and belief, participated in the preparation of the Prospectus and Prospectus Supplement.

32. MLN was the originator of the Mortgage Loans, which were bought by Emax, and then sold to RFC. MLN filed for bankruptcy on February 5, 2007.

33. Emax was the seller of the Mortgage Loans to RFC. Emax made a written request to the State of Illinois Department of Financial and Professional Regulation on February 27, 2007, to surrender its residential mortgage license. That request was ultimately approved and Emax's residential mortgage license was revoked on June 11, 2008.

FACTUAL ALLEGATIONS

A. Ally Financial and its Subsidiaries

34. In the period relevant to this action, RFC acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans

and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Certificates.

35. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults, and losses; and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including ResCap and RFC, led Ally Financial to seek a bailout by the federal government in 2008.

(1) RFC, GMACM, and GMAC-RFC

36. RFC is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

37. GMACM is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate RFC, GMACM engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

38. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical Annual: Volume II* at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

39. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011. *See*

FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

40. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with RFC. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

41. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

42. Ally Financial's business model depended on securitizations, which were conducted by its business units, including RFC. Pooling mortgage loans and selling them into securitizations enabled RFC to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

43. RFC, in addition to securitizing mortgage loans originated by itself or other Ally Financial subsidiaries, also earned fees by securitizing mortgage loans it acquired from third parties through its warehouse lending business. In fact, as of 2006, "ResCap's warehouse lending business [was] the largest provider of warehouse lending services for mortgage loans in the US, with more than $17 billion in commitments." ResCap, *Residential Capital Corporation's CFO to Lead Company's Warehouse Lending Business*, (May 4, 2006) *available at* http://www.businesswire.com/news/home/20060504006138/en/Residential-Capital-Corporations-CFO-Lead-Companys-Warehouse.

44. When securitizing mortgage loans originated by other parties, RFC would typically acquire such mortgage loans and then deposit them into a securitization trust (usually through an affiliate). RFC would then procure underwriters, trustees, and (in the case of insured securities) financial guaranty insurers, and cause the securitization trust to sell securities collateralized by the relevant mortgage loans. RFC would also (i) make representations and warranties with respect to the origination and characteristics of the individual mortgage loans and the mortgage loan pool as a whole, and (ii) arrange to provide mortgage loan servicing, typically through one of its affiliates. By this means, RFC presented securitizations of loans originated by other lenders as the equivalent of securitizations of RFC-originated loans. Since these other lenders typically had lesser reputations in the market— and in the case of MLN, were in fact in bankruptcy and out of business entirely— the presentation of transactions collateralized by such loan pools as the equivalent of transactions collateralized by RFC-originated loan pools substantially improved the marketability of such loan pools.

45. In many instances, when RFC arranged for the securitization of mortgage loans originated by other lenders, RFC profited from the difference between the cost it incurred to acquire mortgage loans and the price at which it sold them for deposit into the securitizations.

46. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining whether a mortgage loan is in default based on the transaction documents, RFC typically also sought (as it did here) to be appointed as the Master Servicer for the 2007-EMX1 Transaction. Moreover, RFC appointed its affiliate, GMACM, and its subsidiary, HomeComings, to act as Subservicers. For acting as Master Servicer to the 2007-EMX1 Transaction, RFC gained substantial additional compensation.

47. RFC also enriched Ally Financial and its subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the 2007-EMX1 Transaction: (i) HomeComings and GMACM gained fees servicing the Mortgage Loans; (ii) RASC, which established the 2007-EMX1 Trust and acted as depositor of the Mortgage Loans, charged fees to cover its operating expenses; and (iii) Ally Securities received fees for underwriting the 2007-EMX1 Certificates.

48. In 2000, GMAC-RFC entered into a strategic alliance with MLN under which it provided MLN with a warehouse lending facility and a revolving line of credit, whereby GMACM could make funds available to MLN in exchange for MLN's future volume of subprime mortgage originations. At the time of the alliance, GMACM's Director of Strategic Alliances and Acquisitions for GMAC-RFC, Marty McCormack, announced that "[b]y pairing

GMAC-RFC's access to capital markets with MLN's quality products, we can leverage both companies' strengths into a strong financing relationship."

49. In addition to the lending relationship, as further evidence of this strategic alliance, GMAC-RFC also received convertible debt of MLN, which created a further incentive to make MLN as profitable as possible regardless of the consequences to third parties, such as FGIC.

(3) Ally Financial, RFC, and GMACM Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

50. On September 2, 2011, the Federal Housing Finance Authority (the "FHFA"), as conservator for Freddie Mac, alleged fraud and state and federal securities laws violations against Ally Financial, ResCap, GMACM and RFC relating to the 2007-EMX1 Transaction, among others. On September 2, 2011, the FHFA filed suit in the Supreme Court of the State of New York, New York County ("New York Supreme Court") against various Ally Financial entities, for fraud, aiding and abetting fraud, and violating state and federal securities laws in connection with their roles in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in RMBS issued through twenty-one RFC-sponsored transactions, including the 2007-EMX1 Transaction.

51. The FHFA also alleges violations of state and federal securities laws by RFC, its parent, Ally Financial, and their affiliates. The violations stem from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, FHFA also alleges aiding and abetting fraud against Ally Financial and certain of its affiliates for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6

billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs. In October 2011, Ally Financial and its co-defendants removed the FHFA action to the United States District Court for the Southern District of New York.

52. In addition, RFC is currently facing a lawsuit brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court in which MBIA alleges that in various RMBS transactions, similar to the 2007-EMX1 Transaction, RFC affirmatively misrepresented the credit quality of tens of thousands of mortgage loans with an aggregate principal balance worth billions of dollars, as a means of unfairly shifting to investors and MBIA risks that RFC should have borne itself. On December 22, 2009, that court issued a ruling on RFC's motion to dismiss, which allowed both the breach of contract and the fraud claims, among others, to proceed to trial.

53. RFC's sister company, GMACM, is also currently facing a lawsuit brought by MBIA in New York Supreme Court for, among other things, fraud and breach of representations and warranties in connection with RMBS transactions. In December 2010, the New York Supreme Court rejected GMACM's motion to dismiss certain of the claims brought against it, allowing both the breach of contract and fraud claims, among others, to proceed.

54. DZ Bank AG also filed a summons with notice in New York Supreme Court on December 13, 2011, against Ally Financial, ResCap, RFC, RASC, and other Ally Financial subsidiaries for common-law fraud, fraudulent inducement, negligent misrepresentation, and aiding and abetting fraud, in connection with various RMBS transactions, including the 2007-EMX1 Transaction. The summons with notice alleges material misrepresentations and omissions regarding the standards used to underwrite, and key statistical characteristics of, the

Mortgage Loans in the 2007-EMX1 Transaction. The claims arise from DZ Bank AG's purchase of $289.8 million in securities issued by Ally Financial subsidiaries, including a portion of the 2007-EMX1 Certificates.

55. IKB Deutsche Industriebank AG also filed two summonses with notices in New York Supreme Court on December 16, 2011 and January 17, 2012, against Ally Financial, ResCap, RFC, and other Ally Financial subsidiaries for securities law violations, common law fraud, fraudulent inducement, and aiding and abetting fraud among others. The claims arise from the purchase of $14 million in securities underwritten and issued by Ally Financial subsidiaries in similar RMBS transactions.

56. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two suits in various jurisdictions pending against Ally Financial's mortgage-related business units and subsidiaries arising from numerous mortgage-backed securities offerings. The plaintiffs in those suits have alleged, among other things, that Ally Financial's various mortgage subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. *See* Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011). Further, in its 2011 annual report, Ally Financial stated that it expects additional similar claims to be brought against Ally Financial and/or its subsidiaries in the future. *See* Ally Fin. Inc., Annual Report (Form 10-K), at 20 (Feb. 28, 2011).

57. Since the filing of its November 2011 quarterly report, moreover, Ally Financial and its subsidiaries have been sued by additional plaintiffs, including HSH Nordbank AG, which

have alleged, among other things, material misrepresentations and omissions about the loans backing RMBS securities issued by Ally Financial's affiliates.

58. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. During 2011, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $265 million worth of mortgages related to securitizations it consummated between 2004 and 2007. Ally Financial evidently recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims, and, according to its own Securities and Exchange Commission ("SEC") filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Annual Report (Form 10-K), at 98 (Feb. 28, 2012).

59. Indeed, according to Ally Financial's 2011 annual report, Ally Financial, RFC's parent, also believes that "[t]he total exposure. . . to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008, specifically the 2006 and 2007 vintages that were originated and sold prior to enhanced underwriting standards and risk-mitigation actions implemented in 2008 and forward." Ally Fin. Inc., Annual Report (Form 10-K), at 224 (Feb. 28, 2012). The 2007-EMX1 Transaction is comprised of mostly Mortgage Loans originated in 2006.

60. Additionally, Ally Financial also disclosed that the SEC served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. Ally Fin. Inc., Amendment No. 3

to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

61. Furthermore, RFC's sister company GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." *Id.* (emphasis added).

(4) The Mortgage Loan Servicing Misconduct of Ally Financial and its Subsidiaries Has Come Under Scrutiny and Resulted in Severe Sanctions

62. On February 9, 2012, the Federal Reserve Board announced that Ally Financial, its subsidiaries, and several other mortgage loan servicers would be required to pay $766.5 million in monetary sanctions for "unsafe and unsound processes and practices in residential mortgage loans servicing and foreclosure processing." Press Release, Federal Reserve Board (February 9, 2011). On February 12, 2012, the Federal Reserve Board imposed well over $200 million of this fine against Ally Financial, ResCap, and GMACM pursuant to an Assessment Order, which requires that the sanctions be paid into various borrower assistance programs and nonprofit programs established to help victims of improper servicing and foreclosure practices. *See* Order of Assessment of a Civil Money Penalty Issued Upon Consent Pursuant to the Federal Deposit Insurance Act, as Amended, FRB Docket No. 12-006-CMP-HC (February 12, 2012) (the "Assessment Order"). According to the Federal Reserve Board, the sanction "takes into account the maximum amount prescribed for unsafe and unsound practices under the applicable statutory limits, the comparative severity of the institutions' misconduct, and the comparative sizes of the

institutions' foreclosure activities." *See* Press Release, Federal Reserve Board (February 9, 2011).

63. Furthermore, also on February 9, 2012, the U.S. Attorney General announced that Ally Financial will take part in a $25 billion settlement to resolve claims brought by the government in response to the "reckless and abusive mortgage practices" of Ally Financial and four similarly situated bank holding companies. *See* Eric Holder, U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012). Although the settlement releases Ally Financial from certain civil claims brought by the DOJ and multiple state attorneys general, *see id.*; National Mortgage Settlement Website, Settlement Documents > Servicing Standard Highlights, available at http://www.nationalmortgagesettlement.com/ (last visited Feb. 12, 2012), the settlement was not designed to resolve any other liabilities that Ally Financial has incurred through its improper origination, securitization, and servicing practices, *see id.*, About the Settlement, *available at* http://www.nationalmortgagesettlement.com/about (last visited Feb. 12, 2012).

64. According to the U.S. Attorney General, the $25 billion settlement and $766.5 million sanction are just "the latest step forward" in holding Ally Financial and others accountable for "egregious mortgage loan servicing abuses." *See* Attorney General Holder, Remarks at the Mortgage Servicers Settlement Press Conference.

65. Indeed, the New York Attorney General recently announced that his office will lead the new Residential Mortgage-Backed Securities Working Group, a component of the interagency Financial Fraud Enforcement Task Force, which is led by the DOJ. *See* Office of the New York Attorney General Website, *available at* http://www.ag.ny.gov/media_center/2012 /feb/feb9b_12.html; *see also* http://www.stopfraud.gov/docs/FFETF-Report-LR.pdf. According

to a statement by the New York Attorney General's Office, the Working Group's joint investigation "brings together the Department of Justice, several state law enforcement officials, and other federal agencies to investigate those responsible for misconduct contributing to the financial crisis through the pooling and sale of residential mortgage-backed securities [and builds] upon ongoing state and federal investigations, while also launching new ones." *See id.*

66. In addition to the recent $25 billion settlement and Assessment Order, the Federal Reserve Board and the Federal Deposit Insurance Corporation (the "FDIC") have previously ordered Ally Financial and several of its subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See* Consent Order, FRB Docket No. 11020-B-HC (April 13, 2011) (the "Consent Order").

67. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

68. Furthermore, under the Consent Order, Ally Financial must direct its mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id.* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [and to assess the performance of]

residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

69. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure processes of GMACM, one of the Subservicers of the 2007-EMX1 Transaction, to request an independent review of their files. *See* Press Release, Federal Reserve Board (November 1, 2011). This independent review will determine whether errors and misrepresentations in GMACM's foreclosure processes indeed caused financial harm to the borrower. *See id.* If the foreclosure process is found to have caused financial injury to the borrower, GMACM will then be required to provide full compensation. *See id.*

70. Pursuant to the Consent Order, Ally Financial and other bank holding companies will also now be required to adhere to new, heightened servicing standards. *See* Press Release, Federal Reserve Board (February 9, 2011). The Federal Reserve Board will require Ally Financial to remedy its servicing practices by, among other things, "strengthen[ing] the coordination of communications with borrowers by providing borrowers the name of the person at the service who is their primary point of contact, establish[ing] limits on foreclosures where loan modifications have been approved, establish[ing] robust third party vendor controls, strengthen[ing] compliance programs, and provid[ing] appropriate remediation to borrowers who suffered financial injury as a result of errors by the servicers." *See id.*

71. Moreover, the servicing and foreclosure improprieties of Ally Financial and its subsidiaries are a matter of public account. According to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan

Dep. *Federal National Mortgage Association v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Div Nine, No. Cumb.) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

72. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.* at 51:15-23. Stephan further testified that when he signed an affidavit affirming that the foreclosure was proper, all he knew was the borrower's name and whether he had signing authority for the GMAC entity foreclosing on the property. *Id.* at 62:23-25, 63:2-6. Stephan testified that the process he followed in signing summary judgment affidavits was in accordance with the policies and procedures required by GMACM. *Id.* at 64:8-14.

73. Additionally, in October 2010, the Ohio Attorney General filed suit against Ally Financial and its subsidiaries, alleging, among other things, that employees of Ally Financial subsidiaries had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See State of Ohio v. GMAC Mortgage LLC*, CI0201006984, Court of Common Pleas, Lucas County, Ohio (Toledo). Although some of the claims brought by this suit

may ultimately be resolved by the $25 billion multi-party settlement, other claims not encompassed by the settlement, including those relating to the improper assignment of mortgage notes, will likely survive. As of March 2012, the action remains pending.

74. Similarly, in December 2011, the Massachusetts Attorney General filed suit against GMACM for, among other things, engaging in unfair and deceptive foreclosure practices. *See Commonwealth of Massachusetts v. Bank of America NA*, 11-4363, Suffolk County Superior Court (Boston). Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial and GMACM for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Boston Globe, Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

Letter from Martha Coakley, Massachusetts Attorney General, to the Hon. Tim Johnson, Chairman, U.S. Senate Committee on Banking, Housing, and Urban Affairs, and the Hon. Spencer Bachus, Chairman, U.S. House Committee on Financial Services (Dec. 6, 2011).

75. While the $25 billion settlement ultimately resolved certain claims brought by the Massachusetts Attorney General in this action, several claims relating to improper foreclosure practices and abuse of certain state recordation systems have survived and will continue to be prosecuted. *See* Press Release, Office of the Attorney General of Massachusetts, *Massachusetts*

Homeowners to Receive $318 Million in Relief as Part of State-Federal Agreement Over Unlawful Foreclosures and Loan Servicing, Feb. 9, 2012.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and RFC

76. Since at least as far back as November 2011, Ally Financial has been considering filing for bankruptcy protection for ResCap, its wholly owned subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports, as of November 9, 2011. RFC is a wholly owned, indirect subsidiary of ResCap.

77. Around that time, the financial industry was "betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering." Bloomberg News, *Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance*, Nov. 14, 2011.

78. As the article notes, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy. *See id.*

79. Indeed, Ally Financial warned in its 2011 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 19 (Feb. 29, 2012).

80. That risk ultimately came to pass as Ally Financial recently disclosed that the penalties assessed by the federal government and numerous state attorneys general regarding the foreclosure practices of Ally Financial and its subsidiaries "resulted in our Mortgage operations recording a $230 million charge in the fourth quarter of 2011." *Id.* at 31. As Ally Financial detailed in its previous public filing, the "[t]he majority of [the charge] was recorded at Residential Capital, LLC ('ResCap') . . . [which] resulted in a covenant breach in certain of

ResCap's credit facilities." Ally Financial, Current Report (Form 8-K) (January 31, 2012). Indeed, as Ally Financial more recently explained, "ResCap is required to maintain consolidated net worth . . . of $250 million at the end of each month under the terms of certain of its credit facilities. . . [and] as a result of the fourth quarter charge, ResCap's consolidated net worth was $92 million at December 31, 2011." Ally Fin. Inc., Annual Report (Form 10-K), at 31-32 (Feb. 28, 2012). ResCap's substantial shortfall, however, was "immediately remediated by Ally through a capital contribution of $197 million, which was provided through forgiveness of intercompany debt during January 2012." *Id.*

81. Moreover, in February 2012, it was reported that Ally Financial had contacted buyout firms such as Fortress Investment Group LLC and Cerberus Capital Management LP regarding a potential sale of ResCap through a pre-packaged bankruptcy to be effectuated by the end of March as ResCap faces financing and liquidity deadlines. *See* Bloomberg Businessweek, *Ally's ResCap Said to Seek Buyers for Prearranged Bankruptcy*, Feb. 8, 2012.

82. According to the report, "[p]otential bidders are being told that a pre-packaged bankruptcy filing would allow the buyer to leave behind liabilities such as [RMBS] securitizations that have been the subject of litigation." *Id.* To that end, Ally Financial's CEO, Michael Carpenter, has stated that he will not pursue the aforementioned initial public offering for Ally Financial "until [these] legacy mortgage issues are resolved." *Id.* Nevertheless, a bondholder group representing holders of approximately $800 million in ResCap debt has expressed its desire to "fight [Ally Financial] tooth and nail" to oppose the bankruptcy, in part on the belief that "Ally [Financial] can't legally separate itself from ResCap because it has stripped assets from the unit." Bloomberg News, *Paulson, Tepper Said Among Investors Urging Ally to Back ResCap*, Jan. 10, 2012.

83. Indeed, as Ally Financial has pointedly noted in its most recent annual report; "In light of ResCap's liquidity and capital needs combined with volatile conditions in the marketplace, there is substantial doubt about ResCap's ability to continue as a going concern." Ally Fin. Inc., Annual Report (Form 10-K), at 18 (Feb. 28, 2012).

B. RFC's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

84. To improve the marketability and ratings of the RMBS Certificates issued as part of its securitizations, RFC from time to time sought credit enhancement for the RMBS Certificates from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. In some cases, such as the 2007-EMX1 Transaction, RFC sought FGIC's participation in transactions that were collateralized by mortgage loans originated by other lenders, such as MLN. RFC's sponsorship of such transactions, and the inducements provided by RFC in connection with such transactions, were critical to FGIC's willingness to issue its insurance policies with respect to the resulting RMBS Certificates.

85. Under the terms of a financial guaranty insurance policy like the one FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Certificates that, if there is a shortfall in cash available to it to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

86. For a trust that issues RMBS Certificates, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS

Certificates. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the loan pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS Certificate investors. Such shortfalls result in claims on FGIC's policy.

(2) Securitization Sponsor's Representations and Warranties

87. The risk FGIC assumes when it agrees to issue a policy for RMBS Certificates depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originator and the characteristics of the loans. If, for instance, a loan originator employs substandard underwriting practices, the underlying mortgage loans would be of inferior credit quality. Consequently, the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage portfolio as a whole, would be materially increased.

88. Accordingly, FGIC generally required securitization sponsors like RFC to provide substantial representations and warranties about the underlying mortgage loans, including representations about the standards and procedures used to underwrite the loans and the characteristics of the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to monthly income ("DTI ratio"), the ratio of the mortgage loan principal balance to the value of the mortgaged property at origination—plus, in the case of a junior lien Mortgage Loan, the principal balance of the senior Mortgage Loan on the related mortgaged property ("LTV ratio"), the borrower's credit score ("FICO score"), and the credit grade of the loan according to RFC's grading system ("Credit Grade"). Even where, as here, RFC did not originate the loans at issue, it nonetheless is typically required to make representations about those loans, thereby assuming the risk that those representations might not be accurate. RFC's

representations and warranties were intended to allow FGIC to assess the credit risk inherent in the mortgage Loan Pool before deciding to commit to the transaction.

C. The RASC 2007-EMX1 Transaction

89. In late 2006, RFC began to put together the 2007-EMX1 Transaction. RFC had, at that time, a long-standing relationship with MLN, having sponsored prior transactions collateralized by MLN-originated mortgage loans. As part of that relationship RFC maintained a warehouse lending facility for the purpose of financing MLN's mortgage loan originations in anticipation of securitization by RFC of such loans.

90. On information and belief, at the time of MLN's bankruptcy RFC held tens of millions of dollars in aggregate principal amount of MLN-originated mortgage loans pursuant to such warehouse lending facility. RFC was unable to sell the mortgage loans on the open market without taking an unacceptable loss on the sale. RFC was able to dispose of such loans, however, by arranging an RFC-sponsored securitization collateralized by those loans—the 2007-EMX1 Transaction.

91. MLN sold the Mortgage Loans that comprised the 2007-EMX1 Transaction to Emax, which in turn sold the Mortgage Loans to RFC. In the securitization, RFC pooled those Mortgage Loans, and deposited them in the 2007-EMX1 Trust (via RASC). The trust then issued $692,852,000 aggregate principal amount of Class A Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2007-EMX1. The 2007-EMX1 Certificates consisted of five classes of senior certificates, all of which were insured by FGIC.

92. The 2007-EMX1 Trust contains two groups of Mortgage Loans (respectively, the "2007-EMX1 Group I Loans" and the "2007-EMX1 Group II Loans"). The 2007-EMX1 Group I Loans consist of 2,084 fixed-rate and adjustable-rate first-lien and junior-lien mortgage loans

having an outstanding principal balance of more than $395 million. The 2007-EMX1 Group II Loans are comprised of 1,967 fixed-rate and adjustable-rate first-lien and junior-lien mortgage loans having an outstanding aggregate principal balance of more than $353 million. The Mortgage Loans were purportedly acquired and evaluated by RFC under its "AlterNet" program (the "AlterNet Program") or the credit grades as described in the Prospectus Supplement.

93. To enhance the ratings and marketability of the 2007-EMX1 Certificates, RFC sought a financial guaranty insurance policy from FGIC for the purpose of insuring the Transaction for the benefit of the certificate holders. On March 12, 2007, FGIC and RFC executed an Insurance and Indemnity Agreement (the "I&I Agreement"), under which FGIC agreed to issue a financial guaranty insurance policy to insure the 2007-EMX1 Certificates, and FGIC accordingly issued its policy number 07030010. The I&I Agreement was signed by FGIC (the "Insurer" for the Transaction); RFC (the "Seller" and Master Servicer for the Transaction); RASC (the "Depositor" for the Transaction); and U.S. Bank (the "Trustee" for the Transaction).

94. The I&I Agreement provides that FGIC is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." The "Operative Documents" are defined to include, among other documents: (i) the 2007-EMX1 Certificates; (ii) the Pooling and Servicing Agreement, dated as of February 1, 2007, among RFC, RASC, and U.S. Bank (the "PSA"); and (iii) the Assignment and Assumption Agreement, dated as of March 12, 2007, between RFC and RASC (the "A&A Agreement"). The PSA also provides that FGIC (the Certificate Insurer) "is an express third-party beneficiary of [the PSA]."

95. The Policy improved the marketability of the 2007-EMX1 Certificates by mitigating risk for potential investors and making the 2007-EMX1 Certificates eligible to receive an initial credit rating of triple-A by the rating agencies at closing.

96. RFC and the Depositor offered the 2007-EMX1 Certificates for sale pursuant to a prospectus, dated December 6, 2006 (the "Prospectus"), and a prospectus supplement, dated March 8, 2007 (the "Prospectus Supplement"), touting the Policy and the triple-A initial rating of the 2007-EMX1 Certificates made possible by the Policy. The Prospectus and the Prospectus Supplement, together with certain preliminary Offering Documents, each as further supplemented by any subsequent amendment or supplement thereto, and any other Offering Documents that makes reference to the Policy, are referred to collectively as the "Offering Documents."

97. On March 12, 2007, an Ally Financial subsidiary, Ally Securities, and Credit Suisse (the other underwriter for the 2007-EMX1 Transaction), purchased from the 2007-EMX1 Trust and sold to investors the 2007-EMX1 Certificates, and FGIC issued the Policy in accordance with the terms of the I&I Agreement.

D. RFC Fraudulently Induces FGIC to Insure the 2007-EMX1 Certificates with Substantial Assistance from Ally Financial

(1) RFC's Fraudulent Inducement of FGIC

98. FGIC's participation in the 2007-EMX1 Transaction was an essential component of the 2007-EMX1 Transaction and enhanced RFC's ability to market the securitization effectively. On information and belief, RFC had been unable to execute a securitization of the Mortgage Loans on an unwrapped basis, due to the provenance of the Mortgage Loans. The Policy allowed RFC to sell the 2007-EMX1 Certificates with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

99. In order to induce FGIC to write financial guaranty insurance for the 2007-EMX1 Transaction, RFC provided to FGIC, directly or indirectly, a variety of information and covenants, which comprised several features that were specifically required by FGIC in order to

induce it to enter into a transaction based on loans originated by MLN, which at that time had already filed for bankruptcy.

100. First and foremost, RFC provided to FGIC the initial and final Prospectus Supplements, which summarized, among other material information, the credit quality and characteristics of the Mortgage Loans, and RFC's loan underwriting guidelines.

101. Second, RFC provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in the 2007-EMX1 Transaction, together with representations regarding material statistics about the Loan Pool.

102. Third, RFC provided to FGIC credit ratings for the 2007-EMX1 Certificates determined without considering the effect of the Policy. These ratings, which RFC procured from the credit rating agencies, are known as "shadow ratings."

103. Fourth, RFC provided FGIC with an express representation that there was no fraud in the origination of the Mortgage Loans.

104. Fifth, as discussed in detail in Section E, RFC provided representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreement regarding the Mortgage Loans specifically and the Loan Pool generally. These covenants included, among other things, representations that the Mortgage Loans would be "seasoned" (*i.e.*, that they were originated at least four months before the closing date), and that RFC would itself service the Mortgage Loans, through its HomeComings and GMACM affiliates as Subservicers.

105. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the 2007-EMX1 Certificates, FGIC relied in part upon representations and warranties regarding RFC's loan underwriting standards made by RFC in the Prospectus and

Prospectus Supplement. A Preliminary Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about March 8, 2007, in an email sent by Jeffrey Wittenberg on behalf of RFC. The Prospectus, as supplemented by the Prospectus Supplement, was filed with the SEC on March 9, 2007. The Final Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about March 9, 2007, in an email sent by John Farmer on RFC's behalf.

106. The Prospectus Supplement set forth, among other information, the following important characteristics of the Loan Pool: the ranges of and weighted average FICO scores and Credit Grades, the ranges of and weighted average LTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (i.e., whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). Prospectus Supplement at II-25 – II-37.

107. RFC publishes its loan underwriting standards in a document the Prospectus refers to as "Residential Funding Company, LLC's Client Guide" as modified from time to time (the "Client Guide"). In general, the Client Guide specifies documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan or line of credit. Depending upon the particular type of loan or line of credit, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories, and/or evidence of closing funds, among other things. RFC disclosed additional data relevant to the AlterNet Program to FGIC. In particular, RFC provided FGIC with the AlterNet Program.

108. The Prospectus Supplement and Prospectus Supplement also include substantive criteria for eligibility addressing material characteristics of a proposed loan, such as DTI ratios, LTV ratios, occupancy status, and Credit Grades.

109. In particular, RFC represented in the Offering Documents that only one of the Mortgage Loans had been originated with a maximum monthly DTI ratio of greater than 55% (0.02% of the Loan Pool); furthermore, RFC represented that the Mortgage Loans had a maximum LTV ratio of 100%. *See* Prospectus Supplement at II-28, II-37. Moreover, with respect to at least 80.55% of the Mortgage Loans, RFC represented that the maximum DTI ratio was 50%, and the maximum LTV ratio for 82.02% of the Mortgage Loans was 95%. *See id.*

110. RFC also represented in the Prospectus Supplement that 92.72% of the Mortgage Loans would be owner-occupied. Prospectus Supplement at II-6. The A&A Agreement further indicated that "[a]pproximately 91.8% and 93.8% of the Mortgage Properties related to the Group I Loans and the Group II Loans, respectively, are secured by the owner's primary residence." A&A Agreement § 4(xxiii); *see also* Prospectus Supplement at II-7, II-19.

111. ***Loan Tape.*** RFC sent via email a final loan tape to FGIC on February 21, 2007. The loan tape provided by RFC set forth, for each Mortgage Loan, key characteristics such as the borrower's FICO score, Credit Grade, DTI ratio, the LTV ratio and for each Mortgage Loan. RFC also disclosed in the Prospectus Supplement, with respect to the pool as a whole, aggregate characteristics relevant to the assessment of the credit risk of the Loan Pool, including FICO scores, Credit Grades, DTI ratios and LTV ratios.

112. ***Shadow Rating Letters***. RFC, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. Based on the information supplied by RFC, Moody's assessed the credit quality of the loan pool and

assigned a shadow rating of A2 to the 2007-EMX1 Certificates, while S&P assigned the 2007-EMX1 Certificates a shadow rating of BBB. These shadow ratings met FGIC's minimum requirements. FGIC required these shadow ratings as an essential condition to its willingness to insure the 2007-EMX1 Transaction.

113. ***No Fraud in the Origination of the Mortgage Loans.*** MLN had filed for bankruptcy on February 5, 2007. Accordingly, as an additional inducement to FGIC, and in order to persuade FGIC to enter into a transaction based on MLN-originated mortgage loans, RFC offered to provide a representation that there was no fraud in the origination of the Mortgage Loans. Although RFC indicated its strong preference to not give a fraud representation or put a fraud representation in public agreements, it ultimately agreed to do so. RFC represented in the A&A Agreement that "[n]o fraud or misrepresentation has taken place in connection with the origination of any Mortgage Loan." § 4(lx).

(2) RFC's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

114. Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to participate in the 2007-EMX1 Transaction and, ultimately, issue the Policy. Ally Financial knew that the Mortgage Loans underlying the 2007-EMX1 Transaction were of a substantially poorer quality than was represented to FGIC and other participants in the Transaction, including investors. Ally Financial further knew that the Mortgage Loans were not underwritten to the standards represented in the Offering Documents and warranted in the Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap and its other subsidiaries, Ally Financial knew that the representations and warranties RFC made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

115. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to finance, support, and engender investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

116. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

117. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Exhibit 99.1.

118. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

119. Ally Financial's corporate restructuring also allowed RFC to explicitly represent and warrant to FGIC in the I&I Agreement that RFC "is solvent, and will not be rendered

insolvent by the Transaction. . . . [RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." I&I Agreement § 2.01(xiii). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary RFC.

120. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the 2007-EMX1 Transactions—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

121. Moreover, as a result of its domination and control over ResCap and RFC, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of RFC's representations and warranties to FGIC—and that they were untrue when stated. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including RFC, shared numerous directors and senior management as well.

122. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, and RFC, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by RFC was shared among and between RFC and its parent ResCap, as well as ResCap and its parent Ally Financial. Indeed, at least one Ally Financial employee who was involved in the 2007-EMX1 Transaction appeared on the Transaction's working group list and received all distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

123. Another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, including RFC and RASC, is David C. Walker. Walker joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. In September 2005, shortly before the closing of the 2007-EMX1 Transaction, Walker was a director at ResCap, GMACM, RFC, and RASC, among other ResCap subsidiaries. In the 2007-EMX1 Transaction, acting as a director of RASC, Walker was a signatory to both RASC's and RFC's "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors." Both documents were dated December 20, 2005. Both of these documents were included in the closing documents of the 2007-EMX1 Transaction.

124. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to RFC in fraudulently inducing FGIC to participate in the Transaction and issue the Policy. Further, the issuance of the Policy, which made the

2007-EMX1 Transaction possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. RFC's Representations, Warranties, and Affirmative Covenants

125. In connection with the 2007-EMX1 Transaction, RFC, at the direction of Ally Financial, either directly or indirectly through ResCap, made numerous representations, warranties, and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way the loans were selected and evaluated, the characteristics of the Mortgage Loans, and the accuracy of the information supplied to FGIC. RFC also promised to provide timely Mortgage Loan file information and to provide FGIC with a variety of information, including access to RFC's books and records and to RFC's Servicing Officer and its independent accountants.

126. RFC's representation, among others, that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into the 2007-EMX1 Transaction and to issue the Policy. Further, the I&I Agreement's incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and every one of the representations and warranties that RFC made in connection with the 2007-EMX1 Transaction.

127. FGIC, for its part, reasonably relied on the information available to it regarding the underlying Mortgage Loans and the representations and warranties provided by RFC. Since FGIC had neither the right nor duty under the Operative Documents, nor the practical ability, to review the thousands of underlying Mortgage Loan files in the days available to it prior to the closing of the 2007-EMX1 Transaction, RFC knew that FGIC had no choice but to rely on RFC's representations regarding the underlying Mortgage Loans in determining whether to issue

the Policy. Further, FGIC had no reason to believe that these representations were not true and accurate.

128. RFC included 4,051 individual Mortgage Loans in the 2007-EMX1 Trust. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation, and other forms of documentation necessary to support underwriting decisions. Unlike RFC, FGIC was under no contractual duty whatsoever to review the Mortgage Loans. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by RFC regarding its evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on the fact that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

129. Based on the information received by FGIC and the representations and warranties given by RFC, FGIC entered into the I&I Agreement and agreed to issue the Policy to the Trustee for the benefit of the holders of the 2007-EMX1 Certificates. In return for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the 2007-EMX1 Certificates, commensurate with the risk FGIC thought it was taking. Specifically, FGIC received 0.20% per annum of the aggregate balance of the 2007-EMX1 Certificates for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties, and affirmative covenants provided by RFC.

130. RFC's information, representations, and warranties were materially false when disclosed and/or provided by RFC. RFC knew that this information, and its representations and

warranties, were materially false when made. RFC also knew that this information and the representations and warranties were essential to FGIC's decision to issue the Policy. Indeed, RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and issue the Policy. The issuance by FGIC of the Policy—induced by RFC's fraudulent misrepresentations and substantial assistance of Ally Financial—made the 2007-EMX1 Certificates eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(1) Representations, Warranties, and Affirmative Covenants Relating to the Operative and Offering Documents

131. Under Section 2.01(a) of the I&I Agreement, RFC made the following representations and warranties, among others (emphasis added in each case):

- *Accuracy of Information*. **None of the Operative Documents nor any other material information relating to the Mortgage Loans**, the operations of RFC . . . or the financial condition of RFC . . . furnished to [FGIC] . . . by RFC . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made**. [RFC] has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change. . . Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to RFC . . . that would render any of the Documents untrue or misleading in any material respect. § (x).

- *Compliance with Securities Laws*. The offering and sale of the [2007-EMX1] Certificates complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading** . . . . § (xi).

- *Operative Documents*. **Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects** . . . . § (xii).

- *Solvency; Fraudulent Conveyance*. [RFC] is solvent, and will not be rendered insolvent by the Transaction. . . . **[RFC] shall not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**. [RFC] does not intend to incur, and does not believe that it has incurred, debts beyond its ability to pay as

> they mature. . . . [RFC] is not entering into the Operative Documents, or transferring any of its assets in connection with the Transaction, with any intent to hinder, delay or defraud any of its creditors. § (xiii).

132. *First*, in the I&I Agreement, RFC represented and warranted that "[n]one of the Operative Documents nor any other material information relating to the Mortgage Loans, the operations of RFC . . . or the financial condition of RFC . . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." I&I Agreement § 2.01(a)(x). Through these Operative and Offering Documents, as detailed above, RFC communicated several material facts about the characteristics of the mortgage loans sold to the 2007-EMX1 Trust.

133. *Second*, in the I&I Agreement, RFC also represented and warranted that the "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading." I&I Agreement § 2.01(a)(xi). As discussed above, in the Prospectus Supplement, RFC represented that the Mortgage Loans sold to the 2007-EMX1 Trust had been evaluated in conformity with RFC's underwriting standards.

134. *Third*, the I&I Agreement incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the respective related Operative Documents: "Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects . . . ." I&I Agreement § 2.01(a)(xii). The incorporation by reference of the Operative Documents into the I&I Agreement was intended to allow FGIC to rely on any representation and warranty that RFC made to other entities, such as investors or the Trustee, in connection with the 2007-EMX1

Transaction. Indeed, the I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. I&I Agreement § 2.02(k).

135. Such representations and warranties included the representation that there was no fraud or misrepresentation in connection with the origination of the Mortgage Loans.

136. *Fourth*, RFC also provided information to FGIC concerning the Mortgage Loans in the 2007-EMX1 Transaction. *See* I&I Agreement § 2.02(c)(iii). This information included a schedule (or "loan tape") that set forth statistics about the Loan Pool. The loan tape purported to describe key characteristics relevant to the assessment of risk, including DTI ratios, LTV ratios, occupancy status, Credit Grades, and FICO scores. *See* PSA § 1.01. On information and belief, the loan tape FGIC received at closing contains the same information as is contained in the Mortgage Loan Schedule, referred to in Section 4(xv) of the A&A Agreement. In turn, in the A&A Agreement, RFC represented that all the information in that schedule "is true and correct in all material respects as of the date or dates which such information is furnished." § 4(xv).

137. As a result of incorporating into the I&I Agreement the representations and warranties in the related Operative Documents, RFC incorporated representations and warranties regarding the underwriting of the Mortgage Loans included in the 2007-EMX1 Transaction. These representations and warranties set forth the standards governing each Mortgage Loan, including, significantly, the representation that each Mortgage Loan had been underwritten in compliance with RFC's own underwriting guidelines.

138. In particular, in the A&A Agreement, RFC represented and warranted as the Mortgage Loans:

- **No Fraud in the Origination**: "No fraud or misrepresentation has taken place in connection with the origination of any Mortgage Loan." § 4(lx).

- **Information in Mortgage Loan Schedule**: "The information set forth on the Mortgage Loan Schedule with respect to each Mortgage Loan is true and correct in all material respects as of the date or dates which such information is furnished." § 4(xv).

- **No Material Breach Or Default**: "[T]here is no default, breach, violation or event of acceleration existing under any Mortgage Note or Mortgage and no event which, with notice and expiration of any grace or cure period, would constitute a default, breach, violation or event of acceleration, and no such default, breach, violation or event of acceleration has been waived by RFC or by any other entity involved in originating or servicing a Mortgage Loan." § 4(xxviii).

- **LTV Ratio**: "The weighted average [LTV] Ratios with respect to the Group I Loans, and the Group II Loans, in each case by outstanding principal balance at origination, are 84.1% and 83.8%, respectively." § 4(xviii).

- **Delinquent Loans**: "None of the Group I Loans are 30 [or more] days Delinquent in payment of principal and interest. . . . None of the Group II Loans have been a maximum of 30 or more days Delinquent in payment of principal or interest in the last 12 months." § 4(xvi).

- **Credit Grades**: "No more than 49.5% of the Group I Loans [and 51.4% of the Group II Loans] have been classified by RFC as Credit Grade A4 Mortgage Loans, no more than 33.6% of the Group I Loans [and 31.7% of the Group II Loans] have been classified by RFC as Credit Grade A5 Mortgage Loans, no more than 8.1% of the Group I Loans [and 8.8% of the Group II Loans] have been classified by RFC as Credit Grade AX Mortgage Loans, no more than 5.4% of the Group I Loans [and 4.3% of the Group II Loans] have been classified by RFC as Credit Grade AM Mortgage Loans, no more than 1.6% of the Group I Loans [and 2.0% of the Group II Loans] have been classified by RFC as Credit Grade B Mortgage Loans and no more than 2.1% of the Group I Loans [and 2.2% of the Group II Loans] have been classified by RFC as Credit Grade C Mortgage Loans, in each case as described generally in the Prospectus Supplement." §§ 4(xxx), 4(xxxi).

- **Occupancy Status**: "Approximately 91.8% and 93.8% of the Mortgaged Properties related to the Group I Loans and the Group II Loans, respectively, are secured by the owner's primary residence." § 4(xxiii).

- **The Originator Considered the Borrower's Ability to Repay**: "The originator of the Group II Loans adequately considered the borrower's ability to make payments by employing underwriting techniques that considered a variety of factors, such as: the borrower's income, assets and liabilities, and not solely the collateral value, in deciding to extend the credit at the time of origination." § 4(liii).

- **Residence is Borrower's Principal Residence**: "With respect to any Group II Loan that is a subordinate lien mortgage loan: (i) such lien is a one- to four-family residence that is the principal residence of the borrower. . . ." § 4(lvii).

139. Moreover, in the I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—RFC specifically covenants that it "shall comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreement §§ 2.02(a), 2.02(k).

140. RFC also agreed that it had to receive FGIC's consent before modifying or amending any of the Operative Documents. The I&I Agreement provides, that RFC will not "modify, waive or amend, or consent to any modification, waiver or amendment of, any of the terms, provisions or conditions of the Operative Documents to which it is a party . . . without the prior written consent of [FGIC], which consent shall not be unreasonably withheld, conditioned or delayed." § 2.03(b).

(2) Representations, Warranties and Affirmative Covenants Regarding Servicing and Access to Information

141. In addition to the representations and warranties referenced above, the I&I Agreement provides that RFC has the contractual obligation, as Master Servicer, to service the Mortgage Loans in compliance with the PSA and to provide FGIC with access to the underlying Mortgage Loans and servicing notes, and as Seller, to procure custodial interim certifications stating that all mortgage files were complete and properly transferred into the appropriate trust ("Interim Certification"). Specifically, the I&I Agreement provides:

- *Other Information.* (A) Promptly upon request, such other data as [FGIC] may reasonably request relating to the Mortgage Loans, the servicing of the Mortgage Loans . . . the Transaction or the ability of any of RFC. . . to perform its obligations under the Operative Documents, and (B) all information required to be furnished to the Trustee or the Holders, as the case may be. § 2.02(c)(v).

- *Access to Records; Discussions with Officers and Accountants.* On an annual basis, or at any time when a Material Adverse Change shall have occurred and be continuing, *upon the reasonable request of [FGIC], [RFC] will permit [FGIC] or its authorized agents, or cause [FGIC] or its authorized agents to be permitted* . . . to inspect the books and records of RFC . . . . to discuss the affairs, finances and accounts of RFC . . . as they relate to the Mortgage Loans, the Transaction or the ability to perform [its] obligations under the Operative Documents with a Servicing Officer . . . [and] if [FGIC] reasonably believes that a Material Adverse Change may have occurred and with RFC's consent, which consent shall not be unreasonably withheld or delayed, to discuss the affairs, finances and accounts of RFC . . . with the independent accountants of such Person; provided, however, that officers of RFC shall have the right to be present during such discussions. In addition, if requested by [FGIC], on an annual basis, or otherwise when reasonably requested by [FGIC], RFC will . . . cause the Custodian to deliver to [FGIC] an updated certification, in the form of the "Interim Certification" required under the Custody Agreement, with an exceptions list attached thereto, to enable [FGIC] to track the progress of recording of Mortgages and Assignments with respect to the Mortgage Loans. § 2.02(e) (emphasis added).

- *Servicing of Mortgage Loans.* All Mortgage Loans will be serviced in all material respects in compliance with the [PSA]. § 2.02(l).

- *Due Diligence.* If in [FGIC's] reasonable judgment circumstances so warrant, based on the performance of the Transaction, [FGIC] shall have the right, so long as the [2007-EMX1] Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices, at [FGIC]'s expense and in reasonable manner convenient to both RFC and [FGIC]. This due diligence right is in addition to the access provided and the other rights provided for in Section 2.02(e) of this Insurance Agreement. § 2.02(m).

F. RFC's Breaches of Its Representations, Warranties, and Affirmative Covenants

142. As discussed above, FGIC relied on material representations and warranties made by RFC regarding the manner in which the Mortgage Loans were selected and evaluated, the characteristics of those loans, and the accuracy and completeness of information RFC supplied to FGIC. Based on those representations and warranties, FGIC agreed to issue the Policy. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed above, the risk that FGIC assumed when it issued the Policy was many times greater than the risk disclosed by

RFC's representations and warranties. RFC breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

143. The 2007-EMX1 Transaction has performed poorly; delinquencies and defaults for Mortgage Loans in the 2007-EMX1 Transaction have been substantial. As of January 2012, a total of 2,828 Mortgage Loans, representing 73.4% of the Mortgage Loans underlying the 2007-EMX1 Transaction, had posted a loss or were severely delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue the Policy, RFC assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with RFC's representations and warranties.

144. The poor performance of the Mortgage Loans has reduced the cash flow to the 2007-EMX1 Trust, which has caused and will continue to cause claims to be presented to FGIC under the Policy to cover these shortfalls. Indeed, as of February 2012, more than $26.9 million in claims had been presented to FGIC in connection with the 2007-EMX1 Transaction. FGIC expects tens of millions of dollars more in claims to be presented to it under the 2007-EMX1 Transaction in the future.

(1) RFC's Denial of Loan File Requests

145. As the 2007-EMX1 Transaction continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blaschko, an RFC/ResCap employee, via e-mail demanding that RFC provide 367 of the Mortgage Loan files. Having received no response from RFC to its earlier requests, FGIC sent a follow-up e-mail on February 3, 2011 regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On

information and belief, the request required authorization from officers at Ally Financial, and RFC/ResCap's response was directed by officers at Ally Financial.

146. On February 14, 2011, and again on April 26, 2011, FGIC sent further follow-up letters requesting loan files.

147. In finally responding to FGIC's request for information, RFC refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans"). Instead, it only provided FGIC with a portion of the requested loan files, consisting solely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

148. Pursuant to the PSA and the I&I Agreement, FGIC is entitled to reasonable access to the documentation regarding all of the Mortgage Loans. Section 2.02(m) of the I&I Agreement provides that FGIC "shall have the right, so long as the [2007-EMX1] Certificates remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans, [and] to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans . . . ." Notably, there is no limitation in the I&I Agreement as to the nature of the Mortgage Loan files that are subject to review. Further, Section 2.02(c)(v) of the I&I Agreement states that "[p]romptly upon request," RFC must provide to FGIC "such other data as [FGIC] may reasonably request relating to the Mortgage Loans . . . ."

149. By producing only non-performing Mortgage Loan files, in contravention of the I&I Agreement, RFC has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files.

(2) RFC's Denial of Interim Certification Requests

150. On February 24, 2011, FGIC demanded, pursuant to Section 2.02(e) of the I&I Agreement, that RFC promptly cause the Custodian of the 2007-EMX1 Transaction to deliver to

FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement for the Transaction, with an exceptions list attached thereto. An Interim Certification would enable FGIC to track the progress of the recording of mortgages and assignments with respect to the related Mortgage Loans.

151. Again on May 24, 2011, FGIC wrote RFC demanding the Interim Certification, noting that its prior request dated February 24, 2011—three months earlier—had gone unanswered.

152. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to these requests.

(3) RFC's Denial of Servicing Notes

153. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(iv) of the I&I Agreement, that RFC furnish or cause to furnish the servicing notes for the Mortgage Loans.

154. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to requests for servicing notes.

(4) RFC's Denial of FGIC's Access To Books and Records, Servicing Officer, and RFC's Independent Accountants

155. On December 8, 2011, in accordance with its express rights under Sections 2.02(e)(i)-(ii) of the I&I Agreement, FGIC requested to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances, and accounts of RFC with the Servicing Officer of RFC; and (iii) discuss the affairs, finances, and accounts of RFC with RFC's independent accountants.

156. To date, RFC has failed to respond to this request, in violation of the I&I Agreement.

(5) Breaches Uncovered In Loan File Reviews

157. When FGIC became concerned about the high delinquencies and default rates in the 2007-EMX1 Transaction, FGIC requested that RFC provide it with certain Mortgage Loan files in the Loan Pool. FGIC selected for review 1,188 non-performing (i.e., non-current or charged-off) loans that had resulted in a loss to the 2007-EMX1 Trust. To perform this review, FGIC hired an independent outside consultant with particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

158. That review revealed that RFC had breached one or more material representations and warranties in 795 of the 1,062 loans, or approximately 75% of the Mortgage Loans initially reviewed. As a result, FGIC requested that RFC repurchase those Mortgage Loans because they were non-conforming. RFC agreed with FGIC's identification of various breaches with regard to approximately 40% of those Mortgage Loans.

159. As discussed above, in 2010 FGIC randomly selected 500 Mortgage Loans. Of those Mortgage Loans, FGIC found that it already possessed loan files for 133 of them so FGIC requested the additional 367 Mortgage Loan files from RFC. When RFC finally responded to FGIC's multiple requests, RFC improperly refused to provide FGIC with any Mortgage Loan files for loans RFC deemed to be Performing Loans. Thus, of the 367 Mortgage Loan files FGIC requested, FGIC received only 140 Mortgage Loan files to review.

160. After receiving the additional Mortgage Loan files, FGIC evaluated them to determine whether they contained material breaches of the 2007-EMX1 Operative Documents necessitating repurchase under the related Operative Documents. To perform this review, FGIC once again engaged an independent outside consultant, having particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

161. The independent consultant's review revealed that over 86% of the Mortgage Loans that were reviewed contained breaches of the representations and warranties in the Operative Documents, including the I&I Agreement.

162. A small sample of these material breaches and underwriting violations are listed below:

- Loan Number 10755392: The borrower provided a stated monthly income of $9,200 a head chef for a diner, but information provided by the borrower for loan modification in 2009 indicated that the borrower was working 30 hours per week as a cook for the same diner for $7.50 per hour (approximately $975 per month). It is unlikely that the borrower earned a tenth as much income in 2009 as he did in 2006, when the loan was originated. Based on the 2009 income, the DTI ratio for the loan is 399.44%, well in excess of the maximum allowable DTI ratio of 55%.

- Loan Number 10754554: Among other defects, the borrower did not disclose two additional mortgages that were closed prior to the subject loan, in the amounts of $217,520 and $54,380, respectively. As a result, the loan had a significantly higher DTI ratio than what was disclosed to FGIC. The borrower's self-employment also was not verified and therefore was not eligible for financing.

- Loan Number 10776558: Among other defects, the borrower did not disclose a prior mortgage in the amount of $222,300 secured by the same property. Therefore the DTI ratio was 67.46% instead of 39.42% as represented in the Mortgage Loan Schedule. Additionally, salary data and business earning information indicate that the borrower vastly overstated his monthly income. Using a more reliable income figure, and combined with the undisclosed mortgage, further increased the DTI ratio to 143.66%. The AlterNet [Program] indicated the maximum allowable DTI ratio was 50% and up to 55% with two months reserves or $1,500 residual income.

These examples of underwriting violations—but a small smattering of the extensive defects among the Mortgage Loans—evidence significant breaches of the Operative Documents for the 2007-EMX1 Transaction.

163. Following the discovery of these high defect rates, and pursuant to the I&I Agreement and the A&A Agreement, FGIC demanded that RFC repurchase the non-compliant Mortgage Loans discovered during its repurchase review. RFC has expressly refused to

repurchase a significant number of non-conforming Mortgage Loans or replace them with conforming Mortgage Loans. This failure constitutes a material breach of the I&I Agreement and Operative Documents incorporated therein.

164. Moreover, RFC's responses in connection with FGIC's loan file review indicate that RFC was aware that the representations and warranties it provided FGIC were not truthful. For example, RFC has admitted to FGIC that the information RFC provided to FGIC via the loan tape was not accurate. In response to FGIC's repurchase requests, RFC stated that repurchase was not required because under the Prospectus, only "substantial compliance" with underwriting standards was required. RFC's response is an admission that the loan tape, which indicated the borrower's assets had been verified, was not accurate—a breach of Section 2.01(x) of the I&I Agreement.

(6) Breaches Uncovered Using Loan Pool Data

165. In addition to the loan-level review discussed above, FGIC commissioned an independent consultant—a leading provider of financial, property, and consumer information, such as property valuation services using automated property valuation tools—to test the accuracy of RFC's representations and warranties relating to the Mortgage Loans regarding occupancy status and LTV ratios. The consultant extracted information and data relating to 3,558 Mortgage Loans.

a. Breaches of Owner-Occupancy Representation and Warranty

166. RFC represented in the A&A Agreement and the Prospectus Supplement that approximately 91.8% of the Group I Loans and 93.8% of the Group II Loans—92.7% of all Mortgage Loans—would be secured by the borrower's primary residence. A&A Agreement § 4(xxiii); Prospectus Supplement at II-7, II-19, II-31.

167. Based on the information provided by RFC, FGIC determined that only 78% of the Mortgage Loans were owner-occupied properties.

168. The A&A Agreement and the Prospectus Supplement therefore materially overstated the percentage of Mortgage Loans in their respective pools that were owner-occupied as a primary residence. As such, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

169. FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that, as of January 2012 were delinquent for more than 60 days, in foreclosure, liquidated, or have posted a loss) in the 2007-EMX1 Transaction for loans that were determined after review to be non owner-occupied was approximately 74.7%.

b. Breaches of LTV Ratio Representation and Warranty

170. The Prospectus Supplement also provided information relating to the LTV ratios of the underlying Mortgage Loans.

171. LTV information provided in the Prospectus Supplement provided that the loans had generally been originated with a maximum LTV ratio of 100%. *See* Prospectus Supplement at II-28. LTV information provided in the Prospectus Supplement included (1) the average weighted LTV ratio for the Mortgage Loans, and (2) the number and aggregate value of the Mortgage Loans with LTV ratios in a given percentage band (e.g., the number of Mortgage Loans with LTV ratios of between 80% and 85%, between 85% and 90%, and so on). Prospectus Supplement at II-28. The Prospectus Supplement reported that *none* of Mortgage Loans had a LTV ratio over 100 percent. *See* Prospectus Supplement at II-28.

172. Using an industry standard automated valuation model to calculate the value of the underlying property at the time the Mortgage Loan was originated, FGIC determined that

approximately 19% of the aggregate principal balance of the Mortgage Loans—as opposed to *none* of the loans, as reported in the Prospectus Supplement—had an original LTV ratio above 100%. FGIC also determined that approximately 30% of the aggregate principal balance of the Mortgage Loans—as opposed to fewer than 18%, as reported in the Prospectus Supplement—had an original LTV ratio above 95%. In addition, RFC represented in the A&A Agreement that the weighted average LTV ratio of the Group I Loans and Group II Loans at origination were 84.1% and 83.8%, respectively. *See* A&A Agreement § 2.02(xviii). However, FGIC determined that the actual weighted average LTV ratio of the aggregate principal balance of the Mortgage Loans at origination was approximately 91.1% for Group I Loans and 90.3% for Group II Loans. Thus, RFC breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact, as well as its representations regarding weighted average LTV in the A&A Agreement.

173. Moreover, FGIC has determined that the rate of Mortgage Loan non-performance (i.e., Mortgage Loans that, as of January 2012 were delinquent for more than 60 days, in foreclosure, liquidated, or have posted a loss) in the 2007-EMX1 Transaction for Mortgage Loans where the automated valuation model indicated a LTV greater than 100% was over 77.5%. This non-performance rate was over 15.4% greater than the non-performance rate of those Mortgage Loans whose automated valuation model indicated a LTV below 100%.

174. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicates the clear breach of RFC's contractual representations, warranties, and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans, including the guidelines to which the Mortgage Loans were underwritten. Specifically, RFC has breached representations and warranties stating, for the 2007-EMX1 Transaction, that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (i.e. the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of RFC in the Operative Documents (including each representation and warranty in the A&A Agreement) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- each Mortgage File contains all required documents and instruments; and
- the Mortgage Loans were in substantial conformity with the standards in RFC's AlterNet Program or in the description of the Credit Grades.

175. It is reasonable to conclude—based on what is known by FGIC and as a result of what is being wrongly withheld from FGIC—that many of the 4,051 Mortgage Loans held by the 2007-EMX1 Trust at closing evidenced similar breaches of RFC's representations and warranties.

176. Indeed, based on the information gathered from FGIC's loan file review and the information extracted by FGIC's consultant relating to LTV ratios and owner-occupancy rates discussed above, FGIC believes that the Transaction-wide defect rate for the Mortgage Loans is likely to be at least 66%.

177. Moreover, the true scope of RFC's underwriting failures is unknown given RFC's refusal to provide FGIC with pertinent—and contractually required—information. This refusal in itself constitutes a breach of RFC's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

G. RFC's Fraud

178. The material breaches of RFC's representations and warranties, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of material representations and warranties and affirmative covenants RFC made to FGIC to induce its participation in the Transaction. The extraordinarily high defect and default rate among the Mortgage Loans, among other things, demonstrates not merely that RFC breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the Policy, RFC would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because RFC refuses to provide all of the requested Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

179. All of the Mortgage Loans underlying the 2007-EMX1 Transaction were acquired by RFC. In addition, as of early 2007 RFC employees were working in MLN's servicing department in order to ensure the continuing servicing of the loans and to prevent the deterioration of the quality of the MLN portfolio. As such, even before acquiring the loans from MLN's affiliate, RFC had the access and ability to evaluate the Mortgage Loan files and to determine if the loans were in substantial compliance with RFC's AlterNet Program.

180. On information and belief, RFC did in fact examine the Mortgage Loans when it assisted with servicing, and thereby became (if it had not been already) aware that many of the Mortgage Loans actually did breach one or more of the representations and warranties that were to be made by RFC in connection with the 2007-EMX1 Transaction.

181. To induce FGIC to enter into the 2007-EMX1 Transaction, RFC provided FGIC with a loan tape, which contained false and misleading information regarding, among other

things, the LTV and DTI ratios, occupancy status, Credit Grades, and FICO scores of the borrowers.

182. In addition, RFC made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the 2007-EMX1 Trust. RFC was well aware that FGIC would not agree to insure the 2007-EMX1 Certificates unless RFC obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, RFC provided Moody's and S&P with the same false information regarding the credit quality of the underlying mortgage loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2007-EMX1 Certificates that met FGIC's minimum requirements. In this way, RFC made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that RFC would pass on to FGIC, and second, by causing shadow ratings of the 2007-EMX1 Certificates to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

183. In connection with MLN's bankruptcy proceeding, on January 29, 2008, RFC filed a proof of claim in the aggregate amount of $495,766,952.77 against MLN. As MLN's largest unsecured and one of its largest secured creditors, RFC was able to wield great influence over MLN. For example, shortly after MLN filed for bankruptcy the press reported that Mitchell Heffernan, former CEO and president of MLN, made allegations that during the approximately 45-day period preceding MLN's bankruptcy RFC and others took over the cash management of MLN. *See* Bloomberg News, *Mortgage Lenders Judge Can't Block Arrest, State Says*, Apr. 5,

2007. As a result, all of MLN's financial transactions and payments to creditors had to be approved by RFC.

184. Moreover, as discussed above, RFC extended warehouse lending facilities to MLN. On information and belief, these lending arrangements gave RFC access to the underlying Mortgage Loan file information, thus providing RFC the opportunity to assess the characteristics and performance of the loans, including increases in early payment defaults of the Mortgage Loans that occurred shortly after origination. In light of the increased defaults and RFC's access to the Mortgage Loan files, RFC was (or should have been) aware that MLN's underwriting practices did not conform to the requirements of the applicable underwriting standards.

185. RFC also made material misrepresentations to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the standards to which the Mortgage Loans were underwritten.

186. For example, RFC knowingly misrepresented to FGIC that the Mortgage Loans were evaluated by RFC at several critical junctures and determined by RFC to comply with RFC's own underwriting guidelines . In the Prospectus Supplement (and in the I&I Agreement by incorporation), RFC represented to FGIC that, prior to assigning the Mortgage Loans to its affiliate RASC, RFC "reviewed the underwriting standards for the mortgage loans" and determined that "all of the [M]ortgage [L]oans were in substantial conformity with the standards set forth in [RFC's] AlterNet Program or are otherwise in conformity with the standards set forth in the description of credit grades set forth in this prospectus supplement." Prospectus Supplement at S-56. In addition, in the section of the Prospectus Supplement titled "AlterNet Program," RFC represented that each and every Mortgage Loan purchased from the Seller was determined to be acceptable by RFC for inclusion in the 2007-EMX1 Transaction due to having

been originated in accordance with or generally consistent with the underwriting program applicable to this Transaction—namely, the AlterNet Program. *See* Prospectus Supplement at S-60. RFC also provided FGIC with the AlterNet Program's guidelines, which detailed the program's extensive underwriting standards and requirements. Moreover, the loan tape provided by RFC indicated that the Mortgage Loans were acquired and evaluated under those same guidelines.

187. Despite all of RFC's above-referenced representations to FGIC, among others, RFC was well aware at the closing of the 2007-EMX1 Transaction that those representations were false. It was not until years after the Transaction closed that RFC admitted that the Mortgage Loans were not underwritten to RFC's AlterNet Program. In 2009, FGIC sent RFC numerous repurchase requests after reviewing certain Mortgage Loans in the 2007-EMX1 Transaction. In those requests, FGIC cited material breaches of the I&I Agreement and the Operative Documents, including non-conformity to RFC underwriting guidelines, which rendered certain Mortgage Loans ineligible or non-conforming and required RFC to repurchase those loans. RFC responded to many of FGIC's repurchase requests by claiming that the Mortgage Loans *were* conforming because they were underwritten to MLN's guidelines and not RFC's AlterNet Program.

188. For example, in 2009, FGIC sent RFC repurchase requests for loan numbers 11213763 and 10687886 because those loans were non-conforming under the applicable AlterNet Program. In response to FGIC's repurchase request for loan number 11213763, RFC asserted that the loan *was* conforming because it was underwritten "using a Lite Documentation Program with a Negotiated Commitment between RFC and EMAX/MLN." RFC attached a chart purporting to represent the requirements of the program and admitted that such a program

required less documentation than the AlterNet Program. In response to FGIC's repurchase request for loan number 10687886, RFC asserted that the loan *did* qualify because "[t]he subject transaction was underwritten according to the EMAX Financial Group Wholesale Loan Program Guide for Stated Income Documentation Program." RFC asserted that this program allowed such a loan because, unlike the AlterNet Program, this other program "do[es] not have a minimum credit depth requirement."

189. RFC's responses noted above further indicate that the Loan Pool was not compliant with RFC's representation in the Prospectus Supplement that the Mortgage Loans were underwritten to AlterNet Program.

190. These admissions demonstrate that RFC did not review the underwriting standards for the Mortgage Loans and determine that all of the Mortgage Loans were in substantial conformity with RFC's AlterNet Program or the credit grades listed in the Prospectus Supplement. Instead, as RFC implicitly conceded in the rescission letters, these loans were evaluated and acquired under Emax and/or MLN's less demanding underwriting guidelines. Accordingly, RFC knew that its representations were materially false at the time of the closing or should have known that its representations were materially false.

191. Moreover, the A&A Agreement (and Prospectus Supplement as incorporated by reference in the I&I Agreement) also contained false and misleading representations about the Mortgage Loans. In particular, RFC misrepresented that, as of the closing: (i) the information set forth in the Mortgage Loan Schedule was true and correct in all material respects; (ii) the Mortgage Loans met certain credit grades; (iii) there was no default breach, violation or event of acceleration existing under any Mortgage Note or Mortgage; and (iv) the weighted average LTV

Ratio with respect to the Group I Loans, and the Group II Loans were 84.1% and 83.8%, respectively.

192. Therefore, at the time of the closing of the 2007-EMX1 Transaction, RFC either (1) knew or should have known that its representations were materially false because RFC had not, among other things, determined if the Mortgage Loans were in fact in "substantial conformity" with the AlterNet Program, or (2) had reviewed whether the Mortgage Loans were in "substantial conformity" with the AlterNet Program, had determined that they did not meet the standards of this program, but nonetheless materially misrepresented to FGIC that the Mortgage Loans were in "substantial conformity" with the AlterNet Program.

193. These representations were essential to FGIC's decision to issue the Policy. These representations and warranties were false when stated. RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and to issue the Policy. The true information regarding these loans, as detailed above, simply could not substantiate RFC's assurances. In short, no amount of RFC promising that the loans met certain standards actually made those promises true.

194. RFC's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC as well as to a multitude of suits and the potential for more litigation to come.

195. Consistent with this pattern of behavior, RFC defrauded FGIC into issuing the Policy, through its knowing misrepresentations.

H. Ally Financial Aids and Abets RFC's Fraud

196. Ally Financial provided substantial assistance to RFC in fraudulently inducing FGIC to issue the Policy. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's

securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties RFC made regarding the nature of RFC's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

I. The Federal Government Alleges Fraud Against Ally Financial and Its Subsidiaries Relating to the 2007-EMX1 Transaction

197. As discussed above, the FHFA recently filed suit in the Supreme Court of New York against RFC for fraud, aiding and abetting fraud, and violating state and federal securities laws in connection with its role in the public filing of offering documents which allegedly contained false and misleading statements.

198. In support of its claims, the FHFA performed a review of loan-level data for randomly-selected 2007-EMX1 Group II Loans to assess whether the information provided in the Prospectus Supplement for the 2007-EMX1 Transaction was true and accurate. *See* FHFA Complaint at ¶ 94; Table 6. For each of the sampled loans, the FHFA used an industry standard automated valuation model ("AVM")—on information and belief, similar to the approach used by FGIC—to calculate the value of the underlying property at the time the mortgage loan was originated. (Id. ¶ 99).

199. Similar to FGIC's findings with respect to 2007-EMX1, the FHFA's review of the sample data confirmed, on a statistically-significant basis, that the information provided in the 2007-EMX1 Prospectus Supplement concerning owner-occupancy and LTV ratios was materially false.

200. The FHFA's analysis determined that RFC overstated the true percentage of non-owner-occupied properties within the 2007-EMX1 underlying Group II Loan Pool, overstated the true percentage of 2007-EMX1 underlying Group II Loans with a LTV ratio at or below 80

percent, and falsely represented that none of the loans had a LTV ratio above 100%. FHFA Complaint ¶ 98 & Table 6; ¶ 102 & Table 7.

J. RFC's Breach of Obligations as Master Servicer

(1) Failure to Remedy Subservicing Deficiencies and to Provide Information

201. RFC, as Master Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for the 2007-EMX1 Transaction, including, but not limited to, its obligations to follow proper servicing procedures, and to sufficiently monitor and manage the performance of the Subservicers with respect to their duties under the Transaction.

202. RFC took responsibility for the servicing of the Mortgage Loans through its wholly owned subsidiary HomeComings and affiliate GMACM. RFC had certain related contractual obligations under the I&I Agreement and the PSA with respect to the 2007-EMX1 Transaction. Under the I&I Agreement, RFC covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the [PSA]." I&I Agreement § 2.02(l). Under the PSA, RFC is "obligated and liable to . . . [FGIC] for the servicing and administering of the Mortgage Loans," and in doing so is required to "follow[] such procedures as it would employ in its good faith business judgment and which are normal and usual in its general mortgage servicing activities. . . ." PSA §§ 3.01(a), 3.04. As such, on each occasion that HomeComings and/or GMACM failed to service and administer the Mortgage Loans in conformity with generally accepted servicing practices (including RFC's own servicing guidelines), RFC was liable "to the same extent and under the same terms and conditions as if the Master Servicer alone were servicing and administering the Mortgage Loans." PSA §§ 3.01(a), 3.04.

203. During 2007, the servicing operations of RFC, GMACM and HomeComings were integrated into ResCap. Since the time of the integration, on information and belief, the Subservicers have been deficient in their borrower contact, collections and loss mitigation standards. An onsite review of the Ally Financial servicing arm's headquarters, including those of GMACM, HomeComings and RFC, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis, revealed among other issues: (i) inadequate call center staffing—staffing unable to handle increased incoming and outgoing call volumes; (ii) call center staffing turnovers as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when GMACM or HomeComings does not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; and (v) severely infrequent use of alternative loss mitigation strategies as compared to the industry, including forbearance plans and workout programs.

204. As performance of this transaction quickly began to deteriorate, FGIC hired a consultant to conduct an onsite servicing review focusing specifically on the servicing of loans in the 2007-EMX1 transaction. The onsite review revealed numerous deviations from industry standards specific to the servicing procedures used with respect to the mortgage loans backing the 2007-EMX1 Certificates. For example, borrowers of the 2007-EMX1 Mortgage Loans who were at risk of defaulting were offered forbearance plans more infrequently than the industry norm, and where forbearance plans were offered to such borrowers, the terms did not comport to, and were generally less generous than, typical industry standards. For instance, at-risk borrowers of the Mortgage Loans were offered only six-month forbearance plans, while the industry norm is to extend borrowers a twelve-month plan.

205. Beyond these forbearance deficiencies, the Subservicers of the Transaction committed other loss mitigation failures. For example, according to industry standards at that time, approximately 85% to 90% of the delinquent mortgage loans in a particular RMBS transaction are involved in some stage of the workout solution process that is designed to mitigate loss. Yet, with respect to the 2007-EMX1 Transaction, FGIC's March 25, 2009 onsite review revealed that only 73% of delinquencies for the preceding month had a workout solution in process, while 27% of the delinquent mortgage loans were not involved in any loss mitigation process whatsoever.

206. The failure by the Subservicers to follow appropriate standards likely resulted from, and was compounded by, the fact that, as of February 2009, the average loss mitigation associate employed by the Subservicers was handling approximately 250 accounts—a workload that was more than double the industry norm at that time.

207. The onsite review further revealed that the Subservicers had employed inadequate and improper practices concerning charged off loans and short sales, which, as of February 2009, had contributed to a pool-wide deficiency rate for the 2007-EMX1 Transaction of over 52%.

208. On information and belief, RFC has failed to remedy any of the deficient servicing practices of the Subservicers.

209. In addition, RFC disclosed to FGIC for the first time in March 2009 that it classified loans into one of three categories or "Risk Tiers" under a protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

210. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. RFC disclosed to FGIC that all of the mortgage loans in FGIC-insured, RFC-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the 2007-EMX1 Transaction, were placed in the lowest category of risk. For such mortgage loans, regardless whether they were (i) first- or second- lien, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities—all of which are factors that require more attentive servicing—delinquent borrowers were called at a later stage of delinquency and less frequently than loans in higher risk categories. As the purchaser of the Mortgage Loans, however, RFC clearly knew that such Mortgage Loans, by their very nature, required particularized servicing such as that provided by HomeComings before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by RFC to ensure that the Mortgage Loans were serviced and administered in accordance with "good faith" business practices constitutes a breach of the PSA and the I&I Agreement. *See* PSA §§ 3.01(a), 3.04; I&I Agreement § 2.02(l).

211. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, RFC has still failed to provide such information.

(2) RFC allowed Excessive Loan Modifications And Amended the PSA without FGIC's Consent

212. RFC, as Master Servicer, agreed that it would "not modify, waive or amend, or consent to any modification, waiver or amendment of" the PSA without the prior written consent of FGIC. I&I Agreement § 2.03(b).

213. On August 12, 2009, RFC, through its counsel, requested FGIC's consent in order to execute an amendment (the "Purported Amendment") to allow RFC to modify 100% of the Mortgage Loans rather than what would otherwise be allowed under the PSA. On information and belief, as of December 2008 RFC had already far exceeded the 5% cap on allowable modifications in the 2007-EMX1 Transaction. FGIC requested that RFC provide FGIC with sufficient information, including RFC's policies and procedures used for underwriting and processing prospective mortgagors for the Home Affordable Modification Program, to respond to RFC's request for FGIC's consent. RFC never provided that information. Despite the fact that FGIC never consented to the additional loan modifications, it appears that RFC nonetheless proceeded as if its Purported Amendment had been adopted in contravention of FGIC's contractual rights. *See* I&I Agreement § 2.03(b).

214. Thus, to amend the PSA, RFC had to receive FGIC's consent. FGIC never gave its consent. Therefore, RFC breached section 2.03(b) of the I&I Agreement.

215. As of January 25, 2012 a total of approximately 25% of the original pool had been modified. Of the cumulative losses incurred to date, approximately $27 million or 13% of the loss is a result of the servicing modifications improperly performed to date.

216. On information and belief, RFC has collected significantly higher servicing fees as a result of adopting the Amendment and modifying particular Mortgage Loans.

217. FGIC has requested additional information in order to determine whether RFC is in breach of its servicing obligations. In contravention of FGIC's contractual rights, RFC has failed to provide such information, including servicing notes, to FGIC. On information and belief, RFC, as Master Servicer, also knew of material breaches of representations and warranties and did not notify FGIC thereof, or cause the repurchase of the Mortgage Loans affected thereby. Accordingly, FGIC reserves its rights to assert additional causes of action relating to RFC's servicing obligations.

(3) RFC has been Improperly Removing Funds from the 2007-EMX1 Trust's Custodial Account

218. The Master Servicer is permitted under the 2007-EMX1 Transaction to withdraw funds from the 2007-EMX1 Transaction's custodial account ("Custodial Account"), into "which the Master Servicer shall deposit or cause to be deposited on a daily basis. . . payments and collections remitted by Subservicers or received by it in respect of the Mortgage Loans," including all principal and interest payments made by the borrowers, among other funds. PSA § 3.07(b). Such withdrawals are meant "to reimburse [RFC] or the related Subservicer for" an advance of funds that RFC, GMACM or HomeComings makes that is deemed to be "nonrecoverable." *See* PSA § 3.10(a)(vii). An advance is nonrecoverable when the Master Servicer determines, in its "good faith judgment," that the advance will not "be ultimately recoverable by the Master Servicer from related Late Collections, Insurance Proceeds, Liquidation Proceeds or REO Proceeds. . . and the Master Servicer determines that no other source of payment or reimbursement for such advances is available to it. . . ." PSA § 1.01.

219. Upon information and belief, RFC has been improperly declaring advances nonrecoverable in order to seek reimbursement of monies that RFC has been advancing as Master Servicer. Such declaration has improperly allowed RFC to remove funds from the

Custodial Account by improperly reimbursing itself for advances that should not be deemed nonrecoverable.

220. Even if RFC were to prove successfully that its reimbursements were made in good faith, RFC is still in breach of its servicing obligations because it has failed to comply with the provisions in the PSA regarding the process of declaring an advance nonrecoverable. The PSA requires RFC to transmit "a certificate of a Servicing Officer, Responsible Officer or Vice President or its equivalent" to FGIC that evidences RFC's decision to declare an advance nonrecoverable. However, the certificate must "include any other information or reports obtained by [RFC]. . . , which may support such determinations." PSA § 1.01. The so-called "Officer's Certificates" sent by RFC to FGIC to date have been executed by an employee identified as a "Manager," not a Servicing Officer, Responsible Officer, Vice President or its equivalent. Furthermore, RFC has also failed to include any supporting information or reports with its Officer's Certificates that would allow FGIC to determine that RFC is in fact using its good faith judgment.

K. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

221. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns RFC and GMACM. Ally Financial—as the ultimate parent of ResCap, RFC and GMACM—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, RFC and GMACM.

222. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, RFC and GMACM. Ally Financial exercised its

direction and control in connection with the 2007-EMX1 Transaction. At times, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

223. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and the FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries[.]" *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

224. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of RFC Directly and Indirectly Through its Control of ResCap

225. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

226. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

227. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

228. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement").

229. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

230. On December 1, 2006, Ally Financial had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." GMAC LLC – Sale of Controlling Interest in GMAC Investor Conference Call (Dec. 1, 2006). On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

231. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[1] Since incorporation, the ownership of ResCap has not changed—Ally Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

232. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial and ResCap shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the proposed 2005 operating agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." 2005 Operating Agreement (emphasis added).

233. Moreover, on April 26, 2007, "ResCap Investor Relations" announced the release of Ally Financial's 2007 first quarter financial results to investors in an email bearing the ResCap logo. That announcement stated that Ally Financial's financial results were found on both Ally Financial's and ResCap's websites.

234. Additionally, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a

[1] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the SEC Con March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

director at ResCap, GMACM, RFC, and RASC, among other Ally Financial subsidiaries. In the 2007-EMX1 Transaction, acting as a director of both RASC and RFC, Walker was a signatory to the "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors." Both documents are dated December 20, 2005.

235. Ally Financial's domination and control of its subsidiaries, and in particular its use of ResCap to effectuate that control, is further evidenced by John Ruckdaschel, who, according to publicly available information, has served as in-house counsel at Ally Financial since October 2006. According to an e-mail sent from ResCap to FGIC, Ruckdaschel has served as "internal legal counsel for all [] securitizations" since at least May 2008. Although purportedly an Ally Financial employee, Ruckdaschel also sent and received e-mail using a ResCap e-mail address. Furthermore, an employee of ResCap specifically instructed FGIC that all "official letters" regarding several Ally Financial subsidiaries—including GMACM, RFC, RASC, and others—should be sent not to the relevant (and supposedly independent) subsidiary, but rather to Ruckdaschel, Ally Financial's internal counsel.

236. Additionally, as discussed above, on May 24, 2011, FGIC sent RFC a demand for an Interim Certification for the 2007-EMX1 Transaction that has been unanswered to date. That same day, FGIC's demand was forwarded from Jeffrey Blaschko at RFC directly to Ruckdaschel at Ally Financial with "high importance." Blaschko included a note to Ruckdaschel that this was FGIC's "[s]econd request" for the Interim Certification.

237. Upon information and belief, that (1) FGIC was directed to address official correspondence that would otherwise go to ResCap and/or RFC to Ally Financial's in-house counsel, and (2) FGIC's demand letter was sent by RFC to Ruckdaschel, were done at Ally Financial's direction in order for Ally Financial to provide its subsidiaries with its controlling

input and approval before acting on FGIC's requests. As such, the ultimate decision by RFC not to respond to FGIC's request for the Interim Certification, and any other demands for information and remedies to which FGIC has a clear contractual right, was made by Ally Financial, which continues to direct the activities of its subsidiaries in their dealings with FGIC and others.

238. As further evidence of Ally Financial's domination over ResCap, the 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See* 2005 Operating Agreement.

239. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

240. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the

strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part of our plan and a key part of our value creation." *Id.* (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

241. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citi, which provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept. 19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id.*

242. Indeed, Ally Financial's 2011 annual report states that "ResCap remains heavily dependent on [Ally Financial] and its affiliates for funding and capital support." Ally. Fin. Inc., Annual Report (Form 10-K), at 128 (Feb. 28, 2012).

243. Additionally, Annual Reports prepared by Ally Financial further note its pursuit of strategic alternatives with ResCap, and highlight the extent to which Ally Financial manipulated its control over its subsidiaries to enhance its own financial health. According to Ally Financial: "On December 31, 2009, we announced that due to our ongoing strategic review of how to best deploy GMAC's current and future liquidity, we decided to pursue strategic alternatives with respect to ResCap and committed to a plan . . . related to management's intent

to sell certain ResCap related assets and businesses. . . . In order to maximize value, we will consider a variety of options including one or more sales, spin-offs, or other potential transactions . . . [that we believe] should minimize the impact of any significant future losses related to ResCap's legacy mortgage business . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3-4 (Feb. 26, 2010).

244. There is also substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

245. Further, Ally Financial has established a "Mortgage Repurchase Reserve" to account for the potentially significant liabilities stemming from repurchase demands made on its mortgage-related subsidiary business units. The balance of the Mortgage Repurchase Reserve was $825 million as of the fourth quarter of 2011. See Ally Financial's 4Q 2011 Earnings Presentation at 16. Although these repurchase demands are generally made on Ally Financial's subsidiaries—such as GMACM—in discussing the reserve on an earnings call, Ally Financial CFO Jim Mackey made clear that it was Ally Financial that was recording "repurchase expense[s]" related to mortgages, as he stated that Ally Financial "had lower mortgage repurchase expense of $44 million." Ally Financial's Q4 2011 Earnings Call at 4 (Feb. 2, 2012).

246. Similarly, in discussing Ally Financial's Mortgage Repurchase Reserve on Ally Financial's third quarter 2011 earnings call, Mackey further described losses attributable mortgage loan repurchases as belonging to Ally Financial, when he stated: "Our mortgage repurchase reserve is [as it then stood] $829 million . . . . Our loss experience improved during

the quarter due to the fact that we had fewer mortgage insurance rescission payments that we experienced last quarter and that did not repeat this quarter." Ally Financial's Q3 2011 Earnings Call at 6 (Nov. 2, 2011) (emphases added). Making this point even more explicitly, on the same call, Ally Financial CEO Carpenter explained that "we have routinely repurchased problem loans voluntarily and by contract . . . ." *Id.* at 8 (emphasis added).

247. Additionally, as discussed above, Ally Financial recorded a $230 million charge in the fourth quarter of 2011, $212 million of which was recorded at its controlled subsidiary, ResCap. As a result of the penalties assessed against ResCap by government regulators, and the fact that ResCap failed to maintain sufficient tangible net worth to comply with the requirements of the terms of certain credit facilities, Ally Financial propped up its subsidiary ResCap with a $197 million capital contribution in the form of intercompany debt forgiveness. *See* Ally Fin. Inc., Form 10-K, at 31-32 (Feb. 28, 2012).

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

248. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 9, 2011).

249. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving

ResCap subsidiaries that FGIC insured, including the 2007-EMX1 Transaction. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

250. The origination and securitization of mortgage loans by ResCap and its subsidiaries have long been an integral part of Ally Financial's core business. In its 2006 Annual Report, Ally Financial (then reporting as GMAC LLC) stated that "[w]e are a leading real estate finance company focused primarily on the residential real estate market. Our business activities include the origination, purchase, servicing, sale and securitization of residential mortgage loans." GMAC LLC, Annual Report (Form 10-K), at 3 (Mar. 13, 2007) (emphasis added). Ally Financial further stated that "we utilize asset and mortgage securitizations and sales as a critical component of our diversified funding strategy." *Id.* at 5 (emphasis added).

251. Ally Financial continued to publicly report on its own business and that of its subsidiaries in later filings on an integrated basis: "We engage in the origination, purchase, servicing, sale, and securitization of consumer (i.e., residential) mortgage loans and mortgage-related products. Mortgage operations include the Residential Capital, LLC (ResCap) legal entity, [and] the mortgage operations of Ally Bank . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3 (Feb. 26, 2010). More recently, continuing to discuss its various mortgage operations as a single enterprise, Ally Financial stated that "[o]ur Origination and Servicing operations is one of the leading originators of conforming and government-insured residential mortgage loans in the United States. We are one of the largest residential mortgage loan servicers in the United

States and we provide collateralized lines of credit to other mortgage originators." Ally Fin. Inc., Annual Report (Form 10-K), at 4 (Feb. 28, 2012).

252. Moreover, as discussed above, Ally Financial—at least in the view of certain of ResCap's bondholders—is believed to have stripped assets from its subsidiary.

253. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed RFC and GMACM as part of its own business. For example, in its investor presentation from 2007, ResCap declares that RFC and GMACM "are owned *and operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial was not directly controlling RFC and GMACM, it was using ResCap as an instrument to do so.

254. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

255. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap

combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one RFC has with respect to the 2007-EMX1 Transaction as Master Servicer.

256. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

257. In another example, Larry Hipp, a member of ResCap's Risk Analyst/Investor Repurchase Department, communicated with FGIC regarding rescission requests using an Ally Financial email address, but in those very same emails, lists his ResCap contact information, including a ResCap email address. In addition, Ally Financial/ResCap used to send FGIC secure communications bearing the "GMAC ResCap" logo, but those same secure communications now have an "Ally Financial" logo.

258. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

Q: Could you please state your name for the record.
A: My name is Jeffrey Stephan.
Q: Okay. And who do you work for?
A: GMAC, LLC [Ally Financial].
Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
Q: Okay.
A: It's GMCA [sic] Mortgage Corporation.
Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?
A. Yes.
Q. So these entities no longer currently exist?
A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

L. FGIC's Contractual Remedies Under The I&I Agreement

259. The I&I Agreement provides FGIC with broad remedies for RFC's breaches of its representations and warranties. The breadth of these remedies provided further material inducement for FGIC to issue the Policy. Specifically, Section 5.02(b) of the I&I Agreement provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this [I&I] Agreement, the [PSA] or the other Operative Documents, or existing at law or in equity.

260. RFC also agreed in Sections 3.03(b) and 3.03(c) of the I&I Agreement:

> Anything in Sections 2.01(a)(xii) and 3.03(a) hereof or in any Operative Document to the contrary notwithstanding, [FGIC] shall be entitled to full reimbursement from RFC for (i) any payment made under the Policy arising as a result of RFC's failure to substitute for or deposit an amount in respect of any defective Mortgage Loan as required pursuant to Section 4 and Section 5 of the [A&A] Agreement, together with interest on any and all such amounts remaining unreimbursed . . . from the date such amounts became due until paid in full. . . .

I&I Agreement § 3.03(b); and

> RFC agrees to pay to [FGIC] any and all reasonable charges, fees, costs and expenses that [FGIC] may reasonably pay or incur, including reasonable attorneys' and accountants' fees and expenses, in connection with (i) the enforcement, defense or preservation of any rights in respect of any of the Operative Documents, including defending, monitoring or participating in any litigation or proceeding . . . relating to any of the Operative Documents . . . .

I&I Agreement § 3.03(c).

261. In addition, RFC agreed in Section 3.04(a) of the I&I Agreement:

> to pay, and to protect, indemnify and save harmless, [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages, costs or expenses (including reasonable fees and expenses of attorneys . . .) of any nature arising out of or relating to the breach by RFC. . . of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the transactions contemplated by the Operative Documents by reason of . . . . the breach by RFC. . . of any representation, warranty . . . or covenant under any of the Operative Documents or the occurrence, in respect of RFC. . . , under any of the Operative Documents of any "event of default" . . . .

I&I Agreement §§ 3.04(a), 3.04(a)(iv).

262. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, RFC agreed to repurchase or substitute Mortgage Loans that did not conform

to RFC's representations and warranties, and to indemnify FGIC for claims and losses arising from RFC's breach of any representation or warranty.

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Material Breach of the I&I Agreement—Declaratory Relief Regarding RFC's Indemnification Obligation)

263. FGIC re-alleges and incorporates by reference paragraphs 1 through 262 of this Complaint.

264. The I&I Agreement is a valid and binding agreement between the parties.

265. FGIC has performed its obligations under the I&I Agreement.

266. RFC's representations and warranties were material to FGIC's decision to insure the 2007-EMX1 Certificates and to issue the Policy.

267. RFC's pervasive and material breaches of its representations and warranties, from the very inception of the Transaction and in the years since, constitute a material breach of the I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

268. Pursuant to Section 3.04(a) of the I&I Agreement, RFC must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things, the breach by RFC of any representation, warranty, or covenant under any of the respective Operative Documents.

269. As explained above, RFC has breached numerous representations and warranties in the 2007-EMX1 Offering and Operative Documents, for example, those contained in Section 2.01 of the I&I Agreement. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

270. On April 13, 2011, FGIC sent RFC a request for reimbursement in the amount of $197,990 for fees FGIC incurred in connection with the repurchases by RFC of the Mortgage Loans RFC admitted did not qualify for inclusion in the 2007-EMX1 Transaction. RFC never responded to FGIC's request and has not tendered payment.

271. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

272. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must jointly and severally indemnify and reimburse FGIC for all sums arising out of the 2007-EMX1 Transaction for which FGIC has or will become liable, or, alternatively, for all loss resulting from any breaches of the representations, warranties and covenants of the I&I Agreement or any of the respective Operative Documents, or alternatively, in an amount to be determined at trial, and an order giving effect to such indemnification.

273. In addition, FGIC seeks a declaration that RFC must indemnify and reimburse FGIC for all sums arising out of the 2007-EMX1 Transaction for which FGIC has or will become liable, or, alternatively, for all loss resulting from any breaches of the representations, warranties and covenants of the I&I Agreement or any of the respective Operative Documents, or alternatively, in an amount to be determined at trial, and an order giving effect to such indemnification.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Fraudulent Inducement—I&I Agreement)

274. FGIC re-alleges and incorporates by reference paragraphs 1 through 273 of this Complaint.

275. RFC induced FGIC to enter into the I&I Agreement and to issue the Policy by making false representations and warranties about its business practices and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

276. As explained above, RFC knowingly made materially false statements to, and/or omitted material facts from, FGIC with the intent to induce detrimental reliance by FGIC.

277. RFC intended for FGIC to rely on RFC's material false statements and/or omissions. FGIC had no reason to believe that RFC's representations were false, and reasonably and justifiably relied on RFC's material false statements and/or omissions regarding information uniquely in the possession of RFC when it decided to enter into the I&I Agreement and to issue the Policy for the 2007-EMX1 Certificates.

278. As a result of RFC's material false statements and omissions, FGIC entered into the I&I Agreement, issued the Policy, and thereby agreed to insure certificates backed by a pool of Mortgage Loans that was, in actuality, materially different from the Loan Pool that RFC represented would collateralize the 2007-EMX1 Transaction.

279. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

280. As a result of RFC's material false statements and omissions, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

281. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

282. In addition, RFC is separately liable for such damages.

THIRD CAUSE OF ACTION

(Alternatively Against Ally Financial: Aiding and Abetting Fraudulent Inducement—I&I Agreement)

283. FGIC re-alleges and incorporates by reference paragraphs 1 through 282 of this Complaint.

284. As explained above, Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to issue the Policy.

285. RFC could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

286. Ally Financial knew that RFC fraudulently induced FGIC to issue the Policy for the 2007-EMX1 Transaction.

287. Ally Financial's statements materially aided RFC's fraudulent inducement.

288. As a result of Ally Financial's aiding and abetting RFC's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Representations, Warranties, and Affirmative Covenants)

289. FGIC re-alleges and incorporates by reference paragraphs 1 through 288 of this Complaint.

290. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

291. FGIC has performed its obligations under the I&I Agreement.

292. As explained above, RFC has materially breached its representations, warranties and affirmative covenants under the I&I Agreement.

293. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

294. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

295. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

296. In addition, RFC is separately liable for such damages.

FIFTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Repurchase Obligations)

297. FGIC re-alleges and incorporates by reference paragraphs 1 through 296 in this Complaint.

298. The I&I Agreement is a valid and binding agreement between the parties.

299. FGIC has performed its obligations under the I&I Agreement.

300. Pursuant to the terms of the I&I Agreement, and the provisions of the Operative Documents incorporated therein, FGIC has demanded that RFC repurchase non-complying Mortgage Loans. RFC has refused to repurchase numerous such Mortgage Loans.

301. RFC has breached the I&I Agreement, and the provisions of the Operative Documents incorporated therein, by failing to repurchase those Mortgage Loans that violated RFC's representations and warranties that FGIC has noticed to RFC.

302. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

303. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

304. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

305. In addition, RFC is separately liable for such damages.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Declaratory Relief Regarding Access to Information)

306. FGIC re-alleges and incorporates by reference paragraphs 1 through 305 of this Complaint.

307. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

308. FGIC has performed its obligations under the I&I Agreement.

309. Pursuant to Section 2.02(c) of the I&I Agreement, RFC agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the 2007-EMX1 Transaction. FGIC further has the right to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(m) of the I&I Agreement.

310. As discussed above, pursuant to the I&I Agreement, FGIC made numerous reasonable written requests that RFC furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by RFC, and others, concerning the Mortgage Loans.

311. RFC has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

312. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

313. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, RFC agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer; and (iii) discuss the affairs, finances and accounts of RFC with RFC's independent accountants.

314. On December 8, 2011, FGIC made a reasonable, written request that RFC permit FGIC or its authorized agent to conduct an inspection of the books and records of RFC, as well as permit FGIC to (i) discuss the affairs, finances and accounts of RFC with (i) RFC's Servicing Officer, and (ii) RFC's independent accountants with RFC's consent, which consent shall not be unreasonably withheld or delayed.

315. RFC has failed to make available such persons or to produce such information.

316. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreement, Section 2.02(e)(i)-(iii).

317. Pursuant to Section 2.02(e) of the I&I Agreement, RFC agreed, on an annual basis or when reasonably requested by FGIC, to cause the Custodian to deliver to FGIC an updated certification, in the form of the Interim Certification required under the 2007-EMX1 Custodial Agreement to enable FGIC to track the progress of the recording of Mortgages and Assignments with respect to the Mortgage Loans.

318. FGIC made a reasonable request for the Interim Certification on June 21, 2011.

319. RFC has failed to cause the Interim Certification to be delivered to FGIC as requested. On December 8, 2011, FGIC again notified RFC of its failure to perform under the I&I Agreement, but RFC continued to fail to cause the Interim Certification to be delivered to FGIC.

320. RFC has failed to comply with its contractual obligations and breached the I&I Agreement by failing to cause the Interim Certification to be delivered to FGIC after receiving reasonable requests from FGIC.

321. Pursuant to Section 2.02(c)(iv) of the I&I Agreement, RFC agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [PSA]."

322. FGIC made a reasonable request for servicing notes on December 9, 2010.

323. RFC has failed to comply with its contractual obligations and breached the I&I Agreement, Section 2.02(e), by failing to cause the Servicing Notes to be delivered to FGIC after receiving reasonable requests from FGIC.

324. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action, as evidenced by Ally Financial's involvement as described more fully in paragraphs 235-237 above.

325. Accordingly, FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must comply with Sections 2.02(c), 2.02(e) and 2.02(m) of the I&I Agreement, and an order requiring RFC to promptly remedy those breaches and therefore comply with FGIC's requests and notices to RFC pursuant to relevant provisions, as detailed above.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Master Servicer Obligations)

326. FGIC re-alleges and incorporates by reference paragraphs 1 through 325 of this Complaint.

327. The I&I Agreement is a valid and binding agreement between FGIC and RFC.

328. FGIC has performed its obligations under the I&I Agreement.

329. As explained above, RFC has materially breached its representations and warranties under section 2.03(b) of the I&I Agreement by purporting to amend the Operative Documents without FGIC's prior and necessary consent.

330. Moreover, as explained above, RFC has breached its affirmative covenant under the I&I Agreement to service all Mortgage Loans in all material respects in compliance with the PSA.

331. RFC's breaches of the I&I Agreement have caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on the Policy and other losses and expenses.

332. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

333. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

334. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

335. In addition, RFC is separately liable for such damages.

EIGHTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Declaratory Relief)

336. FGIC re-alleges and incorporates by reference paragraphs 1 through 335 of this Complaint.

337. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this complaint.

338. For the reasons set forth in paragraphs 221 through 258, among others, Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

339. FGIC has been damaged as a result of the actions of Ally Financial, ResCap and RFC.

340. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other, and therefore are jointly and severally liable for each other's liabilities.

NINTH CAUSE OF ACTION

(As Against RFC: Attorneys' Fees and Costs)

341. FGIC re-alleges and incorporates by reference paragraphs 1 through 340 of this Complaint.

342. The I&I Agreement is a valid and binding agreement between the parties.

343. FGIC has performed its obligations under the I&I Agreement.

344. Pursuant to Section 3.03(c) of the I&I Agreement, RFC agreed to reimburse FGIC for any and all costs or expenses "including reasonable attorneys'. . . fees and expenses" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreement, RFC agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or relating to the 2007-EMX1 Transaction.

345. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of RFC's failure to provide Mortgage Loan files, the Interim Certification, Servicing Notes, and financial information and its breach of the representations and warranties contained in Section

2.01 of the I&I Agreement and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreement.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant Residential Funding Company, LLC, with respect to (1), (2), and (4) through (15) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4) through (12), (14), and (15) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (12), (14), and (15) below and the following relief:

(1) A declaration that, pursuant to RFC's obligations under the I&I Agreement, RFC solely and/or Ally Financial, ResCap, and RFC must jointly and severally reimburse and indemnify FGIC for all sums arising out of the 2007-EMX1 Transaction for which FGIC has or will become liable, or, alternatively, for all losses resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the respective Operative Documents, or alternatively, in an amount to be determined at trial, and an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal rescissory, equitable, and punitive damages, to be proven at trial, for RFC's fraudulent inducement of FGIC to enter into the 2007-EMX1 Transaction and to issue the Policy;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's aiding and abetting of RFC's fraudulent inducement of FGIC to enter into the 2007-EMX1 Transaction and to issue the Policy;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for RFC's material breaches of the 2007-EMX1 Transaction;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for RFC's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreement and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that RFC must repurchase all Mortgage Loans that are in breach of RFC's representations and warranties in the 2007-EMX1 Transaction, and an order giving effect to that declaration;

(7) Further or alternatively, a declaration that RFC must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2007-EMX1 Transaction, and an order giving effect to that declaration;

(8) Further or alternatively, a declaration that RFC must allow FGIC to inspect the books and records of RFC, to discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants, and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that RFC must cause servicing notes to be provided for the 2007-EMX1 Transaction when requested by FGIC, and an order giving effect to that declaration;

(10) Further or alternatively, a declaration that RFC must cause to be provided the custodial Interim Certification when requested by FGIC for the 2007-EMX1 Transaction stating that all mortgage files were complete and were properly transferred into the trusts, or noting any exceptions, and an order giving effect to that declaration;

(11) Further or alternatively, an award of legal and equitable damages, to be proven at trial, for RFC's purported amendment of the PSA without FGIC's consent;

(12) Further or alternatively, a declaration that Ally Financial, ResCap, and RFC are alter egos of each other and are jointly and severally liable for each other's liabilities;

(13) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreement and other Operative Documents, as defined in the I&I Agreement;

(14) An award of prejudgment interest at the statutory rate; and

(15) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

Attorneys for Plaintiff
Financial Guaranty Insurance Company

Exhibit 23

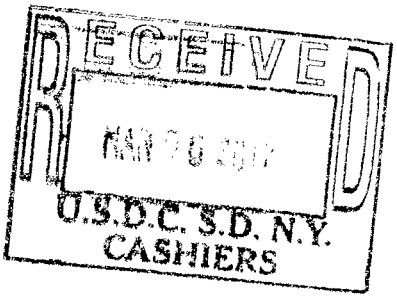
UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

---------- x

FINANCIAL GUARANTY INSURANCE COMPANY,

Plaintiff,

-against-



ALLY FINANCIAL, INC. F/K/A GMAC, LLC; RESIDENTIAL CAPITAL, LLC F/K/A RESIDENTIAL CAPITAL CORPORATION; ALLY BANK F/K/A GMAC BANK; GMAC MORTGAGE, LLC F/K/A GMAC MORTGAGE CORPORATION,

Defendants.

---------- x

Civil Action No. 12 CV 1658

COMPLAINT

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"), Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"), Ally Bank, formerly known as GMAC Bank ("Ally Bank"), and GMAC Mortgage, LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with a financial guaranty insurance policy (the "2006-HE3 Policy" or the "Policy") issued by FGIC in relation to a GMACM-sponsored transaction (the "2006-HE3 Transaction" or the "Transaction"), in which GMACM Home Equity Loan Trust 2006-HE3 (the "2006-HE3 Trust" or the "Trust") issued and sold to investors over $1.14 billion aggregate principal amount of insured residential mortgage-

backed securities (the "2006-HE3 Notes"). As the sponsor of the 2006-HE3 Transaction, GMACM procured the Policy from FGIC in order to enhance the ratings and marketability of the 2006-HE3 Notes. GMACM fraudulently induced FGIC's agreement to provide this insurance through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices and the credit quality and characteristics of the tens of thousands of mortgage loans (individually the "Mortgage Loans," and collectively the "Loan Pool") that provided the collateral for the 2006-HE3 Notes. In short, the Mortgage Loans were different—and demonstrably worse—than GMACM had represented them to be. FGIC's issuance of the Policy enabled the 2006-HE3 Notes to receive a triple-A rating from the rating agencies, which in turn made the 2006-HE3 Transaction viable, and enabled GMACM and its affiliates to earn millions of dollars in transaction fees.

2. Since the closing of the 2006-HE3 Transaction, GMACM has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of the 2006-HE3 Transaction, GMACM has violated the essential terms of its agreement with FGIC. GMACM has also breached the essential terms of the other operative documents incorporated therein.

3. To induce FGIC to enter into the Transaction, GMACM made material representations and warranties to FGIC about the manner in which the Mortgage Loans were selected and evaluated and the characteristics of the Loan Pool generally. Among the numerous misrepresentations and omissions made by GMACM regarding the characteristics of the Loan Pool was the representation that, of the Mortgage Loans transferred to the 2006-HE3 Trust at the time of the closing of the Transaction (the "Initial Mortgage Loans"), no more than 7.61% of the aggregate principal amount of those loans would be balloon mortgage

loans. As explained more fully below, the credit risk inherent in a balloon mortgage loan is typically much higher than that of a non-balloon mortgage loan. Accordingly, the representations and warranties GMACM made in respect of the balloon mortgage loans were a crucial component in assessing the true credit risk of the Transaction. In this Transaction, while GMACM represented and warranted in several instances that no more than 7.61% of the aggregate principal amount of the Initial Mortgage Loans would be balloon mortgage loans, in fact more than 26% of the aggregate principal amount of those loans consisted of these substantially higher-risk mortgages. Indeed, the Loan Pool as measured at closing (the "Initial Loan Pool") contained over 3,000 more balloon mortgage loans than GMACM's representations indicated it would contain.

4. The wholesale misrepresentation by GMACM regarding the balloon mortgage loans in the offering and operative documents governing the Transaction, and the gross over-inclusion of thousands more such mortgage loans in the Initial Loan Pool, provide the most obvious and egregious—but by no means the only—examples of the myriad ways in which GMACM (i) fraudulently induced FGIC to issue the Policy and (ii) materially breached its contractual obligations to FGIC.

5. The wrongdoing committed by GMACM, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through its wholly-owned subsidiary, ResCap. Ally Financial is the ultimate parent of ResCap, which owns GMACM. Ally Financial, as the ultimate parent of ResCap and GMACM, has the practical ability, which it has repeatedly exercised, to direct and control the activities of these (and other) subsidiaries. In many instances—including in this Transaction—Ally Financial's direction and control was effected by using ResCap as an intermediary instrument to achieve its goals. For example,

many of the material contractual breaches committed by GMACM, concerning, primarily, FGIC's right to access information in GMACM's possession and GMACM's failure to repurchase or cure certain of the Mortgage Loans backing the 2006-HE3 Notes that FGIC sought to have repurchased, were carried out by ResCap at the direction and control of Ally Financial.

6. GMACM was also substantially assisted in fraudulently inducing FGIC to issue the Policy by another Ally Financial subsidiary, Ally Bank, then doing business as GMAC Bank. Ally Bank and GMACM were the two principal originators of loans that became the collateral for the 2006-HE3 Transaction, and as such had intimate knowledge of the quality of the Loan Pool. In total, Ally Bank sold over $750 million in loans—accounting for approximately 88% of the Initial Loan Pool—that it had originated or acquired to GMACM to be securitized in the 2006-HE3 Transaction. Further, Ally Bank agreed to serve as custodian of the 2006-HE3 Transaction (the "Custodian")—one of the critical parties charged with certain oversight and maintenance duties with respect to the 2006-HE3 Trust—and received certain key operative documents with respect to the Transaction. With knowledge of GMACM's material misrepresentations and omissions regarding the Mortgage Loans, Ally Bank separately made representations and warranties regarding those loans for the purpose of aiding GMACM's inducement of FGIC to issue the Policy. By assisting GMACM in inducing FGIC to issue the Policy, Ally Bank was able to collect substantial fees as custodian and perpetuate its lucrative loan origination business.

7. Ally Bank has materially breached its own separate contractual agreement regarding its duties as Custodian, in particular by failing to ensure that essential documents

were included in the loan file and failing to notify FGIC of breaches of representations and warranties by GMACM of which Ally Bank was aware.

8. The 2006-HE3 Transaction is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among GMACM and several other parties whereby tens of thousands of home equity loans were pooled together and transferred to the 2006-HE3 Trust, which then issued to investors securities (*i.e.*, the 2006-HE3 Notes) collateralized by those loans.

9. In August 2006, FGIC and several other parties entered into the 2006-HE3 Transaction. The 2006-HE3 Transaction was sponsored by GMACM. To facilitate the Transaction, GMACM pooled together over sixteen thousand Mortgage Loans to provide collateral for the 2006-HE3 Notes. All of the Mortgage Loans were either originated or acquired by GMACM or Ally Bank.

10. After pooling the Mortgage Loans originated or acquired by GMACM and Ally Bank, GMACM transferred the Mortgage Loans directly or indirectly to another Ally Financial subsidiary, Residential Asset Mortgage Products, Inc. ("RAMP"). RAMP then deposited the Mortgage Loans it received from GMACM into the 2006-HE3 Trust. The 2006-HE3 Trust, in turn, issued the 2006-HE3 Notes to investors. The 2006-HE3 Trust was a legal entity created by GMACM solely for the purposes of the 2006-HE3 Transaction to hold the Mortgage Loans and to issue the 2006-HE3 Notes to investors in a registered public offering.

11. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the Trust are used to pay, among other things, principal and interest due on the 2006-HE3 Notes, and the fees and expenses of GMACM and other participants in the Transaction.

12. GMACM also acted as servicer of the 2006-HE3 Transaction (the "Servicer"). As Servicer, GMACM supervised the collection of borrower payments and performed other duties related to servicing the Mortgage Loans. As discussed in more detail below, all of GMACM's servicing operations have since been integrated into ResCap. Yet another Ally Financial subsidiary, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was co-manager of the 2006-HE3 Transaction. In addition, JPMorgan Chase Bank, N.A ("JPMorgan") agreed to act as indenture trustee of the Trust (the "Indenture Trustee").

13. GMACM, directed and controlled by Ally Financial, is, therefore, the hub of the 2006-HE3 Transaction: it is the sponsor of the securitization, the originator and seller of many of the Mortgage Loans, and has acted as servicer of all the loans that collateralize the 2006-HE3 Notes. The primary victim of the 2006-HE3 Transaction—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by GMACM—is FGIC, which has already paid out tens of millions of dollars in losses under the Policy, with further material losses still to come.

14. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed notes ("RMBS Notes"). At the time of the 2006-HE3 Transaction, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Notes typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of principal losses allocated to the RMBS

Notes. FGIC's insurance policies thus enhanced the credit quality, and marketability, of the insured securities.

15. To enhance the ratings and marketability of the 2006-HE3 Notes, and to increase the profit that GMACM would derive from the 2006-HE3 Transaction, GMACM sought to have FGIC issue the Policy to JPMorgan, as Indenture Trustee for the 2006-HE3 Notes for the benefit of the holders of the 2006-HE3 Notes.

16. As noted, to induce FGIC to issue the Policy, GMACM, *inter alia*, offered certain material representations and warranties to FGIC regarding the Transaction. These representations and warranties were false when stated, and FGIC reasonably relied on such warranties, among others, when deciding to enter into the 2006-HE3 Transaction. Additionally, those representations and warranties were false when they were restated by GMACM (for example, when GMACM added new loans to the mortgage pool). As a result, FGIC was fraudulently induced to enter the Transaction, and the credit risk assumed by FGIC in connection with the Transaction was far greater than it would have been had GMACM's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

17. GMACM received substantial assistance from Ally Bank in fraudulently inducing FGIC to issue the Policy. Ally Bank was aware of the material misrepresentations GMACM had made to FGIC, and further represented to FGIC that it would undertake duties to monitor and certify the accuracy and completeness of certain material aspects of the Mortgage Loan files, as well as inform FGIC of certain failures by GMACM to comply with its obligations under the 2006-HE3 Transaction documents. Ally Bank made these representations to FGIC despite its knowledge that GMACM had not complied—and would

not comply—with its representations and warranties to FGIC. As such, Ally Bank actively aided and abetted GMACM's fraudulent inducement of FGIC to issue the Policy.

18. Moreover, both GMACM and Ally Bank received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policy. Ally Financial took actions and made statements to boost investor confidence in, and otherwise finance and support, its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations GMACM and Ally Bank had made to FGIC. As a result of its dominance over ResCap, Ally Bank, and GMACM, Ally Financial knew that the representations and warranties GMACM and Ally Bank made to FGIC, prior to and at the closing, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted GMACM's and Ally Bank's fraudulent inducement of FGIC to issue the Policy.

19. The increased credit risk inherent in the Mortgage Loans—as a result, in part, of the high percentage of the aggregate principal amount of the Initial Loan Pool that was comprised of balloon and other high-risk Mortgage Loans—has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policy in reliance on the (presumed) accuracy and truthfulness of GMACM's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and the resulting amount of claims presented to FGIC have been overwhelming. Had FGIC been told the truth about the nature of GMACM's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the

Policy, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of GMACM's misconduct.

20. Certain of the material contractual breaches committed by GMACM and Ally Bank—including, but not limited to, its refusal to honor FGIC's right to access information in GMACM's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

21. Through this Complaint, FGIC seeks relief against GMACM, Ally Bank, ResCap, and Ally Financial for GMACM's fraudulent inducement of FGIC, and for GMACM's material breaches of its insurance agreement with, and contractual obligations owed to, FGIC in connection with the 2006-HE3 Transaction.

22. Further, FGIC seeks relief against Ally Financial and Ally Bank for aiding and abetting GMACM's fraudulent inducement, as well as for Ally Bank's material breaches of its contractual obligations to FGIC.

23. FGIC also seeks a declaration from the Court that Ally Financial, ResCap and GMACM were and continue to be alter egos of each other.

THE PARTIES

24. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

25. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial is the parent company of ResCap, GMACM, and all GMACM-affiliated entities relevant to this action.

26. Defendant GMACM is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. In the period relevant to this action,

GMACM originated, acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

27. Since 2005, GMACM has been an indirect wholly-owned subsidiary of ResCap; prior to that time, GMACM was an indirect, wholly-owned subsidiary of Ally Financial.

28. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of GMACM and its business includes originating, acquiring, selling, and servicing mortgage loans.

29. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

30. Defendant Ally Bank (f/k/a GMAC Bank), an indirect, wholly-owned subsidiary of Ally Financial, was at all times relevant to this Complaint a loan originator. To facilitate the 2006-HE3 Transaction, Ally Bank sold to GMACM over $750 million in mortgage loans that it had originated or acquired to be securitized in the Transaction. These loans comprised nearly 88% of the initial Mortgage Loans. GMAC Bank was renamed Ally Bank in May 2009. Ally Bank is an online bank chartered under Utah law.

JURISDICTION AND VENUE

31. This Court has subject matter jurisdiction over this suit pursuant to 28 U.S.C. § 1332 because there is complete diversity of citizenship between the parties and the amount in controversy exceeds $75,000, exclusive of interest and costs.

32. Venue is proper in this district under 28 U.S.C. § 1391 because a substantial part of the events giving rise to this claim occurred within this judicial district. Moreover, at

least one of the defendants in this action, GMACM, has agreed to submit to the jurisdiction of this Court, and has agreed not to challenge venue in this Court.

RELEVANT NON-PARTIES

33. RAMP, a special purpose vehicle, is an indirect, wholly owned subsidiary of Ally Financial and a Delaware corporation with its principal place of business in Minnesota. To facilitate the 2006-HE3 Transaction, RAMP purchased mortgage loans from GMACM and Walnut Grove Mortgage Loan Trust 2003-A ("Walnut Grove") and deposited those loans into the 2006-HE3 Trust. The trust then issued the 2006-HE3 Notes to the underwriters, including Ally Securities (then doing business as GMAC RFC Securities), to be sold to investors.

34. Ally Securities, an entity incorporated in Delaware, is an affiliate of GMACM and RAMP and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the 2006-HE3 Notes and, on information and belief, participated in the preparation of certain of the key offering documents for the 2006-HE3 Transaction.

35. Walnut Grove is a Delaware statutory trust established by an affiliate of GMACM. Beginning in 2003, GMACM sold to Walnut Grove second-lien mortgage loans that it had originated or acquired. To facilitate the 2006-HE3 Transaction, Walnut Grove sold certain of the Mortgage Loans to RAMP.

FACTUAL ALLEGATIONS

A. Ally Financial and its Subsidiaries

36. In the period relevant to this action, GMACM originated, acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of

those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Notes.

37. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including those of GMACM, Ally Bank, and ResCap, led Ally Financial to seek a bailout by the federal government in 2008.

(1) GMACM, GMAC-RFC, and RFC

38. GMACM is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

39. Residential Funding Corporation, LLC ("RFC") is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate GMACM, RFC engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

40. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical Annual: Volume II* at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

41. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in

January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

42. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with GMACM. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

43. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

44. Ally Financial's business model depended on securitizations, which were conducted by its business units, including GMACM. Pooling mortgage loans and selling them into securitizations enabled GMACM to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

45. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining whether a mortgage loan is in default based on the transaction documents, GMACM generally acted as servicer of its own securitizations. GMACM thereby earned servicing fees that normally amounted to 0.50% per annum of the aggregate principal balance of the mortgage loans, as well as collected fees in the range of approximately 20%-35% of any subsequent recoveries from charged-off loans.

46. GMACM also enriched Ally Financial and its other subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the 2006-HE3 Transaction:

- Ally Bank gained fees for originating nearly 88% of the loans initially comprising the 2006-HE3 Trust, and proceeds from selling those loans to GMACM; Ally Bank also gained fees as custodian of the 2006-HE3 Trust for holding certain documents;
- Walnut Grove received the proceeds from selling certain of the Mortgage Loans to RAMP (after purchasing over 28% of the loans from GMACM);
- RAMP received payments for serving as the depositor of the Mortgage Loans to the 2006-HE3 Trust; and
- Ally Securities received fees for underwriting the 2006-HE3 Notes.

(3) Ally Financial, GMACM, and RFC Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

47. GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection

with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

48. Additionally, on September 2, 2011, the Federal Housing Finance Authority ("FHFA"), as conservator for Freddie Mac, filed suit in the Supreme Court of the State of New York, New York County against Ally Financial and several of its subsidiaries for claims arising in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in certificates issued through twenty-one transactions similar to the transaction at issue here. Among other claims, FHFA brought suit for common law fraud against various Ally Financial subsidiaries and aiding and abetting fraud against Ally Financial for its intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the subject certificates.

49. The FHFA also alleges violations of state and federal securities laws by Ally Financial and several of its subsidiaries stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, FHFA also alleges aiding and abetting fraud against Ally Financial and certain of its affiliates for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs. In October 2011, Ally Financial and its co-

defendants removed the FHFA action to the U.S. District Court for the Southern District of New York.

50. In addition, GMACM is currently facing a lawsuit brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court in which MBIA alleges that in connection with three transactions similar to the one at issue here, GMACM affirmatively misrepresented the credit quality of tens of thousands of mortgage loans, with a total original principal balance of more than $4 billion, as a means of unfairly shifting to investors and MBIA risks that GMACM should have borne itself. On December 15, 2010, the New York Supreme Court issued a ruling denying GMACM's motion to dismiss, which allowed both the breach of representations and warranties and fraud claims, among others, to proceed to trial.

51. GMACM's sister company, RFC, is also currently facing a lawsuit brought by MBIA in New York Supreme Court for, among other things, fraud and breach of representations and warranties in connection with RMBS transactions. In December 2009, the New York Supreme Court rejected RFC's motion to dismiss certain of the claims brought against it, allowing both the breach of contract and fraud claims, among others, to proceed.

52. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two suits in various jurisdictions pending against Ally Financial's mortgage-related business units and subsidiaries arising from numerous mortgage-backed securities offerings. The plaintiffs in those suits have alleged, among other things, that Ally Financial's various mortgage subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. *See* Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4,

2011). Further, in its 2011 annual report, Ally Financial stated that it expects additional similar claims to be brought against Ally Financial and/or its subsidiaries in the future. *See* Ally Fin. Inc., Annual Report (Form 10-K), at 20 (Feb. 28, 2011).

53. Since the filing of its November 2011 quarterly report, moreover, Ally Financial and its subsidiaries have been sued by additional plaintiffs, including HSH Nordbank AG, which have alleged, *inter alia*, material misrepresentations and omissions about the loans backing RMBS securities issued by Ally Financial's affiliates.

54. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. During 2011, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $265 million worth of mortgages related to securitizations it consummated between 2004 and 2007. Ally Financial evidently clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own Securities and Exchange Commission ("SEC") filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Annual Report (Form 10-K), at 98 (Feb. 28, 2012).

55. Indeed, according to Ally Financial's 2011 annual report, Ally Financial, GMACM's parent, also believes that "[t]he total exposure . . . to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008, specifically the 2006 and 2007 vintages that were originated and sold prior to enhanced underwriting standards and risk-mitigation actions implemented in 2008 and forward." Ally

Fin. Inc., Annual Report (Form 10-K), at 224 (Feb. 28,, 2012). The 2006-HE3 Transaction is, as its name implies, of the 2006 vintage.

56. Additionally, Ally Financial also disclosed that the SEC served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. *See* Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

(4) The Mortgage Loan Servicing Misconduct of Ally Financial and GMACM Has Come Under Scrutiny and Resulted in Severe Sanctions

57. On February 9, 2012, the Federal Reserve Board announced that Ally Financial, its subsidiaries, and several other mortgage loan servicers would be required to pay $766.5 million in monetary sanctions for "unsafe and unsound processes and practices in residential mortgage loans servicing and foreclosure processing." Press Release, Federal Reserve Board (February 9, 2011). On February 12, 2012, the Federal Reserve Board imposed well over $200 million of this fine against Ally Financial, ResCap, and GMACM pursuant to an Assessment Order, which requires that the sanctions be paid into various borrower assistance programs and nonprofit programs established to help victims of improper servicing and foreclosure practices. *See* Order of Assessment of a Civil Money Penalty Issued Upon Consent Pursuant to the Federal Deposit Insurance Act, as Amended, FRB Docket No. 12-006-CMP-HC (February 12, 2012) (the "Assessment Order"). According to the Federal Reserve Board, the sanction "takes into account the maximum amount prescribed for unsafe and unsound practices under the applicable statutory limits, the comparative severity of the

institutions' misconduct, and the comparative sizes of the institutions' foreclosure activities." *See* Press Release, Federal Reserve Board (February 9, 2011).

58. Further, also on February 9, 2012, the U.S. Attorney General announced that Ally Financial will take part in a $25 billion settlement to resolve claims brought by the government in response to the "reckless and abusive mortgage practices" of Ally Financial and four similarly situated bank holding companies. *See* Eric Holder, U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012). Although the settlement releases Ally Financial from certain civil claims brought by the DOJ and multiple state attorneys general, *see id.*; National Mortgage Settlement Website, Settlement Documents > Servicing Standard Highlights, *available at* http://www.nationalmortgagesettlement.com/ (last visited Feb. 12, 2012), the settlement was not designed to resolve any other liabilities that Ally Financial has incurred through its improper origination, securitization, and servicing practices, *see id.*, About the Settlement, *available at* http://www.nationalmortgagesettlement.com/about (last visited Feb. 12, 2012).

59. According to the U.S. Attorney General, the $25 billion settlement and $766.5 million sanction are just "the latest step forward" in holding Ally Financial and others accountable for "egregious mortgage loan servicing abuses." *See* Attorney General Holder, Remarks at the Mortgage Servicers Settlement Press Conference.

60. Similarly, the New York Attorney General recently announced a $136 million settlement with the nation's five largest mortgage servicers—including GMAC/Ally Financial. *See* Office of the New York Attorney General Press Release, *Schneiderman Secures Major Settlement That Allows Sweeping Mortgage Investigations To Proceed*, *available at* http://www.ag.ny.gov/media_center/2012/feb/feb9b_12.htm. As the New York

Attorney General noted, the settlement principally addressed "foreclosure abuses" by GMAC/Ally Financial and other banks, and "[i]n addition to penalties for past abuses, the settlement includes direct relief to victims of wrongful foreclosure conduct" and "imposes strong national standards for mortgage servicing" that had previously been lacking. *Id.* Additionally, the New York Attorney General's office will lead the new Residential Mortgage-Backed Securities Working Group, a component of the interagency Financial Fraud Enforcement Task Force led by the DOJ, which "brings together the Department of Justice, several state law enforcement officials, and other federal agencies to investigate those responsible for misconduct contributing to the financial crisis through the pooling and sale of residential mortgage-backed securities." *Id.*

61. In addition to these recent settlements and Assessment Order, the Federal Reserve Board and the Federal Deposit Insurance Corporation (the "FDIC") previously ordered Ally Financial, GMACM, and several other Ally Financial subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See* Consent Order, FRB Docket No. 11020-B-HC (April 13, 2011) (the "Consent Order").

62. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries, including GMACM, have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

63. Furthermore, under the Consent Order, Ally Financial must direct GMACM and its other mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

64. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure processes of GMACM to request an independent review of their files. *See* Press Release, Federal Reserve Board (November 1, 2011). This independent review will determine whether errors and misrepresentations in GMACM's foreclosure processes indeed caused financial harm to the borrower. *See id.* If the foreclosure process is found to have caused financial injury to the borrower, GMACM will then be required to provide full compensation. *See id.*

65. As a result of servicing misconduct, Ally Financial and other bank holding companies will now be required to adhere to new, heightened servicing standards. *See* Press Release, Federal Reserve Board (February 9, 2011). The Federal Reserve Board has ordered Ally Financial to remedy its servicing practices by, *inter alia*, "strengthen[ing] the coordination of communications with borrowers by providing borrowers the name of the person at the service who is their primary point of contact, establish[ing] limits on foreclosures where loan modifications have been approved, establish[ing] robust third party vendor controls, strengthen[ing] compliance programs, and provid[ing] appropriate

remediation to borrowers who suffered financial injury as a result of errors by the servicers." *See id.*

66. Moreover, the servicing and foreclosure improprieties of Ally Financial and its subsidiaries is a matter of public record. According to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan Dep. *Federal National Mortgage Association v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Dist. Nine, Div. N. Cumberland) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

67. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.* at 51:15-23. Stephan further testified that when he signed an affidavit affirming that the foreclosure was proper, all he knew was the borrower's name and whether he had signing authority for the GMAC entity foreclosing on the property. *Id.* at 62:23-25,

63:2-6. Stephan testified that the process he followed in signing summary judgment affidavits was in accordance with the policies and procedures required by GMACM. *Id.* at 64:8-14.

68. Additionally, in October 2010, the Ohio Attorney General filed suit against GMACM and Ally Financial, alleging, *inter alia*, that employees of GMACM had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See State of Ohio v. GMAC Mortgage LLC*, CI0201006984, Court of Common Pleas, Lucas County, Ohio (Toledo). Although some of the claims brought by the Ohio Attorney General's suit have been resolved by the $25 billion multi-party settlement, many additional claims not encompassed by the settlement, including those relating to the improper assignment of mortgage notes, have survived. As of February 2012, the action remains pending in Ohio.

69. Similarly, in December 2011, the Massachusetts Attorney General filed suit against GMACM for, among other things, engaging in unfair and deceptive foreclosure practices. *See Commonwealth of Massachusetts v. Bank of America NA*, 11-4363, Suffolk County Superior Court (Boston). Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial and GMACM for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Boston Globe, *Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices*, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the

> federal government can take to ensure that Ally [Financial] adheres to the law.

Id.

70. While the $25 billion settlement ultimately resolved certain claims brought by the Massachusetts Attorney General in this action, several claims relating to improper foreclosure practices and abuse of certain state recordation systems have survived and will continue to be prosecuted. *See* Press Release, Office of the Attorney General of Massachusetts, *Massachusetts Homeowners to Receive $318 Million in Relief as Part of State-Federal Agreement Over Unlawful Foreclosures and Loan Servicing*, Feb. 9, 2012.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and GMACM

71. Since at least as far back as November 2011, Ally Financial has been considering filing for bankruptcy protection for ResCap, its wholly-owned subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports. GMACM is a wholly-owned, indirect subsidiary of ResCap.

72. Around that time, the financial industry was "betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering." Bloomberg News, *Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance*," November 14, 2011.

73. As the article notes, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy. *See id.*

74. Indeed, Ally Financial warned in its 2011 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 19 (Feb. 28, 2012).

75. That risk ultimately came to pass as Ally Financial recently disclosed that the penalties assessed by the federal government and numerous state attorneys general regarding the foreclosure practices of Ally Financial and its subsidiaries "resulted in our Mortgage operations recording a $230 million charge in the fourth quarter of 2011." *Id.* at 31. As Ally Financial detailed in its previous public filing, the "[t]he majority of [the charge] was recorded at Residential Capital, LLC ('ResCap') . . . [which] resulted in a covenant breach in certain of ResCap's credit facilities." Ally Financial, Current Report (Form 8-K) (January 31, 2012). Indeed, as Ally Financial more recently explained, "ResCap is required to maintain consolidated net worth . . . of $250 million at the end of each month under the terms of certain of its credit facilities. . . [and] as a result of the fourth quarter charge, ResCap's consolidated net worth was $92 million at December 31, 2011." Ally Fin. Inc., Annual Report (Form 10-K), at 31-32 (Feb. 28, 2012). ResCap's substantial shortfall, however, was "immediately remediated by Ally through a capital contribution of $197 million, which was provided through forgiveness of intercompany debt during January 2012." *Id.*

76. Moreover, in February 2012, it was reported that Ally Financial had contacted buyout firms such as Fortress Investment Group LLC and Cerberus Capital Management LP regarding a potential sale of ResCap through a pre-packaged bankruptcy to be effectuated by the end of March as ResCap faces financing and liquidity deadlines. *See* Bloomberg Businessweek, *Ally's ResCap Said to Seek Buyers for Prearranged Bankruptcy*, Feb. 8, 2012.

77. According to the report, "[p]otential bidders are being told that a pre-packaged bankruptcy filing would allow the buyer to leave behind liabilities such as [RMBS] securitizations that have been the subject of litigation." *Id.* To that end, Ally Financial's CEO, Michael Carpenter, has stated that he will not pursue the aforementioned initial public

offering for Ally Financial "until [these] legacy mortgage issues are resolved." *Id.* Nevertheless, a bondholder group representing holders of approximately $800 million in ResCap debt has expressed its desire to "fight [Ally Financial] tooth and nail" to oppose the bankruptcy, based in part on the belief that "Ally [Financial] can't legally separate itself from ResCap because it has stripped assets from the unit." Bloomberg News, *Paulson, Tepper Said Among Investors Urging Ally to Back ResCap*, Jan. 10, 2012.

78. Indeed, as Ally Financial has pointedly noted in its most recent annual report: "In light of ResCap's liquidity and capital needs combined with volatile conditions in the marketplace, there is substantial doubt about ResCap's ability to continue as a going concern." Ally Fin. Inc., Annual Report (Form 10-K), at 18 (Feb. 28, 2012).

B. GMACM's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

79. To improve the marketability and ratings of the RMBS Notes issued as part of its securitizations, GMACM from time to time sought credit enhancement for the RMBS Notes from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the one FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Notes that, if there is a shortfall in cash available to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

80. For a trust that issues RMBS Notes, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the

RMBS Notes. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the Loan Pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS investors. Such shortfalls result in claims on FGIC's policies.

(2) Securitization Sponsor's Disclosures and Representations and Warranties

81. The risk FGIC assumes when it agrees to issue a policy for RMBS Notes depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originators and the characteristics of the loans. If, for instance, GMACM and other loan originators employ substandard underwriting practices or include a significant number of balloon mortgage loans in a particular transaction, the underlying mortgage loan pool as a whole would be of inferior credit quality. Consequently, the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage portfolio as a whole, would be materially increased.

82. Accordingly, FGIC generally required securitization sponsors, like GMACM, to provide substantial representations and warranties about the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to monthly income ("DTI ratio"), the ratio of the mortgage loan principal balance to the value of the mortgaged property at origination—plus, in the case of a junior lien mortgage loan, the principal balance of the senior mortgage loan on the related mortgaged property—("LTV ratio"), and the borrower's credit score ("FICO score"). Even where GMACM did not originate a particular loan, it nonetheless is typically required to make representations about that loan, thereby assuming the risk that those representations might not be accurate. GMACM's representations and warranties, including representations about the standards and procedures used to underwrite

the loans, were intended to allow FGIC to assess the credit risk inherent in the mortgage loan pool before deciding to commit to the transaction.

83. GMACM's representations and warranties in its RMBS transactions regarding the characteristics of the loans included in the mortgage loan portfolios, and the underwriting standards used to evaluate those mortgage loans, are particularly vital because each loan pool comprised thousands of mortgage loans, each of which was in itself a complex legal transaction. Each loan file typically contains (or at least is supposed to contain) a mortgage application, a credit report, income and employment verifications, an appraisal, the lender's internal documentation and a wide variety of other documentation necessary to support proper loan underwriting decisions. Moreover, in seeking financial guaranty insurance from FGIC for the 2006-HE3 Transaction, GMACM demanded that FGIC commit to the pricing and other material terms within a very limited time frame. Both GMACM and FGIC understood and intended that FGIC would rely on the information supplied by GMACM as sponsor, as well as GMACM's representations and warranties concerning that information, in assessing the credit risk of the mortgage loan pool.

84. Further, on information and belief, for each of its securitizations, GMACM as sponsor supplied the same data it provided to FGIC to one or several rating agencies in order for those agencies to create expected loan level default and loss estimates. The loan level default and loss estimates were then used by the rating agencies to create cash flow projections and potential loss estimates for the entire transaction. Finally, the rating agencies delivered to the sponsor and to FGIC a private credit assessment for the transaction (sometimes referred to as a "shadow rating") without considering the effect of FGIC's policy. The shadow rating provided an overall evaluation of the likelihood of default on the securities

FGIC would be insuring in the securitization. As sponsor, GMACM arranged for the shadow rating to be provided to FGIC knowing that it was an essential condition to FGIC's willingness to issue a financial guaranty insurance policy.

C. The GMACM 2006-HE3 Transaction

85. On August 30, 2006, GMACM pooled together and deposited many thousands of fixed rate Home Equity Loans ("HELs") into the 2006-HE3 Trust. The 2006-HE3 Trust served as the Issuer of $1,142,334,000 aggregate principal amount of 2006-HE3 Notes. Home equity loans are essentially second-lien mortgage loans, which are generally funded entirely at the closing of the loan.

86. The initial conveyance to the 2006-HE3 Trust by RAMP (acting as Depositor) contained over 16,500 HELs with an aggregate principal balance of approximately $862 million. Investors in the GMACM-sponsored 2006-HE3 Transaction were issued five classes of securities (*i.e.*, the 2006-HE3 Notes)—Class A-1 Notes, Class A-2 Notes, Class A-3 Notes, Class A-4 Notes, and Class A-5 Notes (formally termed the GMACM Home Equity Loan-Backed Term Notes, Series 2006-HE3)—which were collateralized by the Mortgage Loans transferred to and held by the 2006-HE3 Trust. In addition, approximately $287 million was deposited into a pre-funding account at closing, which was used to acquire additional Mortgage Loans in the 90 days following the closing.

87. To enhance the ratings and marketability of the 2006-HE3 Notes, GMACM sought a financial guaranty insurance policy from FGIC for the purpose of insuring the transaction for the benefit of the certificate holders. On August 30, 2006, GMACM and FGIC executed an Insurance and Indemnity Agreement (the "I&I Agreement"), under which FGIC agreed to and did issue Policy number 06030099 to insure the 2006-HE3 Notes. The I&I Agreement was signed by FGIC (as the "Insurer" of the Transaction); GMACM (as the

"Servicer" and a "Seller" for the Transaction); RAMP (as the "Depositor" for the Transaction); Walnut Grove (as a "Seller" for the Transaction); and JPMorgan (as the "Indenture Trustee" for the Transaction). The Bank of New York Trust Company, N.A., later became the successor in interest to JPMorgan as Indenture Trustee.

88. Also on August 30, 2006, Ally Bank (using its then-current name, GMAC Bank) entered into a Custodial Agreement whereby it agreed to serve as Custodian of the underlying mortgage loan notes on behalf of the 2006-HE3 Trust. FGIC is an express third party beneficiary of that agreement. *See* Custodial Agreement § 5.6.

89. The I&I Agreement provides that FGIC (the Insurer) is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." I&I Agreement § 2.02(k). "Operative Documents" are defined to include, among other documents: (i) the 2006- HE3 Notes; (ii) the Mortgage Loan Purchase Agreement dated as of August 30, 2006 among GMACM, RAMP, Walnut Grove and JPMorgan (the "MLPA"); (iii) the Servicing Agreement dated as of August 30, 2006 among GMACM, the 2006-HE3 Trust and JPMorgan; (iv) the Indenture dated as of August 30, 2006 between the 2006-HE3 Trust and JPMorgan; and (v) the Custodial Agreement dated as of August 30, 2006 among GMACM, JPMorgan, and Ally Bank. *See* I&I Agreement § 1.01. FGIC is referred to as the "Enhancer" under certain of the Operative Documents.

90. Pursuant to the I&I Agreement, FGIC insured $1,142,334,000 aggregate principal amount of the 2006-HE3 Notes. The Policy improved the marketability of the 2006-HE3 Notes by mitigating risk for potential investors and making the 2006-HE3 Notes eligible to receive a credit rating of triple-A by the rating agencies at closing.

91. GMACM and the Depositor offered the 2006-HE3 Notes for sale pursuant to a prospectus, dated August 9, 2006 (the "Prospectus"), and a prospectus supplement, dated August 28, 2006 (the "Prospectus Supplement"), which touted the Policy and the "triple-A" initial rating of the 2006-HE3 Notes, which was made possible by the Policy. The Prospectus and Prospectus Supplement, together with certain preliminary offering documents, each as further supplemented by any subsequent amendment or supplement thereto, and any other offering document that makes reference to the Policy, are referred to collectively as the "Offering Documents."

92. On August 30, 2006, an Ally Financial subsidiary, Ally Securities, sold the 2006-HE3 Notes to investors, and FGIC issued the Policy in accordance with the terms of the I&I Agreement.

D. GMACM Fraudulently Induces FGIC to Insure the 2006-HE3 Notes with Substantial Assistance from Ally Financial and Ally Bank

(1) GMACM's Fraudulent Inducement of FGIC

93. FGIC's participation in the 2006-HE3 Transaction was an essential component of the 2006-HE3 Transaction and enhanced GMACM's ability to market the securitization effectively. The Policy allowed GMACM to sell the 2006-HE3 Notes with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

94. In order to induce FGIC to write financial guaranty insurance for the 2006-HE3 Transaction, GMACM represented to FGIC, among other things, that the percentage of the aggregate principal amount of the Initial Loan Pool that was composed of balloon mortgage loans did not exceed 7.61%; that the weighted average original term to scheduled maturity of the Initial Loan Pool was 272 months; and that the weighted average remaining term to scheduled maturity of the Initial Loan Pool was 270 months. Those representations,

among others, were formally stated in the Offering Documents, restated in the Operative Documents, and further reflected in the loan tape and other information that GMACM provided to FGIC, directly or indirectly.

95. Additionally, GMACM provided further material information, on which FGIC relied in determining whether and on what terms to issue the Policy.

96. *First*, GMACM provided to FGIC initial and final Prospectus Supplements, which summarized, among other material information, the credit quality and characteristics of the Mortgage Loans, and GMACM's loan underwriting guidelines and loan origination criteria.

97. *Second*, GMACM provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in the 2006-HE3 Transaction, together with representations regarding material statistics about the Initial Loan Pool as a whole.

98. *Third*, GMACM provided to FGIC credit ratings for the 2006-HE3 Notes determined on the basis of information concerning the characteristics of the Mortgage Loans supplied to the rating agencies by GMACM, but without considering the effect of the Policy. These ratings, which GMACM procured from the credit rating agencies, are known as "shadow ratings."

99. *Fourth*, as discussed in detail in Section E below, GMACM provided to FGIC representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreement regarding the Mortgage Loans specifically and the Loan Pool generally.

100. ***Balloon Mortgage Loans***. Included in the Prospectus Supplement and the MLPA was the representation—on which FGIC relied in deciding to issue the Policy on the

agreed terms—that, as at closing, "[a]pproximately 7.61%" of the Mortgage Loans "are not fully amortizing over their terms to maturity and, thus, will require substantial principal payments, sometimes called a balloon amount, at their stated maturity." Prospectus Supplement at S-17; *see also* MLPA § 3.1(b)(xxii).

101. In a balloon mortgage, the amount of the monthly payments to be made by the borrower are generally based on the same amortization schedule as applies to non-balloon mortgages—*e.g.*, a 30-year term—but the maturity date of the mortgage loan is fixed for some date before the expiration of the term used to set the payment schedule. The balloon mortgage loans at issue had maturity dates of approximately 15 years from the due date of the first monthly payment, while having their monthly payment amounts determined according to a 30-year amortization schedule. Since the monthly payments are based on a 30-year schedule, but the maturity date occurs some time in advance of 30 years, a balloon mortgage loan will not have fully amortized by the maturity date, leaving a significant portion of the principal outstanding at that date. The outstanding principal amount, which can be orders of magnitude larger than the borrower's usual monthly payment, must nevertheless be paid by the borrower at maturity. Thus, as the Prospectus Supplement pointedly concedes: "Mortgage loans which require payment of a balloon amount involve a greater degree of risk because the ability of a mortgagor to pay a balloon amount typically will depend upon the mortgagor's ability either to timely refinance the loan or to sell the related mortgaged property." Prospectus Supplement at S-17.

102. GMACM also represented that the weighted average remaining term to scheduled maturity for the Initial Loan Pool—including the balloon mortgage loans—would

be 270 months, and that the weighted average original term to scheduled maturity of the Initial Loan Pool would be 272 months. *See id.* at S-9; *see also* MLPA § 3.1(b)(xxii).

103. Additionally the mortgage loan tape provided to FGIC by GMACM included a "Balloon Indicators" column, which purported to flag as "N" all regularly amortizing loans (*i.e.*, all non-balloon mortgage loans), and the aggregate principal balance of balloon mortgage loans flagged as such in the Balloon Indicators column roughly corresponded with the percentage of the aggregate principal amount of the Initial Loan Pool warranted to be comprised of balloon mortgages by GMACM in the Prospectus Supplement and MLPA (*i.e.*, 7.61%).

104. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the 2006-HE3 Notes, FGIC relied in part upon representations and warranties regarding GMACM's loan underwriting standards made by GMACM in the Prospectus and Prospectus Supplement. The Prospectus, as supplemented by the Prospectus Supplement, was filed with the SEC and became effective on August 30, 2006. A Preliminary Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about August 23, 2006, in an email sent by Marty Howard, on behalf of GMACM. The Final Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about August 29, 2006, in an email sent by Jeffrey Wittenberg on GMACM's behalf.

105. In the Offering Documents, GMACM represented that, based on the data provided in the borrower's application and certain other applicable verifications, "a determination will have been generally made by the original lender that the borrower's monthly income, if required to be stated, would be sufficient to enable the borrower to meet

its monthly obligations on the loan and other expenses related to the property." Prospectus at 23. Further, in the Prospectus Supplement, GMACM also represented to FGIC that:

> The mortgage loans were selected for inclusion in the mortgage pool from among mortgage loans originated or purchased in connection with [GMACM's] Underwriting Standards . . . based on [GMACM's] assessment of investor preferences and rating agency criteria.

Prospectus Supplement at S-29.

106. The Prospectus Supplement expressly states that GMACM's "underwriting standards with respect to the mortgage loans generally will conform to those published in the GMAC Mortgage Corporation underwriting guidelines, including the provisions of the GMAC Mortgage Corporation underwriting guidelines applicable to the GMAC Mortgage Home Equity Program." Prospectus Supplement at S-31.

107. GMACM publishes its loan underwriting standards in a document referred to in the Prospectus Supplement as "the GMAC Mortgage Corporation underwriting guidelines" (and referred to herein as the "Underwriting Guidelines"). *Id.* In general, the Underwriting Guidelines specify documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan. Depending upon the particular type of loan, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories and/or evidence of closing funds, among other things. The substantive criteria for eligibility address material characteristics of the proposed loan, such as DTI ratios, Combined Loan-to-Value ("CLTV") ratios (a ratio comparing the aggregate principal balance of first and second mortgages on a covered property to the value of the property), and occupancy status.

108. The Prospectus Supplement sets forth, among other information, the following important characteristics of the Initial Loan Pool: the ranges of and weighted average FICO

scores, the ranges of and weighted average CLTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (*i.e.*, whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). *See* Prospectus Supplement at A-I-1 - A-I-7.

109. In particular, GMACM represented in the Prospectus Supplement that the loans had generally been originated with a maximum DTI ratio of 45% and a maximum CLTV ratio of 100%. *See* Prospectus Supplement at S-33. GMACM also represented that for each Mortgage Loan it had made a determination based upon all applicable employment, credit and property information regarding whether the prospective borrower had sufficient monthly income available to meet the borrower's monthly obligations. *See* Prospectus at 23 and Prospectus Supplement at S-34.

110. GMACM also represented in the Offering Documents that, with respect to occupancy status, 98.68% of the Mortgage Loans would be secured by the borrower's primary residence. *See* Prospectus Supplement at A-1-4.

111. Further, as discussed, the Prospectus Supplement contained material representations in respect of the balloon mortgage loans and the maturity characteristics of the Initial Loan Pool.

112. ***Loan Tapes.*** The loan tapes provided by GMACM set forth, for each loan in the Initial Loan Pool, key characteristics such as the borrower's FICO score, DTI ratio and the CLTV ratio for the loan. GMACM also disclosed in the Prospectus Supplement—with respect to the Loan Pool as a whole—aggregate characteristics also relevant to the assessment of the credit risk of the pool, including weighted averages of FICO scores, DTI ratios and

CLTV ratios. The loan tape also contained certain key maturity date characteristics of the Initial Loan Pool, as well as information pertaining to the number of balloon mortgage loans among the Initial Mortgage Loans. The loan tape was provided to FGIC prior to the closing of the Transaction on August 11, 2006.

113. ***Shadow Rating Letters***. GMACM, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. As requested by GMACM, Moody's and S&P provided the shadow ratings to FGIC on the closing date of the Transaction. In its letter to FGIC describing the shadow rating for the 2006-HE3 Transaction, Moody's noted that it reviewed the documentation provided by GMACM and that the rating "is based primarily on the credit quality of the loans backing the transaction." Similarly, in its letter to FGIC, S&P noted that it too relied on the information provided to it by GMACM and that the shadow rating "relies on the issuer . . . for the accuracy and completeness of the information submitted in connection with the private credit assessment." Based on the information supplied by GMACM, Moody's assessed the credit quality of the Initial Loan Pool and assigned a shadow rating of Baa2 to the 2006-HE3 Notes, while S&P assigned the 2006-HE3 Notes a shadow rating of BBB-.

114. These shadow ratings, which were based, in part, on GMACM's representations in respect of the balloon mortgage loans and the maturity characteristics of the Initial Loan Pool, met FGIC's minimum requirements and were required by FGIC as an essential condition to its willingness to participate in the 2006-HE3 Transaction and issue the Policy.

(2) GMACM's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Bank

115. Ally Bank provided substantial assistance to GMACM in fraudulently procuring the Policy from FGIC. As it originated or acquired nearly 88% of the Mortgage Loans, Ally Bank was well aware of the true characteristics of the majority of the Loan Pool.

116. Additionally, on August 29, 2006, prior to the closing of the 2006-HE3 Transaction, several representatives of Ally Bank—including Michael Hebling, Donna Harkness, Dave Chiodo, Eleanor Whittall, Linda Rogers, Lauren Coffman, and Tiffany Toale—received an e-mail sent from Jeffrey Wittenberg on behalf of GMACM that attached a true and correct copy of the MLPA.

117. As a result of its affiliate status with GMACM, its role as Custodian for the 2006-HE3 Transaction—for which it received substantial fees— and having directly received the MLPA prior to closing, Ally Bank was aware of the representations and warranties GMACM made to FGIC regarding the nature of GMACM's business practices and the characteristics of the Mortgage Loans (including the many thousands of Mortgages Loans that were originated by Ally Bank).

118. With full knowledge that GMACM had not complied—and would not comply—with the representations and warranties it made to FGIC, and direct knowledge of the many thousands of loans it had originated and sold to GMACM, which formed a substantial part of the collateral for the 2006-HE3 Transaction, Ally Bank represented to FGIC that, as Custodian, it would inform FGIC if it discovered any non-compliant Mortgage Loans or non-compliance with GMACM's obligations under the Operative Documents. By offering FGIC this false comfort, despite knowing that GMACM was fraudulently inducing

FGIC to provide financial guaranty insurance for the 2006-HE3 Transaction, Ally Bank provided material assistance to GMACM's fraud.

(3) GMACM's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

119. Ally Financial provided substantial assistance to its subsidiaries GMACM and Ally Bank in fraudulently inducing FGIC to participate in the 2006-HE3 Transaction and, ultimately, issue the Policy. Ally Financial knew that the Mortgage Loans underlying the 2006-HE3 Transaction were of a substantially poorer quality than was represented to FGIC and other participants in the Transaction, including investors. Ally Financial further knew that the Mortgage Loans were not underwritten to the standards represented in the Offering Documents and warranted in the Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap, Ally Bank, and its other subsidiaries, Ally Financial knew that the representations and warranties GMACM made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

120. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to engender investor confidence in, and otherwise finance and support, its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

121. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

122. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries."

123. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

124. Ally Financial's corporate restructuring also allowed GMACM to explicitly represent and warrant to FGIC in the I&I Agreement that GMACM "is solvent, and will not be rendered insolvent by the Transaction. . . . [GMACM] shall not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." I&I Agreement § 2.01(m). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary GMACM.

125. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the 2006-HE3 Transaction—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in

many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

126. Moreover, as a result of its domination and control over ResCap, GMACM, and Ally Bank, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of GMACM's representations and warranties to FGIC—and that they were untrue when stated—as well as the substantial assistance Ally Bank was rendering GMACM in aid of its fraudulent inducement of FGIC. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including GMACM, shared numerous directors and senior management as well. Similarly, William F. Muir, Ally Financial's President, has served in that capacity since at least 2004 (first at GMAC and then at Ally Financial) while also serving as President and Chairman of the Board of IB Finance Holding Company, LLC—the direct parent of Ally Bank—and as a director of Ally Bank.

127. David C. Walker is another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, including GMACM and RAMP. Walker joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. Walker has also served as a director at ResCap,

GMACM, RFC, and RAMP, among other ResCap subsidiaries. In the 2006-HE3 Transaction, acting as a director of RAMP, Walker was a signatory to RAMP's December 20, 2005 "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors," which was included among the closing documents of the 2006-HE3 Transaction.

128. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, Ally Bank, and GMACM, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by GMACM was shared among and between GMACM and its parent ResCap, ResCap and its parent Ally Financial, and Ally Bank and its parent and affiliates. Indeed, at least one Ally Financial employee who was involved in the 2006-HE3 Transaction appeared on the Transaction's working group list and received all distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

129. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to GMACM in fraudulently inducing FGIC to participate in the Transaction and issue the Policy. Further, the issuance of the Policy, which made the 2006-HE3 Transaction possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. GMACM's Representations, Warranties and Affirmative Covenants

130. In connection with the 2006-HE3 Transaction, GMACM, at the direction of Ally Financial, either directly or indirectly through ResCap, gave numerous representations,

warranties and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way GMACM conducted its loan origination, selection and evaluation process, the characteristics of the Mortgage Loans and the Initial and complete Loan Pool, the percentage of the aggregate principal amount of the Initial Loan Pool to be made up of balloon mortgage loans, and the accuracy and completeness of the information supplied to FGIC. These and other characteristics of the Mortgage Loans included in the Initial Loan Pool were detailed in a schedule attached to the Servicing Agreement and provided to FGIC by GMACM in the form of the loan tape (the "Mortgage Loan Schedule"). Moreover, these same representations and warranties were restated by GMACM when it transferred additional Mortgage Loans to the 2006-HE3 Trust after the closing of the Transaction (as was permitted for a short period following closing).

131. GMACM further promised to provide FGIC with a variety of information, including access to GMACM's books and records and to GMACM's Chief Financial Officer and its independent accountants.

132. GMACM's representations and warranties, and particularly GMACM's representation that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into the 2006-HE3 Transaction and to issue the Policy on the agreed terms. Further, the I&I Agreement's incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and every one of the representations and warranties that GMACM made in connection with the 2006-HE3 Transaction.

133. FGIC, for its part, reasonably relied on the information available to it regarding the underlying Mortgage Loans and the representations and warranties provided by GMACM.

Since FGIC had neither the right under the Operative Documents, nor the practical ability, to review the thousands of underlying Mortgage Loan files, GMACM knew that FGIC had no choice but to rely on GMACM's representations regarding the underlying loans in determining whether to issue the Policy. Further, FGIC had no reason to believe that those representations were not true and accurate.

134. Indeed, GMACM included more than 16,500 individual Mortgage Loans in the 2006-HE3 Transaction at closing, and several thousand more Mortgage Loans post-closing. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation and other forms of documentation necessary to support each underwriting decision. Unlike GMACM, FGIC was under no contractual duty whatsoever to review the more than 16,500 Initial Mortgage Loans or the thousands of Mortgage Loans subsequently transferred after closing. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by GMACM regarding its loan origination, selection, and evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on GMACM to conduct its underwriting processes according to the promised standards, and FGIC had no basis to conclude that GMACM's representations and warranties were false. Thus, FGIC reasonably believed that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

135. Based on the information received by FGIC and the representations and warranties given by GMACM, FGIC entered into the I&I Agreement and agreed to issue the Policy to the Indenture Trustee for the benefit of the holders of the 2006-HE3 Notes. In return

for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the 2006-HE3 Notes. Specifically, FGIC received 0.12% per annum of the aggregate balance of the 2006-HE3 Notes for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties, and affirmative covenants provided by GMACM.

136. As discussed below, GMACM's information, representations and warranties were materially false when disclosed and/or provided by GMACM. GMACM knew that this information, and its representations and warranties, were materially false when made. GMACM also knew that this information and the representations and warranties were essential to FGIC's decision to issue the Policy. Indeed, GMACM intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and issue the Policy. The issuance by FGIC of the Policy—induced by GMACM's fraudulent misrepresentations and substantial assistance by Ally Financial—made the 2006-HE3 Notes eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(1) Breaches of Representations and Warranties Regarding Balloon Mortgage Loans

137. As the Transaction began to perform poorly, FGIC conducted a review of the Mortgage Loans and discovered that thousands of Mortgage Loans in the Initial Loan Pool that were in fact balloon mortgages were not characterized as such by GMACM. Instead, the "Balloon Indicators" column in the Mortgage Loan Schedule provided at closing falsely flagged those thousands of Initial Mortgage Loans as "N"—indicating to FGIC they were regularly amortizing loans and not balloon loans.

138. Despite conceding the higher degree of credit risk inherent in balloon mortgage loans, and affirmatively representing that only 7.61% of the aggregate principal amount of the Initial Loan Pool (corresponding to approximately 1,292 Mortgage Loans with an approximate aggregate principal balance of $65 million) would be comprised of balloon mortgages, in fact over 26% of the aggregate principal amount of the Initial Mortgage Loans (corresponding to approximately 4,300 Mortgage Loans with an aggregate principal balance of more than $226 million) were balloon mortgages. Each of these balloon mortgage loans had been originated or acquired and transferred to the 2006-HE3 Trust, by GMACM, , or one of its affiliates.

139. In sum, the 2006-HE3 Trust contained at least 3,013 more high-risk balloon mortgage loans—accounting for at least $160 million in aggregate principal amount—than FGIC could have reasonably expected in reliance on the percentages regarding this type of loan that GMACM represented and warranted in the Offering Documents and the MLPA, thus constituting a material breach of the I&I Agreement.

140. Additionally, the mischaracterization and omissions regarding the undisclosed balloon mortgage loans on the Mortgage Loan Schedule and/or the loan tape represent further material breaches of the I&I Agreement by GMACM.

141. Moreover, FGIC has determined that, the weighted average remaining term to scheduled maturity and the weighted average original term to scheduled maturity of the Initial Loan Pool—taking into account the previously undisclosed and misidentified balloon mortgage loans—differ materially from the figures represented to FGIC by GMACM. The true weighted average remaining term to scheduled maturity of the Initial Loan Pool was in fact approximately 236 months, and not 270 months, as stated in the Offering Documents and

the MLPA. Additionally, the true weighted average original term to scheduled maturity for the Initial Loan Pool was in fact approximately 238 months, and not 272 months, as represented in the Offering Documents. These misrepresentations by GMACM, separately and apart from the misrepresentation of the balloon loan status of the Mortgage Loans, are material breaches of the I&I Agreement.

142. Further, FGIC has determined that the rate of Mortgage Loan non-performance (*i.e.*, loans that were delinquent for more than 60 days, in foreclosure, charged-off, or liquidated) in the 2006-HE3 Transaction for the over 3,000 undisclosed and mis-flagged balloon mortgage loans was almost 50% greater than the non-performance rate of the non-balloon mortgage loans in the 2006-HE3 Transaction.

(2) Other Representations, Warranties and Affirmative Covenants Relating to the Operative and Offering Documents

143. Under Section 2.01 of the I&I Agreement, GMACM made the following representations and warranties, among others (emphasis added in each case):

- *Accuracy of Information.* **Neither the Operative Documents to which it is a party nor other information relating to the Mortgage Loans**, the operations of GMACM. . . or the financial condition of GMACM . . . furnished to [FGIC] . . . by GMACM . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made** . . . . GMACM . . . has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change with respect to GMACM . . . Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to GMACM . . . that would render any of the Documents untrue or misleading in any material respect.

- *Compliance with Securities Laws.* The offering and sale of the Securities complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state material fact necessary to make the statements made therein,**

in light of the circumstances under which they were made, not misleading . . . .

- *Operative Documents.* **Each of the representations and warranties of GMACM . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects** [and] GMACM . . . hereby makes each such representation and warranty to, and for the benefit of, [FGIC] as if the same were set forth in full herein.

- *Solvency; Fraudulent Conveyance.* GMACM . . . is solvent and will not be rendered insolvent by the Transaction and . . . **GMACM . . . shall not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**, and . . . GMACM . . . does not intend to incur, or believe that it has incurred, debts beyond its ability to pay as they mature. . . . GMACM . . . is not transferring the Mortgage Loans . . . with any intent to hinder, delay or defraud . . . creditors.

144. *First*, in the I&I Agreement, GMACM represented and warranted to FGIC that "[n]either the Operative Documents to which it is a party nor other information relating to the Mortgage Loans. . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." I&I Agreement § 2.01(j). Through these Operative and Offering Documents, GMACM communicated several material facts about the characteristics of the mortgage loans sold to the 2006-HE3 Trust.

145. *Second*, in the I&I Agreement, GMACM represented and warranted that "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading." *Id.* § 2.01(k).

146. As discussed above, in the Prospectus Supplement, GMACM represented that all of the mortgage loans sold to the 2006-HE3 Trust had been underwritten generally in

accordance with GMACM's underwriting standards, including the GMAC Mortgage Home Equity Program. Prospectus Supplement at S-31.

147. Additionally, as discussed above, GMACM also made express representations that only 7.61% of the aggregate principal amount of the Initial Mortgage Loans would be balloon mortgages, and that the Initial Loan Pool in the aggregate had a weighted average remaining term to scheduled maturity of 270 months and a weighted average original term to scheduled maturity of 272 months. *See* Prospectus Supplement at S-9; *see also* MLPA § 3.1(b)(xxii).

148. *Third*, the I&I Agreement incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the "Operative Documents," as that term was defined in the I&I Agreement: "[e]ach of the representations and warranties . . . contained in the applicable Operative Documents . . . is true and correct in all material respects[.]" *See* I&I Agreement §§ 1.01, 2.01(l). The incorporation by reference of the Operative Documents into the I&I Agreement was intended to allow FGIC to rely on any representation and warranty that GMACM made to other entities, such as investors or the Indenture Trustee, in connection with the 2006-HE3 Transaction. Indeed, the I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. *See* I&I Agreement § 2.02(k).

149. *Fourth*, GMACM also provided information to FGIC concerning the Mortgage Loans in the Loan Pool for the 2006-HE3 Transaction. *See* I&I Agreement § 2.02(c)(iii). This information included loan tapes that set forth statistics about the Loan Pool. The loan tapes purported to describe key characteristics relevant to the assessment of risk, including DTI ratios, CLTV ratios, occupancy status and FICO scores, and an identification of whether

a particular Mortgage Loan was a balloon mortgage loan. *See* MLPA § 2.1(d). On information and belief, the loan tape FGIC received at closing contains the same information as is contained in the Mortgage Loan Schedule referred to in the MLPA.

150. In turn, in the MLPA, GMACM represented that all the information in that Mortgage Loan Schedule "is true and correct in all material respects as of the date or dates respecting which such information is furnished." MLPA § 3.1(b)(i).

151. As a result of incorporating into the I&I Agreement the representations and warranties in the related Operative Documents, GMACM incorporated representations and warranties regarding the underwriting of the Mortgage Loans included in the 2006-HE3 Transaction. These representations and warranties set forth the standards governing each Mortgage Loan, including, significantly, the representation that the Mortgage Loans had been underwritten in compliance with GMACM's underwriting guidelines. *See* MLPA § 3.1(b)(xxxvi).

152. In particular, in the MLPA, GMACM represents and warrants that:

- The information set forth in the Mortgage Loan Schedule with respect to each Mortgage Loan or the Mortgage Loans is true and correct in all material respects as of the date or dates respecting which such information is initially furnished;
- As of the Cut-Off Date or related Subsequent Cut-Off Date, no Mortgage Loan was 30 days or more delinquent in payment of principal or interest;
- With respect to the GMACM Initial Mortgage Loans or, as applicable, any Subsequent Mortgage Loans sold by GMACM, the related Mortgage File contains or will contain, in accordance with the definition of "Mortgage File" in Appendix A to the Indenture, each of the documents and instruments specified to be included therein;
- As of the Cut-Off Date or Subsequent Cut-Off Date, the CLTV for each Mortgage Loan was not in excess of 100.00%;

- GMACM used no selection procedures that identified the Mortgage Loans as being less desirable or valuable than other comparable mortgage loans originated or acquired by GMACM under the GMACM Home Equity Program;

- Only 7.61% of the aggregate principal amount of the Initial Loan Pool would be comprised of balloon mortgage loans; and

- The weighted average remaining term to scheduled maturity of the Initial Mortgage Loans was 270 months.

153. Moreover, in the I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—GMACM specifically covenants that it will "comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreement § 2.02(a).

(3) Representations, Warranties, and Affirmative Covenants Regarding Servicing and Access to Information

154. The I&I Agreement also incorporates the representations and warranties that GMACM made in the Servicing Agreement in its capacity as Servicer. *See* I&I Agreement § 2.02(l). Under the I&I Agreement, GMACM covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the [Servicing Agreement]." I&I Agreement § 2.02(l). In the Servicing Agreement, GMACM covenanted, represented, and warranted that, so long as it acted as Servicer, it would service the Mortgage Loans in the 2006-HE3 Transaction in a manner consistent with its own servicing guidelines. *See* Servicing Agreement § 3.01(a).

155. Additionally, the Servicing Agreement entered into by GMACM as the original Servicer of the Transaction provides that, "documents contained in the Mortgage File . . . shall be held by the Servicer in trust as agent for the Indenture Trustee on behalf of the Noteholders." Servicing Agreement § 3.01(c). As such, and as the Servicing Agreement

makes plain, the information and documents regarding the Mortgage Loans are not the property of or otherwise owned by GMACM, but rather such files are to be held by the servicer of the Transaction—whether that party be GMACM or a third party. Moreover, through the Servicing Agreement, GMACM expressly covenanted that, in the event GMACM's servicing duties are terminated and transferred to another party, GMACM "agrees to cooperate with the Issuer, the Enhancer [*i.e.*, FGIC] and Indenture Trustee, as the case may be, in effecting the termination of the responsibilities and rights of the Servicer." *Id.* at § 7.01(a). FGIC is an express third-party beneficiary of the Servicing Agreement. *See id.* at § 8.05.

156. The I&I Agreement affords FGIC the express right to "inspect the books and records of GMACM . . . [and to] discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and with GMACM's consent, which consent shall not be unreasonably, withheld or delayed, to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants." I&I Agreement § 2.02(e)(i)-(iii).

157. The I&I Agreement further provides that GMACM shall furnish to FGIC, promptly upon request, such data as FGIC may reasonably request. *See* I&I Agreement § 2.02(c)(v).

F. GMACM's Breaches of Its Representations, Warranties and Affirmative Covenants

158. As discussed above, FGIC relied on material representations and warranties made by GMACM regarding the manner in which the Mortgage Loans were originated, selected, and evaluated, the characteristics of those loans, and the accuracy and completeness of information GMACM supplied to FGIC, including in respect of the balloon mortgage loans. Based on those representations and warranties, FGIC agreed to issue the Policy. In

fact, as demonstrated by the extreme levels of delinquencies and losses detailed below, the risk that FGIC assumed when it issued the Policy was many times greater than the risk disclosed by GMACM's representations and warranties. GMACM breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

159. The 2006-HE3 Transaction has performed poorly, and delinquencies and defaults for Mortgage Loans in the 2006-HE3 Transaction have been substantial. As of December 2011, a staggering 2,600 mortgage loans, had been liquidated or were delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue the Policy, which covers, *inter alia*, shortfalls in amounts paid to noteholders arising from liquidated Mortgage Loans, GMACM assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with GMACM's own representations and warranties.

160. The poor performance of the Mortgage Loans has reduced the cash flow to the 2006-HE3 Trust, which has caused, and will continue to cause, substantial claims to be presented to FGIC under the Policy to cover these shortfalls. As of February 2012, more than $82.9. million in claims had been presented to FGIC in connection with the 2006-HE3 Transaction. FGIC expects tens of millions of dollars more in claims to be presented to it under the 2006-HE3 Transaction in the future.

161. As an increasingly high percentage of the 2006-HE3 Mortgage Loans enter delinquency and default, FGIC has uncovered a wealth of material breaches of GMACM's representations and warranties regarding the characteristics of the loans and the standards to which they were underwritten.

(1) Breaches Identified Through Initial Review

162. When FGIC became concerned about the high delinquencies and default rates in the 2006-HE3 Transaction, FGIC requested that GMACM provide it with certain Mortgage Loan files underlying the 2006-HE3 Transaction.

163. FGIC selected for review a number of non-performing (*i.e.*, non-current or charged-off) loans that had resulted in a loss to the 2006-HE3 Trust. To perform this review, FGIC hired an independent outside consultant with particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

164. That review revealed that GMACM had breached one or more material representations and warranties with respect to approximately 97% of the loans reviewed.

(2) Breaches Identified Through Additional Review

165. In 2010, as the 2006-HE3 Transaction continued to perform poorly, FGIC again retained a professional mortgage loan review team to identify, review, and evaluate a statistically significant sample of mortgage loans in the 2006-HE3 Transaction.

166. FGIC's independent loan consultant reviewed 120 loan files received by FGIC. That review revealed that GMACM had breached one or more material representations, including those concerning balloon mortgages, with respect to 117, or an astounding 97.5%, of these loans.

(3) GMACM's Pervasive and Material Breaches of Its Representations and Warranties and Affirmative Covenants

167. FGIC ultimately obtained access to 164 Mortgage Loan files, which FGIC's independent consultant reviewed to evaluate and re-underwrite the Mortgage Loans. These reviews revealed that GMACM breached one or more material representations with respect to 160—or a shocking 97.6%—of the Mortgage Loans reviewed.

168. A small sample of these material breaches and underwriting violations are listed below:

- Loan Number 8656112510: due to an income misrepresentation, the loan closed with a DTI of 301.92%. In order for this mortgage loan to have been eligible for inclusion in the 2006-HE3 pool, the relevant guidelines for the particular type of loan underwritten permit a maximum DTI ratio of 50%.

- Loan Number 89646124: the loan was appraised using a comparable property that was sold 9 months prior to the closing date. Further, the loan was not disclosed in the Mortgage Loan Schedule as being a balloon mortgage loan. The Mortgage Loan Schedule reported the term and maturity date for the loan as 360 months and July 1, 2036, however the mortgage note states a term of 180 months and a maturity date of July 1, 2021, indicating a balloon mortgage loan.

- Loan Number 8253572070: the loan was refinanced as an owner occupied property, however the borrower's credit report did not list the property address as their current or previous address. In order for this mortgage loan to have been eligible for inclusion in the 2006-HE3 pool, the relevant guidelines for the particular type of loan underwritten require that the property is owner-occupied.

169. These examples of underwriting violations are but a small smattering of the extensive defects among the Mortgage Loans, and evidence significant breaches of the MLPA. *See* MLPA § 3.1. And it is reasonable to conclude—based on what is now known by FGIC—that a substantial majority of the Mortgage Loans that were ultimately transferred to the 2006-HE3 Trust evidence similar breaches of GMACM's representations and warranties.

170. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicate clear breaches of GMACM's contractual representations, warranties and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans and the Initial and final Loan Pool, including the guidelines to which the Mortgage Loans were underwritten and key statements regarding the balloon mortgage loans included in the 2006-HE3 Trust.

171. Specifically, with respect to the 2006-HE3 Transaction, GMACM made—and breached—representations and warranties stating, as of the closing date, that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (*i.e.* the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of GMACM in the Operative Documents (including each representation and warranty in the MLPA) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- no Mortgage Loan was 30 days or more delinquent as of August 1, 2006 (or the date the loan was transferred to the 2006-HE3 Trust);
- each Mortgage File contains all required documents and instruments;
- the CLTV of each Mortgage Loan did not exceed 100%;
- GMACM selected the Mortgage Loans in accordance with its underwriting guidelines (*i.e.* the Home Equity Loan Program);
- only 7.61% of the aggregate principal amount of the Initial Loan Pool would be comprised of balloon mortgage loans;
- the weighted average remaining term to scheduled maturity of the Initial Mortgage Loans was 270 months; and
- the weighted average original term to scheduled maturity of the Initial Mortgage Loans was 272 months.

172. Many of these representations were repeated in connection with the subsequent transfer of additional Mortgage Loans, and were also breached with respect to those additional Mortgage Loans.

(4) Breaches for GMACM's Refusals to Repurchase, Substitute, or Cure Improper or Non-conforming Mortgage Loans

173. Following the discovery of high defect rates among the Mortgage Loans and the 3,013 additional balloon mortgage loans improperly transferred to the 2006-HE3 Trust, FGIC, demanded that GMACM repurchase the non-compliant Mortgage Loans—including the thousands of undisclosed and mis-flagged balloon mortgage loans—pursuant to the I&I Agreement and the MLPA.

174. Of the 160 (non-balloon) loans that FGIC requested be repurchased by GMACM, only 15 (or 9%) of the non-conforming Mortgage Loans were repurchased—in clear contravention of the I&I Agreement and the Operative Documents incorporated therein.

175. Additionally, FGIC initiated a stream of correspondence with GMACM and ResCap after FGIC discovered the massive excess of high-risk balloon mortgages in the Initial Loan Pool. FGIC wrote to GMACM, as Sponsor, as well as the ResCap Repurchase Operations Department, in order to raise the issue of the balloon mortgages and demand their repurchase pursuant to FGIC's rights under the I&I Agreement and MLPA.

176. In response, GMACM and ResCap—acting for the first time through shared counsel—did not reject or deny FGIC's assertions regarding the illegitimate inclusion of thousands of excess balloon mortgage loans, and yet expressly refused to repurchase the relevant loans.

177. Indeed, GMACM and ResCap, through counsel, refused to even attempt to ascertain whether *any* of the more than 3,000 unaccounted-for balloon mortgage loans specifically identified by FGIC were improperly included in the 2006-HE3 Trust. Rather, GMACM and ResCap sought to shift the burden on to FGIC to explain why the inclusion of

these Mortgage Loans was problematic before GMACM and ResCap would agree to begin to address this glaring breach of the Operative Documents (which they continue to refuse to do).

178. The bad faith and recalcitrance of GMACM in particular in this regard is all the more egregious in light of the fact that GMACM knew, or should have known, of the over-inclusion of thousands of previously undisclosed and misidentified balloon mortgage loans in the 2006-HE3 Transaction at least as early as November 2009. Around that time, servicing duties for the 2006-HE3 Transaction were transferred from GMACM to a third party. During that process, GMACM provided spreadsheets and other information to the new servicer regarding, *inter alia*, the Mortgage Loans and the Loan Pool. The information GMACM provided to the new servicer correctly detailed the true number of balloon mortgage loans among the Initial Loan Pool. As such, at least as early as November 2009, GMACM had (or should have) discovered its breach of several representations and warranties in respect of the balloon mortgage loans and the characteristics of the Initial Loan Pool. And yet, GMACM did nothing to notify FGIC of the error or attempt to rectify it, as is required under the Operative Documents.

179. Moreover, on information and belief, GMACM is and has been aware that many of the Mortgage Loans, whether acquired at the closing or thereafter, were nonconforming for reasons unrelated to being balloon mortgage loans and, thus, failed to comply with its own representations and warranties. Despite this knowledge, GMACM has failed to repurchase the nonconforming loans or substitute them with conforming loans, as is required under the Operative Documents.

(5) GMACM's Denial of FGIC's Access To Books and Records, GMACM's CFO, and GMACM's Independent Accountants

180. On December 8, 2011, in accordance with its express rights under Sections 2.02(e)(i)-(iii) of the I&I Agreement, FGIC requested to (i) inspect the books and records of GMACM; (ii) discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and (iii) discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

181. To date, GMACM has failed to respond to this request, in violation of the I&I Agreement.

(6) GMACM's Frustration of FGIC's Right to Access Information Regarding the Mortgage Loans

182. As discussed, in or around November 2009, servicing duties for the 2006-HE3 Transaction were transferred from GMACM to a third party servicer. As FGIC became aware of increasing numbers of material defects among the Mortgage Loans, as well as the gross over-inclusion in the Transaction of thousands of unidentified and mis-flagged balloon mortgage loans, FGIC sought information regarding the Mortgage Loan files from the successor (and current) servicer of the Transaction.

183. FGIC has been made aware that the current servicer of the Transaction is unable to provide the information FGIC has sought due to GMACM's repeated refusals to provide its successor with certain Mortgage Loan files and other crucial information. GMACM's refusal to turn over information in its possession to, and otherwise cooperate with, its successor servicer is a clear violation of the Servicing Agreement that GMACM entered into as the then-Servicer of the 2006-HE3 Transaction and to which FGIC is a third-party beneficiary, as well as a breach by GMACM of its obligations under the I&I Agreement to

comply with the terms of the Operative Documents. *See* Servicing Agreement §§ 3.01(c), 7.01(a), 8.05; I&I Agreement 2.02.

184. Additionally, GMACM has an independent obligation under the I&I Agreement to provide FGIC such information as FGIC may reasonably request. *See* I&I Agreement § 2.02(c)(v). As such, through its obstinate refusal to provide either FGIC or the successor servicer with material information—admittedly within its possession—regarding the Mortgage Loans, GMACM has further breached its obligations to FGIC.

185. Moreover, on information and belief, the Mortgage Loan information that GMACM refuses to provide either to FGIC or the successor servicer will evidence further material breaches of representations and warranties made by GMACM. Accordingly, FGIC reserves its rights to assert additional causes of action regarding GMACM's breaches of its representations and warranties.

G. Ally Bank's Breaches of The Custodial Agreement

186. Under the Custodial Agreement, to which FGIC is an express third party beneficiary, *see* Custodial Agreement § 5.6, and through which Ally Bank received substantial fees, Ally Bank undertook several obligations to FGIC concerning the manner in which Ally Bank would ensure that the Mortgage Loans contained complete and accurate information and that GMACM was in compliance with its representations and warranties regarding the origination, selection, and characteristics of those loans.

187. Ally Bank agreed that it would "hold the Mortgage Notes and any Loan Agreement relating to any Subsequent Mortgage Loan," and that it would review the Mortgage Notes and deliver to FGIC a certification of "the completeness of the receipt of the Mortgage Notes." *Id.* §§ 2.1, 2.2.

188. Ally Bank further agreed to notify FGIC of breaches of the MLPA by GMACM, by providing that: "Upon discovery by the Custodian of a breach of any representation or warranty made by [GMACM] in the Purchase Agreement . . .with respect to a Mortgage Loan . . . the Custodian shall give prompt written notice to [FGIC]." *Id.* § 2.3.

189. Additionally, as discussed, Ally Bank was provided with a copy of the MLPA by GMACM prior to closing.

190. An initial review of a small percentage of defective Mortgage Loans has revealed that in many instances the Mortgage Note was not included in the loan file. The lack of a Mortgage Note within a particular file constitutes a breach of the representations and warranties given by GMACM in the MLPA. Ally Bank should have been aware of the fact that Mortgage Notes were missing from certain Mortgage Loan files, and that this was a breach of the MLPA representations and warranties. Consequently, it should have notified FGIC pursuant to its own obligations under the Custodial Agreement. *See id.* §§ 2.1-2.3. Ally Bank has, however, failed to provide FGIC with any notices regarding defects in any Mortgage Loan file, and has further provided inaccurate and/or incomplete certifications regarding the Mortgage Loans, thereby breaching the Custodial Agreement to which FGIC is an express third party beneficiary.

191. Moreover, Ally Bank had an obligation to notify FGIC of any breach by GMACM of the MLPA representations and warranties that it discovered, not just those pertaining to the Mortgage Note. Since Ally Bank originated nearly 88% of the Mortgage Loans in the 2006-HE3 Transaction—which have suffered astounding defect rates—it must have been keenly aware of the breadth and scope of the underwriting failures with respect to those loans. Ally Bank, which had received the MLPA, thus, must have known that GMACM

was in breach of the representations and warranties in the MLPA. As such, its failure to so notify FGIC was a further breach of the Custodial Agreement.

H. GMACM's Fraud

192. The material breaches of GMACM's representations and warranties, including the extensive underwriting failures by GMACM, and the poor credit quality of almost all of the Mortgage Loans—including, but not limited to the balloon mortgage loans—demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants GMACM made to FGIC to induce its participation in the Transaction. The extraordinarily high defect and default rate among the Mortgage Loans and the inclusion of thousands more high-risk balloon mortgage loans than had been represented demonstrates not merely that GMACM breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the Policy, it (GMACM) would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true.

193. All of the Mortgage Loans underlying the 2006-HE3 Transaction were originated or acquired by GMACM and its affiliate Ally Bank. As such, GMACM had the access and ability to evaluate the Mortgage Loan files and to determine if the loans were in substantial compliance with the applicable GMACM underwriting guidelines and if the loans breached other representations and warranties made by GMACM, including those in respect of the balloon mortgage loans to be included in the 2006-HE3 Trust, as well as the weighted average remaining term to scheduled maturity and weighted average original term to scheduled maturity of the Initial Loan Pool.

194. To induce FGIC to enter into the 2006-HE3 Transaction, GMACM provided FGIC with a loan tape, which contained false and misleading information regarding, among other things, the CLTV and DTI ratios, occupancy status, and FICO scores of the borrowers, as well as an indication of the number of balloon mortgage loans contained in the Initial Loan Pool.

195. In addition, GMACM made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the 2006-HE3 Trust. GMACM was well aware that FGIC would not agree to insure the 2006-HE3 Notes unless GMACM obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, GMACM provided Moody's and S&P with the same false information regarding the credit quality of the underlying Mortgage Loans that it also provided to FGIC—including material information in regard to balloon mortgage loans and the maturity characteristics of the Initial Loan Pool. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2006-HE3 Notes that met FGIC's minimum requirements—Baa2 and BBB-, respectively. In this way, GMACM made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that GMACM would pass on to FGIC, and second, by causing shadow ratings of the 2006-HE3 Notes to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

196. GMACM was well aware that FGIC would rely on the shadow ratings—prepared with information supplied by GMACM—as the I&I Agreement specifically contemplated as a condition to issuance of the Policy that FGIC "shall have received

confirmation that the Notes insured by the Policy are rated" by S&P and Moody's at a specified minimum level "without regard to the Policy." I&I Agreement § 3.01(k).

197. As noted, the issuance of the Policy enabled the Notes to receive a triple-A rating from the rating agencies. Moreover, the receipt of a triple-A rating for the Notes, which depended on the issuance of the Policy, which in turn depended on the shadow ratings formulated using (inaccurate) information supplied by GMACM, was a critical component of the Transaction. As GMACM expressly noted in the Prospectus Supplement: "It is a condition to the issuance of the notes that they be rated 'Aaa' by Moody's . . . and 'AAA' by Standard & Poor's." Prospectus Supplement at S-98.

198. Had the information provided to the ratings agencies by GMACM been accurate and truthful, Moody's and S&P would almost certainly have assigned very different (and lower) shadow ratings to the 2006-HE3 Transaction, and FGIC, in turn, would not have issued the Policy on the agreed terms, or would have refused to issue the Policy altogether.

199. GMACM also made material misrepresentations to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the guidelines and standards to which the Mortgage Loans were underwritten, the percentage of the aggregate principal amount of the Initial Mortgage Loans that would consist of balloon mortgages, and the weighted average remaining term to scheduled maturity and weighted average original term to scheduled maturity of the Initial Loan Pool.

200. For example, in the Prospectus Supplement (and in the I&I Agreement by incorporation) GMACM assured FGIC that the Mortgage Loans "were originated generally in accordance with the underwriting standards of GMAC Mortgage Corporation." Prospectus

Supplement at S-29. GMACM provided FGIC with GMACM's Underwriting Guidelines themselves, which contained extensive underwriting standards and requirements.

201. In fact, as confirmed by the overwhelming defect rates described above regarding the Loan Pool, all of which are due to Mortgage Loans that are inconsistent with GMACM's own underwriting guidelines, GMACM was well aware at the closing of the 2006-HE3 Transaction that those representations were false. In other words, at the time of the closing of the 2006-HE3 Transaction, GMACM either (1) knew or should have known that its representations were materially false because GMACM had not, among other things, determined if the Mortgage Loans were originated "generally in accordance" with its own underwriting guidelines, or (2) had reviewed whether the Mortgage Loans were originated "generally in accordance" with the its underwriting guidelines, had determined that they were not, but nonetheless materially misrepresented to FGIC that the Mortgage Loans were originated "generally in accordance" with those guidelines.

202. Moreover, GMACM represented to FGIC that, in the case of each loan within the Loan Pool, an underwriter had made an assessment that the borrower had the ability to repay his or her loan, after receiving and reviewing all applicable employment, credit, and property information. In fact, GMACM was not verifying the ability of borrowers to repay their loans in compliance with its own underwriting guidelines accurately or at all. As a result, GMACM misrepresented facts that were uniquely within its knowledge.

