Docket #0005 Date Filed: 5/25/2012

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re:	Case No. 12-12020 (MG)
RESIDENTIAL CAPITAL, LLC, et al.,	Chapter 11
Debtors.	Joint Administration Pending

RESIDENTIAL CAPITAL, LLC, et al.,	Case No. 12-ap-1671 (MG)
Plaintiffs,	Bankruptcy Case No. 12-12020 (MG)
v.	Joint Administration Pending
ALLSTATE INS. CO., THE OTHER PARTIES LISTED ON EXHIBIT A TO THE COMPLAINT, JOHN DOES 1-1000,	
Defendants.	

DECLARATION OF JOEL C. HAIMS

I, Joel C. Haims, hereby declare:

1. I am an attorney admitted to practice before the Courts of the State of New York and the U.S. District Court for the Southern District of New York and a partner with Morrison & Foerster LLP, proposed counsel to the Debtors and Debtors in Possession and counsel for plaintiffs in the above-captioned action, with respect to all Defendants except Federal Home Loan Bank of Boston and Federal Home Loan Bank of Chicago. I submit this declaration in support of Plaintiffs' Motion for a Stay or, in the Alternative, Injunctive Relief Enjoining Prosecution of Certain Litigation against Debtors' Directors and Officers and Non-Debtor Corporate Affiliates.[1]

[1] Unless otherwise defined, capitalized terms used herein have the meanings ascribed to them in the Motion for Stay or, in the Alternative, Injunctive Relief Enjoining Prosecution of Certain Litigation Against Debtors' Directors and Officers and Non-Debtor Corporate Affiliates.

2. Attached as Exhibit 1 is a true and correct copy of the First Amended Complaint (excluding exhibits) filed in *Allstate Ins. Co. et al. v. GMAC Mortg., LLC et al.,* No. 27-CV-11-3480 (Minn. Dist. Ct., Hennepin Cnty. filed Apr. 15, 2011).

3. Attached as Exhibit 2 is a true and correct copy of the Complaint and Jury Demand (excluding appendices) filed in *Cambridge Place Inv. Mgmt., Inc. v. Morgan Stanley & Co. et al.*, No. 10-2741-BLS2 (Mass. Super. Ct., Suffolk Cnty. filed July 9, 2010).

4. Attached as Exhibit 3 is a true and correct copy of the Complaint and Jury Demand (excluding appendix) filed in *Cambridge Place Inv. Mgmt., Inc. v. Morgan Stanley & Co. et al.*, No. 11-0555-BLS2 (Mass. Super. Ct., Suffolk Cnty. filed Feb. 11, 2011)

5. Attached as Exhibit 4 is a true and correct copy of the Complaint (excluding exhibits and schedules) filed in *Fed. Deposit Ins. Corp. As Receiver for Citizens Nat'l Bank and Strategic Capital Bank v. Bear Stearns Asset Backed Securities I LLC et al.*, No. 12-cv-4000 (S.D.N.Y. filed May 18, 2012).

6. Attached as Exhibit 5 is a true and correct copy of the Complaint for Rescission and Damages and Demand for Jury Trial (excluding appendices) filed in *Fed. Home Loan Bank of Bos. v. Ally Fin. Inc. et al.*, No. 1:11-cv-10952-GAO (D. Mass.) (removed from Mass. Super. Ct. (No. 11-1533-BLS1), filed Apr. 20, 2011).

7. Attached as Exhibit 6 is a true and correct copy of the Corrected Amended Complaint for Rescission and Damages (excluding exhibits) filed in *Fed. Home Loan Bank of Chi. v. Ally Fin. Inc. et al.*, No. 10 CH 45033 (Ill. Cir. Ct., Cook Cnty. filed Apr. 8, 2011).

8. Attached as Exhibit 7 is a true and correct copy of the Amended Complaint for Rescission and Damages (excluding appendices) filed in *Fed. Home Loan Bank of Indianapolis v. Ally Fin. Inc. et al.*, No. 49D05 10 10 PL 045071 (Ind. Super. Ct., Marion Cnty. filed July 14, 2011).

9. Attached as Exhibit 8 is a true and correct copy of the Amended Complaint filed in *Huntington Bancshares Inc. v. Ally Fin. Inc. et al.*, No. 27-CV-11-20276 (Minn. Dist. Ct., Hennepin Cnty. filed Oct. 19, 2011).

10. Attached as Exhibit 9 is a true and correct copy of the First Amended Complaint filed in *Mass. Mutual Life Ins. Co. v. Residential Funding Co., LLC et al.*, No. 11-cv-30035-MAP (D. Mass. filed May 17, 2012).

11. Attached as Exhibit 10 is a true and correct copy of the Consolidated Second Amended Securities Class Action Complaint filed in *N.J. Carpenters Health Fund et al. v. Residential Capital, LLC et al.*, No. 08-cv-8781-HB (S.D.N.Y. filed Jan. 3, 2011).

12. Attached as Exhibit 11 is a true and correct copy of the Summons with Notice filed in *SeaLink Funding Ltd. v. Royal Bank of Scotland Grp. PLC et al.*, No. 650484/2012 (N.Y. Sup. Ct., N.Y. Cnty., summons filed Feb. 21, 2012).

13. Attached as Exhibit 12 is a true and correct copy of the Complaint filed in *Stichting Pensioenfonds ABP v. Ally Fin. Inc. et al.*, No. 27-CV-11-20426 (Minn. Dist. Ct., Hennepin Cnty. filed Oct. 11, 2011).

14. Attached as Exhibit 13 is a true and correct copy of the Amended Complaint (excluding exhibits) filed in *Thrivent Fin. for Lutherans et al. v. Residential Funding Co., LLC et al.*, No. 27-CV-11-5830 (Minn. Dist. Ct., Hennepin Cnty. filed Oct. 24, 2011).

15. Attached as Exhibit 14 is a true and correct copy of the Amended Complaint for Violations of the Federal Securities Laws and New York Common Law Fraud filed in *Union Cent. Life Ins. Co. et al. v. Credit Suisse First Bos. Mortg. Sec. Corp. et al.*, No. 11-cv-2890-GBD (S.D.N.Y. filed May 4, 2012).

16. Attached as Exhibit 15 is a true and correct copy of the Amended Complaint (excluding exhibits) filed in *Western & Southern Life Ins. Co. v. Residential Funding Co., LLC et al.*, No. A1105042 (Ohio Ct. of Comm. P., Hamilton Cnty. filed Sept. 9, 2011).

17. Attached as Exhibit 16 is a true and correct copy of the Amended Complaint filed in *FGIC v. GMAC Mortg., LLC et al.*, No. 11-cv-9729 (S.D.N.Y.) (removed from N.Y. Sup. Ct. (No. 653302/2011), filed Mar. 30, 2012).

18. Attached as Exhibit 17 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-00338 (S.D.N.Y.) (removed from N.Y. Sup. Ct. (No. 653623/2011), filed Dec. 27, 2011).

19. Attached as Exhibit 18 is a true and correct copy of the Complaint (excluding exhibits) filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-00339 (S.D.N.Y.) (removed from N.Y. Sup. Ct. (No. 653622/2011), filed Dec. 27, 2011).

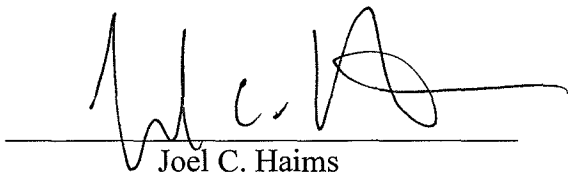
20. Attached as Exhibit 19 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.,* No. 12-cv-00340 (S.D.N.Y.) (removed from N.Y. Sup. Ct. (No. 653621/2011), filed Dec. 27, 2011).

21. Attached as Exhibit 20 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-00341 (S.D.N.Y.) (removed from N.Y. Sup. Ct. (No. 653493/2011), filed Dec. 15, 2011).

22. Attached as Exhibit 21 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-0780 (S.D.N.Y. filed Jan. 31, 2012).

23. Attached as Exhibit 22 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-1601 (S.D.N.Y. filed Mar. 5, 2012).

24. Attached as Exhibit 23 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-1658 (S.D.N.Y. filed Mar. 6, 2012).



25. Attached as Exhibit 24 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-1818 (S.D.N.Y. filed Mar. 12, 2012).

26. Attached as Exhibit 25 is a true and correct copy of the Complaint filed in *FGIC v. Ally Fin. Inc. et al.*, No. 12-cv-1860 (S.D.N.Y. filed Mar. 13, 2012).

27. Attached as Exhibit 26 is a true and correct copy of the Complaint filed in *Assured Guar. Mun. Corp. v. GMAC Mortg., LLC et al.*, No. 12-cv-3776 (S.D.N.Y. filed May 11, 2012).

28. Attached as Exhibit 27 is a true and correct copy of the Complaint (excluding exhibits) filed in *Fed. Hous. Fin. Agency v. Ally Fin., Inc.*, No. 11-cv-07010 (S.D.N.Y.) (removed from N.Y. Sup. Ct. (No. 652441/2011), filed Sept. 2, 2011).

I declare under the penalty of perjury under the laws of the United States that the foregoing is true and correct. Executed on May 24, 2012 in New York, New York.

Civil File No. 27-CV-11-3480
Honorable Margaret A. Daly

FIRST AMENDED COMPLAINT

NATURE OF ACTION 1

PARTIES 6

JURISDICTION AND VENUE 12

BACKGROUND 12

SUBSTANTIVE ALLEGATIONS 16

I. THE DEFENDANTS ABUSED THEIR CONTROL OF THE RAPIDLY-EXPANDING SECURITIZATION PROCESS 16

A. Evidence of a Rise in Securitization Volume Leading to a Decline in Underwriting Standards 16

B. The Defendants' Control Over the Vertically-Integrated Process 22

II. THE DEFENDANTS' MATERIAL MISREPRESENTATIONS AND OMISSIONS 25

A. The Defendants' Misrepresentations Regarding Underwriting Guidelines 25

B. The Defendants' Misrepresentations Regarding Due Diligence Results 26

C. The Defendants' Misrepresentations Regarding Case-by-Case Underwriting Exceptions 27

D. The Defendants' Misrepresentations Regarding Owner-Occupancy Statistics 28

E. The Defendants' Misrepresentations Regarding Loan-to-Value Ratios 29

F. The Defendants' Misrepresentations Regarding the Sufficiency of Borrower Income 30

G. The Defendants' Misrepresentations Regarding Credit Enhancements 31

H. The Defendants' Misrepresentations Regarding Credit Ratings 32

I. Documentary Basis for the Loan Approval 33

III. EVIDENCE THAT ALL OF THE DEFENDANTS' REPRESENTATIONS WERE UNTRUE AND MISLEADING 34

A. Evidence of the Securities' High Default Rates and Plummeting Credit Ratings 36

B. Loan-Level Evidence That Borrowers Did Not Actually Occupy the Mortgage Properties as Represented 39

C. Loan-Level, Independent Evidence That the LTV Ratios Were Materially Misrepresented 43

D. Evidence From A Former Senior Underwriter That GMAC Accepted Absurd Income Claims 48

E. Evidence From the Defendants' Own Insurers' Review of Loan Files at Issue Here 49

F. Documentary and Testimonial Evidence that Due Diligence Flagged Many Problem Loans That Were "Waived In" Anyway 54

G. Evidence That the Ratings Were Meaningless 60

H. Evidence of Serious and Repeated Problems at the Affiliated Originator Homecomings Financial 61

(1) Confidential witness: Automated system manipulated to obtain approvals 61

(2) Confidential witnesses: QC group overridden 64

(3) Other evidence of problems at Homecomings 65

I. Evidence that the Loans Were Approved Based on Incomplete Loan Files 67

J. Evidence that Residential Funding Itself Believes Loans it Purchased Were Non-Compliant 67

IV. THE DEFENDANTS KNEW THEIR REPRESENTATIONS WERE FALSE 68

A. The Statistical Evidence is Itself Persuasive Evidence the Defendants Knew of the Falsity of Their Representations – Particularly Given They Origianted Many of the Loans 68

B. Evidence From Third-Party Due Diligence Firms Demonstrates That Defendants Knew Defective Loans Were Being Securitized 70

C. Other Confidential Witness Testimony Further Confirms' Defendants' Knowledge 73

D. Evidence of Residential Fundings' Improper "Bulk Buying" Procedures 75

E. Evidence That the Defendants Knew the Appraisals Were Falsely Inflated 76

V. ALLSTATE'S DETRIMENTAL RELIANCE AND DAMAGES 79

PRAYER FOR RELIEF 89

JURY TRIAL DEMANDED 90

Plaintiffs Allstate Insurance Company, Allstate Life Insurance Company, Allstate Bank (f/k/a Allstate Federal Savings Bank), Allstate New Jersey Insurance Company, American Heritage Life Insurance Company, First Colonial Insurance Company, Allstate Life Insurance Company of New York, Allstate Retirement Plan, and Kennett Capital, Inc. (collectively, "Allstate"), by and through their attorneys, bring this action against GMAC Mortgage, LLC (f/k/a GMAC Mortgage Corporation), Residential Funding Company, LLC (f/k/a Residential Funding Corporation), Residential Funding Securities, LLC (d/b/a GMAC RFC Securities, f/k/a Residential Funding Securities Corporation), Residential Accredit Loans, Inc., Residential Asset Mortgage Products, Inc., Residential Funding Mortgage Securities I, Inc., Residential Funding Mortgage Securities II, Inc., and Residential Asset Securities Corporation, and allege as follows:

NATURE OF ACTION

1. This action arises out of the defendants' fraudulent sale of residential mortgage-backed securities (the "Certificates") to Allstate. Whereas Allstate was made to believe it was buying highly-rated, safe securities backed by pools of loans with specifically-represented risk profiles, in fact the defendants knew the pool was a toxic mix of loans given to borrowers that could not afford the properties, and thus were highly likely to default.

2. The defendants made numerous material misrepresentations and omissions regarding the riskiness and credit quality of the Certificates in registration statements, prospectuses, prospectus supplements, preliminary term sheets, final term sheets, and other written materials (the "Offering Materials"). For example:

(i) ***Underwriting guidelines.*** The Offering Materials each represented that a particular, reasonable underwriting process was followed to ensure that only loans that the borrower could repay would be included in the pool underlying the Certificates (the "Mortgage Loans"). In fact, the defendants systematically ignored the disclosed underwriting standards in

originating or otherwise acquiring non-compliant loans. Confidential witness testimony confirms that senior executives at the defendants' affiliated lender were trained on how to manipulate the data fed into the system (including by submitting as many as twenty-five different applications) until the loan was approved. It confirms that defendants instructed its affiliated lender to increase the number of applications that used less documentation – which, of course, is the type of applications that can be even more easily manipulated. It also confirms underwriters within the defendants would review files to determine if they could be "tweaked" enough to get a loan approved – including by making undocumented assumptions about the borrower's debt-to-income ratios. It is not surprising, then, that a recent review of the loan files underlying some of Allstate's Certificates by the defendants' own insurer revealed a pervasive lack of proper documentation, facially absurd (yet unchecked) claims about the borrower's purported income, and the routine use of at least three different programs that circumvented the underwriting guidelines altogether. Based on data compiled from third-party due diligence firms, the federal Financial Crisis Inquiry Commission ("FCIC") noted (at 187) in its January 2011 report:

> The Commission concludes that firms securitizing mortgages failed to perform adequate due diligence on the mortgages they purchased and at times knowingly waived compliance with underwriting standards. ***Potential investors were not fully informed or were misled*** about the poor quality of the mortgages contained in some mortgage-related securities. ***These problems appear to be significant.***

(ii) ***Percentage of Known Non-Conforming Loans.*** The defendants fraudulently omitted the fact that both the underwriters' internal due diligence, as well as third-party due diligence firms, had identified numerous loans that did not conform to the stated underwriting guidelines. Nor did they disclose that many of those same non-conforming loans had been "waived" into the collateral pools underlying the Certificates despite not having any purported "compensating" factors. Data recently made available from one of the largest due diligence firms – which worked for many of the underwriters here – confirms this was occurring

on a staggering scale. This not only confirms the results of Allstate's statistical analysis of the loans at issue, but also confirms the defendants' knowledge of those underwriting violations.

(iii) ***Owner Occupancy Statistics.*** The Offering Materials made specific representations regarding the percentage of borrowers who would be occupying the property being mortgaged – a key risk characteristic given that borrowers are less likely to walk away from properties they live in, as compared to properties being used as a vacation home or as an investment. Confidential witness testimony confirms underwriters had what information they needed in the loan files (which Allstate was not given access to) to double-check these figures. But analytical tools recently made available to investors confirm that in truth, a far greater percentage of the loans underlying Allstate's Certificates were in fact given to borrowers who lived elsewhere.

(iv) ***Loan-to-Value Ratios.*** The Offering Materials represented that the underlying loans had specific loan-to-value ("LTV") and combined loan-to-value ("CLTV") ratios. The LTV and CLTV represent the size of the borrower's obligations as compared to the value of the property being used as collateral. The CLTV is the LTV after all loans are considered, not just the first mortgage. These are also key risk metrics, because they represent the equity "cushion" that borrowers have and the likelihood of repayment to lenders upon foreclosure. Analytical tools recently made available to investors confirm that the Offering Materials vastly overstated the value of the collateral being included in the loan pools, and hid additional liens that had been placed on the properties. Confidential witness testimony confirms defendants were relying on facially absurd "comp" calculations – such as treating a house on a canal the same as a beach house – and were relying on arbitrary comp 'mark-ups' which could increase the purported value by as much as 25%. It also confirms that certain appraisers

submitted the same exact analysis for every application – indicating no investigative work was actually being done – yet those companies' appraisals were still approved for use in these calculations.

(v) ***Purpose and Use of Exceptions.*** The Offering Materials represented that loans that did not meet certain criteria were approved as "exceptions" only on the basis of countervailing features of the borrowers' risk profiles that 'made up' for negative aspects of the risk profile. In fact, "exceptions" were instead used as a way to increase loan volume by circumventing the applicable underwriting guidelines. And a recent review of the loan files underlying some of Allstate's Certificates by the defendants' own insurer revealed that non-compliant Mortgage Loans did not have any identified countervailing features, and that the defendants abused at least three bulk-purchase and bulk-approval procedures to create loan pools outside of the disclosed underwriting guidelines.

3. As summarized below, Allstate purchased over ***half a billion dollars*** in the defendants' mortgage-backed securities in reliance on these and the other misrepresentations and omissions. The purchases are further detailed in the exhibits to this complaint, which are all incorporated as if set forth fully herein.

4. Allstate invested in the Certificates as part of a broader plan to invest in a diverse array of mortgage-backed securities. Allstate typically purchased senior classes of mortgage-backed securities (i.e., those rated AAA/Aaa or AA/Aa by the rating agencies Standard & Poor's and Moody's Investors Service). Allstate purchased the Certificates to generate income and total return through safe investments. But Allstate also purchased these securities with the expectation that the investments could be – and indeed some would be and were – sold on the secondary market.

5. The systemic (but hidden) abandonment of the disclosed underwriting guidelines has predictably led to soaring default rates in the mortgage loans underlying the Certificates, resulting in a drastic drop in the value of the Certificates. For instance, despite the fact that most of the of the Certificates started out with AAA ratings – the same rating given to treasury bills backed by the full faith and credit of the United States government – over 75% are now not even rated as investment-grade securities. These problems are so drastic and their onset was so rapid (in comparison to the long-term security of the investments Allstate thought it was purchasing) that the poor performance to date of the Certificates is itself powerful evidence that the Mortgage Loans were not underwritten according to the procedures represented to Allstate. With the

underlying loans performing so poorly, the value of Allstate's Certificates has plummeted, causing Allstate to incur significant losses. These losses were not caused by the downturn in the U.S. housing market, but by defendants' faulty underwriting.

6. As the FCIC concluded in its January 2011 report (at 224):

> As mortgage securities lost value, investors found significant deficiencies in securitizer's due diligence on the mortgage pools underlying the mortgage-backed securities as well as in their disclosure about the characteristics of those deals. As private mortgage insurance companies found similar deficiencies in the loans they insured, they have denied claims to an unprecedented extent . . .

The report also recounted (at 224) that investigations by the government-sponsored entities Fannie Mae and Freddie Mac similarly found loan disclosures consistently lacking. For instance, "Freddie reviewed $76.8 billion of loans . . . and found $21.7 billion to be ineligible, meaning they did not meet representations and warranties."

PARTIES

7. ***The Plaintiffs.*** Plaintiff Allstate Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of Illinois, with its principal place of business in Northbrook, Illinois. It is the nation's largest publicly-held personal-lines insurer, selling property and casualty insurance. Allstate Insurance Company is licensed in the state of Minnesota and writes insurance products within this State. Allstate Insurance Company is a wholly-owned subsidiary of Allstate Insurance Holdings, LLC, which is a Delaware limited liability company. Allstate Insurance Holdings, LLC is a wholly-owned subsidiary of The Allstate Corporation, which is a Delaware corporation.

8. Plaintiff Allstate Life Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of Illinois, with its principal place of business in Northbrook, Illinois. It is licensed in the State of Minnesota and sells life, accident, and health

insurance products in this State. Allstate Life Insurance Company is a wholly-owned subsidiary of Allstate Insurance Company.

9. Plaintiff Allstate Bank, formerly known as Allstate Federal Savings Bank, is a federally-chartered thrift institution that provides retail bank products and services. It is a wholly-owned subsidiary of The Allstate Corporation, and has its registered office in Northbrook, Illinois.

10. Plaintiff Allstate New Jersey Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of Illinois, with its statutory office in Northbrook, Illinois. It is licensed in the states of Illinois and New Jersey, writing property and casualty insurance products in New Jersey.

11. Plaintiff American Heritage Life Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of Florida, with its principal place of business in Jacksonville, Florida. It sells life, accident, and health insurance and annuity products. American Heritage Life Insurance Company is a wholly-owned subsidiary of American Heritage Life Investment Corporation, which is a Delaware corporation. American Heritage Life Investment Corporation is a wholly-owned subsidiary of The Allstate Corporation.

12. Plaintiff First Colonial Insurance Company is an insurance company formed under the laws of, and domiciled in, the State of Florida, with its principal place of business in Jacksonville, Florida. It sells property and casualty insurance products. It is a wholly-owned subsidiary of American Heritage Life insurance Company

13. Plaintiff Allstate Life Insurance Company of New York is an insurance company formed under the laws of, and domiciled in, the State of New York, with its principal place of business in Hauppauge, New York. It sells life, accident and health insurance and annuity

products. Allstate Life Insurance Company of New York is a wholly-owned subsidiary of Allstate Life Insurance Company.

14. Plaintiff Allstate Retirement Plan is an ERISA plan sponsored by Allstate Insurance Company.

15. Plaintiff Kennett Capital, Inc. is a Delaware corporation and an indirect wholly-owned subsidiary of The Allstate Corporation.

16. ***The Defendants.*** All of the defendants in this action are part of the same corporate family, and acted together to control the entire creation, marketing, and sale of the Certificates at issue here, from loan origination, to mortgage pooling, to securities underwriting, to sale to Allstate. Allstate is not seeking relief against any bankrupt entity. It is, however, seeking relief from the defendants, including their successors-in-interest (if any), by reason of a sale or transfer of all or a portion of its assets.

17. ***Seller, Sponsor, and Servicer Defendants.*** Defendant Residential Funding Company, LLC, formerly known as Residential Funding Corporation, is a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. It is engaged in the business of, among other things, originating and acquiring residential mortgage loans and selling those loans through securitization programs.

18. Defendant GMAC Mortgage, LLC, formerly known as GMAC Mortgage Corporation, is a Delaware limited liability company with its principal place of business in Horsham, Pennsylvania. It acquired, originated, and serviced residential loans, and sponsored the securitization of some of the mortgage loans at issue here.

19. ***Affiliated Underwriter Defendant.*** Defendant Residential Funding Securities, LLC, doing business as GMAC RFC Securities and formerly known as Residential Funding

Securities Corporation, is a Delaware limited liability company and registered broker-dealer with its principal place of business in Minneapolis, Minnesota. Residential Funding Securities, LLC's banking operations are limited to broker-dealer functions in the issuance and underwriting of residential and commercial mortgage-backed securities. It served as a co-underwriter for the offerings at issue here except RALI 2005-QA2, RALI 2006-QS14, RALI 2006-QO3, RAMP 2004-RZ4, RAMP 2006-RS3, RASC 2005-KS3, RASC 2005-SK4, and RFMSI 2006-S6.

20. ***Depositor Defendants.*** The Depositors are considered issuers of the Certificates within the meaning of Section 2(a)(4) of the Securities Act of 1933, 15 U.S.C. §77b(a)(4), and in accordance with Section 11(a), 15 U.S.C. §77k(a).

21. Defendant Residential Accredit Loans, Inc. is a Delaware corporation and a limited-purpose indirect subsidiary of Residential Capital with its principal place of business in Minneapolis, Minnesota. It was the Depositor for certain of the offerings in which Allstate invested, the Registrant for certain Registration Statements filed with the SEC, and an issuer of certain mortgage-backed Certificates purchased by Allstate.

22. Defendant Residential Asset Mortgage Products, Inc. is a Delaware corporation and a limited-purpose indirect subsidiary of Residential Capital with its principal place in Minneapolis, Minnesota. It was the Depositor for certain of the offerings in which Allstate invested, the Registrant for certain Registration Statements filed with the SEC, and an issuer of certain mortgage-backed Certificates purchased by Allstate.

23. Defendant Residential Funding Mortgage Securities I, Inc. is a Delaware corporation and a limited-purpose subsidiary of Residential Capital with its principal place of business in Minneapolis, Minnesota. It was the Depositor for certain of the offerings in which

Allstate invested, the Registrant for certain Registration Statements filed with the SEC, and an issuer of certain mortgage-backed Certificates purchased by Allstate.

24. Defendant Residential Funding Mortgage Securities II, Inc. is a Delaware corporation and a limited purpose subsidiary of Residential Capital with its principal place of business in Minneapolis, Minnesota. It was the Depositor for certain of the offerings in which Allstate invested, the Registrant for certain Registration Statements filed with the SEC, and an issuer of certain mortgage-backed Certificates purchased by Allstate.

25. Defendant Residential Asset Securities Corporation is a Delaware corporation and limited purpose subsidiary of Residential Capital with its principal place of business in Minneapolis, Minnesota. It was the Depositor for certain of the offerings in which Allstate invested, the Registrant for certain Registration Statements filed with the SEC, and an issuer of certain mortgage-backed Certificates purchased by Allstate.

26. ***Relevant Non-Parties.*** Ally Financial Inc. is a Delaware corporation with its principal place of business in Detroit, Michigan. On November 30, 2006, General Motors sold a 51% interest in General Motors Acceptance Corporation to FIM Holdings LLC, and changed its name to GMAC, LLC. On June 30, 2009, GMAC, LLC changed its name to GMAC, Inc., and on May 10, 2010, GMAC, Inc. changed its name to Ally Financial Inc. It is now a lending, independent, globally-diversified financial services firm. It is the direct or indirect parent of all the defendants in this action.

27. GMAC Mortgage Group, LLC, formerly known as GMAC Mortgage Group, Inc., is a Delaware limited liability company with its principal place of business in Horsham, Pennsylvania. It is a wholly-owned subsidiary of Ally Financial Inc., and the direct parent of Residential Capital, LLC.

28. Residential Capital, LLC, formerly known as Residential Capital Corporation, is a Delaware limited liability company, an indirect subsidiary of Ally Financial Inc., and a direct subsidiary of GMAC Mortgage Group, LLC, with its principal place of business in Minneapolis, Minnesota. Residential Capital LLC is the direct or indirect parent company of the depositor defendants, Residential Funding Securities, LLC, Residential Funding Company, LLC, and GMAC Mortgage, LLC. Residential Capital and its subsidiaries originate, purchase, sell, and securitize residential mortgage loans primarily in the United States, provide primary and master servicing to investors in residential mortgage loans and securitizations, and provide collateralized lines of credit (referred to as warehouse lending facilities) to other originators.

29. Homecomings Financial, LLC, formerly known as Homecomings Financial Network, Inc., was an affiliate of defendants. Before its lending operations were shut down, it was a Delaware limited liability company with its principal place of business in Minneapolis, Minnesota. It originated loans for securitization by the Residential Funding defendants.

30. The Certificates for each securitization relevant to this action were issued by a trust. The issuing trusts are identified in Exhibit A along with other details regarding Allstate's purchases.

31. At all relevant times, the defendants committed the acts, caused or directed others to commit the acts, or permitted others to commit the acts alleged in this complaint. Any allegation about acts of the corporate defendants means that those acts were committed through their officers, directors, employees, agents, and/or representatives while those individuals were acting within the actual or implied scope of their authority.

JURISDICTION AND VENUE

32. This Court has personal jurisdiction over the defendants because the defendants transact business in Minnesota and because they committed acts in Minnesota causing injury to the plaintiffs.

33. Venue in this Court is proper under Minn. Stat. § 542.09 (2010) because the cause of action arose, in part, in Hennepin County and because defendants Residential Funding Company, LLC, Residential Funding Securities, LLC, Residential Accredit Loans, Inc., Residential Asset Mortgage Products, Inc., Residential Funding Mortgage Securities I, Inc., Residential Funding Mortgage Securities II, Inc., and Residential Asset Securities Corporation reside within this county.

34. On information and belief, based on, among other things, the defendants' principal place of businesses, a majority of the acts giving rise to the claims set forth in this complaint occurred in Minnesota. Specifically, on information and belief: (a) the representations at issue were prepared and/or approved in Minnesota; (b) decisions regarding which loans to securitize were made in and directed from Minnesota; (c) the defendants' underwriting policies and practices were set and implemented in Minnesota; and (d) many of the collateral loans were originated or acquired in Minnesota. Further, on information and belief, many of the key witnesses and documents still reside here in Minnesota.

BACKGROUND

35. ***The Mechanics of Mortgage Securitization.*** Mortgage pass-through securities or certificates represent interests in a pool of mortgage loans; the securities are "shares" in the pool that are sold to investors. The pass-through securities entitle the holder to payments from the pool of mortgages. Although the structure and underlying collateral may vary by offering, the basic principle of pass-through securities remains the same: the cash flow from the pool of

mortgages is "passed through" to the securities holders when payments are made by the underlying mortgage borrowers.

36. The initial step in creating a mortgage pass-through security is the acquisition by a "depositor" of an inventory of loans from a "sponsor" or "seller," which either originates the loans or acquires the loans from other mortgage originators. This "sponsor" of a mortgage-backed security ("MBS") was often created by a financial institution, such as the defendants.

37. Upon acquisition, the depositor transfers, or deposits, the acquired pool of loans to an "issuing trust." The depositor then securitizes the pool of loans in the issuing trust so that the rights to the cash flows from the pool can be sold to investors. The securitization transactions are structured such that the risk of loss is divided among different levels of investment, or "tranches." Tranches consist of multiple series of related securities offered as part of the same offering, each with a different level of risk and reward. Any losses on the underlying loans – whether due to default, delinquency, or otherwise – are generally applied in reverse order of seniority. As such, the most senior tranches of pass-through securities receive the highest credit ratings. Junior tranches, being less insulated from risk, typically obtain lower credit ratings.

38. Once the tranches are established, the issuing trust passes the securities or certificates back to the depositor, who becomes the issuer of the securities. The depositor then passes the securities to one or more underwriters, who offer and sell the securities to investors in exchange for cash that is passed back to the depositor, minus any fees owed to the underwriters.

39. The underwriters, such as defendants, play a critical role in the securitization process by purchasing the securities from the issuing trust through a depositor and then selling

them to investors. Significantly, the underwriters provide the information that potential investors like Allstate use to decide whether to purchase the securities.

40. Because the cash flow from the loans in the collateral pool of a securitization is the source of payments to holders of the securities issued by the trust, the credit quality of the securities depends upon the credit quality of the loans in the collateral pool. The most important information about the credit quality of the loans is contained in the "loan files" that the mortgage originator develops while making the loans.

41. For residential mortgage loans, each loan file normally contains documents including the borrower's application for the loan; verification of the borrower's income, assets, and employment; references; credit reports on the borrower; an appraisal of the property that will secure the loan and provide the basis for measures of credit quality, such as loan-to-value ratios; and a statement of the occupancy status of the property. The loan file also typically contains the record of the investigation by the loan originator of the documents and information provided by the borrower, as well as the detailed notes of the underwriter setting forth the rationale for the making of each loan. Investors like Allstate were not given access to the loan files and they must rely on the representations made by the sponsors and underwriters in the Offering Materials.

42. The collateral pool for each securitization usually includes thousands of loans. Instead of having each potential investor reviewing all of these loan files, the underwriters are generally responsible for gathering, verifying, and presenting to potential investors accurate and complete information about the credit quality and characteristics of the loans that are deposited into the issuing trust. In accordance with industry standards, this involves performing due diligence on the loan pool and the originators to ensure the representations being made to

investors are accurate. Investors, like Allstate, rely on the offering materials to correctly describe the quality and nature of the loans that form the security for their investments.

43. Traditionally, mortgage originators financed their mortgage business through customer deposits, retained ownership of the loans they originated, and directly received the mortgage payment streams. When an originator held a mortgage through the term of the loan, the originator also bore the risk of loss if the borrower defaulted and the value of the collateral was insufficient to repay the loan. As a result, the originator had a strong economic incentive to verify the borrower's creditworthiness through prudent underwriting and to obtain an accurate appraisal of the value of the underlying property before making the mortgage loan.

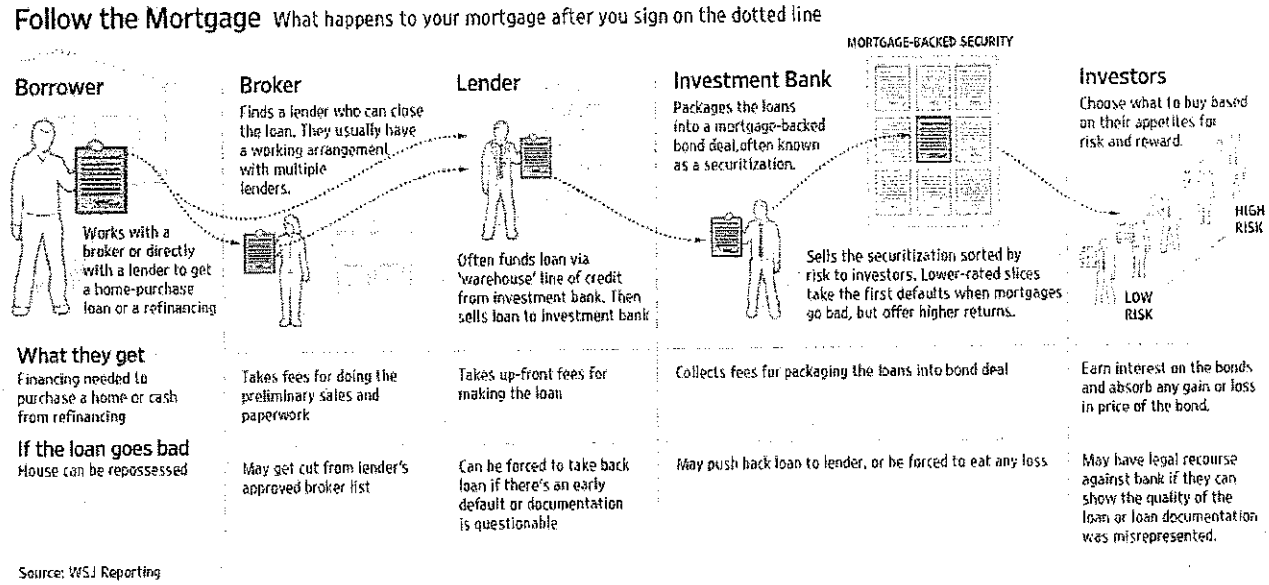
44. Mortgage loan securitization, however, shifted the traditional "originate to hold" model to an "originate to distribute" model, in which originators sell residential mortgages and transfer credit risk to investors through the issuance and sale of RMBS (residential MBS). Under the new model, originators no longer hold the mortgage loans to maturity. Instead, by selling the mortgages to trusts, which provide their securities to investors, the originators obtain the funds to make more loans. Securitization also enables originators to earn most of their income from transaction and loan-servicing fees, rather than from the spread between interest rates paid on deposits and interest rates received on mortgage loans, as in the traditional model. Thus, securitization gives originators an incentive to increase the number of mortgages they issue regardless of credit quality. However, contractual terms, adherence to solid underwriting standards, and good business practices obligate originators to underwrite loans in accordance with their stated policies and to obtain accurate appraisals of the mortgaged properties.

45. Originally, most mortgage securitizations were conducted through the major Government Sponsored Enterprises (the "Agencies"), *i.e.*, the Federal National Mortgage

Association ("Fannie Mae"), the Federal Home Loan Mortgage Corporation ("Freddie Mac"), and the Government National Mortgage Association ("Ginnie Mae"). The Agencies purchased loans from originators and securitized the loans. These Agency securitizations had high credit quality because the Agencies required the underlying loans to be originated in accordance with strict underwriting guidelines. Most non-Agency mortgage securitizations during this period also had relatively high credit quality because they typically complied with the Agencies' underwriting standards.

SUBSTANTIVE ALLEGATIONS

I. THE DEFENDANTS ABUSED THEIR CONTROL OF THE RAPIDLY-EXPANDING SECURITIZATION PROCESS



A. Evidence of a Rise in Securitization Volume Leading to a Decline in Underwriting Standards

46. The FCIC "reviewed millions of pages of documents, interviewed more than 700 witnesses, and held 19 days of public hearings in New York, Washington, D.C., and communities across the country." In the resulting January 2011 report, the FCIC stated (at xvi):

> In this report, we detail the events of the crises . . . [I]t was the collapse of the housing bubble – fueled by low interest rates, easy and available credit, scant regulation, and toxic mortgages – that was the spark that ignited a string of events, which led to a full-blown crises in the fall of 2008. Trillions of dollars in risky mortgages had become embedded throughout the financial system, as mortgage-related securities were packaged, repackaged, and sold to investors around the world.

47. The report noted (at 22-23): "[I]t has been estimated that ultimately as many as 13 million households in the United States may lose their homes to foreclosure." Already, according to the report, "four million families have lost their homes to foreclosure and another four and a half million have slipped into the foreclosure process or are seriously behind on their mortgage payments."

48. As above, in a securitization, mortgages are aggregated, then securities are sold that are backed by the resulting mortgage pools. The cash flows from the pooled loans, in the form of payments of interest and principal, are used to make payments on the securities. The purchase of each Certificate here was thus the purchase of a right to participate in the cash flows generated by the pool of Mortgage Loans. The *Wall Street Journal* has summarized the securitization process as follows:

49. Also as above, traditional securitizations were primarily done in conjunction with the government-sponsored entities Fannie Mae and Freddie Mac. Those entities limited the types of loans that could be securitized through them, and their perceived government backing simultaneously lowered the risk.

50. In the early 2000s, as interest rates at historic lows were pushing down the profits of traditional lending and even securitization through Fannie Mae or Freddie Mac, banks began to look for ways to increase the fees they could generate. Banks, lenders, and securitizers began increasingly focusing on creating products outside the traditional lending guidelines, expanding the number of borrowers who could purportedly qualify for loans while also enabling themselves

to charge those borrowers much higher fees than they would have realized on conforming loan terms.

51. For instance, Confidential Witness 2 ("CW2") worked as a director of GMAC RFC Securities for three years, until 2005. According to CW2, in the 2004-2005 time frame, "people were very focused on increasing volume production," and not much else. "Every year was projected to be a record year." The only way to achieve those projections, according to CW2, was to "loosen the underwriting guidelines." According to CW2, people at GMAC RFC Securities "didn't see the forest for the trees."

52. Similarly, Confidential Witness 4 ("CW4") was a Senior Underwriter at GMAC from 1997 to 2008. According to CW4, GMAC was "always being compared to Countrywide" and "we wanted to be number one," and so GMAC "did what Countrywide did" to keep up with this main competitor.

53. A larger perceived potential borrower base and higher profits per borrower created a huge incentive to increase lending volume. The number of loans issued on terms riskier than those that could be securitized through Fannie Mae or Freddie Mac skyrocketed. For instance, according to an April 7, 2010 report by the FCIC, non-conforming loans went from around $670 billion in 2004 to over $2 trillion in 2006. The same report indicates that Residential Funding Corporation was the eighth-largest sponsor of non-agency mortgage-backed securities in 2007.

54. Such a huge increase in mortgage volume in a short period of time also created the problem of where the money to actually fund those loans would come from, and who would bear the risk. As the FCIC put it in its January 2011 report (at 7): "under the radar, the lending and financial services industry had mutated." It found (at 70) that "[s]ecuritization and subprime

origination grew hand in hand," as (at 125) "[t]he nonprime mortgage securitization process created a pipeline through which risky mortgages were conveyed and sold throughout the financial system. The pipeline was essential to the origination of the burgeoning numbers of high-risk mortgages."

55. In other words, simultaneous with a shift away from non-traditional loans was a focus on an "originate and distribute" business model. In a traditional "originate and hold" business model, the lender is economically vested in establishing the creditworthiness of the borrower and the true value of the underlying property, as it would be stuck with any resulting losses. In an "originate and distribute" model, the incentives are vastly different. The risk of non-payment was transferred to the investors, and thus the only incentive for the originators, underwriters, and others in the securitization chain was to pump out as many loans as possible, the more exotic (and thus the higher-fees) the better – as long as they could be sold. The defendants were willing to abandon sound underwriting practices because they were routinely placing the risk onto investors like Allstate by misrepresenting the resulting loans to ensure their marketability. As the FCIC concluded (at 125): "The originate-to-distribute model undermined responsibility and accountability for the long-term viability of the mortgages and mortgage-related securities and contributed to the poor quality of mortgage loans."

56. Because the underlying loans were on non-traditional terms, the banks could offer investors higher rate of returns on the securitized pools even as the deal's structure (such as, for instance, including "extra" Mortgage Loans in the collateral pool) purportedly made the investments safe. Unknown to investors like Allstate, however, they were in fact much riskier because the defendants misrepresented many aspects of the Mortgage Loans. For instance, though the defendants may have disclosed that the loan pool included adjustable-rate mortgages

(which may be riskier than fixed-rate as the borrower may be unable to afford his or her monthly payment should interest rates rise), they overstated how many loans were owner-occupied (owner-occupied properties have lower risks), understated the loan pools' average loan-to-value ratios (suggesting the owners had more of an equity "cushion" than they did), misrepresented the amount of verification of the borrower's assets and income that had been done (understating the risk that the borrower could not actually afford the monthly payments), and omitted to inform Allstate about the high number of rejected loans that were "waived" in by the underwriters (making representations regarding the quality of the underwriting process even more misleading).

57. Each misrepresentation and omission created an additional, hidden layer of risk well beyond that known to be associated with an "adjustable rate mortgage" or a "home equity loan" in the abstract. In short, by misrepresenting the true risk profile of the loan pools, the defendants defrauded investors like Allstate into accepting the risks created by the defendants' shoddy lending and underwriting practices. A managing director of a financial services analyst quoted in the FCIC's report (at 6) described the financial products created at this time as being a lot like "cheap sangria," "[a] lot of cheap ingredients repackaged to sell at a premium . . . it might taste good for a while, but then you get headaches later and you have no idea what's really inside."

58. The FCIC report summarized (at 28, emphasis added):

> [W]e follow the profound changes in the mortgage industry, from the sleepy days when local lenders took full responsibility for making and servicing 30-year loans to a new era in which the idea was to sell the loans off as soon as possible, so that they could be packaged and sold to investors around the world. New mortgage products proliferated, and so did new borrowers. ***Inevitably, this became a market in which the participants – mortgage brokers, lenders, and Wall Street firms – had a greater stake in the quantity of mortgages signed up and sold than in their quality.***

59. The perverse incentives created by the move to "originate and distribute" did not just operate on an entity level, but flowed down to the individual decisionmakers within the defendants. The FCIC's January 2011 report noted (at 6) that "[b]ondsalesman earned multi-million dollar bonuses packaging and selling new kinds of loans, offered by new kinds of lenders, into new kinds of investment products that were deemed safe but possessed complex and hidden risks." It also found (at 64) that "[c]ompensation structures were skewed all along the mortgage securitization chain."

60. In a section discussing "employee compensation," the chair of the FDIC provided a statement to an investigative panel in January 2010 that:

> The standard compensation practice of mortgage brokers and bankers was based on the volume of loans originated rather than the performance and quality of the loans made. From the underwriter's perspective, it was not important that consumers be able to pay their mortgages when interest rates reset . . . . The long-tail risk posed by these products did not affect mortgage brokers and bankers' incentives because these mortgages were sold and securitized. The lack of a downside in these compensation schemes ultimately hurt both those who could not pay their risky mortgages and the economy.

61. The testimony of CW4 similarly confirms here that GMAC loan officers, executives, and even the underwriters had compensation packages tied to loan volume.

62. To make matters worse, the FCIC found (at 14) that the explosion also created a surging demand for people to carry out the paperwork – a void that was filled, according to a study cited by the FCIC, with thousands of newly-minted "mortgage brokers" with criminal records, including thousands with convictions for fraud, racketeering, and extortion. The FCIC also found (at 162) that "despite the underreporting" of fraud, there was a 20-fold increase in "suspicious activity reports" related to mortgage fraud between 1996 and 2006, numbers that kept climbing during the time the Mortgage Loans at issue here were originated.

63. In short, as summarized by the President's Working Group in March 2008, there was a "significant erosion of market discipline by those involved in the securitization process . . . related in part to failures to provide . . . adequate risk disclosures." It also found that the "turmoil in the financial markets was triggered by a dramatic weakening of underwriting standards for U.S. subprime mortgages . . ." Similarly, the Comptroller of Currency's written statement for a Special Seminar on International Banking and Finance in November 2009 stated that a lethal combination of poor practices "produced, on a nationwide scale, the worst underwritten mortgages in our history." And the FCIC's January 2010 report concluded (at 101) that "there was untrammeled growth in risky mortgages. ***Unsustainable, toxic loans polluted the financial system and fueled the housing bubble.***" (Emphasis added.)

B. <u>The Defendants' Control Over the Vertically-Integrated Process</u>

64. The defendants and their affiliates controlled, and thus had actual knowledge of or were indifferent to the truth or falsity about, every aspect of the securitization process, from loan origination through sale to Allstate. In particular, the defendants controlled every aspect of originating and servicing the underlying Mortgage Loans, providing them with unique and special knowledge regarding the characteristics of the Mortgage Loans and the quality of the underwriting and servicing practices. The defendants also acquired and pooled the mortgage loans, created the securities, and marketed and sold the Certificates at issue using purported disclosures that were wrongful and fraudulent. On information and belief, the fraudulent representations and omissions took place in and/or were directed from Minnesota. All but one of the defendants had their principal place of business in Minnesota.

a. Many of the Mortgage Loans came from the defendants' affiliates. Every Certificate was backed in part by loans from Homecomings Financial, GMAC Mortgage LLC, or

GMAC Bank (an affiliate of GMAC Mortgage LLC). According to the Offering Materials, such affiliated originators were often the single largest source of Mortgage Loans:

Asset	Percent of Affiliated Loans
RALI 2005-QA2	15%
RALI 2005-QS6	65.5%
RALI 2006-QO3	47.6%
RALI 2006-QS14	36.9%
RALI 2007-QH6	43.0%
RAMP 2004 RZ4	42.1%
RAMP 2004-RZ2 Gr. I/II	28.3%/19.1%
RAMP 2005-RS4	24.1%
RAMP 2006-RS3	85.5%
RAMP 2006-RZ3	100%
RASC 2005-KS3	35.2%
RASC 2005-KS4	36.6%
RFMSI 2005-S8	33.2%
RFMSI 2006-S6	39.4%
RFMSII 2005-HI3	7.7%
RFMSII 2005-HS1	7.9%
RFMSII 2005-HS2 Gr. I/II	9.5%/42.3%
RFMSII 2005-HSA1 Gr. I/II	10.8%/41.0%
RFMSII 2006-HI4	43.5%
RFMSII 2006-HI5	21.3%
RFMSII 2007-HI1	18.8%
RFMSII 2007-HSA2	22.4%
RFMSII 2007-HSA3 Gr. I/II	34.9%/40.3%
GMACM 2005-HE1	75.68%
GMACM 2006-HE3	100%

b. Defendants or their affiliates acted as the sponsor, seller, and servicer for the loans underlying the securities. GMAC Mortgage LLC was sponsor, seller, and servicer for GMACM 2005-HE1 and GMACM 2006-HE3, with Residential Funding Company, LLC assuming these roles for the remaining Certificates. Defendants first obtained the Mortgage Loans from originators or sellers, including from its affiliates, as described above. Defendants then pooled the Mortgage Loans in the securitizations and conveyed those loans to the Depositor pursuant to Pooling and Servicing Agreements. The Pooling and Servicing Agreements also

established defendants or their affiliates as Master Servicer of the Mortgage Loans underlying each security.

c. Defendants or their affiliates were underwriters for many of the securities marketed and sold to Allstate. Residential Funding Securities, LLC was co-underwriter for seventeen of the twenty-five offerings at issue here. In that role, it shared responsibility for underwriting and managing the securitizations' sale of Certificates to Allstate and other investors, including screening the Mortgage Loans for compliance with the defendants' underwriting guidelines.

d. Residential Accredit Loans, Inc., Residential Asset Mortgage Products, Inc., Residential Funding Mortgage Securities I, Residential Funding Mortgage Securities II, and Residential Asset Securities Corporation were the Depositors for the offerings. The Depositors purchased the Mortgage Loans, including large amounts of the Mortgage Loans from defendants' affiliates as above, pursuant to the Pooling and Servicing Agreements. The Depositors then conveyed the Mortgage Loans to the Trustees, which held the Mortgage Loans in the Trusts for the benefit of Allstate and other Certificateholders. The Depositors then issued the Certificates, which represent interests in the Mortgage Loans held by the Trusts, to Allstate and other investors. The Depositors, Sellers, and Underwriters marketed and sold the Certificates to investors such as Allstate. The Certificates were sold in classes according to their expected credit ratings, and were expected to provide interest on the income stream generated by the Mortgage Loans in the collateral pools. The Depositors were established as limited-purpose finance subsidiaries of the other defendants.

65. Defendants' involvement in and control over each aspect of the securitization process provided them with unique and special knowledge and expertise regarding the

application of any purported standards or procedures for originating, acquiring, underwriting, and servicing the Mortgage Loans, as well as the loan characteristics of the loan pools securing each Certificate at issue.

II. THE DEFENDANTS' MATERIAL MISREPRESENTATIONS AND OMISSIONS

66. The Offering Materials made repeated representations regarding the risk profile of the Mortgage Loans. Because payments to investors are based on the stream of payments from borrowers, if enough loans in the pool default, investors will not be paid the interest returns promised and may even lose their principal. The market value for the Certificates also decreases as the perceived risk of the underlying pool increases, because the prospects for eventually receiving a full payment stream over the life of the investment decreases. As such, any representation bearing on the riskiness of the underlying Mortgage Loans was material to investors, including Allstate.

67. The Offering Materials for each of the securitizations at issue here had similar representations to those highlighted below. A larger sample of the representations on which Allstate relied are found in Exhibits D through BB.

A. The Defendants' Misrepresentations Regarding Underwriting Guidelines

68. Proper underwriting of the Mortgage Loans underlying Allstate's Certificates was material to Allstate because, as discussed above, the quality of loans in the pool determines the risk of the certificates backed by those loans. If a reasonable underwriting process was not actually followed, the chances that the loans had riskier features than the defendants claimed greatly increased, making the entire loan pool much riskier. A systemic underwriting failure would decrease the reliability of *all* the information investors had about the loans, and thus would significantly increase the perceived and actual risk to investors, while materially decreasing the value of the Certificates.

69. The Offering Materials all represented that the Mortgage Loans had been vetted to ensure that they had been originated according to a reasonable, consistent underwriting program. For example, the Offering Materials for RALI 2006-QS14 represented: "All of the mortgage loans in the mortgage pool were originated in accordance with the underwriting criteria of Residential Funding . . . Residential Funding will review each mortgage loan for compliance with its underwriting standards prior to purchase." It also represented that the "applicable underwriting standards include a set of specific criteria by which the underwriting evaluation is made. . . ." Further similar representations for each Certificate are set forth in Exhibits D through BB.

70. These representations were false. As confirmed by a statistical analysis of the Mortgage Loans at issue here, information provided by confidential witnesses, a review of the defendants' loan files by their own insurer, and other facts referenced below, the guidelines were systematically ignored.

B. The Defendants' Misrepresentations Regarding Due Diligence Results

71. The defendants' representations regarding the underwriting process would be understood by any reasonable investor, including Allstate, to mean that non-compliant loans would not be included in the mortgage pools. Indeed, the underwriting disclosures would be pointless if read to mean only that the some (but not all) of a pool of loans met the given standards, but the defendants approved all the loans together for securitization, including many that failed the applicable standards.

72. The loan pools were subject to review by defendants and/or third-party due diligence firms. The defendants, however, did not disclose that: (1) the defendants were informed from those loan-level review processes that a substantial percentage of loans in the collateral pools were defective; (2) the defendants and other underwriters nonetheless had

waived the defects as to a substantial percentage of these loans; (3) underwriters had instead used the due diligence reports to negotiate a lower price for the loan pools, while retaining the toxic loans for inclusion in the loan pools; and (4) the defendants improperly failed to adjust their investigations (such as by increasing their sampling size or refusing to continue to work with problem originators) given the high number of non-conforming loans the due diligence process had in fact identified.

73. That defendants were including loans that their due diligence procedures had flagged as being defective has been confirmed by information provided by confidential witnesses, by the recent release of documents from the defendants' third-party due diligence firm, Clayton Holdings, and other facts set forth below.

74. The defendants' failure to disclose that high numbers of loans had been rejected by the due diligence process, yet "waived" into the collateral pools anyway, was a fraudulent omission, and rendered the disclosures regarding underwriting even more misleading.

C. The Defendants' Misrepresentations Regarding Case-by-Case Underwriting Exceptions

75. Whether the defendants and those from which defendants were purchasing its loans were making case-by-case (rather than bulk) exceptions to the otherwise-applicable underwriting guidelines was material to Allstate and other investors. A disclosed guideline is factually irrelevant – and indeed misleading – from a risk-analysis perspective if large numbers of loans were excused from those standards.

76. The defendants represented that they made only case-by-case exceptions to the disclosed underwriting standards, based on compensating factors that increased the quality of a loan application. For example, the Offering Materials for RALI 2006-QA14 represented that "[a] mortgage loan may be considered to comply with the underwriting standards described

above, even if one or more specific criteria included in the underwriting standards were not satisfied, if other factors positively compensated for the criteria that were not satisfied." And the Offering Materials for RFMSII 2006-HI4 represented that "normally, in order to be eligible for a reduced loan documentation program, a borrower must have a good credit history, and other compensating factors, including a relatively low combined LTV ratio or other favorable underwriting factors, must be present." Further similar representations for each Certificate are set forth in Exhibits D through BB.

77. These representations were false. As confirmed by, among other things, a review of the defendants' loan files by their own insurer, underwriting "exceptions" were not given based on any positive compensating factors. This is further supported by a statistical analysis of the Mortgage Loans at issue here, and other facts referenced below.

D. The Defendants' Misrepresentations Regarding Owner-Occupancy Statistics

78. Owner-occupancy statistics were material to Allstate because high owner-occupancy rates should have made the Certificates safer investments than certificates backed by second homes or investment properties. Homeowners who reside in mortgaged properties are less likely to default than owners who purchase homes as investments or vacation homes.

79. The Offering Materials contained detailed statistics regarding the Mortgage Loans in the collateral pool, including the reported owner-occupancy characteristics of the Mortgage Loans. For example, in the Offering Materials for RALI 2007-QH6, it was claimed that among the 1,549 loans, 1,282 were purportedly owner-occupied properties. Further similar representations for each Certificate are set forth in Exhibits D through BB.

80. These representations were false. In truth, a much lower percentage of the loans were owner-occupied. Occupancy was being misrepresented first to get the borrower approved for the loan, then being misrepresented to investors to get the loan sold. A material amount of

the loans were not in fact owner-occupied, and the defendants omitted that the given statistics were (due to their abandonment of their underwriting standards) baseless. This is evidenced by a statistical analysis of the Mortgage Loans at issue here, and other facts described below.

E. The Defendants' Misrepresentations Regarding Loan-to-Value Ratios

81. The loan-to-value ("LTV") ratio is the ratio of a mortgage loan's original principal balance to the appraised value of the mortgaged property. The related Combined LTV ("CLTV") takes into account other liens on the property (such as "second" mortgage and home equity loans). These ratios were material to Allstate and other investors because higher ratios are correlated with a higher risk of default. A borrower with a small equity position in a property has less to lose if he or she defaults on the loan. There is also a greater likelihood that a foreclosure will result in a loss for the lender if the borrower fully leveraged the property. These are common metrics for analysts and investors to evaluate the price and risk of mortgage-backed securities.

82. The Offering Materials contained detailed statistics regarding these ratios for the Mortgage Loans in the collateral pool. For example, the Offering Materials for RALI 2007-QH6 represented that the weighted-average loan-to-value ratio at origination was 73.89%. Similarly, the Offering Materials for RFMSII 2005-HS2 represented that no loan had a CLTV ratio greater than 100%. Further similar representations for each Certificate are set forth in Exhibits D through BB.

83. These representations were false. The underlying data was being manipulated in order to get loans approved, making the LTV and CLTV ratios baseless. The defendants did not genuinely believe the appraisal values used in these statistics because they knew that the property values were being artificially inflated in order to increase the amount of money that could be given to a borrower. The defendants had access to detailed information about the borrowers and

about all the loans the borrowers were receiving. The CLTV ratios also omitted the effect of additional liens on the underlying properties, rendering them even further from the truth. The defendants also misleadingly omitted that the disclosed statistics were baseless and that the appraisers were systematically pressured to inflate their appraisals. Thus, the defendants knew that the LTV and CLTV ratios were false and misleading. This is confirmed not only by the statements of a confidential witness who worked within GMAC and testimony showing widespread appraisal fraud, but by a loan-level analysis of the specific Mortgage Loans at issue here, and other facts set forth below.

F. The Defendants' Misrepresentations Regarding the Sufficiency of Borrower Income

84. The sufficiency of a borrower's income to cover the mortgage payments is of facial importance to investors. One way this is measured is through the use of debt-to-income ratios. The Offering Materials represented that the underwriting process was designed to ensure that borrowers could afford the loan, and often made specific representations as to the borrower's debt-to-income ratios.

85. For example, the Offering Documents for RALI 2006-QA14 represented that mortgagers were generally (subject to limited exceptions) required to furnish "information regarding its assets, liabilities, income . . . , credit history and employment history, and to furnish an authorization to apply for a credit report . . ." Based on all of this data, "a determination" was to be made "that the mortgagor's monthly income" was sufficient to "meet its monthly obligations on the mortgage loan and other expenses related to the property, including property taxes, utility costs, standard hazard insurance and other fixed obligations." And the Offering Materials for GMACM 2005-HE1 represented that the weighted debt-to-income ratio was 38%,

and the loans were generally originated with a maximum ratio of 45%. Further similar representations for each Certificate are set forth in Exhibits D through BB.

86. These representations were false. The abandonment of sound underwriting practices facilitated the widespread falsification of these statistics within the Offering Materials. This abandonment is evidenced by all the facts set forth below, including Allstate's statistical analysis into the loans at issue here and statements provided by a confidential witness. In reality, the borrowers' claimed income was regularly inflated, such that the true debt-to-income ratios were materially higher than they were represented to be. As the defendants systematically abandoned their underwriting guidelines, the representations were baseless. Their falsity is confirmed by a review of the defendants' loan files by their own insurer, and is further confirmed by the rising delinquency rates for the Mortgage Loans, which shows borrowers were put into loans they could not afford.

G. The Defendants' Misrepresentations Regarding Credit Enhancements

87. Credit enhancement represents the amount of "cushion" or protection from loss exhibited by a given security. This cushion is intended to improve the likelihood that holders of highly-rated certificates receive the interest and principal they expect. The level of credit enhancement offered is based on the make-up of the loans in the underlying collateral pool. Riskier pools necessarily need higher levels of credit enhancement to ensure payment to senior certificate holders. Credit enhancements for a given trust also impact the overall credit rating a given tranche of certificates receives. The level of credit enhancement for the Certificates was material to Allstate because it represented the protection purportedly afforded from loss.

88. The Offering Materials represented that the Certificates had certain credit enhancements used to improve the likelihood that holders of such certificates would receive regular principal and interest payments thereon. For instance, the Offering Documents for RALI

2006-QO3 represented that "Credit enhancements for the offered certificates consists of: excess cash flow; overcollateralization; and subordination." And the Offering Materials for RFMSII 2005-HS2 represented: "Credit enhancements for the term notes consists of: excess interest; overcollateralization; and two financial guaranty insurance policies . . ."

89. "Excess cash flow," "excess interest," and "overcollateralization" all generally refer to the purported affects of including in the collateral pool more mortgage loans than would be strictly necessary to pay off all investors, assuming that every borrower made every payment on time. "Subordination" refers to the fact that, should loans become delinquent or default, not all investors are treated equally. Rather, generally, certain investors are paid out of what funds are available despite those losses first. Any leftover funds from what was actually received then "waterfall" into the next class of investors, and so on.

90. The representations regarding the purported credit enhancements were untrue and misleading. All of the purported "enhancements" depended on or derived from the false representations regarding the quality of the Mortgage Loans underlying the Certificates. Highly risky, misrepresented loans piled on top of other highly risky, misrepresented loans is not a true "enhancement" as represented.

H. The Defendants' Misrepresentations Regarding Credit Ratings

91. Each of the Certificates received a rating purportedly indicating the rating agencies' view of the risk profile of the securities. The initial and current ratings given to each Certificate are contained in Exhibit C. The ratings were material to reasonable investors, including Allstate, because the ratings provide additional assurances that the investors would receive the expected interest and principal payments. But for the provision of these ratings, the Certificates would have been unmarketable to many institutional investors such as Allstate, and likely would not have been issued.

92. The Offering Materials represented that the rating agencies conducted an analysis designed to assess the likelihood of delinquencies and defaults in the underlying mortgage pools. For example, the Offering Materials for RALI 2006-QA14 represented: "When issued, the offered certificates will receive ratings which are not lower than those listed in the table . . . The ratings on the offered certificates address the likelihood that holders of the offered certificates will receive all distributions on the underlying mortgage loans to which they are entitled." Further similar representations for each Certificate are set forth in Exhibits D through BB.

93. These representations were false and misleading. Unknown to Allstate, the rating agencies were fed baseless and false statistics regarding the loans (including the same statistics and other representations discussed herein), as evidenced by a statistical analysis of the Mortgage Loans at issue here. This made representations regarding the ratings process false (as a rigged process is not designed to "address the likelihood that holders" would receive distributions), and rendered the "ratings" themselves similarly false and misleading (as they only represented the credit rating agencies' analysis of a non-existent mortgage pool that had no relation to that truly underlying Allstate's Certificates).

I. Documentary Basis for the Loan Approval

94. Whether the information in a loan file was fully documented, or whether it was instead approved pursuant to a reduced or no-documentation procedure, was material to Allstate. Reduced-documentation loans are riskier because the borrower provides less substantiating information for criteria such as his or her income and assets. With less confirmation, it is more likely that there are errors or misrepresentations in the loan file.

95. The Offering Materials contained detailed statistics regarding the documentation procedures purportedly used for the Mortgage Loans. For example, the Offering Materials for RFMSII 2006-HI4 represented that 5,223 of the 5,513 loans were based on "full documentation,"

while only 16 were based on "no documentation." Further similar representations for each Certificate are set forth in Exhibits D through BB.

96. These representations were false. A review by the defendants' own insurer found many files incomplete, and Residential Funding itself has accused its originators of using incomplete loan files.

III. EVIDENCE THAT ALL OF THE DEFENDANTS' REPRESENTATIONS WERE UNTRUE AND MISLEADING

97. The Mortgage Loans were not originated according to the underwriting standards disclosed in the relevant Offering Materials. Instead of focusing on assessing an applicant's credit standing and repayment ability, the defendants subordinated loan quality to the goal of originating and securitizing as many loans as possible to generate fees in the secondary mortgage market. That the disclosed underwriting standards were systematically ignored rendered all of the above representations false or misleading at the time they were made.

98. The representations regarding the underwriting processes, underwriting quality, loan selection, and use of exceptions were untrue. The loans did not comply with the underwriting standards the Offering Materials described, as those standards were systemically ignored. In originating or acquiring the loans, the defendants ignored borrowers' actual repayment ability and the value and adequacy of mortgaged property used as collateral in issuing loans. Systematic, bulk exceptions were used without consideration of any compensating factors. The defendants also misleadingly omitted that the defendants were systematically abusing "exceptions" in order to further circumvent their purported underwriting standards.

99. The defendants' representations regarding the underwriting and due diligence processes were made even more misleading by their fraudulent omission of information

regarding the number of rejected loans that that process did identify, and the high number of such loans that were "waived" into the collateral pools anyway.

100. The representations regarding owner-occupancy and the sufficiency of the borrower's income were untrue. The abandonment of sound underwriting practices facilitated the widespread falsification of these statistics within the Mortgage Loans. In reality, a far greater percentage of properties were not owner-occupied, and the borrowers' claimed income was regularly inflated. The defendants also failed to disclose that the representations were baseless.

101. The representations regarding loan-to-value and combined loan-to-value ratios were untrue. The defendants did not genuinely believe the appraisal values used in these statistics because they knew that the property values were being artificially and baselessly inflated in order to increase the amount of money that could be given to a borrower. The CLTV ratios also omitted the effect of additional liens on the underlying properties, rendering them even further from the truth. Additionally, the defendants misleadingly omitted that the disclosed statistics were baseless and that appraisers were systematically pressured to inflate their appraisals.

102. The representations regarding the purported credit enhancements were untrue and misleading. All of the purported "enhancements" depended on or derived from the (false) representations regarding the quality of the Mortgage Loans. Highly risky, misrepresented loans piled on top of other highly risky, misrepresented loans is not a true "enhancement" as represented. Even representations regarding the presence of such enhancements as insurance or similar agreements with third parties was misleading, in that the defendants' fraudulently omitted to disclose that, on information and belief, they procured those contracts making similar

misrepresentations as the defendants made to Allstate, calling into doubt whether their terms will ultimately be honored.

103. The representations regarding the credit ratings were also untrue. The defendants fed baseless loan statistics to the credit rating agencies, essentially pre-determining the ratings that would be given. The use of baseless statistics also made representations about the ratings process being designed to assess credit risk false, as the entire ratings process was rigged from the start through the use of incorrect data. The defendants thus did not genuinely believe that the ratings the agencies assigned to these Certificates reflected their actual risk.

A. Evidence of the Securities' High Default Rates and Plummeting Credit Ratings

104. The drastic rise in default rates on the Mortgage Loans underlying Allstate's Certificates is itself cogent evidence of faulty underwriting. Absent fraud, even in the face of a mortgage crisis, true AAA paper with adequate credit protection should not have experienced the drastic loss in value that was experienced by most of the Certificates.

105. Even though the Certificates were supposed to be long-term, stable investments, just years after their issuance, the underlying Mortgage Loans have already shown serious deterioration in performance. For instance, for RALI 2007-QH6, ***55% of the loans from the original pool have either already had to be written off at a loss or are currently delinquent.*** Similarly, for RAMP 2006-RS3, RAMP 2006-RZ3, RFMSII 2007-HSA2, and RFMSII 2007-HSA3, ***over 40% of the loans from each deal's original pool have either already had to be written off at a loss or are currently delinquent.***

106. Overall, approximately ***24% of the original Mortgage Loans have already had to be written off at a loss***, and of the remaining loans, approximately ***25% are currently delinquent.***

107. Relatedly, the ratings given to the Certificates have significantly deteriorated. Most of Allstate's investments initially received the highest possible ratings – S&P's AAA rating or their equivalent from the other rating agencies. According to S&P's website: "An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong." Moody's similarly describes its highest rating, Aaa, as meaning that the investment is "judged to be of the highest quality, with minimal credit risk." These are the same ratings typically given to bonds backed by the full faith and credit of the United States government, such as treasury bills. Historically, an AAA rated security had an expected loss rate of less than .05%.

108. Because of the high delinquency and default rates and other factors, most of Allstate's Certificates have been downgraded from the highest possible ratings to junk-bond ratings. ***Despite two-thirds of the purchases being for Certificates that had the same rating given to treasury bills (i.e., AAA), currently over 75% of the purchases are backed by Certificates currently rated by at least one of the major agencies as being non-investment grade***. Indeed, ***over half have fallen even further***, falling into the "C" and "D" ranges of the agencies' scales. According to S&P's website, far from having the "extremely strong capacity" to meet commitments required by AAA-rated investments, instead these ratings now indicate that the Certificates are "***currently vulnerable*** and dependent on favorable business, financial and economic conditions to meet financial commitments."

109. The ratings history for the Certificates is set forth in Exhibit C. Most downgrading actions take place after March 2008, and the most serious downgrades (i.e., to non-investment grade) did not take place until mid-2008 or later.

110. The drastic rise in default rates on the Mortgage Loans underlying Allstate's Certificates reflects the defendants' faulty underwriting. The Certificates were supposed to be long-term, stable investments, yet they have already experienced payment problems significantly beyond what was expected for loan pools that were properly underwritten and that contained loans that actually had the characteristics the Offering Materials claimed.

111. It is usually a large and unexpected disruption to a borrower's income that causes an actual payment default. In a properly underwritten pool of loans, one would thus not expect to see a large spike of defaults occurring shortly after origination, since it is unlikely that many borrowers would all incur a sudden and unexpected change to their payment ability so soon after purchasing a home.

112. Indeed, economic studies have confirmed that high default rates early in a loan's life are highly correlated with misrepresentations in the loan files. This makes sense – as borrowers are put in loan products they cannot actually afford, they quickly and predictably fall behind on their payments. For instance, the F.B.I. studied three million residential mortgages that found that between ***30% and 70% of early payment defaults were linked to significant misrepresentations in the original loan applications***. Loans containing egregious misrepresentations were ***five times*** as likely to default in the first six months than loans that did not. The FCIC's "examination found [at xxii], according to one measure, that the percentage of borrowers who defaulted on their mortgages within just a matter of months after taking a loan ***nearly doubled from the summer of 2006 to late 2007***. This data indicates they likely took out mortgages that they ***never had the capacity or intention to repay***." (Emphasis added).

113. In short, the dismal performance of the Mortgage Loans is itself strong evidence that they were improperly underwritten, and that they did not have the credit risk characteristics

the Offering Materials claimed. The defaults and related drop in value thus are due to the defendants' wrongdoing, and not due to the general change in economic conditions.

B. Loan-Level Evidence That Borrowers Did Not Actually Occupy the Mortgage Properties as Represented

114. As above, the defendants repeatedly represented that the loan pools underlying the Certificates had high percentages of loans issued to borrowers that were living in the mortgaged properties. The Certificates here were in fact backed by Mortgage Loans that had a far higher percentage of non-owner occupied properties.

115. According to a January 2011 *Business Week* report, loan files often misrepresented the owner-occupancy status of the mortgaged properties. The study, which looked at a loan's history for 16 months before labeling it "misreported," found that 23% of mortgages that were securitized as being "owner occupied" were either never moved into or were quickly vacated by the borrower.

116. Allstate need not rely solely on such industry-wide studies to support its allegation that the Mortgage Loans here were misrepresented. Allstate selected a random sample of the specific loans underlying the Certificates here to test the defendants' representations on a loan-level basis. Using techniques and methodologies that only recently became available to investors, Allstate conducted loan-level analyses on over 30,000 Mortgage Loans underlying its Certificates.

117. For each offering tested, Allstate attempted to analyze 800 defaulted loans and 800 randomly-sampled loans from within the collateral pool. Where the loan pool contained fewer than 1,600 loans, Allstate tested every loan associated with that transaction.

118. These sample sizes are more than sufficient to provide statistically-significant data to demonstrate the degree of misrepresentation of the Mortgage Loans' characteristics.

Analyzing data for each Mortgage Loan in each Offering would have been cost-prohibitive and unnecessary for purposes of Allstate's complaint. Statistical sampling is an accepted method of establishing reliable conclusions about broader data sets, and is routinely used by courts, government agencies, and private businesses. As the size of a sample increases, the reliability of its estimations of the total population's characteristics increase as well. Experts in RMBS cases have found that a sample size of just 400 loans can provide statistically significant data, regardless of the size of the actual loan pool, because it is unlikely that so large a sample would yield results vastly different from results for the entire population.

119. To determine whether a given borrower actually occupied the property as claimed, Allstate investigated tax information for the sampled loans. One would expect that a borrower residing at a property would have the tax bills sent to that address, and would take all applicable tax exemptions available to residents of that property. If a borrower had his or her tax records sent to another address, that is good evidence that that borrower was not actually residing at the mortgaged property. If a borrower declined to make certain tax exemption elections that depend on the borrower living at the property, that also is strong evidence the borrower was living elsewhere.

120. A review of credit records was also conducted. One would expect that people have bills sent to their primary address. If a borrower was telling creditors to send bills to another address, even six months after buying the property, it is good evidence the borrower was living elsewhere.

121. A review of property records was also conducted. It is less likely that a borrower lives in any one property if in fact that borrower owns multiple properties. It is even less likely

the borrower resides at the mortgaged property if a concurrently-owned separate property did not have its own tax bills sent to the property included in the mortgage pool.

122. A review of other lien records was also conducted. If the property was subject to additional liens but those materials were sent elsewhere, that is good evidence the borrower was not living at the mortgaged property. If the other lien involved a conflicting declaration of residency, that too would be good evidence that the borrower did not live in the subject property.

123. Though the availability to gather such information for large numbers of loans and run these tests was only recently made available to investors like Allstate, these tests draw from data contemporaneous with the transactions at issue. They thus are evidence that a then-existing fact – owner occupancy – was misrepresented. Further, even though this recently-available technique draws on contemporaneous information, and thus provides a robust 'test' of the defendants' representations for pleading purposes – it still does not represent the level of information that was uniquely in defendants' control, such as the loan files. As above, Allstate did not and does not have access to the loan files.

124. The results of Allstate's loan-level analysis of true owner-occupancy rates on the Mortgage Loans underlying its Certificates are set forth below and are further detailed in Exhibits D through BB. Failing multiple of the above tests is strong evidence the borrower did not in fact reside at the mortgaged properties. These statistics thus show that, despite the defendants' representations, a much higher percentage of borrowers did not occupy the mortgaged properties:

Asset	Percentage of Owner-Occupied Properties in Prospectus	Actual Percentage of Owner-Occupied Properties	Prospectus Overstatement
RALI 2005-QA2	81.5%	71.3%	10.2%
RALI 2005-QS6	67.3%	57.0%	10.3%

Asset	Percentage of Owner-Occupied Properties in Prospectus	Actual Percentage of Owner-Occupied Properties	Prospectus Overstatement
RALI 2006-QO3	84.7%	73.1%	11.5%
RALI 2006-QS14	73.0%	62.3%	10.7%
RALI 2007-QH6	82.8%	66.7%	16.1%
RAMP 2004-RZ4	85.4%	74.7%	10.7%
RAMP 2004-RZ2	85.0%	75.4%	9.5%
RAMP 2005-RS4	74.1%	64.2%	9.9%
RAMP 2006-RS3	57.5%	48.7%	8.8%
RASC 2005-KS3	91.1%	80.7%	10.43%
RASC 2005-KS4	90.4%	79.6%	10.7%
RFMSI 2005-S8	97.0%	85.2%	11.9%
RFMSI 2006-S6	96.2%	82.4%	13.8%
RFMSII 2005-HI3	100%	93.6%	6.4%
RFMSII 2005-HS2	92.9%	83.9%	9.0%
RFMSII 2005-HSA1	90.3%	78.9%	11.4%
RFMSII 2006-HI5	99.7%	92.0%	7.7%
RFMSII 2007-HI1	99.3%	91.8%	7.50%
RFMSII 2007-HSA2	77.4%	66.7%	10.6%
RFMSII 2007-HSA3	81.7%	70.4%	11.3%

125. The facts alleged in this complaint show the defendants' problems were systemic, and such is confirmed by the consistency of the results set forth above – the results of reviewing over 30,000 loans across twenty of the twenty-five Certificates at issue here. The untested Certificates involved the same parties, the same affiliated originators, nearly identical disclosures, and both the underlying loans and the certificates themselves were being generated around the same time purportedly according to the same processes. As such, on information and belief, the Offering Materials for the Certificates that Allstate was not able to test on a loan-level basis also misrepresented the owner-occupancy information at approximately the same, material rate as seen in the large sample of Certificates discussed above.

C. Loan-Level, Independent Evidence That the LTV Ratios Were Materially Misrepresented

126. As above, the defendants made representations about the Mortgage Loans' LTV and CLTV ratios. These ratios compare the amount of the loan to the value of the mortgaged property, theoretically calculated using an appraisal process. An inflated appraisal would thus directly result in false and misleading LTV and CLTV ratios.

127. Using techniques and methodologies that only recently became available to investors, Allstate had the underlying property valued, using data contemporaneous with the original valuation the defendants would have done, by an industry-standard automated valuation model ("AVM"). AVMs are routinely used in the industry as a way of valuing properties during prequalification, origination, portfolio review, and servicing. AVMs have become so ubiquitous that their testing and use is specifically outlined in regulatory guidance, and is discussed in the Dodd-Frank Act. AVMs rely upon similar data as appraisers – primarily county assessor records, tax rolls, and data on comparable properties. AVMs produce independent, statistically-derived valuation estimates by applying modeling techniques to this data. The AVM that Allstate used incorporates a database of 500 million mortgage transactions covering zip codes that represent more than 97% of the homes, occupied by more than 99% of the population, in the United States. Independent testing services have determined that this AVM is the most accurate of all such models.

128. The results of this analysis for each Certificate tested is set forth in Exhibits D through BB. Applying the AVM to the available data for the loans underlying the Certificates shows that the value used by the defendants in the represented LTVs were materially and consistently inflated. This caused the disclosed LTV and CLTV ratios to be lower than they really were, i.e., the owners were represented to have more of an equity "cushion" than they

really did, and the prospects for recovery of any funds upon a foreclosure were represented to be much higher than they really were.

129. As with owner-occupancy, though the availability to gather such information and run these tests was only recently made available to investors like Allstate, these tests draw from data contemporaneous with the transactions at issue. They thus are evidence that the LTV and CLTV ratios were misrepresented at the time the representations were made, but still do not represent the level of information that was uniquely in defendants' control, such as the loan files. As above, Allstate did not and does not have access to the loan files.

130. Overall, for those tested Offering Materials that focused on LTV (rather than CLTV) statistics, 37% of the loans sampled had recalculated LTV ratios understated by more than 10%, and ***12% of the loans sampled had LTV ratios understated by more than 25%.*** This overvaluation affected numerous statistics in the Offering Materials.

131. For instance, the Offering Materials made representations about the percent of loans that had LTVs higher than 90%. LTVs in excess of 90% provide the lender little value cushion to protect against borrower default and loss upon foreclosure. However, the AVM indicates that a much higher percentage of the loans had LTVs higher than 90%:

Asset	Percentage of Loans Represented to Have LTVs Greater than 90%	Actual Percentage of Loans With LTVs Greater than 90%	Prospectus Understatement of Percent of Loans With High LTVs
RALI 2005-QA2	1.55%	18.94%	17.39%
RALI 2005-QS6	8.63%	29.25%	20.62%
RALI 2006-QO3	1.42%	32.77%	31.35%
RALI 2006-QS14	4.36%	30.96%	26.60%
RALI 2007-QH6	2.07%	53.62%	51.55%
RAMP 2006-RS3	14.14%	44.43%	30.29%
RASC 2005-KS3	19.04%	47.65%	28.61%
RASC 2005-KS4	17.53%	45.33%	27.80%
RFMSI 2005-S8	2.33%	18.12%	15.79%
RFMSI 2006-S6	0.42%	21.03%	20.61%

132. The Offering Materials also made representations about how many of the Mortgage Loans had LTV ratios greater than 100 percent, meaning the size of the loan is greater than the value of the property. (This is known as being "underwater," where a borrower owes more on the property than it is worth.) Loans with over 100% LTV afford the lender no equity cushion and leave the lender with inadequate collateral from the outset of the loan. Allstate's analysis has found that, despite the defendants representations, a substantial number of the Mortgage Loans had LTVs greater than 100%:

Asset	Percentage of Loans Represented to Have LTVs Greater than 100%	Actual Percentage of Loans With LTVs Greater than 100%	Prospectus Understatement of Percent of Loans Already Underwater
RALI 2005-QA2	0%	6.94%	6.94%
RALI 2005-QS6	0%	12.80%	12.80%
RALI 2006-QO3	0%	13.36%	13.36%
RALI 2006-QS14	0%	15.23%	15.23%
RALI 2007-QH6	0%	28.60%	28.60%
RAMP 2004-RZ4	54.41%	68.96%	14.55%
RAMP 2004-RZ2	55.65%	62.31%	6.66%
RAMP 2005-RS4	2.24%	46.31%	44.07%
RAMP 2006-RS3	0%	23.25%	23.25%
RASC 2005-KS3	0%	24.49%	24.49%
RASC 2005-KS4	0%	23.59%	23.59%
RFMSI 2005-S8	0%	7.00%	7.00%
RFMSI 2006-S6	0%	9.79%	9.79%

133. Allstate has also analyzed the weighted average LTV of the Mortgage Loans in each pool and has found that the weighted average LTV was also understated:

Asset	Represented Weighted Average LTV	Actual Weighted Average LTV	Prospectus Understatement
RALI 2005-QA2	76.93%	81.89%	4.96%
RALI 2005-QS6	77.32%	83.46%	6.14%
RALI 2006-QO3	74.31%	85.79%	11.48%
RALI 2006-QS14	77.46%	84.92%	7.46%

Asset	Represented Weighted Average LTV	Actual Weighted Average LTV	Prospectus Understatement
RALI 2007-QH6	73.89%	91.94%	18.05%
RAMP 2004-RZ4	102.19%	106.81%	4.62%
RAMP 2004-RZ2	102.13%	104.03%	1.9%
RAMP 2005-RS4	93.55%	100.07%	6.52%
RAMP 2006-RS3	80.22%	92.07%	11.85%
RASC 2005-KS3	82.31%	89.09%	6.78%
RASC 2005-KS4	83.03%	88.79%	5.76%
RFMSI 2005-S8	68.73%	75.59%	6.86%
RFMSI 2006-S6	69.98%	81.16%	11.18%

134. Other Offering Materials, particularly for those deals with large numbers of second-lien loans, also focused on the CLTV statistics of the underlying loans. This is because the quality of such a loan should take into account the pre-existing "senior" lien on the property, as that eats into the owner's equity and has to be paid first upon foreclosure. (Deals that purport to not contain many loans subject to a second lien often do not contain CLTV representations.) As with the LTV statistics, the defendants misrepresented the CLTV statistics, seriously understating the riskiness of the Mortgage Loans underlying the Certificates.

135. Overall, for those Offering Materials that focused on CLTV statistics, 49% of the loans sampled had recalculated CLTV ratios of more than 10% higher than what was claimed in the Offering Materials, and ***18% of the loans sampled had CLTV ratios understated by more than 25%***. This overvaluation affected numerous statistics in the Offering Materials.

136. Certain Offering Materials made representations about the percent of loans that had CLTVs higher than 100%. Just as with LTVs, CLTVs in excess of 100% provide the lender no cushion to protect against borrower default and loss upon foreclosure. Using both the AVM to recalculate the value of the property and researching the existence of additional, hidden liens revealed that a much higher percentage of the loans had CLTVs higher than 100%:

Asset	Percentage of Loans Represented to Have CLTVs Greater than 100%	Actual Percentage of Loans With CLTVs Greater than 100%	Prospectus Understatement of Percent of Loans Already Underwater
RFMSII 2005-HS2	0%	50.05%	50.05%
RFMSII 2005-HSA1	0%	52.11%	52.11%
RFMSII 2006-HI5	85.21%	87.21%	2.00%
RFMSII 2007-HI1	90.66%	93.76%	3.10%
RFMSII 2007-HSA2	0%	62.22%	62.22%
RFMSII 2007-HSA3	0%	64.85%	64.85%

137. Even when the Offering Materials disclosed that the Mortgage Loans had high CLTV ratios, it significantly understated *how* high. For instance, as above the Offering Materials for RFMSII 2006-HI5 and 2007-HI1 "only" understated the number of loans underwater by 2-3%. But that is only part of the story. In these instances, the Offering Materials represented that less than ten loans out of each pool had a CLTV ratio higher than 125%. Yet the true ***weighted average for both deals was over 125%***. For RFMSII 2007-HI1, ***over half of the loans had their CLTVs materially understated, with nearly a fifth being understated by more than 25%.*** Thus, even when certain Offering Materials disclosed that some loans were underwater, they still materially misrepresented how much of the collateral pool was underwater, *and* how far underwater those loans were.

138. The Offering Materials similarly misrepresented the weighted-average of the CLTVs:

Asset	Represented Weighted Average CLTV	Actual Weighted Average CLTV	Prospectus Understatement
RFMSII 2005-HI3	117.76%	129.40%	11.64%
RFMSII 2005-HS2	91.45%	101.71%	10.26%
RFMSII 2005-HSA1	91.98%	104.21%	12.23%
RFMSII 2006-HI5	114.81%	126.53%	11.72%
RFMSII 2007-HI1	117.32%	131.00%	13.68%
RFMSII 2007-HSA2	93.60%	107.31%	13.71%
RFMSII 2007-HSA3	91.98%	108.20%	16.22%

139. The defendants did not genuinely believe the appraised values were reasonable estimations of the properties' values at the time they were given. The defendants knew that the appraisals were being inflated to allow borrowers to be approved for loans that they could not afford. As such, they knew the LTV and CLTV statistics were baseless. Further, the CLTV statistics above were inflated in part because of the presence of hidden liens, which do not turn on any purported difference in the appraisal "opinion."

140. The facts alleged in this complaint show the defendants' problems were systemic, and such is confirmed by the consistency of the results set forth above – the results of reviewing over 30,000 loans across twenty of the twenty-five Certificates at issue here. The untested Certificates involved the same parties, the same affiliated originators, nearly identical disclosures, and both the underlying loans and the certificates themselves were being generated around the same time purportedly according to the same processes. As such, on information and belief, the Offering Materials for the Certificates that Allstate was not able to test on a loan-level basis also misrepresented the LTV and CLTV statistics at approximately the same, material rate as seen in the large sample of Certificates discussed above.

D. Evidence From A Former Senior Underwriter That GMAC Accepted Absurd Income Claims

141. According to CW4, a former Senior Underwriter at GMAC, the share of "stated income" loans went up in the 2004-2007 time frame. CW4 "hated" these, which "drove [CW4] insane," because CW4 "had to accept" whatever income was given. CW4 gave an example of a city bus driver that provided a stated income of $9,000 *per month*. As below, a review by the defendants' own insurer, of defendants' loan files at issue here, found similar, numerous problems infected Allstate's Certificates.

142. According to CW4, only a human could really judge the facial reasonableness of a "stated income" amount as against the claimed occupation. Nonetheless, according to CW4, GMAC relied on its automated systems to underwrite stated-income loans, and there was no system in place for otherwise evaluating the reasonableness of the income claims.

143. When CW4 raised such concerns, CW4's supervisor responded that 'this is what we pay you to do.' CW4 felt that "short of walking out, we didn't have a choice."

E. Evidence From the Defendants' Own Insurers' Review of Loan Files at Issue Here

144. MBIA Insurance Corporation had access to some of the complete loan files for certain of the defendants' securitizations – including some of the Certificates at issue here. Its analyses – the first part of which was only made public in December 2008 – provides additional strong evidence that essential characteristics of the Mortgage Loans underlying the Certificates were misrepresented, and that the problems in the defendants' underwriting practices were systemic.

145. MBIA is a monoline insurer that wrote insurance on certain Residential Funding and GMAC mortgage-backed securities. MBIA conducted an investigation into certain loan files after it was asked to make payments on its insurance policies. MBIA's analysis included at least two deals that Allstate invested in: RFMSII 2007-HSA2 and RFMSII 2007-HSA3. The other deals that MBIA analyzed are also probative of problems underlying Allstate's Certificates because the defendants' problems were systemic, and because the collateral pools for the securitizations that MBIA investigated were composed of the same type of collateral underlying some of Allstate's Certificates.

146. In carrying out its review of the approximately 12,000 Residential Funding/GMAC loan files – ***including loans that were securitized and sold to Allstate*** – MBIA

found that ***88% of the defaulted or delinquent loans in those securitizations contained material deviations from the stated underwriting guidelines***. MBIA's report showed that a material number of mortgage loans included in the mortgage loan pools underlying the securitizations were made to borrowers who could not reasonably have expected to be able to repay the mortgage loans, and the risks inherent in the portfolios was significantly higher than as represented. Indeed, ***MBIA claims that Residential Funding admitted to it that it knew mortgage loan pools failed to comply with Residential Funding's guidelines.***

147. MBIA also found that "there were fundamental, material, and consistent violations of [Residential Funding's] underwriting guidelines and policies in connection with the underwriting of the mortgage loans . . . The undisclosed and misrepresented risks were pervasive throughout the mortgage loan portfolios for the securitization transactions." Similarly, the results of its GMAC-focused review "made clear that GMAC Mortgage had wholly abandoned its own underwriting policies and instead routinely approved loans to borrowers who failed to meet basic risk criteria."

148. MBIA gave examples of individual loans that diverged from the stated underwriting guidelines. Below is just a small sample of the problems MBIA found, some of which came from the very loan files that were used to originate the loans pooled into the Certificates at issue here:

- "On November 30, 2006, a loan with a principal balance of $140,000 was made to a borrower in Newton, Massachusetts on a property with an original appraisal value of $740,000 and a senior loan balance of $513,567. The property subject to the loan was a non-owner occupied investment property. The borrower stated his income to be $41,666 per month ($500,000 per year) as the owner of a Wine/Spirits store. Further, the borrower did not demonstrate any liquid assets. The stated income was unreasonable based on the borrower's employment and not substantiated by the borrower's credit/asset profile. Notably, the borrower filed for bankruptcy in 2007 in connection with which the borrower

claimed to have earned $0.00 for 2006. Further, the appraisal indicated the property failed to conform to legal standards and the loan file lacked any letter from the local authority regarding rebuilding. RFC Underwriting Guidelines require verification of 6 months of reserves for the monthly Principle, Interest, Taxes and Insurance ('PITI') payments for stated income loans on non-owner occupied investment properties yet there is no indication in the loan files that these reserves were identified or verified. Finally, RFC guidelines limit loans under the non-owner occupied loan program to $100,000, $40,000 less than was loaned. (Loan # 11169067 – 2007-HSA2)."

- "On March 16, 2007, a loan with a principal balance of $40,000 was made to a borrower in Bradenton, Florida on a property with an original appraisal value of $440,000 and a senior loan balance of $328,000. The borrower is retired and receives a fixed income that was stated as $6,450 per month. The borrower's FICO credit score of 688 required the DTI for the loan not to exceed 45%, however, the borrower's DTI was 55.93%. Because the borrower receives a fixed income, the borrower does not meet the residual income requirements for a higher DTI under RFC's Underwriting Guidelines. Further, the loan file lacks any evidence of 2 months of PITI reserves as required by RFC's Underwriting Guidelines. (Loan # 11434381 – 2007-HSA3)."

- "On November 12, 2006, a loan with a principal balance of $135,000.00 was made to a borrower in Scottsdale, Arizona on a property with an original appraisal value of $540,000.00 and a senior loan balance of $405,000.00. The borrower stated income of $11,000 per month as a sales manager at a concrete company, however, the borrower could only demonstrate assets of $11,491. The stated income was unreasonable based on the borrower's employment and not substantiated by the borrower's credit/asset profile. Notably, the borrower filed for bankruptcy in 2008 in connection with which the borrower claimed to have actually earned $43,523 for 2006 and $20,401 for 2007. Additionally, the bank account used to verify the borrower's reserves is actually held in the name of the loan officer that issued the loan. (Loan # 11165457 – 2007-HSA3)."

- "On April 20, 2007, a loan in the amount of $40,000 was made to co-borrowers in Vernon, New Jersey on a property with an original appraisal value of $305,000 and a senior loan balance of $244,000. The loan file is incomplete and lacks, among other documents, verbal verification of either borrower's employment, evidence of sufficient closing funds and reserves, an appraisal, a copy of the note from the senior lien, and the borrowers' credit reports. Further, the loan was approved even though the income stated by each borrower was unreasonable. One claimed to earn $4,583 per month as a counter manager at a discount tire store though, for example, salary.com, a website which maintains a national salary database based on job title and zip code, reports that the income at the 90th

percentile for such a position is only $2,801 per month. The second borrower claimed to earn $59,592 annually as a sales associate at a home improvement store, but an income verification database showed that the borrower earned only $28,092 in 2006 and $32,977 in 2007. The loan has been charged-off. (Loan # 1000117685 – [GMAC] 2006 Transaction.)"

- "On January 23, 2007, a loan with a principal balance of $100,000 was made to a borrower in Yuma, Arizona on a property with an original appraisal value of $298,000 and a senior loan balance of $129,035. The borrowers claimed on their loan application that their combined income was $113,520 per year. However, on May 12, 2009, the borrowers jointly filed for bankruptcy under Chapter 7, and their court filings indicated that they earned only $13,085 in 2007 and $17,650 in 2008. Moreover, no record of the borrower's claimed employer can be located on websites commonly used to verify the existence of a business: manta.com or yellowpages.com. The loan has been charged-off. (Loan # 8254730412 – [GMAC] 2007 Transaction.)"

149. In short, in its review of Residential loan files – files that underlie some of the Certificates at issue here – Residential Funding's own insurer found:

- "A significant number of mortgage loans have DTI ratios far in excess of RFC's Underwriting Guidelines, have CLTV ratios far in excess of RFC's Underwriting Guidelines and were made on the basis of 'stated incomes' that were grossly unreasonable."

- "[C]ontrary to RFC's Underwriting Guidelines, RFC failed, with respect to a significant number of mortgage loans, to verify employment for mortgage loan borrowers where required to do so, failed to verify prior rental or mortgage payment history, approved mortgage loans with ineligible collateral, approved mortgage loans to borrowers with credit scores that are ineligible under the Underwriting Guidelines and closed mortgage loans without verifying that the borrower had sufficient funds or reserves as required by the Underwriting Guidelines."

- "Numerous mortgage loan files are missing necessary mortgage loan documents and are missing certain disclosures, such as disclosures relating to loan transfers, which are necessary under applicable law."

- "RFC even contributed mortgage loans to the mortgage loan pools that violated either, or both, the federal Home Ownership and Equity Protection Act ('HOEPA') and state predatory lending laws . . . RFC's failure to identify HOEPA violations indicates that RFC failed to perform the calculation, incompetently performed the calculation or performed the calculation but purposely ignored the result."

150. Similarly, MBIA's review of GMAC's loan files found that, among other things:

- "GMAC Mortgage egregiously and routinely breached its representation and warranty that the mortgage loans were underwritten generally in compliance with GMAC Mortgage's underwriting standards."

- "A significant number of mortgage loans were made on the basis of 'stated incomes' that were grossly unreasonable or were approved despite DTI or CLTV ratios in excess of the cut-offs stated in GMAC Mortgage's Underwriting Guidelines or the Purchase Agreements or Prospectus Supplements."

- "Moreover, contrary to its Underwriting Guidelines, GMAC Mortgage failed in many cases to verify the borrower's employment when required to do so or to verify prior rental or mortgage payment history, approved mortgage loans with ineligible collateral, approved mortgage loans to borrowers with ineligible credit scores, and approved loans without verifying that the borrower had sufficient funds or reserves."

- "GMAC Mortgage used its proprietary automated electronic loan underwriting program, known as 'Assetwise,' to approve loans that did not comply with its Underwriting Guidelines . . . Assetwise, however, failed to analyze proposed mortgage loans using the criteria set forth in GMAC Mortgage's Underwriting Guidelines."

- "The vast majority of mortgage loan files are missing necessary mortgage loan documents, such as disclosures relating to loan transfers and notes establishing the first lien."

- "GMAC Mortgage . . . furnish[ed] . . . mortgage loans to the pools that violated state predatory lending laws. These laws are designed to protect borrowers from abusive lending practices by, for example, prohibiting the approval of a loan to a borrower who lacks the ability to repay."

151. MBIA reviewed loans associated with some of the very deals at issue here. Even for deals that were not identical, some were in the same series of offerings – for instance MBIA analyzed GMACM 2006-HE*4* (prospectus supplement dated September 25, 2006), while Allstate purchased certificates in GMACM 2006-HE*3* (prospectus supplement dated August 28, 2006). For the deals MBIA analyzed, the parties, structure, timing, and disclosures made all significantly overlapped with – if were not identical to – those present here. In addition, MBIA's findings are consistent with, and confirmed by, Allstate's statistical analyses of the Certificates

here, discussed above. Thus, on information and belief, all of the findings of the defendants' own insurer, made upon a review of the defendants' own loan files, apply equally to all of the Certificates at issue here.

F. Documentary and Testimonial Evidence that Due Diligence Flagged Many Problem Loans That Were "Waived In" Anyway

152. The defendants wore multiple hats in connection with the Offerings at issue here, acting in various capacities including sponsor and underwriter of the offered securities. In its overlapping capacities, and through their affiliates, they were was responsible for originating and purchasing large blocks of mortgage loans from third-party originators, repackaging those loans into securities, and selling the newly-created securities to investors like Allstate.

153. In connection with the purchase of the Mortgage Loans from the loan originators, and consistent with industry practice, the defendants performed due diligence to determine the quality of the Loans they were purchasing.

154. Specifically, on information and belief, the defendants operated quality assurance and risk management departments tasked with ensuring that loans met the stated guidelines. The defendants conducted due diligence on the loans included in each offering to ensure compliance with defendant-created or approved underwriting guidelines. To make this determination, the defendants employed a team of underwriters who reviewed a sample of the purchased loans to confirm that they both conformed with the representations made by the originators and complied with the defendants' own credit policies.

155. On information and belief, the defendants' own due diligence revealed that a significant percentage of loans purchased from their affiliated and even third-party originators failed to meet applicable underwriting standards, yet were provided unjustified exceptions. This is evidenced by the amount of defective loans Allstate's analysis, as well as that of the

defendants' own insurer, have found – as well as evidence from how underwriters who worked on these deals reacted when they outsourced their due diligence obligations.

156. Sometimes, the underwriters relied on outside firms to conduct the requisite due diligence. One of the largest such firms is Clayton. As the FCIC put it (at 166): "Because of the volume of loans examined by Clayton during the housing boom, the firm had a unique inside view of the underwriting standards that originators were actually applying – and that securitizers were willing to accept."

157. For each loan pool they were hired to review, Clayton checked for: (1) adherence to seller-credit underwriting guidelines and client-risk tolerances; (2) compliance with federal, state and local regulatory laws; and (3) the integrity of electronic loan data provided by the seller to the prospective buyer. This review was commonly referred to as a "credit and compliance review." Contract underwriters reviewed the loan files, compared tape data with hard copy or scanned file data to verify loan information, identified discrepancies in key data points, and graded loans based on seller guidelines and client tolerances. This included answering such questions as whether the "loans meet the underwriting guidelines," "comply with federal and state laws, notably predatory-lending laws and truth-in-lending requirements," and "were the reported property values accurate." (FCIC Report at 166.) It also "critically" analyzed whether, to the extent a loan was deficient, there were any "compensating factors." (*Id.*)

158. Each day, Clayton generated reports that summarized its findings, including summaries of the loan files that failed to meet the relevant underwriting standards. This included giving loans three grades – a Grade 3 loan "failed to meet guidelines and were not approved." Importantly, these Grade 3 loans did not contain any "compensating factors." Tellingly, only 54% of the nearly one-million loans reviewed by Clayton "met guidelines," a number that its

former president admitted indicated "there [was] a quality control issue in the factory" for mortgage-backed securities.

159. Clayton Holdings performed work on Residential Funding and GMAC transactions. Indeed, most all of the unaffiliated underwriters for the Certificates here – including JPMorgan, Bear Stearns, Lehman Brothers, Citigroup, Barclays, Goldman Sachs, Credit Suisse, Banc of America Securities, Deutsche Bank, and Morgan Stanley – have been directly linked to Clayton Holdings through documents made public in September 2010 by the government's investigation into the financial crisis.

160. According to an internal Clayton Holdings "Trending Report" made public by the government in conjunction with testimony given in September 2010, many of the underwriters who handled the Certificates here routinely found that high percentages of the loans they underwrote were outside the given underwriting guidelines, but waived them in in large numbers anyway.

161. These high percentage of problem loans were identified despite, on information and belief, underwriters pressuring Clayton to provide reports in a very short time frame, and with only limited re-verification of data. Thus, on information and belief, the percent of loans that were truly problematic was in fact higher than the astounding rates Clayton's reports managed to discover.

162. With such high failure rates, the proper response would be to reject the pool outright, and seriously investigate whether that originator could be considered a trusted source of loans in the future. Even assuming the defendants incredibly believed the high rates could be chalked up to 'sampling error' (due to the fact that Clayton did not review every loan in a pool),

the proper response would be to increase the sample size to test that hypothesis or to cease doing business with the problematic originators. The defendants did neither.

163. As set forth above, there is ample evidence that the Mortgage Loans at issue here were not, in fact, properly underwritten. Indeed, the recent review of the loan files by MBIA demonstrated that the defendants' loan files were missing information and were full of other red flags. Many of those types of errors were exactly the type that the third-party due diligence firms were supposed to detect. The third-party due diligence reports that were generated here, then, would have showed high levels of loans being rejected, and similarly high levels of those flagged loans being waved in as set forth above.

164. JP Morgan, who was an underwriter in GMACM 2005-HE1 and GMACM 2006-HE3, was informed that 27% of the loans it had reviewed "failed to meet guidelines." It intervened to "waive" 51% of those rejected loans anyway. On information and belief, JP Morgan was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

165. Bear Stearns, who was an underwriter in RAMP 2004-RZ4, RAMP 2006-RZ3, RFMSII 2005-HS2, RFMSII 2005-HSA1, RFMSII 2005-HI3, RFMSII 2006-HI4, RFMSII 2007-HI1, GMACM 2005-HE1, and GMACM 2006-HE3, was informed that 16% of the loans it had reviewed "failed to meet guidelines." It intervened to "waive" 42% of those rejected loans anyway. On information and belief, Bear Sterns was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

166. Lehman Brothers, who was an underwriter in GMACM 2005-HE1, was informed that 26% of the loans it had reviewed "failed to meet guidelines." It intervened to "waive" 37% of those rejected loans anyway. On information and belief, Lehman Brothers was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

167. Citigroup, who was an underwriter in RALI 2005-QA2, RALI 2005-QS6, and RFMSI 2005-S8, RFMSII 2007-HSA2, was informed that 42% of the loans it had reviewed "failed to meet guidelines." Citigroup intervened to "waive" 31% of those rejected loans anyway. On information and belief, it was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

168. Barclays, who was an underwriter in RALI 2006-QS14, was informed that 27% of the loans it had reviewed "failed to meet guidelines." It intervened to "waive" 28% of those rejected loans anyway. On information and belief, Barclays was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

169. Goldman Sachs, who was an underwriter in RALI 2006-QO3 and RALI 2007-QH6, was informed that 23% of the loans it had reviewed "failed to meet guidelines." Goldman Sachs intervened to "waive" 29% of those rejected loans anyway. On information and belief, it was similarly informed of the high number of problematic Mortgage Loans at issue here, and

similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

170. Credit Suisse, who was an underwriter in RASC 2005-KS4, RALI 2005-RS4, RFMSII 2005-HS1, RFMSII 2005-HSA1, RFMSII 2007-HSA3, and RFMSI 2006-S6, was informed that 32% of the loans it had reviewed "failed to meet guidelines." Credit Suisse intervened to "waive" 33% of those rejected loans anyway. On information and belief, it was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

171. Bank of America, who was an underwriter in RAMP 2004-RZ2, RAMP 2006-RZ3, RFMSII 2005-HS2, RFMSII 2005-HSA1, and RFMSII 2005-HS1, was informed that 31% of the loans it had reviewed "failed to meet guidelines." Bank of America intervened to "waive" 27% of those rejected loans anyway. On information and belief, it was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

172. Deutsche Bank, who was an underwriter in RFMSII 2006-HI5, was informed that 35% of the loans it had reviewed "failed to meet guidelines." Deutsche Bank intervened to "waive" 50% of those rejected loans anyway. On information and belief, it was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

173. Morgan Stanley, who was an underwriter in RFMSI 2006-S6, was informed that 37% of the loans it had reviewed "failed to meet guidelines." Morgan Stanley intervened to "waive" 56% of those rejected loans anyway. On information and belief, it was similarly informed of the high number of problematic Mortgage Loans at issue here, and similarly wrongfully waived in high numbers of those loans into the loan pools underlying the mortgage-backed securities purchased by Allstate.

174. In sum, on information and belief, the underwriters' due diligence identified high numbers of problematic loans, but those loans were "waived" into the collateral pools at issue here at a materially high rate. The hidden "waiver" of rejected loans that were not subject to any compensating factors was a fraudulent omission, and rendered the disclosures regarding the underwriting and due diligence processes even more misleading. As the FCIC report concluded (at 167, 170) (emphasis added):

> [M]any prospectuses indicated that the loans in the pool either met guidelines outright or had compensating factors, even though Clayton's records show that only a portion of the loans were sampled, and that of those that were sampled, a substantial percentage of Grade 3 Even loans were waived in.
>
> . . . .
>
> [O]ne could reasonably expect [the untested loans] to have many of the same deficiencies, at the same rate, as the sampled loans. ***Prospectuses for the ultimate investors in the mortgage-backed securities did not contain this information, or information on how few of the loans were reviewed, raising the question of whether the disclosures were materially misleading, in violation of the securities laws.***

G. Evidence That the Ratings Were Meaningless

175. The defendants fed the same misrepresentations found in the Offering Materials to the ratings agencies in an attempt to manufacture predetermined ratings. This not only rendered false the defendants' representations about how the ratings process really functioned,

but also assured that the ratings themselves in no way reflected the actual risk underlying the Certificates.

H. Evidence of Serious and Repeated Problems at the Affiliated Originator Homecomings Financial

176. As set forth above, many of the Mortgage Loans were generated by the defendants' affiliate, Homecomings Financial. It originated or acquired large portions of loans in all but two of the Certificates. For instance, in RALI 2006-QO3 it was responsible for 47.6% of the loans, and in RALI 2007-QH6 it was responsible for 43%. In twenty-three of the twenty-five transactions, it was responsible for at least 15% of the Mortgage Loans. It is thus in many respects the most pivotal originator at issue in this case, and evidence showing Homecomings Financial had problems at the origination stage is further evidence loans that loans included in Allstate's collateral pools were riskier than represented.

177. Not surprisingly given what is known about the actual Mortgage Loans at issue here, government investigations and statements provided by insiders in fact further confirm that the defendants' own originator was churning out problematic loans.

(1) Confidential witness: Automated system manipulated to obtain approvals

178. Confidential Witness 5 ("CW5") worked as a Regional Account Executive at Homecomings from 2003 to 2005, then worked in the Wholesale Lending Department within GMAC until early 2006. CW5 knew Correspondent Lending sales managers personally, and attended meetings with Residential Capital's Correspondent Lending personnel.

179. Part of CW5's duties included training loan brokers on how to use Homecomings' automated loan system. Based on CW5's personal experience, daily conversations with other Account Executives, automated Help Desk personnel, and others, according to CW5, ***Account***

Executives were trained by senior management how to teach outside mortgage brokers how to manipulate borrower data to generate an approval.

180. According to CW5, training people on how to use the automated system involved "loading data in AssetWise with the intent of getting an approval. They could run it through a number of times with different data until it got an approval." Indeed, the automated system allowed multiple applications to be submitted on the same borrower. According to CW5, ***"there were brokers running [the automated system] twenty-five times for the same borrower."***

181. Even though brokers were trained on how to do this data manipulation, according to CW5 brokers sometimes would just fax their changes to Account Executives. However, as this would leave the Account Executive's user ID on the loan file, senior management tried to crack down on this practice. Rather than stressing how data manipulation should not take place at all, according to CW5, they simply wanted more training so the brokers could enter the data themselves, leaving less of a 'paper trail' leading back to the Account Executives.

182. However, because certain Account Executives did not want the social awkwardness of asking brokers to do the data entry themselves, according to CW5 many continued to perform the data changes on behalf of larger clients. Others simply would email the brokers instructions regarding the data changes, or talk them through the process on the phone.

183. In these ways, according to CW5, ***"there was complicity on the part of employees, a lot of employees, in manipulating AssetWise until loan applications were approved."*** According to CW5, ***"this was sanctioned behavior."***

184. Homecomings even had a Help Desk. Rather than being just for technical support, according to CW5, this desk was designed to inform brokers why a particular loan was

being denied by the automated program. An explanation was provided as to what minimum change would be required to generate an approval.

185. According to CW5, the most commonly manipulated data included income, assets, and debt-to-income ratios.

186. CW5 believes that Homecomings' underwriters could see all the prior versions of the loan applications put through the system. Thus, if the first application claimed a borrower was a carpenter making $6,000, they could see that even if the fifth claimed $16,000. According to CW5, underwriters could get "trapped by the guidelines." That is, even if they noticed that income levels were changing in such a way, because the automated system was generating an approval on the last version of the application, the underwriters would be told they could not decline the application.

187. According to CW5, in the 2004-2005 timeframe, the parent company RFC capped the percentage of loans that could be generated using "full documentation" procedures. It made a push to increase loan volumes elsewhere because "that's where the profits were" and wanted the loans for its mortgage-backed securities operations. Around 2004 and 2005, CW5 noticed an unannounced change to the automated systems. Whereas before, users had to input the product the loan application was being submitted under (full documentation, Al-A, etc.), the automated program instead began approving the loan under any program that it qualified for.

188. Despite the manipulation – which, according to CW5, could be done even more so with loans given through low-doc procedures – the automated system initially was ill-suited to the parent company's demand for more subprime products as at first it was rejecting many loans. Though according to CW5 seven of ten of the loans rejected by their own automated program

were eventually given a pass through manual underwriting, that process took time. Because that delay caused the company to lose business, Residential Funding turned to "bulk" purchases.

(2) Confidential witnesses: QC group overridden

189. Confidential Witness 3 ("CW3") worked as a Pre-Funding Quality Control Supervisor at Homecomings from 1997 to 2005. This review was supposed to identify missing information and documents. However, according to CW3, pre-funding reviews covered only 5%-10% of the approved mortgages.

190. According to CW3, 30-35% of the loans CW3's QC team reviewed resulted in a "inconclusive" recommendation, meaning that the underwriter needed to make further proof that the loan file was reliable. According to CW3, 5% received a "misrepresentation with certainty" recommendation.

191. According to CW3, there was no formal channel for the QC group to challenge and overturn an underwriter's decision to approve a mortgage – area managers even had the power to disregard QC's rejection of a mortgage, which, according to CW3, did occur even when the recommendation was "misrepresentation with certainty." According to CW3, Homecomings "gave a lot of loans they shouldn't have." CW3 considered the stated-income loans "all lies."

192. Confidential Witness 6 ("CW6") worked at Homecomings from 2002 to 2007. Until 2006, CW6 worked as a Post-Funding QC Auditor. Thus, unlike CW3's team, CW6 would review loan files of mortgages that had already been funded. Around 2006, CW6's role changed to fixing deficiencies in mortgages that had been identified as "unsellable," and CW6's title changed to "Resolutions Coordinator." According to CW6, this change occurred around the same time changes were occurring within the GMAC organization, and around that time Homecomings "started to spiral downward."

193. By 2005, according to CW6, the borrower qualifying process had gotten "more lax, they took more risks, and got greedy." This caused CW6 to wonder how certain borrowers got loans at all.

(3) Other evidence of problems at Homecomings

194. In mid-2008, the FTC began an investigation into Homecomings Financial, after a staff review had found evidence of discriminatory lending practices. The FTC found that Homecomings Financial "originated the vast majority of its loans through independent brokers" that were allowed to assess discretionary charges on borrowers. The FTC found that disparities in the fees were "substantial, statistically significant, and cannot be explained by any legitimate underwriting or credit characteristics in violation of the ECOA and the FTC Act."

195. On September 3, 2009, Residential Capital announced it was shutting down its wholesale mortgage origination operations, thereby closing down the lending operations of both Homecomings Financial and the other affiliated originator at issue here, GMAC Mortgage LLC. In a January 22, 2009 letter, the FTC explained it was closing its investigation into Homecomings Financial because it had ceased originating loans, and that according to Residential Capital "the ability of [Homecomings Financial] to continue as a going concern is in substantial doubt," in part because Homecomings Financial "is heavily dependent on its own indirect parent, GMAC, LLC, for funding and capital support and that there can be no assurance that such support will continue."

196. A March 5, 2009 article in the *Portland Tribune* discussed the massive failures in the lending industry. It quoted Tim Boyd, who worked at Homecomings Financial for seven years, as saying that: "In order to keep your market share, you had to be more aggressive." According to the article, he knew of loan officers who would tell title agents to "keep quiet about

Option ARM loan provisions during document-signing time. 'They'd tell the title officer, 'Don't go over this, just glean through it quickly and get the thing signed.'"

197. Pay-option loans give the borrower the choice of what to pay each month – but if they choose a low amount, the principal loan balance actually *increases*, eventually causing the "minimum" payment to jump. Option ARMs combine this with another confusing, risky feature: an initially low teaser interest rate that will reset after a certain period. The counterintuitive nature of an increasing principal is a risk many borrowers may not fully understand, particularly when combined with the complex calculation of interest-rate risk. Obviously, a borrower that does not understand the loan terms is more likely to default as it is more likely the borrower cannot properly determine whether it can afford the loan, or plan for and adjust for any unexpected change of circumstances. The FCIC's report (at 90) recounted a study that found that ***38% of borrowers with adjustable-rate mortgages did not understand*** how much their interest rates could reset at one time, and ***more than half underestimated*** how high their rates could reach over the years.

198. According to CW5, by the end of 2006, 50% of Homecomings' loans were option-ARMS. CW6 noted that borrowers who were given ARMs were only qualified at the initial, low rate – without consideration of whether they could afford any changes that might occur after the initial fixed period expired.

199. These same and other types of exotic loans were included in many of the loan pools at issue here. On information and belief, the loans at issue here were similarly, deliberately given to borrowers who were deceived about the risks they presented. This represented yet another deliberate end-run around proper underwriting standards, and created yet another layer of hidden, undisclosed risk.

I. Evidence that the Loans Were Approved Based on Incomplete Loan Files

200. According to the FCIC's report (at 110-11), traditionally, low-documentation loans were used for the particular borrowers with fluctuating or hard-to-verify incomes, such as longtime customers with strong credit. Lenders later realized they could charge borrowers more and approve more borrowers using those processes: "Around 2005 . . . low- and no-documentation loans took on an entirely different character . . . [F]raud specialists described stated income loans as 'an open invitation for fraud' that justified the industry term 'liar loans.'" It also concluded (at 160): "Across the mortgage industry, with the bubble at its peak, standards had declined, documentation was no longer verified, and warnings from internal audit departments and concerned employees were ignored. These conditions created an environment ripe for fraud."

201. As above, a review of the defendants' actual loan files here found many to be incomplete. As below, Residential Funding is itself suing its originators based in part on incomplete loan files. On information and belief, the Offering Materials at issue here similarly materially overstated the percent of underlying loans that were based on a fully-documented basis, and thus materially understated the risk associated with Allstate's Certificates.

J. Evidence that Residential Funding Itself Believes Loans it Purchased Were Non-Compliant

202. According to news reports from early January 2009, Residential Funding *tripled* the number of lawsuits it had filed against unaffiliated originators, alleging that they had wrongfully refused to buy back non-compliant loans that they had sold Residential Funding for use in its securitizations.

203. These suits are based on Residential Funding's originators' alleged breach of their contracts with Residential Funding to abide by the terms of the Seller Guide, representations that the loans were prudently underwritten, and that all loan documents were complete and accurate.

204. These are thus necessarily admissions that Residential Funding was acquiring loans that were based on insufficient documentation and not in compliance with Residential Funding's underwriting guidelines, including around the same time that loans Residential Funding were acquiring were being shuffled into securitizations such as those at issue here.

IV. THE DEFENDANTS KNEW THEIR REPRESENTATIONS WERE FALSE

A. The Statistical Evidence is Itself Persuasive Evidence the Defendants Knew of the Falsity of Their Representations – Particularly Given They Originated Many of the Loans

205. As above, the Certificates have significantly underperformed. For instance, for RALI 2007-QH6, ***55% of the loans have either already had to be written off at a loss or are currently delinquent.*** And overall, ***approximately 30% of the Mortgage Loans underlying the Certificates have already had to be written off at a loss or are currently delinquent.***

206. Allstate's analysis also shows that the loans were consistently misrepresented – by large margins. On average, ***owner occupancy was overstated by over 10%***. The analysis also shows a ***18% understatement of the amount of loans had had LTVs over 100% and 37% understatement of the loans that had CLTVs over 100% (i.e., of loans that were underwater).***

207. In addition, MBIA's similar and overlapping review of thousands of the defendants' actual loan files demonstrates systemic problems in the loans underlying the Certificates.

208. The remarkable default and delinquency rates, understated LTV and CLTV ratios, overstated owner occupancy statistics, and the problem files uncovered by the defendants' insurer are not only evidence that the Mortgage Loans underlying the Offerings were defective.

They are themselves strong evidence that the defendants knew the Mortgage Loans underlying the Offerings were grossly defective when they made contrary representations to Allstate. Simply put, they could not have pooled these Mortgage Loans without knowing that, contrary to their representations, the loans were widely defective.

209. That the Mortgage Loans could have made it to the securitization market without their knowledge of the problems is made all the less improbable by the fact that, as above, many of the loans were originated by defendants' own affiliates. Residential Funding transactions involved affiliated Residential Funding originators, sellers, sponsors, servicers, underwriters, and depositors. Similarly, the GMAC transactions involved affiliated GMAC originators, sponsors, servicers, underwriters, and depositors. All of the defendants involved in the Certificates were related directly or indirectly through Ally Financial Inc., Residential Capital, LLC, and/or GMAC Mortgage Group, LLC. Indeed, starting in 2007, CW6 (who, as above, worked at Homecomings) started receiving an "unsellable report" that reflected *all* funded loans enterprise-wide (i.e., including mortgages originated by GMAC entities other than Homecomings.)

210. This vertical integration between originators and issuers heightened the already-perverse incentives created by the move to the "originate and distribute" business model. The originator, secure with a pipeline to the market, would have even more incentive to loosen its practices. Those responsible for the securitization, focused on volume, would push them to do so even more. Indeed, according to CW5, Residential Funding mandated that Homecomings limit the share of loans approved on a fully-documented basis, and instead focus on the more-profitable low-doc products. And once the loans were issued, those responsible for securitization would have significant incentives to ignore problem loans because rejecting a loan would saddle an affiliated company with a toxic loan.

211. As purchasers of the loans, the defendants had extensive business relationships with the originators (even the unaffiliated ones), had access to the originators mortgage origination personnel and internal information, and conducted due diligence into the originators through their own personnel and third-party loan review firms.

212. Thus, regardless of the originator, the defendants were either aware of the falsity of their representations, or made representations without knowing their truth. In short, the defendants' relationships with the originators, particularly their own affiliates who originated the bulk of the loans at issue here, gave them yet another source of actual knowledge of the falsity of the representations it made to Allstate. Because of those ties, the defendants had a direct window into the lax practices that led to the creation of the toxic pools of loans to begin with.

213. The prevalence of such problems as evidence of the defendants' knowledge is further magnified when one considers the size of the defendants' operations. As above, Residential Funding was the eighth-largest sponsor of non-agency mortgage backed securities in 2007. It is inconceivable that problems on the scale at issue here could be anything but the result of knowing conduct with regard to the true risk profiles of the Mortgage Loans, or conduct undertaken with no regard to the truth or falsity of information uniquely within defendants' knowledge. Indeed, as above, MBIA claims that Residential Funding admitted to it that it knew mortgage loan pools failed to comply with Residential Funding's guidelines.

B. Evidence From Third-Party Due Diligence Firms Demonstrates That Defendants Knew Defective Loans Were Being Securitized

214. Not only *must* the defendants have known that the Mortgage Loans were widely defective; they *did* know.

215. As above, many of the loans at issue here originated from the defendants' affiliated companies, where they had a direct window into the lax origination processes. Further,

the defendants represented that they reviewed the loans they were purchasing both through automated and manual procedures "for conformity with the applicable underwriting standards." Even for those loans not generated in-house, the Offering Materials for RALI 2005-QA2 represented that "[p]rior to assigning the mortgage loans to the depositor, ***Residential Funding will have reviewed*** the underwriting information provided by the mortgage collateral sellers ***for most of the loans*** and, in those cases, determined that the mortgage loans were generally originated with or in a manner generally consistent with the underwriting standards described in the Seller Guide." Similarly, the Offering Materials for RALI 2006-QS14 represented that "Residential Funding Corporation ***evaluates many of the mortgage loans*** that it purchases through the use of one or more automated underwriting systems. In general, these systems are programmed to review ***most of the information*** set forth in Residential Funding Corporation's Seller Guide as the underwriting criteria necessary to satisfy each underwriting program."

216. In other words, the defendants represented that they undertook their own due diligence procedures. This review, if properly performed, would necessarily have revealed the pervasive deficiencies in the Mortgage Loans at issue here.

217. The defendants' willingness to include knowingly defective loans in securitization pools is confirmed by the testimony of CW4, who testified that ***half*** of all applications that were flagged as falling meaningfully short of underwriting guidelines were funding through underwriting "exceptions." It is also confirmed by the testimony of CW5 who, as above, testified of systemic, senior-level-approved manipulation of the data being put into the automated underwriting system, and by the testimony of CW1, discussed in detail further below.

218. It is further demonstrated by data recently revealed by one of the firms hired to carry out the underwriting due diligence. As noted above, underwriters typically hire third-party

due diligence firms, such as Clayton Holdings, Inc., to conduct a review of the proposed loan pool for the underwriters. Clayton Holdings would identify loans that "failed to meet guidelines" and that did *not* contain any "compensating factors." Based on the information released in conjunction with the government's investigation as well as the other facts set forth above, on information and belief the underwriters here were informed by their third-party due diligence firms that high percentages of the Mortgage Loans underlying Allstate's Certificates "failed to meet guidelines," yet the underwriters waived in high numbers of such rejected loans.

219. Such third-party due-diligence data not only supports the fact the Mortgage Loans were defective, but also shows they knew the defendants knew the representations were false. According to the September 2010 testimony of Clayton's Vice President Vicky Beal, the third-party due diligence firms' "exception reports" were provided not just to the underwriter, but also to the sellers. Further, according to the September 2010 testimony before the FCIC by Clayton's former president, D. Keith Johnson, the investment banks would use the exception reports to force a lower price from loan originators.

220. On information and belief, then, the defendants here through their numerous roles of co-underwriter in many of these deals (GMAC RFC Securities), originators (through their affiliates GMAC Bank, GMAC Mortgage LLC and Homecomings Financial, LLC), and sellers (GMAC Mortgage LLC and Residential Funding Company, LLC), thus were aware of the due diligence reports that would have been generated by the third-party due diligence firms. On information and belief, their own due diligence revealed similar problems even apart from Clayton Holdings' review.

221. Thus, the defendants were made well aware by the underwriters' third-party due diligence reports, as well as from their own due diligence, that a high number of the Mortgage

Loans had been red-flagged by those third-party reviews, yet were waived for inclusion in the securitizations anyway by the underwriters. In other words, they knew the Offering Materials were false and misleading.

C. Other Confidential Witness Testimony Further Confirms' Defendants' Knowledge

222. Confidential Witness 1 ("CW1") was a Senior Mortgage Operator within GMAC during 2004 and 2005. CW1's team was responsible for reviewing loan applications and files before closing, in order to approve GMAC's funding of the loan. CW1 believes that the loans CW1's group worked on were designated for sale in loan pools.

223. The loans CW1's team reviewed had already been flagged by automated underwriting systems as being outside normal guidelines. CW1's team, and those like it, were to manually review the file to determine if they could be "tweaked" enough to allow approval of the loan. According to CW1, "There were ways to get any loan approved," and CW1's job was "to make a loan look to be a much prettier package" than it really was.

224. According to CW1, beginning in 2005 there was a pressure to approve loans that did not meet guidelines, and that lacked any compensating features. Whereas things "made sense" before, according to CW1, room was made for a new supervisor that "threw all [CW1] knew out the window."

225. CW1 informed the supervisor that such changes would result in the exposure for the company by way of "buy-backs," but the supervisor did not care and just wanted to "make deals work." CW1 felt pressure and was told such things as "don't be such a hard ass."

226. In addition to the explicit pressure, a change was made that CW1's underwriting team could no longer use other personnel to help complete and clear loan files. This lead to additional time demands on the underwriters, causing underwriters to let missing paperwork

(such as recent pay stubs) in the loan files slide in order to keep up with the expected turn times. Further, the policy was changed such that loan officers – who were paid by GMAC on commission – were allowed to contact underwriters directly – making the environment even more like a boiler room.