203. Additionally, the Prospectus Supplement and MLPA provided to FGIC by GMACM represented that, at closing, only a relatively small percentage (7.61%) of the aggregate principal amount of the Initial Loan Pool would be composed of balloon mortgages, when in fact more than 26% of the aggregate principal amount of the Initial Loan Pool was

comprised of these much higher risk mortgage loans. Indeed, despite providing representations in the MLPA and the Offering Documents to investors, ratings agencies, and FGIC that indicated that the Initial Loan Pool would contain approximately 1,292 balloon mortgage loans, GMACM and its affiliates transferred to the 2006-HE3 Trust more than three times that number of balloon mortgage loans. As FGIC would later discover as the 2006-HE3 Transaction began to perform poorly, at least 4,309 of the 16,558 Initial Mortgage Loans were balloon mortgage loans—accounting for more than $226 million of the $862 million aggregate principal amount of the Initial Loan Pool.

204. GMACM also misrepresented to FGIC that the weighted average remaining term to scheduled maturity of the Initial Mortgage Loans at closing was 270 months, when in fact, GMACM was well aware that the true number was closer to 236 months. Similarly, despite representing to FGIC that the weighted average original term to scheduled maturity of the Initial Mortgage Loans was 272 months, GMACM was aware that the actual number was approximately 238 months.

205. Moreover, the MLPA (and the I&I Agreement by incorporation) contained other false and misleading representations about the Mortgage Loans. In particular, GMACM misrepresented that, as of the closing: (i) the information set forth in the Mortgage Loan Schedule is true and correct in all material respects; (ii) no Mortgage Loan was 30 days or more delinquent as of August 1, 2006; (iii) each Mortgage File contains all required documents and instruments; (iv) the CLTV of each Mortgage Loan did not exceed 100%; and (v) GMACM selected the Mortgage Loans in accordance with its underwriting guidelines (*i.e.* the Home Equity Loan Program). The true information regarding these loans—as known by GMACM—simply could not substantiate GMACM's assurances. In short, no amount of

GMACM promising that the loans met certain standards, despite knowing otherwise, actually made those promises true.

206. GMACM knew that its representations were materially false and that these false representations were essential to FGIC's decision to issue the Policy on the terms to which FGIC agreed. GMACM intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreement and to issue the Policy.

207. GMACM knew when making the representations and warranties regarding the Mortgage Loans to FGIC prior to FGIC agreeing to issue the Policy that GMACM never intended to honor those representations and warranties, as is evidenced, *inter alia*, by the extraordinary breadth and depth of the problems FGIC has uncovered with respect to the underwriting and characteristics of those loans, the overwhelming number of undisclosed and mis-flagged balloon mortgage loans, and the poor performance of the 2006-HE3 Trust. In short, in order to induce FGIC to issue the Policy, GMACM represented to FGIC that, if FGIC issued the Policy, GMACM would comply with its contractual representations and warranties, despite knowing that it had not complied—and would not comply—with those very same obligations.

208. GMACM's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC, including the receipt of a subpoena served in connection with GMACM's suspected fraudulent origination and underwriting practices, as well as to a multitude of suits and the potential for more litigation to come.

209. Consistent with this pattern of behavior, GMACM defrauded FGIC into issuing the Policy, through its knowing misrepresentations.

I. Ally Bank Aids and Abets GMACM's Fraud

210. Ally Bank provided substantial assistance to GMACM in fraudulently inducing FGIC to issue the Policy. In its role as Custodian—for which it received substantial fees—Ally Bank undertook to provide "prompt written notice" to FGIC of any breaches of the representations and warranties in the MLPA that it discovered.

211. The MLPA, *see supra* at ¶ 152, contained several representations and warranties regarding the characteristics of the underlying Mortgage Loans as well as loans subsequently transferred to the 2006-HE3 Trust. And, as noted, prior to the closing of the 2006-HE3 Transaction, several representatives of Ally Bank received a copy of the MLPA from GMACM.

212. Furthermore, as an originator of nearly 88% of the Mortgage Loans, Ally Bank was well aware of the true nature of the Loan Pool. As a result of being a key part of the 2006-HE3 Transaction, its affiliate status with GMACM, and receipt by several of its employees of the MLPA, Ally Bank surely must have been aware of the representations and warranties GMACM routinely made to financial guaranty insurers—and did make here to FGIC—regarding the nature of GMACM's business practices and the quality of the mortgage loans that collateralized its many RMBS transactions, including the 2006-HE3 Transaction.

213. Against this backdrop, Ally Bank represented to FGIC that, if the 2006-HE3 Transaction was consummated, it (Ally Bank) would hold and monitor certain key information and documentation regarding the Mortgage Loans, and would provide notice to FGIC of any breaches by GMACM of which it was aware with respect to GMACM's representations and warranties to FGIC. As must have been known to Ally Bank, those representations and warranties made by GMACM directly concerned the Mortgage Loans, including the 88% of them that Ally Bank itself had originated or acquired. Ally Bank made

these representations to FGIC with full knowledge that GMACM had not complied—and would not comply—with its relevant representations and warranties, and, accordingly, that they were false. By representing to FGIC that it would (a) hold and certify the accuracy of certain key information and documentation regarding the Mortgage Loans, the majority of which it had originated itself, and (b) inform FGIC of any failure by GMACM to comply with its obligations, Ally Bank materially aided GMACM's fraudulent inducement of FGIC to issue the Policy. The issuance of the Policy, which made the 2006-HE3 Transaction possible, inured to the significant financial benefit of Ally Bank, given that it collected substantial fees as Custodian and also perpetuated the market for its loan origination and sales business.

J. Ally Financial Aids and Abets GMACM's Fraud

214. Ally Financial provided substantial assistance to GMACM in fraudulently inducing FGIC to issue the Policy. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties GMACM made regarding the nature of GMACM's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

K. GMACM's Breach of Obligations as Servicer

215. When acting in its capacity as Servicer, GMACM failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for the 2006-HE3 Transaction, including, but not limited to, its obligations to follow proper servicing procedures.

216. GMACM had responsibility for the servicing of the Mortgage Loans and thereby undertook certain related contractual obligations under the I&I Agreement and the Servicing Agreement with respect to the 2006-HE3 Transaction. Under the I&I Agreement, GMACM covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the [Servicing Agreement]." I&I Agreement § 2.02(l). Under the Servicing Agreement, GMACM is liable to FGIC for the servicing and administering of the Mortgage Loans, and in doing so is required to "follow such collection procedures as shall be normal and usual in its general mortgage servicing activities and consistent with the procedures the Servicer employs in servicing all other Mortgage Loans in the servicing portfolio with characteristics similar to those of the Mortgage Loans." Servicing Agreement § 3.02(a).

217. During 2007, the servicing operations of GMACM were integrated into ResCap. Following the integration, on information and belief, GMACM breached these obligations by, among other things, being deficient in its borrower contact, collections, and loss mitigation standards, and by failing to honor FGIC's contractual rights to information. In particular, an onsite review of the Ally Financial servicing arm's headquarters, including those of GMACM, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis, revealed inter alia: (i) inadequate call center staffing—staffing unable to handle increased incoming and outgoing call volumes; (ii) call center staffing turnovers as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when GMACM does not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; and (v) severely infrequent use of alternative loss mitigation strategies as compared to the industry,

GMACM, as servicer, also had an obligation to notify FGIC of any material breaches of representations and warranties, and to cause GMACM, as seller, to repurchase the affected Mortgage Loans.

218. On information and belief, GMACM has failed to remedy any of its deficient servicing practices.

219. In addition, GMACM disclosed to FGIC for the first time in March 2009 that it classified loans into one of three categories or "Risk Tiers" under a servicing protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

220. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. GMACM disclosed to FGIC that all of the mortgage loans in FGIC-insured, GMACM-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the 2006-HE3 Transaction, were placed in the lowest category of risk. For such mortgage loans, regardless whether they were (i) first- or second- lien, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities—all of which are factors that require more attentive servicing—delinquent borrowers were called at a later stage of delinquency and less frequently than loans in higher risk categories. As the purchaser of the Mortgage Loans, however, GMACM clearly knew that such Mortgage Loans, by their very nature, required particularized servicing before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally

received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by GMACM to ensure that the Mortgage Loans were serviced and administered in accordance with "procedures as shall be normal and usual in its general mortgage servicing activities" constitutes a breach of the Servicing Agreement and the I&I Agreement. *See* Servicing Agreement § 3.02(a); I&I Agreement § 2.02(l).

221. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, GMACM has failed to provide such information in breach of Section 2.02(c)(v) of the I&I Agreement.

L. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

222. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns GMACM and RFC. Ally Financial—as the ultimate parent of ResCap, GMACM, Ally Bank, and RFC—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC.

223. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC. Ally Financial exercised its direction and control in connection with the 2006-HE3 Transaction. At times, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

224. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its

direct and indirect subsidiaries." *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

225. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of GMACM Directly and Indirectly Through its Control of ResCap

226. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

227. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

228. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

229. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its

subsidiaries." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement").

230. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

231. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

232. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[1] Since incorporation, the ownership of ResCap has not changed—

[1] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the SEC on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

Ally Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

233. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial and ResCap shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the 2005 Operating Agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "require[s] that [ResCap's] board of directors include at least two independent directors, to be selected by GMAC." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (emphasis added).

234. Moreover, on April 26, 2007, "ResCap Investor Relations" announced the release of Ally Financial's 2007 first quarter financial results to investors in an email bearing the ResCap logo. That announcement stated that Ally Financial's financial results were found on both Ally Financial's and ResCap's websites.

235. Moreover, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, and RAMP, among other Ally Financial subsidiaries.

236. Similarly, as noted above, William F. Muir, Ally Financial's President, has also served as President and Chairman of the Board of IB Finance Holding Company, LLC—the direct parent of Ally Bank—and as a director of Ally Bank.

237. Ally Financial's domination and control of its subsidiaries, and in particular its use of ResCap to effectuate that control, is further evidenced by John Ruckdaschel, who, according to publicly available information, has served as in-house counsel at Ally Financial since October 2006. According to an e-mail sent from ResCap to FGIC, Ruckdaschel has served as "internal legal counsel for all [] securitizations" since at least May 2008. Although purportedly an Ally Financial employee, Ruckdaschel also sent and received e-mail using a ResCap e-mail address. Further, an employee of ResCap specifically instructed FGIC that all "official letters" regarding several Ally Financial subsidiaries—including GMACM, RFC, RAMP, and others—should be sent not to the relevant (and supposedly independent) subsidiary, but rather to Ruckdaschel, Ally Financial's internal counsel. Additionally, Ruckdaschel—using his Ally Financial e-mail address—received correspondence relating to the Operative Documents at issue in this Transaction.

238. In this Transaction, Ruckdaschel was included by GMACM's counsel on key correspondence regarding the repurchase of the undisclosed and misidentified balloon mortgage loans.

239. As further evidence of Ally Financial's domination over ResCap, the 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

240. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and

against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

241. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part of our plan and a key part of our value creation." *Id.* (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

242. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citibank, which provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept.

19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id.*

243. Indeed, Ally Financial's 2011 annual report states that "ResCap remains heavily dependent on [Ally Financial] and its affiliates for funding and capital support." Ally. Fin. Inc., Annual Report (Form 10-K), at 128 (Feb. 28, 2012).

244. Additionally, Annual Reports prepared by Ally Financial further note its pursuit of strategic alternatives with ResCap, and highlight the extent to which Ally Financial manipulated its control over its subsidiaries to enhance its own financial health. According to Ally Financial: "On December 31, 2009, we announced that due to our ongoing strategic review of how to best deploy GMAC's current and future liquidity, we decided to pursue strategic alternatives with respect to ResCap and committed to a plan . . . related to management's intent to sell certain ResCap related assets and businesses. . . . In order to maximize value, we will consider a variety of options including one or more sales, spin-offs, or other potential transactions . . . [that we believe] should minimize the impact of any significant future losses related to ResCap's legacy mortgage business . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3-4 (Feb. 26, 2010).

245. There is also substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. See TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

246. Further, Ally Financial has established a "Mortgage Repurchase Reserve" to account for the potentially significant liabilities stemming from repurchase demands made on

its mortgage-related subsidiary business units. The balance of the Mortgage Repurchase Reserve was $825 million as of the fourth quarter of 2011. *See* Ally Financial's Q4 2011 Earnings Presentation at 16. Although these repurchase demands are generally made on Ally Financial's subsidiaries—such as GMACM—in discussing the reserve on an earnings call, Ally Financial CFO Jim Mackey made clear that it was Ally Financial that was recording "repurchase expense[s]" related to mortgages, as he stated that Ally Financial "had lower mortgage repurchase expense of $44 million." Ally Financial's Q4 2011 Earnings Call at 4 (Feb. 2, 2012).

247. Similarly, in discussing Ally Financial's Mortgage Repurchase Reserve on Ally Financial's third quarter 2011 earnings call, Mackey further described losses attributable mortgage loan repurchases as belonging to Ally Financial, when he stated: "Our mortgage repurchase reserve is [as it then stood] $829 million . . . . Our loss experience improved during the quarter due to the fact that we had fewer mortgage insurance rescission payments that we experienced last quarter and that did not repeat this quarter." Ally Financial's Q3 2011 Earnings Call at 6 (Nov. 2, 2011) (emphases added). On the same call, Ally Financial CEO Carpenter explained that "we have routinely repurchased problem loans voluntarily and by contract . . . ." *Id.* at 8 (emphasis added).

248. Additionally, as discussed above, Ally Financial recorded a $230 million charge in the fourth quarter of 2011, $212 million of which was recorded at its controlled subsidiary, ResCap. As a result of the penalties assessed against ResCap by government regulators, and the fact that ResCap failed to maintain sufficient tangible net worth to comply with the requirements of the terms of certain credit facilities, Ally Financial propped up its

subsidiary ResCap with a $197 million capital contribution in the form of intercompany debt forgiveness. *See* Ally Fin. Inc., Form 10-K, at 31-32 (Feb. 28, 2012).

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

249. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 9, 2011).

250. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured, including this Transaction. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

251. The origination and securitization of mortgage loans by ResCap and its subsidiaries have long been integral parts of Ally Financial's core business. In its 2006 Annual Report, Ally Financial (then reporting as GMAC LLC) stated that "[w]e are a leading real estate finance company focused primarily on the residential real estate market. Our

business activities include the origination, purchase, servicing, sale and securitization of residential mortgage loans." GMAC LLC, Annual Report (Form 10-K), at 3 (Mar. 13, 2007) (emphasis added). Ally Financial further stated that "we utilize asset and mortgage securitizations and sales as a critical component of our diversified funding strategy." *Id.* at 5 (emphasis added).

252. Ally Financial continued to publicly report on its own business and that of its subsidiaries in later filings on an integrated basis: "We engage in the origination, purchase, servicing, sale, and securitization of consumer (i.e., residential) mortgage loans and mortgage-related products. Mortgage operations include the Residential Capital, LLC (ResCap) legal entity, [and] the mortgage operations of Ally Bank . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3 (Feb. 26, 2010). More recently, continuing to discuss its various mortgage operations as a single enterprise, Ally Financial stated that "[o]ur Origination and Servicing operations is one of the leading originators of conforming and government-insured residential mortgage loans in the United States. We are one of the largest residential mortgage loan servicers in the United States and we provide collateralized lines of credit to other mortgage originators." Ally Fin. Inc., Annual Report (Form 10-K), at 4 (Feb. 28, 2012)..

253. Moreover, as discussed above, Ally Financial—at least in the view of certain of ResCap's bondholders—is believed to have stripped assets from its subsidiary.

254. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed GMACM and RFC as part of its own business. For example, in its investor presentation from 2007, ResCap declares that GMACM and RFC "are owned and *operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above,

Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial was not directly controlling GMACM and RFC, it was using ResCap as an instrument to do so.

255. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

256. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one GMACM has with respect to the 2006-HE3 Transaction as Servicer.

257. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as

Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

258. In another example, Larry Hipp, a member of ResCap's Risk Analyst/Investor Repurchase Department, communicated with FGIC regarding rescission requests using an Ally Financial email address, but in those very same emails, lists his ResCap contact information, including a ResCap email address. In addition, Ally Financial/ResCap used to send FGIC secure communications bearing a "GMAC ResCap" header, but those secure communications now have an Ally Financial header.

259. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

Q: Could you please state your name for the record.
A: My name is Jeffrey Stephan.
Q: Okay. And who do you work for?
A: GMAC, LLC [Ally Financial].
Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
Q: Okay.
A: It's GMCA [sic] Mortgage Corporation.
Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?

A. Yes.
Q. So these entities no longer currently exist?
A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

M. FGIC's Contractual Remedies Under The I&I Agreement

260. The I&I Agreement provides FGIC with broad remedies for GMACM's breaches of its representations and warranties. The breadth of these remedies provided further material inducement for FGIC to issue the Policy. Specifically, Section 5.02(b) of the I&I Agreement provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this Insurance Agreement, the Indenture, or existing at law or in equity.

261. Moreover, the I&I Agreement provides that, upon an "Event of Default"—which is defined to include when "[a]ny representation or warranty" made by GMACM in the I&I Agreement or the Operative Documents is materially untrue or incomplete—FGIC can "take whatever action at law or in equity as may appear necessary or desirable in its judgment to collect the amounts, if any, then due under [the I&I Agreement] or any other Operative Document or to enforce performance and observance of any obligation, agreement or covenant of [GMACM]." I&I Agreement §§ 5.01(a), 5.02(a)(vi).

262. In addition, GMACM agreed:

> to pay, and to protect, indemnify and save harmless [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages costs or expenses (including reasonable fees and expenses of attorneys . . .) of any nature arising out of or relating to the breach

> by GMACM . . . of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the transactions contemplated by the Operative Documents . . . .

I&I Agreement § 3.04(a).

263. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, GMACM agreed to repurchase or substitute Mortgage Loans that did not conform to GMACM's representations and warranties, and to indemnify FGIC for claims and losses arising from GMACM's breach of any representation or warranty. *See* I&I Agreement § 3.03(b), 3.04(a).

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Declaratory Relief Regarding GMACM's Indemnification Obligations)

264. FGIC re-alleges and incorporates by reference paragraphs 1 through 263 of this Complaint.

265. The I&I Agreement is a valid and binding agreement between the parties.

266. FGIC has performed its obligations under the I&I Agreement.

267. GMACM's representations and warranties were material to FGIC's decision to insure the 2006-HE3 Notes and to issue the 2006-HE3 Policy.

268. GMACM's pervasive and material breaches of its representations and warranties, from the very inception of the Transaction and in the years since, constitute a material breach of the I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

269. Pursuant to Section 3.04(a) of the I&I Agreement, GMACM must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by GMACM of any of the representations or

warranties contained in Section 2.01 of the I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by GMACM of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

270. As explained above, GMACM has breached numerous representations, warranties, and covenants in the 2006-HE3 Offering and Operative Documents. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

271. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

272. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM must jointly and severally indemnify and reimburse FGIC for all sums arising out of the 2006-HE3 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2006-HE3 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2006-HE3 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

273. In addition, FGIC seeks a declaration that GMACM must indemnify FGIC for all sums arising out of the 2006-HE3 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2006-HE3 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2006-HE3 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Fraudulent Inducement — I&I Agreement)

274. FGIC re-alleges and incorporates by reference paragraphs 1 through 273 of this Complaint.

275. GMACM induced FGIC to enter into the I&I Agreement and to issue the Policy by making false representations and warranties about its business practices and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

276. As explained above, GMACM knowingly made materially false statements to FGIC and/or omitted material facts from its statements to FGIC, with the intent to induce reliance by FGIC.

277. GMACM intended for FGIC to rely on GMACM's material false statements and/or omissions. FGIC had no reason to believe that GMACM's representations were false, and reasonably and justifiably relied on GMACM's material false statements and/or omissions

regarding information uniquely in the possession of GMACM when it decided to enter into the I&I Agreement and to issue the Policy for the 2006-HE3 Notes.

278. As a result of GMACM's material false statements and omissions, FGIC entered into the I&I Agreement, issued the Policy, and thereby agreed to insure Notes backed by a pool of Mortgage Loans that was, in actuality, materially different from the Loan Pool that GMACM represented would collateralize the 2006-HE3 Transaction.

279. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

280. As a result of GMACM's material false statements and material omissions from its statements, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

281. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

282. Alternatively, GMACM is liable for such damages.

THIRD CAUSE OF ACTION

(As Against Ally Financial and Ally Bank: Aiding and Abetting Fraudulent Inducement — I&I Agreement)

283. FGIC re-alleges and incorporates by reference paragraphs 1 through 282 of this Complaint.

284. As explained above, Ally Financial provided substantial assistance to its subsidiary GMACM in fraudulently inducing FGIC to enter the I&I Agreement and issue the Policy.

285. GMACM could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

286. Ally Financial knew that GMACM fraudulently induced FGIC to issue the Policy for the 2006-HE3 Transaction.

287. Ally Financial's statements materially aided GMACM's fraudulent inducement.

288. As a result of Ally Financial's aiding and abetting GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

289. Moreover, as explained above, Ally Bank provided substantial assistance to its affiliate GMACM in fraudulently inducing FGIC to issue the Policy.

290. Ally Bank originated nearly 88% of the Mortgage Loans (amounting to over $500 million in loans), which form a substantial part of the collateral for the 2006-HE3 Transaction. Ally Bank was therefore aware of the characteristics of the Loan Pool. Ally Bank was also an affiliate of GMACM, received a copy of the MLPA, and served as Custodian of the 2006-HE3 Transaction, for which it received substantial fees. As such, Ally Bank was aware of the material misrepresentations GMACM had made to FGIC to fraudulently induce FGIC to issue the Policy. Ally Bank further represented to FGIC that it would undertake duties to monitor and certify the accuracy and completeness of the Mortgage Loan files, as well as inform FGIC of failures by GMACM to comply with its obligations under the Operative Documents. Ally Bank made these representations to FGIC despite its knowledge that GMACM had not complied—and would not comply—with its representations and warranties.

291. Ally Bank's representations to FGIC materially aided GMACM's fraudulent inducement of FGIC to issue the Policy.

292. As a result of Ally Bank's aiding and abetting of GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract—Representations, Warranties, and Affirmative Covenants)

293. FGIC re-alleges and incorporates by reference paragraphs 1 through 292 of this Complaint.

294. The I&I Agreement is a valid and binding agreement between the parties.

295. FGIC has performed its obligations under the I&I Agreement.

296. As explained above, GMACM has materially breached its representations and warranties and affirmative covenants under Sections 2.01 and 2.02 of the I&I Agreement.

297. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

298. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

299. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

300. Alternatively, GMACM is liable for such damages.

FIFTH CAUSE OF ACTION

(As Against Ally Bank: Breach of Custodial Agreement)

301. FGIC re-alleges and incorporates by reference paragraphs 1 through 300 of this Complaint.

302. The Custodial Agreement is a valid and binding agreement between the parties thereto.

303. FGIC is an express third party beneficiary of the Custodial Agreement.

304. As explained above, Ally Bank has materially breached its obligations under Sections 2.1, 2.2, and 2.3 of the Custodial Agreement.

305. Ally Financial, acting directly and/or indirectly through ResCap, directed Ally Bank's actions as set forth in this cause of action.

306. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Repurchase Obligation)

307. FGIC re-alleges and incorporates by reference paragraphs 1 through 306 of this Complaint.

308. The I&I Agreement is a valid and binding agreement between the parties.

309. FGIC has performed its obligations under the I&I Agreement.

310. Pursuant to the terms of the I&I Agreement, and the provisions of the MLPA incorporated therein, FGIC has demanded that GMACM repurchase non-complying Mortgage Loans, including the more than 3,000 illegitimately included and undisclosed balloon mortgage loans. GMACM has refused to repurchase numerous non-conforming Mortgage Loans and all of the excess balloon mortgage loans.

311. GMACM has breached the I&I Agreement, and the provisions of the MLPA incorporated therein, by failing to repurchase any and all Mortgage Loans that violated GMACM's representations and warranties.

312. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

313. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

314. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

315. Alternatively, GMACM is liable for such damages.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract – Declaratory Relief Regarding Access to Information)

316. FGIC re-alleges and incorporates by reference paragraphs 1 through 315 of this Complaint.

317. The I&I Agreement is a valid and binding agreement between the parties.

318. FGIC has performed its obligations under the I&I Agreement.

319. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreement, GMACM agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of GMACM; (ii) discuss the affairs, finances and accounts of GMACM with GMACM's Chief Financial Officer; and (iii) discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

320. On December 8, 2011, FGIC made a reasonable written request that GMACM permit FGIC or its authorized agent to conduct an inspection of the books and records of GMACM, as well as permit FGIC to (i) discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, and (ii) with GMACM's consent, which consent shall not be unreasonably withheld or delayed, discuss the affairs, finances, and accounts of GMACM with GMACM's independent accountants.

321. GMACM has failed to make available such persons or to produce such information.

322. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreement, Section 2.02(e)(i)-(iii).

323. Pursuant to Section 2.02(c)(v) of the I&I Agreement, GMACM agreed to furnish to FGIC, promptly upon request, such data as FGIC may reasonably request. Further, pursuant to Section 7.01(a) of the Servicing Agreement, to which FGIC is an express third-party beneficiary and the provisions of which are incorporated by reference into the I&I Agreement, GMACM agreed to provide information regarding the Mortgage Loans to, and otherwise cooperate with, the successor servicer of the 2006-HE3 Transaction.

324. GMACM has failed to comply with its contractual obligations and breached the I&I Agreement and Servicing Agreement by failing to make available to FGIC and/or the successor servicer the Mortgage Loan files and other related material information.

325. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

326. Accordingly, FGIC seeks a declaration that GMACM has failed to comply with Sections 2.02(e)(i)-(iii) and 2.02(c)(v) of the I&I Agreement and Section 7.01(a) of the Servicing Agreement, and an order requiring GMACM to promptly remedy those breaches and therefore comply with FGIC's and/or the successor servicer's requests and notices to GMACM pursuant to the relevant provisions, as detailed above.

EIGHTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Servicer Obligations)

327. FGIC re-alleges and incorporates by reference paragraphs 1 through 326 of this Complaint.

328. The I&I Agreement is a valid and binding agreement between the parties.

329. FGIC has performed its obligations under the I&I Agreement.

330. Moreover, as explained above, GMACM has breached its affirmative covenant under the I&I Agreement to have serviced all Mortgage Loans in all material respects in compliance with the Servicing Agreement.

331. GMACM's breaches of the I&I Agreement has caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on Policies and other losses and expenses.

332. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

333. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

334. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

335. Alternatively, GMACM is liable for such damages.

NINTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Declaratory Relief)

336. FGIC re-alleges and incorporates by reference paragraphs 1 through 335 of this Complaint.

337. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this complaint.

338. For the reasons set forth in paragraphs 222 through 259, among others, Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other.

339. FGIC has been damaged as a result of the actions Ally Financial, ResCap and GMACM.

340. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other, and therefore are jointly and severely liable for each other's liabilities.

TENTH CAUSE OF ACTION

(As Against GMACM: Attorneys' Fees and Costs)

341. FGIC re-alleges and incorporates by reference paragraphs 1 through 340 of this Complaint.

342. The I&I Agreement is a valid and binding agreement between the parties.

343. FGIC has performed its obligations under the I&I Agreement.

344. Pursuant to Section 3.03(c) of the I&I Agreement, GMACM agreed to reimburse FGIC for any and all costs or expenses "including reasonable attorneys' . . . fees and expenses" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreement, GMACM agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the I&I Agreement or arising out of or relating to the 2006-HE3 Transaction.

345. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of GMACM's failure to provide Mortgage Loan files, Servicing Reports, and financial information and its breach of the representations and warranties contained in Section 2.01 of the I&I Agreement and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreement.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant GMAC Mortgage Company, LLC, with respect to (1), (2), (4) through (6), and (8) through (12) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4) through (6), (9), (11), and (12) below, and in its favor and against Ally Bank, with respect to (3), (7), and (12) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (6), (9), (11), and (12) below, and the following relief:

(1) A declaration that, pursuant to GMACM's obligations under the I&I Agreement, GMACM must solely and/or Ally Financial, ResCap, and GMACM must jointly and severally reimburse and indemnify FGIC for all sums arising out of the 2006-HE3 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement: (i) for all sums it has paid to date under the Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policy as and when such sums fall due or such claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and (iv) an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal, rescissory, equitable and punitive damages, to be proven at trial, for GMACM's fraudulent inducement of FGIC to enter into the 2006-HE3 Transaction and to issue the Policy;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's and Ally

Bank's aiding and abetting of GMACM's fraudulent inducement of FGIC to enter into the 2006-HE3 Transaction and to issue the Policy;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for GMACM's material breaches of the 2006-HE3 Transaction;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for GMACM's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreement and frustration of the parties' bargain, including, but not limited to, those in respect of the more than 3,000 misidentified and undisclosed balloon mortgage loans;

(6) Further or alternatively, a declaration that GMACM must repurchase all Mortgage Loans that are in breach of GMACM's representations and warranties in the 2006-HE3 Transaction, including, but not limited to, the more than 3,000 misidentified and undisclosed balloon mortgage loans, and an order giving effect to that declaration;

(7) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for Ally Bank's material breaches of its obligations under the Custodial Agreement;

(8) Further or alternatively, a declaration that GMACM must allow FGIC to inspect the books and records of GMACM, to discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants; and that GMACM must comply with its obligations to provide FGIC and/or the successor servicer information pertaining to the Mortgage Loan files; and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that Ally Financial, ResCap, and GMACM are alter egos of each other;

(10) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreement and other Operative Documents, as defined in the I&I Agreement;

(11) An award of prejudgment interest at the statutory rate; and

(12) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

12 CV 1818

Civil Action No._____

COMPLAINT

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"), Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"), Ally Bank, formerly known as GMAC Bank ("Ally Bank"), and GMAC Mortgage, LLC, formerly known as GMAC Mortgage Corporation ("GMACM"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with two financial guaranty insurance policies (each the "Policy" and collectively the "Policies") issued by FGIC in relation to two GMACM-sponsored transactions (each a "Transaction" and collectively the "HE Transactions" or the "Transactions") in which GMACM Home Equity Loan Trust 2006-HE2 (the "2006-HE2 Trust") and GMACM Home Equity Loan Trust 2007-HE2 (the "2007-HE2 Trust" and together with the

2006-HE2 Trust, the "HE Trusts") issued and sold to investors a combined $1.87 billion aggregate principal amount of insured residential mortgage-backed securities (the "HE Notes"). As the sponsor of the HE Transactions, GMACM procured the Policies from FGIC in order to enhance the ratings and marketability of the HE Notes. GMACM fraudulently induced FGIC's agreement to provide insurance for the HE Transactions through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices and the credit quality and characteristics of the thousands of home equity loans (individually the "Mortgage Loans," and collectively with respect to each of the Transactions the "Mortgage Loan Pool" or "Loan Pool") that provided the collateral for the HE Notes. In short, the Mortgage Loans were different—and demonstrably worse—than GMACM had represented them to be. FGIC's issuance of the Policies enabled the HE Notes to receive a triple-A rating from the rating agencies, which in turn made the HE Transactions viable, and enabled GMACM and its affiliates to earn millions of dollars in transaction fees.

2. Since the closing of the HE Transactions, GMACM has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of the HE Transactions, GMACM has violated the essential terms of its agreements with FGIC. GMACM has also breached the essential terms of the other operative documents incorporated therein.

3. The wrongdoing committed by GMACM, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through its wholly-owned subsidiary, ResCap. Ally Financial is the ultimate parent of ResCap, which owns GMACM. Ally Financial, as the ultimate parent of ResCap and GMACM, has the practical ability, which it has repeatedly exercised, to direct and control the activities of these (and other) subsidiaries. In many instances,

including in these Transactions, Ally Financial's direction and control was effected by using ResCap as an intermediary instrument to achieve its goals. For example, many of the material contractual breaches committed by GMACM, concerning, primarily, FGIC's right to access information in GMACM's possession and GMACM's failure to repurchase or cure certain of the Mortgage Loans backing the HE Notes that FGIC sought to have repurchased, were carried out by ResCap, at the direction and control of Ally Financial.

4. GMACM was also substantially assisted in fraudulently inducing FGIC to issue the Policies by another Ally Financial subsidiary, Ally Bank, then doing business as GMAC Bank. Ally Bank and GMACM were the two principal originators of loans that became the collateral for the HE Transactions, and as such had intimate knowledge of the quality of the Mortgage Loans. In total, Ally Bank sold nearly $1.1 billion in loans that it had originated or acquired to GMACM to be securitized in the HE Transactions. Further, Ally Bank agreed to serve as custodian (the "Custodian") of the HE Transactions—one of the critical parties charged with certain oversight and maintenance duties with respect to the HE Trusts—and received certain key operative documents with respect to the Transactions. With knowledge of GMACM's material misrepresentations and omissions regarding the Mortgage Loans that collateralized the HE Transactions, Ally Bank separately made representations and warranties regarding those loans for the purpose of aiding GMACM's inducement of FGIC to issue the Policies. By assisting GMACM in inducing FGIC to issue the Policies, Ally Bank was able to collect substantial fees as Custodian and perpetuate its lucrative loan origination business.

5. Ally Bank has materially breached its own separate contractual agreements regarding its duties as Custodian, in particular by failing to ensure that essential documents were

included in the loan file and failing to notify FGIC of breaches of representations and warranties by GMACM of which Ally Bank was aware.

6. The HE Transactions are mortgage loan securitizations: complex arrangements comprising multiple interdependent agreements among GMACM and several other parties whereby tens of thousands of home equity loans were pooled together and transferred to the HE Trusts, which then issued to investors securities (*i.e.*, the HE Notes) collateralized by those loans.

7. In June 2006, FGIC and several other parties entered into the 2006-HE2 Transaction. In June 2007, FGIC and several other parties entered into the 2007-HE2 Transaction. The HE Transactions were sponsored by GMACM. To facilitate the Transactions, GMACM pooled together tens of thousands of Mortgage Loans to provide collateral for the HE Notes. All of the Mortgage Loans were either originated or acquired by GMACM or Ally Bank.

8. After pooling the Mortgage Loans originated or acquired by GMACM and Ally Bank, GMACM transferred the Mortgage Loans directly or indirectly to another Ally Financial subsidiary, Residential Asset Mortgage Products, Inc. ("RAMP"). RAMP then deposited the Mortgage Loans it received from GMACM into the HE Trusts. The HE Trusts, in turn, issued the HE Notes to investors. The HE Trusts were legal entities created by GMACM solely for the purposes of the HE Transactions to hold the Mortgage Loans and to issue the HE Notes to investors in registered public offerings.

9. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the HE Trusts are used to pay, among other things, principal and interest due on the HE Notes, and the fees and expenses of GMACM and other participants in the Transactions.

10. GMACM is also the servicer of the 2006-HE2 Transaction (the "2006-HE2 Servicer") and, until March 2012, was the servicer of the 2007-HE2 Transaction (the "2007-HE2

Servicer"). The servicer of the Transactions supervises the collection of borrower payments and performs other duties related to servicing the Mortgage Loans. Yet another Ally Financial subsidiary, Ally Securities, LLC ("Ally Securities" f/k/a GMAC RFC Securities), was a co-manager of the HE Transactions. In addition, JPMorgan Chase Bank, N.A. ("JPMorgan") agreed to act as Indenture Trustee of the 2006-HE2 Trust, while The Bank of New York Trust Company, N.A. ("BNY") agreed to act as Indenture Trustee of the 2007-HE2 Trust. BNY later succeeded JPMorgan as Indenture Trustee of the 2006-HE2 Trust, as well.

11. GMACM, directed and controlled by Ally Financial, is, therefore, the hub of the HE Transactions: it is the sponsor of each securitization, the originator and seller of many of the Mortgage Loans, and the original servicer of all of the loans that collateralize the HE Notes. The primary victim of the HE Transactions—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by GMACM—is FGIC, which has already paid out tens of millions of dollars in losses under the Policies, with further material losses still to come.

12. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed notes ("RMBS Notes"). At the time of the HE Transactions, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Notes typically guaranteed the timely payment of the principal and interest due on the insured securities.

including the amount, if any, of principal losses allocated to the RMBS Notes. FGIC's insurance policies thus enhanced the credit quality, and marketability, of the insured securities.

13. To enhance the ratings and marketability of the HE Notes, and to increase the profit that GMACM would derive from the 2006-HE2 and 2007-HE2 Transactions, GMACM sought to have FGIC issue the Policies to JPMorgan and BNY, respectively, each in its capacity as Indenture Trustee.

14. To induce FGIC to issue the Policies, GMACM, *inter alia*, offered certain material representations and warranties to FGIC regarding the Transactions. These representations and warranties were false when stated, and FGIC reasonably relied on such warranties, among others, when deciding to enter into the HE Transactions. As a result, FGIC was fraudulently induced to enter the Transactions, and the credit risk assumed by FGIC in connection with the Transactions was far greater than it would have been had GMACM's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

15. GMACM received substantial assistance from Ally Bank in fraudulently inducing FGIC to issue the Policies. Ally Bank was aware of the material misrepresentations GMACM had made to FGIC, and further represented to FGIC that it would undertake duties to monitor and certify the accuracy and completeness of certain material aspects of the Mortgage Loan files, as well as inform FGIC of certain failures by GMACM to comply with its obligations under the HE Transaction documents. Ally Bank made these representations to FGIC despite its knowledge that GMACM had not complied—and would not comply—with its representations and warranties to FGIC. As such, Ally Bank actively aided and abetted GMACM's fraudulent inducement of FGIC to issue the Policies.

16. Moreover, both GMACM and Ally Bank received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue the Policies. Ally Financial took actions and made statements to boost investor confidence in, and otherwise finance and support, its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations GMACM and Ally Bank had made to FGIC. As a result of its dominance over ResCap, Ally Bank, and GMACM, Ally Financial knew that the representations and warranties GMACM and Ally Bank made to FGIC, prior to and at the closing, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted GMACM's and Ally Bank's fraudulent inducement of FGIC to issue the Policies.

17. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policies in reliance on the (presumed) accuracy and truthfulness of GMACM's representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and the resulting amount of claims presented to FGIC, have been overwhelming. Had FGIC been told the truth about the nature of GMACM's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policies, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of GMACM's misconduct.

18. In order to evaluate the extent of GMACM's breaches, FGIC has requested copies of the mortgage loan files and servicing notes for the Mortgage Loans. GMACM is obligated, under its agreements with FGIC, to provide those documents to FGIC. GMACM has refused to provide FGIC with the requested documentation, which, on information and belief, will further

evidence material breaches by GMACM. This refusal to provide information in itself constitutes a material breach of GMACM's insurance agreements with FGIC.

19. Certain of the material contractual breaches committed by GMACM and Ally Bank—including, but not limited to, its refusal to honor FGIC's right to access information in GMACM's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

20. Through this Complaint, FGIC seeks relief against GMACM, Ally Bank, ResCap, and Ally Financial for GMACM's fraudulent inducement of FGIC, and for GMACM's material breaches of its insurance agreements with, and contractual obligations owed to, FGIC in connection with the HE Transactions.

21. Further, FGIC seeks relief against Ally Financial and Ally Bank for aiding and abetting GMACM's fraudulent inducement, as well as for Ally Bank's material breaches of its contractual obligations to FGIC.

22. FGIC also seeks a declaration from the Court that Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other.

THE PARTIES

23. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

24. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial is the parent company of ResCap, GMACM, and all GMACM-affiliated entities relevant to this action.

25. Defendant GMACM is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. In the period relevant to this action,

GMACM originated, acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

26. Since 2005, GMACM has been an indirect wholly-owned subsidiary of ResCap; prior to that time, GMACM was an indirect, wholly-owned subsidiary of Ally Financial.

27. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly-owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of GMACM and its business includes originating, acquiring, selling, and servicing mortgage loans.

28. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

29. Defendant Ally Bank (f/k/a GMAC Bank), an indirect, wholly-owned subsidiary of Ally Financial, was at all times relevant to this Complaint a loan originator. To facilitate the HE Transactions, Ally Bank sold to GMACM nearly $1.1 billion in mortgage loans that it had originated or acquired to be securitized in the Transactions. These loans comprised more than 75% of the initial Mortgage Loans. GMAC Bank was renamed Ally Bank in May 2009. Ally Bank is an online bank chartered under Utah law.

JURISDICTION AND VENUE

30. This Court has subject matter jurisdiction over this suit pursuant to 28 U.S.C. § 1332 because there is complete diversity of citizenship between the parties and the amount in controversy exceeds $75,000, exclusive of interest and costs.

31. Venue is proper in this district under 28 U.S.C. § 1391 because a substantial part of the events giving rise to this claim occurred within this judicial district. Moreover, at least one of the defendants in this action, GMACM, has agreed to submit to the jurisdiction of this Court, and has agreed not to challenge venue in this Court.

RELEVANT NON-PARTIES

32. RAMP, a special purpose vehicle, is an indirect, wholly-owned subsidiary of Ally Financial and a Delaware corporation with its principal place of business in Minnesota. To facilitate the HE Transactions, RAMP purchased mortgage loans from GMACM and another affiliate, Walnut Grove Mortgage Loan Trust 2003-A ("Walnut Grove"), and deposited those loans into the HE Trusts. The Trusts then issued the HE Notes to the underwriters, including Ally Securities (then doing business as GMAC RFC Securities), to be sold to investors.

33. Ally Securities, an entity incorporated in Delaware, is an affiliate of GMACM and RAMP and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as an underwriter of the HE Notes and, on information and belief, participated in the preparation of certain of the key offering documents for the HE Transactions.

34. Walnut Grove is a Delaware statutory trust established by an affiliate of GMACM. Beginning in 2003, GMACM sold to Walnut Grove second-lien mortgage loans that it had originated or acquired. To facilitate the HE Transactions, Walnut Grove sold certain of the Mortgage Loans to RAMP.

FACTUAL ALLEGATIONS

A. Ally Financial and its Subsidiaries

35. In the period relevant to this action, GMACM originated, acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Notes.

36. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including those of GMACM, Ally Bank, and ResCap, led Ally Financial to seek a bailout by the federal government in 2008.

(1) GMACM, GMAC-RFC, and RFC

37. GMACM is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

38. Residential Funding Corporation, LLC ("RFC") is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate GMACM, RFC engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

39. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See* 2011 Mortgage Market Statistical Annual: Volume II at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

40. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States (the "FCIC Report"), published in January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

41. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and

evaluation—a truth FGIC would come to learn specifically in its dealings with GMACM. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

42. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

43. Ally Financial's business model depended on securitizations, which were conducted by its business units, including GMACM. Pooling mortgage loans and selling them into securitizations enabled GMACM to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

44. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining whether a mortgage loan is in default based on the transaction documents, GMACM generally acted as servicer of its own securitizations. GMACM thereby earned servicing fees that

normally amounted to 0.50% per annum of the aggregate principal balance of the mortgage loans, as well as collected fees in the range of approximately 20%-35% of any subsequent recoveries from charged-off loans.

45. GMACM also enriched Ally Financial and its other subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the HE Transactions:

- Ally Bank gained fees for originating more than 75% of the loans initially comprising the HE Trusts, and proceeds from selling those loans to GMACM; Ally Bank also gained fees as Custodian of the HE Trusts for holding certain documents;

- Walnut Grove received the proceeds from selling certain of the Mortgage Loans to RAMP (after purchasing approximately 38% of the 2006-HE2 Mortgage Loans and 44% of 2007-HE2 Mortgage Loans from GMACM);

- RAMP received payments for serving as the depositor of the Mortgage Loans to the HE Trusts; and

- Ally Securities received fees for underwriting the HE Notes.

(3) Ally Financial, GMACM, and RFC Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

46. GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

47. Additionally, on September 2, 2011, the Federal Housing Finance Authority ("FHFA"), as conservator for Freddie Mac, filed suit in the Supreme Court of the State of New York, New York County against Ally Financial and several of its subsidiaries for claims arising in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in certificates issued through twenty-one transactions similar to the transactions at issue here. Among other claims, FHFA brought suit for common law fraud against various Ally Financial subsidiaries and aiding and abetting fraud against Ally Financial for its intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the subject certificates.

48. The FHFA also alleges violations of state and federal securities laws by Ally Financial and several of its subsidiaries stemming from false and misleading statements contained in publicly-filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, the FHFA alleges aiding and abetting fraud against Ally Financial and certain of its affiliates for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs. In October 2011, Ally Financial and its co-defendants removed the FHFA action to the U.S. District Court for the Southern District of New York.

49. In addition, GMACM is currently facing a lawsuit brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court in which MBIA alleges that, in connection with three transactions similar to the one at issue here, GMACM affirmatively misrepresented

the credit quality of tens of thousands of mortgage loans, with a total original principal balance of more than $4 billion, as a means of unfairly shifting to investors and MBIA risks that GMACM should have borne itself. On December 15, 2010, the New York Supreme Court issued a ruling denying GMACM's motion to dismiss, which allowed both the breach of representations and warranties and fraud claims, among others, to proceed to trial.

50. GMACM's sister company, RFC, is also currently facing a lawsuit brought by MBIA in New York Supreme Court for, among other things, fraud and breach of representations and warranties in connection with RMBS transactions. In December 2009, the New York Supreme Court rejected RFC's motion to dismiss certain of the claims brought against it, allowing both the breach of contract and fraud claims, among others, to proceed.

51. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two suits in various jurisdictions pending against Ally Financial's mortgage-related business units and subsidiaries, arising from numerous mortgage-backed securities offerings. The plaintiffs in those suits have alleged, among other things, that Ally Financial's various mortgage subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. *See* Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011). Further, in its 2011 annual report, Ally Financial stated that it expects additional similar claims to be brought against Ally Financial and/or its subsidiaries in the future. *See* Ally Fin. Inc., Annual Report (Form 10-K), at 20 (Feb. 28, 2011).

52. Since the filing of its November 2011 quarterly report, moreover, Ally Financial and its subsidiaries have been sued by additional plaintiffs, including HSH Nordbank AG, which

have alleged, *inter alia*, material misrepresentations and omissions about the loans backing RMBS securities issued by Ally Financial's affiliates.

53. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. During 2011, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $265 million worth of mortgages related to securitizations it consummated between 2004 and 2007. Ally Financial clearly recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own Securities and Exchange Commission ("SEC") filings, Ally Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Annual Report (Form 10-K), at 98 (Feb. 28, 2012).

54. Indeed, according to Ally Financial's 2011 annual report, Ally Financial, GMACM's parent, also believes that "[t]he total exposure . . . to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008, specifically the 2006 and 2007 vintages that were originated and sold prior to enhanced underwriting standards and risk-mitigation actions implemented in 2008 and forward." Ally Fin. Inc., Annual Report (Form 10-K), at 224 (Feb. 28, 2012). The 2006-HE2 and 2007-HE2 Transactions are, as their names imply, of the 2006 and 2007 vintages.

55. Additionally, Ally Financial also disclosed that the SEC served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. *See* Ally Fin. Inc., Amendment No.

3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

(4) The Mortgage Loan Servicing Misconduct of Ally Financial and GMACM Has Come Under Scrutiny and Resulted in Severe Sanctions

56. On February 9, 2012, the Federal Reserve Board announced that Ally Financial, its subsidiaries, and several other mortgage loan servicers would be required to pay $766.5 million in monetary sanctions for "unsafe and unsound processes and practices in residential mortgage loans servicing and foreclosure processing." Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2011). On February 12, 2012, the Federal Reserve Board imposed well over $200 million of this fine against Ally Financial, ResCap, and GMACM pursuant to an assessment order, which requires that the sanctions be paid into various borrower assistance programs and nonprofit programs established to help victims of improper servicing and foreclosure practices. *See In re Ally Fin. Inc.*, FRB Docket Nos. 12-006-CMP-HC & 12-006-CMP-DEO (Feb. 10, 2012) (the "Assessment Order"). According to the Federal Reserve Board, the sanction "takes into account the maximum amount prescribed for unsafe and unsound practices under the applicable statutory limits, the comparative severity of the institutions' misconduct, and the comparative sizes of the institutions' foreclosure activities." *See* Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2011).

57. Further, also on February 9, 2012, the U.S. Attorney General announced that Ally Financial will take part in a $25 billion settlement to resolve claims brought by the government in response to the "reckless and abusive mortgage practices" of Ally Financial and four similarly situated bank holding companies. *See* Eric Holder, U.S. Attorney General, Remarks at the

Mortgage Servicers Settlement Press Conference (Feb. 9, 2012). Although the settlement releases Ally Financial from certain civil claims brought by the DOJ and multiple state attorneys general, *see id.*; National Mortgage Settlement, Servicing Standard Highlights, *available at* http://www.nationalmortgagesettlement.com (last visited Mar. 10, 2012), the settlement was not designed to resolve any other liabilities that Ally Financial has incurred through its improper origination, securitization, and servicing practices, *see* National Mortgage Settlement, About the Settlement, http://www.nationalmortgagesettlement.com/about (last visited Mar. 10, 2012).

58. According to the U.S. Attorney General, the $25 billion settlement and $766.5 million sanction are just "the latest step forward" in holding Ally Financial and others accountable for "egregious mortgage loan servicing abuses." *See* Eric Holder, U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012).

59. Similarly, the New York Attorney General recently announced a $136 million settlement with the nation's five largest mortgage servicers—including GMAC/Ally Financial. *See* Press Release, Office of the New York Attorney General, Schneiderman Secures Major Settlement that Allows Sweeping Mortgage Investigations to Proceed (Feb. 9, 2012). As the New York Attorney General noted, the settlement principally addressed "foreclosure abuses" by GMAC/Ally Financial and other banks, and "[i]n addition to penalties for past abuses, the settlement includes direct relief to victims of wrongful foreclosure conduct" and "imposes strong national standards for mortgage servicing" that had previously been lacking. *Id.* Additionally, the New York Attorney General will lead the new Residential Mortgage-Backed Securities Working Group, a component of the interagency Financial Fraud Enforcement Task Force led by the DOJ, which "brings together the Department of Justice (DOJ), several state law enforcement

officials, and other federal agencies to investigate those responsible for misconduct contributing to the financial crisis through the pooling and sale of residential mortgage-backed securities." *Id.*

60. In addition to these recent settlements and Assessment Order, the Federal Reserve Board and the Federal Deposit Insurance Corporation (the "FDIC") previously ordered Ally Financial, GMACM, and several other Ally Financial subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See In re Ally Fin. Inc.*, FRB Docket Nos. 11020-B-HC & 11020-B-DEO, FDIC-11-123b (April 13, 2011) (the "Consent Order").

61. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries, including GMACM, have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

62. Furthermore, under the Consent Order, Ally Financial must direct GMACM and its other mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id.* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations." *Id.* at 8.

63. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the foreclosure processes of GMACM to request an independent review of their files. *See* Press Release, Fed. Reserve Bd., Federal Reserve Board Announces that Borrowers from Four Mortgage Servicers Can Request an Independent Review and Potentially Receive Compensation (Nov. 1, 2011). This independent review will determine whether errors and misrepresentations in GMACM's foreclosure processes indeed caused financial harm to the borrower. *See id.* If the foreclosure process is found to have caused financial injury to the borrower, GMACM will then be required to provide full compensation. *See id.*

64. As a result of servicing misconduct, Ally Financial and other bank holding companies will now be required to adhere to new, heightened servicing standards. *See* Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2011). The Federal Reserve Board has ordered Ally Financial to remedy its servicing practices by, *inter alia*, "strengthen[ing] the coordination of communications with borrowers by providing borrowers the name of the person at the service who is their primary point of contact, establish[ing] limits on foreclosures where loan modifications have been approved, establish[ing] robust third party vendor controls, strengthen[ing] compliance programs, and provid[ing] appropriate remediation to borrowers who suffered financial injury as a result of errors by the servicers." *See id.*

65. Moreover, the servicing and foreclosure improprieties of Ally Financial and its subsidiaries is a matter of public record. According to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan

Dep. *Fed. Nat'l Mortgage Ass'n v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Dist. Nine, Div. N. Cumberland) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner," Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

66. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.* at 51:15-23. Stephan further testified that when he signed an affidavit affirming that the foreclosure was proper, all he knew was the borrower's name and whether he had signing authority for the GMAC entity foreclosing on the property. *Id.* at 62:23-25, 63:2-6. Stephan testified that the process he followed in signing summary judgment affidavits was in accordance with the policies and procedures required by GMACM. *Id.* at 64:8-14.

67. Additionally, in October 2010, the Ohio Attorney General filed suit against GMACM and Ally Financial, alleging, *inter alia*, that employees of GMACM had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See Ohio v. GMAC Mortgage, LLC*, CI0201006984, Ct. C.P. Lucas Cnty. Although some of the claims brought by the Ohio Attorney General's suit have been resolved by the $25 billion multi-party

settlement, many additional claims not encompassed by the settlement, including those relating to the improper assignment of mortgage notes, have survived. As of February 2012, the action remains pending in Ohio.

68. Similarly, in December 2011, the Massachusetts Attorney General filed suit against GMACM for, among other things, engaging in unfair and deceptive foreclosure practices. *See Massachusetts v. Bank of Am., N.A.*, 11-4363, Suffolk Cnty. Super. Ct. Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States Hous Committee on Financial Services asking that the federal government investigate Ally Financial and GMACM for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Boston Globe, *Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices*, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

Id.

69. While the $25 billion settlement ultimately resolved certain claims brought by the Massachusetts Attorney General in this action, several claims relating to improper foreclosure practices and abuse of certain state recordation systems have survived and will continue to be prosecuted. *See* Press Release, Office of the Attorney General of Massachusetts, *Massachusetts Homeowners to Receive $318 Million in Relief as Part of State-Federal Agreement Over Unlawful Foreclosures and Loan Servicing*, Feb. 9, 2012.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and GMACM

70. Since at least as far back as November 2011, Ally Financial has been considering filing for bankruptcy protection for ResCap, its wholly-owned subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports. GMACM is a wholly-owned, indirect subsidiary of ResCap.

71. Around that time, the financial industry was "betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering." Bloomberg News, *Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance*," Nov. 14, 2011.

72. As the article notes, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy. *See id.*

73. Indeed, Ally Financial warned in its 2011 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 19 (Feb. 28, 2012).

74. That risk ultimately came to pass as Ally Financial recently disclosed that the penalties assessed by the federal government and numerous state attorneys general regarding the foreclosure practices of Ally Financial and its subsidiaries "resulted in our Mortgage operations recording a $230 million charge in the fourth quarter of 2011." *Id.* at 31. As Ally Financial detailed in its previous public filing, the "[t]he majority of [the charge] was recorded at Residential Capital, LLC ('ResCap') . . . [which] resulted in a covenant breach in certain of ResCap's credit facilities." Ally Fin. Inc., Current Report (Form 8-K) (Jan. 31, 2012). Indeed, as Ally Financial more recently explained, "ResCap is required to maintain consolidated net

worth . . . of $250 million at the end of each month under the terms of certain of its credit facilities. . . [and] as a result of the fourth quarter charge, ResCap's consolidated net worth was $92 million at December 31, 2011." Ally Fin. Inc., Annual Report (Form 10-K), at 31-32 (Feb. 28, 2012). ResCap's substantial shortfall, however, was "immediately remediated by Ally through a capital contribution of $197 million, which was provided through forgiveness of intercompany debt during January 2012." *Id.*

75. Moreover, in February 2012, it was reported that Ally Financial had contacted buyout firms such as Fortress Investment Group LLC and Cerberus Capital Management LP regarding a potential sale of ResCap through a pre-packaged bankruptcy to be effectuated by the end of March as ResCap faces financing and liquidity deadlines. *See* Bloomberg News, *Ally's ResCap Said to Seek Buyers for Prearranged Bankruptcy*, Feb. 8, 2012.

76. According to the report, "[p]otential bidders are being told that a pre-packaged bankruptcy filing would allow the buyer to leave behind liabilities such as [RMBS] securitizations that have been the subject of litigation." *Id.* To that end, Ally Financial's CEO, Michael Carpenter, has stated that he will not pursue the aforementioned initial public offering for Ally Financial "until [these] legacy mortgage issues are resolved." *Id.* Nevertheless, a bondholder group representing holders of approximately $800 million in ResCap debt has expressed its desire to "fight [Ally Financial] tooth and nail" to oppose the bankruptcy, based in part on the belief that "Ally [Financial] can't legally separate itself from ResCap because it has stripped assets from the unit." Bloomberg News, *Paulson, Tepper Said Among Investors Urging Ally to Back ResCap*, Jan. 10, 2012.

77. Indeed, as Ally Financial has pointedly noted in its most recent annual report: "In light of ResCap's liquidity and capital needs combined with volatile conditions in the

marketplace, there is substantial doubt about ResCap's ability to continue as a going concern." Ally Fin. Inc., Annual Report (Form 10-K), at 18 (Feb. 28, 2012).

B. GMACM's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

78. To improve the marketability and ratings of the RMBS Notes issued as part of its securitizations, GMACM from time to time sought credit enhancement for the RMBS Notes from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the ones FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Notes that, if there is a shortfall in cash available to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

79. For a trust that issues RMBS Notes, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS Notes. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the loan pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS investors. Such shortfalls result in claims on FGIC's policies.

(2) Securitization Sponsor's Disclosures and Representations and Warranties

80. The risk FGIC assumes when it agrees to issue a policy for RMBS Notes depends upon the credit quality of the underlying mortgage loans, which in turn depends on the

underwriting practices of the loan originators and the characteristics of the loans. If, for instance, GMACM and other loan originators employ substandard underwriting practices, the underlying mortgage loan pool as a whole would be of inferior credit quality. Consequently, the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage portfolio as a whole, would be materially increased.

81. Accordingly, FGIC generally required securitization sponsors, like GMACM, to provide substantial representations and warranties about the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to monthly income ("DTI ratio"), the ratio of the mortgage loan principal balance to the value of the mortgaged property at origination—plus, in the case of a junior lien mortgage loan, the principal balance of the senior mortgage loan on the related mortgaged property—("LTV ratio"), and the borrower's credit score ("FICO score"). Even where GMACM did not originate a particular loan, it nonetheless is typically required to make representations about that loan, thereby assuming the risk that those representations might not be accurate. GMACM's representations and warranties, including representations about the standards and procedures used to underwrite the loans, were intended to allow FGIC to assess the credit risk inherent in the mortgage loan pool before deciding to commit to the transaction.

82. GMACM's representations and warranties in its RMBS transactions regarding the characteristics of the loans included in the mortgage loan portfolios, and the underwriting standards used to evaluate those mortgage loans, are particularly vital because each loan pool is comprised of thousands of mortgage loans, each of which was in itself a complex legal transaction. Each loan file typically contains (or at least is supposed to contain) a mortgage application, a credit report, income and employment verifications, an appraisal, the lender's internal documentation and a wide variety of other documentation necessary to support proper

loan underwriting decisions. Moreover, in seeking financial guaranty insurance from FGIC for the HE Transactions, GMACM demanded that FGIC commit to the pricing and other material terms within a very limited time frame. Both GMACM and FGIC understood and intended that FGIC would rely on the information supplied by GMACM as sponsor, as well as GMACM's representations and warranties concerning that information, in assessing the credit risk of the mortgage loan pool.

83. Further, on information and belief, for each of its securitizations, GMACM as sponsor supplied the same data it provided to FGIC to one or several rating agencies in order for those agencies to create expected loan level default and loss estimates. The loan level default and loss estimates were then used by the rating agencies to create cash flow projections and potential loss estimates for the entire transaction. Finally, the rating agencies delivered to the sponsor and to FGIC a private credit assessment for the transaction (sometimes referred to as a "shadow rating") without considering the effect of FGIC's policy. The shadow rating provided an overall evaluation of the likelihood of default on the securities FGIC would be insuring in the securitization. As sponsor, GMACM arranged for the shadow rating to be provided to FGIC knowing that it was an essential condition to FGIC's willingness to issue a financial guaranty insurance policy.

C. The HE Transactions

(1) The GMACM 2006-HE2 Transaction

84. On June 29, 2006, GMACM pooled together and deposited many thousands of fixed rate Home Equity Loans ("HELs") into the 2006-HE2 Trust. The 2006-HE2 Trust served as the Issuer of $626,240,000 aggregate principal amount of 2006-HE2 Notes. Home equity loans are essentially second-lien mortgage loans, which are generally funded entirely at the closing of the loan.

85. The initial conveyance to the 2006-HE2 Trust by RAMP (acting as Depositor) contained over 9,500 HELs with an aggregate principal balance of approximately $480 million. Investors in the GMACM-sponsored 2006-HE2 Transaction were issued four classes of securities (*i.e.*, the 2006-HE2 Notes)—Class A-1 Notes, Class A-2 Notes, Class A-3 Notes, and Class A-4 Notes (formally termed the GMACM Home Equity Loan-Backed Term Notes, Series 2006-HE2)—which were collateralized by the Mortgage Loans transferred to and held by the 2006-HE2 Trust. In addition, approximately $160 million was deposited into a pre-funding account at closing, which was used to acquire approximately 3,500 additional HELs in the 90 days following the closing.

(2) The GMACM 2007-HE2 Transaction

86. Similarly, on June 28, 2007, GMACM pooled together and deposited many thousands of fixed rate HELs into the 2007-HE2 Trust. The 2007-HE2 Trust served as the Issuer of $1,240,884,000 aggregate principal amount of 2007-HE2 Notes.

87. The initial conveyance to the 2007-HE2 Trust by RAMP (acting as Depositor) contained over 17,800 HELs with an aggregate principal balance of approximately $960 million. Investors in the GMACM-sponsored 2007-HE2 Transaction were issued six classes of securities (*i.e.*, the 2007-HE2 Notes)—Class A-1, Class A-2, Class A-3, Class A-4, Class A-5 and Class A-6 (formally termed the GMACM Home Equity Loan-Backed Term Notes, Series 2007-HE2)—which were collateralized by the Mortgage Loans transferred to and held by the 2007-HE2 Trust. In addition, approximately $320 million was deposited into a pre-funding account at the closing, which was used to acquire approximately 5,800 additional HELs in the 90 days following the closing.

(3) The HE Transactions Generally

88. To enhance the ratings and marketability of the HE Notes, GMACM sought financial guaranty insurance policies from FGIC for the purpose of insuring the Transactions for the benefit of the certificate holders. For each of the HE Transactions, FGIC and GMACM executed an Insurance and Indemnity Agreement (respectively, the "2006-HE2 I&I Agreement" and the "2007-HE2 I&I Agreement," and collectively the "I&I Agreements"),[1] under which FGIC agreed to and did issue financial guaranty insurance policies—Policy number 06030080 and Policy number 07030046, respectively—to insure the 2006-HE2 and 2007-HE2 Notes. Each I&I Agreement was signed by FGIC (as the "Insurer" of each Transaction); GMACM (as the "Servicer" and a "Seller" for each Transaction), RAMP (as the "Depositor" for each Transaction); Walnut Grove (a "Seller" for each Transaction); and the respective Indenture Trustee for each Transaction.[2]

89. In each Transaction, Ally Bank (using its then-current name, GMAC Bank) also entered into a Custodial Agreement whereby it agreed to serve as Custodian of the underlying mortgage loan notes on behalf of the respective Trusts (the "2006-HE2 Custodial Agreement" and "2007-HE2 Custodial Agreement," and, together the "Custodial Agreements"). FGIC is an express third party beneficiary of the Custodial Agreements. *See* Custodial Agreements § 5.6.

90. Each I&I Agreement provides that FGIC (the Insurer) is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." I&I Agreements § 2.02(k). With respect to the 2006-HE2 and 2007-HE2 Transactions, the "Operative

---

[1] JPMorgan initially served as the Indenture Trustee for the 2006-HE2 Transaction, but was succeeded by The Bank of New York Trust Company, N.A. The Bank of New York Trust Company, N.A., also served as the Indenture Trustee for the 2007-HE2 Transaction.

[2] The 2006-HE2 I&I Agreement was executed on June 29, 2006 and the 2007-HE2 I&I Agreement was executed on June 28, 2007.

Documents" are defined to include, among other documents: (i) the relevant HE Notes; (ii) the Mortgage Loan Purchase Agreement, among GMACM, RAMP, Walnut Grove, the relevant HE2 Trust, and the relevant Indenture Trustee (respectively, the "2006-HE2 MLPA" and the "2007-HE2 MLPA," and collectively the "MLPAs"); (iii) the Servicing Agreement among GMACM, the relevant HE2 Trust, and the relevant Indenture Trustee (respectively, the "2006-HE2 Servicing Agreement" and the "2007-HE2 Servicing Agreement," and collectively the "Servicing Agreements"); (iv) the Indenture between the relevant Trust and Indenture Trustee; and (v) the Custodial Agreement among GMACM, the relevant Indenture Trustee, and Ally Bank (then doing business as GMAC Bank).[3] *See* I&I Agreements § 1.01. FGIC is referred to as the "Enhancer" under certain of the Operative Documents.

91. Pursuant to the I&I Agreements, FGIC insured $1,867,124,000 aggregate principal amount of the HE Notes. The Policies improved the marketability of the HE Notes by mitigating risk for potential investors and making the HE Notes eligible to receive a credit rating of triple-A by the rating agencies at closing.

92. GMACM and the Depositor offered the HE Notes for sale pursuant to a prospectus (a "Prospectus," and for each Transaction respectively, the "2006-HE2 Prospectus," and the "2007-HE2 Prospectus"), and a prospectus supplement (a "Prospectus Supplement," and for each Transaction respectively, the "2006-HE2 Prospectus Supplement" and the "2007-HE2 Prospectus Supplement"), each touting the respective Policies and the triple-A initial rating of

[3] The MLPA, Servicing Agreement, Indenture and Custodial Agreement for the 2006-HE2 Transaction were each executed on June 29, 2006. The MLPA, Servicing Agreement, Indenture and Custodial Agreement for the 2007-HE2 Transaction were each executed on June 28, 2007.

the HE Notes, which was made possible by those Policies.[4] The Prospectus and Prospectus Supplement, together with certain preliminary offering documents, each as further supplemented by any subsequent amendment or supplement thereto, and any other offering document that make reference to the Policies, are referred to collectively as the "Offering Documents."

93. Upon the closing of each HE2 Transaction, Ally Securities, an Ally Financial subsidiary, acted as a co- manager and joint-lead manager, respectively, for a syndicate of underwriters that purchased from the respective HE Trust and sold to investors the related HE Notes, and FGIC, for its part, issued the related Policy in accordance with the terms of each I&I Agreement.

D. GMACM Fraudulently Induces FGIC to Insure the HE Notes with Substantial Assistance from Ally Financial and Ally Bank

(1) GMACM's Fraudulent Inducement of FGIC

94. FGIC's participation in the HE Transactions was an essential component of the HE Transactions and enhanced GMACM's ability to market the securitizations effectively. The Policies allowed GMACM to sell the HE Notes with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

95. In order to induce FGIC to write financial guaranty insurance for the HE Transactions, GMACM provided to FGIC, directly or indirectly, a variety of information, and promised to—and did—provide FGIC with a variety of representations, warranties, and covenants.

96. *First*, GMACM provided to FGIC initial and final 2006-HE2 and 2007-HE2 Prospectus Supplements (collectively, the "Prospectus Supplements") which summarized, among

[4] The 2006-HE2 Prospectus is dated as of April 7, 2006; the 2007-HE2 Prospectus is dated as of April 17, 2007. The 2007-HE2 Prospectus Supplement is dated as of June 27, 2006; the 2007-HE2 Prospectus Supplement is dated as of June 28, 2007.

other material information, the credit quality and characteristics of the Mortgage Loans, and GMACM's loan underwriting guidelines and loan origination criteria.

97. *Second*, FGIC received a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in the HE Transactions, together with representations regarding material statistics about the initial Loan Pool as a whole.

98. *Third*, GMACM provided to FGIC credit ratings for the HE Notes determined on the basis of information concerning the characteristics of the Mortgage Loans supplied to the rating agencies by GMACM, but without considering the effect of the Policies. These ratings, which GMACM procured from the credit rating agencies, are known as "shadow ratings."

99. *Fourth*, as discussed in detail in Section E below, GMACM provided to FGIC representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreements regarding the Mortgage Loans specifically and the Loan Pool generally.

100. ***Prospectus Supplement and Other Offering Documents.*** In determining whether to insure the HE Notes, FGIC relied in part upon representations and warranties regarding GMACM's loan underwriting standards made by GMACM in the Prospectuses and Prospectus Supplements. The 2006-HE2 Prospectus, as supplemented by the 2006-HE2 Prospectus Supplement, was filed with the SEC and became effective on June 29, 2006. A Preliminary Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about June 21, 2006, in an email sent by Jeffrey Wittenberg, on behalf of GMACM. The Final 2006-HE2 Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about June 28, 2006, in an email sent by Jeffrey Wittenberg, on behalf of GMACM.

101. The 2007-HE2 Prospectus, as supplemented by the 2007-HE2 Prospectus Supplement, was filed with the SEC and became effective on June 28, 2007. A Preliminary Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about June 25, 2007, in an email sent by Dennis Bent on behalf of GMACM. The Final 2007-HE2 Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about June 28, 2007, in an email sent by Duane Beasley, on behalf of GMACM.

102. In the 2006-HE2 and 2007-HE2 Offering Documents, GMACM represented that, based on the data provided in the borrower's application and certain other applicable verifications, "a determination will have been generally made by the original lender that the borrower's monthly income, if required to be stated, would be sufficient to enable the borrower to meet its monthly obligations on the loan and other expenses related to the property." 2006-HE2 Prospectus at 23; 2007-HE2 Prospectus at 30.

103. Further, in the Prospectus Supplements, GMACM also represented to FGIC that "[a]ll of the mortgage loans were underwritten generally in accordance with [GMACM's] underwriting standards." 2006-HE2 Prospectus Supplement at S-30; 2007-HE2 Prospectus Supplement at S-33.

104. The Prospectus Supplements expressly state that GMACM's "underwriting standards with respect to the mortgage loans generally will conform to those published in the [GMACM] underwriting guidelines, including the provisions of the [GMACM] underwriting guidelines applicable to the GMAC Mortgage Home Equity Program." 2006-HE2 Prospectus Supplement at S-30; 2007-HE2 Prospectus Supplement at S-33.

105. GMACM publishes its loan underwriting standards in a document referred to in the Prospectus Supplements as "the GMAC Mortgage Corporation underwriting guidelines" or

the "GMAC Mortgage, LLC underwriting guidelines" (and referred to herein as the "Underwriting Guidelines"). 2006-HE2 Prospectus Supplement at S-30; 2007-HE2 Prospectus Supplement at S-33. In general, the Underwriting Guidelines specify documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan. Depending upon the particular type of loan, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories and/or evidence of closing funds, among other things. The substantive criteria for eligibility address material characteristics of the proposed loan, such as DTI ratios, Combined Loan-to-Value ("CLTV") ratios (a ratio comparing the aggregate principal balance of first and second mortgages on a covered property to the value of the property), and occupancy status.

106. The Prospectus Supplements set forth, among other information, the following important characteristics of the initial Loan Pools: the ranges of and weighted average FICO scores, the ranges of and weighted average CLTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (*i.e.*, whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property). *See* 2006-HE2 Prospectus Supplement at A-I-1 to A-I-7; 2007-HE2 Prospectus Supplement at A-I-1 to A-I-7.

107. In particular, GMACM represented in the 2006-HE2 and 2007-HE2 Prospectus Supplements that the loans had been originated with a maximum DTI ratio of 80%—with less than 1% of the Mortgage Loans originated with a DTI ratio over 60%—and a maximum CLTV ratio of 100%. *See* 2006-HE2 Prospectus Supplement at A-I-3, A-I-6; 2007-HE2 Prospectus

Supplement at A-I-3, A-I-6. GMACM also represented that for each Mortgage Loan it had generally made a determination based upon all applicable employment, credit and property information regarding whether the prospective borrower had sufficient monthly income available to meet the borrower's monthly obligations. *See* 2006-HE2 Prospectus at 23; 2007 HE2 Prospectus at 30.

108. GMACM also represented in the 2006-HE2 Offering Documents that, with respect to occupancy status, 98.79% of the Mortgage Loans would be secured by the borrower's primary residence. 2006-HE2 Prospectus Supplement at A-I-4. GMACM further represented in the 2007-HE2 Offering Documents that, with respect to occupancy status, 95.41% of the Mortgage Loans would be secured by the borrower's primary residence. 2007-HE2 Prospectus Supplement at A-I-4.

109. ***Loan Tapes.*** The loan tapes set forth, for each Mortgage Loan in the initial Loan Pool, key characteristics such as the borrower's FICO score, DTI ratio, and the CLTV ratio for the loan. GMACM also disclosed in the 2006-HE2 and 2007-HE2 Prospectus Supplements—with respect to each Loan Pool as a whole—aggregate characteristics also relevant to the assessment of the credit risk of the pool, including weighted averages of FICO scores, DTI ratios and CLTV ratios.

110. ***Shadow Rating Letters***. GMACM, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tapes that were provided to FGIC. As requested by GMACM, Moody's and S&P provided the shadow ratings on the respective closing dates of the HE Transactions. In its letters to FGIC describing the shadow ratings for each of the HE Transactions, Moody's noted that it reviewed the documentation provided by GMACM and that the rating was "based primarily on the credit quality of the loans backing the transaction."

Similarly, in its letters to FGIC, S&P noted that it too relied on the information provided to it by GMACM and that each shadow rating "relies on the issuer . . . for the accuracy and completeness of the information submitted in connection with the [shadow rating]."

111. Based on the information supplied by GMACM, Moody's assessed the credit quality of the initial 2006-HE2 and 2007-HE2 Loan Pools and assigned shadow ratings of Baa1 and Baa2, respectively, to the 2006-HE2 and 2007-HE2 Notes. S&P assigned the 2006-HE2 and 2007-HE2 Notes shadow ratings of BBB- and BBB, respectively.

112. These shadow ratings, which were based, in part, on GMACM's representations in respect of the characteristics of the Loan Pools, met FGIC's minimum requirements and were required by FGIC as an essential condition to its willingness to participate in HE Transactions and issue the Policies.

(2) GMACM's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Bank

113. Ally Bank provided substantial assistance to its affiliate GMACM in fraudulently procuring the Policies from FGIC. As it originated or acquired approximately 75% of the initial Mortgage Loans, Ally Bank was well aware of the true characteristics of the majority of the Loan Pool. Moreover, as a result of its affiliate status with GMACM, and its role as Custodian for the HE Transactions—for which it received substantial fees—Ally Bank was aware of the representations and warranties GMACM made to FGIC regarding the nature of GMACM's business practices and the characteristics of the Mortgage Loans (including the many thousands of Mortgages Loans that were originated by Ally Bank).

114. With full knowledge that GMACM had not complied—and would not comply—with the representations and warranties it made to FGIC, and direct knowledge of the many thousands of loans it had originated and sold to GMACM, which formed a substantial part of the

collateral for the HE Transactions, Ally Bank represented to FGIC that, as Custodian, it would inform FGIC if it discovered any non-compliant Mortgage Loans or non-compliance with GMACM's obligations under the Operative Documents. By offering FGIC this false comfort, despite knowing that GMACM was fraudulently inducing FGIC to provide financial guaranty insurance for the HE Transactions, Ally Bank provided material assistance to GMACM's fraud.

(3) GMACM's Fraudulent Inducement of FGIC is Carried Out with Substantial Assistance from Ally Financial

115. Ally Financial provided substantial assistance to its subsidiaries GMACM and Ally Bank in fraudulently inducing FGIC to participate in the HE Transactions and, ultimately, issue the Policies. Ally Financial knew that the Mortgage Loans underlying the HE Transactions were of a substantially poorer quality than was represented to FGIC and other participants in the Transaction, including investors. Ally Financial further knew that the Mortgage Loans were not underwritten to the standards represented in the Offering Documents and warranted in the Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap, Ally Bank, and its other subsidiaries, Ally Financial knew that the representations and warranties GMACM made to FGIC prior to and at the closing, upon which FGIC reasonably relied, were false.

116. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to engender investor confidence in, and otherwise finance and support, its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

117. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

118. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries."

119. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

120. Ally Financial's corporate restructuring also allowed GMACM to explicitly represent and warrant to FGIC in the I&I Agreements that GMACM "is solvent and will not be rendered insolvent by the Transaction. . . . [GMACM] shall not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business . . . ." I&I Agreements § 2.01(m). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary GMACM.

121. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the HE Transactions—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the

acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

122. Moreover, as a result of its domination and control over ResCap, GMACM, and Ally Bank, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of GMACM's representations and warranties to FGIC—and that they were untrue when stated—as well as the substantial assistance Ally Bank was rendering GMACM in aid of its fraudulent inducement of FGIC. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the mortgage operations of both companies. ResCap and its own subsidiaries, including GMACM, shared numerous directors and senior management as well. Similarly, William F. Muir, Ally Financial's President, has served in that capacity since at least 2004 (first at GMAC and then at Ally Financial) while also serving as President and Chairman of the Board of IB Finance Holding Company, LLC—the direct parent of Ally Bank—and as a director of Ally Bank.

123. David C. Walker is another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, including GMACM and RAMP. Walker joined Ally Financial in 1985 and has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. Walker has also served as a director at ResCap, GMACM, RFC, and RAMP, among other ResCap subsidiaries. In the 2006-HE2 Transaction, acting as a director of

RAMP, Walker was a signatory to RAMP's December 20, 2005 "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors," which was included among the closing documents of the 2006-HE2 Transaction.

124. Similarly, as of April 13, 2006, David Applegate served as Director, President and CEO of GMAC Mortgage LLC, while David M. Bricker served as Director, Senior Vice President and CFO of GMAC Mortgage, LLC. In the 2007-HE2 Transaction, acting as directors of RAMP, both Bricker and Applegate were signatories to RAMP's January 25, 2007, "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors," which was included among the closing documents of the 2007-HE2 Transaction.

125. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, Ally Bank, and GMACM, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by GMACM was shared among and between GMACM and its parent ResCap, ResCap and its parent Ally Financial, and Ally Bank and its parent and affiliates. Indeed, at least one Ally Financial employee who was involved in the 2006-HE2 Transaction appeared on the Transactions' working group list and received all distributions that were sent to the group, including all drafts, final versions, and communications concerning the Operative and Offering Documents.

126. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to GMACM in fraudulently inducing FGIC to

participate in the Transactions and issue the Policies. Further, the issuance of the Policies, which made the HE Transactions possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. GMACM's Representations, Warranties and Affirmative Covenants

127. In connection with the HE Transactions, GMACM, at the direction of Ally Financial, either directly or indirectly through ResCap, gave numerous representations, warranties and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way GMACM conducted its loan origination, selection and evaluation processes, the characteristics of the Mortgage Loans and of the initial and complete Loan Pools, and the accuracy and completeness of the information supplied to FGIC. These and other characteristics of the Mortgage Loans included in each of the initial Loan Pools were detailed in schedules attached to the applicable Servicing Agreement, and provided to FGIC by GMACM in the form of loan tapes (collectively, for each Transaction, the "Mortgage Loan Schedules.") Moreover, these same representations and warranties were restated by GMACM when it transferred additional Mortgage Loans to the HE Trusts after the closing of each Transaction (as was permitted for a short time following closing).

128. GMACM further promised to provide FGIC with a variety of information, including access to GMACM's books and records and to GMACM's Chief Financial Officer and its independent accountants.

129. GMACM's representations and warranties, and particularly GMACM's representation that the information supplied to FGIC was not materially inaccurate or misleading, induced FGIC to enter into the HE Transactions and to issue the Policies on the agreed terms. Further, the I&I Agreements' incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and

every one of the representations and warranties that GMACM made in connection with the HE Transactions.

130. FGIC, for its part, reasonably relied on the information available to it regarding the underlying Mortgage Loans and the representations and warranties provided by GMACM. Since FGIC had neither the right under the applicable Operative Documents, nor the practical ability, to review the tens of thousands of underlying Mortgage Loan files in the days available to it prior to the closing of the HE Transactions, GMACM knew that FGIC had no choice but to rely on GMACM's representations regarding the underlying loans in determining whether to issue the Policies. Further, FGIC had no reason to believe that those representations were not true and accurate.

131. Indeed, GMACM included more than 27,000 individual Mortgage Loans in the HE Transactions at their closing dates, and additional Mortgage Loans post-closing. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation and other forms of documentation necessary to support each underwriting decision. Unlike GMACM, FGIC was under no contractual duty whatsoever to review the tens of thousands of initial Mortgage Loans or the Mortgage Loans subsequently transferred after closing. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by GMACM regarding its loan origination, selection, and evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on GMACM to conduct its underwriting processes according to the promised standards and FGIC had no basis to conclude that GMACM's representations and warranties were false. Thus, FGIC reasonably believed that truthful and accurate information had been provided and that it would not face

additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

132. Based on the information received by FGIC and the representations and warranties given by GMACM, FGIC entered into the I&I Agreements and agreed to issue the Policies to the respective Indenture Trustees for the benefit of the holders of the HE Notes. In return for doing so, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the HE Notes. Specifically, FGIC received .13% and .125% per annum of the aggregate balance of the 2006-HE2 Notes and 2007-HE2 Notes, respectively, for serving as insurer, figures commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties and affirmative covenants provided by GMACM.

133. As discussed below, GMACM's information, representations and warranties were materially false when disclosed and/or provided by GMACM. GMACM knew that this information, and its representations and warranties, were materially false when made. GMACM also knew that this information and the representations and warranties were essential to FGIC's decision to issue the Policies. Indeed, GMACM intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreements and issue the Policies. The issuance by FGIC of the Policies—induced by GMACM's fraudulent misrepresentations and substantial assistance by Ally Financial—made the HE Notes eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(1) Representations, Warranties and Affirmative Covenants Relating to the Operative and Offering Documents

134. Under Section 2.01 of the I&I Agreements, GMACM made the following representations and warranties, among others (emphasis added in each case):

♦ *Accuracy of Information.* **Neither the Operative Documents to which it is a party nor other information relating to the Mortgage Loans**, the operations of GMACM. . . or the financial condition of GMACM . . . furnished to [FGIC] . . . by GMACM . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made** . . . GMACM . . . has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change with respect to GMACM . . . Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to GMACM . . . that would render any of the Documents untrue or misleading in any material respect.

♦ *Compliance with Securities Laws.* The offering and sale of the Securities complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading** . . . .

♦ *Operative Documents.* **Each of the representations and warranties of GMACM . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects** [and] GMACM . . . hereby makes each such representation and warranty to, and for the benefit of, [FGIC] as if the same were set forth in full herein . . . .

♦ *Solvency; Fraudulent Conveyance.* [GMACM] . . . is solvent and will not be rendered insolvent by the Transaction and . . . **GMACM . . . shall not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**, and . . . GMACM . . . does not intend to incur, or believe that it has incurred, debts beyond its ability to pay as they mature . . . GMACM . . . is not transferring the Mortgage Loans . . . with any intent to hinder, delay or defraud . . . creditors.

135. *First*, in the I&I Agreements, GMACM represented and warranted to FGIC that "[n]either the Operative Documents to which it is a party nor other information relating to the Mortgage Loans. . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." I&I Agreements § 2.01(j). Through these Operative and Offering Documents, GMACM communicated several material facts about the characteristics of the mortgage loans sold to the HE Trusts.

136. *Second*, in the I&I Agreements, GMACM represented and warranted that "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading . . . ." *Id.* § 2.01(k). As discussed above, in the Prospectus Supplements, GMACM represented that all of the mortgage loans sold to the HE Trusts had been underwritten generally in accordance with GMACM's underwriting standards, including the GMAC Mortgage Home Equity Program. 2006-HE2 Prospectus Supplement at S-30; 2007-HE2 Prospectus Supplement at S-33.

137. *Third*, the I&I Agreements incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the "Operative Documents," as that term was defined in the I&I Agreements: "[e]ach of the representations and warranties . . . contained in the applicable Operative Documents . . . is true and correct in all material respects[.]" *See* I&I Agreements §§ 1.01, 2.01(l). The incorporation by reference of the Operative Documents into the I&I Agreements was intended to allow FGIC to rely on any representation and warranty that GMACM made to other entities, such as investors or the respective Indenture Trustees, in connection with the HE Transactions. Indeed, the I&I Agreements expressly identify FGIC as a third-party beneficiary with respect to the related Operative Documents. I&I Agreements § 2.02(k).

138. *Fourth*, GMACM also provided information to FGIC concerning Mortgage Loans in the HE Transactions. *See* I&I Agreements § 2.02(c)(iii). This information included loan tapes that set forth statistics about the respective Loan Pools. The loan tapes purported to describe key characteristics relevant to the assessment of risk, including DTI ratios, CLTV ratios, occupancy status, and FICO scores. *See* MLPAs § 2.1(d),(e). On information and belief, the loan tapes

FGIC received at closing of each of the Transactions contain the same information as is contained in the Mortgage Loan Schedules referred to in the related MLPAs.

139. In turn, in the MLPAs, GMACM represented that all the information in those Mortgage Loan Schedules "is true and correct in all material respects as of the date or dates respecting which such information is furnished." MLPAs § 3.1(b)(i).

140. As a result of incorporating into the I&I Agreements the representations and warranties in the related Operative Documents, GMACM incorporated representations and warranties regarding the underwriting of the Mortgage Loans included in the HE Transactions. These representations and warranties set forth the standards governing each Mortgage Loan, including the representation that the Mortgage Loans had been underwritten in compliance with GMACM's underwriting guidelines. *See* MLPAs § 3.1(b)(xxxvi).

141. In particular, in the MLPAs, GMACM represents and warrants, as to each Mortgage Loan that:

- The information set forth in the Mortgage Loan Schedule with respect to each Mortgage Loan or the Mortgage Loans is true and correct in all material respects as of the date or dates respecting which such information is initially furnished;

- As of the respective Cut-Off Dates (June 1, 2006, for the 2006-HE2 Transaction, and June 1, 2007, for the 2007-HE2 Transaction) or any Subsequent Cut-Off Date (the date specified in the agreement by which any Subsequent Mortgage Loan was transferred to the respective Trust), no Mortgage Loan was 30 days or more delinquent in payment of principal or interest. Additionally, with respect to the 2007-HE2 Transaction, no more than 1.00% of the Subsequent Mortgage Loans had been 30 or more days delinquent in the twelve months preceding the sale of the Subsequent Mortgage Loans to 2007-HE2 Trust;

- With respect to the GMACM Initial Mortgage Loans or, as applicable, any Subsequent Mortgage Loans sold by GMACM, the related Mortgage File contains or will contain, in accordance with the definition of "Mortgage File" in Appendix A to the related Indenture, each of the documents and instruments specified to be included therein;

- As of the Cut-Off Date or Subsequent Cut-Off Date, the CLTV for each Mortgage Loan was not in excess of 100.00%;

- GMACM used no selection procedures that identified the Mortgage Loans as being less desirable or valuable than other comparable mortgage loans originated or acquired by GMACM under the GMACM Home Equity Program.

142. Additionally, the 2007-HE2 MLPA further represents and warrants that "[n]o fraud or misrepresentation of a material fact with respect to the origination of a Mortgage Loan has taken place on the part of GMACM and to the best of GMACM's knowledge, no fraud or misrepresentation of a material fact with respect to the origination of a Mortgage Loan has taken place on the part of any third party, including without limitation the related mortgagor, connected with the origination of a Mortgage Loan." 2007-HE2 MLPA § 3.1(xxxvii).

143. Moreover, in the I&I Agreements—which expressly identify FGIC as a third-party beneficiary with respect to the related Operative Documents—GMACM specifically covenants that it will "comply in all material respects with the terms and conditions of and perform its obligations under the Operative Documents to which it is a party . . . ." I&I Agreements § 2.02(a).

(2) Representations, Warranties and Affirmative Covenants Regarding Access to Information and Servicing

144. The I&I Agreements also incorporate the representations and warranties that GMACM made in the Servicing Agreements in its capacity as Servicer. *See* I&I Agreements § 2.02(l). Under the I&I Agreements, GMACM covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the Servicing Agreement." I&I Agreements § 2.02(l). In the Servicing Agreements GMACM covenanted, represented, and warranted that it would service the Mortgage Loans in the HE Transactions in a manner consistent with its own servicing guidelines. *See* Servicing Agreements § 3.01(a).

145. Additionally, the Servicing Agreements provide that, "documents contained in the Mortgage File . . . shall be held by the Servicer in trust as agent for the Indenture Trustee on behalf of the Noteholders." Servicing Agreements § 3.01(c). As such, the information and documents regarding the Mortgage Loans are not the property of or otherwise owned by GMACM, but rather such files are to be held by the servicer of the Transactions—whether that party be GMACM or a third party. Moreover, through the Servicing Agreements, GMACM expressly covenanted that, in the event GMACM's servicing duties are terminated and transferred to another party, GMACM "agrees to cooperate with the Issuer, the Enhancer [*i.e.*, FGIC] and Indenture Trustee, as the case may be, in effecting the termination of the responsibilities and rights of the Servicer . . . ." *Id.* at § 7.01(a). FGIC is an express third-party beneficiary of the Servicing Agreements. *See id.* at § 8.05.

146. The I&I Agreements further afford FGIC the express right "to conduct an ongoing review of GMACM's practices as Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices." I&I Agreements § 2.02(p). FGIC also has the express right to "inspect the books and records of GMACM . . . [and to] discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and . . . with GMACM's consent, which consent shall not be unreasonably withheld or delayed, to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants[.]" I&I Agreements § 2.02(e)(i)-(iii).

147. The I&I Agreements further provide that GMACM shall furnish to FGIC, promptly upon request, "such data as FGIC may reasonably request." I&I Agreements § 2.02(c)(v).

F. GMACM's Breaches of Its Representations, Warranties and Affirmative Covenants

148. As discussed above, FGIC relied on material representations and warranties made by GMACM regarding the manner in which the Mortgage Loans were originated, selected, and evaluated, the characteristics of those loans, and the accuracy and completeness of information GMACM supplied to FGIC. Based on those representations and warranties, FGIC agreed to issue the Policies. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed below, the risk that FGIC assumed when it issued the Policies was many times greater than the risk disclosed by GMACM's representations and warranties. GMACM breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

149. The HE Transactions have performed poorly, and delinquencies and defaults for Mortgage Loans in the HE Transactions have been substantial. For the 2006-HE2 Transaction, as of January 31, 2012, approximately 20% of the balance of the entire Loan Pool had been liquidated, modified, or was severely delinquent. And for the 2007-HE2 Transaction, as of January 31, 2012, approximately 26% of the balance of the entire Loan Pool had been liquidated, modified or was severely delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue the Policies, which cover, *inter alia*, shortfalls in amounts paid to noteholders arising from liquidated mortgage loans, GMACM assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with GMACM's representations and warranties.

150. The poor performance of the Mortgage Loans has reduced the cash flow to the HE Trusts, which has caused, and will continue to cause, substantial claims to be presented to FGIC under the Policies to cover these shortfalls. As of February 2012, more than $47 million and

$121 million in claims had been presented to FGIC in connection with the 2006-HE2 and 2007-HE2 Transactions, respectively. FGIC expects tens of millions of dollars more in claims to be presented to it under the HE Transactions in the future.

151. As an increasingly high percentage of the Mortgage Loans enter delinquency and default, FGIC has uncovered a wealth of material breaches of GMACM's representations and warranties regarding the characteristics of the loans and the standards to which they were underwritten.

(1) Breaches Identified Through Initial Review

152. When FGIC became concerned about the high delinquencies and default rates in the HE Transactions, FGIC requested that GMACM provide it with certain Mortgage Loan files underlying the HE Transactions.

153. FGIC selected for review a number of non-performing (*i.e.*, non-current or charged-off) loans that had resulted in losses to the 2006-HE2 and 2007-HE2 Trusts. To perform this review, FGIC hired an independent outside consultant with particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

154. That review revealed that GMACM had breached one or more material representations and warranties with respect to approximately 72% of the 2006-HE2 Mortgage Loans reviewed, and approximately 82% of the 2007-HE2 Mortgage Loans reviewed.

(2) Breaches Identified Through Additional Review

155. In 2010, as the HE Transactions continued to perform poorly, FGIC again retained a professional mortgage loan review team to identify, review, and evaluate a statistically significant sample of mortgage loans in each of the HE Transactions.

156. With respect to 2006-HE2, FGIC's independent loan consultant reviewed 100 loan files received by FGIC. That review revealed that GMACM had breached one or more material representations and warranties with respect to 97, or an astounding 97%, of these loans.

157. A small sample of these material breaches and underwriting violations are listed below:

- Loan Number 8253462462: the Mortgage Loan Schedule reported a DTI ratio of 32.4%. However, the borrowers had several outstanding mortgages that were not accounted for, resulting in an actual DTI ratio of 115%. In addition, the loan file was missing the required verbal verifications of employment, the hazard insurance policy, the preliminary and final title options, and the first lien mortgage note.

- Loan Number 8655918345: the Mortgage Loan Schedule reported a CLTV ratio of 88.4% based on an appraised value of $165,000. However, because the borrowers had owned the subject property for less than twelve months, the purchase price of $124,000 should have been used instead of the appraised value. The use of the correct value results in an actual CLTV ratio of 119.2%, higher than allowed by any program guidelines. In addition, the loan file was missing required verification of mortgage and the preliminary and final title options.

- Loan Number 8656035576: the Mortgage Loan Schedule reported a CLTV ratio of 94.90% based on an appraised value of $200,000. However, because the borrower had owned the subject property for less than twelve months, the purchase price of $174,000 should have been used instead of the appraised value. The use of the correct value results in an actual CLTV ratio of 108.60%, higher than allowed by any program guidelines. In addition, the loan file was missing required preliminary and final title options and the first lien note.

158. Similarly, with respect to the 2007-HE2 Transaction, FGIC's independent loan consultant reviewed 154 loan files received by FGIC. That review revealed that GMACM had breached one or more material representations with respect to 139, or approximately 90%, of these loans.

159. A small sample of these material breaches and underwriting violations are listed below:

- Loan Number 7306296823: the Mortgage Loan Schedule represented that the subject loan was for a first mortgage debt consolidation refinance of an owner occupied

property with a CLTV ratio of 9.93%; however, the Hud-1 Settlement Statements contained in the loan file indicated the borrower has a first ($216,000) and second ($27,000.00) mortgage loan on the subject property which appraised for $272,000, raising the actual CLTV ratio to 89.34%, which exceeds the maximum CLTV ratio allowed under the GMAC Underwriting Guidelines applicable to the particular type of loan. In addition, the Mortgage Loan File did not contain a verification of the mortgage or a credit report supplement indicating the mortgage payment was made on time.

- Loan Number 8255124946: the loan approval stipulated that a verbal verification of employment be obtained; in fact, the borrower was not employed at the time the subject loan was made. If the required verbal verification of employment had been completed prior to the loan closing, the subject loan would not have been approved.

- Loan Number 8656670831: the Mortgage Loan Schedule indicated the appraised value as $123,000; however, the purchase price of $65,000 should have been used since the borrower had not owned the property for twelve months. Based on the correct loan application information, the actual CLTV ratio should have been 141.0% rather than 74.5% as listed, which exceeds the maximum CLTV ratio allowed under the program guidelines.

160. These examples of underwriting violations are but a small smattering of the extensive defects among the Mortgage Loans and evidence significant breaches of the MLPAs. *See* MLPAs § 3.1. And it is reasonable to conclude—based on what is now known by FGIC and as a result of what is being wrongly withheld from FGIC—that a substantial majority of the approximately 36,790 Mortgage Loans (27,400 initial Mortgage Loans and 9,390 Subsequent Mortgage Loans, with a combined principal balance as of their respective Cut-Off Dates of over $1.94 billion) held by the HE Trusts evidence similar breaches of GMACM's representations and warranties.

161. Moreover, with respect to the 2007-HE2 Transaction, FGIC has discovered that a portion of the underlying Mortgage Loans were procured through borrower fraud at the time of origination. For example, a review of the Mortgage Loans has revealed that, in certain instances, borrowers claimed to have been employed in different positions and/or earning significantly more income than was in fact the case. Nevertheless, in spite of numerous such red flags in Loan

Files indicating that certain borrowers' income representations were fraudulent, the loans closed, resulting in, among other things, actual DTI ratios that were higher than reported. Given the frequency with which Mortgage Loans contained red flags and/or were missing critical documentation, GMACM must have been—or at least now is—aware that at least some of the Mortgage Loans were procured through fraud. Accordingly, GMACM has breached the representation and warranty in the 2007-HE2 MLPA that, to the best of GMACM's knowledge, no fraud or misrepresentation of material fact with respect to the origination of a Mortgage Loan had taken place.

162. Additionally, since, as noted, GMACM continues to wrongfully withhold material Mortgage Loan information from FGIC, FGIC is unable to determine whether more examples of such fraud in the origination have taken place, and thus FGIC reserves its right to bring further claims with respect to this breach.

163. Following the discovery of these high defect rates and pursuant to the respective I&I Agreements and the MLPAs, FGIC demanded that GMACM repurchase the non-compliant Mortgage Loans discovered during its repurchase review. GMACM has expressly refused to repurchase a substantial number of non-conforming Mortgage Loans. This failure constitutes a material breach of the I&I Agreements and Operative Documents incorporated therein.

164. Moreover, on information and belief, GMACM is and has been aware that many of the Mortgage Loans, whether acquired at the closing or thereafter, were nonconforming and, thus, in breach of its own representations and warranties. Despite this knowledge, GMACM has failed to repurchase the nonconforming loans with conforming loans, as is required under the Operative Documents.

165. With respect to the 2006-HE2 Transaction, FGIC ultimately obtained access to 168 mortgage loan files (68 files FGIC obtained in 2009, as well as 100 files received from GMACM in 2011), which FGIC's independent consultant reviewed to evaluate and re-underwrite the mortgage loans. These reviews revealed that GMACM breached one or more material representations with respect to 146—approximately 87%—of the Mortgage Loans reviewed.

166. Moreover, despite its express obligations under the 2006-HE2 MLPA and the 2006-HE2 I&I Agreement, GMACM continues to refuse to repurchase or cure certain of the non-compliant and defective loans that FGIC has asked GMACM to repurchase.

167. With respect to the 2007-HE2 Transaction, FGIC ultimately obtained access to 509 mortgage loan files (357 files FGIC obtained in 2009, as well as 152 files received from GMACM in 2011), which FGIC's independent consultant reviewed to evaluate and re-underwrite the mortgage loans. These reviews revealed that GMACM breached one or more material representations with respect to 430 of 509—approximately 84%—of the Mortgage Loans reviewed.

168. Moreover, despite its express obligations under the 2007-HE2 MLPA and the 2007-HE2 I&I Agreement, GMACM continues to refuse to repurchase or cure certain of the non-compliant and defective loans that FGIC has asked GMACM to repurchase.

(3) Breaches Uncovered Using Loan Pool Data

169. FGIC also commissioned its independent loan consultant to test the accuracy of GMACM's representations and warranties relating to the Mortgage Loans in the 2007-HE2 Transaction regarding occupancy status and CLTV ratios. The consultant extracted information and data relating to over 11,000 Mortgage Loans.

a. Breaches of Owner-Occupancy Representation and Warranty

170. GMACM represented in the 2007-HE2 Offering Documents that 95.41% of the aggregate principal amount of the Mortgage Loans in the 2007-HE2 Transaction would be secured by the borrower's primary residence. *See* 2007-HE2 Prospectus Supplement at A-I-4.

171. Based on the information provided, FGIC determined that only 91.7% of the aggregate principal amount of the Mortgage Loans were secured by the owner's primary residence.

172. The Prospectus Supplement therefore materially overstated the percentage of Mortgage Loans in their respective pools that were owner-occupied as a primary residence. As such, GMACM breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

173. Moreover, FGIC has determined that, as of February 2012, fully 26.8%, by aggregate principal amount, of the 2007-HE2 Mortgage Loans that were *not* secured by the owner's primary residence, were non-performing (*i.e.*, were delinquent for more than 60 days, in foreclosure, liquidated, or have posted a loss). This non-performance rate was significantly greater than the non-performance rate of Mortgage Loans that were secured by the owner's primary residence.

b. Breaches of CLTV Ratio Representation and Warranty

174. The 2007-HE2 Prospectus Supplement also provided information relating to the CLTV ratios of the underlying Mortgage Loans in the 2007-HE2 Transaction.

175. The 2007-HE2 Prospectus Supplement provided that the Mortgage Loans had been originated with a maximum CLTV ratio of 100%. *See* 2007-HE2 Prospectus Supplement at A-I-3. CLTV information provided in the Prospectus Supplement included (1) the number and aggregate value of the Mortgage Loans with CLTV ratios in a given percentage band (*e.g.*, the

number of Mortgage Loans with CLTV ratios of between 80% and 85%, between 85% and 90%, and so on), and (2) the average weighted CLTV ratio for the entire Loan Pool. *Id.* The Prospectus Supplement reported that *none* of Mortgage Loans had a CLTV ratio over 100 percent. *Id.*

176. Using an industry standard automated valuation model to calculate the value of the underlying property at the time the Mortgage Loan was originated, FGIC determined that 12.1% of the aggregate principal amount of the Mortgage Loans—as opposed to *none* of the loans, as reported in the 2007-HE2 Prospectus Supplement—had an original CLTV ratio above 100%, and 29.8% of the aggregate principal amount of the Mortgage Loans—as opposed to fewer than 21.9%, as reported in the 2007-HE2 Prospectus Supplement—had an original CLTV ratio above 95%.

177. In addition, GMACM represented in the 2007-HE2 Prospectus Supplement that for the entire Loan Pool, the weighted average CLTV ratio of the Mortgage Loans at origination was 80.52%. FGIC determined that the actual weighted average CLTV ratio of the Mortgage Loans at origination was approximately 84.06%. Thus, GMACM breached its representation and warranty that the information in the Prospectus Supplement did not contain any untrue statements of material fact.

178. Moreover, FGIC has determined that the rate of Mortgage Loan non-performance (*i.e.*, loans that, as of February 2012, were delinquent for more than 60 days, in foreclosure, liquidated, or have posted a loss) in the 2007-HE2 Transaction for loans for which the automated valuation model indicated a CLTV ratio greater than 100% was over 22.3% of the aggregate principal amount of such loans.

179. The pervasive and overwhelming defects in the Mortgage Loan files reviewed to date indicate clear breaches of GMACM's contractual representations, warranties and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans and the initial and final Loan Pool, including the guidelines to which the Mortgage Loans were underwritten. Specifically, GMACM breached representations and warranties stating, as of the respective closing dates for the HE Transactions, that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (*i.e.* the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of GMACM in the Operative Documents (including each representation and warranty in the MLPAs) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- no Mortgage Loan was 30 days or more delinquent as of the date the loan was transferred to the HE Trusts;
- each Mortgage File contains all required documents and instruments;
- the CLTV of each Mortgage Loan did not exceed 100%; and
- GMACM selected the Mortgage Loans in accordance with its underwriting guidelines (*i.e.* the Home Equity Loan Program).
- with respect to the 2007-HE2 Transaction, that no fraud or misrepresentation of a material fact with respect to the origination of a Mortgage Loan had taken place on the part of GMACM, or, to the best of GMACM's knowledge, any third party.

180. Many of these representations were repeated in connection with the subsequent transfer of additional Mortgage Loans, and were also breached with respect to those additional Mortgage Loans.

181. Moreover, the true scope of the material underwriting failures is unknown given GMACM's refusal to provide FGIC with pertinent—and contractually required—information. This refusal in itself constitutes a breach of GMACM's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

(4) GMACM's Denial of Loan File Requests

182. As the HE Transactions continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blaschko, a GMACM/ResCap employee, via e-mail demanding that GMACM provide additional Mortgage Loan files to FGIC, including origination files, servicing notes, and custodian files, for a random sample of 143 2006-HE2 and 280 2007-HE2 Mortgage Loans. Having received no response from GMACM to its earlier requests, FGIC sent a follow-up e-mail on February 3, 2011, regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information and belief, the request required authorization from officers at Ally Financial, and GMACM/ResCap's response was directed by officers at Ally Financial.

183. On February 14, 2011, FGIC sent further follow-up letters requesting loan files.

184. In finally responding to FGIC's request for information, GMACM refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans"). Instead, it only provided FGIC with a small sampling (254 of 423) of the requested loan files, consisting largely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

185. Pursuant to the Servicing Agreements and the I&I Agreements, FGIC is entitled to reasonable access to the documentation regarding all of the Mortgage Loans. Section 2.02(p)

of the I&I Agreements provides that FGIC "shall have the right, so long as any of the [HE] Notes remains outstanding, to conduct an ongoing review of GMACM's practices as Servicer through reviews of the Mortgage Loans . . . ." Notably, there is no limitation in the I&I Agreements as to the nature of the Mortgage Loans files that are subject to review. Further, Section 2.02(c)(v)(B) of the I&I Agreements states that "promptly upon request," GMACM must provide to FGIC "such other data as [FGIC] may reasonably request. . . ."

186. On April 26, 2011, having still received none of the remaining performing Mortgage Loan files it requested, FGIC sent a further letter requesting the remaining loan files. To date, GMACM has not responded.

187. By producing only non-performing Mortgage Loan files, in contravention of the I&I Agreements, GMACM has arbitrarily and unreasonably imposed limitations on FGIC's contractual rights to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

(5) GMACM's Denial of Servicing Notes

188. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(v) of the I&I Agreements, that GMACM furnish or cause to furnish the servicing notes for the Mortgage Loans.

189. GMACM, without justification or explanation, and in breach of its obligations in the I&I Agreements, has failed to respond to requests for servicing notes.

(6) GMACM's Denial of FGIC's Access To Books and Records, Chief Financial Officer, and GMACM's Independent Accountants

190. On January 19, 2012 (with respect to the 2007-HE2 Transaction) and January 20, 2012 (with respect to the 2006-HE2 Transaction), in accordance with its express rights under Sections 2.02(e)(i)-(iii) of the I&I Agreements, FGIC requested to (i) inspect the books and

records of GMACM; (ii) discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM; and (iii) discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

191. To date, GMACM has failed to respond to these requests, in violation of the I&I Agreements.

(7) GMACM's Continued Frustration of FGIC's Right to Access Information Regarding the 2007-HE2 Mortgage Loans

192. On March 1, 2012, servicing duties for the 2007-HE2 Transaction were transferred from GMACM to a third-party servicer. Following the transfer, FGIC again sought information regarding the Mortgage Loan files, this time from the successor (and current) servicer of the 2007-HE2 Transaction.

193. FGIC has been made aware that the current servicer of the Transaction is unable to provide the information FGIC has sought due to GMACM's refusal to provide its successor with certain Mortgage Loan files and other crucial information. GMACM's refusal to turn over information in its possession to, and otherwise cooperate with, its successor servicer is a clear violation of the Servicing Agreement that GMACM entered into as the then-Servicer of the 2007-HE2 Transaction and to which FGIC is a third-party beneficiary, as well as a breach by GMACM of its obligations under the 2007-HE2 I&I Agreement to comply with the terms of the Operative Documents. *See* 2007-HE2 Servicing Agreement §§ 3.01(c), 7.01(a), 8.05; 2007-HE2 I&I Agreement § 2.02.

194. Additionally, GMACM has an independent obligation under the 2007-HE2 I&I Agreement to provide FGIC such information as FGIC may reasonably request. *See* 2007-HE2 I&I Agreement § 2.02(c)(v). As such, through its obstinate refusal to provide either FGIC or the

successor servicer with material information—admittedly within its possession—regarding the Mortgage Loans, GMACM has further breached its obligations to FGIC.

195. Moreover, on information and belief, the Mortgage Loan information that GMACM refuses to provide either to FGIC or the successor servicer will evidence further material breaches of representations and warranties made by GMACM. Accordingly, FGIC reserves its rights to assert additional causes of action regarding GMACM's breaches of its representations and warranties.

G. Ally Bank's Breaches of The Custodial Agreement

196. Under the Custodial Agreements, to which FGIC is an express third party beneficiary, *see* Custodial Agreements § 5.6, and through which Ally Bank received substantial fees, Ally Bank undertook several obligations to FGIC concerning the manner in which Ally Bank would ensure that the Mortgage Loans contained complete and accurate information and that GMACM was in compliance with its representations and warranties regarding the origination, selection, and characteristics of those loans.

197. Ally Bank agreed that it would hold the Mortgage Notes relating to the Initial Mortgage Loans and any Subsequent Mortgage Loans, and that it would review the Mortgage Notes and deliver to FGIC a certification of "the completeness of the receipt of the Mortgage Notes." *Id.* §§ 2.1, 2.2.

198. Ally Bank further agreed to notify FGIC of breaches of the MLPAs by GMACM, by providing that: "Upon discovery by the Custodian of a breach of any representation or warranty made by [GMACM] in the Purchase Agreement . . .with respect to a Mortgage Loan . . . the Custodian shall give prompt written notice to [FGIC]." Custodial Agreements § 2.3.

199. On information and belief, in some instances the Mortgage Note was not included in the loan file. The lack of a Mortgage Note within a particular file constitutes a breach of the

representations and warranties given by GMACM in the MLPAs. Ally Bank should have been aware of the fact that Mortgage Notes were missing from certain Mortgage Loan files, and that this was a breach of the MLPAs' representations and warranties. Consequently, it should have notified FGIC pursuant to its own obligations under the Custodial Agreements. *See id.* §§ 2.1-2.3. Ally Bank has, however, failed to provide FGIC with any notices regarding defects in any Mortgage Loan file, and has further provided inaccurate and/or incomplete certifications regarding the Mortgage Loans, thereby breaching the Custodial Agreements to which FGIC is an express third party beneficiary.

200. Moreover, Ally Bank had an obligation to notify FGIC of any breach by GMACM of the MLPAs' representations and warranties that it discovered, not just those pertaining to the Mortgage Note. Since Ally Bank originated or acquired approximately 75% of the Mortgage Loans in the HE Transactions—which have suffered astounding defect rates—it must have been keenly aware of the breadth and scope of the underwriting failures with respect to those loans. Ally Bank, thus, must have known that GMACM was in breach of the representations and warranties in the MLPAs, and its failure to so notify FGIC was a further breach of the Custodial Agreements.

H. GMACM's Fraud

201. The material breaches of GMACM's representations and warranties, including the extensive underwriting failures by GMACM, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants GMACM made to FGIC to induce its participation in the Transactions. The extraordinarily high defect and default rate among the Mortgage Loans demonstrates not merely that GMACM breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite

representing to FGIC that, if FGIC issued the Policies, it (GMACM) would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because GMACM refuses to provide all of the requested Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

202. All of the Mortgage Loans underlying the HE Transactions were originated or acquired by GMACM and its affiliate Ally Bank. As such, GMACM had the access and ability to evaluate the Mortgage Loan files and to determine if the loans were in substantial compliance with the applicable GMACM underwriting guidelines and if the loans breached other representations and warranties made by GMACM.

203. To induce FGIC to enter into the HE Transactions, GMACM provided FGIC with a loan tape for each of the Transactions, which contained false and misleading information regarding, among other things, the CLTV and DTI ratios, occupancy status, and FICO scores of the borrowers.

204. In addition, GMACM made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the HE Trusts. GMACM was well aware that FGIC would not agree to insure the HE Notes unless the shadow ratings assigned satisfied FGIC's minimum requirements. To this end, upon information and belief, GMACM provided Moody's and S&P with the same false information regarding the credit quality of the underlying Mortgage Loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2006-HE2 and 2007-HE2 Notes that met FGIC's minimum requirements—Baa1 and BBB-, respectively, for the 2006-HE2 Notes, and Baa2 and BBB, respectively, for the 2007-HE2 Notes.

In this way, GMACM made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that GMACM would pass on to FGIC, and second, by causing shadow ratings of the HE Notes to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

205. GMACM was well aware that FGIC would rely on the shadow ratings—prepared with information supplied by GMACM—as the I&I Agreements specifically contemplated as a condition to issuance of the Policies that FGIC "shall have received confirmation that the Notes insured by the Policy are rated" by S&P and Moody's at a specified minimum level "without regard to the Policy." I&I Agreements § 3.01(k).

206. As noted, the issuance of the Policies enabled the HE Notes to receive triple-A ratings from the rating agencies. Moreover, the receipt of a triple-A ratings for the HE Notes, which depended on the issuance of the Policies, which in turn depended on the shadow ratings formulated using (inaccurate) information supplied by GMACM, was a critical component of each of the HE Transactions. As GMACM expressly noted in the Prospectus Supplements: "It is a condition to the issuance of the notes that they be rated 'Aaa' by Moody's . . . and 'AAA' by Standard & Poor's[.]" 2006-HE2 Prospectus Supplement at S-90; 2007-HE2 Prospectus Supplement at S-104.

207. Had the information provided to the ratings agencies by GMACM been accurate and truthful, Moody's and S&P would almost certainly have assigned very different (and lower) shadow ratings to the HE Transactions, and FGIC in turn would not have issued the Policies on the agreed terms, or would have refused to issue the Policies altogether.

208. GMACM also made material misrepresentations to FGIC, on which FGIC relied, about the characteristics of the Mortgage Loans, including the guidelines under and standards to which the Mortgage Loans were underwritten.

209. For example, in the 2006-HE2 Prospectus Supplement (and in the I&I Agreements by incorporation) GMACM assured FGIC that the Mortgage Loans "were originated generally in accordance with the underwriting standards of GMAC Mortgage Corporation." 2006-HE2 Prospectus Supplement at S-30. Similarly, in the 2007-HE2 Prospectus Supplement (and in the I&I Agreements by incorporation), GMACM also represented to FGIC that "[t]he mortgage loans were selected for inclusion in the mortgage pool from among mortgage loans originated or purchased in connection with [GMACM's] Underwriting Standards . . . based on [GMACM's] assessment of investor preferences and rating agency criteria." 2007 HE2 Prospectus Supplement at S-30. GMACM provided FGIC with GMACM's Underwriting Guidelines themselves, which contained extensive underwriting standards and requirements.

210. In fact, as confirmed by the overwhelming defect rates described above regarding the Loan Pools, all of which are due to Mortgage Loans that are inconsistent with GMACM's own underwriting guidelines, GMACM was well aware at the closing of the HE Transactions that those representations were false. In other words, at the time of the closing of the HE Transactions, GMACM either (1) knew or should have known that its representations were materially false because GMACM had not, among other things, determined if the Mortgage Loans were originated "generally in accordance" with its own underwriting guidelines, or (2) had reviewed whether the Mortgage Loans were originated "generally in accordance" with the its underwriting guidelines, had determined that they were not, but nonetheless materially

misrepresented to FGIC that the Mortgage Loans were originated "generally in accordance" with those guidelines.

211. Moreover, GMACM represented to FGIC that, in the case of each loan within the Loan Pools, an underwriter had made an assessment that the borrower had the ability to repay his or her loan, after receiving and reviewing all applicable employment, credit, and property information. In fact, GMACM was not verifying the ability of borrowers to repay their loans in compliance with its own underwriting guidelines accurately or at all. As a result, GMACM misrepresented facts that were uniquely within its knowledge.

212. Moreover, the MLPAs (and the I&I Agreements by incorporation) contained other false and misleading representations about the Mortgage Loans. In particular, GMACM misrepresented that, as of the closing: (i) the information set forth in the Mortgage Loan Schedule is true and correct in all material respects; (ii) no Mortgage Loan was 30 days or more delinquent as of the applicable Cut-Off Date; (iii) each Mortgage File contains all required documents and instruments; (iv) the CLTV of each Mortgage Loan did not exceed 100%; and (v) GMACM selected the Mortgage Loans in accordance with its underwriting guidelines (*i.e.* the Home Equity Loan Program). The true information regarding these loans—as known by GMACM—simply could not substantiate GMACM's assurances. In short, no amount of GMACM promising that the loans met certain standards, despite knowing otherwise, actually made those promises true.

213. GMACM knew that its representations were materially false and that these false representations were essential to FGIC's decision to issue the Policies on the terms to which FGIC agreed. GMACM intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreements and to issue the Policies.

214. GMACM knew when making the representations and warranties regarding the Mortgage Loans to FGIC prior to FGIC agreeing to issue the Policies that GMACM never intended to honor those representations and warranties, as is evidenced, *inter alia*, by the extraordinary breadth and depth of the problems FGIC has uncovered with respect to the underwriting and characteristics of those loans, and the poor performance of the HE Trusts. In short, in order to induce FGIC to issue the Policies, GMACM represented to FGIC that, if FGIC issued the Policies, GMACM would comply with its contractual representations and warranties, despite knowing that it had not complied—and would not comply—with those very same obligations.

215. GMACM's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC, including the receipt of a subpoena served in connection with GMACM's suspected fraudulent origination and underwriting practices, as well as to a multitude of suits and the potential for more litigation to come.

216. Consistent with this pattern of behavior, GMACM defrauded FGIC into issuing the Policies, through its knowing misrepresentations.

I. Ally Bank Aids and Abets GMACM's Fraud

217. Ally Bank provided substantial assistance to GMACM in fraudulently inducing FGIC to issue the Policies. In its role as Custodian—for which it received substantial fees—Ally Bank undertook to provide "prompt written notice" to FGIC of any breaches of the representations and warranties in the MLPAs that it discovered. The MLPAs, *see supra* at ¶ 141, contained several representations and warranties regarding the characteristics of the underlying Mortgage Loans as well as loans subsequently transferred to the HE Trusts.

218. Furthermore, as an originator or acquirer of approximately 75% of the Mortgage Loans, Ally Bank was well aware of the true nature of the Loan Pool. As a result of being a key

part of the HE Transactions and its affiliate status with GMACM, Ally Bank surely must have been aware of the representations and warranties GMACM routinely made to financial guaranty insurers—and did make here to FGIC—regarding the nature of GMACM's business practices and the quality of the mortgage loans that collateralized its many RMBS transactions, including the HE Transactions.

219. Against this backdrop, Ally Bank represented to FGIC that, if the HE Transactions were consummated, it (Ally Bank) would hold and monitor certain key information and documentation regarding the Mortgage Loans, and would provide notice to FGIC of any breaches by GMACM of which it was aware with respect to GMACM's representations and warranties to FGIC. As must have been known to Ally Bank, those representations and warranties made by GMACM directly concerned the Mortgage Loans, including the 75% of them that Ally Bank itself had originated or acquired. Ally Bank made these representations to FGIC with full knowledge that GMACM had not complied—and would not comply—with its relevant representations and warranties, and, accordingly, that they were false. By representing to FGIC that it would (a) hold and certify the accuracy of certain key information and documentation regarding the Mortgage Loans, the majority of which it had originated or acquired itself, and (b) inform FGIC of any failure by GMACM to comply with its obligations, Ally Bank materially aided GMACM's fraudulent inducement of FGIC to issue the Policies. The issuance of the Policies, which made the HE Transactions possible, inured to the significant financial benefit of Ally Bank, given that it collected substantial fees as Custodian and also perpetuated the market for its loan origination and sales business.

J. Ally Financial Aids and Abets GMACM's Fraud

220. Ally Financial provided substantial assistance to GMACM in fraudulently inducing FGIC to issue the Policies. As the ultimate parent of an intertwined corporate

enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties GMACM made regarding the nature of GMACM's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

K. GMACM's Breach of Obligations as Servicer

221. GMACM, as Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for the HE Transactions, including, but not limited to, its obligations to follow proper servicing procedures.

222. GMACM had responsibility for the servicing of the Mortgage Loans and thereby undertook certain related contractual obligations under the I&I Agreements and the Servicing Agreements with respect to the HE Transactions. Under the I&I Agreements, GMACM covenanted that "[a]ll Mortgage Loans will be serviced in all material respects in compliance with the Servicing Agreement." I&I Agreements § 2.02(l). Under the Servicing Agreements, GMACM is liable to FGIC for the servicing and administering of the Mortgage Loans, and in doing so is required to "follow such collection procedures as shall be normal and usual in its general mortgage servicing activities and consistent with the procedures the Servicer employs in servicing all other Mortgage Loans in the servicing portfolio with characteristics similar to those of the Mortgage Loans." Servicing Agreements §§ 3.02(a), 6.01.

223. During 2007, the servicing operations of GMACM were integrated into ResCap. Following the integration, on information and belief, GMACM breached these obligations by, among other things, being deficient in its borrower contact, collections, and loss mitigation standards, and by failing to honor FGIC's contractual rights to information. In particular, an

onsite review of the Ally Financial servicing arm's headquarters, including those of GMACM, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis, revealed *inter alia*: (i) inadequate call center staffing—staffing unable to handle increased incoming and outgoing call volumes; (ii) call center staffing turnovers as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when GMACM does not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; and (v) severely infrequent use of alternative loss mitigation strategies as compared to the industry. GMACM, as servicer, also had an obligation to notify FGIC of any material breaches of representations and warranties, and to cause GMACM, as seller, to repurchase the affected Mortgage Loans.

224. On information and belief, GMACM has failed to remedy any of its deficient servicing practices.

225. In addition, GMACM disclosed to FGIC for the first time in March 2009 that it classified loans into one of three categories or "Risk Tiers" under a servicing protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

226. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. GMACM disclosed to FGIC that all of the mortgage loans in FGIC-insured, GMACM-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the HE

Transactions, were placed in the lowest category of risk. For such mortgage loans, regardless whether they were (i) first- or second- lien, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities—all of which are factors that require more attentive servicing—delinquent borrowers were called at a later stage of delinquency and less frequently than loans in higher risk categories. As the purchaser of the Mortgage Loans, however, GMACM clearly knew that such Mortgage Loans, by their very nature, required particularized servicing before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by GMACM to ensure that the Mortgage Loans were serviced and administered in accordance with "procedures as shall be normal and usual in its general mortgage servicing activities" constitutes a breach of the Servicing Agreements and the I&I Agreements. *See* Servicing Agreements § 3.02(a); I&I Agreements § 2.02(l).

227. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being harmed as a result of being placed in the lower risk tier. To date, GMACM has failed to provide such information in breach of Section 2.02(c)(v) of the I&I Agreement.

L. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

228. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns GMACM and RFC. Ally Financial—as the ultimate parent of ResCap, GMACM, Ally Bank, and RFC—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC.

229. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, GMACM, Ally Bank, and RFC. Ally Financial exercised its direction and control in connection with the HE Transactions. At times, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

230. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries." *See In re Ally Fin. Inc.*, FRB Docket Nos. 11020-B-HC & 11020-B-DEO, FDIC-11-123b (April 13, 2011) (emphasis added).

231. As further discussed below, Ally Financial's public statements and actions at or around the time of the Transactions' close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of GMACM Directly and Indirectly Through its Control of ResCap

232. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

233. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-

owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

234. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

235. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement").

236. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

237. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling

parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

238. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[5] Since incorporation, the ownership of ResCap has not changed—Ally Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

239. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial and ResCap shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the 2005 Operating Agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (emphasis added).

240. Moreover, on April 26, 2007, "ResCap Investor Relations" announced the release of Ally Financial's 2007 first quarter financial results to investors in an email bearing the

[5] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the SEC on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

ResCap logo. That announcement stated that Ally Financial's financial results were found on both Ally Financial's and ResCap's websites.

241. Moreover, David C. Walker, as discussed above, has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, and RAMP, among other Ally Financial subsidiaries.

242. Similarly, as noted above, William F. Muir, Ally Financial's President, has also served as President and Chairman of the Board of IB Finance Holding Company, LLC—the direct parent of Ally Bank—and as a director of Ally Bank.

243. Ally Financial's domination and control of its subsidiaries, and in particular its use of ResCap to effectuate that control, is further evidenced by John Ruckdaschel, who, according to publicly available information, has served as in-house counsel at Ally Financial since October 2006. According to an e-mail sent from ResCap to FGIC, Ruckdaschel has served as "internal legal counsel for all [] securitizations" since at least May 2008. Although purportedly an Ally Financial employee, Ruckdaschel also sent and received e-mail using a ResCap e-mail address. Further, an employee of ResCap specifically instructed FGIC that all "official letters" regarding several Ally Financial subsidiaries—including GMACM, RFC, RAMP and others—should be sent not to the relevant (and supposedly independent) subsidiary, but rather to Ruckdaschel, Ally Financial's internal counsel. Additionally, Ruckdaschel—using his Ally Financial e-mail address—received correspondence relating to the Operative Documents at issue in the HE Transactions.

244. As further evidence of Ally Financial's domination over ResCap, the 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's

ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

245. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

246. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part of our plan and a key part of our value creation." *Id.* (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

247. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap

even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citibank, which provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept. 19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id.*

248. Indeed, Ally Financial's 2011 annual report states that "ResCap remains heavily dependent on [Ally Financial] and its affiliates for funding and capital support." Ally. Fin. Inc., Annual Report (Form 10-K), at 128 (Feb. 28, 2012).

249. Additionally, Annual Reports prepared by Ally Financial further note its pursuit of strategic alternatives with ResCap, and highlight the extent to which Ally Financial manipulated its control over its subsidiaries to enhance its own financial health. According to Ally Financial: "On December 31, 2009, we announced that due to our ongoing strategic review of how to best deploy GMAC's current and future liquidity, we decided to pursue strategic alternatives with respect to ResCap and committed to a plan . . . related to management's intent to sell certain ResCap related assets and businesses. . . . In order to maximize value, we will consider a variety of options including one or more sales, spin-offs, or other potential transactions . . . [that we believe] should minimize the impact of any significant future losses related to ResCap's legacy mortgage business . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3-4 (Feb. 26, 2010).

250. There is also substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. See TARP Report dated March

10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

251. Further, Ally Financial has established a "Mortgage Repurchase Reserve" to account for the potentially significant liabilities stemming from repurchase demands made on its mortgage-related subsidiary business units. The balance of the Mortgage Repurchase Reserve was $825 million as of the fourth quarter of 2011. *See* Ally Financial's 4Q 2011 Earnings Presentation at 16. Although these repurchase demands are generally made on Ally Financial's subsidiaries—such as GMACM—in discussing the reserve on an earnings call, Ally Financial CFO Jim Mackey made clear that it was Ally Financial that was recording "repurchase expense[s]" related to mortgages, as he stated that Ally Financial "had lower mortgage repurchase expense of $44 million." Ally Financial's Q4 2011 Earnings Call at 4 (Feb. 2, 2012).

252. Similarly, in discussing Ally Financial's Mortgage Repurchase Reserve on Ally Financial's third quarter 2011 earnings call, Mackey further described losses attributable mortgage loan repurchases as belonging to Ally Financial, when he stated: "Our mortgage repurchase reserve is [as it then stood] $829 million . . . . Our loss experience improved during the quarter due to the fact that we had fewer mortgage insurance rescission payments that we experienced last quarter and that did not repeat this quarter." Ally Financial's Q3 2011 Earnings Call at 6 (Nov. 2, 2011) (emphases added). On the same call, Ally Financial CEO Carpenter explained that "we have routinely repurchased problem loans voluntarily and by contract . . . ." *Id.* at 8 (emphasis added).

253. Additionally, as discussed above, Ally Financial recorded a $230 million charge in the fourth quarter of 2011, $212 million of which was recorded at its controlled subsidiary,

ResCap. As a result of the penalties assessed against ResCap by government regulators, and the fact that ResCap failed to maintain sufficient tangible net worth to comply with the requirements of the terms of certain credit facilities, Ally Financial propped up its subsidiary ResCap with a $197 million capital contribution in the form of intercompany debt forgiveness. See Ally Fin. Inc., Form 10-K, at 31-32 (Feb. 28, 2012).

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

254. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 9, 2011).

255. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. For example, at least one individual, who was identified at various times as being a GM and/or Ally Financial employee, was on the working group list for transactions involving ResCap subsidiaries that FGIC insured, including these Transactions. He was included on communications surrounding the deal document drafting processes from commencement to close. Such communications sent to him concerned both the negotiation of the various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

256. The origination and securitization of mortgage loans by ResCap and its subsidiaries have long been integral parts of Ally Financial's core business. In its 2006 Annual Report, Ally Financial (then reporting as GMAC LLC) stated that "[w]e are a leading real estate finance company focused primarily on the residential real estate market. Our business activities include the origination, purchase, servicing, sale and securitization of residential mortgage loans." GMAC LLC, Annual Report (Form 10-K), at 3 (Mar. 13, 2007) (emphasis added). Ally Financial further stated that "we utilize asset and mortgage securitizations and sales as a critical component of our diversified funding strategy." *Id.* at 5 (emphasis added).

257. Ally Financial continued to publicly report on its own business and that of its subsidiaries in later filings on an integrated basis: "We engage in the origination, purchase, servicing, sale, and securitization of consumer (i.e., residential) mortgage loans and mortgage-related products. Mortgage operations include the Residential Capital, LLC (ResCap) legal entity, [and] the mortgage operations of Ally Bank . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3 (Feb. 26, 2010). More recently, continuing to discuss its various mortgage operations as a single enterprise, Ally Financial stated that "[o]ur Origination and Servicing operations is one of the leading originators of conforming and government-insured residential mortgage loans in the United States. We are one of the largest residential mortgage loan servicers in the United States and we provide collateralized lines of credit to other mortgage originators." Ally Fin. Inc., Annual Report (Form 10-K), at 4 (Feb. 28, 2012).

258. Moreover, as discussed above, Ally Financial—at least in the view of certain of ResCap's bondholders—is believed to have stripped assets from its subsidiary.

259. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed GMACM and RFC as part of its own business. For example, in its

investor presentation from 2007, ResCap declares that GMACM and RFC "are owned and *operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial was not directly controlling GMACM and RFC, it was using ResCap as an instrument to do so.

260. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

261. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one GMACM has with respect to the HE Transactions as Servicer.

262. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

263. In another example, Larry Hipp, a member of ResCap's Risk Analyst/Investor Repurchase Department, communicated with FGIC regarding rescission requests using an Ally Financial email address, but in those very same emails, lists his ResCap contact information, including a ResCap email address. In addition, Ally Financial/ResCap used to send FGIC secure communications bearing a "GMAC ResCap" header, but those secure communications now have an Ally Financial header.

264. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

> Q: Could you please state your name for the record.
> A: My name is Jeffrey Stephan.
> Q: Okay. And who do you work for?
> A: GMAC, LLC [Ally Financial].
> Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
> A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
> Q: Okay.
> A: It's GMCA [sic] Mortgage Corporation.

Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?
A. Yes.
Q. So these entities no longer currently exist?
A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

M. FGIC's Contractual Remedies Under The I&I Agreements

265. The I&I Agreements provide FGIC with broad remedies for GMACM's breaches of its representations and warranties. The breadth of these remedies provided further material inducement for FGIC to issue the Policies. Specifically, Section 5.02(b) of the I&I Agreements provides:

> Unless otherwise expressly provided, no remedy herein conferred or reserved is intended to be exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under this Insurance Agreement, the Indenture or existing at law or in equity.

266. Moreover, the I&I Agreements provide that, upon an "Event of Default"—which is defined to include when "[a]ny representation or warranty" made by GMACM in the I&I Agreements or the Operative Documents is materially untrue or incomplete—FGIC can "take whatever action at law or in equity as may appear necessary or desirable in its judgment to collect the amounts, if any, then due under this [I&I Agreement] or any other Operative Document or to enforce performance and observance of any obligation, agreement or covenant of GMACM[.]" I&I Agreements §§ 5.01(a), 5.02(a)(vi).

267. In addition, GMACM agreed:

> to pay, and to protect, indemnify and save harmless [FGIC] . . . from and against, any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages costs or expenses (including reasonable fees and expenses of attorneys . . .) of any nature arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 [of the I&I Agreement] or arising out of or relating to the Transaction contemplated by the Operative Documents . . . .

I&I Agreements § 3.04(a).

268. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, GMACM agreed to repurchase or substitute Mortgage Loans that did not conform to GMACM's representations and warranties, and to indemnify FGIC for claims and losses arising from GMACM's breach of any representation or warranty. *See* I&I Agreements § 3.03(b), 3.04(a).

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Material Breach of the 2006-HE2 I&I Agreement – Declaratory Relief Regarding GMACM's Indemnification Obligations)

269. FGIC re-alleges and incorporates by reference paragraphs 1 through 268 of this Complaint.

270. The 2006-HE2 I&I Agreement is a valid and binding agreement between the parties.

271. FGIC has performed its obligations under the 2006-HE2 I&I Agreement.

272. GMACM's representations and warranties were material to FGIC's decision to insure the 2006-HE2 Notes and to issue the 2006-HE2 Policy.

273. GMACM's pervasive and material breaches of its representations and warranties, from the very inception of the Transaction and in the years since, constitute a material breach of the 2006-HE2 I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

274. Pursuant to Section 3.04(a) of the 2006-HE2 I&I Agreement, GMACM must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the 2006-HE2 I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by GMACM of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

275. As explained above, GMACM has breached numerous representations, warranties, and covenants in the 2006-HE2 Offering and Operative Documents. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

276. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

277. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM must jointly and severally indemnify and reimburse FGIC for all sums arising out of the 2006-HE2 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2006-HE2 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2006-HE2 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the 2006-HE2 I&I Agreement or any of the related Operative Documents; or,

alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

278. In addition, FGIC seeks a declaration that GMACM must indemnify FGIC for all sums arising out of the 2006-HE2 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2006-HE2 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2006-HE2 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the 2006-HE2 I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Material Breach of the 2007-HE2 I&I Agreement – Declaratory Relief Regarding GMACM's Indemnification Obligations)

279. FGIC re-alleges and incorporates by reference paragraphs 1 through 278 of this Complaint.

280. The 2007-HE2 I&I Agreement is a valid and binding agreement between the parties.

281. FGIC has performed its obligations under the 2007-HE2 I&I Agreement.

282. GMACM's representations and warranties were material to FGIC's decision to insure the 2007-HE2 Notes and to issue the 2007-HE2 Policy.

283. GMACM's pervasive and material breaches of its representations and warranties, from the very inception of the Transaction and in the years since, constitute a material breach of the 2007-HE2 I&I Agreement that has deprived FGIC of the purpose of the parties' bargain.

284. Pursuant to Section 3.04(a) of the 2007-HE2 I&I Agreement, GMACM must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the 2007-HE2 I&I Agreement or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things: (i) the breach by GMACM of any representation, warranty, or covenant under any of the related Operative Documents; or (ii) any untrue statement or alleged untrue statement of a material fact contained in the related Offering Documents or any omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances under which they were made, not misleading.

285. As explained above, GMACM has breached numerous representations, warranties, and covenants in the 2007-HE2 Offering and Operative Documents. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

286. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

287. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM must jointly and severally indemnify and reimburse FGIC for all sums arising out of the 2007-HE2 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2007-HE2 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2007-HE2 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the 2007-HE2 I&I Agreement or any of the related Operative Documents; or,

alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

288. In addition, FGIC seeks a declaration that GMACM must indemnify FGIC for all sums arising out of the 2007-HE2 Transaction for which FGIC has or will become liable, and that FGIC is entitled to immediate indemnity: (i) for all sums it has paid to date under the 2007-HE2 Policy and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the 2007-HE2 Policy as and when such sums fall due or claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the 2007-HE2 I&I Agreement or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and an order giving effect to such indemnification.

THIRD CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Fraudulent Inducement — 2006-HE2 I&I Agreement)

289. FGIC re-alleges and incorporates by reference paragraphs 1 through 288 of this Complaint.

290. GMACM induced FGIC to enter into the 2006-HE2 I&I Agreement and to issue the 2006-HE2 Policy by making false representations and warranties about its business practices and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

291. As explained above, GMACM knowingly made materially false statements to FGIC, and/or omitted material facts from its statements to FGIC, with the intent to induce reliance by FGIC.

292. GMACM intended for FGIC to rely on GMACM's material false statements and/or omissions. FGIC had no reason to believe that GMACM's representations were false, and reasonably and justifiably relied on GMACM's material false statements and/or omissions regarding information uniquely in the possession of GMACM when it decided to enter into the 2006-HE2 I&I Agreement and to issue the Policy for the 2006-HE2 Notes.

293. As a result of GMACM's material false statements and omissions, FGIC entered into the 2006-HE2 I&I Agreement, issued the 2006-HE2 Policy, and thereby agreed to insure Notes backed by a pool of Mortgage Loans that was, in actuality, materially different from the Loan Pool that GMACM represented would collateralize the 2006-HE2 Transaction.

294. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

295. As a result of GMACM's material false statements and material omissions from its statements, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

296. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

297. Alternatively, GMACM is liable for such damages.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, GMACM: Fraudulent Inducement— 2007-HE2 I&I Agreement)

298. FGIC re-alleges and incorporates by reference paragraphs 1 through 297 of this Complaint.

299. GMACM induced FGIC to enter into the 2007-HE2 I&I Agreement and to issue the 2007-HE2 Policy by making false representations and warranties about its business practices

and the Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

300. As explained above, GMACM knowingly made materially false statements to FGIC, and/or omitted material facts from its statements to FGIC, with the intent to induce reliance by FGIC.

301. GMACM intended for FGIC to rely on GMACM's material false statements and/or omissions. FGIC had no reason to believe that GMACM's representations were false, and reasonably and justifiably relied on GMACM's material false statements and/or omissions regarding information uniquely in the possession of GMACM when it decided to enter into the 2007-HE2 I&I Agreement and to issue the Policy for the 2007-HE2 Notes.

302. As a result of GMACM's material false statements and omissions, FGIC entered into the 2007-HE2 I&I Agreement, issued the 2007-HE2 Policy, and thereby agreed to insure Notes backed by a pool of Mortgage Loans that was, in actuality, materially different from the Loan Pool that GMACM represented would collateralize the 2007-HE2 Transaction.

303. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

304. As a result of GMACM's material false statements and material omissions from its statements, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

305. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

306. Alternatively, GMACM is liable for such damages.

FIFTH CAUSE OF ACTION

**(As Against Ally Financial and Ally Bank:
Aiding and Abetting Fraudulent Inducement — 2006-HE2 I&I Agreement)**

307. FGIC re-alleges and incorporates by reference paragraphs 1 through 306 of this Complaint.

308. As explained above, Ally Financial provided substantial assistance to its subsidiary GMACM in fraudulently inducing FGIC to enter the 2006-HE2 I&I Agreement and issue the 2006-HE2 Policy.

309. GMACM could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

310. Ally Financial knew that GMACM fraudulently induced FGIC to issue the Policy for the 2006-HE2 Transaction.

311. Ally Financial's statements materially aided GMACM's fraudulent inducement.

312. As a result of Ally Financial's aiding and abetting GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

313. Moreover, as explained above, Ally Bank provided substantial assistance to its affiliate GMACM in fraudulently inducing FGIC to issue the 2006-HE2 Policy.

314. Ally Bank originated or acquired nearly 85% of the Mortgage Loans (amounting to over $406 million in loans), which form a substantial part of the collateral for the 2006-HE2 Transaction. Ally Bank was therefore aware of the characteristics of the Loan Pool. Ally Bank was also an affiliate of GMACM, received a copy of the 2006-HE2 MLPA, and served as Custodian of the 2006-HE2 Transaction, for which it received substantial fees. As such, Ally Bank was aware of the material misrepresentations GMACM had made to FGIC to fraudulently induce FGIC to issue the 2006-HE2 Policy. Ally Bank further represented to FGIC that it would

undertake duties to monitor and certify the accuracy and completeness of the Mortgage Loan files, as well as inform FGIC of failures by GMACM to comply with its obligations under the 2006-HE2 Operative Documents. Ally Bank made these representations to FGIC despite its knowledge that GMACM had not complied—and would not comply—with its representations and warranties.

315. Ally Bank's representations to FGIC materially aided GMACM's fraudulent inducement of FGIC to issue the 2006-HE2 Policy.

316. As a result of Ally Bank's aiding and abetting of GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

SIXTH CAUSE OF ACTION

**(As Against Ally Financial and Ally Bank:
Aiding and Abetting Fraudulent Inducement — 2007-HE2 I&I Agreement)**

317. FGIC re-alleges and incorporates by reference paragraphs 1 through 316 of this Complaint.

318. As explained above, Ally Financial provided substantial assistance to its subsidiary GMACM in fraudulently inducing FGIC to enter the 2007-HE2 I&I Agreement and issue the 2007-HE2 Policy.

319. GMACM could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

320. Ally Financial knew that GMACM fraudulently induced FGIC to issue the Policy for the 2007-HE2 Transaction.

321. Ally Financial's statements materially aided GMACM's fraudulent inducement.

322. As a result of Ally Financial's aiding and abetting GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

323. Moreover, as explained above, Ally Bank provided substantial assistance to its affiliate GMACM in fraudulently inducing FGIC to issue the 2007-HE2 Policy.

324. Ally Bank originated or acquired approximately 71% of the Mortgage Loans (amounting to over $686 million in loans), which form a substantial part of the collateral for the 2007-HE2 Transaction. Ally Bank was therefore aware of the characteristics of the Loan Pool. Ally Bank was also an affiliate of GMACM, received a copy of the 2007-HE2 MLPA, and served as Custodian of the 2007-HE2 Transaction, for which it received substantial fees. As such, Ally Bank was aware of the material misrepresentations GMACM had made to FGIC to fraudulently induce FGIC to issue the 2007-HE2 Policy. Ally Bank further represented to FGIC that it would undertake duties to monitor and certify the accuracy and completeness of the Mortgage Loan files, as well as inform FGIC of failures by GMACM to comply with its obligations under the 2007-HE2 Operative Documents. Ally Bank made these representations to FGIC despite its knowledge that GMACM had not complied—and would not comply—with its representations and warranties.

325. Ally Bank's representations to FGIC materially aided GMACM's fraudulent inducement of FGIC to issue the 2007-HE2 Policy.

326. As a result of Ally Bank's aiding and abetting of GMACM's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract 2006-HE2 Transaction—Representations, Warranties, and Affirmative Covenants)

327. FGIC re-alleges and incorporates by reference paragraphs 1 through 326 of this Complaint.

328. The 2006-HE2 I&I Agreement is a valid and binding agreement between the parties.

329. FGIC has performed its obligations under the 2006-HE2 I&I Agreement.

330. As explained above, GMACM has materially breached its representations and warranties and affirmative covenants under Sections 2.01 and 2.02 of the 2006-HE2 I&I Agreement.

331. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

332. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

333. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

334. Alternatively, GMACM is liable for such damages.

EIGHTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract 2007-HE2 Transaction—Representations, Warranties, and Affirmative Covenants)

335. FGIC re-alleges and incorporates by reference paragraphs 1 through 334 of this Complaint.

336. The 2007-HE2 I&I Agreement is a valid and binding agreement between the parties.

337. FGIC has performed its obligations under the 2007-HE2 I&I Agreement.

338. As explained above, GMACM has materially breached its representations and warranties and affirmative covenants under Sections 2.01 and 2.02 of the 2007-HE2 I&I Agreement.

339. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

340. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

341. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

342. Alternatively, GMACM is liable for such damages.

NINTH CAUSE OF ACTION

(As Against Ally Bank: Breach of the 2006-HE2 Custodial Agreement)

343. FGIC re-alleges and incorporates by reference paragraphs 1 through 342 of this Complaint.

344. The 2006-HE2 Custodial Agreement is a valid and binding agreement between the parties thereto.

345. FGIC is an express third party beneficiary of the 2006-HE2 Custodial Agreement.

346. As explained above, Ally Bank has materially breached its obligations under Sections 2.1, 2.2, and 2.3 of the 2006-HE2 Custodial Agreement.

347. Ally Financial, acting directly and/or indirectly through ResCap, directed Ally Bank's actions as set forth in this cause of action.

348. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

TENTH CAUSE OF ACTION

(As Against Ally Bank: Breach of the 2007-HE2 Custodial Agreement)

349. FGIC re-alleges and incorporates by reference paragraphs 1 through 348 of this Complaint.

350. The 2007-HE2 Custodial Agreement is a valid and binding agreement between the parties thereto.

351. FGIC is an express third party beneficiary of the 2007-HE2 Custodial Agreement.

352. As explained above, Ally Bank has materially breached its obligations under Sections 2.1, 2.2, and 2.3 of the 2007-HE2 Custodial Agreement.

353. Ally Financial, acting directly and/or indirectly through ResCap, directed Ally Bank's actions as set forth in this cause of action.

354. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

ELEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Repurchase Obligation)

355. FGIC re-alleges and incorporates by reference paragraphs 1 through 354 of this Complaint.

356. The I&I Agreements are valid and binding agreements between the parties.

357. FGIC has performed its obligations under the I&I Agreements.

358. Pursuant to the terms of the I&I Agreements, and the provisions of the MLPAs incorporated therein, FGIC has demanded that GMACM repurchase non-complying Mortgage Loans. GMACM has refused to repurchase numerous such Mortgage Loans.

359. GMACM has breached the I&I Agreements, and the provisions of the MLPAs incorporated therein, by failing to repurchase any and all Mortgage Loans that violated GMACM's representations and warranties that FGIC has noticed to GMACM.

360. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

361. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

362. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

363. Alternatively, GMACM is liable for such damages.

TWELFTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Contract – Declaratory Relief Regarding Access to Information)

364. FGIC re-alleges and incorporates by reference paragraphs 1 through 363 of this Complaint.

365. The I&I Agreements are valid and binding agreement between the parties.

366. FGIC has performed its obligations under the I&I Agreements.

367. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreements, GMACM agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information. Such other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the HE Transactions. FGIC further has the right to conduct reviews of GMACM's practices as Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(p) of the I&I Agreements.

368. As discussed above, pursuant to the I&I Agreements, FGIC made numerous reasonable written requests that GMACM furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by GMACM, and others, concerning the Mortgage Loans.

369. GMACM has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

370. GMACM has failed to comply with its contractual obligations and breached the I&I Agreements by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

371. Pursuant to Sections 2.02(e)(i)-(iii) of the I&I Agreements, GMACM agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of GMACM; (ii) discuss the affairs, finances and accounts of GMACM with GMACM's Chief Financial Officer; and (iii) discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants.

372. On January 20, 2012, FGIC made a reasonable written request that GMACM permit FGIC or its authorized agent to conduct an inspection of the books and records of GMACM, as well as permit FGIC to (i) discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, and (ii) with GMACM's consent, which consent shall not be unreasonably withheld or delayed, discuss the affairs, finances, and accounts of GMACM with GMACM's independent accountants.

373. GMACM has failed to make available such persons or to produce such information.

374. GMACM has failed to comply with its contractual obligations and breached the I&I Agreements by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreements, Sections 2.02(e)(i)-(iii).

375. Pursuant to Section 2.02(c)(v) of the I&I Agreements, GMACM agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the Servicing Agreement[.]"

376. FGIC made a reasonable request for servicing notes on December 9, 2010.

377. GMACM has failed to comply with its contractual obligations and breached the I&I Agreements by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

378. Further, pursuant to Section 7.01(a) of the 2007-HE2 Servicing Agreement, to which FGIC is an express third-party beneficiary and the provisions of which are incorporated by reference into the 2007-HE2 I&I Agreement, GMACM agreed to provide information regarding the Mortgage Loans to, and otherwise cooperate with, the successor servicer of the 2007-HE2 Transaction.

379. GMACM has failed to comply with its contractual obligations and breached the 2007-HE2 I&I Agreement and 2007-HE2 Servicing Agreement by failing to make available to FGIC and/or the successor servicer Mortgage Loan files and other related material information.

380. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

381. Accordingly, FGIC seeks a declaration that GMACM must comply with Sections 2.02(c)(v), 2.02(e)(i)-(iii), and 2.02(p) of the I&I Agreements, and Section 7.01(a) of the 2007-HE2 Servicing Agreement, and an order requiring GMACM to promptly remedy those breaches and therefore comply with FGIC's and/or the successor servicer's requests and notices to GMACM pursuant to the relevant provisions, as detailed above.

THIRTEENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Breach of Servicer Obligations)

382. FGIC re-alleges and incorporates by reference paragraphs 1 through 381 of this Complaint.

383. The I&I Agreements are valid and binding agreements between the parties.

384. FGIC has performed its obligations under the I&I Agreements.

385. Moreover, as explained above, GMACM has breached its affirmative covenant under the I&I Agreements to service all Mortgage Loans in all material respects in compliance with the Servicing Agreements.

386. GMACM's breaches of the I&I Agreements have caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on Policies and other losses and expenses.

387. Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this cause of action.

388. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

389. GMACM, ResCap and Ally Financial are jointly and severally liable for such damages.

390. Alternatively, GMACM is liable for such damages.

FOURTEENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and GMACM: Declaratory Relief)

391. FGIC re-alleges and incorporates by reference paragraphs 1 through 390 of this Complaint.

392. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed GMACM's actions as set forth in this complaint.

393. For the reasons set forth in paragraphs 228 through 264, among others, Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other.

394. FGIC has been damaged as a result of the actions of Ally Financial, ResCap, and GMACM.

395. FGIC therefore seeks a declaration that Ally Financial, ResCap, and GMACM were and continue to be alter egos of each other, and therefore are jointly and severally liable for each other's liabilities.

FIFTEENTH CAUSE OF ACTION

(As Against GMACM: Attorneys' Fees and Costs)

396. FGIC re-alleges and incorporates by reference paragraphs 1 through 395 of this Complaint.

397. The I&I Agreements are valid and binding agreement between the parties.

398. FGIC has performed its obligations under the I&I Agreements.

399. Pursuant to Section 3.03(c) of the I&I Agreements, GMACM agreed to reimburse FGIC for any and all costs or expenses "including reasonable attorneys' . . . fees and expenses" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to Section 3.04(a) of the I&I Agreements, GMACM agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by GMACM of any of the representations or warranties contained in Section 2.01 of the I&I Agreements or arising out of or relating to the HE Transactions.

400. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of GMACM's failure to provide Mortgage Loan files, Servicing Reports, and financial information and its breach of the representations and warranties contained in Section 2.01 of the I&I Agreements and other representations, warranties, and its covenants within the Operative Documents, such as Section 2.02 of the I&I Agreements.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant GMAC Mortgage Company, LLC, with respect to (1), (2), and (4) through (14) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4) through (11), (13) and (14), below, and in its favor and against Ally Bank, with respect to (3), (7), (13), and (14) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (11), (13) and (14) below and the following relief:

(1) A declaration that, pursuant to GMACM's obligations under the I&I Agreements, GMACM must solely and/or Ally Financial, ResCap, and GMACM must jointly and severally reimburse and indemnify FGIC for all sums arising out of the HE Transactions for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement: (i) for all sums it has paid to date under the Policies and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policies as and when such sums fall due or such claims are presented; or, alternatively, (ii) for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreements or any of the related Operative Documents; or, alternatively, (iii) in an amount to be determined at trial; and (iv) an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal, rescissory, equitable and punitive damages, to be proven at trial, for GMACM's fraudulent inducement of FGIC to enter into the HE Transactions and to issue the Policies;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's and Ally Bank's aiding and abetting of GMACM's fraudulent inducement of FGIC to enter into the HE Transactions and to issue the Policies;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial, for GMACM's material breaches of the HE Transactions;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for GMACM's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreements and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that GMACM must repurchase all Mortgage Loans that are in breach of GMACM's representations and warranties in the HE Transactions, and an order giving effect to that declaration;

(7) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for Ally Bank's material breaches of its obligations under the Custodial Agreements;

(8) Further or alternatively, a declaration that GMACM must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the HE Transactions, and that GMACM must comply with its obligations to provide FGIC and/or the successor servicer information pertaining to the Mortgage Loan files in the 2007-HE2 Transaction; and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that GMACM must allow FGIC to inspect the books and records of GMACM, to discuss the affairs, finances and accounts of GMACM with the Chief Financial Officer of GMACM, and to discuss the affairs, finances and accounts of GMACM with GMACM's independent accountants, and an order giving effect to that declaration;

(10) Further or alternatively, a declaration that GMACM must cause to be provided servicing notes for the HE Transaction when requested by FGIC;

(11) Further or alternatively, a declaration that Ally Financial, ResCap, and GMACM are alter egos of each other;

(12) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreements and other Operative Documents, as defined in the I&I Agreements;

(13) An award of prejudgment interest at the statutory rate; and

(14) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

Attorneys for Plaintiff
Financial Guaranty Insurance Company

Exhibit 25

12 CIV 1860

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

FINANCIAL GUARANTY INSURANCE COMPANY,	**Civil Action No. _____**
Plaintiff,	
-against-	
ALLY FINANCIAL, INC. F/K/A GMAC, LLC; RESIDENTIAL CAPITAL, LLC F/K/A RESIDENTIAL CAPITAL CORPORATION; RESIDENTIAL FUNDING COMPANY, LLC F/K/A RESIDENTIAL FUNDING CORPORATION,	
Defendants.	

Plaintiff Financial Guaranty Insurance Company ("FGIC"), by and through its attorneys, Jones Day, for its Complaint against defendants, Ally Financial, Inc., formerly known as GMAC, LLC ("Ally Financial"); Residential Capital, LLC, formerly known as Residential Capital Corporation ("ResCap"); and Residential Funding Company, LLC, formerly known as Residential Funding Corporation ("RFC"), alleges as follows:

NATURE OF THE ACTION

1. This action arises in connection with five financial guaranty insurance policies (each a "Policy" and collectively the "Policies") issued by FGIC in relation to five RFC-sponsored transactions (each a "Transaction" and collectively the "HI Transactions" or the "Transactions") in which RFMSII Home Loan Trust 2006-HI2 (the "2006-HI2 Trust"), RFMSII

Home Loan Trust 2006-HI3 (the "2006-HI3 Trust"), RFMSII Home Loan Trust 2006-HI4 (the "2006-HI4 Trust"), RFMSII Home Loan Trust 2006-HI5 (the "2006-HI5 Trust"), and RFMSII Home Loan Trust 2007-HI1 (the "2007-HI1 Trust" and together with the 2006-HI2, 2006-HI3, 2006-HI4, and 2006-HI5 Trusts, the "HI Trusts"), issued and sold to investors a combined $1,235,667,000 aggregate principal amount of insured Home Loan-Backed Notes (collectively, the "HI Notes"). As the sponsor of the HI Transactions, RFC procured the Policies from FGIC in order to enhance the ratings and marketability of the HI Notes. RFC fraudulently induced FGIC's agreement to provide insurance for the 2006-HI4, 2006-HI5, and 2007-HI1 Notes through willful and material misrepresentations and omissions concerning, among other things, the nature of its business practices, and the credit quality and characteristics of the thousands of mortgage loans that provided the collateral for the 2006-HI4, 2006-HI5, and 2007-HI1 Notes. In short, the mortgage loans were different—and demonstrably worse—than RFC had represented them to be. FGIC's issuance of the Policies enabled the HI Notes to receive a triple-A rating from the rating agencies, which in turn made each of the HI Transactions viable, and enabled RFC, its affiliates, and its parent Ally Financial to earn millions of dollars in transaction fees.

2. Since the closing of the HI Transactions, RFC has compounded its misconduct by repeatedly and materially breaching its contractual obligations to FGIC. From the very inception of each of the HI Transactions, RFC has violated the essential terms of its agreements with FGIC. RFC has also breached the essential terms of the other operative documents incorporated therein.

3. The wrongdoing committed by RFC, as detailed more fully below, was directed by Ally Financial, acting directly or indirectly through its wholly-owned subsidiary, ResCap. Ally Financial is the ultimate parent of ResCap, which owns RFC. Ally Financial, as the

ultimate parent of ResCap and RFC, has the practical ability, which it has repeatedly exercised, to direct and control the activities of these (and other) subsidiaries. In many instances—including in the Transactions—Ally Financial's direction and control was effected by using ResCap as an intermediary instrument to achieve its goals. For example, many of the material contractual breaches committed by RFC, concerning, primarily, FGIC's right to access information in RFC's possession and RFC's failure to repurchase or cure certain of the Mortgage Loans backing the HI Notes that FGIC sought to have repurchased, were carried out by ResCap, at the direction and control of Ally Financial.

4. Each of the HI Transactions is a mortgage loan securitization: a complex arrangement comprising multiple interdependent agreements among RFC and several other parties. To facilitate each Transaction, RFC pooled together thousands of mortgages (respectively, the "2006-HI2 Mortgage Loans," the "2006-HI3 Mortgage Loans," the "2006-HI4 Mortgage Loans," the "2006-HI5 Mortgage Loans," and the "2007-HI1 Mortgage Loans," and collectively the "Mortgage Loans"). Prior to the closing of each of the HI Transactions, RFC purchased many of the Mortgage Loans from other Ally Financial affiliates—namely, GMAC Mortgage LLC ("GMACM") and/or HomeComings Financial, LLC ("HomeComings")—which is wholly owned by RFC.

5. In each of the five Transactions, following its acquisition of the Mortgage Loans, RFC transferred the Mortgage Loans to another Ally Financial affiliate, Residential Funding Mortgage Securities II, Inc. ("RFMSII"). RFMSII then deposited the Mortgage Loans it received from RFC into the HI Trust designated for the transaction. Each of the HI Trusts, in turn, issued to investors notes collateralized by these loans. Each of the HI Trusts is a legal

entity created by RFC solely for the purposes of the applicable HI Transaction to hold the related Mortgage Loans and to issue the related HI Notes to investors in a registered public offering.

6. The periodic mortgage payments made by the borrowers under the Mortgage Loans held by the HI Trusts are used to pay, among other things, principal and interest due on the HI Notes, and the fees and expenses of RFC, GMACM, and HomeComings, as well as other participants in the Transactions.

7. RFC also acted as master servicer of the HI Transactions ("Master Servicer"), in which capacity it would supervise the subservicers, including overseeing the collection of borrower payments and performing other servicing duties related to the Mortgage Loans. For each of the Transactions, RFC's wholly-owned, direct subsidiary HomeComings and/or RFC's affiliate GMACM acted as subservicers of the loans. As discussed in more detail below, all of the servicing operations of HomeComings, GMACM, and RFC have since been integrated into ResCap. Ally Securities, LLC ("Ally Securities"), yet another Ally Financial affiliate, acted as the joint lead manager of the underwriters of each of the HI Transactions. J.P. Morgan Chase Bank, N. A. ("J.P. Morgan") agreed to act as indenture trustee of the 2006-HI2 Trust, the 2006-HI3 Trust, and the 2006-HI4 Trust, U.S. Bank, N.A. ("U.S. Bank") agreed to act as the indenture trustee of the 2006-HI5 Trust, and LaSalle Bank, N.A. ("LaSalle Bank") agreed to act as the indenture trustee of the 2007-HI1 Trust (each an "Indenture Trustee" and collectively the "Indenture Trustees"). The Bank of New York Trust Company, N.A. later became the successor in interest to J.P. Morgan as Indenture Trustee, and U.S. Bank later became successor in interest to LaSalle Bank as Indenture Trustee.

8. RFC, directed and controlled by Ally Financial, is, therefore, the hub of the HI Transactions: it is the sponsor of the securitizations, an acquirer and seller of the Mortgage

Loans, and the Master Servicer of each of the Transactions. The primary victim of the HI Transactions—which turned out to be backed by inferior loans that did not meet the underwriting standards or loan characteristics warranted by RFC—is FGIC, which has already been presented with over $82 million in claims under the Policies, with substantial further claims still to come.

9. FGIC, a monoline financial guaranty insurance company, was in the business of writing financial guaranty insurance policies with respect to asset-backed and debt securities, including residential mortgage-backed notes ("RMBS Notes"). At the time of the HI Transactions, FGIC's financial strength was rated triple-A by Moody's Investors Services, Inc. ("Moody's"), Standard and Poor's Ratings Services (a division of The McGraw-Hill Companies, Inc.) ("S&P"), and Fitch, Inc., which enabled securities that were insured by FGIC to be rated triple-A as well. FGIC's financial guaranty insurance policies for RMBS Notes typically guaranteed the timely payment of the principal and interest due on the insured securities, including the amount, if any, of principal losses allocated to the RMBS Notes. FGIC's insurance policies thus enhanced the credit quality and marketability of the insured securities.

10. To enhance the ratings and marketability of the HI Notes, and to increase the profit that Ally Financial and RFC would derive from the HI Transactions, RFC sought to have FGIC issue the Policies to the Indenture Trustees for the benefit of the holders of the HI Notes.

11. To induce FGIC to enter into the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, RFC made material representations and warranties to FGIC about the manner in which the 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loans were selected and evaluated and their characteristics. Those representations and warranties were false when stated. FGIC reasonably relied on such warranties, among others, when deciding to enter into the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions. RFC represented, among other things, that the "seller's

underwriting standards relating to the home loans generally will conform to those published in [RFC's] client guide, and the provisions of the guide applicable to the home equity 125 loan program." 2006-HI4 Prospectus Supplement at S-34; 2006-HI5 Prospectus Supplement at S-34; 2007-HI1 Prospectus Supplement at S-33.

12. FGIC reasonably relied on such warranties, among others, and was thus fraudulently induced to enter into the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions. As a result, the credit risk assumed by FGIC in connection with these Transactions was far greater than it would have been had RFC's representations and warranties been true, as demonstrated by the overwhelming number of claims that have been subsequently presented to FGIC.

13. RFC received substantial assistance from Ally Financial in fraudulently inducing FGIC to issue Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions. Ally Financial took actions and made statements to finance, support, and boost investor confidence in its mortgage loan securitization business, which was carried out by its subsidiaries. Ally Financial was aware of the material misrepresentations RFC had made to FGIC. As a result of its dominance over ResCap and RFC, Ally Financial knew that the representations and warranties RFC made to FGIC, prior to and at the closing of the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, upon which FGIC reasonably relied, were false. As such, Ally Financial actively aided and abetted RFC's fraudulent inducement of FGIC to issue the Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions.

14. The increased credit risk inherent in the Mortgage Loans has resulted in extremely high levels of delinquencies, defaults, and losses on the Mortgage Loans, and the resultant claims presented to FGIC have been far in excess of what FGIC reasonably expected when it decided to issue the Policies in reliance on the (presumed) accuracy and truthfulness of RFC's

representations and warranties and affirmative covenants. In fact, the levels of defaults and losses, and the resulting amount of claims presented to FGIC, have been overwhelming. Had FGIC been told the truth about the nature of RFC's underwriting and business practices and/or the true characteristics of the Mortgage Loans, it would never have agreed to issue the Policies, and would thereby have avoided the significant losses and liabilities it has incurred, and will incur, as a result of RFC's misconduct.

15. In order to evaluate the extent of RFC's breaches, FGIC has requested copies of the mortgage loan files for the 2006-HI2, 2006-HI5, and 2007-HI1 Mortgage Loans. RFC is obligated, under its agreements with FGIC, to provide those documents to FGIC. RFC has refused to provide FGIC with the requested documentation, which, on information and belief, will further evidence material breaches by RFC. This refusal to provide information in itself constitutes a material breach of RFC's insurance agreements with FGIC.

16. Certain of the material contractual breaches committed by RFC—including, but not limited to, its refusal to honor FGIC's right to access information in RFC's possession—were directed by Ally Financial, acting directly or indirectly through ResCap.

17. Through this Complaint, FGIC seeks relief against RFC, ResCap, and Ally Financial for RFC's fraudulent inducement of FGIC in connection with the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions.

18. FGIC also seeks relief against RFC, ResCap, and Ally Financial for RFC's material breaches of its insurance agreements with, and contractual obligations owed to, FGIC in connection with the HI Transactions.

19. Further, FGIC seeks relief against Ally Financial for aiding and abetting RFC's fraudulent inducement of FGIC.

20. FGIC also seeks a declaration from the Court that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

THE PARTIES

21. Plaintiff FGIC is a New York stock insurance corporation with its principal place of business at 125 Park Avenue, New York, New York 10017.

22. Defendant Ally Financial is a Delaware corporation with its principal place of business in Detroit, Michigan. Ally Financial is the parent company of ResCap, RFC, and all RFC-affiliated entities relevant to this action.

23. Defendant RFC is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. In the period relevant to this action, RFC acquired, and serviced residential mortgage loans, and sponsored securitizations of mortgage loans.

24. Since 2005, RFC has been an indirect wholly owned subsidiary of ResCap; prior to that time, RFC was an indirect, wholly owned subsidiary of Ally Financial.

25. Defendant ResCap is a Delaware limited liability corporation and an indirect wholly-owned subsidiary of Ally Financial. ResCap is the indirect corporate parent of RFC and its business includes originating, acquiring, selling and servicing mortgage loans.

26. In September 2008, ResCap announced that it was closing much of its mortgage loan acquisition business.

JURISDICTION AND VENUE

27. This Court has subject matter jurisdiction over this suit pursuant to 28 U.S.C. § 1332 because there is complete diversity of citizenship between the parties and the amount in controversy exceeds $75,000, exclusive of interest and costs. Additionally, in agreements at

issue in this case, at least one of the defendants irrevocably submitted to the jurisdiction of this Court.

28. Venue is proper in this district under 28 U.S.C. § 1391 because a substantial part of the events giving rise to this claim occurred within this judicial district, and, in agreements at issue in this case, at least one of the defendants agreed not to challenge venue in this Court.

RELEVANT NON-PARTIES

29. GMACM (f/k/a GMAC Mortgage Corporation) is a Delaware limited liability company with its principal place of business in Fort Washington, Pennsylvania. GMACM is an indirect, wholly-owned subsidiary of ResCap, which in turn is a wholly-owned subsidiary of Ally Financial. Many of the Mortgage Loans in each of the Transactions were originated and sold to RFC by GMACM, which also acted as the subservicer, along with HomeComings, of each of the HI Transactions. GMACM originated 26.6% of the 2006-HI3 Mortgage Loans, 38.9% of the 2006-HI4 Mortgage Loans, 15.6% of the 2006-HI5 Mortgage Loans, and 14.3% of the 2007-HI1 Mortgage Loans.

30. RFMSII, a special purpose vehicle, is an indirect, wholly-owned subsidiary of Ally Financial and a Delaware corporation with its principal place of business in Minneapolis, Minnesota. To facilitate the HI Transactions, RFMSII purchased the Mortgage Loans from RFC and deposited them into the each of the HI Trusts. The trusts then issued the HI Notes to underwriters, including Ally Securities, to be sold to investors.

31. Ally Securities (f/k/a GMAC RFC Securities), an entity incorporated in Delaware, is an affiliate of RFC and RFMSII and a registered broker-dealer under the Securities Exchange Act of 1934, and is registered to do business in New York. Prior to 2007, Ally Securities was known as Residential Funding Securities Corporation, and was doing business as GMAC RFC Securities. Ally Securities served as the joint lead manager of the underwriters of the HI Notes

and, on information and belief, participated in the preparation of the Prospectuses and Prospectus Supplements for the HI Transactions.

32. HomeComings (f/k/a HomeComings Financial Network, Inc.), a Delaware limited liability corporation, is the direct, wholly-owned subsidiary of RFC. Many of the Mortgage Loans in each of the Transactions were originated and sold to RFC by HomeComings, which also acted as the subservicer of each of the HI Transactions. Homecomings originated 5.9% of the 2006-HI2 Mortgage Loans, 3.5% of the 2006-HI3 Mortgage Loans, 4.6% of the 2006-HI4 Mortgage Loans, 5.7% of the 2006-HI5 Mortgage Loans, and 4.5% of the 2007-HI1 Mortgage Loans.

FACTUAL ALLEGATIONS

A. Ally Financial and its Subsidiaries

33. In the period relevant to this action, RFC acquired, sold, and serviced residential mortgage loans and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of RMBS Notes.

34. The Mortgage Loans have suffered extremely high rates of delinquencies, defaults, and losses, and it is a matter of public knowledge that the business practices of Ally Financial's subsidiaries, including those of RFC and ResCap, led Ally Financial to seek a bailout by the federal government in 2008.

(1) RFC, GMACM, and GMAC-RFC

35. RFC is a subsidiary of GMAC-RFC Holding Company, LLC ("GMAC-RFC") which in turn is a subsidiary of ResCap, which in turn is a subsidiary of the ultimate parent, Ally Financial.

36. GMACM is also a subsidiary of GMAC-RFC and ResCap. Like its affiliate RFC, GMACM engaged in the business of originating, acquiring, servicing, and securitizing mortgage loans during the period relevant to this action.

37. GMAC-RFC companies issued $42.34 billion of non-agency mortgage-backed securities in 2004, $56.93 billion in 2005, $66.19 billion in 2006, and $32.43 billion in 2007, according to Inside Mortgage Finance Publications, Inc. *See 2011 Mortgage Market Statistical Annual: Volume II* at 38-41. GMAC-RFC was the fifth largest issuer of non-agency mortgage-backed securities in 2005, the fourth largest in 2006, and the eighth largest in 2007. *Id.*

38. GMAC-RFC was the largest issuer of private mortgage-backed securities in 2002, when it issued $11.5 billion of private mortgage-backed securities, according to the *Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011. *See* FCIC Report at 462. GMAC-RFC was also the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See id.* at 504.

39. The FCIC Report pointedly notes the widespread failure among the mortgage-backed security industry generally to adhere to basic standards in loan origination, selection, and evaluation—a truth FGIC would come to learn specifically in its dealings with RFC. The FCIC Report concludes that:

> [F]irms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. Potential investors were not fully informed or were misled about the poor quality of the mortgages contained in some mortgage-related securities. These problems appear to have been significant.

Id. at 187.

40. The FCIC Report further notes that, in light of Ally Financial and its subsidiaries' systemic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMAC/Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans. *Id.*

(2) Ally Financial's Securitization Business

41. Ally Financial's business model depended on securitizations, which were conducted by its business units, including RFC. Pooling mortgage loans and selling them into securitizations enabled RFC to fund its ongoing mortgage loan originations and acquisitions, earned it significant fees from the resulting transactions, and reduced the credit risk it retained with respect to those loans.

42. RFC, in addition to securitizing mortgage loans originated by itself or other Ally Financial subsidiaries, also earned fees by securitizing mortgage loans it acquired from third parties. RFC would typically acquire such mortgage loans and then deposit them into a securitization trust (usually through an affiliate). RFC would then procure underwriters, trustees, and (in the case of insured securities) financial guaranty insurers, and cause the securitization trust to sell securities collateralized by the relevant mortgage loans. In many instances, RFC profited from the difference between the cost it incurred to acquire mortgage loans and the price at which it sold them for deposit into the securitizations.

43. In order to gain additional fees for performing certain administrative duties under the various transaction agreements, including collecting mortgage payments and determining

whether a mortgage loan is in default based on the transaction documents, RFC typically also sought (as it did here) to be appointed as the master servicer, appointing the mortgage loan originator or an affiliate to act as subservicer. For acting as Master Servicer to the HI Transactions, RFC gained substantial additional compensation.

44. RFC also enriched Ally Financial and its other subsidiaries through its sponsorship of securitizations. Ally Financial entities typically participated in each of the key steps in the securitization process, and recorded gains and earned fees at each of those steps. For example, in the HI Transactions:

- Homecomings and GMACM gained fees for originating certain of the Mortgage Loans and proceeds from selling those loans to RFC;
- RFMSII, which established the HI Trusts and acted as depositor of the Mortgage Loans, charged fees to cover its operating expenses; and
- Ally Securities received fees for underwriting the HI Notes.

(3) Ally Financial, RFC, and GMACM Face Numerous Investigations and Lawsuits Relating to Their RMBS Securitizations

45. On September 2, 2011, the Federal Housing Finance Authority (the "FHFA"), as conservator for Freddie Mac, filed suit in the New York Supreme Court against Ally Financial and several of its subsidiaries for claims arising in connection with its role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in certificates issued through twenty-one RFC-sponsored transactions similar to the HI Transactions. Among other claims, FHFA brought suit for common law fraud against various Ally Financial subsidiaries and aiding abetting fraud against Ally Financial for its intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the subject certificates.

46. The FHFA also alleges violations of state and federal securities laws by Ally Financial and several of its subsidiaries, including RFC, stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, the FHFA also alleges aiding and abetting fraud Ally Financial and certain of its affiliates for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs. In October 2011, Ally Financial and its co-defendants removed the FHFA action to the U.S. District Court for the Southern District of New York.

47. In addition, RFC is currently facing a lawsuit brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court in which MBIA alleges that in connection with five transactions similar to the HI Transactions, RFC affirmative misrepresented the credit quality of tens of thousands of mortgage loans, with a total principal balance of approximately $3.4 billion, as a means of unfairly shifting to investors and MBIA risks that RFC should have borne itself. On December 22, 2009, the New York Supreme Court issued a ruling denying RFC's motion to dismiss, which allowed both the breach of contract and the fraud claims, among others, to proceed to trial.

48. RFC is also currently facing a lawsuit brought by MBIA in New York Supreme Court for, among other things, fraud and breach of representations and warranties in connection with other types of RMBS transactions. In December 2009, the New York Supreme Court rejected RFC's motion to dismiss certain of the claims brought against it, allowing both the breach of contract and fraud claims, among others, to proceed.

49. Additionally, according to Ally Financial's quarterly report for the third quarter of 2011, as of November 4, 2011, there were twenty-two pending suits in various jurisdictions pending against Ally Financial's mortgage-related business units and subsidiaries arising from numerous mortgage-backed securities offerings. The plaintiffs in those suits have alleged, among other things, that Ally Financial's various mortgage subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to RMBS offerings. The alleged misstatements typically concern underwriting standards. *See* Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011). Further, in its 2011 annual report, Ally Financial stated that it expects additional similar claims to be brought against Ally Financial and/or its subsidiaries in the future. *See* Ally Fin. Inc., Annual Report (Form 10-K), at 20 (Feb. 28, 2011).

50. Since the filing of its November 2011 quarterly report, moreover, Ally Financial and its subsidiaries have been sued by additional plaintiffs, including HSH Nordbank AG, which have alleged, among other things, material misrepresentations and omissions about the loans backing RMBS securities issued by Ally Financial's affiliates.

51. Moreover, Ally Financial has disclosed that it expects additional RMBS lawsuits from monoline insurers like FGIC given that Ally Financial and its subsidiaries sold $42.7 billion of loans into monoline-wrapped securitizations from 2004 to 2007. During 2011, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $265 million worth of mortgages related to securitizations it consummated between 2004 and 2007. Ally Financial evidently recognizes its exposure because, according to Ally Financial's CEO, Michael Carpenter, ResCap has already reserved $829 million for representations and warranties claims and, according to its own Securities and Exchange Commission ("SEC") filings, Ally

Financial confirms that "litigation with . . . monolines is likely." Ally Fin. Inc., Annual Report (Form 10-K), at 98 (Feb. 28, 2012).

52. Indeed, according to Ally Financial's 2011 annual report, Ally Financial, GMACM's parent, also believes that "[t]he total exposure . . . to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008, specifically the 2006 and 2007 vintages that were originated and sold prior to enhanced underwriting standards and risk-mitigation actions implemented in 2008 and forward." Ally Fin. Inc., Annual Report (Form 10-K), at 224 (Feb. 28,, 2012). The Transactions at issue here are of the 2006 and 2007 vintages.

53. Additionally, Ally Financial also disclosed that the SEC served a subpoena on Ally Financial in June 2011, requesting documentation regarding certain "bulk settlements" relating to securitized mortgage loans as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. *See* Ally Fin. Inc., Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

54. Furthermore, RFC's sister company GMACM is currently being investigated by the U.S. Department of Justice (the "DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that the DOJ had served GMACM with a subpoena in June 2011, which "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." *Id.* (emphasis added).

(4) The Mortgage Loan Servicing Misconduct of Ally Financial and GMACM Has Come Under Scrutiny and Resulted in Severe Sanctions

55. On February 9, 2012, the Federal Reserve Board announced that Ally Financial, its subsidiaries, and several other mortgage loan servicers would be required to pay $766.5 million in monetary sanctions for "unsafe and unsound processes and practices in residential mortgage loans servicing and foreclosure processing." Press Release, Federal Reserve Board (February 9, 2011). On February 12, 2012, the Federal Reserve Board imposed well over $200 million of this fine against Ally Financial, ResCap, and GMACM pursuant to an Assessment Order, which requires that the sanctions be paid into various borrower assistance programs and nonprofit programs established to help victims of improper servicing and foreclosure practices. *See* Order of Assessment of a Civil Money Penalty Issued Upon Consent Pursuant to the Federal Deposit Insurance Act, as Amended, FRB Docket No. 12-006-CMP-HC (February 12, 2012) (the "Assessment Order"). According to the Federal Reserve Board, the sanction "takes into account the maximum amount prescribed for unsafe and unsound practices under the applicable statutory limits, the comparative severity of the institutions' misconduct, and the comparative sizes of the institutions' foreclosure activities." *See* Press Release, Federal Reserve Board (February 9, 2011).

56. Further, also on February 9, 2012, the U.S. Attorney General announced that Ally Financial will take part in a $25 billion settlement to resolve claims brought by the government in response to the "reckless and abusive mortgage practices" of Ally Financial and four similarly situated bank holding companies. *See* Eric Holder, U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012). Although the settlement releases Ally Financial from certain civil claims brought by the DOJ and multiple

state attorneys general, *see id.*; National Mortgage Settlement Website, Settlement Documents > Servicing Standard Highlights, *available at* http://www.nationalmortgagesettlement.com/ (last visited Feb. 12, 2012), the settlement was not designed to resolve any other liabilities that Ally Financial has incurred through its improper origination, securitization, and servicing practices, *see id.*, About the Settlement, *available at* http://www.nationalmortgagesettlement.com/about (last visited Feb. 12, 2012).

57. According to the U.S. Attorney General, the $25 billion settlement and $766.5 million sanction are just "the latest step forward" in holding Ally Financial and others accountable for "egregious mortgage loan servicing abuses." *See* Attorney General Holder, Remarks at the Mortgage Servicers Settlement Press Conference.

58. Similarly, the New York Attorney General recently announced a $136 million settlement with the nation's five largest mortgage servicers—including GMAC/Ally Financial. *See* Office of the New York Attorney General Press Release, *Schneiderman Secures Major Settlement That Allows Sweeping Mortgage Investigations To Proceed*, *available at* http://www.ag.ny.gov/media_center/2012/feb/feb9b_12.htm. As the New York Attorney General noted, the settlement principally addressed "foreclosure abuses" by GMAC/Ally Financial and other banks, and "[i]n addition to penalties for past abuses, the settlement includes direct relief to victims of wrongful foreclosure conduct" and "imposes strong national standards for mortgage servicing" that had previously been lacking. *Id.* Additionally, the New York Attorney General's office will lead the new Residential Mortgage-Backed Securities Working Group, a component of the interagency Financial Fraud Enforcement Task Force led by the DOJ, which "brings together the Department of Justice, several state law enforcement officials, and

other federal agencies to investigate those responsible for misconduct contributing to the financial crisis through the pooling and sale of residential mortgage-backed securities." *Id.*

59. In addition to these recent settlements and Assessment Order, the Federal Reserve Board and the Federal Deposit Insurance Corporation (the "FDIC") previously ordered Ally Financial and several its subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See* Consent Order, FRB Docket No. 11020-B-HC (April 13, 2011) (the "Consent Order").