227. According to CW1, though other underwriters bent to the new pressure and approved loans despite a lack of compensating features, CW1 left.

228. CW1 gave a particular example of how debt-to-income figures could be manipulated to justify approval. One DTI standard excluded car loans that were less than six months to be paid off. If a credit report was outdated, the underwriter would assume that additional payments had been made in the time since the credit report – then further assume the borrower would make additional payments in the time before loan closing. Making such assumptions, the underwriters would then leave out the car loan from the DTI calculation.

229. As to owner-occupancy, CW1 said that the loan files contained information that could be used to verify owner-occupancy declarations. For instance, CW1 would look for letters from prior landlords confirming they had received a Notice to Vacate, or would call landlords directly. Or, borrowers who owned prior properties were required to show that the first home had been sold. CW1 looked to confirm declarations of other properties being "second homes" (with the property being currently mortgaged the occupied one) by comparing the value of the "vacation home" to the value of the property being mortgaged.

230. As above, CW6 worked within Homecomings. However, according to CW6, there were also auditors in other parts of the GMAC organization that reviewed Homecomings' loan files for underwriting guideline compliance, including within the "investor sales teams," who conducted a "more intense" review of the loans that were to be sold to third parties. This

further confirms defendants would have been knowledgeable about the lax practices of its affiliated-originator.

D. Evidence of Residential Funding's Improper "Bulk Buying" Procedures

231. MBIA's review of the loan files and other parts of its investigation undertaken in its role as the defendants' insurer found that the non-compliant nature of many of the loans it reviewed was due to the systemic abuse of underwriting "exceptions." According to MBIA, a "significant number" of the "exception" loan files MBIA reviewed did not even identify which supposed exception was being relied upon, let alone contain sufficient documentation to justify the use of such an exception. In addition, MBIA found that for a "significant number" of the loans it reviewed were instead approved based on the secret abuse of three practices that resulted in large numbers of non-compliant loans being contributed into securitization programs.

232. According to MBIA, first, Residential Funding improperly abused "negotiated commitments," where it agreed to buy future loans from the originator that failed to comply with Residential Funding's underwriting guidelines. Second, it improperly abused a "bulk purchase program" where it agreed to purchase a large amount of pre-existing loans that Residential Funding would not then confirm whether they had been originated in compliance with Residential Funding's underwriting guidelines. Finally, Residential Funding underwrote or purchased loans using an automated system, Assetwise, that did not in fact analyze the proposed mortgages in accordance with Residential Funding's underwriting guidelines. According to MBIA, these practices all helped contribute to the "substantial and material" number of non-compliant loans that were found in the reviewed securitization pools.

233. On information and belief, based in part on the overlapping nature of the certificates studied by MBIA and those at issue here, these same practices were also used and abused with respect to the Mortgage Loans at issue here. Such practices represent conscious

decisions by the defendants to pool loans that they had no idea as to whether they in fact met any of their claimed underwriting guidelines. As such, these practices show the defendants knew of, or were indifferent to, the falsity of the Offering Materials.

234. The results of MBIA's study is corroborated by the testimony of CW5. As discussed above, in 2004-2005, according to CW5, Residential Funding dictated that its affiliated originator Homecomings produce no more than fifty percent of its loans through fully-documented processes. According to CW5, it did this because it felt other products were more profitable, and wanted the alternative products for use in its securitizations.

235. As also discussed above, according to CW5, even though the automated underwriting system was being manipulated, and even though low-doc loans could be manipulated even more, the system was still rejecting too many loans. The resulting delay in approval by having to manually approve the rejected loans caused the company to lose business. Thus, according to CW5, it turned to "bulk buy" procedures.

236. According to CW5, Residential Funding would buy hundreds of millions of fully-funded loans at a time. The loans were not put through the automated system until Residential Funding won the "bid." Only then did Residential Funding conduct due diligence. However, it would not perform due diligence on all the files, but only a small sample. The sample would decrease with each successive purchase from that seller – eventually such that no testing was done. According to CW5, this allowed Residential Funding to pursue fewer and fewer repurchase demands from the bulk-sellers. "It makes for a better relationship if you're not kicking back a lot of loans."

E. Evidence That the Defendants Knew the Appraisals Were Falsely Inflated

237. As above, the appraised value of a mortgaged property is a key component in the LTV and CLTV ratios. Defendants knew at the time the appraisals were false and baseless, and

thus did not genuinely believe at the time the disclosed statistics were accurate. This is supported, as above, by the consistency of the wide disparities in Allstate's Certificates, discovered through use of loan-level, contemporaneous information. It is also supported by evidence of the systemic problems within defendants' underwriting operations, and by statements provided by a confidential witness, and other testimony that has been provided by industry insiders.

238. CW1 received appraisals that CW1 knew were inflated, but was pressured to approve loans anyway. For instance, appraisals would come in using "comparables" (or "comps") that were in no way comparable to the property being mortgages – such as a home sitting on a canal being compared to a beachside property. In addition, appraisers were allowed to make the comp values even higher using "line adjustments," increasing the aggregate total comp value by as much as 25%.

239. Also, according to CW1, GMAC required that appraisals be obtained from a specific-pre-approved list. CW1 said that some of the appraisers should have been kicked off for consistently submitting inflated appraisals, or submitting the same exact appraisal analysis on every appraisal they submitted – indicating they were not actually doing any independent analysis on each unique property.

240. In addition, according to CW3, the QC team at Homecomings was supposed to ensure that the underwriters had run the appraisal's recommendation through an automated valuation model. As above, an industry-accepted AVM model, using the same type of contemporaneous data that would have likely been used in defendants' models, shows large discrepancies from what figures Defendants put into the Offering Materials.

241. Further, on information and belief, the defendants used their economic leverage over the appraisal process to make the appraised values fit the loan they wanted to approve, rather than to fit the true value of the property. This further establishes that they knew the LTV and CLTV statistics were false.

242. That the misstatements go heavily in one direction – seriously inflated values leading to materially understated LTV and CLTV statistics – is itself persuasive evidence that the overstatements revealed by Allstate's recent analysis were not mere errors or differences of opinion, but conscious misrepresentations. This is further confirmed by Congressional testimony and other statements made by those in the industry about the widespread corruption in the appraisal processes during all times relevant to this Complaint.

243. For instance, Richard Bitner, a former executive of a subprime lender for fifteen years, testified in April 2010 that "the appraisal process [was] highly susceptible to manipulation," and that the rise in property values was in part due to "the subprime industry's acceptance of overvalued appraisals." Similarly, Patricia Lindsay, a former wholesale lender, testified in April 2010 that in her experience appraisers were "often times pressured into coming in 'at value,'" i.e., at least the amount needed for the loan to be approved. The appraisers "fearing" their "future business and their livelihoods" would choose properties "that would help support the needed value rather than finding the best comparables to come up with the most accurate value."

244. And Jim Amorin, President of the Appraisal Institute, testified in April 2009 that "in many cases, appraisers are ordered or severely pressured to doctor their reports to convey a particular, higher value for a property, or else never see work from those parties again . . . [T]oo often state licensed and certified appraisers are forced into making a "Hobson's Choice.'"

245. The FCIC's January 2011 report recounts (at 91) the similar testimony of Dennis J. Black, an appraiser with 24 years of experience who held continuing education services across the country. "He heard complaints from appraisers that they had been pressured to ignore missing kitchens, damaged walls, and inoperable mechanical systems. Black told the FCIC, 'The story I have heard most often is the client saying he could not use the appraisal because the value was [not] what they needed.' The client would hire somebody else."

V. ALLSTATE'S DETRIMENTAL RELIANCE AND DAMAGES

246. In making the investments, Allstate relied upon the defendants' representations and assurances regarding the quality of the mortgage collateral underlying the Certificates, including the quality of their underwriting processes. Allstate received, reviewed, and relied upon the Offering Materials, which described in detail the Mortgage Loans underlying each offering. Offering Materials containing the representations outlined above and in the Exhibits (or nearly identical, materially similar counterparts thereto) were obtained, reviewed, and relied upon before any purchase was made.

247. In purchasing the Certificates, Allstate justifiably relied on the defendants' false representations and omissions of material fact detailed above, including the misstatements and omissions in the Offering Materials. These representations materially altered the total mix of information upon which Allstate made its purchasing decisions.

248. But for the misrepresentations and omissions in the Offering Materials, Allstate would not have purchased or acquired the Certificates as it ultimately did, because those representations and omissions were material to its decision to acquire the Certificates, as described above.

249. Allstate's losses on the Certificates have been much greater than they would have been if the Certificates and the loans underlying them were as the defendants described them to

be. The false and misleading statements of material facts and omissions of material facts in the Offering Materials directly caused Allstate damage, because the Certificates were in fact far riskier than the defendants described them to be, and that risk has actually already materialized. For example, the fact that the loans were not secured by owner-occupied properties at their claimed rate made them more prone to default. Owners who do not occupy their properties are more likely to default on their loans, which made the Certificates poorer investments, accelerated the Certificates' decline in value, and greatly worsened Allstate's losses.

250. In fact, the loans underlying the Certificates have experienced default and delinquency at extraordinarily high rates due to the abandonment of the disclosed underwriting guidelines. These rates of default are much higher than what a pool of loans that had the features defendants' described would have experienced in the same economic conditions. The income and principal payments that Allstate received have been less than Allstate expected under the "waterfall" provisions of the securitizations. Further, the higher default rates have eaten into the safety "buffer" such features as overcollateralization were supposed to provide, meaning the prospects for full receipt of the payments once expected have dropped significantly.

251. The high rates of default, the lower safety "buffer" left in its wake, and the discovery of fundamental irregularities in the defendants' underwriting practices all signal increased risk in the Certificates. As a fundamental financial principle, the diminished prospect of continued cash flows – i.e., perceived and actual risk – dictates that the Certificates are currently less valuable than they would have been but not for the misrepresentations. Thus, Allstate is not seeking recovery for (or, in the alternative, to rescind based on) future potential losses, but recovery based on its past and current damages.

252. Even in the context of the real estate crisis, the Certificates would have held most, if not all, their value had the security underlying the loans been as represented by the defendants in their Offering Materials, because such mortgage pools would not have defaulted at nearly the same high rate. This decreased value is evidenced collectively by, but need not be measured solely by, among other things: (a) the high rates of default and delinquency of the Mortgage Loans; (b) the Certificates' plummeting ratings; (c) lower-than-expected past and current income streams from the Certificates; and (d) lower market value.

253. There are several potential ways of valuing a mortgage-backed security. One of the potential ways that lower value can be measured, and part of the evidence that Allstate has been damaged, can be found in secondary-market pricing. Though the market may have temporarily "seized up" during the financial crisis, it has since recovered and there was and is a functioning, liquid secondary market for mortgage-backed securities such as the Certificates here. Numerous brokers are active in, and have trading desks specifically dedicated to, the secondary market for RMBS, including without limitation Credit Suisse, Barclays, Bank of America, Citigroup, Deutsche Bank, Goldman Sachs, Royal Bank of Scotland, J.P. Morgan, Nomura, and Morgan Stanley. Indeed, Allstate has already sold some of these Certificates on the secondary market.

254. According to data provided to the FCIC, between May 2007 and November 2008 Goldman Sachs alone bought and sold $17 billion worth of RMBS cash securities, and $32 billion worth of credit default swaps linked to RMBS securities, representing a total of 7,000 trades. These figures demonstrate the liquidity in the secondary market for RMBS.

255. The *Wall Street Journal* recently reported that "AIG Bonds are in Demand," finding that the Federal Reserve Bank of New York's "much anticipated" auction of $1.5 billion

in subprime bonds was "deemed successful by industry participants." "Industry participants said dealers saw solid interest from investors." According to a CEO quoted by the article, "The overwhelming majority of the list [of bonds] traded at more than the estimated price, indicating healthy demand by dealers and investors."

256. The *Wall Street Journal* separately also recently quoted the Federal Reserve Bank of Dallas President Richard Fisher as saying that "there is plenty of liquidity" in the markets to drive growth. One of the signs he pointed to was the "rejuvenation of the subprime markets."

257. Allstate purchased the Certificates not only for their income stream, but held them on a "available for sale" basis, with the expectation that some of Allstate's RMBS portfolio could and would be sold on the existing secondary market. Some of these Certificates have already been sold on the secondary market. Allstate thus viewed market value as a critical aspect of the Certificates it purchased. Allstate has lost much of the market value in these securities – much more than it would have lose if the Certificates had been backed by loans of the quality the defendants' represented, which would have held up to the recent economic downturn much better than those loans the defendants actually included in these Certificates.

258. In short, defaults were much higher than they would have been if the Mortgage Loans had been properly underwritten. This has caused the value of the Certificates to plummet. This is evidenced by, but not contingent entirely upon, the drop in market value of the securities. As loans which were properly underwritten would have withstood the same economic conditions much better than those defendants offloaded onto Allstate here, and thus securities backed by loans with the features defendants describe would currently have a much higher value than Allstate's Certificates, Allstate was damaged by defendants' wrongdoing.

259. Allstate's damages here are separate and severable from Allstate's losses caused by the economic downturn, and such could be reliably measured through the discovery process. For instance, but without limitation, upon discovery of the full extent of defendants' misrepresentations, expert testimony may compare the performance of the *actual* Certificates and/or loan pools here, with the performance of securities and/or loan pools that had the features described in the Offering Materials, with Allstate's damages being the difference. However, it is well beyond Allstate's pleading burden to perform such analysis here, and in any event the full extent of the defendants' misrepresentations is unknown as Allstate does not have access to the loan files.

FIRST CAUSE OF ACTION
(Common-law Fraud)

260. Allstate realleges each allegation above as if fully set forth herein.

261. The material representations set forth above were fraudulent, and the defendants' representations falsely and misleadingly misrepresented and omitted material statements of fact. The representations at issue are identified above, further identified in Exhibits D through BB, and are summarized in Section II above.

262. Each of the defendants knew their representations and omissions were false and/or misleading at the time they were made, or made such representations and omissions without knowledge of their truth or falsity.

263. Each made the misleading statements for the purpose of inducing Allstate to purchase the Certificates.

264. Allstate justifiably relied on the defendants' false representations and misleading omissions.

265. Had Allstate known the true facts regarding the defendants' underwriting practices and quality of the loans making up the securitizations, it would not have purchased the Certificates as it ultimately did.

266. As a result of the foregoing, Allstate has suffered damages according to proof or, in the alternative, Allstate has the right to rescind the fraudulently induced Certificate purchases and to require the defendants to repurchase the Certificates at their original cost, plus interest.

SECOND CAUSE OF ACTION
(Negligent Misrepresentation)

267. Allstate realleges each allegation above as if fully set forth herein.

268. Including not only the Certificates at issue here but others not part of this action, Allstate made forty-nine purchases in numerous offerings of mortgage-backed securities that the defendants securitized and sold.

269. Because the defendants arranged the securitizations, and originated or acquired, underwrote, and serviced all of the underlying mortgage loans, they had unique and special knowledge about the loans in the offerings. In particular, they had unique and special knowledge and expertise regarding the quality of the underwriting of those loans as well as the servicing practices employed as to such loans.

270. Because Allstate could not evaluate the loan files for the Mortgage Loans underlying its Certificates, and because Allstate could not examine the underwriting quality or servicing practices for the Mortgage Loans in the securitizations on a loan-by-loan basis, it was heavily reliant on the unique and special knowledge of these defendants regarding the Mortgage Loans when determining whether to make each investment of Certificates. Allstate was entirely reliant on the defendants to provide accurate information regarding the loans in engaging in that

analysis. Accordingly, the defendants were uniquely situated to evaluate the economics of each Securitization.

271. Going back seven years over forty-nine separate purchases, Allstate relied on the defendants' unique and special knowledge regarding the quality of the underlying Mortgage Loans and their underwriting when determining whether to invest in the Certificates at issue in this action. This longstanding relationship, coupled with their unique and special knowledge about the underlying loans, created a special relationship of trust, confidence, and dependence between the defendants and Allstate.

272. The defendants were aware that Allstate relied on their unique and special expertise and experience and depended upon them for accurate and truthful information. They also knew that the facts regarding their compliance with their underwriting standards were exclusively within their knowledge.

273. Based on their expertise, superior knowledge, and relationship with Allstate, the defendants owed a duty to Allstate to provide complete, accurate, and timely information regarding the Mortgage Loans and the offerings. These defendants breached their duty to provide such information to Allstate.

274. They likewise made misrepresentations in order to induce Allstate's investment in the offerings. The misrepresentations are set forth above and in Exhibits D through BB. At the time they made these misrepresentations, the defendants knew, or at a minimum were negligent in not knowing, that these statements were false, misleading, and incorrect. Such information was known to the defendants but not known or readily known to Allstate, and the defendants knew that Allstate was acting in reliance on mistaken information.

275. Allstate reasonably relied on the information the defendants did provide and was damaged as a result of these misrepresentations. Had Allstate known the true facts regarding the defendants' underwriting practices and the quality of the loans making up the securitizations, it would not have purchased the Certificates as it ultimately did.

276. The defendants were in the business of providing information for use by others, including Allstate. Specifically but without limitation, they were in the business of providing information by way of the Offering Materials so that investors could rely on them in deciding whether to invest in the securities being offered. Though this information was publically available, due to the complexities of these Certificates and the nature of the market for mortgage-backed securities, the Offering Materials were primarily intended for the much smaller circle of institutional purchasers.

277. The defendants' material misrepresentations and omissions set forth above were made without any reasonable ground for believing that the representations were true.

278. As a result of the foregoing, Allstate has suffered damages according to proof.

THIRD CAUSE OF ACTION
(Fraudulent Inducement)

279. Allstate realleges each allegation above as if fully set forth herein.

280. Allstate was fraudulently induced to purchase the Certificates by the defendants' misrepresentations and omissions of material facts. The materially untrue statements and omissions of material fact in the Offering Materials are summarized above and are further set forth in the Exhibits.

281. Each of the defendants knew their representations and omissions were false and/or misleading at the time they were made. Each made the misleading statements with an intent to induce Allstate to purchase the Certificates.

282. Allstate justifiably relied on the defendants' false representations and misleading omissions in purchasing the Certificates.

283. Had Allstate known the true facts, it would not have purchased the Certificates as it ultimately did.

284. As a result of the foregoing, Allstate has the right to rescind the fraudulently induced Certificate purchases and to require the defendants to repurchase the Certificates at their original cost, plus interest.

FOURTH CAUSE OF ACTION
(Consumer Fraud Act)

285. The Certificates at issue in this case are "merchandise" as defined under the Minnesota Consumer Fraud Act, Minn. Stat. § 325F.68 ("any objects, wares, goods, commodities, intangibles, real estate, loans, or services").

286. By way of the acts, representations, and omissions set forth above, the defendants used "fraud, false pretense[s], false promise[s], misrepresentation[s], misleading statement[s], or deceptive practice[s], with the intent that others rely thereon in connection with the sale of" merchandise, in violation of Minn. Stat. § 325F.69.

287. The Minnesota Consumer Fraud Act and the Minnesota Private Attorney General statute, Minn. Stat. § 8.31, allow "any person injured," regardless of their alleged sophistication, to bring suit. *See, e.g.*, *Group Health Plan, Inc. v. Philip Morris Inc.*, 621 N.W.2d 2, 8 (Minn. 2001) ("In describing who may bring an action, subdivision 3a does so in the broadest terms, stating that '*any person* injured by a violation . . . may bring a civil action and recover damages' . . . . Neither the private remedies statute nor the substantive statutes contains any language restricting those who may sue to purchasers or consumers.") (emphasis in original, citations omitted).

288. Though Allstate's investing activities are designed to protect its stakeholders (including insureds in the state of Minnesota) through the use of safe and sound investing practices, Allstate purchased the Certificates on its own account. Allstate was not acting as a broker or merchant in connection with the purchase or potential resale of the Certificates.

289. As above, because it was the defendants that arranged the securitizations, and originated or acquired, underwrote, and serviced all of the underlying mortgage loans, they had unique and special knowledge about the loans in the offerings. In particular, they had unique and special knowledge and expertise regarding the quality of the underwriting of those loans as well as the servicing practices employed as to such loans. Allstate could not evaluate the loan files for the Mortgage Loans underlying its Certificates because those files were not provided to it. Nor could Allstate examine the underwriting quality or servicing practices for the Mortgage Loans in the securitizations on a loan-by-loan basis. The disproportionate access to the information at issue in this case between defendants and Allstate was substantial, regardless of any allegations of Allstate's more generalized level of sophistication.

290. This claim is brought for the public benefit under the Minnesota Private Attorney General statute, Minn. Stat. § 8.31, subd. 3a. The number securities at issue here, all containing the same types of misrepresentations, and the other facts set forth above all demonstrate a wide, repeated pattern of deceit by one of the country's largest issuers of these types of securities.

291. Further, even though the securities were largely purchased by institutional investors, they were publically offered, and the ramifications of fraudulent activities in the securitization market quickly spread throughout the economy. Acts such as those by defendants has spawned numerous governmental and regulatory investigations. As above, the President's

Working Group concluded that the "turmoil in the financial markets was triggered by a dramatic weakening of underwriting standards for U.S. subprime mortgages . . ."

292. Also as above, the FCIC has noted estimates that nearly thirteen million homes may eventually be lost to foreclosure. Soaring foreclosure rates do not just depress local property values, but have also been linked to such additional local problems as increases in arson rates and vandalism, including in Minnesota.

293. Enjoining defendants and discouraging others from engaging in fraudulent activities that, due to their sheer size and importance, impact everything from the world's macroeconomic status to the local neighborhood's quality of life would provide public benefits far beyond compensating Allstate's numerous stakeholders (including those in Minnesota).

294. Allstate was injured by the defendants' violations. The defendants' wrongful acts have a causal nexus to Allstate's losses incurred in connection with the Certificates it purchased.

295. As a result of the foregoing, Allstate has the right to recover its damages according to proof or, in the alternative, rescission under the Minnesota Consumer Fraud Act and the Minnesota Private Attorney General statute. In addition, pursuant to Minn. Stat. § 8.31, subd. 3a, it is entitled to its costs and attorney's fees. Allstate further requests an injunction barring defendants from continuing to engage in deceptive practices such as those described herein.

PRAYER FOR RELIEF

WHEREFORE Allstate prays for relief as follows:

An award of damages against the defendants in favor of Allstate, jointly and severally, for all damages sustained as a result of the defendants' wrongdoing, in an amount to be proven at trial, but including at a minimum:

a. Allstate's monetary losses, including loss of value and loss of principal and interest payments;

b. Attorneys' fees and costs;

c. Prejudgment interest at the maximum legal rate;

d. Entry of a permanent injunction enjoining the defendants and their respective successors, agents, officers, directors, employees, and all persons acting in concert with them from engaging in the deceptive practices complained of herein; and

e. Such other and further relief as the Court may deem just and proper.

In the alternative, in addition to injunctive relief, Allstate demands rescission and recovery of the consideration paid for the Certificates, with interest thereon. Allstate is prepared to tender the Certificates in the event the Court grants such relief.

JURY TRIAL DEMANDED

Allstate hereby demands a trial by jury on all issues triable by jury.

XI. RELIEF REQUESTED 178

XII. JURY DEMAND 178

I. NATURE OF THE ACTION

1. The Defendants identified below in ¶¶ 15-32 offered or sold approximately $2.4 billion of residential mortgage-backed securities (the "Securities" or "RMBS") to the investor Plaintiff (as defined in ¶¶ 11-13), by means of untrue statements of material facts and omissions of material fact. As a result of Defendants' untrue statements to Plaintiff in Massachusetts, Plaintiff has incurred losses exceeding $1.2 billion. Defendants' written and oral untrue statements concerned: (1) the mortgage originators' underwriting standards that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the loan-to-value ("LTV") ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Bank Defendants' due diligence of the loans and the mortgage originators' underwriting practices; and (5) various forms of credit enhancement applicable to certain tranches of Securities.

2. Defendants' statements of material facts were not true. In reality, each of the Defendants offered to sell and sold Securities backed by mortgages that came from a small group of now notorious subprime mortgage originators that violated their own underwriting standards, used faulty appraisals that overvalued the mortgaged properties, and accepted untrue information in loan applications.

3. The Wall Street Bank Defendants were complicit in creating an environment of improper lending practices by the mortgage originators; indeed, in many instances the Wall Street Banks had personnel on site at the mortgage originators to monitor their loan underwriting practices. The Wall Street Bank Defendants also fostered the environment for, permitted, and profited from the mortgage originators' rampant violations of sound lending practices. Driven to profit from the lucrative securitization business, the Wall Street Bank Defendants demanded enormous volumes of loans to securitize and sell to investors in the form of RMBS, leading to erosion in lending standards.

4. As a result of the relationships between mortgage originators and the Wall Street Bank Defendants, the Wall Street Banks had superior access to information about the business and lending practices of the mortgage originators and data about the loans, such as loan attributes, beyond what was conveyed to investors in the offering documents for RMBS. Nevertheless, the Wall Street Bank Defendants repeated the untrue information from the mortgage originators in the offering documents used to sell the Securities to investors.

5. While the Wall Street Banks stated to Plaintiff that they performed careful due diligence into the loans and the mortgage originators' underwriting practices, the Wall Street Banks conducted inadequate due diligence and failed to satisfy their own responsibilities. Thus, the statements of material facts that these Wall Street Banks made to Plaintiff in Massachusetts while offering or selling the Securities were untrue and omitted material information.

6. In addition, the Wall Street Banks materially aided the Depositor Defendants, who also offered or sold the Securities to the Plaintiff. The Depositor Defendants are Special Purpose Vehicles ("SPVs") that were created as part of the securitization process to acquire and securitize the loans for sale to investors. Working together with the Wall Street Banks, the Depositor Defendants drafted the offering documents that contained the untrue statements of material facts and circulated them to investors.

7. The Plaintiff brings this action to recover damages incurred as a result of the Defendants' offer or sale of securities in Massachusetts by means of untrue statements of material facts or omissions of material facts in violation of Mass. Gen. Laws Ch. 110A, § 410 (the "Massachusetts Securities Act").

8. Plaintiff alleges the following upon personal knowledge as to itself and its own acts and upon information and belief as to all other matters. Plaintiff's information and belief are based on the investigation conducted by and through counsel. The investigation included interviews with confidential witnesses; documents filed in connection with investigations and actions brought by the United States Securities and Exchange Commission (the "SEC"), the Attorneys General of Massachusetts, New York, and California, and private litigants; testimony

before the Federal Financial Crisis Inquiry Commission; a report of a court-appointed bankruptcy trustee; news reports; interviews published in the financial press; Congressional testimony; and other available information. Some of the facts related to Plaintiff's allegations are known only by the Defendants named herein, or are exclusively within their custody or control. Plaintiff believes that additional evidentiary support for the allegations set forth below will be developed after a reasonable opportunity for discovery.

II. JURISDICTION AND VENUE

9. Jurisdiction is proper because the offer or sale of the Securities by the Defendants occurred in Massachusetts (see Mass. Gen. Laws Ch. 110A, § 414). In addition, Plaintiff's principal place of business is located in the Commonwealth of Massachusetts, and many of the Defendants have offices in Massachusetts. The amount in controversy exceeds $25,000.

10. Venue is proper pursuant to Mass. Gen. Laws Ch. 223, § 1 and Superior Court Administrative Directive No. 09-01 because many of the Defendants have usual places of business in Suffolk County.

III. THE PARTIES

a. Plaintiff

11. Cambridge Place Investment Management Inc. ("CPIM") is a Delaware corporation with its principal place of business in Concord, Massachusetts.

12. CPIM was responsible for the sourcing, review, analysis, and purchase decisions for U.S. investments for its clients, including Caliber Global Investment Ltd., CAMBER 3 PLC, CAMBER 4 PLC, CAMBER 5 Ltd, CAMBER 7 PLC, CPIM Structured Credit Fund 20 LP, CPIM Structured Credit Fund 500 LP, CPIM Structured Credit Fund 1000 LP, and CPIM Structured Credit Fund 1500 LP (collectively, the "Clients").

13. CPIM is the exclusive assignee of, and the exclusive attorney-in-fact for and with respect to, all of the Clients' claims relating to the offer and sale of Securities that are the subject of this Complaint. CPIM, as such exclusive assignee and attorney-in-fact of the Clients, is referred to herein as the "Plaintiff."

14. Plaintiff was solicited in Massachusetts by investment firms, underwriters, and dealers (the "Wall Street Bank Defendants") and by the Depositor Defendants (as defined in ¶ 31), who offered or sold the Securities to Plaintiff.

b. The Wall Street Bank Defendants

15. **Morgan Stanley & Co., Inc.**: Defendant Morgan Stanley & Co. Incorporated ("Morgan Stanley") is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 1585 Broadway, New York, New York 10036 and an office located at 1 International Place, Boston, Massachusetts 02110. The Defendant Morgan Stanley is the broker-dealer subsidiary of Morgan Stanley, a Delaware corporation headquartered in New York, New York. Defendant Morgan Stanley offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Morgan Stanley sales representatives who offered or sold Securities to Plaintiff included Howard Hennick, Paul Knepple, and Ryan Rossitto. Morgan Stanley, Knepple, and Rossitto are all licensed to sell securities in Massachusetts. Other Morgan Stanley representatives who offered or sold Securities to Plaintiff included investment bankers Michael Dubeck, Howard Hubler, Steven Shapiro (who is also licensed to sell securities in Massachusetts), and Terry Smith. The Securities that Morgan Stanley offered or sold to Plaintiff are listed in Appendix A.

16. **Citigroup Global Markets, Inc.**: Defendant Citigroup Global Markets, Inc. ("Citigroup") is a New York corporation and an SEC-registered broker-dealer with its principal place of business located at 388 Greenwich Street, New York, New York. Citigroup representatives from Citigroup's office located at 2 International Place, Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Citigroup sales representatives who offered or sold Securities to Plaintiff included Douglas Meyer, John W. Murray (the manager of Citigroup's Boston office), and David Crean. Citigroup, Murray, and Crean are all licensed to sell securities in Massachusetts. Other

Citigroup representatives who offered or sold Securities to Plaintiff included investment bankers James Demare, Matthew Cherwin, and Philip Seares (who is also licensed to sell securities in Massachusetts). The Securities that Citigroup offered or sold to Plaintiff are listed in Appendix B.

17. **Credit Suisse Securities (USA) LLC**: Defendant Credit Suisse Securities (USA) LLC ("Credit Suisse") is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at 11 Madison Avenue, New York, New York. Credit Suisse representatives from Credit Suisse's office located at 1 Federal Street, Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Credit Suisse sales representatives who offered or sold Securities to Plaintiff included James "Jay" Allen (the manager of Credit Suisse's Boston office) and Andrew Mingle. Credit Suisse, Allen, and Mingle are all licensed to sell securities in Massachusetts. Other Credit Suisse representatives who offered or sold Securities to Plaintiff included syndicate manager Tricia Hazelwood and investment bankers Christopher Schoen, Patrick Dodman, Gregory Richter, and Mark Tecotzky. The Securities that Credit Suisse offered or sold to Plaintiff are listed in Appendix C.

18. **RBS Securities, Inc., f/k/a Greenwich Capital Markets, Inc.**: Defendant RBS Securities, Inc., f/k/a Greenwich Capital Markets, Inc. ("Greenwich Capital"), is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 600 Washington Boulevard, Stamford, Connecticut. Greenwich Capital representatives from Greenwich Capital's office located at 28 State Street, Boston, Massachusetts 02109, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Greenwich Capital sales representatives who offered or sold Securities to Plaintiff included Christopher J. Csrnko and Jeffrey Dimodica. Greenwich Capital, Csrnko, and Dimodica are all licensed to sell securities in Massachusetts. Other Greenwich Capital representatives who offered or sold

Securities to Plaintiff included investment banker Adam Smith. The Securities that Greenwich Capital offered or sold to Plaintiff are listed in Appendix D.

19. **Deutsche Bank Securities Inc.**: Defendant Deutsche Bank Securities Inc. ("Deutsche Bank") is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 60 Wall Street, New York, New York. Deutsche Bank representatives from Deutsche Bank's office located at 225 Franklin Street, Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Deutsche Bank sales representatives who offered or sold Securities to Plaintiff included Alexandra DaCosta, Christopher Del Col, Laurence Pike, and Chris Walter. Deutsche Bank, DaCosta, Del Col, and Pike are all licensed to sell securities in Massachusetts. Other Deutsche Bank representatives who offered or sold Securities to Plaintiff included syndicate managers Fred Brettschneider (who is also licensed to sell securities in Massachusetts) and Brian Wiele, trader Greg Lippman, and investment bankers Michael Commaroto, Paul Mangione, Joseph Swartz, and Ryan Stark. The Securities that Deutsche Bank offered or sold to Plaintiff are listed in Appendix E.

20. **Merrill Lynch, Pierce, Fenner & Smith, Inc.**: Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated ("Merrill Lynch") a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at One Bryant Park, New York, New York. Merrill Lynch is a wholly owned subsidiary of Merrill Lynch & Co., which became a wholly owned subsidiary of Bank of America Corporation on January 1, 2009. Merrill Lynch representatives from Merrill Lynch's office located at 1 Financial Center, Boston, Massachusetts 02111, offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Merrill Lynch sales representatives who offered or sold Securities to Plaintiff included William Farrell, James Peck, and Greg St. Pierre. Merrill Lynch, Farrell, Peck, and St. Pierre are all licensed to sell securities in Massachusetts. Other Merrill Lynch

representatives who offered or sold Securities to Plaintiff included investment bankers Matthew Whalen, Paul Park, and Ketan Parekh. The Securities that Merrill Lynch offered or sold to Plaintiff are listed in Appendix F.

21. **UBS Securities LLC**: Defendant UBS Securities LLC ("UBS") is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at 677 Washington Boulevard, Stamford, Connecticut 06901 and an office located at 1 International Place, Boston, Massachusetts 02110. UBS offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The UBS sales representatives who offered or sold Securities to Plaintiff included Blake Myers. UBS and Myers are licensed to sell securities in Massachusetts. Other UBS representatives who offered or sold Securities to Plaintiff included syndicate managers Jack McCleary and Richard Onkey and investment bankers Jeffrey "Jay" Lown, Carole Mortenson, and Ketan Parekh. The Securities that UBS offered or sold to Plaintiff are listed in Appendix G.

22. **Goldman, Sachs & Co.**: Defendant Goldman, Sachs & Co. ("Goldman Sachs") is a New York partnership and an SEC-registered broker-dealer with its principal place of business located at 200 West Street, New York, NY 10282. Goldman Sachs maintains an office at 125 High Street, Boston, Massachusetts 02110. Goldman Sachs offered or sold the Securities to Plaintiff in at least one face-to-face meeting and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Goldman Sachs sales representatives who offered or sold Securities to Plaintiff included Michael Cagnassola, Eric Feinstein, Samuel Hancock, and Lorin Radtke. Goldman Sachs, Cagnassola, Feinstein, Hancock, and Radtke are all licensed to sell securities in Massachusetts. Other Goldman Sachs representatives who offered or sold Securities to Plaintiff included investment banker Kevin Gasvoda, who is also licensed to sell securities in Massachusetts. The Securities that Goldman Sachs offered or sold to Plaintiff are listed in Appendix H.

23. **J.P. Morgan Securities Inc.:** Defendant J.P. Morgan Securities Inc. ("J.P. Morgan") is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 383 Madison Avenue, New York, New York 10179. J.P. Morgan is a wholly owned subsidiary of JPMorgan Chase & Co., a financial holding company with its principal place of business located at 270 Park Avenue, New York, New York 10017. J.P. Morgan maintains an office at 2 International Place, Boston, Massachusetts 02110. J.P. Morgan offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The J.P. Morgan sales representatives who offered or sold Securities to Plaintiff included James McLaughlin of J.P. Morgan's Boston office. J.P. Morgan and McLaughlin are both licensed to sell securities in Massachusetts. Other J.P. Morgan representatives who offered or sold Securities to Plaintiff included syndicate managers Andrew Cherna (who is also licensed to sell securities in Massachusetts) and Brian McDonald. The Securities that J.P. Morgan offered or sold to Plaintiff are listed in Appendix I.

24. **J.P. Morgan, successor to Bear Stearns:** In addition to Plaintiff's claims based on J.P. Morgan's own offers or sales of Securities to Plaintiff, Plaintiff also brings claims against J.P. Morgan as successor-in-interest to Bear Stearns & Co., Inc. ("Bear Stearns"), which was a Delaware corporation and was an SEC-registered broker-dealer with its principal place of business located at 383 Madison Avenue, New York, New York 10179. On October 1, 2008, J.P. Morgan merged with and into Bear Stearns, with the surviving entity being Defendant J.P. Morgan. Bear Stearns representatives from Bear Stearns' office located at 1 Federal Street, Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Bear Stearns sales representatives who offered or sold Securities to Plaintiff included Daniel Kenslea, Jr., Felix Moy, Andrew Reese, and Steven Scari. Bear Stearns was, and Kenslea, Moy, Reese, and Scarri all are, licensed to sell securities in Massachusetts. Other Bear Stearns representatives who offered or sold Securities to Plaintiff

included investment bankers Scott Eichel, Keith Lind, and Chris Scott. Eichel and Lind are also licensed to sell securities in Massachusetts. The Securities that Bear Stearns offered or sold to Plaintiff are listed in Appendix J.

25. **Countrywide Securities Corporation**: Defendant Countrywide Securities Corporation ("Countrywide") is a California corporation with its principal place of business located at 4500 Park Granada, Calabasas, California. Countrywide was an SEC-registered broker-dealer during the relevant period. Countrywide was a subsidiary of Countrywide Financial Corporation, which merged on July 1, 2008 with a wholly owned subsidiary of Bank of America Corporation, making Countrywide an indirect wholly owned subsidiary of Bank of America. Countrywide offered or sold the Securities to Plaintiff in Massachusetts by making telephone calls and sending documents to Plaintiff in Massachusetts. The Countrywide sales representatives who offered or sold Securities to Plaintiff included Matthew Kennedy, who is licensed to sell securities in Massachusetts, and Elaine Pang. The Securities that Countrywide offered or sold to Plaintiff are listed in Appendix K.

26. **FBR Capital Markets & Co., f/k/a/ Friedman, Billings, Ramsey & Co., Inc.**: Defendant FBR Capital Markets & Co., formerly known as Friedman, Billings, Ramsey & Co., Inc. ("FBR"), is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 1001 Nineteenth Street North, Arlington, Virginia 22209. FBR maintains an office at 100 Federal Street, Boston, Massachusetts 02110. FBR offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. The FBR sales representatives who offered or sold Securities to Plaintiff included John Calabrese. Other FBR representatives who offered or sold Securities to Plaintiff included investment bankers Paul Miller and Scott Valentin. FBR, Calabrese, Miller, and Valentin are all licensed to sell securities in Massachusetts. The Securities that FBR offered or sold to Plaintiff are listed in Appendix L.

27. **HSBC Securities (USA), Inc.**: Defendant HSBC Securities (USA), Inc. ("HSBC") is a Delaware corporation and an SEC-registered broker-dealer with its principal place

of business located at 452 Fifth Avenue, New York, New York. HSBC offered or sold the Securities to Plaintiff in Massachusetts by making telephone calls and sending documents to Plaintiff in Massachusetts. The HSBC sales representatives who offered or sold Securities to Plaintiff included Michael Sheldon and Wendy Horn. HSBC and Horn are licensed to sell securities in Massachusetts. Other HSBC representatives who offered or sold Securities to Plaintiff included investment bankers Jon Voigtman, Martin Priest, and Thomas Benz. The Securities that HSBC offered or sold to Plaintiff are listed in Appendix M.

28. **Banc of America Securities LLC**: Defendant Banc of America Securities LLC ("Banc of America") is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at One Bryant Park, New York, New York 10036. Banc of America offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Banc of America's sales representatives who offered or sold Securities to Plaintiff included Thomas Kanes and Kalefe Wright. Banc of America, Kanes, and Wright are all licensed to sell securities in Massachusetts. Other Banc of America representatives who offered or sold Securities to Plaintiff included syndicate manager Patrick Beranek (who is also licensed to sell securities in Massachusetts) and investment bankers Chris Henteman, Paul Jablansky (who is also licensed to sell securities in Massachusetts), and Jeff Willoughby. The Securities that Banc of America offered or sold to Plaintiff are listed in Appendix N.

29. **Residential Funding Securities, LLC, d/b/a GMAC RFC Securities**: Defendant Residential Funding Securities, LLC, f/k/a Residential Funding Securities Corporation ("GMAC"), is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at One Meridan Crossings, Richfield, Minnesota 55423. Representatives of GMAC offered or sold the Securities to Plaintiff in at least one meeting in Massachusetts and by making telephone calls and sending documents to Plaintiff in Massachusetts. GMAC sales representatives who offered or sold Securities to Plaintiff

included Robert Djorup and Ted Kallina. The Securities that GMAC offered or sold to Plaintiff are listed in Appendix O.

30. **Barclays Capital Inc.**: Defendant Barclays Capital Inc. ("Barclays") is a Connecticut corporation and an SEC-registered broker-dealer with its principal place of business located at 745 Seventh Avenue, New York, New York 10019, and an office at 125 High Street, Boston, Massachusetts 02110. Barclays offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Barclays' sales representatives who offered or sold Securities to Plaintiff included James Hurst and Maria Palermo. Barclays and Hurst are licensed to sell securities in Massachusetts. Other Barclays representatives who offered or sold Securities to Plaintiff included investment bankers John Carroll and Paul Menefee. The Securities that Barclays offered or sold to Plaintiff are listed in Appendix P.

c. The Depositor Defendants

31. To securitize and sell mortgage loans to investors, financial institutions created SPVs to serve various roles in the securitization process. "Depositors" purchased or acquired the mortgage loans, securitized them, and were the "issuers" of the Securities. *See* 17 CFR § 230.191. Working together with the Wall Street Banks, the Depositor Defendants set forth in the table below prepared and circulated the registration statements, accompanying prospectuses, and subsequent prospectus supplements, or private placement memoranda, through which the Depositor Defendants and the Wall Street Bank Defendants offered and sold the Securities and filed the registration statements, prospectuses, and prospectus supplements with the SEC.

32. The Defendants identified in ¶ 31 are collectively referred to herein as the "Depositor Defendants."

IV. FACTUAL BACKGROUND

a. The Mechanics of Mortgage Securitization

33. Mortgage pass-through securities represent interests in a pool of mortgages; the securities are shares in the pool that are sold to investors. The securities represent an equity interest in the "issuing trust" that holds the pool. The pass-through securities entitle the holder to payments from the pool of mortgage loans. Although the structure and underlying collateral of the mortgages may vary, the basic principle of pass-through securities remains the same: The cash flow from the pool of mortgages is "passed through" to the securities holders when payments are made by the underlying mortgage borrowers.

34. The first step in creating a mortgage pass-through security is the acquisition by a "depositor" of an inventory of loans from a "sponsor" or "seller," which either originates the loans or acquires the loans from other mortgage originators, in exchange for cash. The type of loans in the inventory may vary, including conventional, fixed-rate or adjustable-rate mortgage loans (or mortgage participations), secured by first liens, junior liens, or a combination of first and junior liens, with various lifetimes to maturity. The depositor then transfers, or deposits, the acquired pool of loans to an "issuing trust."

35. The depositor then securitizes the pool of loans in the issuing trust so that the rights to the cash flows from the inventory can be sold to investors. The securitization transactions are structured such that the risk of loss is divided among different levels of investment, or "tranches." Tranches consist of multiple series of related RMBS offered as part of the same offering, each with a different level of risk and reward. Any losses on the underlying loans - whether due to default, delinquency, or otherwise - are generally applied in reverse order of seniority. As such, the most senior tranches of pass-through securities are rated as the best quality, or "AAA/Aaa." Junior tranches, which usually obtained lower ratings, ranging from "AA/Aa" to "BB/Bb," are less insulated from risk, but offer greater potential returns.

36. Once the tranches are established, the issuing trust passes the securities back to the depositor, who becomes the issuer of those securities, like the Depositor Defendants herein.

The depositor then passes the securities to one or more Wall Street banks, who offer and sell the securities to investors in exchange for cash that is passed back to the depositor, minus any fees owed to the Wall Street banks.

37. Wall Street banks play a critical role in the securitization process. They underwrite the sale of the securities, that is, they purchase the securities from the issuing trust through a depositor and then sell them to investors. Importantly, the Wall Street banks provide the information that potential investors use to decide whether to purchase the securities.

38. Because the cash flow from the loans in the collateral pool of a securitization is the source of funds to pay the holders of the securities issued by the trust, the credit quality of the securities depends upon the credit quality of the loans in the collateral pool. The most important information about the credit quality of the loans is contained in the "loan files" that the mortgage originator develops while making the loans. For residential mortgage loans, each loan file normally contains documents including the borrower's application for the loan; verification of the borrower's income, assets, and employment; references; credit reports on the borrower; an appraisal of the property that will secure the loan and provide the basis for important measures of credit quality, such as loan-to-value ratios; and a statement of the occupancy status of the property.

39. The collateral pool of loans for each securitization usually includes thousands of loans. Instead of each potential investor reviewing thousands of loan files, the Wall Street banks that underwrite the sale of the securities in a securitization are responsible for gathering, verifying, and presenting to potential investors accurate and complete information about the credit quality and characteristics of the loans that are deposited into the trust.

b. <u>Securitization of Mortgage Loans: The Traditional Model</u>

40. In the 1980s and 1990s, mortgage originators and Wall Street banks fulfilled their respective obligations to comply with underwriting standards and provide accurate information to investors. The mortgage securitization business, therefore, functioned well, to the benefit of home buyers, financial institutions, and investors. For the securitization model to work properly,

the mortgage originators and the Wall Street banks must perform their roles properly. In particular, it is necessary for the mortgage originators to underwrite loans and appraise properties in accordance with their stated standards and to assure accurate information is obtained from loan applicants. Likewise, it is necessary for the Wall Street banks to perform adequate due diligence into the loan pools and to provide accurate information to investors.

41. In the traditional mortgage model, a mortgage originator originated loans to borrowers, held the loans to maturity, and therefore retained the credit (default) risk. As such, under the traditional model, the mortgage originator had a financial incentive to ensure that (1) the borrowers had the financial ability to repay the loans, and (2) the underlying properties had sufficient value to enable the mortgage originator to recover its principal and interest if the borrowers defaulted on the loans.

42. Traditionally, mortgage originators financed their mortgage business primarily using funds from depositors, retained ownership of the mortgage loans they originated, and received a direct benefit from the income flowing from the mortgages. When a mortgage originator held a mortgage through the term of the loan, the mortgage originator received revenue from the borrower's payment of interest and fees. The mortgage originator also bore the risk of loss if the borrower defaulted and the value of the collateral was not sufficient to repay the loan. As a result, the mortgage originator had an economic incentive to verify the borrower's creditworthiness through prudent underwriting and to obtain an accurate appraisal of the value of the underlying property before issuing the mortgage loan.

43. With the advent of securitization, the traditional "originate to hold" model gave way to the "originate to distribute" model, in which mortgage originators sell the mortgages and transfer credit risk to investors through the issuance and sale of RMBS. Through securitization, mortgage originators no longer hold the mortgage loans to maturity. By selling the mortgages to investors through Wall Street banks, the mortgage originators obtain funds, enabling them to make more loans. Securitization also enables mortgage originators to earn most of their income from transaction and loan-servicing fees, rather than from the spread between interest rates paid

on deposits and interest rates received on mortgage loans as in the traditional model. Thus, securitization gives the mortgage originators an incentive to increase the number of mortgages they issue and reduces their incentive to ensure the mortgages' credit quality. However, the contractual terms of the securitization transactions and good business practices obligate mortgage originators to underwrite loans in accordance with their stated policies and to obtain accurate appraisals of the mortgaged properties.

44. During the 1980s and 1990s, the mortgage securitization business grew rapidly, making it possible for mortgage originators to make more loans than would have been possible using only the traditional primary source of funds from deposits. During that period, mortgage originators made loans in accordance with their stated underwriting and appraisal standards and provided accurate information about the loans, borrowers, and mortgaged properties to the Wall Street banks that securitized the loans. In turn, the Wall Street banks provided accurate information about the loans, borrowers, and properties to investors in the RMBS. In the 1980s and 1990s, most mortgage securitizations were conducted through the major Government Sponsored Enterprises (the "Agencies"), *i.e.*, the Federal National Mortgage Association ("Fannie Mae"), the Federal Home Loan Mortgage Corporation ("Freddie Mac"), and the Government National Mortgage Association ("Ginnie Mae"). The Agencies purchased loans from mortgage originators and securitized the loans. These Agency securitizations had high credit quality because the Agencies required the underlying loans to be originated in accordance with strict underwriting guidelines. Most non-Agency mortgage securitizations during this period also complied with the Agencies' underwriting standards.

c. The Systemic Violation of Underwriting and Appraisal Standards in the Mortgage Securitization Industry

45. The securitization of mortgage loans fundamentally shifts the risk of loss from the mortgage originator to the investors who purchase RMBS. As discussed in Section IV.b above, traditionally, the mortgage originator had an economic incentive to verify mortgage borrowers' creditworthiness and obtain accurate appraisals of the value of the underlying properties before

issuing mortgage loans because the mortgage originator held the loans to maturity. In securitizations where the mortgage originator instead sells the loans to Wall Street banks, the mortgage originator does not have the same economic interest in verifying borrowers' creditworthiness or obtaining accurate appraisals in the loan origination process. Nevertheless, the mortgage securitization process worked well during the 1980s and 1990s because both mortgage originators and Wall Street banks played by the rules and complied with their obligations to underwrite loans responsibly and provide accurate information to investors in RMBS.

46. Mortgage originators began systematically to violate their stated underwriting and appraisal standards, made loans with little or no documentation, and accepted untrue information from loan applicants. The mortgage originators also began to provide untrue information about their underwriting practices and about the borrowers, loans, appraisals, and mortgaged properties in connection with the securitization of the loans. As a result of this pervasive breakdown of compliance with proper practices among the mortgage originators, the Wall Street Banks that securitized mortgages provided Plaintiff with untrue information about the mortgage originators' practices and about the underlying mortgage borrowers, loans, and properties. The Wall Street Banks also provided Plaintiff with untrue information about their own due diligence of the mortgage originators and underlying loans.

47. To fund their loans, the mortgage originators maintained credit facilities with warehouse lenders, including the Wall Street Banks. The Wall Street Banks loaned money to the mortgage originators pursuant to "warehouse agreements," so that the mortgage originators could continue to make loans to home buyers. The mortgage originators borrowed from these credit facilities to fund their loans, until the loans were sold and the warehouse agreement was repaid. When loans serving as collateral lost value, the Wall Street Banks made margin calls requiring the mortgage originators to pay cash back to the Wall Street Banks. As a result of the warehouse arrangements between the mortgage originators and the Wall Street Banks, the Wall Street Banks had superior access to information about the mortgage originators' business and lending practices

and the mortgage loans' characteristics and performance, including early warning signs of poor credit quality in loans before the loans were securitized.

48. Fannie Mae and Freddie Mac provided investors in Agency-sponsored RMBS with protection by guaranteeing that the investors would receive timely payments of principal and interest. If the borrower for one of the underlying mortgages failed to make scheduled principal or interest payments, the Agency that issued the RMBS would make the payments to the trust. Because the Agencies were perceived to be backed by the federal government, investors viewed their guarantees as essentially removing the credit risk from Agency-sponsored RMBS.

49. Between 2001 and 2006, non-Agency loan originations and securitizations increased dramatically, while Agency loan originations and securitizations decreased moderately, as summarized in the following table:

	2001	**2006**
Agency loan originations	$1.433 trillion	$1.040 trillion
Agency securitizations	$1.087 trillion	$904 billion
Non-Agency loan originations	$680 billion	$1.480 trillion
Non-Agency securitizations	$240 billion (including $87.1 billion of subprime securitizations)	$1.033 trillion (including $448 billion of subprime securitizations)

Source: *Inside Mortgage Finance* (2007).

50. Thus, from 2001 to 2006, non-Agency loan originations grew by approximately 115%; non-Agency securitizations grew by approximately 330%; and non-Agency securitizations of subprime loans grew by approximately 415%. According to *Inside Mortgage Finance* (2009), non-Agency RMBS more than trebled in market share between 2003 and 2007, peaking at about 38% of the market in 2006, from 6% in 2003. Another measure of the dramatic growth of the non-Agency RMBS market is that "[t]he amount of all outstanding mortgages held in non-[Agency] MBS rose notably from only $670 billion in 2004 to over $2,000 billion in

2006." Financial Crisis Inquiry Commission ("FCIC"), "Preliminary Staff Report: Securitization and the Mortgage Crisis," April 7, 2010.

51. Starting in or about 2005, the growth in non-Agency mortgage securitizations was accompanied by widespread violation by the mortgage originators of their stated underwriting and appraisal standards. According to Ben S. Bernanke, Chairman of the Federal Reserve Board, in a March 2008 speech, "[t]he deterioration in underwriting standards that appears to have begun in late 2005 is another important factor underlying the current crisis. A large share of subprime loans that were originated during this time feature high combined loan-to-value ratios and, in some cases, layers of additional risk factors, such as a lack of full documentation or the acceptance of very high debt-to-income ratios." The loan-to-value ("LTV") ratio is a significant measure of credit risk, because both the likelihood of default and the severity of loss are higher when borrowers have less equity to protect in the event of foreclosure. The debt-to-income ratio is also a significant measure of credit risk, because borrowers who incur debt that is relatively high compared to their income are more likely to default on their loans. In its March 2008 Policy Statement on Financial Market Developments, the President's Working Group on Financial Markets concluded that "[t]he turmoil in financial markets clearly was triggered by a *dramatic weakening of underwriting standards for U.S. subprime mortgages, beginning* in late 2004 and extending into early 2007." (Emphasis in original.) As U.S. housing prices subsequently declined, the delinquency rates for such mortgages soared.

52. An important aspect of the mortgage originators' violation of their stated underwriting standards was their reliance on faulty appraisals. According to the April 7, 2010 FCIC testimony of Richard Bitner, a former executive of a subprime mortgage originator for 15 years and the author of the book *Confessions of a Subprime Lender*, "the appraisal process [was] highly susceptible to manipulation, lenders had to conduct business as though the broker and appraiser couldn't be trusted, [and] either the majority of appraisers were incompetent or they were influenced by brokers to increase the value." He continued:

> To put things in perspective, during my company's history, half of all the loans we underwrote were overvalued by as much 10%. This meant one out of two appraisals were still within an acceptable tolerance for our end investors. Our experience showed that 10% was the most an appraisal could be overvalued and still be purchased by these investors. Another quarter that we reviewed were overvalued by 11-20%. These loans were either declined or we reduced the property value to an acceptable tolerance level. The remaining 25% of appraisals that we initially underwrote were so overvalued they defied all logic. ***Throwing a dart at a board while blindfolded would've produced more accurate results.***[1]

53. Mr. Bitner testified about the implications of inflated appraisals:

> If multiple properties in an area are overvalued by 10%, they become comparable sales for future appraisals. The process then repeats itself. We saw it on several occasions. We'd close a loan in January and see the subject property show up as a comparable sale in the same neighborhood six months later. Except this time, the new subject property, which was nearly identical in size and style to the home we financed in January, was being appraised for 10% more. Of course, demand is a key component to driving value, but the defective nature of the appraisal process served as an accelerant. In the end, the subprime industry's willingness to consistently accept overvalued appraisals significantly contributed to the run-up in property values experienced throughout the country.
>
> * * *
>
> If the appraisal process had worked correctly, a significant percentage of subprime borrowers would've been denied due to a lack of funds. Inevitably, this would have forced sellers to drop their exorbitant asking prices to more reasonable levels. The rate of property appreciation experienced on a national basis from 1998 to 2006 was not only a function of market demand, but was due, in part, to the subprime industry's acceptance of overvalued appraisals, coupled with a high percentage of credit-challenged borrowers who financed with no money down.
>
> Mr. Bitner testified that the engine behind the increased malfeasance was the Wall Street Banks: "[T]he demand from Wall Street investment banks to feed the securitization machines coupled with an erosion in credit standards led the industry to drive itself off the proverbial cliff."

54. Patricia Lindsay, a wholesale underwriter for 10 years at New Century Financial Corporation, testified before the FCIC on April 7, 2010, about the fraudulent practices of New Century's appraisers:

> The role and practices of appraisers in subprime mortgage origination:

[1] Throughout this Complaint, emphasis in quotations is added except where otherwise noted.

> Properly valuing a property . . . is one of the most important components in a loan. In my experience at New Century, fee appraisers hired to go to the properties were often times pressured into coming in "at value", fearing if they didn't, they would lose future business and their livelihoods. They would charge the same fees as usual, but would find properties that would help support the needed value rather than finding the best comparables to come up with the most accurate value. Some appraisers would take boards off boarded up windows, to take the needed photos, then board the properties back up once the shots were taken. Or they would omit certain important elements of a property by angling the camera a certain way or zooming close in to make the property look the best possible. This level of appraiser activism compromises their objectivity.

55. Alan Hummel, Chair of the Appraisal Institute, testified before the Senate Committee on Banking that the dynamic between mortgage originators and appraisers created a "terrible conflict of interest" where appraisers "experience[d] systemic problems of coercion" and were "ordered to doctor their reports" or they might be "placed on exclusionary or 'do-not-use' lists."

56. A 2007 survey of 1,200 appraisers conducted by October Research Corp., which publishes *Valuation Review*, found that 90% of appraisers reported that mortgage brokers and others pressured them to raise property valuations to enable deals to go through. This figure was nearly double the findings of a similar study conducted just three years earlier. The 2007 study also "found that 75% of appraisers reported 'negative ramifications' if they did not cooperate, alter their appraisal, and provide a higher valuation." Adding to these problems was the fact that lenders were generally unable to assess the accuracy of the appraisals for loans originated by mortgage brokers, since the lenders were typically located far from the properties and knew little about the properties' neighborhoods.

57. In addition, the mortgage securitization process was undermined by the widespread industry practice of originating types of loans that were inherently risky and extremely susceptible to delinquencies and default, including (1) stated income loans, where both the income and assets of the borrower were taken as stated on the credit application without verification; (2) "NINA" or No Income, No Asset loans, which were made without any

disclosure of the borrower's income or assets; and (3) "No Doc" loans, which were made to borrowers who did not disclose their income, assets, or employment history.

d. The Wall Street Banks Conduct Less Due Diligence

58. As the Wall Street Banks that profited from securitizations sought increasing volumes of mortgage loans from mortgage originators, the mortgage originators gained bargaining power over the terms on which they would sell the loans. Mortgage originators demanded that the Wall Street Banks limit quality control reviews (*i.e.*, due diligence) to smaller percentages of loans prior to purchase. Additionally, if a Wall Street Bank chose to "kick out" a large number of loans from a pool – because the loans failed to conform to the mortgage originators' underwriting guidelines or did not contain adequate documentation – the Wall Street Bank risked being excluded from future loan purchases. As a result, the Wall Street Banks performed increasingly cursory due diligence on the mortgage loans they securitized. The sheer volume and pace of the securitization business during this period exacerbated such failures.

59. The Wall Street Banks often acquired large quantities of loans for securitization from "loan auctions." There, mortgage originators provided the Wall Street Banks with Bid Stipulation Sheets ("Bid Sheets") which stated the times and dates of the auctions and described the general characteristics of the loan pools. The Bid Sheets also dictated: (1) the percentage of the pool on which the Wall Street Banks would be permitted to conduct due diligence (*e.g.*, 25%); and (2) the number of loans the Wall Street Banks could "kick-out" due to borrower deficiencies, payment delinquencies, early payment defaults, lack of requisite legal documentation, and similar deficiencies. Prior to bid submission, mortgage originators also sent the Wall Street Banks spreadsheets known as "Loan Tapes" which typically contained 50 to 100 columns of data regarding the loans. The Wall Street Banks were supposed to "crack" the Loan Tapes, analyze them, and determine what prices to bid for the loan pools. Once this "bid package" analysis was complete, the Wall Street Banks submitted their bids.

60. If the mortgage originator accepted a bid, the Wall Street Bank typically had a short period of time prior to the settlement date (when cash was paid to the mortgage originator

for the loans) to conduct due diligence on the loans. The Wall Street Banks generally used their own investment bankers to conduct due diligence. Many of the Wall Street Banks also hired third-party due diligence firms such as Clayton Holdings, Inc. ("Clayton") or the Bohan Group ("Bohan") to conduct this review under the supervision of the Wall Street Banks' investment bankers. Clayton's Form 10-K filed March 14, 2008 specifically identified Wall Street Bank Defendants Morgan Stanley and Deutsche Bank among its clients. Bohan's clients included Bear Stearns (predecessor-in-interest to Wall Street Bank Defendant J.P. Morgan Securities) and Wall Street Bank Defendant Merrill Lynch.

61. For each loan pool, Clayton and Bohan reviewed the percentage of loans designated in the Bid Sheet to ensure, *inter alia*, that the loans: (1) conformed to the mortgage originators' underwriting guidelines; (2) contained loan data matching the loan data in the Loan Tape; and (3) contained the appropriate mortgage documents. Upon completion of the review, Clayton and Bohan sent the Wall Street Bank a "due diligence report," which it was supposed to use to decide which loans should be "kicked out" of the pool prior to the settlement date. Wall Street Banks, however, were incentivized to kick-out as few loans as possible because, as explained above, (1) mortgage originators would not invite Wall Street Banks that consistently kicked out large numbers of loans to future auctions; and (2) the securitization became smaller as loans were kicked out, thus decreasing the underwriting fee.

62. As a result, the percentage of loans per pool that Clayton and Bohan were instructed to review declined with time. Frank P. Filipps, Clayton's chairman and CEO, stated that "[e]arly in the decade, a securities firm might have asked Clayton to review 25% to 40% of the sub-prime loans in a pool, compared with typically 10% in 2006." Bohan President Mark Hughes stated, "[b]y contrast, loan buyers who kept the mortgages as an investment instead of packaging them into securities would have 50% to 100% of the loans examined."

63. In June 2007, New York Attorney General Andrew Cuomo ("NYAG") subpoenaed documents from Clayton and Bohan related to their due diligence efforts. The NYAG's investigation focused on whether Wall Street banks failed to adequately disclose the

warnings they received regarding the number of loans that failed to meet lending guidelines. Clayton also received an information request from the SEC and information subpoenas from the Massachusetts and Connecticut Attorneys General.

64. On January 12, 2008, in an article entitled "Inquiry Focuses on Withholding of Data on Loans," the *New York Times* reported:

> An investigation into the mortgage crisis by New York State prosecutors is now focusing on whether Wall Street banks withheld crucial information about the risks posed by investments linked to subprime loans. Reports commissioned by the banks raised red flags about high-risk loans known as exceptions, which failed to meet even the lax credit standards of subprime mortgage companies and the Wall Street firms. ***But the banks did not disclose the details of these reports to credit-rating agencies or investors.*** The inquiry, which was opened last summer by New York's attorney general, Andrew M. Cuomo, centers on how the banks bundled billions of dollars of exception loans and other subprime debt into complex mortgage investments.

65. On January 27, 2008, Clayton revealed that it had entered into an agreement with the NYAG for immunity from civil and criminal prosecution in New York in exchange for providing documents and testimony regarding its due diligence reports. That same day, in an article entitled "Loan Reviewer Aiding Inquiry Into Big Banks," the *New York Times* reported that a person familiar with the NYAG's investigation stated that as demand for loans surged, mortgage originators were in a superior bargaining position and required that Wall Street Banks have Clayton and other consultants review fewer loans. Incredibly, "investment banks directed Clayton *to halve the sample of loans it evaluated in each portfolio*."

66. On March 17, 2008, in an article entitled "Sub-Prime mortgage watchdogs kept on leash; loan checkers say their warnings of risk were met with indifference," the *Los Angeles Times* reported that Clayton and Bohan employees (including eight former loan reviewers who were interviewed for the article) "raised plenty of red flags about flaws [in subprime home loans] so serious that mortgages should have been rejected outright – such as borrowers' incomes that seemed inflated or documents that looked fake – but the problems were glossed over, ignored or stricken from reports."

e. **Plaintiff's Acquisition of the Securities**

67. Plaintiff, located in Massachusetts, was responsible for the sourcing, review, analysis, and purchase decisions for the U.S. investments for the Clients, and made the decision in Massachusetts to purchase the Securities on behalf of the Clients. At all relevant times, Plaintiff had numerous employees in Concord, Massachusetts, and Plaintiff continues to have employees in Concord.

68. Plaintiff decided to purchase each Security on behalf of the Clients on the basis of the information contained in the applicable registration statement, prospectus, and prospectus supplements filed with the SEC or the applicable private placement memorandum (the "Offering Documents"), as identified in Appendices A-P, and based on additional information provided to Plaintiff by the Wall Street Bank Defendants, as described below. In connection with their offers or sales of the Securities to Plaintiff, the Wall Street Bank Defendants sent to Plaintiff's office in Massachusetts the Offering Documents and additional documents, such as statistical tables to be included in the prospectus supplements. These documents included term sheets, pooling and servicing agreements, data, computational material, data regarding the LTV and debt-to-income ratios of the pools, computer models of the financial structures of the securitizations, tabular sensitivity data, loan tapes, rating agency expected loss levels, emails, sampling data regarding credit/compliance/appraisal and due diligence, "kickout" criteria and data, and collateral characteristics. ("Kickout" refers to the mortgage originator's contractual obligation under the terms of the securitization transaction documents to repurchase or replace any mortgage loan that had deficient documentation, an uncured material breach of a representation or warranty, a payment default within a specified time period, or other specified deficiencies.)

69. These documents contained numerous statements of material facts about the Securities, including statements concerning: (1) the mortgage originators' underwriting guidelines that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal guidelines that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios,

debt to income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Banks' due diligence of the loans and the mortgage originators' underwriting practices; and (5) various forms of credit enhancement applicable to certain tranches of Securities. For example, one form of credit enhancement is overcollateralization, which means that the total principal balance of the mortgage loans in the pool for a securitization (and therefore presumably the total value of the underlying properties) exceeds the aggregate amount of Securities issued and sold in the securitization. Another example of credit enhancement is excess interest, which means that the amount of interest collected on the mortgage loans underlying a securitization for each payment period is expected to be higher than the interest distributable on the Securities and fees and expenses payable by the trust for that period; excess interest may be applied both to absorb any interest shortfalls and to pay principal on the Securities to the extent needed to maintain the required level of overcollateralization.

70. These statements of material facts were untrue because: (1) the mortgage originators violated their stated underwriting guidelines and did not consistently evaluate the borrowers' ability to repay the loans; (2) inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be untrue; and (3) the actual numbers of riskier "second home" and "investment property" mortgagees were higher than the stated numbers. In addition, metrics such as debt-to-income ratios were untrue as a result of the mortgage originators' acceptance of untrue information from mortgage applicants. For example, the mortgage originators allowed applicants for "stated income" loans to provide untrue income information and did not verify the applicants' purported income. Stated income loans were therefore widely known among personnel of the mortgage originators as "liar loans."

71. Often at meetings, including meetings in Massachusetts, the Wall Street Bank Defendants also showed Plaintiff "pitch books" and other materials regarding the credit quality of the Securities and the Wall Street Banks' due diligence of the mortgage originators' underwriting practices. Plaintiff, however, was not allowed to keep the pitch books. These pitch

books and other materials contained untrue statements similar to those described above. In addition to the untrue statements and omissions in the documents provided or shown to Plaintiff, the Wall Street Bank Defendants made additional untrue oral statements to Plaintiff during face-to-face meetings and by telephone between 2005 and 2007. The representatives of the Wall Street Bank Defendants who offered or sold the Securities to Plaintiff received compensation based, directly or indirectly, on the volume of Securities they sold to investors, including the Clients on whose behalf Plaintiff purchased Securities.

V. THE OFFERING DOCUMENTS CONTAINED UNTRUE STATEMENTS OF MATERIAL FACTS AND OMISSIONS ABOUT THE MORTGAGE ORIGINATORS' UNDERWRITING STANDARDS AND PRACTICES

72. Most of the mortgage loans underlying the Securities purchased by Plaintiff on behalf of the Clients came from the following eight mortgage originators (the "Mortgage Originators"): New Century Mortgage Corp. ("New Century"), Long Beach Mortgage Company ("Long Beach"), Washington Mutual ("WaMu"), Fremont Investment & Loan ("Fremont"), WMC Mortgage Corporation ("WMC"), Argent Mortgage Company ("Argent"), Ameriquest Mortgage ("Ameriquest"), and Option One Mortgage Corporation ("Option One"). Together with Defendant Countrywide, which originated most of its own mortgage loans through its affiliates, these eight Mortgage Originators accounted for approximately 70% of the loans underlying the RMBS purchased by Plaintiff on behalf of the Clients. The remaining 30% of the loans were originated by approximately 80 other mortgage originators. On information and belief, the types of violations of underwriting and appraisal standards that are alleged below specifically with respect to each of the eight larger Mortgage Originators were also prevalent among the other, smaller mortgage originators.

73. All eight of these large Mortgage Originators have now failed, and numerous consumer and securities fraud cases – both private and regulatory – have been lodged against them. In an April 8, 2010 statement by John C. Dugan, Comptroller of the Currency, before the FCIC, these Mortgage Originators were identified among the "Worst Ten in the Worst Ten," a list of the worst mortgage originators based on the number of foreclosures in the nation's worst ten

metro areas (all except for WaMu, but WaMu's subsidiary Long Beach was on the "Worst Ten" list). During the time that Plaintiff, on the Clients' behalf, was purchasing Securities from the Wall Street Banks that contained mortgage loans provided by these Mortgage Originators, (1) the Mortgage Originators violated their stated underwriting standards when issuing loans to borrowers; (2) the underlying mortgages were based on appraisals that overstated the value of the mortgaged properties and therefore understated the LTV ratios of the mortgage loans; and (3) these underwriting deficiencies rendered the mortgage loans far less valuable and far riskier than disclosed. As a result, the Securities that were issued by the Depositor Defendants and offered or sold by the Wall Street Bank Defendants were backed by mortgage collateral that was much less valuable and posed a significantly greater risk of delinquencies, foreclosures, and other forms of default than the Wall Street Banks stated to Plaintiff.

a. New Century Mortgage Corporation

1. Defendants Made Untrue Statements of Material Facts About New Century's Underwriting Standards and Practices

74. New Century originated Mortgage Loans that were included in the pools for the following offerings:

Offering	Depositor Defendant	Wall Street Bank Defendant
CARR 2005-NC4	Carrington Mortgage Loan Trust	Bear Stearns
CARR 2005-NC3	Carrington Mortgage Loan Trust	Citigroup

MABS 2006-NC2	MASTR Asset Backed Securities Trust	UBS

75. Defendants offered or sold to Plaintiff approximately $286.3 million of Securities for which New Century originated some or all of the underlying mortgage loans.

76. The Offering Documents for these Securities all contained substantially similar, if not identical, statements of material fact regarding New Century's underwriting standards and practices. For example, the prospectus supplement for Asset-Backed Securities Corporation Home Equity Loan Trust, ABSHE Series 2005-HE4 stated:

> The New Century Underwriting Guidelines are primarily intended to assess the borrower's ability to repay the mortgage loan, to assess the value of the mortgaged property and to evaluate the adequacy of the property as collateral for the mortgage loan. All of the mortgage loans in the mortgage pool were also underwritten with a view toward the resale of the mortgage loans in the secondary mortgage market. ***While the originator's primary consideration in underwriting a mortgage loan is the value of the mortgaged property, the originator also***

> ***considers, among other things, a mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type and use of the mortgaged property.***
>
> * * *
>
> ***The mortgage loans will have been originated in accordance with the underwriting guidelines.*** On a case-by-case basis, exceptions to the underwriting guidelines are made where compensating factors exist. It is expected that a substantial portion of the Mortgage Loans will represent these exceptions.
>
> * * *
>
> *Exceptions*. As described above, the foregoing categories and criteria are guidelines only. On a case by case basis, it may be determined that an applicant warrants a debt service-to-income ratio exception, a pricing exception, a loan-to-value ratio exception, an exception from certain requirements of a particular risk category, etc. **An exception may be allowed if the application reflects compensating factors, such as:** low loan-to-value ratio; pride of ownership; a maximum of one 30 day late payment on all mortgage loans during the last 12 months; and stable employment or ownership of current residence of four or more years. An exception may also be allowed if the applicant places a down payment through escrow of at least 20% of the purchase price of the mortgaged property or if the new loan reduces the applicant's monthly aggregate mortgage payment by 25% or more. Accordingly, a mortgagor may qualify in a more favorable risk category than, in the absence of compensating factors, would satisfy only the criteria of a less favorable risk category. It is expected that a substantial portion of the Mortgage Loans will represent these kinds of exceptions.

77. The relevant Offering Documents also contained statements of material fact about the information contained in New Century's loan files. For example, the same prospectus supplement stated:

> Each applicant completes an application which includes information with respect to the applicant's liabilities, income, credit history, employment history and personal information. The underwriting guidelines require a credit report on each applicant from a credit reporting company. The report typically contains information relating to matters such as credit history with local and national merchants and lenders, installment debt payments and any record of defaults, bankruptcies, repossessions or judgments.

78. The relevant Offering Documents also contained statements of material fact about New Century's appraisal standards and practices. For example, the same prospectus supplement stated:

> Mortgaged properties that are to secure mortgage loans are appraised by qualified independent appraisers. These appraisers inspect and appraise the subject property and verify that the property is in acceptable condition. Following each appraisal, the appraiser prepares a report which includes a market value analysis based on recent sales of comparable homes in the area and, when deemed appropriate, replacement cost analysis based on the current cost of constructing a similar home. ***All appraisals are required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac.*** The underwriting guidelines require a review of the appraisal by a qualified employee of the originator or by an appraiser retained by the originator.

79. These statements are substantially similar, if not identical, to statements concerning New Century's appraisal standards and practices found in the other Prospectus Supplements for the Securities whose underlying mortgage loans were originated by New Century.

80. The above statements of material facts were untrue when made because, as explained below in ¶¶ 81-95, they failed to disclose that New Century: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgaged properties in the loan origination and underwriting process.

2. New Century Violated Its Stated Underwriting Standards

81. Defendants J.P. Morgan (as successor-in-interest to Bear Stearns), Citigroup, Credit Suisse, Deutsche Bank, Goldman Sachs, Greenwich Capital, HSBC, Merrill Lynch, Morgan Stanley, and UBS offered or sold to Plaintiff Securities containing loans originated by New Century and made untrue statements to Plaintiff about New Century's underwriting and appraisal standards and practices and the loans underlying the Securities. These Wall Street Banks had extensive business relationships with New Century, had access to New Century's mortgage origination personnel and internal information, and conducted due diligence into New Century using their own personnel and third-party loan review firms. As a result of the Wall

Street Banks' access to and due diligence into New Century, they were or reasonably should have been aware of the untruth of the statements about New Century described above.

82. The court-appointed Bankruptcy Examiner issued a detailed report explaining how New Century's "brazen obsession" with loan originations undermined sound underwriting standards. Moreover, New Century's officers are the targets of both a civil class action and a regulatory action brought by the SEC based on their knowledge of and perpetuation of these practices, and allegations of New Century's deficient underwriting practices have been endorsed by several courts. New Century topped the Comptroller of the Currency's list of the "Worst Ten in the Worst Ten," discussed above.

83. Once one of the nation's largest mortgage origination companies, New Century collapsed and filed for bankruptcy on April 2, 2007. Formed in 1996, New Century grew rapidly to become one of the country's largest subprime lenders, reporting $56.1 billion of total mortgage originations and purchases in 2005 alone. Beginning in 2003, New Century secretly loosened its own underwriting standards and made unjustified exceptions to those already severely weakened standards. These allegations have been substantiated by many sources, as discussed below.

84. On February 29, 2008, following New Century's bankruptcy, Michael J. Missal, the Bankruptcy Court Examiner for New Century, issued a detailed report on the various deficiencies at New Century, including lax mortgage origination standards. The Examiner's report detailed "serious loan quality issues at [New Century] beginning as early as 2004"; numerous "red flags" relating to loan quality; and the failure of New Century's senior management and board of directors to devote sufficient attention to improving loan quality until it "was too late to prevent the consequences of longstanding loan quality problems in an adversely changing market."

85. During the course of his investigation, the Examiner conducted 110 interviews of 85 witnesses and reviewed millions of pages of documents from New Century, its outside auditors, and others. In his 550-page Final Report, the Examiner concluded that:

- "New Century had a brazen obsession with increasing loan originations, without due regard to the risks associated with that business strategy. Loan originations rose dramatically in recent years, from approximately $14 billion in 2002 to approximately $60 billion in 2006. The Loan Production Department was the dominant force within the Company and trained mortgage brokers to originate New Century loans in the aptly named "CloseMore University." Although a primary goal of any mortgage banking company is to make more loans, New Century did so in an aggressive manner that elevated the risks to dangerous and ultimately fatal levels." (Examiner's Report, at 3.)

- "The increasingly risky nature of New Century's loan originations created a ticking time bomb that detonated in 2007. Subprime loans can be appropriate for a large number of borrowers. New Century, however, layered the risks of loan products upon the risks of loose underwriting standards in its loan originations to high risk borrowers." *Id.*

- "New Century also made frequent exceptions to its underwriting guidelines for borrowers who might not otherwise qualify for a particular loan. A Senior Officer of New Century warned in 2004 that the 'number one issue is exceptions to guidelines.' Moreover, many of the appraisals used to value the homes that secured the mortgages had deficiencies. Of the New Century loans rejected by investors, issues with appraisals were the cause of more than 25% of these 'kick-outs.'" *Id.* at 3-4.

- "Senior Management turned a blind eye to the increasing risks of New Century's loan originations and did not take appropriate steps to manage those risks. . . ." *Id.* at 4.

- "Senior Management was aware of an alarming and steady increase in early payment defaults ('EPD') on loans originated by New Century, beginning no later than mid- 2004. The surge in real estate prices slowed and then began to decrease, and interest rates started to rise. The changing market conditions exacerbated the risks embedded in New Century's products, yet Senior Management continued to feed eagerly the wave of investor demands without anticipating the inevitable requirement to repurchase an increasing number of bad loans. Unfortunately, this wave turned into a tsunami of impaired and defaulted mortgages." *Id.* at 4.

86. The Examiner highlighted the severity of New Century's improper conduct: "The Examiner recognizes that the subprime mortgage market collapsed with great speed and unprecedented severity, resulting in all of the largest subprime lenders either ceasing operations or being absorbed by larger financial institutions. Taking these events into consideration and attempting to avoid inappropriate hindsight, the Examiner concludes that New Century engaged

in a number of significant improper and imprudent practices related to its loan originations, operations, accounting and financial reporting processes."

87. According to Confidential Witness ("CW") 1, a former New Century fraud investigator and senior loan underwriter employed from January 1999 until April 2007 and who examined numerous New Century mortgage loans, New Century's problems began when it "started to abandon prudent underwriting guidelines" at the end of 2003 in order to "push more loans through" the system. According to CW 1, New Century, in effect, "stopped underwriting" and adopted an approach that the Company would be "okay if [it] could out run [its] delinquency rate."

88. According to CW 2, a former New Century Senior Vice President employed from July 2005 until April 2006 in Irvine, California, New Century could only meet its increasing year-over-year sales projections by reducing the underwriting standards. According to CW 2, in his position as Senior Vice President of New Century, he would approve just about any loan under New Century's "weak" underwriting standards.

89. According to CW 3, a former New Century underwriting unit manager employed from 1998 through October 2006, underwriting standards were loosened in order to increase sales volume. According to CW 3, exceptions to New Century's underwriting standards were "the norm" and employees were told to make loans "work." At one meeting in the late spring of 2006, CW 3 and other underwriters were told by their operations manager that the underwriters had to do what was necessary to increase volume.

90. Many lenders across the country allowed the sales personnel or account executives at their retail or in-house origination facilities to order and control appraisals and the appraisal process. According to CW 4, a former New Century underwriter employed by the Company from May 2005 to March 2006 in Itasca, Illinois and, previously, from 2000 until 2003 in Cincinnati, Ohio, as an underwriter for New Century, he could not recall the last loan that he looked at that did not have an exception; he handled close to 200 loans a month; and nearly every loan had an exception such as debt ratio exceptions or loan-to-value exceptions. According to

CW 4, "the guidelines were thrown against a wall," underwriters were instructed to "dig deep" in order to make loans work, and all decisions were volume driven. According to CW 4, appraisals even if turned down, were often accepted later as branch or regional sales managers "gave them hell" for rejecting appraisals. According to CW 4, he was told by his superiors that New Century was a volume based company and that New Century needed to increase its volume to outrun "shrinkages" in the secondary market.

91. On May 7, 2007, the front page of the *Washington Post* reported "Pressure at Mortgage Firm Led to Mass Approval of Bad Loans." The *Washington Post* reported that a former New Century appraiser Maggie Hardiman recounted that "[y]ou didn't want to turn away a loan because all hell would break loose," and when she did reject a loan, "her bosses often overruled her and found another appraiser to sign off on it."

92. On March 12, 2007, *USA Today* reported that, one day after New Century "said its lenders were cutting off financing because it didn't have enough money, or prospects of new assistance, to cover billions of dollars in obligations," New Century disclosed that the SEC was investigating the company. *USA Today* also reported that "New Century also said Tuesday that it has received a grand jury subpoena requesting documents. The request is part of the U.S. Attorney in Los Angeles' criminal probe into the company." On May 1, 2007, the *New York Times* (Today in Business) reported that New Century was facing investigations by both federal prosecutors and securities regulators, and on July 6, 2007, *Reuters* reported that the SEC had elevated its investigation of New Century to "formal status" which "gives the SEC subpoena power."

93. On December 7, 2009, the SEC charged three of New Century's top officers with violations of the federal securities laws, and claimed that "New Century's business was anything but 'good' and it soon became evident that its lending practices, far from being 'responsible,' were the recipe for financial disaster." SEC Complaint, ¶ 3. The SEC Complaint further details the falsity of New Century's assurances to the market about its "adhere[nce] to high origination standards in order to sell [its] loan products in the secondary market," and its policy to "only

approve subprime loan applications that evidence a borrower's ability to repay the loan." *Id.*, ¶¶ 19-20.

94. New Century's systematic disregard for its underwriting guidelines led to dramatic downgrades of the value of the Securities in which New Century acted as a mortgage originator. On December 6, 2007, the *New York Times* reported that "[l]oans made by New Century, which filed for bankruptcy protection ..., have some of the highest default rates in the industry. . . , according to data from Moody's Investor Services."

95. Allegations of New Century's dismal underwriting have been sustained by Courts in similar actions. For example, in *New Jersey Carpenters Health Fund v. DLJ Mortgage Capital, Inc., et al.*, an investor brought class claims against the dealer, issuer, and underwriter of RMBS containing collateral loans underwritten by New Century, alleging that New Century failed to comply with its "loan-approval oversight and control mechanisms as represented in [its] underwriting guidelines." The court substantially denied defendants' motion to dismiss, holding that the complaint properly alleged "systemic borrower defaults, complete lack of controls and oversight, and flagrant violations of the Guidelines," and that New Century, along with the dealer and issuer defendants, "acted with reckless abandon in their zeal to generate loan volume and profits."

b. Long Beach Mortgage Company

1. Defendants Made Untrue Statements of Material Facts About Long Beach's Underwriting Standards and Practices

96. Long Beach Mortgage Company ("Long Beach") originated mortgage loans that were included in the pools for the following offerings:

Offering	Depositor Defendant	Wall Street Bank Defendant
ACE 2006-SL2	Ace Securities Corp.	Deutsche Bank
GSAMP 2006-S1	GS Mortgage Securities Corp.	Goldman Sachs
LBMLT 2005-1	Long Beach Mortgage Loan Trust	Greenwich Capital
LBMLT 2005-2	Long Beach Mortgage Loan Trust	Goldman Sachs
LBMLT 2005-WL1	Long Beach Mortgage Loan Trust	Greenwich Capital
LBMLT 2005-WL2	Long Beach Mortgage Loan Trust	Credit Suisse

Offering	Depositor Defendant	Wall Street Bank Defendant
LBMLT 2006-7	Long Beach Mortgage Loan Trust	Goldman Sachs
LBMLT 2006-WL1	Long Beach Mortgage Loan Trust	Goldman Sachs
SVHE 2005-B	SoundView Home Loan Trust	Greenwich Capital

97. Defendants offered or sold to Plaintiff approximately $123.0 million of Securities for which Long Beach originated some or all of the underlying mortgage loans.

98. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding Long Beach's underwriting standards and practices. For example, prospectus supplement ACE 2006-SL2 stated:

> All of the mortgage loans owned by the trust that have been originated by Long Beach, have been originated by Long Beach through wholesale brokers or re-underwritten upon acquisition from correspondents by Long Beach generally in accordance with Long Beach's underwriting guidelines described in this section. Long Beach's underwriting guidelines are primarily intended to evaluate the prospective borrower's credit standing and repayment ability as well as the value and adequacy of the mortgaged property as collateral.
>
> * * *
>
> The adequacy of the mortgaged property as collateral is generally determined by an appraisal of the mortgaged property that generally conforms to Fannie Mae and Freddie Mac appraisal standards and a review of that appraisal. The mortgaged properties are appraised by licensed independent appraisers who have satisfied the servicer's appraiser screening process.
>
> * * *
>
> On a case-by-case basis and only with the approval of an employee with appropriate risk level authority, Long Beach may determine that, based upon compensating factors, a prospective borrower not strictly qualifying under its underwriting risk category guidelines warrants an underwriting exception.

99. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 100-127, they failed to disclose that Long Beach: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in

many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. Long Beach Violated Its Stated Underwriting Standards

100. Defendants Credit Suisse, Deutsche Bank, Goldman Sachs, and Greenwich Capital offered or sold to Plaintiff Securities containing loans originated by Long Beach and made untrue statements to Plaintiff about Long Beach's underwriting and appraisal standards and practices and the loans underlying the Securities. These Wall Street Banks had extensive business relationships with Long Beach, had access to Long Beach's mortgage origination personnel and internal information, and conducted due diligence into Long Beach using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into Long Beach, they were or reasonably should have been aware of the untruth of the statements about Long Beach described above.

101. In 1999, Long Beach was acquired by WaMu, a Washington corporation headquartered at 1301 Second Avenue, Seattle, Washington 98101. WaMu was founded in 1889 and, before its bankruptcy, was the largest savings and loan association in the country. Long Beach served as WaMu's subprime loan origination division until January 1, 2006 and was thereafter known as WaMu's "specialty mortgage lending" channel. According to CW 5, who served as a Long Beach Senior Underwriter in the Chicago area from 2004 through September 2007, WaMu sold subprime loans with interest-only and negative-amortization features, increasing the riskiness of these loans.

102. The Senate Permanent Subcommittee on Investigations ("PSI"), after investigating and holding hearings on Long Beach's role in the recent financial crisis, concluded the following about the company:

> Subprime lending can be a responsible business. Most subprime borrowers pay their loans on time and in full. Long Beach, however, was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry.

103. Long Beach financially rewarded its employees for closing higher-risk loans and instituted loan sales quotas. Long Beach loan officers, for example, received more money per loan for originating higher-risk loans and for exceeding established loan targets. Loan processing personnel were compensated according to the speed and number of the loans they processed. Loan officers and their sales associates received still more compensation if they charged borrowers higher interest rates or points than required in bank rate sheets specifying loan prices, or included prepayment penalties in the loan agreements. That added compensation created incentives to increase loan profitability, but not loan quality. Accordingly, Long Beach's employees targeted more and more borrowers who were less able to afford the loan payments they would have to make, and many of whom had no realistic ability to meet the obligations incident to the loans they were sold.

104. According to CW 6, a First Vice President in the Capital Markets Group and Director of Investor Relations at WaMu Capital Corp. in New York, New York, from October 2004 until December 2007, Long Beach compensated its account executives and underwriters based on the volume of loans that they brought in and closed, and their compensation structure gave no consideration to the quality of those loans.

105. CW 7, an Account Executive for Long Beach in New Jersey from 1998 until October 2007, noted a shift in underwriting philosophy in 2005 toward increasing loan volume at all costs. When CW 7 first joined the subprime business, Long Beach relied on "common sense underwriting" and was not exclusively focused on credit scores. CW 7 noted the change away from a "know your borrower" focus beginning in the 2005 timeframe, with Long Beach relying more on credit scores and less on common sense. The borrower needed to produce less and less documentation, and Fair Isaac Credit Organization ("FICO") credit scores became more important than verifying income for Long Beach. In response, "volume really went through the roof."

106. Long Beach pushed through every loan it could close, through whatever means necessary. CW 8, a Senior Underwriter for Long Beach in Dallas, Texas, from 2004 through

April 2007, reported that on occasion CW 8 would express concerns to her manager over funding some of the loans underwritten, but the manager's "direction from corporate" was simply to fund loans. CW 8 also reported that at month-end team meetings, it was often discussed that the Company was trying to increase volume by getting more "borrowers to fit."

107. CW 8 recalled that some of the "crazier" programs at Long Beach included stated-income loans for W-2 wage earners, a program that started in 2005. Stated-income programs, to the extent that lenders accepted them, were traditionally reserved for self-employed borrowers with significant assets. At Long Beach, however, these "liar's loans" were common, even for those borrowers who were not self-employed. Long Beach would also approve 100% financing for stated-income borrowers with FICO scores as low as 500.

108. CW 8 also described a "three letters of reference" program for self-employed borrowers, where a borrower only had to submit three letters of reference from anyone for whom they supposedly worked. CW 8 said no attempt was made to verify the information in the letters. CW 8 related that some of the accepted letters included statements such as: "So-and-so cuts my lawn and does a good job." At Long Beach, FICO scores ranged from 500-620, but CW 8 said that if Long Beach salespeople had a borrower with a 620, they were "hooping and hollering" about having a borrower with good credit.

109. CW 8 also relayed that borrowers could get a loan with no established FICO score merely by providing "three alternative trade lines." An "alternative trade line" was anything that did not appear on the borrower's credit report, including documentation of car insurance payments, verification of rent payment, or a note from a person claiming the borrower had repaid a personal debt. CW 8 said that Long Beach originated "a significant amount" of these types of problematic loans. CW 8 commented: "It was just a disaster." Furthermore, CW 8 said that these loans made up the majority of first payment defaults – *i.e.*, loans on which the borrower failed to make even the first payment – in the end of 2006.

110. CW 9 was a Wholesale Mortgage Underwriter at the Long Beach loan processing center located in Lake Oswego, Oregon from August 2005 until December 2006. CW 9 first

joined WaMu in Lake Oswego in 2003 as a Senior Credit Analyst and subsequently joined Long Beach in 2004 as a Senior Loan Coordinator, ultimately becoming a Wholesale Mortgage Underwriter. CW 9 said that at Long Beach there was always a sense of "working the underwriting guidelines" to close loans, rather than to mitigate Long Beach's credit risk. CW 9 said that there was simply an environment in the loan processing center to "approve, approve, approve" and that any exception that was needed to approve a loan was not only done, but was "sought after." CW 9 felt that Long Beach consistently pressured its underwriters to "find a way to make it work."

111. According to CW 5, even the few loans that Long Beach underwriters refused to approve were regularly pushed through by Long Beach management by granting exceptions to the guidelines. According to CW 5, "There were so many exceptions." Long Beach allowed LTV ratio exceptions, and the "rate exceptions were ridiculous." According to CW 5, WaMu allowed even the salespeople to give interest-rate exceptions to borrowers to push loans through. CW 5 explained: "There were really no restrictions to approve a loan," and some "really bad loans" went through the office. The attitude at WaMu was "push, push, push."

112. Numerous other Long Beach employees agreed that exceptions to Long Beach's guidelines were commonplace. CW 10, a Senior Underwriter with WaMu in Livermore, California from 2003 through September 2007, said that if Long Beach's competitors could not approve a loan, it was known to send the loan to Long Beach and they would make an exception to get the loan through. CW 10 said that guidelines were "loose to the point of disbelief." CW 10 described Long Beach's lending approach as follows: "If [potential borrowers] were breathing and had a heart beat, you could probably get the loan done."

113. CW 9 stated that many employees at Long Beach were disappointed about the decisions that were being made about loan quality, but they were resigned to simply "keep their heads down." According to CW 5, several WaMu employees contacted corporate headquarters about the incessant underwriting exceptions, including issuing loans to unqualified borrowers. CW 5 stated, "[w]e did a lot of underhanded stuff." CW 5 stated that if an underwriter at Long

Beach refused to force a file through, they would be written up, not because they made a bad decision but because the sales team did not like their decision. CW 5 said: "Basically, sales is what ran Long Beach Mortgage, it wasn't the Operations part."

114. CW 11 served as a Quality Assurance Manager in the Long Beach Loan Fulfillment Center ("LFC") in Dallas, Texas from November 2005 until his termination in August 2007. CW 11 explained that the Quality Assurance group in Dallas performed a monthly audit on a random selection of subprime loans from the various loan origination centers around the country. This analysis was not focused on loan-specific issues, but instead concerned WaMu/Long Beach-wide trends that might suggest necessary changes in underwriting guidelines, compliance standards, or other systems.

115. CW 11 observed that, despite the extensive analysis that the group performed to determine the causes for WaMu/Long Beach-wide loan problems, WaMu/Long Beach ignored the results. CW 11's group continued to identify the same problematic trends again and again without WaMu/Long Beach taking any steps to address the causes. According to CW 11, although WaMu/Long Beach was "going through the motions" to present a façade of legitimate quality control, in reality there was nothing but a "free for all to approve loans by the thousands."

116. According to CW 12, an employee of Long Beach from 2001 until October 2006, serving as an underwriter and later becoming a Quality Assurance Manager, a group of WaMu employees regularly reviewed a percentage (typically around 20%) of Long Beach's loans to monitor Long Beach's underwriting. CW 12 forwarded the report to Long Beach's Loan Servicing Center managers. The Long Beach managers receiving the reports had a certain number of days to go through the loan files in question and respond to the findings in the reports.

117. According to CW 13, a Senior Default Foreclosure Loan Specialist with Long Beach in Chatsworth, California from 2002 to September 2006, her department received statistics every month that showed the number of first payment defaults from the prior month. According to CW 13, at the end of 2004, the default numbers were at 6-7% and, "although they may have increased slightly, did not go over 9%." Suddenly, however, they increased "all at

once" to as high as 14%. According to CW 13, first payment defaults just "seemed to go up and up."

118. In his opening statement at the first PSI hearing on Wall Street and the Financial Crisis (related to the role of high risk home loans), Senator Carl Levin noted that an internal WaMu audit of Long Beach in 2005 found that "relaxed credit guidelines, breakdowns in manual underwriting processes, and inexperienced subprime personnel . . . coupled with a push to increase loan volume and the lack of an automated fraud monitoring tool" led to deteriorating loans. Many of the loans defaulted within three months of being sold to investors. Investors demanded that Long Beach repurchase them. Long Beach had to repurchase over $875 million in loans in 2005 and 2006, lost over $107 million from the defaults, and had to cover a $75 million shortfall in its repurchase reserves.

119. Senator Levin also noted that in response to the repurchase requests, WaMu "fired Long Beach's senior management and moved the company under the direct supervision of the President of WaMu's Home Loans Division, David Schneider" and that "WaMu promised its regulator that Long Beach would improve. But it didn't." In April 2006, WaMu's President, Steve Rotella, emailed the CEO, Kerry Killinger, that Long Beach's "delinquencies are up 140% and foreclosures close to 70%. . . . It is ugly." Five months later, in September, he emailed that Long Beach is "terrible. . . . Repurchases, [early payment defaults], manual underwriting, very weak servicing/collections practices and a weak staff." Two months after that, in November 2006, the head of WaMu Capital Markets in New York, David Beck, wrote to Mr. Schneider that "LBMC [Long Beach] paper is among the worst performing in the [market]."

120. In June 2007, WaMu shut down Long Beach and took over its subprime lending operations. Currently, Long Beach mortgage backed securities report loan delinquency rates in excess of 40%. At the end of 2007, a Long Beach employee was indicted for having taken kickbacks to process fraudulent or substandard loans.

121. In April 2010, the Senate Permanent Subcommittee on Investigations ("PSI") held a series of hearings "to examine some of the causes and consequences of the crisis." The goals

of the hearings were threefold: (1) to construct a public record of the facts to deepen public understanding of what happened and to try to hold some of the perpetrators accountable; (2) to inform the legislative debate about the need for financial reform; and (3) to provide a foundation for building better defenses to protect Main Street from the excesses of Wall Street.

122. The hearings were based on an in-depth bipartisan investigation that began in November 2008. The PSI conducted over 100 detailed interviews and depositions, consulted with dozens of experts, and collected and reviewed millions of pages of documents. Given the extent of the economic damage and the complexity of its root causes, the Subcommittee's approach has been to develop detailed case studies to examine each stage of the crisis.

123. On April 13, 2010, the PSI held a hearing that focused on the role high risk loans played in the financial crisis, using WaMu as a case history. It showed how WaMu originated and sold hundreds of billions of dollars in high risk loans to Wall Street Banks in return for big fees, polluting the financial system with toxic mortgages.

124. The PSI reached the following findings of fact following the April 13, 2010 hearing:

> 1. **High Risk Lending Strategy**. Washington Mutual ("WaMu") executives embarked upon a high risk lending strategy and increased sales of high risk home loans to Wall Street, because they projected that high risk home loans, which generally charged higher rates of interest, would be more profitable for the bank than low risk home loans.
>
> 2. **Shoddy Lending Practices.** WaMu and its affiliate, Long Beach Mortgage Company ("Long Beach"), used shoddy lending practices riddled with credit, compliance, and operational deficiencies to make tens of thousands of high risk home loans that too often contained excessive risk, fraudulent information, or errors.
>
> 3. **Steering Borrowers to High Risk Loans**. WaMu and Long Beach too often steered borrowers into home loans they could not afford, allowing and encouraging them to make low initial payments that would be followed by much higher payments, and presumed that rising home prices would enable those borrowers to refinance their loans or sell their homes before the payments shot up.
>
> 4. **Polluting the Financial System.** WaMu and Long Beach securitized over $77 billion in subprime home loans and billions more in other high risk home loans, used Wall Street firms to sell the securities to investors worldwide, and

polluted the financial system with mortgage backed securities which later incurred high rates of delinquency and loss.

5. Securitizing Delinquency-Prone and Fraudulent Loans. At times, WaMu selected and securitized loans that it had identified as likely to go delinquent, without disclosing its analysis to investors who bought the securities, and also securitized loans tainted by fraudulent information, without notifying purchasers of the fraud that was discovered.

6. Destructive Compensation. WaMu's compensation system rewarded loan officers and loan processors for originating large volumes of high risk loans, paid extra to loan officers who overcharged borrowers or added stiff prepayment penalties, and gave executives millions of dollars even when its high risk lending strategy placed the bank in financial jeopardy.

125. The PSI also concluded that "from 2004 to 2007, in exchange for lucrative fees, Goldman Sachs helped lenders like Long Beach, Fremont, and New Century, securitize high risk, poor quality loans, obtain favorable credit ratings for the resulting residential mortgage backed securities (RMBS), and sell the RMBS securities to investors, pushing billions of dollars of risky mortgages into the financial system."

126. Long Beach and WaMu's appraisal practices have also been the target of governmental investigations. On November 1, 2007, New York State Attorney General Andrew Cuomo announced that he was suing eAppraiseIT and its parent company First American Corporation, charging them with caving into pressure from WaMu to use a list of preferred "Proven Appraisers" who provided inflated appraisals on homes. *People of the State of New York v. First Am. Corp. and First Am. eAppraiseIT*, Index No. 406796/2007 (N.Y. Sup. Ct.). Cuomo's suit alleged that eAppraiseIT colluded with WaMu (the parent of Mortgage Originator Long Beach) to inflate the appraisal values of homes. According to Cuomo, between April 2006 and October 2007, First American performed 262,000 appraisals for WaMu. When WaMu loan officers began complaining that valuations by eAppraiseIT's independent roster were coming in too low, WaMu allegedly pressured First American to assign only appraisers on WaMu's approved list when appraising WaMu mortgage-related properties. WaMu allegedly threatened to take its business elsewhere, and dangled the prospect of greater use of First American's other

settlement services, to convince eAppraiseIT to accede to its demands. In a press release that accompanied the suit, Cuomo stated:

> The independence of the appraiser is essential to maintaining the integrity of the mortgage industry. First American and eAppraiseIT violated that independence when Washington Mutual strong-armed them into a system designed to ripoff homeowners and investors alike . . . . The blatant actions of First American and eAppraiseIT have contributed to the growing foreclosure crisis and turmoil in the housing market. By allowing Washington Mutual to hand-pick appraisers who inflated values, First American helped set the current mortgage crisis in motion.

127. On June 8, 2010, the New York State Appellate Division, First Department, issued a decision upholding Attorney General Cuomo's complaint.

c. <u>WaMu</u>

1. Defendants Made Untrue Statements of Material Facts About WaMu's Underwriting Standards and Practices

128. In addition to the loan originations by WaMu's Long Beach subsidiary discussed above, WaMu originated mortgage loans that were included in the pools for the following Offerings:

Offering	Depositor Defendant	Wall Street Bank Defendant
SACO 2005-WM3	SACO I Trust	Bear Stearns
WAMU 2005-AR2	Washington Mutual	Greenwich Capital

129. Defendants offered or sold to Plaintiff approximately $25.6 million of Securities for which WaMu originated some or all of the underlying mortgage loans.

130. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding WaMu's underwriting standards and practices. For example, prospectus supplement WAMU 2005-AR2 stated:

> [WaMu]'s underwriting standards are intended to evaluate the prospective Mortgagor's credit standing and repayment ability, and the value and adequacy of the proposed Mortgaged Property as collateral. In the loan application process, prospective Mortgagors will be required to provide information regarding such factors as their assets, liabilities, income, credit history, employment history and other related items. Each prospective Mortgagor will also provide an authorization to apply for a credit report which summarizes the Mortgagor's credit history. With respect to establishing the prospective Mortgagor's ability to

> make timely payments, the Company will require evidence regarding the Mortgagor's employment and income, and of the amount of deposits made to financial institutions where the Mortgagor maintains demand or savings accounts. In some instances, Mortgage Loans which were originated under a Limited Documentation Origination Program may be sold to the Company. For a mortgage loan originated under a Limited Documentation Origination Program to qualify for purchase by the Company, the prospective mortgagor must have a good credit history and be financially capable of making a larger cash down payment, in a purchase, or be willing to finance less of the appraised value, in a refinancing, than would otherwise be required by the Company. Currently, the Company's underwriting standards provide that only mortgage loans with certain loan-to-value ratios will qualify for purchase. If the mortgage loan qualifies, the Company waives some of its documentation requirements and eliminates verification of income and employment for the prospective mortgagor.
>
> The Company's underwriting standards generally follow guidelines acceptable to Fannie Mae and Freddie Mac. In determining the adequacy of the property as collateral, an independent appraisal is made of each property considered for financing. The appraiser is required to inspect the property and verify that it is in good condition and that construction, if new, has been completed. The appraisal is based on the appraiser's judgment of values, giving appropriate weight to both the market value of comparable homes and the cost of replacing the property.

131. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 132-158, they failed to disclose that WaMu: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. WaMu Violated Its Stated Underwriting Standards

132. J.P. Morgan (as successor-in-interest to Bear Stearns) and Greenwich Capital offered or sold to Plaintiff Securities containing loans originated by WaMu and made untrue statements to Plaintiff about WaMu's underwriting and appraisal standards and practices and the loans underlying the Securities. These Wall Street Banks had extensive business relationships with WaMu, had access to WaMu's mortgage origination personnel and internal information, and conducted due diligence into WaMu using their own personnel and third-party loan review firms.

As a result of the Wall Street Banks' access to and due diligence into WaMu, they were or reasonably should have been aware of the untruth of the statements about WaMu described above.

133. In addition to the facts alleged above regarding improper underwriting and appraisal practices by Long Beach, WaMu's subprime mortgage subsidiary, WaMu also pervasively violated its stated underwriting and appraisal standards in its purportedly prime mortgage business. In order to generate a greater volume of risky loan products, WaMu financially rewarded loan origination personnel for closing higher-risk loans and instituted minimum loan sales quotas. Accordingly, WaMu's employees targeted more and more borrowers who were less able to afford the loan payments they would have to make, and many of whom had no realistic ability to make payments on the loans they were sold.

134. CW 14, a WaMu Vice President and Senior Credit Quality Manager from 2005 until February 2008 and a Senior Credit Risk Manager from April 2004 through March 2005, explained with regard to WaMu's loans, "[t]he more you slammed out, the more you made." Similarly, CW 15, a Senior Loan Consultant with WaMu from 2005 to 2007, observed that sometimes mortgage originators were surprised by the loans they could get approved. However, as a loan officer, if CW 15 could personally earn $2,000 - $3,000 by closing a loan, then CW 15's only concern was getting the loan approved. According to CW 15: "Once you get paid, you don't care what happens." CW 16, a Senior Loan Coordinator for WaMu's Home Loan Center in Bethel Park, Pennsylvania from February 1998 until September 2007, felt that WaMu employees were "greedy" and that the borrowers suffered as a result. CW 16 concluded, "[w]e could never figure it out why people came to us [for loans]."

135. In a November 2, 2008 *New York Times* article titled "Was There a Loan It Didn't Like?," former WaMu Senior Mortgage Underwriter Keysha Cooper, who started at WaMu in 2003 and left in 2007, explained that "***[a]t WaMu it wasn't about the quality of the loans; it was about the numbers . . . . They didn't care if we were giving loans to people that didn't qualify.*** Instead, it was how many loans did you guys close and fund?" According to the article, "[i]n

February 2007, . . . the pressure became intense. WaMu executives told employees they were not making enough loans and had to get their numbers up . . . ." Ms. Cooper concluded, "I swear 60 percent of the loans I approved I was made to. . . . If I could get everyone's name, I would write them apology letters."

136. Other former employees agreed that the primary factor driving WaMu's mortgage lending practices was to produce as much volume as possible. CW 17, who was a Closing Loan Coordinator at WaMu in Bethel Park, Pennsylvania, from 2003 until July 2007, explained that WaMu's priority regarding loans was "always quantity rather than quality," and her branch closed an "insane" number of loans every day. WaMu loan personnel could meet these volume expectations only because "[i]f you flew by the seat of your pants and didn't look at everything, you could get it done." CW 17 observed that the branch goal was "hitting certain numbers every month." WaMu rewarded high-performing loan officers with "fabulous vacations" if they made their numbers. CW 17 noted, "It was all about sell, sell, sell."

137. Similarly, according to CW 18, a Loan Coordinator/Mortgage Processor for WaMu in Jacksonville, Florida from March 2007 until December 2007, there was a company-wide culture that required WaMu employees to do "whatever it took to get loans closed." WaMu managers would constantly press WaMu underwriters and salespeople to "push, push, push" to close loans. CW 16 stated that "***WaMu's top priority was to get as many loans closed as quickly as they could close and not worry – they just wanted the volume, and it didn't seem to matter how they got it. . . . Everybody just wanted their chunk of the money.***" Not only did loan coordinators receive bonuses for loans they closed, but also CW 16 understood that if loan officers did not meet their quotas, WaMu fired them.

138. Mortgage originators were also paid more for originating loans that carried higher profit margins for WaMu and had commensurately higher credit risk. For example, CW 19, a Senior Loan Consultant with WaMu at Riverside, California, from 2005 through December 2007, reported that "every year [WaMu] came out with a new commission outline and [WaMu's] extra commissions for teaser rate loans." Further, according to CW 19, occasionally WaMu would

send out emails to mortgage originators about commission "specials." One of WaMu's "specials," CW 19 recalls, was to give mortgage originators extra commissions for Option ARM loans. In addition, ***WaMu paid additional commissions for non-conforming loans***. According to CW 19, at WaMu "[i]t's not about what's best for the client; it's about what's best for the Company." According to CW 20, a Sales Manager with WaMu for twenty years until October 2006, WaMu managers also received increases in their bonuses if their group closed a certain percentage of Option ARM loans.

139. CW 21, a former Loan Consultant for WaMu in Riverside, California, reported that because of WaMu's additional incentive compensation, WaMu salespeople undertook particularly aggressive tactics to sell Option ARM loans. As CW 22, who served as a Senior Underwriter with WaMu through a private mortgage insurance company, put it, "WaMu's biggest things are ARMs – they push those things like cotton candy." According to CW 21, "most borrowers" who came to WaMu "wanted the fixed rate loans." Thus, selling Option ARM loans required "pushing" them, which was done in a "nasty" way. ***WaMu loan officers would fail to educate the borrower, so that Option ARM loan borrowers "would think they were paying the fully-indexed rate, when they were only paying a portion of the interest" because the loan consultants did not explain the programs thoroughly***. WaMu loan consultants were under "a lot of pressure" from their managers to promote and sell Option ARM loans. CW 21 originated only "one or two" Option ARM loans because CW 21 was so morally opposed to these "risky" loans. As a result, CW 21 was frequently reprimanded by CW 21's managers at WaMu.

140. CW 23 was an employee at WaMu from 1993 to 2006 and was a "Senior Trainer" from 2000-2004, training employees on processing, closing, underwriting, leadership, products, and pricing. According to CW 23, Option ARM loans were suitable only for rental, non-owner occupied properties or for "savvy investment people who play the stock market." However, many of the WaMu sales people in CW 23's class did not understand the concept of negative amortization and could not explain it to borrowers.

141. Indeed, an internal WaMu presentation on Option ARM loans shows that WaMu focused on unsophisticated borrowers for its high-risk Option ARM loans. The internal WaMu presentation states that appropriate "Option ARM Candidates" are:

- Savvy Investors
- ***First Time Home Buyers***
- High Income Earners
- ***Self Employed Borrowers***
- ***Retired Borrowers***
- Real Estate Agents

The next page of the same presentation further explained that WaMu's target borrowers were of:

- ***All Ages***
- ***Any Social Status***
- ***All Economic Levels***

In other words, WaMu pushed its Option ARM loans on borrowers regardless of their sophistication, income level, or financial stability.

142. WaMu financially incentivized its underwriters, who supposedly served as WaMu's "gatekeepers" of loan credit quality, to approve an enormous volume of loans without regard to loan quality.

143. CW 24, a Senior Underwriter with WaMu in Livermore, California, from 2003 through September 2007, confirmed that loan underwriters received commissions based upon volume of loans underwritten and closed. CW 6 confirmed that underwriters were compensated on the volume of loans brought in and closed, with no consideration given to the quality of the loans.

144. According to CW 14, underwriters were required to underwrite a minimum of nine loans a day, and any loans underwritten in excess of that number provided for bonus payments. Indeed, certain senior underwriters earned in excess of $100,000 annually because of these bonuses; some underwriters received monthly bonus payments of $5,000 for underwriting a high volume of loans.

145. Notwithstanding underwriters' exorbitant volume-based bonuses, according to CW 25, who worked at WaMu from 1997 to February 2008 and served as a Credit Quality Manager and an Area Underwriting Manager, WaMu's senior management believed that if underwriters knew about underwriting problems that led to problem loans, WaMu's underwriters would "by nature" have tightened up WaMu's lending standards. Thus, WaMu refused to provide loan delinquency data to its underwriters.

146. Highly experienced mortgage underwriters who worked at WaMu during the relevant period were shocked by how lenient WaMu was in its lending. CW 26 was a Senior Underwriter in the Washington Mutual Wholesale loan fulfillment center in Lake Success, New York, from June 2005 through February 2008. CW 26 had twenty-plus years of experience underwriting home loans. When CW 26 arrived at WaMu, CW 26 was stunned to find that WaMu's supposedly "A paper" (*i.e.*, prime loans) consisted of loans made to borrowers with credit scores in the 500s, high LTV ratios, and Option ARM loans. CW 26 reported that there was "only so much you could do" with the loans she underwrote, because they met WaMu's lenient underwriting guidelines and CW 26 did not want to discriminate among borrowers by denying loans to some borrowers who met WaMu's loose guidelines merely because CW 26 did not think that borrower could actually repay the loan that WaMu had sold.

147. Similarly, CW 27, who served as a Senior Underwriter with WaMu through a private mortgage insurance company for most of 2007, was appalled by the lenient standards in place at WaMu. CW 27 reported that WaMu's reputation in the mortgage industry was that "if you had a pulse, WaMu would give you a loan." CW 27 stated that the underwriting guidelines at WaMu "changed every minute. . . . You would literally be getting an email every second that the guidelines changed or would have a pissed off account executive at your desk asking why the loan can't go through." Often, CW 27 reported, loans would be taken away from her to be approved by another underwriter who was not as conscientious. CW 27 often saw active or approved loans in the system that CW 27 had refused to underwrite and were ultimately signed

off on by someone else. According to CW 27, "They would give it to one of their 'lead underwriters' to approve."

148. Before a loan came to CW 27's desk, it could be automatically underwritten through a computer program, modeled after Fannie Mae's "Desktop Underwriter" ("DU") program. Loans that could be underwritten using the DU system could be approved by a loan processor without any involvement from an underwriter. CW 27 recalled that regularly, if a loan was rejected by the computer, the loan consultant would repeatedly re-enter the loan's information, changing the information a little each time, "tweak[ing] the system."

149. CW 16 recalled, "I saw underwriting managers and other managers waive a lot [of supposed underwriting rules]." According to CW 16, "[o]nce a week you'd go in with your manager, [and he'd say] 'why didn't this loan close, why didn't that one close?'" CW 16 said ***the pressure "was coming from the very top, the managers had to listen to the head manager, who had to listen to corporate.***" CW 16 added, "I almost had a nervous breakdown." According to CW 16, the underwriting procedures progressively loosened and "got really bad in 2006." ***WaMu's "top priority was to get as many loans closed as quickly as they could close and not worry – they just wanted the volume, and it didn't seem to matter how they got it."***

150. Notwithstanding the fact that, according to regulatory agencies including the Federal Deposit Insurance Corporation and the Office of Thrift Supervision, "prime" loans should have been available only to borrowers with FICO scores of 660 or above, WaMu regularly made loans to borrowers with FICO scores well below this standard. A WaMu training document for subprime loan production employees, entitled "Specialty Lending UW [Underwriter] HLCA [Home Loans Credit Authority] Training," revised September 26, 2007, makes clear that, regardless of a borrowers' credit history or actual potential to repay a loan, if the borrower WaMu targeted for one of its "prime" loans had a FICO score over 619, that borrower was considered a "prime" borrower.

151. In one stunning example of how WaMu abused the watered-down "standard" above, the Company instructed in an internal WaMu document to its underwriters that if a

borrower applied for a "5/1 Amortizing ARM" and the borrower had a bankruptcy "less than 4 years ago," but had a FICO score of 621, WaMu would consider that borrower prime. In fact, CW 28, a Loan Consultant for WaMu in New York from 2003 to 2006, stated that borrowers with credit scores as low as 540 (well below any accepted prime threshold) were approved for "prime" loans during the relevant period.

152. Various witnesses with direct experience in WaMu's underwriting operations have explained that during the relevant period, exceptions to WaMu's already low prime underwriting guidelines were the rule.

153. As observed by CW 29, who worked for WaMu from 1995 through 2008, most recently as Assistant Vice President Credit Level 3, Underwriting Supervisor, no exception to the underwriting guidelines was needed for many questionable loans, because WaMu's "guidelines were so generous." However, for those loans that did not fit within the loose guidelines of WaMu's underwriting standards, exceptions were encouraged and readily available. CW 30, a Senior Underwriter at the WaMu home loan center in Lake Success, New York from 2007 to 2008, agreed, stating that guideline exceptions were "part of the norm . . . it was so commonplace to go outside of the guidelines." ***Underwriting exceptions that were sent to management for approval "were always approved, so it was just business as usual and something that they were comfortable with."*** CW 14 explained that WaMu encouraged loan consultants to obtain exceptions to the underwriting guidelines whenever necessary to close more loans. CW 31, a Senior Loan Processor at WaMu in Pittsburgh from 2004 through 2006 and again in 2007, agreed that WaMu's loans were exception-ridden: "You could pretty much get an exception on any loan you wanted to."

154. As an Area Underwriting Manager, CW 25 was one of four senior underwriters with the Company charged with approving exceptions to WaMu underwriting guidelines for loans greater than $3 million and exceptions beyond those that WaMu underwriting managers were allowed to make. CW 25 stated that she and others in her position at WaMu were required to make numerous exceptions to WaMu's stated underwriting guidelines. Indeed, CW 25 stated

that the Negotiated Transaction Managers would be under a great deal of pressure to approve certain loans, especially where loan consultants had "important relationships." Those loans for which CW 25 and the other Negotiated Transaction Managers refused to make exceptions, even after being pressured, were referred up WaMu's chain of command to Mark Brown, National Underwriting Manager, or Cheryl Feltgen, Division Executive Chief Risk Officer, for approval where the loans would readily be approved.

155. According to CW 32, an underwriter with WaMu from 2002 through 2006 in Portland, Oregon, even when "borrowers were simply not qualified," WaMu's loose underwriting guidelines allowed borrowers to meet stated-income loan guidelines because of their credit scores. For example, CW 32 recalled multiple times where underwriters wanted to lower the stated income on the loan application, based on an evaluation of the borrower's actual circumstances, but WaMu would not allow such revisions. CW 32 said that stated income loans were commonly referred to at WaMu as "lie-to-me loans." Indeed, CW 32 reported that, over underwriter objections, the Company began to accept a job description in lieu of proof of employment for stated-income loans. CW 32 recalled that the borrower's job description did not even have to be produced by the borrower's employer or have to be on their employer's letterhead: "it was sufficient to print out a job description found online."

156. WaMu also did not underwrite its Option ARM loans to the fully-indexed rate. CW 33, a Retail Loan Consultant with WaMu from 2002 through 2007, reported that throughout the relevant period ***until late 2007, WaMu had underwritten its Option ARM loans to ensure only that the borrower could make monthly payments at the "teaser" rate.*** When, in late 2007, the Company changed its guidelines to finally require its underwriters to underwrite the loans to the fully-indexed rate, it was a major change for the underwriters. CW 33 observed that "At the time the loans started falling out of favor, they started underwriting based on the index rate and it just snowballed from there." CW 34, a WaMu Retail Loan Consultant in Kensington, Maryland from 2001 through December 2007, confirmed that WaMu underwrote Option ARM loans to the teaser rate, rather than the fully-indexed rate. In 2007, according to CW 34, WaMu's new

guidelines resulted in fewer borrowers being able to qualify for Option ARM loans based on the fully-indexed rate. Similarly, CW 35, a Senior Underwriter at WaMu's Lake Success, New York branch from June 2005 until February 2008, and CW 21 also confirmed that WaMu underwrote its Option ARM loans to the "teaser" rate, rather than the fully-indexed rate.

157. Witnesses in other divisions of WaMu also have confirmed that WaMu underwrote its Option ARM loans to their "teaser" rates, at least until August 2007. According to CW 36, a Due Diligence Director in the WaMu Transaction Management group in Anaheim and subsequently Fullerton, California, who spent over 17 years with WaMu from 1991 until 2008, WaMu required loans that it purchased from third parties to conform with underwriting guidelines that WaMu applied to the loans that it originated. Thus, WaMu periodically updated its "Bulk Seller Guide" to conform to WaMu's own underwriting requirements. WaMu's "Mortgage Securities Corp. Seller Guide Update – Announcement Concerning Qualifying Rate and Qualifying Payment for Hybrid ARM, IO, and Option ARM Products" indicates that, effective August 1, 2007, WaMu Option ARM loan underwriting shifted to require qualification for such loans only at the fully-indexed rate.

158. On November 1, 2007, New York State Attorney General Andrew Cuomo filed a complaint against First American Corporation and eAppraiseIT, which detailed that WaMu pressured appraisers to inflate appraisal values. According to a November 2, 2007 *New York Times* article, the complaint was filed after "investigators had spent nine months interviewing hundreds of mortgage industry executives and poring over millions of documents obtained through subpoenas." The complaint alleges, on the basis of numerous internal emails, that WaMu executives pressured eAppraiseIT to increase the appraised value of homes and that eAppraiseIT improperly allowed WaMu's loan production staff to hand-pick appraisers who brought in appraisal values high enough to permit WaMu's loans to close. Additionally, the New York Attorney General's complaint alleges that WaMu repeatedly pressured eAppraiseIT appraisers to change appraisal values that were too low to permit loans to close.

d. Fremont Investment & Loan

1. Defendants Made Untrue Statements of Material Facts About Fremont's Underwriting Standards and Practices

159. Fremont Investment & Loan ("Fremont") originated mortgage loans that were included in the pools for the following offerings:

Offering	Depositor Defendant	Wall Street Bank Defendant
ACE 2005-HE2	Ace Securities Corp.	Deutsche Bank
ACE 2005-HE5	Ace Securities Corp.	Deutsche Bank
ACE 2005-HE6	Ace Securities Corp.	Deutsche Bank
ACE 2006-FM2	Ace Securities Corp.	Deutsche Bank
ACE 2006-HE1	Ace Securities Corp.	Deutsche Bank
ACE 2006-SL1	Ace Securities Corp.	Deutsche Bank
ACE 2006-SL2	Ace Securities Corp.	Deutsche Bank
BSABS 2005-HE10	Bear Stearns Asset Backed Securities Inc.	Bear Stearns
BSABS 2006-HE4	Bear Stearns Asset Backed Securities Inc.	Bear Stearns
CARR 2006-FRE1	Carrington Mortgage Loan Trust	Barclays Capital
CARR 2006-FRE2	Carrington Mortgage Loan Trust	Barclays Capital
FHLT 2005-1	Fremont Home Loan Trust	Greenwich Capital
FHLT 2005-A	Fremont Home Loan Trust	Credit Suisse
GSAMP 2005-HE6	GS Mortgage Securities Corp.	Goldman Sachs
HELT 2007-FRE1	Home Equity Loan Trust	Greenwich Capital
IXIS 2005-HE2	IXIS Real Estate Capital Trust	Morgan Stanley
IXIS 2005-HE4	IXIS Real Estate Capital Trust	Goldman Sachs
MABS 2005-FRE1	MASTR Asset Backed Securities Trust	UBS
MABS 2006-FRE2	MASTR Asset Backed Securities Trust	UBS
MABS 2006-HE1	MASTR Asset Backed Securities Trust	UBS

SVHE 2005-A	SoundView Home Loan Trust	Greenwich Capital
SVHE 2005-B	SoundView Home Loan Trust	Greenwich Capital

160. Defendants offered or sold to Plaintiff approximately $275.5 million of Securities for which Fremont originated some or all of the underlying mortgage loans.

161. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding Fremont's underwriting and appraisal standards and practices. For example, the prospectus supplement for MLMI 2005-FM1 stated:

> Mortgage loans are underwritten in accordance with Fremont's current underwriting programs, referred to as the Scored Programs ("Scored Programs"), subject to various exceptions as described in this section. Fremont's underwriting standards are primarily intended to assess the ability and willingness of the borrower to repay the debt and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan. The Scored Programs assess the risk of default by using Credit Scores as described below along with, but not limited to, past mortgage payment history, seasoning on bankruptcy and/or foreclosure and loan-to-value ratio as an aid to, not a substitute for, the underwriter's judgment. All of the mortgage loans in the mortgage pool were underwritten with a view toward the resale of the mortgage loans in the secondary mortgage market.
>
> * * *
>
> All of the mortgage loans were underwritten by Fremont's underwriters having the appropriate approval authority. Each underwriter is granted a level of authority commensurate with their proven judgment, experience and credit skills. **On a case by case basis, Fremont may determine that, based upon compensating factors, a prospective mortgagor not strictly qualifying under the underwriting risk category guidelines described below is nonetheless qualified to receive a loan, i.e., an underwriting exception. Compensating factors may include, but are not limited to, low loan-to-value ratio**, low debt to income ratio, substantial liquid assets, good credit history, stable employment and time in residence at the applicant's current address. It is expected that a substantial portion of the mortgage loans may represent such underwriting exceptions.
>
> There are the three documentation types, Full Documentation ("Full Documentation"), Easy Documentation ("Easy Documentation") and Stated Income ("Stated Income"). Fremont's underwriters verify the income of each applicant under various documentation types as follows: under Full Documentation, applicants are generally required to submit verification of stable income for the periods of one to two years preceding the application dependent on credit profile; under Easy Documentation, the borrower is qualified based on verification of adequate cash flow by means of personal or business bank statements; under Stated Income, applicants are qualified based on monthly income as stated on the mortgage application. The income is not verified under

the Stated Income program; however, the income stated must be reasonable and customary for the applicant's line of work.

Fremont originates loans secured by 1-4 unit residential properties made to eligible borrowers with a vested fee simple (or in some cases a leasehold) interest in the property. **Fremont's underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal.** Generally, initial appraisals are provided by qualified independent appraisers licensed in their respective states. Review appraisals may only be provided by appraisers approved by Fremont. In some cases, Fremont relies on a statistical appraisal methodology provided by a third-party. Qualified independent appraisers must meet minimum standards of licensing and provide errors and omissions insurance in states where it is required to become approved to do business with Fremont. Each uniform residential appraisal report includes a market data analysis based on recent sales of comparable homes in the area and, where deemed appropriate, replacement cost analysis based on the current cost of constructing a similar home. The review appraisal may be a desk review, field review or an automated valuation report that confirms or supports the original appraiser's value of the mortgaged premises.

162. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 163-182, they failed to disclose that Fremont: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. Fremont Violated Its Stated Underwriting Standards

163. Defendants Barclays, J.P. Morgan (as successor-in-interest to Bear Stearns), Credit Suisse, Deutsche Bank, Goldman Sachs, Greenwich Capital, Merrill Lynch, Morgan Stanley, and UBS offered or sold to Plaintiff Securities containing loans originated by Fremont and made untrue statements to Plaintiff about Fremont's underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with Fremont, had access to Fremont's mortgage origination personnel and internal information, and conducted due diligence into Fremont using their own personnel and third-party loan review

firms. As a result of the Wall Street Banks' access to and due diligence into Fremont, they were or reasonably should have been aware of the untruth of the statements about Fremont described above.

164. Fremont originated subprime residential real estate loans nationwide on a wholesale basis through independent loan brokers in nearly all 50 states. Fremont was one of the country's largest subprime lenders until March 2007, when the Federal Deposit Insurance Corporation ("FDIC") effectively forced Fremont out of the subprime lending business for extending subprime credit "in an unsafe and unsound manner" and committing violations of law and FDIC regulations. Fremont later filed for bankruptcy.

165. On March 7, 2007, following an extensive investigation, the FDIC issued a Cease & Desist Order to Fremont, concluding that Fremont was, in fact, "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]," "operating with a large volume of poor quality loans," and "engaging in unsatisfactory lending practices."

166. According to the FDIC's March 7, 2007 press release:

> In taking this action, the FDIC found that [Fremont] was operating without effective risk management policies and procedures in place in relation to its subprime mortgage and commercial real estate lending operations. The FDIC determined, among other things, that the bank had been operating without adequate subprime mortgage loan underwriting criteria, and that it was marketing and extending subprime mortgage loans in a way that substantially increased the likelihood of borrower default or other loss to the bank.

167. In response to Fremont's dangerous subprime lending practices, on October 4, 2007, the Commonwealth of Massachusetts, through its Attorney General, brought an enforcement action against Fremont for an array of "unfair and deceptive business conduct," "on a broad scale." *Massachusetts v. Fremont Investment & Loan and Fremont General Corp.*, No. 07-4373 (Sup. Ct. Mass.) (the "Massachusetts Action"). Specifically, the Massachusetts Action alleged that Fremont abdicated its underwriting standards, provided misleading or incomplete

information to borrowers, made subprime loans that it knew would fail, and participated in predatory lending.

168. According to the Massachusetts Attorney General's complaint, Fremont's loans were "structurally unfair due to their multiple layers of risk with no meaningful consideration whether borrowers [could] afford to pay the loans." Fremont "approve[ed] borrowers without considering or verifying the relevant documentation related to the borrower's credit qualifications, including the borrower's income"; "approv[ed] borrowers for loans with inadequate debt-to-income analyses that do not properly consider the borrowers' ability to meet their overall level of indebtedness and common housing expenses"; "failed to meaningfully account for [ARM] payment adjustments in approving and selling loans"; "approved borrowers for these ARM loans based only on the initial fixed 'teaser' rate, without regard for borrowers' ability to pay after the initial two year period"; "consistently failed to monitor or supervise brokers' practices or to independently verify the information provided to Fremont by brokers"; and "ma[de] loans based on information that Fremont knew or should have known was inaccurate or false, including, but not limited to, borrowers' income, property appraisals, and credit scores."

169. On December 9, 2008, the Supreme Judicial Court of Massachusetts affirmed a preliminary injunction obtained in conjunction with the Massachusetts Action that prevented Fremont from foreclosing on thousands of its loans issued to Massachusetts residents. As a basis for its unanimous ruling, the Supreme Judicial Court found evidence that "Fremont made no effort to determine whether borrowers could 'make the scheduled payments under the terms of the loan,'" and that "Fremont knew or should have known that [its lending practices and loan terms] would operate in concert essentially to guarantee that the borrower would be unable to pay and default would follow."

170. In reaching its decision, the Supreme Judicial Court relied in part on the affidavits of two outside account executives who marketed Fremont's loan products to brokers in Massachusetts. Once loans were produced, these account executives worked with Fremont

employees, such as underwriters and account managers, to process and close the loans. According to their affidavits filed in the Massachusetts Action, both outside account executives attested that Fremont purposefully relaxed its underwriting standards and made loans based on documents known to be untrue.

171. The terms of the preliminary injunction were made permanent by a settlement of the Massachusetts Action, reached on June 9, 2009. In addition to agreeing to the protections for borrowers that would prevent Fremont from foreclosing on "unfair" loans, Fremont agreed to pay the Commonwealth of Massachusetts $10 million in consumer relief, penalties, and costs.

172. Numerous confidential witnesses interviewed by Plaintiff's counsel also corroborate the findings of the FDIC and the Massachusetts Action. According to CW 37, an Assistant Vice President, Regulatory Risk Examiner at Fremont, who was involved in the FDIC's investigation of Fremont, Fremont's Regulatory Risk Management group (of which CW 37 was a member) submitted numerous, repeated adverse written findings to senior Fremont executives in 2005 and 2006, which "mirrored" the FDIC's eventual Cease & Desist Order, one to two years later. CW 37 stated that these repeated adverse reports specifically highlighted, among other things, unfair and deceptive acts in which Fremont was engaging, "pretty obvious" poor underwriting, and problematic incentive compensation. CW 37 stated that these reports were based on reviews performed by the Regulatory Risk Management group, including interviews of underwriters, quality control, and other Fremont personnel. CW 37 stated that Fremont filed repeated Suspicious Activity Reports ("SARs") regarding broker fraud as to the same brokers, but Fremont executives would not end relationships with the identified brokers. CW 37 stated that some of the fraud was "so egregious" including "ridiculous" stated income applications, yet nothing was being done about "obvious problems" including repeated broker fraud.

173. The personal accounts of other former employee confidential witnesses confirm that Fremont failed to adhere to its established underwriting guidelines and promoted the wide use of exceptions to Fremont's underwriting standards in order to drive loan quantity at the expense of quality. For example, Fremont underwriters were instructed that Fremont's

guidelines and underwriting policies were a mere "guide," and that they were to "think outside the box" (according to CW 38, a senior underwriter from 2004 through March 2007 at Fremont's Downers Grove, Illinois center), "make it work" (according to CW 39, an underwriter at Fremont's Downers Grove center from August 2002 to January 2007, and CW 40, an assistant operations manager at Fremont's Anaheim, California center from October 2003 to January 2007), or "massage the file" (according to CW 41, a senior account manager at Fremont's Downers Grove, Illinois center from July 2001 to February 2007) to get loans approved.

174. As explained by CW 42, a former Fremont sales manager from August 1998 through March 2007, not only were Fremont's guidelines loose, but there were frequent granted exceptions to the guidelines. Underwriters made several types of exceptions "everyday," according to CW 43, an operations manager at Fremont's Anaheim, California center from April 2004 to January 2007, and a lot of them were not warranted, according to CW 40. Indeed, an estimated 30% of Fremont's loans had some sort of exception, partly because anyone from an assistant manager on up had the authority to sign off on exceptions, according to CW 44, an underwriter at Fremont's Anaheim, California center from May 2005 to March 2007.

175. According to CW 44 and CW 45 (an account manager at Fremont's Downers Grove, Illinois center from August 2005 to January 2007), when borrowers were rejected for failing to meet Fremont's underwriting criteria for fully documented loans, the loans were simply converted to "stated income" loans – with a higher reported income than previously documented – and approved. According to the separate accounts of CW 39 and CW 41, Fremont approved loans with unrealistic stated incomes, including "pizza delivery men" with reported monthly income of $5,000 or $6,000. Fremont accepted claims that "landscapers and housekeepers" earned $10,000 in monthly income, according to CW 46 (a former senior underwriter at Fremont's Anaheim and Ontario, California centers from 2002 to 2007), and that "window washers" made $75,000 per year, according to CW 41. In addition, Fremont continually ignored obviously fraudulent documents when approving loans, according to CW 47, an account manager from 2005 through May 2007. By way of specific example, Fremont ignored a case

where 40 loan files from the same broker had the exact same banking statements, according to CW 48, a former quality control investigator at Fremont from 2002 until March 2007. Indeed, fraudulent bank statements and W2s were discovered and ignored every day, according to CW 49, a quality control auditor with Fremont from May 2005 to February 2007. And, when Fremont could not ignore fraudulent information, such as a false pay stub, Fremont simply removed the information from the file or replaced it, according to CW 40.

176. According to CW 50, a senior underwriter at Fremont's Anaheim, California center from 1997 to September 2007, Fremont also loosened its debt-to-income-ratio requirements. Before 2004, Fremont generally did not approve loans with more than a 50% debt-to-income ratio. Thereafter, according to CW 50, Fremont approved loans with a 55% debt-to-income ratio. And when CW 50 reviewed the loan files, he often determined that the debt-to-income ratios actually were between 65% or 70%, or even up to 90%. In addition, CW 50 stated that Fremont routinely approved stated-income loans with claimed incomes that were simply "off the wall figures."

177. In addition, according to CW 51, an account manager at Fremont's Downers Grove, Illinois center from January 2002 to July 2006, CW 51's superiors would call property appraisers and request that they inflate their appraisal values by at least a few thousand dollars, and the appraisers would do so. According to CW 51, while auditing loans in the Due Diligence Department and later, in connection with CW 51's review of investor repurchase claims, CW 51 discovered, among other things, incomplete appraisals, appraisals that did not match the address of the property, and appraisals that described the home as owner-occupied when it was rented, on the large majority of the loans.

178. Further corroborating Fremont's poor underwriting practices, Fremont's business partners have alleged that Fremont originated and sold large amounts of loans that were terribly underwritten. In October of 2007, Morgan Stanley Mortgage Capital Holdings LLC sued Fremont for breach of contract for Fremont's failure to repurchase loans that Fremont sold from May of 2005 through December of 2006 to Morgan Stanley's predecessor-in-interest, Morgan

Stanley Mortgage Capital, Inc. (referred to collectively with Morgan Stanley Mortgage Capital Holdings LLC as "Morgan Stanley"). That action was captioned *Morgan Stanley Mortgage Capital Holdings LLC, as Successor-in-Interest to Morgan Stanley Mortgage Capital Inc. v. Fremont Investment & Loan*, No. 07-Civ.-9457 (S.D.N.Y.). According to the complaint, when Fremont sold the loans at issue, Fremont warranted, among other things, that the loans met its underwriting criteria and that Fremont had adequately verified the underlying information, such as the borrowers' income, credit history, and assets. Further, according to the complaint, Fremont agreed to repurchase any loans that materially violated the warranties and indemnify Morgan Stanley for any damages it suffered due to the defective loans.

179. Morgan Stanley alleged that it discovered "hundreds" of improperly underwritten loans shortly after they were purchased. In particular, Morgan Stanley alleged that the "loans fail[ed] to meet Fremont's underwriting guidelines" because Fremont had "fail[ed] to verify assets prior to closing," performed "defective verification of rent, failed[ed] to obtain the minimum credit history information, and [made] loans . . . to borrowers that did not have the requisite credit score." Morgan Stanley also alleged, consistent with the statements of former Fremont employees set forth herein, that the "loan documents" contained "misrepresentations of the income or employment of the borrower" and "misrepresentations concerning appraisal values." Morgan Stanley further alleged that the loans contained "misrepresentations of the occupancy of the residence," "misrepresentations of the assets of the borrower," and "misrepresentations of the condition of the property."

180. Morgan Stanley is not the only one of Fremont's business partners to sue the Company for its improper underwriting. In June of 2007, Lehman Brothers Holdings, Inc. and Lehman Brothers Bank, FSB (collectively, "Lehman Brothers") also sued Fremont for breach of contract and unjust enrichment for Fremont's failure to repurchase loans that Lehman Brothers had purchased beginning in March of 2004. That action was captioned *Aurora Loan Services LLC, et al. v. Fremont Investment & Loan Corp.*, No. 07-cv-01284-RPM (D. Colo.).

181. In that case, Lehman Brothers, just like Morgan Stanley, alleged that when Fremont sold the loans at issue, Fremont warranted that the loans met its underwriting criteria and that the underlying documentation was accurate as to the borrowers' identity, income, employment, credit history, and assets, among other things. Furthermore, Fremont agreed to repurchase those loans that violated the warranties and indemnify Lehman Brothers for any damages it suffered due to the defective loans.

182. After Lehman Brothers purchased the loans, according to its complaint, loan servicers and other third parties notified Lehman Brothers of "certain issues" concerning the loans. When Lehman Brothers "conducted further due diligence," it "confirmed that Fremont breached one or more representations and/or warranties" concerning the loans. According to the Lehman complaint, the breached warranties included "[t]he conformance of the Mortgage Loans with applicable underwriting guidelines and loan program requirements"; "[t]he accuracy and integrity of all information and documentation regarding borrower identity, income, employment, credit, assets, and liabilities used to originate the Mortgage Loans"; "[t]he validity of all Mortgage Loan documentation"; "[t]he ownership, nature, condition, and value of the real property securing the respective Mortgage Loans"; and "[b]orrower occupancy of the property securing the Mortgage Loans."

e. <u>WMC Mortgage Corporation</u>

1. Defendants Made Untrue Statements of Material Facts About WMC's Underwriting Standards and Practices

183. WMC originated Mortgage Loans that were included in the pools for the following offerings:

Offering	Depositor Defendant	Wall Street Bank Defendant
ABSHE 2005-HE1	Asset Backed Securities Corp. Home Equity	Credit Suisse
ABSHE 2005-HE3	Asset Backed Securities Corp. Home Equity	Credit Suisse
ABSHE 2005-HE5	Asset Backed Securities Corp. Home Equity	Credit Suisse
ACE 2005-HE5	Ace Securities Corp.	Deutsche Bank

Offering	Depositor Defendant	Wall Street Bank Defendant
ACE 2005-HE7	Ace Securities Corp.	Deutsche Bank
ACE 2006-HE1	Ace Securities Corp.	Deutsche Bank
ACE 2007-HE2	Ace Securities Corp.	Deutsche Bank

SVHE 2005-1	SoundView Home Loan Trust	Greenwich Capital
SVHE 2005-B	SoundView Home Loan Trust	Greenwich Capital

184. Defendants offered or sold to Plaintiff approximately $253.9 million of Securities for which WMC originated some or all of the underlying mortgage loans.

185. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding WMC's underwriting and appraisal standards and practices. For example, the prospectus supplement for ABSHE 2005-HE5 stated:

> *Underwriting Standards*. The mortgage loans have been originated generally in accordance with the underwriting guidelines established by it (collectively, the "Underwriting Guidelines"). **WMC Mortgage Corp. also originates certain other mortgage loans that are underwritten to the guidelines of specific investors, which mortgage loans are not included among those sold to the trust as described herein. The Underwriting Guidelines are primarily intended to (a) determine that the borrower has the ability to repay the mortgage loan in accordance with its terms and (b) determine that the**

related mortgaged property will provide sufficient value to recover the investment if the borrower defaults. On a case-by-case basis WMC Mortgage Corp. may determine that, based upon compensating factors, a prospective mortgagor not strictly qualifying under the underwriting risk category or other guidelines described below warrants an underwriting exception. Compensating factors may include, but are not limited to, low debt-to-income ratio ("Debt Ratio"), good mortgage payment history, an abundance of cash reserves, excess disposable income, stable employment and time in residence at the applicant's current address. It is expected that a substantial number of the mortgage loans to be included in the trust will represent such underwriting exceptions.

The mortgage loans in the trust will fall within the following documentation categories established by WMC Mortgage Corp.: Full Documentation, Full-Alternative Documentation, Limited Documentation, Lite Documentation, Stated Income Documentation and Stated Income/Verified Assets (Streamlined) Documentation. In addition to single-family residences, certain of the mortgage loans will have been underwritten (in many cases, as described above, subject to exceptions for compensating factors) in accordance with programs established by WMC Mortgage Corp. for the origination of mortgage loans secured by mortgages on condominiums, vacation and second homes, manufactured housing, two- to four-family properties and other property types. In addition, WMC Mortgage Corp. has established specific parameters for jumbo loans, which are designated in the Underwriting Guidelines as mortgage loans with original principal balances in excess of $650,000. However, WMC Mortgage Corp. sometimes increases the original principal balance limits if borrowers meet other compensating credit factors.

Under the Underwriting Guidelines, WMC Mortgage Corp. verifies the loan applicant's eligible sources of income for all products, calculates the amount of income from eligible sources indicated on the loan application, reviews the credit and mortgage payment history of the applicant and calculates the Debt Ratio to determine the applicant's ability to repay the loan, and reviews the mortgaged property for compliance with the Underwriting Guidelines. **The Underwriting Guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require, among other things, (1) an appraisal of the mortgaged property which conforms to Uniform Standards of Professional Appraisal Practice and (2) an audit of such appraisal by a WMC Mortgage Corp.-approved appraiser or by WMC Mortgage Corp.'s in-house collateral auditors (who may be licensed appraisers), which audit may in certain circumstances consist of a second appraisal, a field review, a desk review or an automated valuation model.**

186. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 187-193, they failed to disclose that WMC: (i) systematically failed to

follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. WMC Violated Its Stated Underwriting Standards

187. Defendants Barclays, Citigroup, Credit Suisse, Deutsche Bank, Greenwich Capital, J.P. Morgan, Merrill Lynch, Morgan Stanley, and UBS offered or sold to Plaintiff Securities containing loans originated by WMC and made untrue statements to Plaintiff about WMC's underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with WMC, had access to WMC's mortgage origination personnel and internal information, and conducted due diligence into WMC using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into WMC, they were or reasonably should have been aware of the untruth of the statements about WMC described above.

188. According to Reuters, WMC originated "some of the worst-performing loans in the . . . $575 billion market for home equity asset-backed securities." According to a lawsuit filed in September 2009, a review of WMC's mortgage loan files showed that "in reality [WMC] followed few, if any, objective standards or criteria in underwriting [mortgage loans] and showed little concern if any, for any borrower's ability to repay." WMC's reckless underwriting standards and practices resulted in a huge amount of foreclosures, ranking WMC fourth in the Comptroller of the Currency's "Worst Ten of the Worst Ten" list presented in April 2010 to the FCIC.

189. In 2004, WMC, then the sixth-largest subprime lender in the nation, was purchased by General Electric from private equity firm Apollo Management. WMC's concentration was in nonprime loans and jumbo loans up to $1 million dollars. According to a March 2007 article published by *MortgageDaily.com*, WMC was faced with growing

delinquencies, and announced that it would no longer write mortgages with no down payments. Soon after, on September 20, 2007, General Electric closed WMC's operations, taking a $400 million charge as a result.

190. The market has now become aware of WMC's reckless loan originating practices. For example, on September 2, 2009, PMI Mortgage Insurance Co. ("PMI") sued WMC in California state court for misrepresentations and failure to adhere to its contractual repurchase obligations relating to the securitization of a pool of certain subprime mortgage loans originated by WMC ("PMI Complaint"). PMI alleged that WMC "made extensive representations and warranties" about the underwriting of its mortgage loans and the accuracy of the information underlying such loans. PMI Complaint, ¶¶ 21, 33. According to PMI, an external investigation by Clayton into a sample of some of the thousands of WMC-originated loans revealed that WMC "breached various representations and warranties . . . because, *inter alia*, the loan-to-value ratio at the time of origination was greater than 100%; fraud, errors, misrepresentations, or gross negligence took place on the part of WMC . . . ; the loans did not comply with WMC's own underwriting standards at the time of origination; certain documents were missing; and/or WMC had failed to utilize a methodology in underwriting the loans that employed objective mathematical principles designed to determine that, at the time of origination, the borrower had the reasonable ability to make timely payments on the [m]ortgage [l]oans." Id., ¶ 35.

191. According to the PMI Complaint, the Clayton investigation "demonstrate[d] a systemic failure by WMC to apply sound underwriting standards and practices which cuts across all of the [loans in the securitization]." In the defective loans, "Clayton discovered unreasonable stated income and/or misrepresentations of income and/or employment by the borrower, the large majority of which could have been discovered by WMC prior to transfer via simple diligence procedures." ¶ 36. Moreover, nearly a quarter of the loans sampled by Clayton were shown to contain "misrepresentations of occupancy by the borrower, another factor that could have easily been verified by WMC." *Id.*

192. WMC's reckless loan originating practices were noticed by the regulatory authorities as well. In June 2008, the Washington State Department of Financial Institutions, Division of Consumer Services filed a Statement of Charges and Notice of Intention to Enter an Order to Revoke License, Prohibit From Industry, Impose Fine, Order Restitution and Collect Investigation Fees against WMC Mortgage and its principal owners individually: Amy C. Brandt, WMC's CEO and President; Mark Walter, WMC's executive vice president; and Marc Becker, WMC's Director. The Statement of Charges was the result of a lengthy investigation in which WMC's and its business partners' books were subpoenaed. The investigation found that WMC had originated loans with unlicensed or unregistered mortgage brokers, understated amounts of finance charges on multiple loans, understated amounts of payments made to escrow companies, understated annual percentage rates by almost one-half of 1%, and committed many other violations of Washington State deceptive and unfair practices laws. This investigation is ongoing.

193. In January 2009, WMC Mortgage was sued in the United States District Court for the Eastern District of California for violations of the Truth In Lending Act, 15 U.S.C. § 1601, *et seq*. The plaintiff in that action is a mortgage borrower who alleges that, in an effort to maximize the number of loans sold to consumers and to maximize WMC's profits, WMC assured the plaintiff throughout the loan application process that the plaintiff would have low mortgage payments and failed to disclose the correct payment amounts or finance charges.

f. The Ameriquest Loan Sellers

1. Defendants Made Untrue Statements of Material Facts About the Ameriquest Loan Sellers' Underwriting Standards and Practices

194. ACC Capital Holdings ("ACC Capital") was the nation's largest subprime lender. Argent was a wholly owned mortgage subsidiary of ACC Capital. Citigroup purchased Argent on August 31, 2007. Ameriquest Mortgage Company ("Ameriquest") was ACC Capital's wholly owned retail lending subsidiary. On August 1, 2007, Ameriquest announced that it would no

longer be accepting loan applications. Ameriquest and Argent are, at times, collectively referred to herein as the "Ameriquest Loan Sellers."

195. Together, the Ameriquest Loan Sellers originated mortgage loans that were included in the pools for the following offerings:

Offering	Depositor Defendant	Wall Street Bank Defendant
ABSHE 2006-HE6	Asset Backed Securities Corp. Home Equity	Credit Suisse
ABSHE 2006-HE7	Asset Backed Securities Corp. Home Equity	Credit Suisse
ACE 2005-HE2	Ace Securities Corp.	Deutsche Bank
ACE 2006-SL1	Ace Securities Corp.	Deutsche Bank
ACE 2006-SL2	Ace Securities Corp.	Deutsche Bank
AMSI 2005-R6	Ameriquest Mortgage Securities Inc.	Credit Suisse
AMSI 2005-R7	Ameriquest Mortgage Securities Inc.	UBS
AMSI 2005-R8	Ameriquest Mortgage Securities Inc.	Credit Suisse
AMSI 2006-R2	Ameriquest Mortgage Securities Inc.	Credit Suisse
BSABS 2005-AQ2	Bear Stearns Asset Backed Securities Inc.	Bear Stearns
BSABS 2006-HE3	Bear Stearns Asset Backed Securities Inc.	Bear Stearns
CMLTI 2005-9	Citigroup Mortgage Loan Trust	Citigroup
CMLTI 2007-AMC2	Citigroup Mortgage Loan Trust	Citigroup
GSAMP 2006-HE6	GS Mortgage Securities Corp.	Goldman Sachs

196. Defendants offered or sold to Plaintiff approximately $207.4 million of Securities for which the Ameriquest Loan Sellers originated some or all of the underlying mortgage loans.

197. The Offering Documents for all these Securities contained substantially if not exactly the same statements of material facts regarding the Ameriquest Loan Sellers' underwriting standards and practices. For example, the prospectus supplement for AMSI 2005-R8 stated:

> The Mortgage Loans were originated generally in accordance with guidelines (the "Underwriting Guidelines") established by the Originator with one of the following income documentation types: "Full Documentation," "Limited Documentation" or "Stated Income." **The Underwriting Guidelines are primarily intended to evaluate: (1) the applicant's credit standing and repayment ability and (2) the value and adequacy of the mortgaged property**

as collateral. On a case-by-case basis, the Originator may determine that, based upon compensating factors, a loan applicant, not strictly qualifying under one of the Risk Categories described below, warrants an exception to the requirements set forth in the Underwriting Guidelines. Compensating factors may include, but are not limited to, loan-to-value ratio, debt-to-income ratio, good credit history, stable employment history, length at current employment and time in residence at the applicant's current address. It is expected that a substantial number of the Mortgage Loans to be included in the mortgage pool will represent such underwriting exceptions.

198. The relevant Offering Documents also made statements of material facts about the Ameriquest Loan Sellers' appraisal standards and practices. For example, the same prospectus supplement stated:

> The Underwriting Guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and requires either (A) (i) an appraisal of the mortgaged property which conforms to the Uniform Standards of Professional Appraisal Practice and are generally on forms similar to those acceptable to Fannie Mae and Freddie Mac and (ii) a review of such appraisal, which review may be conducted by a representative of the Originator or a fee appraiser and may include a desk review of the original appraisal or a drive-by review appraisal of the mortgaged property or (B) an insured automated valuation model. The Underwriting Guidelines permit loans with loan-to-value ratios at origination of up to 95%, subject to certain Risk Category limitations (as further described in that section). The maximum allowable loan-to-value ratio varies based upon the income documentation, property type, creditworthiness, debt service-to-income ratio of the applicant and the overall risks associated with the loan decision. Under the Underwriting Guidelines, the maximum loan-to-value ratio, including any second deeds of trust subordinate to the Originator's first deed of trust, is 100%.

199. These statements are substantially similar, if not identical, to statements concerning the Ameriquest Loan Sellers' underwriting standards and practices found in the other Prospectus Supplements for the Securities whose underlying mortgage loans were originated by Ameriquest and Argent.

200. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 201-210, they failed to disclose that the Ameriquest Loan Sellers: (i) systematically failed to follow their stated underwriting standards; (ii) allowed pervasive exceptions to their stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated their

stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. The Ameriquest Loan Sellers Violated Their Stated Underwriting Standards

201. Defendants Citigroup, Credit Suisse, Deutsche Bank, Goldman Sachs, J.P. Morgan (as successor-in-interest to Bear Stearns), and UBS offered or sold to Plaintiff Securities containing loans originated by the Ameriquest Loan Sellers and made untrue statements to Plaintiff about the Ameriquest Loan Sellers' underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with the Ameriquest Loan Sellers, had access to the Ameriquest Loan Sellers' mortgage origination personnel and internal information, and conducted due diligence into the Ameriquest Loan Sellers using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into the Ameriquest Loan Sellers, they were or reasonably should have been aware of the untruth of the statements about the Ameriquest Loan Sellers described above.

202. Both of the Ameriquest Loan Sellers appeared in the Comptroller of the Currency's list of the "Worst Ten in the Worst Ten," discussed above.

203. While the Ameriquest Loan Sellers and the Wall Street Banks stated that the Ameriquest Loan Sellers' underwriting of mortgages was designed to ensure a prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral, these statements were untrue. In fact, the Ameriquest Loan Sellers' underwriting practices were designed to originate as many mortgage loans as possible without regard to the ability of the borrowers to repay such mortgages, and the Ameriquest Loan Sellers systematically disregarded or misstated the income, assets, and employment status of borrowers seeking mortgage loans. Indeed, Argent and Ameriquest were the third and ninth among the Comptroller of the Currency's "Worst Ten" Mortgage Originators, respectively, based on the number of foreclosures as of March 22, 2010 on loans originated between 2005 and 2007.

204. According to a December 7, 2008, article in the *Miami Herald*, employees of Argent, including a former vice president named Orson Benn who is currently in prison for his role in the mortgage fraud schemes at Argent, actively assisted mortgage brokers in falsifying borrowers' financial information by "tutoring . . . mortgage brokers in the art of fraud." Employees "taught [brokers] how to doctor credit reports, coached them to inflate [borrower] income on loan applications, and helped them invent phantom jobs for borrowers" so that loans could be approved. According to Mr. Benn himself, "the accuracy of loan applications was not a priority." The *Miami Herald* examined the applications for 129 loans funded by Argent and "found at least 103 that contained false and misleading information" and "red flags: non-existent employers, grossly inflated salaries and sudden, drastic increases in the borrower's net worth." As noted by the article, "[t]he simplest way for a bank to confirm someone's income is to call the employer. But in at least two dozen cases, the applications show bogus telephone numbers for work references . . . ." Argent's lack of verification was so extreme that a "borrower [who] claimed to work a job that didn't exist . . . got enough money to buy four houses." Another borrower "claimed to work for a company that didn't exist – and got a $170,000 loan."

205. Moreover, according to a May 11, 2008 *Cleveland Plain Dealer* article, Jacquelyn Fishwick, who worked for more than two years at an Argent loan processing center near Chicago as an underwriter and account manager, noted that "some Argent employees played fast and loose with the rules" and stated "I personally saw some stuff I didn't agree with." Ms. Fishwick "saw [Argent] account managers remove documents from files and create documents by cutting and pasting them."

206. In the summer of 2007, Citigroup acquired Ameriquest and Argent. Richard Bowen, III, was Citibank's Business Chief Underwriter for correspondent lending who supervised 220 professional underwriters and exercised direct oversight of more than $90 billion of correspondent residential mortgages annually. Mr. Bowen was involved in the due diligence for that acquisition. In his April 7, 2010 testimony before the FCIC, Mr. Bowen testified that he advised against the acquisition because "we sampled loans that were originated by Argent and

we found large numbers that did not – that were not underwritten according to the representations that were there." He further testified that the number of loans that contained untrue representations was significant enough to support his decision to oppose the acquisition (although Citigroup did not follow his recommendation).

207. Argent has been the subject of several lawsuits alleging fraud in its underwriting and lending practices. In January 2010, Argent, along with its parent company, Ameriquest, participated in a $22 million settlement of claims brought in the Northern District of Illinois by those who purchased mortgages after December 14, 2001 and who alleged fraudulent mortgage lending practices.

208. On August 20, 2007, *Business Week* reported in an article titled "Did Big Lenders Cross the Line?" that lawsuits by mortgage borrowers are increasingly blaming lenders' lax underwriting standards for loan delinquency. In one lawsuit against Ameriquest, plaintiff Mary Overton alleges that loan officers at a Brooklyn, New York branch of Ameriquest coerced Overton into signing a loan. Unbeknownst to Ms. Overton, Ameriquest created fake tax returns, employment records, and a 401(k) to make it appear that the loan was affordable. According to other court filings, at least 40 other borrowers allege Ameriquest doctored loan documents or overstated borrowers' income. According to *Business Week*, large lenders, such as Ameriquest, were motivated to engage in these practices to keep up loan volume and generate sales. The nationwide nature of these practices was confirmed by former Ameriquest employees in a National Public Radio broadcast on May 12, 2007. A former Ameriquest loan officer in Tampa, Florida, recalled that in order to sell a loan "at any cost," "managers encouraged loan officers to conceal the actual cost and interest rates on loans," and "would white out numbers on W2s and bank statements and fill in bigger amounts basically to qualify people for loans that they couldn't afford," a practice "called taking the loan to the art department." According to the National Public Radio broadcast, these practices were not isolated and were confirmed by former employees from Ameriquest offices around the country.

209. On October 22, 2007, *Mortgage Daily* reported that Wachovia filed a lawsuit against Ameriquest alleging that Ameriquest had not complied with repurchase requests on loans with fraudulent files. According to Wachovia's complaint, the 135 nonperforming loans sold to Wachovia on December 29, 2005, contained incorrect credit scores, incorrect employment status, and misstatements of the kind of home being financed. In addition, the complaint stated that the loans had not been underwritten pursuant to the underwriting procedures that Ameriquest agreed to apply and thus Ameriquest's representations and warranties regarding the loans were untrue and were breached by Ameriquest. *Mortgage Daily*, "Wachovia v. Ameriquest," October 22, 2007.

210. In her January 14, 2010 testimony before the FCIC, Illinois Attorney General Lisa Madigan explained how a multistate investigation of Ameriquest "revealed that the company engaged in the kinds of fraudulent practices that other predatory lenders subsequently emulated on a wide scale . . . includ[ing]: inflating home appraisals."

g. Option One

1. Defendants Made Untrue Statements of Material Facts About Option One's Underwriting Standards and Practices

211. Option One originated Mortgage Loans that were included in the pools for the following offerings:

Offering	Depositor Defendant	Wall Street Bank Defendant
ABFC 2005-HE1	Asset Backed Funding Certificates NIM	Bank of America
ABFC 2006-OPT2	Asset Backed Funding Corporation	Bank of America
CMLTI 2006-HE1	Citigroup Mortgage Loan Trust	Citigroup
ABSHE 2006-HE3	Asset Backed Securities Corp. Home Equity	Credit Suisse
ACE 2005-HE7	Ace Securities Corp.	Deutsche Bank
ACE 2006-OP1	Ace Securities Corp.	Deutsche Bank
ACE 2007-HE2	Ace Securities Corp.	Deutsche Bank
GSAMP 2006-S1	GS Mortgage Securities Corp.	Goldman Sachs
SVHE 2006-OPT2	SoundView Home Loan Trust	Greenwich Capital
SVHE 2006-OPT5	SoundView Home Loan Trust	Greenwich Capital

Offering	Depositor Defendant	Wall Street Bank Defendant
HASC 2006-OPT3	HSI Asset Securitization Corporation Trust	HSBC
JPMAC 2005-OPT1	J.P. Morgan Mortgage Acquisition Corp.	JP Morgan
JPMAC 2005-OPT2	J.P. Morgan Mortgage Acquisition Corp.	JP Morgan
MLMI 2005-SL2	Merrill Lynch Mortgage Investors	Merrill Lynch
MLMI 2005-SL3	Merrill Lynch Mortgage Investors	Merrill Lynch
MLMI 2006-SL1	Merrill Lynch Mortgage Investors	Merrill Lynch

212. Defendants offered or sold to Plaintiff approximately $137.5 million of Securities for which Option One originated some or all of the underlying mortgage loans.

213. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding Option One's underwriting and appraisal standards and practices. For example, the prospectus supplement for ABSHE 2006-HE3 stated:

> **The Mortgage Loans will have been originated generally in accordance with Option One's Guidelines** (the "Option One Underwriting Guidelines"). The Option One Underwriting Guidelines are primarily intended to assess the value of the mortgaged property, to evaluate the adequacy of such property as collateral for the mortgage loan and to assess the applicant's ability to repay the mortgage loan. The Mortgage Loans were also generally underwritten with a view toward resale in the secondary market. The Mortgage Loans generally bear higher rates of interest than mortgage loans that are originated in accordance with customary Fannie Mae and Freddie Mac standards.
>
> On a case-by-case basis, exceptions to the Option One Underwriting Guidelines are made where compensating factors exist. Except as specifically stated herein, the Option One Underwriting Guidelines are the same for first lien mortgage loans and second lien mortgage loans.
>
> Each mortgage loan applicant completes an application that includes information with respect to the applicant's liabilities, income, credit history, employment history and personal information. The Option One Underwriting Guidelines require a credit report and, if available, a credit score on each applicant from a credit-reporting agency. The credit report typically contains information relating to such matters as credit history with local and national merchants and lenders, installment debt payments and any record of defaults, bankruptcies, repossessions or judgments. A credit score is a statistical ranking of likely future credit performance developed by Fair, Isaac and Co., Inc. and made available through the three national credit data repositories—Equifax, TransUnion and Experian.

> Mortgaged properties that are to secure mortgage loans generally are appraised by qualified independent appraisers. Such appraisers inspect and appraise the subject property and verify that such property is in acceptable condition. Following each appraisal, the appraiser prepares a report which includes a market value analysis based on recent sales of comparable homes in the area and, when deemed appropriate, replacement cost analysis based on the current cost of constructing a similar home. **All appraisals are required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are generally on forms acceptable to Fannie Mae and Freddie Mac.**
>
> The Option One Underwriting Guidelines require that mortgage loans be underwritten in a standardized procedure which complies with applicable federal and state laws and regulations and require Option One's underwriters to be satisfied that the value of the property being financed, as indicated by an appraisal, supports the loan balance.

214. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 215-223, they failed to disclose that Option One: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. Option One Violated Its Stated Underwriting Standards

215. Defendants Banc of America, Citigroup, Credit Suisse, Deutsche Bank, Goldman Sachs, Greenwich Capital, HSBC, J.P. Morgan, and Merrill Lynch offered or sold to Plaintiff Securities containing loans originated by Option One and made untrue statements to Plaintiff about Option One's underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with Option One, had access to Option One's mortgage origination personnel and internal information, and conducted due diligence into Option One using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into Option One, they were or reasonably should have been aware of the untruth of the statements about Option One described above.

216. Option One was a national mortgage lender formerly owned by H&R Block, Inc., until its assets were sold to American Home Mortgage Servicing, Inc., in April 2008. Option One is the sixth worst mortgage originator, by number of foreclosures as of March 22, 2010, according to the Comptroller of the Currency's "Ten Worst in the Ten Worst" list.

217. Former employees with first-hand knowledge have confirmed that Option One violated its stated standards for underwriting and appraisals. For example, CW 52, a former underwriter at Option One in Atlanta, Georgia from 2005 to 2006, said that if an underwriter denied a loan and an account executive complained, the loan was escalated to the branch manager, who then got in touch with the underwriter. With account executives, "the biggest screamer and shaker of trees gets the most fruit." For a "top-producing" account executive, whatever red flags there were would be "overlooked," and invariably the loan would be pushed through. CW 52 estimated that at least 50% of the total loan volume in Option One's Atlanta branch was approved in this manner. CW 52 also stated that a loan applicant could tell "a straight up lie" about his income, but the untrue information would be overlooked and the loan would be approved, despite CW 52's initial rejection of the application.

218. Similarly, CW 53, an underwriter at Option One's Marietta, Georgia office in 2005, reported that Option One approved stated income loans "knowing good and well that those people did not make that much money in the position they were in." Likewise, CW 54, an underwriter for Option One in Hawaii from November 2004 to January 2006, stated that "the overwhelming majority of stated income loans were crafted," meaning that the borrowers were not making "anywhere near" what they claimed. However, CW 54 stated that he felt pressured to push loans through because every loan generated income and "[i]f you applied any level of rational thought, you were frowned upon."

219. With respect to artificially inflated appraisals, CW 52 stated that "[o]f course they inflated values" and that if an underwriter questioned the appraised value, the account executive and branch manager would override the underwriter's objection, as with any other red flag in a loan file. Similarly, CW 55, a staff review appraiser for Option One working throughout the

western United States from January 2004 to May 2007, stated that the appraisals "were all bad." He considered the appraisals borderline fraudulent, not merely incompetent, but was unable to prevent loans based on the flawed appraisals. He explained, "Our job is supposed to be stopping bad loans, but no one stopped them." When CW 55 objected to loans because of flawed appraisals, the loan officer would complain to the branch manager, who would complain to the Appraisals Department at headquarters in Irvine, California, and on up the chain until someone high enough in the Underwriting and Sales Department said to go forward with the loan.

220. Option One was motivated to violate its underwriting and appraisal standards in order to increase the volume of loans it could sell to Wall Street Banks to be securitized. CW 56, an Assistant Vice President of Option One from 2005 to 2007, worked in the Correspondent Lending department, which purchased loans from small mortgage companies. CW 56 stated that Option One purchased loans that raised concerns under the stated guidelines and that when he raised such concerns he was essentially told, "Shut up, Wall Street will buy it; don't worry about it."

221. Similarly, CW 57, who was an underwriter at Option One in Pleasanton, California from October 2005 to October 2007, stated that "[i]f [a borrower] had a FICO and a pulse, they could get a loan" from Option One. CW 57 also stated that:

> I caught blatant fraud, and the [account executive] would still fight for it. [The account executives and managers] would fight me because they didn't care. They knew they were going to sell it on the secondary market, and they didn't care because it wasn't their money. They were going to get paid regardless. . . . At Option One they didn't have a portfolio; they sold everything, so they didn't care. . . . [Option One] didn't have to worry about it, because once they're done with these crappy loans, they'd sell them off. They were the investors' problem.

222. On June 3, 2008, the Attorney General for the Commonwealth of Massachusetts filed an action against Option One, and its past and present parent companies, for their unfair and deceptive origination and servicing of mortgage loans (the "Massachusetts Option One Complaint"). According to the Attorney General, since 2004, Option One "increasingly disregarded underwriting standards, created incentives for loan officers and brokers to disregard

the interests of the borrowers and steer them into high-cost loans, and originated thousands of loans that [Option One] knew or should have known the borrowers would be unable to pay, all in an effort to increase loan origination volume so as to profit from the practice of packaging and selling the vast majority of [Option One's] residential subprime loans to the secondary market." Massachusetts Option One Complaint, ¶ 4. The Attorney General's complaint alleges that Option One's agents and brokers "frequently overstated an applicant's income and/or ability to pay, and inflated the appraised value of the applicant's home," and that Option One "avoided implementing reasonable measures that would have prevented or limited these fraudulent practices." *Id.*, ¶ 8. Option One's "origination policies . . . employed from 2004 through 2007 have resulted in an explosion of foreclosures." *Id.*, ¶ 10.

223. On June 4, 2008, the *Wall Street Journal* reported that the Massachusetts Attorney General's lawsuit "charges Option One with 'recklessly facilitating the foreclosure of borrowers' homes,'" and that Option One "proposed terms 'that are as unfair and unsustainable as the original loans."

h. Additional Mortgage Originators

224. Other mortgage originators that provided loans for the pools underlying the Securities that the Defendants offered or sold to Plaintiff included Aames, Accredited Home Lenders, Inc. ("Accredited"), DLJ Mortgage Capital, and Equifirst, among others. The Offering Documents for each securitization in which Defendants offered or sold Securities to Plaintiff set forth the underwriting standards for the mortgage originators of the loans included in that securitization. These statements of material facts were untrue and omitted material facts because mortgage originators industry-wide systematically failed to follow their stated underwriting standards.

225. For example, former employees of Accredited confirm the lack of underwriting and appraisal standards. According to CW 58, a Corporate Underwriter at Accredited between June 2004 and March 2005, managers on the sales side frequently overruled underwriting decisions. CW 58 noted such loans were tracked internally, and it was well-known they

performed poorly. Moreover, according to CW 58, in early 2005, Accredited approved risky loans that did not comply with its own underwriting guidelines in an effort to reach monthly production targets.

226. According to CW 59, a Corporate Underwriter at Accredited between August 2003 and February 2006 in Tampa, Florida, Operations Managers and Senior Operations Managers constantly overruled decisions to reject loan applications. According to CW 59, "The problem with the whole system was the overrides. The overrides were rampant. If the borrower breathed, he got the loan."

227. According to CW 60, a Corporate Underwriter at Accredited in San Diego between May 2002 and November 2006, Accredited's underwriters who reviewed and approved or denied loans were being overridden, frequently resulting in loans that did not comply with underwriting guidelines. According to CW 60, the number of overrides grew so large that Accredited was forced to institute a system to track such overrides. The system included a box on the loan file that an underwriter needed to check if a higher-level manager approved the loan "as a business decision" over the recommendation of the underwriter.

228. According to CW 61, a Corporate Underwriter at Accredited between June 2000 and March 2007 in both the San Diego, California, and Austin, Texas, offices, "[a]t the end of the month, we were handed loan files and told to just sign them with no audit."

229. According to CW 62, the Chief Appraiser at Accredited for five years between 2002 and June 2007, Accredited allowed both corporate underwriters and sales managers to override the decisions of licensed property appraisers. In many cases, an appraisal reviewer working for Accredited would reject a loan application after concluding that the appraisal submitted with the application was inflated. According to CW 62, the account executive who submitted the loan application would become annoyed by the rejection and appeal the decision to a sales manager who then would overturn the appraisal reviewer's decision without any valid justification. According to CW 62, overrides of appraisers' decisions were rampant: "As of June 2006, between 12% and 15% of our business was being done through management overrides."

230. On May 1, 2009, Accredited filed for bankruptcy. Accredited faced huge demands from Wall Street Banks to repurchase loans. In bankruptcy filings, Accredited stated that it faces more than $200 million in repurchase claims. The Wall Street Banks assert that certain loans they purchased are defective and violate the purchase agreements they made with Accredited because they contain serious mistakes or borrowers defaulted too quickly.

231. On information and belief, substantially similar violations of underwriting and appraisal standards were commonplace at Aames, DLJ Mortgage Capital, Equifirst, and the other mortgage originators whose loans were included in the securitizations in which Defendants offered or sold Securities to Plaintiff.

VI. DEFENDANTS MADE MATERIAL UNTRUE STATEMENTS AND OMISSIONS

232. The Depositor Defendants acquired mortgage loans and deposited them into issuing trusts, and the Wall Street Bank Defendants offered or sold the Securities to Plaintiff through the Offering Documents, other documents as described herein, and oral statements made directly to Plaintiff. Each Depositor Defendant and Wall Street Bank Defendant participated in drafting the prospectus supplement or private placement memorandum for each securitization issued by that Depositor or underwritten by that Wall Street Bank. In addition, each Depositor Defendant and Wall Street Bank Defendant was identified in these documents as the issuer or underwriter, respectively, of the Securities, and approved the versions of these documents that were delivered by the Wall Street Bank to Plaintiff.

233. The Defendants' Offering Documents contained statements of material facts regarding, *inter alia*, (i) the underwriting process and standards by which the loans held in the issuing trusts were originated; (ii) the standards and guidelines used by the Depositor Defendants and Wall Street Bank Defendants when evaluating and acquiring the loans; and (iii) the value of the underlying real estate securing the loans pooled in the issuing trusts, including the loan-to-value ratios and the appraisal standards by which such real estate values were measured.

234. The Offering Documents emphasized the underwriting standards used to originate the underlying mortgage loans. Indeed, each Prospectus Supplement set forth the underwriting

standards for the Mortgage Originators who originated a substantial portion of the underlying mortgages in that issuing trust. Contrary to these statements of material facts, many of these Mortgage Originators of the underlying mortgages did not originate loans in accordance with their stated underwriting standards. Rather, as set forth above, these Mortgage Originators extended loans that did not comply with their underwriting standards in order to increase loan volume regardless of the borrowers' ability to meet their obligations.

235. Additionally, the Offering Documents often made the statement of material facts, in sum or substance, that "all prospective Mortgage Loans will be subject to the underwriting standards adopted" herein; provided the Wall Street Banks' underwriting standards; or identified significant Mortgage Originators and provided the underwriting standards utilized by those Originators.

236. The written and oral statements of material facts regarding the underwriting and appraisal standards utilized by the Mortgage Originators and the Defendants' own due diligence were untrue and omitted material facts. Indeed, as detailed above, many of the identified Mortgage Originators systematically violated their stated underwriting and appraisal guidelines, and the Wall Street Bank Defendants made untrue statements about their own due diligence.

a. Morgan Stanley's Untrue Statements of Material Facts and Omissions

237. Morgan Stanley offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $219,379,620. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix A.

238. Morgan Stanley sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime lenders to purchase loans, offering to pay more for mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors. According to a December 6, 2007 article in the *New York Times*, "Wary of Risk, Bankers Sold Shaky Mortgage Debt," Morgan Stanley cultivated a relationship

with New Century. As a result of this relationship, Morgan Stanley expanded its subprime underwriting business by 25% from 2004 to 2006. According to a former New Century executive, Morgan Stanley agreed to pay above-market prices for loans in return for a steady supply of mortgages. According to the article, the former New Century executive said: "Morgan would be aggressive and say, 'We want to lock you in for $2 billion a month.'"

239. Through its affiliates and subsidiaries, Morgan Stanley was able to control nearly every step in the mortgage securitization process. For example, Morgan Stanley formed numerous SPVs including: (1) Depositor Defendant Morgan Stanley ABS Capital I Inc., which served as the depositor and issuer for offerings of RMBS; (2) Morgan Stanley Capital I Inc., which served as the depositor and issuer for offerings of RMBS; and (3) Morgan Stanley Mortgage Capital Inc., which originated or otherwise acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of RMBS. Defendant Morgan Stanley offered or sold the Securities to Plaintiff. Morgan Stanley also provided financial research on RMBS and related structured products.

240. In connection with its offer or sale of Securities to Plaintiff, Morgan Stanley sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Morgan Stanley also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Morgan Stanley sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often, Morgan Stanley also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting Securities, the data, and Morgan Stanley's due diligence of the Mortgage Originators' underwriting practices. Morgan Stanley did not allow Plaintiff to keep the pitch books.

241. In the Offering Documents, Morgan Stanley made numerous statements of material facts regarding the underwriting standards that had been followed in originating the

underlying mortgage loans. For example, in offerings for which New Century originated all or a significant amount of the underlying mortgage loans, Morgan Stanley reprinted New Century's "Underwriting Guidelines," which stated, in sum or substance, that (a) New Century's guidelines were "intended to assess the borrower's ability to repay the mortgage loan"; (b) New Century reviewed not only the value of the property, but also considered "the mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type of use of the mortgaged property"; (c) "the mortgage loans [were] originated in accordance with the underwriting guidelines"; and (d) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶ 76. Morgan Stanley made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including WMC. *See* ¶ 185.

242. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Morgan Stanley stated, for example, that New Century commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were "required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac," and that were reviewed "by a qualified employee" of New Century or by an appraiser retained by New Century. *See* ¶ 78. Morgan Stanley made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including WMC. *See* ¶ 185. In offerings in which a Mortgage Originator was not identified in the Offering Documents, Morgan Stanley stated that "the depositor will not include any loan in the trust fund for any series of securities if anything has come to the depositor's attention that could cause it to believe that the representations and warranties of a seller or originator will not be accurate and complete in all material respects in respect of the loan as of the date of initial issuance of the related series of securities."

243. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Morgan Stanley made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Morgan Stanley's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

244. Morgan Stanley made additional oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Morgan Stanley representatives occurred on or about July 13, July 22, and September 9, 2004 and May 16 and and October 3, 2006. Some of these meetings occurred in Plaintiff's offices in Concord, Massachusetts. During these meetings, Morgan Stanley made statements of material facts regarding Morgan Stanley's upcoming RMBS deals, and assured Plaintiff that Morgan Stanley conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance. Specifically, Morgan Stanley made oral statements of material facts that it performed strong due diligence of New Century, stating to Plaintiff that Morgan Stanley even had an employee on site at New Century to ensure compliance with the underwriting standards described in the Offering Documents.

245. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, the principal Mortgage Originators in the Morgan Stanley deals violated their stated underwriting and appraisal standards. Moreover, Morgan Stanley's statements regarding its own due diligence were untrue and contained material omissions.

246. Morgan Stanley outsourced some due diligence by contracting with external firms including Clayton to review whether the loans included in the RMBS that it underwrote complied with the Mortgage Originators' stated standards. As discussed in ¶¶ 63-66, Clayton

and Bohan have been investigated by the New York Attorney General, SEC, and Massachusetts and Connecticut regulators for engaging in improper underwriting practices, and in January 2008, the New York Attorney General granted Clayton immunity from prosecution in exchange for documents and testimony regarding its due diligence reports.

247. In its most recent annual report, filed on Form 10-K with the SEC on February 26, 2010, Morgan Stanley confirmed that it is under direct investigation and is "responding to subpoenas and requests for information from certain regulatory and Governmental entities concerning the origination, purchase, securitization and servicing of subprime and non-subprime residential mortgages and related issues including collateralized debt obligations and credit default swaps backed by or referencing mortgage pass through certificates."

248. On June 24, 2010, the Massachusetts Attorney General announced that Morgan Stanley had agreed to pay $102 million to the Commonwealth and mortgage borrowers in the Commonwealth to settle charges related to "Morgan Stanley's role in facilitating predatory lending by New Century." Attorney General Coakley stated that:

> Morgan Stanley funded, purchased and securitized New Century loans. Morgan developed an intimate knowledge of New Century's business over time. And they uncovered signals pretty early on that the lending practices of New Century were not sound. Morgan Stanley continued to fund and securitize subprime loans even as New Century's bad loans were causing the lender to collapse . . . .
>
> Morgan knew because as part of its business it had to review New Century's loan portfolio in that relationship. Morgan discovered that New Century was making loans that we allege were designed to fail. They started with low teaser rates, but then they kicked to higher interest rates that borrowers predictably could not afford and borrowers could only repay by financing.
>
> ***
>
> Morgan Stanley had a number of red flags that these practices were unfair. For instance, Morgan Stanley knew that New Century was using what we call "no doc loans," that is no documentation, loans with no paperwork, to the point of abuse. New Century was not following its own underwriting guidelines for these loans and New Century failed to account for whether borrowers could actually make payments after the introductory or the so-called teaser rates on the loans have expired.

> Morgan initially refused to fund these loans, but after New Century threatened to pull their business, a Morgan banker approved hundreds of loans that their own compliance team had rejected and Morgan then softened its oversight to let New Century's business continue. [Morgan Stanley c]ontinued to fund New Century and provided the key financing that was needed to so that New Century could continue to make those loans.
>
> ***
>
> [O]ur investigation revealed that Morgan Stanley backed loans for homeowners that they knew, or should have known, were destined to fail and then they failed to disclose the riskiness of those loans to investors.

249. The Assurance of Discontinuance that the Massachusetts Attorney General filed in Court in connection with the Morgan Stanley settlement specifically identifies untrue statements in the loan tapes Morgan Stanley provided to investors such as Plaintiff:

> On the loan tapes provided to investors in Morgan Stanley securitizations of New Century loans, the DTI ratio was typically calculated based on the teaser rate and did not reflect the Fully Indexed Mortgage Payment. Incorporating the Fully Indexed Mortgage Payment in the DTI ratio using Morgan Stanley's reset DTI analysis described above, the average DTI on the New Century tapes would be substantially higher. A large number of the ARM loans would have Fully Indexed DTI Ratios on this basis that were greater than 55%. Based on Morgan Stanley's analysis described above, such borrowers could not afford to repay these loans in accordance with their terms without refinancing. Such loans comprised a significant portion of the overall loan pools.
>
> ***
>
> As early as October 2005, Morgan Stanley's diligence team determined, in reviewing and rejecting loans for purchase, that the stated income on a number of New Century loans was unreasonable. In early 2006, a Morgan Stanley employee commented that stated income credit was not adequately evaluated by New Century. About 36% of the loans originated by New Century and reviewed by Clayton in the diligence process were stated income loans. On average, the stated income of these borrowers was approximately 42% higher than the income of fully documented borrowers. The average stated income of these borrowers on an annual basis was about $115,000.
>
> Assuming that the stated income was closer to or similar to fully documented income, the average actual DTI ratio for stated income borrowers would be much higher than the DTI ratios reported by New Century in the loan tapes (averaging 41% for stated income loans), and a substantial number of these borrowers would have DTI ratios on this basis exceeding 55%.

250. The statements of material facts in the documents Morgan Stanley sent to Plaintiff were untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, subsequent investigations and lawsuits have demonstrated that New Century made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; New Century management "turned a blind eye" to risky loan originations; and "New Century engaged in a number of significant improper and imprudent practices related to its loan originations." *See* ¶¶ 82-95. Moreover, former New Century employees witnessed firsthand how exceptions to New Century's underwriting became the "norm" because employees had to do whatever was necessary to increase loan originations. *See* ¶¶ 89-91. The SEC recently charged former New Century officers with making untrue assurances to the market about the company's "adhere[nce] to high origination standards in order to sell [its] loan products in the secondary market." *See* ¶ 93. The other Mortgage Originators of loans underlying the Morgan Stanley Securities similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

251. The statements of material facts in the documents Morgan Stanley sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57. A former New Century underwriter recently confirmed New Century's use of inflated appraisals in testimony before the FCIC, stating that New Century hired fee appraisers who were "pressured" into inflating property values, at times by tampering with the property, "fearing if they didn't, they would lose future business and their livelihoods." ¶ 54. Another industry insider testified before the FCIC that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶ 52. Surveys performed in 2007 demonstrated that

90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶ 56.

252. Morgan Stanley's statements of material facts were also untrue because other key data provided to Plaintiff by Morgan Stanley were untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

253. The result of the untrue statements and omissions described above is that the Securities Morgan Stanley offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 48% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Morgan Stanley to Plaintiff.

b. Bear Stearns' Untrue Statements of Material Facts and Omissions

254. Bear Stearns offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $536,398,119. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix J.

255. Bear Stearns was a pioneer in mortgage securitization. Through its affiliates and subsidiaries, Bear Stearns was able to control nearly every step in the mortgage securitization process. For example, to make certain the mortgage pipeline was always full, Bear Stearns owned and operated three mortgage loan origination subsidiaries – EMC Mortgage Corporation ("EMC"), Bear Stearns Residential Mortgage Corporation ("Bear Stearns Mortgage Corp."), and Encore Credit Corp. ("Encore"). EMC originated loans that were securitized by Bear Stearns, served as the sponsor for many of Bear Stearns' offerings, and serviced the loans underlying the offerings after the offerings were complete.

256. Bear Stearns also formed numerous SPVs to facilitate the issuance of RMBS. These entities included Depositor Defendants Structured Asset Mortgage Investments II, Inc. ("SAMI") and Bear Stearns Asset Backed Securities I, LLC ("BSABS"), which served as the depositors and issuers for Bear Stearns' offerings. Bear Stearns offered or sold the Securities to Plaintiff. Bear Stearns also provided financial research on RMBS and related structured products.

257. Bear Stearns profited at every step in the securitization process, as it collected: (1) loan-origination fees; (2) gains on sale of the mortgages to securitization trusts; (3) management fees from hedge funds and other investment vehicles that purchased mortgage-backed structured products; (4) underwriting fees; and (5) servicing fees. Bear Stearns summarized its securitization business as follows: "Our vertically integrated franchise allows us to access every step of the mortgage process, including origination, securitization, distribution and servicing." According to *Inside Mortgage Finance*, a leading trade publication whose data is used by the federal government, from 2004 to 2007 Bear Stearns underwrote more than $97 billion in subprime RMBS.

258. In connection with its offer or sale of Securities to Plaintiff, Bear Stearns sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Bear Stearns also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Bear Stearns sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often, Bear Stearns also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Bear Stearns' due diligence of the Mortgage Originators' underwriting practices. Bear Stearns did not allow Plaintiff to keep the pitch books.

259. In the Offering Documents, Bear Stearns made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, Bear Stearns stated that: (1) the Mortgage Originators' underwriting guidelines were intended to assess the borrowers' ability to repay the mortgage loans and considered the borrowers' credit history, repayment ability, debt service-to-income ratio, and other factors; (2) the Mortgage Originators assessed the value of the properties; and (3) exceptions to the Mortgage Originators' underwriting guidelines would only be made where compensating factors existed.

260. Moreover, the Offering Documents included statements of material facts regarding the originators' appraisal guidelines. Bear Stearns stated, for example, that the Mortgage Originators commissioned appraisals by qualified independent appraisers who prepared appraisals that conformed to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation.

261. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Bear Stearns made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Bear Stearns' due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

262. Bear Stearns made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Bear Stearns representatives occurred on or about March 18, September 22, and November, 14, 2005, and May 25, July 19, and August 3, 2006. Some of these meetings occurred in Plaintiff's offices in Concord, Massachusetts, and others were via teleconference. During these meetings, Bear Stearns employees made statements of material facts regarding upcoming RMBS deals, and assured Plaintiff that Bear Stearns conducted due diligence to ensure that the Mortgage

Originators complied with their stated underwriting guidelines. Among other things, Bear Stearns stated that its due diligence included sampling loans to check underwriting process, documentation, valuations, and compliance.

263. Specifically, Bear Stearns repeatedly stated that it used Clayton to perform due diligence on the mortgage loans and to ensure mortgage originator compliance with stated underwriting standards. In June of 2007, the New York Attorney General subpoenaed documents from Clayton and another due diligence firm, Bohan Group ("Bohan"), seeking information regarding whether Wall Street Banks withheld information that should have been disclosed to investors. Similar subpoenas were issued by the SEC and Massachusetts and Connecticut regulators.

264. On January 27, 2008, the New York Attorney General entered into an agreement with Clayton for immunity from prosecution in exchange for additional documents and testimony regarding its due diligence reports. Both the *New York Times* and *Wall Street Journal* published articles detailing the agreement and Clayton's expected testimony. According to the *New York Times* (J. Anderson and V. Bajaj, "Reviewer of Subprime Loans Agrees to Aid Inquiry of Banks," Jan. 27, 2008), Clayton "communicated daily with bankers putting together securities," and that "starting in 2005, it saw a significant deterioration of lending standards and a parallel jump in lending exceptions." In response, rather than change the "broad language written in prospectuses" to reflect the environment, "some investment banks directed Clayton to halve the sample of loans it evaluated in each portfolio."

265. An article in the *Los Angeles Times* (E. Reckard, "Sub-prime Mortgage Watchdogs Kept On Leash; Loan Checkers Say Their Warnings of Risk Met With Indifference," March 18, 2008) revealed that Clayton and Bohan employees "raised plenty of red flags about flaws [in subprime home loans] so serious that mortgages should have been rejected outright – such as borrowers' incomes that seemed inflated or documents that looked fake – but the problems were glossed over, ignored, and stricken from the reports."

266. Each of Bear Stearns' statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, the principal Mortgage Originators in the Bear Stearns deals systematically violated their stated underwriting and appraisal standards. Moreover, Bear Stearns' additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

267. In late 2008, Ambac Assurance Corp. ("Ambac") commenced an action against EMC and Bear Stearns in the United States District Court for the Southern District of New York alleging that the companies had built a "house of cards" through rampant misrepresentations in the origination of mortgage loans used in securitizations. *Ambac Assurance Corp. v. EMC Mortgage Corp.*, No. 08-cv-9464 (S.D.N.Y.) (the "Ambac Complaint"). On November 6, 2008, an article in the Associated Press reported the following with respect to the Ambac Complaint:

> Bear Stearns leveraged its reputation and dominance in mortgage finance to entice companies such as Ambac to insure loans plagued by rampant fraud. . . . Bear Stearns promised that its mortgage loans originated through proper means and didn't result from fraud, misrepresentation or gross negligence. Yet . . . Ambac discovered widespread breaches of representations in almost 80 percent of the documents supporting 695 defaulted loans it studied.

Larry Neumeister, *Lawsuit: Bear Stearns Built A 'House of Cards,'* Associated Press, November 6, 2008.

268. According to the Ambac Complaint, after incurring more than $640 million in losses, Ambac conducted a study of 1,486 loans with an aggregate principal of approximately $86.9 million. The results of that review found:

> Of these 1486 loans, 1332, over 89%, breached one or more of the representations and warranties that EMC had made to Ambac. The most prevalent and troubling of the breaches identified by Ambac across all four Transactions involve (1) rampant misrepresentations about borrower income, employment, assets, and intentions to occupy the purchased properties, and (2) the loan originators' abject failures to adhere to proper and prudent mortgage-lending practices, including their own underwriting guidelines.

Ambac Complaint at ¶ 6.

269. The Ambac Complaint lays out, in detail, the Bear Stearns "securitization machine" and EMC's crucial, and damaging, role within that machine:

> [EMC] acted both as an "originator" and an "aggregator" of an enormous volume of residential mortgage loans, "with the ultimate strategy of securitization into an array of Bear Stearns's securitizations." EMC repeatedly executed on that strategy, in many cases retaining the rights to act as servicer of the mortgage loans that it securitized. In its role as aggregator, EMC prescribed loan origination standards and approved the underwriting guidelines of a large number of mortgage lenders…

Id. at ¶ 18.

270. EMC expanded its loan generation to supply Bear Stearns' securitizations and, at the same time, reassured the market that it would maintain the quality of the securitizations. *Id.* at ¶ 26. But, in fact, "EMC's inventory of mortgage loans was replete with loans (i) originated by fraud, material misrepresentations, or omissions and (ii) underwritten without regard to prudent standards or the fundamental principles of mortgage lending, which require a good-faith assessment of the borrower's ability and willingness to repay the loan." *Id.* at ¶ 27. EMC "convince[d] investors that the securities it sold were a safe and profitable investment, despite the fact that, unbeknownst to Ambac and the market at large, those securities were backed by unjustifiably risky loans." *Id.* at ¶ 25.

271. The Ambac Complaint further makes clear that EMC and Bear Stearns expanded acceptance and financing of "no doc" and "low doc" loan products "with a marked and dangerous decline in the rigor and discipline with which [the companies] approached loan origination and underwriting." *Id.* at ¶ 28. Thus, EMC's inventory of mortgage loans "was replete with loans originated by fraud or underwritten pursuant to imprudent or non-existent standards." *Id.* at ¶¶ 29-30.

272. On March 16, 2009, the District Court denied EMC's motion to strike portions of Ambac's Complaint that EMC asserted were "inflammatory" because they portrayed Bear Stearns and EMC as "corporate villains . . . responsible for the mortgage-backed security crisis." In its decision denying EMC's motion, the Court held that allegations such as that "[t]he Bear

Stearns securitization machine was a house of cards, supported not by real value and sound practices but by Bear Stearns' appetite for loans and disregard as to the risks those loans presented" were not unfairly prejudicial, but rather were relevant to whether EMC "'materially breached its representations and warranties' . . . regarding, among other things, 'the origination, underwriting, servicing, and other key attributes of the loans[.]'" (Quoting Ambac's Complaint; alterations in original.) Ambac's action against EMC is ongoing, and the parties are currently engaged in pretrial discovery.

273. Matt Van Leeuwen, a mortgage analyst with EMC between 2004 and 2006, has also confirmed the above allegations of negligent underwriting practices. Van Leeuwen revealed that (a) Bear Stearns pushed EMC analysts to perform their loan analyses of the underlying mortgages in only one to three days so that Bear Stearns would not have to hold the loans on its books; (b) EMC analysts were encouraged to falsify loan data (such as FICO scores) if that information was missing from the loan data and the mortgage originators did not respond to requests for that information; (c) the documentation level (*i.e.*, no documentation, partial documentation) of the loans was often incorrectly identified; and (d) rather than going back to the mortgage originator for clarification, such as verification of income, Bear Stearns would avoid investigating and make the loan "fit." Teri Buhl, "More Corruption: Bear Stearns Falsified Information as Raters Shrugged," *The Atlantic*, May 2010.

274. The statements of material facts in the documents Bear Stearns sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines.

275. The statements of material facts in the documents Bear Stearns sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57. An industry insider testified before the FCIC and

stated that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶ 52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶ 56.

276. Bear Stearns' statements of material facts were also untrue because other key data provided to Plaintiff were untrue and contained material omissions. For example, the data often identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of credit quality and likelihood of default.

277. The result of the untrue statements and omissions described above is that the Securities Bear Stearns offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 47% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Bear Stearns to Plaintiff.

278. Defendant J.P. Morgan is the successor-in-interest to Bear Stearns as a result of the merger of Bear Stearns with and into J.P. Morgan on October 1, 2008, with J.P. Morgan Securities as the surviving entity.

c. Citigroup's Untrue Statements of Material Facts and Omissions

279. Citigroup offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $220,839,945. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix B.

280. Citigroup sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime mortgage originators including New Century, Argent, and WMC for the purchase of subprime loans to be pooled and securitized as Securities, offering to pay more for mortgages than competing Wall Street Banks, and offering to

perform less due diligence than competitors. New Century, Argent and WMC were some of the largest Mortgage Originators in these Citigroup Securities.

281. To facilitate the sale of RMBS, Citigroup formed SPVs including Depositor Defendant Citigroup Mortgage Loan Trust Inc., which originated or otherwise acquired residential mortgage loans to be securitized and served as the sponsor, depositor, and issuer in numerous offerings of RMBS. Defendant Citigroup offered or sold the Securities to Plaintiff. Citigroup also provided financial research on RMBS and related structured products.

282. In connection with its offer or sale of Securities to Plaintiff, Citigroup sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements, and for one deal, a private placement agreement. Citigroup also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Citigroup sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Citigroup also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Citigroup's due diligence of the Mortgage Originators' underwriting practices. Citigroup did not allow Plaintiff to keep the pitch books.

283. In the Offering Documents, Citigroup made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which New Century originated all or a significant amount of the underlying mortgage loans, Citigroup reprinted New Century's "Underwriting Guidelines," which stated in sum or substance, that (a) New Century's guidelines were "intended to assess the borrower's ability to repay the mortgage loan"; (b) New Century not only reviewed the value of the property, but also considered "the mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type of use of the mortgaged property"; (c) "the mortgage loans [were] originated in accordance with the underwriting guidelines"; and (d)

exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶ 76. Citigroup made similar statements of material facts for loans originated by other Mortgage Originators, including Argent and WMC. *See* Section V.

284. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Citigroup stated, for example, that New Century commissioned an appraisal of mortgaged properties by "qualified independent appraisers" who prepared an appraisal report that is "required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac," and that was reviewed "by a qualified employee" of New Century or by an appraiser retained by New Century. *See* ¶ 78. Citigroup made similar statements of material facts for appraisals commissioned by or performed or reviewed by other Mortgage Originators, including Argent and WMC. *See* Section V.

285. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Citigroup made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Citigroup's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

286. Citigroup made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Citigroup occurred on or about September 30, 2004; June 23, October 31, and December 8, 2005; and May 22, August 14, and December 7, 2006. Some of these meetings occurred in Plaintiff's offices in Concord, Massachusetts. During these meetings, Citigroup made statements of material facts regarding Citigroup's upcoming RMBS deals, and assured Plaintiff that Citigroup conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines,

including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

287. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. As detailed below, New Century, Argent, and WMC, the principal Mortgage Originators in the Citigroup deals, systematically violated their stated underwriting and appraisal standards. Moreover, Citigroup's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

288. Citigroup stated that it retained external firms, including Clayton and Bohan, to review whether the loans included in the RMBS that Citigroup underwrote complied with the Mortgage Originators' stated standards. As discussed in ¶¶ 63-66, Clayton and Bohan have been investigated by the New York Attorney General, the SEC, and Massachusetts and Connecticut regulators for improper activity in their mortgage due diligence services.

289. In its most recent annual report, filed on Form 10-K with the SEC on February 26, 2010, Citigroup Inc. (the parent company of Defendant Citigroup) confirmed that "beginning in the fourth quarter of 2007, certain of Citigroup's regulators and other state and federal government agencies commenced formal and informal investigations and inquiries, and issued subpoenas and requested information, concerning Citigroup's subprime mortgage-related conduct and business activities."

290. The statements of material facts in the documents Citigroup sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, as described above, New Century's statements that it underwrote loans in accordance with its stated underwriting guidelines were untrue. *See* ¶¶ 82-95. The other two Mortgage Originators underlying the Citigroup Securities, Argent and WMC, similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See*

Section V. Citigroup's statements of material facts about the appraisals of the underlying properties were also untrue.

291. Citigroup's statements of material facts were also untrue because other key data provided to Plaintiff by Citigroup was untrue. For example, the data often identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

292. The Financial Crisis Inquiry Commission (the "FCIC") investigated Citigroup as part of its statutory mission to determine "the causes ... of the current financial and economic crisis in the United States." Fraud Enforcement and Recovery Act of 2009, Pub. L. No. 111-21, § 5(a) (May 20, 2009). In connection with its investigation, the FCIC interviewed senior Citigroup executives with direct responsibility for the Company's mortgage operations; subpoenaed and reviewed thousands of internal Citigroup documents concerning those operations; and held hearings on April 7-9, 2010.

293. The FCIC heard testimony from Richard M. Bowen, III, who was the Senior Vice President and Chief Underwriter for Correspondent and Acquisitions for Citifinancial Mortgage (Citigroup's subprime mortgage lending subsidiary) from 2002 through 2005 and was promoted in early 2006 to Business Chief Underwriter for Correspondent Lending in Citigroup's Consumer Lending Group (which included Citigroup's prime mortgage lending, subprime mortgage lending, and prime second lien mortgage businesses). As Business Chief Underwriter for Correspondent Lending, Mr. Bowen was one of Citigroup's most senior mortgage executives, supervising 220 professional underwriters and exercising direct oversight over the underwriting of more than $90 billion of residential mortgages annually.

294. Mr. Bowen testified that each year since 2005, Citigroup's mortgage operation systematically acquired tens of billions of dollars of risky loans that violated Citigroup's own underwriting criteria and were likely to default. He also testified that Citigroup's Wall Street Chief Risk Officer routinely overruled underwriters' rejections of pools of subprime mortgages

that did not satisfy Citigroup's underwriting criteria for purchase by the "Correspondent Wall Street channel," thus causing Citigroup to purchase billions of dollars of loan pools that fell far short of underwriting standards. In sum, Mr. Bowen testified that "[d]uring 2006 and 2007, I witnessed business risk practices which made a mockery of Citi credit policy. . . ."

295. Mr. Bowen also testified that he recommended that Citigroup not purchase Ameriquest, because his due diligence found that Argent's loans did not meet the standards they had represented to Citigroup. Specifically, Mr. Bowen testified that "we sampled the loans that were originated by Argent and we found large numbers that did not – that were not underwritten according to the representations that were there."

296. As a result of the untrue statements and omissions described above, the Securities Citigroup offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, 50% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Citigroup to Plaintiff.

d. Credit Suisse's Untrue Statements of Material Facts and Omissions

297. Credit Suisse offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $387,100,311. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix C.

298. Credit Suisse acquired hundreds of thousands of subprime mortgages and securitized the mortgage loans into billions of dollars of RMBS, some of which were then offered or sold to Plaintiff in a series of offerings containing subprime mortgage loans from several different Mortgage Originators, including New Century, Ameriquest, WMC, Long Beach, Argent, and Option One.

299. To facilitate the sale of RMBS, Credit Suisse's parent company formed SPVs, including Depositor Defendants Credit Suisse First Boston Mortgage Securities Corporation and

Asset Backed Securities Corporation, which issued and were the depositors for numerous offerings of RMBS. Defendant Credit Suisse offered or sold the Securities to Plaintiff. Credit Suisse also provided financial research on RMBS and related structured products.

300. In connection with its offer or sale of Securities to Plaintiff, Credit Suisse sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Credit Suisse also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Credit Suisse sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often, Credit Suisse also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Credit Suisse's due diligence of the Mortgage Originators' underwriting practices. Credit Suisse did not allow Plaintiff to keep the pitch books.

301. In the Offering Documents, Credit Suisse made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which New Century originated all or a significant amount of the underlying mortgage loans, Credit Suisse reprinted New Century's "Underwriting Guidelines," which stated in sum or substance, that (a) New Century's guidelines were "intended to assess the borrower's ability to repay the mortgage loan"; (b) New Century reviewed not only the value of the property, but also considered "the mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type of use of the mortgaged property"; (c) "the mortgage loans [were] originated in accordance with the underwriting guidelines"; and (d) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶ 76. Credit Suisse made similar statements of material facts for Mortgage Loans originated by other mortgage originators, including Ameriquest, Argent, Long Beach, WMC, and Option One. *See* Section V.

302. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Credit Suisse stated, for example, that New Century commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were "required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac," and that were reviewed "by a qualified employee" of New Century or by an appraiser retained by New Century. *See* ¶ 78. Credit Suisse made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Argent and WMC. *See* Section V.

303. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Credit Suisse made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities' and Credit Suisse's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

304. Credit Suisse made additional, oral statements of material facts about the Securities to Plaintiff in meetings, including meetings at Plaintiff's offices in Concord, Massachusetts. Some of Plaintiff's meetings with Credit Suisse occurred on or about September 9, 2004; August 29 and October 26, 2005; and March 2, May 17, and December 31, 2006. During these meetings, Credit Suisse made statements of material facts regarding Credit Suisse's upcoming RMBS deals, and assured Plaintiff that Credit Suisse conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by reviewing loans in order to check underwriting process, documentation, valuations, and compliance.

305. For example, Credit Suisse made oral statements of material facts to Plaintiff about the strength and quality of the due diligence Credit Suisse performed on the "HEAT" series of deals, in which Plaintiff purchased over $182,004,054 of Securities on behalf of the Clients between 2005 and 2006. *See* Appendix C. Specifically, Credit Suisse stated to Plaintiff that Credit Suisse performed a valuation review of 100% of the underlying loans, meaning that Credit Suisse should have reviewed the data and documentation for each underlying loan before accepting the loan for inclusion in the pool. In fact, Credit Suisse stated to Plaintiff that the due diligence for the HEAT transactions was "superior" to the due diligence for most other RMBS transactions because of this 100% valuation review.

306. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, Ameriquest, New Century, WMC, Long Beach, Argent, and Option One, the principal Mortgage Originators of loans included in the Credit Suisse deals, systematically violated their stated underwriting and appraisal standards. Moreover, Credit Suisse's statements of material facts regarding its own due diligence were untrue and contained material omissions.

307. Credit Suisse contracted with external firms including Clayton and Bohan to review whether the loans included in the RMBS that Credit Suisse underwrote complied with the Mortgage Originators' stated standards. As discussed in ¶¶ 63-66, Clayton and Bohan have been investigated by the New York Attorney General, SEC, and Massachusetts and Connecticut regulators for engaging in improper underwriting practices. In January 2008, the New York Attorney General granted Clayton immunity from prosecution in exchange for documents and testimony regarding its due diligence reports.

308. The statements of material facts in the documents Credit Suisse sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, investigations and lawsuits have demonstrated that New Century made

frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; New Century management "turned a blind eye" to the risky loan originations; and "New Century engaged in a number of significant improper and imprudent practices related to its loan originations." *See* ¶¶ 82-95. Moreover, former New Century employees witnessed firsthand how exceptions to New Century's underwriting became the "norm" because employees had to do what was necessary to increase loan originations. *See* ¶¶ 89-91. The SEC has charged former New Century officers with making untrue assurances to the market about the company's "adhere[nce] to high origination standards in order to sell [its] loan products in the secondary market." *See* ¶ 93. The other Mortgage Originators underlying the Credit Suisse Securities – Ameriquest, WMC, Long Beach, Argent, and Option One – similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V. Indeed, the Senate Permanent Subcommittee on Investigations recently concluded that "Long Beach . . . was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry." ¶ 102.

309. The statements of material facts in the documents Credit Suisse sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57. For example, a former New Century underwriter recently confirmed New Century's use of inflated appraisals in testimony before the FCIC, stating that New Century hired fee appraisers who were "pressured" into inflating property values, at times by tampering with the property, "fearing if they didn't, they would lose future business and their livelihoods." ¶ 54. The Illinois Attorney General testified before the FCIC that a multistate investigation "revealed that [Ameriquest] engaged in the kinds of fraudulent practices that other predatory lenders subsequently emulated on a wide scale . . . includ[ing]: inflating home appraisals." ¶ 210. An industry insider testified before the FCIC that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶ 52. Surveys performed in 2007

demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶ 56.

310. Credit Suisse's statements were also untrue because other material data provided by Credit Suisse to Plaintiff were untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

311. Credit Suisse is a defendant in numerous lawsuits directly related to its conduct as an underwriter of RMBS. On March 29, 2010, the United States District Court for the Southern District of New York sustained claims against Credit Suisse brought on behalf of a class of investors who purchased subprime RMBS issued in 2006 and 2007 that contained underlying mortgage loans from Mortgage Originators including New Century and WMC. *New Jersey Carpenters Health Fund v. DLJ Mortgage Capital, Inc.*, Docket No. 08-CV-5653 (PAC) (S.D.N.Y.) (the "Credit Suisse RMBS Action"). The class's claims in that action under the Securities Act of 1933 are substantially similar legally and factually to Plaintiff's claims in this action.

312. In the Credit Suisse RMBS Action, the District Court held that the plaintiffs adequately alleged that Credit Suisse's offering documents "contain[ed] materially misleading statements and omissions" relating to Credit Suisse's "systematic disregard of loan-approval oversight and control mechanisms as represented in underwriting guidelines by the Originators," which Credit Suisse failed to detect "because of wholly inadequate due diligence procedures." Like Plaintiff here, the plaintiffs in the Credit Suisse RMBS Action, allege that:

> **The [Securities] were issued pursuant to a number of core representations in the Offering Documents each of which contained material misstatements and omissions. It was represented that the home equity loans were originated pursuant to underwriting guidelines detailed in both in the Registration Statement and the Supplemental Prospectuses.** These guidelines required an analysis of borrower creditworthiness (i.e., ability to repay the loan) and an appraisal of the mortgaged property pursuant to standard appraisal practices and procedures. The guidelines also described that when loans were issued with

limited or no borrower documentation there were compensating factors such as the lender's reliance primarily on the valuation of the mortgaged properties.

***

The Rating Agencies in downgrading the [Securities] from the highest investment grade to junk bond status specifically attributed their actions to "aggressive underwriting" deployed in originating the loans. **Further, well after the completion of the Offerings, disclosures began to emerge that the principal home equity loan Originators - i.e., New Century, Accredited and WMC - engaged in origination practices which flagrantly violated underwriting guidelines set forth in the Offering Documents.**

Credit Suisse conducted inadequate due diligence to ensure compliance with the underwriting guidelines stated in the Offering Documents. It was incentivized to acquire and securitize as many loans as possible since its profit was achieved upon the sale of the securities. **The due diligence Credit Suisse did perform was in the period when it was acquiring the loans from third parties – not in underwriting the issuance of the [Securities] - when there was a serious disincentive for Credit Suisse to reject loans submitted for auction by originators, for fear that they would be cut-off from access to further loans for future securitization.**

Credit Suisse RMBS Action Complaint, ¶¶ 10-12 (internal citations omitted).

313. As a result of the untrue statements of material facts and omissions described above, the Securities that Credit Suisse offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 42% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Credit Suisse to Plaintiff.

e. <u>Greenwich Capital's Untrue Statements of Material Facts and Omissions</u>

314. Greenwich Capital offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $260,371,635. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix D.

315. Greenwich Capital underwrote more than $180 billion in securities backed by subprime mortgages between 2002 and 2006. In particular, between 2005 and 2006, Greenwich Capital sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime lenders including Long Beach, Argent, Fremont, Option One, and Meritage for the purchase of subprime loans to be pooled and securitized as Securities, offering to pay more for mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors.

316. To facilitate the sale of RMBS, Greenwich Capital formed SPVs, including Depositor Defendant Financial Asset Security Corporation, which issued and was the depositor for numerous offerings of RMBS. Defendant Greenwich Capital offered or sold the Securities to Plaintiff. Greenwich Capital also provided financial research on RMBS and related structured products.

317. In connection with its offer or sale of Securities to Plaintiff, Greenwich Capital sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Greenwich Capital also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Greenwich Capital sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often, Greenwich Capital also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Greenwich Capital's due diligence of the Mortgage Originators' underwriting practices. Greenwich Capital did not allow Plaintiff to keep the pitch books.

318. In the Offering Documents, Greenwich Capital made numerous statements of material facts regarding the underwriting standards and appraisal practices that had been followed in originating the underlying mortgage loans. For example, for the offerings in which Long Beach originated all or a significant amount of the underlying mortgage loans, Greenwich

Capital reprinted Long Beach's "Underwriting Guidelines," which stated that: (1) Long Beach's guidelines were primarily intended to evaluate the prospective borrower's credit standing and repayment ability as well as the value and adequacy of the mortgaged property as collateral; (2) appraisal of the mortgaged property generally conformed to Fannie Mae and Freddie Mac appraisal standards; (3) appraisals were generally performed by licensed independent appraisers who had satisfied the loan servicer's appraiser screening process; and (4) exceptions were only granted with the approval of an employee with appropriate "risk level authority" and in the presence of compensating factors. *See* ¶ 98.

319. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Greenwich Capital made additional statements of material facts regarding the particular Securities and their underlying data, data quality, the relevant Mortgage Originators' practices and guidelines, and Greenwich Capital's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

320. Greenwich Capital made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff, including during meetings in Plaintiff's offices in Concord, Massachusetts. Some of Plaintiff's meetings with Greenwich Capital occurred on or about May 13 and September 2, 2004; March 2 and August 16, 2006; and January 10, 2007. During these meetings, Greenwich Capital made statements of material facts regarding Greenwich Capital's upcoming RMBS deals, and stated that Greenwich Capital conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

321. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained omissions. As detailed above and below, the principal Mortgage Originators of the underlying loans systematically violated their stated

underwriting and appraisal standards. Moreover, Greenwich Capital's statements of material facts regarding its own due diligence were untrue and contained material omissions.

322. For example, the statements of material facts in the documents Greenwich Capital sent to Plaintiff was untrue because Long Beach violated its stated underwriting guidelines, did not consistently evaluate the borrower's ability to repay, and made exceptions to its underwriting standards in the absence of "compensating factors." Subsequent investigations and lawsuits have demonstrated that Long Beach ignored and made frequent exceptions to its underwriting guidelines. *See* ¶¶ 102-127. Moreover, former Long Beach employees witnessed firsthand how variance from Long Beach's stated underwriting standard became the "norm" because employees were incentivized to increase loan volume. *Id.* The Senate Permanent Subcommittee on Investigations stated: "Long Beach . . . was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry." *See* ¶ 102.

323. Likewise, subsequent investigations and lawsuits have demonstrated that Fremont, another Mortgage Originator whose loans Greenwich Capital securitized, "engage[ed] in unsatisfactory lending practices"; "ma[de] loans based on information that Fremont knew or should have known was inaccurate or false, including, but not limited to, borrowers' income, property appraisals, and credit scores"; purposefully relaxed its underwriting standards and made loans based on documents it knew to be untrue; made "everyday" exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for a loan; and continually ignored fraudulent documents when approving loans. *See* ¶¶ 165-182. The other Mortgage Originators of loans underlying the Greenwich Capital Securities similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

324. The statements of material facts in the documents Greenwich Capital sent to Plaintiff were also untrue because the inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57. For example, a former Fremont account manager described how superiors would call appraisers and directly request that they inflate their appraisal values in order to close a deal. ¶ 177. Another Fremont employee audited loans that

the company was asked to repurchase, and found alarming problem with the appraisals, including appraisals that were incomplete, did not match the address of the property, or described the home as owner-occupied when it was rented, on the large majority of the loans. *Id.* An industry insider testified before the FCIC that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶ 52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶ 56.

325. Greenwich Capital's statements of material facts were also untrue because other material data provided to Plaintiff by Greenwich Capital was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

326. On March 8, 2008, RBS confirmed that its Greenwich Capital unit was subject to an SEC investigation into the collapse of the subprime market and had been ordered to turn over financial documents to the SEC regarding, among other things, the origination of mortgages, accounting, due diligence, sales, and insider trading.

327. As a result of the untrue statements of material facts and omissions described above, the Securities that Greenwich Capital offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, 45% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Greenwich Capital to Plaintiff.

f. Deutsche Bank's Untrue Statements of Material Facts and Omissions

328. Deutsche Bank offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $137,103,585. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and

Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix E.

329. Deutsche Bank acquired and then converted subprime mortgages into billions of dollars of RMBS, some of which Deutsche Bank offered or sold to Plaintiff in a series of offerings and sales pursuant to the relevant Offering Documents and other statements.

330. Deutsche Bank offered or sold Securities to Plaintiff, and Plaintiff purchased Securities on behalf of the Clients from Deutsche Bank, in four offerings and sales containing subprime mortgage loans from several different Mortgage Originators, including Fremont, Long Beach, and Option One.

331. To facilitate the sale of RMBS, Deutsche Bank formed SPVs, including Depositor Defendant Ace Securities Corporation, which issued and was the depositor for numerous offerings of RMBS. Defendant Deutsche Bank offered or sold the Securities to Plaintiff. Deutsche Bank also provided financial research on RMBS and related structured products.

332. In connection with its offer or sale of Securities to Plaintiff, Deutsche Bank sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Deutsche Bank also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Deutsche Bank sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often, Deutsche Bank also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Deutsche Bank's due diligence of the Mortgage Originators' underwriting practices. Deutsche Bank did not allow Plaintiff to keep the pitch books.

333. In the Offering Documents, Deutsche Bank made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Fremont originated all or a

significant amount of the underlying mortgage loans, Credit Suisse reprinted Fremont's "Underwriting Guidelines," which stated in sum or substance, that (a) Fremont's guidelines were "intended to assess the ability and willingness of the borrower to repay the debt and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan"; (b) "the Fremont mortgage loans were originated in accordance with the[se] underwriting criteria"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . based upon compensating factors." *See* ¶ 161. Deutsche Bank made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including Long Beach and Option One. *See* Section V.

334. Deutsche Bank's Offering Documents also made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Deutsche Bank stated, for example, that "Fremont's underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal," and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were reviewed by Fremont. *See* ¶ 161. Deutsche Bank made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Long Beach and Option One. *See* Section V.

335. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Deutsche Bank made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Deutsche Bank's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

336. Deutsche Bank made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in meetings, some of which occurred in Plaintiff's offices

in Concord, Massachusetts. Some of Plaintiff's meetings with Deutsche Bank occurred on or about October 28 and 31, 2005 and November 3 and December 6, 2006. During these meetings, Deutsche Bank made statements of material facts regarding Deutsche Bank's upcoming RMBS deals, and stated that Deutsche Bank conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

337. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, Fremont, Long Beach, and Option One, the principal Mortgage Originators of loans included in the Deutsche Bank deals, violated their stated underwriting and appraisal standards. Moreover, Deutsche Bank's statements of material facts regarding its own due diligence were untrue and contained material omissions.

338. The statements of material facts in the documents Deutsche Bank sent to Plaintiff were also untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, investigations and lawsuits have demonstrated that Fremont "engage[ed] in unsatisfactory lending practices"; "ma[de] loans based on information that Fremont knew or should have known was inaccurate or false, including, but not limited to, borrowers' income, property appraisals, and credit scores"; purposefully relaxed its underwriting standards and made loans based on documents it knew to be untrue; made "everyday" exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; and continually ignored fraudulent documents when approving loans. *See* ¶¶ 165-182. The other two principal Mortgage Originators of loans underlying the Deutsche Bank Securities, Long Beach and Option One, similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

339. The statements of material facts in the documents Deutsche Bank sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57. For example, a former Fremont account manager described how superiors would call appraisers and directly request that they inflate their appraisal values in order to close a deal. ¶ 177. Another Fremont employee audited loans that the company was asked to repurchase, and found alarming problems with the appraisals on the large majority of the loans, including appraisals that were incomplete, did not match the address of the property, or described the home as owner-occupied when it was rented. *Id.*

340. Deutsche Bank's statements of material facts were also untrue because other key data provided to Plaintiff by Deutsche Bank was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

341. Deutsche Bank is one of eight Wall Street Banks targeted by New York State Attorney General Andrew Cuomo, who, according to a May 12, 2010 article in the *New York Times*, is investigating these Wall Street Banks to determine whether they provided untrue information to rating agencies in order to inflate the ratings of mortgage securities.

342. As a result of the untrue statements of material facts and omissions described above, the Securities that Deutsche Bank offered or sold to the Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 52% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Deutsche Bank to Plaintiff.

g. Merrill Lynch's Untrue Statements of Material Facts and Omissions

343. Merrill Lynch offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $123,888,595. A full list of these offerings and sales, along

with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix F.

344. Merrill Lynch & Co. sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime lenders including Fremont, WMC, and Option One for the purchase of subprime loans to be pooled and securitized as Securities, offering to pay more for mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors.

345. To facilitate the sale of RMBS, Merrill Lynch & Co. formed numerous SPVs including: (1) Depositor Defendant Merrill Lynch Mortgage Investors, Inc., which served as the depositor and issuer for offerings of RMBS; and (2) Merrill Lynch Mortgage Lending, Inc., which acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of RMBS. Defendant Merrill Lynch offered or sold the Securities to Plaintiff. Merrill Lynch also provided financial research on RMBS and related structured products.

346. In connection with its offer or sale of Securities to Plaintiff, Merrill Lynch sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Merrill Lynch also sent Plaintiff numerous other documents, including term sheets, collateral and computational materials, and "loan tapes." The loan tapes Merrill Lynch sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, inter alia, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Merrill Lynch also showed Plaintiff "pitch books" promoting, *inter alia*, the quality of the Securities and Merrill Lynch's due diligence of the Mortgage Originators' underwriting practices. Merrill Lynch did not allow Plaintiff to keep the pitch books.

347. In the Offering Documents, Merrill Lynch made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying

mortgage loans. For example, in offerings for which Fremont originated all or a significant amount of the underlying mortgage loans, Merrill Lynch reprinted Fremont's "Underwriting Guidelines," which stated in sum or substance, that (a) Fremont's guidelines were "intended to assess the borrower's ability and willingness of the borrower to repay the debt"; (b) the "mortgage loans [were] underwritten in accordance with Fremont's current underwriting programs"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . based on compensating factors." *See* ¶ 161. Merrill Lynch made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including WMC and Option One. *See* ¶¶ 185, 213.

348. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Merrill Lynch stated, for example, that "underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal" and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers." *See* ¶ 161. Merrill Lynch made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including WMC and Option One. *See* ¶¶ 185, 213.

349. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Merrill Lynch made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to mortgage loans underlying those Securities, and Merrill Lynch's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

350. Merrill Lynch also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Merrill Lynch representatives occurred on or about June 25, 2004 and September 21, 2006. During these

meetings, Merrill Lynch made statements of material facts regarding Merrill Lynch's upcoming RMBS deals, and assured Plaintiff that Merrill Lynch conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

351. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. As detailed below, Fremont, Option One, and WMC, the principal Mortgage Originators of loans underlying the Merrill Lynch deals, violated their stated underwriting and appraisal standards. Moreover, Merrill Lynch's statements of material facts regarding its own due diligence were untrue and contained material omissions.

352. Merrill Lynch contracted with external firms including Clayton and Bohan to review whether the loans included in the Securities that Merrill Lynch underwrote complied with the Mortgage Originators' stated standards, as discussed in ¶¶ 63-66.

353. The statements of material facts in the documents Merrill Lynch sent to Plaintiff were untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards in the absence of the "compensating factors" required by their guidelines. For example, investigations and lawsuits have demonstrated that Fremont made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; Fremont management encouraged risky loan originations; and Fremont was "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]." *See* ¶¶ 165-182. Moreover, former Fremont employees witnessed firsthand how exceptions to Fremont's underwriting became the "norm" because employees had to do what was necessary to increase loan originations. *Id.* The FDIC ultimately issued a Cease & Desist Order to Fremont for extending subprime credit "in an unsafe and unsound manner" and violating laws and FDIC regulations. *See* ¶¶ 165-166. The other Mortgage Originators of loans underlying the Merrill Lynch Securities, including Option One and WMC, similarly

violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

354. The statements of material facts in the documents Merrill Lynch sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57.

355. Merrill Lynch's statements of material facts were also untrue because other material data provided to Plaintiff by Merrill Lynch was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loan's credit quality and likelihood of default.

356. Merrill Lynch pressured Mortgage Originators to loosen their underwriting practices in order to generate more loans to be securitized. For example, a *New York Times* article titled "East Coast Money Lent Out West," dated May 8, 2007, reported that "William D. Dallas, the founder and chief executive of Ownit [Mortgage Solutions, a Mortgage Originator], acknowledges loosening lending standards but says he did so reluctantly and under pressure from his investors, particularly Merrill Lynch [which purchased a 20 percent stake in Ownit in 2005], which wanted more loans to package into lucrative securities. He recalls being asked to make more 'stated income' loans . . . . The message, he said, was simple: You are leaving money on the table – do more of them."

357. Among other investigations by various State Attorneys General and the SEC, the New York Attorney General initiated an investigation to determine whether Merrill Lynch concealed information, including the warnings it received about exceptions or mortgages that did not meet minimum lending standards, in an effort to bolster ratings of RMBS and make them more attractive to buyers. *See* Kate Kelly, Amir Efrati & Ruth Simon, "State Subprime Probe Takes a New Track," *Wall Street Journal*, Jan. 31, 2008.

358. Merrill Lynch is also a defendant in a number of lawsuits which directly relate to its conduct as an underwriter of RMBS. For example, in December 2008, investors filed a class action alleging violations of the Securities Act of 1933 arising from Merrill Lynch's sale of RMBS using untrue offering documents. *See Public Employees' Retirement System of Mississippi v. Merrill Lynch & Co. Inc., et al.*, 08-cv-10841 (JRS) (S.D.N.Y.). The consolidated complaint in that action alleges that the Merrill Lynch offering documents contained untrue statements related to (1) the underwriting guidelines used to originate the mortgage loans underlying the Securities; (2) the accuracy of the appraisals for the properties underlying the Securities; (3) the maximum LTV ratios used to qualify borrowers; (4) the debt-to-income ratios permitted on the loans underlying the Securities; and (5) the credit ratings of the Securities. On June 1, 2010, the District Court denied motions to dismiss the action and sustained Section 11 claims against Merrill Lynch. Specifically, the Court held that "the alleged repeated deviation from established underwriting standards is enough to render misleading the assertion in the registration statements that underwriting guidelines were generally followed."

359. As a result of Merrill Lynch's untrue statements of material facts and omissions, the Securities that Merrill Lynch offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 50% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Merrill Lynch to Plaintiff.

h. <u>UBS's Untrue Statements of Material Facts and Omissions</u>

360. UBS offered or sold Securities to Plaintiff in Massachusetts during 2005 and 2006 for a total price of $ 55,295,897. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix G.

361. UBS was one of the leading underwriters of RMBS. UBS and its affiliates formed numerous SPVs to facilitate RMBS issuances including: (1) UBS Real Estate Securities Inc., which served as the sponsor and seller for many of UBS's RMBS offerings; and (2) Depositor Defendant Mortgage Asset Securitization Transactions, Inc. ("MASTR"), a wholly owned limited purpose finance subsidiary of UBS, which served as the depositor and issuer for UBS's RMBS offerings. Defendant UBS offered or sold RMBS to Plaintiff. UBS also provided financial research on RMBS and related structured products.

362. In connection with its offer or sale of Securities to Plaintiff, UBS sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. UBS also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes UBS sent consisted of Excel spreadsheets containing dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often, UBS also showed Plaintiff "pitch books" and other materials promoting the quality of the Securities and UBS's due diligence of the Mortgage Originators' underwriting practices. UBS did not allow Plaintiff to keep the pitch books.

363. In the Offering Documents, UBS made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Fremont originated all or a significant amount of the underlying mortgage loans, UBS reprinted Fremont's "Underwriting Guidelines," which stated that (a) Fremont's guidelines were "intended to assess the ability and willingness of the borrower to repay the debt and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan"; (b) "the Fremont mortgage loans were originated in accordance with the[se] underwriting criteria"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . based upon compensating factors." *See* ¶ 161. UBS made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including Aames. *See* Section V.

364. Moreover, UBS's Offering Documents made statements of material facts regarding the appraisal guidelines and practices of Fremont and the other relevant Mortgage Originators. UBS stated, for example, that "Fremont's underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal," and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were reviewed by Fremont. *See* ¶ 161. UBS made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Aames. *See* Section V.

365. In the other documents including term sheets, loan tapes, and pitch books UBS sent or showed to Plaintiff, UBS made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to the loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

366. UBS made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with UBS representatives occurred on or about July 12, July 14, and November 3, 2004; April 11, November 30, and December 5, 2005; May 18, September 28, and November 21, 2006; and March 12, April 11, April 16, July 18, and August 3, 2007. During these meetings, UBS made statements of material facts regarding upcoming RMBS deals, and assured Plaintiff that UBS conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines.

367. On March 5, 2008, investors commenced an action against UBS relating to mortgage-related securities purchases. *Pursuit Partners, LLC v. UBS AG, et al.*, 05-CV-08-4013452 (Conn. Super Ct.). The plaintiffs in that action alleged that UBS marketed junk Securities as investment-grade. Between July and October 2007, the plaintiffs in that action purchased more than $50 million of mortgage-related Securities from UBS, and on October 10,

2007, the securities were downgraded to junk status. On September 8, 2009, the Connecticut Superior Court ordered UBS to set aside $35.5 million to cover a potential judgment against it, finding that plaintiffs had "presented sufficient evidence to satisfy the probable cause standard." The court summarized the case as follows: "Through direct and circumstantial evidence, Pursuit has established probable cause to sustain the validity of a claim that the UBS defendants were in possession of material nonpublic information regarding imminent ratings downgrades on the Notes it sold to the Plaintiffs, information UBS withheld from the Plaintiffs."

368. On February 22, 2010, a pension fund commenced an action against UBS in the United States District Court for the District of New Jersey regarding the issuance of RMBS. *Local 302 & 612 of the International Union of Operating Engineers-Employers Construction Industry Retirement Trust v. Mortgage Asset Securitization Transactions, Inc. et al.*, 10-cv-00898-DMC (D.N.J.). The pension fund plaintiff in that case alleges that the Offering Documents pursuant to which UBS offered RMBS contained misstatements and material omissions regarding: (1) the underwriting standards pursuant to which the underlying mortgage collateral was originated; (2) the Securities' true investment risk and credit ratings; and (3) the amount and quality of the credit enhancement or credit support. The plaintiff in that case also alleges that UBS failed to conduct adequate, or in many cases any, due diligence on the mortgage loan applications and mortgaged properties before or during the securitization process. The mortgage loans underlying the Securities in that case were principally originated by Countrywide and IndyMac Bank, F.S.B. ("IndyMac").

369. According to a May 12, 2010 article in the *New York Times*, UBS received a subpoena from the New York State Attorney General in connection with an investigation into whether UBS provided untrue information to rating agencies in order to inflate ratings of RMBS.

370. Each of the statements of material facts identified above made by UBS regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, Fremont and the other Mortgage Originators of loans underlying the UBS Securities systematically violated their stated underwriting and appraisal standards. Moreover, UBS's

statements of material facts regarding its own due diligence were untrue and contained material omissions.

371. The statements of material facts in the documents UBS sent to Plaintiff were untrue because Fremont and the other relevant Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, subsequent investigations and lawsuits have demonstrated that Fremont made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; Fremont management encouraged risky loan originations; and Fremont was "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]." *See* ¶¶ 165-182. Moreover, former Fremont employees witnessed firsthand how exceptions to Fremont's underwriting became the "norm" because employees had to do whatever was necessary to increase loan originations. *Id.* The FDIC ultimately issued a Cease & Desist Order to Fremont for extending subprime credit "in an unsafe and unsound manner" and violating laws and FDIC regulations. *See* ¶¶ 165-166. The other Mortgage Originators of loans underlying the UBS Securities, including Aames, similarly violated their stated underwriting guidelines in order to increase loan volume. *See* SectionV.

372. The statements of material facts in the documents UBS sent to Plaintiff were also untrue because the appraisals of the mortgaged properties were systematically inflated, which caused the listed LTV ratios and credit enhancement levels to be untrue. *See, e.g.*, ¶¶ 52-57.

373. UBS's statements of material facts were also untrue because other material data provided to Plaintiff by UBS was untrue. For example, the data often identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loan's credit quality and likelihood of default. *See* Section V.

374. As a result of the untrue statements of material facts and omissions described above, all of the Securities that UBS offered or sold to Plaintiff have been downgraded, and their value has collapsed. As of June 25, 2010, over 49% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by UBS to Plaintiff.

i. Goldman Sachs' Untrue Statements of Material Facts and Omissions

375. Goldman Sachs offered or sold Securities to Plaintiff in Massachusetts in 2005 and 2006 for a total price of $50,792,745. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix H.

376. Goldman Sachs had several trading desks responsible for purchasing and selling mortgage-related assets, including RMBS. From 2004 through 2007, Goldman Sachs actively participated in the securitization markets and worked extensively with subprime Mortgage Originators Long Beach, Fremont, and New Century.

377. To facilitate the sale of RMBS, Goldman Sachs formed numerous SPVs including: (1) Goldman Sachs Mortgage Company, which served as the sponsor for many of Goldman Sachs' offerings; and (2) Depositor Defendant GS Mortgage Securities Corp., which served as the depositor and issuer for Goldman Sachs' offerings. Goldman Sachs offered or sold the Securities to Plaintiff. Goldman Sachs also provided financial research on RMBS and related structured products.

378. In connection with its offer or sale of Securities to Plaintiff, Goldman Sachs sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements that were, or would become, publicly available when filed with the SEC. Goldman Sachs also sent Plaintiff other documents, including term sheets and "loan tapes." The loan tapes Goldman Sachs sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual

loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often, Goldman Sachs also showed Plaintiff "pitch books" and other materials promoting the quality of the Securities and Goldman Sachs' due diligence of the Mortgage Originators' underwriting practices. Goldman Sachs did not allow Plaintiff to keep the pitch books.

379. In the Offering Documents, Goldman Sachs made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, Long Beach originated all or a significant amount of the underlying mortgage loans in the Goldman Sachs offerings Plaintiff purchased on behalf of the Clients. In the Offering Documents, Goldman Sachs reprinted Long Beach's "Underwriting Guidelines," which stated that: (1) Long Beach's guidelines were primarily intended to evaluate the prospective borrowers' credit standing and repayment ability as well as the value and adequacy of the mortgaged properties as collateral; (2) appraisals of the mortgaged properties generally conformed to Fannie Mae and Freddie Mac standards; (3) appraisals were generally performed by licensed independent appraisers who had satisfied the loan servicer's appraiser screening process; and (4) exceptions were only granted with the approval of an employee with appropriate "risk level authority" and in the presence of compensating factors. *See* ¶ 98.

380. In the other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Goldman Sachs made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Long Beach's practices and guidelines, and Goldman Sachs' due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

381. The statements of material facts in the documents Goldman Sachs sent to Plaintiff were untrue because Long Beach violated its stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay, and made exceptions to its underwriting standards in the

absence of "compensating factors." Subsequent investigations and lawsuits have demonstrated that Long Beach ignored and made frequent exceptions to its underwriting guidelines. *See* ¶¶ 102-127. Moreover, former Long Beach employees witnessed firsthand how variance from Long Beach's stated underwriting standard became the "norm" because employees were incentivized to increase loan volume. *Id.* The PSI summed up Long Beach's conduct by stating: "Long Beach...was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry." *See* ¶ 102.

382. The statements of material facts in the documents Goldman Sachs sent to Plaintiff were also untrue because inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57. An industry insider who testified before the FCIC stated that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶ 52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶ 56.

383. Goldman Sachs' statements of material facts were also untrue because other material data provided to Plaintiff by Goldman Sachs was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

384. Goldman Sachs also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. For example, in connection with the sale of the LBMLT 2005-2 deal, Goldman Sachs stated that in the 18 months before the deal, Long Beach had shifted to significantly higher-quality collateral. Goldman Sachs also stated to Plaintiff that Long Beach had stopped originating mortgages on mobile homes and that the concentrations of loan balances in the pools below $50,000 were very small. Plaintiff met with Goldman Sachs representatives on or about April 6 and June 15, 2004. During these meetings, Goldman Sachs representatives made statements of material facts regarding upcoming RMBS deals, and assured

Plaintiff that Goldman Sachs conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines. Among other things, Goldman Sachs stated that its due diligence included sampling loans to check underwriting process, documentation, valuations, and compliance. Specifically, Goldman Sachs repeatedly stated that it performed due diligence on the mortgage loans and to ensure Mortgage Originator compliance with stated underwriting standards.

385. Goldman Sachs' oral statements of material facts were untrue for the same reasons listed in ¶ 381, above. Moreover, the statements of material facts were untrue because Goldman Sachs failed to conduct adequate due diligence on the Mortgage Originators and the mortgage loans underlying the Securities in accordance with its statements.

386. The PSI investigated Goldman Sachs and concluded that from 2004 to 2007, Goldman Sachs "helped lenders like Long Beach, Fremont, and New Century, securitize high risk, poor quality loans, obtain favorable credit ratings for the resulting [RMBS], and sell the [RMBS] to investors, pushing billions of dollars of risky mortgages into the financial system."

387. The PSI specifically profiled Goldman Sachs' relationship with Long Beach, which originated all the mortgages in the LBMLT 2005-2 deal Plaintiff purchased on behalf of the Clients. A PSI exhibit showed that WaMu (Long's Beach's parent company), Long Beach, and Goldman Sachs collaborated on at least $14 billion in loan sales and securitizations. The PSI also stated that in 2005 and 2006, Long Beach's RMBS were among the worst performing in the market.

388. The PSI highlighted one example of how Goldman Sachs securitized Long Beach mortgage loans, despite the fact that Long Beach was "one of the nation's worst mortgage lenders." In May 2006, Goldman Sachs, along with its co-lead underwriter WaMu, sold $495 million in Securities backed by Long Beach loans. In less than a year, delinquencies and defaults on the underlying loans began to skyrocket. By May 2007, the cumulative net loss on the underlying mortgage pool was over 12 percent, erasing the deal's loss protection and causing downgrades of 6 out of 7 of the mezzanine tranches. By May 2008 – only two years later – even

the AAA securities in the May 2006 deal had been downgraded to "default," and by March 2010 the securities had recorded a cumulative net loss of over 66 percent.

389. Massachusetts Attorney General Martha Coakley recently investigated Goldman Sachs' role in securitizing loans in the Commonwealth. The investigation examined whether Goldman Sachs engaged in the following practices:

- Failing to ascertain whether loans purchased from originators complied with the originators' stated underwriting guidelines;
- Failing to take sufficient steps to avoid placing problem loans in securitization pools;
- Failing to correct inaccurate information in securitization trustee reports concerning repurchases of loans; and
- Failing to make available to potential investors certain information concerning allegedly unfair or problem loans, including information obtained during loan due diligence and the pre-securitization process, as well as information concerning Goldman Sachs' practices in making repurchase claims relating to loans both in and out of securitizations.

390. On May 7, 2009, Goldman Sachs entered into a settlement agreement with the Massachusetts Attorney General in order "[t]o resolve any potential claims stemming from the Attorney General's investigation . . . ." Under the agreement, among other things, Goldman Sachs paid $10 million to the Commonwealth.

391. As a result of the untrue statements of material facts and omissions described above, the Securities that Goldman Sachs offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, 50% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Goldman Sachs to Plaintiff.

j. J.P. Morgan's Untrue Statements of Material Facts and Omissions

392. J.P. Morgan offered or sold Securities to Plaintiff in Massachusetts in 2005 and 2006 for a total price of $41,802,784. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage

Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix I.

393. J.P. Morgan, seeking to compete with its Wall Street peers, formed numerous entities to facilitate the sale of RMBS, including: (1) J.P. Morgan Chase Bank ("Chase Bank"), which originated various types of mortgage loans to various types of borrowers, and also acted as the servicers of the mortgage loans following their securitization; (2) Depositor Defendant J.P. Morgan Acceptance Corporation I, which served as the depositor and issuer for offerings of RMBS; and (3) J.P. Morgan Mortgage Acquisition Corporation, which acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of RMBS. Defendant J.P. Morgan offered or sold the Securities to Plaintiff. J.P. Morgan also provided financial research on RMBS and related structured products.

394. In connection with its offer or sale of Securities to Plaintiff, J.P. Morgan sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. J.P. Morgan also sent Plaintiff numerous other documents, including term sheets, collateral and computational materials, and "loan tapes." The loan tapes J.P. Morgan sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. J.P. Morgan also showed Plaintiff "pitch books" promoting, *inter alia*, the quality of the Securities and J.P. Morgan's due diligence of the Mortgage Originators' underwriting practices. J.P. Morgan did not allow Plaintiff to keep the pitch books.

395. In the Offering Documents, J.P. Morgan made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Option One originated all or a significant amount of the underlying mortgage loans, J.P. Morgan reprinted Option One's "Underwriting Guidelines," which stated that (a) Option One's guidelines were "intended to assess the value of the mortgaged property, to evaluate the adequacy of such property as collateral for the mortgage

loan and to assess the applicant's ability to repay the mortgage loan"; (b) the "Mortgage Loans [were] originated generally in accordance with Option One's [Underwriting] Guidelines"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See*, ¶ 213. The Offering Documents for Securities that J.P. Morgan offered or sold to Plaintiff made similar statements of material facts regarding mortgage loans originated by Countrywide, WMC, Chase Bank and Fieldstone Mortgage Company ("Fieldstone"). *See* Section V.

396. Moreover, the Offering Documents for Securities that J.P. Morgan offered or sold to Plaintiff contained statements of material facts regarding appraisal guidelines and practices. For example, the Offering Documents for the JPMAC 2006-CW2 Trust stated that Countrywide's underwriting standards "require an independent appraisal of the mortgaged property" and the Offering Documents for the JPMAC 2005-WMC1 stated that WMC's underwriting standards required an appraisal of the mortgaged property "which conforms to Uniform Standards of Professional Appraisal Practice." The Offering Documents made similar statements of material facts regarding appraisals for loans originated by Option One, Chase Bank and Fieldstone. *See* Section V.

397. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," J.P. Morgan made additional statements of material facts regarding the particular Securities and their underlying data, Mortgage Originator practices and guidelines, and J.P. Morgan's due diligence of those practices and guidelines. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

398. J.P. Morgan also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with J.P. Morgan representatives occurred on or about April 13, April 28, September 29, and November 7, 2005, and May 3 and November 7, 2006. During these meetings, J.P. Morgan made statements of material facts regarding J.P. Morgan's upcoming RMBS deals and assured Plaintiff that J.P.

Morgan conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans to check underwriting process, documentation, valuations, and compliance.

399. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. Option One, WMC, Countrywide, Chase Bank, and Fieldstone, the principal Mortgage Originators of loans underlying the J.P. Morgan deals, violated their stated underwriting and appraisal standards. Moreover, J.P. Morgan's statements of material facts regarding its own due diligence were untrue and contained material omissions.

400. The statements of material facts in the documents J.P. Morgan sent to Plaintiff were untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards in the absence of the "compensating factors" required by their guidelines. For example, the Massachusetts Attorney General brought a lawsuit against Option One charging that the company "increasingly disregard[ed] underwriting standards, creat[ed] incentives for loan officers and brokers to disregard the interests of the borrowers and steer them into high-cost loans, and originated thousands of loans that [Option One] knew or should have known the borrowers would be unable to pay, all in an effort to increase loan origination volume so as to profit from the practice of packaging and selling the vast majority of [Option One's] residential subprime loans to the secondary market." The other Mortgage Originators of loans underlying the J.P. Morgan Securities, WMC, Countrywide, Chase Bank and Fieldstone, similarly violated their stated underwriting guidelines in an effort to increase loan production. *See* Section V.

401. The statements of material facts in the documents J.P. Morgan sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57.

402. J.P. Morgan's statements of material facts were also untrue because other material data provided to Plaintiff by J.P. Morgan was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loan's credit quality and likelihood of default.

403. According to a May 13, 2010 Reuters news article, the SEC and "U.S. prosecutors are conducting a broad criminal investigation of six major Wall Street Banks, including J.P. Morgan" about whether they misled investors about mortgage-securities deals.

404. As a result of J.P. Morgan's untrue statements of material facts and omissions, the Securities that J.P. Morgan offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 45% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by J.P. Morgan to Plaintiff.

k. Countrywide's Untrue Statements of Material Facts and Omissions

405. Countrywide offered or sold Securities to Plaintiff in Massachusetts in 2005 and 2006 for a total price of $93,807,045. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix K.

406. As one of the nation's largest subprime Mortgage Originators, Countrywide Financial was able to buy and sell vast amounts of subprime loans which were pooled and securitized as Securities. In 2005 and 2006 alone, Countrywide Financial originated in excess of $850 billion in home loans throughout the United States.

407. Through its affiliates and subsidiaries, Countrywide Financial was able to control nearly every step in the mortgage securitization process. To facilitate the sale of RMBS, Countrywide Financial formed numerous SPVs including: (1) Depositor Defendants CWABS, Inc. and CWALT, Inc., which served as the depositors and issuers for offerings of Securities; and

(2) Countrywide Home Loans, Inc. ("Countrywide Home"), which originated or otherwise acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of Securities. Defendant Countrywide offered or sold Securities containing loans originated by these SPEs to Plaintiff. Countrywide also offered or sold to Plaintiff Securities containing loans originated by other mortgage originators such as Aames Investment Corporation. Countrywide also provided financial research on RMBS and related structured products.

408. In connection with its offer or sale of Securities to Plaintiff, Countrywide sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements, and other documents that were, or would become, publicly available when filed with the SEC. Countrywide also sent Plaintiff numerous other documents, including term sheets, loan tapes, collateral tables, and summaries of loans reports. The "loan tapes" Countrywide sent to Plaintiff consisted of Excel spreadsheets that contained over 100 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Countrywide also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Countrywide's due diligence of the Mortgage Originators' underwriting practices. Countrywide did not allow Plaintiff to keep the pitch books.

409. In the Offering Documents, Countrywide made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Countrywide Home originated all or a significant amount of the underlying mortgage loans, Countrywide reprinted Countrywide Home's "Underwriting Guidelines," which stated, in sum or substance, that (a) Countrywide Home's guidelines were "intended to evaluate the value and adequacy of the mortgaged property as collateral for the proposed mortgage loan and the borrower's credit standing and repayment ability"; (b) Countrywide Home reviewed not only the value of the property, but also considered

"applicant's assets, liabilities, income and employment history, as well as certain other personal information"; (c) the mortgage loans were originated in accordance with the underwriting guidelines; and (d) exceptions to these guidelines would only be made "[o]n a case by case basis . . . based upon compensating factors." CWL 2005-11 Prospectus Supplement. Countrywide made similar statements with respect to loans originated by other mortgage originators, including Aames Home Loan.

410. Moreover, the Offering Documents made statements of material facts regarding the Mortgage Originators' appraisal guidelines. Countrywide stated, for example, that the Mortgage Originators commissioned appraisals by qualified independent appraisers who prepared appraisals that conformed to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation.

411. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Countrywide made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Countrywide's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

412. Countrywide also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. For example, on April 4, 2006, Plaintiff made a due diligence visit to Countrywide's offices to meet with Countrywide's origination and servicing staff. During these meetings, Countrywide representatives made statements of material facts regarding Countrywide's upcoming RMBS deals, and assured Plaintiff that Countrywide conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

413. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. The principal Mortgage Originators in the Countrywide deals systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines, and either knew of or participated in the inflated appraisals of the mortgaged properties. Moreover, Countrywide's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

414. Countrywide's statements of material facts were also untrue because other material data provided to Plaintiff by Countrywide was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

415. Countrywide Financial's lending practices, including the subjects of the untrue statements of material facts and omissions in the Offering Documents, are currently the target of multiple state and federal investigations and proceedings. Various State Attorneys General, including those from Massachusetts, California, Connecticut, Illinois, Florida, and Indiana, have brought lawsuits or initiated investigations against Countrywide based on its lending, underwriting, and appraisal practices for mortgage loans.

416. On March 24, 2010, Massachusetts Attorney General Coakley filed a Complaint and Final Judgment by Consent against Countrywide's parent, Countrywide Financial Corporation, and its affiliates Countrywide Home Loans, Inc., Countrywide Mortgage Ventures LLC, and Full Spectrum Lending, Inc. The Attorney General's Complaint alleged that:

> During 2006 and 2007, Countrywide was the largest lender in Massachusetts and the nation and the largest subprime lender in Massachusetts. In originating residential mortgage loans in Massachusetts from 2005 to 2007 ("loans"), Countrywide engaged in unfair loan origination practices including approving risk-layered loans that, at times, led to predictable borrower "payment shock" -- that is, a significant increase in a borrower's payment based on changes to the

> calculation of a monthly payment, frequently attributable to a change in interest rate for an adjustable rate mortgage ("ARM") or the deferral of the payment of principal on interest only or Pay Option ARMs. When originating these loans, Countrywide knew or should have known that a substantial number of its borrowers could not reasonably repay these loans according to the loans' terms and that the loans would be subject to predictable delinquency and default.

417. The Attorney General's Complaint quotes emails sent by the Chairman of Countrywide, Angelo Mozilo, in March and April 2006 in which Mozilo referred to Countrywide's 100% LTV subprime loans as "the most dangerous product in existence and there can be nothing more toxic," and "[i]n all my years in the business, I have never seen a more toxic pr[o]duct." Despite Mozilo's awareness in early 2006 that such loans were toxic, the Attorney General's Complaint alleges that Countrywide continued to make such loans through 2007 and into 2008.

418. The Attorney General's settlement with Countrywide Financial Corporation, in combination with settlements by other State Attorneys General, provides for $18 million in loan modifications for Massachusetts homeowners, $3 billion in loan modifications for homeowners across the country, and a $4.1 million payment by Countrywide Financial Corporation to the Commonwealth.

419. Countrywide's underwriting standards are also the subject of an investigation by the Federal Bureau of Investigation ("FBI"), which was first reported on March 8, 2008 by *The Wall Street Journal* in an article entitled "FBI Investigates Countrywide -- U.S. Scrutinizes Filings on Financial Strength, Loan Quality for Fraud." The FBI investigation is focused on "whether company officials made misrepresentations about the company's financial position and the quality of its mortgage loans in securities filings."

420. On March 11, 2008, the *Wall Street Journal* published another article detailing the FBI's investigation of Countrywide's lending practices. According to the sources interviewed by the *Wall Street Journal*, federal investigators found that "Countrywide's loan documents often were marked by dubious or erroneous information about its mortgage clients, according to people involved in the matter. The company packaged many of those mortgages into securities

and sold them to investors, raising the additional question of whether Countrywide understated the risks such investments carried."

421. As a result of the untrue statements of material facts and omissions described above, the Securities that Countrywide offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 57% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Countrywide to Plaintiff.

l. FBR's Untrue Statements of Material Facts and Omissions

422. FBR offered or sold Securities to Plaintiff in Massachusetts in 2005 for a total price of $22,149,863. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix L.

423. FBR sought to expand its share of the RMBS market by aggressively pursuing subprime mortgage originators including Aames, offering to pay more for their mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors. In an effort to expand its subprime origination, servicing, and securitization business, FBR acquired First NLC Financial Services, a mortgage originator headquartered in Florida, in 2005.

424. To facilitate the sale of RMBS, FBR formed SPVs, including Depositor Defendant FBR Securitization, Inc., which served as the depositor and issuer for many of FBR's offerings. FBR offered or sold the Securities to Plaintiff. FBR also provided financial research on RMBS and related structured products.

425. In connection with its offer or sale of Securities to Plaintiff, FBR sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. FBR also sent Plaintiff numerous other documents, including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and "loan tapes." The loan tapes FBR sent to

Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the data, the mortgage originators' underwriting practices and guidelines for the mortgages supporting the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. FBR also showed Plaintiff "pitch books" promoting, *inter alia*, the mortgage originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and FBR's due diligence of the mortgage originators' underwriting practices. FBR did not allow Plaintiff to keep the pitch books.

426. In the Offering Documents, FBR made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in an offering for which Aames originated all of the underlying mortgage loans, FBR stated, in sum or substance, that (a) Aames' guidelines were intended to assess the borrower's ability and willingness to repay the debt; (b) the mortgage loans underwritten in accordance with Aames' underwriting standards; and (c) exceptions to these standards would only be made on a case-by-case basis based on compensating factors. FBR made similar statements of material facts for mortgage loans originated by other mortgage originators.

427. Moreover, the Offering Documents made statements of material facts regarding the relevant mortgage originators' compliance with their appraisal guidelines.

428. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," FBR made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and mortgage originator practices and guidelines applicable to mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

429. FBR also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in meetings, some of which were at Plaintiff's offices in Concord,

Massachusetts on or about August 9 and 11, 2004. Among other things, FBR stated that it retained Clayton to conduct due diligence for credit, compliance, and appraisals on 100% of the loans in FBRSI 2005-5, a securitization for which Aames originated all the loans.

430. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. The mortgage originators in the FBR deals systematically violated their stated underwriting and appraisal standards. Moreover, FBR's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

431. The statements of material facts in the documents FBR sent to Plaintiff were untrue because the mortgage originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines.

432. The statements of material facts in the documents FBR sent to Plaintiff were also untrue because of the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue.

433. FBR's statements of material facts were also untrue because other material data provided to Plaintiff by FBR was untrue. For example, the data incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

434. As a result of FBR's untrue statements of material facts and omissions, the Securities that FBR offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 47% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by FBR to Plaintiff.

m. HSBC's Untrue Statements of Material Facts and Omissions

435. HSBC offered or sold Securities to Plaintiff in Massachusetts in 2005 and 2006 for a total price of $64,313,293. A full list of these offerings and sales, including the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix M.

436. To facilitate the sale of RMBS, HSBC formed other special-purpose entities including Depositor Defendant HSI Asset Securitization Corporation, which acquired residential mortgage loans to be securitized and served as the depositor and issuer in numerous offerings of RMBS. The Defendant HSBC offered or sold the Securities to Plaintiff. HSBC also provided financial research on RMBS and related structured products.

437. In connection with its offer or sale of Securities to Plaintiff, HSBC sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements and, for FFML 2006-FF5, a Confidential Offering Memorandum, prospectus, and prospectus supplement. HSBC also sent Plaintiff other documents, including term sheets and "loan tapes." The loan tapes HSBC sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. HSBC also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting Securities, the data, and HSBC's due diligence of the Mortgage Originators' underwriting practices. HSBC did not allow Plaintiff to keep the pitch books.

438. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

439. As discussed further below, the Offering Documents and other documents provided by HSBC to Plaintiff contained statements of material facts regarding underwriting and

appraisal standards applicable to the mortgage loans underlying the Securities. These statements of material facts were untrue and contained material omissions. As detailed below, the principal Mortgage Originators of loans underlying the HSBC deals violated their stated underwriting and appraisal standards.

440. HSBC's statements of material facts were also untrue because other material data provided to Plaintiff by HSBC was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

441. HSBC met with Plaintiff on or about December 5, 2005 and November 22, 2006. During the meetings, HSBC reiterated many of the statements of material facts in the documents provided to Plaintiff. In addition, HSBC stated that HSBC conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

442. These oral statements of material facts were untrue for the same reasons listed in ¶¶ 446-47. In addition, the statements of material facts were untrue because HSBC failed to conduct adequate due diligence on the Mortgage Originators and the mortgage loans underlying the Securities in accordance with its statements.