60. The Consent Order notes that Ally Financial's mortgage servicing subsidiaries have been accused, *inter alia*, of (1) failing to properly increase financial, staffing, and managerial resources in order to meet an increasing number of foreclosures; (2) failing to properly put in place "adequate internal controls, policies and procedures, compliance risk management, internal audit, training, and oversight of the foreclosure process"; (3) filing false affidavits in foreclosure actions; and (4) litigating foreclosure proceedings without "confirming that the promissory note and mortgage document were properly endorsed or assigned." *Id.* at 3-4.

61. Furthermore, under the Consent Order, Ally Financial must direct its mortgage servicing subsidiaries to take certain remedial action to ensure that they operate in a "safe and sound manner" in the future. *Id* at 4. Specifically, among other things, the Consent Order requires Ally Financial to take "steps to improve the information and reports that will be regularly reviewed by [Ally Financial's] board of directors. . . [to assess the performance of] residential mortgage loan servicing, Loss Mitigation, and foreclosure activities and operations . . . ." *Id.* at 8.

62. In connection with the enforcement of the Consent Order, as of November 2011, the Federal Reserve Board is permitting mortgage borrowers who were financially harmed by the

foreclosure processes of GMACM to request an independent review of their files. *See* Press Release, Federal Reserve Board (Nov. 1, 2011). This independent review will determine whether errors and misrepresentations in GMACM's foreclosure processes indeed caused financial harm to the borrower. *See id.* If the foreclosure process is found to have caused financial injury to the borrower, GMACM will then be required to provide full compensation. *See id.*

63. As a result of servicing misconduct, Ally Financial and other bank holding companies will now be required to adhere to new, heightened servicing standards. *See* Press Release, Federal Reserve Board (Feb. 9, 2011). The Federal Reserve Board has ordered Ally Financial to remedy its servicing practices by "strengthen[ing] the coordination of communications with borrowers by providing borrowers the name of the person at the service who is their primary point of contact, establish[ing] limits on foreclosures where loan modifications have been approved, establish[ing] robust third party vendor controls, strengthen[ing] compliance programs, and provid[ing] appropriate remediation to borrowers who suffered financial injury as a result of errors by the servicers." *See id.*

64. Moreover, the servicing and foreclosure improprieties of Ally Financial and its subsidiaries is a matter of public record. According to the sworn testimony of an Ally Financial/GMACM employee, Ally Financial's mortgage servicing subsidiaries have routinely filed false affidavits in thousands of foreclosure actions across the country. *See* Jeffrey Stephan Dep. *Federal National Mortgage Association v. Bradbury*, BRI-RE-09-65 (Me. Dist. Ct., Dist. Nine, Div. N. Cumberland) (June 7, 2010). Indeed, according to the FCIC Report:

> [L]enders have relied on "robo-signers" who substituted speed for accuracy by signing, and sometimes backdating, hundreds of affidavits claiming personal knowledge of facts about mortgages that they did not actually know to be true. One such "robosigner,"

> Jeffrey Stephan of GMAC, said that he signed 10,000 affidavits in a month—roughly 1 per minute, in a 40-hour workweek—making it highly unlikely that he verified payment histories in each individual case of foreclosure.

FCIC Report at 407.

65. Stephan also testified that, when executing summary judgment affidavits to be used in judicial foreclosure actions, he was acting in accordance with policies and procedures, and never in fact inspected any of the exhibits to the affidavits or even ensured that the exhibits were attached, despite swearing that he had done so in the affidavits themselves. Stephan Dep. Tr. at 54:12-25. Such exhibits would generally include (or at least should have included), among other things, the mortgage note and documents relating to the assignment of the mortgage. *See id.* at 51:15-23. Stephan further testified that when he signed an affidavit affirming that the foreclosure was proper, all he knew was the borrower's name and whether he had signing authority to foreclose on the property. *Id.* at 62:23-25, 63:2-6. Stephan testified that the process he followed in signing summary judgment affidavits was in accordance with the policies and procedures required by Ally Financial subsidiaries. *Id.* at 64:8-14.

66. Additionally, in October 2010, the Ohio Attorney General filed suit against GMACM and Ally Financial, alleging, among other things, that employees of GMACM had executed thousands of false affidavits in connection with foreclosures on properties in that state. *See State of Ohio v. GMAC Mortgage LLC*, CI0201006984, Court of Common Pleas, Lucas County, Ohio (Toledo). Although some of the claims brought by the Ohio Attorney General's suit have been resolved by the $25 billion multi-party settlement, many additional claims not encompassed by the settlement, including those relating to the improper assignment of mortgage notes, have survived. As of February 2012, the action remains pending in Ohio.

67. Similarly, in December 2011, the Massachusetts Attorney General filed suit against GMACM for, among other things, engaging in unfair and deceptive foreclosure practices. *See Commonwealth of Massachusetts v. Bank of America NA*, 11-4363, Suffolk County Superior Court (Boston). Days after filing suit, the Massachusetts Attorney General sent a letter to the United States Senate Committee on Banking, Housing and Urban Affairs, and the United States House Committee on Financial Services asking that the federal government investigate Ally Financial and GMACM for allegedly carrying out illegal foreclosures and submitting false documents related to property seizures. *See* Boston Globe, *Attorney General Martha Coakley Urges Congress to Investigate Ally Financial's GMAC Over Foreclosure Practices*, Dec. 6, 2011. Specifically, the Massachusetts Attorney General's letter to the Senate and House Committees stated:

> In light of Ally [Financial]'s alleged deceptive and illegal actions against homeowners in Massachusetts and across the country, I respectfully request that your committees investigate Ally [Financial]'s serious misconduct and consider what actions the federal government can take to ensure that Ally [Financial] adheres to the law.

Id.

68. While the $25 billion settlement ultimately resolved certain claims brought by the Massachusetts Attorney General in this action, several claims relating to improper foreclosure practices and abuse of certain state recordation systems have survived and will continue to be prosecuted. *See* Press Release, Office of the Attorney General of Massachusetts, *Massachusetts Homeowners to Receive $318 Million in Relief as Part of State-Federal Agreement Over Unlawful Foreclosures and Loan Servicing*, Feb. 9, 2012.

(5) Significant Possibility of Ally Financial Seeking Bankruptcy Protection for ResCap, GMAC-RFC, and RFC

69. Since at least as far back as November 2011, Ally Financial has been considering filing for bankruptcy protection for ResCap, its wholly-owned subsidiary, which has reportedly lost $555 million since 2009, according to multiple published reports. RFC is a wholly-owned, indirect subsidiary of ResCap.

70. Around that time, the financial industry was "betting that Ally [Financial] will place its Residential Capital LLC [ResCap] mortgage unit into bankruptcy instead of supporting the business as the bank prepares for an initial public offering." Bloomberg News, *Ally May Put ResCap in Bankruptcy to Ease IPO: Corporate Finance*," Nov. 14, 2011.

71. As the article notes, Ally Financial has the power to decide whether its "mortgage unit," ResCap, should file for bankruptcy. *See id.*

72. Indeed, Ally Financial warned in its 2011 annual report that "[t]here is a significant risk that ResCap will not be able to meet its debt service obligations and other funding obligations in the near term." Ally Fin. Inc., Annual Report (Form 10-K), at 19 (Feb. 28, 2012).

73. That risk ultimately came to pass as Ally Financial recently disclosed that the penalties assessed by the federal government and numerous state attorneys general regarding the foreclosure practices of Ally Financial and its subsidiaries "resulted in our Mortgage operations recording a $230 million charge in the fourth quarter of 2011." *Id.* at 31. As Ally Financial detailed in its previous public filing, the "[t]he majority of [the charge] was recorded at Residential Capital, LLC ('ResCap') . . . [which] resulted in a covenant breach in certain of ResCap's credit facilities." Ally Financial, Current Report (Form 8-K) (Jan. 31, 2012). Indeed, as Ally Financial more recently explained, "ResCap is required to maintain consolidated net

worth . . . of $250 million at the end of each month under the terms of certain of its credit facilities. . . [and] as a result of the fourth quarter charge, ResCap's consolidated net worth was $92 million at December 31, 2011." Ally Fin. Inc., Annual Report (Form 10-K), at 31-32 (Feb. 28, 2012). ResCap's substantial shortfall, however, was "immediately remediated by Ally through a capital contribution of $197 million, which was provided through forgiveness of intercompany debt during January 2012." *Id.* This capital contribution followed a previous grant of $58 million in intercompany debt forgiveness by Ally Financial in 2011 on a $1.6 billion line of credit Ally Financial had extended its controlled subsidiary ResCap. *Id.* at 129.

74. Moreover, in February 2012, it was reported that Ally Financial had contacted buyout firms such as Fortress Investment Group LLC and Cerberus Capital Management LP regarding a potential sale of ResCap through a pre-packaged bankruptcy to be effectuated by the end of March as ResCap faces financing and liquidity deadlines. *See* Bloomberg Businessweek, *Ally's ResCap Said to Seek Buyers for Prearranged Bankruptcy*, Feb. 8, 2012.

75. According to the report, "[p]otential bidders are being told that a pre-packaged bankruptcy filing would allow the buyer to leave behind liabilities such as [RMBS] securitizations that have been the subject of litigation." *Id.* To that end, Ally Financial's CEO, Michael Carpenter, has stated that he will not pursue the aforementioned initial public offering for Ally Financial "until [these] legacy mortgage issues are resolved." *Id.* Nevertheless, a bondholder group representing holders of approximately $800 million in ResCap debt has expressed its desire to "fight [Ally Financial] tooth and nail" to oppose the bankruptcy, based in part on the belief that "Ally [Financial] can't legally separate itself from ResCap because it has stripped assets from the unit." Bloomberg News, *Paulson, Tepper Said Among Investors Urging Ally to Back ResCap*, Jan. 10, 2012.

76. Indeed, as Ally Financial has pointedly noted in its most recent annual report: "In light of ResCap's liquidity and capital needs combined with volatile conditions in the marketplace, there is substantial doubt about ResCap's ability to continue as a going concern." Ally Fin. Inc., Annual Report (Form 10-K), at 18 (Feb. 28, 2012)

B. RFC's Securitizations and Financial Guaranty Insurance Generally

(1) Financial Guaranty Insurance Policies

77. To improve the marketability and ratings of the RMBS Notes issued as part of its securitizations, RFC from time to time sought credit enhancement for the RMBS Notes from FGIC, a financial guaranty insurer, in the form of financial guaranty insurance policies. Under the terms of a financial guaranty insurance policy like the ones FGIC issued here, the insurer unconditionally and irrevocably guarantees to the trustee for the benefit of the holders of the insured RMBS Notes that, if there is a shortfall in cash available to it to make required payments on the insured securities, the financial guaranty insurer will pay the amount of the shortfall to the trustee for the benefit of the holders of the insured securities.

78. For a trust that issues RMBS Notes, the primary source of funds is the remittance of payments on the underlying residential mortgage loans. Delinquencies by borrowers in making their mortgage loan payments will, by definition, reduce cash flows to the trust, which will directly impair the ability of the trust to make required payments on the RMBS Notes. Delinquencies, if not cured, will eventually result in losses on the mortgage loans, which reduce the aggregate principal amount of the loan pool held by the trust. In this manner, high levels of mortgage loan delinquencies and defaults can lead to shortfalls in cash available to pay RMBS investors. Such shortfalls result in claims on FGIC's policies.

(2) Securitization Sponsor's Disclosures and Representations and Warranties

79. The risk FGIC assumes when it agrees to issue a policy for RMBS Notes depends upon the credit quality of the underlying mortgage loans, which in turn depends on the underwriting practices of the loan originators and the characteristics of the loans. If, for instance, a loan originator employs substandard underwriting practices, the underlying mortgage loans would be of inferior credit quality. Consequently, the credit risk—the risk of delinquency or default—of the underlying mortgages, and of the mortgage loan portfolio as a whole, would be materially increased.

80. Accordingly, FGIC generally required securitization sponsors, like RFC, to provide substantial representations and warranties about the underlying mortgage loans, such as the ratio of the borrower's monthly debt payments to monthly income ("DTI ratio"), the ratio of the mortgage loan principal balance or credit limit, as applicable, to the value of the mortgaged property at origination ("LTV ratio"), the ratio of the combined outstanding principal balances of the mortgage loan and all senior or subordinate mortgage loans secured by the mortgaged property to the value of the mortgaged property at origination ("CLTV ratio"), the borrower's credit score ("FICO score"), and the borrower's residual income, representing the borrower's gross monthly income less the borrower's monthly mortgage payment and other specified monthly debt payments ("Residual Income"). Even where, as here, RFC did not originate a particular loan, it nonetheless is typically required to make representations about that loan, thereby assuming the risk that those representations might not be accurate. RFC's representations and warranties, including representations about the standards and procedures used to underwrite the loans and the characteristics of the underlying mortgage loans, were

intended to allow FGIC to assess the credit risk inherent in the mortgage loan pool before deciding to commit to the transaction.

81. RFC's representations and warranties in its RMBS transactions regarding the characteristics of the loans included in the mortgage loan portfolios, and the underwriting standards used to evaluate those mortgage loans, are particularly vital because each loan pool comprised of thousands of mortgage loans, each of which was in itself a complex legal transaction. Each loan file typically contains (or at least is supposed to contain) a mortgage application, a credit report, income and employment verifications, an appraisal, the lender's internal documentation and a wide variety of other documentation necessary to support proper loan underwriting decisions. Moreover, in seeking financial guaranty insurance from FGIC for the HI Transactions, RFC demanded that FGIC commit to the pricing and other material terms within a very limited time frame. Both RFC and FGIC understood and intended that FGIC would rely on the information supplied by RFC as sponsor, as well as RFC 's representations and warranties concerning that information, in assessing the credit risk of the mortgage loan pool.

82. Further, on information and belief, for each of its securitizations, RFC as sponsor supplied the same data it provided to FGIC to one or several rating agencies in order for those agencies to create expected loan level default and loss estimates. The loan level default and loss estimates were then used by the rating agencies to create cash flow projections and potential loss estimates for the entire transaction. Finally, the rating agencies delivered to the sponsor and to FGIC a private credit assessment for the transaction (sometimes referred to as a "shadow rating") without considering the effect of FGIC's policy. The shadow rating provided an overall evaluation of the likelihood of default on the securities FGIC would be insuring in the securitization. As sponsor, RFC arranged for the shadow rating to be provided to FGIC knowing

that it was an essential condition to FGIC's willingness to issue a financial guaranty insurance policy.

C. The HI Transactions

(1) The 2006-HI2 Transaction

83. On May 25, 2006, RFC purchased thousands of residential mortgage loans originated by either its wholly-owned subsidiary HomeComings or an unaffiliated originator, pooled those loans, and deposited them in the 2006-HI2 Trust (via RFMSII). The trust then issued approximately $237 million aggregate principal amount of Home Loan-Backed Notes, Series 2006-HI2 (the "2006-HI2 Notes"). The 2006-HI2 Notes consisted of four tranches of Class A notes, all of which would be insured by FGIC. The 2006-HI2 Mortgage Loans consisted of 5,038 fixed rate home loans with an aggregate principal balance of approximately $237,844,495.

(2) The 2006-HI3 Transaction

84. On July 21, 2006, RFC purchased thousands of residential mortgage loans originated by either its wholly-owned subsidiary HomeComings, its affiliate GMACM, or an unaffiliated originator, pooled those loans, and deposited them in the 2006-HI3 Trust (via RFMSII). The trust then issued approximately $223 million aggregate principal amount of Home Loan-Backed Notes, Series 2006-HI3 (the "2006-HI3 Notes"). The 2006-HI3 Notes consisted of four tranches of Class A notes, all of which would be insured by FGIC. The 2006-HI3 Mortgage Loans consisted of approximately 4,425 fixed rate home loans with an aggregate principal balance of approximately $226,901,669.

(3) The 2006-HI4 Transaction

85. On September 28, 2006, RFC purchased thousands of residential mortgage loans originated by either its wholly-owned subsidiary HomeComings, its affiliate GMACM, or an

unaffiliated originator, pooled those loans, and deposited them in the 2006-HI4 Trust (via RFMSII). The trust then issued approximately $273 million aggregate principal amount of Home Loan-Backed Notes, Series 2006-HI4 (the "2006-HI4 Notes"). The 2006-HI4 Notes consisted of four tranches of Class A notes, all of which would be insured by FGIC. The 2006-HI4 Mortgage Loans consisted of 5,513 fixed rate home loans with an aggregate principal balance of approximately $273,513,055.

(4) The 2006-HI5 Transaction

86. On December 28, 2006, RFC purchased thousands of residential mortgage loans originated by either its wholly-owned subsidiary HomeComings, its affiliate GMACM, or an unaffiliated originator, pooled those loans, and deposited them in the 2006-HI5 Trust (via RFMSII). The trust then issued approximately $247 million aggregate principal amount of Home Loan-Backed Notes, Series 2006-HI5 (the "2006-HI5 Notes"). The 2006-HI5 Notes consisted of four tranches of Class A notes, all of which would be insured by FGIC. The 2006-HI5 Mortgage Loans consisted of 5,071 fixed rate home loans with an aggregate principal balance of approximately $250,095,045.

(5) The 2007-HI1 Transaction

87. On March 30, 2007, RFC purchased thousands of residential mortgage loans originated by either its wholly-owned subsidiary HomeComings, its affiliate GMACM, or an unaffiliated originator, pooled those loans, and deposited them in the 2007-HI1 Trust (via RFMSII). The trust then issued approximately $255 million aggregate principal amount of Home Loan-Backed Notes, Series 2007-HI1 (the "2007-HI1 Notes"). The 2007-HI1 Notes consisted of four tranches of Class A notes, all of which would be insured by FGIC. The 2007-

HI1 Mortgage Loans consisted of 5,171 fixed rate home loans with an aggregate principal balance of approximately $257,532,198.

(6) The HI Transactions Generally

88. To enhance the ratings and marketability of the HI Notes, RFC sought financial guaranty insurance policies from FGIC for the purpose of insuring the HI Transactions for the benefit of the note holders. For each of the Transactions, FGIC and RFC executed an Insurance and Indemnity Agreement (respectively, the "2006-HI2 I&I Agreement," the "2006-HI3 I&I Agreement," the "2006-HI4 I&I Agreement," the "2006-HI5 I&I Agreement," and the "2007-HI1 I&I Agreement," and collectively the "I&I Agreements"), under which FGIC agreed to and did issue a financial guaranty insurance policy to insure the HI Notes.[1] Each I&I Agreement was signed by FGIC (the "Insurer" for each Transaction); RFC (the "Seller" and "Master Servicer" of each Transaction); RFMSII (the "Depositor" for each Transaction); and the Indenture Trustee for each Transaction.[2]

89. Each I&I Agreement provides that FGIC is a third-party beneficiary of, and shall have all of the rights provided for in, the "Operative Documents." For each of the HI Transactions, the "Operative Documents" are defined to include, among other documents: (i) the relevant HI Notes; (ii) an Indenture, between the relevant Indenture Trustee and the relevant HI Trust (respectively, the "2006-HI2 Indenture," the "2006-HI3 Indenture," the "2006-HI4 Indenture," the "2006-HI5 Indenture," and the "2007-HI1 Indenture"); (iii) a Servicing

[1] FGIC issued financial guaranty insurance policies with policy number 06030063 for the 2006-HI2 Transaction; policy number 06030087 for the 2006-HI3 Transaction; policy number 06030113 for the 2006-HI4 Transaction; policy number 06030135 for the 2006-HI5 Transaction; and policy number 07030014 for the 2007-HI1 Transaction.

[2] The 2006-HI2 I&I Agreement was executed on May 25, 2006; the 2006-HI3 I&I Agreement was executed on July 21, 2006; the 2006-HI4 I&I Agreement was executed on September 28, 2006; the 2006-HI5 I&I Agreement was executed on December 28, 2006; and the 2007-HI1 I&I Agreement was executed on March 30, 2007.

Agreement, among the relevant HI Trust, RFC, and the relevant Indenture Trustee (respectively, the "2006-HI2 Servicing Agreement," the "2006-HI3 Servicing Agreement," the "2006-HI4 Servicing Agreement," the "2006-HI5 Servicing Agreement," and the "2007-HI1 Servicing Agreement," and together, the "Servicing Agreements"); and (iv) a Home Loan Purchase Agreement, between RFC and RFMSII (respectively, the "2006-HI2 HLPA," the "2006-HI3 HLPA," the "2006-HI4 HLPA," the "2006-HI5 HLPA," and the "2007-HI1 HLPA" and collectively the "Purchase Agreements").[3] The Servicing Agreements also provide that FGIC, as Credit Enhancer, is an express third-party beneficiary thereof.

90. The Policies improved the marketability of the HI Notes by mitigating risk for potential investors and making the HI Notes eligible to receive an initial credit rating of triple-A by the rating agencies at the closing of each HI Transaction.

91. RFC and RFMSII offered the HI Notes for sale pursuant to a prospectus, (each a "Prospectus," and for each Transaction respectively, the "2006-HI2 Prospectus," the "2006-HI3 Prospectus," the "2006-HI4 Prospectus," the "2006-HI5 Prospectus," and the "2007-HI1 Prospectus"), and a prospectus supplement (each a "Prospectus Supplement," and for each transaction respectively, the "2006-HI2 Prospectus Supplement," the "2006-HI3 Prospectus Supplement," the "2006-HI4 Prospectus Supplement," the "2006-HI5 Prospectus Supplement," and the "2007-HI1 Prospectus Supplement"), each touting the respective Policies and the triple-

[3] The Indenture and the Servicing Agreement for the 2006-HI2 Transaction were each executed on May 25, 2006; the HLPA was executed on May 1, 2006. The Indenture and the Servicing Agreement for the 2006-HI3 Transaction were each executed on July 21, 2006; the HLPA was executed on July 1, 2006. The Indenture and the Servicing Agreement for the 2006-HI4 Transaction were each executed on September 28, 2006; the HLPA was executed on September 1, 2006. The Indenture and the Servicing Agreement for the 2006-HI5 Transaction were each executed on December 28, 2006; the HLPA was executed on December 1, 2006. The Indenture and the Servicing Agreement for the 2007-HI1 Transaction were each executed on March 30, 2007; the HLPA was executed on March 1, 2007.

A initial rating of the respective HI Notes made possible by those Policies.[4] The "Offering Documents" for each transaction consist of the related Prospectus and Prospectus Supplement, together with any related preliminary Offering Documents, as further supplemented by any subsequent amendment or supplement thereto, and any other related Offering Documents that make reference to a Policy.

92. Upon the closing of each HI Transaction, Ally Securities—an Ally Financial subsidiary—in its capacity as an underwriter of each of the HI Transactions, sold to investors the related HI Notes, and FGIC, for its part, issued the related Policy in accordance with the terms of the related I&I Agreement.

D. RFC Fraudulently Induces FGIC to Insure the 2006-HI4, 2006-HI5, and 2007-HI1 Notes with Substantial Assistance from Ally Financial

(1) RFC's Fraudulent Inducement of FGIC

93. FGIC's participation in the HI Transactions was an essential component of the HI Transactions and enhanced RFC's ability to market the securitizations effectively. The Policies allowed RFC to sell the HI Notes with an initial triple-A credit rating, making them more attractive to a broader pool of potential investors.

94. In order to induce FGIC to write financial guaranty insurance for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, RFC provided to FGIC, directly or indirectly, a variety of information.

---

[4] The 2006-HI2 Prospectus is dated as of May 17, 2006; the 2006-HI3 Prospectus is dated as of July 19, 2006; the 2006-HI4 Prospectus is dated as of September 25, 2006; the 2006-HI5 Prospectus is dated as of December 20, 2006; and the 2007-HI1 Prospectus is dated as of March 27, 2007. The 2006-HI2 Prospectus Supplement is dated as of May 24, 2006; the 2006-HI3 Prospectus Supplement is dated as of July 20, 2006; the 2006-HI4 Prospectus Supplement is dated as of September 26, 2006; the 2006-HI5 Prospectus Supplement is dated as of December 15, 2006; and the 2007-HI1 Prospectus Supplement is dated as of March 21, 2007.

95. First and foremost, RFC provided to FGIC initial and final Prospectus Supplements, which summarized, among other material information, the credit quality and characteristics of the Mortgage Loans, and RFC's loan underwriting guidelines.

96. Second, RFC provided a document (generally referred to as a "loan tape" or "magnetic tape") detailing material characteristics of individual borrowers and loans expected to be included in each HI Transaction, together with representations regarding material statistics about the loan pool as a whole.

97. Third, for each Transaction, RFC provided to FGIC credit ratings for the HI Notes determined without considering the effect of the relevant Policy. These ratings, which RFC procured from the credit rating agencies, are known as "shadow ratings."

98. Fourth, as discussed in detail below, RFC provided representations, warranties, and affirmative covenants in the Operative Documents and the I&I Agreements for each Transaction regarding the related Mortgage Loans specifically and the related loan pool generally.

99. ***Prospectus Supplement and Other Operative Documents.*** In determining whether to insure the HI Notes, FGIC relied in part upon representations and warranties regarding RFC's loan underwriting standards made by RFC in the respective Prospectuses and Prospectus Supplements. For the 2006-HI4 Transaction, a Preliminary 2006-HI4 Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about September 22, 2006 in an email sent by Jacob Sheehan on behalf of RFC. The 2006-HI4 Prospectus, as supplemented by the 2006-HI4 Prospectus Supplement, was filed with the SEC and became effective on September 28, 2006. The Final 2006-HI4 Prospectus Supplement was transmitted to,

among others, Dana Skelton of FGIC, on or about September 27, 2006, in an email sent by Jacob Sheehan on behalf of RFC.

100. For the 2006-HI5 Transaction, a Preliminary 2006-HI5 Prospectus Supplement was transmitted to, among others, Monica Selden of FGIC, on or about December 15, 2006 in an email sent by Andrew D. Hollenbeck on behalf of RFC. The 2006-HI5 Prospectus, as supplemented by the 2006-HI5 Prospectus Supplement, was filed with the SEC and became effective on December 20, 2006. The Final 2006-HI5 Prospectus Supplement was transmitted to, among others, Monica Selden of FGIC, on or about December 20, 2006, in an email sent by Andrew D. Hollenbeck on behalf of RFC.

101. For the 2007-HI1 Transaction, a Preliminary 2007-HI1 Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about March 22, 2007 in an email sent by Andy D. Hollenbeck on behalf of RFC. The 2007-HI1 Prospectus, as supplemented by the 2007-HI1 Prospectus Supplement, was filed with the SEC and became effective on March 30, 2007. The Final 2007-HI1 Prospectus Supplement was transmitted to, among others, Dana Skelton of FGIC, on or about March 28, 2007, in an email sent by Susannah L. Schmid on behalf of RFC.

102. Each Prospectus Supplement sets forth generally, and among other information, the following important characteristics of the Mortgage Loan pool: the ranges of and weighted average FICO scores, the ranges of and weighted average CLTV ratios, the ranges of and weighted average outstanding principal balances of the loans, the DTI ratios of the borrowers, the geographic distribution of the loans, and the occupancy status of the borrowers (i.e., whether the property securing a mortgage is: (i) the borrower's primary residence; (ii) a second home; or

(iii) an investment property). 2006-HI4 Prospectus Supplement at II-1–II-9; 2006-HI5 Prospectus Supplement at II-1–II-9; 2007-HI1 Prospectus Supplement at II-1–II-9.

103. Each Prospectus Supplement expressly states: "[The] underwriting standards relating to the home loans generally will conform to those published in [RFC's] client guide, and the provisions of the guide applicable to the home equity 125 loan program." 2006-HI4 Prospectus Supplement at S-34; 2006-HI5 Prospectus Supplement at S-34; 2007-HI1 Prospectus Supplement at S-33.

104. RFC publishes its loan underwriting standards in a document the Prospectuses refer to as "Residential Funding Company, LLC's Client Guide," which is modified from time to time (the "Client Guide"). In general, the Client Guide specifies documentation requirements, and substantive criteria for key credit-related characteristics, that borrowers must satisfy in order to qualify for a particular mortgage loan or line of credit. Depending upon the particular type of loan or line of credit, these requirements and criteria may include asset verification, income verification, employment verification, bank statements, payment histories, and/or evidence of closing funds, among other things. The Client Guide also includes substantive criteria for eligibility, addressing material characteristics of a proposed loan, such as DTI ratios, LTV and CLTV ratios, occupancy status, and the borrower's Residual Income.

105. RFC represented that, in all instances, the Mortgage Loans had been originated pursuant to maximum monthly DTI and CLTV ratios, which typically did not exceed 55% and 125% respectively. *See* 2006-HI4 Prospectus Supplement at II-2, II-7; 2006-HI5 Prospectus Supplement at II-2, II-7; 2007-HI1 Prospectus Supplement at II-2, II-7.

106. RFC also represented that, with respect to occupancy status, 99.96% of the aggregate principal balance of the 2006-HI2 Mortgage Loans, 99.98% of the 2006-HI3 Mortgage

Loans, 98.77% of the 2006-HI4 Mortgage Loans, 99.67% of the 2006-HI5 Mortgage Loans, and 99.40% of the 2007-HI1 Mortgage Loans would be secured by the borrower's primary residence. *See* 2006-HI2 Prospectus Supplement at II-11; 2006-HI3 Prospectus Supplement at II-11; 2006-HI4 Prospectus Supplement at II-9; 2006-HI5 Prospectus Supplement at II-9; 2007-HI1 Prospectus Supplement at II-9.

107. ***Loan Tapes.*** RFC sent via email loan tapes to FGIC for each of the Transactions. The 2006-HI4 Transaction preliminary loan tape was sent by RFC to FGIC on or about September 13, 2006. The 2006-HI5 Transaction preliminary loan tape was sent by RFC to FGIC on or about December 5, 2006. The 2007-HI1 Transaction preliminary loan tape was sent by RFC to FGIC on or about March 13, 2007. These loan tapes set forth, for each loan in the related pool, key characteristics such as the borrower's FICO score, Residual Income, DTI ratio, and the LTV and CLTV ratios for the loan. RFC also disclosed in the Prospectus Supplement, with respect to the related pool as a whole, aggregate characteristics relevant to the assessment of the credit risk of the pool, including FICO scores, Residual Income, DTI ratios, and LTV and CLTV ratios.

108. ***Shadow Rating Letters.*** RFC, on information and belief, provided Moody's and S&P with, at a minimum, the same mortgage loan tape that it also provided to FGIC. As requested by RFC, Moody's—and, upon information and belief, S&P—provided the shadow ratings to FGIC on or about the closing date of each Transaction. In its letter to FGIC describing the shadow rating for each HI Transaction, Moody's noted that it reviewed the documentation provided by RFC and that the relevant rating was "based primarily on the credit quality of the loans backing the transaction." Similarly, upon information and belief, in its letters to FGIC, S&P noted that it too relied on the information provided to it by RFC and that the shadow ratings

relied on the issuer for the accuracy and completeness of the information submitted in connection with S&P's private credit assessment. Based on the information supplied by RFC, Moody's and S&P assessed the credit quality of the loan pool and assigned shadow ratings to the 2006-HI4, 2006-HI5, and 2007-HI1 Notes as set forth in the table below.

	Moody's	S&P
2006-HI4 Notes	Baa3	BBB-
2006-HI5 Notes	Baa2	BBB
2007-HI1 Notes	Baa2	BBB

109. These shadow ratings met FGIC's minimum requirements. FGIC required these shadow ratings as an essential condition to its willingness to participate in and issue Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions.

(2) RFC's Fraudulent Inducement of FGIC Is Carried Out with Substantial Assistance from Ally Financial

110. Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to participate in the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions and, ultimately, issue Policies for these three Transactions. Ally Financial knew that the Mortgage Loans underlying the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions were of a substantially poorer quality than was represented to FGIC and other participants in the these three Transactions, including investors. Ally Financial further knew that the 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loans were not underwritten to the standards represented in each Transaction's Offering Documents and warranted in each Transaction's Operative Documents. Moreover, on information and belief, as a result of its dominance over ResCap and its other

subsidiaries. Ally Financial knew that the representations and warranties RFC made to FGIC prior to and at the closing the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, upon which FGIC reasonably relied, were false.

111. Ally Financial, at the direction of its board of directors, took a number of actions in 2005 to finance, support, and engender investor confidence in its mortgage securitization business, which was carried out by its subsidiaries. Ally Financial substantially restructured its subsidiaries in 2005. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

112. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

113. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries."

114. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries were undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

115. Ally Financial's corporate restructuring also allowed RFC to explicitly represent and warrant to FGIC in the I&I Agreements that RFC "is solvent, and will not be rendered insolvent by the Transaction [. . .] [a]fter giving effect to the Transaction, it will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business." 2006-HI4 I&I Agreement § 2.01(m) (emphasis added); 2006-HI5 I&I Agreement § 2.01(m) (emphasis added); 2007-HI1 I&I Agreement § 2.01(m) (emphasis added). This statement—on which FGIC materially relied—could not have been made absent Ally Financial's decision to prop up its subsidiary RFC.

116. Additionally, Ally Financial was aware that the true characteristics of the Mortgage Loans in the HI Transactions—and other securitization transactions—were far worse than was represented to FGIC and were not underwritten to the standards that were represented and warranted to FGIC. This is true in that Ally Financial's subsidiaries were, in many cases, the acquirers, sellers, and servicers of those very loans. Indeed, the driving factor in the separation of Ally Financial from General Motors Corporation ("GM") and the creation, in particular, of ResCap, was to create an entity, the sole focus of which was the home mortgage business.

117. Moreover, as a result of its domination and control over ResCap and RFC, as well as the shared officers and directors among and between Ally Financial and its subsidiaries, Ally Financial was aware of RFC's representations and warranties to FGIC—and that they were untrue when stated. For example, Eric A. Feldstein was Ally Financial's CEO and Chairman of its board of directors and also served as Chairman of ResCap's board of directors. Furthermore, Sanjiv Khattri has served as Executive Vice President and CFO of Ally Financial, while also serving as a director and CFO of ResCap. Numerous other individuals served as Directors and Officers of both Ally Financial and ResCap, with many serving in roles directly related to the

mortgage operations of both companies. ResCap and its own subsidiaries, including RFC, shared numerous directors and senior management as well.

118. As a result of the overlapping personnel, intertwined business operations, and the free flow of information among Ally Financial, ResCap, and RFC, it is more than reasonable to conclude that information regarding the representations and warranties being made to FGIC by RFC was shared among and between RFC and its parent ResCap, as well as ResCap and its parent Ally Financial. On information and belief, Ally Financial employees received drafts, final versions, and communications concerning the Operative and Offering Documents.

119. David C. Walker, another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries, joined Ally Financial in 1985 and also served as Vice President of GMAC Group and CFO of GMAC Mortgage Group. Walker has also served as a director at ResCap, GMACM, RFC, HomeComings, and RFMSII, among other ResCap subsidiaries. In the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, Walker, acting as a Director of RFC and RFMSII, was a signatory to both RFC's and RFMSII's "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors," which were included in the closing documents of these three Transactions.

120. Ally Financial, by (1) representing that its mortgage loan practices were sound and that its securitization transactions were supported by mortgage loans that met the criteria to which they were purportedly underwritten, (2) providing financial, managerial, and strategic assistance to its subsidiaries, and (3) modifying its corporate structure to control and direct its subsidiaries, provided substantial assistance to RFC in fraudulently inducing FGIC to participate in the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions and issue Policies for these three Transactions. Further, the issuance of the Policies, which made the 2006-HI4, 2006-HI5, and

2007-HI1 Transactions possible, inured to the significant financial benefit of Ally Financial and its subsidiaries.

E. RFC's Representations, Warranties, and Affirmative Covenants

121. In connection with the HI Transactions, RFC, at the direction of Ally Financial, either directly or indirectly through ResCap, gave numerous representations, warranties, and affirmative covenants to FGIC. These representations and warranties were material and concerned, among other things, the way the loans were selected and evaluated, the characteristics of, and the underwriting standards used for, the Mortgage Loans, and the accuracy of the information supplied to FGIC. RFC also promised to provide timely Mortgage Loan file information and to provide FGIC with a variety of information, including access to RFC's books and records and to discuss the affairs, finances, and accounts of RFC with RFC's Servicing Officer and, under some circumstances, RFC's accountants.

122. RFC's representation that the information supplied to FGIC was not materially inaccurate or misleading, among others, induced FGIC to enter into each HI Transaction and to issue each Policy on the agreed terms. Further, the I&I Agreements' incorporation and restatement of the representations and warranties in the Operative Documents was intended to allow FGIC to rely upon each and every one of the representations and warranties that RFC made in connection with the relevant HI Transaction.

123. FGIC, for its part, reasonably relied on the information available to it regarding the underlying mortgage loans and the representations and warranties provided by RFC. Since FGIC had neither the right nor duty under the Operative Documents, nor the practical ability, to review the thousands of underlying Mortgage Loan files, RFC knew that FGIC had no choice but to rely on RFC's representations regarding the underlying loans in determining whether to issue

the Policies. Further, FGIC had no reason to believe that those representations were not true and accurate.

124. RFC included 25,219 individual Mortgage Loans in the HI Trusts collectively. Typically, each Mortgage Loan has its own voluminous file containing, among other items, mortgage applications, credit reports, income and employment verifications, the lender's internal documentation, and other forms of documentation necessary to support underwriting decisions. Unlike RFC, FGIC was under no contractual duty whatsoever to review the Mortgage Loans. Instead, FGIC, as contemplated by the many representations, warranties, and affirmative covenants by RFC regarding its evaluation practices, and the credit quality of the Mortgage Loans, reasonably relied on the presumed fact that truthful and accurate information had been provided and that it would not face additional, hidden risk by virtue of material omissions or positive misrepresentations having been made.

125. In each instance, based on the information received by FGIC and the representations and warranties given by RFC, FGIC entered into the respective I&I Agreements and agreed to issue the relevant Policy to the Indenture Trustee for the benefit of the holders of the respective HI Notes. In return for doing so, in each case, FGIC received a modest annual premium, based on a small, fixed percentage of the aggregate principal balance of the related HI Notes, commensurate with the risk FGIC thought it was taking. Specifically, FGIC received a small percentage of the aggregate balance of the HI Notes, ranging from 0.28% to 0.30%, for serving as insurer, a figure commensurate with the risk that FGIC believed it was accepting, based on the representations, warranties, and affirmative covenants provided by RFC.

126. In each case, RFC's information, representations, and warranties were materially false when disclosed and/or provided by RFC. RFC knew that this information, and its

representations and warranties, in each instance, were materially false when made. RFC also knew that, with respect to each HI Transaction individually, this information and the representations and warranties were essential to FGIC's decision in each instance to issue the related Policy. Indeed, RFC intentionally made these material misrepresentations to induce FGIC to enter into the I&I Agreements and issue the Policies. The issuance by FGIC of the Policies—induced by RFC's fraudulent misrepresentations and substantial assistance of Ally Financial—made the HI Notes eligible to receive an initial triple-A credit rating, thus greatly improving their marketability to potential investors.

(1) Representations, Warranties, and Affirmative Covenants Relating to the Operative and Offering Documents

127. In each of the HI Transactions, under Section 2.01 of each I&I Agreement, RFC made the following representations and warranties, among others:

- *Accuracy of Information.* "**None of the Operative Documents, nor any other material information relating to the [Mortgage Loans]**, the operations of RFC . . . or the financial condition of RFC . . . furnished to [FGIC] . . . by RFC . . . including the Offering Documents . . . **contains any statement of a material fact which was untrue or misleading in any material respect when made**. [RFC] has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change. Since the furnishing of the Documents, there has been no change nor any development or event involving a prospective change known to RFC . . . that would render any of the Documents untrue or misleading in any material respect."

- *Compliance with Securities Laws.* "The offering and sale of the Notes complies in all material respects with all requirements of law, including the registration requirements of the Securities Act and any other applicable securities laws. **The Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading**."

- *Operative Documents.* "**Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects**."

- *Solvency; Fraudulent Conveyance.* "[RFC] is solvent, and will not be rendered insolvent by the Transaction . . . . **[RFC] will not be left with an unreasonably small amount of capital with which to engage in the ordinary course of its business**. [RFC] does not intend to incur, and does not believe that it has incurred, debts beyond its ability to pay as they mature . . . . [RFC] is not entering into the Operative Documents, or transferring any of its assets in connection with the Transaction, with any intent to hinder, delay or defraud any of its creditors."

I&I Agreements § 2.01 (emphasis added).

128. *First*, in each I&I Agreement, RFC represented and warranted that "[n]one of the Operative Documents, nor any other material information relating to the [Mortgage Loans], the operations of RFC . . . or the financial condition of RFC . . . including the Offering Documents . . . contains any statement of a material fact which was untrue or misleading in any material respect when made." 2006-HI2 I&I Agreement § 2.01(j); 2006-HI3 I&I Agreement § 2.01(j); 2006-HI4 I&I Agreement § 2.01(j); 2006-HI5 I&I Agreement § 2.01(j); 2007-HI1 I&I Agreement § 2.01(j). Through these Operative and Offering Documents, as detailed above, RFC communicated several material facts about the characteristics of the Mortgage Loans.

129. *Second*, in each I&I Agreement, RFC also separately represented and warranted that "[t]he Offering Documents do not contain any untrue statement of a material fact and do not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading . . . ." 2006-HI2 I&I Agreement § 2.01(k); 2006-HI3 I&I Agreement § 2.01(k); 2006-HI4 I&I Agreement § 2.01(k); 2006-HI5 I&I Agreement § 2.01(k); 2007-HI1 I&I Agreement § 2.01(k). As discussed above, in each Prospectus Supplement, RFC represented that the Mortgage Loans sold to the HI Trusts had been underwritten in conformity with RFC's underwriting standards and, specifically, those of the "home equity 125 loan program." *See* 2006-HI2 Prospectus Supplement at S-31; 2006-HI3

Prospectus Supplement at S-33; 2006-HI4 Prospectus Supplement at S-34; 2006-HI5 Prospectus Supplement at S-34; 2007-HI1 Prospectus Supplement at S-33.

130. *Third*, the I&I Agreements incorporated by reference, for the benefit of FGIC, the representations and warranties contained in the related Operative Documents: "Each of the representations and warranties of RFC . . . contained in the applicable Operative Documents and the Underwriting Agreement is true and correct in all material respects . . . ." 2006-HI2 I&I Agreement § 2.01(l); 2006-HI3 I&I Agreement § 2.01(l); 2006-HI4 I&I Agreement § 2.01(l); 2006-HI5 I&I Agreement § 2.01(l); 2007-HI1 I&I Agreement § 2.01(l). The incorporation by reference of the Operative Documents into each I&I Agreement was intended to allow FGIC to rely on any representation and warranty that RFC made to other entities, such as investors or the Indenture Trustee, in connection with the relevant HI Transaction. Indeed, each I&I Agreement expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents. 2006-HI2 I&I Agreement § 2.02(k); 2006-HI3 I&I Agreement § 2.02(k); 2006-HI4 I&I Agreement § 2.02(k); 2006-HI5 I&I Agreement § 2.02(k); 2007-HI1 I&I Agreement § 2.02(k).

131. *Fourth*, RFC also provided information to FGIC concerning the Mortgage Loans in each of the Transactions. *See* 2006-HI2 I&I Agreement § 2.02(c)(iii); 2006-HI3 I&I Agreement § 2.02(c)(iii); 2006-HI4 I&I Agreement § 2.02(c)(iii); 2006-HI5 I&I Agreement § 2.02(c)(iii); 2007-HI1 I&I Agreement § 2.02(c)(iii). This information included schedules (or "loan tapes") that set forth statistics about the loan pool. The schedules purported to describe key characteristics relevant to the assessment of risk, including DTI and CLTV ratios, occupancy status, and FICO scores. *See* 2006-HI2 Indenture, Appendix A; 2006-HI3 Indenture, Appendix A; 2006-HI4 Indenture, Appendix A; 2006-HI5 Indenture, Appendix A; 2007-HI1 Indenture,

Appendix A. On information and belief, the loan tape FGIC received at the closing of each Transaction contains the same information as is contained in the schedule referenced in the relevant HI Purchase Agreement. In turn, in each HI Purchase Agreement, RFC represented that all the information in those schedules was true and correct in all material respects as of the date on which the information was furnished. 2006-HI2 HLPA § 3.1(b)(i); 2006-HI3 HLPA § 3.1(b)(i); 2006-HI4 HLPA § 3.1(b)(i); 2006-HI5 HLPA § 3.1(b)(i); 2007-HI1 HLPA § 3.1(b)(i).

132. As a result of incorporating into each I&I Agreement the representations and warranties in the relevant Operative Documents, RFC incorporated representations and warranties regarding the underwriting of the Mortgage Loans included in each Transaction. These representations and warranties set forth the standards governing each Mortgage Loan, including, significantly, the representation that each Mortgage Loan had been underwritten in compliance with RFC's underwriting guidelines.

133. In particular, in the HI Purchase Agreements, RFC represents and warrants that:

- **Information in Mortgage Loan Schedule**. "The information set forth in the [Mortgage Loan] Schedule with respect to each [Mortgage Loan] is true and correct in all material respects as of the date or dates respecting which such information is furnished." 2006-HI2 HLPA § 3.1(b)(i); 2006-HI3 HLPA § 3.1(b)(i); 2006-HI4 HLPA § 3.1(b)(i); 2006-HI5 HLPA § 3.1(b)(i); 2007-HI1 HLPA § 3.1(b)(i).

- **No Material Breach or Default**. "There is no material default, breach, violation or event of acceleration existing under the terms of any Mortgage Note or Mortgage and no event which, with notice and expiration of any grace or cure period, would constitute a material default, breach, violation or event of acceleration under the terms of any Mortgage Note or Mortgage, and no such material default, breach, violation or event acceleration has been waived by [RFC] or by any other entity involved in originating or servicing a [Mortgage Loan]." 2006-HI2 HLPA § 3.1(b)(xxix); 2006-HI3 HLPA § 3.1(b)(xxix); 2006-HI4 HLPA § 3.1(b)(xxix); 2006-HI5 HLPA § 3.1(b)(xxix); 2007-HI1 HLPA § 3.1(b)(xxix).

- **Delinquent Loans**. "As of the Cut-off Date, none of the [Mortgage Loans] were 30 or more days delinquent." 2006-HI2 HLPA § 3.1(b)(viii); 2006-HI3 HLPA §

3.1(b)(viii); 2006-HI4 HLPA § 3.1(b)(viii); 2006-HI5 HLPA § 3.1(b)(viii); 2007-HI1 HLPA § 3.1(b)(viii).

- **CLTV**. "Approximately [96.2% of the 2006-HI2 Mortgage Loans, 97.6% of the 2006-HI3 Mortgage Loans, 86.12% of the 2006-HI4 Mortgage Loans, 86.54% of the 2006-HI5 Mortgage Loans, and 93.2% of the 2007-HI1 Mortgage Loans] by Cut-Off Date Loan Balance, had a Combined Loan-to-Value Ratio in excess of 100%." 2006-HI2 HLPA § 3.1(b)(xiv); 2006-HI3 HLPA § 3.1(b)(xiv); 2006-HI4 HLPA § 3.1(b)(xiv); 2006-HI5 HLPA § 3.1(b)(xiv); 2007-HI1 HLPA § 3.1(b)(xiv).

- **Custodial File**. "For each [Mortgage Loan], the related [Custodial or Mortgage] File contains each of the documents and instruments specified to be included therein." 2006-HI2 HLPA § 3.1(b)(ix); 2006-HI3 HLPA § 3.1(b)(ix); 2006-HI4 HLPA § 3.1(b)(ix); 2006-HI5 HLPA § 3.1(ix); 2007-HI1 HLPA § 3.1(b)(ix).

134. Moreover, in each I&I Agreement—which expressly identifies FGIC as a third-party beneficiary with respect to the related Operative Documents—RFC specifically covenants that it will comply in all material respects with the terms and conditions of and perform its obligations under the relevant Operative Documents. *See* 2006-HI2 I&I Agreement § 2.02(a),(k); 2006-HI3 I&I Agreement § 2.02(a),(k); 2006-HI4 I&I Agreement § 2.02(a),(k); 2006-HI5 I&I Agreement § 2.02(a),(k); 2007-HI1 I&I Agreement § 2.02(a),(k).

(2) Representations, Warranties, and Affirmative Covenants Regarding Access to Information and Servicing

135. The I&I Agreements incorporate the representations and warranties that RFC made in the Servicing Agreement in its capacity as Servicer. *See* 2006-HI2 I&I Agreement § 2.02(l); 2006-HI3 I&I Agreement § 2.02(l); 2006-HI4 I&I Agreement § 2.02(l); 2006-HI5 I&I Agreement § 2.02(l); 2007-HI1 I&I Agreement § 2.02(l). In the Servicing Agreements, RFC covenanted, represented, and warranted that, so long as it acted as Master Servicer, it would service the Mortgage Loans following such procedures as it would employ in its good faith business judgment and which are normal and usual in its general mortgage servicing activities. *See* 2006-HI2 Servicing Agreement § 3.01(a); 2006-HI3 Servicing Agreement § 3.01(a); 2006-

HI4 Servicing Agreement § 3.01(a); 2006-HI5 Servicing Agreement § 3.01(a); 2007-HI1 Servicing Agreement § 3.01(a).

136. The Servicing Agreements provide, under certain circumstances, for the replacement of RFC as Master Servicer with a successor servicer. *See, e.g.*, 2006-HI2 Servicing Agreement § 7.02; 2006-HI3 Servicing Agreement § 7.02; 2006-HI4 Servicing Agreement § 7.02; 2006-HI5 Servicing Agreement § 7.02; 2007-HI1 Servicing Agreement § 7.02. The Servicing Agreements further provide that: "Any successor . . . to the Master Servicer as servicer shall during the term of its service as servicer (i) continue to service and administer the [Mortgage Loans] for the benefit of the Securityholders . . . and (iii) be bound by the terms of the Insurance Agreement." *See* 2006-HI2 Servicing Agreement § 7.02(b); 2006-HI3 Servicing Agreement § 7.02(b); 2006-HI4 Servicing Agreement § 7.02(b); 2006-HI5 Servicing Agreement § 7.02(b); 2007-HI1 Servicing Agreement § 7.02(b).]

137. Thus, according to the plain language of the Servicing Agreements, insofar as RFC is not the permanent Master Servicer of the Transactions but rather can be replaced in that capacity, and the obligations of the Master Servicer are undertaken for the benefit, *inter alia*, of the Securityholders and FGIC, information and documents regarding the Mortgage Loans are not the property of or otherwise owned by RFC. Rather, such files are to be held by the servicer of each Transaction—whether that party be RFC or a third-party successor servicer. FGIC is an express third-party beneficiary of the Servicing Agreements. See 2006-HI2 Servicing Agreement § 8.05; 2006-HI3 Servicing Agreement § 8.05; 2006-HI4 Servicing Agreement § 8.05; 2006-HI5 Servicing Agreement § 8.05; 2007-HI1 Servicing Agreement § 8.05.

138. In addition to RFC's contractual obligation to FGIC to service the Mortgage Loans in compliance with the Servicing Agreements, RFC also agreed to provide FGIC with

access to the underlying Mortgage Loans and servicing notes, and, as Seller, to procure custodial interim certifications stating that all mortgage files were complete and properly transferred into the appropriate HI Trust ("Interim Certification"). Specifically, each of the I&I Agreements provides FGIC, in sum and substance, with the following access to information rights:

- *Other Information.* RFC shall furnish to FGIC, promptly upon request, such data as FGIC may reasonably request relating to the Mortgage Loans, the servicing of the Mortgage Loans, the Transaction, or the ability of RFC to perform its obligations under the Operative Documents. *See* 2006-HI2 I&I Agreement § 2.02(c)(v); 2006-HI3 I&I Agreement § 2.02(c)(v); 2006-HI4 I&I Agreement § 2.02(c)(v); 2006-HI5 I&I Agreement § 2.02(c)(v); 2007-HI1 I&I Agreement § 2.02(c)(v).

- *Access to Records; Discussions with Officers and Accountants.* On an annual basis, or at any time when a Shortfall Event/Materially Adverse Change or an Event of Default shall have occurred and be continuing, upon the reasonable request of FGIC, RFC will permit FGIC or its authorized agents to inspect the books and records of RFC, discuss the affairs, finances and accounts of RFC as they relate to the Mortgage Loans, the Transaction, or the ability of RFC to perform its obligations under the Operative Documents with a Servicing Officer. If FGIC reasonably believes that a Material Adverse Change may have occurred and with RFC's consent, which consent shall not be unreasonably withheld or delayed, FGIC shall have the right to discuss the affairs, finances and accounts of RFC with RFC's independent accountants. In addition, if requested by FGIC, on an annual basis, or otherwise when reasonably requested by FGIC, RFC will cause the Custodian to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement, with an exceptions list attached thereto, to enable FGIC to track the progress of recording of Mortgages and Assignments with respect to the Mortgage Loans. *See* 2006-HI2 I&I Agreement § 2.02(e); 2006-HI3 I&I Agreement § 2.02(e); 2006-HI4 I&I Agreement § 2.02(e); 2006-HI5 I&I Agreement § 2.02(e); 2007-HI1 I&I Agreement § 2.02(e).

- *Due Diligence.* If in FGIC's reasonable judgment circumstances so warrant, based on the performance of the Transaction, FGIC shall have the right, so long as the Notes remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans, reappraisals of Mortgaged Properties and reviews of servicing practices, at FGIC's expense and in a reasonable manner convenient to both RFC and FGIC. This due diligence right is in addition to the access provided and the other rights provided for in Section 2.02(e) of this Insurance Agreement. *See* 2006-HI2 I&I Agreement § 2.02(m); 2006-HI3 I&I Agreement § 2.02(m); 2006-HI4 I&I Agreement § 2.02(m); 2006-HI5 I&I Agreement § 2.02(m); 2007-HI1 I&I Agreement § 2.02(m).

- *Servicing of Mortgage Loans.* All Mortgage Loans will be serviced in all material respects in compliance with the Servicing Agreement. *See* 2006-HI2 I&I Agreement § 2.02(l); 2006-HI3 I&I Agreement § 2.02(l); 2006-HI4 I&I Agreement § 2.02(l); 2006-HI5 I&I Agreement § 2.02(l); 2007-HI1 I&I Agreement § 2.02(l).

F. RFC's Breaches of Its Representations, Warranties, and Affirmative Covenants

139. As discussed above, in relation to the HI Transactions, FGIC relied on material representations and warranties made by RFC regarding the manner in which the Mortgage Loans were selected and evaluated, the characteristics of those loans, and the accuracy and completeness of information RFC supplied to FGIC. Based on those representations and warranties, FGIC agreed in each case to issue the related Policy. In fact, as demonstrated by the extreme levels of delinquencies and losses detailed below, the risk that FGIC ultimately assumed when it issued each Policy was many times greater than the risk it could have reasonably anticipated based on the information disclosed by RFC's representations and warranties. RFC breached its representations and warranties to FGIC, and FGIC has been damaged as a result of those breaches.

140. The HI Transactions have performed poorly, and delinquencies and defaults for Mortgage Loans in each Transaction have been substantial. Indeed, as of January 2012 a total of: (i) 1,400 mortgage loans, representing 27.8% of the loans underlying the 2006-HI2 Transaction, had posted a loss or were significantly delinquent; (ii) 1,149 mortgage loans, representing 26.7% of the loans underlying the 2006-HI3 Transaction, had posted a loss or were significantly delinquent; (iii) 1,650 loans, representing 32.5% of the loans underlying the 2006-HI4 Transaction, had posted a loss or were significantly delinquent; (iv) 1,610 loans, representing 32.4% of the loans underlying the 2006-HI5 Transaction, had posted a loss or were significantly delinquent; and (v) 1,744 loans, representing 34.4% of the loans underlying the 2007-HI1

Transaction, had posted a loss or were significantly delinquent. As discussed above, by making these extensive representations and warranties to FGIC, and thereby inducing FGIC to issue each Policy, RFC assumed and allocated to itself all risk associated with the Mortgage Loans failing to comply with RFC's representations and warranties.

141. The poor performance of the Mortgage Loans has reduced the cash flow to each of the HI Trusts, which has caused and will continue to cause claims to be presented to FGIC under all the Policies to cover these shortfalls. Indeed, as of February 2012 a total of more than $82 million in claims had been presented to FGIC in connection with the HI Transactions. FGIC expects tens of millions of dollars more in claims to be presented to it under the HI Transactions in the future.

(1) RFC's Denial of Loan File Requests

142. As the HI Transactions continued to perform poorly, on December 9, 2010, FGIC wrote to Jeff Blaschko, an RFC/ResCap employee, via e-mail demanding that RFC provide FGIC with 180 Mortgage Loan files relating to the 2006-HI5 Transaction and 175 Mortgage Loan files relating to the 2007-HI1 Transaction. Having received no response to this request, FGIC sent a follow-up e-mail on February 3, 2011 regarding the status of its December 9, 2010 request for files. FGIC's demands for information were received by ResCap, which informed FGIC that ResCap could not respond to the requests until the matter was discussed internally at ResCap and a response was authorized by those with decision-making authority. On information and belief, the request required authorization from officers at Ally Financial, and RFC/ResCap's response was directed by officers at Ally Financial.

143. On February 14, 2011, and again on April 28, 2011, FGIC sent further follow-up letters requesting loan files.

144. In finally responding to FGIC's request for information, RFC refused to provide any loan files or other information relating to current or pre-paid loans ("Performing Loans"). Instead, it only provided FGIC with a portion of the requested loan files, consisting solely of non-performing loans, and chose to conceal the Performing Loan files from FGIC.

145. On January 19, 2012, FGIC sent ResCap a letter requesting 500 loan files relating to the 2006-HI2 Transaction.

146. To date, ResCap has not provided any of the loan files relating to the 2006-HI2 Transaction.

147. Pursuant to the I&I Agreements, FGIC is entitled to reasonable access to the documentation regarding the relevant Mortgage Loans. The relevant I&I Agreements provide that FGIC shall have the right, so long as the HI Notes remain outstanding, to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans. *See* 2006-HI2 I&I Agreement § 2.02(m); 2006-HI5 I&I Agreement § 2.02(m); 2007-HI1 I&I Agreement § 2.02(m). Notably, there is no limitation in any of the I&I Agreements as to the nature of the Mortgage Loan files that are subject to review. Further, the relevant I&I Agreements state that promptly upon request, RFC must provide to FGIC such other data as FGIC may reasonably request relating to the Mortgage Loans. *See* 2006-HI2 I&I Agreement § 2.02(c)(v); 2006-HI5 I&I Agreement § 2.02(c)(v); 2007-HI1 I&I Agreement § 2.02(c)(v). By producing only non-performing Mortgage Loan files, in contravention of the relevant I&I Agreements, RFC has arbitrarily and unreasonably imposed limitations on FGIC's contractual right to reasonable access to Mortgage Loan files in contravention of the Operative Documents.

(2) RFC's Denial of Interim Certification Requests

148. On June 21, 2011, FGIC demanded, pursuant to Section 2.02(e) of the I&I Agreements, that RFC promptly cause the Custodians under the 2006-HI3 Transaction, 2006-

HI4 Transaction, the 2006-HI5 Transaction, and the 2007-HI1 Transaction to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreement for the Transaction, with an exceptions list attached thereto. An Interim Certification would enable FGIC to track the progress of the recording of mortgages and assignments with respect to the related Mortgage Loans.

149. Again on September 30, 2011, FGIC sent to RFC a pending event of default notice letter demanding the Interim Certification for the 2006-HI3 Transaction, noting that it had been over three months since FGIC's initial letter and that RFC had failed to respond. On December 8, 2011, FGIC sent a notice of default to RFC, informing RFC of its failure to perform its obligations under the 2006-HI5 I&I Agreement to provide the Interim Certification.

150. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreement, has failed to respond to these requests.

(3) RFC's Denial of Servicing Notes

151. On December 9, 2010, FGIC demanded, pursuant to Section 2.02(c)(iv) of the 2006-HI5 and the 2007-HI1 I&I Agreements, that RFC furnish or cause to furnish the servicing notes for the 2006-HI5 and 2007-HI1 Mortgage Loans. Similarly, on January 19, 2012, FGIC demanded that RFC furnish or cause to furnish the servicing notes for the 2006-HI2 Mortgage Loans.

152. RFC, without justification or explanation, and in breach of its obligations in the I&I Agreements, has failed to respond to these requests for servicing notes.

(4) RFC's Denial Of FGIC's Access To Books and Records, Servicing Officer, and RFC's Independent Accountants

153. On January 24, 2012, in accordance with its express rights under Sections 2.02(e)(i)-(ii) of the I&I Agreements, FGIC requested for the HI Transactions to (i) inspect the

books and records of RFC; and (ii) discuss the affairs, finances, and accounts of RFC with the Servicing Officer of RFC.

154. To date, RFC has failed to respond to these requests, in violation of the I&I Agreements.

155. Further, on or about May 1, 2010, servicing duties for the 2006-HI3 Transaction were transferred from RFC to a third-party servicer. Similarly, on or about July 1, 2010, servicing duties for the 2006-HI4 Transaction were transferred from RFC to a third-party servicer. As FGIC became aware of increasing numbers of material defects among the 2006-HI3 and 2006-HI4 Mortgage Loans, FGIC sought information regarding the Mortgage Loan files from the successor (and current) servicer of the 2006-HI3 and 2006-HI4 Transactions.

156. FGIC has been made aware that the current servicer of the 2006-HI3 and 2006-HI4 Transactions is unable to provide the information FGIC has sought due to RFC's repeated refusals to provide its successor with certain Mortgage Loan files and other crucial information. RFC's refusal to turn over information in its possession to, and otherwise cooperate with, its successor servicer is a violation of the 2006-HI3 and 2006-HI4 Servicing Agreements that RFC entered into as the then-Master Servicer of the 2006-HI3 and 2006-HI4 Transactions and to which FGIC is a third-party beneficiary, as well as a breach by RFC of its obligations under the I&I Agreements to comply with the terms of the Operative Documents.

157. Additionally, RFC has an independent obligation under the I&I Agreements to provide FGIC such information as FGIC may reasonably request. *See* 2006-HI3 I&I Agreement § 2.02(c)(v); 2006-HI4 I&I Agreement § 2.02(c)(v). As such, through its obstinate refusal to provide either FGIC or the successor servicer with material information—admittedly within its possession—regarding the Mortgage Loans, RFC has further breached its obligations to FGIC.

158. Moreover, on information and belief, the Mortgage Loan information that RFC refuses to provide either to FGIC or the successor servicer will evidence further material breaches of representations and warranties made by RFC. Accordingly, FGIC reserves its rights to assert additional causes of action regarding RFC's breaches of its representations and warranties.

(5) Breaches Uncovered In Loan File Reviews

159. When FGIC became concerned about the high delinquencies and default rates in the HI Transactions, FGIC requested that RFC provide it with certain Mortgage Loan files in certain loan pools. FGIC selected for review 146 non-performing (i.e., non-current or charged-off) loans that had resulted in a loss to the 2006-HI5 Trust and 150 non-performing loans that had resulted in a loss to the 2007-HI1 Trust. To perform this review, FGIC hired an independent outside consultant with particular skill, experience, and expertise in the review, evaluation, and re-underwriting of mortgage loans.

160. That review revealed that RFC had breached one or more material representations and warranties in 139 of the 146 2006-HI5 Mortgage Loans, or approximately 95% of the loans initially reviewed in connection with the 2006-HI5 Transaction.

161. A small sample of these material breaches and underwriting violations in the 2006-HI5 Transaction are listed below:

- Loan Number 10762296: among other violations, the loan exceeded the maximum allowable loan amount and cash out amount based on the borrower's credit score. Additionally, a non-owner occupied property was not eligible, neither was the Stated Income Documentation Program. Furthermore, no cash asset reserves were verified as required under the guidelines.

- Loan Number 11079761: the loan was originated for the purchase of a primary residence, but evidence showed that the borrower's primary residence was at another address. The borrower stated monthly earnings of $12,000, but earned only $84,419 in W-2 wages in 2006. As a result, the DTI ratio for the loan was

94.17%, well in excess of the maximum allowable DTI ratio of 50% under the guidelines.

- Loan Number 10725746: the loan application did not include an Automated Valuation Model report, indicating a minimum confidence level of 40% from an approved vendor. The loan file was also missing full income documentation for the borrower, the credit report used at the time of loan origination, documentation from the first mortgage lender indicating the lender escrowed the property taxes, and hazard insurance.

162. Similarly, the review revealed that RFC had breached one or more material representations and warranties in 147 of the 150 2007-HI1 Mortgage Loans, or approximately 98% of the loan initially reviewed for that transaction.

163. A small sample of these material breaches and underwriting violations in the 2007-HI1 Transaction are listed below:

- Loan Number 11087987: the loan file was lacking a number of documents: a loan approval, an appraisal, a first mortgage note, the credit report used at origination, complete income documentation for the borrower's employment and disability income, property taxes, the most recent twelve months housing payment history, a homeowner's insurance declaration page, and a flood determination report. All of the missing documentation was required under the relevant underwriting guidelines.

- Loan Number 10791368: the loan closed with a loan amount of $105,000, but under the underwriting guidelines, the maximum allowable loan amount for the borrower, who had a credit score of 655, was $35,000. Also, the maximum allowable DTI ratio under the guidelines for this borrower was 45%, but the loan closed with a DTI ratio of 58.96%. The data tape reported the CLTV ratio for the loan was 115%, but the actual CLTV ratio was 123.17%, which resulted in a breach of the underwriting guidelines.

- Loan Number 11370813: among other violations, the borrower misrepresented his income and employment, which resulted in a DTI ratio of 221.15%. Under the underwriting guidelines, the maximum allowable DTI ratio was 50%.

164. Following this review of the 2006-HI5 and 2007-HI1 Mortgage Loans, FGIC requested that RFC repurchase the non-conforming Mortgage Loans. To date, RFC has failed to repurchase certain of the affected Mortgage Loans in violation of its contractual obligations.

165. As discussed above, in 2010 FGIC requested additional 2006-HI5 and 2007-HI1 Mortgage Loans from RFC that included a random selection of both non-performing and Performing Loans. When RFC finally responded to FGIC's request, RFC improperly refused to provide FGIC with any Mortgage Loan files for the Performing Loans even though such loans had been demanded on several occasions. Thus, when FGIC requested files for the additional 360 2006-HI5 Mortgage Loans, FGIC received only 49 "non-performing" loans to review.

166. Moreover, when FGIC requested files for the additional 175 2007-HI1 Mortgage Loans, FGIC received only 43 "non-performing" loans to review.

167. After receiving the loan files for those additional non-performing 2006-HI5 and 2007-HI1 Mortgage Loans, FGIC evaluated those non-performing Mortgage Loans to determine whether they contained material breaches of the 2006-HI5 and 2007-HI1 Operative Documents necessitating repurchase under the related Operative Documents. The independent consultant's review revealed substantial breaches of the representations and warranties in the I&I Agreements and further indicated that the defective loans comprised 91.3% and 94.6% of the total balance of the 2006-HI5 Mortgage Loans and 2007-HI1 Mortgage Loans, respectively, reviewed by the outside independent consultant.

168. FGIC has also evaluated 134 2006-HI4 Mortgage Loans to determine whether they contained material breaches of the 2006-HI4 Operative Documents necessitating repurchase under the related Operative Documents. The independent consultant's review revealed that 92.3% of the total balance of the 2006-HI4 Mortgage Loans reviewed by the outside independent consultant was comprised of defective loans.

169. A small sample of these material breaches and underwriting violations in the 2006-HI4 Transaction are listed below:

Loan Number 10798883: the borrower's limited assets and credit level should have raised a red flag for the underwriter. The borrower misrepresented his or her income, which resulted in an increase of DTI from 49.99% to 83.06%, well in excess of the guideline maximum.

- Loan Number 10490306: among other violations, the loan file did not contain sufficient documentation to verify the borrower's employment history under the applicable guidelines. The underwriter also failed to obtain credit reports for the borrower or accurately calculate the borrower's income. Also, the borrower failed to disclose all prior debt obligations. A recalculation of the DTI based on a proper calculation of income and the borrower's undisclosed debt increased the DTI from 48.9% to 93.42%.

- Loan Number 10428398: among other violations, the underwriter failed to verify the borrower's housing history and assets. The underwriter also failed to properly document the borrower's income under the applicable guidelines. Recalculating the DTI based on the borrower's verified income results in an increase from 47% which exceeds the maximum permitted at origination to 62.81%, which exceeds the guidelines maximum. The loan was also approved at 100% CLTV, which exceeds the maximum allowable CLTV of 90% under the applicable guidelines.

170. These examples of underwriting violations—but a small smattering of the extensive defects among the Mortgage Loans—evidence significant breaches of the Purchase Agreements and the I&I Agreements.

171. Moreover, on information and belief, RFC is and has long been aware that many of the Mortgage Loans were non-conforming and breached its own representations and warranties. Despite this knowledge, and as noted above, RFC has failed to take steps to repurchase the non-conforming loans or replace them with conforming loans.

(6) Breaches Uncovered Using Loan Pool Data

172. In addition to the loan-level review discussed above, FGIC commissioned an independent consultant—a leading provider of financial, property and consumer information, such as property valuation services using automated property valuation tools—to test the accuracy of RFC's representations and warranties relating to the Mortgage Loans regarding

occupancy status and CLTV ratios. The consultant extracted information and data relating to 14,885 Mortgage Loans.

a. Breaches of Owner-Occupancy Representation and Warranty

173. In each of the HI Transactions, RFC represented that nearly all of the related Mortgage Loans would be secured by the borrower's primary residence. *See* 2006-HI2 Prospectus Supplement at II-11; 2006-HI3 Prospectus Supplement at II-11; 2006-HI4 Prospectus Supplement at II-9; 2006-HI5 Prospectus Supplement at II-9; 2007-HI1 Prospectus Supplement at II-9. Based on the information provided, however, FGIC determined that a significant number of the Mortgage Loans were not secured by the owner's primary residence. For example, based on the information provided, FGIC determined that only 92.6% of the total balance of the 2006-HI5 Mortgage Loans, and only 92.5% of the total balance of the 2007-HI1 Mortgage Loans, were secured by properties that were owner-occupied as a primary residence.

174. Moreover, FGIC has also determined that such non-owner-occupied Mortgage Loans are poor credit risks. For example, the rate of Mortgage Loan non-performance (i.e., loans that, as of January 2012, were delinquent for more than 60 days, in foreclosure, charged-off, or liquidated) for loans that were determined after review not to be secured by owner-occupied property was approximately 47.3% of the total balance for the 2007-HI1 Transaction. The remaining HI Transactions have also suffered elevated non-performance rates due to owner-occupancy misrepresentations. Based on this factor, among others, RFC has materially misrepresented the nature of the respective loan pools for each of the several HI transactions.

175. The Prospectus Supplements for each of the Transactions understated the percentage of Mortgage Loans in their respective pools that were not secured by the owner's primary residence. Those non-owner-occupied Mortgage Loans have defaulted at shockingly high rates, resulting in substantial losses to the respective Trusts and damages to FGIC. As such,

RFC breached its representation and warranty that the information in the Prospectus Supplements did not contain any untrue statements of material fact.

b. Breaches of CLTV Ratio Representation and Warranty

176. Each of the HI Prospectus Supplements also provided information relating to the CLTV ratios of the underlying Mortgage Loans. CLTV information provided in the HI Prospectus Supplements included, among other things, (1) the average weighted CLTV ratio for the Mortgage Loans, and (2) the number and aggregate value of the Mortgage Loans with CLTV ratios in a given percentage band (e.g., the number of Mortgage Loans with CLTV ratios of between 80% and 85%, between 85% and 90%, and so on). *See* 2006-HI2 Prospectus Supplement at II-3; 2006-HI3 Prospectus Supplement at II-3; 2006-HI4 Prospectus Supplement at II-2; 2006-HI5 Prospectus Supplement at II-2; and 2007-HI1 Prospectus Supplement at II-2.

177. In each of the respective Prospective Supplements, RFC represented that the Mortgage Loans were originated with a maximum CLTV ratio of either 125% or 126%. *See* 2006-HI2 Prospectus Supplement at S-5; 2006-HI3 Prospectus Supplement at S-5; 2006-HI4 Prospectus Supplement at S-5; 2006-HI5 Prospectus Supplement at S-5; 2007-HI1 Prospectus Supplement at S-5.

178. Using an industry standard automated valuation model to calculate the value of the underlying property at the time the Mortgage Loan was originated, however, FGIC determined that high percentages of the Mortgage Loans in the loan pools for each of the Transactions actually exceeded those limits.

179. For example, 22.03% of the 2006-HI2 Mortgage Loans—as opposed to none of the loans, as reported in the 2006-HI2 Prospectus Supplement—had an original CLTV ratio above 125%, and 23.25% of the 2007-HI1 Mortgage Loans—as opposed to none of the loans, as reported in the 2007-HI1 Prospectus Supplement—had an original CLTV ratio above 126%.

180. Moreover, FGIC has determined that the rate of Mortgage Loan non-performance (i.e., loans that were delinquent for more than 60 days, in foreclosure, charged-off, or liquidated) in the Transactions for loans where the automated valuation model indicated a CLTV greater than 125% for the 2006-HI2 Transaction and greater than 126% for the other four transactions was over 44.2%. This non-performance rate was over 24% greater than the non-performance rate of those loans whose automated valuation model indicated a CLTV below 125% for the 2006-HI2 Transaction and below 126% for the other four transactions.

181. In addition, RFC represented in each of the Prospectus Supplements that the weighted average CLTV ratio of the Mortgage Loans in each pool at origination would not exceed a stated level. For example, RFC represented in the Prospectus Supplements for the 2006-HI2 Transaction and the 2007-HI1 Transaction that the weighted average CLTV of the Mortgage Loans in those Transactions was 117.82% and 117.32%, respectively. *See* 2006-HI2 Prospectus Supplement at S-5; 2007-HI1 Prospectus Supplement at S-5.

182. FGIC determined, however, that the actual weighted average CLTV ratios of the Mortgage Loans in each of the HI Transactions exceeded the values stated in the related Prospectus Supplements. For example, the actual weighted CLTV ratio of the 2006-HI2 Mortgage Loans at origination was approximately 122.56%, and the actual weighted average CLTV ratio of the 2007-HI1 Mortgage Loans at origination was approximately 122.74%.

183. By including loans in the Trusts that exceeded the stated limits on CLTV, and by assembling loan pools that exceeded the stated weighted average CLTV ratios, in each case as set forth in the Prospectus Supplements, RFC breached its representation and warranty that the information in each of the respective Prospectus Supplements did not contain any untrue statements of material fact.

184. The pervasive and overwhelming defects regarding the Mortgage Loans indicate the clear breach of RFC's contractual representations, warranties, and affirmative covenants relating to, among other things, the characteristics of the Mortgage Loans, including the guidelines to which the Mortgage Loans were underwritten. Specifically, among the various HI Transactions, RFC has breached representations and warranties stating that:

- neither the Operative Documents nor any information related to the Mortgage Loans contain any untrue or misleading statement of material fact;
- the Offering Documents (i.e. the Prospectus and Prospectus Supplement) contain no untrue or misleading statement of material fact;
- each representation and warranty of RFC in the Operative Documents (including each representation and warranty in the HI Purchase Agreements) is true and correct in all material respects;
- the information set forth in the Mortgage Loan Schedule is true and correct in all material respects;
- each Mortgage File contains all required documents and instruments; and
- the Mortgage Loans were underwritten to conform with the standards in RFC's client guide.

185. It is reasonable to conclude—based on what is known by FGIC and as a result of what is being wrongly withheld from FGIC—that many of the thousands of Mortgage Loans held by the HI Trusts at each closing evidenced similar breaches of RFC's representations and warranties.

186. Indeed, based on the information gathered from FGIC's loan file review and the information extracted by FGIC's consultant relating to CLTV ratios and owner-occupancy rates discussed above, FGIC believes that the defect rate across the HI Transactions is likely to be at least 30%.

187. Moreover, the true scope of the material underwriting failures is unknown given RFC's refusal to provide FGIC with pertinent—and contractually required—information. This refusal in itself constitutes a breach of RFC's affirmative covenant to comply with FGIC's reasonable requests regarding access to information concerning the Mortgage Loans.

G. RFC's Fraud

188. The material breaches of RFC's representations and warranties, and the poor credit quality of almost all of the Mortgage Loans, demonstrate the knowing and wanton disregard of the material representations and warranties and affirmative covenants RFC made to FGIC to induce its participation in the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions. The extraordinarily high defect and default rate among the Mortgage Loans demonstrates not merely that RFC breached its representations and warranties as a contractual matter, but that it did not—and never intended to—comply with them, despite representing to FGIC that, if FGIC issued the relevant Policy, RFC would make the representations and warranties set forth in the Operative Documents, and that those representations and warranties would be true. Because RFC refuses to provide all of the requested 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loan files in violation of its contractual obligation to do so, however, the full extent and scope of the fraud has yet to be revealed.

189. All of the Mortgage Loans underlying the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions were acquired by RFC. As such, RFC had the access and ability to evaluate those Mortgage Loan files and to determine if the loans conformed with standards set forth in RFC's home equity 125 loan program and if the loans breached other representations and warranties made by RFC.

190. To induce FGIC to enter into the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, RFC provided FGIC with loan tapes, which contained false and misleading

information regarding, among other things, the CLTV, LTV and DTI ratios, occupancy status, FICO scores, and Residual Income of the borrowers.

191. In addition, RFC made critical misrepresentations to FGIC with respect to the credit rating agencies' assessment of the loans that were to comprise the 2006-HI4, 2006-HI5, and 2007-HI1 Trusts. RFC was well aware that FGIC would not agree to insure the respective HI Notes unless RFC obtained shadow ratings from the rating agencies that satisfied FGIC's minimum requirements. To this end, upon information and belief, RFC provided Moody's and S&P with the same false information regarding the credit quality of the underlying mortgage loans that it also provided to FGIC. Based on this faulty information, Moody's and S&P assigned shadow ratings regarding the credit quality of the 2006-HI4, 2006-HI5, and 2007-HI1 Notes that met FGIC's minimum requirements. In this way, RFC made both direct and indirect misrepresentations to FGIC—first, by providing faulty information to the rating agencies to provide a risk assessment that RFC would pass on to FGIC, and second, by causing shadow ratings of the 2006-HI4, 2006-HI5, and 2007-HI1 Notes to be delivered to FGIC without disclosing to FGIC that those ratings were based on incomplete and inaccurate loan-level data.

192. RFC was well aware that FGIC would rely on the shadow ratings—prepared with information supplied by RFC—as the 2006-HI4, 2006-HI5, and 2007-HI1 I&I Agreements specifically contemplated as a condition to issuance of the Policies that FGIC "shall have received confirmation that the Notes [insured by the Policy] are rated" by S&P and Moody's at a specified minimum level "without regard to the Policy." *See* 2006-HI4 I&I Agreement § 3.01(j); 2006-HI5 I&I Agreement § 3.01(j); 2007-HI1 I&I Agreement § 3.01(j).

193. As noted, the issuance of the Policies enabled the HI Notes to receive a triple-A rating from the rating agencies. Moreover, the receipt of a triple-A rating for the HI Notes,

which depended on the issuance of the Policies, which in turn depended on the shadow ratings formulated using (inaccurate) information supplied by RFC, was a critical component of the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions. As RFC expressly noted in the 2006-HI4, 2006-HI5, and 2007-HI1 Prospectus Supplements: "It is a condition to issuance of the Class A Notes that the Class A Notes be rated not less than "Aaa" by Moody's . . . and "AAA" by Standard & Poor's." 2006-HI4 Prospectus Supplement S-81; 2006-HI5 Prospectus Supplement S-87; 2007-HI1 Prospectus Supplement S-81.

194. Had the information provided to the ratings agencies by RFC been accurate and truthful, Moody's and S&P would almost certainly have assigned very different shadow ratings to the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, and FGIC in turn would not have issued the Policies on the agreed terms, or would have refused to issue the Policies altogether.

195. RFC also made material representations and warranties and affirmative covenants to FGIC, on which FGIC relied, about the characteristics of the 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loans, including the standards and specific underwriting guidelines to which those Mortgage Loans were underwritten.

196. For example, in each Prospectus Supplement (and in each I&I Agreement by incorporation) RFC assured FGIC that the "underwriting standards relating to the [Mortgage Loans] generally will conform to those published in [RFC's] client guide, and the provisions of the guide applicable to the home equity 125 loan program." 2006-HI4 Prospectus Supplement at S-34; 2006-HI5 Prospectus Supplement at S-34; and 2007-HI1 Prospectus Supplement at S-33. As such, RFC represented to FGIC that, in the case of each loan within the pool, an underwriter had made an assessment that the borrower had the ability to repay his or her loan, after receiving and reviewing all applicable employment, credit, and property information.

197. In fact, RFC was well aware at the closing of the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions that those representations were false. It was not until years after the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions closed that RFC admitted that the Mortgage Loans were not underwritten to RFC's underwriting guidelines. In 2010, FGIC sent RFC numerous repurchase requests after reviewing certain Mortgage Loans in the 2006-HI5 and 2007-HI1 Transactions. In those requests, FGIC cited material breaches of the relevant I&I Agreement and Operative Documents, including non-conformity to RFC underwriting guidelines, which rendered certain Mortgage Loans ineligible or non-conforming and required RFC to repurchase those loans. RFC responded to many of FGIC's repurchase requests by claiming that the Mortgage Loans *were* conforming because they were underwritten to the less stringent standards of various unaffiliated originators and not RFC's "home equity 125 loan program."

198. For example, on December 3, 2010, FGIC sent RFC repurchase requests for loan number 10783594 because the loan was non-conforming under the applicable "home equity 125 loan program." In response to FGIC's repurchase request for loan 10783594, RFC asserted that repurchase was not necessary because the originator, M & I Bank, had granted a variance for the particular violation of the "home equity 125 loan program" guidelines.

199. Such admissions demonstrate that RFC did not acquire and evaluate the 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loans under RFC's underwriting guidelines, *i.e.*, under the "home equity 125 loan program," as represented in the Prospectus Supplement. Instead, as RFC implicitly conceded in the rescission letters, these loans were evaluated and acquired under the less demanding underwriting standards of various loan originators. Accordingly, RFC knew that its representations were materially false at the time of the closing or should have known that its representations were materially false because RFC had not, among other things, evaluated and

acquired the 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loans under RFC's "home equity 125 loan program" guidelines.

200. Moreover, the 2006-HI4, 2006-HI5, and 2007-HI1 Purchase Agreements—and, by incorporation, their corresponding I&I Agreements—also contained false and misleading representations about the Mortgage Loans. In particular, for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, RFC misrepresented that, as of the closing: (i) the information set forth on the Mortgage Loan Schedule with respect to each Mortgage Loan was true and correct in all material respects as of the date which such information was furnished; (ii) there was no material default, breach, violation or event of acceleration existing under the terms of any Mortgage Note or Mortgage; (iii) approximately 86.12% of the 2006-HI4 Mortgage Loans, 86.54% of the 2006-HI5 Mortgage Loans, and 93.2% of the 2007-HI1 Mortgage Loans by Cut-Off Date Loan Balance, had a CLTV in excess of 100%, and (iv) as of the Cut-off Date, none of the Mortgage Loans were 30 or more days delinquent. According to the HI Prospectuses, none of the HI Mortgage Loans had a CLTV in excess of 126%.

201. Therefore, at the time of the closing of the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, RFC either (1) knew or should have known that its representations were materially false because RFC had not, among other things, determined if the Mortgage Loans did in fact conform to the standards of the "home equity 125 loan program" contained in the Client Guide, or (2) had reviewed whether the Mortgage Loans were in conformity with the "home equity 125 loan program," had determined that they were not, but nonetheless materially misrepresented to FGIC that each Mortgage Loan conformed to the "home equity 125 loan program" as set forth in the Client Guide.

202. For the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, these representations were essential to FGIC's decision to issue a Policy. In each instance, these representations and warranties were false when stated. RFC, in each case, intentionally made these material misrepresentations to induce FGIC to enter into the relevant I&I Agreement and to issue the relevant Policies. The true information regarding these loans simply could not substantiate RFC's assurances. In short, no amount of RFC promising that the loans met certain standards actually made those promises true.

203. RFC's repeated fraudulent acts have exposed it to investigations by the DOJ and the SEC as well as to a multitude of suits and the potential for more litigation to come.

204. Consistent with this pattern of behavior, RFC defrauded FGIC into issuing the Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, through its knowing misrepresentations.

H. Ally Financial Aids and Abets RFC's Fraud

205. Ally Financial provided substantial assistance to RFC in fraudulently inducing FGIC to issue Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions. As the ultimate parent of an intertwined corporate enterprise, the subsidiaries of which were substantially involved in every aspect of Ally Financial's securitization business, Ally Financial was well aware of the true nature of the Mortgage Loans. Moreover, as discussed above, Ally Financial was aware of the representations and warranties RFC made regarding the nature of RFC's business practices and the quality of the Mortgage Loans and that such representations and warranties were false.

I. RFC's Breach of Obligations as Master Servicer

206. RFC, as Master Servicer, failed in numerous material respects to properly perform its duties to service and administer the Mortgage Loans in accordance with the provisions of the relevant Operative Documents for each of the HI Transactions, including, but not limited to, its obligations to follow proper servicing procedures, and to sufficiently monitor and manage the performance of the subservicer with respect to its duties under each Transaction.

207. RFC took responsibility for the servicing of the Mortgage Loans through its wholly-owned subsidiary HomeComings and its affiliate GMACM, and RFC had certain related contractual obligations under the I&I Agreements and the HI Servicing Agreements with respect to the HI Transactions. Under the I&I Agreements, RFC covenanted that "[a]ll [Mortgage Loans] will be serviced in all material respects in compliance with the [relevant HI Servicing Agreement]." 2006-HI2 I&I Agreement § 2.02(l); 2006-HI3 I&I Agreement § 2.02(l); 2006-HI4 I&I Agreement § 2.02(l); 2006-HI5 I&I Agreement § 2.02(l); 2007-HI1 I&I Agreement § 2.02(l). Under the HI Servicing Agreements, RFC "shall service and administer the [Mortgage Loans] . . . following such procedures as it would employ in its good faith business judgment and which are normal and usual in its general mortgage servicing activities . . . [and] shall at all times remain responsible to . . . [FGIC] for the performance of its duties and obligations hereunder . . . ." 2006-HI2 Servicing Agreement § 3.01(a); 2006-HI3 Servicing Agreement § 3.01(a); 2006-HI4 Servicing Agreement § 3.01(a); 2006-HI5 Servicing Agreement § 3.01(a); 2007-HI1 Servicing Agreement § 3.01(a). As such, on each occasion that HomeComings or GMACM failed to service and administer the Mortgage Loans in conformity with generally accepted servicing practices (including RFC's own servicing guidelines), RFC was liable "to the same extent and under the same terms and conditions as if the Master Servicer alone were servicing and administering the [Mortgage Loans]." 2006-HI2 Servicing Agreement § 3.01(a); 2006-HI3

Servicing Agreement § 3.01(a); 2006-HI4 Servicing Agreement § 3.01(a); 2006-HI5 Servicing Agreement § 3.01(a); 2007-HI1 Servicing Agreement § 3.01(a).

208. During 2007, the servicing operations of GMACM, GMAC-RFC, and HomeComings were integrated into ResCap. Since the time of the integration, on information and belief, HomeComings and GMACM have been deficient in their borrower contact, collections, and loss mitigation standards. An onsite review of the Ally Financial servicing arm's headquarters, including those of HomeComings, GMACM, and RFC, on March 25, 2009 by FGIC and a third party firm, and subsequent analysis revealed, among other things: (i) inadequate call center staffing (staff unable to handle increased incoming and outgoing call volumes); (ii) call center staffing turnover as high as 40% in a single year; (iii) a calling campaign that does not attempt to contact borrowers through other means when HomeComings or GMACM do not have a viable number or the borrower is continuously unresponsive to messages left; (iv) a lack of effort to hire personnel to visit the mortgaged property to discuss loss mitigation strategies with borrowers in default; (v) with respect to second lien loans, a policy of extending largely nonrecoverable advances to delinquent borrowers; and (vi) severely infrequent use of alternative loss mitigation strategies as compared to the industry.

209. ResCap and RFC, on information and belief, have failed to remedy any of the deficient practices in which HomeComings or GMACM have engaged as subservicers.

210. In addition, RFC disclosed to FGIC that it classified loans into one of three categories or "Risk Tiers" under a protocol ("Risk Protocol"). Such an approach was, upon information and belief, part of the further cost-cutting measures implemented under the direction of Ally Financial when all of the servicing operations were integrated.