1. HASC 2005-NC2

443. The HASC 2005-NC2 Securities were offered or sold to Plaintiff pursuant to a Registration Statement, a Prospectus Supplement, and a term sheet, and the M-10 class of HASC 2005-NC2 Securities was also offered or sold to Plaintiff pursuant to a private placement agreement.

444. In the Offering Documents, HSBC made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans, most of which were originated by New Century. For example, HSBC reprinted

New Century's "Underwriting Guidelines," which stated, in sum or substance, that (a) New Century's guidelines were "intended to assess the borrower's ability to repay the mortgage loan"; (b) New Century reviewed not only the value of the property, but also considered "the mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type of use of the mortgaged property"; (c) "the mortgage loans [were] originated in accordance with the underwriting guidelines"; and (d) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶ 76. HSBC made similar statements of material facts for Mortgage Loans originated by other Mortgage Originators.

445. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. HSBC stated, for example, that New Century commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were "required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac," and that were reviewed "by a qualified employee" of New Century or by an appraiser retained by New Century. *See* ¶ 78. HSBC made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators.

446. The statements of material facts in the documents HSBC sent to Plaintiff were untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, subsequent investigations and lawsuits have demonstrated that New Century made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; New Century management "turned a blind eye" to risky loan originations; and "New Century engaged in a number of significant improper and imprudent practices related to its loan originations." *See* ¶¶ 82-95. Moreover, former New Century employees witnessed firsthand how exceptions to New Century's underwriting became the "norm" because employees

had to do what was necessary to increase loan originations. *See* ¶¶ 89-91. The SEC has recently charged former New Century officers with making untrue assurances to the market about the company's "adhere[nce] to high origination standards in order to sell [its] loan products in the secondary market." *See* ¶ 93. The other Mortgage Originators underlying the HSBC Securities similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production.

447. The statements of material facts in the documents HSBC sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57. A former New Century underwriter recently confirmed New Century's use of inflated appraisals in testimony before the FCIC, stating that New Century hired fee appraisers who were "pressured" into inflating property values, at times by tampering with the property, "fearing if they didn't, they would lose future business and their livelihoods." ¶ 54. Another industry insider testified before the FCIC that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶ 52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶ 56.

2. FFML 2006-FF5

448. In the Offering Documents for FFML 2006-FF5, HSBC made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans, substantially all of which were originated by First Franklin, a division of National City Bank of Indiana ("First Franklin"), and were sold by First Franklin to its affiliate First Franklin Financial Corporation (the "Mortgage Loan Seller"), which in turn sold the mortgage loans to HSBC to be securitized.

449. HSBC stated that First Franklin originated the mortgage loans in accordance with the underwriting criteria described in the Offering Documents, which stated that:

> The Mortgage Loan Seller's acquisition underwriting standards are primarily intended to assess the ability and willingness of the borrower to repay the debt and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan. The standards established by the Mortgage Loan Seller require that the mortgage loans of a type similar to the Mortgage Loans were underwritten by the third party originators [*i.e.*, primarily First Franklin] with a view toward the resale of the mortgage loans in the secondary mortgage market. In accordance with the Mortgage Loan Seller's guidelines for acquisition, the third party originators must consider, among other things, a mortgagor's credit history, repayment ability and debt service to income ratio ("Debt Ratio"), as well as the value, type and use of the mortgaged property.
>
> * * * *
>
> In accordance with the Mortgage Loan Seller's guidelines for acquisition, all of the mortgage loans of a type similar to the Mortgage Loans were required to be underwritten by the third party originator's underwriters having the appropriate signature authority. Each underwriter is granted a level of authority commensurate with their proven judgment, maturity and credit skills. On a case by case basis, a third party originator may determine that, based upon compensating factors, a prospective mortgagor not strictly qualifying under the underwriting risk category guidelines described below warrants an underwriting exception. Compensating factors may include, but are not limited to, low loan-to-value ratio, low Debt Ratio, substantial liquid assets, good credit history, stable employment and time in residence at S-42 the applicant's current address. It is expected that a substantial portion of the Mortgage Loans may represent such underwriting exceptions.

450. Moreover, the Offering Documents made statements of material facts regarding First Franklin's appraisal guidelines and practices. HSBC stated, for example, that:

> In accordance with the Mortgage Loan Seller's guidelines for acquisition, the third party originators [i.e., primarily First Franklin] are required to comply with applicable federal and state laws and regulations and generally require an appraisal of the mortgaged property which conforms to Freddie Mac and/or Fannie Mae standards; and if appropriate, a review appraisal. Generally, appraisals are provided by appraisers approved by the Mortgage Loan Seller. Review appraisals may only be provided by appraisers approved by the Mortgage Loan Seller. In some cases, the third party originator may rely on a statistical appraisal methodology provided by a third party.
>
> Qualified independent appraisers must meet minimum standards of licensing and provide errors and omissions insurance in states where it is required to become approved to do business with the third party originators. Each Uniform Residential Appraisal Report includes a market data analysis based on recent sales of comparable homes in the area and, where deemed appropriate, replacement cost analysis based on the current cost of constructing a similar home. The review

> appraisal may be an enhanced desk, field review or an automated valuation report that confirms or supports the original appraiser's value of the mortgaged premises.

451. The statements of material facts in the documents HSBC sent to Plaintiff were untrue because First Franklin violated its stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to its underwriting standards absent the "compensating factors" required by the guidelines.

452. The statements of material facts in the documents HSBC sent to Plaintiff were also untrue because of inflated appraisals for the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. CW 63, a Corporate Underwriter at First Franklin from 2006 until June 2007 who audited appraisals, estimated that one in four appraisals reviewed at First Franklin was inflated. CW 63 stated that most lenders maintained blacklists for appraisers who submitted appraisals with inflated values or unsupported comparables. First Franklin, however, maintained no such lists. Frequently CW 63 rejected loans with overinflated appraisals, only to have them approved by managers.

453. In December 2006, Merrill Lynch purchased First Franklin from National City Corporation ("National City") for $1.3 billion. In April 2007, National City received a dispute notice from Merrill Lynch asserting that the closing date net asset values and related purchase price were overstated by $67 million. Merrill Lynch's dispute notice alleged that National City had breached representations or warranties concerning First Franklin's alleged losses associated with its obligation to repurchase defective loans. In May 2008, Merrill Lynch announced that it would stop funding loans at First Franklin and explore selling the company. Thereafter, in June 2008, National City was notified that the SEC was investigating National City, and the SEC requested documents concerning National City's loan underwriting experience and the sale of First Franklin. In November 2008, after Bank of America had agreed to acquire Merrill Lynch, Bank of America determined that Merrill Lynch would have to take a goodwill charge of $2.3 billion, due in part to the failure of First Franklin.

454. As a result of the untrue statements of material facts and omissions described above, the Securities that HSBC offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 46% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by HSBC to Plaintiff.

n. Banc of America's Untrue Statements of Material Facts and Omissions

455. Banc of America Securities, LLC offered or sold Securities to Plaintiff in Massachusetts in 2005 and 2006 for a total price of $50,407,959. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix N.

456. Banc of America sought to expand its share of the mortgage securities market by aggressively pursuing subprime Mortgage Originators including Option One, Accredited, and GMAC Mortgage, offering to pay more for their mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors. Option One was one of the the largest Mortgage Originators in the Banc of America Securities.

457. To facilitate the sale of mortgage-backed securities, Banc of America's parent company formed SVPs, including Depositor Defendants Asset Backed Funding Corporation ("ABFC") and Banc of America Mortgage Securities, Inc., which served as the depositors and issuers for many of its offerings. Banc of America offered or sold the Securities to Plaintiff. Banc of America also provided financial research on RMBS and related structured products.

458. In connection with its offer or sale of Securities to Plaintiff, Banc of America sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Banc of America also sent Plaintiff numerous other documents, including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and "loan tapes." The

loan tapes Banc of America sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Banc of America also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Banc of America's due diligence of the Mortgage Originators' underwriting practices. Banc of America did not allow Plaintiff to keep the pitch books.

459. In the Offering Documents, Banc of America made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Option One originated all or a significant amount of the underlying mortgage loans, Banc of America reprinted Option One's "Underwriting Guidelines," which stated that (a) Option One's guidelines were "intended to assess the value of the mortgaged property, to evaluate the adequacy of such property as collateral for the mortgage loan and to assess the applicant's ability to repay the mortgage loan"; (b) the "Mortgage Loans [were] originated generally in accordance with Option One's [Underwriting] Guidelines"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See*, ¶ 213. Banc of America made similar statements of material facts for mortgage loans originated by other mortgage originators, including Accredited and GMAC Mortgage. *See* Section V.

460. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Banc of America stated, for example that Option One's guidelines required that "[a]ll appraisals are required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are generally on forms acceptable to Fannie Mae and Freddie Mac," and that Option One commissioned an appraisal of mortgaged properties by "qualified independent appraisers" and "require[d] that mortgage loans be underwritten in a standardized procedure which complies with applicable federal and state laws and regulations

and require Option One's underwriters to be satisfied that the value of the property being financed, as indicated by an appraisal, supports the loan balance." *See* ¶ 213. Banc of America made similar statements of material facts for appraisals commissioned, performed, or reviewed by other mortgage originators, including Accredited and GMAC Mortgage. *See* Section V.

461. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Banc of America made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to the mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

462. Banc of America also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in calls and meetings, some of which took place in Plaintiff's Massachusetts offices. Some of Plaintiff's meetings with Banc of America representatives occurred on or about September 15, 2004; April 4, June 2, November 28, November 29, and December 5, 2005; January 2, January 31, May 23, and October 10, 2006; and January 4, 2007. During these meetings, Banc of America's employees made statements of material facts regarding Banc of America's upcoming RMBS deals, and assured Plaintiff that Banc of America conducted its own due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

463. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. As detailed above, Option One, the principal Mortgage Originator in the Banc of America deals, systematically violated its stated underwriting and appraisal standards. Moreover, Banc of America's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

464. The statements of material facts in the documents Banc of America sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, a subsequent lawsuit brought by the Attorney General for the Commonwealth of Massachusetts against Option One, and its past and present parent companies, alleged that Option One "increasingly disregard[ed] underwriting standards, creat[ed] incentives for loan officers and brokers to disregard the interests of the borrowers and steer them into high-cost loans, and originated thousands of loans that [Option One] knew or should have known the borrowers would be unable to pay, all in an effort to increase loan origination volume so as to profit from the practice of packaging and selling the vast majority of [Option One's] residential subprime loans to the secondary market." The other Mortgage Originators of loans underlying the Banc of America Securities, including Accredited and GMAC Mortgage, similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production.

465. The statements of material facts in the documents Banc of America sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57.

466. Banc of America's statements of material facts were also untrue because other material data provided to Plaintiff by Banc of America was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

467. As a result of Banc of America's untrue statements of material facts and omissions, the Securities that Banc of America offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 42% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or

repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Banc of America to Plaintiff.

o. **GMAC's Untrue Statements of Material Facts and Omissions**

468. GMAC offered or sold Securities to Plaintiff in Massachusetts in 2005 and 2006 for a total price of $11,350,513. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix O.

469. GMAC sought to expand its share of the RMBS market by aggressively pursuing subprime mortgage originators, offering to pay more for their mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors.

470. To facilitate the sale of RMBS, GMAC formed SPVs, including Depositor Defendants Residential Asset Securities Corporation ("RASC"), Residential Accredit Loans, Inc., and Residential Asset Mortgage Products Inc. ("RAMP"), which served as the depositors and issuers for many of GMAC's offerings. GMAC offered or sold the Securities to Plaintiff. GMAC also provided financial research on RMBS and related structured products.

471. In connection with its offer or sale of Securities to Plaintiff, GMAC sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. GMAC also sent Plaintiff numerous other documents, including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and "loan tapes." The loan tapes GMAC sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the data, the mortgage originators' underwriting practices and guidelines for the mortgages supporting the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. GMAC also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities,

the data, and GMAC's due diligence of the Mortgage Originators' underwriting practices. GMAC did not allow Plaintiff to keep the pitch books.

472. In the Offering Documents, GMAC made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in an offering for which Equifirst originated all of the underlying mortgage loans, GMAC stated, in sum or substance, that (a) Equifirst's guidelines were intended to assess the borrower's ability and willingness to repay the debt; (b) the mortgage loans underwritten in accordance with Equifirst's underwriting standards; and (c) exceptions to these standards would only be made on a case-by-case basis based on compensating factors.

473. Moreover, the Offering Documents made statements of material facts regarding the relevant Mortgage Originators' compliance with their appraisal guidelines.

474. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," GMAC made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

475. GMAC also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in a meeting at Plaintiff's offices in Massachusetts on or about August 17, 2005. Among other things, GMAC stated that it performed due diligence on 100% of the loans it purchased from Equifirst for the RAMP 05-EFC4 securitization.

476. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. The Mortgage Originators in the GMAC deals systematically violated their stated underwriting and appraisal standards. Moreover, GMAC's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

477. The statements of material facts in the documents GMAC sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines.

478. The statements of material facts in the documents GMAC sent to Plaintiff were also untrue because of the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue.

479. GMAC's statements of material facts were also untrue because other material data provided to Plaintiff by GMAC was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

480. As a result of GMAC's untrue statements of material facts and omissions, the Securities that GMAC offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 40% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by GMAC to Plaintiff.

p. Barclays' Untrue Statements of Material Facts and Omissions

481. Barclays offered or sold Securities to Plaintiff in Massachusetts in 2005, 2006 and 2007 for a total price of $141,298,323. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, and the amounts invested is contained in the attached Appendix P.

482. Barclays sought to expand its share of the RMBS market by aggressively pursuing subprime Mortgage Originators including Fremont, WMC, Decision One, Option One, and Encore, offering to pay more for their mortgages than competing Wall Street Banks, and offering

to perform less due diligence than competitors. Fremont was one of the largest Mortgage Originators of loans underlying the Barclays Securities. In an effort to expand its subprime origination, servicing, and securitization business in the United States, Barclays acquired two large U.S.-based mortgage companies: HomEq Servicing Corporation in June 2006, and EquiFirst Corporation in 2007.

483. To facilitate the sale of RMBS, Barclays' parent company formed SPVs, including Depositor Defendant Securitized Asset Backed Receivables LLC ("SABR"), which served as the depositor and issuer for many of Barclays' offerings. Barclays offered or sold the Securities to Plaintiff. Barclays also provided financial research on RMBS and related structured products.

484. In connection with its offer or sale of Securities to Plaintiff, Barclays sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Barclays also sent Plaintiff numerous other documents, including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and "loan tapes." The loan tapes Barclays sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the data, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Barclays also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Barclays' due diligence of the Mortgage Originators' underwriting practices. Barclays did not allow Plaintiff to keep the pitch books.

485. In the Offering Documents, Barclays made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Fremont originated all or a significant amount of the underlying mortgage loans, Barclays reprinted Fremont's "Underwriting Guidelines," which stated, in sum or substance, that (a) Fremont's guidelines were "intended to

assess the borrower's ability and willingness of the borrower to repay the debt"; (b) the "mortgage loans [were] underwritten in accordance with Fremont's current underwriting programs"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . based on compensating factors." *See*, ¶ 161. Barclays made similar statements of material facts for Mortgage Loans originated by other Mortgage Originators, including WMC. *See* ¶ 185.

486. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Barclays stated, for example, that "underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal" and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers." *See* ¶ 161. Barclays made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including WMC. *See* ¶ 185.

487. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Barclays made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

488. Barclays also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Barclays occurred on or about July 13 and October 27, 2004; January 19, 2005; and March 14 and November 6, 2006. During these meetings, Barclays representatives made statements of material facts regarding Barclays' upcoming RMBS deals, and assured Plaintiff that Barclay conducted its own due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance. For example, Plaintiff met with Barclays at the ABS East industry

conference during November 2006. At this meeting, Barclays stated that Barclays employees were on-site with the largest Mortgage Originators, "QCing" (*i.e.*, quality controlling) the underwriting and pool construction process, and that every exception to the Mortgage Originators' underwriting standards was supposed to be QC'ed by a Barclays employee.

489. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. As detailed below, Fremont, the principal Mortgage Originator in the Barclays deals, systematically violated its stated underwriting and appraisal standards. Moreover, Barclays' additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

490. The statements of material facts in the documents Barclays sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, subsequent investigations and lawsuits have demonstrated that Fremont made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for a loan; Fremont management encouraged risky loan originations; and Fremont was "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]." *See* ¶¶ 165-182. Moreover, former Fremont employees witnessed firsthand how exceptions to Fremont's underwriting became the "norm" because employees had to do what was necessary to increase loan originations. *Id.* The FDIC ultimately issued a Cease & Desist Order to Fremont for extending subprime credit "in an unsafe and unsound manner" and committing violations of laws and FDIC regulations. *See* ¶¶ 165-166. The other Mortgage Originators of loans underlying the Barclays Securities, including WMC, similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

491. The statements of material facts in the documents Barclays sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated

appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57.

492. Barclays' statements of material facts were also untrue because other material data provided to Plaintiff by Barclays was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

493. As a result of Barclay's untrue statements of material facts and omissions, the Securities that Barclays offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of June 25, 2010, over 52% of the mortgage loans underlying the Securities are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities offered or sold by Barclays to Plaintiff.

q. The Depositor Defendants' Untrue Statements of Material Facts and Omissions

494. For their securitization businesses, financial institutions created SPVs, wholly-owned subsidiaries, to serve as depositors that purchased or acquired the loans for securitization and sale to investors. The limited corporate purpose of depositors was to package and sell loans for the benefit of their parent banks. Revenues from the depositors' securitization activities were passed up to the parent banks.

495. Each of the Depositor Defendants served as a "depositor" for the sale of the Securities. The Depositor Defendants, as "issuers" under Regulation AB (17 CFR § 230.191), were sellers of the Securities and made false statements of material facts in the Offering Documents.

496. Prior to issuing the Securities, the Depositor Defendants prepared and filed with the SEC on Form S-3 registration statements under the Securities Act of 1933, 15 U.S.C § 77k, indicating their intention to sell the Securities. The Depositors then issued the Securities pursuant to the registration statements, accompanying prospectuses, and subsequent prospectus

supplements, or private placement memoranda. The Depositor Defendants and the Wall Street Banks drafted the prospectus supplements or private placement memoranda and circulated these documents to investors, including Plaintiff. The Depositor Defendants filed the prospectus supplements with the SEC.

497. As alleged above, the prospectus supplements or private placement memoranda purported to describe the mortgage pools underlying the Securities that the Depositor Defendants offered and sold, making statements about the loan origination process, the quality of the loans, and the adequacy of the collateral. Each prospectus supplement or private placement memorandum included tables with data concerning the loans underlying the Securities, including (but not limited to) the type of loans, the number of loans, the mortgage rate and net mortgage rate, the aggregate scheduled principal balance of the loans, the purported weighted average of original combined LTV ratios, the occupancy status of the mortgaged properties, and the geographic concentration of the properties.

498. The prospectus supplements or private placement memoranda contained the untrue statements of material facts set forth above in Section VI concerning the Securities, including untrue statements regarding: (1) the Mortgage Originators' underwriting guidelines that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal guidelines that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; and (4) various forms of credit enhancement applicable to certain tranches of Securities.

499. As detailed above, these statements of material facts concerning the Securities were untrue because: (1) the Mortgage Originators violated their stated underwriting guidelines and did not consistently evaluate the borrowers' ability to repay the loans; (2) inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be inaccurate; and (3) the stated numbers of riskier "second home" and "investment property" mortgagees were lower than the

actual numbers, and the stated numbers of less risky "owner occupied" mortgage loans were higher than the actual numbers. In addition, metrics such as debt-to-income ratios were untrue as a result of the Mortgage Originators' acceptance of untrue information from mortgage applicants.

VII. THE PERFORMANCE AND VALUE OF THE SECURITIES

500. The rates of delinquency, foreclosure, and real estate owned (*i.e.*, foreclosed and not yet sold) on the Securities' underlying mortgages have soared since issuance. As reflected in the charts below (in which all figures are expressed as percentages), as of May 2010, the percentage of those underlying loans that are currently either 60 days or more delinquent, in foreclosure, or real estate owned exceeds 38%, on average, for the Securities offered or sold to Plaintiff by each Wall Street Bank Defendant. These data provide a snapshot of the pools as currently constituted and do not include loans that have been liquidated out of the original pools. The pools and the related Securities suffered significant additional losses as a result of the liquidation of defaulted loans that are not included in the tables below.

VIII. COUNT I AGAINST THE WALL STREET BANK DEFENDANTS: VIOLATION OF MASSACHUSETTS UNIFORM SECURITIES ACT, MASS. GEN. LAWS CH. 110A § 410(A)(2)

517. Plaintiff realleges and incorporates by reference the allegations contained in paragraphs 1 through 516.

518. Each of the Securities was offered or sold to the Plaintiff in Massachusetts and purchased directly or for the benefit of the Clients. Each Wall Street Bank Defendant offered or sold Securities to Plaintiff in Massachusetts.

519. Massachusetts General Laws Chapter 110A, § 101 provides that "it is unlawful for any person, in connection with the offer, sale or purchase of any security, directly or indirectly (1) to employ any device, scheme or artifice to defraud, (2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made not misleading, or (3) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person."

520. Massachusetts General Laws Chapter 110A, § 410(a)(2) provides for civil liability in the event of any offer or sale of securities by means of an untrue statement or material omission.

521. Each Wall Street Bank Defendant made an untrue statement of a material fact or omitted to state a material fact necessary in order to make the statements made not misleading, in connection with the offer or sale of the Securities to Plaintiff.

522. In connection with the offer or sale of the Securities to Plaintiff, each Wall Street Bank Defendant violated § 410(a)(2) by making an untrue statement of a material fact or omitting to state a material fact necessary in order to make the statements made not misleading, concerning, *inter alia*, (1) the Mortgage Originators' underwriting standards that were

purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Bank Defendants' due diligence of the loans and the Mortgage Originators' underwriting practices; and (5) various forms of credit enhancement applicable to certain tranches of Securities. Plaintiff made the decision to purchase the Securities on behalf of the Clients not knowing of the Defendants' untruths or omissions.

523. The Wall Street Bank Defendants' actions and conduct violated Massachusetts General Laws Ch. 110A.

524. Plaintiff has been damaged by the Wall Street Bank Defendants' violations of the Massachusetts Securities Act.

IX. COUNT II AGAINST THE DEPOSITOR DEFENDANTS: VIOLATION OF MASSACHUSETTS UNIFORM SECURITIES ACT, MASS. GEN. LAWS CH. 110A § 410(A)(2)

525. Plaintiff realleges and incorporates by reference the allegations contained in paragraphs 1 through 524.

526. Each of the Securities was offered or sold to the Plaintiff in Massachusetts and purchased directly or for the benefit of the Clients. Each Depositor Defendant offered or sold Securities to Plaintiff in Massachusetts.

527. Massachusetts General Laws Chapter 110A, § 101 provides that "it is unlawful for any person, in connection with the offer, sale or purchase of any security, directly or indirectly (1) to employ any device, scheme or artifice to defraud, (2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made not misleading, or (3) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person."

528. Massachusetts General Laws Chapter 110A, § 410(a)(2) provides for civil liability in the event of any offer or sale of securities by means of an untrue statement or material omission.

529. Each Depositor Defendant made an untrue statement of a material fact or omitted to state a material fact necessary in order to make the statements made not misleading, in connection with the offer or sale of the Securities to Plaintiff.

530. In connection with the offer or sale of the Securities to Plaintiff, each Depositor Defendant violated § 410(a)(2) by making an untrue statement of a material fact or omitting to state a material fact necessary in order to make the statements made not misleading, concerning, *inter alia*, (1) the Mortgage Originators' underwriting standards that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Bank Defendants' due diligence of the loans and the Mortgage Originators' underwriting practices; and (5) various forms of credit enhancement applicable to certain tranches of Securities. Plaintiff made the decision to purchase the Securities on behalf of the Clients not knowing of the Defendants' untruths or omissions.

531. The Depositor Defendants' actions and conduct violated Massachusetts General Laws Ch. 110A.

532. Plaintiff has been damaged by the Depositor Defendants' violations of the Massachusetts Securities Act.

X. COUNT III AGAINST THE WALL STREET BANK DEFENDANTS: VIOLATION OF MASSACHUSETTS UNIFORM SECURITIES ACT, MASS. GEN. LAWS CH. 110A § 410(B)

533. Plaintiff realleges and incorporates by reference the allegations contained in paragraphs 1 through 532.

534. Each of the Securities was offered or sold to the Plaintiff in Massachusetts and purchased directly or for the benefit of the Clients. Each Wall Street Bank Defendant offered or sold Securities to Plaintiff in Massachusetts.

535. Massachusetts General Laws Chapter 110A, § 101 provides that "it is unlawful for any person, in connection with the offer, sale or purchase of any security, directly or indirectly (1) to employ any device, scheme or artifice to defraud, (2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made not misleading, or (3) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person."

536. Massachusetts General Laws Chapter 110A, § 410(b) provides that "every broker-dealer or agent who materially aids in the sale [of securities by a seller liable under subsection (a) is] also liable jointly and severally with and to the same extent as the seller . . . ."

537. Each Wall Street Bank Defendant materially aided in the offer or sale of Securities to Plaintiff pursuant to an untrue statement of a material fact or omission to state a material fact necessary in order to make the statements made not misleading, in connection with the offer or sale of the Securities to Plaintiff.

538. In connection with the offer or sale of the Securities to Plaintiff, each Wall Street Bank Defendant violated § 410(b) by materially aiding the offer or sale of Securities pursuant to an untrue statement of a material fact or omitting to state a material fact necessary in order to make the statements made not misleading, concerning, *inter alia*, (1) the Mortgage Originators' underwriting standards that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Bank Defendants' due diligence of the loans and the Mortgage Originators' underwriting practices; and (5) various forms of credit enhancement applicable to

certain tranches of Securities. Plaintiff made the decision to purchase the Securities on behalf of the Clients not knowing of the Defendants' untruths or omissions.

539. The Wall Street Bank Defendants' actions and conduct violated Massachusetts General Laws Ch. 110A.

540. Plaintiff has been damaged by the Wall Street Bank Defendants' violations of the Massachusetts Securities Act.

XI. RELIEF REQUESTED

WHEREFORE, Plaintiff requests entry of final judgment, as expressly provided by Mass. Gen. Laws Ch. 110A, § 410, as follows: (i) recovery of the consideration paid for the Securities, together with statutory interest from the date of payment, costs, and reasonable attorneys' fees, less the amount of any income received on the Securities, upon the tender of the Securities, or (ii) damages in the amount that would be recoverable upon a tender of the Securities less the value of the Securities when the buyer disposed of them, statutory interest from the date of disposition, costs, and reasonable attorneys' fees. In addition, Plaintiff requests such other and further relief as the Court deems just and proper.

XII. JURY DEMAND

Plaintiff demands a trial by jury on all claims so triable.

XII. JURY DEMAND.....169

I. NATURE OF THE ACTION

1. Cambridge Place Investment Management Inc. ("Plaintiff") alleges the following for its Complaint for damages and additional relief for the Wall Street Bank Defendants and Depositor Defendants (defined below) violations of the Massachusetts Securities Act arising from their offers to sell and sales of the residential mortgaged-backed securities set forth in Appendix A (the "Securities") and for materially aiding such sales.[1] The Defendants identified below in ¶¶ 15-32 offered or sold approximately $825 million of residential mortgage-backed securities to the investor Plaintiff (as defined in ¶¶ 11-13), by means of untrue statements of material facts and omissions of material fact. As a result of Defendants' untrue statements to Plaintiff in Massachusetts, Plaintiff has incurred losses exceeding $260 million. Defendants' written and oral untrue statements concerned: (1) the mortgage originators' underwriting standards that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the loan-to-value ("LTV") ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Bank Defendants' due diligence of the loans and the mortgage originators' underwriting practices; (5) various forms of credit enhancement applicable to certain tranches of Securities; and (6) whether the issuing trust for each offering had obtained good title to the mortgage loans comprising the pool for the offering.

---

[1] In a separate complaint, Plaintiff asserts additional and related claims for Defendants' offers to sell and sales of additional securities. *See Cambridge Place Investment Management Inc. v. Morgan Stanley & Co., Inc.*, No. 10-2741 (Mass. Super. Ct. Suffolk Cty filed July 9, 2010). Certain of the Defendants removed that action to the United States District Court for the District of Massachusetts, and Plaintiff moved to remand. On December 28, 2010, Chief Magistrate Judge Judith Dein issued a Report and Recommendation recommending that Plaintiff's motion to remand be granted. On January 18, 2011, Defendants filed an objection to the Chief Magistrate Judge's Report and Recommendation, and Plaintiff replied to Defendants' objection on February 1, 2011. As of the date of this Complaint, Defendants' objection is *sub judice*.

2. Defendants statements of material facts were not true. In reality, each of the Defendants offered to sell and sold Securities backed by mortgages that came from a small group of now notorious subprime mortgage originators that violated their own underwriting standards, used faulty appraisals that overvalued the mortgaged properties, and accepted untrue information in loan applications.

3. The Wall Street Bank Defendants were complicit in creating an environment of improper lending practices by the mortgage originators; indeed, in many instances the Wall Street Banks had personnel on site at the mortgage originators to monitor their loan underwriting practices. The Wall Street Bank Defendants also fostered the environment for, permitted, and profited from the mortgage originators rampant violations of sound lending practices. Driven to profit from the lucrative securitization business, the Wall Street Bank Defendants demanded enormous volumes of loans to securitize and sell to investors in the form of residential mortgage backed securities (RMBS), leading to erosion in lending standards.

4. As a result of the relationships between mortgage originators and the Wall Street Bank Defendants, the Wall Street Banks had superior access to material adverse information about the business and lending practices of the mortgage originators and data about the loans, such as loan attributes, beyond what was conveyed to investors in the offering documents for the RMBS. Nevertheless, the Wall Street Bank Defendants repeated the untrue information from the mortgage originators in the offering documents used to sell the RMBS to investors.

5. While the Wall Street Banks stated to Plaintiff that they performed careful due diligence into the loans and the mortgage originators underwriting practices, the Wall Street Banks conducted inadequate due diligence, ignored material adverse due diligence findings, and failed to satisfy their own responsibilities to investors. Thus, the statements of material facts that these Wall Street Banks made to Plaintiff in Massachusetts while offering or selling the Securities were untrue and omitted material information.

6. In addition, the Wall Street Banks materially aided the Depositor Defendants, who also offered or sold the Securities to the Plaintiff. The Depositor Defendants are Special Purpose

Vehicles ("SPVs") that were created as part of the securitization process to acquire and securitize the loans for sale to investors. Working together with the Wall Street Banks, the Depositor Defendants drafted the offering documents that contained the untrue statements of material facts and circulated them to investors.

7. The Plaintiff brings this action to recover damages incurred as a result of the Defendants' offer or sale of securities in Massachusetts by means of untrue statements of material facts or omissions of material facts in violation of Mass. Gen. Laws Ch. 110A, § 410 (the "Massachusetts Securities Act").

8. Plaintiff alleges the following upon personal knowledge as to itself and its own acts and upon information and belief as to all other matters. Plaintiff's information and belief are based on the investigation conducted by and through counsel. The investigation included interviews with confidential witnesses; documents filed in connection with investigations and actions brought by the United States Securities and Exchange Commission (the "SEC"), the Attorneys General of Massachusetts, New York, and California, and private litigants; testimony before the Federal Financial Crisis Inquiry Commission; a report of a court-appointed bankruptcy trustee; news reports; interviews published in the financial press; Congressional testimony; and other available information. Some of the facts related to Plaintiff's allegations are known only by the Defendants named herein, or are exclusively within their custody or control. Plaintiff believes that additional evidentiary support for the allegations set forth below will be developed after a reasonable opportunity for discovery.

II. JURISDICTION AND VENUE

9. Jurisdiction is proper because the offer or sale of the Securities by the Defendants occurred in Massachusetts (see Mass. Gen. Laws Ch. 110A, § 414). In addition, Plaintiff's principal place of business is located in the Commonwealth of Massachusetts, and many of the Defendants have offices in Massachusetts. The amount in controversy exceeds $25,000.

10. Venue is proper pursuant to Mass. Gen. Laws Ch. 223, § 1 and Superior Court Administrative Directive No. 09-01 because many of the Defendants have usual places of business in Suffolk County.

III. THE PARTIES

a. Plaintiff

11. Cambridge Place Investment Management Inc. (□CPIM□) is a Delaware corporation with its principal place of business in Concord, Massachusetts.

12. CPIM was responsible for the sourcing, review, analysis, and purchase decisions for U.S. investments for its clients, including Caliber Global Investment Ltd., CAMBER 3 PLC, CAMBER 4 PLC, CAMBER 5 Ltd, CAMBER 7 PLC, CPIM Structured Credit Fund 20 LP, CPIM Structured Credit Fund 500 LP, CPIM Structured Credit Fund 1000 LP, and CPIM Structured Credit Fund 1500 LP (collectively, the □Clients□).

13. CPIM is the exclusive assignee of, and the exclusive attorney-in-fact for and with respect to, all of the Clients□ claims relating to the offer and sale of Securities that are the subject of this Complaint. CPIM, as such exclusive assignee and attorney-in-fact of the Clients, is referred to herein as the □Plaintiff.□

14. Plaintiff was solicited in Massachusetts by investment firms, underwriters, and dealers (the □Wall Street Bank Defendants□) and by the Depositor Defendants (as defined in □31), who offered or sold the Securities to Plaintiff.

b. The Wall Street Bank Defendants

15. **Morgan Stanley & Co., Inc.**: Defendant Morgan Stanley & Co. Incorporated (□Morgan Stanley□) is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 1585 Broadway, New York, New York 10036 and an office located at 1 International Place, Boston, Massachusetts 02110. The Defendant Morgan Stanley is the broker-dealer subsidiary of Morgan Stanley, a Delaware corporation headquartered in New York, New York. Defendant Morgan Stanley offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls

and sending documents to Plaintiff in Massachusetts. Morgan Stanley is licensed to sell securities in Massachusetts. The Securities that Morgan Stanley offered or sold to Plaintiff are listed in Appendix A.

16. **Citigroup Global Markets, Inc.**: Defendant Citigroup Global Markets, Inc. ("Citigroup") is a New York corporation and an SEC-registered broker-dealer with its principal place of business located at 388 Greenwich Street, New York, New York. Citigroup representatives from Citigroup's office located at 2 International Place, Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Citigroup is licensed to sell securities in Massachusetts. The Securities that Citigroup offered or sold to Plaintiff are listed in Appendix A.

17. **Credit Suisse Securities (USA) LLC**: Defendant Credit Suisse Securities (USA) LLC ("Credit Suisse") is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at 11 Madison Avenue, New York, New York. Credit Suisse representatives from Credit Suisse's office located at 1 Federal Street, Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Credit Suisse is licensed to sell securities in Massachusetts. The Securities that Credit Suisse offered or sold to Plaintiff are listed in Appendix A.

18. **RBS Securities, Inc., f/k/a Greenwich Capital Markets, Inc.**: Defendant RBS Securities, Inc., f/k/a Greenwich Capital Markets, Inc. ("Greenwich Capital"), is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 600 Washington Boulevard, Stamford, Connecticut. Greenwich Capital representatives from Greenwich Capital's office located at 28 State Street, Boston, Massachusetts 02109, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Greenwich

Capital is licensed to sell securities in Massachusetts. The Securities that Greenwich Capital offered or sold to Plaintiff are listed in Appendix A.

19. **Deutsche Bank Securities Inc.**: Defendant Deutsche Bank Securities Inc. ("Deutsche Bank") is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 60 Wall Street, New York, New York. Deutsche Bank representatives from Deutsche Bank's office located at 225 Franklin Street, Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Deutsche Bank is licensed to sell securities in Massachusetts. The Securities that Deutsche Bank offered or sold to Plaintiff are listed in Appendix A.

20. **Merrill Lynch, Pierce, Fenner & Smith, Inc.**: Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated ("Merrill Lynch") a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at One Bryant Park, New York, New York. Merrill Lynch is a wholly owned subsidiary of Merrill Lynch & Co., which became a wholly owned subsidiary of Bank of America Corporation on January 1, 2009. Merrill Lynch representatives from Merrill Lynch's office located at 1 Financial Center, Boston, Massachusetts 02111, offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Merrill Lynch is licensed to sell securities in Massachusetts. The Securities that Merrill Lynch offered or sold to Plaintiff are listed in Appendix A.

21. **UBS Securities LLC**: Defendant UBS Securities LLC ("UBS") is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at 677 Washington Boulevard, Stamford, Connecticut 06901 and an office located at 1 International Place, Boston, Massachusetts 02110. UBS offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. UBS is licensed to

sell securities in Massachusetts. The Securities that UBS offered or sold to Plaintiff are listed in Appendix A.

22. **Goldman, Sachs & Co.**: Defendant Goldman, Sachs & Co. ("Goldman Sachs") is a New York partnership and an SEC-registered broker-dealer with its principal place of business located at 200 West Street, New York, NY 10282. Goldman Sachs maintains an office at 125 High Street, Boston, Massachusetts 02110. Goldman Sachs offered or sold the Securities to Plaintiff in at least one face-to-face meeting and by making telephone calls and sending documents to Plaintiff in Massachusetts. Goldman Sachs is licensed to sell securities in Massachusetts. The Securities that Goldman Sachs offered or sold to Plaintiff are listed in Appendix A.

23. **J.P. Morgan Securities Inc.:** Defendant J.P. Morgan Securities Inc. ("J.P. Morgan") is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 383 Madison Avenue, New York, New York 10179. J.P. Morgan is a wholly owned subsidiary of JPMorgan Chase & Co., a financial holding company with its principal place of business located at 270 Park Avenue, New York, New York 10017. J.P. Morgan maintains an office at 2 International Place, Boston, Massachusetts 02110. J.P. Morgan offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. J.P. Morgan is licensed to sell securities in Massachusetts. The Securities that J.P. Morgan offered or sold to Plaintiff are listed in Appendix A.

24. **J.P. Morgan, successor to Bear Stearns:** In addition to Plaintiff's claims based on J.P. Morgan's own offers or sales of Securities to Plaintiff, Plaintiff also brings claims against J.P. Morgan as successor-in-interest to Bear Stearns & Co., Inc. ("Bear Stearns"), which was a Delaware corporation and was an SEC-registered broker-dealer with its principal place of business located at 383 Madison Avenue, New York, New York 10179. On October 1, 2008, J.P. Morgan merged with and into Bear Stearns, with the surviving entity being Defendant J.P. Morgan. Bear Stearns representatives from Bear Stearns' office located at 1 Federal Street,

Boston, Massachusetts 02110, offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Bear Stearns was licensed to sell securities in Massachusetts. The Securities that Bear Stearns offered or sold to Plaintiff are listed in Appendix A.

25. **Countrywide Securities Corporation**: Defendant Countrywide Securities Corporation ("Countrywide") is a California corporation with its principal place of business located at 4500 Park Granada, Calabasas, California. Countrywide was an SEC-registered broker-dealer during the relevant period. Countrywide was a subsidiary of Countrywide Financial Corporation, which merged on July 1, 2008 with a wholly owned subsidiary of Bank of America Corporation, making Countrywide an indirect wholly owned subsidiary of Bank of America. Countrywide offered or sold the Securities to Plaintiff in Massachusetts by making telephone calls and sending documents to Plaintiff in Massachusetts. The Securities that Countrywide offered or sold to Plaintiff are listed in Appendix A.

26. **FBR Capital Markets & Co., f/k/a/ Friedman, Billings, Ramsey & Co., Inc.**: Defendant FBR Capital Markets & Co., formerly known as Friedman, Billings, Ramsey & Co., Inc. ("FBR"), is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 1001 Nineteenth Street North, Arlington, Virginia 22209. FBR maintains an office at 100 Federal Street, Boston, Massachusetts 02110. FBR offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. FBR is licensed to sell securities in Massachusetts. The Securities that FBR offered or sold to Plaintiff are listed in Appendix A.

27. **HSBC Securities (USA), Inc.**: Defendant HSBC Securities (USA), Inc. ("HSBC") is a Delaware corporation and an SEC-registered broker-dealer with its principal place of business located at 452 Fifth Avenue, New York, New York. HSBC offered or sold the Securities to Plaintiff in Massachusetts by making telephone calls and sending documents to

Plaintiff in Massachusetts. HSBC is licensed to sell securities in Massachusetts. The Securities that HSBC offered or sold to Plaintiff are listed in Appendix A.

28. **Banc of America Securities LLC**: Defendant Banc of America Securities LLC (□Banc of America□) is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at One Bryant Park, New York, New York 10036. Banc of America offered or sold the Securities to Plaintiff at face-to-face meetings, including meetings in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Banc of America is licensed to sell securities in Massachusetts. The Securities that Banc of America offered or sold to Plaintiff are listed in Appendix A.

29. **Residential Funding Securities, LLC, d/b/a GMAC RFC Securities**: Defendant Residential Funding Securities, LLC, f/k/a Residential Funding Securities Corporation (□GMAC□), is a Delaware limited liability company and an SEC-registered broker-dealer with its principal place of business located at One Meridan Crossings, Richfield, Minnesota 55423. Representatives of GMAC offered or sold the Securities to Plaintiff in at least one meeting in Massachusetts and by making telephone calls and sending documents to Plaintiff in Massachusetts. The Securities that GMAC offered or sold to Plaintiff are listed in Appendix A.

30. **Barclays Capital Inc.**: Defendant Barclays Capital Inc. (□Barclays□) is a Connecticut corporation and an SEC-registered broker-dealer with its principal place of business located at 745 Seventh Avenue, New York, New York 10019, and an office at 125 High Street, Boston, Massachusetts 02110. Barclays offered or sold the Securities to Plaintiff at face-to-face meetings, including at least one meeting in Massachusetts, and by making telephone calls and sending documents to Plaintiff in Massachusetts. Barclays is licensed to sell securities in Massachusetts. The Securities that Barclays offered or sold to Plaintiff are listed in Appendix A.

c. The Depositor Defendants

31. To securitize and sell mortgage loans to investors, financial institutions created SPVs to serve various roles in the securitization process. □Depositors□purchased or acquired the

mortgage loans, securitized them, and were the "issuers" of the Securities. *See* 17 CFR § 230.191. Working together with the Wall Street Banks, the Depositor Defendants set forth in the table below prepared and circulated the registration statements, accompanying prospectuses, and subsequent prospectus supplements, or private placement memoranda, through which the Depositor Defendants and the Wall Street Bank Defendants offered and sold the Securities and filed the registration statements, prospectuses, and prospectus supplements with the SEC.

	Depositor Defendant, Principal Place of Business (State of Incorporation)	Offerings

32. The Defendants identified in ¶ 31 are collectively referred to herein as the "Depositor Defendants."

IV. FACTUAL BACKGROUND

a. The Mechanics Of Mortgage Securitization

33. Mortgage pass-through securities represent interests in a pool of mortgages; the securities are shares in the pool that are sold to investors. The securities represent an equity interest in the "issuing trust" that holds the pool. The pass-through securities entitle the holder to payments from the pool of mortgage loans. Although the structure and underlying collateral of the mortgages may vary, the basic principle of pass-through securities remains the same: The cash flow from the pool of mortgages is "passed through" to the securities holders when payments are made by the underlying mortgage borrowers.

34. The first step in creating a mortgage pass-through security is the acquisition by a "depositor" of an inventory of loans from a "sponsor" or "seller," which either originates the loans or acquires the loans from other mortgage originators, in exchange for cash. The type of loans in the inventory may vary, including conventional, fixed-rate or adjustable-rate mortgage

loans (or mortgage participations), secured by first liens, junior liens, or a combination of first and junior liens, with various lifetimes to maturity. The depositor then transfers, or deposits, the acquired pool of loans to an "issuing trust."

35. The depositor then securitizes the pool of loans in the issuing trust so that the rights to the cash flows from the inventory can be sold to investors. The securitization transactions are structured such that the risk of loss is divided among different levels of investment, or "tranches." Tranches consist of multiple series of related RMBS offered as part of the same offering, each with a different level of risk and reward. Any losses on the underlying loans - whether due to default, delinquency, or otherwise - are generally applied in reverse order of seniority. As such, the most senior tranches of pass-through securities are rated as the best quality, or "AAA/Aaa." Junior tranches, which usually obtained lower ratings, ranging from "AA/Aa" to "BB/Bb," are less insulated from risk, but offer greater potential returns.

36. Once the tranches are established, the issuing trust passes the securities back to the depositor, who becomes the issuer of those securities, like the Depositor Defendants herein. The depositor then passes the securities to one or more Wall Street banks, who offer and sell the securities to investors in exchange for cash that is passed back to the depositor, minus any fees owed to the Wall Street banks.

37. Wall Street banks play a critical role in the securitization process. They underwrite the sale of the securities, that is, they purchase the securities from the issuing trust through a depositor and then sell them to investors. Importantly, the Wall Street banks provide the information that potential investors use to decide whether to purchase the securities.

38. Because the cash flow from the loans in the collateral pool of a securitization is the source of funds to pay the holders of the securities issued by the trust, the credit quality of the securities depends upon the credit quality of the loans in the collateral pool. The most important information about the credit quality of the loans is contained in the "loan files" that the mortgage originator develops while making the loans. For residential mortgage loans, each loan file normally contains documents including the borrower's application for the loan; verification of

the borrower's income, assets, and employment; references; credit reports on the borrower; an appraisal of the property that will secure the loan and provide the basis for important measures of credit quality, such as loan-to-value ratios; and a statement of the occupancy status of the property.

39. The collateral pool of loans for each securitization usually includes thousands of loans. Instead of each potential investor reviewing thousands of loan files, the Wall Street banks that underwrite the sale of the securities in a securitization are responsible for gathering, verifying, and presenting to potential investors accurate and complete information about the credit quality and characteristics of the loans that are deposited into the trust.

b. Securitization Of Mortgage Loans: The Traditional Model

40. In the 1980s and 1990s, mortgage originators and Wall Street banks fulfilled their respective obligations to comply with underwriting standards and provide accurate information to investors. The mortgage securitization business, therefore, functioned well, to the benefit of home buyers, financial institutions, and investors. For the securitization model to work properly, the mortgage originators and the Wall Street banks must perform their roles properly. In particular, it is necessary for the mortgage originators to underwrite loans and appraise properties in accordance with their stated standards and to assure accurate information is obtained from loan applicants. Likewise, it is necessary for the Wall Street banks to perform adequate due diligence into the loan pools and to provide accurate information to investors.

41. In the traditional mortgage model, a mortgage originator originated loans to borrowers, held the loans to maturity, and therefore retained the credit (default) risk. As such, under the traditional model, the mortgage originator had a financial incentive to ensure that (1) the borrowers had the financial ability to repay the loans, and (2) the underlying properties had sufficient value to enable the mortgage originator to recover its principal and interest if the borrowers defaulted on the loans.

42. Traditionally, mortgage originators financed their mortgage business primarily using funds from depositors, retained ownership of the mortgage loans they originated, and

received a direct benefit from the income flowing from the mortgages. When a mortgage originator held a mortgage through the term of the loan, the mortgage originator received revenue from the borrower's payment of interest and fees. The mortgage originator also bore the risk of loss if the borrower defaulted and the value of the collateral was not sufficient to repay the loan. As a result, the mortgage originator had an economic incentive to verify the borrower's creditworthiness through prudent underwriting and to obtain an accurate appraisal of the value of the underlying property before issuing the mortgage loan.

43. With the advent of securitization, the traditional "originate to hold" model gave way to the "originate to distribute" model, in which mortgage originators sell the mortgages and transfer credit risk to investors through the issuance and sale of RMBS. Through securitization, mortgage originators no longer hold the mortgage loans to maturity. By selling the mortgages to investors through Wall Street banks, the mortgage originators obtain funds, enabling them to make more loans. Securitization also enables mortgage originators to earn most of their income from transaction and loan-servicing fees, rather than from the spread between interest rates paid on deposits and interest rates received on mortgage loans as in the traditional model. Thus, securitization gives the mortgage originators an incentive to increase the number of mortgages they issue and reduces their incentive to ensure the mortgages' credit quality. However, the contractual terms of the securitization transactions and good business practices obligate mortgage originators to underwrite loans in accordance with their stated policies and to obtain accurate appraisals of the mortgaged properties.

44. During the 1980s and 1990s, the mortgage securitization business grew rapidly, making it possible for mortgage originators to make more loans than would have been possible using only the traditional primary source of funds from deposits. During that period, mortgage originators made loans in accordance with their stated underwriting and appraisal standards and provided accurate information about the loans, borrowers, and mortgaged properties to the Wall Street banks that securitized the loans. In turn, the Wall Street banks provided accurate information about the loans, borrowers, and properties to investors in the RMBS. In the 1980s

and 1990s, most mortgage securitizations were conducted through the major Government Sponsored Enterprises (the "Agencies"), *i.e.*, the Federal National Mortgage Association ("Fannie Mae"), the Federal Home Loan Mortgage Corporation ("Freddie Mac"), and the Government National Mortgage Association ("Ginnie Mae"). The Agencies purchased loans from mortgage originators and securitized the loans. These Agency securitizations had high credit quality because the Agencies required the underlying loans to be originated in accordance with strict underwriting guidelines. Most non-Agency mortgage securitizations during this period also complied with the Agencies' underwriting standards.

c. The Systemic Violation Of Underwriting And Appraisal Standards In The Mortgage Securitization Industry

45. The securitization of mortgage loans fundamentally shifts the risk of loss from the mortgage originator to the investors who purchase RMBS. As discussed in Section IV.b above, traditionally, the mortgage originator had an economic incentive to verify mortgage borrowers' creditworthiness and obtain accurate appraisals of the value of the underlying properties before issuing mortgage loans because the mortgage originator held the loans to maturity. In securitizations where the mortgage originator instead sells the loans to Wall Street banks, the mortgage originator does not have the same economic interest in verifying borrowers' creditworthiness or obtaining accurate appraisals in the loan origination process. Nevertheless, the mortgage securitization process worked well during the 1980s and 1990s because both mortgage originators and Wall Street banks played by the rules and complied with their obligations to underwrite loans responsibly and provide accurate information to investors in RMBS.

46. Mortgage originators began systematically to violate their stated underwriting and appraisal standards, made loans with little or no documentation, and accepted untrue information from loan applicants. The mortgage originators also began to provide untrue information about their underwriting practices and about the borrowers, loans, appraisals, and mortgaged properties in connection with the securitization of the loans. As a result of this pervasive breakdown of

compliance with proper practices among the mortgage originators, the Wall Street Banks that securitized mortgages provided Plaintiff with untrue information about the mortgage originators' practices and about the underlying mortgage borrowers, loans, and properties. The Wall Street Banks also provided Plaintiff with untrue information about their own due diligence of the mortgage originators and underlying loans.

47. To fund their loans, the mortgage originators maintained credit facilities with warehouse lenders, including the Wall Street Banks. The Wall Street Banks loaned money to the mortgage originators pursuant to "warehouse agreements," so that the mortgage originators could continue to make loans to home buyers. The mortgage originators borrowed from these credit facilities to fund their loans, until the loans were sold and the warehouse agreement was repaid. When loans serving as collateral lost value, the Wall Street Banks made margin calls requiring the mortgage originators to pay cash back to the Wall Street Banks. As a result of the warehouse arrangements between the mortgage originators and the Wall Street Banks, the Wall Street Banks had superior access to information about the mortgage originators' business and lending practices and the mortgage loans' characteristics and performance, including early warning signs of poor credit quality in loans before the loans were securitized.

48. Fannie Mae and Freddie Mac provided investors in Agency-sponsored RMBS with protection by guaranteeing that the investors would receive timely payments of principal and interest. If the borrower for one of the underlying mortgages failed to make scheduled principal or interest payments, the Agency that issued the RMBS would make the payments to the trust. Because the Agencies were perceived to be backed by the federal government, investors viewed their guarantees as essentially removing the credit risk from Agency-sponsored RMBS.

49. Between 2001 and 2006, non-Agency loan originations and securitizations increased dramatically, while Agency loan originations and securitizations decreased moderately, as summarized in the following table:

	2001	**2006**
Agency loan originations	$1.433 trillion	$1.040 trillion
Agency securitizations	$1.087 trillion	$904 billion
Non-Agency loan originations	$680 billion	$1.480 trillion
Non-Agency securitizations	$240 billion (including $87.1 billion of subprime securitizations)	$1.033 trillion (including $448 billion of subprime securitizations)

Source: *Inside Mortgage Finance* (2007).

50. Thus, from 2001 to 2006, non-Agency loan originations grew by approximately 115%; non-Agency securitizations grew by approximately 330%; and non-Agency securitizations of subprime loans grew by approximately 415%. According to *Inside Mortgage Finance* (2009), non-Agency RMBS more than trebled in market share between 2003 and 2007, peaking at about 38% of the market in 2006, from 6% in 2003. Another measure of the dramatic growth of the non-Agency RMBS market is that "[t]he amount of all outstanding mortgages held in non-[Agency] MBS rose notably from only $670 billion in 2004 to over $2,000 billion in 2006." Financial Crisis Inquiry Commission ("FCIC"), "Preliminary Staff Report: Securitization and the Mortgage Crisis," April 7, 2010.

51. Starting in or about 2005, the growth in non-Agency mortgage securitizations was accompanied by widespread violation by the mortgage originators of their stated underwriting and appraisal standards. According to Ben S. Bernanke, Chairman of the Federal Reserve Board, in a March 2008 speech, "[t]he deterioration in underwriting standards that appears to have begun in late 2005 is another important factor underlying the current crisis. A large share of subprime loans that were originated during this time feature high combined loan-to-value ratios and, in some cases, layers of additional risk factors, such as a lack of full documentation or the acceptance of very high debt-to-income ratios." The loan-to-value ("LTV") ratio is a significant measure of credit risk, because both the likelihood of default and the severity of loss are higher when borrowers have less equity to protect in the event of foreclosure. The debt-to-income ratio

is also a significant measure of credit risk, because borrowers who incur debt that is relatively high compared to their income are more likely to default on their loans. In its March 2008 Policy Statement on Financial Market Developments, the President's Working Group on Financial Markets concluded that "[t]he turmoil in financial markets clearly was triggered by a *dramatic weakening of underwriting standards for U.S. subprime mortgages, beginning* in late 2004 and extending into early 2007." (Emphasis in original.) As U.S. housing prices subsequently declined, the delinquency rates for such mortgages soared.

52. An important aspect of the mortgage originators' violation of their stated underwriting standards was their reliance on faulty appraisals. According to the April 7, 2010 FCIC testimony of Richard Bitner, a former executive of a subprime mortgage originator for 15 years and the author of the book *Confessions of a Subprime Lender*, "the appraisal process [was] highly susceptible to manipulation, lenders had to conduct business as though the broker and appraiser couldn't be trusted, [and] either the majority of appraisers were incompetent or they were influenced by brokers to increase the value." He continued:

> To put things in perspective, during my company's history, half of all the loans we underwrote were overvalued by as much 10%. This meant one out of two appraisals were still within an acceptable tolerance for our end investors. Our experience showed that 10% was the most an appraisal could be overvalued and still be purchased by these investors. Another quarter that we reviewed were overvalued by 11-20%. These loans were either declined or we reduced the property value to an acceptable tolerance level. The remaining 25% of appraisals that we initially underwrote were so overvalued they defied all logic. ***Throwing a dart at a board while blindfolded would've produced more accurate results.***[2]

53. Mr. Bitner testified about the implications of inflated appraisals:

> If multiple properties in an area are overvalued by 10%, they become comparable sales for future appraisals. The process then repeats itself. We saw it on several occasions. We'd close a loan in January and see the subject property show up as a comparable sale in the same neighborhood six months later. Except this time, the new subject property, which was nearly identical in size and style to the home we financed in January, was being appraised for 10% more. Of course, demand is a key component to driving value, but the defective nature of the appraisal process served as an accelerant. In the end, the subprime industry's willingness to

[2] Throughout this Complaint, emphasis in quotations is added except where otherwise noted.

> consistently accept overvalued appraisals significantly contributed to the run-up in property values experienced throughout the country.
>
> * * *
>
> If the appraisal process had worked correctly, a significant percentage of subprime borrowers would've been denied due to a lack of funds. Inevitably, this would have forced sellers to drop their exorbitant asking prices to more reasonable levels. The rate of property appreciation experienced on a national basis from 1998 to 2006 was not only a function of market demand, but was due, in part, to the subprime industry's acceptance of overvalued appraisals, coupled with a high percentage of credit-challenged borrowers who financed with no money down.
>
> Mr. Bitner testified that the engine behind the increased malfeasance was the Wall Street Banks: "[T]he demand from Wall Street investment banks to feed the securitization machines coupled with an erosion in credit standards led the industry to drive itself off the proverbial cliff."

54. Patricia Lindsay, a wholesale underwriter for 10 years at New Century Financial Corporation, testified before the FCIC on April 7, 2010, about the fraudulent practices of New Century's appraisers:

> The role and practices of appraisers in subprime mortgage origination:
>
> Properly valuing a property . . . is one of the most important components in a loan. In my experience at New Century, fee appraisers hired to go to the properties were often times pressured into coming in "at value", fearing if they didn't, they would lose future business and their livelihoods. They would charge the same fees as usual, but would find properties that would help support the needed value rather than finding the best comparables to come up with the most accurate value. Some appraisers would take boards off boarded up windows, to take the needed photos, then board the properties back up once the shots were taken. Or they would omit certain important elements of a property by angling the camera a certain way or zooming close in to make the property look the best possible. This level of appraiser activism compromises their objectivity.

55. Alan Hummel, Chair of the Appraisal Institute, testified before the Senate Committee on Banking that the dynamic between mortgage originators and appraisers created a "terrible conflict of interest" where appraisers "experience[d] systemic problems of coercion" and were "ordered to doctor their reports" or they might be "placed on exclusionary or "do-not-use" lists."

56. A 2007 survey of 1,200 appraisers conducted by October Research Corp., which publishes *Valuation Review*, found that 90% of appraisers reported that mortgage brokers and others pressured them to raise property valuations to enable deals to go through. This figure was nearly double the findings of a similar study conducted just three years earlier. The 2007 study also found that 75% of appraisers reported "negative ramifications" if they did not cooperate, alter their appraisal, and provide a higher valuation." Adding to these problems was the fact that lenders were generally unable to assess the accuracy of the appraisals for loans originated by mortgage brokers, since the lenders were typically located far from the properties and knew little about the properties' neighborhoods.

57. In addition, the mortgage securitization process was undermined by the widespread industry practice of originating types of loans that were inherently risky and extremely susceptible to delinquencies and default, including (1) stated income loans, where both the income and assets of the borrower were taken as stated on the credit application without verification; (2) "NINA" or No Income, No Asset loans, which were made without any disclosure of the borrower's income or assets; and (3) "No Doc" loans, which were made to borrowers who did not disclose their income, assets, or employment history.

d. The Wall Street Banks Conduct Less Due Diligence

58. As the Wall Street Banks that profited from securitizations sought increasing volumes of mortgage loans from mortgage originators, the mortgage originators gained bargaining power over the terms on which they would sell the loans. Mortgage originators demanded that the Wall Street Banks limit quality control reviews (*i.e.*, due diligence) to smaller percentages of loans prior to purchase. Additionally, if a Wall Street Bank chose to "kick out" a large number of loans from a pool – because the loans failed to conform to the mortgage originators' underwriting guidelines or did not contain adequate documentation – the Wall Street Bank risked being excluded from future loan purchases. As a result, the Wall Street Banks performed increasingly cursory due diligence on the mortgage loans they securitized. The sheer volume and pace of the securitization business during this period exacerbated such failures.

59. The Wall Street Banks often acquired large quantities of loans for securitization from "loan auctions." There, mortgage originators provided the Wall Street Banks with Bid Stipulation Sheets ("Bid Sheets") which stated the times and dates of the auctions and described the general characteristics of the loan pools. The Bid Sheets also dictated: (1) the percentage of the pool on which the Wall Street Banks would be permitted to conduct due diligence (*e.g.*, 25%); and (2) the number of loans the Wall Street Banks could "kick-out" due to borrower deficiencies, payment delinquencies, early payment defaults, lack of requisite legal documentation, and similar deficiencies. Prior to bid submission, mortgage originators also sent the Wall Street Banks spreadsheets known as "Loan Tapes" which typically contained 50 to 100 columns of data regarding the loans. The Wall Street Banks were supposed to "crack" the Loan Tapes, analyze them, and determine what prices to bid for the loan pools. Once this "bid package" analysis was complete, the Wall Street Banks submitted their bids.

60. If the mortgage originator accepted a bid, the Wall Street Bank typically had a short period of time prior to the settlement date (when cash was paid to the mortgage originator for the loans) to conduct due diligence on the loans. The Wall Street Banks generally used their own investment bankers to conduct due diligence. Many of the Wall Street Banks also hired third-party due diligence firms such as Clayton Holdings, Inc. ("Clayton") or the Bohan Group ("Bohan") to conduct this review under the supervision of the Wall Street Banks' investment bankers. Clayton's Form 10-K filed March 14, 2008 identified Wall Street Bank Defendants Morgan Stanley and Deutsche Bank among its clients, and a Clayton document made public by the Financial Crisis Inquiry Commission identified those two Wall Street Banks as well as Banc of America, Barclays, Bear Stearns (predecessor-in-interest to Wall Street Bank Defendant J.P. Morgan Securities), Citigroup, Credit Suisse, Goldman Sachs, Greenwich Capital, HSBC, J.P. Morgan Securities, Merrill Lynch, and UBS as Clayton clients. Bohan's clients included Bear Stearns and Wall Street Bank Defendant Merrill Lynch.

61. For each loan pool, Clayton and Bohan reviewed the percentage of loans designated in the Bid Sheet to ensure, *inter alia*, that the loans: (1) conformed to the mortgage

originators underwriting guidelines; (2) contained loan data matching the loan data in the Loan Tape; and (3) contained the appropriate mortgage documents. Upon completion of the review, Clayton and Bohan sent the Wall Street Bank a due diligence report, which it was supposed to use to decide which loans should be kicked out of the pool prior to the settlement date. Wall Street Banks, however, were incentivized to kick-out as few loans as possible because, as explained above, (1) mortgage originators would not invite Wall Street Banks that consistently kicked out large numbers of loans to future auctions; and (2) the securitization became smaller as loans were kicked out, thus decreasing the underwriting fee.

62. As a result, the percentage of loans per pool that Clayton and Bohan were instructed to review declined with time. Frank P. Filipps, Clayton's chairman and CEO, stated that [e]arly in the decade, a securities firm might have asked Clayton to review 25% to 40% of the sub-prime loans in a pool, compared with typically 10% in 2006. Bohan President Mark Hughes stated, [b]y contrast, loan buyers who kept the mortgages as an investment instead of packaging them into securities would have 50% to 100% of the loans examined.

63. In June 2007, New York Attorney General Andrew Cuomo (NYAG) subpoenaed documents from Clayton and Bohan related to their due diligence efforts. The NYAG's investigation focused on whether Wall Street banks failed to adequately disclose the warnings they received regarding the number of loans that failed to meet lending guidelines. Clayton also received an information request from the SEC and information subpoenas from the Massachusetts and Connecticut Attorneys General.

64. On January 12, 2008, in an article entitled Inquiry Focuses on Withholding of Data on Loans, the *New York Times* reported:

> An investigation into the mortgage crisis by New York State prosecutors is now focusing on whether Wall Street banks withheld crucial information about the risks posed by investments linked to subprime loans. Reports commissioned by the banks raised red flags about high-risk loans known as exceptions, which failed to meet even the lax credit standards of subprime mortgage companies and the Wall Street firms. *But the banks did not disclose the details of these reports to credit-rating agencies or investors.* The inquiry, which was opened last summer by New York's attorney general, Andrew M. Cuomo, centers on how the banks

bundled billions of dollars of exception loans and other subprime debt into complex mortgage investments.

65. On January 27, 2008, Clayton revealed that it had entered into an agreement with the NYAG for immunity from civil and criminal prosecution in New York in exchange for providing documents and testimony regarding its due diligence reports. That same day, in an article entitled "Loan Reviewer Aiding Inquiry Into Big Banks," the *New York Times* reported that a person familiar with the NYAG's investigation stated that as demand for loans surged, mortgage originators were in a superior bargaining position and required that Wall Street Banks have Clayton and other consultants review fewer loans. Incredibly, "investment banks directed Clayton *to halve the sample of loans it evaluated in each portfolio*." On March 17, 2008, in an article entitled "Sub-Prime mortgage watchdogs kept on leash; loan checkers say their warnings of risk were met with indifference," the *Los Angeles Times* reported that Clayton and Bohan employees (including eight former loan reviewers who were interviewed for the article) "raised plenty of red flags a*bout flaws [in* subprime home loans] so serious that mortgages should have been rejected outright – such as borrowers' incomes that seemed inflated or documents that looked fake – but the problems were glossed over, ignored or stricken from reports."

66. Testimony by Keith Johnson, Clayton's former President and Chief Op*erating Officer, before the Financial Crisis Inquiry Commis*sion and a Clayton document made p*ublic by the Commis*sion demonstrate that during 2006 and the first half of 2007, only 54% of all mortgage loans reviewed by Clayto*n for its Wall St*reet Bank clients me*t all applicabl*e underwriting guidelines; 18% did not satisfy the applicable underwriting guidelines but had purported compensating factors; and 28% did not satisfy the applicable underwriting guidelines and had no compensating factors. The Wall Street Bank Defendants nevertheless waived the applicable underwriting *guidelines for many of the loans that they knew did not s*atisfy the applicable underwriting guidelines and had no compensating factors, and the Defendants securitized those loans without disclosing to investors that the l*oans violated the* disclosed underwriting guidelines and had no compensating factors. During 2006 and the first half of

2007, Banc of America securitized 27% of the loans Clayton told it violated the applicable underwriting guidelines and had no compensating factors; Barclays securitized 28% of such loans; Bear Stearns securitized 42% of such loans; Credit Suisse securitized 33% of such loans; Citigroup securitized 31% of such loans; Deutsche Bank securitized 50% of such loans; Greenwich Capital securitized 53% of such loans; Goldman Sachs securitized 29% of such loans; HSBC securitized 62% of such loans; J.P. Morgan Securities securitized 51% of such loans; Merrill Lynch securitized 32% of such loans; Morgan Stanley securitized 56% of such loans; and UBS securitized 33% of such loans.

e. Defendants Failed To Ensure That Title To The Underlying Loans Was Effectively Transferred

67. An essential aspect of the mortgage securitization process is that the issuing trust for each RMBS offering must obtain good title to the mortgage loans comprising the pool for that offering. This is necessary in order for the RMBS holders to be legally entitled to receive cash payments from the pass-through of the mortgage borrowers payments of interest and principal, and for the trustee to be legally entitled to enforce the mortgage loans in case of default. Two documents relating to each mortgage loan must be validly transferred to the trust as part of the securitization process a promissory note and a security instrument (either a mortgage or a deed of trust). Without the note, the mortgage loan is unenforceable, and without the security instrument, the note is simply an unsecured debt obligation.

68. The rules for these transfers are governed by the law of the state where the property is located, by the terms of the pooling and servicing agreement (PSA) for each securitization, and by the law governing the issuing trust (with respect to matters of trust law). Generally, state laws and the PSA require the promissory note and security instrument to be transferred by endorsement, in the same way that a check can be transferred by endorsement, or by sale. In addition, state laws generally require that the trustee have physical possession of the original, manually signed note in order for the loan to be enforceable by the trustee against the borrower in case of default.

69. In order to preserve the bankruptcy-remote status of the issuing trusts in RMBS transactions, the notes and security instruments are generally not transferred directly from the mortgage loan originator to the trust. Rather, the notes and security instruments are generally initially transferred from the originator to the depositor, either directly or via one or more special-purpose entities established by the Wall Street Bank Defendant sponsoring the transaction. After this initial transfer to the depositor, the depositor transfers the notes and security interests to the issuing trust for the particular securitization. Each of these transfers must be valid under applicable state law in order for the trust to have good title to the mortgage loans.

70. In addition, the PSA generally requires the transfers of the mortgage loans to the trust to be completed within a strict time limit after formation of the trust in order to ensure that the trust qualifies as a tax-free real estate mortgage investment conduit ("REMIC").

71. The applicable state trust law generally requires strict compliance with the trust documents, including the PSA, so that failure to comply strictly with the timeliness, endorsement, physical delivery, and other requirements of the PSA with respect to the transfers of the notes and security instruments means that the transfers would be void and the trust would not have good title to the mortgage loans.

72. The Offering Documents for each offering of Securities represented in substance that the issuing trust for that offering had obtained good title to the mortgage loans comprising the pool for the offering. In reality, however, as has been established by evidence in actions involving Defendants Countrywide, Banc of America Securities, and Asset Backed Funding Corporation that are summarized below, Defendants routinely failed to comply with the requirements of applicable state laws and the PSAs for valid transfers of the notes and security instruments to the issuing trusts. On information and belief, the Defendants other than Countrywide, Banc of America Securities, and Asset Backed Funding Corporation also routinely failed to comply with these requirements. Indeed, a Countrywide employee testifying in the action involving Countrywide answered "yes" when asked whether noncompliance with these requirements was "standard operating procedure in the mortgage banking business."

73. In *Kemp v. Countrywide Home Loans, Inc.*, Bkrtcy. No. 08-18700 (D.N.J.), Countrywide sought to prove that the Bank of New York, as trustee for an RMBS issuing trust that purportedly held Mr. Kemp's mortgage, was entitled to enforce the mortgage. Countrywide presented testimony by Linda DeMartini, who had been employed by Countrywide for almost ten years as of August 2009 and was then a supervisor and operational team leader for the Litigation Management Department of Countrywide's mortgage loan servicing business. Ms. DeMartini testified that, in her extensive career in the mortgage loan servicing business of Countrywide, "I had to know about everything . . . ." She testified that Countrywide originated Kemp's loan in 2006 and transferred it to the Bank of New York as trustee for the issuing trust, but that Countrywide retained the original note in its own possession and never delivered it to the Bank of New York because Countrywide was the servicer for the loan.

74. Even though DeMartini was presented by Countrywide as a witness in an attempt to prove that the loan documents had been validly transferred to the issuing trust, her testimony actually proved that the loan documents were never validly transferred. She testified that an allonge to the promissory note, which purported to transfer the note to the trust by endorsement, was prepared only in preparation for the litigation in 2009, long after the purported transfer of the note to the trust in 2006, and was never delivered to the trustee. Indeed, she testified that there was not an ordinary business practice of signing an allonge at the time a note was purportedly transferred.

75. DeMartini also testified that the original note was retained by Countrywide and was never delivered to the trustee. Most significantly, she testified on direct examination that not delivering the original note to the trustee was Countrywide's standard practice:

> Q. Ms. DeMartini, is it generally the custom to "for your investor [*i.e.*, the issuing trust] to hold the documents?
>
> A. No. They would stay with us as the servicer.
>
> Q. And are documents ever transferred to the investor?
>
> A. If we service-release them they would be transferred to whomever we're service-releasing them to.

Q. So I believe you testified Countrywide was the originator of this loan?

A. Yes.

Q. So Countrywide had possession of the documents from the outset?

A. Yes.

Q. And subsequently did Countrywide transfer these documents by assignment or an allonge?

A. Yes.

Q. And □

A. Well, transferred the rights, yes, transferred the ownership, not the physical documents.

Q. So the physical documents were retained within the corporate entity Countrywide or Bank of America?

A. Correct.

Q. Okay. And would you say that this is standard operating procedure in the mortgage banking business?

A. Yes. It would be normal □the normal course of business as the reason that we are the servicer, as we□re the ones that are doing all the servicing, and that would include retaining the documents.

76. In response to questioning by the Bankruptcy Judge, DeMartini again testified that □I do know that it is our normal course of action with the loans that we service that we are the ones that retain the □that we retain those documents.□ In response to the Court□s question whether the documents are □ever moved to follow the transfer of ownership,□DeMartini testified that □it is not customary for them to move.□

77. At a subsequent hearing in September 2009, Countrywide□s counsel stated that

> [A]lthough . . . the UCC and the Master Servicing Agreement apparently requires that, procedure seems to indicate that they don□t physically move documents from place to place because of the fear of loss and the trouble involved and the people handling them. They basically execute the necessary documents and retain them as long as servicing□s retained. The documents only leave when servicing is released.

78. Based on the evidence quoted above, Chief Bankruptcy Judge Judith H. Wizmur held in November 2010 that the Bank of New York, as trustee for the issuing trust, could not enforce the mortgage loan for two reasons:

> First, under New Jersey's Uniform Commercial Code ("UCC") provisions, the fact that the owner of the note, the Bank of New York, never had possession of the note, is fatal to its enforcement. Second, upon the sale of the note and mortgage to the Bank of New York, the fact that the note was not properly indorsed to the new owner also defeats the enforceability of the note.

Kemp v. Countrywide Home Loans, Inc., No. 08-18700-JHW, Slip Op., at *10-11 (Bkrtcy. D.N.J. Nov. 16, 2010). Judge Wizmur further held that Countrywide also could not enforce the mortgage loan, because as a loan servicing agent for the owner of the note, Countrywide had no more authority to enforce the note than its principal, the Bank of New York. *Id.* at *21.

79. As DeMartini testified, Countrywide routinely did not transfer the original mortgage loan documents to the issuing trusts for RMBS transactions, but rather retained the original documents itself, and this was standard operating procedure in the mortgage banking business. Thus, Countrywide and, on information and belief, the other Defendants failed to validly transfer the promissory notes and security instruments for many of the mortgage loans underlying the Securities purchased by Plaintiff to the issuing trusts for the Securities.

80. Additional evidence that failure to validly transfer mortgage loans to the issuing trusts for RMBS was common among the Wall Street Bank Defendants and Depositor Defendants comes from *U.S. Bank National Association v. Ibanez*, No. SJC-10694 (Mass. Jan. 7, 2011), in which the Supreme Judicial Court of Massachusetts held that the trustees for two RMBS issuing trusts did not have valid assignments of two mortgages originated by Option One (one of which was securitized by Banc of America Securities and Asset Backed Funding Corporation) at the time the trustees published notices of foreclosure and foreclosed on the homes. The Court therefore held that the foreclosures were invalid and the trustees did not have valid title to the properties. The notes for the loans had been assigned to the trustees, but the related mortgages had only been assigned "in blank" without naming the trustees as the

assignees, and Option One and the trustees later tried to fix the problem by executing post-foreclosure assignments. The Court held that assignments in blank cannot validly convey title to a mortgage; that assignment only of a note does not carry with it assignment of the related mortgage; and that post-foreclosure assignments could not retroactively validate the foreclosures, rejecting the banks argument that the use of postsale assignments was customary in the industry . . . .

81. The Court rebuked the banks for their cavalier attitude towards the legal requirements for proper foreclosures:

> Where . . . mortgage loans are pooled together in a trust and converted into mortgage-backed securities, the underlying promissory notes serve as financial instruments generating a potential income stream for investors, but the mortgages securing these notes are still legal title to someone s home or farm and must be treated as such. . . . The legal principles and requirements we set forth are well established in our case law and our statutes. All that has changed is the [banks] apparent failure to abide by those principles and requirements in the rush to sell mortgage-backed securities.

82. Two judges concurring in the Supreme Judicial Court s unanimous decision in *Ibanez* wr[o]te separately only to underscore that what is surprising about these cases is not the statement of principles articulated by the court regarding title law and the law of foreclosure in Massachusetts, but rather the utter carelessness with which the plaintiff banks documented the titles to their assets.

f. Plaintiff's Acquisition Of The Securities

83. Plaintiff, located in Massachusetts, was responsible for the sourcing, review, analysis, and purchase decisions for the U.S. investments for the Clients, and made the decision in Massachusetts to purchase the Securities on behalf of the Clients. At all relevant times, Plaintiff had numerous employees in Concord, Massachusetts, and Plaintiff continues to have employees in Concord.

84. Plaintiff decided to purchase each Security that was purchased in the initial offering of that Security on behalf of the Clients on the basis of the information contained in the applicable registration statement, prospectus, and prospectus supplements filed with the SEC or

the applicable private placement memorandum (the "Offering Documents"), as identified in Appendix A, and based on additional information provided to Plaintiff by the Wall Street Bank Defendants, as described below. In connection with their offers or sales of the Securities to Plaintiff, the Wall Street Bank Defendants sent to Plaintiff's office in Massachusetts the Offering Documents and additional documents, such as statistical tables to be included in the prospectus supplements. These documents included term sheets, pooling and servicing agreements, data, computational material, data regarding the LTV and debt-to-income ratios of the pools, computer models of the financial structures of the securitizations, tabular sensitivity data, loan tapes, rating agency expected loss levels, emails, sampling data regarding credit/compliance/appraisal and due diligence, "kickout" criteria and data, and collateral characteristics. ("Kickout" refers to the mortgage originator's contractual obligation under the terms of the securitization transaction documents to repurchase or replace any mortgage loan that had deficient documentation, an uncured material breach of a representation or warranty, a payment default within a specified time period, or other specified deficiencies.)

85. These documents contained numerous statements of material facts about the Securities, including statements concerning: (1) the mortgage originators' underwriting guidelines that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal guidelines that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt to income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Banks' due diligence of the loans and the mortgage originators' underwriting practices; and (5) various forms of credit enhancement applicable to certain tranches of Securities. For example, one form of credit enhancement is overcollateralization, which means that the total principal balance of the mortgage loans in the pool for a securitization (and therefore presumably the total value of the underlying properties) exceeds the aggregate amount of Securities issued and sold in the securitization. Another example of credit enhancement is

excess interest, which means that the amount of interest collected on the mortgage loans underlying a securitization for each payment period is expected to be higher than the interest distributable on the Securities and fees and expenses payable by the trust for that period; excess interest may be applied both to absorb any interest shortfalls and to pay principal on the Securities to the extent needed to maintain the required level of overcollateralization.

86. These statements of material facts were untrue because: (1) the mortgage originators violated their stated underwriting guidelines and did not consistently evaluate the borrowers ability to repay the loans; (2) inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be untrue; and (3) the actual numbers of riskier second home and investment property mortgagees were higher than the stated numbers. In addition, metrics such as debt-to-income ratios were untrue as a result of the mortgage originators acceptance of untrue information from mortgage applicants. For example, the mortgage originators allowed applicants for stated income loans to provide untrue income information and did not verify the applicants purported income. Stated income loans were therefore widely known among personnel of the mortgage originators as liar loans.

87. Often at meetings regarding initial offerings of Securities, including meetings in Massachusetts, the Wall Street Bank Defendants also showed Plaintiff pitch books and other materials regarding the credit quality of the Securities and the Wall Street Banks due diligence of the mortgage originators underwriting practices. Plaintiff, however, was not allowed to keep the pitch books. These pitch books and other materials contained untrue statements similar to those described above. In addition to the untrue statements and omissions in the documents provided or shown to Plaintiff, the Wall Street Bank Defendants made additional untrue oral statements to Plaintiff during face-to-face meetings and by telephone between 2005 and 2007. The representatives of the Wall Street Bank Defendants who offered or sold the Securities to Plaintiff received compensation based, directly or indirectly, on the volume of Securities they sold to investors, including the Clients on whose behalf Plaintiff purchased Securities.

88. For purchases exclusively in the secondary market, Plaintiff purchased each Security based on the same types of information as described in ¶¶ 84-87. When making secondary market purchases, Plaintiff reviewed and analyzed the documents relating to the initial offering of the Security as described above, particularly the prospectus supplements. Plaintiff also reviewed and analyzed publicly-available data regarding the performance of the mortgage loans included in the pool for the Security (such as delinquencies, prepayments, and defaults) and of the Security (such as payments on the Security and any changes in credit enhancement). Plaintiff purchased Securities in the secondary market either from the same Wall Street Bank Defendant that underwrote the initial offering of the particular Securities, or from another Wall Street Bank Defendant or other broker-dealer, as indicated for each Security in Appendix A.

V. THE OFFERING DOCUMENTS CONTAINED UNTRUE STATEMENTS OF MATERIAL FACTS AND OMISSIONS ABOUT THE MORTGAGE ORIGINATORS' UNDERWRITING STANDARDS AND PRACTICES

89. Most of the mortgage loans underlying the Securities purchased by Plaintiff on behalf of the Clients came from the following seven mortgage originators (the "Mortgage Originators"): New Century Mortgage Corp. ("New Century"), Long Beach Mortgage Company ("Long Beach"), Fremont Investment & Loan ("Fremont"), WMC Mortgage Corporation ("WMC"), Argent Mortgage Company ("Argent"), Ameriquest Mortgage ("Ameriquest"), and Option One Mortgage Corporation ("Option One"). Together with Defendant Countrywide, which originated most of its own mortgage loans through its affiliates, these seven Mortgage Originators accounted for approximately 79.5% of the loans underlying the Securities purchased by Plaintiff on behalf of the Clients. The remaining 20.54% of the loans were originated by approximately 45 other mortgage originators. On information and belief, the types of violations of underwriting and appraisal standards that are alleged below specifically with respect to each of the seven larger Mortgage Originators were also prevalent among the other, smaller mortgage originators.

90. All seven of these large Mortgage Originators have now failed, and numerous consumer and securities fraud cases – both private and regulatory – have been lodged against

them. In an April 8, 2010 statement by John C. Dugan, Comptroller of the Currency, before the FCIC, these Mortgage Originators were identified among the "Worst Ten in the Worst Ten," a list of the worst mortgage originators based on the number of foreclosures in the nation's worst ten metro areas. During the time that Plaintiff, on the Clients' behalf, was purchasing Securities from the Wall Street Banks that contained mortgage loans provided by these Mortgage Originators, (1) the Mortgage Originators violated their stated underwriting standards when issuing loans to borrowers; (2) the underlying mortgages were based on appraisals that overstated the value of the mortgaged properties and therefore understated the LTV ratios of the mortgage loans; and (3) these underwriting deficiencies rendered the mortgage loans far less valuable and far riskier than disclosed. As a result, the Securities that were issued by the Depositor Defendants and offered or sold by the Wall Street Bank Defendants were backed by mortgage collateral that was much less valuable and posed a significantly greater risk of delinquencies, foreclosures, and other forms of default than the Wall Street Banks stated to Plaintiff.

a. New Century Mortgage Corporation

1. Defendants Made Untrue Statements Of Material Facts About New Century's Underwriting Standards And Practices

91. New Century originated Mortgage Loans that were included in the pools for the following offerings:

Deal	Depositor Defendant	Direct Seller Bank Defendant
ABSHE 2004-HE1	Asset Backed Securities Corporation	Credit Suisse First Boston
ABSHE 2004-HE7	Asset Backed Securities Corporation	Bank of America
ABSHE 2004-HE8	Asset Backed Securities Corporation	Greenwich Capital
ACE 2006-NC1	ACE Securities Corp.	Citigroup
CARR 2005-NC2	Bear Stearns & Co. Inc. Asset Backed Securities I LLC	Citigroup
CARR 2005-NC4	Stanwich Asset Acceptance Company, LLC	Citigroup

Deal	Depositor Defendant	Direct Seller Bank Defendant

92. New Century originated some or all of the loans underlying $93,492,992 million of the Securities in Appendix A that Defendants offered or sold to Plaintiff.

93. The Offering Documents for these Securities all contained substantially similar, if not identical, statements of material fact regarding New Century s underwriting standards and practices. For example, the prospectus supplement for New Century Home Equity Loan Trust Series 2005-Dstated:

> The Underwriting Guidelines are primarily intended to assess the borrower s ability to repay the mortgage loan, to assess the value of the mortgaged property and to evaluate the adequacy of the property as collateral for the mortgage loan. All of the mortgage loans in the mortgage pool were also underwritten with a view toward the resale of the mortgage loans in the secondary mortgage market.

> ***While the originator's primary consideration in underwriting a mortgage loan is the value of the mortgaged property, the originators also consider, among other things, a mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type and use of the mortgaged property.***
>
> * * *
>
> ***The mortgage loans will have been originated in accordance with the underwriting guidelines.*** On a case by case basis, exceptions to the underwriting guidelines are made where compensating factors exist. It is expected that a substantial portion of the mortgage loans in the mortgage pool that were originated by the originators will represent these exceptions.
>
> * * *
>
> *Exceptions*. As described above, the foregoing categories and criteria are guidelines only. On a case by case basis, it may be determined that an applicant warrants a debt service-to-income ratio exception, a pricing exception, a loan-to-value ratio exception, an exception from certain requirements of a particular risk category, etc. **An exception may be allowed if the application reflects compensating factors, such as:** low loan-to-value ratio; pride of ownership; a maximum of one 30 day late payment on all mortgage loans during the last 12 months; and stable employment or ownership of current residence of four or more years. An exception may also be allowed if the applicant places a down payment through escrow of at least 20% of the purchase price of the mortgaged property or if the new loan reduces the applicant s monthly aggregate mortgage payment by 25% or more. Accordingly, a mortgagor may qualify in a more favorable risk category than, in the absence of compensating factors, would satisfy only the criteria of a less favorable risk category. It is expected that a substantial portion of the mortgage loans will represent these kinds of exceptions.

94. The relevant Offering Documents also contained statements of material fact about the information contained in New Century s loan files. For example, the same prospectus supplement stated:

> Each applicant completes an application which includes information with respect to the applicant s liabilities, income, credit history, employment history and personal information. The underwriting guidelines require a credit report on each applicant from a credit reporting company. The report typically contains information relating to matters such as credit history with local and national merchants and lenders, installment debt payments and any record of defaults, bankruptcies, repossessions or judgments.

95. The relevant Offering Documents also contained statements of material fact about New Century's appraisal standards and practices. For example, the same prospectus supplement stated:

> Mortgaged properties that are to secure mortgage loans are appraised by qualified independent appraisers. These appraisers inspect and appraise the subject property and verify that the property is in acceptable condition. Following each appraisal, the appraiser prepares a report which includes a market value analysis based on recent sales of comparable homes in the area and, when deemed appropriate, replacement cost analysis based on the current cost of constructing a similar home. ***All appraisals are required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac.*** The underwriting guidelines require a review of the appraisal by a qualified employee of the originator or by an appraiser retained by that originator.

96. These statements are substantially similar, if not identical, to statements concerning New Century's appraisal standards and practices found in the other Prospectus Supplements for the Securities whose underlying mortgage loans were originated by New Century.

97. The above statements of material facts were untrue when made because, as explained below in ¶¶98-112, they failed to disclose that New Century: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgaged properties in the loan origination and underwriting process.

2. New Century Violated Its Stated Underwriting Standards

98. Defendants Banc of America, J.P. Morgan (itself and as successor-in-interest to Bear Stearns), Citigroup, Credit Suisse, Deutsche Bank, Greenwich Capital, HSBC, and Morgan Stanley underwrote, offered or sold to Plaintiff Securities containing loans originated by New Century and made untrue statements to Plaintiff about New Century's underwriting and appraisal standards and practices and the loans underlying the Securities. These Wall Street Banks had

extensive business relationships with New Century, had access to New Century's mortgage origination personnel and internal information, and conducted due diligence into New Century using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into New Century, they were or reasonably should have been aware of the untruth of the statements about New Century described above.

99. The court-appointed Bankruptcy Examiner issued a detailed report explaining how New Century's "brazen obsession" with loan originations undermined sound underwriting standards. Moreover, New Century's officers are the targets of both a civil class action and a regulatory action brought by the SEC based on their knowledge of and perpetuation of these practices, and allegations of New Century's deficient underwriting practices have been endorsed by several courts. New Century topped the Comptroller of the Currency's list of the "Worst Ten in the Worst Ten," discussed above.

100. Once one of the nation's largest mortgage origination companies, New Century collapsed and filed for bankruptcy on April 2, 2007. Formed in 1996, New Century grew rapidly to become one of the country's largest subprime lenders, reporting $56.1 billion of total mortgage originations and purchases in 2005 alone. Beginning in 2003, New Century secretly loosened its own underwriting standards and made unjustified exceptions to those already severely weakened standards. These allegations have been substantiated by many sources, as discussed below.

101. On February 29, 2008, following New Century's bankruptcy, Michael J. Missal, the Bankruptcy Court Examiner for New Century, issued a detailed report on the various deficiencies at New Century, including lax mortgage origination standards. The Examiner's report detailed "serious loan quality issues at [New Century] beginning as early as 2004"; numerous "red flags" relating to loan quality; and the failure of New Century's senior management and board of directors to devote sufficient attention to improving loan quality until it "was too late to prevent the consequences of longstanding loan quality problems in an adversely changing market."

102. During the course of his investigation, the Examiner conducted 110 interviews of 85 witnesses and reviewed millions of pages of documents from New Century, its outside auditors, and others. In his 550-page Final Report, the Examiner concluded that:

- "New Century had a brazen obsession with increasing loan originations, without due regard to the risks associated with that business strategy. Loan originations rose dramatically in recent years, from approximately $14 billion in 2002 to approximately $60 billion in 2006. The Loan Production Department was the dominant force within the Company and trained mortgage brokers to originate New Century loans in the aptly named "CloseMore University." Although a primary goal of any mortgage banking company is to make more loans, New Century did so in an aggressive manner that elevated the risks to dangerous and ultimately fatal levels." (Examiner's Report, at 3.)

- "The increasingly risky nature of New Century's loan originations created a ticking time bomb that detonated in 2007. Subprime loans can be appropriate for a large number of borrowers. New Century, however, layered the risks of loan products upon the risks of loose underwriting standards in its loan originations to high risk borrowers." *Id.*

- "New Century also made frequent exceptions to its underwriting guidelines for borrowers who might not otherwise qualify for a particular loan. A Senior Officer of New Century warned in 2004 that the "number one issue is exceptions to guidelines." Moreover, many of the appraisals used to value the homes that secured the mortgages had deficiencies. Of the New Century loans rejected by investors, issues with appraisals were the cause of more than 25% of these "kick-outs." *Id.* at 3-4.

- "Senior Management turned a blind eye to the increasing risks of New Century's loan originations and did not take appropriate steps to manage those risks. . . ." *Id.* at 4.

- "Senior Management was aware of an alarming and steady increase in early payment defaults ("EPD") on loans originated by New Century, beginning no later than mid- 2004. The surge in real estate prices slowed and then began to decrease, and interest rates started to rise. The changing market conditions exacerbated the risks embedded in New Century's products, yet Senior Management continued to feed eagerly the wave of investor demands without anticipating the inevitable requirement to repurchase an increasing number of bad loans. Unfortunately, this wave turned into a tsunami of impaired and defaulted mortgages." *Id.* at 4.

103. The Examiner highlighted the severity of New Century's improper conduct: "The Examiner recognizes that the subprime mortgage market collapsed with great speed and

unprecedented severity, resulting in all of the largest subprime lenders either ceasing operations or being absorbed by larger financial institutions. Taking these events into consideration and attempting to avoid inappropriate hindsight, the Examiner concludes that New Century engaged in a number of significant improper and imprudent practices related to its loan originations, operations, accounting and financial reporting processes.

104. According to Confidential Witness ("CW") 1, a former New Century fraud investigator and senior loan underwriter employed from January 1999 until April 2007 and who examined numerous New Century mortgage loans, New Century's problems began when it "started to abandon prudent underwriting guidelines" at the end of 2003 in order to "push more loans through" the system. According to CW 1, New Century, in effect, "stopped underwriting" and adopted an approach that the Company would be "okay if [it] could out run [its] delinquency rate."

105. According to CW 2, a former New Century Senior Vice President employed from July 2005 until April 2006 in Irvine, California, New Century could only meet its increasing year-over-year sales projections by reducing the underwriting standards. According to CW 2, in his position as Senior Vice President of New Century, he would approve just about any loan under New Century's "weak" underwriting standards.

106. According to CW 3, a former New Century underwriting unit manager employed from 1998 through October 2006, underwriting standards were loosened in order to increase sales volume. According to CW 3, exceptions to New Century's underwriting standards were "the norm" and employees were told to make loans "work." At one meeting in the late spring of 2006, CW 3 and other underwriters were told by their operations manager that the underwriters had to do what was necessary to increase volume.

107. Many lenders across the country allowed the sales personnel or account executives at their retail or in-house origination facilities to order and control appraisals and the appraisal process. According to CW 4, a former New Century underwriter employed by the Company from May 2005 to March 2006 in Itasca, Illinois and, previously, from 2000 until 2003

in Cincinnati, Ohio, as an underwriter for New Century, he could not recall the last loan that he looked at that did not have an exception; he handled close to 200 loans a month; and nearly every loan had an exception such as debt ratio exceptions or loan-to-value exceptions. According to CW 4, "the guidelines were thrown against a wall," underwriters were instructed to "dig deep" in order to make loans work, and all decisions were volume driven. According to CW 4, appraisals even if turned down, were often accepted later as branch or regional sales managers "gave them hell" for rejecting appraisals. According to CW 4, he was told by his superiors that New Century was a volume based company and that New Century needed to increase its volume to outrun "shrinkages" in the secondary market.

108. On May 7, 2007, the front page of the *Washington Post* reported "Pressure at Mortgage Firm Led to Mass Approval of Bad Loans." The *Washington Post* reported that a former New Century appraiser Maggie Hardiman recounted that "[y]ou didn't want to turn away a loan because all hell would break loose," and when she did reject a loan, "her bosses often overruled her and found another appraiser to sign off on it."

109. On March 12, 2007, *USA Today* reported that, one day after New Century "said its lenders were cutting off financing because it didn't have enough money, or prospects of new assistance, to cover billions of dollars in obligations," New Century disclosed that the SEC was investigating the company. *USA Today* also reported that "New Century also said Tuesday that it has received a grand jury subpoena requesting documents. The request is part of the U.S. Attorney in Los Angeles' criminal probe into the company." On May 1, 2007, the *New York Times* (Today in Business) reported that New Century was facing investigations by both federal prosecutors and securities regulators, and on July 6, 2007, *Reuters* reported that the SEC had elevated its investigation of New Century to "formal status" which "gives the SEC subpoena power."

110. On December 7, 2009, the SEC charged three of New Century's top officers with violations of the federal securities laws, and claimed that "New Century's business was anything but 'good' and it soon became evident that its lending practices, far from being 'responsible,'

were the recipe for financial disaster." SEC Complaint, ¶3. The SEC Complaint further details the falsity of New Century's assurances to the market about its "adhere[nce] to high origination standards in order to sell [its] loan products in the secondary market," and its policy to "only approve subprime loan applications that evidence a borrower's ability to repay the loan." *Id.*, ¶¶ 19-20.

111. New Century's systematic disregard for its underwriting guidelines led to dramatic downgrades of the value of the Securities in which New Century acted as a mortgage originator. On December 6, 2007, the *New York Times* reported that "[l]oans made by New Century, which filed for bankruptcy protection ... , have some of the highest default rates in the industry. . . , according to data from Moody's Investor Services."

112. Allegations of New Century's dismal underwriting have been sustained by Courts in similar actions. For example, in *New Jersey Carpenters Health Fund v. DLJ Mortgage Capital, Inc., et al.*, an investor brought class claims against the dealer, issuer, and underwriter of RMBS containing collateral loans underwritten by New Century, alleging that New Century failed to comply with its "loan-approval oversight and control mechanisms as represented in [its] underwriting guidelines." The court substantially denied defendants' motion to dismiss, holding that the complaint properly alleged "systemic borrower defaults, complete lack of controls and oversight, and flagrant violations of the Guidelines," and that New Century, along with the dealer and issuer defendants, "acted with reckless abandon in their zeal to generate loan volume and profits."

b. Long Beach Mortgage Company

1. Defendants Made Untrue Statements Of Material Facts About Long Beach's Underwriting Standards And Practices

113. Long Beach Mortgage Company ("Long Beach") originated mortgage loans that were included in the pools for the following offerings:

Deal	Depositor Defendant	Direct Seller Bank Defendant
LBMLT 2003-4	Long Beach Securities Corp.	Credit Suisse First Boston
LBMLT 2005-1	Long Beach Securities Corp.	Bank of America, Deutsche Bank, Citigroup, Merrill Lynch
LBMLT 2005-WL1	Long Beach Securities Corp.	Citigroup
LBMLT 2005-WL2	Long Beach Securities Corp.	
SVHE 2005-B	Financial Asset Securities Corp.	Greenwich Capital

114. Long Beach originated some or all of the loans underlying $61,039,861 million of the Securities in Appendix A that Defendants offered or sold to Plaintiff.

115. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding Long Beach's underwriting standards and practices. For example, prospectus supplement Soundview Home Loan Trust 2005-B stated:

> The Long Beach Mortgage Loans were originated, acquired or re-underwritten upon acquisition by Long Beach generally in accordance with the underwriting guidelines described below.
>
> The Long Beach Mortgage Loans were originated or re-underwritten, in the case of Long Beach Mortgage Loans acquired by Long Beach, generally in accordance with guidelines established by Long Beach under its Full Documentation ("Full Doc"), Limited Documentation ("Limited Doc") or State Income Documentation ("Stated Income") residential loan programs. Long Beach's underwriting guidelines are primarily intended to evaluate the mortgagor's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral. On a case-by-case basis and only with the approval of a lending officer with appropriate risk level authority, Long Beach may determine that, based upon compensating factors, a prospective borrower not strictly qualifying under its underwriting risk category guidelines warrants an underwriting exception.
>
> * * *
>
> The mortgaged properties are appraised by licensed independent appraisers who have satisfied WMB's appraiser screening process. . . . Each appraisal includes a market data analysis based on recent sales of comparable homes in the area and, where deemed appropriate, replacement cost analysis based on the current cost of

> constructing a similar home. Every independent appraisal is reviewed by a representative of Long Beach or WMB before the loan is funded or re-underwritten.

116. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 117-143, they failed to disclose that Long Beach: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. Long Beach Violated Its Stated Underwriting Standards

117. Defendant Greenwich Capital underwrote, offered or sold to Plaintiff Securities containing loans originated by Long Beach and made untrue statements to Plaintiff about Long Beach's underwriting and appraisal standards and practices and the loans underlying the Securities. Greenwich Capital had extensive business relationships with Long Beach, had access to Long Beach's mortgage origination personnel and internal information, and conducted due diligence into Long Beach using its own personnel and third-party loan review firms. As a result of Greenwich Capital's access to and due diligence into Long Beach, it was or reasonably should have been aware of the untruth of the statements about Long Beach described above.

118. In 1999, Long Beach was acquired by Washington Mutual ("WaMu"), a Washington corporation headquartered at 1301 Second Avenue, Seattle, Washington 98101. WaMu was founded in 1889 and, before its bankruptcy, was the largest savings and loan association in the country. Long Beach served as WaMu's subprime loan origination division until January 1, 2006 and was thereafter known as WaMu's "specialty mortgage lending" channel. According to CW 5, who served as a Long Beach Senior Underwriter in the Chicago area from 2004 through September 2007, WaMu sold subprime loans with interest-only and negative-amortization features, increasing the riskiness of these loans.

119. The Senate Permanent Subcommittee on Investigations ("PSI"), after investigating and holding hearings on Long Beach's role in the recent financial crisis, concluded the following about the company:

> Subprime lending can be a responsible business. Most subprime borrowers pay their loans on time and in full. Long Beach, however, was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry.

120. Long Beach financially rewarded its employees for closing higher-risk loans and instituted loan sales quotas. Long Beach loan officers, for example, received more money per loan for originating higher-risk loans and for exceeding established loan targets. Loan processing personnel were compensated according to the speed and number of the loans they processed. Loan officers and their sales associates received still more compensation if they charged borrowers higher interest rates or points than required in bank rate sheets specifying loan prices, or included prepayment penalties in the loan agreements. That added compensation created incentives to increase loan profitability, but not loan quality. Accordingly, Long Beach's employees targeted more and more borrowers who were less able to afford the loan payments they would have to make, and many of whom had no realistic ability to meet the obligations incident to the loans they were sold.

121. According to CW 6, a First Vice President in the Capital Markets Group and Director of Investor Relations at WaMu Capital Corp. in New York, New York, from October 2004 until December 2007, Long Beach compensated its account executives and underwriters based on the volume of loans that they brought in and closed, and their compensation structure gave no consideration to the quality of those loans.

122. CW 7, an Account Executive for Long Beach in New Jersey from 1998 until October 2007, noted a shift in underwriting philosophy in 2005 toward increasing loan volume at all costs. When CW 7 first joined the subprime business, Long Beach relied on "common sense underwriting" and was not exclusively focused on credit scores. CW 7 noted the change away from a "know your borrower" focus beginning in the 2005 timeframe, with Long Beach relying

more on credit scores and less on common sense. The borrower needed to produce less and less documentation, and Fair Isaac Credit Organization ("FICO") credit scores became more important than verifying income for Long Beach. In response, "volume really went through the roof."

123. Long Beach pushed through every loan it could close, through whatever means necessary. CW 8, a Senior Underwriter for Long Beach in Dallas, Texas, from 2004 through April 2007, reported that on occasion CW 8 would express concerns to her manager over funding some of the loans underwritten, but the manager's "direction from corporate" was simply to fund loans. CW 8 also reported that at month-end team meetings, it was often discussed that the Company was trying to increase volume by getting more "borrowers to fit."

124. CW 8 recalled that some of the "crazier" programs at Long Beach included stated-income loans for W-2 wage earners, a program that started in 2005. Stated-income programs, to the extent that lenders accepted them, were traditionally reserved for self-employed borrowers with significant assets. At Long Beach, however, these "liar's loans" were common, even for those borrowers who were not self-employed. Long Beach would also approve 100% financing for stated-income borrowers with FICO scores as low as 500.

125. CW 8 also described a "three letters of reference" program for self-employed borrowers, where a borrower only had to submit three letters of reference from anyone for whom they supposedly worked. CW 8 said no attempt was made to verify the information in the letters. CW 8 related that some of the accepted letters included statements such as: "So-and-so cuts my lawn and does a good job." At Long Beach, FICO scores ranged from 500-620, but CW 8 said that if Long Beach salespeople had a borrower with a 620, they were "hooping and hollering" about having a borrower with good credit.

126. CW 8 also relayed that borrowers could get a loan with no established FICO score merely by providing "three alternative trade lines." An "alternative trade line" was anything that did not appear on the borrower's credit report, including documentation of car insurance payments, verification of rent payment, or a note from a person claiming the borrower had repaid

a personal debt. CW 8 said that Long Beach originated "a significant amount" of these types of problematic loans. CW 8 commented: "It was just a disaster." Furthermore, CW 8 said that these loans made up the majority of first payment defaults – *i.e.*, loans on which the borrower failed to make even the first payment – in the end of 2006.

127. CW 9 was a Wholesale Mortgage Underwriter at the Long Beach loan processing center located in Lake Oswego, Oregon from August 2005 until December 2006. CW 9 first joined WaMu in Lake Oswego in 2003 as a Senior Credit Analyst and subsequently joined Long Beach in 2004 as a Senior Loan Coordinator, ultimately becoming a Wholesale Mortgage Underwriter. CW 9 said that at Long Beach there was always a sense of "working the underwriting guidelines" to close loans, rather than to mitigate Long Beach's credit risk. CW 9 said that there was simply an environment in the loan processing center to "approve, approve, approve" and that any exception that was needed to approve a loan was not only done, but was "sought after." CW 9 felt that Long Beach consistently pressured its underwriters to "find a way to make it work."

128. According to CW 5, even the few loans that Long Beach underwriters refused to approve were regularly pushed through by Long Beach management by granting exceptions to the guidelines. According to CW 5, "There were so many exceptions." Long Beach allowed LTV ratio exceptions, and the "rate exceptions were ridiculous." According to CW 5, WaMu allowed even the salespeople to give interest-rate exceptions to borrowers to push loans through. CW 5 explained: "There were really no restrictions to approve a loan," and some "really bad loans" went through the office. The attitude at WaMu was "push, push, push."

129. Numerous other Long Beach employees agreed that exceptions to Long Beach's guidelines were commonplace. CW 10, a Senior Underwriter with WaMu in Livermore, California from 2003 through September 2007, said that if Long Beach's competitors could not approve a loan, it was known to send the loan to Long Beach and they would make an exception to get the loan through. CW 10 said that guidelines were "loose to the point of disbelief." CW

10 described Long Beach's lending approach as follows: "If [potential borrowers] were breathing and had a heart beat, you could probably get the loan done."

130. CW 9 stated that many employees at Long Beach were disappointed about the decisions that were being made about loan quality, but they were resigned to simply "keep their heads down." According to CW 5, several WaMu employees contacted corporate headquarters about the incessant underwriting exceptions, including issuing loans to unqualified borrowers. CW 5 stated, "[w]e did a lot of underhanded stuff." CW 5 stated that if an underwriter at Long Beach refused to force a file through, they would be written up, not because they made a bad decision but because the sales team did not like their decision. CW 5 said: "Basically, sales is what ran Long Beach Mortgage, it wasn't the Operations part."

131. CW 11 served as a Quality Assurance Manager in the Long Beach Loan Fulfillment Center ("LFC") in Dallas, Texas from November 2005 until his termination in August 2007. CW 11 explained that the Quality Assurance group in Dallas performed a monthly audit on a random selection of subprime loans from the various loan origination centers around the country. This analysis was not focused on loan-specific issues, but instead concerned WaMu/Long Beach-wide trends that might suggest necessary changes in underwriting guidelines, compliance standards, or other systems.

132. CW 11 observed that, despite the extensive analysis that the group performed to determine the causes for WaMu/Long Beach-wide loan problems, WaMu/Long Beach ignored the results. CW 11's group continued to identify the same problematic trends again and again without WaMu/Long Beach taking any steps to address the causes. According to CW 11, although WaMu/Long Beach was "going through the motions" to present a façade of legitimate quality control, in reality there was nothing but a "free for all to approve loans by the thousands."

133. According to CW 12, an employee of Long Beach from 2001 until October 2006, serving as an underwriter and later becoming a Quality Assurance Manager, a group of WaMu employees regularly reviewed a percentage (typically around 20%) of Long Beach's loans to monitor Long Beach's underwriting. CW 12 forwarded the report to Long Beach's Loan

Servicing Center managers. The Long Beach managers receiving the reports had a certain number of days to go through the loan files in question and respond to the findings in the reports.

134. According to CW 13, a Senior Default Foreclosure Loan Specialist with Long Beach in Chatsworth, California from 2002 to September 2006, her department received statistics every month that showed the number of first payment defaults from the prior month. According to CW 13, at the end of 2004, the default numbers were at 6-7% and, "although they may have increased slightly, did not go over 9%." Suddenly, however, they increased "all at once" to as high as 14%. According to CW 13, first payment defaults just "seemed to go up and up."

135. In his opening statement at the first PSI hearing on Wall Street and the Financial Crisis (related to the role of high risk home loans), Senator Carl Levin noted that an internal WaMu audit of Long Beach in 2005 found that "relaxed credit guidelines, breakdowns in manual underwriting processes, and inexperienced subprime personnel . . . coupled with a push to increase loan volume and the lack of an automated fraud monitoring tool" led to deteriorating loans. Many of the loans defaulted within three months of being sold to investors. Investors demanded that Long Beach repurchase them. Long Beach had to repurchase over $875 million in loans in 2005 and 2006, lost over $107 million from the defaults, and had to cover a $75 million shortfall in its repurchase reserves.

136. Senator Levin also noted that in response to the repurchase requests, WaMu "fired Long Beach's senior management and moved the company under the direct supervision of the President of WaMu's Home Loans Division, David Schneider" and that "WaMu promised its regulator that Long Beach would improve. But it didn't." In April 2006, WaMu's President, Steve Rotella, emailed the CEO, Kerry Killinger, that Long Beach's "delinquencies are up 140% and foreclosures close to 70%. . . . It is ugly." Five months later, in September, he emailed that Long Beach is "terrible. . . . Repurchases, [early payment defaults], manual underwriting, very weak servicing/collections practices and a weak staff." Two months after that, in November

2006, the head of WaMu Capital Markets in New York, David Beck, wrote to Mr. Schneider that "LBMC [Long Beach] paper is among the worst performing in the [market]."

137. In June 2007, WaMu shut down Long Beach and took over its subprime lending operations. Currently, Long Beach RMBS report loan delinquency rates in excess of 40%. At the end of 2007, a Long Beach employee was indicted for having taken kickbacks to process fraudulent or substandard loans.

138. In April 2010, the Senate Permanent Subcommittee on Investigations ("PSI") held a series of hearings "to examine some of the causes and consequences of the crisis." The goals of the hearings were threefold: (1) to construct a public record of the facts to deepen public understanding of what happened and to try to hold some of the perpetrators accountable; (2) to inform the legislative debate about the need for financial reform; and (3) to provide a foundation for building better defenses to protect Main Street from the excesses of Wall Street.

139. The hearings were based on an in-depth bipartisan investigation that began in November 2008. The PSI conducted over 100 detailed interviews and depositions, consulted with dozens of experts, and collected and reviewed millions of pages of documents. Given the extent of the economic damage and the complexity of its root causes, the Subcommittee's approach has been to develop detailed case studies to examine each stage of the crisis.

140. On April 13, 2010, the PSI held a hearing that focused on the role high risk loans played in the financial crisis, using WaMu as a case history. It showed how WaMu originated and sold hundreds of billions of dollars in high risk loans to Wall Street Banks in return for big fees, polluting the financial system with toxic mortgages.

141. The PSI reached the following findings of fact following the April 13, 2010 hearing:

> **1. High Risk Lending Strategy**. Washington Mutual ("WaMu") executives embarked upon a high risk lending strategy and increased sales of high risk home loans to Wall Street, because they projected that high risk home loans, which generally charged higher rates of interest, would be more profitable for the bank than low risk home loans.

2. Shoddy Lending Practices. WaMu and its affiliate, Long Beach Mortgage Company ("Long Beach"), used shoddy lending practices riddled with credit, compliance, and operational deficiencies to make tens of thousands of high risk home loans that too often contained excessive risk, fraudulent information, or errors.

3. Steering Borrowers to High Risk Loans. WaMu and Long Beach too often steered borrowers into home loans they could not afford, allowing and encouraging them to make low initial payments that would be followed by much higher payments, and presumed that rising home prices would enable those borrowers to refinance their loans or sell their homes before the payments shot up.

4. Polluting the Financial System. WaMu and Long Beach securitized over $77 billion in subprime home loans and billions more in other high risk home loans, used Wall Street firms to sell the securities to investors worldwide, and ***polluted the financial system with mortgage backed securities which later incurred high rates of delinquency and loss.***

5. Securitizing Delinquency-Prone and Fraudulent Loans. At times, WaMu selected and securitized loans that it had identified as likely to go delinquent, without disclosing its analysis to investors who bought the securities, and also securitized loans tainted by fraudulent information, without notifying purchasers of the fraud that was discovered.

6. Destructive Compensation. WaMu's compensation system rewarded loan officers and loan processors for originating large volumes of high risk loans, paid extra to loan officers who overcharged borrowers or added stiff prepayment penalties, and gave executives millions of dollars even when its high risk lending strategy placed the bank in financial jeopardy.

142. The PSI also concluded that "from 2004 to 2007, in exchange for lucrative fees, Goldman Sachs helped lenders like Long Beach, Fremont, and New Century, securitize high risk, poor quality loans, obtain favorable credit ratings for the resulting residential mortgage backed securities (RMBS), and sell the RMBS securities to investors, pushing billions of dollars of risky mortgages into the financial system."

143. Long Beach and WaMu's appraisal practices have also been the target of governmental investigations. On November 1, 2007, New York State Attorney General Andrew Cuomo announced that he was suing eAppraiseIT and its parent company First American Corporation, charging them with caving into pressure from WaMu to use a list of preferred "Proven Appraisers" who provided inflated appraisals on homes. *People of the State of New York*

v. First Am. Corp. and First Am. eAppraiseIT, Index No. 406796/2007 (N.Y. Sup. Ct.). Cuomo's suit alleged that eAppraiseIT colluded with WaMu (the parent of Mortgage Originator Long Beach) to inflate the appraisal values of homes. According to Cuomo, between April 2006 and October 2007, First American performed 262,000 appraisals for WaMu. When WaMu loan officers began complaining that valuations by eAppraiseIT's independent roster were coming in too low, WaMu allegedly pressured First American to assign only appraisers on WaMu's approved list when appraising WaMu mortgage-related properties. WaMu allegedly threatened to take its business elsewhere, and dangled the prospect of greater use of First American's other settlement services, to convince eAppraiseIT to accede to its demands. In a press release that accompanied the suit, Cuomo stated:

> The independence of the appraiser is essential to maintaining the integrity of the mortgage industry. First American and eAppraiseIT violated that independence when Washington Mutual strong-armed them into a system designed to ripoff homeowners and investors alike . . . . The blatant actions of First American and eAppraiseIT have contributed to the growing foreclosure crisis and turmoil in the housing market. By allowing Washington Mutual to hand-pick appraisers who inflated values, First American helped set the current mortgage crisis in motion.

144. On June 8, 2010, the New York State Appellate Division, First Department, issued a decision upholding Attorney General Cuomo's complaint.

c. Fremont Investment & Loan

1. Defendants Made Untrue Statements Of Material Facts About Fremont's Underwriting Standards And Practices

145. Fremont Investment & Loan ("Fremont") originated mortgage loans that were included in the pools for the following offerings:

Deal	Depositor Defendant	Direct Seller Bank Defendant
BSABS 2004-FR3	Bear Stearns & Co. Inc. Asset Backed Securities I LLC	Citigroup
FHLT 2004-C	Fremont Mortgage Securities Corporation	Lehman Brothers
FHLT 2005-E	Fremont Mortgage Securities Corporation	Credit Suisse First Boston, Deutsche Bank
FHLT 2006-B	Fremont Mortgage Securities Corporation	Greenwich Capital, BNP Paribas
FHLT 2006-C	Fremont Mortgage Securities Corporation	Merrill Lynch
MLMI 2004-SL1	Merrill Lynch Mortgage Investors, Inc.	Merrill Lynch
MLMI 2005-FM1	Merrill Lynch Mortgage Investors, Inc.	Merrill Lynch
SVHE 2005-B	Financial Asset Securities Corp.	Greenwich Capital

146. Fremont originated some or all of the loans underlying $125,873,239 million of the Securities in Appendix A that Defendants offered or sold to Plaintiff.

147. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding Fremont's underwriting and appraisal standards and practices. For example, the prospectus supplement for Fremont Home Loan Trust 2004-C stated:

> Mortgage loans are underwritten in accordance with Fremont's current underwriting programs, referred to as the Scored Programs ("Scored Programs"), subject to various exceptions as described in this section. Fremont's underwriting guideliness are primarily intended to assess the ability and willingness of the borrower to repay the debt and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan. The Scored Programs assess the risk of default by using Credit Scores obtained from third-party credit repositories along with, but not limited to, past mortgage payment history, seasoning on bankruptcy and/or foreclosure and loan-to-value ratio as an aid to, not a substitute for, the underwriter's judgment. All of the mortgage loans in the mortgage pool were underwritten with a view toward the resale of the mortgage loans in the secondary mortgage market.

* * *

All of the mortgage loans were underwritten by Fremont's underwriters having the appropriate approval authority. Each underwriter is granted a level of authority commensurate with their proven judgment, experience and credit skills. **On a case by case basis, Fremont may determine that, based upon compensating factors, a prospective mortgagor not strictly qualifying under the underwriting risk category guidelines described below is nonetheless qualified to receive a loan, i.e., an underwriting exception. Compensating factors may include, but are not limited to, low loan-to-value ratio**, low debt to income ratio, substantial liquid assets, good credit history, stable employment and time in residence at the applicant's current address. It is expected that a substantial portion of the mortgage loans may represent such underwriting exceptions.

There are the three documentation types, Full Documentation ("Full Documentation"), Easy Documentation ("Easy Documentation") and Stated Income ("Stated Income"). Fremont's underwriters verify the income of each applicant under various documentation types as follows: under Full Documentation, applicants are generally required to submit verification of stable income for the periods of one to two years preceding the application dependent on credit profile; under Easy Documentation, the borrower is qualified based on verification of adequate cash flow by means of personal or business bank statements; under Stated Income, applicants are qualified based on monthly income as stated on the mortgage application. The income is not verified under the Stated Income program; however, the income stated must be reasonable and customary for the applicant's line of work.

Fremont originates loans secured by 1-4 unit residential properties made to eligible borrowers with a vested fee simple (or in some cases a leasehold) interest in the property. **Fremont's underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal**. Generally, initial appraisals are provided by qualified independent appraisers licensed in their respective states. Review appraisals may only be provided by appraisers approved by Fremont. In some cases, Fremont relies on a statistical appraisal methodology provided by a third-party. Qualified independent appraisers must meet minimum standards of licensing and provide errors and omissions insurance in states where it is required to become approved to do business with Fremont. Each uniform residential appraisal report includes a market data analysis based on recent sales of comparable homes in the area and, where deemed appropriate, replacement cost analysis based on the current cost of constructing a similar home. The review appraisal may be a desk review, field review or an automated valuation report that confirms or supports the original appraiser's value of the mortgaged premises.

148. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶149-168, they failed to disclose that Fremont: (i) systematically failed

to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. Fremont Violated Its Stated Underwriting Standards

149. Defendants Barclays, J.P. Morgan (as successor-in-interest to Bear Stearns), Credit Suisse, Greenwich Capital, Merrill Lynch, and UBS underwrote, offered or sold to Plaintiff Securities containing loans originated by Fremont and made untrue statements to Plaintiff about Fremont's underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with Fremont, had access to Fremont's mortgage origination personnel and internal information, and conducted due diligence into Fremont using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into Fremont, they were or reasonably should have been aware of the untruth of the statements about Fremont described above.

150. Fremont originated subprime residential real estate loans nationwide on a wholesale basis through independent loan brokers in nearly all 50 states. Fremont was one of the country's largest subprime lenders until March 2007, when the Federal Deposit Insurance Corporation ("FDIC") effectively forced Fremont out of the subprime lending business for extending subprime credit "in an unsafe and unsound manner" and committing violations of law and FDIC regulations. Fremont later filed for bankruptcy.

151. On March 7, 2007, following an extensive investigation, the FDIC issued a Cease & Desist Order to Fremont, concluding that Fremont was, in fact, "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]," "operating with a large volume of poor quality loans," and "engaging in unsatisfactory lending practices."

152. According to the FDIC's March 7, 2007 press release:

> In taking this action, the FDIC found that [Fremont] was operating without effective risk management policies and procedures in place in relation to its subprime mortgage and commercial real estate lending operations. The FDIC determined, among other things, that the bank had been operating without adequate subprime mortgage loan underwriting criteria, and that it was marketing and extending subprime mortgage loans in a way that substantially increased the likelihood of borrower default or other loss to the bank.

153. In response to Fremont's dangerous subprime lending practices, on October 4, 2007, the Commonwealth of Massachusetts, through its Attorney General, brought an enforcement action against Fremont for an array of "unfair and deceptive business conduct," "on a broad scale." *Massachusetts v. Fremont Investment & Loan and Fremont General Corp.*, No. 07-4373 (Sup. Ct. Mass.) (the "Massachusetts Action"). Specifically, the Massachusetts Action alleged that Fremont abdicated its underwriting standards, provided misleading or incomplete information to borrowers, made subprime loans that it knew would fail, and participated in predatory lending.

154. According to the Massachusetts Attorney General's complaint, Fremont's loans were "structurally unfair due to their multiple layers of risk with no meaningful consideration whether borrowers [could] afford to pay the loans." Fremont "approv[ed] borrowers without considering or verifying the relevant documentation related to the borrower's credit qualifications, including the borrower's income"; "approv[ed] borrowers for loans with inadequate debt-to-income analyses that do not properly consider the borrowers' ability to meet their overall level of indebtedness and common housing expenses"; "failed to meaningfully account for [ARM] payment adjustments in approving and selling loans"; "approved borrowers for these ARM loans based only on the initial fixed 'teaser' rate, without regard for borrowers' ability to pay after the initial two year period"; "consistently failed to monitor or supervise brokers' practices or to independently verify the information provided to Fremont by brokers"; and "ma[de] loans based on information that Fremont knew or should have known was inaccurate or false, including, but not limited to, borrowers' income, property appraisals, and credit scores."

155. On December 9, 2008, the Supreme Judicial Court of Massachusetts affirmed a preliminary injunction obtained in conjunction with the Massachusetts Action that prevented Fremont from foreclosing on thousands of its loans issued to Massachusetts residents. As a basis for its unanimous ruling, the Supreme Judicial Court found evidence that "Fremont made no effort to determine whether borrowers could make the scheduled payments under the terms of the loan," and that "Fremont knew or should have known that [its lending practices and loan terms] would operate in concert essentially to guarantee that the borrower would be unable to pay and default would follow."

156. In reaching its decision, the Supreme Judicial Court relied in part on the affidavits of two outside account executives who marketed Fremont's loan products to brokers in Massachusetts. Once loans were produced, these account executives worked with Fremont employees, such as underwriters and account managers, to process and close the loans. According to their affidavits filed in the Massachusetts Action, both outside account executives attested that Fremont purposefully relaxed its underwriting standards and made loans based on documents known to be untrue.

157. The terms of the preliminary injunction were made permanent by a settlement of the Massachusetts Action, reached on June 9, 2009. In addition to agreeing to the protections for borrowers that would prevent Fremont from foreclosing on "unfair" loans, Fremont agreed to pay the Commonwealth of Massachusetts $10 million in consumer relief, penalties, and costs.

158. Numerous confidential witnesses interviewed by Plaintiff's counsel also corroborate the findings of the FDIC and the Massachusetts Action. According to CW 37, an Assistant Vice President, Regulatory Risk Examiner at Fremont, who was involved in the FDIC's investigation of Fremont, Fremont's Regulatory Risk Management group (of which CW 37 was a member) submitted numerous, repeated adverse written findings to senior Fremont executives in 2005 and 2006, which "mirrored" the FDIC's eventual Cease & Desist Order, one to two years later. CW 37 stated that these repeated adverse reports specifically highlighted, among other things, unfair and deceptive acts in which Fremont was engaging, "pretty obvious" poor

underwriting, and problematic incentive compensation. CW 37 stated that these reports were based on reviews performed by the Regulatory Risk Management group, including interviews of underwriters, quality control, and other Fremont personnel. CW 37 stated that Fremont filed repeated Suspicious Activity Reports ("SARs") regarding broker fraud as to the same brokers, but Fremont executives would not end relationships with the identified brokers. CW 37 stated that some of the fraud was "so egregious" including "ridiculous" stated income applications, yet nothing was being done about "obvious problems" including repeated broker fraud.

159. The personal accounts of other former employee confidential witnesses confirm that Fremont failed to adhere to its established underwriting guidelines and promoted the wide use of exceptions to Fremont's underwriting standards in order to drive loan quantity at the expense of quality. For example, Fremont underwriters were instructed that Fremont's guidelines and underwriting policies were a mere "guide," and that they were to "think outside the box" (according to CW 38, a senior underwriter from 2004 through March 2007 at Fremont's Downers Grove, Illinois center), "make it work" (according to CW 39, an underwriter at Fremont's Downers Grove center from August 2002 to January 2007, and CW 40, an assistant operations manager at Fremont's Anaheim, California center from October 2003 to January 2007), or "massage the file" (according to CW 41, a senior account manager at Fremont's Downers Grove, Illinois center from July 2001 to February 2007) to get loans approved.

160. As explained by CW 42, a former Fremont sales manager from August 1998 through March 2007, not only were Fremont's guidelines loose, but there were frequent granted exceptions to the guidelines. Underwriters made several types of exceptions "everyday," according to CW 43, an operations manager at Fremont's Anaheim, California center from April 2004 to January 2007, and a lot of them were not warranted, according to CW 40. Indeed, an estimated 30% of Fremont's loans had some sort of exception, partly because anyone from an assistant manager on up had the authority to sign off on exceptions, according to CW 44, an underwriter at Fremont's Anaheim, California center from May 2005 to March 2007.

161. According to CW 44 and CW 45 (an account manager at Fremont's Downers Grove, Illinois center from August 2005 to January 2007), when borrowers were rejected for failing to meet Fremont's underwriting criteria for fully documented loans, the loans were simply converted to "stated income" loans "with a higher reported income than previously documented" and approved. According to the separate accounts of CW 39 and CW 41, Fremont approved loans with unrealistic stated incomes, including "pizza delivery men" with reported monthly income of $5,000 or $6,000. Fremont accepted claims that "landscapers and housekeepers" earned $10,000 in monthly income, according to CW 46 (a former senior underwriter at Fremont's Anaheim and Ontario, California centers from 2002 to 2007), and that "window washers" made $75,000 per year, according to CW 41. In addition, Fremont continually ignored obviously fraudulent documents when approving loans, according to CW 47, an account manager from 2005 through May 2007. By way of specific example, Fremont ignored a case where 40 loan files from the same broker had the exact same banking statements, according to CW 48, a former quality control investigator at Fremont from 2002 until March 2007. Indeed, fraudulent bank statements and W2s were discovered and ignored every day, according to CW 49, a quality control auditor with Fremont from May 2005 to February 2007. And, when Fremont could not ignore fraudulent information, such as a false pay stub, Fremont simply removed the information from the file or replaced it, according to CW 40.

162. According to CW 50, a senior underwriter at Fremont's Anaheim, California center from 1997 to September 2007, Fremont also loosened its debt-to-income-ratio requirements. Before 2004, Fremont generally did not approve loans with more than a 50% debt-to-income ratio. Thereafter, according to CW 50, Fremont approved loans with a 55% debt-to-income ratio. And when CW 50 reviewed the loan files, he often determined that the debt-to-income ratios actually were between 65% or 70%, or even up to 90%. In addition, CW 50 stated that Fremont routinely approved stated-income loans with claimed incomes that were simply "off the wall figures."

163. In addition, according to CW 51, an account manager at Fremont's Downers Grove, Illinois center from January 2002 to July 2006, CW 51's superiors would call property appraisers and request that they inflate their appraisal values by at least a few thousand dollars, and the appraisers would do so. According to CW 51, while auditing loans in the Due Diligence Department and later, in connection with CW 51's review of investor repurchase claims, CW 51 discovered, among other things, incomplete appraisals, appraisals that did not match the address of the property, and appraisals that described the home as owner-occupied when it was rented, on the large majority of the loans.

164. Further corroborating Fremont's poor underwriting practices, Fremont's business partners have alleged that Fremont originated and sold large amounts of loans that were terribly underwritten. In October of 2007, Morgan Stanley Mortgage Capital Holdings LLC sued Fremont for breach of contract for Fremont's failure to repurchase loans that Fremont sold from May of 2005 through December of 2006 to Morgan Stanley's predecessor-in-interest, Morgan Stanley Mortgage Capital, Inc. (referred to collectively with Morgan Stanley Mortgage Capital Holdings LLC as "Morgan Stanley"). That action was captioned *Morgan Stanley Mortgage Capital Holdings LLC, as Successor-in-Interest to Morgan Stanley Mortgage Capital Inc. v. Fremont Investment & Loan*, No. 07-Civ.-9457 (S.D.N.Y.). According to the complaint, when Fremont sold the loans at issue, Fremont warranted, among other things, that the loans met its underwriting criteria and that Fremont had adequately verified the underlying information, such as the borrowers' income, credit history, and assets. Further, according to the complaint, Fremont agreed to repurchase any loans that materially violated the warranties and indemnify Morgan Stanley for any damages it suffered due to the defective loans.

165. Morgan Stanley alleged that it discovered "hundreds" of improperly underwritten loans shortly after they were purchased. In particular, Morgan Stanley alleged that the "loans fail[ed] to meet Fremont's underwriting guidelines" because Fremont had "fail[ed] to verify assets prior to closing," performed "defective verification of rent, fail[ed] to obtain the minimum credit history information, and [made] loans . . . to borrowers that did not have the requisite

credit score. Morgan Stanley also alleged, consistent with the statements of former Fremont employees set forth herein, that the loan documents contained misrepresentations of the income or employment of the borrower and misrepresentations concerning appraisal values. Morgan Stanley further alleged that the loans contained misrepresentations of the occupancy of the residence, misrepresentations of the assets of the borrower, and misrepresentations of the condition of the property.

166. Morgan Stanley is not the only one of Fremont's business partners to sue the Company for its improper underwriting. In June of 2007, Lehman Brothers Holdings, Inc. and Lehman Brothers Bank, FSB (collectively, Lehman Brothers) also sued Fremont for breach of contract and unjust enrichment for Fremont's failure to repurchase loans that Lehman Brothers had purchased beginning in March of 2004. That action was captioned *Aurora Loan Services LLC, et al. v. Fremont Investment & Loan Corp.*, No. 07-cv-01284-RPM (D. Colo.).

167. In that case, Lehman Brothers, just like Morgan Stanley, alleged that when Fremont sold the loans at issue, Fremont warranted that the loans met its underwriting criteria and that the underlying documentation was accurate as to the borrowers identity, income, employment, credit history, and assets, among other things. Furthermore, Fremont agreed to repurchase those loans that violated the warranties and indemnify Lehman Brothers for any damages it suffered due to the defective loans.

168. After Lehman Brothers purchased the loans, according to its complaint, loan servicers and other third parties notified Lehman Brothers of certain issues concerning the loans. When Lehman Brothers conducted further due diligence, it confirmed that Fremont breached one or more representations and/or warranties concerning the loans. According to the Lehman complaint, the breached warranties included [t]he conformance of the Mortgage Loans with applicable underwriting guidelines and loan program requirements; [t]he accuracy and integrity of all information and documentation regarding borrower identity, income, employment, credit, assets, and liabilities used to originate the Mortgage Loans; [t]he validity of all Mortgage Loan documentation; [t]he ownership, nature, condition, and value of the real

property securing the respective Mortgage Loans□; and □[b]orrower occupancy of the property securing the Mortgage Loans.□

d. WMC Mortgage Corporation

1. Defendants Made Untrue Statements Of Material Facts About WMC's Underwriting Standards And Practices

169. WMC originated Mortgage Loans that were included in the pools for the following offerings:

Deal	Depositor Defendant	Direct Seller Bank Defendant
ABFC 2005-HE2	Asset Backed Funding Corporation	Bank of America
ABSHE 2004-HE7	Asset Backed Securities Corporation	Bank of America
ACE 2005-HE7	ACE Securities Corp.	Deutsche Bank
ACE 2005-HE7	ACE Securities Corp.	Deutsche Bank, Goldman Sachs
MABS 2004-WMC3	Mortgage Asset Securitization Transactions, Inc.	Deutsche Bank
MLMI 2004-WMC1	Merrill Lynch Mortgage Investors, Inc.	Merrill Lynch
MLMI 2005 WMC-1	Merrill Lynch Mortgage Investors, Inc.	Merrill Lynch, UBS, Bear Stearns & Co. Inc., Morgan Stanley
MSAC 2005-WMC2	Morgan Stanley ABS Capital I Inc	JP Morgan
SVHE 2005-1	Financial Asset Securities, Corp.	Merrill Lynch
SVHE 2005-4	Financial Asset Securities Corp.	Greenwich Capital
SVHE 2005-B	Financial Asset Securities Corp.	Greenwich Capital

170. WMC originated some or all of the loans underlying $62,999,403 million of the Securities in Appendix A that Defendants offered or sold to Plaintiff.

171. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding WMC's underwriting and appraisal standards and practices. For example, the prospectus supplement for ABFC Asset-Backed Certificates 2005-HE2 stated:

> *WMC Mortgage Corp. Underwriting Guidelines*. The WMC Mortgage Loans have been originated generally in accordance with the underwriting guidelines established by WMC Mortgage Corp. (collectively, the "WMC Underwriting Guidelines"). **WMC Mortgage Corp. also originates certain other mortgage loans that are underwritten to the guidelines of specific investors, which mortgage loans are not included among those sold to the Trust as described herein. The WMC Underwriting Guidelines are primarily intended to (a) determine that the borrower has the ability to repay the mortgage loan in accordance with its terms and (b) determine that the related mortgaged property will provide sufficient value to recover the investment if the borrower defaults. On a case-by-case basis WMC Mortgage Corp. may determine that, based upon compensating factors, a prospective mortgagor not strictly qualifying under the underwriting risk category or other guidelines described below warrants an underwriting exception. Compensating factors may include, but are not limited to, low debt-to-income ratio**, good mortgage payment history, an abundance of cash reserves, excess disposable income, stable employment and time in residence at the applicant's current address. It is expected that a substantial number of the WMC Mortgage Loans will represent such underwriting exceptions.
>
> The WMC Mortgage Loans will fall within the following documentation categories established by WMC Mortgage Corp.: Full Documentation, Full-Alternative Documentation, Limited Documentation, Lite Documentation, Stated Income Documentation and Stated Income/Verified Assets (Streamlined) Documentation. In addition to single-family residences, certain of the WMC Mortgage Loans will have been underwritten (in many cases, as described above, subject to exceptions for compensating factors) in accordance with programs established by WMC Mortgage Corp. for the origination of mortgage loans secured by mortgages on condominiums, vacation and second homes, manufactured housing, two- to four-family properties and other property types. In addition, WMC Mortgage Corp. has established specific parameters for jumbo loans, which are designated in the WMC Underwriting Guidelines as mortgage loans with original principal balances in excess of $650,000. However, WMC Mortgage Corp. sometimes increases the original principal balance limits if borrowers meet other compensating credit factors.
>
> Under the WMC Underwriting Guidelines, WMC Mortgage Corp. verifies the loan applicant's eligible sources of income for all products, calculates the amount of income from eligible sources indicated on the loan application, reviews the credit and mortgage payment history of the applicant and calculates the debt-to-

> income ratio to determine the applicant's ability to repay the loan, and reviews the mortgaged property for compliance with the WMC Underwriting Guidelines. **The WMC Underwriting Guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require, among other things, (1) an appraisal of the mortgaged property which conforms to Uniform Standards of Professional Appraisal Practice and (2) an audit of such appraisal by a WMC Mortgage Corp.-approved appraiser or by WMC Mortgage Corp.'s in-house collateral auditors (who may be licensed appraisers), which audit may in certain circumstances consist of a second appraisal, a field review, a desk review or an automated valuation model.**

172. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶173-179, they failed to disclose that WMC: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. WMC Violated Its Stated Underwriting Standards

173. Defendants Banc of America, Credit Suisse, Deutsche Bank, Greenwich Capital, Merrill Lynch, and UBS underwrote, offered or sold to Plaintiff Securities containing loans originated by WMC and made untrue statements to Plaintiff about WMC's underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with WMC, had access to WMC's mortgage origination personnel and internal information, and conducted due diligence into WMC using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into WMC, they were or reasonably should have been aware of the untruth of the statements about WMC described above.

174. According to Reuters, WMC originated "some of the worst-performing loans in the . . . $575 billion market for home equity asset-backed securities." According to a lawsuit filed in September 2009, a review of WMC's mortgage loan files showed that "in reality [WMC]

followed few, if any, objective standards or criteria in underwriting [mortgage loans] and showed little concern if any, for any borrower's ability to repay." WMC's reckless underwriting standards and practices resulted in a huge amount of foreclosures, ranking WMC fourth in the Comptroller of the Currency's "Worst Ten of the Worst Ten" list presented in April 2010 to the FCIC.

175. In 2004, WMC, then the sixth-largest subprime lender in the nation, was purchased by General Electric from private equity firm Apollo Management. WMC's concentration was in nonprime loans and jumbo loans up to $1 million dollars. According to a March 2007 article published by *MortgageDaily.com*, WMC was faced with growing delinquencies, and announced that it would no longer write mortgages with no down payments. Soon after, on September 20, 2007, General Electric closed WMC's operations, taking a $400 million charge as a result.

176. The market has now become aware of WMC's reckless loan originating practices. For example, on September 2, 2009, PMI Mortgage Insurance Co. ("PMI") sued WMC in California state court for misrepresentations and failure to adhere to its contractual repurchase obligations relating to the securitization of a pool of certain subprime mortgage loans originated by WMC ("PMI Complaint"). PMI alleged that WMC "made extensive representations and warranties" about the underwriting of its mortgage loans and the accuracy of the information underlying such loans. PMI Complaint, ¶¶21, 33. According to PMI, an external investigation by Clayton into a sample of some of the thousands of WMC-originated loans revealed that WMC "breached various representations and warranties . . . because, *inter alia*, the loan-to-value ratio at the time of origination was greater than 100%; fraud, errors, misrepresentations, or gross negligence took place on the part of WMC . . . ; the loans did not comply with WMC's own underwriting standards at the time of origination; certain documents were missing; and/or WMC had failed to utilize a methodology in underwriting the loans that employed objective mathematical principles designed to determine that, at the time of origination, the borrower had the reasonable ability to make timely payments on the [m]ortgage [l]oans." *Id.*, ¶35.

177. According to the PMI Complaint, the Clayton investigation "demonstrate[d] a systemic failure by WMC to apply sound underwriting standards and practices which cuts across all of the [loans in the securitization]." In the defective loans, "Clayton discovered unreasonable stated income and/or misrepresentations of income and/or employment by the borrower, the large majority of which could have been discovered by WMC prior to transfer via simple diligence procedures." ¶36. Moreover, nearly a quarter of the loans sampled by Clayton were shown to contain "misrepresentations of occupancy by the borrower, another factor that could have easily been verified by WMC." *Id*.

178. WMC's reckless loan originating practices were noticed by the regulatory authorities as well. In June 2008, the Washington State Department of Financial Institutions, Division of Consumer Services filed a Statement of Charges and Notice of Intention to Enter an Order to Revoke License, Prohibit From Industry, Impose Fine, Order Restitution and Collect Investigation Fees against WMC Mortgage and its principal owners individually: Amy C. Brandt, WMC's CEO and President; Mark Walter, WMC's executive vice president; and Marc Becker, WMC's Director. The Statement of Charges was the result of a lengthy investigation in which WMC's and its business partners' books were subpoenaed. The investigation found that WMC had originated loans with unlicensed or unregistered mortgage brokers, understated amounts of finance charges on multiple loans, understated amounts of payments made to escrow companies, understated annual percentage rates by almost one-half of 1%, and committed many other violations of Washington State deceptive and unfair practices laws. This investigation is ongoing.

179. In January 2009, WMC Mortgage was sued in the United States District Court for the Eastern District of California for violations of the Truth In Lending Act, 15 U.S.C. § 1601, *et seq*. The plaintiff in that action is a mortgage borrower who alleges that, in an effort to maximize the number of loans sold to consumers and to maximize WMC's profits, WMC assured the plaintiff throughout the loan application process that the plaintiff would have low mortgage payments and failed to disclose the correct payment amounts or finance charges.

e. The Ameriquest Loan Sellers

1. Defendants Made Untrue Statements Of Material Facts About The Ameriquest Loan Sellers' Underwriting Standards And Practices

180. ACC Capital Holdings ("ACC Capital") was the nation's largest subprime lender. Argent was a wholly owned mortgage subsidiary of ACC Capital. Citigroup purchased Argent on August 31, 2007. Ameriquest Mortgage Company ("Ameriquest") was ACC Capital's wholly owned retail lending subsidiary. On August 1, 2007, Ameriquest announced that it would no longer be accepting loan applications. Ameriquest and Argent are, at times, collectively referred to herein as the "Ameriquest Loan Sellers."

181. Together, the Ameriquest Loan Sellers originated mortgage loans that were included in the pools for the following offerings:

Deal	Depositor Defendant	Direct Seller Bank Defendant
AMSI 2004-R7	Ameriquest Mortgage Securities Inc.	UBS
AMSI 2005-R1	Ameriquest Mortgage Securities Inc.	Deutsche Bank
AMSI 2005-R9	Ameriquest Mortgage Securities Inc.	Countrywide Securities Corporation
ARSI 2004-W7	Argent Securities Inc.	
ARSI 2005-W2	Argent Securities, Inc.	Merrill Lynch
BSABS 2005-HE11	Bear Stearns & Co. Inc. Asset Backed Securities I LLC	Bear Stearns & Co. Inc.
BSABS 2006-HE2	Bear Stearns & Co. Inc. Asset Backed Securities I LLC	Morgan Stanley
MSWFT 2003-MSA		Bank of America
PPSI 2004-MHQ1	Park Place Securities, Inc.	Goldman Sachs, Citigroup

182. The Ameriquest Loan Sellers originated some or all of the loans underlying $56,865,537 million of the Securities in Appendix A that Defendants offered or sold to Plaintiff.

183. The Offering Documents for all these Securities contained substantially if not exactly the same statements of material facts regarding the Ameriquest Loan Sellers'

underwriting standards and practices. For example, the prospectus supplement for AMSI 2004-R7 stated:

> The Mortgage Loans were originated generally in accordance with guidelines (the "Underwriting Guidelines") established by the Originators with one of the following income documentation types: "Full Documentation," "Limited Documentation" or "Stated Income." **The Underwriting Guidelines are primarily intended to evaluate: (1) the applicant's credit standing and repayment ability and (2) the value and adequacy of the mortgaged property as collateral. On a case-by-case basis, the Originators may determine that, based upon compensating factors, a loan applicant, not strictly qualifying under one of the Risk Categories described below, warrants an exception to the requirements set forth in the Underwriting Guidelines**. Compensating factors may include, but are not limited to, loan-to-value ratio, debt-to-income ratio, good credit history, stable employment history, length at current employment and time in residence at the applicant's current address. It is expected that a substantial number of the Mortgage Loans to be included in the mortgage pool will represent such underwriting exceptions.

184. The relevant Offering Documents also made statements of material facts about the Ameriquest Loan Sellers' appraisal standards and practices. For example, the same prospectus supplement stated:

> The Underwriting Guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and requires either (A) (i) an appraisal of the mortgaged property which conforms to the Uniform Standards of Professional Appraisal Practice and are generally on forms similar to those acceptable to Fannie Mae and Freddie Mac and (ii) a review of such appraisal, which review may be conducted by a representative of the applicable Originator or a fee appraiser and may include a desk review of the original appraisal or a drive-by review appraisal of the mortgaged property or (B) an insured automated valuation model. The Underwriting Guidelines permit loans with loan-to-value ratios at origination of up to 95%, subject to certain Risk Category limitations (as further described in that section). The maximum allowable loan-to-value ratio varies based upon the income documentation, property type, creditworthiness, debt service-to-income ratio of the applicant and the overall risks associated with the loan decision. Under the Underwriting Guidelines, the maximum loan-to-value ratio, including any second deeds of trust subordinate to the applicable Originator's first deed of trust, is 100%.

185. These statements are substantially similar, if not identical, to statements concerning the Ameriquest Loan Sellers' underwriting standards and practices found in the other

Prospectus Supplements for the Securities whose underlying mortgage loans were originated by Ameriquest and Argent.

186. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶187-196, they failed to disclose that the Ameriquest Loan Sellers: (i) systematically failed to follow their stated underwriting standards; (ii) allowed pervasive exceptions to their stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated their stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. The Ameriquest Loan Sellers Violated Their Stated Underwriting Standards

187. Defendants Banc of America, Barclays, Citigroup, Credit Suisse, J.P. Morgan (itself and as successor-in-interest to Bear Stearns), Greenwich Capital, Merrill Lynch, Morgan Stanley, and UBS underwrote, offered or sold to Plaintiff Securities containing loans originated by the Ameriquest Loan Sellers and made untrue statements to Plaintiff about the Ameriquest Loan Sellers' underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with the Ameriquest Loan Sellers, had access to the Ameriquest Loan Sellers' mortgage origination personnel and internal information, and conducted due diligence into the Ameriquest Loan Sellers using their own personnel and third-party loan review firms. As a result of the Wall Street Banks' access to and due diligence into the Ameriquest Loan Sellers, they were or reasonably should have been aware of the untruth of the statements about the Ameriquest Loan Sellers described above.

188. Both of the Ameriquest Loan Sellers appeared in the Comptroller of the Currency's list of the "Worst Ten in the Worst Ten," discussed above.

189. While the Ameriquest Loan Sellers and the Wall Street Banks stated that the Ameriquest Loan Sellers' underwriting of mortgages was designed to ensure a prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged

property as collateral, these statements were untrue. In fact, the Ameriquest Loan Sellers' underwriting practices were designed to originate as many mortgage loans as possible without regard to the ability of the borrowers to repay such mortgages, and the Ameriquest Loan Sellers systematically disregarded or misstated the income, assets, and employment status of borrowers seeking mortgage loans. Indeed, Argent and Ameriquest were the third and ninth among the Comptroller of the Currency's "Worst Ten" Mortgage Originators, respectively, based on the number of foreclosures as of March 22, 2010 on loans originated between 2005 and 2007.

190. According to a December 7, 2008, article in the *Miami Herald*, employees of Argent, including a former vice president named Orson Benn who is currently in prison for his role in the mortgage fraud schemes at Argent, actively assisted mortgage brokers in falsifying borrowers' financial information by "tutoring . . . mortgage brokers in the art of fraud." Employees "taught [brokers] how to doctor credit reports, coached them to inflate [borrower] income on loan applications, and helped them invent phantom jobs for borrowers" so that loans could be approved. According to Mr. Benn himself, "the accuracy of loan applications was not a priority." The *Miami Herald* examined the applications for 129 loans funded by Argent and "found at least 103 that contained false and misleading information" and "red flags: non-existent employers, grossly inflated salaries and sudden, drastic increases in the borrower's net worth." As noted by the article, "[t]he simplest way for a bank to confirm someone's income is to call the employer. But in at least two dozen cases, the applications show bogus telephone numbers for work references . . . ." Argent's lack of verification was so extreme that a "borrower [who] claimed to work a job that didn't exist . . . got enough money to buy four houses." Another borrower "claimed to work for a company that didn't exist" and got a $170,000 loan."

191. Moreover, according to a May 11, 2008 *Cleveland Plain Dealer* article, Jacquelyn Fishwick, who worked for more than two years at an Argent loan processing center near Chicago as an underwriter and account manager, noted that "some Argent employees played fast and loose with the rules" and stated "I personally saw some stuff I didn't agree with." Ms. Fishwick

saw [Argent] account managers remove documents from files and create documents by cutting and pasting them.

192. In the summer of 2007, Citigroup acquired Ameriquest and Argent. Richard Bowen, III, was Citibank s Business Chief Underwriter for correspondent lending who supervised 220 professional underwriters and exercised direct oversight of more than $90 billion of correspondent residential mortgages annually. Mr. Bowen was involved in the due diligence for that acquisition. In his April 7, 2010 testimony before the FCIC, Mr. Bowen testified that he advised against the acquisition because we sampled loans that were originated by Argent and we found large numbers that did not that were not underwritten according to the representations that were there. He further testified that the number of loans that contained untrue representations was significant enough to support his decision to oppose the acquisition (although Citigroup did not follow his recommendation).

193. Argent has been the subject of several lawsuits alleging fraud in its underwriting and lending practices. In January 2010, Argent, along with its parent company, Ameriquest, participated in a $22 million settlement of claims brought in the Northern District of Illinois by those who purchased mortgages after December 14, 2001 and who alleged fraudulent mortgage lending practices.

194. On August 20, 2007, *Business Week* reported in an article titled Did Big Lenders Cross the Line? that lawsuits by mortgage borrowers are increasingly blaming lenders lax underwriting standards for loan delinquency. In one lawsuit against Ameriquest, plaintiff Mary Overton alleges that loan officers at a Brooklyn, New York branch of Ameriquest coerced Overton into signing a loan. Unbeknownst to Ms. Overton, Ameriquest created fake tax returns, employment records, and a 401(k) to make it appear that the loan was affordable. According to other court filings, at least 40 other borrowers allege Ameriquest doctored loan documents or overstated borrowers income. According to *Business Week*, large lenders, such as Ameriquest, were motivated to engage in these practices to keep up loan volume and generate sales. The nationwide nature of these practices was confirmed by former Ameriquest employees in a

National Public Radio broadcast on May 12, 2007. A former Ameriquest loan officer in Tampa, Florida, recalled that in order to sell a loan "at any cost," managers encouraged loan officers to conceal the actual cost and interest rates on loans, and "would white out numbers on W2s and bank statements and fill in bigger amounts basically to qualify people for loans that they couldn't afford," a practice "called taking the loan to the art department." According to the National Public Radio broadcast, these practices were not isolated and were confirmed by former employees from Ameriquest offices around the country.

195. On October 22, 2007, *Mortgage Daily* reported that Wachovia filed a lawsuit against Ameriquest alleging that Ameriquest had not complied with repurchase requests on loans with fraudulent files. According to Wachovia's complaint, the 135 nonperforming loans sold to Wachovia on December 29, 2005, contained incorrect credit scores, incorrect employment status, and misstatements of the kind of home being financed. In addition, the complaint stated that the loans had not been underwritten pursuant to the underwriting procedures that Ameriquest agreed to apply and thus Ameriquest's representations and warranties regarding the loans were untrue and were breached by Ameriquest. *Mortgage Daily*, "Wachovia v. Ameriquest," October 22, 2007.

196. In her January 14, 2010 testimony before the FCIC, Illinois Attorney General Lisa Madigan explained how a multistate investigation of Ameriquest "revealed that the company engaged in the kinds of fraudulent practices that other predatory lenders subsequently emulated on a wide scale . . . includ[ing]: inflating home appraisals."

f. Option One

1. Defendants Made Untrue Statements Of Material Facts About Option One's Underwriting Standards And Practices

197. Option One originated Mortgage Loans that were included in the pools for the following offerings:

Deal	Depositor Defendant	Direct Seller Bank Defendant
ABFC 2005-HE1	Asset Backed Funding Corporation	Bank of America
OOMLT 2005-4	Option One Mortgage Acceptance Corporation	JP Morgan
OOMLT 2006-1	Option One Mortgage Acceptance Corporation	JP Morgan, Goldman Sachs
SABR 2004-OP1	Securitized Asset Backed Receivables LLC	Bank of America
SABR 2004-OP2	Securitized Asset Backed Receivables LLC	Citigroup, Goldman Sachs

198. Option One originated some or all of the loans underlying $25,558,371 million of the Securities in Appendix A that Defendants offered or sold to Plaintiff.

199. The Offering Documents all contained substantially similar, if not identical, statements of material facts regarding Option One's underwriting and appraisal standards and practices. For example, the prospectus supplement for Option One Mortgage Loan Trust 2006-1 stated:

> **The Mortgage Loans will have been originated generally in accordance with Option One's Guidelines** (the "Option One Underwriting Guidelines"). The Option One Underwriting Guidelines are primarily intended to assess the value of the mortgaged property, to evaluate the adequacy of such property as collateral for the mortgage loan and to assess the applicant's ability to repay the mortgage loan. The Mortgage Loans were also generally underwritten with a view toward resale in the secondary market. The Mortgage Loans generally bear higher rates of interest than mortgage loans that are originated in accordance with customary Fannie Mae and Freddie Mac standards.
>
> On a case-by-case basis, exceptions to the Option One Underwriting Guidelines are made where compensating factors exist. Except as specifically stated herein, the Option One Underwriting Guidelines are the same for first lien mortgage loans and second lien mortgage loans.
>
> Each mortgage loan applicant completes an application that includes information with respect to the applicant's liabilities, income, credit history, employment history and personal information. The Option One Underwriting Guidelines require a credit report and, if available, a credit score on each applicant from a credit-reporting agency. The credit report typically contains information relating to such matters as credit history with local and national merchants and lenders, installment debt payments and any record of defaults, bankruptcies, repossessions

> or judgments. A credit score is a statistical ranking of likely future credit performance developed by Fair, Isaac and Co., Inc. and made available through the three national credit data repositories—Equifax, TransUnion and Experian.
>
> Mortgaged properties that are to secure mortgage loans generally are appraised by qualified independent appraisers. Such appraisers inspect and appraise the subject property and verify that such property is in acceptable condition. Following each appraisal, the appraiser prepares a report which includes a market value analysis based on recent sales of comparable homes in the area and, when deemed appropriate, replacement cost analysis based on the current cost of constructing a similar home. **All appraisals are required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are generally on forms acceptable to Fannie Mae and Freddie Mac.**
>
> The Option One Underwriting Guidelines require that mortgage loans be underwritten in a standardized procedure which complies with applicable federal and state laws and regulations and require Option One's underwriters to be satisfied that the value of the property being financed, as indicated by an appraisal supports the loan balance.

200. The above statements of material facts were untrue when made because, as demonstrated below in ¶¶ 201-209, they failed to disclose that Option One: (i) systematically failed to follow its stated underwriting standards; (ii) allowed pervasive exceptions to its stated underwriting standards in the absence of compensating factors; (iii) disregarded credit quality in favor of generating increased loan volume; and (iv) violated its stated appraisal standards and in many instances materially inflated the values of the underlying mortgage properties in the loan origination and underwriting process.

2. Option One Violated Its Stated Underwriting Standards

201. Defendants Banc of America and Barclays underwrote, offered or sold to Plaintiff Securities containing loans originated by Option One and made untrue statements to Plaintiff about Option One's underwriting and appraisal standards and practices and the loans. These Wall Street Banks had extensive business relationships with Option One, had access to Option One's mortgage origination personnel and internal information, and conducted due diligence into Option One using their own personnel and third-party loan review firms. As a result of the Wall

Street Banks' access to and due diligence into Option One, they were or reasonably should have been aware of the untruth of the statements about Option One described above.

202. Option One was a national mortgage lender formerly owned by H&R Block, Inc., until its assets were sold to American Home Mortgage Servicing, Inc., in April 2008. Option One is the sixth worst mortgage originator, by number of foreclosures as of March 22, 2010, according to the Comptroller of the Currency's "Ten Worst in the Ten Worst" list.

203. Former employees with first-hand knowledge have confirmed that Option One violated its stated standards for underwriting and appraisals. For example, CW 52, a former underwriter at Option One in Atlanta, Georgia from 2005 to 2006, said that if an underwriter denied a loan and an account executive complained, the loan was escalated to the branch manager, who then got in touch with the underwriter. With account executives, "the biggest screamer and shaker of trees gets the most fruit." For a "top-producing" account executive, whatever red flags there were would be "overlooked," and invariably the loan would be pushed through. CW 52 estimated that at least 50% of the total loan volume in Option One's Atlanta branch was approved in this manner. CW 52 also stated that a loan applicant could tell "a straight up lie" about his income, but the untrue information would be overlooked and the loan would be approved, despite CW 52's initial rejection of the application.

204. Similarly, CW 53, an underwriter at Option One's Marietta, Georgia office in 2005, reported that Option One approved stated income loans "knowing good and well that those people did not make that much money in the position they were in." Likewise, CW 54, an underwriter for Option One in Hawaii from November 2004 to January 2006, stated that "the overwhelming majority of stated income loans were crafted," meaning that the borrowers were not making "anywhere near" what they claimed. However, CW 54 stated that he felt pressured to push loans through because every loan generated income and "[i]f you applied any level of rational thought, you were frowned upon."

205. With respect to artificially inflated appraisals, CW 52 stated that "[o]f course they inflated values" and that if an underwriter questioned the appraised value, the account executive

and branch manager would override the underwriter's objection, as with any other red flag in a loan file. Similarly, CW 55, a staff review appraiser for Option One working throughout the western United States from January 2004 to May 2007, stated that the appraisals "were all bad." He considered the appraisals borderline fraudulent, not merely incompetent, but was unable to prevent loans based on the flawed appraisals. He explained, "Our job is supposed to be stopping bad loans, but no one stopped them." When CW 55 objected to loans because of flawed appraisals, the loan officer would complain to the branch manager, who would complain to the Appraisals Department at headquarters in Irvine, California, and on up the chain until someone high enough in the Underwriting and Sales Department said to go forward with the loan.

206. Option One was motivated to violate its underwriting and appraisal standards in order to increase the volume of loans it could sell to Wall Street Banks to be securitized. CW 56, an Assistant Vice President of Option One from 2005 to 2007, worked in the Correspondent Lending department, which purchased loans from small mortgage companies. CW 56 stated that Option One purchased loans that raised concerns under the stated guidelines and that when he raised such concerns he was essentially told, "Shut up, Wall Street will buy it; don't worry about it."

207. Similarly, CW 57, who was an underwriter at Option One in Pleasanton, California from October 2005 to October 2007, stated that "[i]f [a borrower] had a FICO and a pulse, they could get a loan" from Option One. CW 57 also stated that:

> I caught blatant fraud, and the [account executive] would still fight for it. [The account executives and managers] would fight me because they didn't care. They knew they were going to sell it on the secondary market, and they didn't care because it wasn't their money. They were going to get paid regardless. . . . At Option One they didn't have a portfolio; they sold everything, so they didn't care. . . . [Option One] didn't have to worry about it, because once they're done with these crappy loans, they'd sell them off. They were the investors' problem.

208. On June 3, 2008, the Attorney General for the Commonwealth of Massachusetts filed an action against Option One, and its past and present parent companies, for their unfair and deceptive origination and servicing of mortgage loans (the "Massachusetts Option One

Complaint"). According to the Attorney General, since 2004, Option One "increasingly disregarded underwriting standards, created incentives for loan officers and brokers to disregard the interests of the borrowers and steer them into high-cost loans, and originated thousands of loans that [Option One] knew or should have known the borrowers would be unable to pay, all in an effort to increase loan origination volume so as to profit from the practice of packaging and selling the vast majority of [Option One's] residential subprime loans to the secondary market." Massachusetts Option One Complaint, ¶ 4. The Attorney General's complaint alleges that Option One's agents and brokers "frequently overstated an applicant's income and/or ability to pay, and inflated the appraised value of the applicant's home," and that Option One "avoided implementing reasonable measures that would have prevented or limited these fraudulent practices." *Id.*, ¶ 8. Option One's "origination policies . . . employed from 2004 through 2007 have resulted in an explosion of foreclosures." *Id.*, ¶ 10.

209. On June 4, 2008, the *Wall Street Journal* reported that the Massachusetts Attorney General's lawsuit "charges Option One with 'recklessly facilitating the foreclosure of borrowers' homes,'" and that Option One "proposed terms 'that are as unfair and unsustainable as the original loans.'"

g. Additional Mortgage Originators

210. Other mortgage originators that provided loans for the pools underlying the Securities that the Defendants underwrote, offered or sold to Plaintiff included Aames, Accredited Home Lenders, Inc. ("Accredited"), and Equifirst, among others. The Offering Documents for each securitization underwritten, offered or sold to Plaintiff by the Defendants set forth the underwriting standards for the mortgage originators of the loans included in that securitization. These statements of material facts were untrue and omitted material facts because mortgage originators industry-wide systematically failed to follow their stated underwriting standards.

211. For example, former employees of Accredited confirm the lack of underwriting and appraisal standards. According to CW 58, a Corporate Underwriter at Accredited between

June 2004 and March 2005, managers on the sales side frequently overruled underwriting decisions. CW 58 noted such loans were tracked internally, and it was well-known they performed poorly. Moreover, according to CW 58, in early 2005, Accredited approved risky loans that did not comply with its own underwriting guidelines in an effort to reach monthly production targets.

212. According to CW 59, a Corporate Underwriter at Accredited between August 2003 and February 2006 in Tampa, Florida, Operations Managers and Senior Operations Managers constantly overruled decisions to reject loan applications. According to CW 59, "The problem with the whole system was the overrides. The overrides were rampant. If the borrower breathed, he got the loan."

213. According to CW 60, a Corporate Underwriter at Accredited in San Diego between May 2002 and November 2006, Accredited's underwriters who reviewed and approved or denied loans were being overridden, frequently resulting in loans that did not comply with underwriting guidelines. According to CW 60, the number of overrides grew so large that Accredited was forced to institute a system to track such overrides. The system included a box on the loan file that an underwriter needed to check if a higher-level manager approved the loan "as a business decision" over the recommendation of the underwriter.

214. According to CW 61, a Corporate Underwriter at Accredited between June 2000 and March 2007 in both the San Diego, California, and Austin, Texas, offices, "[a]t the end of the month, we were handed loan files and told to just sign them with no audit."

215. According to CW 62, the Chief Appraiser at Accredited for five years between 2002 and June 2007, Accredited allowed both corporate underwriters and sales managers to override the decisions of licensed property appraisers. In many cases, an appraisal reviewer working for Accredited would reject a loan application after concluding that the appraisal submitted with the application was inflated. According to CW 62, the account executive who submitted the loan application would become annoyed by the rejection and appeal the decision to a sales manager who then would overturn the appraisal reviewer's decision without any valid

justification. According to CW 62, overrides of appraisers decisions were rampant: As of June 2006, between 12% and 15% of our business was being done through management overrides.

216. On May 1, 2009, Accredited filed for bankruptcy. Accredited faced huge demands from Wall Street Banks to repurchase loans. In bankruptcy filings, Accredited stated that it faces more than $200 million in repurchase claims. The Wall Street Banks assert that certain loans they purchased are defective and violate the purchase agreements they made with Accredited because they contain serious mistakes or borrowers defaulted too quickly.

217. On information and belief, substantially similar violations of underwriting and appraisal standards were commonplace at Aames, Equifirst, and the other mortgage originators whose loans were included in the securitizations in which Defendants offered or sold Securities to Plaintiff.

VI. DEFENDANTS MADE MATERIAL UNTRUE STATEMENTS AND OMISSIONS

218. The Depositor Defendants acquired mortgage loans and deposited them into issuing trusts, and the Wall Street Bank Defendants offered or sold the Securities to Plaintiff through the Offering Documents, other documents as described herein, and oral statements made directly to Plaintiff. Each Depositor Defendant and Wall Street Bank Defendant participated in drafting the prospectus supplement or private placement memorandum for each securitization issued by that Depositor or underwritten by that Wall Street Bank. Each Wall Street Bank Defendant circulated the prospectus supplement or private placement memorandum for each securitization underwritten by that Wall Street Bank to the market. In addition, each Depositor Defendant and Wall Street Bank Defendant was identified in these documents as the issuer or underwriter, respectively, of the Securities, and approved the versions of these documents that were circulated to the market and delivered to Plaintiff by the Wall Street Bank. In instances when Plaintiff purchased Securities from Wall Street Bank Defendants or other broker-dealers that did not underwrite the initial offering of the Securities, the selling Wall Street Bank Defendant or other broker-dealer provided Plaintiff copies of the offering materials from the initial offering that had been prepared by the underwriting Wall Street Bank Defendants. The

Wall Street Bank Defendants that underwrote each offering of Securities actively encouraged secondary market transactions in those Securities by disseminating the applicable prospectus supplements and other offering materials to the market, acting as de facto market makers in the secondary market for those Securities, and providing price quotes for those Securities.

219. The Defendants' Offering Documents contained statements of material facts regarding, *inter alia*, (i) the underwriting process and standards by which the loans held in the issuing trusts were originated; (ii) the standards and guidelines used by the Depositor Defendants and Wall Street Bank Defendants when evaluating and acquiring the loans; and (iii) the value of the underlying real estate securing the loans pooled in the issuing trusts, including the loan-to-value ratios and the appraisal standards by which such real estate values were measured.

220. The Offering Documents emphasized the underwriting standards used to originate the underlying mortgage loans. Indeed, each Prospectus Supplement set forth the underwriting standards for the Mortgage Originators who originated a substantial portion of the underlying mortgages in that issuing trust. Contrary to these statements of material facts, many of these Mortgage Originators of the underlying mortgages did not originate loans in accordance with their stated underwriting standards. Rather, as set forth above, these Mortgage Originators extended loans that did not comply with their underwriting standards in order to increase loan volume regardless of the borrowers' ability to meet their obligations.

221. Additionally, the Offering Documents often made the statement of material facts, in sum or substance, that "all prospective Mortgage Loans will be subject to the underwriting standards adopted" herein; provided the Wall Street Banks' underwriting standards; or identified significant Mortgage Originators and provided the underwriting standards utilized by those Originators.

222. The written and oral statements of material facts regarding the underwriting and appraisal standards utilized by the Mortgage Originators and the Defendants' own due diligence were untrue and omitted material facts. Indeed, as detailed above, many of the identified

Mortgage Originators systematically violated their stated underwriting and appraisal guidelines, and the Wall Street Bank Defendants made untrue statements about their own due diligence.

a. Morgan Stanley's Untrue Statements Of Material Facts And Omissions

223. Morgan Stanley offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $98,559,337. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Banks, is contained in the attached Appendix A.

224. Morgan Stanley sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime lenders to purchase loans, offering to pay more for mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors. According to a December 6, 2007 article in the *New York Times*, "Wary of Risk, Bankers Sold Shaky Mortgage Debt," Morgan Stanley cultivated a relationship with New Century. As a result of this relationship, Morgan Stanley expanded its subprime underwriting business by 25% from 2004 to 2006. According to a former New Century executive, Morgan Stanley agreed to pay above-market prices for loans in return for a steady supply of mortgages. According to the article, the former New Century executive said: "Morgan would be aggressive and say, 'We want to lock you in for $2 billion a month.'"

225. Through its affiliates and subsidiaries, Morgan Stanley was able to control nearly every step in the mortgage securitization process. For example, Morgan Stanley formed numerous SPVs including: (1) Depositor Defendant Morgan Stanley ABS Capital I Inc., which served as the depositor and issuer for offerings of RMBS; (2) Morgan Stanley Capital I Inc., which served as the depositor and issuer for offerings of RMBS; and (3) Morgan Stanley Mortgage Capital Inc., which originated or otherwise acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of RMBS. Defendant Morgan

Stanley offered or sold the Securities to Plaintiff. Morgan Stanley also provided financial research on RMBS and related structured products.

226. In connection with its offer or sale of Securities to Plaintiff, Morgan Stanley sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Morgan Stanley also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Morgan Stanley sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Morgan Stanley also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting Securities, the data, and Morgan Stanley's due diligence of the Mortgage Originators' underwriting practices. Morgan Stanley did not allow Plaintiff to keep the pitch books.

227. In the Offering Documents, Morgan Stanley made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which New Century originated all or a significant amount of the underlying mortgage loans, Morgan Stanley reprinted New Century's "Underwriting Guidelines," which stated, in sum or substance, that (a) New Century's guidelines were "intended to assess the borrower's ability to repay the mortgage loan"; (b) New Century reviewed not only the value of the property, but also considered "the mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type of use of the mortgaged property"; (c) "the mortgage loans [were] originated in accordance with the underwriting guidelines"; and (d) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶¶93-95. Morgan Stanley made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including Aames and the Ameriquest Loan Sellers. *See* ¶¶183-186, 217.

228. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Morgan Stanley stated, for example, that New Century commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were "required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac," and that were reviewed "by a qualified employee" of New Century or by an appraiser retained by New Century. *See* ¶ 95. Morgan Stanley made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Aames and the Ameriquest Loan Sellers. *See* ¶¶ 183-186, 217. In offerings in which a Mortgage Originator was not identified in the Offering Documents, Morgan Stanley stated that "the depositor will not include any loan in the trust fund for any series of securities if anything has come to the depositor's attention that could cause it to believe that the representations and warranties of a seller or originator will not be accurate and complete in all material respects in respect of the loan as of the date of initial issuance of the related series of securities."

229. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Morgan Stanley made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Morgan Stanley's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

230. Morgan Stanley made additional oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Morgan Stanley representatives occurred on or about July 13, July 22, and September 9, 2004 and May 16 and October 3, 2006. Some of these meetings occurred in Plaintiff's offices in Concord,

Massachusetts. During these meetings, Morgan Stanley made statements of material facts regarding Morgan Stanley's upcoming RMBS deals, and assured Plaintiff that Morgan Stanley conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance. Specifically, Morgan Stanley made oral statements of material facts that it performed strong due diligence of New Century, stating to Plaintiff that Morgan Stanley even had an employee on site at New Century to ensure compliance with the underwriting standards described in the Offering Documents.

231. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, the principal Mortgage Originators in the Morgan Stanley deals violated their stated underwriting and appraisal standards. Moreover, Morgan Stanley's statements regarding its own due diligence were untrue and contained material omissions.

232. Morgan Stanley outsourced some due diligence by contracting with external firms including Clayton to review whether the loans included in the RMBS that it underwrote complied with the Mortgage Originators' stated standards. As discussed in ¶¶ 60-66, Clayton and Bohan have been investigated by the New York Attorney General, SEC, and Massachusetts and Connecticut regulators for engaging in improper underwriting practices, and in January 2008, the New York Attorney General granted Clayton immunity from prosecution in exchange for documents and testimony regarding its due diligence reports.

233. In its most recent annual report, filed on Form 10-K with the SEC on February 26, 2010, Morgan Stanley confirmed that it is under direct investigation and is "responding to subpoenas and requests for information from certain regulatory and Governmental entities concerning the origination, purchase, securitization and servicing of subprime and non-subprime residential mortgages and related issues including collateralized debt obligations and credit default swaps backed by or referencing mortgage pass through certificates."

234. On June 24, 2010, the Massachusetts Attorney General announced that Morgan Stanley had agreed to pay $102 million to the Commonwealth and mortgage borrowers in the Commonwealth to settle charges related to "Morgan Stanley's role in facilitating predatory lending by New Century." Attorney General Coakley stated that:

> Morgan Stanley funded, purchased and securitized New Century loans. Morgan developed an intimate knowledge of New Century's business over time. And they uncovered signals pretty early on that the lending practices of New Century were not sound. Morgan Stanley continued to fund and securitize subprime loans even as New Century's bad loans were causing the lender to collapse . . . .
>
> Morgan knew because as part of its business it had to review New Century's loan portfolio in that relationship. Morgan discovered that New Century was making loans that we allege were designed to fail. They started with low teaser rates, but then they kicked to higher interest rates that borrowers predictably could not afford and borrowers could only repay by financing.
>
> ***
>
> Morgan Stanley had a number of red flags that these practices were unfair. For instance, Morgan Stanley knew that New Century was using what we call "no doc loans," that is no documentation, loans with no paperwork, to the point of abuse. New Century was not following its own underwriting guidelines for these loans and New Century failed to account for whether borrowers could actually make payments after the introductory or the so-called teaser rates on the loans have expired.
>
> Morgan initially refused to fund these loans, but after New Century threatened to pull their business, a Morgan banker approved hundreds of loans that their own compliance team had rejected and Morgan then softened its oversight to let New Century's business continue. [Morgan Stanley c]ontinued to fund New Century and provided the key financing that was needed to so that New Century could continue to make those loans.
>
> ***
>
> [O]ur investigation revealed that Morgan Stanley backed loans for homeowners that they knew, or should have known, were destined to fail and then they failed to disclose the riskiness of those loans to investors.

235. The Assurance of Discontinuance that the Massachusetts Attorney General filed in Court in connection with the Morgan Stanley settlement specifically identifies untrue statements in the loan tapes Morgan Stanley provided to investors such as Plaintiff:

> On the loan tapes provided to investors in Morgan Stanley securitizations of New Century loans, the DTI ratio was typically calculated based on the teaser rate and did not reflect the Fully Indexed Mortgage Payment. Incorporating the Fully Indexed Mortgage Payment in the DTI ratio using Morgan Stanley's reset DTI analysis described above, the average DTI on the New Century tapes would be substantially higher. A large number of the ARM loans would have Fully Indexed DTI Ratios on this basis that were greater than 55%. Based on Morgan Stanley's analysis described above, such borrowers could not afford to repay these loans in accordance with their terms without refinancing. Such loans comprised a significant portion of the overall loan pools.
>
> ***
>
> As early as October 2005, Morgan Stanley's diligence team determined, in reviewing and rejecting loans for purchase, that the stated income on a number of New Century loans was unreasonable. In early 2006, a Morgan Stanley employee commented that stated income credit was not adequately evaluated by New Century. About 36% of the loans originated by New Century and reviewed by Clayton in the diligence process were stated income loans. On average, the stated income of these borrowers was approximately 42% higher than the income of fully documented borrowers. The average stated income of these borrowers on an annual basis was about $115,000.
>
> Assuming that the stated income was closer to or similar to fully documented income, the average actual DTI ratio for stated income borrowers would be much higher than the DTI ratios reported by New Century in the loan tapes (averaging 41% for stated income loans), and a substantial number of these borrowers would have DTI ratios on this basis exceeding 55%.

236. The statements of material facts in the documents Morgan Stanley sent to Plaintiff were untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, subsequent investigations and lawsuits have demonstrated that New Century made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; New Century management "turned a blind eye" to risky loan originations; and "New Century engaged in a number of significant improper and imprudent practices related to its loan originations." *See* ¶¶ 98-112. Moreover, former New Century employees witnessed firsthand how exceptions to New Century's underwriting became the "norm" because employees had to do whatever was necessary to increase loan originations. *See* ¶¶ 106-108. The SEC

recently charged former New Century officers with making untrue assurances to the market about the company's "adhere[nce] to high origination standards in order to sell [its] loan products in the secondary market." *See* ¶110. The other Mortgage Originators of loans underlying the Securities initially offered by Morgan Stanley similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

237. The statements of material facts in the documents Morgan Stanley sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶51-57. A former New Century underwriter recently confirmed New Century's use of inflated appraisals in testimony before the FCIC, stating that New Century hired fee appraisers who were "pressured" into inflating property values, at times by tampering with the property, "fearing if they didn't, they would lose future business and their livelihoods." ¶54. Another industry insider testified before the FCIC that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶56.

238. Morgan Stanley's statements of material facts were also untrue because other key data provided to Plaintiff by Morgan Stanley were untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

239. In sum or substance, Morgan Stanley stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as

required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

240. The result of the untrue statements and omissions described above is that the Securities Morgan Stanley underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Morgan Stanley to Plaintiff.

b. Bear Stearns' Untrue Statements Of Material Facts Aand Omissions

241. Bear Stearns offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $125,395,473. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

242. Bear Stearns was a pioneer in mortgage securitization. Through its affiliates and subsidiaries, Bear Stearns was able to control nearly every step in the mortgage securitization process. For example, to make certain the mortgage pipeline was always full, Bear Stearns owned and operated three mortgage loan origination subsidiaries – EMC Mortgage Corporation ("EMC"), Bear Stearns Residential Mortgage Corporation ("Bear Stearns Mortgage Corp."), and Encore Credit Corp. ("Encore"). EMC originated loans that were securitized by Bear Stearns,

served as the sponsor for many of Bear Stearns offerings, and serviced the loans underlying the offerings after the offerings were complete.

243. Bear Stearns also formed numerous SPVs to facilitate the issuance of RMBS. These entities included Depositor Defendant Bear Stearns Asset Backed Securities I, LLC (BSABS), which served as the depositor and issuer for Bear Stearns offerings. Bear Stearns offered or sold the Securities to Plaintiff. Bear Stearns also provided financial research on RMBS and related structured products.

244. Bear Stearns profited at every step in the securitization process, as it collected: (1) loan-origination fees; (2) gains on sale of the mortgages to securitization trusts; (3) management fees from hedge funds and other investment vehicles that purchased mortgage-backed structured products; (4) underwriting fees; and (5) servicing fees. Bear Stearns summarized its securitization business as follows: Our vertically integrated franchise allows us to access every step of the mortgage process, including origination, securitization, distribution and servicing. According to *Inside Mortgage Finance*, a leading trade publication whose data is used by the federal government, from 2004 to 2007 Bear Stearns underwrote more than $97 billion in subprime RMBS.

245. In connection with its offer or sale of Securities to Plaintiff, Bear Stearns sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Bear Stearns also sent Plaintiff numerous other documents, including term sheets and loan tapes. The loan tapes Bear Stearns sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Bear Stearns also showed Plaintiff pitch books and other materials promoting the Mortgage Originators underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Bear Stearns due diligence of the

Mortgage Originators' underwriting practices. Bear Stearns did not allow Plaintiff to keep the pitch books.

246. In the Offering Documents, Bear Stearns made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, Bear Stearns stated that: (1) the Mortgage Originators' underwriting guidelines were intended to assess the borrowers' ability to repay the mortgage loans and considered the borrowers' credit history, repayment ability, debt service-to-income ratio, and other factors; (2) the Mortgage Originators assessed the value of the properties; and (3) exceptions to the Mortgage Originators' underwriting guidelines would only be made where compensating factors existed.

247. Moreover, the Offering Documents included statements of material facts regarding the originators' appraisal guidelines. Bear Stearns stated, for example, that the Mortgage Originators commissioned appraisals by qualified independent appraisers who prepared appraisals that conformed to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation.

248. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Bear Stearns made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Bear Stearns' due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

249. Bear Stearns made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Bear Stearns representatives occurred on or about March 18, September 22, and November, 14, 2005, and May 25, July 19, and August 3, 2006. Some of these meetings occurred in Plaintiff's offices in Concord, Massachusetts, and others were via teleconference. During these meetings, Bear

Stearns employees made statements of material facts regarding upcoming RMBS deals, and assured Plaintiff that Bear Stearns conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines. Among other things, Bear Stearns stated that its due diligence included sampling loans to check underwriting process, documentation, valuations, and compliance.

250. Specifically, Bear Stearns repeatedly stated that it used Clayton to perform due diligence on the mortgage loans and to ensure mortgage originator compliance with stated underwriting standards. In June of 2007, the New York Attorney General subpoenaed documents from Clayton and another due diligence firm, Bohan Group ("Bohan"), seeking information regarding whether Wall Street Banks withheld information that should have been disclosed to investors. Similar subpoenas were issued by the SEC and Massachusetts and Connecticut regulators.

251. On January 27, 2008, the New York Attorney General entered into an agreement with Clayton for immunity from prosecution in exchange for additional documents and testimony regarding its due diligence reports. Both the *New York Times* and *Wall Street Journal* published articles detailing the agreement and Clayton's expected testimony. According to the *New York Times* (J. Anderson and V. Bajaj, "Reviewer of Subprime Loans Agrees to Aid Inquiry of Banks," Jan. 27, 2008), Clayton "communicated daily with bankers putting together securities," and that "starting in 2005, it saw a significant deterioration of lending standards and a parallel jump in lending exceptions." In response, rather than change the "broad language written in prospectuses" to reflect the environment, "some investment banks directed Clayton to halve the sample of loans it evaluated in each portfolio."

252. An article in the *Los Angeles Times* (E. Reckard, "Sub-prime Mortgage Watchdogs Kept On Leash; Loan Checkers Say Their Warnings of Risk Met With Indifference," March 18, 2008) revealed that Clayton and Bohan employees "raised plenty of red flags about flaws [in subprime home loans] so serious that mortgages should have been rejected outright "

such as borrowers incomes that seemed inflated or documents that looked fake but the problems were glossed over, ignored, and stricken from the reports.

253. Each of Bear Stearns statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, the principal Mortgage Originators in the Bear Stearns deals systematically violated their stated underwriting and appraisal standards. Moreover, Bear Stearns additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

254. In late 2008, Ambac Assurance Corp. (Ambac) commenced an action against EMC and Bear Stearns in the United States District Court for the Southern District of New York alleging that the companies had built a house of cards through rampant misrepresentations in the origination of mortgage loans used in securitizations. *Ambac Assurance Corp. v. EMC Mortgage Corp.*, No. 08-cv-9464 (S.D.N.Y.) (the Ambac Complaint). On November 6, 2008, an article in the Associated Press reported the following with respect to the Ambac Complaint:

> Bear Stearns leveraged its reputation and dominance in mortgage finance to entice companies such as Ambac to insure loans plagued by rampant fraud. . . . Bear Stearns promised that its mortgage loans originated through proper means and didn t result from fraud, misrepresentation or gross negligence. Yet . . . Ambac discovered widespread breaches of representations in almost 80 percent of the documents supporting 695 defaulted loans it studied.

Larry Neumeister, *Lawsuit: Bear Stearns Built A 'House of Cards,'* Associated Press, November 6, 2008.

255. According to the Ambac Complaint, after incurring more than $640 million in losses, Ambac conducted a study of 1,486 loans with an aggregate principal of approximately $86.9 million. The results of that review found:

> Of these 1486 loans, 1332, over 89%, breached one or more of the representations and warranties that EMC had made to Ambac. The most prevalent and troubling of the breaches identified by Ambac across all four Transactions involve (1) rampant misrepresentations about borrower income, employment, assets, and intentions to occupy the purchased properties, and (2) the loan originators abject failures to adhere to proper and prudent mortgage-lending practices, including their own underwriting guidelines.

Ambac Complaint at ¶6.

256. The Ambac Complaint lays out, in detail, the Bear Stearns "securitization machine" and EMC's crucial, and damaging, role within that machine:

> [EMC] acted both as an "originator" and an "aggregator" of an enormous volume of residential mortgage loans, "with the ultimate strategy of securitization into an array of Bear Stearns's securitizations." EMC repeatedly executed on that strategy, in many cases retaining the rights to act as servicer of the mortgage loans that it securitized. In its role as aggregator, EMC prescribed loan origination standards and approved the underwriting guidelines of a large number of mortgage lenders"

Id. at ¶18.

257. EMC expanded its loan generation to supply Bear Stearns' securitizations and, at the same time, reassured the market that it would maintain the quality of the securitizations. *Id.* at ¶26. But, in fact, "EMC's inventory of mortgage loans was replete with loans (i) originated by fraud, material misrepresentations, or omissions and (ii) underwritten without regard to prudent standards or the fundamental principles of mortgage lending, which require a good-faith assessment of the borrower's ability and willingness to repay the loan." *Id.* at ¶27. EMC "convince[d] investors that the securities it sold were a safe and profitable investment, despite the fact that, unbeknownst to Ambac and the market at large, those securities were backed by unjustifiably risky loans." *Id.* at ¶25.

258. The Ambac Complaint further makes clear that EMC and Bear Stearns expanded acceptance and financing of "no doc" and "low doc" loan products "with a marked and dangerous decline in the rigor and discipline with which [the companies] approached loan origination and underwriting." *Id.* at ¶28. Thus, EMC's inventory of mortgage loans "was replete with loans originated by fraud or underwritten pursuant to imprudent or non-existent standards." *Id.* at ¶¶29-30.

259. On March 16, 2009, the District Court denied EMC's motion to strike portions of Ambac's Complaint that EMC asserted were "inflammatory" because they portrayed Bear Stearns and EMC as "corporate villains . . . responsible for the mortgage-backed security crisis."

In its decision denying EMC's motion, the Court held that allegations such as that "[t]he Bear Stearns securitization machine was a house of cards, supported not by real value and sound practices but by Bear Stearns' appetite for loans and disregard as to the risks those loans presented" were not unfairly prejudicial, but rather were relevant to whether EMC "materially breached its representations and warranties" . . . regarding, among other things, "the origination, underwriting, servicing, and other key attributes of the loans[.]" (Quoting Ambac's Complaint; alterations in original.) Ambac's action against EMC is ongoing, and the parties are currently engaged in pretrial discovery.

260. Matt Van Leeuwen, a mortgage analyst with EMC between 2004 and 2006, has also confirmed the above allegations of negligent underwriting practices. Van Leeuwen revealed that (a) Bear Stearns pushed EMC analysts to perform their loan analyses of the underlying mortgages in only one to three days so that Bear Stearns would not have to hold the loans on its books; (b) EMC analysts were encouraged to falsify loan data (such as FICO scores) if that information was missing from the loan data and the mortgage originators did not respond to requests for that information; (c) the documentation level (*i.e.,* no documentation, partial documentation) of the loans was often incorrectly identified; and (d) rather than going back to the mortgage originator for clarification, such as verification of income, Bear Stearns would avoid investigating and make the loan "fit." Teri Buhl, "More Corruption: Bear Stearns Falsified Information as Raters Shrugged," *The Atlantic*, May 2010.

261. The statements of material facts in the documents Bear Stearns sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines.

262. The statements of material facts in the documents Bear Stearns sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit

enhancement to be untrue. *See, e.g.*, ¶¶51-57. An industry insider testified before the FCIC and stated that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶56.

263. Bear Stearns' statements of material facts were also untrue because other key data provided to Plaintiff were untrue and contained material omissions. For example, the data often identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of credit quality and likelihood of default.

264. In sum or substance, Bear Stearns stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

265. The result of the untrue statements and omissions described above is that the Securities Bear Stearns underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or

repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Bear Stearns to Plaintiff.

266. Defendant J.P. Morgan is the successor-in-interest to Bear Stearns as a result of the merger of Bear Stearns with and into J.P. Morgan on October 1, 2008, with J.P. Morgan Securities as the surviving entity.

c. Citigroup's Untrue Statements Of Material Facts And Omissions

267. Citigroup offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $209,970,924. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

268. Citigroup sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime mortgage originators including New Century and the Ameriquest Loan Sellers for the purchase of subprime loans to be pooled and securitized as RMBS, offering to pay more for mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors. New Century and the Ameriquest Loan Sellers were some of the largest Mortgage Originators in the Securities underwritten, offered, or sold by Citigroup to Plaintiff.

269. To facilitate the sale of RMBS, Citigroup formed SPVs that originated or otherwise acquired residential mortgage loans to be securitized and served as the sponsor, depositor, and issuer in numerous offerings of RMBS. Defendant Citigroup offered or sold the Securities to Plaintiff. Citigroup also provided financial research on RMBS and related structured products.

270. In connection with its offer or sale of Securities to Plaintiff, Citigroup sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements, and for one deal, a private placement agreement. Citigroup also sent Plaintiff numerous other documents, including term sheets and

"loan tapes." The loan tapes Citigroup sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Citigroup also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Citigroup's due diligence of the Mortgage Originators' underwriting practices. Citigroup did not allow Plaintiff to keep the pitch books.

271. In the Offering Documents, Citigroup made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which New Century originated all or a significant amount of the underlying mortgage loans, Citigroup reprinted New Century's "Underwriting Guidelines," which stated in sum or substance, that (a) New Century's guidelines were "intended to assess the borrower's ability to repay the mortgage loan"; (b) New Century not only reviewed the value of the property, but also considered "the mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type of use of the mortgaged property"; (c) "the mortgage loans [were] originated in accordance with the underwriting guidelines"; and (d) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶¶93-95. Citigroup made similar statements of material facts for loans originated by other Mortgage Originators, including the Ameriquest Loan Sellers. *See* Section V.

272. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Citigroup stated, for example, that New Century commissioned an appraisal of mortgaged properties by "qualified independent appraisers" who prepared an appraisal report that is "required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac," and

that was reviewed "by a qualified employee" of New Century or by an appraiser retained by New Century. *See* ¶ 95. Citigroup made similar statements of material facts for appraisals commissioned by or performed or reviewed by other Mortgage Originators, including the Ameriquest Loan Sellers. *See* Section V.

273. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Citigroup made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Citigroup's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

274. Citigroup made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Citigroup occurred on or about September 30, 2004; June 23, October 31, and December 8, 2005; and May 22, August 14, and December 7, 2006. Some of these meetings occurred in Plaintiff's offices in Concord, Massachusetts. During these meetings, Citigroup made statements of material facts regarding Citigroup's upcoming RMBS deals, and assured Plaintiff that Citigroup conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

275. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. As detailed below, New Century and the Ameriquest Loan Sellers, the principal Mortgage Originators in the Citigroup deals, systematically violated their stated underwriting and appraisal standards. Moreover, Citigroup's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

276. Citigroup stated that it retained external firms, including Clayton and Bohan, to review whether the loans included in the RMBS that Citigroup underwrote complied with the Mortgage Originators' stated standards. As discussed in ¶¶ 60-66, Clayton and Bohan have been investigated by the New York Attorney General, the SEC, and Massachusetts and Connecticut regulators for improper activity in their mortgage due diligence services.

277. In its most recent annual report, filed on Form 10-K with the SEC on February 26, 2010, Citigroup Inc. (the parent company of Defendant Citigroup) confirmed that "beginning in the fourth quarter of 2007, certain of Citigroup's regulators and other state and federal government agencies commenced formal and informal investigations and inquiries, and issued subpoenas and requested information, concerning Citigroup's subprime mortgage-related conduct and business activities."

278. The statements of material facts in the documents Citigroup sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, as described above, New Century's statements that it underwrote loans in accordance with its stated underwriting guidelines were untrue. *See* ¶¶ 98-112. The Ameriquest Loan Sellers similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V. Citigroup's statements of material facts about the appraisals of the underlying properties were also untrue.

279. Citigroup's statements of material facts were also untrue because other key data provided to Plaintiff by Citigroup was untrue. For example, the data often identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

280. The Financial Crisis Inquiry Commission (the "FCIC") investigated Citigroup as part of its statutory mission to determine "the causes . . . of the current financial and economic

crisis in the United States. Fraud Enforcement and Recovery Act of 2009, Pub. L. No. 111-21, § 5(a) (May 20, 2009). In connection with its investigation, the FCIC interviewed senior Citigroup executives with direct responsibility for the Company's mortgage operations; subpoenaed and reviewed thousands of internal Citigroup documents concerning those operations; and held hearings on April 7-9, 2010.

281. The FCIC heard testimony from Richard M. Bowen, III, who was the Senior Vice President and Chief Underwriter for Correspondent and Acquisitions for Citifinancial Mortgage (Citigroup's subprime mortgage lending subsidiary) from 2002 through 2005 and was promoted in early 2006 to Business Chief Underwriter for Correspondent Lending in Citigroup's Consumer Lending Group (which included Citigroup's prime mortgage lending, subprime mortgage lending, and prime second lien mortgage businesses). As Business Chief Underwriter for Correspondent Lending, Mr. Bowen was one of Citigroup's most senior mortgage executives, supervising 220 professional underwriters and exercising direct oversight over the underwriting of more than $90 billion of residential mortgages annually.

282. Mr. Bowen testified that each year since 2005, Citigroup's mortgage operation systematically acquired tens of billions of dollars of risky loans that violated Citigroup's own underwriting criteria and were likely to default. He also testified that Citigroup's Wall Street Chief Risk Officer routinely overruled underwriters' rejections of pools of subprime mortgages that did not satisfy Citigroup's underwriting criteria for purchase by the "Correspondent Wall Street channel," thus causing Citigroup to purchase billions of dollars of loan pools that fell far short of underwriting standards. In sum, Mr. Bowen testified that "[d]uring 2006 and 2007, I witnessed business risk practices which made a mockery of Citi credit policy. . . ."

283. Mr. Bowen also testified that he recommended that Citigroup not purchase Ameriquest, because his due diligence found that Argent's loans did not meet the standards they had represented to Citigroup. Specifically, Mr. Bowen testified that "we sampled the loans that were originated by Argent and we found large numbers that did not – that were not underwritten according to the representations that were there."

284. In sum or substance, Citigroup stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in □□ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers□ payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

285. The result of the untrue statements and omissions described above is that the Securities Citigroup underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Citigroup to Plaintiff.

d. Credit Suisse's Untrue Statements of Material Facts and Omissions

286. Credit Suisse offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $137,658,731. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

287. Credit Suisse acquired hundreds of thousands of subprime mortgages and securitized the mortgage loans into billions of dollars of RMBS, some of which were then

offered or sold to Plaintiff in a series of offerings containing subprime mortgage loans from several different Mortgage Originators, including New Century, Argent, WMC, and Fremont.

288. To facilitate the sale of RMBS, Credit Suisse's parent company formed SPVs, including Depositor Defendants Credit Suisse First Boston Mortgage Securities Corporation and Asset Backed Securities Corporation, which issued and were the depositors for numerous offerings of RMBS. Defendant Credit Suisse offered or sold the Securities to Plaintiff. Credit Suisse also provided financial research on RMBS and related structured products.

289. In connection with its offer or sale of Securities to Plaintiff, Credit Suisse sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Credit Suisse also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Credit Suisse sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Credit Suisse also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Credit Suisse's due diligence of the Mortgage Originators' underwriting practices. Credit Suisse did not allow Plaintiff to keep the pitch books.

290. In the Offering Documents, Credit Suisse made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which New Century originated all or a significant amount of the underlying mortgage loans, Credit Suisse reprinted New Century's "Underwriting Guidelines," which stated in sum or substance, that (a) New Century's guidelines were "intended to assess the borrower's ability to repay the mortgage loan"; (b) New Century reviewed not only the value of the property, but also considered "the mortgagor's credit history, repayment ability and debt service-to-income ratio, as well as the type of use of the mortgaged property"; (c) "the

mortgage loans [were] originated in accordance with the underwriting guidelines"; and (d) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶¶93-95. Credit Suisse made similar statements of material facts for Mortgage Loans originated by other mortgage originators, including Argent, WMC, and Fremont. *See* Section V.

291. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Credit Suisse stated, for example, that New Century commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were "required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are on forms acceptable to Fannie Mae and Freddie Mac," and that were reviewed "by a qualified employee" of New Century or by an appraiser retained by New Century. *See* ¶95. Credit Suisse made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Argent, WMC and Fremont. *See* Section V.

292. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Credit Suisse made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities and Credit Suisse's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

293. Credit Suisse made additional, oral statements of material facts about the Securities to Plaintiff in meetings, including meetings at Plaintiff's offices in Concord, Massachusetts. Some of Plaintiff's meetings with Credit Suisse occurred on or about September 9, 2004; August 29 and October 26, 2005; and March 2, May 17, and December 31, 2006. During these meetings, Credit Suisse made statements of material facts regarding Credit Suisse's

upcoming RMBS deals, and assured Plaintiff that Credit Suisse conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by reviewing loans in order to check underwriting process, documentation, valuations, and compliance.

294. For example, Credit Suisse made oral statements of material facts to Plaintiff about the strength and quality of the due diligence Credit Suisse performed on the "HEAT" series of deals. *See* Appendix A. Specifically, Credit Suisse stated to Plaintiff that Credit Suisse performed a valuation review of 100% of the underlying loans, meaning that Credit Suisse should have reviewed the data and documentation for each underlying loan before accepting the loan for inclusion in the pool. In fact, Credit Suisse stated to Plaintiff that the due diligence for the HEAT transactions was "superior" to the due diligence for most other RMBS transactions because of this 100% valuation review.

295. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, Argent, New Century, WMC, and Fremont, the principal Mortgage Originators of loans included in the Credit Suisse deals, systematically violated their stated underwriting and appraisal standards. Moreover, Credit Suisse's statements of material facts regarding its own due diligence were untrue and contained material omissions.

296. Credit Suisse contracted with external firms including Clayton and Bohan to review whether the loans included in the RMBS that Credit Suisse underwrote complied with the Mortgage Originators' stated standards. As discussed in ¶¶60-66, Clayton and Bohan have been investigated by the New York Attorney General, SEC, and Massachusetts and Connecticut regulators for engaging in improper underwriting practices. In January 2008, the New York Attorney General granted Clayton immunity from prosecution in exchange for documents and testimony regarding its due diligence reports.

297. The statements of material facts in the documents Credit Suisse sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting

guidelines, did not consistently evaluate the borrowers ability to repay the loans, and made exceptions to their underwriting standards absent the compensating factors required by their guidelines. For example, investigations and lawsuits have demonstrated that New Century made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; New Century management turned a blind eye to the risky loan originations; and New Century engaged in a number of significant improper and imprudent practices related to its loan originations. *See* 98-112. Moreover, former New Century employees witnessed firsthand how exceptions to New Century s underwriting became the norm because employees had to do what was necessary to increase loan originations. *See* 106-108. The SEC has charged former New Century officers with making untrue assurances to the market about the company s adhere[nce] to high origination standards in order to sell [its] loan products in the secondary market. *See* 110. The other Mortgage Originators underlying the Credit Suisse Securities Ameriquest, WMC, Long Beach, Argent, and Option One similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V. Indeed, the Senate Permanent Subcommittee on Investigations recently concluded that Long Beach . . . was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry. 119.

298. The statements of material facts in the documents Credit Suisse sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, 51-57. For example, a former New Century underwriter recently confirmed New Century s use of inflated appraisals in testimony before the FCIC, stating that New Century hired fee appraisers who were pressured into inflating property values, at times by tampering with the property, fearing if they didn t, they would lose future business and their livelihoods. 55. The Illinois Attorney General testified before the FCIC that a multistate investigation revealed that [Ameriquest] engaged in the kinds of fraudulent practices that other predatory lenders subsequently emulated on a wide scale . . . includ[ing]:

inflating home appraisals. ¶ 196. An industry insider testified before the FCIC that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶ 52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶56.

299. Credit Suisse's statements were also untrue because other material data provided by Credit Suisse to Plaintiff were untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

300. Credit Suisse is a defendant in numerous lawsuits directly related to its conduct as an underwriter of RMBS. On March 29, 2010, the United States District Court for the Southern District of New York sustained claims against Credit Suisse brought on behalf of a class of investors who purchased subprime RMBS issued in 2006 and 2007 that contained underlying mortgage loans from Mortgage Originators including New Century and WMC. *New Jersey Carpenters Health Fund v. DLJ Mortgage Capital, Inc.*, Docket No. 08-CV-5653 (PAC) (S.D.N.Y.) (the "Credit Suisse RMBS Action"). The class's claims in that action under the Securities Act of 1933 are substantially similar legally and factually to Plaintiff's claims in this action.

301. In the Credit Suisse RMBS Action, the District Court held that the plaintiffs adequately alleged that Credit Suisse's offering documents "contain[ed] materially misleading statements and omissions" relating to Credit Suisse's "systematic disregard of loan-approval oversight and control mechanisms as represented in underwriting guidelines by the Originators," which Credit Suisse failed to detect "because of wholly inadequate due diligence procedures." Like Plaintiff here, the plaintiffs in the Credit Suisse RMBS Action, allege that:

> **The [securities] were issued pursuant to a number of core representations in the Offering Documents each of which contained material misstatements and omissions. It was represented that the home equity loans were originated**

> **pursuant to underwriting guidelines detailed in both in the Registration Statement and the Supplemental Prospectuses.** These guidelines required an analysis of borrower creditworthiness (i.e., ability to repay the loan) and an appraisal of the mortgaged property pursuant to standard appraisal practices and procedures. The guidelines also described that when loans were issued with limited or no borrower documentation there were compensating factors such as the lender s reliance primarily on the valuation of the mortgaged properties.
>
> ***
>
> The Rating Agencies in downgrading the [securities] from the highest investment grade to junk bond status specifically attributed their actions to aggressive underwriting deployed in originating the loans. **Further, well after the completion of the Offerings, disclosures began to emerge that the principal home equity loan Originators - i.e., New Century, Accredited and WMC - engaged in origination practices which flagrantly violated underwriting guidelines set forth in the Offering Documents**.
>
> **Credit Suisse conducted inadequate due diligence to ensure compliance with the underwriting guidelines stated in the Offering Documents.** It was incentivized to acquire and securitize as many loans as possible since its profit was achieved upon the sale of the securities. **The due diligence Credit Suisse did perform was in the period when it was acquiring the loans from third parties – not in underwriting the issuance of the [securities] - when there was a serious disincentive for Credit Suisse to reject loans submitted for auction by originators, for fear that they would be cut-off from access to further loans for future securitization.**

Credit Suisse RMBS Action Complaint, ¶¶10-12 (internal citations omitted).

302. In sum or substance, Credit Suisse stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers payments of interest and principal to

be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

303. The result of the untrue statements of material facts and omissions described above is that the Securities that Credit Suisse underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Credit Suisse to Plaintiff.

e. Greenwich Capital's Untrue Statements Of Material Facts And Omissions

304. Greenwich Capital offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $214,301,456. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

305. Greenwich Capital underwrote more than $180 billion in RMBS backed by subprime mortgages between 2002 and 2006. In particular, between 2005 and 2006, Greenwich Capital sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime lenders including Aames, Accredited, Argent, Countrywide, Fremont, Long Beach, New Century, and WMC for the purchase of subprime loans to be pooled and securitized as RMBS, offering to pay more for mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors.

306. To facilitate the sale of RMBS, Greenwich Capital formed SPVs, including Depositor Defendant Financial Asset Security Corporation, which issued and was the depositor for numerous offerings of RMBS. Defendant Greenwich Capital offered or sold the Securities to

Plaintiff. Greenwich Capital also provided financial research on RMBS and related structured products.

307. In connection with its offer or sale of Securities to Plaintiff, Greenwich Capital sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Greenwich Capital also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Greenwich Capital sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Greenwich Capital also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Greenwich Capital's due diligence of the Mortgage Originators' underwriting practices. Greenwich Capital did not allow Plaintiff to keep the pitch books.

308. In the Offering Documents, Greenwich Capital made numerous statements of material facts regarding the underwriting standards and appraisal practices that had been followed in originating the underlying mortgage loans. For example, for the offerings in which Long Beach originated all or a significant amount of the underlying mortgage loans, Greenwich Capital reprinted Long Beach's "Underwriting Guidelines," which stated that: (1) Long Beach's guidelines were primarily intended to evaluate the prospective borrower's credit standing and repayment ability as well as the value and adequacy of the mortgaged property as collateral; (2) appraisal of the mortgaged property generally conformed to Fannie Mae and Freddie Mac appraisal standards; (3) appraisals were generally performed by licensed independent appraisers who had satisfied the loan servicer's appraiser screening process; and (4) exceptions were only granted with the approval of an employee with appropriate "risk level authority" and in the presence of compensating factors. *See* ¶115.

309. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Greenwich Capital made additional statements of material facts regarding the particular Securities and their underlying data, data quality, the relevant Mortgage Originators' practices and guidelines, and Greenwich Capital's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

310. Greenwich Capital made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff, including during meetings in Plaintiff's offices in Concord, Massachusetts. Some of Plaintiff's meetings with Greenwich Capital occurred on or about May 13 and September 2, 2004; March 2 and August 16, 2006; and January 10, 2007. During these meetings, Greenwich Capital made statements of material facts regarding Greenwich Capital's upcoming RMBS deals, and stated that Greenwich Capital conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

311. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained omissions. As detailed above and below, the principal Mortgage Originators of the underlying loans systematically violated their stated underwriting and appraisal standards. Moreover, Greenwich Capital's statements of material facts regarding its own due diligence were untrue and contained material omissions.

312. For example, the statements of material facts in the documents Greenwich Capital sent to Plaintiff were untrue because Long Beach violated its stated underwriting guidelines, did not consistently evaluate the borrower's ability to repay, and made exceptions to its underwriting standards in the absence of "compensating factors." Subsequent investigations and lawsuits have demonstrated that Long Beach ignored and made frequent exceptions to its underwriting guidelines. *See* ¶¶119-143. Moreover, former Long Beach employees witnessed firsthand how

variance from Long Beach's stated underwriting standard became the "norm" because employees were incentivized to increase loan volume. *Id.* The Senate Permanent Subcommittee on Investigations stated: "Long Beach . . . was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry." *See* ¶119.

313. Likewise, subsequent investigations and lawsuits have demonstrated that Fremont, another Mortgage Originator whose loans Greenwich Capital securitized, "engag[ed] in unsatisfactory lending practices"; "ma[de] loans based on information that Fremont knew or should have known was inaccurate or false, including, but not limited to, borrowers' income, property appraisals, and credit scores"; purposefully relaxed its underwriting standards and made loans based on documents it knew to be untrue; made "everyday" exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for a loan; and continually ignored fraudulent documents when approving loans. *See* ¶¶149-168. The other Mortgage Originators of loans underlying the Securities initially offered by Greenwich Capital similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

314. The statements of material facts in the documents Greenwich Capital sent to Plaintiff were also untrue because the inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶51-57. For example, a former Fremont account manager described how superiors would call appraisers and directly request that they inflate their appraisal values in order to close a deal. ¶164. Another Fremont employee audited loans that the company was asked to repurchase, and found alarming problem with the appraisals, including appraisals that were incomplete, did not match the address of the property, or described the home as owner-occupied when it was rented, on the large majority of the loans. *Id*. An industry insider testified before the FCIC that, in his experience, subprime appraisals were so overvalued that "throwing a dart at a board while blindfolded would've produced more accurate results." ¶52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. ¶56.

315. Greenwich Capital's statements of material facts were also untrue because other material data provided to Plaintiff by Greenwich Capital was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

316. On March 8, 2008, RBS confirmed that its Greenwich Capital unit was subject to an SEC investigation into the collapse of the subprime market and had been ordered to turn over financial documents to the SEC regarding, among other things, the origination of mortgages, accounting, due diligence, sales, and insider trading.

317. In sum or substance, Greenwich Capital stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

318. The result of the untrue statements of material facts and omissions described above is that the Securities that Greenwich Capital underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Greenwich Capital to Plaintiff.

f. Deutsche Bank's Untrue Statements Of Material Facts And Omissions

319. Deutsche Bank offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $127,779,742. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

320. Deutsche Bank acquired and then converted subprime mortgages into billions of dollars of RMBS, some of which Deutsche Bank offered or sold to Plaintiff in a series of offerings and sales pursuant to the relevant Offering Documents and other statements.

321. Deutsche Bank offered or sold Securities to Plaintiff, and Plaintiff purchased Securities on behalf of the Clients from Deutsche Bank, in offerings and sales containing subprime mortgage loans from several different Mortgage Originators, including Countrywide and New Century.

322. To facilitate the sale of RMBS, Deutsche Bank formed SPVs, including Depositor Defendant Ace Securities Corporation, which issued and was the depositor for numerous offerings of RMBS. Defendant Deutsche Bank offered or sold the Securities to Plaintiff. Deutsche Bank also provided financial research on RMBS and related structured products.

323. In connection with its offer or sale of Securities to Plaintiff, Deutsche Bank sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Deutsche Bank also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes Deutsche Bank sent to Plaintiff consisted of Excel spreadsheets that contained dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Deutsche Bank also showed Plaintiff "pitch books" and other materials promoting the Mortgage Originators' underwriting practices

and guidelines for the mortgages supporting the Securities, the data, and Deutsche Bank's due diligence of the Mortgage Originators' underwriting practices. Deutsche Bank did not allow Plaintiff to keep the pitch books.

324. In the Offering Documents, Deutsche Bank made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Fremont originated all or a significant amount of the underlying mortgage loans, Credit Suisse reprinted Fremont's "Underwriting Guidelines," which stated in sum or substance, that (a) Fremont's guidelines were "intended to assess the ability and willingness of the borrower to repay the debt and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan"; (b) "the Fremont mortgage loans were originated in accordance with the[se] underwriting criteria"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . based upon compensating factors." *See* ¶¶ 147-148. Deutsche Bank made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including Long Beach and Option One. *See* Section V.

325. Deutsche Bank's Offering Documents also made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Deutsche Bank stated, for example, that "Fremont's underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal," and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were reviewed by Fremont. *See* ¶¶ 147-148. Deutsche Bank made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Long Beach and Option One. *See* Section V.

326. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes" and "pitch books," Deutsche Bank made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices

and guidelines applicable to the loans underlying those Securities, and Deutsche Bank's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

327. Deutsche Bank made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in meetings, some of which occurred in Plaintiff's offices in Concord, Massachusetts. Some of Plaintiff's meetings with Deutsche Bank occurred on or about October 28 and 31, 2005 and November 3 and December 6, 2006. During these meetings, Deutsche Bank made statements of material facts regarding Deutsche Bank's upcoming RMBS deals, and stated that Deutsche Bank conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

328. Each of the statements of material facts identified above regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed in Section V, Countrywide and New Century, which originated loans included in the Deutsche Bank deals, violated their stated underwriting and appraisal standards did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. Moreover, Deutsche Bank's statements of material facts regarding its own due diligence were untrue and contained material omissions.

329. The statements of material facts in the documents Deutsche Bank sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶51-57.

330. Deutsche Bank's statements of material facts were also untrue because other key data provided to Plaintiff by Deutsche Bank was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment

properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

331. Deutsche Bank is one of eight Wall Street Banks targeted by New York State Attorney General Andrew Cuomo, who, according to a May 12, 2010 article in the *New York Times*, is investigating these Wall Street Banks to determine whether they provided untrue information to rating agencies in order to inflate the ratings of RMBS.

332. In sum or substance, Deutsche Bank stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

333. The result of the untrue statements of material facts and omissions described above is that the Securities that Deutsche Bank underwrote, offered or sold to the Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Deutsche Bank to Plaintiff.

g. Merrill Lynch's Untrue Statements Of Material Facts And Omissions

334. Merrill Lynch offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $126,740,462.

A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

335. Merrill Lynch & Co. sought to compete with its Wall Street peers and to expand its share of the RMBS market by aggressively pursuing subprime lenders including Accredited, Fremont, and WMC for the purchase of subprime loans to be pooled and securitized as RMBS, offering to pay more for mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors.

336. To facilitate the sale of RMBS, Merrill Lynch & Co. formed numerous SPVs including: (1) Depositor Defendant Merrill Lynch Mortgage Investors, Inc., which served as the depositor and issuer for offerings of RMBS; and (2) Merrill Lynch Mortgage Lending, Inc., which acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of RMBS. Defendant Merrill Lynch offered or sold the Securities to Plaintiff. Merrill Lynch also provided financial research on RMBS and related structured products.

337. In connection with its offer or sale of Securities to Plaintiff, Merrill Lynch sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Merrill Lynch also sent Plaintiff numerous other documents, including term sheets, collateral and computational materials, and "loan tapes." The loan tapes Merrill Lynch sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, inter alia, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Merrill Lynch also showed Plaintiff "pitch books" promoting, *inter alia*, the quality of the Securities and Merrill Lynch's due diligence of the Mortgage Originators' underwriting practices. Merrill Lynch did not allow Plaintiff to keep the pitch books.

338. In the Offering Documents, Merrill Lynch made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Fremont originated all or a significant amount of the underlying mortgage loans, Merrill Lynch reprinted Fremont's "Underwriting Guidelines," which stated in sum or substance, that (a) Fremont's guidelines were "intended to assess the borrower's ability and willingness of the borrower to repay the debt"; (b) the "mortgage loans [were] underwritten in accordance with Fremont's current underwriting programs"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . based on compensating factors." *See* ¶¶ 147-148. Merrill Lynch made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including Accredited and WMC. *See* ¶¶171, 210.

339. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Merrill Lynch stated, for example, that "underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal" and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers." *See* ¶¶ 147-148. Merrill Lynch made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Accredited and WMC. *See* ¶¶171, 210.

340. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Merrill Lynch made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to mortgage loans underlying those Securities, and Merrill Lynch's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

341. Merrill Lynch also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Merrill Lynch representatives occurred on or about June 25, 2004 and September 21, 2006. During these meetings, Merrill Lynch made statements of material facts regarding Merrill Lynch's upcoming RMBS deals, and assured Plaintiff that Merrill Lynch conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

342. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. As detailed below, Accredited, Fremont, and WMC, the principal Mortgage Originators of loans underlying the Securities initially offered by Merrill Lynch, violated their stated underwriting and appraisal standards. Moreover, Merrill Lynch's statements of material facts regarding its own due diligence were untrue and contained material omissions.

343. Merrill Lynch contracted with external firms including Clayton and Bohan to review whether the loans included in the Securities that Merrill Lynch underwrote complied with the Mortgage Originators' stated standards, as discussed in ¶¶60-66.

344. The statements of material facts in the documents Merrill Lynch sent to Plaintiff were untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards in the absence of the "compensating factors" required by their guidelines. For example, investigations and lawsuits have demonstrated that Fremont made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; Fremont management encouraged risky loan originations; and Fremont was "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]." *See* ¶¶149-168. Moreover, former Fremont employees witnessed firsthand how exceptions to Fremont's underwriting became the "norm" because employees had to do what was necessary to increase loan originations. *Id.* The FDIC ultimately issued a Cease

& Desist Order to Fremont for extending subprime credit "in an unsafe and unsound manner" and violating laws and FDIC regulations. *See* ¶¶ 153-154. The other Mortgage Originators of loans underlying the Securities initially offered by Merrill Lynch, including Accredited and WMC, similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

345. The statements of material facts in the documents Merrill Lynch sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶ 51-57.

346. Merrill Lynch's statements of material facts were also untrue because other material data provided to Plaintiff by Merrill Lynch was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loan's credit quality and likelihood of default.

347. Merrill Lynch pressured Mortgage Originators to loosen their underwriting practices in order to generate more loans to be securitized. For example, a *New York Times* article titled "East Coast Money Lent Out West," dated May 8, 2007, reported that "William D. Dallas, the founder and chief executive of Ownit [Mortgage Solutions, a Mortgage Originator], acknowledges loosening lending standards but says he did so reluctantly and under pressure from his investors, particularly Merrill Lynch [which purchased a 20 percent stake in Ownit in 2005], which wanted more loans to package into lucrative securities. He recalls being asked to make more 'stated income' loans . . . . The message, he said, was simple: You are leaving money on the table – do more of them."

348. Among other investigations by various State Attorneys General and the SEC, the New York Attorney General initiated an investigation to determine whether Merrill Lynch concealed information, including the warnings it received about exceptions or mortgages that did not meet minimum lending standards, in an effort to bolster ratings of RMBS and make them

more attractive to buyers. *See* Kate Kelly, Amir Efrati & Ruth Simon, "State Subprime Probe Takes a New Track," *Wall Street Journal*, Jan. 31, 2008.

349. Merrill Lynch is also a defendant in a number of lawsuits which directly relate to its conduct as an underwriter of RMBS. For example, in December 2008, investors filed a class action alleging violations of the Securities Act of 1933 arising from Merrill Lynch's sale of RMBS using untrue offering documents. *See Public Employees' Retirement System of Mississippi v. Merrill Lynch & Co. Inc., et al.*, 08-cv-10841 (JRS) (S.D.N.Y.). The consolidated complaint in that action alleges that the Merrill Lynch offering documents contained untrue statements related to (1) the underwriting guidelines used to originate the mortgage loans underlying the RMBS; (2) the accuracy of the appraisals for the properties underlying the RMBS; (3) the maximum LTV ratios used to qualify borrowers; (4) the debt-to-income ratios permitted on the loans underlying the RMBS; and (5) the credit ratings of the RMBS. On June 1, 2010, the District Court substantially denied motions to dismiss the action and sustained Section 11 claims against Merrill Lynch. Specifically, the Court held that "the alleged repeated deviation from established underwriting standards is enough to render misleading the assertion in the registration statements that underwriting guidelines were generally followed." On December 1, 2010, the Court substantially denied motions to dismiss an amended complaint in the action, again holding that the plaintiff adequately alleged false statements in the offering documents for the Merrill Lynch RMBS.

350. In sum or substance, Merrill Lynch stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts

therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

351. The result of Merrill Lynch's untrue statements of material facts and omissions is that the Securities that Merrill Lynch underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Merrill Lynch to Plaintiff.

h. UBS's Untrue Statements Of Material Facts Aand Omissions

352. UBS offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $134,397,098. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

353. UBS was one of the leading underwriters of RMBS. UBS and its affiliates formed numerous SPVs to facilitate RMBS issuances including: (1) UBS Real Estate Securities Inc., which served as the sponsor and seller for many of UBS's RMBS offerings; and (2) Depositor Defendant Mortgage Asset Securitization Transactions, Inc. ("MASTR"), a wholly owned limited purpose finance subsidiary of UBS, which served as the depositor and issuer for UBS's RMBS offerings. Defendant UBS offered or sold the Securities to Plaintiff. UBS also provided financial research on RMBS and related structured products.

354. In connection with its offer or sale of Securities to Plaintiff, UBS sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. UBS also sent Plaintiff numerous other documents, including term sheets and "loan tapes." The loan tapes UBS sent consisted of Excel spreadsheets

containing dozens of categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, UBS also showed Plaintiff "pitch books" and other materials promoting the quality of the Securities and UBS's due diligence of the Mortgage Originators' underwriting practices. UBS did not allow Plaintiff to keep the pitch books.

355. In the Offering Documents, UBS made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Fremont originated all or a significant amount of the underlying mortgage loans, UBS reprinted Fremont's "Underwriting Guidelines," which stated that (a) Fremont's guidelines were "intended to assess the ability and willingness of the borrower to repay the debt and to evaluate the adequacy of the mortgaged property as collateral for the mortgage loan"; (b) "the Fremont mortgage loans were originated in accordance with the[se] underwriting criteria"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . based upon compensating factors." *See* ¶¶ 147-148. UBS made similar statements of material facts for mortgage loans originated by other Mortgage Originators, including WMC. *See* Section V.

356. Moreover, UBS's Offering Documents made statements of material facts regarding the appraisal guidelines and practices of Fremont and the other relevant Mortgage Originators. UBS stated, for example, that "Fremont's underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal," and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers" who prepared appraisal reports that were reviewed by Fremont. *See* ¶¶ 147-148. UBS made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including WMC. *See* Section V.

357. In the other documents including term sheets, loan tapes, and pitch books UBS sent or showed to Plaintiff, UBS made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to the loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

358. UBS made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with UBS representatives occurred on or about July 12, July 14, and November 3, 2004; April 11, November 30, and December 5, 2005; May 18, September 28, and November 21, 2006; and March 12, April 11, April 16, July 18, and August 3, 2007. During these meetings, UBS made statements of material facts regarding upcoming RMBS deals, and assured Plaintiff that UBS conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines.

359. On March 5, 2008, investors commenced an action against UBS relating to mortgage-related securities purchases. *Pursuit Partners, LLC v. UBS AG, et al.*, 05-CV-08-4013452 (Conn. Super Ct.). The plaintiffs in that action alleged that UBS marketed junk securities as investment-grade. Between July and October 2007, the plaintiffs in that action purchased more than $50 million of mortgage-related securities from UBS, and on October 10, 2007, the securities were downgraded to junk status. On September 8, 2009, the Connecticut Superior Court ordered UBS to set aside $35.5 million to cover a potential judgment against it, finding that plaintiffs had "presented sufficient evidence to satisfy the probable cause standard." The court summarized the case as follows: "Through direct and circumstantial evidence, Pursuit has established probable cause to sustain the validity of a claim that the UBS defendants were in possession of material nonpublic information regarding imminent ratings downgrades on the Notes it sold to the Plaintiffs, information UBS withheld from the Plaintiffs."

360. On February 22, 2010, a pension fund commenced an action against UBS in the United States District Court for the District of New Jersey regarding the issuance of RMBS.

Local 302 & 612 of the International Union of Operating Engineers-Employers Construction Industry Retirement Trust v. Mortgage Asset Securitization Transactions, Inc. et al., 10-cv-00898-DMC (D.N.J.). The pension fund plaintiff in that case alleges that the offering documents pursuant to which UBS offered RMBS contained misstatements and material omissions regarding: (1) the underwriting standards pursuant to which the underlying mortgage collateral was originated; (2) the RMBS' true investment risk and credit ratings; and (3) the amount and quality of the credit enhancement or credit support. The plaintiff in that case also alleges that UBS failed to conduct adequate, or in many cases any, due diligence on the mortgage loan applications and mortgaged properties before or during the securitization process. The mortgage loans underlying the RMBS in that case were principally originated by Countrywide and IndyMac Bank, F.S.B. ("IndyMac").

361. According to a May 12, 2010 article in the *New York Times*, UBS received a subpoena from the New York State Attorney General in connection with an investigation into whether UBS provided untrue information to rating agencies in order to inflate ratings of RMBS.

362. Each of the statements of material facts identified above made by UBS regarding underwriting and appraisal standards was untrue and contained material omissions. As detailed below, Fremont and the other Mortgage Originators of loans underlying the Securities initially offered by UBS systematically violated their stated underwriting and appraisal standards. Moreover, UBS's statements of material facts regarding its own due diligence were untrue and contained material omissions.

363. The statements of material facts in the documents UBS sent to Plaintiff were untrue because Fremont and the other relevant Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, subsequent investigations and lawsuits have demonstrated that Fremont made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for loans; Fremont management encouraged risky

loan originations; and Fremont was "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]." *See* ¶¶149-168. Moreover, former Fremont employees witnessed firsthand how exceptions to Fremont's underwriting became the "norm" because employees had to do whatever was necessary to increase loan originations. *Id.* The FDIC ultimately issued a Cease & Desist Order to Fremont for extending subprime credit "in an unsafe and unsound manner" and violating laws and FDIC regulations. *See* ¶¶153-154. The other Mortgage Originators of loans underlying the Securities initially offered by UBS, including WMC, similarly violated their stated underwriting guidelines in order to increase loan volume. *See* SectionV.

364. The statements of material facts in the documents UBS sent to Plaintiff were also untrue because the appraisals of the mortgaged properties were systematically inflated, which caused the listed LTV ratios and credit enhancement levels to be untrue. *See, e.g.*, ¶¶51-57.

365. UBS's statements of material facts were also untrue because other material data provided to Plaintiff by UBS was untrue. For example, the data often identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loan's credit quality and likelihood of default. *See* Section V.

366. In sum or substance, UBS stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to

be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

367. The result of the untrue statements of material facts and omissions described above is that all of the Securities that UBS underwrote, offered or sold to Plaintiff have been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by UBS to Plaintiff.

i. Goldman Sachs' Untrue Statements of Material Facts and Omissions

368. Goldman Sachs offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $177,043,516. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

369. Goldman Sachs had several trading desks responsible for purchasing and selling mortgage-related assets, including RMBS. From 2004 through 2007, Goldman Sachs actively participated in the securitization markets and worked extensively with subprime Mortgage Originators Long Beach, Fremont, and New Century.

370. To facilitate the sale of RMBS, Goldman Sachs formed numerous SPVs including: (1) Goldman Sachs Mortgage Company, which served as the sponsor for many of Goldman Sachs offerings; and (2) Depositor Defendant GS Mortgage Securities Corp., which served as the depositor and issuer for Goldman Sachs offerings. Goldman Sachs offered or sold the Securities to Plaintiff. Goldman Sachs also provided financial research on RMBS and related structured products.

371. In connection with its offer or sale of Securities to Plaintiff, Goldman Sachs sent numerous documents to Plaintiff in Massachusetts. These documents included registration

statements, prospectuses, and prospectus supplements that were, or would become, publicly available when filed with the SEC. Goldman Sachs also sent Plaintiff other documents, including term sheets and loan tapes. The loan tapes Goldman Sachs sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Goldman Sachs also showed Plaintiff pitch books and other materials promoting the quality of the Securities and Goldman Sachs due diligence of the Mortgage Originators underwriting practices. Goldman Sachs did not allow Plaintiff to keep the pitch books.

372. In the Offering Documents, Goldman Sachs made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, Long Beach originated all or a significant amount of the underlying mortgage loans in the Goldman Sachs offerings Plaintiff purchased on behalf of the Clients. In the Offering Documents, Goldman Sachs reprinted Long Beach s Underwriting Guidelines, which stated that: (1) Long Beach s guidelines were primarily intended to evaluate the prospective borrowers credit standing and repayment ability as well as the value and adequacy of the mortgaged properties as collateral; (2) appraisals of the mortgaged properties generally conformed to Fannie Mae and Freddie Mac standards; (3) appraisals were generally performed by licensed independent appraisers who had satisfied the loan servicer s appraiser screening process; and (4) exceptions were only granted with the approval of an employee with appropriate risk level authority and in the presence of compensating factors. *See* 115.

373. In the other documents sent or shown to Plaintiff, including term sheets, loan tapes and pitch books, Goldman Sachs made additional statements of material facts regarding the particular Securities and their underlying data, data quality, the Mortgage Originators practices and guidelines, and Goldman Sachs due diligence of the Mortgage Originators underwriting practices. This information was material as it allowed Plaintiff to perform sensitive

calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

374. The statements of material facts in the documents Goldman Sachs sent to Plaintiff were untrue because the Mortgage Originators violated their stated underwriting guidelines, did not consistently evaluate the borrowers ability to repay, and made exceptions to their underwriting standards in the absence of compensating factors. Subsequent investigations and lawsuits have demonstrated that Long Beach ignored and made frequent exceptions to its underwriting guidelines. *See* 119-144. Moreover, former Long Beach employees witnessed firsthand how variance from Long Beach s stated underwriting standard became the norm because employees were incentivized to increase loan volume. *Id.* The PSI summed up Long Beach s conduct by stating: Long Beach was not a responsible lender. Its loans and mortgage backed securities were among the worst performing in the subprime industry. *See* 119.

375. The statements of material facts in the documents Goldman Sachs sent to Plaintiff were also untrue because inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, 51-57. An industry insider who testified before the FCIC stated that, in his experience, subprime appraisals were so overvalued that throwing a dart at a board while blindfolded would ve produced more accurate results. 52. Surveys performed in 2007 demonstrated that 90% of appraisers felt pressured to raise property values in order to enable deals to go through. 56.

376. Goldman Sachs statements of material facts were also untrue because other material data provided to Plaintiff by Goldman Sachs was untrue. For example, the data often incorrectly identified properties as owner occupied when they were really second homes or investment properties. The untruth of this information was material to Plaintiff s analysis of the loans credit quality and likelihood of default.

377. Goldman Sachs also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. For example, Goldman Sachs represented to Plaintiff in 2005 that in the prior 18 months, Long Beach had shifted to significantly higher-quality

collateral. Goldman Sachs also stated to Plaintiff that Long Beach had stopped originating mortgages on mobile homes and that the concentrations of loan balances in the pools below $50,000 were very small. Plaintiff met with Goldman Sachs representatives on or about April 6 and June 15, 2004. During these meetings, Goldman Sachs representatives made statements of material facts regarding upcoming RMBS deals, and assured Plaintiff that Goldman Sachs conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines. Among other things, Goldman Sachs stated that its due diligence included sampling loans to check underwriting process, documentation, valuations, and compliance. Specifically, Goldman Sachs repeatedly stated that it performed due diligence on the mortgage loans and to ensure Mortgage Originator compliance with stated underwriting standards.

378. Goldman Sachs oral statements of material facts were untrue for the same reasons listed above. Moreover, the statements of material facts were untrue because Goldman Sachs failed to conduct adequate due diligence on the Mortgage Originators and the mortgage loans underlying the Securities in accordance with its statements.

379. The PSI investigated Goldman Sachs and concluded that from 2004 to 2007, Goldman Sachs helped lenders like Long Beach, Fremont, and New Century, securitize high risk, poor quality loans, obtain favorable credit ratings for the resulting [RMBS], and sell the [RMBS] to investors, pushing billions of dollars of risky mortgages into the financial system.

380. The PSI specifically profiled Goldman Sachs relationship with Long Beach. A PSI exhibit showed that WaMu (Long s Beach s parent company), Long Beach, and Goldman Sachs collaborated on at least $14 billion in loan sales and securitizations. The PSI also stated that in 2005 and 2006, Long Beach s RMBS were among the worst performing in the market.

381. The PSI highlighted one example of how Goldman Sachs securitized Long Beach mortgage loans, despite the fact that Long Beach was one of the nation s worst mortgage lenders. In May 2006, Goldman Sachs, along with its co-lead underwriter WaMu, sold $495 million in RMBS backed by Long Beach loans. In less than a year, delinquencies and defaults

on the underlying loans began to skyrocket. By May 2007, the cumulative net loss on the underlying mortgage pool was over 12 percent, erasing the deal's loss protection and causing downgrades of 6 out of 7 of the mezzanine tranches. By May 2008 – only two years later – even the AAA securities in the May 2006 deal had been downgraded to "default," and by March 2010 the securities had recorded a cumulative net loss of over 66 percent.

382. Massachusetts Attorney General Martha Coakley recently investigated Goldman Sachs' role in securitizing loans in the Commonwealth. The investigation examined whether Goldman Sachs engaged in the following practices:

- Failing to ascertain whether loans purchased from originators complied with the originators' stated underwriting guidelines;
- Failing to take sufficient steps to avoid placing problem loans in securitization pools;
- Failing to correct inaccurate information in securitization trustee reports concerning repurchases of loans; and
- Failing to make available to potential investors certain information concerning allegedly unfair or problem loans, including information obtained during loan due diligence and the pre-securitization process, as well as information concerning Goldman Sachs' practices in making repurchase claims relating to loans both in and out of securitizations.

383. On May 7, 2009, Goldman Sachs entered into a settlement agreement with the Massachusetts Attorney General in order "[t]o resolve any potential claims stemming from the Attorney General's investigation . . . ." Under the agreement, among other things, Goldman Sachs paid $10 million to the Commonwealth.

384. In sum or substance, Goldman Sachs stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the

purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

385. The result of the untrue statements of material facts and omissions described above is that the Securities that Goldman Sachs underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Goldman Sachs to Plaintiff.

j. J.P. Morgan's Untrue Statements Of Material Facts And Omissions

386. J.P. Morgan offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $117,146,975. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

387. J.P. Morgan, seeking to compete with its Wall Street peers, formed numerous entities to facilitate the sale of RMBS, including: (1) J.P. Morgan Chase Bank ("Chase Bank"), which originated various types of mortgage loans to various types of borrowers, and also acted as the servicers of the mortgage loans following their securitization; and (2) J.P. Morgan Mortgage Acquisition Corporation, which acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of RMBS. Defendant J.P. Morgan offered or sold the Securities to Plaintiff. J.P. Morgan also provided financial research on RMBS and related structured products.

388. In connection with its offer or sale of Securities to Plaintiff, J.P. Morgan sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. J.P. Morgan also sent Plaintiff numerous other documents, including term sheets, collateral and computational materials, and "loan tapes." The loan tapes J.P. Morgan sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, J.P. Morgan also showed Plaintiff "pitch books" promoting, *inter alia*, the quality of the Securities and J.P. Morgan's due diligence of the Mortgage Originators' underwriting practices. J.P. Morgan did not allow Plaintiff to keep the pitch books.

389. In the Offering Documents, J.P. Morgan made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which New Century originated all or a significant amount of the underlying mortgage loans, J.P. Morgan represented that New Century's underwriting standards assessed "the creditworthiness of a mortgagor," "the income sufficiency of a mortgagor's projected family income relative to the mortgage payment and to other fixed obligations," and "the adequacy of the mortgaged property expressed in terms of loan-to-value ratio, or LTV ratio, to serve as the collateral for a mortgage loan." The Offering Documents for Securities that J.P. Morgan offered or sold to Plaintiff made similar statements of material facts regarding mortgage loans originated by the Ameriquest Loan Sellers. *See* Section V.

390. Moreover, the Offering Documents for Securities that J.P. Morgan offered or sold to Plaintiff contained statements of material facts regarding appraisal guidelines and practices. For example, the Offering Documents for the 2005-WCH1 Securities stated that the relevant originator's underwriting guidelines required "an appraisal of the mortgaged property which conforms to the Uniform Standards of Professional Appraisal Practice and are [sic] generally on forms similar to those acceptable to Fannie Mae and Freddie Mac . . . ." *See* Section V.

391. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," J.P. Morgan made additional statements of material facts regarding the particular Securities and their underlying data, Mortgage Originator practices and guidelines, and J.P. Morgan's due diligence of those practices and guidelines. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

392. J.P. Morgan also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with J.P. Morgan representatives occurred on or about April 13, April 28, September 29, and November 7, 2005, and May 3 and November 7, 2006. During these meetings, J.P. Morgan made statements of material facts regarding J.P. Morgan's upcoming RMBS deals and assured Plaintiff that J.P. Morgan conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans to check underwriting process, documentation, valuations, and compliance.

393. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. The Ameriquest Loan Sellers, New Century, and the other originators of loans underlying the Securities initially offered by J.P. Morgan violated their stated underwriting and appraisal standards, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards in the absence of the "compensating factors" required by their guidelines. *See* Section V. Moreover, J.P. Morgan's statements of material facts regarding its own due diligence were untrue and contained material omissions.

394. The statements of material facts in the documents J.P. Morgan sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶51-57.

395. J.P. Morgan's statements of material facts were also untrue because other material data provided to Plaintiff by J.P. Morgan was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loan's credit quality and likelihood of default.

396. According to a May 13, 2010 Reuters news article, the SEC and "U.S. prosecutors are conducting a broad criminal investigation of six major Wall Street Banks, including J.P. Morgan" about whether they misled investors about mortgage-securities deals.

397. In sum or substance, J.P. Morgan stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

398. The result of J.P. Morgan's untrue statements of material facts and omissions is that the Securities that J.P. Morgan underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by J.P. Morgan to Plaintiff.

k. Countrywide's Untrue Statements Of Material Facts And Omissions

399. Countrywide offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $154,995,802. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

400. As one of the nation's largest subprime Mortgage Originators, Countrywide Financial was able to buy and sell vast amounts of subprime loans which were pooled and securitized as RMBS. In 2005 and 2006 alone, Countrywide Financial originated in excess of $850 billion in home loans throughout the United States.

401. Through its affiliates and subsidiaries, Countrywide Financial was able to control nearly every step in the mortgage securitization process. To facilitate the sale of RMBS, Countrywide Financial formed numerous SPVs including: (1) Depositor Defendant CWABS, Inc., which served as the depositor and issuer for offerings of RMBS; and (2) Countrywide Home Loans, Inc. ("Countrywide Home"), which originated or otherwise acquired residential mortgage loans to be securitized and served as the sponsor in numerous offerings of RMBS. Defendant Countrywide underwrote, offered or sold Securities containing loans originated by these SPVs to Plaintiff. Countrywide also underwrote, offered or sold to Plaintiff Securities containing loans originated by other mortgage originators such as Aames Investment Corporation. Countrywide also provided financial research on RMBS and related structured products.

402. In connection with its offer or sale of Securities to Plaintiff, Countrywide sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements, and other documents that were, or would become, publicly available when filed with the SEC. Countrywide also sent Plaintiff numerous other documents, including term sheets, loan tapes, collateral tables, and summaries of loans

reports. The "loan tapes" Countrywide sent to Plaintiff consisted of Excel spreadsheets that contained over 100 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Countrywide also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Countrywide's due diligence of the Mortgage Originators' underwriting practices. Countrywide did not allow Plaintiff to keep the pitch books.

403. In the Offering Documents, Countrywide made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Countrywide Home originated all or a significant amount of the underlying mortgage loans, Countrywide reprinted Countrywide Home's "Underwriting Guidelines," which stated, in sum or substance, that (a) Countrywide Home's guidelines were "intended to evaluate the value and adequacy of the mortgaged property as collateral for the proposed mortgage loan and the borrower's credit standing and repayment ability"; (b) Countrywide Home reviewed not only the value of the property, but also considered "applicant's assets, liabilities, income and employment history, as well as certain other personal information"; (c) the mortgage loans were originated in accordance with the underwriting guidelines; and (d) exceptions to these guidelines would only be made "[o]n a case by case basis . . . based upon compensating factors." CWL 2007-2 Prospectus Supplement. Countrywide made similar statements with respect to loans originated by other mortgage originators, including Aames Home Loan.

404. Moreover, the Offering Documents made statements of material facts regarding the Mortgage Originators' appraisal guidelines. Countrywide stated, for example, that the Mortgage Originators commissioned appraisals by qualified independent appraisers who prepared appraisals that conformed to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation.

405. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Countrywide made additional statements of material facts regarding the particular Securities and their underlying data, data quality, Mortgage Originator practices and guidelines applicable to the loans underlying those Securities, and Countrywide's due diligence of the Mortgage Originators' underwriting practices. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

406. Countrywide also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. For example, on April 4, 2006, Plaintiff made a due diligence visit to Countrywide's offices to meet with Countrywide's origination and servicing staff. During these meetings, Countrywide representatives made statements of material facts regarding Countrywide's upcoming RMBS deals, and assured Plaintiff that Countrywide conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

407. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. The principal Mortgage Originators in the Countrywide deals systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines, and either knew of or participated in the inflated appraisals of the mortgaged properties. Moreover, Countrywide's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

408. Countrywide's statements of material facts were also untrue because other material data provided to Plaintiff by Countrywide was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or

investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

409. Countrywide Financial's lending practices, including the subjects of the untrue statements of material facts and omissions in the Offering Documents, are currently the target of multiple state and federal investigations and proceedings. Various State Attorneys General, including those from Massachusetts, California, Connecticut, Illinois, Florida, and Indiana, have brought lawsuits or initiated investigations against Countrywide based on its lending, underwriting, and appraisal practices for mortgage loans.

410. On March 24, 2010, Massachusetts Attorney General Coakley filed a Complaint and Final Judgment by Consent against Countrywide's parent, Countrywide Financial Corporation, and its affiliates Countrywide Home Loans, Inc., Countrywide Mortgage Ventures LLC, and Full Spectrum Lending, Inc. The Attorney General's Complaint alleged that:

> During 2006 and 2007, Countrywide was the largest lender in Massachusetts and the nation and the largest subprime lender in Massachusetts. In originating residential mortgage loans in Massachusetts from 2005 to 2007 ("loans"), Countrywide engaged in unfair loan origination practices including approving risk-layered loans that, at times, led to predictable borrower "payment shock" -- that is, a significant increase in a borrower's payment based on changes to the calculation of a monthly payment, frequently attributable to a change in interest rate for an adjustable rate mortgage ("ARM") or the deferral of the payment of principal on interest only or Pay Option ARMs. When originating these loans, Countrywide knew or should have known that a substantial number of its borrowers could not reasonably repay these loans according to the loans' terms and that the loans would be subject to predictable delinquency and default.

411. The Attorney General's Complaint quotes emails sent by the Chairman of Countrywide, Angelo Mozilo, in March and April 2006 in which Mozilo referred to Countrywide's 100% LTV subprime loans as "the most dangerous product in existence and there can be nothing more toxic," and "[i]n all my years in the business, I have never seen a more toxic pr[o]duct." Despite Mozilo's awareness in early 2006 that such loans were toxic, the Attorney General's Complaint alleges that Countrywide continued to make such loans through 2007 and into 2008.

412. The Attorney General's settlement with Countrywide Financial Corporation, in combination with settlements by other State Attorneys General, provides for $18 million in loan modifications for Massachusetts homeowners, $3 billion in loan modifications for homeowners across the country and a $4.1 million payment by Countrywide Financial Corporation to the Commonwealth.

413. Countrywide's underwriting standards are also the subject of an investigation by the Federal Bureau of Investigation ("FBI"), which was first reported on March 8, 2008 by *The Wall Street Journal* in an article entitled "FBI Investigates Countrywide; U.S. Scrutinizes Filings on Financial Strength, Loan Quality for Fraud." The FBI investigation is focused on "whether company officials made misrepresentations about the company's financial position and the quality of its mortgage loans in securities filings."

414. On March 11, 2008, the *Wall Street Journal* published another article detailing the FBI's investigation of Countrywide's lending practices. According to the sources interviewed by the *Wall Street Journal*, federal investigators found that "Countrywide's loan documents often were marked by dubious or erroneous information about its mortgage clients, according to people involved in the matter. The company packaged many of those mortgages into securities and sold them to investors, raising the additional question of whether Countrywide understated the risks such investments carried."

415. In sum or substance, Countrywide stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to

receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

416. The result of the untrue statements of material facts and omissions described above is that the Securities that Countrywide underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Countrywide to Plaintiff.

l. FBR's Untrue Statements Of Material Facts And Omissions

417. FBR offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $7,267,040. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Banks, is contained in the attached Appendix A.

418. FBR sought to expand its share of the RMBS market by aggressively pursuing subprime mortgage originators including Aames, offering to pay more for their mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors. In an effort to expand its subprime origination, servicing, and securitization business, FBR acquired First NLC Financial Services, a mortgage originator headquartered in Florida, in 2005.

419. To facilitate the sale of RMBS, FBR formed SPVs, including Depositor Defendant FBR Securitization, Inc., which served as the depositor and issuer for many of FBR's offerings. FBR offered or sold the Securities to Plaintiff. FBR also provided financial research on RMBS and related structured products.

420. In connection with its offer or sale of Securities to Plaintiff, FBR sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. FBR also sent Plaintiff numerous other documents,

including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and "loan tapes." The loan tapes FBR sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the data, the mortgage originators' underwriting practices and guidelines for the mortgages supporting the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, FBR also showed Plaintiff "pitch books" promoting, *inter alia*, the mortgage originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and FBR's due diligence of the mortgage originators' underwriting practices. FBR did not allow Plaintiff to keep the pitch books.

421. In the Offering Documents, FBR made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in an offering for which Aames originated all of the underlying mortgage loans, FBR stated, in sum or substance, that (a) Aames' guidelines were intended to assess the borrower's ability and willingness to repay the debt; (b) the mortgage loans underwritten in accordance with Aames' underwriting standards; and (c) exceptions to these standards would only be made on a case-by-case basis based on compensating factors. FBR made similar statements of material facts for mortgage loans originated by other mortgage originators.

422. Moreover, the Offering Documents made statements of material facts regarding the relevant mortgage originators' compliance with their appraisal guidelines.

423. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," FBR made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and mortgage originator practices and guidelines applicable to mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

424. FBR also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in meetings, some of which were at Plaintiff's offices in Concord, Massachusetts on or about August 9 and 11, 2004.

425. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. The mortgage originators in the FBR deals systematically violated their stated underwriting and appraisal standards. Moreover, FBR's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

426. The statements of material facts in the documents FBR sent to Plaintiff were untrue because the mortgage originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines.

427. The statements of material facts in the documents FBR sent to Plaintiff were also untrue because of the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue.

428. FBR's statements of material facts were also untrue because other material data provided to Plaintiff by FBR was untrue. For example, the data incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

429. In sum or substance, FBR stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because

Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

430. The result of FBR's untrue statements of material facts and omissions is that the Securities that FBR underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by FBR to Plaintiff.

m. HSBC's Untrue Statements Of Material Facts And Omissions

431. HSBC offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $8,264,895. A full list of these offerings and sales, including the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

432. To facilitate the sale of RMBS, HSBC formed other special-purpose entities including Depositor Defendant HSI Asset Securitization Corporation, which acquired residential mortgage loans to be securitized and served as the depositor and issuer in numerous offerings of RMBS. The Defendant HSBC underwrote, offered or sold the Securities to Plaintiff. HSBC also provided financial research on RMBS and related structured products.

433. In connection with its offer or sale of Securities to Plaintiff, HSBC sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. HSBC also sent Plaintiff other documents, including term sheets and "loan tapes." The loan tapes HSBC sent to Plaintiff consisted of Excel

spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, HSBC also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting Securities, the data, and HSBC's due diligence of the Mortgage Originators' underwriting practices. HSBC did not allow Plaintiff to keep the pitch books.

434. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flows, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

435. The Offering Documents and other documents provided by HSBC to Plaintiff contained statements of material facts regarding underwriting and appraisal standards applicable to the mortgage loans underlying the Securities. These statements of material facts were untrue and contained material omissions. As detailed in ¶¶ 98-112, New Century, the principal Mortgage Originator of loans underlying the Securities initially offered by HSBC, violated its stated underwriting and appraisal standards.

436. HSBC's statements of material facts were also untrue because other material data provided to Plaintiff by HSBC was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

437. HSBC met with Plaintiff on or about December 5, 2005 and November 22, 2006. During the meetings, HSBC reiterated many of the statements of material facts in the documents provided to Plaintiff. In addition, HSBC stated that HSBC conducted due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

438. These oral statements of material facts were untrue because HSBC failed to conduct adequate due diligence on the Mortgage Originators and the mortgage loans underlying the Securities in accordance with its statements.

439. The statements of material facts in the documents HSBC sent to Plaintiff were also untrue because New Century violated its stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to its underwriting standards absent the "compensating factors" required by the guidelines.

440. The statements of material facts in the documents HSBC sent to Plaintiff were also untrue because of inflated appraisals for the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See* ¶¶51-57.

441. In sum or substance, HSBC stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

442. The result of the untrue statements of material facts and omissions described above is that the Securities that HSBC underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default,

foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by HSBC to Plaintiff.

n. Banc of America's Untrue Statements Of Material Facts And Omissions

443. Banc of America Securities, LLC offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $77,065,662. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

444. Banc of America sought to expand its share of the RMBS market by aggressively pursuing subprime Mortgage Originators including Option One, Accredited, the Ameriquest Loan Sellers, New Century, and WMC, offering to pay more for their mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors.

445. To facilitate the sale of RMBS, Banc of America's parent company formed SVPs, including Depositor Defendant Asset Backed Funding Corporation ("ABFC"), which served as the depositor and issuer for many of its offerings. Banc of America offered or sold the Securities to Plaintiff. Banc of America also provided financial research on RMBS and related structured products.

446. In connection with its offer or sale of Securities to Plaintiff, Banc of America sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Banc of America also sent Plaintiff numerous other documents, including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and "loan tapes." The loan tapes Banc of America sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO

scores. Often for Securities that Plaintiff purchased in the initial offering, Banc of America also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Banc of America's due diligence of the Mortgage Originators' underwriting practices. Banc of America did not allow Plaintiff to keep the pitch books.

447. In the Offering Documents, Banc of America made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Option One originated all or a significant amount of the underlying mortgage loans, Banc of America reprinted Option One's "Underwriting Guidelines," which stated that (a) Option One's guidelines were "intended to assess the value of the mortgaged property, to evaluate the adequacy of such property as collateral for the mortgage loan and to assess the applicant's ability to repay the mortgage loan"; (b) the "Mortgage Loans [were] originated generally in accordance with Option One's [Underwriting] Guidelines"; and (c) exceptions to these guidelines would only be made "on a case-by-case basis . . . where compensating factors exist." *See* ¶199. Banc of America made similar statements of material facts for mortgage loans originated by other mortgage originators, including Accredited, the Ameriquest Loan Sellers, New Century, and WMC. *See* Section V.

448. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Banc of America stated, for example that Option One's guidelines required that "[a]ll appraisals are required to conform to the Uniform Standards of Professional Appraisal Practice adopted by the Appraisal Standards Board of the Appraisal Foundation and are generally on forms acceptable to Fannie Mae and Freddie Mac," and that Option One commissioned an appraisal of mortgaged properties by "qualified independent appraisers" and "require[d] that mortgage loans be underwritten in a standardized procedure which complies with applicable federal and state laws and regulations and require Option One's underwriters to be satisfied that the value of the property being financed, as indicated by an appraisal, supports the loan balance." *See* ¶199. Banc of America

made similar statements of material facts for appraisals commissioned, performed, or reviewed by other mortgage originators, including Accredited, the Ameriquest Loan Sellers, New Century, and WMC. *See* Section V.

449. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Banc of America made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to the mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

450. Banc of America also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in calls and meetings, some of which took place in Plaintiff's Massachusetts offices. Some of Plaintiff's meetings with Banc of America representatives occurred on or about September 15, 2004; April 4, June 2, November 28, November 29, and December 5, 2005; January 2, January 31, May 23, and October 10, 2006; and January 4, 2007. During these meetings, Banc of America's employees made statements of material facts regarding Banc of America's upcoming RMBS deals, and assured Plaintiff that Banc of America conducted its own due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance.

451. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. For example, as detailed above, Option One systematically violated its stated underwriting and appraisal standards. Moreover, Banc of America's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

452. The statements of material facts in the documents Banc of America sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated

underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, a subsequent lawsuit brought by the Attorney General for the Commonwealth of Massachusetts against Option One, and its past and present parent companies, alleged that Option One "increasingly disregard[ed] underwriting standards, creat[ed] incentives for loan officers and brokers to disregard the interests of the borrowers and steer them into high-cost loans, and originated thousands of loans that [Option One] knew or should have known the borrowers would be unable to pay, all in an effort to increase loan origination volume so as to profit from the practice of packaging and selling the vast majority of [Option One's] residential subprime loans to the secondary market." The other Mortgage Originators of loans underlying the Securities initially offered by Banc of America, including Accredited, the Ameriquest Loan Sellers, New Century, and WMC, similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production.

453. The statements of material facts in the documents Banc of America sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶51-57.

454. Banc of America's statements of material facts were also untrue because other material data provided to Plaintiff by Banc of America was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

455. In sum or substance, Banc of America stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as

required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

456. The result of Banc of America's untrue statements of material facts and omissions is that the Securities that Banc of America underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Banc of America to Plaintiff.

o. GMAC's Untrue Statements Of Material Facts And Omissions

457. GMAC offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $5,461,231. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

458. GMAC sought to expand its share of the RMBS market by aggressively pursuing subprime mortgage originators, offering to pay more for their mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors.

459. To facilitate the sale of RMBS, GMAC formed SPVs, including Depositor Defendants Residential Asset Securities Corporation ("RASC") and Residential Asset Mortgage Products Inc. ("RAMP"), which served as the depositors and issuers for many of GMAC's offerings. GMAC offered or sold the Securities to Plaintiff. GMAC also provided financial research on RMBS and related structured products.

460. In connection with its offer or sale of Securities to Plaintiff, GMAC sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. GMAC also sent Plaintiff numerous other documents, including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and "loan tapes." The loan tapes GMAC sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the data, the mortgage originators' underwriting practices and guidelines for the mortgages supporting the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. In connection with the offer to Plaintiff of Securities that Plaintiff purchased in the initial offering of the Securities, GMAC also showed Plaintiff "pitch books" promoting, *inter alia*, the Mortgage Originators' underwriting practices and guidelines for the mortgages supporting the Securities, the data, and GMAC's due diligence of the Mortgage Originators' underwriting practices. GMAC did not allow Plaintiff to keep the pitch books.

461. In the Offering Documents, GMAC made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans.

462. Moreover, the Offering Documents made statements of material facts regarding the relevant Mortgage Originators' compliance with their appraisal guidelines.

463. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," GMAC made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

464. GMAC also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff in a meeting at Plaintiff's offices in Massachusetts on or about August 17, 2005.

465. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. The Mortgage Originators in the GMAC deals systematically violated their stated underwriting and appraisal standards. Moreover, GMAC's additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

466. The statements of material facts in the documents GMAC sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines.

467. The statements of material facts in the documents GMAC sent to Plaintiff were also untrue because of the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue.

468. GMAC's statements of material facts were also untrue because other material data provided to Plaintiff by GMAC was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

469. In sum or substance, GMAC stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because

Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

470. The result of GMAC's untrue statements of material facts and omissions is that the Securities that GMAC underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by GMAC to Plaintiff.

p. Barclays' Untrue Statements Of Material Facts And Omissions

471. Barclays offered or sold Securities to Plaintiff in Massachusetts, and underwrote Securities sold in the secondary market to Plaintiff, for a total price of $70,956,316. A full list of these offerings and sales, along with the relevant Offering Documents, the identities of the relevant Depositor Defendants and Mortgage Originators, the dates of the purchases, the amounts invested, and the selling Wall Street Bank Defendants, is contained in the attached Appendix A.

472. Barclays sought to expand its share of the RMBS market by aggressively pursuing subprime Mortgage Originators including the Ameriquest Loan Sellers, Fremont, and Option One, offering to pay more for their mortgages than competing Wall Street Banks, and offering to perform less due diligence than competitors. Fremont was one of the largest Mortgage Originators of loans underlying the Securities initially offered by Barclays. In an effort to expand its subprime origination, servicing, and securitization business in the United States, Barclays acquired two large U.S.-based mortgage companies: HomEq Servicing Corporation in June 2006, and EquiFirst Corporation in 2007.

473. To facilitate the sale of RMBS, Barclays parent company formed SPVs, including Depositor Defendant Securitized Asset Backed Receivables LLC (SABR), which served as the depositor and issuer for many of Barclays offerings. Barclays offered or sold the Securities to Plaintiff. Barclays also provided financial research on RMBS and related structured products.