211. FGIC was damaged by the use of the Risk Protocol following the Ally-directed integration. Under the Risk Protocol, the timing and frequency of calls made with respect to a loan are determined in accordance with the loan's assigned category or Risk Tier. RFC disclosed to FGIC that all of the mortgage loans in FGIC-insured, RFC-serviced transactions (over 90,000 mortgage loans), including all of the Mortgage Loans in the Transactions, were placed in the lowest category of risk. For such mortgage loans, regardless of whether they were (i) secured by second-lien mortgages, (ii) underwritten under less stringent guidelines, or (iii) originated by non-GMAC entities (all of which are factors that require more attentive servicing), delinquent borrowers were called at a later stage of delinquency, and less frequently, than loans in higher risk categories. As the purchaser of the Mortgage Loans, however, RFC clearly knew that the Mortgage Loans, by their very nature, required particularized servicing such as that provided by HomeComings or GMACM before the implementation of the Risk Protocol. The Mortgage Loans were therefore knowingly miscategorized and neglected, and intentionally received much less care than if they had been properly categorized and appropriately serviced. Consequently, the failure by RFC to ensure that the Mortgage Loans were serviced and administered in accordance with "good faith" business practices constitutes a breach of the HI Servicing Agreements and the I&I Agreements. *See* 2006-HI2 Servicing Agreement § 3.01(a); 2006-HI3 Servicing Agreement § 3.01(a); 2006-HI4 Servicing Agreement § 3.01(a); 2006-HI5 Servicing Agreement § 3.01(a); 2007-HI1 Servicing Agreement § 3.01(a); 2006-HI2 I&I Agreement § 2.02(l); 2006-HI3 I&I Agreement § 2.02(l); 2006-HI4 I&I Agreement § 2.02(l); 2006-HI5 I&I Agreement § 2.02(l); 2007-HI1 I&I Agreement § 2.02(l).

212. On July 8, 2009, FGIC requested: (1) additional information concerning the various Risk Tiers generally, and (2) documentation in order to assess whether or not FGIC was being

harmed as a result of being placed in the lower risk tier. To date, RFC has failed to provide such information.

213. On information and belief, RFC, as Master Servicer, also knew of material breaches of representations and warranties and did not notify FGIC thereof, or cause the repurchase of the Mortgage Loans affected thereby. Accordingly, FGIC reserves its rights to assert additional causes of action relating to RFC's servicing obligations.

J. Ally Financial's Domination and Control of its Subsidiaries Results in an Integrated, Single Corporate Enterprise

214. As discussed in greater detail below, Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which owns RFC and GMACM. Ally Financial—as the ultimate parent of ResCap, RFC, and GMACM—has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries, including ResCap, RFC, and GMACM.

215. As also discussed below, Ally Financial has exercised such domination and control over its subsidiaries, including ResCap, RFC, GMACM. Upon information and belief, Ally Financial exercised its direction and control in connection with the HI Transactions. At times, upon information and belief, Ally Financial performed such direction and control by using ResCap as an instrument to effect its goals.

216. As mentioned above, Ally Financial has recently admitted to the Federal Reserve Board and the FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . ('ResCap'), and its direct and indirect subsidiaries." *See* Consent Order, *In the Matter of Ally Financial Inc., et al.*, FRB Docket No. 11020-B-HC (Apr. 13, 2011) (emphasis added).

217. As further discussed below, Ally Financial's public statements and actions at or around the time of each Transaction's close until present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

(1) Evidence of Ally Financial's Domination of RFC Directly and Indirectly Through its Control of ResCap

218. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than a subsidiary whose dealings were at arm's length.

219. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage securitization business.

220. Ally Financial, at the direction of its board of directors, also provided ResCap with liquidity and capital.

221. Further, in Ally Financial's 8-K, filed on June 9, 2005, it disclosed that ResCap would enter into an operating agreement with Ally Financial, under which Ally Financial would agree to "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8, 2005 (hereinafter "2005 Operating Agreement").

222. On information and belief, Ally Financial's restructuring and financial support of its subsidiaries was undertaken at the direction of the Ally Financial board of directors in order to improve and maintain the investment grade rating and profitability of Ally Financial's mortgage securitization business. This restructuring then enabled Ally Financial to present itself to its subsidiaries' securitization transaction partners—including FGIC—as a stable corporate parent supporting and overseeing the business of its subsidiaries, which in turn made those subsidiaries more attractive as counterparties to market participants, such as FGIC.

223. On December 1, 2006, Ally Financial, had its inaugural conference call with investors, at which time Rick Buxton, the then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." GMAC LLC Sale of Controlling Interest in GMAC Investor Conference Call (Dec. 1, 2006). On the same investor call, Eric Feldstein, Ally Financial's then CEO, demonstrated how Ally Financial was going to take initial steps to actively control its subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

224. At all times since Ally Financial caused ResCap to be incorporated, it has owned 100% of ResCap.[5] Since incorporation, the ownership of ResCap has not changed—Ally

[5] GM had created a shell company, GMAC Mortgage Group Inc., which was the direct parent of ResCap. However, there is no indication that this company conducted any business independent from Ally Financial. In fact, Ally Financial's first Annual Report as an independent entity, which was filed with the SEC on March 3, 2007, included a corporate hierarchy chart that evidenced Ally Financial's corporate structure. There was a direct line from Ally Financial to ResCap. *See* Ally Fin. Form 10-K, at 2 (March 3, 2007). In addition, there is no indication that Ally Financial ever discusses ResCap as an "indirect subsidiary." To the contrary, as discussed, below, Ally has publicly stated on numerous occasions that it is the owner of ResCap.

Financial still "owns 100% of ResCap . . . ." Ally Financial Earnings Call dated Nov. 2011, statement by Michael Carpenter, Ally Financial's CEO.

225. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management and employees. For example, Ally Financial shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the 2005 Operating Agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*require[s]* that [ResCap's] board of directors include at least two independent directors, *to be selected by GMAC*." 2005 Operating Agreement (emphasis added).

226. Moreover, on April 26, 2007, "ResCap Investor Relations" announced the release of Ally Financial's 2007 first quarter financial results to investors in an email bearing the ResCap logo. That announcement stated that Ally Financial's financial results were found on both Ally Financial's and ResCap's websites.

227. Another example of the many employees who had overlapping responsibilities at Ally Financial and its subsidiaries is David C. Walker. As discussed above, Walker has served as Vice President of GMAC Group and CFO of GMAC Mortgage Group, and as of September 29, 2005, was a director at ResCap, GMACM, RFC, RFMSII, and HomeComings, among other Ally Financial subsidiaries. In the HI Transactions, acting as a Director for both RFMSII and RFC, Walker was a signatory to the respective "Unanimous Written Consent of Directors in Lieu of Meeting of Board of Directors" for both RFMSII and RFC. Both documents are dated December 20, 2005.

228. Ally Financial's domination and control of its subsidiaries, and in particular its use of ResCap to effectuate that control, is further evidenced by John Ruckdaschel, who, according to publicly available information, has served as in-house counsel at Ally Financial since October 2006. According to an e-mail sent from ResCap to FGIC, Ruckdaschel has served as "internal legal counsel for all [] securitizations" since at least May 2008. Although purportedly an Ally Financial employee, Ruckdaschel also sent and received e-mail using a ResCap e-mail address. Further, an employee of ResCap specifically instructed FGIC that all "official letters" regarding several Ally Financial subsidiaries—including RFC, GMACM, RFMSII, and others—should be sent not to the relevant (and supposedly independent) subsidiary, but rather to Ruckdaschel, Ally Financial's internal counsel.

229. As further evidence of Ally Financial's domination over ResCap, the 2005 Operating Agreement also indicates that Ally Financial has expressly "restrict[ed] ResCap's ability to declare dividends or prepay subordinated indebtedness owed to [Ally Financial] or its other affiliates." *See id.*

230. Conversely, Ally Financial has also agreed to directly pay the losses or expenses of ResCap. In the same 2005 Operating Agreement, Ally Financial stated that it would stand behind ResCap and "indemnify, defend and hold [ResCap] harmless from and against any losses [ResCap] suffer[s] related to the businesses and liabilities of [Ally Financial] and its subsidiaries." *Id.*

231. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, in May 2007, during an investor earnings call, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take

whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board . . . and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "[a]ll I can assure you [is] that if you look at the strategic plan of GMAC, a strong ResCap with an investment grade rating is a key part of our plan of our value creation." *Id.* (emphasis added). Thus, Ally Financial's senior management assured the market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

232. The financial support Ally Financial gave to ResCap began as far back as May 2005 and has persisted over many years. Upon information and belief, Ally Financial continued to prop up ResCap, an undercapitalized entity, by channeling capital and liquidity into ResCap even as its condition continued to deteriorate as the housing market crashed. In addition to the direct financial support Ally Financial contributed to ResCap, it was also instrumental in obtaining outside investments that flowed directly to its mortgage subsidiaries. In 2008, Ally Financial announced to the market that it renewed a funding facility with Citibank, which provided "funding of up to $13.8 billion." Ally Fin. Inc., Form 8-K (Sept. 19, 2008). A portion of such funding was specifically earmarked for "mortgage assets across the [Ally Financial] and [ResCap] businesses." *Id.*

233. Indeed, Ally Financial's 2011 annual report states that "ResCap remains heavily dependent on [Ally Financial] and its affiliates for funding and capital support." Ally. Fin. Inc., Annual Report (Form 10-K), at 128 (Feb. 28, 2012).

234. Additionally, Annual Reports prepared by Ally Financial further note its pursuit of strategic alternatives with ResCap, and highlight the extent to which Ally Financial manipulated its control over its subsidiaries to enhance its own financial health. According to Ally Financial: "On December 31, 2009, we announced that due to our ongoing strategic review of how to best deploy GMAC's current and future liquidity, we decided to pursue strategic alternatives with respect to ResCap and committed to a plan . . . related to management's intent to sell certain ResCap related assets and businesses. . . . In order to maximize value, we will consider a variety of options including one or more sales, spin-offs, or other potential transactions . . . [that we believe] should minimize the impact of any significant future losses related to ResCap's legacy mortgage business . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3-4 (Feb. 26, 2010).

235. There is also substantial evidence that billions of dollars of TARP funds meant to stabilize Ally Financial were given to ResCap by Ally Financial. *See* TARP Report dated March 10, 2010, at 41, 44 (hereinafter "TARP Report"). Upon information and belief, the TARP funds were commingled among a variety of entities within Ally Financial's mortgage family, including ResCap.

236. Further, Ally Financial has established a "Mortgage Repurchase Reserve" to account for the potentially significant liabilities stemming from repurchase demands made on its mortgage-related subsidiary business units. The balance of the Mortgage Repurchase Reserve was $825 million as of the fourth quarter of 2011. *See* Ally Financial's 4Q 2011 Earnings Presentation at 16. Although these repurchase demands are generally made on Ally Financial's subsidiaries—such as GMACM—in discussing the reserve on an earnings call, Ally Financial CFO Jim Mackey made clear that it was Ally Financial that was recording "repurchase

expense[s]" related to mortgages, as he stated that Ally Financial "had lower mortgage repurchase expense of $44 million." Ally Financial's Q4 2011 Earnings Call at 4 (Feb. 2, 2012).

237. Similarly, in discussing Ally Financial's Mortgage Repurchase Reserve on Ally Financial's third quarter 2011 earnings call, Mackey further described losses attributable mortgage loan repurchases as belonging to Ally Financial, when he stated: "Our mortgage repurchase reserve is [as it then stood] $829 million . . . . Our loss experience improved during the quarter due to the fact that we had fewer mortgage insurance rescission payments that we experienced last quarter and that did not repeat this quarter." Ally Financial's Q3 2011 Earnings Call at 6 (Nov. 2, 2011) (emphases added). On the same call, Ally Financial CEO Carpenter explained that "we have routinely repurchased problem loans voluntarily and by contract . . . ." *Id.* at 8.

238. Additionally, as discussed above, Ally Financial recorded a $230 million charge in the fourth quarter of 2011, $212 million of which was recorded at its controlled subsidiary, ResCap. As a result of the penalties assessed against ResCap by government regulators, and the fact that ResCap failed to maintain sufficient tangible net worth to comply with the requirements of the terms of certain credit facilities, Ally Financial propped up its subsidiary ResCap with a $197 million capital contribution in the form of intercompany debt forgiveness. *See* Ally Fin. Inc., Annual Report (Form 10-K), at 31-32 (Feb. 28, 2012). Additionally, Ally Financial currently provides funding and capital support to ResCap through various secured and unsecured facilities, which includes a $1.6 billion line of credit. As noted, the $197 million capital contribution was in addition to forgiveness by Ally Financial of $58 million of ResCap debt on the $1.6 billion line of credit provided by Ally Financial. *See id.* at 18; 129.

(2) Ally Financial Has Disregarded Corporate Formalities and Treated Its Businesses as a Single Enterprise

239. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial, rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home > About Ally > Investor Relations, *available at* http://www.ally.com/about/investor/ (last visited Dec. 29, 2011).

240. In line with Ally Financial's current classification of its mortgage businesses as "units" of Ally Financial, it has consistently been involved in the day-to-day operations of its subsidiaries. On information and belief, Ally Financial employees received communications concerning various Operative and Offering Documents, as well as the final executed versions of the Operative and Offering Documents, including the fraudulent representations, warranties, and affirmative covenants that are at issue in this action.

241. The origination and securitization of mortgage loans by ResCap and its subsidiaries have long been an integral part of Ally Financial's core business. In its 2006 Annual Report, Ally Financial (then reporting as GMAC LLC) stated that "[w]e are a leading real estate finance company focused primarily on the residential real estate market. Our business activities include the origination, purchase, servicing, sale and securitization of residential mortgage loans." GMAC LLC, Annual Report (Form 10-K), at 3 (Mar. 13, 2007) (emphasis added). Ally Financial further stated that "we utilize asset and mortgage securitizations and sales as a critical component of our diversified funding strategy." Id. at 5 (emphasis added).

242. Ally Financial continued to publicly report on its own business and that of its subsidiaries in later filings on an integrated basis: "We engage in the origination, purchase,

servicing, sale, and securitization of consumer (i.e., residential) mortgage loans and mortgage-related products. Mortgage operations include the Residential Capital, LLC (ResCap) legal entity, [and] the mortgage operations of Ally Bank . . . ." Ally Fin. Inc., Annual Report (Form 10-K), at 3 (Feb. 26, 2010). More recently, continuing to discuss its various mortgage operations as a single enterprise, Ally Financial stated that "[o]ur Origination and Servicing operations is one of the leading originators of conforming and government-insured residential mortgage loans in the United States. We are one of the largest residential mortgage loan servicers in the United States and we provide collateralized lines of credit to other mortgage originators." Ally Fin. Inc., Annual Report (Form 10-K), at 4 (Feb. 28, 2012).

243. Moreover, as discussed above, Ally Financial—at least in the view of certain of ResCap's bondholders—is believed to have stripped assets from its subsidiary.

244. In addition to the dominance and control Ally Financial exerted over its mortgage units, ResCap also viewed RFC and GMACM as part of its own business. For example, in its investor presentation from 2007, ResCap declares that RFC and GMACM "are owned *and operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies."

245. Ally Financial exerted its dominance and control over ResCap. Upon information and belief, when Ally Financial was not directly controlling RFC and GMACM, it was using ResCap as an instrument to do so.

246. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information

related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the origination business. Instead, it is using its mortgage units as instruments to obtain favorable ratings.

247. Such disregard for the corporate form has persisted over time. For instance, Fitch Ratings in 2007 publicly reported that "operations of [Ally Financial]'s residential mortgage servicing businesses—which include [GMACM, RFC], and HomeComings Financial Network—have been integrated into" ResCap. Moreover, Moody's reported that in 2007, "ResCap combined all servicing operations under one servicing entity . . . under common management [and] common systems . . . ." There is no indication that either RFC or GMACM has ceased operations or been sold to other entities or investors. Thus, upon information and belief, ResCap has conflated various businesses that currently have extensive third-party contractual relationships, such as the one RFC has with respect to the HI Transactions as Master Servicer.

248. Even the employees of Ally Financial's subsidiaries think of themselves as employees of Ally Financial rather than separate entities since there appears to be no difference. For example, Thomas F. Marano, served as an officer of Ally Financial as well as Chairman and CEO of ResCap. His responsibilities include overseeing the mortgage lending and servicing in ResCap. In testimony before the House Financial Services Subcommittee on November 18, 2011, Marano stated that "Ally [Financial]'s mortgage business is conducted through GMAC Mortgage." Upon information and belief, Marano—in his dual role as an officer of Ally Financial as well as Chairman and CEO of ResCap—directed and controlled the actions of GMACM and RFC.

249. In another example, Larry Hipp, a member of ResCap's Risk Analyst/Investor Repurchase Department, communicated with FGIC regarding rescission requests using an Ally

Financial email address, but in those very same emails, lists his ResCap contact information, including a ResCap email address. In addition, Ally Financial/ResCap used to send FGIC secure communications bearing a "GMAC ResCap" header, but those secure communications now have an Ally Financial header.

250. A further example is supplied by Jeffrey Stephan, a loan officer of GMACM who was implicated in the robo-signing issues associated with servicing mortgage loans. He was asked the following questions at his deposition:

Q: Could you please state your name for the record.
A: My name is Jeffrey Stephan.
Q: Okay. And who do you work for?
A: GMAC, LLC [Ally Financial].
Q: And is there a difference between GMAC, LLC and GMAC Mortgage, LLC?
A: GMAC, LLC – I'm trying to think of the word to use – the most recent name.
Q: Okay.
A: It's GMCA [sic] Mortgage Corporation.
Q: Okay.
A: I'm not sure how you would word that.
Q. Okay. So are they -- does GMAC, LLC -- now has that basically taken over these other entities --
A. Yes.
Q. -- that formerly existed?
A. Yes.
Q. So these entities no longer currently exist?
A. Right.
Q. Okay. And how long then have you been employed by GMAC, LLC?
A. Five years.

Jeffrey Stephan Deposition, *GMAC Mortgage, LLC v. Neu*, 4:25-5:22, Dec. 10, 2009, Case No. 50 2008 CA 040805, (15th Cir. Ct., Palm Beach, Fl.).

K. FGIC's Contractual Remedies Under The I&I Agreements

251. The I&I Agreements provide FGIC with broad remedies for RFC's breaches of its representations and warranties. Each of the I&I Agreements state that, unless otherwise expressly provided, no remedy conferred in the relevant I&I Agreement is intended to be

exclusive of any other available remedy, but each remedy shall be cumulative and shall be in addition to other remedies given under the relevant I&I Agreement or any other relevant Operative Document, or existing at law or in equity. *See* 2006-HI2 I&I Agreement § 5.02(b); 2006-HI3 I&I Agreement § 5.02(b); 2006-HI4 I&I Agreement § 5.02(b); 2006-HI5 I&I Agreement § 5.02(b); 2007-HI1 I&I Agreement § 5.02(b).

252. In each of the HI Transactions, RFC also agreed that, any provision in the relevant I&I Agreement or any Operative Document to the contrary notwithstanding, FGIC shall be entitled to full reimbursement from RFC for any payment made under any Policy arising as a result of RFC's failure to substitute for or deposit an amount in respect of any defective Mortgage Loan as required by the relevant HI Purchase Agreement, together with interest on any and all such amounts remaining unreimbursed from the date such amounts became due until paid in full. *See* 2006-HI2 I&I Agreement § 3.03(b); 2006-HI3 I&I Agreement § 3.03(b); 2006-HI4 I&I Agreement § 3.03(b); 2006-HI5 I&I Agreement § 3.03(b); 2007-HI1 I&I Agreement § 3.03(b).

253. Further, in each Transaction, RFC expressly agreed to pay to FGIC any and all reasonable charges, fees, costs and expenses that FGIC may reasonably pay or incur, including reasonable attorneys' and accountants' fees and expenses, in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents, including defending, monitoring or participating in any litigation or proceeding relating to any of the Operative Documents. *See* 2006-HI2 I&I Agreement § 3.03(c); 2006-HI3 I&I Agreement § 3.03(c); 2006-HI4 I&I Agreement § 3.03(c); 2006-HI5 I&I Agreement § 3.03(c); 2007-HI1 I&I Agreement § 3.03(c).

254. In addition, in each of the HI Transactions, RFC agreed to pay, protect, indemnify and save harmless FGIC from and against any and all claims, losses, liabilities (including penalties), actions, suits, judgments, demands, damages, costs or expenses (including reasonable fees and expenses of attorneys) of any nature arising out of or relating to the transactions contemplated by the Operative Documents by reason of the breach by RFC of any representation, warranty or covenant under any of the Operative Documents or the occurrence, in respect of RFC, under any of the Operative Documents, of any event of default. *See* 2006-HI2 I&I Agreement § 3.04(a); 2006-HI3 I&I Agreement § 3.04(a); 2006-HI4 I&I Agreement § 3.04(a); 2006-HI5 I&I Agreement § 3.04(a); 2007-HI1 I&I Agreement § 3.04(a).

255. Moreover, consistent with its obligation to select Mortgage Loans that met its published criteria, RFC agreed to repurchase or substitute Mortgage Loans that did not conform to RFC's representations and warranties, and to indemnify FGIC for claims and losses arising from RFC's breach of any representation or warranty.

FIRST CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Declaratory Relief Regarding RFC's Indemnification Obligation)

256. FGIC re-alleges and incorporates by reference paragraphs 1 through 255 of this Complaint.

257. The I&I Agreements are valid and binding agreements between the parties.

258. FGIC has performed its obligations under each of the I&I Agreements.

259. RFC's representations and warranties were material to FGIC's decision to insure the HI Notes and to issue the Policies.

260. RFC's pervasive and material breaches of its representations and warranties constitute a material breach of each of the I&I Agreements that has deprived FGIC of the purpose of the parties' bargain.

261. Pursuant to Section 3.04(a) of the I&I Agreements, RFC must indemnify FGIC for any and all claims, losses, liabilities, demands, damages, costs or expenses of any nature arising out of or relating to the breach by RFC of any of the representations or warranties contained in Section 2.01 of the I&I Agreements or arising out of or related to the transactions contemplated by the related Operative Documents by reason of, among other things, the breach by RFC of any representation, warranty, or covenant under any of the related Operative Documents.

262. As explained above, RFC has breached numerous representations, warranties, and covenants in the Offering and Operative Documents for the HI Transactions. These breaches have caused FGIC to pay claims and to incur losses, costs, and expenses; and it will continue to do so.

263. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

264. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must jointly and severally indemnify and reimburse FGIC for all sums arising out of the HI Transactions for which FGIC has been or will become liable, or alternatively, for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreements or any of the related Operative Documents, or alternatively, in an amount to be determined at trial, and an order giving effect to such indemnification.

265. In addition, FGIC seeks a declaration that RFC must indemnify and reimburse FGIC for all sums arising out of the HI Transactions for which FGIC has or will become liable, or, alternatively, for all loss resulting from any breaches of the representations, warranties, and covenants of the I&I Agreements or any of the related Operative Documents, or alternatively, in an amount to be determined at trial, and an order giving effect to such indemnification.

SECOND CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Fraudulent Inducement—I&I Agreement)

266. FGIC re-alleges and incorporates by reference paragraphs 1 through 265 of this Complaint

267. RFC induced FGIC to enter into the 2006-HI4, 2006-HI5, and 2007-HI1 I&I Agreements and to issue Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions by making false representations and warranties about its business practices and the 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loans, and by agreeing to broad remedies (including indemnification) for any breach of those representations and warranties.

268. As explained above, RFC knowingly made materially false statements to FGIC, and/or omitted material facts from its statements to FGIC, with the intent to induce detrimental reliance by FGIC.

269. RFC intended for FGIC to rely on RFC's material false statements and/or omissions. FGIC had no reason to believe that RFC's representations were false, and reasonably and justifiably relied on RFC's material false statements and/or omissions regarding information uniquely in the possession of RFC when it decided to enter into the I&I Agreements and to issue the Policies for the HI Notes.

270. As a result of RFC's material false statements and material omissions from its statements, FGIC entered into the 2006-HI4, 2006-HI5, and 2007-HI1 I&I Agreements, issued

Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions, and thereby agreed to insure notes backed by pools of the 2006-HI4, 2006-HI5, and 2007-HI1 Mortgage Loans that were, in actuality, materially different from the mortgage loan pools that RFC represented would collateralize the 2006-HI4, 2006-HI5, and 2007-HI1 Notes.

271. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

272. As a result of RFC's material false statements and material omissions from its statements, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

273. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

274. Alternatively, RFC is liable for such damages.

THIRD CAUSE OF ACTION

(As Against Ally Financial: Aiding and Abetting Fraudulent Inducement—I&I Agreement)

275. FGIC re-alleges and incorporates by reference paragraphs 1 through 274 of this Complaint.

276. As explained above, Ally Financial provided substantial assistance to its subsidiary RFC in fraudulently inducing FGIC to enter into the 2006-HI4, 2006-HI5, and 2007-HI1 I&I Agreements and issue Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions.

277. RFC could not have perpetrated its fraudulent scheme against FGIC without the substantial assistance of Ally Financial.

278. Ally Financial knew that RFC fraudulently induced FGIC issue the Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions.

279. Ally Financial's statements and actions materially aided RFC's fraudulent inducement.

280. As a result of Ally Financial's aiding and abetting RFC's fraud, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

FOURTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Representations, Warranties, and Affirmative Covenants)

281. FGIC re-alleges and incorporates by reference paragraphs 1 through 280 of this Complaint.

282. The I&I Agreements are valid and binding agreements between FGIC and RFC.

283. FGIC has performed its obligations under each of the I&I Agreements.

284. As explained above, RFC has materially breached its representations and warranties under the I&I Agreements.

285. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

286. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

287. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

288. Alternatively, RFC is liable for such damages.

FIFTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Repurchase Obligation)

289. FGIC re-alleges and incorporates by reference paragraphs 1 through 288 of this Complaint.

290. The I&I Agreements are valid and binding agreements between the parties.

291. FGIC has performed its obligations under each of the I&I Agreements.

292. Pursuant to the terms of the 2006-HI5 and the 2007-HI1 I&I Agreements, and the provisions of the HI Purchase Agreements incorporated therein, FGIC has demanded that RFC repurchase non-complying 2006-HI5 Mortgage Loans and 2007-HI1 Mortgage Loans. RFC has refused to repurchase numerous such Mortgage Loans.

293. RFC has breached the 2006-HI5 and the 2007-HI1 I&I Agreements, and the provisions of the HI Purchase Agreements incorporated therein, by failing to repurchase those Mortgage Loans that violated RFC's representations and warranties that FGIC has noticed to RFC.

294. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

295. As a result of these breaches of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

296. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

297. Alternatively, RFC is liable for such damages.

SIXTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Contract—Declaratory Relief Regarding Access to Information)

298. FGIC re-alleges and incorporates by reference paragraphs 1 through 298 of this Complaint.

299. The I&I Agreements are valid and binding agreements between FGIC and RFC.

300. FGIC has performed its obligations under each of the I&I Agreements.

301. Pursuant to Section 2.02(c) of the I&I Agreements, RFC agreed to furnish or cause to be furnished to FGIC financial statements, accountants' reports, and other information.

Such other information includes, but is not limited to, data relating to the Mortgage Loans, the servicing of the Mortgage Loans, and the HI Transactions. FGIC further has the right to conduct reviews of RFC's practices as Master Servicer through reviews of the Mortgage Loans pursuant to Section 2.02(m) of the I&I Agreements.

302. As discussed above, pursuant to the I&I Agreements, and with regard to requests for access to Mortgage Loan files pursuant to the 2006-HI2, 2006-HI5, and 2007-HI1 I&I Agreements, FGIC made numerous reasonable written requests that RFC furnish or cause to be furnished data relating to the Mortgage Loans, and the servicing of those loans, in order for FGIC to determine the veracity of representations and warranties made by RFC, and others, concerning the Mortgage Loans.

303. RFC has refused to provide more than a fraction of the data concerning the Mortgage Loans sought by FGIC.

304. RFC has failed to comply with its contractual obligations and breached the 2006-HI2, 2006-HI5, and 2007-HI1 I&I Agreements by failing to provide data relating to the Mortgage Loans after receiving reasonable requests for such data from FGIC.

305. Pursuant to the Section 2.02(e)(i)-(iii) of the I&I Agreements, RFC agreed to permit FGIC, upon its reasonable request, to (i) inspect the books and records of RFC; (ii) discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer; and (iii) discuss the affairs, finances and accounts of RFC with RFC's independent accountants.

306. FGIC made a reasonable written request that RFC permit FGIC or its authorized agent to conduct an inspection of the books and records of RFC, as well as permit FGIC to (i) discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer, and (ii) with

RFC's consent, which consent shall not be unreasonably withheld or delayed, discuss the affairs, finances, and accounts of RFC with RFC's independent accountants in January 24, 2012.

307. RFC has failed to make available such persons or to produce such information.

308. RFC has failed to comply with its contractual obligations and breached the I&I Agreements by failing to make available the persons requested or to provide the information requested pursuant to the I&I Agreements, Section 2.02(e)(i)-(iii).

309. Pursuant to Section 2.02(e) of the I&I Agreements, RFC agreed, on an annual basis or when reasonably requested by FGIC, to cause the Custodian to deliver to FGIC an updated certification, in the form of the "Interim Certification" required under the Custodial Agreements for each of the HI Transactions to enable FGIC to track the progress of the recording of Mortgages and Assignments with respect to the Mortgage Loans.

310. FGIC made a reasonable request for the Interim Certification on June 21, 2011 for the 2006-HI4 Transaction, the 2006-HI5 Transaction, and the 2007-HI1 Transaction. On December 8, 2011, FGIC sent a notice of default to RFC with respect to its failure to cause the Interim Certification to be delivered to FGIC for the 2006-HI5 Transaction.

311. RFC has failed to cause the Interim Certification to be delivered to FGIC as requested.

312. RFC has failed to comply with its contractual obligations and breached the I&I Agreement, Section 2.02(e), by failing to cause the Interim Certification to be delivered to FGIC after receiving reasonable requests from FGIC.

313. Pursuant to Section 2.02(c)(v) of the I&I Agreements, RFC agreed to furnish or cause to furnish to FGIC "all reports provided . . . pursuant to the [HI Servicing Agreements]."

314. FGIC made a reasonable request for servicing notes for the 2006-HI5 and 2007-HI1 Transactions on December 9, 2010, and for the 2006-HI2 Transaction on January 19, 2012.

315. RFC has failed to comply with its contractual obligations and breached the 2006-HI5 and 2007-HI1 I&I Agreements by failing to cause the Servicing Reports to be delivered to FGIC after receiving reasonable requests from FGIC.

316. Pursuant to the Servicing Agreement, to which FGIC is an express third-party beneficiary and the provisions of which are incorporated by reference into the I&I Agreement, RFC is obligated to provide information regarding the Mortgage Loans to, and otherwise cooperate with, the successor servicer of the 2006-HI3 and 2006-HI4 Transactions.

317. RFC has failed to comply with its contractual obligations and breached the I&I Agreements and Servicing Agreements for the 2006-HI3 and 2006-HI4 Transactions by failing to make available to FGIC and/or the successor servicer the 2006-HI3 and 2006-HI4 Mortgage Loan files and other related material information.

318. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

319. Accordingly, FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC must comply with Sections 2.02(c), 2.02(e), and 2.02(m) of the I&I Agreement, and an order requiring RFC to promptly remedy those breaches and therefore comply with FGIC's requests and notices to RFC pursuant to relevant provisions, as detailed above.

SEVENTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Declaratory Relief)

320. FGIC re-alleges and incorporates by reference paragraphs 1 through 319 of this Complaint.

321. This is a claim for declaratory judgment pursuant to CPLR 3001 for the purpose of determining a justiciable controversy between FGIC and Ally Financial, ResCap, and RFC.

322. As discussed above, Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this complaint.

323. For the reasons set forth in paragraphs 214 through 250, among others, Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

324. FGIC has been damaged as a result of the actions Ally Financial, ResCap and RFC.

325. FGIC therefore seeks a declaration that Ally Financial, ResCap, and RFC were and continue to be alter egos of each other.

EIGHTH CAUSE OF ACTION

(As Against Ally Financial, ResCap, and RFC: Breach of Master Servicer Obligations)

326. FGIC re-alleges and incorporates by reference paragraphs 1 through 325 of this Complaint.

327. Each of the I&I Agreements is a valid and binding agreement between FGIC and RFC.

328. FGIC has performed its obligations under each of the I&I Agreements.

329. RFC has breached its affirmative covenants under the I&I Agreements to service all Mortgage Loans in all material respects in compliance with the HI Servicing Agreements.

330. RFC's breaches of the I&I Agreements have caused substantial harm and damages to FGIC, in an amount to be proved at trial, but at a minimum including substantially higher claims on Policies and other losses and expenses.

331. Ally Financial, acting directly and/or indirectly through ResCap, directed RFC's actions as set forth in this cause of action.

332. As a result of this breach of contract, FGIC has been damaged and will continue to be damaged in an amount to be determined at trial.

333. RFC, ResCap and Ally Financial are jointly and severally liable for such damages.

334. Alternatively, RFC is liable for such damages.

NINTH CAUSE OF ACTION

(As Against RFC: Attorneys' Fees and Costs)

335. FGIC re-alleges and incorporates by reference paragraphs 1 through 334 of this Complaint.

336. The I&I Agreements are valid and binding agreements between FGIC and RFC.

337. FGIC has performed its obligations under each of the I&I Agreements.

338. Pursuant to the I&I Agreements, RFC agreed to reimburse FGIC for any and all costs or expenses "including reasonable fees and expenses of attorneys" in connection with the enforcement, defense or preservation of any rights in respect of any of the Operative Documents. Further, pursuant to the I&I Agreements, RFC agreed to pay FGIC any and all costs or expenses "including reasonable fees and expenses of attorneys" arising out of or relating to the breach by RFC of any of the representations or warranties contained in each of the I&I Agreements or arising out of or relating to the HI Transactions.

339. FGIC has incurred and will continue to incur substantial costs and expenses, including but not limited to attorneys' fees in filing and prosecuting this lawsuit, arising out of RFC's failure to provide Mortgage Loan files, the Interim Certification, Servicing Reports, and financial information, and its breach of the representations and warranties contained in the I&I

Agreements and other representations, warranties, and covenants within the Operative Documents.

PRAYER FOR RELIEF

WHEREFORE, plaintiff Financial Guaranty Insurance Company demands judgment in its favor and against defendant Residential Funding Company, LLC, with respect to (1), (2), and (4) through (14) below, and in its favor and against Residential Capital, LLC, with respect to (1), (2), (4) through (11), (13), and (14) below, and in its favor and against Ally Financial, Inc., with respect to (1) through (11), (13), and (14) below and the following relief:

(1) A declaration that, pursuant to RFC's obligations under the I&I Agreements, RFC solely and/or Ally Financial, ResCap, and RFC must jointly and severally reimburse and indemnify FGIC for all sums arising out of the HI Transactions for which FGIC has or will become liable, and that FGIC is entitled to immediate reimbursement of all sums it has paid to date under the Policies and to the payment of all future amounts that may fall due or claims that may be presented for payment by FGIC under the Policies as and when such sums fall due or such claims are presented, and an order giving effect to that declaration;

(2) Further or alternatively, an award of all legal rescissory, equitable, and punitive damages, to be proven at trial, for RFC's fraudulent inducement of FGIC to enter into and issue Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions;

(3) Further or alternatively, an award of all legal, rescissory, equitable, and punitive damages, to be proven at trial, for Ally Financial's aiding and abetting of RFC's fraudulent inducement of FGIC to enter into and issue Policies for the 2006-HI4, 2006-HI5, and 2007-HI1 Transactions;

(4) Further or alternatively, an award of all legal, rescissory, and equitable damages, to be proven at trial for RFC's material breaches of the HI Transactions;

(5) Further or alternatively, an award of compensatory, consequential and/or equitable damages, and any other damages to be proven at trial, for RFC's pervasive and material breaches of its representations, warranties, and affirmative covenants, which constitute material breaches of the I&I Agreements and frustration of the parties' bargain;

(6) Further or alternatively, a declaration that RFC must repurchase all Mortgage Loans that are in breach of RFC's representations and warranties in the HI Transactions, and an order giving effect to that declaration;

(7) Further or alternatively, a declaration that RFC must provide full access to all Mortgage Loan files requested or that will be requested by FGIC in the 2006-HI2 Transaction, the 2006-HI5 Transaction, and the 2007-HI1 Transaction, and an order giving effect to that declaration;

(8) Further or alternatively, a declaration that RFC must allow FGIC to inspect the books and records of RFC, to discuss the affairs, finances and accounts of RFC with RFC's Servicing Officer, and to discuss the affairs, finances and accounts of RFC with RFC's independent accountants, and an order giving effect to that declaration;

(9) Further or alternatively, a declaration that RFC must cause to be provided servicing notes for the 2006-HI2, 2006-HI5, and 2007-HI1 Transactions when requested by FGIC;

(10) Further or alternatively, a declaration that RFC must cause to be provided the custodial Interim Certification when requested by FGIC for the HI Transactions stating that all mortgage files were complete and were properly transferred into the trusts, or noting any exceptions, and an order giving effect to that declaration;

(11) Further or alternatively, a declaration that Ally Financial, ResCap, and RFC are alter egos of each other;

(12) An award of FGIC's attorneys' fees, and other costs and expenses incurred in enforcing, defending, or preserving its rights under the I&I Agreements and other Operative Documents, as defined in the I&I Agreements;

(13) An award of prejudgment interest at the statutory rate; and

(14) Any other and further relief that the Court deems just and proper.

JURY DEMAND

FGIC demands a trial by jury for all issues so triable as a matter of right.

Financial Guaranty Insurance Company

Exhibit 26

JUDGE OETKEN

12 CIV 3776

IN THE UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

ASSURED GUARANTY MUNICIPAL CORP., f/k/a FINANCIAL SECURITY ASSURANCE INC.,

Plaintiff,

vs.

GMAC MORTGAGE, LLC, f/k/a GMAC MORTGAGE CORPORATION; RESIDENTIAL ASSET MORTGAGE PRODUCTS, INC.; ALLY BANK, f/k/a GMAC BANK; RESIDENTIAL FUNDING COMPANY, LLC, f/k/a RESIDENTIAL FUNDING CORPORATION; RESIDENTIAL CAPITAL, LLC, f/k/a RESIDENTIAL CAPITAL CORPORATION; ALLY FINANCIAL, f/k/a GMAC, LLC, and RESIDENTIAL FUNDING MORTGAGE SECURITIES II, INC.,

Defendants.

Case No:

RECEIVED
MAY 11 2012
U.S.D.C. S.D. N.Y.
CASHIERS

COMPLAINT

Assured Guaranty Municipal Corp., f/k/a Financial Security Assurance Inc. ("AGM" or the "Note Insurer"), through its attorneys Susman Godfrey LLP, alleges as follows.

NATURE OF ACTION

1. AGM brings this suit against GMAC Mortgage, LLC (f/k/a GMAC Mortgage Corporation) ("GMACM"), Residential Asset Mortgage Products, Inc. ("RAMP"), Ally Bank (f/k/a GMAC Bank) ("Ally Bank"), Residential Funding Company, LLC (f/k/a Residential Funding Corporation) ("RFC"), Residential Capital, LLC (f/k/a Residential Capital Corporation) ("ResCap"), Ally Financial (f/k/a GMAC, LLC) ("Ally Financial"),and Residential Funding Mortgage Securities II, Inc. ("RFMS") (collectively, the "GMAC Entities") for breach of contract, reimbursement, and indemnification under New York law, in connection with two

securitizations of residential mortgages. One securitization transaction occurred in 2004; the other in 2006 (together, "the Transactions").

2. The GMAC Entities induced AGM to issue financial guaranty insurance for the Transactions by making numerous representations and warranties concerning (1) the quality and characteristics of the mortgage loans serving as collateral for the Transactions and (2) the conduct of the GMAC Entities with respect to the origination of the mortgage loans, the sale of mortgage loans to the securitization trusts, and the servicing of the mortgage loans in the trusts. AGM's credit support was imperative to the triple-A rating of the securities to be marketed to investors, the viability of the Transactions, and, ultimately, the GMAC Entities' ability to earn millions of dollars in transaction and servicing fees. However, the representations and warranties made by the GMAC Entities were false, the GMAC Entities have not honored their contractual obligations, and AGM has suffered, and will continue to suffer, millions of dollars in losses as a result.

3. The GMAC Entities controlled nearly every aspect of the Transactions. The mortgage loans underlying the securitizations were originated or acquired by GMACM (2004 transaction) and RFC (2006 transaction). GMACM and RFC then sold the mortgage loans to other GMAC Entities, RAMP (2004 transaction) and RFMS (2006 transaction). RAMP and RFMS then deposited these mortgage loans into trusts, which issued notes for the Transactions to investors. Another affiliate, GMAC RFC Securities, helped to underwrite and distribute the notes in both the 2004 and 2006 transactions. The Trust created to hold the mortgage loans and to issue the notes in the 2004 transaction was the GMACM Home Equity Loan Trust 2004-HE3. The Trust created to hold the mortgage loans and to issue the notes in the 2006 transaction was the Home Equity Loan Trust 2006-HSA3.

4. The GMAC Entities also serviced the mortgage loans after the offerings. GMACM, in addition to originating or acquiring the mortgage loans in the 2004-HE3 transaction, was also the servicer. Likewise, RFC was the servicer for the 2006-HSA3 transaction. A servicer's primary role is to supervise the collection of borrower payments related to the mortgage loans. As servicers, GMACM and RFC collected substantial servicing fees.

5. Yet another GMAC Entity, Ally Bank, served as the custodian of the 2004-HE3 transaction and collected fees in that role. As custodian, Ally Bank had certain oversight and maintenance duties with respect to the 2004-HE3 transaction, including receiving and holding certain documents and other instruments delivered by the servicer relating to the underlying mortgage loans.

6. AGM is a leading provider of financial guaranties and credit enhancement products to investors, financial institutions, and other participants in the global capital markets. To make the securities in each of the Transactions attractive to investors, the GMAC Entities requested that AGM provide financial guaranty insurance policies ("Policies") for the Transactions, guaranteeing the payment of principal and interest to investors who would purchase notes issued on the deals. As a result of AGM's participation, the GMAC Entities were able to engage in the Transactions and earn millions of dollars in transaction and servicing fees.

7. To induce AGM to participate in the Transactions, the GMAC Entities made numerous representations and warranties to AGM concerning the mortgage loans underlying the Transactions and the conduct of the GMAC Entities. In reliance on these representations and warranties, AGM issued the Policies. Among other promises, the GMAC Entities represented that there were no material defaults, breaches, or violations as to the underlying mortgage loans, that (as to the 2006-HSA3 transaction) the mortgage loans were originated in accordance with the GMAC Entities' underwriting guidelines, and that the loan files were complete and contained

all documentation needed to verify the quality and characteristics of the mortgage loan, the mortgagor, and the mortgaged property. The GMAC Entities further represented and warranted that there were no material defaults, breaches, or violations in their servicing of the underlying mortgage loans.

8. The GMAC Entities' representations and warranties were essential to AGM's decision to issue the Policies. Mortgage loans with a default at origination, or which do not comply with guidelines or lack required documentation, bear a higher expected default rate, and upon default, bear a higher expected loss. Such mortgage loans thus pose a higher risk to insurers such as AGM. AGM relied on the truth and accuracy of the GMAC Entities' contractual representations and warranties in agreeing to provide insurance. Indeed, AGM's ability to accurately assess the risks of the Transactions depended entirely on the truthfulness of the GMAC Entities' disclosures and representations and warranties about the quality of the mortgage loan pools and the GMAC Entities' underwriting and servicing standards.

9. The GMAC Entities materially breached numerous representations and warranties and other contractual obligations. For instance, AGM has discovered the following: (a) evidence of misrepresentations by borrowers in connection with the origination of mortgage loans (breaching, among other things, the representation that the mortgage loans were not in default, breach, or violation of their relevant loan agreements and mortgages); (b) numerous instances of missing, critical loan documentation; (c) discrepancies between the data provided by the GMAC Entities at the time of the Transactions and the information in the loan files; (d) violations of the GMAC Entities' underwriting guidelines; and (e) failure to provide the required notice to AGM before the sale of hundreds of millions of dollars in subsequent mortgage loans into the securitization trusts, many of which were mortgage loans that were themselves in breach

of the GMAC Entities' representations and warranties, and which have subsequently defaulted at an alarming rate.

10. Based on the widespread defects in the mortgage loan pools underlying the Transactions and the fact that the GMAC Entities and their related brokers and correspondents originated, sold, and serviced the mortgage loans in these pools, the GMAC Entities were aware of the noncompliance of the mortgage loans with the representations and warranties made to AGM and other counterparties. The GMAC Entities breached their contractual obligations by nevertheless subsequently failing to repurchase or substitute these defective mortgage loans as required.

11. The GMAC Entities fundamentally frustrated the parties' bargains through their material and pervasive breaches of their representations and warranties, their contractual loan-level repurchase or substitution obligations, their contractual obligations to provide notices, files, and other documents, other conditions precedent and covenants, and the parties' contracts as a whole. Defendants' breaches have inflicted and continue to inflict tremendous harm on AGM, including AGM's payment of approximately $55.7 million in claims in the Transactions as of the April 25, 2012 distribution date, and potentially tens of millions of dollars more in claims AGM may be required to pay in the future.

12. AGM also seeks reimbursement and indemnity for all of its costs, expenses, and losses resulting and that may in the future result from the GMAC Entities' breaches, including Policy claim payments, related expenses, and attorneys' fees.

THE PARTIES

13. AGM is a New York corporation with its principal place of business at 31 West 52nd Street, New York, New York 10019.

14. GMAC Mortgage, LLC (f/k/a GMAC Mortgage Corporation) is a limited liability company organized under the laws of the state of Delaware with its principal place of business at 1100 Virginia Drive, Fort Washington, PA 19034.

15. Residential Asset Mortgage Products, Inc. is a Delaware corporation. Its principal place of business is at 8400 Normandale Lake Blvd. Suite 600, Minneapolis, MN 55437.

16. Ally Bank (f/k/a GMAC Bank) is an online bank chartered under Utah law, with its principal place of business at 6985 Union Park Center, Midvale, UT 84047.

17. Residential Funding Company, LLC (f/k/a Residential Funding Corporation) is a limited liability company organized under the laws of the State of Delaware. Its principal place of business is at 8400 Normandale Lake Blvd. Suite 250, Minneapolis, MN 55437.

18. Residential Capital, LLC (f/k/a Residential Capital Corporation) is a Delaware limited liability corporation and a wholly-owned subsidiary of Ally Financial. Its principal place of business is at One Meridian Crossings, Minneapolis, MN 55423. ResCap is the corporate parent of GMACM.

19. Ally Financial (f/k/a GMAC, LLC) is a Delaware corporation with its principal place of business in Detroit. Michigan. Its principal place of business is at 200 Renaissance Center, Detroit, MI 48265. Ally Financial is the parent company of ResCap, GMACM, and all GMACM-affiliated entities relevant to this action.

20. Residential Funding Mortgage Securities II, Inc. is a Delaware corporation. Its principal place of business is at 8400 Normandale Lake Blvd., Suite 600, Minneapolis, MN 55437.

JURISDICTION AND VENUE

21. This Court has jurisdiction pursuant to 28 U.S.C. § 1332. AGM and the Defendants are citizens of different States, and the amount in controversy is well in excess of $75,000.

22. Venue is proper in this District under 28 U.S.C. §§ 1391(a)(2) and 1391(a)(3) and as contractually agreed to by the parties in this action. Moreover, GMACM, RAMP, RFC, and RFMS, parties to this action, have agreed to submit to the jurisdiction of this Court, and have agreed not to challenge venue in this Court.

FACTUAL ALLEGATIONS

23. This case involves over a billion dollars in home equity loan backed securities sponsored by the GMAC Entities in two transactions, one executed in 2004 and one executed in 2006. Through the Policies, AGM guaranteed certain payments of principal and interest on the securities. AGM brings this suit because the GMAC Entities breached their representations, warranties, and obligations under the Transaction Documents, causing AGM significant and continuing injury.

24. In the period relevant to this action, the GMAC Entities originated, acquired, sold, and serviced residential mortgage loans, including the mortgage loans securing the Transactions, and, from time to time, arranged for the securitization of those mortgage loans and the sale of securities collateralized by those mortgage loans to investors, often in the form of notes.

25. The two seller/servicers in the Transactions, GMACM and RFC, are both subsidiaries of GMAC-RFC Holding Company, LLC ("GMAC-RFC"). GMAC-RFC is a subsidiary of ResCap, which in turn is a subsidiary of Ally Financial, which has exercised domination and control over its subsidiaries' actions, including GMACM, Ally Bank, ResCap, and RFC.

26. GMAC-RFC was the fourth largest subprime mortgage lender in 2004, when it loaned $26 billion to subprime borrowers. *See Financial Crisis Inquiry Report, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States* (the "FCIC Report"), published in January 2011, at 504.

27. The FCIC Report notes that, in light of Ally Financial and its subsidiaries' systematic failure to ensure the credit quality of the mortgage loans backing its securitizations, repurchase demands against GMACM and Ally Financial have mounted. From 2007 to 2010, the Federal National Mortgage Association ("Fannie Mae") has forced Ally Financial to buy back approximately $838 million worth of mortgage loans that served as collateral in securitizations in which Fannie Mae invested. *Id.* at 225. And in 2009 and 2010, the Federal Home Loan Mortgage Corporation ("Freddie Mac") forced Ally Financial to buy back approximately $453 million worth of mortgage loans that served as collateral in securitizations in which Freddie Mac invested. *Id.*

28. Today, a very high percentage of GMAC-RFC-originated mortgage loans have suffered delinquencies or been charged off, and the mortgage lending practices of Ally Financial's subsidiaries, including the GMAC Entities, have led Ally Financial to the brink of financial ruin. Ally Financial recently announced that it is seeking a buyer for all or parts of ResCap, which has reportedly lost $555 million since 2009.

Investigations and Lawsuits Relating to Mortgage Loan Securitizations by GMAC Entities and Affiliated Companies

29. GMACM is currently being investigated by the U.S. Department of Justice ("DOJ") for fraud related to the origination and underwriting of mortgage loans. On June 29, 2011, Ally Financial disclosed that DOJ had served GMACM with a subpoena that "includes a broad request for documentation and other information in connection with its investigation of potential fraud related to the origination and/or underwriting of mortgage loans." Ally Fin. Inc.,

Amendment No. 3 to Form S-1 Registration Statement under the Securities Act of 1933 (Form S-1/A), at 23 (June 29, 2011).

30. Additionally, on September 2, 2011, the Federal Housing Finance Authority ("FHFA") filed suit in the Supreme Court of the State of New York, New York County, against Ally Financial and several of its subsidiaries—including GMACM, RFC, RAMP—for claims arising in connection with their role in the public filing of offering documents containing false and misleading statements. These claims arise from Freddie Mac's purchase of over $6 billion in certificates issued through twenty-one transactions similar to the transactions at issue here. Among other claims, FHFA asserted a claim for common law fraud against various Ally Financial subsidiaries, including RFC and RAMP, and aiding and abetting claims against Ally Financial for its intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the subject certificates.

31. The FHFA also alleges violations of state and federal securities laws by Ally Financial and several of its subsidiaries stemming from false and misleading statements contained in publicly filed prospectuses, prospectus supplements, registration statements, and other offering documents. Additionally, FHFA has filed aiding and abetting claims against Ally Financial and certain of its affiliates for their intentional and substantial assistance in rendering material misrepresentations to Freddie Mac in connection with the sale of the certificates. The FHFA action seeks relief in the form of rescission and recovery of the $6 billion purchase price of the certificates, including lost principal and interest, as well as punitive damages and attorneys' fees and costs.

32. Ally Financial also disclosed that the U.S. Securities and Exchange Commission (the "SEC") served a subpoena on Ally Financial, requesting documentation regarding certain

"bulk settlements" relating to securitized mortgage loans, as well as a request for materials provided to investors and prospective investors in mortgage securitization transactions. *Id.*

33. Defendants GMACM and RFC face numerous pending lawsuits brought by investors and insurers relating to mortgage loan securitizations. For example, GMACM and RFC are each currently facing lawsuits brought by MBIA Insurance Corporation ("MBIA") in New York Supreme Court in which MBIA alleges that the defendants breached their contractual representations and warranties relating to the characteristics of mortgage loans contained in transactions similar to the ones at issue here, that defendants improperly serviced the mortgage loans, and that defendants affirmatively misrepresented the credit quality of tens of thousands of mortgage loans, with a total original principal balance of more than $4 billion, as a means of unfairly shifting to investors and MBIA risks that GMACM and RFC should have borne. Ally Financial and several of its subsidiaries including ResCap, Ally Bank, RFC, and GMACM are also currently facing several lawsuits brought by Financial Guaranty Insurance Company ("FGIC") in which FGIC alleges that in connection with transactions similar to the ones at issue here, the defendants, acting as alter egos of each other, affirmatively misrepresented the credit quality of tens of thousands of mortgage loans, with a total original principal balance of about $1.87 billion, as a means of unfairly shifting to investors and FGIC risks which the defendants should have borne and have breached their contractual obligations.

34. According to Ally Financial's most recent SEC filings, as of April 27, 2012, there are more than 30 pending lawsuits against Ally Financial's mortgage-related subsidiaries, including in many instances GMACM and RFC, as well as Ally Financial itself. *See* Ally Fin. Inc., Quarterly Report (Form 10-Q), at 72 (April 27, 2012); Ally Fin. Inc., Annual Report (Form 10-K), at 229, 230 (Feb. 28, 2012); Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011). The plaintiffs in those suits have alleged, among other things, that Ally Financial's

various subsidiaries made misstatements and omissions in registration statements, prospectuses, prospectus supplements, and other documents related to mortgage loan securitizations. The alleged misstatements and omissions typically concern false representations and warranties that the mortgage loans complied with underwriting standards. Ally Fin. Inc., Quarterly Report (Form 10-Q), at 72 (April 27, 2012); Ally Fin. Inc., Quarterly Report (Form 10-Q), at 159 (Nov. 4, 2011).

35. Moreover, Ally Financial has disclosed that it expects additional lawsuits from financial guaranty or "monoline" insurers, like AGM, given that Ally Financial and its subsidiaries sold $42.7 billion of mortgage loans into securitizations "wrapped" by such insurers from 2004 to 2007. During the year ended December 31, 2011, Ally Financial and its subsidiaries have received repurchase claims from monoline insurers for $265 million worth of mortgages related to securitizations it consummated between 2004 and 2007. In its 2011 Annual Report (Form 10-K), Ally Financial disclosed that it has already reserved $825 million for representations and warranties claims and confirmed that "additional litigation with other monolines is likely." Ally Fin. Inc., Annual Report (Form 10-K), at 98, 225 (Feb. 28, 2012).

36. According to its most recent quarterly report, Ally Financial believes that "the total exposure of the applicable Mortgage Companies to mortgage representation and warranty claims is most significant for loans originated and sold between 2004 through 2008." Ally Fin. Inc., Quarterly Report (Form 10-Q), at 116 (April 27, 2012). This period encompasses the closing dates of both the 2004-HE3 and 2006-HSA3 Transactions, as well as the period during which GMACM sold additional mortgage loans into the 2004-HE3 Trust.

37. In addition to the pending investigations and lawsuits involving their woeful mortgage loan origination and underwriting practices, the GMAC Entities have been punished severely for their misconduct in mortgage loan servicing.

38. For example, on February 9, 2012, the Federal Reserve Board announced that Ally Financial, its subsidiaries, including GMACM, and several other mortgage loan servicers would be required to pay $766.5 million in monetary sanctions for "unsafe and unsound processes and practices in residential mortgage loans servicing and foreclosure processing." Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2012). And on February 12, 2012, the Federal Reserve Board imposed over $200 million of this fine against Ally Financial, ResCap, and GMACM pursuant to an assessment order, which requires that the sanctions be paid into various borrower assistance programs and nonprofit programs established to help victims of improper servicing and foreclosure practices. *See In re Ally Fin. Inc.*, FRB Docket Nos. 12-006-CMP-HC & 12-006-CMP-DEO (Feb. 10, 2012) (the "Assessment Order"). According to the Federal Reserve Board, the sanction "takes into account the maximum amount prescribed for unsafe and unsound practices under the applicable statutory limits, the comparative severity of the institutions' misconduct, and the comparative sizes of the institutions' foreclosure activities." *See* Press Release. Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2012).

39. Also on February 9, 2012, the United States Attorney General announced that Ally Financial will take part in a $25 billion settlement to resolve claims brought by the government in response to the "**reckless and abusive mortgage practices**" of Ally Financial and four similarly situated bank-holding companies. Eric Holder. U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012). Although the settlement releases Ally Financial from certain civil claims brought by the DOJ and multiple state attorneys general, *see id.*; National Mortgage Settlement, Servicing Standard Highlights,

available at http://www.nationalmortgagesettlement.com (last visited Mar. 23, 2012), the settlement was not designed to resolve any other liabilities that Ally Financial has incurred through its improper origination, securitization, and servicing practices. *See* National Mortgage Settlement, About the Settlement, http://www.nationalmortgagesettlement.com/about (last visited Mar. 23, 2012).

40. According to the Attorney General, the $25 billion settlement and $766.5 million sanctions are just "the latest step forward" in holding Ally Financial and others accountable for "egregious mortgage loan servicing abuses." Eric Holder, U.S. Attorney General, Remarks at the Mortgage Servicers Settlement Press Conference (Feb. 9, 2012).

41. In addition to these recent settlements and the Assessment Order, the Federal Reserve Board and the Federal Deposit Insurance Corporation (the "FDIC") previously ordered Ally Financial, GMACM, and several other Ally Financial subsidiaries to adopt new procedures and practices in relation to mortgage loan servicing. *See In re Ally Fin. Inc.,* FRB Docket Nos. l1020-B-HC & 11020-B-DEO, FDIC-11-123b (April 13, 2011).

The 2004-HE3 Transaction

42. In 2004, AGM entered into a transaction with defendants GMACM and RAMP to guaranty approximately $977 million in notes backed by home equity loans that GMACM had either originated or purchased from one of its affiliates. In this transaction, the GMAC Home Equity Loan Trust 2004-HE3 served as the Issuer of approximately $977 million in notes.

43. In this transaction, GMACM acted as both Seller and Servicer of the mortgage loans, and Ally Bank acted as the Custodian.

44. The 2004-HE3 transaction was structured to permit GMACM to add mortgage loans to the pool after closing ("Subsequent Mortgage Loans"). GMACM was permitted to sell Subsequent Mortgage Loans to the pool on certain Subsequent Transfer Dates pursuant to the

terms of Subsequent Transfer Agreements—but *only* in compliance with the conditions imposed upon such transfers in the Transaction Documents.

45. GMACM and RAMP offered the 2004-HE3 notes for sale pursuant to, among other things, a prospectus and a prospectus supplement that touted AGM's involvement in the 2004-HE3 transaction as the "Enhancer," as well as AGM's "triple-A" ratings. The prospectus supplement also stated that "[a]ll of the mortgage loans were underwritten generally in accordance with GMACM's underwriting standards," including the Subsequent Mortgage Loans.

46. AGM agreed to issue a financial guaranty insurance policy related to the 2004-HE3 transaction based on explicit representations and warranties by the Defendants as to the mortgage loans backing those securities. This Policy enhanced the ratings and marketability of the 2004-HE3 notes.

47. In connection with the 2004-HE3 transaction and related 2004-HE3 Policy, GMACM, RAMP, Ally Bank, and AGM executed a number of Transaction Documents.

2004-HE3 Mortgage Loan Purchase Agreement

48. Through a Mortgage Loan Purchase Agreement ("2004-HE3 MLPA"), GMACM sold a pool containing thousands of home equity loan mortgages to RAMP and RAMP deposited them with the GMAC Home Equity Loan Trust 2004-HE3, which would issue the securities at issue.

49. The 2004-HE3 MLPA expressly identifies the Note Insurer (termed the Enhancer) as AGM. The 2004-HE3 MLPA further provides that AGM is a third-party beneficiary under the agreement and is entitled to enforce the agreement. 2004-HE3 MLPA § 8.11.

50. In contracting with AGM (referred to as "Financial Security" in the transaction documents) to purchase financial guaranty insurance on the securities, GMACM made a number of representations and warranties in the 2004-HE3 MLPA concerning the quality and

characteristics of the mortgage loans underlying the transaction. 2004-HE3 MLPA § 3.1. These representations and warranties are materially false, and based on information obtained by AGM on samples of mortgage loans to date, affect a substantial number of mortgage loans in the pool. GMACM represented that:

(a) GMACM "is or will be in compliance with the laws of each state in which any Mortgaged Property is located to extent necessary to ensure the enforceability of each Mortgage Loan," 2004-HE3 MLPA § 3.1(a)(i);

(b) "The information set forth in the Mortgage Loan Schedule with respect to each Mortgage Loan or the Mortgage Loans is true and correct in all material respect as of the date or dates respecting which such information is initially furnished," *Id.* § 3.1(b)(i);

(c) "To the best of GMACM's knowledge, there is no valid offset, defense or counterclaim of any obligor under any Loan Agreement or Mortgage," *Id.* § 3.1(b)(iv);

(d) The Mortgage File for each Mortgage Loan "contains or will contain . . . each of the documents and instrument specified to be included therein," *Id.* § 3.1(b)(ix);

(e) "A policy of hazard insurance and flood insurance, if applicable, was required from the Mortgagor for the Mortgage Loan when the Mortgage Loan was originated," *Id.* § 3.1(b)(xxviii);

(f) "To the best of the GMACM's knowledge, the related Loan Agreement and the related Mortgage at the time it was made complied in all material respects with applicable local, state and federal laws, including, but not limited to, applicable predatory lending laws," *Id.* § 3.1(b)(x);

(g) "Other than with respect to a payment default, there is no material default, breach, violation or event of acceleration existing under the terms of any Loan Agreement or Mortgage and, to the best of GMACM's knowledge, no event which, with notice and expiration

of any grace or cure period, would constitute a material default, breach, violation or event of acceleration under the terms of any Loan Agreement or Mortgage, and no such material default, breach, violation or event of acceleration has been waived by GMACM involved in originating or servicing the related Mortgage Loan," *Id.* § 3.1(b)(xxix);

(h) "GMACM used no selection procedures that identified the Mortgage Loans as being less desirable or valuable than other comparable mortgage loans originated or acquired by GMACM under the GMACM Home Equity Program. The Mortgage Loans are representative of GMACM's portfolio of adjustable rate mortgage loans that were originated under the GMACM Home Equity Program," *Id.* § 3.1(b)(xxxvii).

51. The preceding provisions are examples of the dozens of representations and warranties GMACM made in the transaction documents concerning the quality and characteristics of the mortgage loans in the 2004-HE3 transaction. These representations and warranties were essential to AGM's agreement to issue its financial guaranty insurance policy in the 2004-HE3 transaction. In fact, AGM agreed to issue the insurance policy subject only to the satisfaction of certain conditions precedent, including a certification that the representations and warranties made in the Transaction Documents "shall be true and correct on and as of the Closing Date as if made on the Closing Date." 2004-HE3 I&I § 3.01(d).

52. GMACM, as the mortgage loan originator and seller, assumed the risk and the burden of assessing the characteristics and attributes of those mortgage loans. Accordingly, among other promises, GMACM represented and warranted that it provided complete and accurate information as to the mortgage loans and that there were no material defaults, breaches, or violations relating to the mortgage loans. GMACM further assumed the obligation of verifying the accuracy of the representations and warranties concerning the mortgage loans and loan documentation and the completeness of the documentation pertaining to the mortgage loans,

which backed the securities AGM was to insure. In turn, AGM, as the Note Insurer, bore the burden of evaluating whether mortgage loans bearing the characteristics, attributes, loan documentation and other items as represented and warranted by GMACM would perform as AGM had projected, despite economic variables that might change post-closing.

53. This explicit division of responsibility was a reasoned risk allocation. GMACM and its affiliates originated the mortgage loans and prepared and finalized the loan documentation and loan files before conveying the mortgage loans to the trusts that issued the securities AGM insured. GMACM owned and serviced the mortgage loans, and Ally Bank, as Custodian, held the loan files, which afforded these entities access and control over information required to evaluate the mortgage loans. GMACM thus had the means to assess the quality of the prospective and actual mortgagors, mortgaged properties and other related mortgage loan characteristics and attributes, as well as the accuracy and completeness of the loan documentation, and—in the event a defect was discovered—exclude that mortgage loan from the securitization, or seek other recourse. By contrast, AGM did not originate any of the underlying mortgage loans, has never been in privity with the mortgage loan brokers with whom GMACM originated the mortgage loans, did not prepare or finalize the loan documentation and loan files, never owned the mortgage loans or the loan files, and lacks direct recourse against the mortgage loan brokers with whom GMACM originated the mortgage loans.

54. For these reasons, these sophisticated contracting parties sensibly agreed that GMACM would bear the risk and the burden of assessing the validity, sufficiency, and accuracy of the loan documentation and characteristics and attributes of the mortgage loans it originated and conveyed to the owning trusts, and AGM would bear the burden of evaluating whether mortgage loans bearing (amongst other things) these characteristics, attributes, and loan documentation would perform after the closing of the transactions as AGM had projected. In

reliance on GMACM's contractual representations and warranties about the mortgage loans' quality and characteristics, AGM reviewed a sampling of certain mortgage loan documentation in order to confirm that the documentation corresponded to the parameters GMACM had provided AGM. AGM was not required to verify the data provided by GMACM—that, by explicit agreement, was GMACM's contractual responsibility.

55. The MLPA required GMACM—within 45 or 90 days (depending on the circumstances) of discovering or receiving notice of a breaching mortgage loan—to "cure such breach in all material respects" *or* either (a) repurchase the breaching mortgage loan or (b) substitute a nonbreaching mortgage loan for that breaching mortgage loan. *See* 2004-HE3 MLPA § 3.1 (e). AGM has demanded that GMACM comply with this provision by sending GMACM "put back" demands—but to date, GMACM has not repurchased, substituted, or cured a single mortgage loan and therefore breached its repurchase-or-cure obligations.

56. The 2004-HE3 MLPA also contains numerous provisions regarding the sale of Subsequent Mortgage Loans to the Issuer on Subsequent Transfer Dates. *See, e.g.*, 2004-HE3 MLPA § 2.2. Although this transaction was structured to allow GMACM to sell these Subsequent Mortgage Loans into the existing pool, the MLPA sets forth specific notice and consent provisions relating to AGM, in order to give AGM the opportunity to assess and either approve or reject these new mortgage loans. For instance, the MLPA provides that:

(a) GMACM must provide certain entities, *including AGM* ("the Enhancer"), "with a timely Addition Notice . . . which notice shall be given no later than seven Business Days prior to the related Subsequent Transfer Date, and shall designate the Subsequent Mortgage Loans to be sold to the Issuer, the aggregate Principal Balance of such Subsequent Mortgage Loans as of the related Subsequent Cut-Off Date and any other information reasonably requested

by the Indenture Trustee or the Enhancer with respect to such Subsequent Mortgage Loans." 2004-HE3 MLPA § 2.2(b)(i);

(b) GMACM "shall have delivered to the Indenture Trustee and the Enhancer a duly executed Subsequent Transfer Agreement . . . (A) confirming the satisfaction of each condition precedent and representations and warranties specified in this Section 2.2(b) and in Section 2.2(c) and in the related Subsequent Transfer Agreement and (B) including a Mortgage Loan Schedule listing the Subsequent Mortgage Loans." *Id.* § 2.2(b)(ii);

(c) AGM "shall have approved the sale of the Subsequent Mortgage Loans (which approval shall not be unreasonably withheld) within five (5) Business Days of receipt of a loan tape containing the same fields of information regarding the Subsequent Mortgage Loans that was delivered to the Enhancer prior to the Closing Date with respect to the Initial Mortgage Loans." *Id.* § 2.2(b)(vi);

(d) The Issuer is not obligated to purchase any Subsequent Mortgage Loan unless the loan satisfies, among many other conditions, the following: compliance with "the representations and warranties specified in the related Subsequent Transfer Agreement" and MLPA; that GMACM has not "selected such Subsequent Mortgage Loans in a manner that it reasonably believes is adverse to the interests of the Noteholders or the Enhancer"; that GMACM "will deliver to the Enhancer and the Indenture Trustee certain Opinions of Counsel described in Section 2.2(b) and acceptable to the Enhancer and the Indenture Trustee with respect to the conveyance of such Subsequent Mortgage Loans"; and that "such Subsequent Mortgage Loan will be underwritten substantially in accordance with the criteria set forth under . . . the Prospectus Supplement." *Id.* Any Subsequent Mortgage Loan "materially varying" from these criteria may only be purchased by the Issuer if it is "acceptable to the Enhancer, in its reasonable discretion." *Id.*

(e) "[w]ithin five Business Days after each Subsequent Transfer Date, GMACM shall deliver to the Rating Agencies, the Indenture Trustee and the Enhancer a copy of the Mortgage Loan Schedule reflecting the Subsequent Mortgage Loans in electronic format." *Id.* § 2.2(c).

57. GMACM breached these disclosure-and-notice obligations. Despite the fact that through 2007, GMACM had sold hundreds of millions of dollars of Subsequent Mortgage Loans into the 2004-HE3 Trust, AGM never received any of the notice documents described above and required by the MLPA, and GMACM failed to obtain AGM's consent prior to selling the Subsequent Mortgage Loans to the 2004-HE3 Trust. These continuing contractual breaches deprived AGM of its ability to confirm that the Subsequent Mortgage Loans did not alter the risk profile in the transaction. Indeed, the Subsequent Mortgage Loans added by GMACM to the 2004-HE3 Trust have performed worse than the initial mortgage loans sold to the 2004-HE3 Trust.

2004-HE3 Servicing Agreement

58. GMACM and the 2004-HE3 Trust entered into a Servicing Agreement ("2004-HE3 SA") under which GMACM would service the underlying mortgage loans. The 2004-HE3 SA set forth numerous duties of GMACM and again designates AGM, as the Enhancer, as a third-party beneficiary to the agreement. 2004-HE3 SA § 8.05.

59. Under the terms of the 2004-HE3 SA, GMACM represented and warranted that it would "enforce the representations and warranties of the Sellers pursuant to the [2004-HE3 MLPA]." Since GMACM was both the Seller and the Servicer, GMACM effectively promised to enforce its own representations and warranties. 2004-HE3 SA § 2.03.

60. The 2004-HE3 SA reiterated the obligation of GMACM as the Seller to either cure breaches of these representations and warranties in all material respects within the

designated cure period, or to repurchase defective Mortgage Loans or substitute eligible substitute mortgage loans. 2004-HE3 SA § 2.03. As previously stated, GMACM is in breach of its repurchase obligations. GMAC is also in breach of its notice obligations under the 2004-HE3 SA. GMACM represented and warranted in the 2004-HE3 SA that it would "promptly notify [the] Seller"—again, itself—of any such breaches. *Id.*

61. The Servicing Agreement also included the following additional representations and warranties:

(a) "[T]he servicing of the Mortgage Loans has at all times been conducted in material compliance with all applicable federal, state and local laws, rules and regulations and there has been no material violation of any such laws, rules or regulations arising out of the servicing of the Mortgage Loans," *id.* § 2.01(g);

(b) "The Servicer shall service and administer the Mortgage Loans in a manner generally consistent with the terms of the Program Guide," *id.* § 3.01(a);

(c) "Whenever required by statute or regulation, the Servicer shall provide to the Enhancer, any Securityholder upon reasonable request (or a regulator for a Securityholder) or the Indenture Trustee, reasonable access to the documentation regarding the Mortgage Loans." *Id.* § 3.12.

62. Upon information and belief regarding the 2004 transaction's performance, GMACM, as Seller and Servicer, has breached its obligations under the 2004-HE3 Transaction Documents, including but not limited to Section 2.01—which provides that "the servicing of the Mortgage Loans has at all times been conducted in material compliance with all applicable federal, state and local laws, rules and regulations and there has been no material violation of any such laws, rules or regulations arising out of the servicing of the Mortgage Loans."

63. GMACM's servicing violations have been documented by various governmental agencies, including the Federal Reserve Board, which noted GMACM's "unsafe and unsound processes and practices in residential mortgage loans servicing and foreclosure processing." Press Release, Fed. Reserve Bd., Federal Reserve Board Announces Agreement in Principle with Five Banking Organizations Regarding the Issuance of Monetary Sanctions (Feb. 9, 2011). Upon information and belief, GMACM's servicing of the underlying residential mortgage loans in this case violated its obligations under the Transaction Documents.

64. Moreover, on information and belief, GMACM is and has been aware that a substantial number of the underlying mortgage loans, whether acquired at the closing or thereafter, were defective and, thus, in breach of its own representations and warranties. Despite this knowledge, GMACM has failed to repurchase the defective mortgage loans or replace them with mortgage loans which conformed to the underwriting guidelines, as it is required to do so.

65. In December 2010, because of the poor performance of the two Transactions, AGM terminated GMACM as servicer, pursuant to its contractual right, and Specialized Loan Servicing, LLC ("SLS") became the new servicer. After SLS became the servicer, it provided AGM with certain loan files for the 2004 transaction, including certain loan files for the Subsequent Mortgage Loans added by GMACM in the 2004 transaction. AGM wanted these loan files so it could compare the information in those loan files to GMACM's underwriting guidelines and GMACM's representations and warranties in the contractual documents. Before the servicer termination, AGM had repeatedly requested the same loan files from GMACM—but GMACM never provided a single loan file from the 2004 transaction to AGM, in breach of its contractual obligations to do so.

2004-HE3 Custodial Agreement

66. Also on June 30, 2004, Ally Bank (then known as GMAC Bank), entered into the 2004-HE3 Custodial Agreement ("2004-HE3 CA"), whereby it agreed, among other things, to serve as Custodian of the underlying mortgage loan notes on behalf of the 2004-HE3 Trust. AGM is an express third-party beneficiary of that agreement. 2004-HE3 CA § 4.6.

67. In the Custodial Agreement, Ally Bank undertook several obligations to AGM concerning the manner in which Ally Bank would ensure that the Mortgage Loans contained complete and accurate information, so that GMACM was in compliance with its representations and warranties regarding the origination, selection, and characteristics of those mortgage loans. The Custodial Agreement provides:

(a) "The Custodian shall deliver to the Indenture Trustee . . . with a copy to the Enhancer, with respect to the Loan Agreements related to the Initial Mortgage Loans and the Loan Agreements related to any Subsequent Mortgage Loans, on or prior to the Closing Date or the related Subsequent Transfer Date, as applicable, an Initial Certification . . . evidencing receipt of the Loan Agreements for each Initial Mortgage Loan and the Loan Agreements for each Subsequent Mortgage Loan listed on the Mortgage Loan Schedule or Amended Mortgage Loan Schedule." 2004-HE3 CA § 2.2(a);

(b) "Within 90 days from the Closing Date or Subsequent Transfer Date, as applicable, the Custodian . . . shall deliver to the Indenture Trustee, as pledgee of the Issuer and to Financial Security Assurance Inc., as the Enhancer . . . a final certification . . . evidencing the completeness of the receipt of the Loan Agreements." *Id.* § 2.2(b).

68. The Custodial Agreement also states that "[u]pon discovery by the Custodian of a breach of any representation or warranty made by either Seller in the Purchase Agreement or assigned by either Seller pursuant to the Purchase Agreement with respect to a Mortgage Loan

relating to a Loan Agreement, the Custodian shall give prompt written notice to such Seller and the Enhancer." *Id.* § 2.3.

69. Once again, AGM never received any initial or final certifications relating to the Subsequent Mortgage Loans that GMACM sold, without AGM's knowledge, into the 2004-HE3 Trust. Ally Bank's breach of its contractual obligation to provide these certifications further deprived AGM of its right to assess and either accept or reject the risk associated with these Subsequent Mortgage Loans.

2004-HE3 Insurance and Indemnity Agreement

70. Concurrent with the 2004-HE3 MLPA and 2004-HE3 SA, GMACM, RAMP, and AGM entered into an Insurance and Indemnity Agreement ("2004-HE3 I&I").

71. The 2004-HE3 I&I defined "Operative Documents" to include the 2004-HE3 MLPA, 2004-HE3 SA, and the 2004-HE3 CA. 2004-HE3 I&I App. 1-2.

72. Under the 2004-HE3 I&I, GMACM and RAMP each represented and warranted, among other things, that:

(a) "The Operative Documents . . . will constitute the legal, valid and binding obligations of each of GMACM . . . and the Depositor, enforceable in accordance with their respective terms," 2004-HE3 I&I § 2.01(f);

(b) "Neither the **Operative Documents** to which it is a party nor other material information relating to the Mortgage Loans . . . contains **any statement of a material fact which was untrue or misleading in any material respect when made**. Each of GMACM . . . and the Depositor has no knowledge of any circumstances that could reasonably be expected to cause a Material Adverse Change with respect to GMACM . . . or the Depositor. Since the furnishing of the Documents, there has been no change nor any development or event involving a

prospective change known to GMACM . . . or the Depositor that would render any of the Documents untrue or misleading in any material respect," *id.* § 2.01(k);

(c) "Each of the representations and warranties of GMACM . . . and the Depositor **contained in the applicable Operative Documents** to which it is a party **is true and correct in all material respects** as of the date reflected therein and each of GMACM . . . and the Depositor hereby makes each such representation and warranty to, and for the benefit of, Financial Security [*i.e.*, AGM] as if the same were set forth in full herein," *id.* § 2.01(m).

(d) That the Offering Document "**does not contain any untrue statement of a material fact and does not omit to state a material fact necessary to make the statements made therein, in light of the circumstances under which they were made, not misleading as of the Closing Date.**" 2004-HE3 I&I § 2.01(l) (emphasis added). The Offering Document described the ostensible characteristics of the mortgage loans in the collateral pool, and among other things, stated that "[a]ll of the mortgage loans were underwritten generally in accordance with GMACM's underwriting standards." 2004-HE3 Prospectus Supplement, at S-40.

73. GMACM and RAMP further acknowledged AGM's position as a third-party beneficiary of the 2004-HE3 MLPA and 2004-HE3 SA: "Each of GMACM . . . and the Depositor agrees that Financial Security shall have all rights provided to Financial Security in the Operative Documents and that Financial Security shall constitute a third-party beneficiary with respect to such rights in respect of the Operative Documents and hereby incorporates and restates its representations, warranties and covenants as set forth therein for the benefit of Financial Security," *id.* § 2.02(k).

74. The 2004-HE3 I&I contains additional representations, warranties and covenants, many of which bolster those discussed above, that GMACM and RAMP made to persuade AGM to issue the requested financial guaranty insurance policy, including that GMACM and RAMP

would not "interfere in any material respect with the enforcement of any rights of Financial Security [AGM] under or with respect to any of the Operative Documents," *id.* § 2.03(a); that "[n]o practice, procedure or policy employed, or proposed to be employed, by GMACM . . . or the Depositor in the conduct of its business violates any law, regulation judgment, agreement, order or decree," *id.* § 2.01(h); and, again relating to AGM's right of access to mortgage loan information, GMACM would furnish to AGM numerous categories of financial documents and reports and, "promptly upon request, such other data as Financial Security [AGM] may reasonably request." *id.* § 2.02(c).

75. The 2004-HE3 I&I contains broad provisions defining events of default and AGM's remedies for any such events of defaults. The 2004-HE3 I&I defined an event of default to include circumstances where "[a]ny representation or warranty made by GMACM . . . or the Depositor hereunder or under the Operative Documents, or in any certificate furnished hereunder or under the Operative Documents, shall prove to be untrue or incomplete in any material respect," *id.* § 5.01(a).

76. Should an event of default occur, the 2004-HE3 I&I grants AGM broad remedies. AGM may "exercise any rights and remedies available under the Related Documents," *id.* § 5.02(a)(ii). The 2004-HE3 I&I also permits AGM to "take whatever action at law or in equity as may appear necessary or desirable in its judgment . . . to enforce performance of any obligation of the GMACM [or] the Depositor . . . under the Related Documents." *Id.* § 5.02(a)(iii).

77. Under the 2004-HE3 I&I, AGM has reimbursement rights, with interest, against GMACM for payments made by Financial Security that result from the failure of GMACM to fulfill certain responsibilities under the 2004-HE3 MLPA, and from "the enforcement, defense or preservation of any rights in respect of any of the Operative Documents." *Id.* § 3.03.

78. In addition, GMACM and RAMP agreed to indemnify AGM for all losses arising out of or related to their breach of the Operative Documents. *Id.* § 3.04(a).

2006-HSA3 Transaction

79. In 2006, the GMAC Entities again sought to issue over $200 million in securities backed by home equity loans. AGM agreed to issue a financial guaranty insurance policy covering these securities.

80. The transaction documents for this transaction (with RFC acting as seller, sponsor, and servicer, and RFMS as depositor) are substantially similar to those executed in connection with the 2004-HE3 transaction (namely, the 2006-HSA3 Home Equity Loan Purchase Agreement ["2006-HSA3 HELPA"], the 2006-HSA3 Servicing Agreement ["2006-HSA3 SA"], and the 2006-HSA3 Insurance and Indemnity Agreement ["2006-HSA3 I&I"]). As with the 2004 securitization, the GMAC Entities made comprehensive representations and warranties to induce AGM to provide financial guaranty insurance, and the GMAC Entities breached numerous representations and warranties contained in these documents.

2006-HSA3 Home Equity Loan Purchase Agreement

81. In the 2006-HSA3 transaction, RFC and its affiliates acted as both Seller and Servicer of the mortgage loans.

82. The 2006-HSA3 HELPA, pursuant to which RFC sold a pool of home equity loan mortgages to RFMS, contains many identical representations and warranties, on the part of seller RFC, as GMACM made in the 2004-HE3 MLPA: RFC attested to the truth and accuracy of the information in the Home Equity Loan Schedule (2006-HSA3 HELPA § 3.1(b)(i)); verified that there was no right of rescission, offset, etc. (*id.* § 3.1(b)(iv)); confirmed the completeness of the Mortgage Files (*id.* § 3.1(b)(ix)); represented that the Mortgage Loans complied with all applicable laws (*id.* § 3.1(b)(x)); made specific representations and warranties concerning the

quality of the mortgage loans, for instance that the CLTV for each mortgage loan was not in excess of 100% (*id.* § 3.1(b)(xiv)); and warranted that there was no material default, breach, etc. relating to the Mortgage Loans (*id.* § 3.1(b)(xxx)). RFC also represented that it complied with its own underwriting guidelines in originating the underlying mortgage loans—specifically, that "[a]ll of the Home Equity Loans have been underwritten in substantial compliance with the criteria set forth in the Program Guide," *Id.* § 3.1(b)(xli).

83. As with the 2004-HE3 transaction, these representations and warranties as to the mortgage loan characteristics and quality were essential to AGM's agreement to issue its Policy.

84. As with the 2004-HE3 MLPA, the 2006-HSA3 HELPA provides that AGM is a third-party beneficiary under the agreement and is entitled to enforce the agreement. *Id.* § 8.11. Indeed, the 2006-HSA3 HELPA expressly provides that RFC's representations and warranties are made directly to AGM, as the Credit Enhancer. *Id.* § 3.1.

2006-HSA3 Servicing Agreement

85. The 2006-HSA3 SA between RFC, as Master Servicer, and Issuer Home Equity Loan Trust 2006-HSA3 sets forth numerous duties of RFC and again designates AGM, as the Credit Enhancer, a third-party beneficiary to the agreement. The provisions of the 2006-HSA3 SA are substantially similar to those of the 2004-HE3 SA.

2006-HSA3 Insurance and Indemnity Agreement

86. Concurrent with the 2006-HSA3 HELPA and 2006-HSA3 SA, RFC, RFMS, and AGM entered into an Insurance and Indemnity Agreement ("2006-HSA3 I&I").

87. The 2006-HSA3 I&I defined "Transaction Documents" to include the 2006-HSA3 HELPA and the 2006-HSA3 SA. 2006-HSA3 I&I App. I.

88. The 2006-HSA3 I&I is substantially similar to the 2004-HE3 I&I regarding representations and warranties, events of default, remedies, reimbursement, and indemnity. The

2006-HSA3 I&I also expressly makes RFC and RFMS jointly and severally liable for any breach of their obligations. 2006-HSA3 I&I § 4.02(b).

The GMAC Entities Have Breached the Insurance and Indemnity Agreements and Transaction Documents

89. In the years since the 2004-HE3 I&I and the 2006-HSA3 I&I were executed, the performance of the mortgage loans in the securitized pools in each of the Transactions has dramatically deteriorated.

2004-HE3 Transaction

90. As of the April 25, 2012 distribution date, the 2004-HE3 transaction has incurred approximately $72.1 million in cumulative losses to collateral, and AGM has paid approximately $15.04 million in claims to noteholders. Given that there remains approximately $219.5 million of notes still outstanding in this deal, and that the performance of the 2004-HE3 Transaction has been very poor, AGM anticipates far greater losses and Policy payments on this transaction.

91. AGM has, on numerous occasions, directly requested loan files for charged-off mortgage loans from GMACM for the purpose of comparing the information in those files to GMACM's underwriting guidelines and GMACM's representations and warranties in the contractual documents. But despite these multiple requests, GMACM has never provided the requested loan files to AGM, in violation of its obligations under the Transaction Documents.

92. AGM has, however, been able to obtain from SLS a limited number of loan files underlying the 2004-HE3 transaction. What AGM found in its analysis of these loan files was extremely disturbing. In short, the majority of the mortgage loans AGM audited violated GMACM's underwriting guidelines. Many contained evidence of fraud or negligence in the origination process. AGM's review of the loan files further revealed substantial inaccuracies in the representations and warranties provided by GMACM regarding these mortgage loans, the mortgagors and the related mortgaged properties; GMACM's original underwriting and

origination processes regarding these loans; the identity, financial means, and occupational status of the mortgagors; and the completeness and accuracy of the loan documentation. Upon information and belief, as indicated by its decision to terminate GMACM as servicer, GMACM's *servicing* of the mortgage loans backing the securities that AGM insured was deficient. These defects and deficiencies represent material breaches of the GMAC Entities' representations and warranties in the relevant contractual documents. GMACM's continuing failure to repurchase any defective mortgage loans from the collateral pool, is a further breach of its contractual obligations under the Transaction Documents.

93. **Borrower Misrepresentations.** In its review of the loan files for the mortgage loans included in the 2004-HE3 transaction, AGM identified numerous instances where the borrower misrepresented, at the time of loan origination, employment, income, assets, debt obligations, and occupancy.

94. GMACM represented and warranted that "there is no material default, breach, violation or event of acceleration existing under the terms of any Loan Agreement or Mortgage." 2004-HE3 MLPA § 3.1(b)(xxix). The misrepresentations detailed above, each of which were in breach and violation of the relevant Loan Agreements and Mortgages, constitute a breach of GMACM's representations and warranties to AGM.

95. **Missing Loan File Documentation.** GMACM represented and warranted to AGM that the Mortgage File for each Mortgage Loan "contains or will contain . . . each of the documents and instruments specified to be included therein," 2004-HE3 MLPA § 3.1(b)(ix). Yet, in many cases, AGM discovered (during the course of its investigation of origination files for the mortgage loans included in the Transactions) that the loan files did not contain critical pieces of required information and/or contained deficient or defective loan documentation, including missing underwriting documents. Inclusion of mortgage loans with missing loan file

documentation in the pool breached the GMAC Entities' representations and warranties in their agreements with AGM.

96. **Discrepancies between data provided by GMACM at the time of the transaction and information in the loan file.** AGM has discovered that with regard to a large number of the mortgage loans it reviewed, the data pulled from the loan file during AGM's audit differs from "tape data" initially provided to AGM at the time of the transaction, in violation of § 2.01(k) of the 2004-HE3 I&I.

97. GMACM represented and warranted the "Accuracy of Information," which includes "material information relating to the Mortgage Loans . . . furnished to Financial Security in writing or electronic form by GMACM." 2004-HE3 I&I § 2.01(k).

98. GMACM represented and warranted that "[t]he information set forth in the Mortgage Loan Schedule with respect to each Mortgage Loan or the Mortgage Loans is true and correct in all material respect as of the date or dates respecting which such information is initially furnished," 2004-HE3 MLPA § 3.1(b)(i). The provision of inaccurate information to AGM with regard to numerous mortgage loans breached the GMACM representations and warranties in their agreements with AGM.

99. **Violations of underwriting guidelines.** In its audit of underlying mortgage loans relating to the 2004-HE3 transaction, AGM has discovered that the vast majority of the mortgage loans do not conform to GMAC's description of the underwriting guidelines as contained in the Offering Document, in violation of § 2.01(l) of the 2004-HE3 I&I.

100. **Failure to cure or repurchase.** Based on the widespread defects in the mortgage loan pool underlying the Transactions, and the fact that GMACM, its affiliates, and its related brokers and correspondents, themselves originated, sold, and serviced those mortgage loans, AGM believes that GMACM was aware of the substantial noncompliance of the mortgage loans

with the representations and warranties made to AGM and other counterparties. GMACM breached its contractual obligations by nevertheless subsequently failing to repurchase or substitute these defective mortgage loans.

101. In February 2012, AGM submitted a repurchase demand to GMACM concerning mortgage loans it was able to review detailing the breaches and violations it found. GMACM responded by informing AGM that it would not repurchase a single mortgage loan. Needless to say, GMACM has completely failed to comply with its contractual repurchase obligations.

102. **Violations of obligations to provide notice relating to Subsequent Mortgage Loans.** As detailed above, GMACM and Ally Bank violated their respective contractual obligations in the 2004-HE3 MLPA (GMACM) and the 2004-HE3 CA (Ally Bank) to provide required notices and documents relating to the hundreds of millions of dollars' worth of Subsequent Mortgage Loans that GMACM sold to the 2004-HE3 Trust without AGM's knowledge.

103. These breaches deprived AGM of its contractual rights to evaluate, and then accept or reject these additional mortgage loans. The circumstances of GMACM's sale of these mortgage loans to the 2004-HE3 Trust are rather suspect. GMACM continued to sell mortgage loans to the trust through 2007 for three years after the closing of the 2004 transaction without ever following the contractual requirements for adding new mortgage loans to 2004-HE3 Trust. Of the approximately $72.1 million in collateral losses suffered on the mortgage loans in the 2004-HE3 Trust, approximately $46 million of those losses were related to Subsequent Mortgage Loans. Given that these mortgage loans have defaulted at a rate three times higher than the original mortgage loans and the pre-funding mortgage loans, it is reasonable to conclude that GMACM had a motive for withholding the required mortgage loan data from AGM.

104. **Violations of obligations to provide requested loan documents.** As discussed above, GMACM has failed to fulfill its contractual duties under the 2004-HE3 SA and 2004-HE3 I&I to provide AGM with loan files requested on multiple occasions.

2006-HSA3 Transaction

105. As of the April 25, 2012 distribution date, the 2006-HSA3 transaction has incurred approximately $57.2 million in cumulative losses to collateral, and AGM has paid approximately $40.7 million in claims relating to the 2006-HSA3 transaction.

106. These substantial losses led AGM to investigate the mortgage loans in the 2006-HSA3 Trust beginning in 2007. As of April 30, 2012, AGM has reviewed nearly $46 million in mortgage loans, and has discovered rampant breaches of the GMAC Entities' representations and warranties under the Transaction Documents.

107. The GMAC Entities were aware of the substantial noncompliance of the mortgage loans with the representations and warranties made to AGM and other counterparties, but nevertheless breached their contractual obligations by failing to repurchase or substitute these defective mortgage loans upon discovery of the violations.

108. Faced with the GMAC Entities' inaction, AGM has been forced to make formal demands for repurchases of mortgage loans, beginning in December 2007 and continuing through May 2011.

109. In the first three rounds of repurchase demands—on December 6, 2007, April 18, 2008, and September 4, 2008—the GMAC Entities ultimately agreed, after extensive time, effort and resources were expended by AGM, to repurchase substantial numbers of defective mortgage loans (85%, 43%, and 72% of mortgage loans identified in AGM's demands, respectively). Despite their knowledge of extensive breaches in the collateral underlying the 2006-HSA3 transaction, the GMAC Entities did not repurchase any mortgage loans outside of the requests

made by AGM. But given the high incidence of breaches AGM identified to the GMAC Entities, and the GMAC Entities' agreement that substantial percentages warranted repurchase, the GMAC Entities were certainly aware that a significant percentage of the mortgage loans from the securitized pool outside of those formally "putback" to them would likely have the same types of material breaches.

110. Further, with regard to AGM's four subsequent putback requests in 2009 and 2011, the GMAC Entities became markedly uncooperative and abruptly refused to cure or repurchase more than a tiny percentage of the defective mortgage loans identified by AGM. Despite AGM's identification of over $32 million in total defective mortgage loans in these later requests, the GMAC Entities have agreed to repurchase only $5.5 million of those mortgage loans. This constitutes a further material breach of the GMAC Entities' cure, repurchase, and substitution obligations under the Transaction Documents. The GMAC Entities' deadline to comply with their cure-or-repurchase obligations under the 2006-HSA3 transaction documents has long since expired.

111. Given the high incidence of misrepresentations found in the mortgage loans that AGM has investigated to date, as well as deficiencies and defects in the loan documentation, it is a virtual certainty that a significant percentage of the mortgage loans from the 2004-HE3 and 2006-HSA3 securitized pools that AGM has not yet reviewed to date have the same or similar breaches.

Ally Financial's Domination and Control of its Subsidiaries Resulted in a Single Corporate Enterprise.

112. Ally Financial is the ultimate parent of all of the other Defendants to this action. Ally Financial owns ResCap, which in turn owns GMACM, RAMP, RFMS and RFC. Ally Financial—as the ultimate parent of ResCap, GMACM, Ally Bank, RAMP, RFMS and RFC—

has the practical ability, which it has repeatedly and admittedly exercised, to direct and control the actions of its subsidiaries.

113. Ally Financial has recently admitted to the Federal Reserve Board and FDIC that it "indirectly owns and controls . . . numerous direct and indirect nonbank subsidiaries, including Residential Capital, LLC . . . "ResCap") and its direct and indirect subsidiaries." *See In re Ally Fin. Inc.*, FRB Docket Nos. 11020-B-HC & 11020-B-DEO. FDIC-11-123b (April 13, 2011) (emphasis added).

114. Ally Financial's public statements and actions from at or around the time of the Transactions' closings until the present, also demonstrate that Ally Financial: (i) owns a majority of its subsidiaries' stock; (ii) shares resources, management, and employees with its subsidiaries; (iii) considers its mortgage businesses to be "units" of its business; and (iv) has a business relationship with its subsidiaries designed to benefit itself at the expense of its subsidiaries.

115. From its inception as the ultimate parent company, Ally Financial focused on controlling the management of its subsidiaries to the point that it treated ResCap as an extension of itself, rather than as a subsidiary whose dealings were at arm's length.

116. ResCap, for example, did not conduct any operations whatsoever until GMAC Residential Holding Corp. and GMAC-RFC Holding Corp.—two of Ally Financial's wholly-owned subsidiaries—were transferred to it in March 2005. Those two subsidiaries represented substantially all of Ally Financial's mortgage loan securitization business.

117. On December 1, 2006, Ally Financial had its inaugural conference call with investors, at which time Rick Buxton, then head of Ally Financial's Investor Relations, "welcome[d everyone] to the beginning of a new era [of Ally Financial] as an independent global financial services company." On the same investor call, Eric Feldstein, then Ally Financial's CEO, demonstrated how Ally Financial was going to take initial steps to actively control its

subsidiaries. For instance, Feldstein declared that one of Ally Financial's first acts as controlling parent was "to integrate certain of GMAC mortgage operations . . . with RFC operations . . . to drive some cost efficiencies." *Id.*

118. Ally Financial has continued to exert its domination and control over ResCap via shared resources, management, and employees. For example, Ally Financial and ResCap shared at least three common board members, including two individuals who were active participants with respect to the intertwined relationship between Ally Financial and ResCap: (1) ResCap's Chairman and Ally Financial's CEO, Eric Feldstein; and (2) Ally Financial's CFO and a director of ResCap, Sanjiv Khattri. In fact, the 2005 Operating Agreement, between ResCap and Ally Financial, which Ally Financial filed with the SEC, and which upon information and belief is still currently in effect, "*requires* that [ResCap's] board of directors include at least two independent directors, to be *selected by GMAC*." Proposed Operating Agreement, Ex. 99.1 to Form 8-K, dated June 8. 2005 (emphasis added).

119. Ally Financial has continued to make additional public statements that further demonstrate its willingness to support and fund ResCap. For instance, during an investor earnings call in May 2007, Sanjiv Khattri, the Executive Vice President and Chief Financial Officer of Ally Financial, repeatedly made statements that Ally Financial's board of directors "will take whatever reasonable efforts that need to be done to maintain [ResCap's] earnings." Ally Financial's Q1 2007 Earnings Call at 24 (May 2, 2007). Khattri pointed to the fact that "the [Ally Financial] Board ... and [Ally Financial] did not hesitate to inject a billion dollars of equity when it was appropriate . . . ." Ally Financial's Q2 2007 Earnings Call at 9 (July 30, 2007). Khattri unequivocally stated that "all I can assure you [is] that if you look at the strategic plan of [Ally Financial], a strong ResCap with an investment grade rating is a key part of our plan and a key part of our value creation." *Id.* Thus, Ally Financial's senior management assured the

market that Ally Financial was supporting ResCap for the purposes of Ally Financial's own "value creation."

120. Indeed, Ally Financial's 2011 annual report states that "ResCap remains heavily dependent on [Ally Financial] and its affiliates for funding and capital support." Ally. Fin. Inc., Annual Report (Form 10-K), at 128 (Feb. 28, 2012).

121. Further, Ally Financial has established a "Mortgage Repurchase Reserve" account for the potentially significant liabilities stemming from repurchase demands made on its mortgage-related subsidiary business units. The balance of the Mortgage Repurchase Reserve was $825 million as of the fourth quarter of 2011. *See* Ally Financial's Q4 2011 Earnings Presentation at 16. Although these repurchase demands are generally made on Ally Financial's subsidiaries—such as GMACM—in discussing the reserve on an earnings call, Ally Financial CFO Jim Mackey made clear that it was Ally Financial that was recording "repurchase expense[s]" related to mortgages, as he stated that Ally Financial "had lower mortgage repurchase expense of $44 million." Ally Financial's Q4 2011 Earnings Call at 4 (Feb. 2, 2012).

122. Similarly, in discussing Ally Financial's Mortgage Repurchase Reserve on Ally Financial's third quarter 2011 earnings call, Mackey further described losses attributable to mortgage loan repurchases as belonging to Ally Financial when he stated: "Our mortgage repurchase reserve is [as it then stood] $829 million . . . . Our loss experience improved during the quarter due to the fact that we had fewer mortgage insurance rescission payments that we experienced last quarter and that did not repeat this quarter." Ally Financial's Q3 2011 Earnings Call at 6 (Nov. 2, 2011). On the same call, Ally Financial CEO Carpenter explained that "we have routinely repurchased problem loans voluntarily and by contract . . . ." *Id.* at 8.

123. Ally Financial describes its subsidiaries as its own business units rather than separate and distinct entities. For example, Ally Financial declares, in a section of its website specifically intended to inform investors, that GMACM is a "business unit" of Ally Financial rather than an indirect subsidiary owned by ResCap. *See* Ally Financial Website, Ally Home, About Ally, *available at* http://www.ally.com/about/investor/ (last visited May 7, 2012).

124. In addition to the domination and control Ally Financial exerts over its mortgage units, ResCap also viewed GMACM and RFC as part of its own business. For example, in its investor presentation from 2007, ResCap declares that GMACM and RFC "are owned and *operated* by GMAC Residential Capital Company, LLC [ResCap]." It further states that ResCap "is part of the [Ally Financial] family of companies." As discussed above, Ally Financial dominates and controls ResCap. Upon information and belief, when Ally Financial was not directly controlling GMACM and RFC, it used ResCap as an instrument to do so.

125. Ally Financial is currently using its subsidiaries' resources as its own in order to earn favorable ratings by credit rating agencies. For instance, a report put out by Moody's in November 2011 rated Ally Financial as an "above average" originator of mortgage loans. It is evident from that report that Ally Financial obtained such a rating by providing information related to its mortgage units, including GMACM and Ally Bank. Ally Financial itself is not engaged in the mortgage loan origination business. Instead, it is using its mortgage units as instruments to obtain more favorable ratings.

CAUSES OF ACTION

Claim 1: Breach of Contract Against GMACM, RAMP, ResCap, and Ally Financial

126. AGM re-alleges and incorporates by reference each paragraph above.

127. The 2004-HE3 I&I is a valid contract entered between AGM, and GMACM and RAMP. By its terms, the 2004-HE3 I&I essentially incorporates the representations, warranties and covenants made by the GMAC Entities in the 2004-HE3 MLPA and the 2004-HE3 SA.

128. AGM has performed all of its obligations under the 2004-HE3 I&I and the Policy.

129. As detailed more fully above, GMACM and RAMP failed to perform under the 2004-HE3 I&I, the 2004-HE3 MLPA, and the 2004-HE3 SA by, amongst other things: breaching certain representations and warranties contained in the 2004-HE3 I&I, the 2004-HE3 MLPA, and the 2004-HE3 SA; breaching the repurchase/cure provisions in the 2004-HE3 I&I, the 2004-HE3 MLPA, and the 2004-HE3 SA; failing to provide proper notice of Subsequent Mortgage Loan transfers under the 2004-HE3 MLPA; failing to provide documents as required under the 2004-HE3 I&I and 2004-HE3 SA; and breaching the reimbursement and indemnification provisions found in the 2004-HE3 I&I. This list is not exhaustive of the breaches that, on a full record, GMACM and RAMP will be shown to have committed.

130. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled GMACM's and RAMP's actions as set forth in this cause of action.

131. As a result, AGM has suffered damages in an amount to be determined at trial, but which include, at a minimum, any payments made to holders of the 2004-HE3 securities covered under the Policy.

Claim 2: Breach of Contract Against RFC, RFMS, ResCap, and Ally Financial

132. AGM re-alleges and incorporates by reference each paragraph above.

133. The 2006-HSA3 I&I is a valid contract entered between AGM, and RFC and RFMS. By its terms, the 2006-HSA3 I&I incorporates the representations and warranties of the 2006-HSA3 HELPA and 2006-HSA3 SA.

134. AGM has performed all of its obligations under the 2006-HSA3 I&I and the Policy.

135. As detailed more fully above, RFC and RFMS have failed to perform under the 2006-HSA3 I&I by, amongst other things: breaching certain representations and warranties contained in the 2006-HSA3 HELPA, the 2006-HSA3 SA, and the 2006-HSA3 I&I; breaching the repurchase/substitution provisions in the 2006-HSA3 HELPA, the 2006-HSA3 SA, and the 2006-HSA3 I&I; and breaching the reimbursement and indemnification provisions found in the 2006-HSA3 I&I. This list is not exhaustive of the breaches that, on a full record, RFC and RFMS will be shown to have committed.

136. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled RFC's and RFMS's actions as set forth in this cause of action.

137. As a result, AGM has suffered damages in an amount to be determined at trial, but which include, at a minimum, any payments made to holders of the 2006-HSA3 securities covered under the Policy.

Claim 3: Breach of Contract Against Ally Bank, ResCap, and Ally Financial

138. AGM re-alleges and incorporates by reference each paragraph above.

139. The 2004-HE3 Custodial Agreement is a valid and binding agreement between the parties thereto.

140. AGM is an express third-party beneficiary of the Custodial Agreement.

141. As explained above, Ally Bank has materially breached its obligations under the Custodial Agreement by failing to provide documents relating to Subsequent Mortgage Loan transfers to AGM and by failing to notify AGM of GMACM's breaches of its representations and warranties.

142. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled Ally Bank's actions as set forth in this cause of action.

143. As a result of these breaches of contract, AGM has been damaged and will continue to be damaged in an amount to be determined at trial.

Claim 4: Breach of Contract Against GMACM, ResCap, and Ally Financial

144. AGM re-alleges and incorporates by reference each paragraph above.

145. The 2004-HE3 SA is a valid contract entered between AGM and GMACM.

146. AGM has performed all of its obligations under the 2004-HE3 SA.

147. As detailed more fully above, GMACM has failed to perform under the 2004-HE3 SA by, amongst other things: breaching its servicing obligations, including the terms referred to in Section 2.01; and failing to provide documents as required under the 2004-HE3 SA. This list is not exhaustive of the breaches that, on a full record, GMACM will be shown to have committed.

148. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled GMACM's actions as set forth in this cause of action.

149. Each of GMACM's acts of breaching its servicing obligations under the 2004-HE3 SA was committed with misfeasance, bad faith, or gross negligence in the performance of its duties as Servicer or with reckless disregard of the obligations of the Servicer.

150. As a result, AGM has suffered damages in an amount to be determined at trial, but which include, at a minimum, any payments made to holders of the 2004-HE3 securities covered by the governing Policy.

Claim 5: Breach of Contract Against RFC, ResCap, and Ally Financial

151. AGM re-alleges and incorporates by reference each paragraph above.

152. The 2006-HSA3 SA is a valid contract entered between AGM and RFC.

153. AGM has performed all of its obligations under the 2006-HSA3 SA.

154. As detailed more fully above, RFC has failed to perform under 2006-HSA3 SA by, amongst other things: breaching its servicing obligations, including the terms referred to in Section 2.01; and failing to provide documents as required under the 2006-HSA3 SA. This list is not exhaustive of the breaches that, on a full record, RFC will be shown to have committed.

155. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled RFC's actions as set forth in this cause of action.

156. Each of RFC's acts of breaching its servicing obligations under the 2006-HSA3 SA was committed with misfeasance, bad faith, or gross negligence in the performance of its duties as Servicer or with reckless disregard of the obligations of the Servicer.

157. As a result, AGM has suffered damages in an amount to be determined at trial, but which include, at a minimum, any payments made to holders of the 2006-HSA securities covered by the Policy.

Claim 6: Reimbursement Against GMACM, RAMP, ResCap, and Ally Financial

158. AGM re-alleges and incorporates by reference each paragraph above.

159. Pursuant to Section 3.03 of the 2004-HE3 I&I, AGM is entitled to reimbursement for all of its claims, losses, liabilities, demands, damages, costs, and expenses of any nature whatsoever relating to GMACM's and RAMP's breaches of representations, warranties, or covenants contained in the 2004-HE3 MLPA, 2004-HE3 SA, and 2004-HE3 I&I.

160. As detailed more fully above and as will be presented at trial, GMACM and RAMP have breached numerous representations, warranties, and covenants that have caused and will cause AGM to incur losses, costs, and/or expenses, in an amount to be determined at trial. AGM's costs and expenses include attorneys' fees and expert fees, incurred and to be incurred in

order to enforce, defend, and preserve AGM's rights under the 2004-HE3 MLPA, 2004-HE3 SA, and 2004-HE3 I&I.

161. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled GMACM's and RAMP's actions as set forth in this cause of action.

Claim 7: Indemnification Against GMACM, RAMP, ResCap, and Ally Financial

162. AGM re-alleges and incorporates by reference each paragraph above.

163. Pursuant to Section 3.04 of the 2004-HE3 I&I, AGM is entitled to indemnification for all of its claims, losses, liabilities, demands, damages, costs, and expenses of any nature whatsoever relating to GMACM's and RAMP's breaches of representations, warranties, or covenants contained in the 2004-HE3 MLPA, 2004-HE3 SA, and 2004-HE3 I&I.

164. As detailed more fully above and as will be presented at trial, GMACM and RAMP have breached numerous representations, warranties, and covenants that have caused and will cause AGM to incur losses, costs, and/or expenses, in an amount to be determined at trial. AGM's costs and expenses include attorneys' fees and expert fees, incurred and to be incurred in order to enforce, defend, and preserve AGM's rights under the 2004-HE3 MLPA, 2004-HE3 SA, and 2004-HE3 I&I.

165. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled GMACM's and RAMP's actions as set forth in this cause of action.

Claim 8: Reimbursement Against RFC, RFMS, ResCap, and Ally Financial

166. AGM re-alleges and incorporates by reference each paragraph above.

167. Pursuant to Section 3.03 of the 2006-HSA3 I&I, AGM is entitled to reimbursement for all of its claims, losses, liabilities, demands, damages, costs, and expenses of any nature whatsoever relating to RFC's and RFMS's breaches of representations, warranties, or covenants contained in the 2006-HSA3 HELPA, 2006-HSA3 SA, and 2006-HSA3 I&I.

168. As detailed more fully above and as will be presented at trial, RFC and RFMS have breached numerous representations, warranties, and covenants that have caused and will cause AGM to incur losses, costs, and/or expenses, in an amount to be determined at trial. AGM's costs and expenses include attorneys' fees and expert fees, incurred and to be incurred in order to enforce, defend, and preserve AGM's rights under the 2006-HSA3 HELPA, 2006-HSA3 SA, and 2006-HSA3 I&I.

169. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled RFC's and RFMS's actions as set forth in this cause of action.

Claim 9: Indemnification Against RFC, RFMS, ResCap, and Ally Financial

170. AGM re-alleges and incorporates by reference each paragraph above.

171. Pursuant to Section 3.04 of the 2006-HSA3 I&I, AGM is entitled to indemnification for all of its claims, losses, liabilities, demands, damages, costs, and expenses of any nature whatsoever relating to RFC's and RFMS's breaches of representations, warranties, or covenants contained in the 2006-HSA3 HELPA, 2006-HSA3 SA, and 2006-HSA3 I&I.

172. As detailed more fully above and as will be presented at trial, RFC and RFMS have breached numerous representations, warranties, and covenants that have caused and will cause AGM to incur losses, costs, and/or expenses, in an amount to be determined at trial. AGM's costs and expenses include attorneys' fees and expert fees, incurred and to be incurred in order to enforce, defend, and preserve AGM's rights under the 2006-HSA3 HELPA, 2006-HSA3 SA, and 2006-HSA3 I&I.

173. Ally Financial, acting directly and/or indirectly through ResCap, directed and controlled RFC's and RFMS's actions as set forth in this cause of action.

PRAYER FOR RELIEF

174. AGM respectfully prays that this Court, cumulatively or alternatively:

(a) Award compensatory and consequential damages, and any other present and future damages to be proven at trial;

(b) Award a sum to be determined at trial to compensate AGM for its issuance of the Policies resulting from the Defendants' misrepresentations in the documents underlying the 2004-HE3 and 2006-HSA3 transactions and compensation for AGM's guarantee of certain payments of principal and interest on securities backed by a substantial number of mortgage loans that were underwritten in violation of relevant underwriting guidelines; were originated through misrepresentations, error, omissions, or negligence; and/or concerning which there were defects or deficiencies in the underlying loan documents;

(c) Order the GMAC Entities to comply with the reimbursement and indemnification provisions of the relevant agreements;

(d) Order reimbursement and indemnification for AGM's losses and expenses related to the GMAC Entities' breaches of their representations, warranties, and covenants, including attorneys' fees, expert expenses, and other costs;

(e) Order prejudgment interest pursuant to federal law and New York Civil Practice Law & Rules §§ 5001-5004; and

(f) Order such other legal and equitable relief as this Court deems proper.

Defendants.

NOTICE OF REMOVAL

Action Removed From Supreme Court, New York County, Index No. 652441/2011

PLEASE TAKE NOTICE that, pursuant to 28 U.S.C. §§ 1452 and 1441(b), the undersigned defendants (the "Removing Defendants") hereby remove this action to this Court from the Supreme Court of the State of New York, County of New York ("Supreme Court"), where it was pending under Index No. 652441/2011. As grounds for removal, the Removing Defendants state as follows:

1. The action's removal is authorized by 28 U.S.C. § 1452 because this action is related to cases under the Bankruptcy Code, Title 11 of the United States Code, and therefore within the jurisdiction supplied by 28 U.S.C. § 1334(b).

2. The action's removal is also authorized by 28 U.S.C. § 1441(b) because the action arises under the laws of the United States by virtue of the provision of 12 U.S.C. § 1452(f)(2) that all civil actions to which the Federal Home Loan Mortgage Corporation "is a party shall be deemed to arise under the laws of the United States."

3. This action also falls within the original jurisdiction of this Court pursuant to 28 U.S.C. § 1331 (laws of the United States), 28 U.S.C. § 1345 (federal agency action) and/or § 1349 (federally-owned and chartered corporation).

I. Background And Procedural Matters

A. The Federal Actions

4. On July 27, 2011 and September 2, 2011, the Federal Housing Finance Agency ("FHFA"), as Conservator for the Federal Home Loan Mortgage Corporation ("Freddie Mac"), and in most instances also as Conservator for the Federal National Mortgage Association ("Fannie Mae"), filed in this Court thirteen substantially similar actions (the "Federal Actions") arising out of the alleged purchase by Freddie Mac and Fannie Mae of residential mortgage-backed securities ("RMBS") in the period from

2005 to 2007. Plaintiffs assert claims under the Securities Act of 1933 (the "Securities Act"), state Blue Sky Laws, and the common law.

5. This Court has recognized that the Federal Actions "preliminarily appear to bear substantial similarities and to raise similar issues," and it has directed the submission of a joint report (or separate reports if agreement cannot be reached) on or before October 19, 2011 describing the similarities and differences among the Federal Actions and proposing means for the most efficient and convenient handling of these substantially similar actions. *See* Order, *FHFA as Conservator etc. v. HSBC N. Am. Holdings, Inc. et al.*, No. 11 Civ. 6189 (LAK) (S.D.N.Y. Sept. 16, 2011) (DE 4).

B. This Action And The Other State-Court Actions

6. On September 2, 2011, FHFA filed this action in Supreme Court. Here, as in the Federal Actions, FHFA asserts common-law claims, Securities Act claims, and state Blue Sky claims arising out of alleged Freddie Mac RMBS purchases between 2005 and 2007. At issue in this action are claims related to securities from 21 securitizations in which the depositor was a subsidiary of Ally Financial Inc. ("Ally"). (Ally, once known as GMAC and before that as General Motors Acceptance Corp., is currently majority owned by the United States Treasury.) The defendants in the action are the depositors of loans in the 21 securitizations, various Ally subsidiaries alleged to control the depositors, Ally, and certain underwriters. Underwriter defendant Residential Funding Securities, LLC is an Ally subsidiary. The other underwriter defendants are unaffiliated with Ally, and they are all also defendants in at least one of the Federal Actions. The defendants in this action deny liability.

7. On September 2, 2011, FHFA also filed three additional similar actions in Supreme Court. At least two of these actions, *FHFA as Conservator etc. v. Morgan Stanley et al.*, and *FHFA as Conservator etc. v. Countrywide Financial Corp. et al.,* already have been removed to this Court and are pending as Case No. 11 Civ. 6739 (PKC) and Case No. 11 Civ. 6916 (unassigned).

C. Procedural Matters

8. In compliance with the venue provisions of 28 U.S.C. § 1446(a) and Fed. R. Bankr. P. 9027(a)(1), this Court is the district court for the district and division within which the action has been pending.

9. The claims asserted against the Removing Defendants are not core proceedings within the meaning of 28 U.S.C. § 157(b). The Removing Defendants do not consent to entry of final orders or judgments by the bankruptcy judge.

10. No defendant was served with the summons herein more than 30 days prior to the date hereof, and so removal is timely under 28 U.S.C. § 1446(b) and Fed. R. Bankr. P. 9027(a)(3).

11. The only papers served on the Removing Defendants, and the only process or pleadings in the action to date, are the summons and complaint reproduced, in accordance with 28 U.S.C. § 1446(a) and Fed. R. Bankr. P. 9027(a)(1), as Exhibit A hereto. Also filed with Supreme Court last month was the stipulation extending the defendants' time to respond to the complaint, reproduced as Exhibit B hereto.

12. Pursuant to 28 U.S.C. § 1446(d) and Fed. R. Bankr. P. 9027(b)-(c), the Removing Defendants will serve plaintiff's attorneys with a copy of this Notice of Removal and will file a copy thereof with the Clerk of Supreme Court.

II. Grounds For Removal

A. Bankruptcy Jurisdiction Removal

13. This action may be removed under 28 U.S.C. § 1452(a) because it is a civil proceeding "related to" several cases under the Bankruptcy Code, and this Court therefore has original jurisdiction over this action under 28 U.S.C. § 1334(b).

14. The allegations against the Removing Defendants relate to the following RMBS, each of which contains mortgages originated, or originally purchased and resold, by entities that are in bankruptcy or that are subsidiaries of bankrupt entities and against which one or more of the Removing Defendants has potential claims for indemnification and/or contribution (the "Bankrupt Originators/Sellers"). The Bankrupt Originators/Sellers include, but are not limited to, the following:

Offering	*Bankrupt Originators/Sellers*
RALI 2005-QO4	Choice Capital Funding; Lancaster Mortgage Bankers LLC

27. Franklin Bank Corporation is the subject of a Bankruptcy Code case commenced November 12, 2008, in the United States Bankruptcy Court for the District of Delaware, *In re Franklin Bank Corporation,* Case No. 08-12924.

28. Homebanc Mortgage Corporation is the subject of a Bankruptcy Code case commenced August 9, 2007, in the United States Bankruptcy Court for the District of Delaware, *In re Homebanc Mortgage Corporation, et al.*, Case No. 07-11079.

29. Lancaster Mortgage Bankers, LLC is the subject of a Bankruptcy Code case commenced August 31, 2007, in the United States Bankruptcy Court for the District of New Jersey, *In re Lancaster Mortgage Bankers, LLC*, Case No. 07-22479-MBK. Upon information and belief, Lancaster Mortgage Bankers LLC originated mortgages under the name Lancaster Mortgage Services ("Lancaster").

30. Maverick Residential Mortgage, a/k/a The Mortgage Company, is the subject of a Bankruptcy Code case commenced February 13, 2008, in the United States Bankruptcy Court for the Eastern District of Texas, *In re Maverick Residential Mortgage, Inc.,* Case No. 08-40352.

31. Meritage Mortgage Corporation is the subject of a Bankruptcy Code case commenced February 17, 2009, in the United States Bankruptcy Court for the Northern District of Texas, *In re Meritage Mortgage Corporation,* Case No. 09-30971.

32. Mortgage Lender's Network USA, Inc. is the subject of a Bankruptcy Code case commenced February 4, 2007, in the United States Bankruptcy Court for the District of Delaware, *In re Mortgage Lender's Network USA, Inc.*, Case No. 07-10146.

33. New Century Mortgage Corporation is the subject of a Bankruptcy Code case commenced April 2, 2007, in the United States Bankruptcy Court for the District of Delaware, *In re New Century TRS Holdings, Inc., et al.,* Case No. 07-10416.

34. Oak Street Mortgage, LLC is the subject of a Bankruptcy Code case commenced June 8, 2007, in the United States Bankruptcy Court for the Southern District of Illinois, *In re Oak Street Mortgage, LLC*, Case No. 07-05279.

35. OwnIt Mortgage Solutions, Inc. is the subject of a Bankruptcy Code case commenced December 28, 2006, in the United States Bankruptcy Court for the Central District of California, *In re OwnIt Mortgage Solutions, Inc.,* Case No. SV-06-12579.

36. People's Choice Home Loan, Inc. is the subject of a Bankruptcy Code case commenced March 14, 2007, in the United States Bankruptcy Court for the Central District of California, *In re People's Choice Home Loan, Inc.,* Case No. SA 07-10765.

37. Premier Mortgage Funding, Inc. is the subject of a Bankruptcy Code case commenced July 3, 2007 in the United States Bankruptcy Court for the Middle District of Florida, *In re Premier Mortgage Funding, Inc.*, Case No. 8:07-BK-05713.

38. Realty Mortgage Corporation is the subject of a Bankruptcy Code case commenced February 18, 2009, in the United States Bankruptcy Court for the Southern District of Mississippi, *In re Realty Mortgage Corporation,* Case No. 09-00544.

39. In selling the mortgage loan collateral to certain of the Removing Defendants, each Bankrupt Originator/Seller made representations to one or more of the Removing Defendants regarding that Bankrupt Originator/Seller's loan-underwriting standards and the characteristics of the mortgage-loan collateral for the RMBS — the very

subjects of plaintiff's allegations. (*See, e.g.*, Compl. ¶¶ 71-77, 103-126.) Pursuant to sale agreements that contained indemnification and/or contribution provisions for one or more of the Removing Defendants, the Bankrupt Originators/Sellers owe these Removing Defendants indemnification and/or contribution for any claims arising out of actual or alleged material misstatements or omissions by the Bankrupt Originators/Sellers regarding their underwriting practices and the mortgage loans at issue. These agreements further require the Bankrupt Originators/Sellers to indemnify one or more of the Removing Defendants for the costs (including legal fees) of defending such claims, regardless of their outcome.

40. A civil proceeding is "related to" a bankruptcy if "its outcome might have any conceivable effect on the bankrupt estate." *Publicker Indus., Inc. v. United States (In re Cuyahoga Equip. Corp.)*, 980 F.2d 110, 114 (2d Cir. 1992). A proceeding between non-debtors may have a "conceivable effect" on the bankruptcy estate where "the outcome could alter the debtor's rights, liabilities, options, or freedom of action (either positively or negatively) and which in any way impacts upon the handling and administration of the bankrupt estate." *Back v. LTV Corp. (In re Chateaugay Corp.)*, 214 B.R. 633, 638 (S.D.N.Y. 1997). This Action is related to the bankruptcy cases of the Bankrupt Originators/Sellers because the Bankrupt Originators/Sellers owe one or more of the Removing Defendants an indemnity obligation, which, as a result of any costs or expenses incurred by the Removing Defendants to defend this Action and any judgment against the Removing Defendants, could affect the property of the Bankrupt Originators/Sellers. *See IIG Capital LLC v. Wollmuth Maher & Deutsch, LLP (In re Amanat)*, 338 B.R. 574, 579-81 (Bankr. S.D.N.Y. 2005). In addition, removal is proper

under section 1452(a) as this action has a "close nexus" to these proceedings. *See Allstate Ins. Co. v. Ace Secs. Corp.*, No. 11 Civ. 1914 (LBS), 2011 U.S. Dist. LEXIS 91989, at *13-15 (S.D.N.Y. Aug. 16, 2011).

41. An indemnity obligation that affects the property of debtors gives rise to "related to" jurisdiction under 28 U.S.C. § 1334(b). The Removing Defendants may therefore remove this Action to this Court pursuant to 28 U.S.C. § 1452(a). *See Allstate*, 2011 U.S. Dist. LEXIS 91989, at *14-15 (claims for indemnification and contribution against bankrupt mortgage originators created "related to" bankruptcy jurisdiction).

42. The non-removal provisions of Section 22(a) of the Securities Act of 1933 does not bar removal under 28 U.S.C. § 1452(a). *See Cal. Pub. Employees. Ret. Sys. v. Worldcom, Inc.*, 368 F.3d 86, 108 (2d Cir. 2004).

B. Federal-Question Jurisdiction Removal

43. This action may be removed under 28 U.S.C. § 1441(b) because the action arises under the laws of the United States by virtue of 12 U.S.C. § 1452(f)(2), which states that all civil actions to which Freddie Mac "is a party shall be deemed to arise under the laws of the United States, and the district courts of the United States shall have original jurisdiction of all such actions." Under 28 U.S.C. § 1441(c), it is clear that "the entire case" may be removed when one of the plaintiff's claims arises under the laws of the United States, even if that claim is "joined with one or more otherwise non-removable claims or causes of action."

44. The complaint in this action makes clear that FHFA is acting on behalf of, and in the name of Freddie Mac, making Freddie Mac a party to this action. (Compl. ¶ 11.) Under the Housing and Economic Recovery Act of 2008 ("HERA"), Pub.

L. No. 110-289, 122 Stat. 2654, FHFA "shall, as conservator or receiver, and by operation of law, immediately succeed to (i) all rights, titles, powers, and privileges of the regulated entity," and may "perform all functions of the regulated entity in the name of the regulated entity." 12 U.S.C. §§ 4617(b)(2)(A), 4617(b)(2)(B)(iii). Because FHFA succeeded to Freddie Mac's rights, titles and privileges, FHFA stands in Freddie Mac's shoes and *is* Freddie Mac for all relevant legal purposes. Courts construing similar language in similar acts have reached the same conclusion that the agency "stepped 'into the shoes'" of the depository institution. *See, e.g., Waterview Mgmt. Co. v. FDIC*, 105 F.3d 696, 700-701 (D.C. Cir. 1997); *accord O'Melveny & Myers v. FDIC*, 512 U.S. 79 (1994) (finding that same provision "places [the federal agency] in the shoes of the insolvent S&L.").

45. Securities Act § 22(a) does not preclude removal under 28 U.S.C. § 1441(b). *See*, *e.g.*, *Gallagher v. Donald*, 803 F. Supp. 899, 902-04 (S.D.N.Y. 1992); *Pacific Life Ins. Co.* v. *J.P. Morgan Chase & Co.*, No. SA CV 03-813GLT (ANX), 2003 WL 22025158, at *2 (C.D. Cal. June 30, 2003) ("Section 22(a) proscribes removal based on federal question jurisdiction under 28 U.S.C. § 1441(a), but does not prevent removal based on other grounds."); *see also In re Fannie Mae 2008 Sec. Litig.*, No. 08 Civ. 7831, 09 Civ. 1352, 2009 WL 4067266, at *2-3 (S.D.N.Y. Nov. 24, 2009) (holding that because "federal courts have jurisdiction over Fannie Mae," removal of an action asserting claims under the Securities Act "was appropriate.")

III. Other Bases Of Subject-Matter Jurisdiction

A. Federal Question Jurisdiction

46. This Court has subject-matter jurisdiction over this action based on Securities Act § 22(a) and 28 U.S.C. § 1331.

B. Federal Agency And/Or Federal Corporation Jurisdiction

47. As additional or alternative bases for subject-matter jurisdiction, the Court has subject matter jurisdiction under 28 U.S.C. § 1345 (federal agency action) and/or 28 U.S.C. § 1349 (federally-owned and chartered corporation). FHFA is an agency of the United States, 12 U.S.C. § 4511(a), expressly authorized to sue on behalf of Freddie Mac under 12 U.S.C. § 4617(b)(2)(A) and 12 U.S.C. § 1452(c)(7).

WHEREFORE, the Removing Defendants hereby remove this civil action to this Court from the Supreme Court of the State of New York, County of New York.

PRAYER FOR RELIEF 93

Plaintiff Federal Housing Finance Agency ("Plaintiff" or "FHFA"), as Conservator of the Federal Home Loan Mortgage Corporation ("Freddie Mac"), by its attorneys Kasowitz, Benson, Torres & Friedman LLP, for its Complaint against the defendants named herein ("Defendants"), alleges as follows:

NATURE OF ACTION

1. This action arises from false and misleading statements and omissions in registration statements, prospectuses, and other offering materials pursuant to which certain residential mortgage-backed securities ("RMBS") were purchased by Freddie Mac. Among other things, these documents falsely represented that the mortgage loans underlying the RMBS complied with certain underwriting guidelines and standards, and presented a false picture of the characteristics and riskiness of those loans. These representations were material to Freddie Mac, as they would have been to any reasonable investor, and their falsity violates Sections 11, 12(a)(2), and 15 of the Securities Act of 1933, 15 U.S.C. § 77a *et seq.*, as well as Sections 13.1-522(A)(ii) and 13.1-522(C) of the Virginia Code. Freddie Mac justifiably relied on Defendants' misrepresentations and omissions of material fact to its detriment. In addition to its strict statutory liability under federal securities law and liability under state law, Defendants' statements and omissions give rise to liability under state common law.

2. Between September 23, 2005 and May 30, 2007, Freddie Mac purchased over $6 billion in Certificates issued in connection with 21 securitizations that were virtually all sponsored and underwritten by Defendants.[1]

---

[1] For purposes of this Complaint, the securities issued under the Registration Statements (as defined in note 2, *infra*) are referred to as "Certificates." Holders of Certificates are referred to as "Certificateholders."

3. The Certificates were offered for sale pursuant to one of six shelf registration statements (the "Shelf Registration Statements") filed with the Securities and Exchange Commission (the "SEC"). For each of the 21 securitizations sold to Freddie Mac (the "Securitizations"), a prospectus ("Prospectus") and prospectus supplement ("Prospectus Supplement") were filed with the SEC as part of the Registration Statement for that Securitization.[2] The Certificates were marketed and sold to Freddie Mac pursuant to the Registration Statements.

4. The Registration Statements contained representations concerning, among other things, the characteristics and credit quality of the mortgage loans underlying the Securitizations, the creditworthiness of the borrowers on those underlying mortgage loans, and the origination and underwriting practices used to make and approve the loans. Such representations were material to a reasonable investor's decision to invest in the Certificates, and they were material to Freddie Mac. Unbeknownst to Freddie Mac, those representations were false because, among other reasons, many of material percentages of the underlying mortgage loans were not originated in accordance with the represented underwriting standards and origination practices, and did not have the credit and other characteristics set forth in the Registration Statements.

5. Among other things, the Registration Statements presented the loan origination guidelines of the mortgage loan originators who originated the loans that underlay the Certificates. The Registration Statements falsely represented that those guidelines were adhered to except in specified circumstances, when in fact the guidelines systematically were disregarded in that the loans were not originated in accordance therewith.

---

[2] The term "Registration Statement" as used herein incorporates the Shelf Registration Statement, the Prospectus, and the Prospectus Supplement and in Appendix A for each referenced Securitization, except where otherwise indicated.

6. The Registration Statements also set forth for each Securitization statistical summaries of the characteristics of the underlying mortgage loans, such as the percentage of loans secured by owner-occupied properties and the percentage of the loan group's aggregate principal balance with loan-to-value ratios within specified ranges. This information was material to reasonable investors, and it was material to Freddie Mac. However, a loan-level analysis of a sample of loans for each Securitization -- a review that encompassed in the aggregate thousands of mortgages across all of the Securitizations -- has revealed that for each Securitization these statistical summaries were false and misleading. The statistics reflected or were based upon misrepresentations of other key characteristics of the mortgage loans and inflated property values.

7. For example, the percentage of owner-occupied properties in the loan pool underlying a RMBS is a material risk factor to the purchasers of certificates, such as Freddie Mac, because a borrower who actually lives in a mortgaged property is generally less likely to stop paying the mortgage and more likely to take care of the property. The loan-level review revealed that the true percentage of owner-occupied properties for the loans supporting the Certificates was materially lower than that represented in the Prospectus Supplements. Likewise, the Prospectus Supplements misrepresented such material information as loan-to-value ratios -- that is, the relationship between the principal amount of the loans and the true value of the mortgaged properties securing those loans -- and the ability of the individual mortgage holders to satisfy their debts.

8. The Registration Statements also set forth ratings for each of the Securitizations. Those AAA ratings were material to a reasonable investor's decision to purchase the Certificates, and they were material to Freddie Mac. The ratings for the Securitizations were materially

inaccurate and were based upon false information supplied by Defendants. Upon information and belief, neither the Defendants nor the rating agencies who issued the ratings believed or had any sound basis to believe in their truthfulness.

9. Defendants, who are issuers, sponsors, and/or underwriters of the Certificates purchased by Freddie Mac are liable for the misstatements and omissions of material fact contained in the Registration Statements and other offering materials because they prepared, filed, and/or used these documents to market and sell the Certificates to Freddie Mac, or because they directed and controlled the entities that did so.[3]

10. Defendants misstatements and omissions of material facts have caused loss and injury to Freddie Mac. Freddie Mac purchased the highest tranches of Certificates offered for sale by Defendants. Freddie Mac would not have purchased these Certificates but for Defendants material misrepresentations and omissions concerning the mortgage loans underlying the RMBS. As the truth concerning the misrepresented and omitted facts has come to light, and as the hidden risks have materialized, the market value of the Certificates purchased by Freddie Mac has declined. Freddie Mac has suffered enormous financial losses as a result of Defendants misrepresentations and omissions. FHFA, as Conservator for Freddie Mac, now seeks rescission and damages for those losses.

PARTIES

Plaintiff

11. Plaintiff the Federal Housing Finance Agency is a federal agency located at 1700 G Street, NW in Washington, D.C. FHFA was created on July 30, 2008, pursuant to the Housing and Economic Recovery Act of 2008 (HERA), Pub L. No. 110-289, 122 Stat. 2654,

[3] The Certificates purchased by Freddie Mac are identified below in paragraph 130 and are listed *infra* in Table 10.

codified at 12 U.S.C. § 4617 *et seq.* ("HERA"), to oversee the Federal National Mortgage Association ("Fannie Mae"), Freddie Mac and the Federal Home Loan Banks. On September 6, 2008, the Director of FHFA, also pursuant to HERA, placed Freddie Mac into conservatorship and appointed FHFA as Conservator. In that capacity, FHFA has the authority to exercise all rights and remedies of Freddie Mac, including, but not limited to, the authority to bring suits on behalf of and/or for the benefit of Freddie Mac. 12 U.S.C. § 4617(b)(2).

12. Freddie Mac is a government-sponsored enterprise chartered by Congress with a mission to provide liquidity, stability and affordability to the United States housing and mortgage markets. As part of this mission, Freddie Mac invested in RMBS. Freddie Mac is located at 8200 Jones Branch Drive in McLean, Virginia.

Defendants

GMAC Defendants

13. Defendant Ally Financial Inc. ("Ally"), a leading, multi-national financial services firm with a corporate center in New York, has approximately $179 billion of assets and operations in approximately 25 countries. Ally is the parent and sole owner of Defendants GMAC Mortgage Group, Inc. and Residential Funding Services, LLC. Prior to 2010, Ally was known as GMAC, LLC.

14. Defendant GMAC Mortgage Group, Inc. ("GMACM") is a wholly-owned subsidiary and the mortgage arm of Ally. GMACM is a Delaware corporation with its principal place of business at 1100 Virginia Drive, Fort Washington, Pennsylvania 19034. GMACM transacted business in New York.

15. Defendant Residential Capital LLC ("ResCap") is a wholly-owned subsidiary of GMACM and originates, services, and securitizes mortgage loans in the United States, including New York. ResCap was incorporated in the State of Delaware and its principal office is located

at One Meridian Crossings, Minneapolis, Minnesota 55423. Prior to 2007, ResCap was known as Residential Capital Corporation.

16. Defendant GMAC-RFC Holding Company, LLC, doing business as GMAC Residential Funding Corporation (□GMAC-RFC□), is a wholly-owned subsidiary of ResCap and acquires residential mortgages and loans, which it then packages as mortgage-backed securities and sells to institutional investors. GMAC-RFC was incorporated in the State of Delaware and its principal office is located at 8400 Normandale Lake Boulevard, Minneapolis, Minnesota 55437. GMAC-RFC transacted business in New York.

17. Defendant Residential Funding Company, LLC (□RFC□) is a wholly-owned subsidiary of GMAC-RFC. RFC, a Delaware corporation, has an office in New York, has appointed an agent for service of process in New York, and has consented to the jurisdiction of the New York courts. Prior to October 2006, RFC was known as Residential Funding Corporation. RFC was the sponsor of all 21 of the Securitizations. Defendant RFC is the parent and sole owner of Homecomings Financials, LLC (□HFN□), the originator of loans underlying the Certificates for 13 of the 21 Securitizations and, upon information and belief, the only Ally subsidiary that originated residential mortgage loans during the relevant time period. Prior to 2006, HFN was known as Homecomings Financials Network, Inc.

18. Defendant Ally Securities, LLC is an SEC-registered broker-dealer and is registered to do business in New York. Prior to August 1, 2011, Ally Securities, LLC was known as Residential Funding Securities, LLC, which was doing business as GMAC RFC Securities and prior to 2007, Residential Funding Securities, LLC was known as Residential Funding Securities Corporation (collectively, □RFS□). RFS is a wholly-owned subsidiary of Ally, and was registered to do business in New York. RFS was the co-lead underwriter for five

of the Securitizations and was an underwriter for an additional six of the Securitizations. Freddie Mac purchased five of the Securitizations from RFS in its capacity as co-lead underwriter of those Securitizations.

19. Defendant Residential Asset Mortgage Products, Inc. (□RAMP□) is a wholly-owned subsidiary of GMAC-RFC and its principal office is located at 8400 Normandale Lake Boulevard, Minneapolis, Minnesota 55437. RAMP was the depositor for five of the Securitizations and transacted business in New York. RAMP, as depositor, was also responsible for preparing and filing reports required under the Securities Exchange Act of 1934 with respect to the Securitizations.

20. Defendant Residential Asset Securities Corporation (□RASC□) is a wholly-owned subsidiary of GMAC-RFC and its principal office is located at 8400 Normandale Lake Boulevard, Minneapolis, Minnesota 55437. RASC was the depositor for 10 of the Securitizations and transacted business in New York. RASC, as depositor, was also responsible for preparing and filing reports required under the Securities Exchange Act of 1934.

21. Defendant Residential Accredit Loans, Inc. (□RALI□) is a wholly-owned subsidiary of GMAC-RFC and its principal office is located at 8400 Normandale Lake Boulevard, Minneapolis, Minnesota 55437. RALI was the depositor for 6 of the Securitizations and transacted business in New York. RALI, as depositor, was also responsible for preparing and filing reports required under the Securities Exchange Act of 1934. Defendants Ally, GMACM, ResCap, GMAC-RFC, RFS, RAMP, RASC and RALI are referred to together herein as □GMAC.□

Non-GMAC Defendants

22. Defendant Barclays Capital Inc. (□Barclays□) is a Connecticut corporation with its principal place of business located at 200 Park Avenue, New York, New York 10166. Barclays

is an SEC-registered broker-dealer and served as underwriter or co-underwriter for one Securitization.

23. Defendant Citigroup Global Markets Inc. ("Citi") is an SEC-registered broker-dealer. Citi is a corporation organized and existing under the laws of the State of New York with its principal place of business located at 388 Greenwich Street, New York, New York 10013. Citi served as underwriter or co-underwriter for one Securitization.

24. Defendant Credit Suisse Securities (USA) LLC ("Credit Suisse") is a corporation organized and existing under the laws of the State of Delaware with its principal place of business at 11 Madison Ave., New York, New York 10010. Prior to January 16, 2006, Credit Suisse was known as Credit Suisse First Boston LLC. Credit Suisse is an SEC-registered broker-dealer, and was the co-lead underwriter for four of the Securitizations. Credit Suisse was co-underwriter for three of the Securitizations.

25. Defendant Goldman, Sachs & Co. ("Goldman") is a corporation organized and existing under the laws of the State of New York with its principal place of business located at 200 West Street, New York, New York 10282. Goldman is an SEC-registered broker-dealer and served as underwriter or co-underwriter for one Securitization.

26. Defendant J.P. Morgan Securities, LLC, f/k/a J.P. Morgan Securities, Inc. ("JPM"), is a limited liability company organized and existing under the laws of Delaware with its principal place of business located at 277 Park Avenue, New York, New York 10172. JPM is an SEC-registered broker-dealer and was co-lead underwriter for two of the Securitizations.

27. JPM is also the successor-in-interest to Bear, Stearns & Co., Inc. ("Bear Stearns") because on March 16, 2008, Bear Stearns' parent company, Bear Stearns Companies, Inc. ("BSCI"), entered into an Agreement and Plan of Merger with Bear Stearns Merger Corporation,

a wholly-owned subsidiary of JPMorgan Chase & Co. (□JPMorgan Chase□), making Bear Stearns a wholly-owned indirect subsidiary of JPMorgan Chase. Following the merger, on or about October 1, 2008, Bear Stearns merged with J.P. Morgan Securities Inc., a subsidiary of JPMorgan Chase, which subsequently changed its name to J.P. Morgan Securities LLC. Thus, BSCI is now doing business as Defendant JPM.

28. In a June 30, 2008 press release describing internal restructuring to be undertaken pursuant to the Merger, JPMorgan Chase stated its intent to assume Bear Stearns and its debts, liabilities, and obligations as follows:

> Following completion of this transaction, Bear Stearns plans to transfer its broker-dealer subsidiary Bear, Stearns & Co. Inc. to JPMorgan Chase, resulting in a transfer of substantially all of Bear Stearns□assets to JPMorgan Chase. In connection with such transfer, JPMorgan Chase will assume (1) all of Bear Stearns□ then-outstanding registered U.S. debt securities; (2) Bear Stearns□ obligations relating to trust preferred securities; (3) Bear Stearns□ then-outstanding foreign debt securities; and (4) Bear Stearns□ guarantees of then-outstanding foreign debt securities issued by subsidiaries of Bear Stearns, in each case, in accordance with the agreements and indentures governing these securities.

Further, the former Bear Stearns website, www.bearstearns.com, redirects Bear Stearns visitors to J.P. Morgan Securities Inc.□s website.

29. J.P. Morgan Securities Inc. was fully aware of the pending and potential claims against Bear Stearns when it consummated the merger. J.P. Morgan Securities Inc. has further evinced its intent to assume Bear Stearns□liabilities by paying to defend and settle lawsuits against Bear Stearns. JPM announced its intention to □convert to a limited liability company, effective September 1, 2010,□as part of which it changed its name to J.P. Morgan Securities LLC. As a result of the Merger, Defendant JPM Securities is the successor-in-interest to Bear Stearns and is jointly and severally liable for the misstatements and omissions of material fact alleged herein of Bear Stearns. This action is brought against JPM Securities as successor to

Bear Stearns. Prior to acquisition, Bear Stearns was an SEC-registered broker-dealer and served as an underwriter for one Securitization.

30. Defendant RBS Securities, Inc., doing business as RBS Greenwich Capital (□RBS□), is an SEC-registered broker-dealer incorporated in the State of Delaware with offices located at 101 Park Avenue, New York, New York 10178. Prior to April 2009, RBS was known as Greenwich Capital Markets, Inc. RBS served as underwriter or co-underwriter for two of the Securitizations.

31. Defendant UBS Securities LLC (□UBS□) is a Delaware limited liability company with its principal place of business located at 677 Washington Blvd., Stamford, Connecticut 06901. UBS is an SEC-registered broker-dealer and served as underwriter or co-underwriter for one Securitization.

32. Defendants Barclays, Citi, Credit Suisse, Goldman, JPM, RBS, and UBS are referred to together herein as the □Non-GMAC Defendants,□and together with RFS as the □Underwriter Defendants.□

Non-Party Originators

33. The loans underlying the Certificates were acquired by the sponsor RFC for each Securitization from the following mortgage originators: Homecomings Financials Network Inc. (□HFN□); Aegis Mortgage Corporation; Decision One Mortgage Company, LLC; EFC Holdings Corporation and its subsidiary EquiFirst Corporation; Finance America, LLC; First National Bank of Nevada; Home123 Corporation; Homefield Financial Inc.; Mortgage Lenders Network USA, Inc.; New Century Mortgage Corporation; Ownit Mortgage Solutions Inc.; People□s Choice Home Loan, Inc.; Pinnacle Financial Corporation; and SCME Mortgage Bankers, Inc. HFN -- a subsidiary of Defendant Ally and an affiliate of Defendant RFC -- originated loans

underlying the Certificates for 13 of the 21 Securitizations. Together, the entities identified in this paragraph are referred to as the "Non-Party Originators."

JURISDICTION AND VENUE

34. This Court has jurisdiction over this action pursuant to Section 22 of the Securities Act of 1933, 15 U.S.C. § 77v and Section 7 of Article VI of the New York State Constitution.

35. This Court has personal jurisdiction over the Defendants pursuant to C.P.L.R. §§ 301 and 302.

36. Venue is proper in this district pursuant to C.P.L.R. § 503 because one or more of the parties resides in this county. The underwriters reside or have their principal place of business in this county and many of the alleged acts and transactions, including the preparation and dissemination of the Registration Statements, occurred in substantial part within New York County, New York.

FACTUAL ALLEGATIONS

I. FACTUAL ALLEGATIONS APPLICABLE TO ALL CLAIMS

37. The factual allegations set forth in paragraphs 38 through 134 below are made with respect to all causes of action against Defendants and are sufficient to establish Defendants' strict statutory liability under the federal Securities Act and the Securities Act of Virginia. With respect to such liability, no allegations are made or intended, and none are necessary, concerning Defendants' state of mind. Defendants are strictly liable, without regard to intent on their part or reliance on Freddie Mac's part, for the misstatements in, and material omissions from, the Registration Statements under Sections 11 and 12 and, for control person defendants, under Section 15, of the Securities Act, and Sections 13.1-522(A)(ii) and 13.1-522(C) of the Virginia Code.

A. The Securitizations

1. Residential Mortgage-Backed Securitizations Generally

38. Asset-backed securitization involves pooling cash-producing financial assets and issuing securities backed by those pools of assets. In residential mortgage-backed securitizations, the cash-producing financial assets are residential mortgage loans.

39. In the most common form of securitization of mortgage loans, a sponsor -- the entity that acquires or originates the mortgage loans and initiates the securitization -- directly or indirectly transfers a portfolio of mortgage loans to a trust. In many instances, the transfer of assets to the trust is a two-step process in which the sponsor first transfers the financial assets to an intermediate entity, typically referred to as a depositor, and then the depositor transfers the assets to a trust. The trust is established pursuant to a pooling and servicing agreement or trust indenture entered into by, among others, the depositor for that securitization.

40. RMBS are the securities backed by the underlying mortgage loans in the trust. Some residential mortgage-backed securitizations are created from more than one cohort of loans, called collateral groups, in which case the trust issues different tranches of securities backed by different groups of loans. For example, a securitization may involve two groups of mortgages, with some securities backed primarily by the first group, and others primarily by the second group. Purchasers of the securities (in the form of certificates) acquire an ownership interest in the assets of the trust, which in turn owns the loans. These purchasers are thus dependent for repayment of principal and payment of interest upon the cash flows from the designated group of mortgage loans -- primarily mortgagors payments of principal and interest on the mortgage loans held by the related trust.

41. RMBS are generally issued and sold pursuant to registration statements filed with the SEC. These registration statements include prospectuses, which describe the general

structure of the investment, and prospectus supplements, which set forth detailed descriptions of, among other things, the mortgage groups underlying the certificates. Certificates are issued by the trust and sold pursuant to the registration statement, the prospectus and prospectus supplement. Underwriters purchase the certificates from the trust and then offer, sell or distribute the certificates to investors.

42. A mortgage servicer manages the collection of proceeds from the mortgage loans. The servicer is responsible for collecting homeowners mortgage loan payments, which the servicer remits to the trustee after deducting a monthly servicing fee. The servicer s duties include making collection efforts on delinquent loans, initiating foreclosure proceedings, and determining when to charge off a loan by writing down its balance. The servicer is required to report key information about the loans to the trustee. The trustee (or trust administrator) administers the trust funds and delivers payments due each month on the certificates to the investors.

2. Securitizations at Issue in this Case

43. This case involves the following 21 Securitizations:

i. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2005-EMX3 (RASC 2005-EMX3);

ii. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2005-KS10 (RASC 2005-KS10);

iii. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2005-KS11 (RASC 2005-KS11);

iv. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2006-EMX8 (RASC 2006-EMX8);

v. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2006-EMX9 (RASC 2006-EMX9);

vi. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2006-KS3 (RASC 2006-KS3);

vii. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2006-KS9 (RASC 2006-KS9);

viii. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2007-EMX1 ("RASC 2007-EMX1");

ix. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2007-KS2 ("RASC 2007-KS2");

x. Home Equity Mortgage Asset-Backed Pass-Through Certificates, Series 2007-KS3 ("RASC 2007-KS3");

xi. Mortgage Asset-Backed Pass-Through Certificates, Series 2005-EFC6 ("RAMP 2005-EFC6");

xii. Mortgage Asset-Backed Pass-Through Certificates, Series 2005-EFC7 ("RAMP 2005-EFC7");

xiii. Mortgage Asset-Backed Pass-Through Certificates, Series 2005-NC1 ("RAMP 2005-NC1");

xiv. Mortgage Asset-Backed Pass-Through Certificates, Series 2005-RS9 ("RAMP 2005-RS9");

xv. Mortgage Asset-Backed Pass-Through Certificates, Series 2006-RS1 ("RAMP 2006-RS1");

xvi. Mortgage Asset-Backed Pass-Through Certificates, Series 2005-QO4 ("RALI 2005-QO4");

xvii. Mortgage Asset-Backed Pass-Through Certificates, Series 2006-QO4 ("RALI 2006-ii. QO4");

xviii. Mortgage Asset-Backed Pass-Through Certificates, Series 2006-QO5 ("RALI 2006-QO5");

xix. Mortgage Asset-Backed Pass-Through Certificates, Series 2006-QO8 ("RALI 2006-QO8");

xx. Mortgage Asset-Backed Pass-Through Certificates, Series 2006-QO9 ("RALI 2007-QO9"); and

xxi. Mortgage Asset-Backed Pass-Through Certificates, Series 2007-QH5 ("RALI 2007-QH5).

44. For each of the 21 Securitizations, Table 1 identifies the: (1) sponsor; (2) depositor; (3) underwriter; (4) principal amount issued for the tranches[4] purchased by Freddie

[4] A tranche is one of the classes of debt securities issued as part of a single bond or instrument. Securities are often issued in tranches to meet different investor objectives for portfolio diversification. Freddie Mac purchased two tranches of Certificates from the RALI 2006-Q04 Securitization, which is why the tables have 22 entries for 21 Securitizations.

Mac; (5) date of issuance; and (6) the loan group or groups backing the Certificate for that Securitization (referred to as the "Supporting Loan Groups").

3. Securitization Process

a. The Sponsors Grouped Mortgage Loans in Special-Purpose Trusts

45. In each case, the sponsor purchased the mortgage loans underlying the Certificates purchased by Freddie Mac for its Securitizations either directly from the originators or through affiliates of the originators. RFC sponsored 21 Securitizations and sold the acquired loans to one of three depositors, all of which are RFC-affiliated entities: RALI, RAMP and RASC.

46. RALI, RAMP and RASC were wholly-owned, limited-purpose financial subsidiaries of GMAC-RFC and affiliates of RFC. The sole purpose of RALI, RAMP and RASC as depositors was to act as a conduit through which loans acquired by the sponsor could be securitized and sold to investors.

47. As depositors for all 21 of the Securitizations, RALI, RAMP and RASC transferred the relevant mortgage loans to the respective trusts for each of those Securitizations, in each case pursuant to Assignment and Recognition Agreements or Mortgage Loan Purchase

Agreements that contained various representations and warranties regarding the mortgage loans for the Securitizations.

48. As part of each Securitization, the trustee for that Securitization, on behalf of the Certificateholders, executed a Pooling and Service Agreement ("PSA") with the relevant depositor and the relevant servicer. In each case, the trust, administered by the trustee, was required to hold the mortgage loans, pursuant to the related PSA and issued certificates, including the Certificates, backed by such loans. Freddie Mac purchased the Certificates, through which it obtained an ownership interest in the assets of the trust, including the mortgage loans.

b. The Trusts Issued Securities Backed by the Loans

49. Once the mortgage loans were transferred to the trusts in accordance with the PSAs, each trust issued Certificates backed by the underlying mortgage loans. The Certificates were then sold to investors, including Freddie Mac. Each Certificate entitles its holder to a specified portion of the cash flows from the underlying mortgages in the supporting loan group for that certificate. Therefore, the value of the Certificates, derived in part from the likelihood of payment of principal and interest on the Securitizations, depends upon the credit quality of the underlying mortgages, *i.e.*, the risk of default by borrowers and the recovery value upon default of foreclosed-upon properties.

50. The Certificates purchased by Freddie Mac were issued and sold pursuant to Shelf Registration Statements filed with the SEC on a Form S-3.[5] The Shelf Registration Statements ("S-3") were amended by one or more Form S-3/A (the "Amendments" or "S-3/A") filed with

[5] Defendant RALI filed three Shelf Registration Statements that were used to market six of the Securitizations; Defendant RAMP filed one Shelf Registration Statement that was used to market five of the Securitizations; and Defendant RASC filed two Registration Statements that were used to market 10 of the Securitizations.

the SEC. The Individual Defendants signed the six Shelf Registration Statements (and amendments thereto) that were filed, in each case, by RALI, RAMP or RASC. The SEC filing number, registrants, signatories, and filing dates for all six Shelf Registration Statements with Amendments, as well as the Certificates purchased by Freddie Mac covered by each Shelf Registration Statement, are reflected in Table 2 below.

51. The Prospectus Supplement for each Securitization describes the loan underwriting guidelines that purportedly were used in connection with the origination of the underlying mortgage loans. In addition, the Prospectus Supplements purport to provide accurate statistics regarding the mortgage loans in each group, including: the ranges of and weighted average FICO credit scores of the borrowers, the ranges of and weighted average loan-to-value (□LTV□) ratios of the loans, the ranges of and weighted average outstanding principal balances of the loans, the debt-to-income ratios of the borrowers, the geographic distribution of the loans, the extent to which the loans were for purchase or refinance purposes, information concerning whether the loans were secured by a property to be used as a primary residence, second home, or investment property, and information concerning whether the loans were delinquent.

52. The Prospectus Supplement for each Securitization was filed with the SEC as part of the Registration Statements. The Form 8-Ks attaching the PSAs for each Securitization were also filed with the SEC. The date on which the Prospectus Supplement and Form 8-K were filed for each Securitization, as well as the filing number of the Shelf Registration Statement related to each, are set forth in Table 3 below.

Table 3

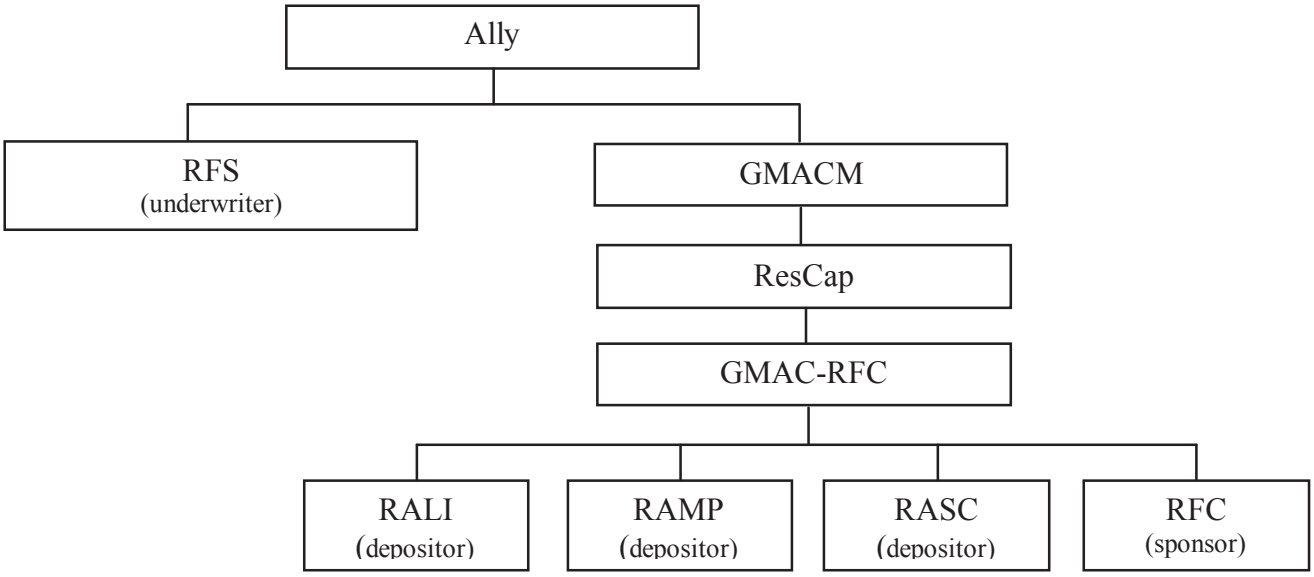
B. Defendants' Participation in the Securitization Process



53. Each of the Defendants played a role in the securitization process and the marketing for some or all of the Certificates purchased by Freddie Mac, which included purchasing the mortgage loans from the originators, arranging the Securitizations, selling the mortgage loans to the depositor, transferring the mortgage loans to the trustee on behalf of the Certificateholders, underwriting the public offering of the Certificates, structuring and issuing the Certificates, and marketing and selling the Certificates to Freddie Mac.

54. The Defendants are liable, jointly and severally, as participants in the registration, issuance and offering of the Certificates purchased by Freddie Mac, including issuing, causing, or making materially misleading statements in the Registration Statements, and omitting material

facts required to be stated therein or necessary to make the statements contained therein not misleading.

1. Ally

55. Defendant Ally wholly owns GMACM and RFS and is also the ultimate parent of GMACM, ResCap, GMAC-RFC, RFC, RALI, RASC and RAMP. The chart below indicates the corporate structure of the relevant GMAC entities.

2. RFC

56. RFC was formed in 1985 as a wholly-owned subsidiary of GMAC-RFC for the purpose of issuing mortgage-backed securities through its affiliates RALI, RASC and RAMP. RFC was a leading sponsor of mortgage-backed securities at all relevant times based largely in part on GMAC-RFC becoming one of the largest issuers of mortgage-backed securities in the world. According to *Inside Mortgage Finance*, GMAC-RFC issued (i) $42.336 billion of non-agency mortgage-backed securities in 2004, (ii) $56.93 billion in 2005, making it the fifth largest issuer in 2005; (iii) $66.19 billion in 2006, making it the fourth largest issuer in 2006; and

(iv) $32.4 billion in 2007, which still made GMAC-RFC the eighth largest issuer in 2007.[7] *2011 Mortgage Market Statistical Annual*, Vol. II (Inside Mortgage Finance Publ□ns, Inc., 2011)

57. Defendant RFC was the sponsor of all 21 Securitizations. In that capacity, RFC determined the structure of the Securitizations, initiated the Securitizations, purchased the mortgage loans to be securitized, determined distribution of principal and interest, and provided data to the rating agencies to secure investment grade ratings for the Certificates sold to Freddie Mac. RFC also selected RALI, RASC and RAMP as the special-purpose vehicles that would be used to transfer the mortgage loans from RFC to the trusts, and selected RFS or the Non-GMAC Underwriter Defendants for the Securitizations, including Defendant RFS. In its role as sponsor, RFC knew and intended that the mortgage loans it purchased would be sold in connection with the securitization process, and that certificates representing such loans would be issued by the relevant trusts.

58. For all 21 Securitizations that it sponsored, RFC also conveyed the mortgage loans to RALI, RASC and RAMP, as depositor, pursuant to an Assignment and Recognition Agreement or a Mortgage Loan Purchase Agreement. In these agreements, RFC made certain representations and warranties to RALI, RASC and RAMP regarding the groups of loans collateralizing the Certificates purchased by Freddie Mac. These representations and warranties were assigned by RALI, RASC and RAMP to the trustees for the benefit of the Certificateholders.

---

[7] □Agency□ mortgage-backed securities are guaranteed by a government agency or government-sponsored enterprise such as Fannie Mae or Freddie Mac, while □non-agency□ mortgage-backed securities are issued by banks and financial companies not associated with a government agency or government-sponsored enterprise.

3. RALI, RASC and RAMP

59. Defendants RALI, RASC and RAMP have been engaged in the securitization of mortgage loans as depositors since their incorporation in 1995, 1994, and 1999, respectively. They are special-purpose entities formed solely for the purpose of purchasing mortgage loans, filing registration statements with the SEC, forming issuing trusts, assigning mortgage loans and all of their rights and interests in such mortgage loans to the trustee for the benefit of certificateholders, and depositing the underlying mortgage loans into the issuing trusts.

60. RALI was the depositor for six of the 21 Securitizations, RASC was the depositor for 10 Securitizations, and RAMP was the depositor for five Securitizations. In their capacity as depositors, RALI, RASC and RAMP purchased the mortgage loans from RFC (as sponsor) pursuant to an Assignment and Recognition Agreement or a Mortgage Loan Purchase Agreement. RALI, RASC and RAMP then sold, transferred, or otherwise conveyed the mortgage loans to be securitized to the trusts. Together with the other Defendants, RALI, RASC and RAMP were also responsible for preparing and filing the Registration Statements pursuant to which the Certificates purchased by Freddie Mac were offered for sale. The trusts, in turn, held the mortgage loans for the benefit of the Certificateholders, and issued the Certificates in public offerings for sale to investors, including Freddie Mac.

4. RFS

61. Defendant RFS was formed in 1990 and is a wholly-owned subsidiary of Ally. Defendant RFS is an investment bank, solely operating as a registered broker-dealer with respect to the issuance and underwriting of residential and commercial mortgage-backed securities. At all relevant times, RFS was one of the leading underwriters of mortgage and other asset-backed securities in the United States. According *to Inside Mortgage Finance* in 2004, RFS underwrote over $8.9 billion of non-agency mortgage-backed securities. In 2005, the data shows that RFS

underwrote $14.5 billion, and in 2006 and 2007, RFS underwrote $12.4 billion and $10.2 billion in non-agency mortgage-backed securities, respectively.

62. Defendant RFS was the co-lead and selling underwriter for five of the 21 Securitizations and an underwriter for an additional six Securitizations. In that role, it was responsible for underwriting and managing the offer and sale of the Certificates to Freddie Mac and other investors. RFS was also obligated to conduct meaningful due diligence to ensure that the Registration Statements did not contain any material misstatements or omissions, including as to the manner in which the underlying mortgage loans were originated, transferred and underwritten.

5. GMAC-RFC

63. GMAC-RFC employed its wholly-owned subsidiaries, RFC, RALI, RASC and RAMP, in the key steps of the securitization process. Unlike typical arm□s length securitizations, the Securitizations involved various Ally subsidiaries and affiliates at virtually each step in the chain. For all 21 Securitizations, RFC was the sponsor and either RALI, RASC or RAMP was the depositor.

64. GMAC-RFC, as the sole corporate parent of RFC, RALI, RASC and RAMP had the practical ability, in connection with the Securitizations, and the issuance and sale of the Certificates to Freddie Mac, to direct and control the actions of RFC, RALI, RASC and RAMP, and in fact exercised such direction and control over these activities.

6. Ally, GMACM and ResCap

65. Defendant ResCap wholly owns GMAC-RFC and Defendant GMACM wholly owns ResCap. ResCap, as the sole corporate parent of GMAC-RFC, had the practical ability to direct and control the actions of GMAC-RFC, and in fact, exercised such direction and control over the activities of this entity related to the issuance and sale of the Certificates to Freddie

Mac. GMACM, as the sole corporate parent of ResCap, had the practical ability to direct and control the actions of ResCap, and in fact, exercised such direction and control over the activities of this entity related to the issuance and sale of the Certificates to Freddie Mac.

66. As detailed, *supra*, the Securitizations involved all of the GMAC Defendants at virtually every step in the process, and Ally profited substantially from this vertically integrated approach to mortgage-backed securitization. Furthermore, ResCap shared overlapping management with the other GMAC entities. For example, in 2007, David Applegate served as President of GMACM; the COO of ResCap, GMACM's direct subsidiary; the Chairman and CEO of GMAC-RFC, ResCap's direct subsidiary; and Principal Executive Officer of RALI, GMAC-RFC's direct subsidiary, for which he signed a Shelf Registration and amendment thereto. Similarly, Bruce Paradis served as CEO of GMAC-RFC and then CEO of ResCap, while also serving as the Director, President, and CEO of RALI, RAMP, and RASC -- in which capacity he signed three Shelf Registration Statements and amendments thereto.

7. Non-GMAC Underwriters

67. The Non-GMAC Underwriters were the nation's largest non-agency mortgage-backed securities underwriters between 2004 through 2007. The Non-GMAC Underwriter Defendants were the co-lead underwriters for twelve Securitizations and underwriters for an additional seven Securitizations. In those roles, the Non-GMAC Defendants were responsible for underwriting and managing the offer and sale of the Certificates to Freddie Mac. The Non-GMAC Underwriter Defendants also were obligated to conduct due diligence to ensure that the Registration Statements did not contain any material misstatements or omissions, including as to the manner in which the underlying mortgage loans were originated, transferred and underwritten.

68. Further, through their positions at GMAC, including Defendants GMACM, ResCap, GMAC-RFC, RFS, RFC, RAMP, RALI, and RASC, certain persons had the practical ability to direct and control the actions of the GMAC Defendants in issuing and selling the Certificates, and in fact, exercised such direction and control over the activities of these entities in connection with the issuance and sale for the Certificates to Freddie Mac. Many people simultaneously held management positions at GMACM, ResCap, GMAC-RFC, RFS, and/or RFC while also holding management positions at RAMP, RALI and RASC.

C. Statements in the Prospectus Supplements

69. Plaintiff relies on its claims, in part, upon the Registration Statements in their entirety. Specific representations and warranties in the Registration Statements that form the basis for the claims herein are set forth for each Securitization in Appendix A hereto.

1. Compliance with Underwriting Guidelines

70. The Prospectus Supplement for each of the Securitizations contained detailed descriptions of the underwriting guidelines used to originate the mortgage loans included in the Securitizations. Because payment on, and the value of, the Certificates is based on the cash flows from the underlying mortgage pool, representations concerning compliance with the stated underwriting guidelines were material to reasonable investors. Investors, including Freddie Mac, did not have access to information concerning the collateral pool, and were required to rely on the representations in the Prospectus Supplements concerning that collateral.

71. Among other consequences, the failure to originate mortgage loans in accordance with stated guidelines diminished the value of the Certificates by increasing the significant risk that an investor will not be paid its principal and interest. Misrepresentations concerning, or failing accurately to disclose, borrower, loan, and property characteristics bearing on the risk of default by the borrower as well as the severity of losses given default can artificially inflate the

perceived value of the securities. Without accurate information regarding the collateral pool, reasonable investors, including Freddie Mac, are unable to accurately and independently assess whether the price of an RMBS adequately accounts for the risks they are assuming when they purchase the security.

72. The Prospectus Supplements for each of the Securitizations contained several key statements with respect to the loan purchasing and underwriting standards of the entities that originated the loans in the Securitizations. For example, with respect to the RAMP 2005-EFC7 Securitization, for which EquiFirst Corporation ("EquiFirst") was originator, RFS was a co-underwriter, and RASC was the depositor, the Prospectus Supplement states:

> "*All of the mortgage loans included in the trust were originated by EquiFirst, generally in accordance with [EquiFirst's] underwriting criteria*" (emphasis added) and that
>
> "EquiFirst's underwriting standards are primarily intended to assess the ability and willingness of the borrower to repay the debt, and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan."

73. With respect to the information evaluated by the originator (in this example, EquiFirst), the Prospectus Supplement stated that:

> *EquiFirst considers, among other things, a mortgagor's credit history, repayment ability and debt service-to-income ratio ("Debt Ratio"), as well as the value, type and use of the mortgaged property."* (emphasis added)
>
> "The Credit Bureau Risk Score is used along with, but not limited to, mortgage payment history, seasoning on bankruptcy and/or foreclosure, and is not a substitute for the underwriter's judgment. EquiFirst's underwriting staff fully reviews each loan to determine whether EquiFirst's guidelines for income, assets, employment and collateral are met. (Emphasis added).

74. The Prospectus Supplement for the RAMP 2005-EFC7 Securitization further states:

> EquiFirst's guidelines comply with applicable federal and state laws and regulations and generally require an appraisal of the mortgaged property which conforms to Freddie Mac and/or Fannie Mae standards. All loans are subject to EquiFirst's appraisal review process. Appraisals are provided by qualified independent appraisers licensed in their respective states.

75. The Prospectus Supplements for each of the Securitizations made similar representations with respect to the underwriting guidelines employed by each of the originators in the Securitizations, which included: Aegis Mortgage Corporation, Decision One Mortgage Company, LLC, EFC Holdings Corporation and its subsidiary EquiFirst Corporation, Finance America, LLC, First National Bank of Nevada, Home123 Corporation, Homefield Financial Inc., Mortgage Lenders Network USA, Inc., New Century Mortgage Corporation, Ownit Mortgage Solutions Inc., People's Choice Home Loan, Inc., Pinnacle Financial Corporation and SCME Mortgage Bankers, Inc. *See* Appendix A.

76. Contrary to those representations, however, these originators routinely and egregiously departed from, or abandoned completely, their stated underwriting guidelines, as discussed in Section I.D.2, *infra*. As a result, the representations concerning compliance with underwriting guidelines and the inclusion and descriptions of those guidelines in the Prospectus Supplements were false and misleading, and the actual mortgages underlying each Securitization exposed the purchasers, including Freddie Mac, to a materially greater risk to investors than that represented in the Prospectus Supplements.

77. As reflected more fully in Appendix A, for the vast majority of the Securitizations, the Prospectus Supplements included representations that: (i) the mortgage loans were underwritten in accordance with each originator's underwriting guidelines in effect at the time of origination, subject only to limited exceptions; and (ii) the origination and collection

practices used by the originator with respect to each mortgage note and mortgage were in all respects legal, proper and customary in the mortgage origination and servicing business.

78. The inclusion of these representations in the Prospectus Supplements had the purpose and effect of providing assurances to investors regarding the quality of the mortgage collateral underlying the Securitizations. These representations were material to a reasonable investor's decisions to purchase the Certificates, and they were material to Freddie Mac. As alleged more fully below, Defendants' representations were materially false.

2. Occupancy Status of Borrower

79. The Prospectus Supplements for each Securitization set forth information about the occupancy status of the borrowers of the loans underlying the Securitization; that is, whether the property securing a mortgage is (i) the borrower's primary residence; (ii) a second home; or (iii) an investment property. This information was presented in tables, typically titled "Occupancy Status of the Mortgage Loans," that assigned all the properties in the collateral group to one of the following categories: (i) "Primary," or "Owner-Occupied;" (ii) "Second Home," or "Secondary"; and (iii) "Investor" or "Non-Owner." For each category, the table stated the number of loans purportedly in that category. Occupancy statistics for the Supporting Loan Groups for each Securitization were reported in the Prospectus Supplements as follows:[8]

[8] Each Prospectus Supplement provides the total number of loans and the number of loans in the following categories: owner-occupied, investor, and second home. These numbers have been converted to percentages for ease of comparison.

Table 4

Transaction	Tranche	Supporting Loan Group	Primary or Owner-Occupied	Second Home / Secondary	Investor
RALI 2005-QO4	IA1	Group I	81.68%	1.71%	16.61%
RALI 2006-QO4	IA1	Group I	79.14%	5.53%	15.33%
RALI 2006-QO4	IA2	Group I	79.14%	5.53%	15.33%

RALI 2006-QO8	IIA	Group II	81.78%	3.41%	14.81%
RALI 2006-QO9	IIA	Group II	80.99%	4.05%	14.97%
RALI 2007-QH5	AII	Group II	77.36%	5.74%	16.90%
RAMP 2005-EFC6	AII	Group II	98.15%	0.37%	1.48%
RAMP 2005-EFC7	AII	Group II	100.00%	0.00%	0.00%
RAMP 2005-NC1	AII	Group II	83.96%	5.56%	10.48%
RAMP 2005-RS9	AII	Group II	65.80%	1.35%	32.85%
RAMP 2006-RS1	AII	Group II	78.45%	2.11%	19.44%
RASC 2005-EMX3	AII	Group II	93.92%	2.29%	3.79%
RASC 2005-KS10	AII	Group II	94.42%	0.85%	4.72%
RASC 2005-KS11	AII	Group II	89.88%	2.53%	7.59%
RASC 2006-EMX8	AII	Group II	100.00%	0.00%	0.00%
RASC 2006-EMX9	AII	Group II	100.00%	0.00%	0.00%
RASC 2006-KS3	AII	Group II	99.24%	0.76%	0.00%
RASC 2006-KS9	AII	Group II	95.82%	2.81%	1.36%
RASC 2007-EMX1	AII	Group II	93.65%	1.98%	4.37%
RASC 2007-KS2	AII	Group II	95.23%	0.71%	4.05%
RASC 2007-KS3	AII	Group II	95.56%	1.27%	3.17%

80. As Table 4 makes clear, the Prospectus Supplements reported that 17 of the 22 Supporting Loan Groups contained at least 80 percent owner-occupied loans, and 11 of the 22 Supporting Loan Groups contained at least 90 percent owner-occupied loans.

81. Because information about occupancy status is an important factor in determining the credit risk associated with a mortgage loan -- and, therefore, the securitization that it backs -- the statements in the Prospectus Supplements concerning occupancy status were material to a

reasonable investor's decision to invest in the Certificates, and they were material to Freddie Mac. These statements were material because, among other reasons, borrowers who live in mortgaged properties are substantially less likely to default and more likely to care for their primary residence than borrowers who purchase properties as second homes or investments and live elsewhere. For example, as stated in the Prospectus Supplement for the RALI 2005-QO4 Securitization: "[T]he rate of default on mortgage loans or manufactured housing contracts that are secured by investment properties . . . may be higher than on other mortgage loans or manufactured housing contracts." Accordingly, the percentage of loans in the collateral group of a securitization that are secured by mortgage loans on owner-occupied residences is an important measure of the risk of the certificates sold in that securitization.

82. Other things being equal, the lower the percentage of loans secured by owner-occupied residences, the greater the risk of loss to Certificateholders. Even modest differences in the percentages of primary/owner-occupied, second home/secondary, and investment properties in the collateral group of a securitization can have a significant effect on the risk of each certificate sold in that securitization, and thus, are important to the decision of a reasonable investor whether to purchase any such certificate. As discussed *infra* at paragraphs 94 through 98, the Prospectus Supplements for each Securitization materially overstated the percentage of loans in the Supporting Loan Groups that were owner-occupied, thereby misrepresenting the degree of risk of the Certificates purchased by Freddie Mac.

3. Loan-to-Value Ratios

83. The loan-to-value ratio of a mortgage loan, or LTV ratio, is the ratio of the balance of the mortgage loan to the value of the mortgaged property when the loan is made.

84. The denominator in the LTV ratio is the value of the mortgaged property, and is generally the lower of the purchase price or the appraised value of the property. In a refinancing

or home-equity loan, there is no purchase price to use as the denominator, so the denominator is often equal to the appraised value at the time of the origination of the refinanced loan or home-equity loan. Accordingly, an accurate appraisal is essential to an accurate LTV ratio. In particular, an inflated appraisal will understate, sometimes greatly, the credit risks associated with a given loan.

85. The Prospectus Supplements for the Securitizations contain information about the LTV ratio for each Supporting Loan Group. Table 5 below reflects two categories of important information reported in the Prospectus Supplements concerning the LTV ratios for each Supporting Loan Group: (i) the percentage of loans with an LTV ratio of 80 percent or less; and (ii) the percentage of loans with an LTV ratio greater than 100 percent. [9]

Table 5

Transaction	Supporting Loan Group	% of Loans, by Aggregate Principal Balance, with LTV Less than or Equal to 80%	% of Loans, by Aggregate Principal Balance, with LTV Greater than 100%
RAMP 2005-EFC6	Group II	57.86%	0.00%
RAMP 2005-EFC7	Group II	71.74%	0.00%
RASC 2005-EMX3	Group II	47.33%	0.00%
RASC 2005-KS10	Group II	45.62%	0.00%
RASC 2005-KS11	Group II	61.19%	0.00%
RAMP 2005-NC1	Group II	57.07%	0.00%
RALI 2005-QO4	Group I	94.77%	0.00%
RAMP 2005-RS9	Group II	53.93%	0.00%
RASC 2006-EMX8	Group II	53.72%	0.00%
RASC 2006-EMX9	Group II	41.34%	0.00%
RASC 2006-KS3	Group II	61.60%	0.00%
RASC 2006-KS9	Group II	45.21%	0.00%
RALI 2006-QO4 (IA1 & IA2)	Group I	94.37%	0.00%
RALI 2006-QO5	Group I	95.44%	0.00%

[9] As used in this Complaint, "LTV" refers to the loan-to-value ratio for first lien mortgages and for properties with second liens subordinate to the lien included in the securitization (*i.e.*, only the securitized lien is included in the numerator of the LTV calculation). Where the securitized lien is junior to another loan, the more senior lien has been added to the securitized one to determine the numerator in the LTV calculation (this latter calculation is sometimes referred to as the combined-loan-to-value ratio, or "CLTV").

Transaction	Supporting Loan Group	% of Loans, by Aggregate Principal Balance, with LTV Less than or Equal to 80%	% of Loans, by Aggregate Principal Balance, with LTV Greater than 100%
RALI 2006-QO8	Group II	95.56%	0.00%
RALI 2006-QO9	Group II	93.89%	0.00%
RAMP 2006-RS1	Group II	44.73%	0.00%
RASC 2007-EMX1	Group II	52.14%	0.00%
RASC 2007-KS2	Group II	44.68%	0.00%
RASC 2007-KS3	Group II	43.00%	0.00%
RALI 2007-QH5	Group II	93.70%	0.00%

86. The LTV ratio is among the most important measures of the risk of a mortgage loan for several reasons. First, the LTV ratio is a strong indicator of the likelihood of default because a higher LTV ratio makes it more likely that a decline in the value of a property will completely eliminate a borrower's equity, and will incentivize the borrower to stop making mortgage payments and abandon the property. Second, the LTV ratio is a strong predictor of the severity of loss in the event of a default because the higher the LTV ratio, the smaller the "equity cushion," and the greater the likelihood that the proceeds of foreclosure will not cover the unpaid balance of the mortgage loan.

87. Thus, LTV ratios are material to a reasonable investor's investment decision with respect to the Certificates, and they were material to Freddie Mac. Even small differences between the LTV ratios of the mortgage loans in the collateral group of a securitization have a significant effect on the likelihood that collateral groups will generate sufficient funds to pay certificateholders in that securitization. Such differences are important to the decision of a reasonable investor on whether to purchase any such certificate, and they affect the intrinsic value of the certificate.

88. As Table 5 makes clear, the Prospectus Supplements for the majority of the Securitizations reported that the majority of the mortgage loans in the Supporting Loan Groups

had an LTV ratio of 80 percent or less. The Prospectus Supplements also reported that *none* of the Supporting Loan Groups contained a single loan with an LTV ratio over 100 percent.

89. As discussed *infra* at paragraphs 99 through 104, the Prospectus Supplements for the Securitizations materially *overstated* the percentage of loans in the Supporting Loan Groups with an LTV ratio at or less than 80 percent, and materially *understated* the percentage of loans in the Supporting Loan Groups with an LTV ratio over 100 percent, thereby misrepresenting the degree of risk to Certificateholders.

4. Credit Ratings

90. Credit ratings are assigned to the tranches of mortgage-backed securitizations by the credit rating agencies, including Standard & Poor□s, Moody□s Investor Service, and Fitch Ratings. Each credit rating agency uses its own scale with letter designations to describe various levels of risk. In general, AAA or its equivalent ratings are at the top of the credit rating scale and are intended to designate the safest investments. C and D ratings are at the bottom of the scale and refer to investments that are currently in default and exhibit little or no prospect for recovery. At the time Freddie Mac purchased the Certificates, investments with AAA or its equivalent ratings historically experienced a loss rate of less than .05 percent. Investments with a BBB rating, or its equivalent, historically experienced a loss rate of less than one percent. As a result, securities with credit ratings between AAA or its equivalent through BBB- or its equivalent were generally referred to as □investment grade.□

91. Rating agencies determine the credit rating for each tranche of a mortgage-backed securitization by comparing the likelihood of contractual principal and interest repayment to the □credit enhancements□available to protect investors. Rating agencies determine the likelihood of repayment by estimating cash flows based on the quality of the underlying mortgages by using sponsor-provided loan-level data. Credit enhancements, such as subordination, represent the

amount of "cushion" or protection from loss incorporated into a given securitization.[10] This cushion is intended to improve the likelihood that holders of highly-rated certificates receive the interest and principal to which they are contractually entitled. The level of credit enhancement offered is based on the composition of the loans in the underlying collateral group and entire securitization. Riskier loans underlying the securitization necessitate higher levels of credit enhancement to insure payment to senior certificate holders. If the collateral within the deal is of a higher quality, then rating agencies require less credit enhancement for an AAA or its equivalent rating.