474. In connection with its offer or sale of Securities to Plaintiff, Barclays sent numerous documents to Plaintiff in Massachusetts. These documents included registration statements, prospectuses, and prospectus supplements. Barclays also sent Plaintiff numerous other documents, including term sheets, private placement term sheets, confidential offering memoranda, computational materials, collateral terms sheets, and loan tapes. The loan tapes Barclays sent to Plaintiff consisted of Excel spreadsheets that contained over 60 categories of information related to the individual loans including, *inter alia*, the data, the Mortgage Originators underwriting practices and guidelines for the mortgages supporting the purpose of the mortgage loans; the type of properties; the owner-occupancy status; and borrower FICO scores. Often for Securities that Plaintiff purchased in the initial offering, Barclays also showed Plaintiff pitch books promoting, *inter alia*, the Mortgage Originators underwriting practices and guidelines for the mortgages supporting the Securities, the data, and Barclays due diligence of the Mortgage Originators underwriting practices. Barclays did not allow Plaintiff to keep the pitch books.

475. In the Offering Documents, Barclays made numerous statements of material facts regarding the underwriting standards that had been followed in originating the underlying mortgage loans. For example, in offerings for which Fremont originated all or a significant amount of the underlying mortgage loans, Barclays reprinted Fremont s Underwriting Guidelines, which stated, in sum or substance, that (a) Fremont s guidelines were intended to assess the borrower s ability and willingness of the borrower to repay the debt; (b) the mortgage loans [were] underwritten in accordance with Fremont s current underwriting programs; and (c) exceptions to these guidelines would only be made on a case-by-case basis . . . based on compensating factors. *See* 147-148. Barclays made similar statements of

material facts for Mortgage Loans originated by other Mortgage Originators, including Option One. *See* ¶199.

476. Moreover, the Offering Documents made statements of material facts regarding the appraisal guidelines and practices of the relevant Mortgage Originators. Barclays stated, for example, that "underwriting guidelines are applied in accordance with a procedure which complies with applicable federal and state laws and regulations and require an appraisal of the mortgaged property, and if appropriate, a review appraisal" and that Fremont commissioned appraisals of mortgaged properties by "qualified independent appraisers." *See* ¶¶ 147-148. Barclays made similar statements of material facts for appraisals commissioned, performed, or reviewed by other Mortgage Originators, including Option One. *See* ¶199.

477. In other documents sent or shown to Plaintiff, including "term sheets," "loan tapes," and "pitch books," Barclays made additional statements of material facts regarding the particular Securities and their underlying data, data quality, and Mortgage Originator practices and guidelines applicable to mortgage loans underlying those Securities. This information was material as it allowed Plaintiff to perform sensitive calculations regarding the risk, cash flow, and value of a Security and to determine whether to purchase the Security on behalf of the Clients.

478. Barclays also made additional, oral statements of material facts about the Securities it offered or sold to Plaintiff. Some of Plaintiff's meetings with Barclays occurred on or about July 13 and October 27, 2004; January 19, 2005; and March 14 and November 6, 2006. During these meetings, Barclays representatives made statements of material facts regarding Barclays' upcoming RMBS deals, and assured Plaintiff that Barclay conducted its own due diligence to ensure that the Mortgage Originators complied with their stated underwriting guidelines, including by sampling loans in order to check underwriting process, documentation, valuations, and compliance. For example, Plaintiff met with Barclays at the ABS East industry conference during November 2006. At this meeting, Barclays stated that Barclays employees were on-site with the largest Mortgage Originators, "QCing" (*i.e.*, quality controlling) the

underwriting and pool construction process, and that every exception to the Mortgage Originators' underwriting standards was supposed to be QC'ed by a Barclays employee.

479. Each of the statements of material facts identified above regarding underwriting and appraisal standards were untrue and contained material omissions. As detailed below, Fremont, the principal Mortgage Originator in the Barclays deals, systematically violated its stated underwriting and appraisal standards. Moreover, Barclays' additional statements of material facts regarding its own due diligence were untrue and contained material omissions.

480. The statements of material facts in the documents Barclays sent to Plaintiff were untrue because the Mortgage Originators systematically violated their stated underwriting guidelines, did not consistently evaluate the borrowers' ability to repay the loans, and made exceptions to their underwriting standards absent the "compensating factors" required by their guidelines. For example, subsequent investigations and lawsuits have demonstrated that Fremont made frequent exceptions to its underwriting guidelines for borrowers who would not otherwise qualify for a loan; Fremont management encouraged risky loan originations; and Fremont was "operating with inadequate underwriting criteria and excessive risk in relation to the kind and quality of assets held by [Fremont]." *See* ¶¶149-168. Moreover, former Fremont employees witnessed firsthand how exceptions to Fremont's underwriting became the "norm" because employees had to do what was necessary to increase loan originations. *Id.* The FDIC ultimately issued a Cease & Desist Order to Fremont for extending subprime credit "in an unsafe and unsound manner" and committing violations of laws and FDIC regulations. *See* ¶¶153-154. The other Mortgage Originators of loans underlying the Securities initially offered by Barclays, including the Ameriquest Loan Sellers and Option One, similarly violated their stated underwriting guidelines in exchange for dramatically increased loan production. *See* Section V.

481. The statements of material facts in the documents Barclays sent to Plaintiff were also untrue because the Mortgage Originators either knew of or participated in the inflated appraisals of the mortgaged properties, which caused the listed LTV ratios and levels of credit enhancement to be untrue. *See, e.g.*, ¶¶51-57.

482. Barclays' statements of material facts were also untrue because other material data provided to Plaintiff by Barclays was untrue. For example, the data often incorrectly identified properties as "owner occupied" when they were really second homes or investment properties. The untruth of this information was material to Plaintiff's analysis of the loans' credit quality and likelihood of default.

483. In sum or substance, Barclays stated in each Prospectus Supplement for Securities underwritten by it that the issuing trust for the relevant Securities had valid title to the mortgage loans comprising the pool for that securitization. These representations were false because, as alleged in detail in ¶¶ 67-82, Defendants routinely failed to physically deliver the original promissory notes and security instruments for the mortgage loans to the issuing trusts, as required by applicable state laws and the PSAs. These representations were also false because Defendants routinely failed to execute valid endorsements of the documents at the time of the purported transfer, as also required by applicable state laws and the PSAs. The issuing trusts therefore did not possess good title to many of the mortgage loans, lacked legal authority to receive cash flows from many of the mortgage borrowers' payments of interest and principal to be passed through to the Securities holders, and lacked legal authority to enforce many of the mortgage loans against the borrowers in case of default.

484. The result of Barclays' untrue statements of material facts and omissions is that the Securities that Barclays underwrote, offered or sold to Plaintiff have all been downgraded, and their value has collapsed. As of December 2010 over 32% of the mortgage loans underlying the Securities included in this Complaint are in delinquency, default, foreclosure, bankruptcy, or repossession. Plaintiff and the Clients have suffered significant losses on the Securities underwritten, offered or sold by Barclays to Plaintiff.

q. The Depositor Defendants' Untrue Statements Of Material Facts And Omissions

485. For their securitization businesses, financial institutions created SPVs, wholly-owned subsidiaries, to serve as depositors that purchased or acquired the loans for securitization

and sale to investors. The limited corporate purpose of depositors was to package and sell loans for the benefit of their parent banks. Revenues from the depositors securitization activities were passed up to the parent banks.

486. Each of the Depositor Defendants served as a depositor for the sale of the Securities. The Depositor Defendants, as issuers under Regulation AB (17 CFR § 230.191), were sellers of the Securities and made false statements of material facts in the Offering Documents.

487. Prior to issuing the Securities, the Depositor Defendants prepared and filed with the SEC on Form S-3 registration statements under the Securities Act of 1933, 15 U.S.C § 77k, indicating their intention to sell the Securities. The Depositors then issued the Securities pursuant to the registration statements, accompanying prospectuses, and subsequent prospectus supplements, or private placement memoranda. The Depositor Defendants and the Wall Street Banks drafted the prospectus supplements or private placement memoranda and circulated these documents to investors, including Plaintiff. The Depositor Defendants filed the prospectus supplements with the SEC.

488. As alleged above, the prospectus supplements or private placement memoranda purported to describe the mortgage pools underlying the Securities that the Depositor Defendants offered and sold, making statements about the loan origination process, the quality of the loans, and the adequacy of the collateral. Each prospectus supplement or private placement memorandum included tables with data concerning the loans underlying the Securities, including (but not limited to) the type of loans, the number of loans, the mortgage rate and net mortgage rate, the aggregate scheduled principal balance of the loans, the purported weighted average of original combined LTV ratios, the occupancy status of the mortgaged properties, and the geographic concentration of the properties.

489. The prospectus supplements or private placement memoranda contained the untrue statements of material facts set forth above in Section VI concerning the Securities, including untrue statements regarding: (1) the Mortgage Originators underwriting guidelines

that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal guidelines that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) various forms of credit enhancement applicable to certain tranches of Securities; and (5) the Depositor Defendants' transfer of valid title to the mortgage loans comprising the pool for each offering of Securities to the relevant issuing trust.

490. As detailed above, these statements of material facts concerning the Securities were untrue because: (1) the Mortgage Originators violated their stated underwriting guidelines and did not consistently evaluate the borrowers' ability to repay the loans; (2) inflated appraisals caused the listed LTV ratios and levels of credit enhancement to be inaccurate; (3) the stated numbers of riskier "second home" and "investment property" mortgagees were lower than the actual numbers, and the stated numbers of less risky "owner occupied" mortgage loans were higher than the actual numbers; and (4) Defendants routinely failed to transfer valid title to the mortgage loans comprising the pool for each offering of Securities to the relevant issuing trust. In addition, metrics such as debt-to-income ratios were untrue as a result of the Mortgage Originators' acceptance of untrue information from mortgage applicants.

VII. THE PERFORMANCE AND VALUE OF THE SECURITIES

491. The rates of delinquency, foreclosure, and real estate owned (*i.e.*, foreclosed and not yet sold) on the Securities' underlying mortgages have soared since issuance. As reflected in the charts below (in which all figures are expressed as percentages), as of December 2010, the percentage of those underlying loans that are currently either 60 days or more delinquent, in foreclosure, or real estate owned exceeds 32%, on average, for the Securities offered or sold to Plaintiff by each Wall Street Bank Defendant. These data provide a snapshot of the pools as currently constituted and do not include loans that have been liquidated out of the original pools.

The pools and the related Securities suffered significant additional losses as a result of the liquidation of defaulted loans that are not included in the tables below.

Deal	60 Days Delinquent	90 Days Delinquent	In Foreclosure	Real Estate Owned	Total Delinquency

VIII. COUNT I AGAINST THE WALL STREET BANK DEFENDANTS: VIOLATION OF MASSACHUSETTS UNIFORM SECURITIES ACT, MASS. GEN. LAWS CH. 110A § 410(A)(2)

492. Plaintiff realleges and incorporates by reference the allegations contained in paragraphs 1 through 488.

493. Each of the Securities was offered or sold to the Plaintiff in Massachusetts and purchased directly or for the benefit of the Clients. Each Wall Street Bank Defendant offered or sold Securities to Plaintiff in Massachusetts.

494. Massachusetts General Laws Chapter 110A, § 101 provides that □it is unlawful for any person, in connection with the offer, sale or purchase of any security, directly or indirectly (1) to employ any device, scheme or artifice to defraud, (2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made not misleading, or (3) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person.□

495. Massachusetts General Laws Chapter 110A, § 410(a)(2) provides for civil liability in the event of any offer or sale of securities by means of an untrue statement or material

omission. Massachusetts General Laws Chapter 110A, § 410(b) provides for joint and several liability with the seller of every broker-dealer or agent who materially aids in a sale in violation of § 410(a).

496. Each Wall Street Bank Defendant made an untrue statement of a material fact or omitted to state a material fact necessary in order to make the statements made not misleading, in connection with the offer or sale of the Securities to Plaintiff. For Plaintiff's purchases of Securities from a Wall Street Bank Defendant that did not underwrite the initial offering of that Security, such Wall Street Bank made an untrue statement of material fact, or omitted to state a material fact necessary in order to make the statements made not misleading, by delivering the misleading Offering Documents and other offering materials to Plaintiff. The Wall Street Bank Defendant that underwrote the initial offering materially aided in the sale of the Securities to Plaintiff by preparing the misleading Offering Documents and other offering materials that were provided to Plaintiff and by circulating the misleading Offering Documents and other offering materials to the market.

497. In connection with the offer or sale of the Securities to Plaintiff, each Wall Street Bank Defendant violated § 410(a)(2) by making an untrue statement of a material fact or omitting to state a material fact necessary in order to make the statements made not misleading, concerning, *inter alia*, (1) the Mortgage Originators' underwriting standards that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were "owner occupied," "second homes," or "investment properties"; (4) the Wall Street Bank Defendants' due diligence of the loans and the Mortgage Originators' underwriting practices; (5) various forms of credit enhancement applicable to certain tranches of Securities; and (6) whether the issuing trust for each offering had obtained good title to the mortgage loans comprising the

pool for the offering. Plaintiff made the decision to purchase the Securities on behalf of the Clients not knowing of the Defendants untruths or omissions.

498. The Wall Street Bank Defendants actions and conduct violated Massachusetts General Laws Ch. 110A.

499. Plaintiff has been damaged by the Wall Street Bank Defendants violations of the Massachusetts Securities Act.

IX. COUNT II AGAINST THE DEPOSITOR DEFENDANTS: VIOLATION OF MASSACHUSETTS UNIFORM SECURITIES ACT, MASS. GEN. LAWS CH. 110A § 410(A)(2)

500. Plaintiff realleges and incorporates by reference the allegations contained in paragraphs 1 through 496.

501. Each of the Securities was offered or sold to the Plaintiff in Massachusetts and purchased directly or for the benefit of the Clients. Each Depositor Defendant offered or sold Securities to Plaintiff in Massachusetts.

502. Massachusetts General Laws Chapter 110A, § 101 provides that it is unlawful for any person, in connection with the offer, sale or purchase of any security, directly or indirectly (1) to employ any device, scheme or artifice to defraud, (2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made not misleading, or (3) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person.

503. Massachusetts General Laws Chapter 110A, § 410(a)(2) provides for civil liability in the event of any offer or sale of securities by means of an untrue statement or material omission.

504. Each Depositor Defendant made an untrue statement of a material fact or omitted to state a material fact necessary in order to make the statements made not misleading, in connection with the offer or sale of the Securities to Plaintiff.

505. In connection with the offer or sale of the Securities to Plaintiff, each Depositor Defendant violated § 410(a)(2) by making an untrue statement of a material fact or omitting to

state a material fact necessary in order to make the statements made not misleading, concerning, *inter alia*, (1) the Mortgage Originators' underwriting standards that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were 'owner occupied,' 'second homes,' or 'investment properties'; (4) the Wall Street Bank Defendants' due diligence of the loans and the Mortgage Originators' underwriting practices; (5) various forms of credit enhancement applicable to certain tranches of Securities; and (6) whether the issuing trust for each offering had obtained good title to the mortgage loans comprising the pool for the offering. Plaintiff made the decision to purchase the Securities on behalf of the Clients not knowing of the Defendants' untruths or omissions.

506. The Depositor Defendants' actions and conduct violated Massachusetts General Laws Ch. 110A.

507. Plaintiff has been damaged by the Depositor Defendants' violations of the Massachusetts Securities Act.

X. COUNT III AGAINST THE WALL STREET BANK DEFENDANTS: VIOLATION OF MASSACHUSETTS UNIFORM SECURITIES ACT, MASS. GEN. LAWS CH. 110A § 410(b)

508. Plaintiff realleges and incorporates by reference the allegations contained in paragraphs 1 through 504.

509. Each of the Securities was offered or sold to the Plaintiff in Massachusetts and purchased directly or for the benefit of the Clients. Each Wall Street Bank Defendant offered or sold Securities to Plaintiff in Massachusetts.

510. Massachusetts General Laws Chapter 110A, § 101 provides that 'it is unlawful for any person, in connection with the offer, sale or purchase of any security, directly or indirectly (1) to employ any device, scheme or artifice to defraud, (2) to make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the

statements made not misleading, or (3) to engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person.

511. Massachusetts General Laws Chapter 110A, § 410(b) provides that every broker-dealer or agent who materially aids in the sale [of securities by a seller liable under subsection (a) is] also liable jointly and severally with and to the same extent as the seller . . . .

512. Each Wall Street Bank Defendant materially aided in the offer or sale of Securities to Plaintiff pursuant to an untrue statement of a material fact or omission to state a material fact necessary in order to make the statements made not misleading, in connection with the offer or sale of the Securities to Plaintiff.

513. In connection with the offer or sale of the Securities to Plaintiff, each Wall Street Bank Defendant violated § 410(b) by materially aiding the offer or sale of Securities pursuant to an untrue statement of a material fact or omitting to state a material fact necessary in order to make the statements made not misleading, concerning, *inter alia*, (1) the Mortgage Originators underwriting standards that were purportedly applied to evaluate the ability of the borrowers to repay the loans underlying the Securities; (2) the appraisal standards that were purportedly applied to evaluate the value and adequacy of the mortgaged properties as collateral; (3) the LTV ratios, debt-to-income ratios, and purported occupancy status of the mortgaged properties, including whether the properties were owner occupied, second homes, or investment properties; (4) the Wall Street Bank Defendants due diligence of the loans and the Mortgage Originators underwriting practices; (5) various forms of credit enhancement applicable to certain tranches of Securities; and (6) whether the issuing trust for each offering had obtained good title to the mortgage loans comprising the pool for the offering. Plaintiff made the decision to purchase the Securities on behalf of the Clients not knowing of the Defendants untruths or omissions.

514. The Wall Street Bank Defendants actions and conduct violated Massachusetts General Laws Ch. 110A.

515. Plaintiff has been damaged by the Wall Street Bank Defendants violations of the Massachusetts Securities Act.

XI. RELIEF REQUESTED

WHEREFORE, Plaintiff requests entry of final judgment, as expressly provided by Mass. Gen. Laws Ch. 110A, § 410, as follows: (i) recovery of the consideration paid for the Securities, together with statutory interest from the date of payment, costs, and reasonable attorneys fees, less the amount of any income received on the Securities, upon the tender of the Securities, or (ii) damages in the amount that would be recoverable upon a tender of the Securities less the value of the Securities when the buyer disposed of them, statutory interest from the date of disposition, costs, and reasonable attorneys fees. In addition, Plaintiff requests such other and further relief as the Court deems just and proper.

XII. JURY DEMAND

Plaintiff demands a trial by jury on all claims so triable.

Index No. 12 CV 4000 **COMPLAINT**

U.S. DISTRICT COURT
FILED
MAY 18 2012
S. D. OF N.Y.

Plaintiff Federal Deposit Insurance Corporation as Receiver for Citizens National Bank and Strategic Capital Bank, for its Complaint against Bear Stearns Asset Backed Securities I LLC; The Bear Stearns Companies LLC; J.P. Morgan Securities LLC; Citicorp Mortgage Securities, Inc.; CitiMortgage, Inc.; Citigroup Global Markets Inc.; Credit Suisse First Boston Mortgage Securities Corp.; Credit Suisse Management LLC; Credit Suisse Securities (USA) LLC; Merrill Lynch Mortgage Investors, Inc.; Merrill Lynch Mortgage Capital Inc.; Merrill Lynch, Pierce, Fenner & Smith Inc.; Ally Securities, LLC; Deutsche Bank Securities Inc.; HSBC Securities (USA) Inc.; RBS Securities Inc.; and UBS Securities LLC, alleges as follows:

I. NATURE OF THIS ACTION

1. This is an action for damages caused by violation of the federal Securities Act of 1933 (**1933 Act**) by the defendants. As alleged in detail below, defendants issued and underwrote nineteen securities known as "certificates," which were backed by collateral pools of residential mortgage loans in twelve securitizations. Citizens National Bank (referred to in this Complaint as **CNB**) purchased ten of the certificates for approximately $67.5 million. Strategic Capital Bank (referred to in this Complaint as **SCB**) purchased nine of the certificates for approximately $73 million. When they issued and underwrote these certificates, the defendants made numerous statements of material facts about the certificates and, in particular, about the credit quality of the mortgage loans that backed them. Many of those statements were untrue. Moreover, the defendants omitted to state many material facts that were necessary in order to make their statements not misleading. For example, the defendants made untrue statements or omitted important information about such material facts as the loan-to-value ratios of the mortgage loans, the extent to which appraisals of the properties that secured the loans were performed in compliance with professional appraisal standards, the number of borrowers who did not live in the houses that secured their loans (that is, the number of properties that were not primary residences), and the extent to which the entities that made the loans disregarded their own standards in doing so.

2. Based on an analysis of a random sample of the relevant loans in each of the twelve securitizations, the defendants made such untrue or misleading statements or omissions about at least the following numbers of the loans.

Securitization No.[1]	Number of Loans about which Defendants Made Material Untrue or Misleading Statements[2]	Number of Relevant Loans in the Securitizations	Percentage of Loans about which Defendants Made Material Untrue or Misleading Statements
1	2,380	3,552	67.0%
2	3,133	4,712	66.5%
3	383	636	60.2%
4	2,762	4,266	64.7%
5	1,986	3,009	66.0%
6	800	1,539	52.0%
7	1,125	1,822	61.7%
8	793	1,392	57.0%
9	1,119	1,696	66.0%
10	136	240	56.7%
11	827	1,645	50.3%
12	926	1,424	65.0%

3. The certificates are "securities" within the meaning of the 1933 Act. The defendants are liable under the following provisions of the 1933 Act:

As issuers: Bear Stearns Asset Backed Securities I LLC issued one of the certificates that CNB purchased and one of the certificates that SCB purchased. Citicorp Mortgage Securities, Inc. issued one of the certificates that SCB purchased. Credit Suisse First Boston Mortgage Securities Corp. issued one of the certificates that CNB purchased and one of the certificates that SCB purchased. Merrill Lynch Mortgage Investors, Inc. issued one of the certificates that CNB purchased and one of the certificates that SCB purchased. These defendants are liable as "issuers" under Section 11 of the 1933 Act.

---

[1] Six of the securitizations issued two or more of the certificates that SCB and CNB purchased.

[2] The method of random sampling that Plaintiff used ensures that conclusions about the entire collateral pool have a margin of error of no more than plus or minus 5% at a confidence level of 95% (that is, one can be 95% certain that the true percentage in the collateral pool as a whole is within 5% of the percentage measured in the sample). For example, one can be 95% certain that the number of loans in Securitization No. 7 about which defendants made untrue or misleading statements or omissions is within 5% of 1,125, that is, between 1,069 and 1,181. The same margin of error should be applied to all information in the Complaint and accompanying schedules that is based on a random sample of loans in a collateral pool.

As underwriters: J.P. Morgan Securities LLC underwrote one of the certificates that CNB purchased and one of the certificates that SCB purchased. Citigroup Global Markets Inc. underwrote one of the certificates that CNB purchased and two of the certificates that SCB purchased. Credit Suisse Securities (USA) LLC underwrote one of the certificates that CNB purchased and two of the certificates that SCB purchased. Deutsche Bank Securities Inc. underwrote four of the certificates that CNB purchased. Ally Securities, LLC underwrote five of the certificates that CNB purchased and one of the certificates that SCB purchased. HSBC Securities (USA) Inc. underwrote one of the certificates that CNB purchased. Merrill Lynch, Pierce, Fenner & Smith Inc. underwrote one of the certificates that CNB purchased and one of the certificates that SCB purchased. RBS Securities Inc. underwrote two of the certificates that CNB purchased and three of the certificates that SCB purchased. UBS Securities LLC underwrote one of the certificates that SCB purchased. These defendants are liable as "underwriters" under Section 11 of the 1933 Act.

As control persons: The Bear Stearns Companies Inc., CitiMortgage, Inc., Credit Suisse Management LLC, and Merrill Lynch Mortgage Capital Inc., are liable as "controlling persons" of Bear Stearns Asset Backed Securities I LLC, Citicorp Mortgage Securities, Inc., Credit Suisse First Boston Mortgage Securities Corp., and Merrill Lynch Mortgage Investors, Inc., respectively, under Section 15 of the 1933 Act.

II. PARTIES

4. Plaintiff is the receiver for CNB and SCB. Under the Federal Deposit Insurance Act, the Federal Deposit Insurance Corporation, a corporation organized and existing under the laws of the United States of America, is authorized to be appointed as receiver for failed insured depository institutions. Under the Federal Deposit Insurance Act, Plaintiff is empowered to sue and complain in any court of law and to do so to pursue claims held by banks of which it is the receiver. 12 U.S.C. § 1819. Thus, Plaintiff has authority to pursue claims held by CNB and SCB, including its claims made against the defendants in this action.

5. Defendant Bear Stearns Asset Backed Securities I LLC (referred to as **BSABS**) is a corporation organized under the laws of Delaware. BSABS was the issuer of one of the certificates that CNB purchased and one of the certificates that SCB purchased.

6. Defendant The Bear Stearns Companies LLC (formerly known as The Bear Stearns Companies Inc. and referred to as **BSCI**) is a limited liability company organized under the laws of Delaware. During the relevant time period, BSCI controlled BSABS. Under Section 15 of the Securities Act, 15 U.S.C. § 77o, BSCI therefore is liable jointly and severally with, and to the same extent as, BSABS.

7. Defendant J.P. Morgan Securities LLC (formerly known as Bear, Stearns & Co. Inc. and referred to as **Bear Stearns**) is a limited liability company organized under the laws of Delaware. Bear Stearns underwrote one of the certificates that CNB purchased and one of the certificates that SCB purchased.

8. Defendant Citicorp Mortgage Securities, Inc. (referred to as **CMSI**) is a corporation organized under the laws of Delaware. CMSI issued one of the certificates that SCB purchased.

9. Defendant CitiMortgage, Inc. (referred to as **CitiMortgage**) is a corporation organized under the laws of New York. During the relevant time period, CitiMortgage controlled CMSI. Under Section 15 of the Securities Act, 15 U.S.C. § 77o, CitiMortgage therefore is liable jointly and severally with, and to the same extent as, CMSI.

10. Defendant Citigroup Global Markets Inc. (referred to as **Citigroup**) is a corporation organized under the laws of New York. Citigroup underwrote one of the certificates that CNB purchased and two of the certificates that SCB purchased.

11. Defendant Credit Suisse First Boston Mortgage Securities Corp. (referred to as **CSFB Mortgage Securities**) is a corporation organized under the laws of Delaware. CSFB Mortgage Securities issued one of the certificates that CNB purchased and one of the certificates that SCB purchased.

12. Defendant Credit Suisse Management LLC (referred to as **Credit Suisse Management**) is a limited liability company organized under the laws of Delaware. During the relevant time period, Credit Suisse Management controlled CSFB Mortgage Securities. Under Section 15 of the Securities Act, 15 U.S.C. § 77o, Credit Suisse Management therefore is liable jointly and severally with, and to the same extent as, CSFB Mortgage Securities.

13. Defendant Credit Suisse Securities (USA) LLC (referred to as **Credit Suisse**) is a limited liability company organized under the laws of Delaware. Credit Suisse underwrote one of the certificates that CNB purchased and two of the certificates that SCB purchased.

14. Defendant Merrill Lynch Mortgage Investors, Inc. (referred to as **MLMI**) is a corporation organized under the laws of Delaware. MLMI issued one of the certificates that CNB purchased and one of the certificates that SCB purchased.

15. Defendant Merrill Lynch Mortgage Capital Inc. (referred to as **MLMCI**) is a corporation organized under the laws of Delaware. During the relevant time period, MLMCI controlled MLMI. Under Section 15 of the Securities Act, 15 U.S.C. § 77o MLMCI therefore is liable jointly and severally with, and to the same extent as, MLMI.

16. Defendant Merrill Lynch, Pierce, Fenner & Smith Inc. (referred to as **Merrill Lynch**) is a corporation organized under the laws of Delaware. Merrill Lynch underwrote one of the certificates that CNB purchased and one of the certificates that SCB purchased.

17. Defendant Ally Securities, LLC (formerly known as Residential Funding Securities, LLC and doing business as GMAC RFC Securities, and referred to as **GMAC**) is a corporation organized under the laws of Delaware. GMAC underwrote five of the certificates that CNB purchased and one of the certificates that SCB purchased.

18. Defendant Deutsche Bank Securities Inc. (referred to as **DBS**) is a corporation organized under the laws of Delaware. DBS underwrote four of the certificates that CNB purchased.

19. Defendant HSBC Securities (USA) Inc. (referred to as **HSBC**) is a corporation organized under the laws of Delaware. HSBC underwrote one of the certificates that CNB purchased.

20. Defendant RBS Securities Inc. (formerly known as Greenwich Capital Markets, Inc. and doing business as RBS Greenwich Capital, and referred to as **RBS**) is a corporation organized under the laws of Delaware. RBS underwrote two of the certificates that CNB purchased and three of the certificates that SCB purchased.

21. Defendant UBS Securities LLC (referred to as **UBS**) is a limited liability company organized under the laws of Delaware. UBS underwrote one of the certificates that SCB purchased.

III. JURISDICTION AND VENUE

22. This Court has subject matter jurisdiction pursuant to 28 U.S.C. § 1331 because the Securities Act claims asserted herein arise under Sections 11 and 15 of the Securities Act of 1933, 15 U.S.C. §§ 77k and 77o. This Court further has jurisdiction over the Securities Act claims pursuant to Section 22 of the Securities Act of 1933, 15 U.S.C. § 77v.

23. Venue is proper in this Court, pursuant to Section 22 of the Securities Act of 1933, 15 U.S.C. § 77v, because the defendants are found in this district, are inhabitants of this district, and transact business in this district.

IV. SECURITIZATION OF MORTGAGE LOANS

24. The securities that CNB and SCB purchased are so-called **residential mortgage-backed securities**, or **RMBS**, created in a process known as **securitization**. Securitization begins with loans on which the borrowers are to make payments, usually monthly. The entity that makes the loans is known as the **originator** of the loans. The process by which the originator decides whether to make particular loans is known as the **underwriting** of loans. The purpose of underwriting is to ensure that loans are made only to borrowers of sufficient credit standing to repay them and only against sufficient collateral. In the loan underwriting process, the originator applies its **underwriting standards**.

25. In general, residential mortgage lenders may hold some of the mortgage loans they originate in their own portfolios and may sell other mortgage loans they originate into securitizations.

26. In a securitization, a large number of loans, usually of a similar type, are grouped into a **collateral pool**. The originator of those loans sells them (and, with them, the right to receive the cash flow from them) to a **trust**. The trust pays the originator cash for the loans. The trust raises the cash to pay for the loans by selling **securities**, usually called **certificates**, to investors such as CNB and SCB. Each certificate entitles its holder to an agreed part of the cash flow from the loans in the collateral pool.

27. In a simple securitization, the holder of each certificate is entitled to a *pro rata* part of the overall monthly cash flow from the loans in the collateral pool.

28. In a more complex securitization, the cash flow is divided into different parts, usually called **tranches** ("tranche" is "slice" in French), and the certificates are divided into different **classes**, each with different rights. Each class of certificates is entitled to the cash flow in the tranche corresponding to that class.

29. One way in which the cash flow is divided — and the rights of different classes of certificates distinguished — is by priority of payment or, put differently, risk of nonpayment. The most **senior** class of certificates usually is entitled to be paid in full before the next most senior class, and so on. Conversely, losses from defaults in payment of the loans in the collateral pool are allocated first to the most **subordinate** class of certificates, then to the class above that, and so on. The interest rate on each class of certificates is usually proportional to the amount of risk that that class bears; the most senior certificates bear the least risk and thus pay the lowest rate of interest, the most subordinate, the opposite. This hierarchy of rights to payment is referred to as the **waterfall**.

30. The risk of a particular class of certificate is a function of both the riskiness of the loans in the collateral pool and the seniority of that class in the waterfall. Even if the underlying loans are quite risky, the certificates may bear so little of that risk that they may be rated as

triple-A. (According to Moody's, "[o]bligations rated Aaa are judged to be of the highest quality, with minimal credit risk.") For example, assume a securitization of $100 million of risky loans, on which the historical loss rate is 5%. Assume that there are two classes of certificates, a senior class of $50 million and a subordinate class of $50 million. Even though the underlying loans are quite risky, the senior class of certificates would be paid in full as long as the $100 million of loans produced payments of at least $50 million plus interest, that is, unless the loss rate on those loans exceeded 50%, fully ten times the historical average. All but three of the certificates referred to in this Complaint were rated triple-A when CNB and SCB purchased them. The other three certificates were rated double-A.

31. Each securitization has a **sponsor**, the prime mover of the securitization. Sometimes the sponsor is the originator or an affiliate. In originator-sponsored securitizations, the collateral pool usually contains loans made by the originator that is sponsoring the securitization. Other times, the sponsor may be an investment bank, which purchases loans from one or more originators, aggregates them into a collateral pool, sells them to a trust, and securitizes them. The sponsor arranges for title to the loans to be transferred to an entity known as the **depositor**, which then transfers title to the loans to the trust.

32. The obligor of the certificates in a securitization is the trust that purchases the loans in the collateral pool. Because a trust has few assets other than the loans that it purchased, it may not be able to satisfy the liabilities of an issuer of securities (the certificates). The law therefore treats the depositor as the **issuer** of a residential mortgage-backed certificate.

33. **Securities underwriters**, like Citigroup, Credit Suisse, RBS, Bear Stearns, Merrill Lynch, DBS, UBS, and HSBC play a critical role in the process of securitization. They underwrite the sale of the certificates, that is, they purchase the certificates from the trust and then sell them to investors. Equally important, securities underwriters provide to potential investors the information that they need to decide whether to purchase certificates.

34. Because the cash flow from the loans in the collateral pool of a securitization is the source of funds to pay the holders of the certificates issued by the trust, the credit quality of

those certificates is dependent upon the credit quality of the loans in the collateral pool (and upon the place of each certificate in the waterfall). The most important information about the credit quality of those loans is contained in the files that the originator develops while making the loans, the so-called "loan files." For residential mortgage loans, each loan file normally contains comprehensive information from such important documents as the borrower's application for the loan, credit reports on the borrower, and an appraisal of the property that will secure the loan. The loan file may also include notes from the person who underwrote the loan about whether and how the loan complied with the originator's underwriting standards, including documentation of any "compensating factors" that justified any departure from those standards.

35. Potential investors in certificates are not given access to loan files. Instead, the securities underwriters are responsible for gathering, verifying, and presenting to potential investors the information about the credit quality of the loans that will be deposited into the trust. They do so by using information about the loans that has been compiled into a database known as a **loan tape**. The securities underwriters use the loan tape to compile numerous statistics about the loans, which are presented to potential investors in a **prospectus supplement**, a disclosure document that the underwriters are required to file with the Securities and Exchange Commission. (Neither CNB nor SCB had access to the loan tape before they purchased the certificates, but Plaintiff has reviewed data from the loan tape in preparing this Complaint.)

36. As alleged in detail below, the information in the prospectus supplements and other offering documents about the credit quality of the loans in the collateral pools of the trusts contained many statements that were material to the credit quality of those loans, but were untrue or misleading.

V. DEFENDANTS' MATERIAL UNTRUE OR MISLEADING STATEMENTS ABOUT THE CERTIFICATES

37. CNB purchased certificates in eight securitizations (referred to in this Complaint as Securitizations Nos. 1 through 8). SCB purchased certificates in nine securitizations (referred to in this Complaint as Securitizations Nos. 4 through 12). Both CNB and SCB purchased

securities in five overlapping securitizations (Securitizations Nos. 4 through 8). Details of each trust and each certificate are stated in Item 37 of Schedules 1 through 12 of this Complaint. The Schedules correspond to Securitizations Nos. 1 through 12. Plaintiff incorporates into this paragraph 37 and alleges the contents of Item 37 of the Schedules.

38. The prospectus supplement for each of the twelve securitizations is available from the Securities and Exchange Commission's website. A URL for each prospectus supplement is included in Item 37 of each Schedule. Each prospectus supplement is incorporated into this Complaint by reference.

39. In general, Plaintiff drew and analyzed random samples of 400 loans from the collateral pools of each of the securitizations in which CNB and SCB purchased certificates.[3]

40. Many of the statements of material fact that the defendants made in the twelve prospectus supplements were untrue or misleading. These untrue or misleading statements included the following.

A. Untrue or Misleading Statements About the Loan-to-Value Ratios (LTVs) of the Mortgage Loans, and the Appraisals of the Properties, in the Collateral Pools

1. LTVs

(a) The materiality of LTVs

41. The loan-to-value ratio of a mortgage loan, or LTV, is the ratio of the amount of the mortgage loan to the lower of the appraised value or the sale price of the mortgaged property when the loan is made. For example, a loan of $300,000 secured by a property valued at $500,000 has an LTV of 60%; a loan of $450,000 on the same property has an LTV of 90%. LTV is one of the most crucial measures of the risk of a mortgage loan, and the LTVs of the mortgage loans in the collateral pool of a securitization are therefore one of the most crucial measures of the risk of certificates sold in that securitization. LTV is a primary determinant of

[3] For Securitization No. 2, Plaintiff drew and analyzed a random sample of 800 loans that backed the certificates that CNB purchased. For Securitization No 10, Plaintiff drew and analyzed a sample of 207 of the 240 loans that backed the certificate that SCB purchased. For all other securitizations, Plaintiff drew and analyzed a random sample of 400 loans that backed the certificates that CNB or SCB purchased.

the likelihood of default. The lower the LTV, the lower the likelihood of default. For example, the lower the LTV, the less likely it is that a decline in the value of the property will wipe out the owner's equity and thereby give the owner an incentive to stop making mortgage payments and abandon the property, a so-called strategic default. LTV also is a primary determinant of the severity of losses on a loan that defaults. The lower the LTV, the lower the severity of losses if the loan defaults. Loans with lower LTVs provide greater "cushion," thereby increasing the likelihood that the proceeds of foreclosure will cover the unpaid balance of the mortgage loan.

42. Beyond these fundamental effects on the likelihood and severity of default, LTVs also affect prepayment patterns (that is, the number of borrowers who pay off their mortgage loans before maturity and when they do so) and therefore the expected lives of the loans. Prepayment patterns therefore affect many aspects of certificates that are material to the investors that purchase them, including the life of the certificate and the timing and amount of cash that the investor will receive during that life.

43. In addition, rating agencies use LTVs to determine the proper structuring and credit enhancement necessary for securities, such as the certificates that CNB and SCB purchased, to receive a particular rating. If the LTVs of the mortgage loans in the collateral pool of a securitization are incorrect, the ratings of certificates sold in that securitization will also be incorrect.

44. An accurate denominator (that is, the value of the property) is essential to an accurate LTV. In particular, an inflated denominator will understate, sometimes greatly, the risk of a loan. To return to the example above, if the property whose actual value is $500,000 is valued incorrectly at $550,000, then the ostensible LTV of the $300,000 loan falls from 60% to 54.5%, and the ostensible LTV of the $450,000 loan falls from 90% to 81.8%. In either case, the LTV based on the incorrect appraised value understates the risk of the loan.

45. For these reasons, a reasonable investor considers LTV critical to the decision whether to purchase a certificate in a securitization of mortgage loans. Even small differences in the weighted average LTVs of the mortgage loans in the collateral pool of a securitization have a

significant effect on both the risk and the rating of each certificate sold in that securitization and, thus, are essential to the decision of a reasonable investor whether to purchase any such certificate.

(b) Untrue or misleading statements about the LTVs of the mortgage loans in the collateral pools of these securitizations

46. In the prospectus supplements, the defendants made material untrue or misleading statements about the LTVs of the mortgage loans in the collateral pools of these securitizations. Each such statement is identified in Item 46 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 46, and alleges as though fully set forth in this paragraph, the contents of Item 46 of the Schedules.

47. The defendants made these statements as statements of fact. Plaintiff is informed and believes, and based thereon alleges, that the defendants intended that these statements be understood as statements of fact. CNB and SCB did understand the statements about the LTVs as statements of fact. CNB and SCB had no access to appraisal reports or other documents or information from which it could verify the LTVs of the mortgage loans other than the statements that the defendants made about those LTVs.

(c) An automated valuation model demonstrates that the defendants' statements about the LTVs were untrue because they were based on overstated valuations of the properties in the collateral pools.

48. The stated LTVs of many of the mortgage loans in each securitization were significantly lower than the true LTVs because the denominators (that is, the value of the properties that secured those loans) that were used to determine the disclosed LTVs were overstated to a material extent. The weighted-average LTVs presented in the prospectus supplements were also, therefore, untrue and misleading.

49. Using a comprehensive, industry-standard automated valuation model (**AVM**), it is possible to determine the true market value of a certain property as of a specified date. An AVM is based on objective criteria like the condition of the property and the actual sale prices of

comparable properties in the same locale shortly before the specified date, and is more consistent, independent, and objective than other methods of appraisal. AVMs have been in widespread use for many years. The AVM on which these allegations are based incorporates a database of 500 million sales covering ZIP codes that represent more than 97% of the homes, occupied by more than 99% of the population, in the United States. Independent testing services have determined that this AVM is the most accurate of all such models.

50. For many of the properties that secured the mortgage loans, the model reported that LTVs presented in the prospectus supplements were understated. In particular, the model reported that the denominator (that is, the appraised value of the property as stated in the loan tape and compiled into the tables in the prospectus supplement) that was used to determine the disclosed LTV was 105% or more of the true market value as determined by the model as of the time the loan was originated. The model reported that the denominator that was used to determine the disclosed LTV was 95% or less of the true market value on a much smaller number of properties. Thus, the number of properties on which the value was overstated exceeded by far the number on which the value was understated, and the aggregate amount overstated exceeded by far the aggregate amount understated.

51. To take an example, in Securitization No. 7,[4] there were 1,822 mortgage loans in loan group 1 of the collateral pool. On 615 of the properties that secured those loans, the model reported that the denominator that was used to determine the disclosed LTV was 105% or more of the true market value and the amount by which the stated values of those properties exceeded their true market values in the aggregate was $38,955,148. The model reported that the denominator that was used to determine the disclosed LTV was 95% or less of true market value on only 187 properties, and the amount by which the true market values of those properties exceeded the values reported in the denominators was $12,727,579. Thus, the number of properties on which the value was overstated exceeded by more than 3 times the number on

[4] Both CNB and SCB purchased certificates in Securitization No. 7.

which the value was understated, and the aggregate amount overstated was 3 times the aggregate amount understated.

52. On one of the loans in Securitization No. 7, the amount of the loan was $304,000 and the stated value of the property was $380,000, resulting in a stated LTV of 80%. The model, however, determined that the true value of the property was $256,000, resulting in a true LTV of 118.8%. Thus, the stated value was higher than the true value by 48.4%, and the stated LTV was lower than the true LTV by 38.8%. Both of these were huge discrepancies that were material to the credit quality of the loan.

53. The overstated values of 615 properties made virtually every statement by the defendants about the LTVs of the mortgage loans untrue or misleading. For example, the defendants stated that all mortgage loans had an LTV of 100% or less. In fact, 77 of the mortgage loans had LTVs of over 100%. Defendants also stated that the weighted-average LTV of the loans in the collateral pool was 70.013%. In fact, the weighted-average LTV of the loans was 78.7%. These differences were material for the reasons stated above.

54. The results of the valuations by the automated model in this example are summarized in the following table.

Number of loans in loan group 1	1,822
Number of loans on which the stated value was 105% or more of the true market value as determined by the model	615
Aggregate amount by which the stated values of those properties exceeded their true market values as determined by the model	$38,955,148
Number of loans on which the stated value was 95% or less of the true market value as determined by the model	187
Aggregate amount by which the true market values of those properties exceeded their stated values	$12,727,579
Number of loans with LTVs over 100%, as stated by Defendants	0
Number of loans with LTVs over 100%, as determined by the model	77
Weighted-average LTV, as stated by Defendants	70.013%
Weighted-average LTV, as determined by the model	78.7%

55. The model produced similar results for the mortgage loans in the collateral pool of each securitization. Details of the results of the model for each securitization are stated in Item

55 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 55, and alleges as though fully set forth in this paragraph, the contents of Item 55 of the Schedules.

(d) These statements also were misleading because the defendants omitted to state that there were additional liens on a material number of the properties that secured the mortgage loans in the collateral pools.

56. As mentioned above, the LTV of a mortgage loan is a key determinant of the likelihood that the mortgagor will default in payment of the mortgage. The lower the LTV, the less likely that a decline in the value of the property will wipe out the owner's equity and thereby give the owner an incentive to stop making mortgage payments and abandon the property. Because LTV affects the behavior of borrowers so profoundly, accurate LTVs are essential to predicting defaults and prepayments by borrowers. Also as mentioned above, LTV affects the severity of loss on those loans that do default. The power of LTV to predict defaults, prepayments, and severities is a major reason why reasonable investors consider the LTVs of mortgage loans important to the decision whether to purchase a certificate in the securitization of those loans.

57. The predictive power of the LTV of a mortgage loan is much reduced if there are additional liens on the same property. Additional liens reduce the owner's equity in the property and thereby increase the owner's incentive to stop making mortgage payments and abandon the property if the value of the property falls below the combined amount of all of the liens on the property (a strategic default). Additional liens also exacerbate delinquencies and defaults because they complicate the servicing of mortgage loans and the management of delinquencies and defaults. Servicers of the first-lien mortgage must then deal not only with the borrower, but also with the servicer of the second-lien mortgage. For example, the servicer of a single mortgage may want to grant a borrower forbearance while the borrower is unemployed and allow him or her to add missed payments to the principal of the loan and to resume payments when he or she is employed again. But the servicer of the second-lien mortgage may refuse such forbearance and initiate foreclosure and thereby force the borrower into default on the first mortgage as well.

58. According to land records, many of the properties that secured mortgage loans in the collateral pool of each securitization were subject to liens in addition to the lien of the mortgage in the pool at the time of the closing of these securitizations.[5] The defendants failed to disclose any of these additional liens in the prospectus supplements. These additional liens increased the risk that those owners would default in payment of the mortgage loan in the pool.

59. To take an example, of the 1,822 properties that secured the mortgage loans in Securitization No. 7, at least 528 were subject to undisclosed liens in addition to the lien of the mortgage in the pool. For example, defendants stated that the weighted-average LTV of the properties was 70.013%, when, solely because of the additional liens on these 528 properties, the weighted-average combined LTVs of all of the loans in the pool was 75.0%.[6] This is a significant difference.

60. On one of the loans, the original balance of the mortgage loan was $343,000, the represented value of the property was $490,000, and the reported LTV was 70%. On the date of the closing of this securitization, however, there were undisclosed additional liens on this property of $147,000. Thus, when all liens on the property were taken into account, the combined LTV of the loan was 100%, which was 43% higher than the stated LTV on that loan. This was a huge discrepancy that was material to the credit quality of the loan. In many cases, the amount of the undisclosed additional liens was much greater than the owner's ostensible equity, putting the owner "under water" on the day on which this securitization closed.

61. Details of the undisclosed additional liens in the securitizations are stated in Item 61 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 61, and alleges as though fully set forth in this paragraph, the contents of Item 61 of the Schedules. Plaintiff is informed and believes, and based thereon alleges, that discovery will demonstrate that the

[5] In order to ensure that liens that were paid off but were not properly removed from land records were not included in this calculation, additional liens referred to in this Complaint and the Schedules exclude liens on the loan tapes that were originated on or before the date on which the mortgage loans in the pools were originated.

[6] The combined LTV is the ratio of all loans on a property to the value of the property.

number of loans with additional liens is substantially higher than those disclosed in the Schedules.

62. Because the defendants did not disclose the existence or the amounts of these additional liens, all of the statements that they made about the LTVs of the mortgage loans were misleading.

2. Appraisals

63. As discussed above in paragraph 44, an accurate denominator (value of the mortgaged property) is essential to calculating an accurate LTV. An accurate appraisal of the property, in turn, is essential to identifying an accurate denominator.

64. In connection with these securitizations, there was undisclosed upward bias in appraisals of properties that secured mortgage loans and consequent understatement of the LTVs of those loans. This upward bias in appraisals caused the denominators that were used to calculate the LTVs of many mortgage loans to be overstated and, in turn, the LTVs to be understated. The defendants' statements regarding the LTVs of the mortgage loans in the collateral pools were misleading because they omitted to state that the appraisals of a material number of the properties that secured those loans were biased upwards. In addition, the defendants stated that the appraisals conformed to the Uniform Standards of Professional Appraisal Practice (**USPAP**), the professional standards that govern appraisers and appraisals (or to the standards of Fannie Mae and Freddie Mac, which required compliance with USPAP). Those statements were false because upwardly biased appraisals do not conform to USPAP.

(a) The statements that the defendants made about the LTVs of the mortgage loans in the collateral pools were misleading because they omitted to state that the appraisals of a large number of the properties that secured those loans were biased upward, so that stated LTVs based on those appraisals were lower than the true LTVs of those mortgage loans.

65. The defendants omitted to state that the appraisals in these securitizations used inaccurate property descriptions, ignored recent sales of the subject and comparable properties, and used sales of properties that were not comparable, all in order to inflate the values of the

appraised properties. The appraisals used to compute the LTVs of many of the mortgage loans in the collateral pools were biased upwards. As alleged in paragraphs 49 through 55, in each trust, the number of properties for which the value was overstated exceeded by far the number for which the value was understated, and the aggregate amount overstated exceeded by far the aggregate amount understated. These ratios for each trust are summarized in the following table:

Securitization No.	Ratio of Number of Properties whose Value was Overstated to Number whose Value was Understated	Ratio of Amount of Overvaluation to Amount of Undervaluation
1	2.8	2.8
2	3.2	3.9
3	7.6	10.1
4	3.6	3.8
5	4.5	10.0
6	5.1	9.2
7	3.3	3.1
8	3.0	3.2
9	3.0	2.7
10	8.1	10.0
11	7.2	6.8
12	5.4	8.6

These lopsided results demonstrate the upward bias in appraisals of properties that secured the mortgage loans in the collateral pools.

66. Plaintiff is informed and believes, and based thereon alleges, that a material number of the upwardly biased appraisals were not statements of the appraisers' actual findings of the values of the properties based on their objective valuations.

(b) The statements by the defendants about compliance with USPAP were untrue because the appraisals of a large number of the properties that secured the mortgage loans were biased upward.

67. Appraisers and appraisals are governed by USPAP, which is promulgated by the Appraisal Standards Board. The Preamble to USPAP states that its purpose "is to promote and maintain a high level of public trust in appraisal practice." Both Fannie Mae and Freddie Mac require that appraisals comply with USPAP.

68. USPAP includes the following provisions:

(a) USPAP Standards Rule 2-1(b)(iii) requires that "Each written or oral real property appraisal report must clearly and accurately set forth the appraisal in a manner that will not be misleading."

(b) USPAP Standards Rule 1-4(a) provides that "When a sales comparison approach is necessary for credible assignment results, an appraiser must analyze such comparable sales data as are available to indicate a value conclusion."

(c) USPAP Standards Rule 1-4(b) provides that "When a cost approach is necessary for credible assignment results, an appraiser must:

(i) develop an opinion of site value by an appropriate appraisal method or technique;

(ii) analyze such comparable cost data as are available to estimate the cost new of the improvements (if any); and

(iii) analyze such comparable data as are available to estimate the difference between the cost new and the present worth of the improvements (accrued depreciation)."

69. The Appraisal Standards Board, which promulgates USPAP, also issues Advisory Opinions. Although the Advisory Opinions do not establish new standards or interpret USPAP, they "are issued to illustrate the applicability of appraisal standards in specific situations." Advisory Opinion 1 discussing "Sales History" states that "The requirement for the appraiser to analyze and report sales history and related information is fundamental to the appraisal process. Just as the appraiser must analyze pending and recent sales of comparable properties, the appraiser must take into account all pending and recent sales of the subject property itself."

70. In the prospectus supplements, the defendants made statements that the appraisals of properties that secured the mortgage loans in the collateral pools were made in compliance with USPAP or with the appraisal standards of Fannie Mae and Freddie Mac, which required compliance with USPAP. Details of each such statement are stated in Item 70 of the Schedules

of this Complaint. Plaintiff incorporates into this paragraph 70, and alleges as though fully set forth in this paragraph, the contents of Item 70 of the Schedules.

71. Plaintiff is informed and believes, and based thereon alleges, that a material number of mortgage loans in the collateral pools had appraisals conducted that deviated from USPAP.

72. Each of the statements referred to in paragraph 70 was untrue because the appraisals of a material number of the properties referred to in each such statement did not conform to USPAP.

73. By each of the untrue and misleading statements referred to in paragraphs 46 and 70 above, the defendants materially understated the risk of the certificates that they issued and underwrote.

B. Untrue or Misleading Statements About the Occupancy Status of the Properties That Secured the Mortgage Loans in the Collateral Pools

1. The materiality of occupancy status

74. Residential real estate is usually divided into primary residences, second homes, and investment properties. Mortgages on primary residences are less likely to default than mortgages on non-owner-occupied residences and therefore are less risky. Occupancy status also influences prepayment patterns.

75. Occupancy status (that is, whether the property that secures a mortgage is to be the primary residence of the borrower, a second home, or an investment property) is an important measure of the risk of a mortgage loan. The percentage of loans in the collateral pool of a securitization that are not secured by mortgages on primary residences is an important measure of the risk of certificates sold in that securitization. Other things being equal, the higher the percentage of loans not secured by primary residences, the greater the risk of the certificates. A reasonable investor considers occupancy status important to the decision whether to purchase a certificate in a securitization of mortgage loans.

2. Untrue or misleading statements about the occupancy status of the properties that secured the mortgage loans in the collateral pools of these securitizations

76. In the prospectus supplements, the defendants made statements about the number of properties in the collateral pool of each securitization that were the primary residences of their owners. To return to the example of Securitization No. 7, the defendants stated that, of the 1,822 mortgage loans in loan group 1 of the collateral pool, 1,325 were secured by primary residences and 497 were not. Details of each such statement in each securitization are stated in Item 76 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 76, and alleges as though fully set forth in this paragraph, the contents of Item 76 of the Schedules.

77. These statements were untrue or misleading because (i) the stated number of mortgage loans secured by primary residences was higher than the actual number of loans in that category or (ii) the stated number of mortgage loans not secured by primary residences was lower than the actual number of loans in that category.

3. Basis of the allegations above that these statements about the occupancy status of the properties that secured the mortgage loans in the collateral pools were untrue or misleading

78. Because they are less risky than other mortgage loans, mortgage loans on primary residences usually have more favorable terms, including lower interest rates and more lenient underwriting standards, than mortgage loans on second homes and investment properties. Applicants for loans on second homes and investment properties therefore have an incentive to state that the property will be their primary residence even when it will not. Plaintiff is informed and believes, and based thereon alleges, that borrowers of many nonconforming securitized loans did so.

79. A significant number of the properties in the collateral pool of each securitization that were stated to be primary residences actually were not. Moreover, Plaintiff is informed and believes, and based thereon alleges, that there is additional evidence of occupancy fraud in the loan files of many more of the mortgage loans in each collateral pool.

80. With respect to some of the properties that were stated to be primary residences, the borrower instructed local tax authorities to send the bills for the taxes on the property to the borrower at an address other than the property itself. This is strong evidence that the mortgaged property was not the borrower's primary residence.

81. In some states and counties, owners of a property are able to designate whether that property is his or her "homestead," which may reduce the taxes on that property or exempt the property from assets available to satisfy the owner's creditors, or both. An owner may designate only one property, which he or she must occupy, as his or her homestead. The fact that an owner in one of these jurisdictions does not designate a property as his or her homestead when he or she can do so is strong evidence that the property was not his or her primary residence. With respect to some of the properties that were stated to be primary residences, the owner could have but did not designate the property as his or her homestead. That omission is strong evidence that the property was not the borrower's primary residence.

82. When a borrower actually occupies a newly mortgaged property, he or she normally notifies entities that send bills to him or her (such as credit card companies, utility companies, and local merchants) to send his or her bills to the address of the newly mortgaged property. Six months after the closing of the mortgage is ample time to complete this process. Six months after the closing of the mortgage, if the borrower is still receiving his or her bills at a different address, it is very likely that the borrower does not occupy the mortgaged property. For each securitization, a credit reporting agency specializing in mortgage loans compared the addresses in the borrowers' credit reports to the addresses of the mortgaged properties six months after the closing of the mortgage loans. Many borrowers whose mortgage loans were secured by properties that were stated in the loan tapes to be owner-occupied did not receive any bills at the address of the mortgaged property but did receive their bills at another address or addresses. It is very likely that each of these borrowers did not occupy the mortgaged property.

83. In Securitization No. 7, 100 owners of properties that were stated to be primary residences instructed local tax authorities to send the bills for the taxes on those properties to

them at different addresses; 187 owners of properties that were stated to be primary residences could have, but did not, designate those properties as their homesteads; and 32 owners of properties that were stated to be primary residences did not receive any of their bills there six months after the mortgages were originated. Eliminating duplicates, for one or more of these reasons, 278 of the 1,325 properties that were stated to be primary residences actually were not. Thus, the number of properties that were not primary residences was not 497, as defendants stated, but at least 775, a material difference. The numbers of such loans in the collateral pool of each securitization are stated in Item 83 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 83, and alleges as though fully set forth in this paragraph, the contents of Item 83 of the Schedules.

84. By each of the untrue and misleading statements referred to in paragraph 76, the defendants materially understated the risk of the certificates that they issued and underwrote.

C. Untrue or Misleading Statements About the Underwriting Standards of the Originators of the Mortgage Loans in the Collateral Pools

1. The materiality of underwriting standards and the extent of an originator's disregard of them

85. Originators of mortgage loans have written standards by which they underwrite applications for loans. An important purpose of underwriting is to ensure that the originator makes mortgage loans only in compliance with those standards and that its underwriting decisions are properly documented. An even more fundamental purpose of underwriting mortgage loans is to ensure that loans are made only to borrowers with credit standing and financial resources to repay the loans and only against collateral with value, condition, and marketability sufficient to secure the loans. An originator's underwriting standards, and the extent to which the originator does not follow its standards, are important indicators of the risk of mortgage loans made by that originator and of certificates sold in a securitization in which mortgage loans made by that originator are part of the collateral pool. A reasonable investor considers the underwriting standards of originators of mortgage loans in the collateral pool of a

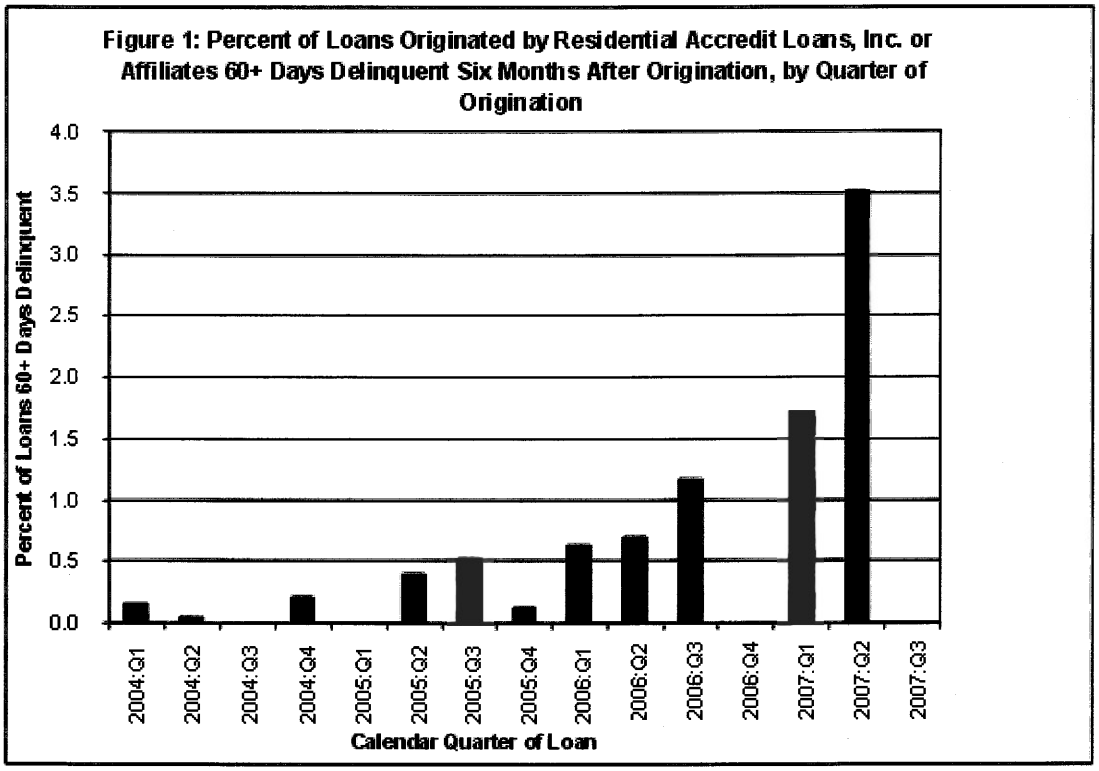
securitization, and whether an originator disregards its standards, important to the decision whether to purchase a certificate in that securitization.

2. Untrue or misleading statements about the underwriting standards of originators of the mortgage loans

86. In the prospectus supplements, the defendants made statements about the underwriting standards of the originators of the mortgage loans in the collateral pool. Details of each such statement are stated in Item 86 of the Schedules of this Complaint. They included statements that the originators made mortgage loans in compliance with their underwriting standards and made exceptions to those standards only when compensating factors were present. Plaintiff incorporates into this paragraph 86, and alleges as though fully set forth in this paragraph, the contents of Item 86 of the Schedules.

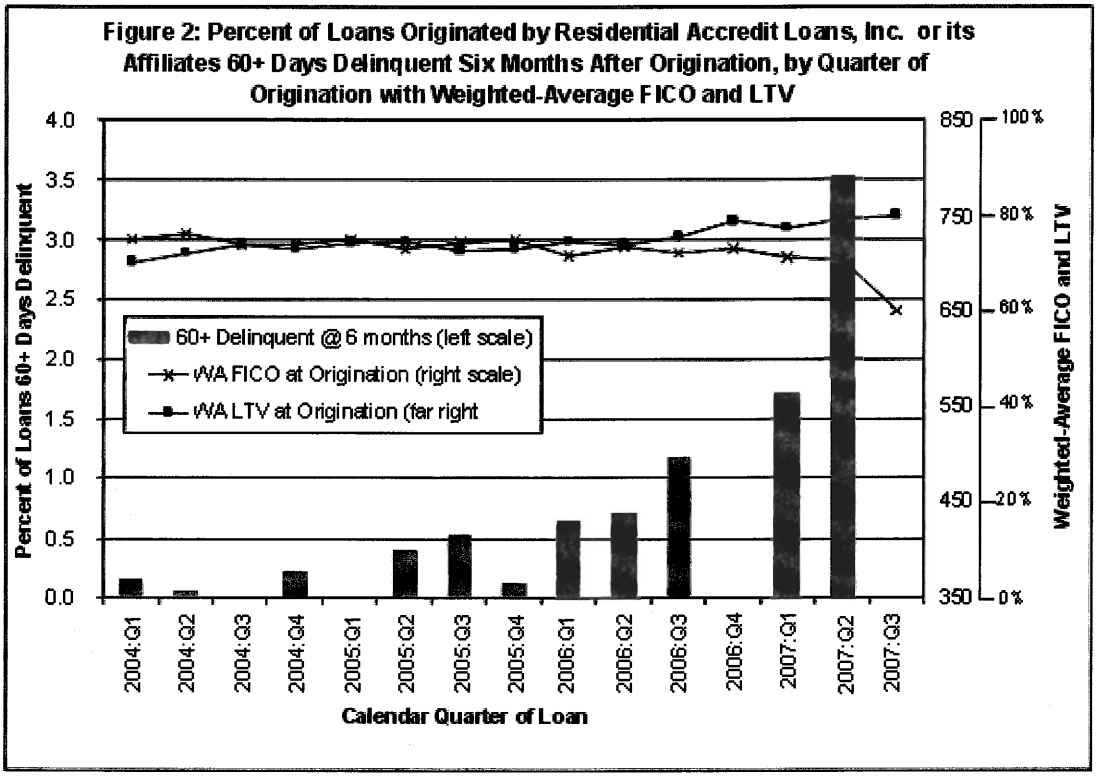
87. Plaintiff is informed and believes, and based thereon alleges, that these statements were untrue or misleading because the defendants omitted to state that: (a) the originators were disregarding those underwriting standards; (b) the originators were making extensive exceptions to those underwriting standards when no compensating factors were present; (c) the originators were making wholesale, rather than case-by-case, exceptions to those underwriting standards; (d) the originators were making mortgage loans that borrowers could not repay; and (e) the originators were failing frequently to follow quality-assurance practices necessary to detect and prevent fraud intended to circumvent their underwriting standards.

3. Basis of the allegations that these statements about the underwriting standards of the originators of the mortgage loans in the collateral pools were untrue or misleading



(a) The deterioration in undisclosed credit characteristics of mortgage loans made by these originators

88. Plaintiff is informed and believes, and based thereon alleges, that before and during the time of these securitizations the originators of the loans in the securitizations disregarded their stated underwriting standards. As a result, securitized mortgage loans made



between 2004 and the dates of these securitizations have experienced high rates of delinquency and default.

89. The high rates of delinquency and default were caused not so much by any deterioration in credit characteristics of the loans that were expressly embodied in underwriting standards and disclosed to investors, but rather by deterioration in credit characteristics that were not disclosed to investors.

90. Plaintiff is informed and believes that what was true about recently securitized mortgage loans in general was true in particular of loans originated by the entities that originated the loans in the collateral pools of these securitizations, as the following figures demonstrate. Taking the originator Residential Accredit Loans, Inc. as an example, Figure 1 shows the rising incidence of early payment defaults (or **EPDs**), that is, the percent of loans (by outstanding principal balance) that were originated and sold into securitizations by Residential Accredit Loans, Inc. and that became 60 or more days delinquent within six months after they were made. An EPD is strong evidence that the originator did not follow its underwriting standards in making the loan. Underwriting standards are intended to ensure that loans are made only to borrowers who can and will make their mortgage payments. Because an EPD occurs so soon after the mortgage loan was made, it is much more likely that the default occurred because the borrower could not afford the payments in the first place (and thus that the underwriting standards were not followed), than because of changed external circumstances unrelated to the underwriting of the mortgage loan (such as that the borrower lost his or her job). The bars in Figure 1 depict the incidence of EPDs in loans originated by Residential Accredit Loans, Inc. that were sold into securitizations. The steady increase in EPDs is further evidence that the deterioration in the credit quality of those loans was caused by disregard of underwriting standards.

91. Figure 2 shows the weighted-average disclosed LTVs of the same loans and weighted-average disclosed credit scores of the borrowers. These were nearly constant, showing that the deterioration in the credit quality of the loans was caused not by these disclosed factors, but rather by undisclosed factors.

92. Substantially the same facts are true of the mortgage loans originated and sold into securitizations by each of the originators of mortgage loans in the collateral pools of these securitizations. Figures for them are presented in Figures 1 and 2 of Exhibits A to C of this Complaint:

Exhibit	Originator
A	Bear Stearns Residential Mortgage Corporation/EMC Mortgage Corporation
B	IndyMac Bank, F.S.B.
C	National City Mortgage Corporation

(b) The poor performance of the loans in these pools demonstrates that the originators disregarded their underwriting guidelines when making these loans.

93. As noted above, an EPD is evidence that the originator may have disregarded its underwriting standards in making the loan. The mortgage loans in some of the collateral pools of these securitization experienced EPDs. These EPDs are evidence that the originators of those

loans may have disregarded their underwriting standards when making those loans. The number and percent of the loans in each pool that suffered EPDs are stated in Item 93 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 93, and alleges as though fully set forth in this paragraph, the contents of Item 93 of the Schedules.

94. A high rate of delinquency at any time in a group of mortgage loans is also evidence that the originators of those loans may have disregarded their underwriting standards in making the loans. A common measure of serious delinquency is the number of loans on which the borrowers were ever 90 or more days delinquent in their payments. The mortgage loans in the collateral pools have experienced very high rates of delinquencies by this measure. This high rate of delinquencies is strong evidence that the originators of those loans may have disregarded their underwriting standards when making those loans. The number and percent of the loans in each pool that suffered 90 or more days delinquencies are stated in Item 94 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 94, and alleges as though fully set forth in this paragraph, the contents of Item 94 of the Schedules.

95. A second common measure of delinquency is the number of loans on which the borrowers are 30 or more days delinquent at a given point in time. This high rate of delinquencies is strong evidence that the originators of those loans may have disregarded their underwriting standards when making those loans. The number and percent of the loans in each pool that were 30 or more days delinquent on January 31, 2012 are stated in Item 95 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 95, and alleges as though fully set forth in this paragraph, the contents of Item 95 of the Schedules.

96. By each of the untrue and misleading statements referred to in paragraph 86 above, the defendants materially understated the risk of the certificates that they issued or underwrote. Moreover, Plaintiff is informed and believes, and based thereon alleges, that discovery will yield additional evidence that the originators disregarded their underwriting guidelines when making the mortgage loans in the collateral pools of these securitizations.

D. The Large Number of Mortgage Loans in the Collateral Pools About Which the Defendants Made Material Untrue or Misleading Statements Made Their Statements About the Ratings of CNB's and SCB's Certificates Untrue and Misleading.

97. In the prospectus supplements, the defendants made statements about the rating of each certificate by ratings agencies. They stated that the ratings agencies rated each such certificate investment grade. Details of each such statement are stated in Item 97 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 97, and alleges as though fully set forth in this paragraph, the contents of Item 97 of the Schedules.

98. The ratings were important to the decision of any reasonable investor whether to purchase the certificates. Many investors, including CNB and SCB, have investment policies that require a certain minimum rating for all investments. The policy of CNB and SCB was to purchase only certificates that were rated at least A.

99. These statements by the defendants about the ratings of the certificates they issued and underwrote were misleading because the defendants omitted to state that the ratings were affected by all the material untrue or misleading statements about specific mortgage loans in the collateral pools. These include:

(a) loans in which the LTVs were materially understated as shown by the AVM;

(b) loans in which the LTVs were misleading as a result of undisclosed additional liens;

(c) loans that suffered EPDs, strong evidence that the originators may have disregarded the underwriting standards in making those loans; and

(d) loans in which the properties were stated to be owner-occupied, but were not.

100. In Securitization No. 7, there were 615 loans whose LTVs were materially understated as shown by the AVM, 528 loans in which the LTVs were misleading because of undisclosed additional liens, 7 loans that suffered EPDs, and 278 loans in which the properties were stated to be owner-occupied but were not. Eliminating duplicates, there were 1,125 loans (or 61.7% of the loans in the collateral pool) about which defendants made untrue or misleading

statements. The numbers of such loans in the collateral pool of each securitization are stated in Item 100 of the Schedules of this Complaint. Plaintiff incorporates into this paragraph 100, and alleges as though fully set forth in this paragraph, the contents of Item 100 of the Schedules.

101. Plaintiff is informed and believes, and based thereon alleges, that loan files and other documents available only through discovery will prove that those statements were untrue or misleading with respect to many more loans as well.

102. By these untrue and misleading statements, the defendants materially understated the risk of the certificates that they issued and underwrote. Moreover, Plaintiff is informed and believes, and based thereon alleges, that the defendants materially understated the risk of the certificates that they issued and underwrote.

VI. STATUTE OF LIMITATIONS

103. None of the claims in this Complaint was barred by the statute of limitations on May 22, 2009, the date on which Plaintiff became receiver for CNB and SCB, because, even in the exercise of reasonable diligence, neither CNB nor SCB should have discovered, and neither CNB nor SCB did discover, the untrue or misleading statements by defendants more than one year before that date. Under 12 U.S.C. § 1821(d)(14), the statute of limitations on all of the claims in this Complaint is extended to three years from May 22, 2009. Plaintiff discovered the untrue or misleading statements by defendants in 2011 in the course of its investigation of possible claims of CNB and SCB that Plaintiff is authorized to bring as receiver for CNB and SCB. The claims in this Complaint are timely.

VII. CAUSES OF ACTION

A. Untrue or Misleading Statements in a Registration Statement Under Section 11 of the 1933 Act

104. Plaintiff hereby incorporates by reference, as though fully set forth, paragraphs 1 through 103.

105. BSABS is the depositor of Securitization No. 6 and therefore is the issuer of the certificates. In doing the acts alleged, BSABS violated Section 11 of the 1933 Act in connection with the sale to CNB and SCB of the certificates in Securitization No. 6.

106. CMSI is the depositor of Securitization No. 12 and therefore is the issuer of the certificates. In doing the acts alleged, CMSI violated Section 11 of the 1933 Act in connection with the sale to SCB of the certificate in Securitization No. 12.

107. CSFB Mortgage Securities is the depositor of Securitization No. 7 and therefore is the issuer of the certificates. In doing the acts alleged, CSFB Mortgage Securities violated Section 11 of the 1933 Act in connection with the sale to CNB and SCB of the certificates in Securitization No. 7.

108. MLMI is the depositor of Securitization No. 8 and therefore is the issuer of the certificates. In doing the acts alleged, MLMI violated Section 11 of the 1933 Act in connection with the sale to CNB and SCB of the certificates in Securitization No. 8.

109. Bear Stearns is the underwriter of Securitization No. 6. In doing the acts alleged, Bear Stearns violated Section 11 of the 1933 Act in connection with the sale to CNB and SCB of the certificates in Securitization No. 6.

110. Citigroup is the underwriter of Securitizations Nos. 4 and 9. In doing the acts alleged, Citigroup violated Section 11 of the 1933 Act in connection with the sale to CNB of the certificate in Securitization No. 4, and the sale to SCB of the certificates in Securitizations Nos. 4 and 9.

111. Credit Suisse is the underwriter of Securitizations Nos. 7 and 10. In doing the acts alleged, Credit Suisse violated Section 11 of the 1933 Act in connection with the sale to CNB of the certificate in Securitization No. 7, and the sale to SCB of the certificates in Securitizations Nos. 7 and 10.

112. DBS is the underwriter of Securitizations Nos. 2 and 3. In doing the acts alleged, DBS violated Section 11 of the 1933 Act in connection with the sale to CNB of the certificates in Securitizations Nos. 2 and 3.

113. GMAC is the underwriter of the certificates in Securitizations Nos. 1, 2, and 4. In doing the acts alleged, GMAC violated Section 11 of the 1933 Act in connection with the sale to CNB of the certificates in Securitizations Nos. 1, 2, and 4, and the sale to SCB of the certificate in Securitization No. 4.

114. HSBC is the underwriter of Securitization No. 3. In doing the acts alleged, HSBC violated Section 11 of the 1933 Act in connection with the sale to CNB of the certificate in Securitization No. 3.

115. Merrill Lynch is the underwriter of Securitization No. 8. In doing the acts alleged, Merrill Lynch violated Section 11 of the 1933 Act in connection with the sale to CNB and SCB of the certificates in Securitization No. 8.

116. RBS is the underwriter of Securitizations Nos. 1, 5, 11, and 12. In doing the acts alleged, RBS violated Section 11 of the 1933 Act in connection with the sale to CNB of the certificates in Securitizations Nos. 1 and 5, and the sale to SCB of the certificates in Securitizations Nos. 5, 11, and 12.

117. UBS is the underwriter of Securitization No. 10. In doing the acts alleged, UBS violated Section 11 of the 1933 Act in connection with the sale to SCB of the certificate in Securitization No. 10.

118. The certificates in these securitizations were issued pursuant or traceable to registration statements. Details of each registration statement and each certificate are stated in Item 37 of the Schedules.

119. The registration statements, as amended by the prospectus supplements, contained untrue statements of material fact and omitted to state material facts necessary in order to make the statements, in the light of the circumstances under which they were made, not misleading. These untrue and misleading statements included all of the untrue and misleading statements described in paragraphs 41 through 102.

120. CNB and SCB purchased each certificate before the issuer made an earning statement covering a period of at least twelve months generally available.

121. Plaintiff expressly excludes from this cause of action any allegation that could be construed as alleging fraud or intentional or reckless conduct. This cause of action is based solely on claims of strict liability or negligence under the 1933 Act.

122. CNB and SCB did not know when they purchased these certificates that the statements in the registration statements, as amended by the prospectus supplements, were untrue or misleading.

123. When they failed on May 22, 2009, neither CNB nor SCB had discovered that the defendants made untrue or misleading statements about the certificates. Plaintiff discovered that the defendants made untrue or misleading statements in the sale of the securities in 2011 in the course of its investigation.

124. CNB and SCB have suffered a loss on each of these certificates.

125. Plaintiff is entitled to recover damages as described in 15 U.S.C. § 77k(e).

B. Liability as a Controlling Person Under Section 15 of the 1933 Act

126. Plaintiff hereby incorporates by reference, as though fully set forth, paragraphs 1 through 125.

127. BSCI, by or through stock ownership, agency, or otherwise, controlled BSABS within the meaning of Section 15 of the 1933 Act.

128. In doing the acts alleged, BSABS violated Section 11 of the 1933 Act by issuing the certificates.

129. BSCI is therefore jointly and severally liable with and to the same extent as BSABS.

130. CitiMortgage, by or through stock ownership, agency, or otherwise, controlled CMSI within the meaning of Section 15 of the 1933 Act.

131. In doing the acts alleged, CMSI violated Section 11 of the 1933 Act by issuing the certificates.

132. CitiMortgage is therefore jointly and severally liable with and to the same extent as CMSI.

133. Credit Suisse Management, by or through stock ownership, agency, or otherwise, controlled CFSB Mortgage Securities within the meaning of Section 15 of the 1933 Act.

134. In doing the acts alleged, CFSB Mortgage Securities violated Section 11 of the 1933 Act by issuing the certificates.

135. Credit Suisse Management is therefore jointly and severally liable with and to the same extent as CSFB Mortgage Securities.

136. MLMCI, by or through stock ownership, agency, or otherwise, controlled MLMI within the meaning of Section 15 of the 1933 Act.

137. In doing the acts alleged, MLMI violated Section 11 of the 1933 Act by issuing the certificates.

138. MLMCI is therefore jointly and severally liable with and to the same extent as MLMI.

VIII. JURY DEMAND

139. Pursuant to Federal Rule of Civil Procedure 38, Plaintiff demands a trial by jury of all issues triable by jury.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff prays for judgment against defendants for damages in an amount to be determined at trial, but not less than $66 million, plus attorneys' fees, costs of court, pre- and post-judgment interest at the appropriate allowable rates. Plaintiff further requests that the Court order any and all other relief at law and in equity to which Plaintiff is entitled.

Dated: May 18, 2012

Exhibit 5

UNITED STATES DISTRICT COURT
DISTRICT OF MASSACHUSETTS

FEDERAL HOME LOAN BANK OF BOSTON, Plaintiff, v. ALLY FINANCIAL, INC., *et al*. Defendants.	Civil Action No. (Superior Court of the Commonwealth of Massachusetts for Suffolk County, Civil Action No. 11-1533-BLS1)

NOTICE OF REMOVAL

TO: THE CLERK OF THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF MASSACHUSETTS

PLEASE TAKE NOTICE THAT Defendants Bear Stearns Asset Backed Securities I, LLC, EMC Mortgage Corporation, J.P. Morgan Acceptance Corporation I, J.P. Morgan Mortgage Acquisition Corp., J.P. Morgan Securities, LLC (f/k/a Bear, Stearns & Co. Inc. and J.P. Morgan Securities, Inc.), JPMorgan Chase & Co., JPMorgan Securities Holdings, LLC, Structured Asset Mortgage Investments II, Inc., The Bear Stearns Companies, LLC (f/k/a The Bear Stearns Companies Inc.), and WaMu Capital Corp. (collectively, the "Removing Defendants"), pursuant to 28 U.S.C. §§ 1441(a) and 1446(a), hereby remove this action[1] from the Superior Court of the Commonwealth of Massachusetts to the United States District Court

[1] On May 23, 2011, Individual Defendants Lana Franks, Richard S. Fuld, Jr., Edward Grieb, Richard McKinney, Christopher O'Meara, Kristine Smith, James J. Sullivan, Samir Tabet and Mark Zusy also filed a Notice of Removal seeking to remove specifically the claims against them contained in the first, second and third causes of action in the Complaint filed in this action. On May 25, 2011, Individual Defendant Barry J. O'Brien filed a Joinder in the Individual Defendants' Notice of Removal.

for the District of Massachusetts.[2] This removal arises under 28 U.S.C. §§ 1334(b), 1441, 1446 and 1452(a), and 12 U.S.C. § 1432(a). As grounds for removal, the Removing Defendants state as follows:

SUMMARY

1. Defendants may properly remove an action from state court pursuant to 28 U.S.C. § 1441(a) if the federal district court has original jurisdiction over the action.

2. This Court has original jurisdiction over this matter pursuant to the charter of the Federal Home Loan Bank of Boston, 12 U.S.C. § 1432(a), and all claims and causes of action in the matter may be removed to this Court under 28 U.S.C. § 1441(a).

3. This Court also has original jurisdiction over this matter pursuant to 28 U.S.C. §§ 1334(b) and 1452(a) because this action is "related to" ongoing bankruptcy proceedings, and all claims and causes of action in this matter may be removed to this Court under 28 U.S.C. §§ 1441 and/or 1452.

PROCEDURAL HISTORY AND BACKGROUND

4. On or about April 20, 2011, Plaintiff filed a complaint (the "Complaint") in the Superior Court of the Commonwealth of Massachusetts (the "State Court") entitled "*Federal Home Loan Bank of Boston v. Ally Financial, Inc. et al.*," Civil Action No. 11-1533-BLS1 (the "State Court Action").

5. On April 28, 2011, and thereafter, Plaintiff served the Complaint on the Removing Defendants. In accordance with 28 U.S.C. § 1446(a), copies of process, pleadings

[2] The Removing Defendants appear specially for the purpose of removal only. They reserve all defenses as to jurisdiction, service, or otherwise that may be available in this action.

and orders served upon the Removing Defendants are attached hereto as Exhibit A.[3]

6. In the Complaint, Plaintiff alleges that it purchased approximately 115 Private Label Mortgage-Backed Securities ("PLMBS") issued or underwritten by various defendants. Residential home mortgages provide the collateral for each of the PLMBS at issue, such that mortgage payments made by thousands of homeowners back the PLMBS at issue in this case. Plaintiff alleges that defendants made material untrue statements and omissions in connection with the sale of PLMBS to the Plaintiff. The allegations center on disclosures concerning the lending practices of originators of the mortgage loans that provide the collateral of the PLMBS.

7. Plaintiff purports to bring claims against the Removing Defendants under the Massachusetts Uniform Securities Act, Mass. Gen. Laws c. 110A § 410, under the state Consumer Protection Act, Mass. Gen. Laws c. 93A § 11, and under the common law, based on alleged material untrue statements and omissions in connection with the sale of the PLMBS to the Plaintiff. Paragraphs 45-49, 85-89 and 127 of the Complaint, and Appendices XI, XII, XIII, and XIV identify the offerings alleged to be at issue in the claims against the Removing Defendants. Many of these offerings involved securities backed by mortgage loan collateral that was originated almost entirely by now-bankrupt entities.

8. The Removing Defendants deny that they have any liability whatsoever to Plaintiff.

9. The Removing Defendants' time to answer the summons and complaint

[3] Because the complaint with exhibits is 767 pages, the Removing Defendants attach only one copy of the complaint served on the Removing Defendants. Should the Court so desire, the Removing Defendants can supplement this filing with copies of the complaint served on each of the Removing Defendants. Copies of the summons served on each of the Removing Defendants are attached in Exhibit A.

has not expired and none of the Removing Defendants has served or filed an answer.

10. No motions or other proceedings in this action are pending in the State Court.

11. This Notice of Removal is timely under 28 U.S.C. § 1446(b) because it is being filed within thirty (30) days after service of the summons and Complaint.

GROUNDS FOR REMOVAL

FHLB Boston's Federal Charter Confers Original Jurisdiction

12. This Court has original jurisdiction over this matter pursuant to Plaintiff's charter. The Supreme Court has held that "a congressional charter's 'sue and be sued' provision may be read to confer federal court jurisdiction" where, as here, it "specifically mentions the federal courts." *Am. Nat'l Red Cross v. S.G.*, 505 U.S. 247, 255 (1992).

13. Plaintiff's charter is codified in the Federal Home Loan Bank Act, 12 U.S.C. § 1421 *et seq.*, and specifically references the federal courts. The Act provides that all Federal Home Loan Banks "shall have the power . . . to sue and be sued, to complain and to defend in any court of competent jurisdiction, State or Federal." 12 U.S.C. § 1432(a). Recent decisions have held that charters with language essentially identical to the FHLB charter, which includes the phrase "any court of competent jurisdiction," also confer original jurisdiction to the federal district courts under *American National Red Cross*. *See Pirelli Armstrong Tire Corp. Retiree Med. Benefits Trust v. Rains*, 534 F.3d 779, 785 (D.C. Cir. 2008) (holding that Fannie Mae's charter, which includes "court of competent jurisdiction" in its "sue or be sued" clause, conferred original jurisdiction on federal district courts on the basis of the charter alone); *Grun v. Countrywide Home Loans*, No. Civ. A.S.A.-03-CA-0141-XR, 2004 WL 1509088, at *2 (W.D. Tex. Jul. 1, 2004) (denying remand based on "sue or be sued . . . in any court of competent

jurisdiction clause).[4]

14. This Court has also recognized that a charter clause materially identical to the one at issue here confers federal jurisdiction under *American National Red Cross*. In *Rodriguez v. Fed. Nat'l Mortg. Ass'n*, 268 F. Supp. 2d 87, 89-90 (D. Mass. 2003), this Court explicitly stated that "the Supreme Court has held that the 'sue and be sued' 'provision in a charter act of a similar federally chartered organization confers original jurisdiction over all cases to which the federally chartered corporation is a party, 'with the consequence that the organization is thereby authorized to remove from state to federal court any state-law action it is defending.'" *Id.* (citing *Am. Nat'l Red Cross*, 505 U.S. at 248).[5]

15. Because Plaintiff s charter specifically references federal courts, this Court has original jurisdiction over this action and removal is available pursuant to section 1441(a). *See, e.g.*, *Am. Nat'l Red Cross*, 505 U.S. at 247 (the sue or be sued provision of the Red Cross charter confers original jurisdiction on federal courts over all cases to which the Red Cross is a party, with the consequence that the organization is thereby authorized to remove from state to federal court any state-law action . . . .).

"Related to" Bankruptcy Jurisdiction

16. This Court also has original jurisdiction over this matter under 28 U.S.C.

[4] The Removing Defendants are aware of recent decisions by district courts in other Circuits holding that claims asserted by other Federal Home Loan Banks are not subject to removal under the terms of the Congressional charter. *See, e.g.*, *Federal Home Loan Bank of Chicago v. Bank of Am. Funding Corp.*, No. 10-C-7560, 2011 WL 151842, at *2 (N.D. Ill. Jan. 18, 2011); *Federal Home Loan Bank of San Francisco v. Deutsche Bank Sec., Inc.*, Nos. 10-3039, 10-3045, 2010 WL 5394742, at *6-8 (N.D. Cal. Dec. 20, 2010); *Federal Home Loan Bank of Seattle v. Deutsche Bank Sec., Inc.*, 736 F. Supp. 2d 1283, 1286 (W.D. Wash. 2010). We respectfully submit that those decisions incorrectly apply the Supreme Court s decision in *American Nat'l Red Cross* and the decision in *Pirelli* by the only Court of Appeals that has addressed the issue.

[5] The court went on to distinguish *Red Cross* and remand the case because, unlike here, the removing party was a counterclaim defendant that had initially filed the action in state court. *See id.* at 90 ("[counterclaim defendant] concedes that *Red Cross* did not involve a counterclaim, as is present here, and that the removal statute only allows a "defendant" to remove a state court case to federal court.").

§§ 1334(b) and 1452(a), because this action is "related to" numerous ongoing bankruptcy proceedings.

17. "[A] civil proceeding is related to a bankruptcy [where] the outcome of that proceeding could conceivably have any effect on the estate being administered in bankruptcy." *Garcia-Quintero v. Commonwealth of Puerto Rico*, No. Civ. 96-1770, 1997 WL 157744, at *2 (1st Cir. Mar. 11, 1997) (quoting *In re GSF Corp.*, 938 F.2d 1467, 1475 (1st Cir. 1991)). *See also In re Boston Regional Med. Ctr., Inc.*, 410 F.3d 100, 105 (1st Cir. 2005).

18. The allegations against the Removing Defendants arise in part from the following PLMBS, each of which contains mortgages originated by bankrupt entities:

Offering	**Originator(s) in Bankruptcy**	**Underwriter/ Seller**	**Removing Defendant(s) Named By Plaintiff**
AHM 2005-2	American Home Mortgage Corporation	J.P. Morgan Securities, LLC	J.P. Morgan Securities, LLC; The Bear Stearns Companies, LLC
BALTA 2005-10	Accredited Mortgage; Bear Stearns Residential Mortgage Corporation; Aegis Mortgage Corporation; Loan Link Financial Services; Lancaster Mortgage Bankers, LLC; American Home Mortgage Corporation; United Financial Mortgage Corporation	J.P. Morgan Securities, LLC	J.P. Morgan Securities, LLC; Structured Asset Mortgage Investments II, Inc.; EMC Mortgage Corporation; The Bear Stearns Companies, LLC

Offering	**Originator(s) in Bankruptcy**	**Underwriter/ Seller**	**Removing Defendant(s) Named By Plaintiff**
BALTA 2005-8	Bear Stearns Residential Mortgage Corporation; Lancaster Mortgage Bankers, LLC; Homebanc Mortgage Corporation	J.P. Morgan Securities, LLC	J.P. Morgan Securities, LLC; Structured Asset Mortgage Investments II, Inc.; EMC Mortgage Corporation; The Bear Stearns Companies, LLC
BALTA 2005-9	Bear Stearns Residential Mortgage Corporation; Homebanc Mortgage Corporation; Oak Street Mortgage LLC; Lancaster Mortgage Bankers, LLC	J.P. Morgan Securities, LLC	J.P. Morgan Securities, LLC; Structured Asset Mortgage Investments II, Inc.; EMC Mortgage Corporation; The Bear Stearns Companies, LLC
BALTA 2006-1	Bear Stearns Residential Mortgage Corporation; Homebanc Mortgage Corporation; Lancaster Mortgage Bankers, LLC; Aegis Mortgage Corporation	J.P. Morgan Securities, LLC	J.P. Morgan Securities, LLC; Bear Stearns Asset Backed Securities I, LLC; EMC Mortgage Corporation; The Bear Stearns Companies, LLC

Offering	**Originator(s) in Bankruptcy**	**Underwriter/ Seller**	**Removing Defendant(s) Named By Plaintiff**

33. On June 18, 2010, Mountain View Mortgage Company filed a voluntary petition for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the District of Nevada, *In re Mountain View Mortgage Company*, Case No. 10-21356.

34. On February 13, 2010, Loan Link Financial Services filed a voluntary petition for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the Central District of California, *In re Loan Link Financial Services, Inc.*, Case No. 10-11777.

35. On February 19, 2008, Cameron Financial Group, Inc. filed a voluntary petition for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the Central District of California, *In re Cameron Financial Group, Inc.*, Case No. 08-10322.

36. On July 5, 2007, Choice Capital Funding, Inc. filed a voluntary petition

for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the Northern District of Georgia, *In re Choice Capital Funding, Inc.*, Case No. 07-70717.

37. On December 17, 2007, Delta Funding Corporation filed a voluntary petition for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the Southern District of California, *In re Delta Funding Corporation*, Case No. 07-11881.

38. On November 9, 2010, Home Capital Funding, Inc. filed a voluntary petition for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the Southern District of California, *In re Home Capital Funding, Inc.*, Case No. 10-19896.

39. On February 18, 2009, Realty Mortgage Corporation filed a voluntary petition for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the Southern District of Mississippi, *In re Realty Mortgage Corporation*, Case No. 09-00544.

40. On February 13, 2008, Maverick Residential Mortgage Inc. a/k/a The Mortgage Company, filed a voluntary petition for relief under Title 11 of the United States Code in the United States Bankruptcy Court for the Eastern District of Texas, *In re Maverick Residential Mortgage Inc.*, Case No. 08-40352.

41. Pursuant to agreements containing certain indemnification provisions for the benefit of the Removing Defendants, among others, and pursuant to statutory and common law, the Originators owe the Removing Defendants indemnification and/or contribution for any claims arising from actual or alleged material misstatements or omissions made by the Originators regarding the mortgage loans at issue, as well as certain legal expenses arising from such claims.

42. This action is related to the bankruptcies listed in ¶¶ 17-37 above because the Originators owe indemnity and/or contribution obligations to the Removing Defendants.

Such obligations could affect the property of the debtor, and thus give rise to "related to" jurisdiction under 28 U.S.C. § 1334(b). This action therefore may be removed to this Court by the Removing Defendants pursuant to 28 U.S.C. § 1452(a). *Garcia-Quintero*, 1997 WL 157744, at *2; *New England Wood Pellet, LLC v. New England Pellet, LLC*, 419 B.R. 133, 142-44 (D.N.H. 2009); *Kropp v. Lawrence*, No. Civ. 05-51-B-W, 2005 WL 757607, at *1 (D. Me. Mar. 31, 2005).

OTHER PROCEDURAL REQUIREMENTS

43. Promptly upon the filing of this Notice of Removal, a true copy of this Notice of Removal will be provided to all adverse parties pursuant to 28 U.S.C. § 1446(d). Pursuant to Fed. R. Civ. P. 5(d), the Removing Defendants will file with this Court a Certificate of Service of Notice to Adverse Parties of Removal to Federal Court.

44. Concurrently with the filing of this Notice of Removal, the Removing Defendants are filing a Notification of Filing of Notice of Removal with the clerk of the Superior Court for the Commonwealth of Massachusetts, Suffolk County in accordance with 28 U.S.C. § 1446(d).

45. This Notice of Removal is signed pursuant to Fed. R. Civ. P. 11.

46. As required under Rule 9027(a)(1) of the Federal Rules of Bankruptcy Procedure, the Removing Defendants state that the claims asserted against them are non-core, within the meaning of 28 U.S.C. § 157(b), and that they do not consent to entry of final orders or judgments by the bankruptcy judge.

47. By filing this Notice of Removal, the Removing Defendants do not waive any defense that may be available to any of them and do not concede that the allegations in the Complaint state a valid claim under applicable law.

WHEREFORE, the Removing Defendants respectfully request that the State Court Action now pending in the Superior Court for the Commonwealth of Massachusetts, Civil Action No. 11-1533-BLS1, be removed therefrom to this Court.

4. Successor Defendant DB Structured Products, Inc. (MortgageIT Holdings) 48

5. Successor Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated (Banc of America Securities LLC). 50

6. Successor Defendant Morgan Stanley Mortgage Capital Holdings LLC (Morgan Stanley Mortgage Capital Inc.) 51

D. The John Doe Defendants 51

E. Summary Charts of Defendants and Certificates 52

V. FACTUAL BACKGROUND 52

A. The Creation of Mortgage-Backed Securities 52

1. The Securitization Process 52

2. Defendants' Access to Loan Files and Due Diligence Obligations 55

3. The Rating Process for PLMBS 57

B. The Mortgage Originators Abandoned Underwriting and Appraisal Standards and Engaged in Predatory Lending 59

1. The Shift from "Originate to Hold" to "Originate to Distribute" Securitization Encouraged Mortgage Originators to Disregard Loan Quality 59

2. Mortgage Originators Abandoned Underwriting Guidelines to Create Loans for Securitization 65

3. Mortgage Originators Manipulated Appraisals of Collateralized Real Estate to Create Loans for Securitization 67

4. Mortgage Originators Engaged in Predatory Lending to Initiate Loans for Securitization 72

5. Widespread Defaults and Delinquencies Are the Inevitable Consequence of Loans Issued Without Meaningful Underwriting 75

6. The Bank's Review of Loan Files Recently Provided by Certain Trustees Confirms that Underwriting Guidelines Were Abandoned 77

C. Federal and State Investigations, Press Reports, Publicly Available Documents Produced in Other Civil Lawsuits, and Analysis of the Loan Pools Underlying the Certificates Identify Systematic Violation of Underwriting Guidelines, Appraisal Guidelines, and

Predatory Lending by the Originators Whose Loans Back the PLMBS in this Case 78

1. Countrywide Home Loans, Inc. 79

a. Government actions against Countrywide and documents produced therein demonstrate Countrywide's abandonment of sound underwriting practices. 80

b. Private actions against Countrywide demonstrate Countrywide's abandonment of sound underwriting practices. 91

c. Confidential witnesses provide further evidence of Countrywide's abandonment of sound underwriting practices. 98

d. The mortgages originated by Countrywide and securitized in the PLMBS purchased by the Bank provide further evidence of Countrywide's abandonment of sound underwriting practices. 103

e. Press reports, government investigations, and related litigation demonstrate that Countrywide engaged in predatory lending. 103

f. Confidential witnesses provide further evidence of Countrywide's predatory lending practices. 106

2. Bear Stearns Residential Mortgage Corporation and EMC Mortgage Corporation 107

a. Private actions and confidential witnesses demonstrate the wholesale abandonment of sound underwriting practices by Bear Stearns Residential Mortgage Corporation and EMC Mortgage Corporation. 107

b. The mortgages originated by Bear Stearns Residential Mortgage Corporation and EMC Mortgage Corporation and securitized in the PLMBS purchased by the Bank provide further evidence of these originators' abandonment of sound underwriting practices. 112

3. IndyMac Bank, F.S.B. 113

a. Government actions and related lawsuits and investigations demonstrate IndyMac's abandonment of sound underwriting practices and its predatory lending 114

b. Private actions against IndyMac demonstrate IndyMac's abandonment of sound underwriting practices. 118

c. Confidential witnesses provide further evidence of IndyMac's abandonment of sound underwriting practices. 121

d. The mortgages originated by IndyMac and securitized in the PLMBS purchased by the Bank provide further evidence of IndyMac's abandonment of sound underwriting practices. 124

4. Washington Mutual Mortgage Securities Corp. 125

a. Government actions and related lawsuits and investigations demonstrate WaMu's abandonment of sound underwriting practices. 125

b. WaMu manipulated the appraisal process. 129

c. WaMu engaged in predatory lending 137

d. Confidential witnesses provide further evidence of WaMu's failures to adhere to sound underwriting practices, predatory lending, and manipulation of the appraisal process. 141

e. The mortgages originated by WaMu and securitized in the PLMBS purchased by the Bank provide further evidence of WaMu's abandonment of sound underwriting practices 149

5. Wells Fargo Bank, N.A. 150

a. Investigations, lawsuits and confidential witness testimony demonstrate that Wells Fargo abandoned underwriting guidelines. 150

b. The mortgages originated by Wells Fargo and securitized in the PLMBS purchased by the Bank provide further evidence of Wells Fargo's abandonment of sound underwriting practices. 157

c. Investigations, lawsuits and confidential witness testimony demonstrate that Wells Fargo engaged in predatory lending. 158

6. Ameriquest Mortgage Company 161

a. Investigations and lawsuits demonstrate that Ameriquest abandoned underwriting guidelines and engaged in predatory lending. 162

b. The mortgages originated by Ameriquest and securitized in the PLMBS purchased by the Bank provide further evidence of Ameriquest's abandonment of sound underwriting guidelines. 165

7. Aurora Loan Services LLC and Lehman Brothers Bank, F.S.B. 166

a. Evidence produced in the Lehman Brothers bankruptcy case demonstrates that Aurora abandoned sound underwriting practices. 166

b. Confidential witnesses provide additional evidence of Aurora's abandonment of sound underwriting practices. 170

c. The mortgages originated by Aurora and securitized in the PLMBS purchased by the Bank provide further evidence of Aurora's abandonment of sound underwriting guidelines. 173

8. Chase Home Finance LLC and JPMorgan Chase Bank, N.A. 174

a. Investigations and confidential witness testimony demonstrate that the Chase Originators abandoned sound underwriting practices. 174

b. The mortgages originated by the Chase Originators and securitized in the PLMBS purchased by the Bank provide further evidence of abandonment of sound underwriting practices. 179

9. American Home Mortgage and American Home Mortgage Investment Corporation 180

a. Investigations, lawsuits and confidential witness testimony demonstrate that AHM abandoned sound underwriting practices..... 180

b. The mortgages originated by AHM and securitized in the PLMBS purchased by the Bank provide further evidence of AHM's abandonment of sound underwriting practices..... 183

10. MortgageIT, Inc..... 184

a. The Bank's review of loan files demonstrates that MortgageIT abandoned sound underwriting practices..... 184

b. The mortgages originated by MortgageIT and securitized in the PLMBS purchased by the Bank provide further evidence that MortgageIT abandoned sound underwriting practices..... 189

11. Silver State..... 189

a. Evidence from the Bank's review of loan files and a journalistic investigation indicates that Silver State abandoned sound underwriting practices..... 190

b. The mortgages originated by Silver State and securitized in the PLMBS purchased by the Bank provide further evidence of Silver State's abandonment of sound underwriting practices..... 192

12. Alliance Bancorp..... 193

13. Morgan Stanley Mortgage Capital Inc..... 196

a. An investigation by the Massachusetts Attorney General provides evidence that Morgan Stanley & Co. abandoned sound underwriting practices..... 197

b. The mortgages originated by Morgan Stanley Mortgage and securitized in the PLMBS purchased by the Bank provide further evidence that Morgan Stanley Mortgage abandoned sound underwriting practices..... 200

14. Other Mortgage Originators Originating Loans Underlying the PLMBS Also Abandoned Sound Underwriting

Practices and Engaged in Predatory Lending in Order to Issue Loans for Securitization 201

D. The Securitization Process Was Plagued by Conflicts of Interest and Misplaced Incentives 202

1. The Vertical Integration of Many of the Firms Involved in the Issuance of the PLMBS Purchased by the Bank Provided the Securities Defendants with Access to Information Regarding the Abandonment of Underwriting Guidelines, the Manipulation of the Appraisal Process, and Predatory Lending Practices. 202

2. Financial Ties Between the Investment Banks and Non-Bank Lenders Provided the Securities Defendants with Access to Information Regarding the Mortgage Originators' Failure to Adhere to Underwriting Guidelines and Predatory Lending Practices. 207

3. Conflicts of Interest Undermined Adequate Due Diligence and Disclosure to Investors. 210

4. The Sponsor Defendants Limited Third-Party Firms' Due Diligence and Misused the Results of That Due Diligence. 213

a. The Sponsor Defendants directed the due diligence process and were provided with detailed reports describing the results of the process. 213

b. The Sponsor Defendants both limited the due diligence performed on the loan pools and misused the results of the limited diligence that was performed. 217

c. The Sponsor Defendants should have known that they included defective loans in the pools. 219

5. The Sponsor Defendants' Own Due Diligence Identified Defective Loans in the Mortgage Pools Backing PLMBS. 222

E. The Vertical Integration of Many of the Firms Involved in the Issuance of the PLMBS Purchased by the Bank Enabled the Controlling Person Defendants to Control the Management and Policies of the Controlled Entities 224

F. The Rating Agency Defendants Knew, and the Securities Defendants Should Have Known, That the Securitization Process

Was Supported by Credit Ratings That Materially Misstated the Credit Risk of the PLMBS 226

1. The Rating Agency Defendants Knew That the Credit Ratings Were Unreliable, Based As They Were on Underwriting Standards That the Rating Agency Defendants Knew Had Been Abandoned. 227

2. The Credit Ratings Were Compromised by Conflicts of Interest, Manipulation and Misinformation. 229

3. The Credit Ratings Were Unreliable Due to the Use of Inaccurate, Outdated Models, and Inadequate Resources. 231

4. The Rating Agency Defendants Knew That Their PLMBS Ratings Fundamentally Differed from Their Ratings of Corporate Bonds. 234

5. Subsequent Downgrades Confirm that the Investment-Grade Ratings Reported in the Offering Documents Were Unjustifiably High and Misstated the True Credit Risk of the PLMBS Purchased by the Bank. 235

6. The Bank Reasonably Relied on the Credit Ratings Reported in the Prospectuses. 237

G. The Proper Steps Were Not Taken To Ensure That the Mortgage Loans Underlying the Trusts Were Enforceable 239

VI. DEFENDANTS' MATERIAL UNTRUE STATEMENTS AND OMISSIONS IN CONNECTION WITH THE SALE OF PLMBS TO THE BANK 244

A. The Securities Defendants Misrepresented Underwriting Guidelines Utilized by Mortgage Lenders 245

1. The Materiality of Underwriting Guidelines 245

2. Misstatements Regarding Underwriting Guidelines 245

3. Evidence Demonstrating Misstatements in the Offering Documents Regarding the Originators' Underwriting Practices. 248

a. Government investigations, actions and settlements, confidential witnesses, and evidence developed in other private lawsuits demonstrate systematic and

pervasive abandonment of stated underwriting practices by the originators. 248

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrates the abandonment of stated underwriting practices by the originators. 249

B. The Securities Defendants Misrepresented the Appraisal Process and LTVs That Were Based Upon Those "Appraisals." 259

1. The Materiality of Representations Regarding Appraisals and LTVs 259

2. Misstatements Regarding Appraisals and LTVs 263

a. The Offering Documents falsely state that the LTVs were based upon appraisals 263

b. Misstatements regarding the standards to which the purported "appraisals" conformed 268

c. Misstatements regarding aggregate LTVs 270

3. Evidence Demonstrating Misstatements about Appraisals and LTVs in the Offering Documents 270

a. Government investigations, press reports, and confidential witnesses demonstrate systemic and pervasive appraisal manipulation by the mortgage originators 270

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrate that appraisals were materially inflated and the LTVs were materially understated. 271

C. The Offering Documents Were Materially Misleading Because They Failed to Inform Investors of the Presence of Compounded High-Risk Mortgages in the Loan Pools 285

D. Defendants' Statements Regarding the Triple-A Rating of the PLMBS Were False and Misleading 290

1. The Materiality of the Credit Rating Process and Ratings 290

2. False Representations That the Certificates the Bank Purchased Would Not Be Issued Unless They Earned Triple-A Ratings 290

3. Misstatements about the Credit Rating Process and Ratings 291

4. Evidence Demonstrating Misstatements about the Ratings and Ratings Process 292

E. The Securities Defendants Misrepresented the Mortgage Originators' Compliance with Predatory Lending Restrictions 297

1. The Materiality of Predatory Lending Practices and the Issuance of Loans that Violate Other State and Federal Lending Statutes 297

2. Misstatements about Predatory Lending Compliance 298

3. Evidence Demonstrating Misstatements about Predatory Lending Practices of the Mortgage Originators 299

a. Government investigations, actions and settlements, confidential witnesses and evidence developed in other private lawsuits demonstrate predatory lending by the mortgage originators. 299

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrate that loans in the mortgage pools were the result of predatory lending 300

F. The Securities Defendants Misrepresented the Due Diligence Performed on the Mortgage Pools that Backed the PLMBS Purchased by the Bank 300

1. The Materiality of Due Diligence on the Mortgage Pools 300

2. Misstatements about Due Diligence 301

3. Evidence of Misstatements about Due Diligence 303

G. The Securities Defendants Misrepresented That Mortgages and Mortgage Loans Were Validly Assigned and Transferred to the Issuing Trusts 303

1. The Materiality of Valid Assignment and Transfer 303

2. Misstatements Regarding Valid Assignment and Transfer 304

3. A Material Number of Mortgages and Mortgage Loans Were Not Validly Transferred or Assigned to the Issuing Trusts 306

VII. COUNTS 306

Plaintiff, FEDERAL HOME LOAN BANK OF BOSTON (hereinafter the "Bank") alleges the following based upon personal knowledge with regard to its own acts, and upon public information as well as information and belief as to all other matters. The Bank's information and belief is based on, among other things, the investigation by its counsel. The investigation included but was not limited to: (1) review and analysis of the Offering Documents for the securities that are the subject of this action; (2) interviews with individuals with first-hand knowledge of the events alleged herein; (3) examination of relevant filings with the Securities and Exchange Commission ("SEC"), press releases and other public statements; (4) review and analysis of pleadings in other private civil actions involving certain Defendants; (5) review and analysis of investigations and complaints filed by state and federal authorities against certain Defendants; (6) published materials, media reports, congressional testimony and additional related materials; (7) analysis of the performance and composition of the loan pools underlying the securities; and (8) review of origination files for loans underlying certain of the securities to which the Bank recently has been provided access. Many of the facts related to Plaintiff's allegations are known only by the Defendants, or are exclusively within their custody or control, including, for example, the loan origination files to which the Bank has not been provided access. Plaintiff believes that substantial additional evidentiary support for the allegations set forth below will be developed after a reasonable opportunity for discovery.

I. NATURE OF THE ACTION

1. The action arises from the sale by certain Defendants to the Bank of over $5.9 billion in Private Label Mortgage-Backed Securities ("PLMBS" or "Certificates"). The Certificates are "securities" within the meaning of the Massachusetts Uniform Securities Act, M.G.L. c. 110A, § 401(k). The Defendants include the Sponsors, Depositors/Issuers, and

Underwriters who packaged, marketed, offered, and sold the Certificates to the Bank ("Securities Defendants").

2. The Certificates were sold to the Bank by means of registration statements, prospectuses, supplemental prospectuses, private placement memoranda and other written offering materials (collectively, the "Offering Documents") that the Securities Defendants wrote, signed, and/or circulated, and which contained untrue statements of material facts and omitted to state material facts necessary in order to make the Offering Documents not misleading.[1]

3. Accordingly, the Bank seeks rescission and damages under M.G.L. c. 110A, § 101 *et seq.* (the Massachusetts Uniform Securities Act), M.G.L. c. 93A, § 1 *et seq.*, and applicable common law.

4. The Bank purchased the PLMBS in reliance on the ratings assigned to them by Fitch Inc.; The McGraw-Hill Companies, Inc. and Standard & Poor's Financial Services LLC; and Moody's Investors Service, Inc. and Moody's Corporation ("Rating Agency Defendants"). The Rating Agency Defendants issued these ratings knowing that the ratings were unreliable and lacked a sufficient basis in fact, and they issued the ratings without due care. The Bank seeks appropriate relief against the Rating Agency Defendants under M.G.L. c. 93A, § 1 *et seq.* and applicable common law.

[1] Attached as Appendix I is a list of the PLMBS purchased by the Bank that are the subject of this action. One of the certificates, MARM 2007-R5, is not directly backed by a mortgage pool, but rather constitutes an investment in a separate PLMBS, BALTA 05-09-2B, and is therefore backed indirectly by the pool of mortgages that back BALTA 05-09-2B.

II. EXECUTIVE SUMMARY

A. PLMBS Defined.

5. PLMBS are mortgage pass-through Certificate securities entitling the holder to income payments from pools of mortgage loans.[2] The securities are referred to as "private label" because they are issued by private entities instead of the Federal National Mortgage Association ("Fannie Mae") or the Federal Home Loan Mortgage Corporation ("Freddie Mac"), which are U.S. government-sponsored enterprises ("GSEs"). (Mortgage securities issued or guaranteed by Fannie Mae and Freddie Mac are referred to as "agency" mortgage securities.)

6. The value of a mortgage pass-through Certificate depends on the ability of borrowers to repay the principal and interest on the underlying loans and the adequacy of the collateral the borrowers provide. In the event that borrowers fall behind or default, the investor is exposed to loss. For this reason, statements regarding the nature and extent of the underwriting guidelines utilized by the mortgage originators who issued the loans backing the PLMBS and the collateral for the loans are critically important to investors such as the Bank. If stated underwriting criteria are not followed, the collateral is not properly appraised, or the creditworthiness of the borrower is not accurately measured, the Certificates are riskier and more likely to result in losses than is apparent from the Offering Documents.

B. The Bank Purchased Only the Highest Rated (Triple-A-Rated) PLMBS.

7. PLMBS are segmented into "tranches" with laddered payment priority and varying return potential for the holders of certificates representing various tranches. The most senior tranches enjoy the highest payment priority and lowest risk of default. Thus, if mortgage payments are not made, the losses are allocated first to the most junior tranches and move toward

[2] The terms "PLMBS" and "Certificate(s)" are used interchangeably. The Bank identifies the PLMBS using the ticker symbols for each certificate as created by Bloomberg.

the more senior tranches as losses cause the junior tranches to be exhausted. The senior tranches often are protected as well by certain credit enhancements, a common form of which is known as "overcollateralization." When a tranche is overcollateralized, the mortgages in that tranche have an aggregate principal balance that exceeds the aggregate principal balances of the Certificates secured thereby. For these reasons, the tranches are given different credit ratings—the higher up the ladder, the higher the rating.

8. Pursuant to both Bank policy and applicable regulatory requirements, and in order to minimize the risk of loss on the PLMBS, the Bank purchased only senior, triple-A-rated PLMBS tranches. Thus, based on the Offering Documents, the Bank believed it was buying safe and secure Certificates with an extremely low risk of default—equivalent, from an investment quality standpoint, to other triple-A-rated investments. Instead, the Bank purchased a toxic stew of PLMBS backed by doomed mortgage loans.

C. The Mortgage Originators Who Issued Loans Backing the Certificates Abandoned Underwriting Guidelines and Issued Loans Without Ensuring the Borrowers' Ability to Pay and Without Sufficient Collateral.

9. The Bank did not know when it purchased the Certificates that the mortgage originators who made the loans backing the PLMBS, many of whom were affiliates of the Securities Defendants, sought to issue as many loans as possible to feed these Defendants' securitization machine. Whether borrowers could repay the loans and the quality of the collateral became secondary considerations to the originators' ability to sell the pooled interests on the loans. The mortgage loan originators' standard operating procedure was to approve any loan that could be sold into the secondary mortgage market. As a result, unbeknownst to the Bank, exceptions to underwriting and appraisal standards became the norm. Likewise, the originators knowingly obtained flawed appraisals of the collateral for the loans. Rather than requiring appraisals conducted in accordance with governing federal appraisal regulations, the

mortgage originators pressured and coerced appraisers to ensure that the appraisals came back "at value," *i.e.*, the level necessary to close the loan. Consequently, the collateral for the loan pools backing the Certificates purchased by the Bank was vastly deficient.

10. The Bank also did not know that the Securities Defendants failed to ensure that the loans they purchased and packaged into the Certificates complied with the mortgage originators' stated underwriting guidelines and appraisal standards. As revealed in recent government investigations, this approach to securitization was labeled "IBGYBG"—"I'll be gone, you'll be gone." Lost in this process was any effort by the Securities Defendants to truthfully and accurately describe the loans in the Offering Documents so that investors such as the Bank could ascertain the true risk of the Certificates. Making matters even more egregious, the Securities Defendants conducted a certain amount of due diligence on the loans, and were in a position to know that no real underwriting had been done.

D. The Defendants Provided Misleading Information About the Certificates in the Offering Documents They Prepared and Provided to the Bank.

11. In many arm's-length transactions, a buyer and a seller have limited disclosure obligations—buyer beware, or *caveat emptor*, is acceptable. This, however, is not the case with the sale of securities. Those who participate in the sale of securities are required to provide detailed information regarding what is being sold. Here, as required by law, the Defendants prepared detailed Offering Documents in which they purported to describe among other things the characteristics of the loans backing the Certificates. However, unbeknownst to the Bank, and to its great detriment, the Offering Documents contained material misstatements and omitted to disclose material information with respect to the mortgage pools backing the Certificates, and what Defendants knew about the pools. As a result, despite their original triple-A ratings and the

abundant representations and warranties regarding the underlying mortgage pools, the Certificates were far riskier than could be determined from the Offering Documents.

12. Though the Certificates themselves are complex, the abuses by the Defendants can be put in simple terms. The Offering Documents did not provide truthful or accurate information about the underwriting and appraisal standards used when the loans backing the pools were issued, or about the due diligence conducted when the loans were securitized.

13. Defendants' untrue statements and omissions of material fact went to the heart of the risk of the mortgage pools underlying the PLMBS. Specifically, Defendants failed to accurately describe key characteristics of the mortgages and the securitization of the mortgages, including, but not limited to:

a. **The Mortgage Originators' Underwriting Guidelines.** The Offering Documents contained material misstatements and omitted material information regarding the mortgage originators' abandonment of underwriting guidelines. The Defendants represented that the mortgage originators applied their stated underwriting guidelines when issuing loans to borrowers. However, the mortgage originators routinely disregarded their own guidelines and granted exceptions without proper justification.

b. **The Loan-to-Value Ratios of the Mortgage Loans and the Appraisal Standards Used to Determine the Ratios.** The Offering Documents contained material misstatements and omitted material information regarding the loan-to-value ratios ("LTVs") of the loans in the mortgage pools and the appraisal standards that were purportedly applied to determine the home values. The LTVs were purportedly based on valid appraisals performed in accordance with specific regulations and standards—but in truth, they were not based on legitimate appraisals at all. They were predetermined values set to ensure that the loan would close.

c. **The Ratings Process.** The Offering Documents contained material misstatements and omitted material information regarding the basis for the Certificates' triple-A ratings and the ratings processes. The Offering Documents represented that the Rating Agency Defendants conducted analysis that was designed to assess the likelihood of delinquency and defaults in the underlying mortgage pools. However, the Rating Agency Defendants knew, and the Securities Defendants should have known, that the ratings were based on unreliable data and faulty assumptions—all of which caused the ratings to vastly understate the true risk of the PLMBS and overstate their creditworthiness.

d. **Predatory Lending.** The Offering Documents contained material misstatements and omitted material information regarding the mortgage originators' compliance with state and federal predatory lending prohibitions. Pursuant to the Bank's regulatory requirements, it was not permitted to purchase any mortgage-backed securities that were secured by mortgage loans that violated these prohibitions. The Defendants represented that the mortgage pools did not contain any mortgage loans that violated state and federal predatory lending prohibitions. However, in truth, the mortgage originators engaged in rampant predatory lending, and, thus, the mortgage pools contained many loans that violated state and federal predatory lending restrictions.

e. **Due Diligence.** Many of the Offering Documents contained material misstatements and omitted material information regarding the Sponsors' due diligence on the mortgage loans in the PLMBS mortgage pools. The Offering Documents stated that the underlying mortgage loans were inspected for compliance with the mortgage originators' underwriting and appraisal guidelines and documentation requirements. However, the Offering Documents omitted that the third-party due diligence firms retained to conduct the due diligence felt pressured to ignore deviations from the applicable underwriting criteria, and that even with regard to loan defects identified through the due diligence process, the Sponsors nonetheless waived the defects as to a substantial percentage of these loans and, in many cases, used this information about defective loans to negotiate lower prices for the loan pools. These lower prices were not reflected in the PLMBS prices paid by investors.

f. **Enforceability of Mortgages.** Many of the Offering Documents contained material misstatements regarding the measures taken to ensure the enforceability of the mortgages and mortgage loans transferred to the trusts. In order for a mortgage to be enforced, basic steps need to be taken to validly assign the mortgage and mortgage loan to the trust and ensure that the trustee has the proper papers. These basic steps, and the representations made about these steps, were critical to investors (including the Bank), because if a mortgage cannot be enforced, then the mortgage loans, and the Certificates dependent on these loans, are worthless. The Offering Documents failed to disclose that in fact basic steps regarding the transfer of mortgages and mortgage loans were not followed—mortgage loans were not validly assigned, and papers necessary to ensure enforceability of the mortgage were never transferred to the trustee.

g. **The Offering Documents Did Not Disclose the Compounded High-Risk Mortgages that Infected the Mortgage Pools.** The Offering Documents contained certain statistical measurements of the overall mortgage pools, including measurements of the pools' weighted average LTVs, credit scores, and debt-to-income ratios ("DTIs"). In addition to the material inaccuracy of much of this data, the Offering Documents did not disclose the compounding of risks in many mortgages in the pools. The representations in the Offering Documents indicated that a high risk according to one measure (say, a bad credit score) would be offset by a low risk according to another measure (say, a good LTV). If the Offering Documents were accurate, then, the mortgage pools would contain few if any mortgages with *compounded* high risks—with, for example, a bad credit score *and* a bad LTV. But analysis of the loans in the mortgage pools shows otherwise. Many of the mortgage loans in the pools in fact contained

multiple risky factors. The undisclosed presence of a significant volume of loans with these characteristics made the Certificates much more prone to default than the Offering Documents indicated. The prevalence of these compounded high-risk loans tainted the loan pools and contributed substantially to the decline in performance and value of the Certificates.

14. The untrue, incomplete and materially misleading statements summarized above and discussed in detail below were made with respect to each of the Certificates purchased by the Bank. The Bank reasonably relied on these statements and was misled by the omissions when deciding to purchase the Certificates.

15. As a result of these untrue statements in and omissions from the Offering Documents, the Bank purchased Certificates that were far riskier than represented by the Defendants, and that were not in truth "highest investment grade" as stated in the Offering Documents, but, instead, were low-quality, high-risk Certificates. All but two of the 115 Certificates have been downgraded to below investment-grade, *i.e.*, "junk," indicating a high probability of default.

E. The Bank Is Entitled to Rescission and Damages.

16. As indicated above, and described in detail below, it is not happenstance, or the result of later events, that the PLMBS failed to perform, plunged in value, and were ultimately severely downgraded. To the contrary, the PLMBS purchased by the Bank collapsed because the underlying loans were not what the Offering Documents represented them to be at the time the Certificates were issued. They were *not* backed by pools of loans issued to borrowers based on the application of stated underwriting standards. Exceptions to underwriting guidelines were *not* justified by "compensating circumstances." Valid appraisals of the collateral for the loans were *not* performed. The Securities Defendants did *not* engage in appropriate and effective due diligence to ensure that the loans satisfied the originators' stated underwriting guidelines.

17. Because the Offering Documents were marred by material misstatements and omissions that concealed the true risk of the Certificates, the Bank is entitled to rescission and such other make-whole relief afforded by applicable law.

18. The fair value of these Certificates has also declined dramatically. Moreover, as a result of the current and anticipated future poor performance of the mortgages underlying these Certificates, the Bank has incurred other-than-temporary impairment losses on these investments, resulting in hundreds of millions of dollars in losses.

19. Accordingly, the Bank seeks relief from Defendants in the manner set forth herein.

III. JURISDICTION AND VENUE

20. This Court has jurisdiction over the claims alleged in this action.

21. This is an action for rescission and damages in an amount exceeding $25,000.

22. Massachusetts law applies to Plaintiff's state law claims that arise under the Massachusetts Uniform Securities Act and under the common law of Massachusetts, because the Bank's claims arise from its transaction of business with Defendants in Massachusetts.

23. The Defendants are subject to personal jurisdiction in Massachusetts pursuant to M.G.L. c. 223A, § 3, because the Bank's claims against Defendants arise from Defendants' transaction of business within Massachusetts.

24. As set forth in Appendix X attached to this Complaint, numerous Defendants are or were at the relevant time registered to do business in Massachusetts and have thereby submitted to the jurisdiction of this Commonwealth.

25. Because its activities are not localized in one state, the Bank is not a citizen of any state under 28 U.S.C. § 1332(c).

26. Venue is proper in this County pursuant to M.G.L. c. 223, § 8(2), (4).

27. The Bank asserts no claims in this action against any entity that has filed for bankruptcy protection.

IV. THE PARTIES

A. Plaintiff

28. The Bank was created by the Federal Home Loan Bank Act of 1932. The Bank is a cooperative bank created to promote housing finance opportunities for Americans of all income levels. For more than 75 years, the Bank has pursued that public policy mission by loaning money at competitive rates to member financial institutions, which helps those members make home loans available to prospective home buyers.

29. The headquarters of the Bank are in Boston, Suffolk County, Massachusetts. Under its Organization Certificate, the Bank is to operate in Federal Home Loan Bank District 1, which comprises the states of Connecticut, Massachusetts, Maine, New Hampshire, Rhode Island, and Vermont. The Bank conducts business in each of these six states, and its member institutions are headquartered in and conduct business in each of them. From time to time, the Bank also conducts business with the other eleven Federal Home Loan Banks.

30. The Bank's operations are principally funded by its earnings and funds raised by issuing debt instruments (bonds and notes) in the capital markets through the Office of Finance, a joint Federal Home Loan Bank office in Virginia.

31. The Bank is capitalized solely by the capital-stock investments of its members and by its retained earnings.

32. The Bank's members are all private institutions eligible for membership, including banks, savings banks, savings and loan associations, cooperative banks, credit unions, and insurance companies.

33. The Bank is not a federal agency, and the Bank is not a citizen of any state. The Bank is federally chartered, but privately capitalized and independently managed. The federal government is not involved in the day-to-day management of the Bank's operations. Management of the Bank is vested by law in the Bank's board of directors, all members of which are either elected by the Bank's shareholder members or, in the case of a vacancy, appointed by the board of directors. No tax dollars are involved in the operation of the Bank, and the federal government does not own any of the Bank's stock.

34. The Bank is supervised and examined by the Federal Housing Finance Agency, the successor to the Federal Housing Finance Board.

35. The members of the Bank's board of directors reside in Connecticut, Massachusetts, Maine, New Hampshire, Rhode Island, and Vermont.

36. In light of its public policy mission, the Bank has a very conservative investment philosophy. The Bank bought the PLMBS on the basis of factual representations designed to convince the Bank that these securities were safe, prudent, and highly rated investments. The Bank could not and would not have purchased the PLMBS if the Offering Documents had disclosed the truth about these securities and the mortgage loans that backed them.

B. Defendants

1. The Banc of America Entities

37. Depositor/Issuer Defendant Banc of America Funding Corporation is a Delaware corporation. Banc of America Funding Corporation was the Depositor for Certificates BAFC 2006-D 1A1 and BAFC 2005-H 7A1.

38. Underwriter and Corporate Seller[3] Non-Defendant Banc of America Securities LLC was a Delaware limited liability company that, during the relevant period, maintained a

[3] See footnote 4 below for a definition of the term "Corporate Seller."

securities broker-dealer Financial Institutions Regulatory Authority ("FINRA") registration in Massachusetts and was registered to do business in Massachusetts. Banc of America Securities LLC underwrote Certificates NAA 2007-3 A1, BAFC 2006-D 1A1 and BAFC 2005-H 7A1. Banc of America Securities LLC also sold Certificate WFMBS 2006 AR12 1A1 to the Bank. Effective November 1, 2010, Banc of America Securities LLC merged with and into Successor Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated, a Delaware corporation. *See infra* § III.C. All references herein to Banc of America Securities LLC are also to Merrill Lynch, Pierce, Fenner & Smith Incorporated, which is liable as a matter of law as successor to Banc of America Securities LLC by virtue of its status as the surviving entity in its merger with Banc of America Securities LLC.

39. Sponsor Defendant Bank of America, National Association is a nationally chartered bank that operates branches throughout Massachusetts and is regulated by the Office of the Comptroller of the Currency (OCC). Bank of America, National Association was the Sponsor of the offerings in which the bank purchased Certificates BAFC 2005-H 7A1 and BAFC 2006-D 1A1. Bank of America, National Association was also an originator of loans for the offering in which the bank purchased Certificate BAFC 2006-D 1A1.

40. Controlling Person Defendant Bank of America Corporation is a Delaware corporation. Bank of America Corporation is the parent and a controlling entity of Banc of America Funding Corporation, Banc of America Securities LLC and Bank of America, National Association.

41. Bank of America Corporation is also named as a Successor Defendant to CWALT, Inc., CWMBS, Inc., Countrywide Securities Corporation, Countrywide Home Loans, Inc. and Countrywide Financial Corporation. *See infra* § IV.C. As set forth below, on or about

July 1, 2008, Successor Defendant Bank of America Corporation acquired Countrywide Financial Corporation and all of its subsidiaries, including CWALT, Inc., CWMBS, Inc., Countrywide Securities Corporation, and Countrywide Home Loans, Inc.

42. Bank of America Corporation is also named as a Successor Defendant to Merrill Lynch Mortgage Investors, Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated, Merrill Lynch Mortgage Lending, Inc., and Merrill Lynch & Co., Inc. *See infra* § IV.C. As set forth below, on or about January 1, 2009, Successor Defendant Bank of America Corporation acquired Merrill Lynch & Co., Inc. and all of its subsidiaries, including Merrill Lynch Mortgage Investors, Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated, and Merrill Lynch Mortgage Lending, Inc.

2. The Barclays Entities

43. Depositor/Issuer Defendant BCAP LLC is a Delaware corporation. BCAP LLC was the Depositor for Certificate BCAP 2006-AA1 A1.

44. Underwriter Defendant Barclays Capital Inc. is a Connecticut corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Barclays Capital Inc. underwrote Certificates RALI 2007-QS6 A29, CCMFC 2006-2A A1, CCMFC 2007-1A A1, CCMFC 2007-2A A1, LUM 2006-7 2A1, LUM 2006-6 A1, and BCAP 2006-AA1 A1.

3. The Bear Stearns Entities

45. Depositor/Issuer Defendant Bear Stearns Asset Backed Securities I LLC is a Delaware limited liability company. Bear Stearns Asset Backed Securities I LLC was the Depositor for Certificate BALTA 2006-1 11A1.

46. Depositor/Issuer Defendant Structured Asset Mortgage Investments II Inc. is a Delaware corporation. Structured Asset Mortgage Investments II Inc. was the Depositor for

Certificates BSMF 2007-AR5 1A1A, BALTA 2007-3 1A1, BSMF 2007-AR4 1A1, BALTA 2007-2 1A1, BALTA 2007-1 1A1, BSMF 2007-AR1 1A1, BSMF 2006-AR5 1A1, BALTA 2006-7 1A1, BSMF 2006-AR3 1A1, BSMF 2006-AR2 1A1, BALTA 2006-6 1A1, SAMI 2006-AR7 A1A, BSMF 2006-AR1 1A1, BALTA 2006-5 1A1, SAMI 2006-AR4 4A1, SAMI 2006-AR6 1A1, BALTA 2006-4 11A1, BALTA 2006-4 13A1, LUM 2006-3 11A1, BALTA 2006-3 1A1, BALTA 2006-2 11A1, BALTA 2005-10 11A1, LUM 2005-1 A1, BALTA 2005-9 11A1, BALTA 2005-8 11A1, SAMI 2005-AR6 2A1, GPMF 2005-AR4 4A1A, SAMI 2005-AR3 1A1, GPMF 2005-AR2 A1, SAMI 2005-AR2 1A1, GPMF 2005-AR1 A2, and GPMF 2006-AR3 4A1.

47. Underwriter and Corporate Seller[4] Defendant Bear, Stearns & Co. Inc., now known as J.P. Morgan Securities, LLC (hereafter "Bear, Stearns & Co. Inc."),[5] is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Bear, Stearns & Co. Inc. maintains its Massachusetts principal office at One Federal Street, Boston, MA 02110. Bear, Stearns & Co. Inc. underwrote Certificates AHM 2005-2 1A1, MHL 2005-5 A1, LUM 2005-1 A1, NAA 2007-3 A1, NAA 2007-1 2A1, LUM 2006-7 2A1, IMM 2005-7 A1,

[4] As used in this Complaint, "Corporate Seller" refers to a corporate entity that sold a particular issuance of PLMBS directly to that Bank, but did not act as an Underwriter for that PLMBS. For example, Bear, Stearns & Co. Inc. acted as a Corporate Seller—but not as an Underwriter—with respect to Certificate NAA2006-AR4A2.

[5] During the fall of 2008, Underwriter Defendant J.P. Morgan Securities Inc. merged with and into Underwriter Defendant Bear Stearns & Co., Inc. The surviving corporation changed its name from Bear Stearns & Co. Inc. to J.P. Morgan Securities Inc. The company changed its name again on or about September 1, 2010, when it converted into J.P. Morgan Securities LLC. For the sake of clarity, Plaintiff refers to this Underwriter Defendant as Bear Stearns & Co., Inc. in connection with all pre-merger acts and omissions of Bear Stearns & Co., Inc. Similarly, Plaintiff refers to this Underwriter Defendant as J.P. Morgan Securities Inc. in connection with all pre-merger acts and omissions of J.P. Morgan Securities Inc. To the extent that Underwriter Defendant J.P. Morgan Securities Inc. has undergone a change in corporate structure and/or ownership through merger, J.P. Morgan Securities LLC remains liable as the initial entity's successor.

LUM 2006-6 A1, BSMF 2007-AR5 1A1A, BALTA 2007-3 1A1, BSMF 2007-AR4 1A1, TMST 2007-1 A2A, BALTA 2007-2 1A1, BALTA 2007-1 1A1, BSMF 2007-AR1 1A1, BSMF 2006-AR5 1A1, BALTA 2006-7 1A1, BSMF 2006-AR3 1A1, BSMF 2006-AR2 1A1, BALTA 2006-6 1A1, SAMI 2006-AR7 A1A, BSMF 2006-AR1 1A1, BALTA 2006-5 1A1, SAMI 2006-AR4 4A1, SAMI 2006-AR6 1A1, IMSA 2006-2 1A2A, BALTA 2006-4 11A1, BALTA 2006-4 13A1, LUM 2006-3 11A1, BALTA 2006-3 1A1, BALTA 2006-2 11A1, BALTA 2006-1 11A1, BALTA 2005-10 11A1, IMSA 2005-2 A1, BALTA 2005-9 11A1, BALTA 2005-8 11A1, SAMI 2005-AR6 2A1, GPMF 2005-AR4 4A1A, SAMI 2005-AR3 1A1, GPMF 2005-AR2 A1, SAMI 2005-AR2 1A1, GPMF 2005-AR1 A2, and CWHL 2005-2 2A1. Bear, Stearns & Co. Inc. also sold Certificate NAA2006-AR4A2 to the Bank.

48. Sponsor Defendant EMC Mortgage Corporation is a Delaware corporation that was and is registered to do business in Massachusetts. EMC Mortgage Corporation was the Sponsor for the offerings in which the Bank purchased Certificates SAMI 2006-AR6 1A1, SAMI 2005-AR6 2A1, SAMI 2005-AR3 1A1, SAMI 2005-AR2 1A1, GPMF 2005-AR4 4A1A, BSMF 2007-AR5 1A1A, BALTA 2007-3 1A1, BSMF 2007-AR4 1A1, BALTA 2007-2 1A1, BALTA 2007-1 1A1, BSMF 2007-AR1 1A1, BSMF 2006-AR5 1A1, BALTA 2006-7 1A1, BSMF 2006-AR3 1A1, BSMF 2006-AR2 1A1, BALTA 2006-6 1A1, SAMI 2006-AR7 A1A, BSMF 2006-AR1 1A1, BALTA 2006-5 1A1, SAMI 2006-AR4 4A1, BALTA 2006-4 11A1, BALTA 2006-4 13A1, BALTA 2006-3 1A1, BALTA 2006-2 11A1, BALTA 2006-1 11A1, BALTA 2005-10 11A1, BALTA 2005-9 11A1, BALTA 2005-8 11A1, GPMF 2005-AR2 A1, GPMF 2005-AR1 A2, and GPMF 2006-AR34A1.

49. Controlling Person Defendant The Bear Stearns Companies Inc. is a Delaware corporation. At the time the Bank acquired the relevant Certificates, The Bear Stearns

Companies Inc. was the parent company and a controlling entity of Bear Stearns Asset Backed Securities I LLC, Structured Asset Mortgage Investments II Inc., Bear, Stearns & Co. Inc., and EMC Mortgage Corporation. At the time of the transactions, The Bear Stearns Companies, Inc. was also the parent company and a controlling entity of Bear Stearns Residential Mortgage Corporation which originated loans for the offerings in which the Bank purchased Certificates BALTA 2007-3 1A1, BALTA 2007-2 1A1, BSMF 2006-AR1 1A1, BSMF 2007-AR4 1A1, BSMF 2007-AR5 1A1A, BSMF 2007-AR1 1A1, BSMF 2006-AR3 1A1, BSMF 2006-AR2 1A1, and BSMF 2006-AR5 1A1. The Bear Stearns Companies, Inc. was also the parent company and a controlling entity of EMC Mortgage Corporation, which originated loans for the offerings in which the bank purchased Certificates BALTA 2007-3 1A1, BALTA 2007-2 1A1, BALTA 2007-1 1A1, BALTA 2006-7 1A1, BALTA 2006-5 1A1, BALTA 2006-3 1A1, BALTA 2006-2 11A1, BALTA 2006-1 11A1, BALTA 2006-4 13A1, BALTA 2006-4 11A1, BALTA 2005-9 11A1, BALTA 2006-6 1A1, BALTA 2005-10 11A1, BSMF 2006-AR5 1A1, BSMF 2006-AR2 1A1, BSMF 2006-AR3 1A1, BSMF 2007-AR1 1A1, LUM 2005-1 A1, BALTA 2005-8 11A1, BSMF 2006-AR1 1A1, BSMF 2007-AR4 1A1 and BSMF 2007-AR5 1A1A. On or about July 6, 2008, The Bear Stearns Companies, Inc. legally changed its name to The Bear Stearns Companies LLC. All references herein to The Bear Stearns Companies, Inc. are also to The Bear Stearns Companies LLC.

4. The Chevy Chase (Capital One) Entities

50. Depositor/Issuer Defendant Chevy Chase Funding LLC is a Delaware limited liability company. Chevy Chase Funding LLC was the Depositor for Certificates CCMFC 2006-2A A1, CCMFC 2007-1A A1, and CCMFC 2007-2A A1.

51. Sponsor and Controlling Person Non-Defendant Chevy Chase Bank, F.S.B. was a federally chartered savings bank that was registered to do business in Massachusetts at the time

of the transactions. Chevy Chase Bank, F.S.B. was the Sponsor for the offerings in which the Bank purchased Certificates CCMFC 2006-2A A1, CCMFC 2007-1A A1 and CCMFC 2007-2A A1. Chevy Chase Bank, F.S.B. was also the parent company and a controlling entity of Chevy Chase Funding LLC and originated loans for the offerings in which the Bank purchased Certificates CCMFC 2006-2A A1, CCMFC 2007-1A A1 and CCMFC 2007-2A A1. During December 2008, Chevy Chase Bank, F.S.B. was acquired by and merged with and into Successor Defendants Capital One Financial Corporation and Capital One, National Association. *See infra* § III.C. All references herein to Chevy Chase Bank, F.S.B. are also to Capital One Financial Corporation and Capital One, National Association, which are liable as a matter of law as successor to Chevy Chase Bank, F.S.B. and its subsidiaries, including Chevy Chase Funding LLC, by virtue of their status as the surviving entities in the acquisition of and merger with Chevy Chase Bank, F.S.B.

5. The Citigroup Entities

52. Depositor/Issuer Defendant Citicorp Mortgage Securities, Inc. is a Delaware corporation. Citicorp Mortgage Securities, Inc. was the Depositor for Certificate CMALT 2007-A4 1A7.

53. Depositor/Issuer Defendant Citigroup Mortgage Loan Trust Inc. is a Delaware corporation. Citigroup Mortgage Loan Trust Inc. was the Depositor for Certificate CMLTI 2005-9 1A1.

54. Underwriter and Corporate Seller Defendant Citigroup Global Markets Inc. is a New York corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Citigroup Global Markets Inc. underwrote Certificates LUM 2007-2 1A1, RALI 2006-QA2 1A1,

and CMLTI 2005-9 1A1. Citigroup Global Markets Inc. also sold Certificates MARM 2005-7 2A1 and GPMF 2006-AR3 4A1 to the Bank.

55. Sponsor Defendant Citigroup Global Markets Realty Corp. is a New York corporation that was and is registered to do business in Massachusetts. Citigroup Global Markets Realty Corp. was the Sponsor for the offering in which the Bank purchased Certificate CMLTI 2005-9 1A1.

56. Sponsor and Controlling Person Defendant CitiMortgage, Inc. is a New York corporation that was and is registered to do business in Massachusetts. CitiMortgage, Inc. was the Sponsor for the offering in which the Bank purchased Certificate CMALT 2007-A4 1A7. CitiMortgage, Inc. is also a parent company and controlling entity of Citicorp Mortgage Securities, Inc. and originated loans for the offering in which the Bank purchased Certificate CMALT 2007-A4 1A7.

57. Controlling Person Defendant Citigroup Financial Products, Inc. is a Delaware corporation and is also a parent company and controlling entity of Citigroup Mortgage Loan Trust Inc., Citigroup Global Markets Inc. and Citigroup Global Markets Realty Corp.

58. Controlling Person Defendant Citigroup Inc. is a Delaware corporation. Citigroup Inc. is the parent company and controlling entity of Citicorp Mortgage Securities, Inc., Citigroup Mortgage Loan Trust Inc., Citigroup Global Markets Inc., Citigroup Global Markets Realty Corp., CitiMortgage, Inc. and Citigroup Financial Products, Inc.

6. The Countrywide Entities

59. Depositor/Issuer Defendant CWALT, Inc. is a Delaware corporation. CWALT, Inc. was the Depositor for Certificates CWALT 2007-OA9 A1, CWALT 2007-OA4 A1, CWALT 2006-OA16 A2, CWALT 2006-OA8 1A1, CWALT 2005-86CB A10, and CWALT 2005-16 A4.

60. Depositor/Issuer Defendant CWMBS, Inc. is a Delaware corporation. CWMBS, Inc. was the Depositor for Certificate CWHL 2005-2 2A1.

61. Underwriter Defendant Countrywide Securities Corporation is a California corporation. Countrywide Securities Corporation underwrote Certificates IMM 2005-7 A1, CWALT 2007-OA9 A1, AHMA 2007-5 A1, AHMA 2007-2 A1, AHMA 2006-6 A1A, CWALT 2006-OA16 A2, IMSA 2006-2 1A2A, CWALT 2005-86CB A10, and IMSA 2005-2 A1.

62. Sponsor Defendant Countrywide Home Loans, Inc. is a New York corporation that was and is registered to do business in Massachusetts. Countrywide Home Loans, Inc. was the Sponsor for the offerings in which the Bank purchased Certificates CWALT 2007-OA9 A1, CWALT 2007-OA4 A1, CWALT 2006-OA16 A2, CWALT 2006-OA8 1A1, CWALT 2005-86CB A10, CWALT 2005-16 A4, and CWHL 2005-2 2A1. Countrywide Home Loans, Inc. also originated loans for the offerings in which the Bank purchased Certificates BALTA 2007-1 1A1, BALTA 2006-7 1A1, BALTA 2006-5 1A1, BALTA 2006-2 11A1, MARM 2005-7 2A1, CWALT 2007-OA9 A1, CWALT 2007-OA4 A1, CWALT 2006-OA8 1A1, CWALT 2005-86CB A10, CWALT 2005-16 A4, CWHL 2005-2 2A1, DBALT 2006-AR4 A1, BALTA 2006-4 11A1, DBALT 2006-AR3 A2, JPALT 2006-A2 1A1, BAFC 2005-H 7A1, HVMLT 2007-1 2A1A, BCAP 2006-AA1 A1, SAMI 2006-AR7 A1A, SAMI 2006-AR6 1A1, HVMLT 2005-10 2A1A, BAFC 2006-D 1A1, SAMI 2005-AR2 1A1, SAMI 2006-AR4 4A1, CWALT 2006-OA16 A2, MARM 2005-8 1A1, ARMT 2006-3 4A2, ARMT 2007-2 2A21, BALTA 2005-9 11A1, LUM 2005-1 A1, ARMT 2006-1 6A1, BALTA 2006-6 1A1, and LUM 2006-6 A1.

63. Controlling Person Defendant Countrywide Financial Corporation is a Delaware corporation. At the time the Bank acquired the relevant Certificates, Countrywide Financial Corporation was a holding company which, through its subsidiaries, was engaged in mortgage

lending and other real estate finance-related businesses, including mortgage banking, banking and mortgage warehouse lending, dealing in securities and insurance underwriting. Countrywide Financial Corporation managed its business through five business segments: Mortgage Banking; Banking; Capital Markets; Insurance; and Global Operations. The Mortgage Banking segment was Countrywide Financial Corporation's core business and generated 48% of the Countrywide Financial Corporation's pre-tax earnings in 2006. Countrywide Financial Corporation is the parent company and a controlling entity of CWALT, Inc., CWMBS, Inc., Countrywide Securities Corporation and Countrywide Home Loans, Inc.

64. Bank of America Corporation is also named as a Successor Defendant to CWALT, Inc., CWMBS, Inc., Countrywide Securities Corporation, Sponsor Defendant Countrywide Home Loans, Inc., and Controlling Person Defendant Countrywide Financial Corporation. *See infra* § IV.C. As set forth below, on or about July 1, 2008, Successor Defendant Bank of America Corporation acquired Countrywide Financial Corporation and all of its subsidiaries, including CWALT, Inc., CWMBS, Inc., Countrywide Securities Corporation, and Countrywide Home Loans, Inc.

7. The Credit Suisse Entities

65. Depositor/Issuer Defendant Credit Suisse First Boston Mortgage Securities Corp. is a Delaware corporation that was and is registered to do business in Massachusetts. Credit Suisse First Boston Mortgage Securities Corp. was the Depositor/Issuer for Certificates ARMT 2007-2 2A21, ARMT 2007-1 5A1, ARMT 2006-3 4A2, ARMT 2006-1 6A1, and ARMT 2006-2 6A1.

66. Sponsor and Underwriter Defendant Credit Suisse Securities (USA) LLC is a Delaware limited liability company which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in

Massachusetts. Credit Suisse Securities (USA) LLC underwrote Certificates CCMFC 2006-2A A1, CCMFC 2007-1A A1, CCMFC 2007-2A A1, ARMT 2007-2 2A21, ARMT 2007-1 5A1, TMST 2007-1 A2A, ARMT 2006-3 4A2, ARMT 2006-2 6A1, ARMT 2006-1 6A1, and MHL 2006-1 1A2. Credit Suisse Securities (USA) LLC was also the Sponsor for the offering in which the Bank purchased Certificate ARMT 2006-2 6A1.

67. Sponsor Defendant DLJ Mortgage Capital, Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. DLJ Mortgage Capital Inc. was the Sponsor for the offerings in which the Bank purchased Certificates ARMT 2007-2 2A21, ARMT 2007-1 5A1, ARMT 2006-3 4A2, and ARMT 2006-1 6A1. DLJ Mortgage Capital, Inc. also originated loans for the offering in which the Bank purchased Certificates ARMT 2007-2 2A21, ARMT 2006-2 6A1, ARMT 2006-3 4A2, and ARMT 2007-1 5A1.

68. Controlling Person Defendant Credit Suisse (USA), Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. Credit Suisse (USA), Inc. is a parent company and controlling entity of Credit Suisse Securities (USA) LLC, and DLJ Mortgage Capital Inc.

69. Controlling Person Defendant Credit Suisse Holdings (USA), Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. Credit Suisse Holdings (USA), Inc. is the parent company and a controlling entity of Credit Suisse First Boston Mortgage Securities Corp.; Credit Suisse Securities (USA) LLC; DLJ Mortgage Capital, Inc.; and Credit Suisse (USA) Inc.

70. The Credit Suisse Entities identified in paragraphs 65 through 69 above are also affiliates, under common ownership, of Credit Suisse Financial Corporation, which originated

loans for the offerings in which the Bank purchased Certificates ARMT 2006-1 6A1, ARMT 2006-2 6A1, ARMT 2006-3 4A2, ARMT 2007-1 5A1, and ARMT 2007-2 2A21.

8. The Deutsche Entities

71. Depositor/Issuer Defendant Deutsche Alt-A Securities, Inc. is a Delaware corporation. Deutsche Alt-A Securities, Inc. was the Depositor/Issuer for Certificates DBALT 2006-AR2 1A1, DBALT 2006-AR2 1A2, DBALT 2006-AR3 A2, DBALT 2006-AR4 A1, DBALT 2006-AR5 1A1, DBALT 2007-AR1 A1, and DBALT 2007-AR3 2A1.

72. Underwriter and Corporate Seller Defendant Deutsche Bank Securities Inc. is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Deutsche Bank Securities Inc. underwrote Certificates DBALT 2006-AR2 1A1, DBALT 2006-AR2 1A2, DBALT 2006-AR3 A2, DBALT 2006-AR4 A1, DBALT 2006-AR5 1A1, DBALT 2007-AR1 A1, DBALT 2007-AR3 2A1, and RALI 2006-QA3 A1. Deutsche Bank Securities Inc. also sold Certificate JPMMT 2005-ALT1 2A1 to the Bank.

73. Sponsor and Controlling Person Defendant DB Structured Products, Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. DB Structured Products, Inc. was the Sponsor for the deals in which the Bank purchased Certificates DBALT 2006-AR2 1A1, DBALT 2006-AR2 1A2, DBALT 2006-AR3 A2, DBALT 2006-AR4 A1, DBALT 2006-AR5 1A1, DBALT 2007-AR1 A1, and DBALT 2007-AR3 2A1. DB Structured Products, Inc. was also a parent company and controlling entity of Deutsche Alt-A Securities, Inc.

74. DB Structured Products, Inc. is also named as a Successor Defendant to MortgageIT Holdings, Inc., MortgageIT, Inc. and MortgageIT Securities Corp. *See infra* § IV.C. As set forth below, on or about July 11, 2006, Successor Defendant DB Structured Products, Inc.

acquired MortgageIT Holdings, Inc. and all of its subsidiaries, including MortgageIT, Inc. and MortgageIT Securities Corp.

75. Controlling Person Defendant DB U.S. Financial Market Holding Corporation is a Delaware corporation. DB U.S. Financial Market Holding Corporation is a parent company and controlling entity of Deutsche Alt-A Securities, Inc.; Deutsche Bank Securities Inc.; and DB Structured Products, Inc.

9. Goldman, Sachs & Co.

76. Underwriter Defendant Goldman, Sachs & Co. is a New York corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Goldman, Sachs & Co underwrote Certificates AHM 2005-2 1A1, CWALT 2007-OA4 A1 and RALI 2006-QO10 A1.

10. The Greenwich Entities

77. Depositor/Issuer Defendant Greenwich Capital Acceptance, Inc. is a Delaware corporation. Greenwich Capital Acceptance, Inc. was the Depositor for Certificates DSLA 2005-AR1 2A1A, DSLA 2005-AR2 2A1A, HVMLT 2007-1 2A1A, HVMLT 2006-8 2A1A, HVMLT 2006-7 2A1A, MHL 2006-1 1A2, and HVMLT 2005-10 2A1A. Pursuant to its Restated Certificate of Incorporation, dated July 8, 2009, Greenwich Capital Acceptance, Inc. legally changed its name to RBS Acceptance Inc. All references herein to Greenwich Capital Acceptance, Inc. are also to RBS Acceptance Inc.

78. Underwriter Defendant Greenwich Capital Markets, Inc. is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Greenwich Capital Markets, Inc. underwrote Certificates AHM 2005-2 1A1, DSLA 2005-AR1 2A1A, DSLA 2005-AR2 2A1A, NAA 2006-AR4 A2, NAA 2007-1 2A1, LUM 2007-2 1A1,

CMALT 2007-A4 1A7, TMST 2007-1 A2A, HVMLT 2007-1 2A1A, HVMLT 2006-8 2A1A, HVMLT 2006-7 2A1A, MHL 2006-1 1A2, HVMLT 2005-10 2A1A, INDX 2005-AR8 2A1A, INDX 2005-AR4 2A1A, and INDX 2005-AR12 2A1a. Pursuant to its Restated Certificate of Incorporation, dated April 1, 2009, Greenwich Capital Markets, Inc. legally changed its name to RBS Securities Inc. All references herein to Greenwich Capital Markets, Inc. are also to RBS Securities Inc.

79. Sponsor Defendant Greenwich Capital Financial Products, Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. Greenwich Capital Financial Products, Inc. was the Sponsor for the offerings in which the Bank purchased Certificates 2005-AR1 2A1A, HVMLT 2007-1 2A1A, HVMLT 2006-8 2A1A, HVMLT 2006-7 2A1A, and HVMLT 2005-10 2A1A. Pursuant to its Restated Certificate of Incorporation, dated April 1, 2009, Greenwich Capital Financial Products, Inc. legally changed its name to RBS Financial Products Inc. All references herein to Greenwich Capital Financial Products, Inc. are also to RBS Financial Products Inc.

80. Controlling Person Defendant Greenwich Capital Holdings, Inc., a Delaware corporation, is the parent company and a controlling entity of Greenwich Capital Acceptance, Inc., Greenwich Capital Markets, Inc. and Greenwich Capital Financial Products, Inc. Greenwich Capital Holdings, Inc. legally changed its name to RBS Holdings USA Inc. All references herein to Greenwich Capital Holdings, Inc. are also to RBS Holdings USA Inc.

11. The Impac Entities

81. Depositor/Issuer Defendant IMH Assets Corp. is a California corporation. IMH Assets Corp. was the Depositor for Certificate IMM 2005-7 A1.

82. Depositor/Issuer Defendant Impac Secured Assets Corp. is a California corporation. Impac Secured Assets Corp. was the Depositor for Certificates IMSA 2005-2 A1 and IMSA 2006-2 1A2A.

83. Sponsor and Controlling Person Defendant Impac Funding Corporation is a California corporation that was and is registered to do business in Massachusetts. Impac Funding Corporation was the Sponsor for the offerings in which the Bank purchased Certificates IMSA 2006-2 1A2A and IMSA 2005-2 A1. Impac Funding Corporation is also the parent company and a controlling entity of Impac Secured Assets Corp.

84. Sponsor and Controlling Person Defendant Impac Mortgage Holdings, Inc. is a Maryland corporation. Impac Mortgage Holdings, Inc. was the Sponsor for the offering in which the Bank purchased Certificate IMM 2005-7 A1. Impac Mortgage Holdings, Inc. is also the parent company and a controlling entity of IMH Assets Corp., Impac Secured Assets Corp. and Impac Funding Corporation.

12. The J.P. Morgan Entities

85. Depositor/Issuer Defendant J.P. Morgan Acceptance Corporation I is a Delaware corporation. J.P. Morgan Acceptance Corporation I was the Depositor for Certificates JPALT 2007-A2 12A1, JPALT 2006-A3 1A1, JPALT 2006-A2 1A1, JPALT 2006-A1 1A1, and JPMMT 2005-ALT1 2A1.

86. Underwriter Defendant J.P. Morgan Securities Inc., a Delaware corporation, changed its name and organization to J.P. Morgan Securities LLC, a Delaware limited liability company, on or about September 1, 2010. This entity will simply be referred to as "J.P. Morgan Securities Inc."[6] It has, at all relevant times, maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. J.P.

[6] *See* footnote 5, *supra*.

Morgan Securities Inc. underwrote Certificates JPALT 2007-A2 12A1, JPALT 2006-A3 1A1, JPALT 2006-A2 1A1, and JPALT 2006-A1 1A1.

87. Sponsor Defendant J.P. Morgan Mortgage Acquisition Corp. is a Delaware corporation. J.P. Morgan Mortgage Acquisition Corp. was the Sponsor for the offerings in which the Bank purchased Certificates JPALT 2006-A2 1A1, JPALT 2006-A1 1A1, JPALT 2007-A2 12A1, JPALT 2006-A3 1A1, and JPMMT 2005-ALT1 2A1.

88. At all relevant times, Controlling Person Defendant JPMorgan Securities Holdings LLC, a Delaware limited liability company, was the parent company and a controlling entity of J.P. Morgan Acceptance Corporation I and J.P. Morgan Securities Inc.

89. Controlling Person Defendant JPMorgan Chase & Co., a Delaware corporation, is the parent company and a controlling entity of JPMorgan Securities Holdings LLC, J.P. Morgan Acceptance Corporation I, J.P. Morgan Securities Inc. and J.P. Morgan Mortgage Acquisition Corp. JP Morgan Chase & Co. is also the parent company of both Chase Home Finance LLC and JPMorgan Chase Bank, N.A. which originated loans for the offerings in which the Bank purchased Certificates JPALT 2007-A2 12A1, JPALT 2006-A2 1A1, JPALT 2006-A3 1A1, and JPALT 2006-A1 1A1.

13. The Lehman Individual Defendants

90. Seller and Controlling Person Defendant Lana Franks is an individual residing in New York. Franks was Chairman, President and Principal Executive Officer and a Director of Structured Asset Securities Corporation, which was the Depositor for Certificates LXS 2005-8 1A2, LXS 2006-15 A1, LXS 2007-9 1A1, and LXS 2007-11 A1 (together the "Lehman Certificates"). Frank was a signatory on the Registration Statement for Certificates LXS 2006-15 A1, LXS 2007-9 1A1 and LXS 2007-11 A1. Structured Asset Securities Corporation was a subsidiary of Lehman Brothers Holdings Inc., the Sponsor for all four Lehman Certificates.

Franks also served as a Manager of Aurora Loan Services LLC, another Lehman Brothers Holdings Inc. subsidiary, which was an originator of loans for the offerings in which the Bank purchased all four Lehman Certificates.

91. Controlling Person Defendant Richard S. Fuld, Jr. is an individual residing in Florida. Between at least 2005 and 2007, Fuld was the Chairman and Chief Executive Officer and a Director of Sponsor Lehman Brothers Holdings Inc., as well as chair of Lehman Brothers Holdings Inc's. Executive Committee and Risk Committee. During 2005, Fuld was the Chief Executive Officer and President of Lehman Brothers, Inc., a Lehman Brothers Holdings Inc. subsidiary and the Underwriter for all four Lehman Certificates. During 2006 and 2007, Fuld was the Chief Executive Officer and Chairman and a Director of Lehman Brothers Inc.

92. Seller and Controlling Person Defendant Edward Grieb is an individual residing in New York. Beginning no later than 2006, Grieb was the Chief Financial Officer of Structured Asset Securities Corporation. Grieb was signatory on the Registration Statement for Certificates LXS 2006-15 A1, LXS 2007-9 1A1, and LXS 2007-11 A1. From at least 2005 through 2007, Grieb also served as a Manager of Originator Aurora Loan Services LLC.

93. Seller and Controlling Person Defendant Richard McKinney is an individual residing in New York. Beginning no later than 2006, McKinney was a Director of Structured Asset Securities Corporation. McKinney was a signatory on the Registration Statement for Certificates LXS 2006-15 A1, LXS 2007-9 1A1, and LXS 2007-11 A1.

94. Controlling Person Defendant Barry J. O'Brien is an individual residing in New Jersey. During at least 2005 and 2007, O'Brien was the Treasurer of Sponsor Lehman Brothers Holdings Inc. From at least 2005 through 2007, O'Brien was the First Vice President of Underwriter Lehman Brothers, Inc.

95. Controlling Person Defendant Christopher M. O'Meara is an individual residing in New York. O'Meara was the Chief Financial Officer, Controller and Executive Vice President of Sponsor Lehman Brothers Holdings Inc. from 2004 until 2007, when he became the Global Head of Risk Management for Lehman Brothers Holdings Inc. O'Meara was also a member of the Lehman Brothers Holdings Inc. Risk Committee at all relevant times. During at least 2005 through 2007 O'Meara was the Chief Financial Officer of Underwriter Lehman Brothers, Inc.

96. Seller and Controlling Person Defendant Kristine Smith is an individual who, on information and belief, resides in New York. Beginning no later than 2006, Smith was the Controller and Principal Accounting Officer of Structured Asset Securities Corporation. Smith was signatory on the Registration Statement for Certificates LXS 2006-15 A1, LXS 2007-9 1A1, and LXS 2007-11 A1.

97. Seller and Controlling Person Defendant James J. Sullivan is an individual residing in New York. Beginning no later than 2005, Sullivan was a Director of Structured Asset Securities Corporation. Sullivan was signatory on the Registration Statement for all four Lehman Certificates.

98. Seller and Controlling Person Defendant Samir Tabet is an individual residing in New York. During at least 2005, Tabet was the Managing Director of Structured Asset Securities Corporation. Tabet was signatory on the Registration Statement for Certificates LXS 2005-8 1A2.

99. Seller and Controlling Person Defendant Mark L. Zusy is an individual residing in Florida. During at least 2005, Zusy was the Chairman, President and a Director of Structured

Asset Securities Corporation. Zusy was signatory on the Registration Statement for Certificates LXS 2005-8 1A2.

100. Defendants Franks, Fuld, Grieb, McKinney, Smith, Sullivan, Tabet and Zusy are referred to collectively as the "Individual Controlling Person Defendants."

101. Defendants Franks, Grieb, McKinney, O'Brien, O'Meara, Smith, Sullivan, Tabet and Zusy are referred to as the "Individual Seller Defendants."

14. The Merrill Lynch Entities

102. Depositor/Issuer Defendant Merrill Lynch Mortgage Investors, Inc., is a Delaware corporation. Merrill Lynch Mortgage Investors, Inc. was the Depositor for Certificates MANA 2007-A3 A2A and MLMI 2006-AF2 AV2A.

103. Underwriter and Successor Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Merrill Lynch, Pierce, Fenner & Smith Incorporated underwrote Certificates IMSA 2006-2 1A2A, INDX 2006-AR19 1A1, MANA 2007-A3 A2A, MHL 2005-5 A1, MLMI 2006-AF2 AV2A and NAA 2006-AF2 5A1. A Merrill Lynch entity believed and alleged to be Merrill Lynch, Pierce, Fenner & Smith Incorporated sold Certificate MLMI 2006-AF2 AV2A to the Bank. Effective November 1, 2010, Banc of America Securities LLC merged with and into Successor Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated, a Delaware corporation. All references herein to Banc of America Securities LLC are also to Merrill Lynch, Pierce, Fenner & Smith Incorporated, which is liable as a matter of law as successor to Banc of America Securities LLC by virtue of its status as the surviving entity in its merger with Banc of America Securities LLC.

104. Sponsor Defendant Merrill Lynch Mortgage Lending, Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. Merrill Lynch Mortgage Lending, Inc. was the Sponsor for the offerings in which the Bank purchased Certificates MANA 2007-A3 A2A and MLMI 2006-AF2 AV2A.

105. Controlling Person Defendant Merrill Lynch & Co., Inc. is a Delaware corporation. Merrill Lynch & Co., Inc. is the parent corporation and a controlling entity of Merrill Lynch Mortgage Investors, Inc.; Merrill Lynch, Pierce, Fenner & Smith Incorporated; and Merrill Lynch Mortgage Lending, Inc.

106. Bank of America Corporation is also named as a Successor Defendant to Merrill Lynch Mortgage Investors, Inc.; Merrill Lynch, Pierce, Fenner & Smith Incorporated; Merrill Lynch Mortgage Lending, Inc.; and Merrill Lynch & Co., Inc. *See infra* § IV.C. As set forth below, on or about January 1, 2009, Successor Defendant Bank of America Corporation acquired Merrill Lynch & Co., Inc. and all of its subsidiaries, including Merrill Lynch Mortgage Investors, Inc.; Merrill Lynch, Pierce, Fenner & Smith Incorporated; and Merrill Lynch Mortgage Lending, Inc.

15. The Morgan Stanley Entities

107. Depositor/Issuer Defendant Morgan Stanley Capital I Inc. is a Delaware corporation. Morgan Stanley Capital I Inc. was the Depositor for Certificates MSM 2006-13AX A1, MSM 2006-16AX 2A1, MSM 2006-8AR 1A2, MSM 2006-9AR A3, MSM 2007-2AX 2A2, MSM 2007-5AX 2A2, and MSM 2007-7AX 2A1.

108. Underwriter and Controlling Person Defendant Morgan Stanley & Co. Incorporated is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Morgan Stanley & Co. Incorporated underwrote Certificates CMALT 2007-A4

1A7, CWALT 2005-86CB A10, LUM 2005-1 A1, MSM 2006-13AX A1, MSM 2006-16AX 2A1, MSM 2006-8AR 1A2, MSM 2006-9AR A3, MSM 2007-2AX 2A2, MSM 2007-5AX 2A2, and MSM 2007-7AX 2A1. Morgan Stanley & Co. Incorporated was also a controlling entity of Morgan Stanley Mortgage Capital Inc.

109. Sponsor Non-Defendant Morgan Stanley Mortgage Capital Inc. was a New York corporation that was registered to do business in Massachusetts. Morgan Stanley Mortgage Capital Inc. was the Sponsor for the offerings in which the Bank purchased Certificates MSM 2006-13AX A1, MSM 2006-16AX 2A1, MSM 2006-8AR 1A2, MSM 2006-9AR A3, MSM 2007-2AX 2A2, MSM 2007-5AX 2A2, and MSM 2007-7AX 2A1. Morgan Stanley Mortgage Capital Inc. also originated loans for the offerings in which the Bank purchased Certificates MSM 2006-13AX A1, MSM 2006-16AX 2A1, MSM 2006-8AR 1A2, MSM 2006-9AR A3, MSM 2007-2AX 2A2, MSM 2007-5AX 2A2, and MSM 2007-7AX 2A1. Effective June 17, 2007, Morgan Stanley Mortgage Capital Inc. merged with and into Successor Defendant Morgan Stanley Mortgage Capital Holdings LLC, a New York limited liability company that is registered to do business in Massachusetts. *See infra* § IV.C. Since the merger, Morgan Stanley Mortgage Capital Holdings LLC has continued the business of Morgan Stanley Mortgage Capital Inc. All references to Morgan Stanley Mortgage Capital Inc. are also to Morgan Stanley Mortgage Capital Holdings LLC, which is liable as a matter of law as successor to Morgan Stanley Mortgage Capital Inc. by virtue of its status as the surviving entity in its merger with Morgan Stanley Mortgage Capital Inc.

110. Controlling Person Defendant Morgan Stanley is a financial holding company organized under the laws of Delaware. Morgan Stanley is the parent company and a controlling

entity of Morgan Stanley Capital I Inc., Morgan Stanley & Co. Incorporated, and was a parent company and controlling entity of Morgan Stanley Mortgage Capital Inc.

16. The MortgageIT Entities

111. Depositor/Issuer Defendant MortgageIT Securities Corp. is a Delaware corporation. MortgageIT Securities Corp. was the Depositor/Issuer for Certificate MHL 2005-5 A1.

112. Sponsor and Controlling Person Defendant MortgageIT, Inc. is a New York corporation that was and is registered to do business in Massachusetts. MortgageIT, Inc. was the Sponsor for the offering in which the Bank purchased Certificate MHL 2006-1 1A2. MortgageIT, Inc. is the parent company and a controlling entity of MortgageIT Securities Corp. MortgageIT, Inc. also originated loans for the transactions in which the Bank purchased Certificates CWALT 2006-OA16 A2, DBALT 2006-AR3 A2, DBALT 2006-AR4 A1, DBALT 2007-AR1 A1, DBALT 2007-AR3 2A1, LUM 2006-6 A1, MARM 2005-7 2A1, MHL 2005-5A1, MHL 2006-1 1A2, MSM 2006-16AX 2A1, RALI 2006-QA2 1A1, and RALI 2006-QA3 A1.

113. Sponsor and Controlling Person Non-Defendant MortgageIT Holdings, Inc. was a Maryland corporation. MortgageIT Holdings, Inc. was the Sponsor for the offering in which the Bank purchased Certificate MHL 2005-5 A1. MortgageIT Holdings, Inc. was also the parent company and a controlling entity of MortgageIT Securities Corp. and MortgageIT, Inc. On or about July 11, 2006, MortgageIT Holdings, Inc. was acquired by and merged with and into Successor Defendant DB Structured Products, Inc. *See infra* § IV.C. All references herein to MortgageIT Holdings, Inc. are also to DB Structured Products, Inc., which is liable as a matter of law as successor to MortgageIT Holdings, Inc. by virtue of its status as the surviving entity in the acquisition of and merger with MortgageIT Holdings, Inc. DB Structured Products, Inc. is

named as a Successor Defendant to MortgageIT Holdings, Inc., and its former subsidiaries, including MortgageIT, Inc., and MortgageIT Securities Corp.

17. The Nomura Entities

114. Depositor/Issuer Defendant Nomura Asset Acceptance Corporation is a Delaware corporation. Nomura Asset Acceptance Corporation was the Depositor for Certificates NAA 2006-AF2 5A1, NAA 2006-AR4 A2, NAA 2007-1 2A1, and NAA 2007-3 A1.

115. Underwriter Defendant Nomura Securities International, Inc. is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. Nomura Securities International, Inc. underwrote Certificate NAA 2006-AF2 5A1.

116. Sponsor Defendant Nomura Credit & Capital, Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. Nomura Credit & Capital, Inc. was the Sponsor for the offerings in which the Bank purchased Certificates NAA 2006-AF2 5A1, NAA 2006-AR4 A2, NAA 2007-1 2A1, and NAA 2007-3 A1.

117. Controlling Person Defendant Nomura Holding America, Inc., a Delaware corporation, is the parent company and a controlling entity of Nomura Asset Acceptance Corporation, Nomura Securities International, Inc., and Nomura Credit & Capital, Inc.

18. The Residential Funding (GMAC) Entities

118. Depositor/Issuer Defendant Residential Accredit Loans, Inc. is a Delaware corporation. Residential Accredit Loans, Inc. was the Depositor for Certificates RALI 2005-QA9 NB41, RALI 2006-QA2 1A1, RALI 2006-QA3 A1, RALI 2006-QO10 A1, and RALI 2007-QS6 A29.

119. Sponsor Defendant Residential Funding Company, LLC, previously known as Residential Funding Corporation until it changed its name on October 16, 2006 (hereafter

together referred to as "Residential Funding Company, LLC"), is a Delaware limited liability company that was and is registered to do business in Massachusetts. Residential Funding Company, LLC was the Sponsor for the offerings in which the Bank purchased Certificates RALI 2006-QO10 A1, RALI 2007-QS6 A29, RALI 2005-QA9 NB41, RALI 2006-QA2 1A1, and RALI 2006-QA3 A1. Residential Funding Company, LLC, doing business as Residential Mortgage Corporation, also originated loans for the offering in which the Bank purchased Certificate LUM 2006-6 A1. Residential Funding Company, LLC is also the parent company and a controlling entity of Homecomings Financial Network Inc., which is now known as Homecomings Financial, LLC but will together be referred to as "Homecomings Financial Network Inc." Homecomings Financial Network Inc. originated loans for the offerings in which the Bank purchased Certificates RALI 2005-QA9 NB41, RALI 2006-QA2 1A1, RALI 2006-QA3 A1, RALI 2006-QO10 A1, and RALI 2007-QS6 A29.

120. Controlling Person Defendant GMAC Mortgage Group, Inc., a Delaware corporation, is now known as GMAC Mortgage Group LLC, a Delaware limited liability company. This entity will be referred to simply as "GMAC Mortgage Group, Inc." GMAC Mortgage Group, Inc. is a parent company and controlling entity of Residential Accredit Loans, Inc. and Residential Funding Company, LLC, as well as Homecomings Financial Network Inc.

121. Controlling Person Defendant GMAC LLC was a Delaware limited liability company that was registered to do business in Massachusetts. In June 2009, GMAC LLC converted to a Delaware corporation and changed its name to GMAC Inc. and in May 2010, GMAC Inc. changed its name to Ally Financial, Inc. All references to GMAC LLC are also to GMAC Inc. and Ally Financial, Inc. GMAC LLC is the parent company and a controlling entity of Residential Accredit Loans, Inc.; Residential Funding Company, LLC; and GMAC Mortgage

Group, Inc. GMAC LLC is also the parent company and a controlling entity of Homecomings Financial Network Inc. and GMAC Mortgage Corporation. GMAC Mortgage Corporation is now known as GMAC Mortgage, LLC, but this entity will be referred to simply as "GMAC Mortgage Corporation." GMAC Mortgage Corporation originated loans for the offerings in which the Bank purchased Certificates LUM 2006-6 A1 and RALI 2007-QS6 A29.

19. Sandler, O'Neill & Partners, L.P.

122. Corporate Seller Defendant Sandler, O'Neill & Partners, L.P. is a Delaware limited partnership which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and is registered to do business in Massachusetts. Sandler, O'Neill & Partners, L.P., which maintains an office at 50 Congress Street, Suite 330 Boston, MA, 02109, provides brokerage and investment banking services. Sandler, O'Neill & Partners, L.P. sold Certificate TMTS 2007-6ALT A1 to the Bank.

20. The UBS Entities

123. Depositor/Issuer Defendant Mortgage Asset Securitization Transactions, Inc. is a Delaware corporation. Mortgage Asset Securitization Transactions, Inc. was the Depositor for Certificates MARM 2005-7 2A1, MARM 2005-8 1A1, and MARM 2007-R5 A1.

124. Underwriter, Corporate Seller, and Sponsor Defendant UBS Securities LLC is a Connecticut limited liability company which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Massachusetts and was and is registered to do business in Massachusetts. UBS Securities LLC underwrote Certificates AHM 2005-2 1A1, CWALT 2005-16 A4, CWALT 2006-OA8 1A1, IMM 2005-7 A1, IMSA 2005-2 A1, MARM 2005-8 1A1, MARM 2007-R5 A1, MHL 2006-1 1A2, NAA 2006-AR4 A2, and RALI 2005-QA9 NB41. UBS Securities LLC also sold Certificate LUM 2006-3 11A1 to the Bank. UBS Securities LLC

was also the Sponsor for the offering in which the Bank purchased Certificate MARM 2007-R5 A1.

125. Sponsor Defendant UBS Real Estate Securities Inc. is a Delaware corporation that was and is registered to do business in Massachusetts. UBS Real Estate Securities Inc. was the Sponsor for the offerings in which the Bank purchased Certificates MARM 2005-7 2A1 and MARM 2005-8 1A1.

126. Controlling Person Defendant UBS Americas Inc. is a Delaware corporation. UBS Americas Inc. is the parent company and a controlling entity of Mortgage Asset Securitization Transactions, Inc., UBS Real Estate Securities Inc., and the parent company (owner of the preferred members' interest) of UBS Securities LLC.

21. WaMu Capital Corp.

127. Underwriter Defendant WaMu Capital Corp. is a Washington corporation that was registered to do business in Massachusetts during the relevant period. WaMu Capital Corp. underwrote Certificates DSLA 2005-AR1 2A1A and DSLA 2005-AR2 2A1A.

22. The Wells Fargo Defendants

128. Depositor Defendant Wells Fargo Asset Securities Corporation is a Delaware corporation. Wells Fargo Asset Securities Corporation was the depositor for Certificate WFMBS 2006 AR12 1A1.

129. Sponsor and Controlling Person Defendant Wells Fargo Bank, National Association, is a nationally chartered bank and is regulated by the OCC. Wells Fargo Bank, National Association was the Sponsor for the offerings in which the Bank purchased Certificate WFMBS 2006 AR12 1A1 and an originator of loans for the offering in which the Bank purchased Certificate WFMBS 2006 AR12 1A1s GSR 2006-AR1 2A3, GSR 2005-1F 3A1, WFMBS 2007-10 1A10, WFMBS 2005-AR12 2A2, WFMBS 2006-10 A7, WFMBS 2007-4

A16 and WFMBS 2007-11 A2. Wells Fargo Bank, National Assocation is also the parent corporation and controlling entity of Wells Fargo Asset Securities Corporation.

130. Controlling Person Defendant Wells Fargo & Company, a Delaware corporation, is the parent corporation, with 100% direct or indirect ownership, and controlling entity of Wells Fargo Asset Securities Corporation and Wells Fargo Bank, National Association.

23. The Securities Defendants

131. The Defendants identified in paragraphs 37 through 130 are referred to collectively herein as the "Securities Defendants."

24. The Rating Agency Defendants

132. Defendant Fitch, Inc. (also doing business as Fitch Ratings) ("Fitch") is a Delaware corporation that was and is registered to do business in Massachusetts. Fitch provides analysis of global credit markets covering corporate finance, including financial institutions and insurance, structured finance, public finance, global infrastructure and project finance.

133. Defendant The McGraw-Hill Companies, Inc. is a New York corporation that was and is registered to do business in Massachusetts. The McGraw-Hill Companies, Inc. maintains an office at 420 Boylston Street in Boston, Massachusetts. Through its credit rating division, Standard & Poor's Ratings Services, which maintains an office at 225 Franklin Street in Boston, Massachusetts, The McGraw-Hill Companies, Inc. provided global credit ratings, indices, risk evaluation, investment research and data to investors, corporations, governments, financial institutions, investment managers and advisors. At the time the Bank purchased the Certificates, The McGraw-Hill Companies, Inc. was a provider serving the financial services, education and business information markets through three business segments: McGraw-Hill Education, Financial Services, and Information and Media.

134. Effective January 1, 2009, The McGraw-Hill Companies, Inc. transferred certain assets and properties associated with its Standard & Poor's division to Standard & Poor's Financial Services LLC. This Complaint refers to The McGraw-Hill Companies, Inc. and Standard & Poor's Financial Services LLC collectively as "S&P."

135. Defendant Moody's Investors Service, Inc. is a Delaware corporation which, at relevant times, was registered to do business in Massachusetts and maintains an office at 175 Federal Street in Boston, Massachusetts. Moody's Investors Service, Inc., which is a wholly owned subsidiary of Defendant Moody's Corporation, provides credit ratings and research covering debt instruments and securities.

136. Defendant Moody's Corporation is a Delaware corporation. Moody's Corporation is a provider of credit ratings; credit and economic related research, data and analytical tools; risk management software; and quantitative credit risk measures, credit portfolio management solutions, training and financial credentialing and certification services. This Complaint refers to Moody's Investors Service, Inc. and Moody's Corporation collectively as "Moody's."

C. Successor Liability Allegations against Certain Defendants

1. Successor Defendant Bank of America Corporation (Countrywide)

137. On July 1, 2008, Successor Defendant Bank of America Corporation acquired Countrywide Financial Corporation and those it controlled, including Depositor/Issuer Defendants CWALT, Inc. and CWMBS, Inc., Underwriter Defendant Countrywide Securities Corporation, and Sponsor Defendant Countrywide Home Loans, Inc. through an all-stock merger. In this transaction, Countrywide Financial Corporation merged with and into Bank of America Corporation, which acquired substantially all Countrywide Financial Corporation assets and responsibility for all pre-merger liabilities. *See* Agreement and Plan of Merger by and

among Countrywide Financial Corporation, Bank of America Corporation and Red Oak Merger Corporation (Jan. 11, 2008).

138. At the time of the transaction, Bank of America announced that it intended to combine Countrywide's operations with its own and re-brand those combined operations with the Bank of America name. Bank of America further announced that Barbara Desoer would run the combined mortgage and consumer real estate operations from Calabasas, California, where Countrywide Financial had its headquarters, and that Countrywide Financial's incumbent president, David Sambol, would remain for at least some time to work on the transition.

139. On October 16, 2008, Bank of America announced that Countrywide Financial Corporation would no longer publicly report its own financial results and that Bank of America was transferring "substantially all of the assets and operations of Countrywide Financial Corporation and Countrywide Home Loans, Inc. to other subsidiaries of Bank of America."

140. On November 10, 2008, Bank of America publicly announced through an SEC filing on Form 8-K the integration of Countrywide Financial Corporation (and its subsidiaries) with Bank of America's other businesses and operations. That filing once again disclosed that Bank of America had transferred substantially all of Countrywide Financial Corporation's assets to Bank of America.

141. On April 27, 2009, Bank of America announced that it was retiring the Countrywide name and that the combined operations of Countrywide and Bank of America would do business as Bank of America Home Loans. Many former Countrywide locations, employees, assets, and business operations now continue under the Bank of America Home Loans name. Upon information and belief, Bank of America Home Loans is a brand name that Bank of America now uses for the Countrywide Financial Corporation mortgage origination and

securitization operations that Bank of America has absorbed and consolidated with its own operations. The Form 10-K that Bank of America filed on February 26, 2010 lists Depositor/Issuer Defendants CWALT, Inc. and CWMBS, Inc., Underwriter Defendant Countrywide Securities Corporation, Sponsor Defendant Countrywide Home Loans, Inc. and Controlling Person Defendant Countrywide Financial Corporation as Bank of America subsidiaries.

142. Bank of America entered into the Countrywide merger with full knowledge that it was assuming substantial Countrywide liabilities. In a February 22, 2008 interview, Bank of America spokesman Scott Silvestri told Corporate Counsel that Bank of America had not overlooked Countrywide's legal expenses and liabilities when it decided to merge with Countrywide:

> Handling all this litigation won't be cheap, even for Bank of America, the soon-to-be largest mortgage lender in the country. Nevertheless, the banking giant says that Countrywide's legal expenses were not overlooked during negotiations. "We bought the company and all of its assets and liabilities," spokesman Scott Silvestri says. "We are aware of the claims and potential claims against the company and have factored these into the purchase."

143. A January 23, 2008 *New York Times* article similarly quotes former Bank of America Chairman and CEO Kenneth D. Lewis acknowledging that Bank of America had thought long and hard about acquiring Countrywide's liabilities:

> We did extensive due diligence. We had 60 people inside the company for almost a month. It was the most extensive due diligence we have ever done. So we feel comfortable with the valuation. We looked at every aspect of the deal, from their assets to potential lawsuits and we think we have a price that is a good price.

144. On November 16, 2010, Bank of America's Chief Executive Officer, Brian Moynihan, publicly admitted that Bank of America had accepted liability for investors' claims concerning Countrywide's mortgage-backed securities: "There's a lot of people out there with a

lot of thoughts about how we should solve this [investor demands for refunds over faulty mortgages], but at the end of the day, we'll pay for the things that Countrywide did."

145. And in a December 11, 2010 *New York Times* profile, Moynihan again publicly admitted that Bank of America would be responsible for Countrywide's liabilities:

> But what about Countrywide?
>
> "A decision was made; I wasn't running the company," Mr. Moynihan says, although he was obviously a top bank official at the time. "Our company bought it and we'll stand up; we'll clean it up."

The profile then noted that Bank of America's securities filings echoed the position taken by Moynihan that Bank of America would be responsible for Countrywide's liabilities:

> In addition to significantly increased revenues due to Countrywide's contributions, Bank of America has reported its payment on claims for defective legacy Countrywide mortgages and announced a $4.4 billion reserve fund to pay for similar claims in the future.

146. In October 2008, Bank of America agreed to pay $8.4 billion to settle predatory lending lawsuits that various state attorneys general had filed against Countrywide. Although Countrywide originated the mortgages and was alleged to have committed the misconduct in question long before Bank of America's acquisition, Bank of America assumed financial responsibility for the settlement.

147. On January 3, 2011, Bank of America similarly announced that it had agreed to pay $2.8 billion to settle claims to repurchase mortgage loans that Fannie Mae and Freddie Mac had purchased from Countrywide Financial or its subsidiaries. In its press releases and presentation concerning the settlement, Bank of America admitted that it was paying to resolve claims concerning "alleged breaches of selling representations and warranties related to loans sold by legacy Countrywide."

148. Bank of America has completed actual and de facto mergers with Controlling Person Defendant Countrywide Financial Corporation and its subsidiaries, including Underwriter Defendant Countrywide Securities, and has absorbed Countrywide Financial and those entities controlled by it into Bank of America's own operations. Bank of America Corporation is the successor in liability to Countrywide Financial Corporation and its subsidiaries, including CWALT, Inc.; CWMBS, Inc.; Countrywide Securities Corporation; and Countrywide Home Loans, Inc., and is jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants. Accordingly, the Bank seeks to recover any damages it is awarded against Countrywide Financial Corporation and Countrywide Securities Corporation from Bank of America.

2. Successor Defendant Bank of America Corporation (Merrill Lynch)

149. On January 1, 2009, Successor Defendant Bank of America Corporation, through a wholly owned subsidiary formed solely for the purpose of the merger, acquired Merrill Lynch & Co., Inc. and those it controlled, including Merrill Lynch Mortgage Investors, Inc.; Merrill Lynch, Pierce, Fenner & Smith Incorporated; and Merrill Lynch Mortgage Lending, Inc. In this transaction, Merrill Lynch & Co., Inc. merged with and into Bank of America Corporation, and Bank of America Corporation acquired substantially all Merrill Lynch & Co., Inc. assets and responsibility for all pre-merger liabilities. *See* Agreement and Plan of Merger by and between Merrill Lynch & Co., Inc. and Bank of America Corporation dated as of September 15, 2008; *see also* Bank of America Proxy Statement, Schedule 14A (describing the terms of the "strategic business combination").

150. Bank of America has completed actual and de facto mergers with Seller and Controlling Person Defendant Merrill Lynch & Co., Inc. and its subsidiaries, including Depositor/Issuer Defendant Merrill Lynch Mortgage Investors, Inc., Underwriter and Successor

Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated, and Sponsor Defendant Merrill Lynch Mortgage Lending, Inc. by absorbing Merrill Lynch & Co., Inc. and those entities controlled by it into Bank of America's own operations. Bank of America Corporation is the successor in liability to Merrill Lynch Mortgage Investors, Inc.; Merrill Lynch, Pierce, Fenner & Smith Incorporated; Merrill Lynch Mortgage Lending, Inc.; and Merrill Lynch & Co., Inc., and is jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants. Accordingly, the Bank seeks to recover any damages it is awarded against Merrill Lynch Mortgage Investors, Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated, Merrill Lynch Mortgage Lending, Inc., and Merrill Lynch & Co., Inc. from Bank of America.

3. Successor Defendant Capital One Financial Corporation and Capital One, National Association (Chevy Chase)

151. On December 3, 2008, Successor Defendant Capital One Financial Corporation, a Delaware corporation, entered into an agreement to acquire B.F. Saul Real Estate Investment Trust, a Maryland real estate investment trust, Derwood Investment Corporation, a Maryland corporation, and the B.F. Saul Company Employees' Profit Sharing and Retirement Trust and those they controlled, in particular Sponsor and originator Chevy Chase F.S.B. and its subsidiary Depositor/Issuer Defendant Chevy Chase Funding LLC, through a stock and cash transaction. The acquisition became effective February 27, 2009.

152. In its December 4, 2008 announcement of the transaction, Capital One Financial Corporation touted the benefits of the agreement, including the receipt of more than $11 billion in deposits, which helped it ride out the financial crisis:

> With the addition of Chevy Chase's $11 billion in deposits, Capital One—the largest retail depository institution headquartered in the Washington D.C. region—will also have the largest branch and ATM network in the area.

. . . .

. . . Capital One expects this transaction will be accretive to operating EPS in 2009 and accretive to GAAP EPS in 2010 . . .

. . . .

"Chevy Chase is a great strategic fit for Capital One and the combination of our two banks is economically compelling. Chevy Chase provides an opportunity to acquire a well-run retail bank with local scale in one of the best local banking markets in the U.S. This transaction will enhance our strong deposit base, providing us with greater scope and scale in key Mid-Atlantic banking markets," said Richard D. Fairbank, Chairman and Chief Executive Officer of Capital One. "At a time when core funding is key, we see our deposit strength as an important element of our continued success. The integration of Chevy Chase and the continued growth of our banking businesses is our highest priority."

153. Capital One also announced that, as part of the transaction, Capital One would be taking a net credit mark of $1.75 billion for potential losses in Chevy Chase's loan portfolio. Ultimately, the adjustment exceeded the initial estimate: "the Company recorded net expected principal losses of approximately $2.2 billion as a component of the fair value adjustment for which actual losses will be applied." 2009 Form 10-K at 30.

154. Following the acquisition, on July 30, 2009, Chevy Chase Bank F.S.B. was merged with and into one of Capital One Financial Corporation's "principal" subsidiaries, Capital One, National Association. By reason of the merger, Capital One Financial Corporation and Capital One National Association obtained substantially all Chevy Chase Bank F.S.B. assets and are responsible for the pre-merger liabilities of Chevy Chase Bank F.S.B. *See, e.g.*, Stock Purchase Agreement by and among Capital One Financial Corporation, B.F. Saul Real Estate Investment Trust, Derwood Investment Corporation, and B.F. Saul Company Employees' Profit Sharing and Retirement Trust, dated as of December 3, 2008; Capital One Financial Corporation 2009 Annual Report; Capital One Financial Corporation 2009 Form 10-K.

155. Capital One, North America, as the surviving entity, retained as operating, financial and statutory subsidiaries a number of entities that were owned by Chevy Chase Bank F.S.B. before the merger, including Chevy Chase Funding LLC. *See, e.g.*, Letter from Comptroller of the Currency Administrator of National Banks, dated July 14, 2009, granting conditional approval to the conversion and merger applications of Chevy Chase Bank and Capital One, National Association.

156. Capital One promptly integrated the business and operations of Chevy Chase Bank F.S.B. and its subsidiaries, including Chevy Chase Funding LLC. For instance, in Capital One Financial Corporation's 2009 Annual Report, investors were advised:

> During the third quarter of 2009, the Company realigned its business segment reporting structure to better reflect the manner in which the performance of the Company's operations is evaluated.
>
> . . . .
>
> The segment reorganization includes the allocation of Chevy Chase Bank to the appropriate segments.

See also Capital One 2010 Annual Report at 5 ("We converted Chevy Chase Bank to the Capital One brand in 2010."); 2010 Form 10-K at 1 ("In September 2010, we rebranded Chevy Chase Bank, F.S.B. ("Chevy Chase Bank"), strengthening the Capital One brand in the Washington, D.C. region.").

157. Following the acquisition, visitors to Chevy Chase's website have been are automatically redirected to the Capital One website, and have been told that Chevy Chase Bank is "a division of Capital One, N.A." and that "[t]he Chevy Chase Bank site is no longer available. Please bookmark www.capitalonebank.com for future reference. You will be redirected to capitalonebank.com momentarily."

158. In March 18, 2010 proxy statement to shareholders, Capital One Financial Corporation noted that it was "[c]ontinuing to integrate Chevy Chase Bank to build a scalable bank infrastructure to ensure that the Company is well-positioned to take advantage of opportunities to grow its consumer and commercial banking businesses."

159. Capital One Financial Corporation further touted the benefits of the transaction in its 2009 10-K and confirmed that it had incorporated Chevy Chase Bank's financials into its own: "This acquisition improves the Company's core deposit funding base, increases readily available and committed liquidity, adds additional scale in bank operations, and brings a strong customer base in an attractive banking market. Chevy Chase Bank's results of operations are included in the Company's results after the acquisition date of February 27, 2009."

160. Capital One Financial Corporation and Capital One, National Association entered into this transaction with full knowledge that it was assuming substantial Chevy Chase liabilities. In fact, Capital One Financial Corporation, in its 2009 Annual Report, referred to Capital One, National Association as the "successor" to Chevy Chase Bank F.S.B., and has taken steps to expressly and impliedly assume Chevy Chase Bank's liabilities, advising investors that "[w]e have established a reserve in the consolidated financial statements for potential losses that are that are considered to be both probable and reasonably estimable related to the mortgage loans sold by our originating subsidiaries," including Chevy Chase Bank. Indeed, in its 2009 Form 10-K, Capital One Financial Corporation disclosed that Capital One, National Association, "as successor to Chevy Chase Bank," may be liable to investors who purchased securitized Chevy Chase loans, "in the event that there was improper underwriting or fraud, or in the event that the loans become delinquent shortly after they are originated." Capital One Financial Corporation further disclosed:

> [W]e may be exposed to credit risk associated with sold loans. We have established a reserve in the consolidated financial statements for potential losses that are considered to be both probable and reasonably estimable related to the mortgage loans sold by our originating subsidiaries. The adequacy of the reserve and the ultimate amount of losses incurred will depend on, among other things, the actual future mortgage loan performance, the actual level of future repurchase and indemnification requests, the actual success rate of claimants, developments in Company and industry litigation, actual recoveries on the collateral, and macroeconomic conditions (including unemployment levels and housing prices). Due to uncertainties relating to these factors, we cannot reasonably estimate the total amount of losses that will actually be incurred as a result of our subsidiaries' repurchase and indemnification obligations, and there can be no assurance that our reserves will be adequate or that the total amount of losses incurred will not have a material adverse effect upon the Company's financial condition or results of operations. For additional information related to the Company's mortgage loan operations, mortgage loan repurchase and indemnification obligations and related reserves, see Item 7 "Management Discussion and Analysis of Financial Conditions and Results of Operations – Valuation of Representation and Warranty Reserve"

161. In its 2009 10-K, Capital One Financial Corporation described the accounting treatment of the transaction, including assumption of liabilities, as follows:

> The Chevy Chase Bank acquisition is being accounted for under the acquisition method of accounting following the provisions of ASC 805-10/SFAS No. 141(R). . . . ASC 805-10/SFAS No. 141(R) requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, at their fair values as of that date, with limited exceptions, thereby replacing SFAS 141's cost-allocation process. This Statement also changes the requirements for recognizing acquisition related costs, restructuring costs, and assets acquired and liabilities assumed arising from contingencies.
>
> Accordingly, the purchase price was allocated to the acquired assets and liabilities based on their estimated fair values at the Chevy Chase Bank acquisition date, as summarized in the table below. Initial goodwill of $1.1 billion was calculated as the purchase premium after adjusting for the fair value of net assets acquired. Throughout 2009, the Company continued the analysis of the fair values and purchase price allocation of Chevy Chase Bank's assets and liabilities which resulting in purchase accounting adjustments and an increase to goodwill of $510.9 million. Goodwill of $1.6 billion represents the value expected from the synergies created through the scale, operational and product enhancement benefits that will result from combining the operations of the two companies. The change was predominantly related to a reduction in the fair value of net loans at the acquisition date. As of December 31, 2009, the Company has completed the analysis and considers purchase accounting to be final and the Company has

recast previously presented information as if all adjustments to the purchase price allocation had occurred at the date of acquisition.

162. Capital One Financial Corporation and Capital One, National Association have completed de facto and actual mergers with Controlling Person Chevy Chase F.S.B. and its subsidiaries, including Depositor/Issuer Defendant Chevy Chase Funding LLC, by absorbing Chevy Chase F.S.B. and those entities controlled by it into Capital One Financial Corporation and Capital One, National Association's own operations. Capital One Financial Corporation and Capital One, National Association are the successors in liability to Chevy Chase F.S.B. and its subsidiaries, including Depositor/Issuer Defendant Chevy Chase Funding LLC, and is jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants and entities alleged herein, including the liability with respect to the Certificates. Accordingly, the Bank seeks to recover any damages it is awarded against Chevy Chase F.S.B. and its subsidiaries, including Depositor/Issuer Defendant Chevy Chase Funding LLC, from Capital One Financial Corporation and Capital One, National Association.

4. Successor Defendant DB Structured Products, Inc. (MortgageIT Holdings)

163. On or about July 11, 2006, Controlling Person MortgageIT Holdings, Inc. was acquired by and merged with and into Successor Defendant DB Structured Products, Inc. through a wholly owned subsidiary formed solely for the purpose of the merger. DB Structured Products, Inc. acquired MortgageIT Holdings, Inc. and its wholly owned subsidiaries, MortgageIT, Inc. and MortgageIT Securities Corp. In this transaction, DB Structured Products, Inc. acquired substantially all of the assets and responsibility for all pre-merger liabilities of MortgageIT Holdings, Inc. and its subsidiaries. *See* Agreement and Plan of Reorganization Dated as of July 11, 2006 among DB Structured Products, Inc., Titan Holdings Corp., Titan Acquisition Corp., and MortgageIT Holdings, Inc.

164. In its July 12, 2006 announcement of the transaction, Deutsche Bank AG, the parent of DB Structured Products, Inc., stressed the financial and operational benefits of the agreement, such as the loan origination capacities of MortgageIT, Inc., which originated $29.2 billion in loans in 2005. DB Structured Products, Inc. promptly integrated the operations of MortgageIT, Inc. into its Residential Mortgage Backed Securities business, part of its Corporate Banking and Securities line of business:

> This acquisition is expected to be earnings accretive in 2007 and will add significant platform scale and synergies to Deutsche Bank's existing US residential mortgage franchise. It is a key element of the Bank's build-out of a vertically integrated mortgage origination and securitization platform.
>
> . . . .
>
> . . . In 2005, MortgageIT grew its loan originations approximately 124% over 2004, to $29.2 billion, and is one of the fastest-growing and largest residential mortgage loan originators in the US.
>
> . . . .
>
> Upon closing, the operating company, MortgageIT, Inc., will become a part of Deutsche Bank's Residential Mortgage Backed Securities (RMBS) business, which is based in New York. Deutsche Bank's acquisition of MortgageIT is the latest in a series of steps taken to significantly increase its presence in the US mortgage markets.

165. Anshu Jain, head of Global Markets for Deutsche Bank, expressed confidence in that press release that "[t]he MortgageIT team ha[d] built an outstanding business." He stated: "[W]e are extremely pleased to have them join our effort as we continue to expand our mortgage securitization platform in the US and globally."

166. The acquisition and incorporation of the lending practices of MortgageIT represented a significant risk. In Deutsche Bank's Form 6-K filed on April 3, 2008, Deutsche Bank disclosed that, as of December 2007, it had taken on $12.67 billion worth of exposure in its residential mortgage-backed security business—and that this exposure was primarily due to the

acquisition of MortgageIT. Deutsche Bank thereafter announced that it was closing the retail operations and scaling down the wholesale operations of MortgageIT, and on December 11, 2008, Deutsche Bank issued a statement announcing the closure of MortgageIT's remaining wholesale lending operations.

167. DB Structured Products Inc. has completed actual and de facto mergers with Mortgage IT Holdings, Inc. and its subsidiaries, including Sponsor and Controlling Person Defendant MortgageIT, Inc. and Depositor/Issuer Defendant MortgageIT Securities Corp., by absorbing MortgageIT Holdings, Inc. and those entities controlled by it, including MortgageIT, Inc. and MortgageIT Securities Corp. into the operations of DB Structured Products, Inc. DB Structured Products, Inc. is the successor in liability to MortgageIT Holdings, Inc. and its subsidiaries, including MortgageIT, Inc. and MortgageIT Securities Corp., and is jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants and entities. Accordingly, the Bank seeks to recover any damages it is awarded against Mortgage IT Holdings, Inc. and its subsidiaries, including MortgageIT, Inc. and MortgageIT Securities Corp., from DB Structured Products, Inc.

5. Successor Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated (Banc of America Securities LLC).

168. As noted in § IV.B, *supra*, effective November 1, 2010, Banc of America Securities LLC merged with and into Successor Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated, a Delaware corporation. All references herein to Banc of America Securities LLC are also to Merrill Lynch, Pierce, Fenner & Smith Incorporated, which is liable as a matter of law as successor to Banc of America Securities LLC by virtue of its status as the surviving entity in its merger with Banc of America Securities LLC.

6. Successor Defendant Morgan Stanley Mortgage Capital Holdings LLC (Morgan Stanley Mortgage Capital Inc.).

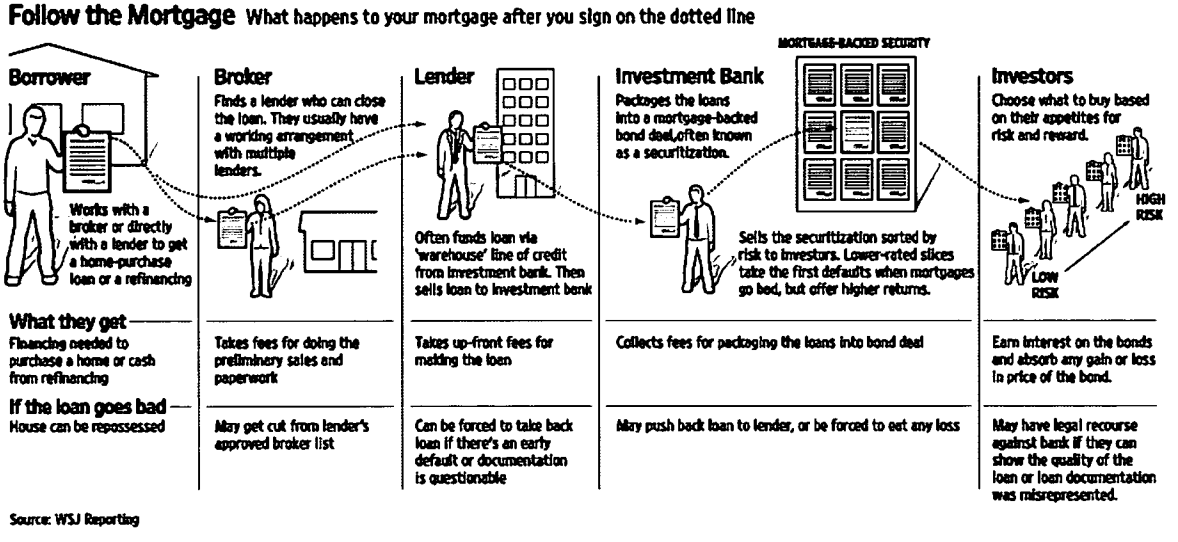
169. As noted in § IV.B, *supra*, effective June 17, 2007, Morgan Stanley Mortgage Capital Inc. merged with and into Successor Defendant Morgan Stanley Mortgage Capital Holdings LLC, a New York limited liability company that is registered to do business in Massachusetts. Since the merger, Morgan Stanley Mortgage Capital Holdings LLC has continued the business of Morgan Stanley Mortgage Capital Inc. All references herein to Morgan Stanley Mortgage Capital Inc. are also to Morgan Stanley Mortgage Capital Holdings LLC, which is liable as a matter of law as successor to Morgan Stanley Mortgage Capital Inc. by virtue of its status as the surviving entity in its merger with Morgan Stanley Mortgage Capital Inc.

D. The John Doe Defendants

170. Defendants John Doe 1-50 are other Depositor/Issuers, Underwriters, and/or others who are jointly and severally or otherwise liable for the misstatements, omissions, and other wrongful conduct alleged herein, including the liability with respect to the Certificates. The John Doe Defendants may include persons or entities that are not named as defendants at this time because Plaintiff has insufficient information as to the extent, if any, of their involvement in and liability for the matters alleged herein. Plaintiff will amend this Complaint to allege the true names and capacities of these defendants when ascertained.

E. Summary Charts of Defendants and Certificates

171. Summary Charts of the Defendants, and the Certificates with which they are associated, are included in Appendices XI through XVII.



V. FACTUAL BACKGROUND

A. The Creation of Mortgage-Backed Securities.

1. The Securitization Process

172. The PLMBS purchased by the Bank were created in a process known as "mortgage securitization." Mortgage securitization is an end-to-end process by which mortgage loans are acquired from "mortgage originators," pooled together, and securities constituting interests in the cash flow from the mortgage pools are then sold to investors. The securities are referred to as "mortgage pass-through certificates" because the cash flow from the pool of mortgages is "passed through" to the certificate holders when payments are made by the underlying mortgage borrowers.

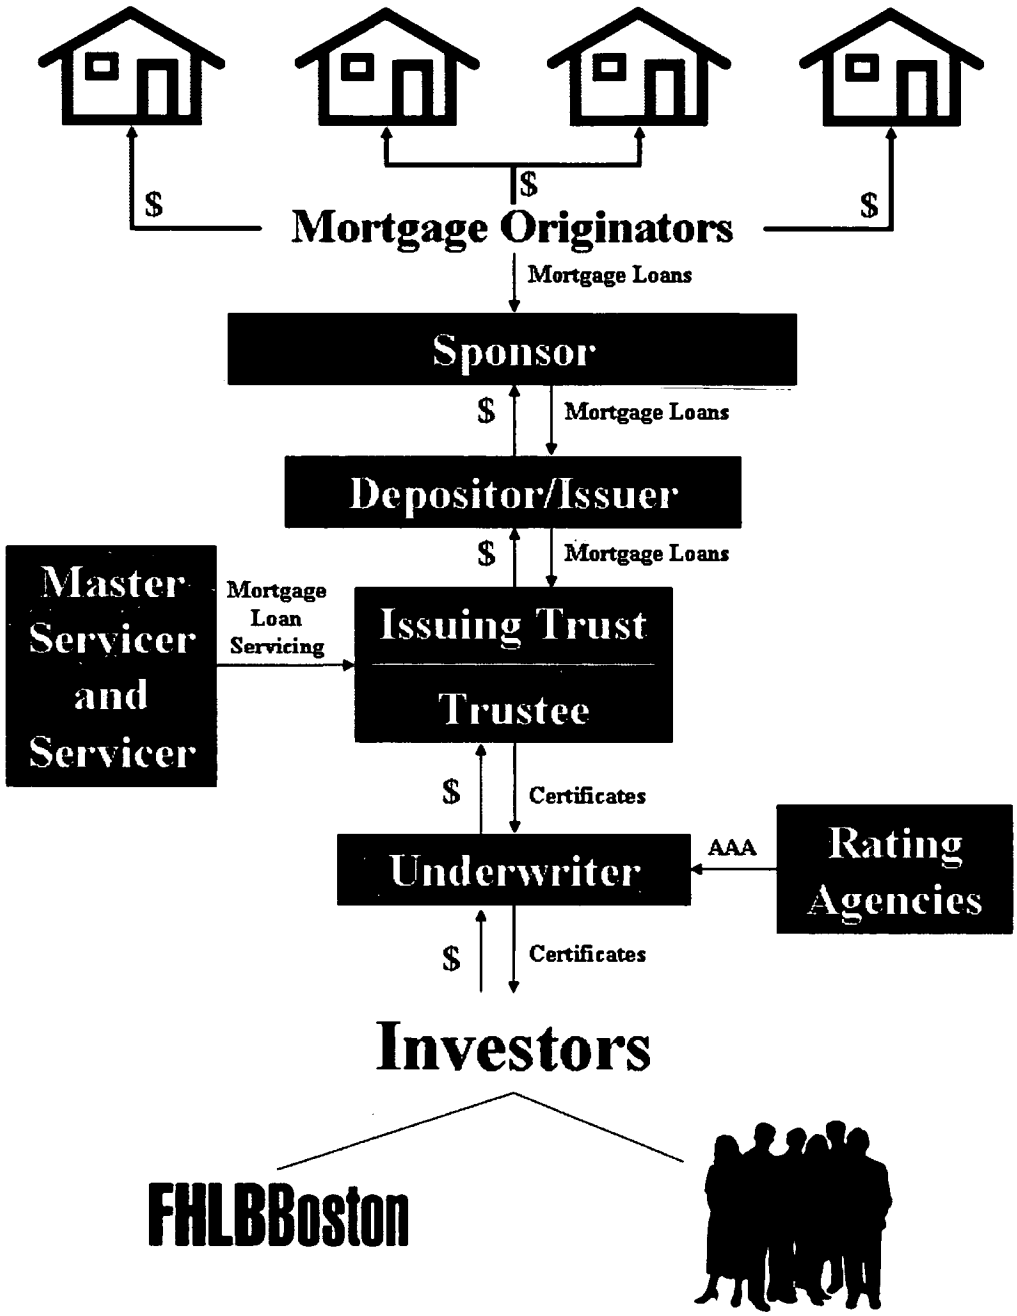
173. The following graphic illustrates the securitization process:

174. Securitization involves several entities who perform distinct tasks, though, as was the case here, many or all of the entities in a securitization may be subsidiaries or affiliates of a single parent or holding company.

175. The first step in creating a mortgage pass-through security such as the PLMBS purchased by the Bank is the acquisition by a "**Depositor**" or "**Depositor/Issuer**" of an

inventory of loans from a "**Sponsor**" or "**Seller**" which organizes and initiates these PLMBS transactions by acquiring the loans from its own origination unit or from other mortgage originators in exchange for cash, and participates in marketing and selling the securities to investors, including the Bank. The Depositor/Issuer is often a subsidiary or other affiliate of the Sponsor, and indeed, each Depositor/Issuer Defendant named herein was an affiliate of the Sponsor, and often also of at least one originator of mortgage loans underlying that security. *See infra* § V.D.1. Plaintiff believes and alleges that each Depositor/Issuer named herein was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization.

176. The Depositor then securitizes the pool of loans by forming one or more mortgage pools with the inventory of loans, and creating tranches of interests in the mortgage pools with various levels of seniority. Interests in these tranches are then issued by the Depositor (who then serves as the Issuer) through a trust in the form of bonds, or Certificates. The Depositor/Issuer Defendants, which securitized these PLMBS, were the "issuers" of the securities.[7]



177. Each tranche has a different level of purported risk and reward, and, often, a different rating. The most senior tranches typically receive the highest investment-grade rating, triple A. Junior tranches, which usually have lower ratings, are more exposed to risk, but offer higher potential returns. The most senior tranches of Certificates often are retired faster than the more junior, or subordinate, tranches, by redirecting all or part of the collateral's principal repayments from junior tranches up to the senior tranches. Conversely, losses on the underlying loans in the asset pool—whether due to default, delinquency, or otherwise—are allocated first to

[7] *See* 17 C.F.R. § 230.191 ("The depositor for the asset-backed securities acting solely in its capacity as depositor to the issuing entity is the issuer for purposes of the asset-backed securities of that issuing entity.").

the most subordinate or junior tranche of Certificate, then to the tranche above that. This hierarchy in the division of cash flows is referred to as the "flow of funds" or "waterfall."

178. The Depositor/Issuer and/or Sponsor worked with one or more of the nationally-recognized credit rating agencies—here, one or more of the Rating Agency Defendants—to ensure that each tranche of the Certificate received the rating desired by the Securities Defendants. For PLMBS, this meant a triple-A rating for the senior tranche, and lower ratings for the subordinated tranches. Triple-A ratings are provided where the credit rating agency purports to determine that the tranche has the necessary level of credit support. Once the asset pool is securitized, the Certificates are placed with one or more "**Underwriters**" who resell them to investors, such as the Bank.

179. The following diagram identifies in basic terms the entities involved in the creation and sale of PLMBS:

2. Defendants' Access to Loan Files and Due Diligence Obligations.

180. Because the cash flow from the loans in the mortgage pool of a securitization is the source of funds to pay the holders of the Certificates issued by the trust, the credit quality of

the Certificates depends largely on the credit quality of the loans in the mortgage pool. The collateral pool for each PLMBS often includes thousands of loans. Detailed information about the credit quality of the loans is supposed to be contained in the "loan files" developed and maintained by the mortgage originators when making the loans. For residential mortgage loans, such as the loans that backed the PLMBS purchased by the Bank, loan files contain documents such as the borrower's application for the loan; verification of income, assets, and employment; references; credit reports; an appraisal of the property that will secure the loan and provide the basis for other measures of credit quality, such as loan-to-value ratios ("LTVs"); and occupancy status. The loan file also generally includes notes from the person who underwrote the loan describing the loan's purported compliance with underwriting guidelines, and documentation of "compensating factors" that justified any departure from those standards.

181. When evaluating whether to purchase PLMBS, investors such as the Bank do not have access to the loan files. Only the Sponsors, Depositors/Issuers, and the Underwriters, together with the trustees and/or servicers, are in a position to have access to the loan files. Consequently, the Sponsors, Depositor/Issuers, and the Underwriters who draft and sign the Offering Documents, and who sell the PLMBS to investors like the Bank, are responsible for gathering and verifying information about the credit quality and characteristics of the loans that are deposited into the trust, and presenting summaries of this information in prospectuses or other offering documents that are prepared for potential investors. This due diligence process is a critical safeguard for investors and a fundamental legal obligation of the Sponsors, the Depositor/Issuers and the Underwriters. Accordingly, the due diligence process supposedly performed by Securities Defendants was critical to the Bank's decision to purchase the Certificates. As discussed in more detail below, the Defendants did not use their access to the

loan files in order to ferret out defective loans or to provide an accurate assessment to the Bank regarding the quality and characteristics of the loans.

3. The Rating Process for PLMBS

182. Like many institutional investors, the Bank was permitted to buy only triple-A-rated securities. Accordingly, the credit ratings of the tranches of PLMBS were material to the Bank's decision to purchase the Certificates.

183. In any PLMBS, the credit rating of each tranche is negotiated between the Depositor/Issuer of the Certificates and the credit rating agencies. In this process, the Depositor/Issuer and/or the Sponsor and Underwriters provide the credit rating agency with information about the credit quality and characteristics of the loans that are deposited into the trust.

184. The credit rating agency is then supposed to evaluate, among other things:

A. The appraised value of the mortgaged property.

B. The mortgagor's ability to pay.

C. The experience and underwriting standards of the originators of the underlying loans.

D. The loan characteristics that, according to the Depositor/Issuer, underlie a particular transaction.

E. The default rates and historic recovery rates of the loans.

F. The *concentration* of the loans along a number of variables, which typically include—to name just a few—the extent to which the loans come from any particular geographic area, the extent to which the mortgagors have low FICO scores[8] or

[8] A FICO score is a score developed by the Fair Isaac Corporation to assess consumer credit risk; it is the most widely used credit score in the United States.

other indications of low credit quality, and the extent to which the loans were "low-document" or "no-document" loans.

G. The ability of the servicer to perform all the activities for which the servicer will be responsible.

H. The extent to which the cash flow from trust assets can satisfy all of the obligations of the PLMBS transaction. The cash flow payments which must be made from the asset pool are interest and principal to investors, servicing fees, and any other expenses for which the Depositor/Issuer is liable. The credit rating agencies are supposed to stress-test the flow of funds to determine whether the cash flows match the payments that are required to be made to satisfy the Depositor/Issuer's obligations.

185. After evaluating these objective and verifiable factors, the credit rating agency issues a rating for the security. This rating constitutes a factual representation regarding the risk of the security made in reliance on objectively verifiable facts, including those listed immediately above. The rating should therefore be a reflection of both the riskiness of the loans in the asset pool and the seniority of the tranche. If the rating that the credit rating agency assigns to the tranche is not in accord with the Sponsor's target, then the Depositor/Issuer may "credit enhance" the structure. Such credit enhancement may include:

A. Adjusting the level of support provided by subordinate tranches.

B. Overcollateralization—that is, ensuring that the aggregate principal balance of the mortgages securing the Certificates exceeds the aggregate principal balances of the Certificates secured thereby.

C. Cash reserve accounts.

D. Excess spread, which is defined as scheduled cash inflows from the mortgages that exceed the interest service requirements of the related Certificates.

E. Third-party contracts, under which losses suffered by the asset pool are absorbed by an insurer or other counterparty.

186. By using credit enhancement, a Depositor/Issuer may be able to elevate a bond to the highest credit rating.

187. All of the Certificates that the Bank purchased were senior Certificates that were rated triple A when the Bank purchased them.

B. The Mortgage Originators Abandoned Underwriting and Appraisal Standards and Engaged in Predatory Lending.

1. The Shift from "Originate to Hold" to "Originate to Distribute" Securitization Encouraged Mortgage Originators to Disregard Loan Quality.

188. As noted above, the fundamental basis upon which mortgage pass-through Certificates are valued is the ability of the borrowers to repay the principal and interest on the underlying loans and the adequacy of the collateral for those loans. If the borrowers cannot pay, and the collateral is insufficient, the cash flow from the Certificate diminishes, and the investors are exposed to losses. For this reason, the underwriting standards and practices of the mortgage originators who issued loans that back PLMBS—and the representations in the Offering Documents regarding those standards—are critically important to the value of the Certificates and an investor's decision to purchase the Certificates.

189. Yet, unbeknownst to the Bank, during the period that the Bank purchased the PLMBS, mortgage originators, including those affiliated with the Securities Defendants, were motivated by the financial rewards of securitization to: (a) effectively abandon their stated underwriting standards; (b) allow pervasive and systematic exceptions to their stated underwriting standards without proper justification; (c) disregard credit risk and quality controls

in favor of generating loan volume; (d) pressure and coerce appraisers to inflate their collateral valuations in order to permit loans to close; and (d) engage in predatory lending practices. As has only become clear recently, this was the result of a fundamental shift in the mortgage securitization markets.

190. Historically, mortgage originators held on to the mortgage loans they provided to borrowers through the term of the loan. Originators would therefore profit from the obligor's payment of interest and repayment of principal, but also bear the risk of loss if the obligor defaulted and the property value was insufficient to repay the loan. The originator had an economic incentive to establish the creditworthiness of the obligor and the true value of the underlying property.

191. As mortgage securitization emerged in the 1980s and 1990s, it generally fell within the domain of GSEs Fannie Mae and Freddie Mac. Fannie Mae and Freddie Mac purchased loans from originators, securitized them, and sold them to investors. Investors in these early GSE securitizations were provided protections because the underlying loans were originated pursuant to strict underwriting guidelines imposed by Fannie Mae and Freddie Mac, and these entities guaranteed that the investors would receive timely payments of principal and interest. Because Fannie Mae and Freddie Mac were perceived as being backed by the federal government, investors viewed the guarantees as diminishing credit risk, if not removing it altogether.

192. Between 2001 and at least 2006, however, Wall Street investment banks and other large financial institutions moved aggressively into the securitization markets, taking market share away from the GSEs. Unlike the GSEs, which focused on "prime" mortgage pools, the Wall Street banks and large financial institutions focused primarily on "Alt-A" and "subprime"

mortgage pools because of the higher fees that were available. "Alt-A" mortgage loans were loans that allegedly met the credit score and other underwriting criteria of the GSEs, but were ineligible for GSE purchase either because the mortgages exceeded the applicable GSE dollar limit, were supported by reduced documentation, or contained disqualifying terms, such as certain types of adjustable rates. "Subprime" mortgage loans were mortgages that did not meet the GSE criteria for creditworthiness of the borrower but purportedly satisfied loan underwriting criteria developed by their originators.

193. As the Financial Crisis Inquiry Commission (often, "FCIC") reported in April 2010, "[t]he amount of all outstanding mortgages held in [PLMBS] rose notably from only $670 billion in 2004 to over $2,000 billion in 2006." This statistic demonstrates the dramatic growth of the PLMBS market during this time. FCIC, *Preliminary Staff Report: Securitization and the Mortgage Crisis* 12 (Apr. 7, 2010).

194. This enormous increase in PLMBS securitization is reflected in the securitization volume of the Depositors/Issuers of the PLMBS purchased by the Bank. For example, between 2003 and 2005, the Bear Stearns entities' securitizations of Alt-A mortgages more than tripled, from $6.7 billion to $22.9 billion, and its subprime securitizations increased from $0.8 billion to $13.5 billion (a 1675% increase). This growth was fueled in large part by the growth of EMC Mortgage Corporation, whose loan volume grew sevenfold between 2000 and 2006. Other Sponsors—large financial institutions and Wall Street banks—similarly expanded their securitization business during the same period.

195. This increase was fueled by the complex interaction between record high global savings, referred to by Federal Reserve Chairman Ben Bernanke as the "global savings glut," and exceedingly low interest rates. Low interest rates made it easier and more appealing for

consumers to take out home mortgage loans. But the low Federal Reserve rate also meant that the global pool of investors received only marginal returns on traditional low-risk investments, in particular U.S. Government Bonds. This created an incentive for financial institutions to create seemingly low-risk investment options that produced returns in excess of those of government bonds. PLMBS securitization was their answer. Thus, following the model created by the GSEs, the large financial institutions began buying pools of mortgages from mortgage originators, securitizing the pools, and selling the securities to global investors. Because mortgage interest rates (and even more so Alt-A and subprime rates) generally exceeded those of U.S. Government bonds, the resulting PLMBS could provide investors with the higher rate of return they were seeking.

196. One complication that the investment banks needed to solve was the rating of the Certificates. Debt securities secured by pools of mortgages made to lower credit quality borrowers would generally fail to meet the investment-grade requirements of most institutional investors. The financial institutions' solution was to structure the financings through the creation of tranches as discussed above. As a general rule, the result was that up to 80% of any particular PLMBS would receive an "investment-grade" rating. The remaining 20% was often purchased by hedge funds and other entities that were able to buy non-investment-grade Certificates. This development opened the floodgates for the securitization and sale of PLMBS.

197. To ensure that the flood of securitizations and sale of PLMBS did not abate, the financial institutions bankrolled the lenders (both the ones they owned and those that were independent) so that the lenders had ample capital to issue loans. Indeed, a recent study by the Center for Public Integrity found that 21 of the top 25 subprime lenders in terms of loan volume were either owned outright by the biggest banks or former investment houses, or had their

subprime lending financed by those banks, either directly or through lines of credit. *See Who Is Behind the Financial Meltdown: The Top 25 Subprime Lenders and Their Wall Street Backers*, The Center for Public Integrity (May 6, 2009), http://www.publicintegrity.org/investigations/economic_meltdown/.

198. As the PLMBS market expanded, the traditional "originate to hold" model morphed into the "originate to distribute" model. Under the new "originate to distribute" model, mortgage originators no longer held the mortgage loans to maturity. Rather, mortgage originators sold the loans to Wall Street banks and other major financial institutions and shifted the risk of loss to the investors who purchased an interest in the securitized pool of loans.

199. The new distribution model was highly profitable for the mortgage originators in the short term. By securitizing and selling pools of these mortgages to investors through Underwriters, the mortgage originators shifted loans and credit risk off their books, earned fees and, thus, were able to issue more loans. Additionally, the securitization process enabled the originators to earn most of their income from transaction and loan-servicing fees, rather than (as in the traditional model) from the spread between interest rates paid on deposits and interest rates received on mortgage loans. This created an unchecked incentive to originate more and more loans to feed into the securitization machine.

200. In testimony before the FCIC, Sheila C. Bair, Chair of the Federal Deposit Insurance Corporation, explained both the misalignment of incentives arising from the sale of loans and the misalignment created by flawed compensation practices within the origination industry:

> The standard compensation practice of mortgage brokers and bankers was based on the volume of loans originated rather than the performance and quality of the loans made. From the underwriters' perspective, it was not important that consumers be able to pay their mortgages when interest rates reset, because it was

> assumed the loans would be refinanced, generating more profit by ensuring a steady stream of customers. The long-tail risk posed by these products did not affect mortgage brokers and bankers' incentives because these mortgages were sold and securitized.

201. The Attorney General for the Commonwealth of Massachusetts came to the same conclusion when she issued the results of her investigation into the subprime mortgage industry, *The American Dream Shattered: The Dream of Homeownership and the Reality of Predatory Lending* ("The Massachusetts Attorney General Predatory Lending Report"). This report explains:

> Historically, the vast majority of home mortgages were written by banks which held the loans in their own portfolios, knew their borrowers, and earned profit by writing good loans and collecting interest over many years. Those banks had to live with their "bad paper" and thus had a strong incentive to avoid making bad loans. In recent years, however, the mortgage market has been driven and funded by the sale and securitization of the vast majority of loans. Lenders now frequently make mortgage loans with the intention to promptly sell the loan and mortgage to one or more entities. . . . The lenders' incentives thus changed from writing good loans to writing a huge volume of loans to re-sell, extracting their profit at the front end, with considerably less regard to the ultimate performance of the loans.

202. Similarly, as reported in the *Seattle Times*, executives at Washington Mutual (also termed "WaMu" in reference to Washington Mutual Bank and its parent corporation, Washington Mutual, Inc.), an originator of loans underlying some of the Bank's Certificates, recognized and responded to the same incentive.

> Now it [WaMu] began bundling ARMs [adjustable rate mortgages] and certain other mortgages into securities and selling them off—pocketing hundreds of millions of dollars in fees immediately, while offloading any potential repayment problems. . . . [At this time WaMu CEO] Killinger hired Craig Davis, American's director of mortgage origination, to run WaMu's lending and financial services. Davis, several former WaMu executives said, began pushing WaMu to write more adjustable-rate mortgages, especially the lucrative option ARMs. "He only wanted production," said Lee Lannoye, WaMu's former executive vice president of corporate administration. "It was someone else's problem to worry about credit quality, all the details."

Drew DeSilver, *Reckless Strategies Doomed WaMu*, Seattle Times, Oct. 25, 2009, at A1 (hereinafter DeSilver, *Reckless*, Seattle Times).

203. The statements above provide support for the argument that, as far as lenders were concerned, their profits were generated by origination of as many loans as possible, and once these loans were packaged and securitized, repayment risk was someone else's problem.

204. As Ben Bernanke, Chairman of the Federal Reserve Board, explained in Congressional testimony:

> When an originator sells a mortgage and its servicing rights, depending on the terms of the sale, much or all of the risks are passed on to the loan purchaser. Thus, originators who sell loans may have less incentive to undertake careful underwriting than if they kept the loans. Moreover, for some originators, fees tied to loan volume made loan sales a higher priority than loan quality. This misalignment of incentives, together with strong investor demand for securities with high yields, contributed to the weakening of underwriting standards.

2. Mortgage Originators Abandoned Underwriting Guidelines to Create Loans for Securitization.

205. The misalignment of incentives following the shift to the "originate to distribute" model caused mortgage originators to violate their stated underwriting and appraisal standards, and to accept, encourage and even fabricate their own untrue information from loan applicants. This was not a problem limited to one or a few mortgage originators, but rather—contrary to the incessant touting of "quality underwriting" by mortgage originators during this period—was pervasive among the mortgage originators at issue here. Mortgage originators and the financial institutions that bankrolled them sought loan volume, not loan quality, to profit from the securitization market.

206. In addition, coincident with the widespread transfer of mortgage default risk to purchasers of mortgage-backed securities, mortgage originators expanded the practice of originating highly risky nontraditional loans. In a marked departure from traditional mortgage

origination procedures, originators offered a variety of reduced documentation programs in which the verification or substantiation of the applicants' statements of income, assets and employment history was limited or non-existent. While these programs were touted as providing for "streamlined" but nonetheless effective underwriting, the programs—unbeknownst to the Bank—enabled originators to make loans to unqualified borrowers. When these defective loans were securitized, investors including the Bank were assured that reduced documentation programs were available only where the borrower satisfied certain criteria, such as FICO scores, LTVs, and/or debt-to-income ratios ("DTIs"). In fact, the originators lacked any principled basis on which to evaluate the increased credit risk posed by what would eventually become colorfully and generally accurately known as "Liar Loans," or "NINJA" (for "no income, no job or assets") loans. Moreover, the widespread granting of exceptions to underwriting standards without legitimate compensating factors meant that the minimal safeguards associated with the reduced documentation programs were often abandoned in the headlong rush to maximize origination volume. Additionally, mortgage underwriters would often begin the underwriting of an applicant's loan under full documentation procedures, only to transfer the loan applicant to a "No Doc" program upon learning of information that would disqualify the applicant under the full documentation procedures.

207. John C. Dugan, Acting Comptroller of the Currency, described for the FCIC the consequences of these poor underwriting practices:

> The combination of all the factors I have just described produced, on a nationwide scale, the worst underwritten mortgages in our history. When house prices finally stopped rising, borrowers could not refinance their way out of financial difficulty. And not long after, we began to see the record levels of delinquency, default, foreclosures, and declining house prices that have plagued the United States for the last two years—both directly and through the spillover effects to financial institutions, financial markets, and the real economy.

3. Mortgage Originators Manipulated Appraisals of Collateralized Real Estate to Create Loans for Securitization.

208. Accurate appraisals prepared in accordance with established appraisal standards are essential for PLMBS investors to evaluate the credit risk associated with their investment. Indeed, an accurate appraisal is necessary to calculate an accurate LTV, which is the ratio of the amount of the mortgage loan to the lower of the appraised value or the sale price of the mortgaged property when the loan is made. The LTV is strongly indicative of the borrowers' likelihood of defaulting. As a borrower's equity decreases and the corresponding LTV increases—and particularly when equity drops to less than 10% of the property's value and LTVs are greater than 90%—the borrower's incentive to keep the mortgage current, or to maintain the collateral in good condition, decreases dramatically. Consequently, aggregate LTV calculations are among the most significant characteristics of a mortgage pool because LTVs both define the extent of the investor's "equity cushion" (*i.e.*, the degree to which values may decline without the investor suffering a loss), and are strongly indicative of a borrower's incentive to pay. In the absence of properly prepared appraisals, the value component of the LTV is unreliable and misleading. The appraisal practices of the mortgage originators who issued loans that back PLMBS, and the accuracy of the representations in the Offering Documents regarding those practices, therefore, were critically important to the value of the Certificates, and to the investors' decisions to purchase the Certificates.

209. Appraisers are governed by the Uniform Standards of Professional Appraisal Practice ("USPAP"), which are promulgated by the Appraisal Standards Board. The USPAP contain a series of ethical rules designed to ensure the integrity of the appraisal process. For example, the USPAP Ethics Conduct Rule provides: "An appraiser must perform assignments

with impartiality, objectivity, and independence, and without accommodation of personal interests."

210. The USPAP Ethics Conduct Rule states: "An appraiser must not accept an assignment that includes the reporting of predetermined opinions and conclusions."

211. The USPAP Ethics Management Rule states:

> It is unethical for an appraiser to accept an assignment, or to have a compensation arrangement for an assignment, that is contingent on any of the following:
>
> 1. the reporting of a predetermined result;
> 2. a direction in assignment results that favors the cause of a client;
> 3. the amount of a value opinion;
> 4. the attainment of a stipulated result; or
> 5. the occurrence of a subsequent event directly related to the appraiser's opinions and specific to the assignment's purpose.

212. The USPAP Scope of Work Acceptability Rule states: "An appraiser must not allow the intended use of an assignment or a client's objectives to cause the assignment results to be biased."

213. The Appraisal Standards Board also issues Advisory Opinions regarding appropriate appraisal conduct. For example, Advisory Opinion 19 states in part:

> Certain types of conditions are unacceptable in any assignment because performing an assignment under such condition violates USPAP. Specifically, an assignment condition is unacceptable when it:
>
> - precludes an appraiser's impartiality because such a condition destroys the objectivity and independence required for the development of credible results;
> - limits the scope of work to such a degree that the assignment results are not credible, given the intended use of the assignment; or
> - limits the content of a report in a way that results in the report being misleading.

214. The USPAP Scope of Work Rule states: "For each appraisal . . . an appraiser must . . . determine and perform the scope of work necessary to develop credible assignment results."

215. Additionally, USPAP Standard 1 states: "In developing a real property appraisal, an appraiser must identify the problem to be solved, determine the scope of work necessary to solve the problem, and correctly complete research and analyses necessary to produce a credible appraisal."

216. USPAP Standards Rule 2-1 states that "[e]ach written or oral real property appraisal report must "(a) clearly and accurately set forth the appraisal in a manner that will not be misleading; (b) contain sufficient information to enable the intended users of the appraisal to understand the report properly; and (c) clearly and accurately disclose all assumptions, extraordinary assumptions, hypothetical conditions, and limiting conditions used in the assignment."

217. Despite the importance of accurate appraisals and the requirements that are designed to ensure them, during the time frame that the Bank purchased the PLMBS, the originators routinely manipulated the process for appraising the collateralized real estate properties. They did so by pressuring and coercing appraisers, and blacklisting those that would not "come back at value." The prevalence of this problem and its impact on the financial crisis has been extensively investigated and examined in the aftermath of the market collapse.

218. According to his statements submitted in connection with his April 7, 2010 testimony before the Financial Crisis Inquiry Commission, Richard Bitner, a former executive of a subprime lender for 15 years and author of the book *Confessions of a Subprime Lender*, explains:

> With the appraisal process highly susceptible to manipulation, lenders had to conduct business as though the broker and appraiser couldn't be trusted. . . . [E]ither the majority of appraisers were incompetent or they were influenced by brokers to increase the value. . . .
>
> . . . 25% of [the] appraisals that we initially underwrote were so overvalued they defied all logic. Throwing a dart at a board while blindfolded would've produced more accurate results.
>
> . . . .
>
> If the appraisal process had worked correctly, a significant percentage of subprime borrowers would've been denied due to lack of funds. Inevitably, this would have forced sellers to drop their exorbitant asking price to more reasonable levels. The rate of property appreciation experienced on a national basis from 1998 to 2006 was not only a function of market demand, but was due, in part, to the subprime industry's acceptance of overvalued appraisals, coupled with a high percentage of credit-challenged borrowers who financed with no money down.
>
> . . . .
>
> . . . [T]he demand from Wall Street investment banks to feed the securitization machine couple[d] with an erosion in credit standards led the industry to drive itself off the proverbial cliff.

Testimony of Richard Bitner at 9-10 (Apr. 7, 2010), *available at* http://fcic-static.law.stanford.edu/cdn_media/fcic-testimony/2010-0407-Bitner.pdf (last visited Apr. 15, 2011).

219. Alan Hummel, Chair of the Appraisal Institute's Government Relations Committee and Past President of the Appraisal Institute, testified before the Senate Committee on Banking that the dynamic between mortgage originators and appraisers created a "terrible conflict of interest" where appraisers "experience[d] systemic problems with coercion" and were "ordered to doctor their reports or else never see work from those parties again."

220. In testimony before the House Financial Services Committee, Subcommittee on Financial Institutions and Consumer Credit, Jim Amorin, President of the Appraisal Institute, testified similarly that:

> In recent years, many financial institutions have lost touch with fundamental risk management practices, including the separation between loan production and risk management. Unfortunately, parties with a vested interest in a transaction are often the same people managing the appraisal process within many financial institutions: a flagrant conflict of interest.
>
> . . . .
>
> Another coercion tactic is the threat of being placed on a "blacklist: (aka — "exclusionary appraiser list"), commonly used to blackball appraisers. It is one thing to maintain a list of reputable businesses to work with, or to maintain a list of firms to avoid as a result of poor performance. However, [it] is another to place an appraiser on a blacklist for refusal to hit a predetermined value.

221. Confirming the extent of the problem, a survey of 1,200 appraisers conducted by October Research Corp. found that 90% of appraisers reported that mortgage brokers and others pressured them to raise property valuations to enable deals to go through during the period at issue. The study also found that 75% of appraisers reported negative ramifications if they did not cooperate, alter their appraisal, and provide a higher valuation.

222. As a result of widespread appraisal abuse, in 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act, section 1472, amended Chapter 2 of the Truth in Lending Act, 15 U.S.C. §§ 1631 *et seq.*, to specifically prohibit actions that violate "appraisal independence." Under the new Act, acts or practices that violate appraisal independence include:

> (1) any appraisal of a property offered as security for repayment of the consumer credit transaction that is conducted in connection with such transaction in which a person with an interest in the underlying transaction compensates, coerces, extorts, colludes, instructs, induces, bribes, or intimidates a person, appraisal management company, firm, or other entity conducting or involved in an appraisal, or attempts, to compensate, coerce, extort, collude, instruct, induce, bribe, or intimidate such a person, for the purpose of causing the appraised value assigned, under the appraisal, to the property to be based on any factor other than the independent judgment of the appraiser;
>
> (2) mischaracterizing, or suborning any mischaracterization of, the appraised value of the property securing the extension of the credit;
>
> (3) seeking to influence an appraiser or otherwise to encourage a targeted value in order to facilitate the making or pricing of the transaction; and

(4) withholding or threatening to withhold timely payment for an appraisal report or for appraisal services rendered when the appraisal report or services are provided for in accordance with the contract between the parties.

223. All of the abuses targeted by the amended Truth in Lending Act were widespread during the time frame that the Bank purchased the PLMBS, and many of these abuses were in fact carried out by the originators, causing the appraisals of the collateralized real estate backing the PLMBS to be unreliable.

4. Mortgage Originators Engaged in Predatory Lending to Initiate Loans for Securitization.

224. Under state and federal predatory lending laws, predatory loans are characterized by excessively high interest rates or fees, and abusive or unnecessary provisions that do not benefit the borrower, including balloon payments, prepayment penalties, and underwriting that ignores a borrower's repayment ability. Moreover, according to the Office of the Comptroller of the Currency ("OCC"), "a fundamental characteristic of predatory lending is the aggressive marketing of credit to prospective borrowers who simply cannot afford the credit on the terms being offered." OCC Advisory Letter, Guidelines for National Banks to Guard Against Predatory and Abusive Lending Practices, AL 2003-2 at 2 (Feb. 21, 2003) ("OCC 2003 Predatory Lending Advisory Letter"). The Securities Defendants represented and warranted that the mortgage pools that backed the PLMBS purchased by the Bank did not contain predatory loans. This was critically important to the Bank because the Federal Home Loan Banks were precluded by regulation from purchasing any loan that was the result of predatory lending abuses. Accordingly, the Bank would not have purchased the PLMBS had it known that the Certificates were backed by predatory loans. The representations and warranties in the Offering Documents about the absence of predatory lending were false.

225. Predatory lending was part of the mortgage lenders' effort to increase volume at any cost. The Wall Street banks and other financial institutions that issued and underwrote PLMBS depended on a steady stream of higher interest subprime loans, which often were the result of predatory lending practices. As Federal Reserve Board Chairman Bernanke explained: "[a]lthough the high rate of delinquency has a number of causes, it seems clear that unfair or deceptive acts and practices by lenders resulted in the extension of many loans, particularly high-cost loans, that were inappropriate for or misled the borrower."

226. "The truth is that many of us in the industry were deeply distressed by the growing practice of pushing high risk loans on borrowers who had no reasonable expectation of being able to repay the mortgage. Disclosures were often less than adequate, and faced with a bewildering array of loan terms, borrowers tended to trust their mortgage banker or broker. . . . In our industry, we have frankly seen too much mortgage malpractice." Scott Stern, CEO of Lenders One, Testimony before the Senate Banking Committee.

227. Too often, mortgage loans were issued to "a borrower who ha[d] little or no ability to repay the loan from sources other than the collateral pledged," a predatory practice explicitly identified by the Expanded Guidance for Subprime Lending Programs issued by the OCC, the Board of Governors of the Federal Reserve System ("FRB"), the Federal Deposit Insurance Corporation ("FDIC"), and the Office of Thrift Supervision ("OTS"). The Expanded Guidance stated:

> Loans to borrowers who do not demonstrate the capacity to repay the loan, as structured, from sources other than the collateral pledged are generally considered unsafe and unsound. Such lending practices should be criticized in the Report of Examination as imprudent.

Expanded Guidance for Subprime Lending Programs at 11 (Jan. 31, 2001). Additionally, the OCC warned:

> When a loan has been made based on the foreclosure value of the collateral, rather than on a determination that the borrower has the capacity to make the scheduled payments under the terms of the loan, based on the borrower's current and expected income, current obligations, employment status, and other relevant financial resources, the lender is effectively counting on its ability to seize the borrower's equity in the collateral to satisfy the obligation and to recover the typically high fees associated with such credit. Not surprisingly, such credits experience foreclosure rates higher than the norm.
>
> [S]uch disregard of basic principles of loan underwriting lies at the heart of predatory lending . . . .

OCC 2003 Predatory Lending Advisory Letter at 2.

228. As detailed below, *see infra* § V.C, numerous investigations have revealed the extent of predatory lending by the entities that originated the loans underlying the Certificates.

229. The Massachusetts Attorney General Predatory Lending Report explains the ramifications of such predatory lending:

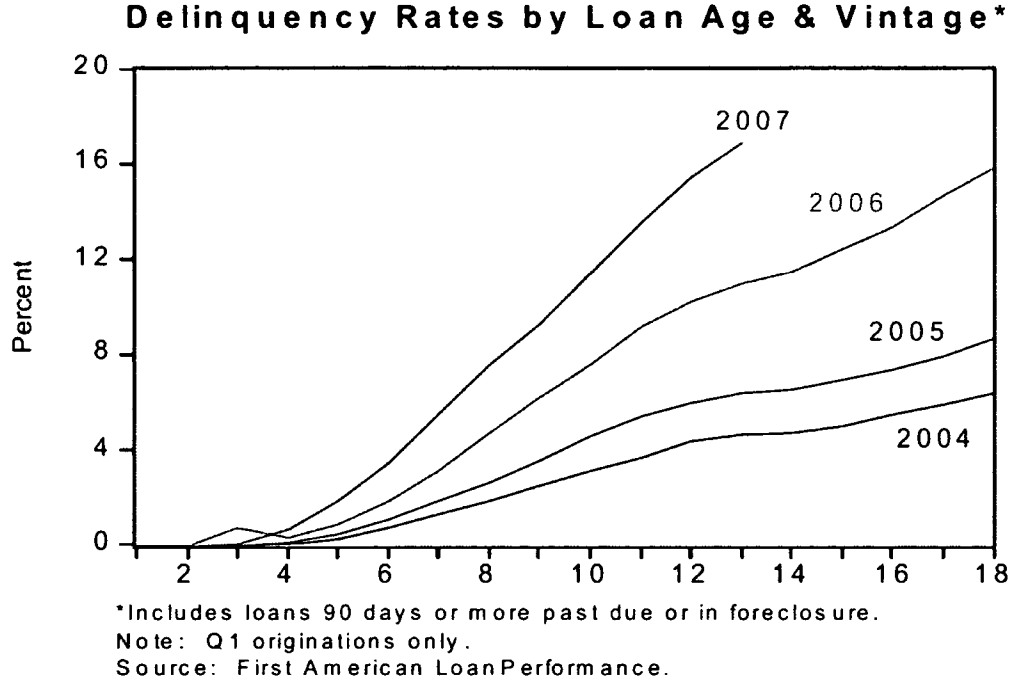
> Subprime ARM loans typically carry an artificially low, fixed interest rate for two or three years, sometimes called a "teaser" rate. That initial rate eventually adjusts to a higher, variable rate for the remaining term of the loan, causing monthly payments to increase, often dramatically. In recent years, many subprime lenders qualified borrowers based only on their ability to make payments during the "teaser" rate period, ignoring the fact that the borrowers would not be able to make payments when the rate adjusted upwards. As a result, many borrowers had to continually refinance. Borrowers were forced to obtain new loans, each one higher than the last, at increasingly high loan to value (LTV) ratios . . . . Exacerbating the effects of serial refinancing, subprime mortgages often carry burdensome prepayment penalties, as well as high transaction costs including lender and broker commissions and other fees. . . . [T]his cycle could continue only so long as home valuations continued to increase []. As soon as real estate prices flattened, however, homeowners—especially those who used high LTV loans—no longer had the same options when monthly payments began to adjust upward.

230. Singling out one specific common practice, the Report notes that "[w]hen lenders qualify borrowers for ARM loans based only on the 'teaser' rate period, that reflects an utter lack of diligence in determining whether the borrower could actually pay back the loan. This problem is systemic." According to the Report, this practice was permitted by lax underwriting standards

and apparently reached its peak in 2006 (though it also continued into 2007), and was directly in violation of the Interagency Guidance on Nontraditional Mortgage Product Risks issued in 2006, which stated that for "nontraditional" loans, "analysis of a borrower's repayment capacity should include an evaluation of their ability to repay the debt by final maturity at the fully indexed rate, assuming a fully amortizing repayment schedule." 71 Fed. Reg. 58,609, 58,614 (Oct. 4, 2006).

231. As FDIC Chairman Sheila C. Bair explained in her January 2010 testimony before the Financial Crisis Inquiry Commission:

> The well-publicized benefits associated with legitimate rate-reducing mortgage refinancing and rising housing prices conditioned consumers to actively manage their mortgage debt. An unfortunate consequence of this favorable environment for refinancing was fraud. Many consumers have only a limited ability to understand details of standard mortgage contracts let alone the complex mortgages that became common during this period. In this environment, unscrupulous mortgage providers capitalized on the widely advertised benefits associated with mortgage refinance, and took advantage of uninformed consumers by refinancing them into mortgage loans with predatory terms that were not readily transparent to many borrowers.



5. Widespread Defaults and Delinquencies Are the Inevitable Consequence of Loans Issued Without Meaningful Underwriting.

232. High payment defaults and delinquency rates are reflective of a systematic disregard for underwriting guidelines by mortgage originators. When effective underwriting occurs, poor credit risks are screened out. That is the purpose of underwriting. In the absence of effective underwriting, loans are made to unqualified borrowers and fraud is not detected. When borrowers are loaned money without regard to their ability to repay, loan delinquencies (and foreclosures) ensue. High delinquency rates in loans issued by an originator provide further evidence that the originator failed to adhere to prudent underwriting practices.

233. Academic studies have shown that the departure from sound underwriting practices that accompanied the explosion in securitizations contributed to substantial increases in early payment defaults and delinquencies. *See* Benjamin J. Keys et al., *Did Securitization Lead*

to Lax Screening? Evidence from Subprime Loans, 125 Q. J. Econ. 307 (2010) ("[W]e show that a doubling of securitization volume is on average associated with about a 10%-25% increase in defaults . . . within two years of origination . . . [and] a decline in screening standards . . . .").

234. Data collected on the performance of loans over the past several years and analyzed in these studies show that payment default and delinquency rates have in fact soared as a result of faulty underwriting. In the chart below, the X axis reflects months since issuance of the loan; the Y axis reflects the percentage of loans delinquent.

235. Review of current performance data of the loan pools backing the Bank's PLMBS similarly shows increased rates of default, delinquency and foreclosure, indicating pervasive underwriting failures by the mortgage originators who issued the loans backing the PLMBS. *See infra* ¶ 723. As of March 31, 2011, the rates of default, delinquency, and foreclosure for mortgage loans underlying the Bank's PLMBS are all in the double digits, and many are as high as 49 or 50%.

6. The Bank's Review of Loan Files Recently Provided by Certain Trustees Confirms that Underwriting Guidelines Were Abandoned.

236. As noted above, the Bank did not have access to loan files when it purchased these Certificates. However, as a financial institution, the Bank has certain post-purchase contractual rights to obtain from the trustees the loan files for certain of the Certificates. The Bank has sought to exercise this right, but has faced significant resistance from the trustees and Defendants to obtaining these loan files. For the most part, despite the Bank's demands, the trustees have refused to comply with their obligation to provide access to the loan files. However, after much wrangling, the Bank was able to obtain loan file information for two Certificates—one issued by Nomura, and the other by MortgageIT (a Deutsche Bank affiliate). The findings of the review of the loan files are startling. Despite the Defendants' representations regarding their due diligence review of the loan pools and confirmation that loans in the pools were issued pursuant to stated underwriting guidelines, the loan files demonstrate just the opposite.

237. The trustee for MHL 2006-1 1A2 (a MortgageIT issuance) provided the Bank with loan files for certain of the 855 loans in the pool. The Bank reviewed 113 loans. Of this number, a full one third (37) of the loans were identified by the Bank's third-party reviewer as exhibiting "obvious material and adverse breach" of the applicable representations and warranties. The trustee for NAA 2006-AF2 5A1 (a Nomura issuance) provided the Bank with loan files for certain of the 631 loans in the pool. The Bank reviewed 113 loans. Of this number, over half (60) of the loans were identified by the Bank's third-party reviewer as exhibiting "obvious material and adverse breach" of the applicable representations and warranties. The large number of defective loans in the loan pools strongly evidences the failure of the mortgage originators to apply their stated underwriting guidelines.

238. The material and adverse breaches documented with respect to some of the loan files are included in Section V.C, below, and in Appendix VIII.

C. Federal and State Investigations, Press Reports, Publicly Available Documents Produced in Other Civil Lawsuits, and Analysis of the Loan Pools Underlying the Certificates Identify Systematic Violation of Underwriting Guidelines, Appraisal Guidelines, and Predatory Lending by the Originators Whose Loans Back the PLMBS in this Case.

239. There have been numerous investigations into the practices of the mortgage originators who issued loans backing the PLMBS purchased by the Bank. A review of these investigations and related litigation, as well as confidential witness testimony obtained during the Bank's investigation, demonstrate that mortgage originators in general, and those that issued loans that backed the PLMBS purchased by the Bank in particular, systematically violated and ignored their stated underwriting standards, rendering the statements in the Offering Documents with regard to underwriting standards of the mortgage originators misleading. This evidence is reinforced further by the analysis of the performance of the actual loan pools backing the PLMBS purchased by the Bank, and, where it has been made available, the actual loan files for the loans backing the PLMBS.

240. Indeed, many of the mortgage originators who issued loans backing the PLMBS purchased by the Bank have been specifically identified as problem lenders. In materials presented to the FCIC on April 8, 2010, the OCC presented a list of the worst of the subprime lenders based on their mortgage foreclosure rates in the hardest hit metropolitan areas of the country. *See* OCC, *Activities of the National Banks Related to Subprime Lending*, Attachment 2. Eight of the originators of mortgage loans that back the PLMBS purchased by the Bank were included on the list: Countrywide, Ameriquest Mortgage Co., American Home Mortgage Corp., IndyMac Bank, F.S.B., Greenpoint Mortgage Funding, Wells Fargo, OwnIt Mortgage Solutions, Inc., and Decision One Mortgage.

241. Abundant additional information now available reveals the extent to which these and other mortgage originators abandoned sound underwriting practices and engaged in predatory lending, as follows.[9]

1. Countrywide Home Loans, Inc.

242. Countrywide Home Loans, Inc. ("Countrywide") originated underlying mortgage loans securing at least thirty-four of the Certificates purchased by the Bank: ARMT 2006-1 6A1, ARMT 2006-3 4A2, ARMT 2007-2 2A21, BAFC 2005-H 7A1, BAFC 2006-D 1A1, BALTA 2005-9 11A1, BALTA 2006-2 11A1, BALTA 2006-4 11A1, BALTA 2006-5 1A1, BALTA 2006-6 1A1, BALTA 2006-7 1A1, BALTA 2007-1 1A1, BCAP 2006-AA1 A1, CWALT 2005-16 A4, CWALT 2005-86CB A10, CWALT 2006-OA16 A2, CWALT 2006-OA8 1A1, CWALT 2007-OA4 A1, CWALT 2007-OA9 A1, CWHL 2005-2 2A1, DBALT 2006-AR3 A2, DBALT 2006-AR4 A1, HVMLT 2005-10 2A1A, HVMLT 2007-1 2A1A, IMSA 2006-2 1A2A, JPALT 2006-A2 1A1, LUM 2005-1 A1, LUM 2006-6 A1, MARM 2005-7 2A1, MARM 2005-8 1A1, SAMI 2005-AR2 1A1, SAMI 2006-AR4 4A1, SAMI 2006-AR6 1A1 and SAMI 2006-AR7 A1A. Countrywide abandoned sound underwriting practices.

243. Countrywide was the nation's largest subprime loan originator between 2005 and 2007. In 2010, Countrywide was identified by the OCC as the eighth worst mortgage originator in the country based on the delinquency rates of the mortgages it originated in the ten metropolitan areas with the highest rates of delinquency.

[9] The Bank profiles in the following section thirteen mortgage loan originators whose abandonment of underwriting guidelines and other non-disclosed origination practices resulted in materially false and misleading statements in the Offering Documents. The practices of additional mortgage loan originators whose practices were similarly not disclosed in the Offering Documents are set forth in Appendix IX.

a. Government actions against Countrywide and documents produced therein demonstrate Countrywide's abandonment of sound underwriting practices.

244. On June 4, 2009, the SEC filed a complaint against certain senior executives of Countrywide's parent corporation, Countrywide Financial Corporation, including President, David Sambol, Chairman and CEO, Angelo Mozilo, and CFO, Eric Sieracki. *SEC v. Mozilo et al.*, No. 09-3994 (C.D. Cal.).[10] In this complaint, the SEC alleged that these three senior officers committed securities fraud by hiding from investors "the high percentage of loans it originated that were outside its own already widened underwriting guidelines due to loans made as exceptions to guidelines." That SEC complaint detailed how Countrywide was aware internally that its own underwriting guidelines were being ignored and that borrowers were lying about their income in the reduced-documentation application process.

245. According to the SEC:

> [T]he actual underwriting of exceptions was severely compromised. According to Countrywide's official underwriting guidelines, exceptions were only proper where "compensating factors" were identified which offset the risks caused by the loan being outside of guidelines. In practice, however, Countrywide used as "compensating factors" variables such as FICO and loan to value which had already been assessed [in determining the loan to be outside the guidelines].

246. Countrywide's top-down involvement in the securitization process and complete abandonment of underwriting standards are confirmed by the documents produced in the SEC action, including internal emails, memos, minutes, presentations and deposition testimony, which only became publicly available as part of the briefing on the Countrywide Defendants' unsuccessful motion for summary judgment.

---

[10] Countrywide Financial Corporation originated mortgage loans through its wholly owned subsidiary Countrywide Home Loans, Inc., which this Complaint refers to as "Countrywide" for simplicity. *See, e.g.*, Countrywide Financial Corporation 2006 Annual Report at 3 (Form 10-K). Thus, the allegations from, and evidence produced in, actions against Countrywide Financial Corporation, when they concern Countrywide Financial Corporation's mortgage origination business, really concern Countrywide Home Loans, Inc.