92. For almost a hundred years, investors like pension funds, municipalities, insurance companies, and university endowments have relied heavily on credit ratings to assist them in distinguishing between safe and risky investments.

93. Each tranche of the Securitizations received a credit rating before issuance, which purported to describe the riskiness of that tranche. Defendants reported the credit ratings for each tranche in the Prospectus Supplements. For each of the Certificates purchased by Freddie Mac was AAA or its equivalent the credit rating provided. The accuracy of these ratings was material to a reasonable investor's decision to purchase the Certificates, and it was material to Freddie Mac. Among other things, the ratings provided additional assurance that investors in the Certificates would receive the expected interest and principal payments. As set forth in Table 8, *infra* at paragraph 126, the ratings for the majority of the Securitizations were severely downgraded after Freddie Mac's purchase of the Certificates. Upon information and belief, the

---

[10] "Subordination" refers to the fact that the certificates for a mortgage-backed securitization are issued in a hierarchical structure, from senior to junior. The junior certificates are "subordinate" to the senior certificates in that, should the underlying mortgage loans become delinquent or default, the junior certificates suffer losses first. These subordinate certificates thus provide a degree of protection to the senior certificates from certain losses on the underlying loans.

initial ratings were based in substantial part upon the materially inaccurate and incomplete information in the Registration Statements and related information provided to the ratings agencies.

D. Falsity of Statements in the Registration Statements and Prospectus Supplements

1. The Statistical Data Provided in the Prospectus Supplements Concerning Owner-Occupancy and Loan-to-Value Ratios was Materially False

94. A review of loan-level data was conducted to assess whether the statistical information provided in the Prospectus Supplements was true and accurate. For each Securitization, the review included an analysis either of: (i) a sample of 1,000 loans randomly selected from the Supporting Loan Group; or (ii) all the loans in the Supporting Loan Group if there were fewer than 1,000 such loans. The review of sample data has confirmed, on a statistically-significant basis, that the data provided in the Prospectus Supplements concerning owner-occupancy and LTV ratios was materially false, and that the Prospectus Supplements contained material misrepresentations with respect to the underwriting standards employed by the originators, and certain key characteristics of the mortgage loans across the Securitizations.

a. Owner-Occupancy Data was Materially False

95. The data review has revealed that the owner-occupancy statistics reported in the Prospectus Supplements were materially false and inflated. Indeed, the Prospectus Supplements overreported the number of underlying properties that were occupied by their owners, and underreported the number of underlying properties held as second homes or investment properties.

96. To determine whether a given borrower actually occupied the property as claimed, a number of tests were conducted, including, *inter alia*, whether, months after the loan

closed, the borrower's tax bill was being mailed to the property or to a different address, whether the borrower had claimed a tax exemption on the property, and whether the mailing address of the property was reflected in the borrower's credit reports, tax records, or lien records. Failing two or more of these tests constitutes strong evidence that the borrower did not live at the mortgaged property and instead used it as a second home or an investment property, rendering it much more likely that a borrower will not repay the loan.

97. For each Securitization, a significant number of the underlying loans failed two or more of these tests, demonstrating that the owner-occupancy statistics provided to Freddie Mac were materially false and misleading. For example, the Prospectus Supplement for the RAMP 2005-EFC6 Securitization -- for which RFC was the sponsor and RFS was a co-underwriter -- stated that 1.85 percent of the underlying properties by loan count in the Supporting Loan Group were not owner-occupied. But the data review revealed that the true percentage of non-owner-occupied properties was 13.67 percent,[11] approximately 700 percent greater than the percentage reported in the Prospectus Supplement because for 12.04 percent of the properties represented as owner-occupied, the owners lived elsewhere.

98. The data review revealed that for each Securitization, the Prospectus Supplement misrepresented the percentage of non-owner-occupied properties. The true percentage of non-owner-occupied properties, as determined by the data review, versus the percentage stated in the Prospectus Supplement for each Securitization, is reflected in Table 6 below. Table 6

[11] The true percentage of non-owner-occupied properties (Table 6 Column C) is calculated by adding the percentage reported in the Prospectus Supplement (Table 6 Column A) to the product of owner-occupied properties reported in the Prospectus Supplement (100 minus Column A) and the percentage of properties reported as owner-occupied but with strong indication of non-owner-occupancy (Table 6 Column B).

demonstrates that the Prospectus Supplements for each Securitization significantly understated the percentage of non-owner-occupied properties.

Table 6

		A	B	C	D
Transaction	**Supporting Loan Group**	**Reported % of Non-Owner-Occupied Properties**	**Percentage of Properties As Owner-Occupied Misrepresented in the Registration Statements**	**Actual % of Non-Owner-Occupied Properties**	**Understatement of Non-Owner-Occupied Properties in the Offering Materials**
RAMP 2005-EFC6	Group II	1.85%	12.04%	13.67%	11.82%
RAMP 2005-EFC7	Group II	0.00%	11.88%	11.88%	11.88%

RASC 2007-EMX1	Group II	6.35%	9.44%	15.19%	8.84%
RASC 2007-KS2	Group II	4.77%	10.28%	14.56%	9.79%
RASC 2007-KS3	Group II	4.44%	11.10%	15.05%	10.60%
RALI 2007-QH5	Group II	22.64%	15.76%	34.83%	12.20%

b. Loan-to-Value Data was Materially False

99. The data review has further revealed that the LTV ratios disclosed in the Prospectus Supplements were materially false and understated, as more specifically set out below. For each of the sampled loans, an industry standard automated valuation model (□AVM□) was used to calculate the value of the underlying property at the time the mortgage loan was originated. AVMs are routinely used in the industry as a way of valuing properties during prequalification, origination, portfolio review, and servicing. AVMs rely upon similar

data as appraisers -- primarily county assessor records, tax rolls, and data on comparable properties. AVMs produce independent, statistically-derived valuation estimates by applying modeling techniques to this data.

100. Applying the AVM to the available data for the properties securing the sampled loans shows that the retroactive appraised value given to such properties was significantly higher than the actual value of such properties. The result of this overstatement of property values is a material understatement of LTV. That is, if a property s true value is significantly less than the value used in the loan underwriting, then the loan represents a significantly higher percentage of the property s value. This, of course, increases the risk a borrower will not repay the loan and the risk of greater losses in the event of a default. As stated in the Prospectus Supplement for RALI 2005-QO4: The rate of default . . . on mortgage loans or manufactured housing contracts with higher LTV ratios may be higher than for other types of mortgage loans or manufactured housing contracts.

101. For example, for the RALI 2005-QH5 Securitization, for which RFC was the sponsor and RFS was a co-underwriter, the Prospectus Supplement stated that no LTV ratios for the Supporting Loan Group were above 100 percent. In fact, 18.26 percent of the sample of loans included in the data review had LTV ratios above 100 percent. In addition, the Prospectus Supplement stated that 93.70 percent of the loans had LTV ratios at or below 80 percent. The data review indicated that only 45.89 percent of the loans had LTV ratios at or below 80 percent.

102. The data review revealed that for each Securitization, the Prospectus Supplement misrepresented the percentage of loans with an LTV ratio above 100 percent, as well the percentage of loans that had an LTV ratio at or below 80 percent. Table 7 reflects (i) the true percentage of mortgages in the Supporting Loan Group with LTV ratios above 100 percent,

versus the percentage reported in the Prospectus Supplement; and (ii) the true percentage of mortgages in the Supporting Loan Group with LTV ratios at or below 80 percent, versus the percentage reported in the Prospectus Supplement. The percentages listed in Table 7 were calculated by aggregated principal balance.

Table 7

		PROSPECTUS	DATA REVIEW	PROSPECTUS	DATA REVIEW
Transaction	Supporting Loan Group	% of Loans Reported to have LTV Ratio at or Less than 80%	True % of Loans with LTV Ratio at or Less than 80%	% of Loans Reported to have LTV Ratio Over 100%	True % of Loans with LTV Ratio Over 100%
RAMP 2005-EFC6	Group II	57.86%	35.31%	0.00%	16.70%
RAMP 2005-EFC7	Group II	71.74%	38.91%	0.00%	13.32%

RASC 2006-EMX8	Group II	53.72%	30.69%	0.00%	26.94%
RASC 2006-EMX9	Group II	41.34%	21.70%	0.03%	33.84%
RASC 2006-KS3	Group II	61.60%	44.12%	0.00%	11.68%
RASC 2006-KS9	Group II	45.21%	27.87%	0.00%	26.92%
RALI 2006-QO4 (IA1 & IA2)	Group I	94.37%	57.25%	0.00%	8.43%
RALI 2006-QO5	Group I	95.44%	53.64%	0.00%	11.09%
RALI 2006-QO8	Group II	95.56%	46.48%	0.00%	11.62%
RALI 2006-QO9	Group II	93.89%	48.39%	0.00%	13.12%
RAMP 2006-RS1	Group II	44.73%	29.46%	2.60%	22.23%
RASC 2007-EMX1	Group II	52.14%	27.06%	0.00%	26.46%
RASC 2007-KS2	Group II	44.68%	28.40%	0.00%	28.40%
RASC 2007-KS3	Group II	43.00%	27.04%	0.00%	29.22%
RALI 2007-QH5	Group II	93.70%	45.89%	0.00%	18.26%

103. As Table 7 demonstrates, the Prospectus Supplements for all the Securitizations falsely reported that only two of the Supporting Loan Groups had mortgage loans with an LTV ratio over 100 percent: the data review revealed that at least eight percent of the mortgage loans for *every* Securitization had an LTV ratio over 100 percent, and for most Securitizations this figure was much larger. Indeed, for 19 of the 21 Securitizations, the data review revealed that

more than 10 percent of the mortgages in the Supporting Loan Group had a true LTV ratio over 100 percent. For 12 Securitizations, the data review revealed that more than 15 percent of the mortgages in the Supporting Loan Group had a true LTV ratio over 100 percent and for seven Securitizations, the data review revealed that more than 20 percent of the mortgages in the Supporting Loan Group had a true LTV ratio over 100 percent.

104. These misrepresentations with respect to reported LTV ratios also demonstrate that the representations in the Registration Statements relating to appraisal practices were false, and that the appraisers, in many instances, furnished appraisals that they understood were inaccurate and that they knew bore no reasonable relationship to the actual value of the underlying properties. Indeed, independent appraisers following proper practices, and providing genuine estimates as to valuation, would not systematically generate appraisals that deviate so significantly (and so consistently upward) from the true values of the appraised properties. The Financial Crisis Inquiry Commission ("FCIC"), created by Congress to investigate the mortgage crisis and attendant financial collapse in 2008, identified "inflated appraisals" as a pervasive problem during the period of the Securitizations, and determined through its investigation that appraisers were often pressured by mortgage originators, among others, to produce inflated results. (*See* FCIC, Final Report of the National Commission on the Causes of the Financial and Economic Crisis in the United States (2011) ("FCIC Report"), at 91.)

2. The Originators of the Underlying Mortgage Loans Systematically Disregarded Their Underwriting Guidelines

105. The Prospectus Supplements each contained material misstatements and omissions concerning the underwriting guidelines used by the originators of the loans included in the Securitizations, defined herein as the Non-Party Originators. Among other things, the Prospectus Supplements stated that the Non-Party Originators underwrote all loans in

compliance with their respective underwriting guidelines. *See* Appendix A, Sections I-XXI at Subsections B.

106. The Non-Party Originators -- companies such as New Century, Decision One, and others -- systematically disregarded their respective underwriting guidelines, as confirmed not only by the pervasively false owner-occupancy and LTV figures alleged *supra*, but also by: (1) government investigations and private actions relating to their underwriting practices, which have revealed widespread abandonment of their reported underwriting guidelines during the period of the Securitizations; (2) the collapse of the credit ratings of Certificates purchased by Freddie Mac; and (3) the surge in delinquencies and defaults in the mortgages in the Securitizations.

a. Government and Private Investigations Confirm That the Originators of the Loans in the Securitizations Systematically Failed to Adhere to Their Underwriting Guidelines

107. An extraordinary volume of publicly-available information, including government reports and investigations, confirms that the originators whose loans were included by the Defendants in the Securitizations abandoned their loan origination guidelines throughout the period of the Securitizations.

108. For example, in November 2008, the Office of the Comptroller of the Currency (□OCC□), an office within the United States Department of the Treasury, issued a report identifying the □Worst Ten□mortgage originators in the □Worst Ten□metropolitan areas. The worst originators were defined as those with the largest number of non-prime mortgage foreclosures for 2005-2007 originations. Aegis, Decision One, New Century, Ownit,[12] and

[12] Ownit, which originated loans for one of the Securitizations, was identified by the OCC as the fifteenth worst subprime lender in the country based on the delinquency rates of the mortgages it originated in the ten metropolitan areas between 2005 and 2007 with the highest

People's Choice -- the companies that originated loans for eight of the Securitizations at issue here -- were all on that list. *See* "Worst Ten in the Worst Ten," Office of the Comptroller of the Currency Press Release, November 13, 2008. Several of the Non-Party Originators -- including New Century, HFN and MLN -- have been the target of government investigations or private actions that allege a complete abandonment of their reported underwriting guidelines.

i. New Century Violated Its Underwriting Guidelines

109. New Century and its subsidiary, Home123, originated loans for at least four of the Securitizations. As stated in the Prospectus Supplement for the RAMP 2005-NC1 Securitization, "[f]or the quarter ending September 30, 2005, New Century Financial Corporation originated $40.4 billion in mortgage loans." By the end of 2006, Inside Mortgage Finance reports that New Century was the second largest subprime mortgage loan originator in the United States, with a loan production volume that year of $51.6 billion. Before its collapse in the first half of 2007, New Century was one of the largest subprime lenders in the country. New Century filed for protection from its creditors under Chapter 11 of the federal Bankruptcy Code on April 2, 2007.

110. In 2010, the OCC identified New Century as *the* worst subprime lender in the country based on the delinquency rates of the mortgages it originated in the 10 metropolitan areas between 2005 and 2007 with the highest rates of delinquency. *See* "Worst Ten in the Worst Ten: Update," Office of the Comptroller of Currency Press Release, March 22, 2010. Further, in January 2011, the FCIC Report detailed, among other things, the collapse of mortgage underwriting standards and subsequent collapse of the mortgage market and wider economy. *See* FCIC Report. The FCIC Report singled out New Century for its role:

---

rates of delinquency. *See* "Worst Ten in the Worst Ten: Update," Office of the Comptroller of Currency Press Release, March 22, 2010.

> New Century—once the nation's second-largest subprime lender—ignored early warnings that its own loan quality was deteriorating and stripped power from two risk-control departments that had noted the evidence. In a June 2004 presentation, the Quality Assurance staff reported they had found severe underwriting errors, including evidence of predatory lending, federal and state violations, and credit issues, in 25% of the loans they audited in November and December 2003. In 2004, Chief Operating Officer and later CEO Brad Morrice recommended these results be removed from the statistical tools used to track loan performance, and in 2005, the department was dissolved and its personnel terminated. The same year, the Internal Audit department identified numerous deficiencies in loan files; out of nine reviews it conducted in 2005, it gave the company's loan production department "unsatisfactory" ratings seven times. Patrick Flanagan, president of New Century's mortgage-originating subsidiary, cut the department's budget, saying in a memo that the "group was out of control and tries to dictate business practices instead of audit."

111. On February 29, 2008, after an extensive document review and conducting over 100 interviews, Michael J. Missal, the Bankruptcy Court Examiner for New Century, issued a detailed report on the various deficiencies at New Century, including lax mortgage standards and a failure to follow its own underwriting guidelines. Among his findings, the Examiner reported:

> New Century had a brazen obsession with increasing loan originations without due regard for the risks associated with that business strategy. . . . Although the primary goal of any mortgage banking company is to make more loans, New Century did so in an aggressive manner that elevated the risks to dangerous and ultimately to fatal levels.
>
> New Century also made frequent exceptions to its underwriting guidelines for borrowers who might not otherwise qualify for a particular loan. A Senior Officer of New Century warned in 2004 that the "number one issue is exceptions to the guidelines." Moreover, many of the appraisals used to value the homes that secured the mortgages had deficiencies.
>
> New Century . . . layered the risks of loan products upon the risks of loose underwriting standards in its loan originations to high risk borrowers.

Final Report of Michael J. Missal, Bankruptcy Examiner, *In re New Century TRS Holdings, Inc.*, No. 07-10416 (KJC) (Bankr. Del. Feb. 29, 2008).

112. On December 9, 2009, the SEC charged three of New Century's top officers with violations of federal securities laws. The SEC's complaint details the blatant falsity of New Century's representations regarding its underwriting guidelines, for example, its representations that it was committed to "adher[ing] to high origination standards in order to sell [its] loan products in the secondary market" and to "only approv[ing] subprime loan applications that evidence a borrower's ability to repay the loan."

113. New Century's failure to adhere to its underwriting guidelines is further reflected in allegations in the Assurance of Discontinuance signed by Morgan Stanley and the Attorney General of Massachusetts (the "Assurance of Discontinuance"), in *In re: Morgan Stanley & Co. Inc.*, Civil Action No. 10-2538 (Suffolk Cnty. Super. Ct. June 24, 2010). The Massachusetts Attorney General alleged:

- New Century "stretch[ed] underwriting guidelines to encompass or approve loans not written in accordance with the guidelines." (*Id.* ¶¶17, 23.)
- "One recurring issue identified by Morgan Stanley was New Century's origination of loans that violated Massachusetts Division of Banks' borrower's best interest standard []." (*Id.* ¶18.)
- During the period 2006-2007, 91 percent of the loans approved for securitization that did not meet New Century's underwriting guidelines did not have "sufficient compensating factors to offset such exceptions." (*Id.* ¶27.)
- "In the last three quarters of 2006, Morgan Stanley waived more than half of all material exceptions found by Clayton . . ., and purchased a substantial number of New Century loans found by Clayton to violate guidelines without sufficient compensating factors." (*Id.* ¶28.)
- The loans originated by New Century were "unfair loans to Massachusetts borrowers" and "were in violation of Massachusetts law . . . ." (*Id.* ¶¶43-44.)

114. As a result, on or about June 24, 2010, Morgan Stanley paid $102 million to settle the claims asserted by the Attorney General and also agreed to drastic changes in its underwriting practices.

115. Patricia Lindsay, a former Vice President of Corporate Risk at New Century, testified before the FCIC in April 2010 that, beginning in 2004, underwriting guidelines had been all but abandoned at New Century. Ms. Lindsay further testified that New Century systematically approved loans with 100 percent financing to borrowers with extremely low credit scores and no supporting proof of income. (*See* Written Testimony of Patricia Lindsay for the FCIC Hearing, April 7, 2010 ("Lindsay Testimony"), http://fcic-static.law.stanford.edu/cdn-media/fcic.testimony/2010-0407-Lindsay.pdf, at 3.)

116. Ms. Lindsay also testified that appraisers "fear[ed]" for their "livelihoods," and therefore cherry-picked data "that would help support the needed value rather than finding the best comparables to come up with the most accurate value." (*See* Written Testimony of Patricia Lindsay to the FCIC, April 7, 2010, at 5.) Indeed, on May 7, 2007, *The Washington Post* reported that a former New Century appraiser, Maggie Hardiman, recounted how she "didn't want to turn away a loan because all hell would break loose" and that, when she did reject a loan, "her bosses often overruled her and found another appraiser to sign off on it." (David Cho, *Pressure at Mortgage Firm Led to Mass Approval of Bad Loans*, The Washington Post (May 7, 2007).)

ii. HFN Violated Its Underwriting Guidelines

117. HFN originated loans for 13 of the Securitizations -- as discussed *infra*, HFN was the GMAC entity responsible for the origination of all of GMAC's residential mortgage loans during the relevant time period.

118. MBIA Insurance Corporation, which insured mortgage-backed securities issued by GMAC, has filed two actions against GMACM and RFC, both parents of HFN, alleging, among other things, that GMACM and RFC made fraudulent representations regarding adherence to GMAC's loan origination underwriting guidelines. MBIA alleged that it performed an extensive a review of loan files in advance of making its allegations. Its complaint explains that it performed a review of "loan files associated with 4,104 delinquent or charged off loans" and that its review revealed that "[a]t least 89% of the 4,104 delinquent or charged off loans . . . were not originated in material compliance with GMAC Mortgage's Underwriting Guidelines." (Complaint at ¶6, *MBIA Insurance Corp. v. GMAC Mortgage, LLC (f/k/a GMAC Mortgage Corporation)*, No. 6008737-2010 (N.Y. Sup. Ct.) (filed Compl. Apr. 1, 2010).) MBIA's complaint further alleges that MBIA, or the experts that performed its review, found that "a significant number of mortgage loans were made on the basis of "stated incomes" that were grossly unreasonable or were approved despite [debt-to-income] or CLTV ratios in excess of the limits stated in GMAC Mortgage's Underwriting Guidelines," and that, "contrary to its Underwriting Guidelines, GMAC Mortgage failed in many cases to verify the borrower's employment when required to do so or to verify prior rental or mortgage payment history, approved mortgage loans with ineligible collateral, approved mortgage loans to borrowers with ineligible credit scores, and approved loans without verifying that the borrower had sufficient funds or reserves." (*Id.* at ¶76.)

119. In its complaint against RFC, the direct parent of HFN, MBIA also asserted a claim for fraud, among other things, alleging that MBIA's review "[o]f the 1,847 mortgage loans [revealed that] . . . only 129 mortgage loans -- less than 7% of the mortgage loans reviewed -- were originated or acquired in material compliance with RFC's representations and warranties

. . . with respect to the underwriting of the mortgage loans contributed to the RFC transactions. (Complaint at ¶46, *MBIA Insurance Corp. v. Residential Funding Co., LLC*, No. 603552-2008 (N.Y. Sup. Ct.) (filed Compl. Dec. 4, 2008).)

120. Further, on June 29, 2011, the SEC and the DOJ launched investigations of, among other things, "potential fraud related to the origination and/or underwriting of mortgage loans" by GMAC. As an originator of residential mortgage loans for the GMAC entities, the scope of the SEC and the DOJ's investigation will likely include a review of HFN's compliance with its own loan origination underwriting guidelines.

iii. MLN Violated Its Underwriting Guidelines

121. Mortgage Loan Networks USA, Inc. ("MLN"), which originated the loans for four of the Securitizations, filed for bankruptcy on February 5, 2007, and on January 6, 2011, the Liquidating Trustee for MLN filed a motion seeking to destroy certain MLN records and releasing the Trustee from responding to any future requests concerning those records. The United States Attorney objected to the Trustee's motion on the basis that "federal law enforcement records indicate that [MLN's] loans are the subject of many ongoing investigations. As a result, [MLN's] records, including but not limited to the loan files and loan related information . . . , may be relevant to pending federal criminal investigations into mortgage fraud." (Objection to Debtor's Motion for the Destruction for Certain Records, *In re Mortgage Lenders Network USA, Inc.*, No. 07-10146-PJW (Bankr. Del.) (Dkt. 3281).) Accordingly, upon information and belief, government investigations into MLN's origination of loans and compliance with its own underwriting guidelines are ongoing.

122. The originators of the mortgage loans underlying the Securitizations went beyond the systematic disregard of their own underwriting guidelines. The FCIC found that mortgage loan originators throughout the industry pressured appraisers, during the period of the

Securitizations, to issue inflated appraisals that met or exceeded the amounts needed for the subject loans to be approved, regardless of the accuracy of such appraisals, and especially when the originators aimed at putting the mortgages into a package of mortgages that would be sold for securitization. Upon information and belief, these inflated appraisals resulted in inaccurate LTV ratios.

b. The Collapse of the Certificates' Credit Ratings Further Shows that the Mortgage Loans were not Originated in Adherence to the Stated Underwriting Guidelines

123. The total collapse in the credit ratings of the Certificates invested in by Freddie Mac, typically from AAA or its equivalent to non-investment speculative grade, is further evidence of the originators systematic disregard of underwriting guidelines, underscoring that these Certificates were impaired from the start.

124. The Certificates purchased by Freddie Mac originally were assigned credit ratings of AAA or its equivalent, which purportedly reflected the description of the mortgage loan collateral and underwriting practices set forth in the Registration Statements. Those ratings artificially were inflated, however, upon information and belief, in part as a result of the same misrepresentations that the Defendants made to investors in the Prospectus Supplements.

125. Upon information and belief, GMAC provided information at the loan level to the rating agencies, including LTV ratios, owner-occupancy rates, and other loan characteristics, that the rating agencies used in part to calculate the assigned ratings of the Certificates purchased by Freddie Mac. Upon information and belief, because the information that GMAC provided, which information included among other things the Registration Statements or portions thereof, the ratings were inflated. As a result, the Certificates were offered and purchased at prices suitable for investment grade securities when in fact the Certificates actually carried a severe risk of loss and inadequate credit enhancement.

126. Since the issuance of the Certificates, the ratings agencies dramatically have downgraded their ratings to reflect the revelations regarding the true underwriting practices used to originate the mortgage loans, and the true value and credit quality of the mortgage loans. Table 8 details the extent of the downgrades.[13]

Table 8

c. The Surge in Mortgage Delinquency and Default Further Demonstrates that the Mortgage Loans were not Originated in Adherence to the Stated Underwriting Guidelines

127. Even though the Certificates were marketed as long-term, stable investments, a significant percentage of the mortgage loans backing the Certificates have defaulted, have been

[13] Applicable ratings are shown in sequential order separated by forward slashes: S&P/Moody□s/Fitch. A double-hyphen indicates that the relevant agency did not provide a rating at issuance.

foreclosed upon, or are delinquent, resulting in massive losses to the Certificateholders. The overall poor performance of the mortgage loans is a direct consequence of the fact that their underlying mortgage loans were not underwritten in accordance with applicable underwriting guidelines as represented in the Prospectus Supplements.

128. Loan groups that were underwritten properly and contained loans with the characteristics represented in the Prospectus Supplements would have experienced substantially fewer delinquencies and substantially lower percentages of defaults, foreclosures, and delinquencies than occurred here. Table 9 reflects the percentage of loans in the Supporting Loan Groups that are in default, have been foreclosed upon, or are delinquent as of July 2011.

Table 9

Transaction	Supporting Loan Group	Percentage of Delinquent / Defaulted / Foreclosed Loans
RAMP 2005-EFC6	Group II	33.5%
RAMP 2005-EFC7	Group II	40.2%
RASC 2005-EMX3	Group II	36.6%
RASC 2005-KS10	Group II	30.6%
RASC 2005-KS11	Group II	28.8%
RAMP 2005-NC1	Group II	29.0%
RALI 2005-QO4	Group I	42.3%
RAMP 2005-RS9	Group II	28.8%
RASC 2006-EMX8	Group II	53.0%
RASC 2006-EMX9	Group II	61.7%
RASC 2006-KS3	Group II	34.0%
RASC 2006-KS9	Group II	33.3%
RALI 2006-QO4 (IA1)	Group I	39.2%
RALI 2006-QO4 (IA2)	Group I	39.2%
RALI 2006-QO5	Group I	39.9%
RALI 2006-QO8	Group II	40.6%
RALI 2006-QO9	Group II	40.7%
RAMP 2006-RS1	Group II	27.5%
RASC 2007-EMX1	Group II	43.4%
RASC 2007-KS2	Group II	33.2%
RASC 2007-KS3	Group II	37.9%
RALI 2007-QH5	Group II	43.2%

129. The confirmed misstatements concerning owner-occupancy and LTV ratios; the confirmed systematic underwriting failures by the originators responsible for the mortgage loans

across the Securitizations; and the extraordinary drop in credit rating and rise in delinquencies across those Securitizations all demonstrate that the mortgage loans in the Supporting Loan Groups, contrary to the representations in the Registration Statements, were not originated in accordance with the stated underwriting guidelines.

E. Freddie Mac's Purchases of the Certificates

130. Between September 23, 2005 and May 30, 2007, Freddie Mac purchased from RFS, JPM, Credit Suisse, RBS, UBS, Bear Stearns, Citi, Barclays, Lehman Brothers and Goldman over $6 billion in RMBS issued in connection with the Securitizations. Table 10 reflects each of Freddie Mac's purchases of the Certificates.[14] To date, Freddie Mac has not sold any of the Certificates.

Table 10

F. Freddie Mac was Damaged by Defendants' Violations of Sections 11, 12 and 15 of the Securities Act

131. The statements and information in the Registration Statement regarding the credit quality and characteristics of the mortgage loans underlying the Certificates, and the origination and underwriting practices pursuant to which the mortgage loans purportedly were originated, were material to a reasonable investor. But for the misrepresentations and omissions in the Registration Statement concerning those matters, Freddie Mac would not have purchased the Certificates.

132. Based upon sales of the Certificates or similar certificates in the secondary market and other indications of value, Freddie Mac has incurred substantial losses on the Certificates due to a decline in value that is directly attributable to Defendants material misrepresentations and omissions. Among other things, the mortgage loans underlying the Certificates experienced defaults and delinquencies at a higher rate than would have been the case had the loans underlying the Certificates actually conformed to the origination guidelines, and had the Certificates merited the credit ratings set forth in the Registration Statement.

133. Defendants' misstatements and omissions in the Registration Statement were the direct, proximate and actual cause of Freddie Mac's losses resulting from its purchase of the Certificates. The precise extent of Freddie Mac's injuries will be proven at trial.

134. At the time it purchased the Certificates, Freddie Mac was unaware of the Defendants' misrepresentations, omissions, and/or untrue statements. Plaintiff was appointed Conservator of Freddie Mac less than one year after the discovery of the untrue statements and omissions contained in the Registration Statement and within three years of the Certificates being offered for sale to the public. Despite the exercise of reasonable diligence, Freddie Mac could not reasonably have discovered the untrue statements and omissions in the Registration Statement more than one year prior to the appointment of the Plaintiff as Conservator. This action is timely pursuant to 12 U.S.C. §§ 4617(b)(12) & (13), which provides for extension or tolling of all statutory time periods applicable to the claims brought herein.

II. ADDITIONAL FACTUAL ALLEGATIONS

135. The allegations in paragraphs 160 through 176 below concerning Defendants' knowledge or recklessness concerning the information set forth in or omitted from the Registration Statements and any other materials provided to Freddie Mac are made solely with respect to Plaintiff's common law claims, as are the allegations set forth in paragraphs 177 through 185 concerning Freddie Mac's reliance on the material misrepresentations and omissions alleged herein.

A. Defendants Were Incentivized to Fund Risky Residential Mortgage Loans and to Securitize and Sell Them to Investors

136. Securitizing large volumes of loans was a highly lucrative and competitive business for the Defendants. All of the underwriter defendants engaged in this business on a massive scale, each doing multiple billions of dollars worth of securitizations during the period

when they sold the Certificates to Freddie Mac. Fees, which were a percentage of the balance of the loan pool being purchased, and other transaction revenues associated with the Certificates at issue here, and with the RMBS securitization business more generally, accounted for a substantial portion of the underwriter (and other) Defendants earnings in the relevant time period. The more and the larger the securitizations the Defendants arranged and participated in, the greater their earnings. This financial motive accounts for Defendants willingness, intentionally or recklessly, to make false statements in, or to omit material facts from, the Registration Statements and other offering materials. In furtherance of this motive, the Defendant underwriters took measures and entered into arrangements designed to ensure that a continuous and high volume of mortgage loans would be available for securitization.

137. Thus, among other things, the underwriters provided warehouse funding to mortgage originators to enable these originators to make, and to continue to make, loans. These subprime mortgage originators used those funds to make large numbers of loans, which they then turned around and sold back to the underwriters whose funds enabled them to make the loans in the first place. The banks then securitized the loans they effectively had funded, and transferred the risk to investors like Freddie Mac through the sale of the RMBS resulting from the securitizations.

138. These arrangements between the underwriters and loan originators undermined the underwriting process for the Certificates because the underwriters had no incentive to identify and exclude from the securitizations loans that did not conform to the loan originators stated guidelines. To the contrary, the underwriters had the motive to, and did, include loans that upon information and belief, they knew did not conform to those guidelines, and that lacked the characteristics or merited the ratings set forth in the Registration Statement.

139. Credit Suisse, Citi, Bear Stearns, Barclays, UBS and Goldman Sachs -- all of whom were underwriters of the Securitizations -- provided billions of dollars of warehouse lending to New Century. From 2000 to 2010, Citi extended warehouse lines of credit of up to $7 billion to unaffiliated originators, including $950 million to New Century and over $3.5 billion to Ameriquest. (FCIC Report at 113.) Citi and JPM lent their own mortgage origination subsidiaries at least $26.3 billion and $30 billion, respectively, between 2005 and 2007. (*See* "Who is Behind The Financial Meltdown: The Top 25 Subprime Lenders and their Wall Street Backers," The Center for Integrity, available at http://www.publicintegrity.org/investigations/economic_meltdown/the_subprime_25/.) As reported by the FCIC, Barclays provided at least $221 million in warehouse financing to New Century in connection with just a single financing. Upon information and belief, Barclays provided similar financing to originators in connection with several securitizations, leading to the same conflicts of interest. Upon information and belief, RBS also engaged in the same warehouse lending practices.

140. The practice was pervasive among investment banks. Thus, for example, Bear Stearns kept its pipeline flowing by operating its own mortgage loan originators and loan servicers: EMC Mortgage Corporation ("EMC"), Bear Stearns Residential Mortgage Corporation, and Encore Credit Corp. As a result of its strategy, Bear Stearns' fixed income net revenues were a record $4.0 billion in 2006, up 23 percent from $3.3 billion in 2005. Bear Stearns did not report how it manipulated its wholly-owed originators and servicers to push through non-compliant loans. A former EMC employee, who vetted loans for securitizations, told *The Atlantic* that "Bear traders pushed EMC analysts to get loan analysis done in only one to three days. That way, Bear could sell them off fast to eager investors and didn't have to carry

the cost of holding these loans on their books. (More Corruption: Bear Stearns Falsified Information as Raters Shrugged, The Atlantic, by Teri Buhl, May 14, 2010.) EMC analysts fabricated data such as FICO scores if lenders did not provide real information quickly enough, and Bear Stearns analysts in New York, rather than EMC employees who had access to loan information, decided how to report and calculate the presence and quality of loan documentation without adequate research. (*Id.*)

141. GMAC itself was a fully, vertically-integrated RMBS operation that was dependent on volume. GMACM and HFN originated subprime and Alt A loans; RFC sponsored securitizations of such loans and transferred them to affiliated depositors RALI, RAMP and RASC; and RFS marketed and sold the RMBS to investors. HFN, which originated loans for 13 of the Securitizations here, was under enormous pressure to extend risky loans. A former loan officer at HFN recounted that "[t]he main focus was doing Alt A because that's where the money was," and "[i]n order to keep your market share, you had to be more aggressive." (*See* "Shaky loans may spur new foreclosure wave," *The Portland Tribune* (Oct. 30, 2009).) A mortgage broker confirmed such pressure, stating: "The V.P.s came down to the office beating the drums about Option ARMs" "I had Wachovia march through here; I had GMAC." (*Id.*)

142. Defendants were motivated to churn out and securitize as many mortgages as possible because they earned so much in revenues on both ends of the securitization process, while transferring the ultimate risk of default to investors, such as Freddie Mac. Indeed, several of the Defendants ranked in the top ten of the nation's largest underwriters of RMBS between 2004 and 2007, according to Inside Mortgage Finance. The three underwriters that sold the Certificates to Freddie Mac -- JPM, Credit Suisse and RBS -- were especially prolific. By 2007, RBS ranked fifth with $50.3 billion in transactions, Credit Suisse ranked sixth with $44.1 billion,

and JPM ranked seventh with $43.5 billion. (*2011 Mortgage Market Statistical Annual*, Vol. II (Inside Mortgage Finance Publ□ns, Inc., 2011).)

B. Defendants' Material Misrepresentations and Omissions in the Offering Materials

143. In connection with the sale of the Certificates, the selling underwriters RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS, and Goldman; the depositors RALI, RASC, and RAMP; and the sponsor RFC (together, the □Fraud Defendants□) each made misrepresentations and omissions of material fact to Freddie Mac in term sheets, Registration Statements, Prospectuses, Prospectus Supplements, and other draft and final written offering documents (the □Offering Materials□). These Offering Materials describe the credit quality and other characteristics of the underlying mortgage loans and were provided to investors, including Freddie Mac.

144. Accordingly, Freddie Mac required the Fraud Defendants to provide representations and warranties regarding the origination and quality of the mortgage loans, including that the mortgage loans had been underwritten by the loan originators pursuant to extensive guidelines.

145. Through term sheets or other offering documents, the Fraud Defendants also furnished Freddie Mac with anticipated credit ratings on the proposed pool of mortgage loans intended for securitization.

146. On information and belief, the Fraud Defendants solicited the anticipated ratings from credit rating agencies based on misrepresentations by Defendants as to the credit quality of the mortgage loans and the amount of the overcollateralization in the deal. All of the Securitizations had shadow ratings of at least AAA or its equivalent.

147. Furthermore, the Fraud Defendants delivered Prospectus Supplements to Freddie Mac that included more specific information about the loans underlying the Certificates in each Securitization.

148. The materially false and misleading information contained in the initial and final Prospectus Supplements that the Fraud Defendants provided to Freddie Mac included reproductions of the same schedules that the Fraud Defendants provided to Freddie Mac, containing false data about LTV ratios and owner-occupancy statistics.

149. The Offering Materials, among other things: (1) misrepresented the loans and loan originators adherence to the stated underwriting guidelines; (2) overstated the number of loans for owner-occupied properties; (3) understated the loan pools average LTV ratios; and (4) failed to disclose that the credit ratings of the Certificates were based on false information. Each misrepresentation and omission created an additional, hidden layer of risk well beyond that known to be associated with non-agency loans or subprime loans.

150. First, the Fraud Defendants statements regarding the mortgage pools compliance with stated underwriting guidelines were false. The falsity of such representations is evident from disclosures concerning the originators systematic disregard of their stated underwriting guidelines, as well as the Certificates high default rates and plummeting credit ratings. Indeed, of the 15 originators whose loans were sold into the Securitizations, five were cited as among the worst ten in the worst ten metropolitan areas: Aegis, Decision One, New Century, Ownit, and People s Choice. Government and private investigations have confirmed that these originators failed to apply any standards at all when making high-risk loans. Moreover, the high default rates and low credit ratings confirm that the loans were not properly underwritten in the first place. As shown in Tables 8 and 9, the average rate of default

across the Securitizations is 38.03 percent, and although the Certificates invested in by Freddie Mac for all 21 of the Securitizations had been rated AAA (or its equivalent) at the time of purchase, by July 31, 2011, 18 had been downgraded, and most had been downgraded to junk or nearly junk-bond status, with eight downgraded to CCC (or its equivalent), the lowest rating above junk. *See supra* Section I.D.2.b.

151. These misstatements were material because, as discussed above, the quality of loans in the pool determined the risk of the Certificates backed by those loans. Because a reasonable underwriting process had not been followed, the entire loan pool was much riskier and more prone to default and market losses than represented. The systemic underwriting failures decreased the reliability of *all* the information provided to Freddie Mac about the loans, and thus increased the actual risk to investors. As a result of those failures, the value of the Certificates was substantially lower than the price paid by Freddie Mac for those Certificates.

152. Second, as shown in Table 6, the Fraud Defendants materially understated the non-owner-occupied status for each Securitization by an average of 10.73 percent. This information was material to Freddie Mac because high owner-occupancy rates reported to Freddie Mac should have made the Certificates purchased by Freddie Mac safer investments than certificates backed by second homes or investment properties.

153. Third, the Fraud Defendants understated the loan pools average LTV ratios, which overstates the borrowers equity cushion in the property. As Table 7 demonstrates, on average, only 38.5 percent of the loans actually had LTV ratios of less than 80 percent, as opposed to 64.2 percent as represented in the Prospectus Supplements. Moreover, while all but two of the Certificates were represented to have no loans with an LTV over 100 percent, in reality, every deal contained at least eight percent loans with greater than 100 percent LTV, with

an average of 18.5 percent. In other words, in almost all of the Securitizations, a significant percentage of the mortgage loans either were under-secured or "under water" from the start. The understatement of LTV ratios was misleading because it misrepresented the risk of a borrower abandoning a property if the value dropped below the unpaid balance of the loan, as well as the risk that proceeds from a foreclosure sale would fail to cover the unpaid balance.

154. Further, the Fraud Defendants failed to disclose that the Certificates' credit ratings were false and misleading because Defendants provided to the ratings agencies the same misinformation contained in the Offering Materials in an attempt to manufacture predetermined ratings. In testimony before the Senate Permanent Subcommittee on Investigations, Susan Barnes, the North American Practice Leader for RMBS at S&P from 2005 to 2008, confirmed that the rating agencies relied upon investment banks to provide accurate information about the loan pools:

> The securitization process relies on the quality of the data generated about the loans going into the securitizations. *S&P relies on the data produced by others and reported to both S&P and investors about those loans . . . . S&P does not receive the original loan files for the loans in the pool.* Those files are reviewed by the arranger or sponsor of the transaction, who is also responsible for reporting accurate information about the loans in the deal documents and offering documents to potential investors.

(SPSI hearing testimony, April 23, 2010) (emphasis added). As a result, the ratings failed to reflect accurately the actual risk underlying the Certificates purchased by Freddie Mac because the ratings agencies were analyzing a mortgage pool that had no relation to the pool that actually backed the Certificates purchased by Freddie Mac.

155. The AAA (or equivalent) anticipated and final credit ratings were material to Freddie Mac, because the ratings provided additional assurances that Freddie Mac would receive

the expected interest and principal payments. Freddie Mac would not have purchased the Certificates without the proper ratings.

156. Each of the Fraud Defendants is responsible for the representations made in or omitted from the Offering Materials. Specific false and misleading statements in the Registration Statements for the Certificates purchased by Freddie Mac are detailed in Sections I.C. and I.D., in paragraphs 69-134 *supra* and Appendix A, which are incorporated by reference.

157. Because payment on the Certificates ultimately was funded by payments from the mortgagors, Freddie Mac faced a risk of non-payment if too many borrowers defaulted on their loans and the value of the mortgaged properties was insufficient to cover the unpaid principal balance. Accordingly, any representation bearing on the riskiness of the underlying mortgage loans was material to Freddie Mac. By misrepresenting the true risk profile of the underlying loan pools, the Fraud Defendants defrauded Freddie Mac.

158. As the FCIC found:

> The Commission concludes that firms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. *Potential investors were not fully informed or were misled* about the poor quality of the mortgages contained in some mortgage-related securities. *These problems appear to have been significant.*

(FCIC Report at 187 (emphasis added).)

C. The Fraud Defendants Knew or were Reckless in not Knowing that Their Representations were False and Misleading

159. The Fraud Defendants knew or were reckless in not knowing that their representations in the Offering Materials were false, and that the information they omitted from documents rendered them materially misleading. The consistency of the misrepresentations and omissions across all of the 21 Securitizations is strong evidence that the Fraud Defendants did

not innocently make materially false statements and omissions, but actually knew or were reckless in not knowing that (1) the loan originators systematically disregarded their own underwriting guidelines, (2) the LTV ratios presented in the Registration Statements were materially inaccurate, (3) the owner-occupancy rates presented in the Registration Statements were materially inaccurate, and (4) the credit ratings for the Certificates were based on incomplete and inaccurate information and were not believed by the ratings agencies when provided.

160. The Fraud Defendants' financial interests and relationships with mortgage originators compromised their approach to securitizing RMBS. Thus, for example, six of the Fraud Defendants -- Credit Suisse, Citi, Bear Stearns, Barclays, Goldman Sachs, and UBS -- provided warehouse lines of credit to New Century, whose departure from its stated underwriting guidelines has now been extensively investigated and documented. Given all the revelations about New Century's flagrant conduct and the Fraud Defendants' disincentives to perform meaningful due diligence, the Fraud Defendants knew or were reckless in disregarding that New Century loans backing the Certificates were not originated in accordance with the sound underwriting practices.

161. In the case of GMAC, the GMAC entities were so closely integrated and the abusive lending practices so rampant from the top down that the depositors (RALI, RAMP and RASC), the sponsor (RFC) and the underwriter (RFS), knew -- or were reckless in not knowing -- that HFN -- a subsidiary of the sponsor -- systematically was disregarding prudent underwriting standards and that its loans lacked the characteristics represented in the Offering Materials. As detailed above, a sampling of GMACM loans conducted by MBIA has revealed a non-compliance rate of at least 89 percent.

162. Further, GMACM's abusive or reckless lending and servicing practices, including commingling funds from custodial bank accounts and questionable and unlawful foreclosure practices, have also been revealed. (*See* "Moody's downgrades $1.4 billion in GMAC subprime RMBS" *available at* http://www.housingwire.com/2011/03/25/allstates-mbs-exposure-hits-2-78-billion.) The GMAC entities also shared substantial overlapping management; for instance, David M. Applegate held simultaneous positions as the President and CEO of GMACM and the Principal Executive Officer of RALI, while Bruce Paradis was the CEO of GMAC-RFC, RALI, RAMP, and RASC. Given the overlapping management and the integrated structure, GMAC knew or was reckless in not knowing of the misrepresentations and omissions concerning HFN's underwriting guidelines.

163. Further, several of the Fraud Defendants knew that the mortgage loans they securitized were non-compliant because they had been informed of such by third-party experts. Clayton Holdings, Inc. ("Clayton") was a due diligence firm that sampled loans for many of the key players in the RMBS market.[15] Clayton was "hired to identify, among other things, whether the loans met the originators' stated underwriting guidelines and, in some measure, to enable clients to negotiate better prices on pools of loans." (FCIC Report at 166 (footnote omitted).) Yet, upon information and belief, the Fraud Defendants routinely disregarded and manipulated Clayton's findings.

---

[15] Clayton was the leading provider of third-party due diligence during the relevant time period. In 2006, Clayton analyzed over $418 billion in loans underlying mortgage-backed securities, which represented 22.8% of the total outstanding U.S. non-agency mortgage-backed securities for that year. (Clayton, Form 10-K.) During 2004, 2005, and 2006, Clayton worked with each of the ten largest non-agency mortgage-backed securities underwriters, as ranked by *Inside MBS & ABS*, which accounted for 73% to 78% of the total underwriting volume during those years. The belief that GMAC used Clayton for due diligence is based upon the information that GMAC and Clayton shared senior management. (*See* http://nationalmortgageprofessional.com/news16031/national-groups-expands-its-executive-team.)

164. In January 2008, Clayton disclosed that it had entered into an agreement with the New York Attorney General ("NYAG") to provide documents and testimony regarding its due diligence reports, including copies of the actual reports provided to its clients. According to *The New York Times*, as reported on January 27, 2008, Clayton told the NYAG "that starting in 2005, it saw a significant deterioration of lending standards and a parallel jump in lending expectations" and "some investment banks directed Clayton to halve the sample of loans it evaluated in each portfolio." Upon information and belief, the Fraud Defendants were included in that group of investment banks**.** Thus, these Defendants made a conscious decision *not to* avail themselves of comprehensive due diligence regarding the loans they were securitizing, which alone renders their misrepresentations concerning those loans knowing or reckless.

165. For the 18 month period ending on June 31, 2007, a significant percentage of the loans sampled by Clayton at the direction of the Fraud Defendants failed to meet the various loan originator's underwriting guidelines. This information was provided to the securities underwriters. Nonetheless, several of the Fraud Defendants overruled Clayton's findings and "waived in" substantial percentages of these loans (approximately 51 percent for JPM, 29 percent for Bear Stearns, 33 percent for Credit Suisse, 53 percent for RBS, 31 percent for Citi, 28 percent for Barclays, 33 percent for UBS, and 29 percent for and Goldman). (*See* Clayton Trending Reports, available at http://fcic.law.stanford.edu/hearings/testimony/the-impact-of-the-financial-crisis-sacramento#documents; FCIC Report, 167.)

166. Upon information and belief, these Defendants waived in these loans, found by Clayton to be non-compliant with the relevant originator's origination guidelines, without taking any adequate steps of their own to verify Clayton's findings. These loans then found their way into RMBS that were sold to investors like Freddie Mac. *See* FCIC Report, 167; *see* September

23, 2010 All Clayton Trending Reports, 1st Quarter 2006 -- 2nd Quarter 2007. Consequently, the Fraud Defendants were aware that the mortgage loans making up the pools for the Certificates were not as safe as had been represented, and were priced too high for the level of risk assumed.

167. Similarly, Citi's knowledge concerning origination practices went far beyond a general awareness that originators systematically were disregarding their own underwriting guidelines. Citi knew its representations to Freddie Mac were false. In April 2010, Richard M. Bowen III, an executive of a Citi affiliate testified before the FCIC that during the 2006-2007 time frame -- when Freddie Mac purchased Certificates -- 60 percent to 80 percent of the RMBS Citi sold were defective and in contravention to the representations and warranties made to those investors, including specifically Freddie Mac. (Written Testimony of Richard M. Bowen, III to the FCIC, April 7, 2010, at 1-2, 6.)

168. In a November 3, 2007 e-mail, Mr. Bowen recounted Citi's misrepresentations to Freddie Mac:

> We currently purchase from mortgage companies and sell to third party investors . . . mortgage loans which have not been underwritten by us but which we rep and warrant to the investors (primarily Fannie/Freddie) that these files are complete and have been underwritten to our policy criteria.
>
> Our internal Quality Assurance function, which underwrites a small sample of these files post-purchase, has reflected since 2006 . . . that 40-60% of these files are either outside of policy criteria or have documentation missing from the files. QA for recent months indicate 80% of the files fall into this category.

(Bowen Testimony, Ex. 1.) Citi retaliated against this whistleblower by decreasing the number of his direct reports from 220 people to two, slashing his bonus, and giving him poor performance reviews. (FCIC Report at 19.)

169. Defendant Goldman Sachs malfeasance in the RMBS market has also been reviewed and reported in detail by the United States Senate. The SPSI Report found that in exchange for lucrative fees, Goldman Sachs helped lenders like Long Beach, Fremont, and New Century, securitize high risk, poor quality loans, obtain favorable credit ratings for the resulting RMBS, and sell the RMBS securities to investors, pushing billions of dollars of risky mortgages into the financial system. (*See* Sen. Levin, Carl and Sen. Coburn, Tom, U.S. Senate Permanent Subcommittee on Investigations, *Wall Street and the Financial Crisis: Anatomy of a Financial Collapse* (Committee on Homeland Security and Governmental Affairs, April 13, 2011) (SPSI Report), p. 377.)

170. Bear Stearns likewise participated in -- and therefore knew about -- the origination practices behind the loans it securitized. As reported in *The Atlantic*, Bear Stearns manipulated its wholly-owned originators to push through non-compliant loans. A former EMC employee revealed that Bear traders pushed EMC analysts to get loan analysis done in only one to three days. That way, Bear could sell them off fast to eager investors and didn't have to carry the cost of holding these loans on their books. (More Corruption: Bear Stearns Falsified Information as Raters Shrugged, The Atlantic, by Teri Buhl, May 14, 2010.) EMC analysts fabricated data such as FICO scores if lenders did not provide real information quickly enough, and Bear Stearns analysts in New York, rather than EMC employees who had access to loan information, decided how to report and calculate the presence and quality of loan documentation without adequate research. (*Id.*)

171. As active participants in fraudulent origination practices, the Fraud Defendants knew or were reckless in disregarding the falsity of their statements in the Offering Materials concerning underwriting guidelines.

172. The Fraud Defendants also knew or recklessly disregarded that the owner-occupancy statistics and LTV ratios reported in the Offering Materials were false and misleading. Given their role as underwriters of the securities, the relationships they had with loan originators, and this expertise in underwriting and securitizing RMBS, the Fraud Defendants had the practical ability to gain access to loan files and the ability and resources to test the reported data points, such as owner-occupancy rates and LTV ratios. They intentionally elected not to do so, rendering their representations concerning those data knowingly or recklessly false.

173. Moreover, upon information and belief, underwriters, including certain of the Fraud Defendants, influenced the appraisals used to determine LTV ratios. Government investigations have uncovered widespread evidence of appraisers being pressured to overvalue properties so more loans could be originated. For instance, several witnesses, ranging from the President of the Appraisal Institute to appraisers and lenders on the ground, confirmed that appraisers felt compelled to come in "at value" -- *i.e.*, at least the amount needed for the loan to be approved -- or face losing future business or their livelihoods. Given the systemic pressure applied to appraisers, upon information and belief, the appraisers themselves, the originators, and the underwriters did not believe that the appraised values of the properties -- and therefore LTV ratios -- were true and accurate at the time they communicated the information to potential investors, including the GSEs.

174. Further, the Fraud Defendants knew or were reckless in not knowing that the credit ratings reported for the Certificates failed to reflect the actual risk of the securities, and that the ratings agencies had no basis to believe in the accuracy of those ratings. Not only did these Defendants provide the ratings agencies false, loan-level information, but they also routinely engaged in "ratings shopping" -- *i.e.*, pressuring the ratings agencies for favorable

ratings and playing the rating agencies off one another with the threat of withholding future business if the sponsoring bank was not given favorable treatment. As detailed in the SPSI Report:

> At the same time Moody's and S&P were pressuring their RMBS and CDO analysis to increase market share and revenues, the investment banks responsible for bringing RMBS and CDO business to the firms were pressuring those same analysts to ease rating standards. Former Moody's and S&P analysts and managers interviewed by the Subcommittee described, for example, how investment bankers pressured them to get their deals done quickly, increase the size of the tranches that received AAA ratings, and reduce the credit enhancements protecting the AAA tranches from loss. They also pressed the CRA analysts and managers to ignore a host of factors that could be seen as increasing credit risk. Sometimes described as "ratings shopping," the analysts described how some investment bankers threatened to take their business to another credit rating agency if they did not get the favorable treatment they wanted. The evidence collected by the Subcommittee indicates that the pressure exerted by investment banks frequently impacted the ratings process, enabling the banks to obtain more favorable treatment than they otherwise would have received.

(SPSI Report, at 278.)

175. As one S&P director put it in an August 8, 2006 e-mail: "[Our RMBS friends have] become so beholden to their top issuers for revenue [that] they have all developed a kind of Stockholm syndrome which they mistakenly tag as Customer Value creation." Ratings analysts who complained about the pressure, or did not do as they were told, were quickly replaced on deals or terminated.

176. Summarizing the intense pressure investment banks put on ratings analysts to provide favorable ratings, a former Moody's VP and Senior Credit Officer testified before the FCIC that "[t]he willingness to decline to rate, or to just say no to proposed transactions, steadily diminished over time. That unwillingness to say no grew in parallel with the company's share price and the proportion of total firm revenues represented by structured finance transactions . . .

coincident with the steady drive toward commoditization of the instruments we were rating . . . . The threat of losing business . . . even if not realized, absolutely tilted the balance away from independent arbiter of risk towards a captive facilitator of risk transfer . . . . The message from management was . . . "Must say yes." (*See* Written Testimony of Richard Michalek (FCIC Hearing, June 2, 2010), available at http://fcic-static.law.stanford.edu/cdn_media/fcic-testimony/2008-0602-Michalek-corrected-oral.pdf; see *also* Written Statement of Eric Kolchinsky, Managing Director, Moody's Derivatives Group ("Managers of rating groups were expected by their supervisors and ultimately the Board of Directors . . . to build, or at least maintain, market shares. It was an unspoken understanding that loss of market share would cause a manager to lose his or her job; "[L]owering credit standards . . . was one easy way for a managing director to regain market share."), available at http://hsgac.senate.gov/public/index.cfm?FuseAction=Files.View&FileStore_id=bd65f802-961c-4727-b176-72ece145baef.)

D. Freddie Mac Justifiably Relied on the Misrepresentations and Omissions in the Offering Materials and was Damaged by Defendants' Fraudulent Conduct

177. Freddie Mac is a government-sponsored enterprise chartered by Congress to provide liquidity, stability, and affordability to the U.S. housing and mortgage markets. In furtherance of this mission, Freddie Mac purchases mortgages and invest in RMBS.

178. Generally when purchasing RMBS, Freddie Mac requires compliance with their investment requirements, as well as various representations and warranties concerning, among other things, the credit quality of the underlying loans, evaluation of the borrower's ability to pay, the accuracy of loan data provided, and adherence to applicable local, state and federal law. Such representations and warranties were material to Freddie Mac's decision to purchase RMBS, including the Certificates.

179. The Fraud Defendants intended for investors, including Freddie Mac, to rely on their representations of material facts about the assets backing the Certificates. These Defendants regularly provided prospective RMBS investors with information concerning the volume of their annual securitization business to assure investors that, by virtue of their expertise in and share of the RMBS market, Freddie Mac should rely upon the representations and warranties in their Offering Materials. *See*, *e.g.*, Prospectus Supplement for the RALI 2006-QO8 Securitization.

180. The Fraud Defendants knew that Freddie Mac had specific requirements for investing in non-agency mortgage-backed securities and intended for Freddie Mac to rely on their fraudulent misstatements as shown by their provision of representations, warranties and shadow credit ratings in connection with the Certificates, and their repetition of false loan statistics in term sheets, free writing prospectuses, and Prospectus Supplements, among other materials.

181. In fact, Freddie Mac did rely, to its detriment, on the Fraud Defendants misrepresentations and material omissions in the Offering Materials.

182. Freddie Mac's reliance was justifiable because Freddie Mac necessarily was required to rely upon the Fraud Defendants to provide accurate information regarding the loans. Freddie Mac lacked access to the actual loan files, and the loan-level data essential to perform the necessary statistical tests with respect to, among other things, owner-occupancy and LTV ratios.

183. Freddie Mac's reliance also was justifiable because industry practice was for an investor to rely upon the representations and warranties of the sponsors and underwriters regarding the quality of the mortgage loans and the standards under which they were originated.

Information regarding the originators compliance with underwriting guidelines, owner-occupancy rates, LTV ratios, and the information provided to credit ratings agencies, was peculiarly within the knowledge of the Fraud Defendants.

184. Freddie Mac was induced into buying the Certificates based on the false and misleading Offering Materials. Freddie Mac would not have purchased the Certificates had it known the truth concerning the matters alleged herein. Alternatively, Freddie Mac suffered damages because the price it paid for the Certificates was higher than their actual value.

185. From the day Freddie Mac purchased the Certificates, it suffered injury. As a result of Defendants misrepresentations, the true value of the Certificates on the date of purchase was far lower than the price paid for them by Freddie Mac.

FIRST CAUSE OF ACTION

Violation of Section 11 of the Securities Act of 1933 (Against Defendants RALI, RASC, RAMP, RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS and Goldman Sachs)

186. Plaintiff realleges paragraphs 1 through 134 above as if fully set forth herein. For purposes of this cause of action, Plaintiff hereby expressly excludes any allegation that could be construed as sounding in fraud.

187. This claim is brought by FHFA pursuant to Section 11 of the Securities Act of 1933 and is asserted on behalf of Freddie Mac, which purchased the Certificates issued pursuant to the Registration Statements for the Securitizations listed in paragraph 43.

188. This claim is for strict liability based on the material misstatements and omissions in the Registration Statements that registered securities that were bona fide offered to the public on or after September 6, 2005 for the 21 Securitizations (as specified in Table 1, *supra* at paragraph 44), and is asserted against RALI, RASC, RAMP, RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS, and Goldman Sachs (together, the Section 11 Defendants).

189. RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS, and/or Goldman Sachs (the "Underwriter Defendants") acted as underwriter in connection with the sale of the Certificates for each of the 21 Securitizations (as specified in Table 1, *supra* at paragraph 44), directly and indirectly participated in distributing the Certificates, and directly and indirectly participated in drafting and disseminating the Registration Statements that registered securities that were bona fide offered to the public on or after September 6, 2005. The Underwriter Defendants were underwriters for the Certificates, and are strictly liable for the misstatements and omissions in the Registration Statements under Section 11 of the Securities Act.

190. Depositors RALI, RASC, and RAMP (the "Depositor Defendants") filed Shelf Registration Statements that registered securities that were bona fide offered to the public on or after September 6, 2005 (as specified in Table 2, *supra* at paragraph 50) pursuant to which the Securitizations were carried out, and are the "issuers" of the Certificates issued pursuant to the Registration Statements within the meaning of Section 2(a)(4) of the Securities Act, 15 U.S.C. § 77b(a)(4), and in accordance with Section 11(a), 15 U.S.C. § 77k(a).

191. At the time that they became effective, each of the Registration Statements, as set forth above, contained material misstatements of fact and omitted information necessary to make the facts stated therein not misleading. The facts misstated or omitted were material to a reasonable investor in the securities sold pursuant to the Registration Statements.

192. The untrue statements of material facts and omissions of material fact in the Registration Statements are principally those set forth herein in Section IV, and pertain to purported compliance with underwriting guidelines, occupancy status, loan-to-value ratios and credit ratings.

193. Freddie Mac purchased or otherwise acquired the Certificates pursuant to the false and misleading Registration Statements and in the primary market. At the time it purchased the Certificates, Freddie Mac was unaware of the false and misleading statements and omissions alleged herein, and if Freddie Mac had known those facts, it would not have purchased the Certificates.

194. The Section 11 Defendants were obligated to make a reasonable investigation of the statements contained in the Registration Statements at the time they became effective to ensure that such statements were true and correct, and that there were no omissions of material facts required to be stated in order to make the statements contained therein not misleading.

195. The Section 11 Defendants did not exercise such due diligence and failed to conduct a reasonable investigation. In the exercise of reasonable care, these Defendants should have known of the false statements and omissions contained in or omitted from the Registration Statements filed in connection with the Securitizations, as set forth herein. In addition, although the performance of due diligence is not an affirmative defense available to the Depositor Defendants on this strict liability claim, they nonetheless also failed to take reasonable steps to ensure the accuracy of the representations made in the Registration Statements.

196. By virtue of the foregoing, Freddie Mac sustained substantial damages, including depreciation in the value of the securities, as a result of the misstatements and omissions in the Registration Statements. Plaintiff is entitled to damages, jointly and severally, from each of the Section 11 Defendants.

197. Based on the foregoing, the Section 11 Defendants are jointly and severally liable for their wrongdoing.

SECOND CAUSE OF ACTION

Violation of Section 12(a)(2) of the Securities Act of 1933
(Against Defendants RALI, RASC, RAMP, RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS and Goldman Sachs)

198. Plaintiff realleges paragraphs 1 through 134 as if fully set forth herein. For purposes of this cause of action, Plaintiff hereby expressly excludes any allegation that could be construed as sounding in fraud.

199. This claim is brought by Plaintiff pursuant to Section 12(a)(2) of the Securities Act of 1933 and is asserted on behalf of Freddie Mac, which purchased the Certificates issued pursuant to the Registration Statements in the Securitizations listed in paragraph 43.

200. The Underwriter Defendants are prominently identified as underwriters in each of the Prospectuses used to sell the Certificates. The Underwriter Defendants offered, promoted, and/or sold the Certificates publicly, including selling to Freddie Mac their Certificates, as set forth in the "Plan of Distribution" or "Underwriting" sections of the Prospectuses. The Underwriter Defendants offered, promoted, and/or sold the Certificates to Freddie Mac as specified in Table 2, *supra* at paragraph 50.

201. The Underwriter Defendants offered, promoted, and/or sold the Certificates to Freddie Mac by means of the Prospectuses that contained untrue statements of material facts and omitted to state material facts necessary to make the statements, in light of the circumstances under which they were made, not misleading. The Underwriter Defendants successfully solicited Freddie Mac's purchases of the Certificates, and generated millions of dollars in commissions in connection with the sale of the Certificates.

202. The Underwriter Defendants offered the Certificates for sale, sold them, and distributed them by the use of means or instruments of transportation and communication in interstate commerce.

203. The Depositor Defendants are prominently identified in the Prospectuses for the Securitizations carried out under the Registration Statements that they filed. These Prospectuses were the primary documents each used to sell the Certificates for the 21 Securitizations under those Registration Statements. The Depositor Defendants offered the Certificates publicly and actively solicited their sale, including to Freddie Mac.

204. With respect to the Securitizations for which they filed Registration Statements, the Depositor Defendants offered the Certificates to Freddie Mac by means of Prospectuses that contained untrue statements of material facts and omitted to state material facts necessary to make the statements, in the light of the circumstances under which they were made, not misleading. Upon information and belief, the Depositor Defendants reviewed and participated in drafting the Prospectuses.

205. The Depositor Defendants offered the Certificates for sale by the use of means or instruments of transportation and communication in interstate commerce.

206. The Underwriter Defendants and Depositor Defendants (together, the "Section 12 Defendants") actively participated in the solicitation of Freddie Mac's purchase of the Certificates, and did so in order to benefit themselves. Such solicitation included assisting in preparing the Registration Statements, filing the Registration Statements, and/or assisting in marketing and selling the Certificates.

207. Each of the Prospectuses contained material misstatements of fact and omitted information necessary to make the facts stated therein not misleading. The facts misstated and omitted were material to a reasonable investor reviewing the Prospectuses.

208. The untrue statements of material facts and omissions of material fact in the Registration Statements, which include the Prospectuses, are set forth above in Section IV and pertain to compliance with underwriting guidelines, occupancy status, and loan-to-value ratios.

209. The Section 12 Defendants offered and sold the Certificates offered pursuant to the Registration Statements directly to Freddie Mac, pursuant to the false and misleading Prospectuses.

210. The Section 12 Defendants owed to Freddie Mac a duty to make a reasonable and diligent investigation of the statements contained in the Prospectuses, to ensure that such statements were true, and to ensure that there was no omission of a material fact required to be stated in order to make the statements contained therein not misleading. The Section 12 Defendants failed to exercise such reasonable care, and in the exercise of reasonable care should have known that the Prospectuses contained untrue statements of material facts and omissions of material facts at the time of the Securitizations as set forth above.

211. Freddie Mac did not know of the misstatements and omissions contained in the Prospectuses at the time they purchased the Certificates. If Freddie Mac had known of those misstatements and omissions, it would not have purchased the Certificates.

212. Freddie Mac acquired the Certificates in the primary market pursuant to the Prospectuses.

213. Freddie Mac sustained substantial damages in connection with its investments in the Certificates and has the right to rescind and recover the consideration paid for the Certificates, with interest thereon. Plaintiff hereby seeks rescission and makes any necessary tender of its Certificates. In the alternative, Plaintiff seeks damages according to proof.

THIRD CAUSE OF ACTION

Violation of Section 15 of the Securities Act of 1933 (Against RFC, GMAC-RFC, ResCap, GMACM and Ally)

214. Plaintiff realleges paragraphs 1 through 134 above as if fully set forth herein. For purposes of this cause of action, Plaintiff hereby expressly excludes any allegation that could be construed as sounding in fraud.

215. This claim is brought under Section 15 of the Securities Act of 1933, 15 U.S.C. §77o ("Section 15"), against RFC, GMAC-RFC, ResCap, GMACM, and Ally for controlling-person liability with regard to the Section 11 and Section 12(a)(2) causes of actions set forth above.

216. RFC was the sponsor for all 21 Securitizations carried out pursuant to the Registration Statements filed by RALI, RAMP, and RASC (as specified in Table 1, *supra* at paragraph 44), and culpably participated in their violations of Sections 11 and 12(a)(2) by initiating these Securitizations, purchasing the mortgage loans to be securitized, determining the structure of the Securitizations, selecting the Depositors as special-purpose vehicles, and selecting RFS or the Non-GMAC Underwriters as underwriters. In its role as sponsor, RFC knew and intended that the mortgage loans it purchased would be sold in connection with the securitization process, and that certificates representing the ownership interests of investors in the mortgages would be issued by the relevant trusts.

217. RFC sold the mortgage loans to the Depositor Defendants (as specified in Table 1, *supra* at paragraph 44), and conveyed the mortgage loans to the Depositor Defendants pursuant to an Assignment and Recognition Agreement or a Mortgage Loan Purchase Agreement. RFC controlled all aspects of the business of the Depositor Defendants, who were special-purpose entities created for the purpose of acting as a pass-through for the issuance of the Certificates.

Upon information and belief, the officers and directors of RFC overlapped with the officers and directors of the Depositor Defendants. In addition, RFC was able to, and did in fact, control the contents of the Registration Statements filed by the Depositors, including the Prospectuses and Prospectus Supplements that contained material misstatements of fact and omitted facts necessary to make the contents therein not misleading.

218. Defendant GMAC-RFC is the corporate parent of, and controlled the business operations of, RFC and the Depositor Defendants. As the sole corporate parent of RFC and the Depositor Defendants, GMAC-RFC had the practical ability to direct and control the actions of RFC and the Depositor Defendants in issuing and selling the Certificates, and in fact exercised such direction and control over the activities of RFC and the Depositor Defendants.

219. GMAC-RFC culpably participated in the violations of Section 11 and 12(a)(2) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans characteristics in the Registration Statements and established special-purpose financial entities such as the Depositors and the issuing trusts to serve as conduits for the mortgage loans.

220. Defendant ResCap wholly owns GMAC-RFC and is thus, a parent of RFC and the Depositor Defendants. ResCap culpably participated in the violations of Section 11 and 12(a)(2) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans characteristics in the Registration Statements and established special-purpose financial entities such as the Depositor Defendants and the issuing trusts to serve as conduits for the mortgage loans.

221. Defendant GMACM wholly owns ResCap, and is thus, a parent of GMAC-RFC, RFC, and the Depositor Defendants. GMAC-RFC culpably participated in the violations of

Section 11 and 12(a)(2) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans characteristics in the Registration Statements and established special-purpose financial entities such as the Depositor Defendants and the issuing trusts to serve as conduits for the mortgage loans.

222. Defendant Ally wholly owns GMACM and RFS and is the ultimate parent of GMAC-MG, ResCap, GMAC-RFC, RFC, and the Depositor Defendants. As the sole corporate parent of RFS, Ally had the practical ability to direct and control the actions of RFS in issuing and selling the Certificates, and in fact exercised such direction and control over the activities of RFS in connection with the issuance and sale of the Certificates. Ally culpably participated in the violations of Section 11 and 12(a)(2) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans characteristics in the Registration Statements and established special-purpose financial entities such as the Depositor Defendants and the issuing trusts to serve as conduits for the mortgage loans.

223. Ally, GMACM, ResCap, and GMAC-RFC are controlling persons within the meaning of Section 15 by virtue of their actual power over, control of, ownership of, and/or directorship of RFC, RFS, and the Depositor Defendants at the time of the wrongs alleged herein and as set forth herein, including their control over the content of the Registration Statements.

224. Freddie Mac purchased the Certificates in the primary market, which were issued pursuant to the Registration Statements, including the Prospectuses and Prospectus Supplements, in the primary market which at the time they became effective, contained material misstatements of fact and omitted facts necessary to make the facts stated therein not misleading. The facts misstated and omitted were material to a reasonable investor reviewing the Registration Statements.

225. Freddie Mac did not know of the misstatements and omissions in the Registration Statements; had Freddie Mac known of those misstatements and omissions, it would not have purchased the Certificates.

226. Freddie Mac has sustained damages as a result of the misstatements and omissions in the Registration Statements, for which it is entitled to compensation.

FOURTH CAUSE OF ACTION

Primary Violations of the Virginia Securities Act
(Against RALI, RASC, RAMP, RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS and Goldman Sachs)

227. Plaintiff realleges paragraphs 1 through 134 above as if fully set forth herein. For purposes of this cause of action, Plaintiff hereby expressly excludes any allegation that could be construed as sounding in fraud.

228. This claim is brought by Plaintiff pursuant to Section 13.1-522(A)(ii) of the Virginia Code and is asserted on behalf of Freddie Mac with respect to those Certificates identified in Table 10 above that were purchased by Freddie Mac and issued pursuant to the Registration Statements.

229. The Depositor Defendants (as specified in Table 1, *supra*) made false and materially misleading statements in the Prospectuses (as supplemented by the Prospectus Supplements, hereinafter referred to in this Section as □Prospectuses□) for each Securitization. The Underwriter Defendants (as specified in Table 1, *supra*) made false and materially misleading statements in the Prospectuses for the Securitizations effected under the Shelf Registration Statements.

230. The Underwriter Defendants are prominently identified in the Prospectuses, the primary documents that they used to sell the Certificates. The Underwriter Defendants offered

the Certificates publicly, including selling to Freddie Mac the Certificates, as set forth in the "Method of Distribution" or equivalent underwriting section of each Prospectus.

231. The Underwriter Defendants offered and sold the Certificates to Freddie Mac by means of the Prospectuses, which contained untrue statements of material facts and omitted to state material facts necessary to make the statements, in light of the circumstances under which they were made, not misleading. The Underwriter Defendants reviewed and participated in drafting the Prospectuses.

232. The Underwriter Defendants successfully solicited Freddie Mac's purchases of the Certificates. The Underwriter Defendants were paid a substantial commission based on the amount it received from the sale of the Certificates to the public.

233. The Underwriter Defendants offered the Certificates for sale, sold them, and distributed them to Freddie Mac in the State of Virginia.

234. The Depositor Defendants are prominently identified in the Prospectuses for the Securitizations carried out under the Registration Statements. These Prospectuses were the primary documents used to sell Certificates for the Securitizations pursuant to the Registration Statements. The Depositor Defendants offered the Certificates publicly and actively solicited their sale, including to Freddie Mac. The Depositor Defendants were paid a percentage of the total dollar amount of the offering upon completion of the Securitizations effected pursuant to the Shelf Registration Statements.

235. With respect to the Securitizations for which it filed the Shelf Registration Statements, including the related Prospectus Supplements, the Depositor Defendants offered the Certificates to Freddie Mac by means of Prospectuses which contained untrue statements of material facts and omitted to state material facts necessary to make the statements, in the light of

the circumstances under which they were made, not misleading. The Depositor Defendants reviewed and participated in drafting the Prospectuses.

236. Each of the Underwriter Defendants and the Depositor Defendants actively participated in the solicitation of the Freddie Mac's purchase of the Certificates, and did so in order to benefit itself. Such solicitation included assisting in preparing the Registration Statements, filing the Registration Statements, and assisting in marketing the Certificates.

237. Each of the Prospectuses contained material misstatements of fact and omitted facts necessary to make the facts stated therein not misleading. The facts misstated and omitted were material to a reasonable investor reviewing the Prospectuses, and specifically to Freddie Mac.

238. The untrue statements of material facts and omissions of material facts in the Registration Statements, which include the Prospectuses, are set forth above, and include compliance with underwriting guidelines, occupancy status, loan-to-value ratios, and accurate credit ratings.

239. The Underwriter Defendants and the Depositor Defendants offered and sold the Certificates directly to Freddie Mac pursuant to the materially false, misleading, and incomplete Prospectuses.

240. The Underwriter Defendants owed to Freddie Mac, as well as to other investors in these trusts, a duty to make a reasonable and diligent investigation of the statements contained in the Prospectuses, to ensure that such statements were true, and to ensure that there was no omission of a material fact required to be stated in order to make the statements contained therein not misleading. The Depositor Defendants owed the same duty with respect to the Prospectuses for the Securitizations effected under the Shelf Registration Statements.

241. The Underwriter Defendants and the Depositor Defendants failed to exercise such reasonable care. These Defendants in the exercise of reasonable care should have known that the Prospectuses contained untrue statements of material facts and omissions of material facts at the time of the Securitizations, as set forth above.

242. In contrast, Freddie Mac did not know, and in the exercise of reasonable diligence could not have known, of the untruths and omissions contained in the Prospectuses at the time it purchased the Certificates. If Freddie Mac had known of those untruths and omissions, it would not have purchased the Certificates.

243. Freddie Mac sustained substantial damages in connection with its investments in the Certificates and has the right to rescind and recover the consideration paid for the Certificates, with interest thereon. Plaintiff hereby seeks rescission and makes any necessary tender of its Certificates. In the alternative, Plaintiff seeks damages according to proof.

FIFTH CAUSE OF ACTION

Controlling Person Liability Under the Virginia Securities Act (Against RFC, GMAC-RFC, ResCap, GMACM and Ally)

244. Plaintiff realleges paragraphs 1 through 134 above as if fully set forth herein. For purposes of this cause of action, Plaintiff hereby expressly excludes any allegation that could be construed as sounding in fraud.

245. This claim is brought under Section 13.1-522(C) of the Virginia Code and is asserted on behalf of Freddie Mac, which purchased the Certificates (identified in Table 10, supra) that were issued pursuant to the Registration Statements. This claim is brought against RFC, GMAC-RFC, ResCap, GMACM, and Ally (the "Control Persons") for controlling-person liability with regard to the claim brought by Plaintiff pursuant to Section 13.1-522(A)(ii).

246. RFC was the sponsor for all 21 Securitizations carried out pursuant to the Registration Statements filed by the Depositor Defendants (as specified in Table 1, supra), and culpably participated in their violations of Section 13.1-522(A)(ii) by initiating these Securitizations, purchasing the mortgage loans to be securitized, determining the structure of the Securitizations, selecting the Depositors as special-purpose vehicles, and selecting RFS or the Non-GMAC Underwriters as underwriters. In its role as sponsor, RFC knew and intended that the mortgage loans it purchased would be sold in connection with the securitization process, and that certificates representing the ownership interests of investors in the mortgages would be issued by the relevant trusts.

247. RFC sold the mortgage loans to the Depositor Defendants (as specified in Table 1 *supra*), and conveyed the mortgage loans to the Depositor Defendants pursuant to an Assignment and Recognition Agreement or a Mortgage Loan Purchase Agreement. RFC controlled all aspects of the business of the Depositor Defendants, who were special-purpose entities created for the purpose of acting as a pass-through for the issuance of the Certificates. Upon information and belief, the officers and directors of RFC overlapped with the officers and directors of the Depositor Defendants. In addition, RFC was able to, and did in fact, control the contents of the Registration Statements filed by the Depositors, including the Prospectuses and Prospectus Supplements that contained material misstatements of fact and omitted facts necessary to make the contents therein not misleading.

248. Defendant GMAC-RFC is the corporate parent of, and controlled the business operations of, RFC and the Depositor Defendants. As the sole corporate parent of RFC and the Depositor Defendants, GMAC-RFC had the practical ability to direct and control the actions of

RFC and the Depositor Defendants in issuing and selling the Certificates, and in fact exercised such direction and control over the activities of RFC and the Depositor Defendants.

249. GMAC-RFC culpably participated in the violations of Section 13.1-522(A)(ii) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans characteristics in the Registration Statements and established special-purpose financial entities such as the Depositor Defendants and the issuing trusts to serve as conduits for the mortgage loans.

250. Defendant ResCap wholly owns GMAC-RFC and is thus, a parent of RFC and the Depositor Defendants. ResCap culpably participated in the violations of Section 13.1-522(A)(ii) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans characteristics in the Registration Statements and established special-purpose financial entities such as the Depositor Defendants and the issuing trusts to serve as conduits for the mortgage loans.

251. Defendant GMACM wholly owns ResCap, and is thus, a parent of GMAC-RFC, RFC, and the Depositor Defendants. GMAC-RFC culpably participated in the violations of Section 13.1-522(A)(ii) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans characteristics in the Registration Statements and established special-purpose financial entities such as the Depositor Defendants and the issuing trusts to serve as conduits for the mortgage loans.

252. Defendant Ally wholly owns GMACM and RFS and is the ultimate parent of GMAC-MG, ResCap, GMAC-RFC, RFC, and the Depositor Defendants. As the sole corporate parent of RFS, Ally had the practical ability to direct and control the actions of RFS in issuing and selling the Certificates, and in fact exercised such direction and control over the activities of

RFS in connection with the issuance and sale of the Certificates. Ally culpably participated in the violations of Section 13.1-522(A)(ii) set forth above. It oversaw the actions of its subsidiaries and allowed them to misrepresent the mortgage loans' characteristics in the Registration Statements and established special-purpose financial entities such as the Depositor Defendants and the issuing trusts to serve as conduits for the mortgage loans.

253. Ally, GMACM, ResCap, and GMAC-RFC are controlling persons within the meaning of Section 13.1-522(C) of the Virginia Code by virtue of their actual power over, control of, ownership of, and/or directorship of RFC, RFS, and the Depositor Defendants at the time of the wrongs alleged herein and as set forth herein, including their control over the content of the Registration Statements.

254. Freddie Mac purchased the Certificates, which were issued pursuant to the Registration Statements, including the Prospectuses and Prospectus Supplements, which contained material misstatements of fact and omitted facts necessary to make the facts stated therein not misleading. The facts misstated and omitted were material to a reasonable investor reviewing the Registration Statements, and specifically to Freddie Mac.

255. Freddie Mac did not know, and in the exercise of reasonable diligence could not have known, of the misstatements and omissions in the Registration Statements; had Freddie Mac known of those misstatements and omissions, it would not have purchased the Certificates.

256. Freddie Mac has sustained substantial damages as a result of the misstatements and omissions in the Registration Statements, for which it is entitled to compensation, and for which the Control Persons are jointly and severally liable.

SIXTH CAUSE OF ACTION

(Common Law Fraud Against RALI, RAMP, RASC, RFC, RFS JPM, Credit Suisse, RBS, Citi, Barclays, UBS and Goldman Sachs)

257. Plaintiff realleges paragraphs 1 through 185 as if fully set forth herein.

258. Freddie Mac was fraudulently induced to purchase the Certificates by the Fraud Defendants misrepresentations and omissions of material facts.

259. The material representations set forth above and in Appendix A were fraudulent, and the Fraud Defendants representations falsely and misleadingly misrepresented and omitted material statements of fact. The representations at issue are identified in Sections I.C. and I.D. and in Appendix A.

260. The Fraud Defendants knew their representations and omissions were false and/or misleading at the time they were made, or made such representations and omissions recklessly without knowledge of their truth or falsity.

261. Each of the Fraud Defendants made the misleading statements with the intent and for the purpose of inducing Freddie Mac to purchase the Certificates.

262. Freddie Mac justifiably relied on the Fraud Defendants false representations and misleading omissions.

263. But for the Fraud Defendants fraudulent misrepresentations and omissions regarding the Fraud Defendants underwriting practice and quality of the loans making up the securitizations, Freddie Mac would not have purchased the Certificates.

264. As a result of the foregoing, Freddie Mac has suffered damages in an amount to be proven at trial. Plaintiff hereby demands rescission and makes any necessary tender of the Certificates.

265. Because the Fraud Defendants defrauded Freddie Mac willfully and wantonly, and because, by their acts, the Fraud Defendants knowingly affected the general public, including but not limited to all persons with interest in the Certificates, Plaintiff is entitled to recover punitive damages.

SEVENTH CAUSE OF ACTION

(Aiding and Abetting Fraud Against Ally, GMACM, GMAC-MG, ResCap, GMAC-RFC, RFC, RALI, RASC and RAMP)

266. Plaintiff realleges paragraphs 1 through 185 as if fully set forth herein.

267. This is a claim for aiding and abetting fraud, in the alternative, should it be found that the Underwriting Defendants alone are liable for fraud. This claim is brought against Ally, GMACM, GMAC-MG, ResCap, GMAC-RFC, RFC, the Depositor Defendants, arising from the intentional and substantial assistance each rendered to the Underwriter Defendants to advance the fraud on Freddie Mac.

268. Through overlapping personnel, strategies, and intertwined business operations, and the fluid transfer of information among the Defendants, each of Ally, GMACM, GMAC-MG, ResCap, GMAC-RFC, RFC, the Depositor Defendants knew of the Fraud Defendants and fraudulent scheme to offload the credit risks of non-agency loans to investors, including Freddie Mac. Each of these Defendants acted in concert to defraud Freddie Mac.

269. Ally, GMACM, GMAC-MG, ResCap, GMAC-RFC, RFC, the Depositor Defendants, through their employees and representatives, substantially assisted in, among other things: (a) the extension of warehouse loans to originators; (b) acquiring the underlying mortgage loans from the originators; (c) packaging up those loans into pools which were deposited into the Trust; (d) waiving into the collateral pools of the Trusts loans previously rejected by Clayton or otherwise non-compliant loans, despite the lack of compensating factors;

(e) creating and structuring the Trusts whose Certificates would be sold to investors including Freddie Mac; and (f) preparing the Registration Statements which would be used to market the Certificates.

270. The Underwriter Defendants would not have been able to implement their fraud against Freddie Mac without such substantial assistance.

271. Through overlapping personnel, strategies, and intertwined business operations, and the fluid transfer of information among the Defendants, each of the Defendants knew of the fraud perpetrated on Freddie Mac.

272. The Underwriter Defendants could not have perpetrated their fraud without the substantial assistance of each other defendant, and they all provided financial, strategic, and marketing assistance for their scheme. Defendants are highly intertwined and interdependent businesses and each benefitted from the success of the scheme. Through the fraudulent sale of the Certificates to the Freddie Mac, the Selling Underwriters were able to materially improve their financial condition by reducing their exposure to declining subprime-related assets and garnering millions of dollars in fees from the structuring and sale of the Certificates.

273. As a direct, proximate, and foreseeable result of the conduct of Ally, GMACM, GMAC-MG, ResCap, GMAC-RFC, RFC, and the Depositor Defendants, Freddie Mac has suffered and will continue to suffer damages in an amount to be proven at trial. Plaintiff hereby demands rescission and makes any necessary tender of the Certificates.

274. Because the Fraud Defendants defrauded Freddie Mac willfully and wantonly, and because, by their acts, the Fraud Defendants knowingly affected the general public, including but not limited to all persons with interest in the Certificates, Plaintiff is entitled to recover punitive damages.

EIGHTH CAUSE OF ACTION

(Negligent Misrepresentation Against RALI, RASC, RAMP, RFC, RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS and Goldman Sachs)

275. Plaintiff realleges paragraphs 1 through 185 as if fully set forth herein.

276. Between September 23, 2005 and May 30, 2007, RALI, RASC, RAMP, RFC, RFS, JPM, Credit Suisse, RBS, Citi, Barclays, UBS, Goldman Sachs (the "Negligent Misrepresentation Defendants") sold the Certificates Freddie Mac as described above. Because the Depositor Defendants owned and then conveyed the underlying mortgage loans to the issuing trusts, the Depositor Defendants had unique, exclusive, and special knowledge about the mortgage loans in the Securitizations through their possession of the loan files and other documentation.

277. Likewise, as underwriters of the Securitizations, the Underwriter Defendants had the access to and ability to review loan file information and were obligated to perform adequate due diligence to ensure the accuracy of the Offering Materials. Accordingly, the Underwriter Defendants had unique, exclusive, and special knowledge about the underlying mortgage loans in the Securitizations.

278. The Negligent Misrepresentation Defendants also had unique, exclusive, and special knowledge of the work of third-party due diligence providers, such as Clayton, who identified significant failures of originators to adhere to the underwriting standards represented in the Registration Statements. Freddie Mac lacked access to borrower loan files prior to the closing of the Securitizations and their purchase of the Certificates. Accordingly, when determining whether to purchase the Certificates, Freddie Mac could not evaluate the underwriting quality or the servicing practices of the mortgage loans in the Securitizations on a loan-by-loan basis. Freddie Mac therefore reasonably relied on the knowledge and

representations of the Negligent Misrepresentation Defendants regarding the underlying mortgage loans.

279. The Negligent Misrepresentation Defendants were aware that Freddie Mac reasonably relied on these Defendants for complete, accurate, and timely information. The standards under which the underlying mortgage loans were actually originated were known to these Defendants and were not known, and could not be determined, by Freddie Mac prior to the closing of the Securitizations. Freddie Mac reasonably relied upon these Defendants misrepresentations and omissions in the Offering Materials.

280. The Negligent Misrepresentation Defendants breached their duty of disclosure by making false or misleading statements of material facts to Freddie Mac when they knew or should have known of the falsity of their statements. The misrepresentations are set forth in Sections I.C. and I.D. above and Appendix A.;

281. In addition, having false or misleading representations about the underlying collateral in the Securitizations and the facts bearing on the riskiness of the Certificates, the Negligent Misrepresentation Defendants had a duty to correct the misimpressions left by their statements, including with respect to any half truths. The Negligent Misrepresentation Defendants failed to correct in a timely manner any of their misstatements or half truths.

282. Freddie Mac reasonably relied on the information provided by the Selling Negligent Misrepresentation Defendants, and as a result, Freddie Mac suffered damages in an amount to be determined at trial.

PRAYER FOR RELIEF

WHEREFORE Plaintiff respectfully requests that judgment be entered:

An award in favor of Plaintiff against all Defendants, jointly and severally, for:

a. Rescission and recovery of the consideration paid for the Certificates, with interest thereon (in connection with this request for rescission, the Certificates are hereby tendered to the Defendants);

b. Freddie Mac's monetary losses, including any diminution in value of the Certificates, as well as lost principal and lost interest payments thereon;

c. Punitive damages;

d. Attorney's fees and costs;

e. Prejudgment interest at the maximum legal rate; and

f. Such other and further relief as the Court may deem just and proper.