247. For example, Countrywide's Chief Risk Officer John McMurray testified as to Countrywide's adoption of a "matching" strategy, under which Countrywide matched whatever product was being offered by other originators in the marketplace. [Exh. 267] However, Countrywide's adoption of its competitors' guidelines (without adoption of corresponding credit risk mitigants) rendered Countrywide's origination practices "the most aggressive in the country." A June 24, 2005 e-mail from McMurray to Sambol stated that "[b]ecause the matching process includes comparisons to a variety of lenders, our [guidelines] will be a composite of outer boundaries offered across multiple lenders," and that because comparisons are only made to lender guidelines where they are more aggressive and not used where they are less aggressive, CFC's "composite guides are likely among the most aggressive in the industry." [Exh. 106].

248. As part of that matching strategy, Countrywide adopted a policy of underwriting ever more loans based on exceptions to their underwriting guidelines. As Sambol explained in a February 13, 2005 email to Countrywide management, Countrywide "should be willing to price virtually any loan that we reasonably believe we can sell/securitize without losing money, even if other lenders can't or won't do the deal." [Exh. 220] Similarly, an internal Countrywide email from Managing Director, Carlos Garcia, to McMurray and Countrywide's Credit Risk Officer, Clifford Rossi, dated June 2, 2006 states that "[w]e should originate whatever we can sell to investors." [Exh. 118]

249. Ever in pursuit of the next deal, Countrywide routinely went beyond and around its publicly-touted Automated Underwriting System, the Countrywide Loan Underwriting Expert System ("CLUES"). If CLUES rejected an applicant, Countrywide subjected the loan application to a process of manual underwriting whereby the loan would be sent up the chain for

approval, first to a loan officer, then to the Structured Loan Desk (also referred to as the "exception desk"), and if still not approved, the loan would be referred to Secondary Marketing where applications were routinely granted exceptions to stated underwriting guidelines, all in furtherance of Countrywide's matching strategy. As former Countrywide Managing Director for Secondary Marketing, Nathan "Josh" Adler, testified in the SEC action:

> Q. Do you know whether Countrywide sometimes originated loans that were considered to be exceptions to its underwriting guidelines?
>
> A. We did.
>
> Q. To your knowledge, was there a process by which such loans were approved?
>
> . . . .
>
> A: There generally was, yes.
>
> Q. And what is your understanding of that process?
>
> A. Well, I was—I was at the tail end of that process. There was—we had guidelines, we had kind of core guidelines, and then we had these shadow guidelines, which were the kind of the second tier guideline, if you will. And then there was this third tier which would come to me. But essentially there were—the tiering of guidelines related to the kind of the exception process. And there was an underwriting, they called it, Structured Loan Desk process in the divisions where loans would get referred to the Structured Loan Desk if they were outside, I believe, of kind of the core guidelines. And then if those loans were outside of even the shadow guidelines, then they would be referred to Secondary Marketing to determine if the loan could be sold given the exception that was being asked for.

[Exh. 234]

250. As the SEC alleged: "The elevated number of exceptions resulted largely from Countrywide's use of exceptions as part of its matching strategy to introduce new guidelines and product changes." SEC Compl. ¶ 29 (citing July 8, 2008 testimony of John P. McMurray at 373:25-375:6). [SOF 285/Exh. 267] In order to boost revenue from securitizations, Countrywide was willing to approve virtually any loan, regardless of deviation from stated underwriting standards, so long as it could package and re-sell the loan in a securitization. While not publicly

disclosed, these facts were well known within Countrywide, including by Countrywide's highest levels of management.

251. For example, in a May 22, 2005 email to Sambol, McMurray, after noting that "exceptions are generally done at terms even more aggressive than [Countrywide] guidelines," identified a number of concerns regarding credit risk associated with Countrywide's exception loans, including the following:

(a) "Use of 2nds Liens as Credit Enhancement." Because many exceptions loans are structured as piggy-back transactions, Countrywide was taking on much of the loan's credit risk through the second lien, which is not sold into the secondary market;

(b) "R&W [representation and warranty] Exposure." Although Countrywide sold "much of the credit risk associated with high risk transactions away to third parties," Countrywide "will see higher rates of default on the riskier transactions and third parties coming back to us seeking a repurchase or indemnification" for losses due to the defaults;

(c) "Security Performance. To the extent our securities contain a greater concentration of higher risk transactions than those issued by our competitors, our security performance may be adversely impacted. The issue here is the extent our concern over security performance drives what we will or won't do on an exception."

252. McMurray also noted in his email that Countrywide's pricing models were inherently limited because they "are often used to price transactions (e.g., exceptions) beyond the scope of the data used to estimate the models." [SOF 288/Exh. 84]

253. At a June 28, 2005 Credit Risk Committee meeting, Countrywide senior executives received a presentation informing the attendees that nonconforming exceptions loans accounted for a staggering 40% of Countrywide's loan originations. [SOF 289]

254. On April 13, 2006, CEO Mozilo issued an email noting that he had "personally observed a serious lack of compliance with our origination system as it relates to documentation and generally a deterioration in the quality of loans originated versus the pricing of those

loan[s]." Specifically, in his email, Mozilo explained that Countrywide was originating home mortgage loans "through our channels with disregard for process [and] compliance with guidelines."

255. During June 2006, a Credit Risk Leadership package reported that Countrywide underwrote, on an exceptions basis, 44.3% of its Pay-Option ARMs, 37.3% of its subprime first liens, 25.3% of its subprime second liens, and 55.3% of its standalone home equity loans. [SOF 293/Exhs. 4, 117]

256. During December 2006, the Credit Risk Leadership package reported similar percentages of loans underwritten on an exceptions basis: 45.4% of Pay-Option ARMs, 35.3% of subprime first liens, 24.1% of subprime second liens, and 52.6% of standalone home equity loans [SOF 294/Exh. 5].

257. Countrywide's Quality Control group performed a "4506 Audit" for the 10-month period ended on April 30, 2006, comparing the stated income from loan applications to the income reported by that borrower to the Internal Revenue Service [SOF 427/Exhs. 115, 117, 119], and concluded that 50.3% of the stated income loans audited by Countrywide showed a variance in income from the borrowers' IRS filings of greater than 10%. Of those, 69% had an income variance of greater than 50%. [SOF 428/Exh. 117] Available documents confirm that the audit results were widely known within Countrywide, having been distributed to Countrywide management, including its highest ranking officers, and were discussed at the April 24, 2006 Credit Risk Management Committee meeting [SOF 431/Exhs. 115, 117], where McMurray stated that the income discrepancies revealed in the audit were also being seen at Countrywide Home Loans. [SOF 432, Exhs. 115, 117] Rossi, testified that the "vast majority"

of the income discrepancies revealed in the 4506 Audit were the result of fraud and misrepresentation. [SOF 434/Exh. 275]

258. By February 2007, internal risk management at Countrywide "noted that the production divisions continued to advocate for, and operated pursuant to, an approach based upon the matching strategy alone. . . . Additionally, [a senior risk manager] warned [Sambol] that 'I doubt this approach would play well with regulators, investors, rating agencies etc. To some, this approach might seem like we've simply ceded our risk standards and balance sheet to whoever has the most liberal guidelines.'" McMurray email to Sambol dated Feb. 11, 2007. [Exh. 109]

259. The deterioration of Countrywide's internal quality control process was noted by Countrywide's management and Corporate Credit Risk Committee. At the March 12, 2007 meeting, it was reported that of the loans reviewed through Countrywide's internal quality control process, 30.3% had deficiencies or were rated high risk, and 11.9% were rated severely unsatisfactory, and that one of the principal causes for such ratings included inadequate DTIs or LTVs, missing income or appraisal documentation, or failure to meet minimum FICO scores. Similarly, at the May 29, 2007 meeting, attendees were informed that loans were being made "outside of any guidelines." A presentation made at the May 29, 2007 meeting notes that "loans continue to be originated outside guidelines primarily via the Secondary SLD desk, and that there is no formal guidance or governance surrounding SLD approvals." [Exhs. 133, 55, 176]

260. A December 2007 internal Countrywide memorandum quoted by the SEC states that "a Countrywide review of loans issued in late 2006 and early 2007 resulted in . . . the finding that borrower repayment capacity was not adequately assessed by the bank during the underwriting process . . . . More specifically, debt-to-income ratios did not consider the impact

of principal [negative] amortization or any increase in interest." SEC Compl. ¶ 56 (quoting Mozilo memo dated December 13, 2007).

261. In employing its "matching" strategy and thereby making as many loans as possible, regardless of exceptions, Countrywide was able to enjoy tremendous profits from securitization of the loans, which also shifted the risk of the loans from Countrywide to investors:

> As indicated in a previous note, when we first started the SLD, the intent was to be able to offer at least one option for borrowers who wanted exceptions to our underwriting guides. The thought was that we would offer borrower exceptions in our two major loan programs: 30-year fixed rate and 5/1 ARMs. In addition, both of these programs were set up for Alt A and as such we could price and sell under these programs. While this process seemed to have worked well in the past, we have been recently seeing increased demand from Production for exceptions on all products in general and Pay Option loans in particular. In addition, Production has been expressing frustration that we were only offering major exceptions for 5/1 ARMs and 30-year fixed rates. As such, to the widest extent possible, we are going to start allowing exceptions on all requests, regardless of loan program, for loans less than $3 million effective immediately.
>
> The pricing methodology we will use will be similar to that which we use for 30-year fixed rates and 5-1 Hybrids. We will assume securitization in all cases.
>
> . . . .
>
> The methodology from a saleability point of view will also be similar to that used for 30-year fixed rates and 5-1 Hybrids. We will view the exception assuming securitization and will no longer take into account whole loan buyers. In the past, this has caused some exceptions to be declined for Ratios, Balances and LTV/CLTV[11] combinations. Provided we can sell all of the credit risk (i.e. not be forced to retain a first loss place due to a[n] 80% LTV, 60 Back-end ratios $3 million loan) we will approve the loan as a salable loan. Finally, we will not be reviewing loans from an underwriting point of view but will rather be relying on Production to make certain that the loan[s] meet all other underwriting Guideline and w[i]ll have been reviewed for compliance acceptability and fraud.

[11] "CLTV" means "combined loan-to-value ratio"—the ratio of *all* liens on a property to the property's total appraised value.

July 28, 2005 email from David Spector, Managing Director, to Countrywide Managing Directors and Secondary Marketing Management.

262. As Nathan Adler, Managing Director of Secondary Markets, testified in the SEC action:

> Q. Was one of the criteria for granting exceptions at the Secondary Loan Desk in Secondary Marketing whether or not the loan could be sold into the secondary market?
>
> A. That was the only criteria that we followed.

263. The widespread use of exceptions to its underwriting guidelines were well known within Countrywide, but permitted because, as recognized by John McMurray in his May 22, 2005 email discussed above, "CW's approach to exceptions has been lucrative over the past several years."

264. Yet Countrywide did not publicly disclose the amount of loans it was underwriting on an exception basis for any loan product or division. Paul Liu, a Countrywide attorney who participated in, and testified to, the legal work involved in the securitization process at Countrywide between 2004 and 2007, including review of offering documents such as prospectus supplements, testified in the SEC action that while the prospectus supplements he reviewed may have stated that "some of those mortgage loans may have . . . been originated with exemptions that have compensating factors," they did not disclose the number or percentage of loans included in each securitization that were underwritten pursuant to exceptions, or even in many cases whether any loans within that securitization were underwritten pursuant to exceptions at all.

265. Indeed, Countrywide assured investors that the level of exceptions was low. Christopher Brendler, a Stifel Nicholas analyst who initiated coverage of Countrywide in early 2006, testified that Countrywide repeatedly advised conference call and investor presentation

participants that it kept its "exceptions low." Brendler also testified that a low exception rate in the mortgage industry would have been 5% to 10% of total loans—not the extreme number of exceptions that Countrywide made. Brendler confirmed that such a disclosure would have been material:

> That's—that would have been a very disturbing disclosure, I believe, to know that you're basically seeking out the most aggressive policies and underwriting guidelines of your competitors without consideration for other factors. You're essentially creating a worst of the worst.

[Exh. 242]

266. On November 3, 2009, the District Court for the Central District of California denied a motion to dismiss the SEC complaint. Judge Walter specifically noted that "neither Countrywide's disclosures nor a careful review of the context of the statements convince this Court that the alleged omissions or misstatements were immaterial or not misleading as a matter of law." *SEC v. Mozilo, et al.*, No. 09-3994, slip op., at 10 (C.D. Cal. Nov. 3, 2009).

267. Subsequently, on September 16, 2010, Judge Walter denied Countrywide's motion for summary judgment. Among other key determinations, the court found:

> [The] SEC has also presented evidence that Countrywide routinely ignored its official underwriting guidelines to such an extent that Countrywide would underwrite *any* loan it could sell into the secondary mortgage market. According to the evidence presented by the SEC, Countrywide typically made four attempts to approve a loan. Countrywide first used an automated underwriting system known as "CLUES", which applied Countrywide's underwriting guidelines as set forth in Countrywide's technical manuals and loan program guides. . . . CLUES would either approve the loan or "refer" it to a loan officer for manual underwriting. If that loan officer lacked the authority to make an exception to Countrywide's underwriting guidelines, the loan was referred to the Structured Lending Desk, where yet another underwriter, with even more authority to waive guideline requirements, attempted to make the loan. If that attempt failed, the loan was referred to Countrywide's Secondary Markets Structured Lending Desk. According to the testimony of the Managing Director of Countrywide Home Loans' Secondary Marketing Division, once the loan was referred to Countrywide's Secondary Markets Structured Lending Desk, the sole criterion used for approving the loan was whether or not the loan could be sold into the secondary market. As a result of this process, a significant percentage (typically in

> excess of 20%) of Countrywide's loans were issued as exceptions to its official underwriting guidelines. As reported in one Corporate Credit Risk Committee meeting, one third of the loans referred from CLUES missed "major guidelines" and another one third missed "minor" guidelines. In light of this evidence, a reasonable jury could conclude that Countrywide all but abandoned managing credit risk through its underwriting guidelines, that Countrywide would originate any loan it could sell, and therefore that the statements regarding the quality of Countrywide's underwriting and loan production were misleading.

SEC v. Mozilo, et al., No. 09-3994, slip op., at 11–12 (C.D. Cal. Sept. 16, 2010) (citations to the record omitted).

268. In short, evidence presented to the court supported the claim that "Countrywide routinely ignored its official underwriting guidelines, and in practice, Countrywide's only criterion for approving a loan was whether the loan could be sold into the secondary market." *Id.* at 12.

269. The Attorneys General from many states also filed complaints against Countrywide based on its abusive and predatory lending practices. Among them, the Attorney General of California alleged based on its extensive investigation of Countrywide that the company "viewed borrowers as nothing more than the means for producing more loans, originating loans with little or no regard to borrowers' long-term ability to afford them." Complaint at 5, *People v. Countrywide Fin. Corp.*, No. LC083076 (Cal. Super. Ct.) ("California Attorney General Countrywide Complaint"). Countrywide, the California Attorney General found, "did whatever it took to sell more loans, faster—including by ... disregarding the minimal underwriting criteria it claimed to require." California Attoney General Countrywide Complaint at 20.

270. For example, the California Attorney General Countrywide Complaint quotes one former California loan officer explaining how stated income loans were sold, with a loan officer telling the borrower "with your credit score of X, for this house, and to make X payment, X is

the income that you need to make"—after which the borrower would state that his or her income was X. *Id.* at 21.

271. A similar lawsuit instituted by the Illinois Attorney General, *People v. Countrywide Financial Corp.*, No. 08-22994 (Ill. Ch.), detailed how (a) one Countrywide employee estimated that approximately 90% of all reduced documentation loans sold out of the Chicago office had inflated incomes; and (b) one of Countrywide's mortgage brokers, One Source Mortgage, Inc., routinely doubled the amount of the potential borrower's income on stated income mortgage applications.

272. The Illinois complaint also detailed how Countrywide created incentives for its employees to increase the number of loans without concern for ability of the borrower to repay the loan. The *New York Times* described the allegations in the complaint as "paint[ing] a picture of a lending machine that was more concerned with volume of loans than quality."

273. Among the many other abuses described in the Illinois complaint, the Attorney General found that:

> [t]hrough the securitization process, Countrywide extracted hefty over-head charges, then shifted the risk of the failure of these non-traditional loans to investors. Moreover, securitization allowed Countrywide to tap those investors for much needed capital to fuel its origination process and reach its goal of capturing more and more market share. To facilitate the increase in loan origination volume, Countrywide relaxed its underwriting standards even more and sold risky, unaffordable and unnecessarily more expensive mortgage loans to millions of American homeowners.

Testimony of Illinois Attorney General Lisa Madigan before the FCIC, Jan. 14, 2010.

274. Similar allegations appear in a complaint filed by the Connecticut Attorney General, *State v. Countrywide Financial Corp.*, No. 08-40390945 (Conn. Super. Ct.).

> On October 6, 2008, Countrywide entities settled lawsuits brought by *eleven* State Attorneys General and potential claims by 28 other states, including all of the States in which loans backing the PLMBS purchased by the Bank were issued. The settlement valued at $8.4 billion resolved charges of violations of predatory

> lending, unfair competition, false advertising, and violations of banking laws, and required Countrywide to implement a program to modify certain existing loans, particularly high risk loans and pay-option mortgages that were the subject of the Attorneys Generals' investigations.

275. Similarly, as the 2011 FCIC Report just recently revealed based on the FCIC's extensive investigation:

> Lenders made loans that they knew borrowers could not afford and that could cause massive losses to investors in mortgage securities. As early as September 2004, Countrywide executives recognized that many of the loans they were originating could result in "catastrophic consequences." Less than a year later, they noted that certain high-risk loans they were making could result not only in foreclosures but also in "financial and reputational catastrophe" for the firm. But they did not stop.

FCIC Report at xxii.

b. Private actions against Countrywide demonstrate Countrywide's abandonment of sound underwriting practices.

276. A multitude of private class action and individual cases raise further challenges to Countrywide's underwriting practices—and substantiate the challenges with witness testimony and documentary evidence. For example, Mark Zachary, a former Regional Vice President of Countrywide Mortgage Ventures, LLC, Countrywide's joint venture with the homebuilding company KB Home, detailed in a complaint how Countrywide blatantly ignored its underwriting policies and procedures. Compl., *Zachary v. Countrywide Financial Corp.*, No. 08-0214 (S.D. Tex). Mr. Zachary states that in September of 2006 he informed Countrywide executives that loan officers were helping loan applicants to submit applications with false income amounts.

277. Zachary's observations about problems with appraisals at KB Home are confirmed by documents reflecting internal correspondence within and between KB Home and Countrywide filed in *Johnson v. KB Home*, No. 09-972 (D. Ariz.).

278. Countrywide handled all of the mortgage financing and appraisal services for KB Home.

279. For example, on June 8, 2005, Christina Nickerson, a KB Home salesperson wrote: "We have an appraisal issue at IMR Mesa . . . . [T]he [lender's] appraiser can not obtain value. . . . I have asked the [lender] for a copy of the appraisal, and I requested that she try a more aggressive appraiser. . . . My suggestion is that we have [KB Home Mortgage Company, a wholly owned subsidiary of KB Home] order an appraisal from a KB friendly appraiser and see what happens." KB Home Director of Sales McLaury responded: "I agree, we need to order an appraisal from our KB friendly appraiser[.]" On June 16, the salesperson heard back: "Here's our appraisal at purchase price[,]" but McLaury complained: "It's $1,966 short isn't it? Can Ernie Carver bump it up?" Soon after, McLaury confirmed that the maneuvering had worked: "Christina and the Mesa Team, the appraisal will come in at the total sales price."

280. In another instance, in July 2006, KB Home Phoenix Vice President Stacie McDonald asked a KB Home salesman about a home for which an appraisal was low. The salesman responded: "It was approved at $290,000 with a VC of 38%, however, we were able to push appraisal to $300,000 and the addendum for $300,000 was done yesterday."

281. Similarly, in October 2007, KB Home Director of Sales McLaury instructed "friendly" appraiser Scott Dugan: "Please base your appraisal on today's base sales price, the options/upgrades the buyer purchased ($40,777), and comps in the neighborhood/area, particularly the one lot 44 (66 Lions Den Avenue) that closed at $248,643." Dugan responded: "ok."

282. KB Home salesperson, Peter Manesiotis, reported to his manager, Gregory Victors: "Appraisal came in low. This is a CW deal. How should we proceed?" Victors responded: "Have Countrywide order a second appraisal. KB will pay for it. Speak to [loan officer] or processor to get someone who knows area. This process just worked at Mesquite.

Buyer did not know about first appraisal." Manesiotis then instructed that a new appraisal be ordered and "do not notify the buyer about the first appraisal."

283. Countrywide senior executives were apparently not just aware but actively involved in this conduct. In an August 9, 2006 email sent after an appraisal was below contract price and below the level that KB Home's hand-picked appraiser, Harry, could reach, Countrywide/CWKB Vice President, Tim Ryan wrote: "Eric Sanford the western regional VP of landsafe is reviewing the appraisal—he is as high as it gets at landsafe. . . . As soon as I hear I will let you know. We are fighting all the way to the top for you." Ryan later reported: "We were just informed the original appraisal will be amended to Harry's appraisal. . . . So CW will be able to use the $687,000.00 value." On another occasion Ryan explained one scheme for generating self-perpetuating excessive appraisals: "Going forward I have asked ops to request Harry on homes that are 'decked' out—this way we know max value has been given. Under the new rules we cannot do it often, however once a few closing occur—we have comps!"

284. More evidence has been presented in lawsuits against Countrywide by the leading insurance companies that insured mortgage-backed securities sold by Countrywide. On September 30, 2008, MBIA Insurance, one of the largest providers of bond insurance, filed its complaint in *MBIA Insurance Corp. v. Countrywide Home Loans* (Sup. Ct. Cty of New York). This complaint explains how MBIA "provide[d] credit enhancement on the [mortgage-backed securities]—in the form of guarantee of repayment of principal and interest for the [mortgage-backed securities] notes in each securitization," and claims MBIA issued such insurance on the basis of fraudulent representations by Countrywide.

285. MBIA explains that:

> MBIA's re-underwriting review has revealed that 91% of defaulted or delinquent loans in these fifteen Countrywide securitizations show material discrepancies

> from underwriting guidelines. . . . For example the loan documentation may (i) lack key documentation such as verification of borrower income or assets; (ii) include an invalid or incomplete appraisal; (iii) demonstrate fraud by the borrower on the face of the application; or (iv) reflect that any of the borrower income, FICO score, debt, DTI or CLTV ratios, fails to meet stated Countrywide guidelines (without any permissible exception).

MBIA specifically notes that "the Defective Loans run across Countrywide's securitizations from 2004-2007, demonstrating the consistency of Countrywide's disregard for its underwriting guidelines during this period." On April 27, 2010, the Court denied Countrywide's motion to dismiss MBIA's fraud claims.

286. The September 28, 2010 Complaint filed by monoline insurer Ambac in *Ambac Assurance Corp. v. Countrywide Home Loans* (N.Y. Sup. Ct.) alleges:

> Because Countrywide [Financial Corporation, Countrywide Home Loans, Inc. and Countrywide Securities Corporation] was the nation's leading mortgage originator, its many public pronouncements that its underwriting practices were the industry's gold standard carried significant weight. Countrywide repeatedly asserted that the loans in its portfolio, from which the loans in the transactions at issue were drawn, were originated pursuant to Countrywide's strict underwriting standards that allowed "exceptions" only if compensating factors were present. But what Countrywide concealed is that, contrary to its representations, approval of "exceptions" became the rule. Countrywide failed to disclose that its business model was premised on the perpetual origination and refinancing of loans to borrowers who did not have the ability to make the required payments.

287. Ambac alleges that Countrywide made numerous false and misleading statements and omitted material facts about the quality of Countrywide's loan origination procedures and the collateral underlying the transactions. In particular, "[t]he Prospectus Supplements contained false and misleading statements concerning the quality of Countrywide's loan origination procedures and, in particular, failed to disclose that Countrywide had adopted a practice of making loans to borrowers who had little or no ability to repay their loans." Furthermore, the loan tapes for the transactions provided by Countrywide—which were "large spreadsheets that purported to contain true and accurate information concerning the proposed loan pools, including

key metrics for assessing the borrowers' ability to repay their loans and the sufficiency of the properties as collateral," and upon which Ambac was intended to rely to analyze the risks of and pricing for the proposed transactions—contained information that was materially false and misleading "in view of Countrywide's abandonment of sound underwriting practices and its knowledge of pervasive fraud."

288. The falsity of Countrywide's representations is evidenced by the performance of the underlying loans, which have defaulted at extraordinary rates. As of September 2010, more than 35,000 loans insured by Syncora, with an aggregate principal balance of more than $1.95 billion, had defaulted or have been charged-off. Further, by September 2010, Ambac had reviewed the origination files for 6,533 loans for conformance with Countrywide's loan-level representations and warranties and discovered that 6,362 of the loans—more than 97%—materially breached Countrywide's loan-level representations and warranties.

289. In *Financial Guaranty Insurance Co. v. Countrywide Home Loans, Inc.* (N.Y. Sup. Ct.), Financial Guaranty Insurance Company ("FGIC"), an insurer of Countrywide's mortgage-backed securities, alleges that, with respect to securitization it insured in 2006 and 2007, Countrywide and its corporate affiliates made multiple false misrepresentations and omissions, including that Countrywide: (a) failed to disclose an increase in its exceptions to, and expansion of, its mortgage-underwriting guidelines, including exceptions for which there were no compensating factors; (b) failed to disclose and deliberately concealed changes to its underwriting standards and procedures from those used for mortgage loans included in prior securitizations; (c) engaged in "adverse selection," whereby poor quality loans would be securitized while loans that were expected to perform better were retained on Countrywide's books; (d) failed to disclose mortgage-loan-origination fraud, in which Countrywide and its

corporate affiliates were participants or complicit; (e) misrepresented to FGIC the nature of key delinquency information; and (f) made numerous false and misleading public statements concerning the quality of Countrywide's mortgage origination process and securitized mortgage loans.

290. According to FGIC, beginning in early 2006, at the latest, Countrywide made continuing undisclosed changes in its mortgage loan origination practices, and started originating and securitizing lower-quality, poorly underwritten loans. These changes resulted in an undisclosed weakening of Countrywide's underwriting guidelines by permitting increased exceptions in originating mortgage loans, and permitting these exceptions without adequate, and in many cases any, compensating factors. Moreover, FGIC alleges that Countrywide admitted to it that Countrywide not only expanded the exception process, but also engaged in "adverse selection" by retaining fewer exception mortgage loans for its portfolio, while securitizing (for sale to investors) those loans with exceptions.

291. FGIC's allegations and Countrywide's purported admissions are supported by the analysis of professional residential mortgage loan review experts that were retained by FGIC to review statistically significant samples of mortgage loans from FGIC insured securitizations. These reviews determined that approximately *70%* of the mortgage loans in these securitizations significantly violated one or more of Countrywide's underwriting guidelines or standard mortgage underwriting practices. Unsurprisingly, the loss rate for mortgage loans found to be in breach of underwriting standards was two-and-a-half to three times the loss rate on non-breaching loans.

292. Similarly, in *Syncora Guarantee Inc. v. Countrywide Home Loans, Inc.* (N.Y. Sup. Ct.), Syncora, an insurer of Countrywide's mortgage-backed securities, alleges that, with respect to Countrywide securitizations it insured between 2004 and 2006:

> in originating the loans in these portfolios, Countrywide, *consistent with its business practices at the time, systematically ignored its own underwriting guidelines* and made imprudent loans that no reasonable underwriter would have made in a single-minded pursuit of generating ever-greater volumes of new loans. As a result, thousands of non-performing loans in the securitized portfolios violated Countrywide's own published guidelines should never have been made.

(emphasis added.)

293. Syncora alleges that the Countrywide offering documents, including the prospectuses and prospectus supplements, were replete with misrepresentations regarding Countrywide's underwriting process and failed to disclose its routine, material deviations from sound underwriting practices. Countrywide is also alleged to have materially misrepresented the accuracy of data, including DTIs and CLTVs, provided to Syncora for each securitized loan (commonly referred to as the "loan tape").

294. Syncora's review of underlying files for 3,700 defaulted loans in two of the securitizations it insured revealed that 2709 of the loans—almost 75%—have severe underwriting defects. The majority of these loans exceeded or ignored one or more Countrywide underwriting guidelines regarding excessive DTIs; excessive combined loan to value ratios; excessive loan amounts; improper calculation of first-lien debt, improper calculation of property values; patently unreasonable stated incomes; borrower fraud; indiscriminate availability of stated income loans; inflated appraisals; insufficient borrower credit; insufficient cash reserves; and/or missing documents. Indeed, Countrywide frequently breached a combination of underwriting guidelines for a given loan, which created a "layered risk," greatly increasing the likelihood of default.

295. With respect to inflated appraisals, Syncora alleges in part:

> In a review of non-performing loans in the 2005-K and 2006-D Securitizations, Syncora has found that Countrywide's appraisals of properties secured by non-performing loans show a clear pattern of inflation compared to sales prices achieved for comparable properties in the locale at the time Countrywide obtained its appraisals. Moreover, despite Countrywide's promise in the contractual documents and the Prospectuses to obtain "independent third party" appraisals, the properties underlying the vast majority of the loans in the Securitizations were appraised by Countrywide's own affiliated appraisal company, Landsafe, Inc. ("Landsafe"). Landsafe, like Countrywide Home Loans, is a subsidiary of Countrywide Financial [Corp.].

296. In sum, the evidence developed in numerous other actions against Countrywide substantiate that Countrywide abandoned its stated underwriting guidelines.

c. Confidential witnesses provide further evidence of Countrywide's abandonment of sound underwriting practices.

297. Confidential witnesses provide additional evidence of Countrywide's failure to adhere to sound underwriting practices and guidelines. For example, confidential witnesses, such as Confidential Witness ("CW")-1, a loan officer who worked at Countrywide from 1997 through 2007, CW-2, a former branch manager and regional vice president for Countrywide from September 2005 through December 2007, CW-3, a loan specialist at Countrywide's subprime lender, Full Spectrum Lending, from 2004 to 2005, and CW-4, a former Countrywide branch operation's manager from 2005 to 2010 (after Countrywide was taken over by Bank of America), all confirm that: (a) Countrywide employees faced intense pressure to close loans at any cost; (b) Countrywide increasingly approved risky, low- or no-documentation loans without adequate review; (c) Countrywide failed to adhere to underwriting guidelines; (d) Countrywide routinely approved loans that contained exceptions for which there were no reasonable compensating factors; (e) Countrywide employees pressured appraisers to inflate home values; and (f) Countrywide employees manipulated loan data in order to close loans.

298. Specifically, CW-1 stated that employees at Countrywide always faced pressure to produce and close more loans. Because CW-1's performance was judged only on how many loans he closed each month, and not on long-term performance, he used to joke to friends that his status of employment was continually under scrutiny by his employer: "I'm fired every month, and then every month they re-hire me."

299. CW-1 stated that from 2004 to 2006, Countrywide's underwriting guidelines became "looser and looser and looser." During this period, the minimum credit scores required for prime or Alt-A mortgages fell repeatedly, such that a borrower with a FICO score of 680 could get a mortgage with a 100% LTV based upon stated income/stated assets documentation. CW-1 also stated that Countrywide offered no income/no asset ("NINA") loans, whereby a borrower could obtain a loan without providing any employment, income, or asset documentation, and did so without any effort, or for that matter no way to determine whether the borrower had an ability to repay the loan. CW-1 further stated that Countrywide frequently offered loans to borrowers who had been rejected by other mortgage providers. In fact, Countrywide loan officers often emphasized to prospective borrowers that Countrywide could do loans that other lenders could not.

300. According to CW-1, Countrywide had an "Exception Desk," whose purpose was to review loans that did not strictly meet the underwriting guidelines. During the 2004-2006 time period, CW-1 stated that, "It got to where loan approvals with exceptions were the norm."

301. According to both CW-1 and CW-2, Countrywide loan officers pressured appraisers to return values which would allow the loans to be approved. For example, Countrywide loan officers would tell the appraisers that if they did not provide the value the loan officers needed, Countrywide would not send any more work to the appraiser.

302. Both CW-1 and CW-2 described that, even in circumstances where the appraisers were not directly threatened, Countrywide influenced their appraisal values by telling appraisers exactly what value they needed in order to approve the loan. CW-2 also explained that in other instances, Countrywide provided appraisers with the purchase price of the home and the loan amount so that the appraisers could extrapolate the minimum value needed for the appraisal. CW-2 noted that Countrywide also sent appraisers additional comparables that were higher than those the appraiser initially relied upon.

303. CW-2 stated as well that Countrywide's underwriting guidelines became "way too easy" to meet. As a consequence, many of Countrywide's loans ended up in default. Numerous times, he recalled thinking to himself, "people making this kind of money shouldn't qualify for a $400,000 loan." For example, he recalled seeing loan applications for $350,000 homes, with $1,900/month loan payments, when the borrowers were making only $3,000/month. The DTI on such a loan was approximately 63%. He said such situations were "absurd, but I saw it all the time."

304. Additionally, CW-2 said that most approved mortgages at Countrywide had 95-100% LTVs, and most borrowers only put down zero to five percent of the purchase price. Consequently, borrowers had "no skin in the game," and when home values started to drop and the borrowers' loans were for more than the homes were worth, they had no incentive to continue making their mortgage payments. Moreover, CW-2 said that Countrywide granted numerous mortgages to borrowers with 65% DTIs, and that Countrywide did not require borrowers to have any "reserves" (*i.e.*, cash in their bank accounts)—or, at most, they only had to have one month's reserve—in order to be approved.

305. CW-2 also stated that Countrywide offered a "Fast and Easy" loan program, which required minimal documentation and thereby allowed mortgages to be approved more quickly. It was Countrywide's version of the stated income/stated asset mortgage. CW-2 had "no doubt" that there was a lot of upward manipulation of borrower income in order to qualify borrowers for a Fast and Easy loan. Indeed, CW-2 reported one employee to Countrywide's Fraud Department when he caught the employee repeatedly entering fraudulently high income. However, the Countrywide human resources department said that such reported incidents were not enough to fire the employee, and the employee was simply suspended. While the employee was suspended, CW-2 examined the employee's loan files and found four to five different applications in which the employee had nearly doubled the borrowers' reported income in order to get the loans approved.

306. CW-3 also saw a practice of inflating incomes on stated-income loans when she worked at Countrywide's Full Spectrum Lending division. On instruction from the branch manager, CW-3 said that loan officers "recalculated income and removed [any documents] they didn't want the underwriters to see" in order to push the loans through. In addition, CW-3 knew that loan officers at Countrywide cut and pasted false information into loan documents in order to get loans approved. "It was a pretty common practice," she said.

307. Like CW-1, CW-4 was aware that her bosses were under a lot of pressure to produce a high volume of loans; she noted that there was a big push on volume back then and that bonuses were tied to volume. In fact, CW-4 was admonished that she was being too difficult with respect to the underwriting rules, and was told that "I had to find a way to make the loans, and not try to find a way to not make them." CW-4 recalls many times during her tenure when she did not believe a loan should be made, but it nevertheless was pushed through. By way of

example, CW-4 recalls a Countrywide loan officer in her branch who was allowed to originate loans for his family members, notwithstanding that this violated Countrywide policy, and even though the applications only contained names and addresses and no other information. In fact, it was only after several of these loans closed, and CW-4 complained to her regional manager, that her colleague was told he could no longer make loans to family.

308. CW-4 also recalls instances in which she spoke with a customer over the telephone regarding missing or questionable information, and was informed by the customer that he or she just put down what the loan officer told him or her to write. When CW-4 expressed her concerns to the loan officer involved, she was told *not* to contact any customers. CW-4 recalls a lot of tension between the loan officers and loan processors in the branch, with the loan officers insisting that loans be processed quickly and without questions and becoming angry when loan processors attempted to verify and validate the information on the loan.

309. CW-5, a loan officer and branch manager for Countrywide, stated that verification of income under Countrywide's Fast and Easy loan program was "a joke." Moreover, if the CLUES system—Countrywide's Automated Underwriting System—did not approve a loan at first, loan officers would often simply inflate the numbers until there was an approval. There was no limit to how many times the numbers could be re-entered. In CW-5's experience, loan officers were unlikely to seek exceptions to the underwriting guidelines from the branch manager, since they could simply commit fraud on the "front end"—i.e., by inflating the numbers.

310. CW-5 also said that 50% of mortgage loans were made without formal appraisals. When appraisals were done, the appraiser was told that if the property did not "come back at value," Countrywide would simply go to another appraiser thereafter. CW-5 said when an

appraised property had zoning violations, or other features that would bring down the valuation, the appraiser was told to make sure their photographs of the property didn't include those features.

d. The mortgages originated by Countrywide and securitized in the PLMBS purchased by the Bank provide further evidence of Countrywide's abandonment of sound underwriting practices.

311. Countrywide originated mortgages that secured at least the Certificates listed above in paragraph 242. As discussed in detail below, the Offering Documents contained serious material misstatements and omissions regarding specific characteristics of the loan pools securing these Certificates, including misstatements with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates – averaging over 49 percent. These circumstances are strong evidence of Countrywide's failure to observe its stated underwriting standards. Countrywide's actual practices—including use of unreliable appraisals, routine granting of underwriting exceptions, and reliance on unverified borrower-supplied information—caused it to originate loans whose actual LTVs and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

e. Press reports, government investigations, and related litigation demonstrate that Countrywide engaged in predatory lending.

312. The *New York Times* detailed Countrywide's abusive lending practices in a story entitled "Inside the Countrywide Lending Spree":

> On its way to becoming the nation's largest mortgage lender, the Countrywide Financial Corporation encouraged its sales force to court customers over the telephone with a seductive pitch that seldom varied. "I want to be sure you are getting the best loan possible," the sales representatives would say.

> But providing "the best loan possible" to customers wasn't always the bank's main goal, say some former employees. Instead, potential borrowers were often led to high-cost and sometimes unfavorable loans that resulted in richer commissions for Countrywide's smooth-talking sales force, outsize fees to company affiliates providing services on the loans, and a roaring stock price that made Countrywide executives among the highest paid in America.
>
> Countrywide's entire operation, from its computer system to its incentive pay structure and financing arrangements, is intended to wring maximum profits out of the mortgage lending boom no matter what it costs borrowers, according to interviews with former employees and brokers who worked in different units of the company and internal documents they provided. One document, for instance, shows that until last September the computer system in the company's subprime unit excluded borrowers' cash reserves, which had the effect of steering them away from lower-cost loans to those that were more expensive to homeowners and more profitable to Countrywide.

313. According to *The New York Times*, "Countrywide was willing to underwrite loans that left little disposable income for borrowers' food, clothing and other living expenses." The Company's incentive compensation system encouraged such loans—regardless of the inevitability that the borrower would default and the Company (and the borrower) would be severely harmed.

314. According to Mark Zachary, a former Regional Vice President of Countrywide's joint venture with KB Home, Countrywide Mortgage Ventures, LLC, the appraiser, as known to Countrywide executives, was being strongly encouraged to inflate appraisal values by as much as 6% to allow the homeowner to "roll up" all closing costs. Mr. Zachary explained that this resulted in the homeowner being "duped" as to the value of the home. According to Mr. Zachary, this inflated value put the buyer "upside down" on the home immediately after purchasing it, *i.e.* the borrower owed more than the home's worth. Thus, the buyer was set up to be more susceptible to defaulting on the loan. *See supra* ¶¶ 276-77 (citing to complaints filed in *Zachary v. Countrywide Fin. Corp.*, No. 08-0214 (S.D. Tex.), and *Johnson v. KB Homes*, No. 09-972 (D. Ariz.)).

315. Countrywide's incentive compensation system encouraged brokers and sales representatives to place borrowers into the sub-prime category even if they in fact qualified for other loans. As reported in *Bloomberg*, Senator Charles Schumer urged that "Countrywide, the biggest U.S. mortgage lender, should stop paying higher commissions to brokers who steer borrowers to high-cost loans that 'are designed to fail.'"

316. The Massachusetts Attorney General has detailed "Countrywide's indifference to its borrowers' inability to repay its loans." For example, while "[o]n its website, Countrywide's successor Bank of America suggests when obtaining a mortgage to purchase a home that a borrower have a maximum back-end [DTI] ratio of 36%[,] Countrywide routinely approved loans for borrowers with back-end DTI ratios exceeding 50%."

317. According to the Massachusetts Attorney General complaint in *Commonwealth v. Countrywide Financial Corp.* (Mass. Super. Ct.), Countrywide allegedly violated Massachusetts' Consumer Protection Law by "originat[ing] loans in such a manner that would lead predictably to a borrower's default and foreclosure," including the origination of negative amortization loans, hybrid ARMs where borrowers were not qualified based on the post-teaser rate, stated income loans, and loans with these features plus prepayment penalties.

318. Among the conduct alleged and resolved in Countrywide's above-noted settlement with 39 state Attorneys General were violations of state predatory lending laws by (a) making loans it could not reasonably have expected borrowers to be able to repay; (b) using high pressure sales and advertising tactics designed to steer borrowers towards high-risk loans; and (c) failing to disclose to borrowers important information about loans, such as refinancing costs, the availability of lower cost products, the existence of prepayment penalties, and that advertised rates would adjust upwards sharply as soon as one month after closing.

f. Confidential witnesses provide further evidence of Countrywide's predatory lending practices.

319. Confidential witnesses also confirmed that Countrywide engaged in predatory lending practices. For example, CW-1 said he knew a lot of Countrywide loan officers who misrepresented to borrowers how a negative amortization loan worked. On a negative amortization loan, the monthly payment covered an amount that was less than the total accrued interest on the loan; any unpaid interest was added on to the end of the loan. The interest rate on the negative amortization loans then adjusted upward periodically. Consequently, if a borrower continued to make monthly payments that were below the amount of the accrued interest, the amount of the unpaid interest would skyrocket. In approximately three years, the amount due would hit a "ceiling" of 110% to 115% of the original principal balance. Then Countrywide would "recast" the loan balance, and adjust the required monthly payment so that it would cover all of the previously-deferred interest. As a result, the borrower's monthly payment could rise to as much as two-and-a-half times the original monthly payment. Many borrowers fell into problems with such loans.

320. CW-1 said he knew that Countrywide loan officers misrepresented how these types of loans worked because he used to make calls to Countrywide workers posing as a prospective borrower. When the Countrywide officers explained the loans to him, their explanations were not accurate.

321. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, at Countrywide variance from the stated standards was the norm, and many loans were made with essentially little to no underwriting or effort to evaluate ability

to repay. Nowhere did any of the Offering Documents apprise the Bank that Countrywide abandoned its guidelines and engaged in predatory lending.

2. Bear Stearns Residential Mortgage Corporation and EMC Mortgage Corporation

322. Bear Stearns Residential Mortgage Corporation ("Bear Stearns Residential Mortgage") originated underlying mortgage loans securing at least nine of the Certificates purchased by the Bank: BALTA 2007-2 1A1, BALTA 2007-3 1A1, BSMF 2006-AR1 1A1, BSMF 2006-AR2 1A1, BSMF 2006-AR3 1A1, BSMF 2006-AR5 1A1, BSMF 2007-AR1 1A1, BSMF 2007-AR4 1A1, and BSMF 2007-AR5 1A1A. Bear Stearns Residential Mortgage abandoned sound underwriting practices.

323. EMC Mortgage Corporation ("EMC Mortgage"), a subsidiary of The Bear Stearns Companies, originated or acquired from other originators, reviewed, and resold underlying mortgage loans securing at least twenty three of the PLMBS purchased by the Bank: BALTA 2005-10 11A1, BALTA 2005-8 11A1, BALTA 2005-9 11A1, BALTA 2006-1 11A1, BALTA 2006-2 11A1, BALTA 2006-3 1A1, BALTA 2006-4 11A1, BALTA 2006-4 13A1, BALTA 2006-5 1A1, BALTA 2006-6 1A1, BALTA 2006-7 1A1, BALTA 2007-1 1A1, BALTA 2007-2 1A1, BALTA 2007-3 1A1, BSMF 2006-AR1 1A1, BSMF 2006-AR2 1A1, BSMF 2006-AR3 1A1, BSMF 2006-AR5 1A1, BSMF 2007-AR1 1A1, BSMF 2007-AR4 1A1, BSMF 2007-AR5 1A1A, LUM 2005-1 A1 and MARM 2007-R5 A1. EMC Mortgage Corporation also abandoned sound underwriting practices.

a. Private actions and confidential witnesses demonstrate the wholesale abandonment of sound underwriting practices by Bear Stearns Residential Mortgage Corporation and EMC Mortgage Corporation.

324. Both Bear Stearns Residential Mortgage and EMC served as mortgage loan conduits for the massive Bear Stearns mortgage-loan-securitization machine. The Bear Stearns

entities had no intention of ever holding the loans they originated or purchased. Rather, the sole purpose of the origination conduits was to generate the flow of loans into the Bear Stearns securitization pipeline.

325. Bear Stearns affiliates provided loan volume, not loan quality, and, indeed, pushed for increased loan volume at the expense of underwriting standards.

326. The abandonment of underwriting guidelines by EMC and Bear Stearns Residential Mortgage (both with regard to loans originated by them and purchased from other originators) is at the heart of several lawsuits filed by monoline bond insurers from which Bear Stearns entities had obtained insurance on several securitization trusts. The policies required the insurers to guarantee payment of interest and principle to bond holders in the event of loan defaults within the trusts. For example, Ambac, which provided bond insurance for four Bear Stearns securitizations, alleged based on substantial discovery obtained in its lawsuit that Bear, Stearns & Co., Inc. was in a position to know of the low quality of loans it aggregated and securitized through EMC and Bear Stearns Residential.

327. In the course of its investigation and litigation, Ambac obtained loan files from Bear, Stearns & Co., Inc. for many of the loans backing the PLMBS it insured. Analysis of the loan files by an independent consultant hired by Ambac confirms widespread breaches of representations and warranties with regard to the underwriting of the loans. Indeed, of the 6,309 loans reviewed, 5,724 breached one or more of EMC's representations and warranties, evidencing a staggering ***90%*** breach rate. Defects identified in the analysis include:

- rampant fraud, primarily involving misrepresentation of the borrower's income, assets, employment, or intent to occupy the property as the borrower's residence (rather than as an investment), and subsequent failure to so occupy the property;

- failure by the borrower to accurately disclose his or her liabilities, including multiple other mortgage loans taken out to purchase additional investment property;
- inflated and fraudulent appraisals; and,
- pervasive violations of the loan originators' own underwriting guidelines and prudent mortgage-lending practices, including loans made to borrowers (i) who made unreasonable claims as to their income, (ii) with multiple, unverified social-security numbers, (iii) with debt-to-income and loan-to-value ratios above the allowed maximums, or (iv) with relationships to the applicable originator or other non-arm's-length relationships.

328. Ambac's findings are not unique. Independent consultants have analyzed loan files from the Bear Stearns securitization pipeline for other monoline bond insurers, and this has produced similar or worse results. For example, Syncora Guaranty Inc., analyzed hundreds of defaulting loans backing Bear Stearns PLMBS insured by Syncora, and found material breaches of representations and warranties in ***93%*** of the loans in one review, and ***95%*** in another. A subsequent randomly selected sample of 400 loans in Bear Stearns securitizations insured by Syncora demonstrated that **85.5%** of the loans breached one or more representations and warranties regarding loan quality.

329. As explained by Syncora: "The most prevalent and troubling of the breaches indentified by Syncora involve (i) rampant misrepresentations about borrower income, employment, assets, and intentions to occupy the purchased properties and (ii) the loan originator's abject failure to adhere to proper and prudent mortgage-lending practices and its own underwriting guidelines."

330. Confidential witness testimony further demonstrates the abandonment of underwriting guidelines and predatory lending by EMC and Bear Stearns Residential Mortgage. For example, CW-6 was an underwriter at Bear Stearns Residential Mortgage in 2006. He reveals that Bear Stearns Residential Mortgage engaged in predatory lending, regularly

approving loans without analyzing whether a customer could actually afford the loan. CW-6 also routinely rejected loans that his managers would later approve—despite the fact that these loans failed to meet underwriting guidelines pertaining to income, assets, or the appraised value of the homes.

331. Among the loans CW-6 underwrote were what the company called "no ratio loans." According to applicable guidelines, "no ratio" loans did not require underwriters to analyze whether the customer could actually afford the loan.

332. CW-6 stated that Bear Stearns Residential Mortgage also sold stated income and stated asset loans, which did not require any documentation to substantiate income or assets. The underwriter only needed to verify the fact of employment, but did not need to verify income levels.

333. CW-6's branch office of Bear Stearns Residential Mortgage underwrote about $150 million in mortgages every month in 2006. To maintain these numbers, CW-6 was under pressure to process about five loans each day. When CW-6 rejected loans because they did not meet underwriting guidelines as to income, assets, or appraisal values, account executives would often appeal his decision up the line to management. These appeals often resulted in an override of his decision to reject the loan, and its subsequent approval.

334. CW-6 reports that the borrowers who received approved loans from Bear Stearns Residential Mortgage did not fully understand the risks of some of the loans they were getting. "They didn't know they couldn't afford the loan," CW-6 stated.

335. CW-7 worked at EMC's Lewisville, Texas headquarters from 2000 to 2007 as a fraud auditor in the "fraud prevention" department. In addition to CW-7, the "fraud prevention" department had two underwriters and an analyst.

336. CW-7 audited loans that EMC had acquired from other lenders and that it was preparing to bundle and sell to investors as mortgage-backed securities. CW-7 was given a set of approximately 30 to 50 loan files each week to audit and determine whether they contained evidence of fraud. It was part of her job to take the perceived burden off the company's regular underwriters who suspected fraud in the loan files by reviewing the suspect loans, so that the other underwriters could keep their loan reviews and approvals flowing.

337. CW-7 regularly found fraud in the loan files she reviewed, including inflated appraisals, altered credit reports, investors using straw buyers for multiple properties and transactions, and titles that had been doctored. "There was a lot of misrepresentation and fraud," CW-7 said. Although CW-7 identified these problems throughout the portfolio she reviewed, she recalls in particular that the loans EMC acquired from Encore Credit—a mortgage originator—were rampant with fraud. In fact, there were so many issues with Encore Credit's loans that EMC was forced to buy Encore Credit in 2007.

338. CW-7 confirmed that loans in which she identified fraud remained in the mortgage pools that were sold to investors. These loans "were put in a pool and sold off to someone else. The 'dirty' loans got lost in the mix." CW-7 knew this occurred, because she witnessed it. "I was sitting right there. That was the strategy. If someone on the other end didn't catch it, so be it. It made me cringe."

339. CW-8 was also employed by EMC at its Lewisville, Texas headquarters as an underwriting coordinator at EMC from 2005 through the fall of 2007. As an underwriting coordinator, he reviewed loans that EMC had acquired from other lenders, and either approved or declined them before they were sold off for securitization. CW-8 explained that EMC's

strategy was to buy pools of loans, do as little analysis as possible on them, and sell them off to investors.

340. Beginning in about 2006, CW-8 started raising questions with his supervisors and colleagues about the quality of the loans that he was processing. Instead of taking his concerns seriously about poor loan quality, CW-8 was mocked, and given the nickname, "Eagle Eye," for spotting risk factors or red flags in loan files that others did not want to see.

341. At EMC during this period, CW-8, along with the other underwriting coordinators, was pushed to meet high production numbers for reviewing and approving loan files. EMC required CW-8 to review more than 10 loan files a day, and the emphasis was on quickly reviewing—and approving—as many loans as possible.

342. Given these pressures, CW-8 felt that most of the loans should have been given some "qualitative analysis" before being sold to investors. "We needed more due diligence in the system," he said. However, CW-8 believed that EMC was "not scrutinizing the loans enough." Rather, "we were told to make the deals go." The emphasis that CW-8 felt was on making his production numbers, not reviewing for loan quality or red flags in the file.

b. The mortgages originated by Bear Stearns Residential Mortgage Corporation and EMC Mortgage Corporation and securitized in the PLMBS purchased by the Bank provide further evidence of these originators' abandonment of sound underwriting practices.

343. As discussed in detail below, the Offering Documents contained serious material misstatements and omissions regarding specific characteristics of the loan pools securing the Certificates that included loans originated by Bear Stearns Residential Mortgage and EMC, including misstatements with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723

below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of Bear Stearns Residential Mortgage's and EMC's failure to observe its stated underwriting standards. Bear Stearns Residential Mortgage's and EMC's actual practices—including the use of unreliable appraisals, routine granting of underwriting exceptions and reliance on unverified borrower-supplied information—caused them to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

344. In summary, far from following their underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, at both Bear Stearns Residential Mortgage and EMC, variance from the stated standards was the norm, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that Bear Stearns Residential Mortgage and EMC abandoned their underwriting guidelines.

3. IndyMac Bank, F.S.B.

345. IndyMac Bank, F.S.B. ("IndyMac") originated underlying mortgage loans securing at least thirteen of the Certificates purchased by the Bank: BAFC 2006-D 1A1, BALTA 2006-4 13A1, CWALT 2007-OA9 A1, DBALT 2006-AR5 1A1, DBALT 2007-AR1 A1, INDX 2005-AR4 2A1A, INDX 2005-AR8 2A1A, INDX 2005-AR12 2A1A, INDX 2006-AR19 1A1, LUM 2006-3 11A1, LUM 2006-7 2A1, LXS 2007-9 1A1 and MSM 2007-5AX 2A2. IndyMac abandoned sound underwriting practices.

a. Government actions and related lawsuits and investigations demonstrate IndyMac's abandonment of sound underwriting practices and its predatory lending.

346. In 2010, IndyMac was identified by the OCC as the twelfth worst mortgage originator in the country based on the delinquency rates of the mortgages it originated in the ten metropolitan areas with the highest rates of delinquency.

347. As reported in the Audit Report of the Office of Inspector General, Department of Treasury, IndyMac made loans to borrowers who could not afford to repay them, an indicator of predatory lending:

> IndyMac often made loans without verification of the borrower's income or assets, and to borrowers with poor credit histories. Appraisals obtained by IndyMac on underlying collateral were often questionable as well. As an Alt-A lender, IndyMac's business model was to offer loan products to fit the borrower's needs, using an extensive array of risky option-adjustable-rate-mortgages (option ARMs), subprime loans, 80/20 loans, and other nontraditional products. Ultimately, loans were made to many borrowers who simply could not afford to make their payments.

SAFETY AND SOUNDNESS: MATERIAL LOSS REVIEW OF INDYMAC BANK, FSB, OIG-09-032, (February 26, 2009).

348. In describing what it referred to as IndyMac's "Unsound Underwriting Practices," the Inspector General's audit explained:

> IndyMac encouraged the use of nontraditional loans. IndyMac's underwriting guidelines provided flexibility in determining whether, or how, loan applicants' employment, income, and assets were documented or verified. The following procedures were used by the thrift:
>
> - No doc: income, employment, and assets are not verified
> - No income/no assets (NINA): income and assets are not verified; employment is verbally verified
> - No ratio: no information about income is obtained; employment is verbally verified; assets are verified
> - Stated income: income documentation is waived, employment is verbally verified, and assets are verified
> - Fast forward: income documentation is sometimes waived, employment is verbally verified, and assets may or may not be verified.

349. The Inspector General's audit also explained that:

> [A]mong other things, we noted instances where IndyMac officials accepted appraisals that were not in compliance with the Uniform Standard of Professional Appraisal Practice (USPAP). We also found instances where IndyMac obtained multiple appraisals on a property that had vastly different values. There was no evidence to support, or explain why different values were determined. In other instances, IndyMac allowed the borrowers to select the appraiser. As illustrative of these problems, the file for one 80/20, $1.5 million loan we reviewed contained several appraisals with values ranging between $639,000 and $1.5 million. There was no support to show why the higher value appraisal was the appropriate one to use for approving the loan.

350. The Inspector General's audit contained four examples of examined loans with serious underwriting failings and questionable appraisals. These included the following examples of IndyMac's conduct and the losses resulting from IndyMac's violation of underwriting standards and reliance on faulty appraisals:

> Loan 1
>
> On May 2, 2007, IndyMac approved a $926,000 stated income loan for the borrower, . . . an adjustable rate mortgage with a 5-year term and a beginning interest rate of 5.875 percent, which was subject to change monthly. . . .
>
> As a stated income loan, IndyMac performed no verification of the borrower's self-employment income of $50,000 a month ($600,000 annually). IndyMac also did not verify the borrower's assets. . . .
>
> The loan file contained an appraisal which indicated that the property value was $1.43 million. This value was based on comparable properties that had been improved with single family residences. However, the comparable properties were located closer to the ocean and bay, and their values were based on listing price instead of the actual selling price. The appraised value also did not take in consideration a slowdown in the real estate market. We saw no evidence in the loan file that IndyMac resolved these and other anomalies with the appraisal.
>
> The borrower made payments totaling $5,389 before defaulting on the loan. The unpaid principal and interest at the time of foreclosure totaled approximately $1.01 million. At the time of our review, the property was listed for sale for an asking price of $599,000.
>
> Loan 2

In November 2007, IndyMac approved a $3 million stated income loan, secured by the borrower's primary residence in Scottsdale, Arizona. The loan proceeds were used to refinance the primary residence which the borrower had owned for 11 years and reported its value as $4.9 million.

As a stated income loan, IndyMac performed no verification of the borrower's reported self-employment income of $57,000 a month ($684,000 annually). Contrary to IndyMac policy, the borrower selected the appraiser who appraised the property at $4.9 million.

Notes in the loan file indicated that the borrower had listed the property for sale in November 2006, first at a price of $4.9 million that was later reduced to $4.5 million before the borrower pulled the property off the market. Despite this, the appraiser concluded that the value of $4.9 million appeared to be reasonable. IndyMac accepted the appraiser's value based on a review of online sale and public records. It did not physically inspect the property.

The borrower made no payments on the loan before default. The total delinquent loan amount as of November 2008 was $3,015,625. According to the IndyMac official, the property sold in October 2008 for $2.0 million.

Loan 3

In February 2007, IndyMac provided the borrower a stated income, 80/20 loan, for a combined total of $1.475 million, to purchase a property in Marco Island, Florida. The combined loan equaled the appraised value of the property.

As a stated income loan, IndyMac performed no verification of the borrower's reported income of $28,500 a month ($342,000 annually). For 80/20 loans, IndyMac allowed an $800,000/$200,000 maximum loan amount and a maximum combined loan amount of $1 million. This loan was an exception to IndyMac policy as the combined loan amount of $1,475,000 exceeded the maximum combined loan amount. The loan exception was approved anyway.

Various appraisals in the loan file contained significant differences with no indication of how they were resolved by IndyMac. A January 2007 appraisal valued the property at $1.48 million. A valuation analysis prepared by an IndyMac employee on January 25, 2007, stated that the skill level of the appraiser was unacceptable—the appraiser had not provided accurate comparable properties to the subject property and did not accurately consider the location of the property. The IndyMac employee estimated the property value at $1 million and recommended that another appraisal be obtained. Another note in the loan indicated that the IndyMac official overruled the employee's recommendation and the appraisal was accepted. The IndyMac official, however, adjusted the appraised value approximately 10 percent lower, to $1.33 million, citing as a justification that a property on the same street had sold for $1.97 million.

The borrower made no payments before defaulting on the combined $1.48 million loans. According to the IndyMac official, the borrower deeded the property to the thrift in lieu of foreclosure. The IndyMac official estimated in November 2008 that the property was worth about $700,000.

Loan 4

In April 2002, IndyMac approved the borrower for a stated income home equity line of credit of $550,000. This line of credit was in addition to a 80/20 loan for $3 million that the borrower already had with IndyMac. The borrower reported that the property was worth $5.2 million.

As a stated income loan, IndyMac performed no verification of the borrower's reported gross income of $95,000 a month ($1.14 million annually) as the owner/manager of a limited liability corporation. The loan notes history did not indicate how IndyMac resolved negative information revealed in credit reports on the borrower. Two credit reports obtained in March 2002 listed serious and frequent delinquencies. An earlier credit report had noted a discrepancy with the borrower's social security number.

Various appraisals in the loan file also contained significant discrepancies with no indication of how they were resolved by IndyMac. Specifically, the appraisal for the original 80/20 loan, dated in October 2001, valued the property which the appraisal described as new construction at $5.2 million. This same value was reported by a second appraisal dated in March 2002. A third appraisal, dated in April 2002, placed the market value of the home at $508,500. The appraisal stated that the home was less than ½ mile from a hazardous waste facility. A fourth appraisal, also prepared in April 2002, valued the property at $730,000, with the lowest reasonable value at $590,000 and the highest reasonable at $900,000. This appraiser also reported that the home was built in 1959.

The borrower made payments totaling about $11,000 before defaulting on the $550,000 home equity line of credit loan. According to the IndyMac official, the thrift was able to recover approximately $600,000 on both loans. . . .

351. A June 30, 2008 report issued by the Center for Responsible Lending entitled INDYMAC: WHAT WENT WRONG? HOW AN "ALT-A" LEADER FUELED ITS GROWTH WITH UNSOUND AND ABUSIVE MORTGAGE LENDING concluded that IndyMac often ignored its stated underwriting and appraisal standards and encouraged its employees to approve loans regardless of the borrower's ability to repay.

352. The Center for Responsible Lending's report quotes an IndyMac underwriting team leader, Audrey Streater, as stating of her time at IndyMac: "I would reject a loan and the insanity would begin. It would go to upper management and the next thing you know it's going to closing."

353. The Center for Responsible Lending's report describes the recollection of another former underwriter for IndyMac, Wesley Miller:

> [W]hen he rejected a loan, sales managers screamed at him and then went up the line to a senior vice president and got it okayed. "There's a lot of pressure when you're doing a deal and you know it's wrong from the get-go—that the guy can't afford it," Miller told CRL. "And then they pressure you to approve it." The refrain from managers, Miller recalls, was simple: "Find a way to make this work."

354. The Center for Responsible Lending interviewed another former Indymac underwriter:

> Scott Montilla, who worked as an underwriter for IndyMac in Arizona . . . says that when salespeople went over his head to complain about loan denials, higher-ups overruled his decisions roughly half the time. "I would tell them: 'If you want to approve this, let another underwriter do it, I won't touch it—I'm not putting my name on it,'" Montilla says. "There were some loans that were just blatantly overstated. . . . Some of these loans are very questionable. They're not going to perform."

b. Private actions against IndyMac demonstrate IndyMac's abandonment of sound underwriting practices.

355. Multiple insurers of IndyMac-originated loans, including MBIA Insurance Corporation, FGIC, and Syncora—all of whom have experienced unprecedented losses in connection with the financial guarantee insurance they provided on IndyMac loans—have filed suit against IndyMac alleging the abandonment of underwriting standards based, in part, on their analysis of the loan files for IndyMac loans. Some of the allegations made by the insurers are virtually identical to the allegations made by the Bank here—namely that IndyMac completely

abandoned its underwriting standards in its rush to originate (and securitize) as many loans as possible.

356. By way of example, according to MBIA:

> IndyMac had abandoned any reasonable and prudent underwriting standards. In an effort to expand its market share during the mortgage lending boom, IndyMac systematically abandoned its own underwriting guidelines in pursuit of increased loan originations: it knowingly loaned millions of dollars to borrowers who could not afford to repay the loans, or who IndyMac personnel knew or should have known were including misstatements in their loan applications, often with the assistance and encouragement of IndyMac's employees and brokers, or who otherwise did not satisfy the basic risk criteria for prudent and responsible lending that IndyMac claimed to use.

357. This systematic abandonment of underwriting standards stands in sharp contrast to the representations made about IndyMac's underwriting standards in numerous documents, including investor prospectuses and prospectus supplements.

358. MBIA's allegations are supported by reviews of loan files backing PLMBS insured by MBIA. A review of the loan files of 418 defaulting loans in one of the PLMBS insured by MBIA indicated that *over 95%* of the defaulting loans failed to comply with IndyMac's representations and warranties with respect to its underwriting guidelines and policies. Similarly, a review of 297 defaulting loans in another PLMBS insured by MBIA indicated that *over 99%* failed to comply with IndyMac's stated underwriting guidelines and policies.

359. Syncora also analyzed various IndyMac loans backing PLMBS it insured. Out of the 107 loans analyzed by Syncora, 105 of the loans breached representations and warranties made by IndyMac to Syncora. These include (a) 83 loans in breach of the representation that "each Mortgage Loan was originated in all material respects in accordance with the applicable Originator's underwriting criteria in effect at the time of origination"; (b) 57 loans in breach of the representation that "each Mortgage Note be a legal, valid and binding obligation, all parties

had full legal capacity to execute the documents and convey real estate to the best of the Seller's knowledge, and there was no fraud involved in the origination of any Mortgage loan"; and (c) six loans in breach of the representation that "each Mortgage Loan contain an appraisal conforming to the standards of the applicable Originator."

360. In addition to similar allegations of the abandonment of underwriting guidelines by IndyMac, which are also based on review of loan files, FGIC alleges that IndyMac materially misrepresented the accuracy of data provided to FGIC for a securitization it insured, including the owner-occupancy status of a property, the combined LTV for the property, the borrower's DTI, and the borrower's FICO credit score. Again, this allegation is supported by evidence obtained by FGIC from its review of loan files it obtained in the course of its investigation.

361. The three insurers noted above have not been able to conduct complete analyses of the loan pools for which they provided insurance because IndyMac, despite its contractual obligations to the insurers, has refused to provide complete access to the loan files. For this reason, all three insurers are seeking judicial relief to gain access to these various loan files. Similarly, many of the Securities Defendants have repeatedly refused to provide the Bank with access to the files for the loans underlying its Certificates.

362. Other entities are also pursuing claims against IndyMac for abandoning its underwriting guidelines. For example, in May of 2009, Deutsche Bank National Trust Company, in its capacity as a trustee, filed suit against IndyMac Bank and the FDIC (in its corporate capacity as well as in its capacity as receiver and conservator for IndyMac Bank and IndyMac Federal Bank) over the more than 150,000 mortgage loans that IndyMac Bank had originated or acquired and sold to the trust. *See Deutsche Bank Nat'l Trust Co. v. FDIC*, No. 09-3852 (C.D. Cal.). Deutsche Bank's complaint asserts claims for breach of contract, breach of the

duty of good faith and fair dealing, and breach of fiduciary duty, and alleges that IndyMac breached numerous representations and warranties that it made to the trusts, including: (a) selling mortgage loans into the trusts that failed to comply with IndyMac's credit underwriting standards and origination process; (b) providing mortgage loan origination files that failed to contain required documentation; (c) originating mortgage loans that did not comply with applicable law; and (d) selling mortgage loans into the trusts that did not possess the characteristics set forth in the schedules to the relevant governing agreements. Encompassed in the Deutsche Bank case are three of the IndyMac-originated Certificates purchased by the Bank, INDX 2005-AR4, INDX 2005-AR8, and INDX 2006-AR19. Hence, like the Bank, the trustee for these very Certificates contends that IndyMac abandoned its underwriting guidelines, contrary to the statements in the Offering Documents.

c. Confidential witnesses provide further evidence of IndyMac's abandonment of sound underwriting practices.

363. Confidential witnesses provide additional evidence of IndyMac's failure to adhere to sound underwriting practices and guidelines, as well as appraisal guidelines.

364. According to CW-9—a former underwriter for IndyMac in Missouri from June 2005 to June 2007—she was required on a daily basis to approve loans that she believed should not be approved. IndyMac required underwriters who wanted to deny stated income loans to obtain management approval for the denial. As a result, CW-9 was frequently overruled, even when the income provided in the application was obviously overstated, such as when a cab driver from Chicago claimed to have $12,000 a month in income. Upset at being forced to approve clearly inaccurate loan applications, CW-9 many times noted in the file that "the loan was approved under duress."

365. CW-9 noted that IndyMac underwriters were under a lot of pressure to approve loans. IndyMac underwriters received bonuses based on the number of loans that they permitted to be funded, not the number of loans that they reviewed. According to CW-9, this structure incentivized the approval of unscrupulous loans and opened the doors to committing fraud on the inside. CW-9 stated that a broker could not commit fraud unless an underwriter approved it, and there were certain underwriters that would approve anything, no matter how blatant, because they wanted a larger paycheck. In fact, in 2007, CW-9 recalled being required, along with the other underwriters in her department, to come in on a Saturday and review the loan files for stated income loans that had been previously funded. CW-9 believes that during this time period a lot of questions were coming up about the loans being reviewed, and CW-9 and her colleagues went through every loan her department had approved to see whether or not the stated salary was within the correct range—as indicated by salary.com—for the job description of the loan applicant. CW-9 found a lot of overstated incomes in the files that had been reviewed by other underwriters—"some of the underwriters would rather see a bigger paycheck than do the right thing."

366. The testimony of CW-10, a former underwriter for IndyMac in California from 2006 to 2008, and CW-11, a former underwriter for IndyMac in New Jersey from 2004 to 2007, further confirm IndyMac's abandonment of underwriting standards. CW-10 stated that on several occasions she suspected that stated-income loan applications contained inflated income information. In particular, she recalls a gardener in California who purportedly made $20,000 a month. Notwithstanding her concerns, because the loan applicant had a sufficiently high FICO score, IndyMac's automated system—eMITS—approved him for the loan. When CW-10 questioned this approval, she was informed that because the system approved it, she needed to

process the loan. CW-10 also recalled that the bonus system—which was based on the number of loans funded—incentivized underwriters to quickly approve loans. Those underwriters who failed to meet their quotas were written up. Similarly, CW-11 reported that no-documentation and stated income loans were "the norm" during CW-11's tenure as an underwriter, with CW-11 stated that his managers approved loans that CW-11 would not have approved, and were known to overrule CW-11 on loans that he denied. CW-11 believed that IndyMac did too many no-doc and stated income loans, and approved deals that should not have been approved.

367. CW-9 also testified as to the loosening of appraisal standards. When CW-9 first started at IndyMac, the bank had an automated system for scoring appraisals that took into account different factors such as the location of the property and the date of the comparable sales. Based on the scoring of this data, certain appraisals were sent to IndyMac's appraisal review department, which denied a lot of loans. According to CW-9, at a certain point management concluded that too many loans were being reviewed and denied, so management relaxed the standards, thereby reducing the number of appraisals automatically sent to the review department. CW-9 worked on the same floor as the appraisal review department, and recalls talking with appraisal reviewers who complained "a lot" that they had a strong belief that "they weren't seeing appraisals [they should be seeing]," i.e., that suspect appraisals were not being reviewed.

368. CW-9's testimony was confirmed by CW-12, who began working for IndyMac in California as a licensed real estate appraiser trainee and who did appraisals for IndyMac in 2006 and 2007. CW-12 recalls being blacklisted over her appraisal of a California home with a separate guest house. Consistent with standard appraisal practices, CW-12 did not include the guest house's square footage in the main house, and refused to do so even under pressure from

IndyMac. CW-12's refusal prompted IndyMac to stop sending her work, and an IndyMac representative verbally confirmed that she had been placed on a blacklist.

d. The mortgages originated by IndyMac and securitized in the PLMBS purchased by the Bank provide further evidence of IndyMac's abandonment of sound underwriting practices.

369. IndyMac originated mortgages that secured at least twelve of the Certificates in this action. As discussed in detail below, the Offering Documents contained serious material misstatements regarding specific characteristics of the loan pools securing these Certificates, including misstatements and omissions with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of IndyMac's failure to observe its stated underwriting standards. IndyMac's actual practices—including the use of unreliable appraisals, routine granting of underwriting exceptions and reliance on unverified borrower-supplied information—caused it to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

370. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was the norm at IndyMac, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that IndyMac abandoned its guidelines and engaged in predatory lending.

4. Washington Mutual Mortgage Securities Corp.

371. Loans backing two of the Certificates (Certificates JPALT 2006-A1 1A1 and LUM 2007-2 1A1) were originated by Washington Mutual Mortgage Securities Corp., a wholly owned subsidiary of Washington Mutual Bank, and loans backing Certificate HVMLT 2006-8 2A1A were originated by Washington Mutual Bank. These originators are referred to individually and collectively herein as "WaMu."

372. Investigations into the practices of WaMu reveal the depth and breadth of its abandonment of underwriting standards, appraisal standards, and its predatory lending practices.

373. A review of the investigations and related litigation involving WaMu, as well as confidential witness testimony obtained during the Bank's investigation, demonstrate that these mortgage originators systematically violated and ignored their stated underwriting guidelines, rendering materially misleading the statements in the Offering Documents regarding underwriting practices, appraisals and LTVs, and predatory lending. This evidence is reinforced further by the analysis of the performance of the actual loan pools backing the PLMBS purchased by the Bank.

a. Government actions and related lawsuits and investigations demonstrate WaMu's abandonment of sound underwriting practices.

374. As reported at the Senate Subcommittee hearing on Wall Street and the Financial Crisis held on April 13, 2010, identified high risk loan practices by WaMu, concluding:

> **Shoddy Lending Practices.** WaMu used shoddy lending practices riddled with credit, compliance and operational deficiencies to make tens of thousands of high risk home loans that too often contained excessive risk, fraudulent information, or errors.
>
> **Steering Borrowers to High Risk Loans.** WaMu too often steered borrowers into home loans they could not afford, allowing and encouraging them to make low initial payments that would be followed by much higher payments, and presumed that rising home prices would enable those borrowers to refinance their loans.

> **Securitizing Delinquency-Prone and Fraudulent Loans.** At times, WaMu selected and securitized loans that it had identified as likely to go delinquent, without disclosing its analysis to investors who bought the securities, and also securitized loans tainted by fraudulent information, without notifying purchasers of the fraud that was discovered.
>
> **Destructive Compensation.** WaMu's compensation system rewarded loan officers and loan processors for originating large volumes of high risk loans, [and] paid extra to loan officers who overcharged borrowers or added stiff prepayment penalties . . . .

375. A November internal 2005 review of WaMu loans in southern California found "an extensive level of loan fraud . . . virtually all of it stemming from employees in these areas circumventing bank policy surrounding loan verification and review." According to the *Seattle Times*, "[a]t one California office, 58 percent of loans examined in an internal review were fraudulent; at another, 83 percent." Drew DeSilver, *WaMu Execs Saw Warning Signs of Deteriorating Loans*, Seattle Times, Apr. 12, 2010, at A1.

376. A WaMu PowerPoint presentation presented to Kerry Killinger, Steve Rotella and many other WaMu executives was disclosed at the April 13, 2010 hearing before the Senate Subcommittee on Investigations. The presentation, which examined the risk management of WaMu's home loan division, examined 187 loan files that had made a first payment default. The presentation revealed that of these 187 files, there was "confirmed fraud" on 115. 17 were "highly suspect." 133, or 71%, "had credit evaluation or loan decision errors." 58, or almost one-third, "had appraisal discrepancies or issues that raised concerns." Of the 187 loans, 112 had required no documentation of income; out of these 112, 80 were identified "for lack of reasonableness of income."

377. Another internal memorandum presented at the Senate Subcommittee hearings, titled "So. California Emerging Markets Targeted Loan Review Results," explained that "[o]f the 129 detailed loan review[s] that have been conducted to date, 42% of the loans reviewed

contained suspect activity or fraud, virtually all of it attributable to some sort of employee malfeasance or failure to execute company policy. . . . On average, 78% of the funded retail broker loans reviewed were found to contain fraud . . . principally centered in misrepresentation of loan qualifying data and appraisal issues."

378. Another exhibit at the April 13, 2010 Senate Subcommittee hearing explained how: "[o]ne Sales Associate admitted that during that crunch time some of the Associates would 'manufacture' asset statements from previous loan docs and submit them to the LFC [Loan Fulfillment Center]. She said the pressure was tremendous from the LFC to get them the docs since the loan had already funded and pressure from the Loan Consultants to get the loans funded [sic]."

379. At one point, the *Seattle Times* reports that over three quarters of WaMu's $58.9 billion portfolio of option-ARM loans had been issued as limited documentation loans. Drew DeSilver, *Big Dreams of WaMu Dashed By Risky Loans*, Seattle Times, Sept. 21, 2008 at H1.

380. As explained in the *Seattle Times*, WaMu increasingly favored "low-documentation" loans, "lean[ing] more and more heavily on credit scores, which could be ascertained while the borrower was still on the phone." Nancy Erken, a WaMu loan consultant in Seattle, is quoted as stating that at WaMu at this time "the big saying was 'a skinny file is a good file.'" She also explained how she would try to document borrowers' ability to afford their loans but that her experience was that when she would "take the files over to the processing center in Bellevue . . . . [T]hey'd tell me 'Nancy, why do you have all this stuff in here? We're just going to take this stuff and throw it out.'" DeSilver, *Reckless*, Seattle Times, *supra* ¶ 202 at A1.

381. In a 2005 memo obtained by the *Seattle Times*, WaMu risk managers were told they needed to "shift ways of thinking" so they would no longer be a "regulatory burden" on lending operations and instead act as a "customer service" to support growth. *Id.*

382. The *Seattle Times* further reported that Dale George, a senior credit-risk officer in Irvine, California attended an "all hands" meeting of risk managers where Melissa Martinez, WaMu's chief compliance and risk oversight officer, emphasized "the softer side of risk management." George explained that the message was: "They weren't going to have risk management get in the way of what they [production] wanted to do, which was basically lend the customers more money." *Id.*

383. WaMu Senior Mortgage Underwriter Keysha Cooper, who started at WaMu in 2003 and left in 2007, was quoted by the *New York Times* explaining that "[a]t WaMu it wasn't about the quality of the loans; it was about the numbers . . . . They didn't care if we were giving loans to people that didn't qualify. Instead it was 'how many loans did you guys close and fund?'" Cooper continued to explain how the pressure became intense in 2007 and admitted that "I swear 60 percent of the loans I approved I was made to . . . . If I could get everyone's name, I would write them apology letters." Gretchen Morgenson, *Was There a Loan It Didn't Like?*, N.Y. Times, Nov. 1, 2008 at BU1.

384. Another *Seattle Times* report quotes Mary Kay Morse, a 20-year veteran at WaMu whose job was to persuade independent brokers to make option ARM loans, stating, as to option-ARMs: "I hated that loan . . . . It's just not a good loan. It wasn't good for the borrower." She continued that whereas at one time: "I always felt like I worked for a really honest industry that cared for the borrowers they dealt with," in her opinion the corporate culture had changed to:

"[w]e just want to do the most we can to make money for the bank." David Heath, *Hometown Bank Turned Predatory,* Seattle Times, Oct. 26, 2009, at A1.

385. The reason for WaMu's adoption of these highly risky and unsuitable products was simple. As the *Seattle Times* explained:

> As demand [for traditional loans] waned, lenders tried to entice business by slashing profit margins on conventional mortgages, such as the 30-year fixed. WaMu's chief business was making home loans, yet it lost money on that segment in the third quarter of 2003.
>
> By November, WaMu had eliminated 4,500 full-time jobs in home lending and ousted the division head. By year's end, its mortgage business had shrunk with alarming speed, down by about half from the summer.
>
> After [Kerry] Killinger [WaMu's CEO] finished speaking, Chief Financial Officer Tom Casey got up and presented WaMu's solution.
>
> WaMu had other types of loans, such as subprime and home-equity lines of credit, that remained highly profitable. He noted there was even a specialty loan for borrowers with good credit that remained lucrative, the option ARM.
>
> As Casey explained it, the bank recently had beefed up its commissions and retrained its sales force to push option ARMs. In just the past few months, they had climbed from 15 to 35 percent of its mortgage business.
>
> The loan—mind-numbingly complex and highly risky for both the bank and its customers—originally was created for the savviest and most risk-tolerant of borrowers.

Heath, *supra* ¶ 384 at A1.

386. Unsurprisingly, given its predatory practices and abandonment of any genuine underwriting standards, the *Seattle Times* reported that "WaMu's subprime loans failed at the highest rates in the nation. . . . In the 10 hardest hit cities, more than a third of WaMu subprime loans went into foreclosure." DeSilver, *Reckless*, Seattle Times, *supra* ¶ 202 at A1.

b. WaMu manipulated the appraisal process.

387. WaMu manipulated the appraisal process to inflate the reported value of real estate properties thereby artificially depressing the LTVs based on the appraisals. Multiple

government investigations, including ones by the Senate Permanent Subcommittee on Investigations and the New York Attorney General's office, have examined the appraisal practices of WaMu. The internal documents recently released to the public by these investigations reveal that: (1) appraisal fraud infected the origination of mortgages; and (2) WaMu actively pressured appraisers to inflate their appraisals or manipulated the appraisals themselves so that more loans could close and subsequently be securitized.

388. Internal WaMu documents released by the Senate Subcommittee on Investigations demonstrate that appraisal fraud infected its mortgage origination process. According to an internal WaMu memorandum presented at the April 2010 Senate Subcommittee hearing regarding a review of loans from 2003-2005, *78%* of the funded retail broker loans reviewed by WaMu's Risk Mitigation department were found to contain fraud that principally involved misrepresentation of loan qualifying data and appraisal issues.

389. One specific example of appraisal fraud for a WaMu originated loan involved an appraisal value for a property that apparently was based on both the value of the property *and the value of another house located in Mexico*. As WaMu's internal "Fraud Risk" PowerPoint notes, the inclusion of this additional house might explain why the appraisal value of $400,000 was so much higher than the $240,000 sales price of the property. Moreover, the appraisal omitted other important information, including that the property use was "illegal" because there was a third unpermitted unit on the property. This appraisal was not referred to an underwriter because the WaMu office manager waived the requirement for an underwriter to review the appraisal.

390. Another specific example for a WaMu originated loan involved an appraisal that contained false data regarding the subject property's site and building sizes as well as numerous warning signs that the appraisal was unreliable. The borrowers were refinancing a first mortgage

that they had previously obtained from WaMu a year earlier. According to the Fraud Report, the appraisal contained multiple red flags. The property had appreciated in value by *90%* (from $322,000 to $610,000) in a *single year*; the occupancy type was an investment property; the automated valuation model ("AVM") reflected a more probable value of $400,000. Further, the "comparables"—properties with characteristics similar to the appraised property—did not appear comparable; two out of the three "comparable" properties were located 3-4 miles away, and the comparable properties were given large upward adjustments in value to account for differences in design, functionality, square footage and lot size. Notwithstanding these warnings, the appraisal was not reviewed by underwriters. The Fraud Report also notes that the refinancing transaction was a "cash out refinance," and that the funds from this refinancing were needed *to close another loan that WaMu was processing for the borrower*. In other words, not one, but two transactions were dependent upon the appraisal coming in at value, even if that meant a 90% increase in the appraised value over the course of a single year.

391. Another internal document dated December 2006 states that "[WaMu subsidiary] Long Beach [Mortgage] represents a real problem for WaMu," and forwards the results of "post-funding review team" tasked with reviewing, on a monthly basis, 275 loans within 15 days of funding. The review team identified, as a "top five priority" issue "[a]ppraisal deficiencies that could impact value and were not addressed." The review also emphasized that both the Corporate Credit Review department and the Senior Credit Officer Subprime were focused on "two key facts"—that "[t]he non accrual rate had increased year over year from 3.53% to 6.13%," and that "[o]n a vintage basis the deterioration was accelerating in recent vintages with each vintage since 2002 having performed worse than the prior vintage." As noted above, LTVs and a borrower's equity in his or her home are strongly indicative of a borrower's likelihood of

defaulting. To the degree that inflated appraisals understate the LTVs, and overstate a borrower's equity, one would expect to find increasing rates of non-accrual correlated with increasingly unreliable appraisals.

392. On November 1, 2007, the New York Attorney General filed *People v. First Am. Corp. and First Am. eAppraiseIT*, No. 46796/2007 (N.Y. Sup. Ct.) ("eAppraiseIT Compl."), alleging that eAppraiseIT colluded with WaMu to inflate the appraisal value of homes.

393. eAppraiseIT was one of two appraisal management firms hired by WaMu in the Spring of 2006 when WaMu decided to close its internal appraisal office. WaMu was eAppraiseIT's largest client, and on information and belief, eAppraiseIT performed appraisals for loans included in the loan pools for Certificates purchased by the Bank.

394. The New York Attorney General's complaint, which relies on multiple internal documents and emails—many of which have only recently become publicly available—demonstrates that WaMu actively encouraged the manipulation of appraisals to facilitate the origination of more and more mortgages for securitization. In 2009, the trial court denied eAppraisIT's motion to dismiss, finding that the complaint sufficiently alleged a violation of New York law, "insofar as the intentional misleading of consumers in this state relating to the accuracy and independence of appraisals constitutes fraudulent and deceptive business practices that the [Attorney General] may seek redress for." *People v. First Am. Corp.*, 24 Misc. 3d 672, 682 (N.Y. Sup. Ct. 2009).

395. From its inception, the relationship between WaMu and eAppraiseIT was focused on undermining the appraisal process by pressuring appraisers to come in "at value"—provide appraisals that were equal to or greater than a property's purchase price in order for a transaction to close. WaMu's efforts to pressure appraisers included: (1) excessive "Reconsideration of

Value" requests to reconsider appraisals that were too low to permit a loan to be funded; (2) demanding that "business managers"—many of whom were former WaMu employees—have the authority to overrule appraisals that were too low; (3) constantly complaining that appraisals by eAppraiseIT appraisers were lower than appraisals from eAppraiseIT's chief competitor; (4) making clear to senior management at First American (eAppraiseIT's parent company) that any expanded business relationship was contingent upon the "resolution" of the appraisal issue to WaMu's satisfaction; and (5) ultimately creating a blacklist designed to punish appraisers who failed to inflate their appraisals to come in "at value."

396. According to the New York Attorney General's complaint, and the internal documents referenced therein:

- WaMu retained eAppraiseIT in Spring 2006, after WaMu decided to close its internal appraisal office and terminate its staff appraisers. WaMu quickly became eAppraiseIT's largest client.

- From the beginning, WaMu possessed the ability to pressure eAppraiseIT's staff and third party appraisers to increase their valuations. WaMu had a contractual arrangement with eAppraiseIT whereby WaMu could challenge an independent appraiser's conclusions by requesting a "Reconsideration of Value," if WaMu disagreed with an appraisal. WaMu frequently ordered Reconsiderations of Value from eAppraise IT.

- eAppraiseIT also hired approximately 50 former WaMu appraisers as eAppraiseIT staff appraisers and Appraisal Business Managers. At WaMu's request, these "business managers" were authorized to override and revise the values reached by staff and third party appraisers. According to a September 29, 2006 email from a WaMu executive to senior executives at eAppraiseIT, the business managers would be responsible for "proactively making a decision to override and correct the third party appraiser's value or reviewer's value cut, when considered appropriate and supported."

- Almost immediately after retaining eAppraiseIT, WaMu's loan production staff began to complain that eAppraiseIT's appraisals were too low. On August 9, 2006, eAppraise IT's President informed WaMu executives that "[w]e need to address the [Reconsideration of Value] issue . . . . The Wamu internal staff we are speaking with admonish us to be certain we solve the [Reconsideration of Value] issue quickly or we will all be in for some pretty rough seas."

- The following week, eAppraiseIT's Executive Vice President informed eAppraiseIT's President that WaMu's loan officers would often pressure WaMu internal appraisal field managers for a "extra few thousand," or "tell[] them specifically what they needed," or "would ask for several [Reconsiderations of Value] on the same property." According to the vice president, "[h]aving loan officers ask for a few thousand dollars because it is within the range is something we do not currently do for any client . . . . It is also direct pressure on the appraiser for a higher value without any additional information."

- During the latter part of 2006, WaMu repeatedly complained to eAppraiseIT regarding low appraisals. On December 2, 2006, an internal eAppraiseIT communication notes that "we know [WaMu is] going to complain about the excessive number of low values because the majority of orders are not going to [WaMu's] preferred appraisers."

- By December 2006, WaMu had reassigned all of its Northern California appraisal work to Lender Services, Inc. and away from eAppraiseIT. One eAppraiseIT executive told his colleagues that WaMu's criticism stemmed from the fact that "values are coming in lower with [eAppraiseIT]," than with Lender Services, Inc., its top competitor for WaMu work, and that "[t]he [WaMu] managers indicated that if the loan consultants had a choice they would prefer to use [Lender Services] over eAppraiseIT because they feel they will have less problem with the values."

- In addition to pressuring eAppraiseIT regarding low appraisals, WaMu also indicated to First American, eAppraiseIT's parent company, that WaMu would be open to expanding its business relationship with First American, provided the appraisal issues were "resolved." According to a First American executive, the President of WaMu mortgage told him that "if the appraisal issues are resolved and things are working well he would welcome conversations about expanding our relationship."

- In early 2007, WaMu directed eAppraiseIT to stop using panels of staff and third party appraisers to perform WaMu appraisals, and demanded that eAppraiseIT use "Proven Appraisers" selected by WaMu. The President of eAppraiseIT explained to First American executives the reason for this change: "Performance ratings to retain position as a Wamu Proven Appraiser will be based on how many come in on value, negating the need for a[] [Reconsideration of Value]."

- eAppraiseIT's President informed the First American executives that "we have agreed to roll over and just do it." The President of eAppraiseIT also wrote to WaMu's executives stating that "Wamu proven appraisers bring the value in a greater majority of time . . . . I am fine with that, of course, and will happily assign Wamu orders to Wamu proven appraisers instead of eAppraiseIT's approved panel appraisers whenever possible."

- Internal eAppraiseIT communications indicate that WaMu's *lending department* was in charge of selecting the preferred appraisers. An eAppraiseIT Appraisal Specialist contacted the Executive Vice President, the Chief Operating Office and the Chief Appraiser about two "good, solid long-time wonderful appraisers" that were removed from the WaMu panel "for no apparent reason" after having "value issues." The Chief Appraiser informed him that "[t]he probability that a loan officer requested him to be removed is pretty high I think because that is what they did with the Master List; they sent it out to Lending to choose."

- eAppraiseIT was willing to accede to WaMu's demands that its lending department select its appraisers, despite knowing that these demands violated federal law and professional appraisal standards by compromising appraiser independence. eAppraiseIT's President expressly acknowledged that "[w]e view this [agreeing to WaMu's demands] as a violation of the OCC, OTS, FDIC, and USPAP influencing regulation."

397. In addition, documents that have only recently become publicly available demonstrate WaMu's efforts to manipulate the appraisal process.

398. The Bank has reviewed an August 10, 2010 affidavit by Peter Gailitis, a former Chief Appraiser for eAppraiseIT. Mr. Gailitis was promoted to Chief Appraiser in 2006, and was Chief Appraiser during the time period that WaMu outsourced its appraisal business to eAppraiseIT.

399. The Gailitis Affidavit indicates that from the beginning of eAppraiseIT's relationship with WaMu in Spring 2006, WaMu began pressuring eAppraiseIT appraisers to inflate their appraisals. (*Id.*, ¶¶ 5, 6) According to Mr. Gailitis, shortly after eAppraiseIT began performing appraisals for WaMu loans, Mr. Gailitis began receiving "many complaints" from WaMu managers over the "allegedly low values" being provided by eAppraiseIT appraisers. (*Id.* ¶ 6)

400. One of WaMu's primary methods for increasing appraisals was to flood eAppraiseIT with requests for Reconsiderations of Value. According to Mr. Gailitis, WaMu submitted considerably more Reconsiderations of Value than any other eAppraiseIT client, with the volume from WaMu loan officers reaching *four hundred* Reconsiderations of Value per

month at one point. (*Id.*, ¶ 6) WaMu loan officers would file a Reconsideration of Value simply because the appraised value of a property was too low for a loan to close, and use the Reconsideration of Value as a tool for obtaining a sufficient increase in value for the transaction to go forward. (*Id.*, ¶ 6)

401. In addition to abusing the Reconsideration of Value process, WaMu also sought to use its considerable economic leverage to manipulate the appraisal process. Mr. Gailitis testified that WaMu was eAppraiseIT's largest client, and that WaMu management would pass along the complaints regarding low appraisals to eAppraiseIT management, along with a threatened loss of business if the complaints from WaMu's retail divisions did not stop. (*Id.*, ¶ 7)

402. An internal email from David Feldman, the Executive Vice President of eAppraiseIT, to Anthony Merlo, the President, also makes clear that WaMu's manipulation of the appraisal process pre-dated its relationship with eAppraiseIT. (Aug. 15, 2006 email from Mr. Feldman to Mr. Merlo.) According to Mr. Feldman, WaMu had an "extra few thousand" policy under which loan officers would ask for, and apparently receive, increases in appraisals of a few thousand dollars if the inflated appraisal was still "within the range." Mr. Feldman emphasized that this was something that eAppraiseIT does "not currently do for any client," and that it constitutes "direct pressure on the appraiser for a higher value without any additional information." Mr. Feldman also noted that the WaMu staff he spoke with indicated that this "policy was abused in many ways including calling the [appraisal field manager] and telling them specifically what they needed," or asking for multiple Reconsiderations of Value on the same property (a practice that became so prevalent that the appraisal field managers began allowing only one Reconsideration of Value for free and then charging $175 for each additional one).

403. A fall 2006 email from eAppraiseIT President Merlo to executives at First American (eAppraiseIT's parent company) and WaMu further illustrates WaMu's efforts to manipulate the process and eAppraiseIT's concerns. (Sept. 13, 2006 email from Mr. Merlo to Mr. Sando.) Mr. Merlo's email forwards various instances of WaMu pressure on appraisers, including WaMu production staff regularly contacting appraisers to "argue and often berate them" over their appraisals, or informing appraisers that if they do not increase their valuations, the appraisal request will be given to another appraiser to get the appropriate "price." Mr. Merlo warns that these efforts to pressure appraisers are "getting outrageously unethical and now borderline dangerous," and he implores WaMu's executives to "respond [with] what you will do to have this stopped within the WaMu organization." As Mr. Merlo candidly acknowledges, WaMu's actions are "pure pressure to commit fraud."

404. Notwithstanding President Merlo's concerns, WaMu continued its efforts to manipulate the appraisal process. In April 2007, eAppraisetIT expressed concern that WaMu loan production staff had "a great deal to do with selecting appraisers," which was "directly in contradiction" with the interagency guidelines adopted by the OTS, the agency responsible for regulating WaMu. (Apr. 17, 2007 memo to WAMU Oversight Team)

c. WaMu engaged in predatory lending.

405. At WaMu, mortgage originators were paid more for originating loans that carried higher profit margins for WaMu and had commensurately higher risk. As James G. Vanasek, WaMu Bank's former Chief Credit Officer/Chief Risk Officer, testified to the Senate Permanent Subcommittee on Investigations:

> Because of the compensation systems rewarding volume vs. quality and the independent structure of the loan originators, I am confident that at times borrowers were coached to fill out applications with overstated incomes or net worth adjusted to meet the minimum underwriting policy requirements.

In a document entitled "2007 Product Strategy," WaMu noted that it must "maintain a compensation structure that supports the high margin product strategy." The *Seattle Times* reported how a 2007 compensation grid revealed that "the company paid the highest commissions on option-ARMs, subprime loans and home-equity loans. A $300,000 option ARM, for example, would earn a $1,200 commission, versus $960 for a fixed rate loan of the same amount. The rates increased as a consultant made more loans. . . ." DeSilver, *Reckless*, Seattle Times, *supra* ¶ 202. Likewise, a WaMu "Retail Loan Consultant 2007 Incentive Plan" explained that "[i]ncentive tiers reward high margin products... such as the Options ARM, Non-prime referrals and Home Equity Loans . . . ."

406. In April 2010, the Senate Permanent Subcommittee on Investigations held a series of hearings into the causes of the financial crisis. The Senate Subcommittee concluded that WaMu often steered borrowers into home loans with low initial payments they could afford only in the short term, if at all, presuming that rising home prices would enable those borrowers to refinance or sell their homes before the loan payments ballooned beyond a level they could not afford. Internal compensation schemes encouraged such conduct because loan officers and loan processors were rewarded for originating high risk loans and for placing borrowers in high interest loans with large prepayment penalties.

407. The details of how WaMu paid brokers to press borrowers into buying unsuitable loans at high interest rates, and often pressured borrowers to refinance from a fixed rate loan into a variable rate loan with higher interest rates, is illustrated by the story of Bob Houk:

> Usually, Bob Houk's wife handled the family's money matters. But after being diagnosed with a brain tumor, she was in and out of the hospital, so he took over. In late 2006, he received a postcard with WaMu's logo on it.
>
> Houk already had a 30-year WaMu mortgage at a fixed rate of 4.6 percent. But the postcard promised to lower the monthly payments on their Bainbridge Island home with an adjustable-rate mortgage starting at only 1 percent interest.

He liked the idea of cutting expenses. A son was in college, his wife was on disability from her job as a nurse, and Houk, a physician assistant at Group Health, worked only part time to be at her side.

Houk called the number on the card, reached an independent mortgage broker in California, and made all the arrangements over the phone. Soon someone came to his house with papers to sign. Houk was impressed at how easy the process was.

But a couple of months later, Houk noticed something on his monthly statement that gave him a sick feeling. Instead of one low monthly payment, there were now options. His minimum monthly payment of only $1,018 was there. But there were also higher-priced options for paying interest only or for paying interest and principal. Just covering the interest that month would cost him about $1,000 more.

The 1 percent interest rate Houk thought he was getting was only good for the first month. It had reset to 7.4 percent, nearly 3 percentage points above his previous WaMu loan. This was buried in the fine print in a sheaf of legal documents he had signed. "Who in their right mind would give up a 4.6 percent loan?" Houk said. "I felt totally duped."

Houk said he called Washington Mutual, but the woman he talked to said nothing could be done. WaMu just gets the loan from the broker, he recalled her saying, so the bank's not responsible.

To drum up customers for these overpriced loans, WaMu offered hefty commissions to its sales force.

Loan officers working inside WaMu were rewarded with higher commissions for signing up a borrower for an option ARM rather than a conventional loan.

But WaMu made the vast majority of its option ARMs through its network of independent mortgage brokers. They worked in a loosely regulated industry. In many states, the job required no education, no background check and no oversight. While there are reputable brokers, the industry suddenly attracted a motley crew, who could make six figures in a year in commissions.

WaMu did not reward brokers for getting its customers the best deal. Just the opposite. The worse the terms were for borrowers, the more WaMu paid the brokers.

A WaMu daily rate sheet obtained by The Seattle Times shows how lavish the rewards could be. On an option ARM, WaMu would reward brokers as much as 3 percent of the loan amount—more than triple the standard commission at the time.

> Brokers would get an additional point—1 percent of the loan—for roughly every half-point in higher interest the borrower paid. So the broker would get 3 percent of the loan if he could get the borrower to pay 1.5 percent above the market rate.
>
> WaMu could afford to pay such high commissions, called "yield spread premiums," because the money actually came from the borrower in the form of higher interest rates and prepayment penalties.
>
> Houk's broker, for example, got paid a commission of $9,498 on a $316,000 loan, according to loan documents.

Heath, *supra* ¶ 384 at A1.

408. Moreover, WaMu was among 14 lenders named by the NAACP in a complaint alleging "systematic, institutionalized racism in sub-prime home mortgage lending." According to the lawsuit, African American homeowners who received sub-prime mortgage loans from these lenders were more than 30 percent more likely to be issued a higher rate loan than Caucasian borrowers with the same qualifications. In January 2009, the court denied a motion to dismiss, finding that the plaintiff had sufficiently pled a disparate impact claim.

409. Of particular note among the many other cases against WaMu with regard to its loan origination practices, in September of 2010, Deutsche Bank National Trust Company, in its capacity as a trustee, filed suit alleging breach of contract and seeking a declaratory judgment and damages over 99 different trusts created, sponsored and/or serviced by WaMu, and which included loans originated by WaMu. *See* Am. Compl., *Deutsche Bank Nat'l Trust Co. v. FDIC*, No. 09-cv-1656-RMC (D.D.C. Sept. 8, 2010). The allegations in Deutsche Bank's complaint are very similar to the ones made by the Bank here. These allegations include that WaMu engaged in "shoddy lending practices," "performed inadequate underwriting," and securitized "delinquency prone and fraudulent loans." The trustee's contract claim is based on numerous breaches of representations and warranties, including representations and warranties that the loans complied with laws prohibiting predatory lending, that the loans were written in

accordance with the seller's underwriting guidelines as described in the prospectus supplement, that appraisals were conducted generally in accordance with WaMu's underwriting guidelines, that the LTV for each mortgage loan was no greater than 100% at the time of origination, and that "to the best of the seller's knowledge, no misrepresentation, negligence, fraud or similar occurrence with respect to a Mortgage loan has taken place on the part of any person, including without limitation, the Mortgagor, any appraiser, builder or developer, or any other party involved in the origination of the mortgage loan."

d. Confidential witnesses provide further evidence of WaMu's failures to adhere to sound underwriting practices, predatory lending, and manipulation of the appraisal process.

410. Confidential witnesses such as CW-13 provide further evidence that WaMu abandoned sound underwriting practices. CW-13 worked at WaMu from 1987 until the fall of 2006. During her time at WaMu, CW-13 held such positions as personal financial manager, assistant branch manager, and branch manager. In these capacities, CW-13 worked in consumer lending, including loan origination.

411. CW-13 saw many "stated income" loans at WaMu. If the borrower had false documents or if CW-13 believed that the borrower's income would not be high enough (as evidenced by paystubs) to qualify for a loan, CW-13 would instruct the borrower not to show her the documents and she would simply offer a "stated income" loan.

412. CW-13 also said that WaMu underwriters frequently made exceptions on the loans in order to approve them; moreover, she knew who the "lenient" underwriters were and would direct her loans to them so that they would be approved. CW-13 used different tactics in order to get loans approved by the underwriter; for example, she would write the documents up in a special way so that the loans would always be approved, even if a borrower was not strong enough to otherwise qualify.

413. Even if loans were declined by certain underwriters, CW-13 said she could always ask for the loan to be reviewed again. Sometimes she would call the borrower to tell them why a loan was denied, and the borrower would come back with new facts or new documentation. According to CW-13, there was a lot of "fudging" that took place in those situations.

414. CW-13 also confirmed that during the time period she was employed at WaMu, including 2005 and 2006, appraisals were manipulated to reach a value necessary for the loan to close. CW-13 would order appraisals from the WaMu appraisal department by saying "this is what I need," or "this is what the customer thinks it's worth." CW-13 was trained to forward all information on the application to the appraisers, including the homeowner's estimate of value, even if the estimated home value looked high. The FDIC's Office of Inspector General has found this practice to be inconsistent with "standard residential appraisal methods" because providing the homeowner's estimate of the value of the home to the independent appraiser biases the appraiser's evaluation. (Evaluation of Federal Regulatory Oversight of Washington Mutual Bank at p. 11, Report No. EVAL-10-002 (April 2010)). Pursuant to USPAP Rule 1-2(b), appraisers must not allow the intended use of an assignment or a client's objectives to cause the assignment results to be biased.

415. While CW-13 normally submitted appraisal requests to the appraisal department for a coordinator to handle, CW-13 could, and did, request specific appraisers if she needed a certain value in a certain neighborhood. CW-13 knew the appraisers' reputations for being high or low with respect to certain neighborhoods, and she used that knowledge in requesting certain appraisers in order to get the value the client needed for the loan to close.

416. If an appraisal came back lower than what was needed to close the deal, CW-13 had several options available to increase the appraisal. If the appraisal was close to the required value, CW-13 would call the appraiser and negotiate for a higher number. For some of the time CW-13 worked at WaMu, the appraisal department was either in the same building or across the street, which allowed CW-13 to walk to the appraisal department and directly negotiate with the appraisers to see what could be done to increase the value of the appraisal so the loan could close.

417. If the appraisal was significantly lower than the required value, CW-13 would tell the customer to find additional comparable properties within a two-mile radius to justify increasing the appraisal value, even though standard practice generally required a comparable to be within a one mile radius of the property. If there were not any comparables within a two-mile radius that would justify an increase, the customer would pull higher value comparables from even farther afield.

418. In addition to CW-13, CW-14 provided additional evidence confirming the manipulation of appraisals by WaMu. CW-14 was a staff appraiser at eAppraiseIT from 2002 until February 2007. CW-14 appraised homes for a variety of lender who used eAppraiseIT's services, including WaMu.

419. According to CW-14, after WaMu closed its in-house appraisal department and chose eAppraiseIT as one of its two preferred appraisal management companies, eAppraiseIT hired several former WaMu appraisers to serve as "business managers." These business managers supervised the eAppraiseIT staff appraisers and were also "in contact" with WaMu loan officers.

420. According to CW-14, prior to WaMu retaining eAppraiseIT, the eAppraiseIT staff appraisers were left alone and were not routinely pressured to increase values. After eAppraiseIT hired WaMu's former appraisers as managers, they pressured everyone, including CW-14, to increase appraisal values. Beginning in approximately mid-2006, CW-14 began reporting to a business manager in Arizona. CW-14's manager was in touch with WaMu loan officers who complained about CW-14's low valuations on refinancing transactions. CW-14's manager then called her, advised her of the complaints, and informed her that she was tired of getting complaints from the loan officers about CW-14's low values.

421. CW-14's manager constantly pressured her to increase values by modest amounts, telling her that "just a couple thousand more and the loan would go through," or "[t]here's got to be something you're not looking at." In many instances, CW-14's manager would tell her that WaMu had requested she look at other comparables that simply were not comparable, and force CW-14 to explain why the comparables WaMu identified were not appropriate. CW-14 estimates that this occurred for 75% of the appraisals she performed for WaMu.

422. CW-14 eventually asked not to be assigned any WaMu appraisals, despite the fact that roughly 50% of her workload was WaMu transactions. While eAppraiseIT had other clients, her business manager nevertheless informed her that she "wouldn't get any work." In February 2007, CW-14 left eAppraiseIT. Based on CW-14's experience, "eAppraiseIT prostituted themselves for WaMu. I can't understand why they didn't treat WaMu like any other lender."

423. The testimony of CW-15 also confirms the pressure that WaMu exerted on eAppraiseIT and the appraisers working for eAppraiseIT. CW-15 is an independent real estate appraiser who received assignments from WaMu through eAppraiseIT. CW-15 believes that he performed work for WaMu between approximately November 2005 and April 2007. CW-15

stated that after WaMu closed its in-house appraisal department, a former WaMu appraiser was hired by eAppraiseIT to serve as his district or regional manager. CW-15 also noted that many former WaMu staff appraisers were hired in similar manager capacities at eAppraiseIT.

424. According to CW-15, "within the individual purview of the district manager, it was commonplace for them to come back for revision or reconsideration [of an appraisal]. It was understood that when they asked, you complied." CW-15 believes that as a conservative estimate, 10% of the reports he wrote for WaMu resulted in a value adjustment that CW-15 made at the request of the eAppraiseIT manager.

425. CW-16 and CW-17 provided testimony regarding what occurred if an appraiser refused to bow to WaMu pressure. CW-16 was an independent appraiser that received assignments through eAppraiseIT, LSI, and directly from WaMu. CW-16 was placed on WaMu's list of "approved appraisers," and estimates that around 75% of her appraisals were for WaMu.

426. CW-16 recalls being pressured by WaMu to increase appraisal values on several occasions, and she believes that this pressure occurred between November 2005 and April 2007. CW-16 would be told that she was missing the sales price by a small amount, and that because the market was going up, her appraisal should also increase. On one occasion, an appraisal was reassigned from CW-16 to a staff appraiser because her appraisals were too conservative.

427. CW-16 was ultimately removed from the "approved appraiser" list because of her view that the market was declining in value. The standard appraisal form that CW-16 used included a section on market condition, and required appraisers to check a box indicating whether market values were stable, increasing, or decreasing at the time the appraisal was made. Sometime between November 2005 and April 2007, CW-16 indicated that property values were

decreasing. According to CW-16, this was a "big no-no," because if the market was in decline, WaMu would not be able to resell the loan on the secondary market, or if they did, the loan would have to be discounted. WaMu "hassled" CW-16 for her conclusion, and a WaMu employee even called her to try to convince her that market values were not declining. WaMu subsequently removed CW-16 from the approved appraiser list—informing her via a telephone call—and she never received work from WaMu again.

428. CW-17 is an independent appraiser and has prepared appraisals for a variety of lenders, including WaMu. In the spring of 2006, in connection with a WaMu loan application, CW-17 appraised a home for $2.2 million. While CW-17's supervisor reviewed the appraisal, and agreed with the valuation, a WaMu staff appraiser subsequently sent CW-17 a letter indicating that she disagreed with the valuation, and was increasing it by $500,000 to $2.7 million. CW-17 was confident that his appraisal was accurate, in part because it was based on comparable properties on the same street as the subject property, and contacted the WaMu's chief appraiser in the area to express his concerns about the inflated appraisal. Far from being concerned, WaMu's chief appraiser informed CW-17 that WaMu "could change the value to anything it wanted."

429. After this incident, CW-17's assignments for WaMu decreased, even though he believed he remained on the "panel" of preferred appraisers. CW-17 also recalls an instance where a WaMu appraisal was assigned to him, only to be reassigned thirty minutes later at the request of the WaMu loan officer, who believed that CW-17 was "too conservative." According to CW-17, this behavior was "typical"—it was either "their way or the highway."

430. CW-18 also confirmed that the time pressures placed on auditors hurt the quality of the loan review. From 2005 to early 2006, CW-18 was a senior staff appraiser at WaMu.

CW-18's position was eliminated in 2006 when WaMu eliminated its in-house appraisal department, but CW-18 rejoined WaMu in 2007 as an appraisal reviewer in the quality control department.

431. According to CW-18, WaMu senior staff appraisal reviewers had to meet volume quotas that harmed the quality of their reviews. While CW-18 is not sure of the exact quota, he believes that "front-end" reviewers were required to review 20 appraisals per day, in contrast to quality control reviewers who were only expected to review 8 to 10 appraisals per day. CW-18 explained that "front-end" appraisals had an effect on production in that they were required to fund loans, whereas no one relied on quality control's appraisals for funding.

432. As a quality control review appraiser, CW-18 saw many fraudulent appraisals in approved WaMu loans. CW-18 estimates that a very high number, probably 15-20% of the appraisals he reviewed were inflated or fraudulent. Although most of the fraudulent appraisals were of collateral securing loans approved by Washington Mutual origination subsidiary, Long Beach Mortgage, CW-18 also saw many fraudulent appraisals in approved WaMu loans, as well. According to CW-18, "the problem was on the lending side of the business. It was pure greed," fostered by a desire to make as many loans as possible.

433. CW-18 also explained that WaMu implemented an appraisal tracking and review system called OPTISValue. OPTISValue reviewed an appraisal for key characteristics, and if those characteristics were satisfied, it could approve the appraisal. WaMu could change the key characteristics that the OPTISValue system used to determine whether an appraisal would be approved or flagged for secondary review. CW-18 believes that as time went on, the key characteristics were loosened because, as a lender, WaMu wanted "to get everything approved." According to CW-18, while OPTISValue was initially designed from a risk standpoint, it was

geared towards "cookie cutter loans," and was not designed to catch fraud. For this reason, there were red flags in loan applications that a human appraiser or underwriter would have caught, that OPTISValue would not.

434. Another Confidential Witness, CW-19, confirmed the flaws in the OPTISValue program. CW-19 was a senior staff appraiser at WaMu from 1999 until September 2006.

435. Prior to 2002, WaMu administrative staff reviewed appraisals using checklists to assist them in finding risky characteristics that warranted further review by a certified appraiser.

436. Starting in 2001 or 2002, WaMu began automating its appraisal review process by using OPTISValue. After 2002, all appraisals were automatically reviewed by the OPTISValue system. OPTISValue performed the initial appraisal screening that humans had previously done, thus eliminating human involvement from the first stage of review, and creating a system where certain appraisals would be automatically approved without ever being reviewed by a person.

437. According to CW-19, OPTISValue automatically approved a huge percent of appraisals; CW-19 estimates that more than 50% of all appraisals sent to WaMu were never looked at by any human. Both in-house production appraisers and fee appraisers knew that if "they came in with a value that worked"—a value that was equal to or greater than the purchase price—their appraisal would never be questioned because OPTISValue would approve it without any review. The use of an automated system, coupled with increasingly relaxed appraisal standards, resulted in inflated appraisals. CW-19 recalls seeing a "whole bunch of appraisals with inflated values," and was aware of loans that were supported with inflated or otherwise fraudulent appraisals that were still approved.

438. The confidential witness statements quoted above demonstrate that WaMu routinely accepted—in fact demanded—appraisals that were conducted in violation of USPAP

standards. Because WaMu insisted upon certain results, negotiated results with appraisers, and pressured appraisers to increase values, the resulting appraisals simply were not performed with "impartiality, objectivity, and independence" as required by the USPAP Ethics Conduct Rule. Instead, appraisers routinely allowed the "intended use of an assignment or a client's objectives to cause the assignment results to be biased" in violation of the USPAP Scope of Work Acceptability Rule. Additionally, by threatening appraisers regarding the availability of future work and removing appraisers from the list of accepted appraisers, WaMu forced appraisers to violate the USPAP Ethics Management Rule, which precludes the acceptance of assignments that are contingent upon either "the reporting of a predetermined result" or "a direction in assignment results that favors the cause of a client." Ultimately, the systemic coercion of appraisers caused a fundamental violation of USPAP Standard 1, which requires that appraisers "correctly complete research and analyses necessary to produce a credible appraisal." As discussed in public reports and confirmed by confidential witnesses, WaMu's appraisal abuse was standard operating procedure for both companies.

e. The mortgages originated by WaMu and securitized in the PLMBS purchased by the Bank provide further evidence of WaMu's abandonment of sound underwriting practices.

439. WaMu originated the mortgages that secured at least 3 securities purchased by the Bank. As discussed in detail below, the Offering Documents contained serious material misstatements and omissions regarding specific characteristics of the loan pools securing these Certificates, including misstatements with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of WaMu's failure to observe its stated

underwriting standards. WaMu's actual practices—including use of unreliable and biased collateral valuations in lieu of appraisals, routine granting of underwriting exceptions, and reliance on unverified borrower-supplied information—caused it to originate loans whose actual LTVs were far different from those reported in the Offering Documents. As a result, the likelihood of default for these loans was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

440. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was in fact the norm at WaMu, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank of WaMu's pervasive and systematic disregard of its stated underwriting guidelines, failure to adhere to standard appraisal practices, and rampant predatory lending.

5. Wells Fargo Bank, N.A.

441. Wells Fargo Bank, N.A. ("Wells Fargo") originated underlying mortgage loans securing at least three of the Certificates purchased by the Bank: BAFC 2006-D 1A1, IMSA 2006-2 1A2A, and WFMBS 2006-AR 12 1A1. Wells Fargo Bank, N.A. abandoned sound underwriting practices.

a. Investigations, lawsuits and confidential witness testimony demonstrate that Wells Fargo abandoned underwriting guidelines.

442. In 2010, Wells Fargo was identified by the OCC as the fourteenth worst mortgage originator in the country based on the delinquency rates of the mortgages it originated in the ten metropolitan areas with the highest rates of delinquency. In denying in part a motion to dismiss in *In re Wells Fargo Mortgage-Backed Securities Litigation*, No. 3:09-1376 (N.D.

Cal.) ("*Wells Fargo* Complaint"), the court found that plaintiffs had adequately pled that "variance from the stated [underwriting] standards was essentially [Wells Fargo's] norm" and that this conduct "infected the entire underwriting process."

443. The *Wells Fargo* Complaint is supported by numerous confidential witness statements substantiating the allegations that Wells Fargo abandoned underwriting guidelines, increasingly made exceptions without compensating factors, sacrificed underwriting standards to loan volume, and manipulated loan information in order to close loans without regard to borrowers' ability to repay the loans.

444. Confidential witnesses contacted in connection with the Bank's investigation provide additional evidence of Wells Fargo's repeated failure to adhere to sound underwriting practices and guidelines. Statements by confidential witnesses confirm that: (a) Wells Fargo underwriters faced intense pressure to close loans at any cost; (b) Wells Fargo increasingly approved risky, low- or no-documentation loans without adequate review; (c) Wells Fargo routinely approved loans that contained exceptions for which there were no reasonable compensating factors; (d) Wells Fargo employees approved loans with inflated appraisal values; and (e) Wells Fargo employees manipulated data in order to close loans.

445. Confidential witnesses include CW-20, CW-21, and CW-22. CW-20 worked as an underwriter at Wells Fargo for five years and left the company in approximately 2006. She helped start one of Wells Fargo's wholesale lending offices. The wholesale lending office received mortgage applications from various brokers in the area and then underwrote, approved, and funded such mortgages. CW-21 was an underwriting manager at a Wells Fargo branch in California from 2004 until late 2007, when Wells Fargo closed the branch. The branch was a "MAP" center, which was a location where Wells Fargo loans were registered, underwritten,

processed, closed, and shipped out for sale in pools. CW-22 was a quality control specialist at Wells Fargo Mortgage in Maryland from January 2004 through August 2005. CW-22 audited conventional mortgage loan files from all over the United States that had already been through Wells Fargo underwriting, but which had not yet closed. CW-22 was one of five quality control specialists in the office who evaluated the work of underwriters "to make sure they were underwriting correctly."

446. Wells Fargo employees increasingly disregarded the credit risk of loans and quality controls in favor of generating loan volume. According to CW-21, this was because loan officers and underwriters at Wells Fargo received commissions and/or bonuses based on the number of loans closed. CW-22 noticed an increase in the number of exceptions made in loan files, "when the sales numbers weren't where they were supposed to be at the end of a month." In such cases, CW-22 said, Wells Fargo granted more exceptions to meet sales goals. "The sales force was driving the business, as opposed to underwriting management doing the driving . . . . It came down to volume and keeping up with our lender peers and getting market share."

447. Among Wells Fargo's abuses of underwriting standards, confidential witnesses detailed a practice of approving risky loans based upon little or no documentation. CW-20 explained that underwriters at Wells Fargo's branches used two Automated Underwriting Systems (often, "AUS"), which were pre-programmed with the minimum credit scores, LTVs and DTIs, cash reserve levels, and documentation levels needed for the borrower to qualify for the various mortgage products that Wells Fargo offered. If these AUS returned an "approve" or "accept" result, then Wells Fargo typically approved the application and funded the mortgage. CW-20 commented that she was skeptical of the "approvals" that came from the AUS, and often

thought to herself, "How did it approve *this*?" The systems approved borrowers who "never should have been approved."

448. For example, the AUS would approve a borrower with recent late payments, a 50-55% DTI, a 650 credit score, and no cash reserves. CW-20 would have questioned such an application. However, so long as the AUS approved the loan, the underwriters in Wells Fargo's branches were not required to look any deeper. In CW-20's view, the integrity of mortgage origination "all fell apart when the AUS became the standard." She explained that by the mid-2000s, when the AUS were being relied upon almost exclusively, she no longer agreed with the loans that were being approved because the underwriting guidelines had become so loose.

449. CW-22 described 2004 and 2005 as the era of "creative financing programs" at Wells Fargo such as no-doc and stated income loans. "It was a free-for-all at that point. You would see a file where a janitor was stating he made $5,000 a month and his debt ratio was right where our cut-off was. CW-22 said that it was obvious that a loan officer, who would have been aware of the debt ratio required for loan approval, had either "filled out the paperwork or coached the borrower." When CW-22 inquired about facts like this, he was told "there were compensating factors like a good FICO score or stated assets of $10,000 or something like that." However, "there was no way to verify it."

450. CW-22 saw exceptions to underwriting guidelines involving business tax returns. For example, if lending guidelines required three years of business tax returns, a borrower might provide just two years of such returns, and Wells Fargo would waive the requirement for providing documents for a third year.

451. According to CW-20, her superiors at Wells Fargo "didn't want to hear" her concerns about mortgages being approved for borrowers with questionable credit, high debt

levels, high LTVs, or minimal cash reserves. Throughout her time with Wells Fargo, the origination and underwriting emphasis was completely sales-oriented. According to CW-20, the motto at the company was "sales rules," and underwriters had no say in the kinds of borrowers that the AUS approved.

452. The only time human underwriters were involved in the underwriting process was when the AUS recommended a loan for "refer" instead of "accept." A result of "refer" meant that the application did not meet the underwriting guidelines programmed into the AUS. These loans required manual underwriting, and most of the time they were still approved.

453. CW-20 stated that underwriters at Wells Fargo were pressured to approve applications on which the AUS returned a "refer" result because "sales rules." Underwriters were pressured to approve the loans because if they did not, they were at risk of suddenly being fired. As stated by CW-20, "The loan officer or broker would go to the Operations Manager and complain, and suddenly people [underwriters] were no longer there." Additionally, underwriters received e-mails directly from the outside mortgage brokers or loan officers indicating that they weren't happy with the underwriter's decision not to approve an application. Many mortgage brokers expected the underwriter to approve all of his or her loans. In general, CW-20 stated that the mortgage brokers and loan officers "learned how to get away with what they needed in order to get the loans approved."

454. CW-20 explained that, in deciding whether to approve loans, underwriters disregarded whether the borrower had the ability to repay the loan: "We were just supposed to ignore all the warning signs." Thus, even for government loan programs, LTVs were in the range of 95-100%, FICO scores were as low as 550 to 560, and DTIs were as high as 55%. Cash

reserves were only required "sometimes." Many of the conventional loans that CW-20 underwrote between 2004 and 2006 were stated income/stated asset or no-income/no-asset loans.

455. Confidential witnesses also described Wells Fargo's standard practice of approving exceptions that deviated from prudent underwriting guidelines. According to CW-21, 30-40% of the time, Wells Fargo loan officers issued exceptions to underwriting guidelines on loans that otherwise would have been rejected.

456. CW-21 noticed that the exceptions that Wells Fargo granted increased in late 2006 or early 2007, in conjunction with Wells Fargo's decision to tighten its underwriting guidelines. Wells Fargo's sales staff could not understand why a loan that would have been approved the prior year could not be approved in the current year, and did not accept the tightened guidelines. According to CW-21, the sales staff "wouldn't take 'no' for an answer," and therefore placed tremendous pressure on the Wells Fargo underwriters to approve their loans. Even where the Wells Fargo underwriters would deny requests for exceptions, Wells Fargo's sales staff would take their loans to lead underwriters and risk managers to have the decisions overridden. According to CW-21, the increase in exceptions countered Wells Fargo's efforts to tighten the underwriting guidelines.

457. Evidence also exists that Wells Fargo employees also manipulated loan data in order to close loans and generate volume. For example, CW-21 was aware of circumstances in which loan files were doctored in order for the loans to be approved.

458. Confidential witnesses also detailed how mortgages approved by Wells Fargo were based upon inflated appraisal values. According to CW-20, the outside mortgage brokers who brought the loans to her branch for approval chose the appraisers that they wanted to use. The outside brokers, loan officers, and appraisers all had a vested interest in the appraised value

being accepted and the mortgage application being approved by Wells Fargo, since they all made money off of the transaction. Consequently, they all had a "let's make a deal mentality" about reaching an appraisal value that supported the amount of the mortgage loan.

459. CW-23 has been a licensed appraiser in Washington since 1992. In the spring of 2007, CW-23 was given an assignment by Rels Valuation—the appraisal management firm used by Wells Fargo—to appraise a home on the outskirts of Seattle. CW-23's appraisal noted that the house was being remodeled, that the remodel was incomplete, and that the house was consequently not habitable. After submitting his appraisal, CW-23 was contacted by both Wells Fargo underwriters and Rels customer service representatives, ordering him to change his appraisal to state that the house remodel was complete. This pressure culminated with CW-23 receiving a phone call from a Rels Valuation Area Manager informing him that "you appraisers take USPAP [the uniform appraisal standards] too seriously," and that if CW-23 failed to alter his appraisal, he would be blacklisted. When CW-23 refused on the grounds that changing the appraisal would violate appraisal standards, he was blacklisted and ceased receiving work from Wells Fargo.

460. CW-24, who formerly worked as a review resolution coordinator for Rels Valuation from February 2007 to July 2010, confirms the problematic nature of the appraisal process. According to CW-24, Wells Fargo had an unwritten "Five Percent Rule," whereby if a Rels review appraiser came up with a new value that was within 5% of the original value, the higher value was automatically accepted.

461. CW-24 also testified that from the beginning of his tenure at Rels in 2007, until the implementation of the new Federal Home Valuations Code of Conduct in 2009, pressure from Wells Fargo officers occurred quite frequently, with CW-24 receiving at least one call a

day from a review appraiser complaining that a Wells Fargo loan officer contacted him or her directly. CW-24 also sat near 18 review resolution analysts that were tasked with resolving appraisals in which the original appraiser and the review appraiser could not agree on the value. On multiple occasions, CW-24 recalls a Rels national review manager arguing with the review analysts and telling them what he believed was the correct value. CW-24 believes that this constituted undue pressure on review analysts. According to CW-24, "[o]n the one hand the review manager was trying to run a delicate balancing act with the client, Wells Fargo. But on the other hand, you have to draw the line. Most of the stuff that I saw I felt like it was a little over the line."

462. CW-24 also emphasized that not every appraisal ordered by Rels Valuation for Wells Fargo was reviewed by human eyes. Rels relied on a computer program, called ACE, to identify problematic appraisals. While the system caught clerical errors or omissions, appraisals containing "egregious violations of USPAP" were sometimes not identified until after the loan had closed.

b. The mortgages originated by Wells Fargo and securitized in the PLMBS purchased by the Bank provide further evidence of Wells Fargo's abandonment of sound underwriting practices.

463. Wells Fargo originated mortgages that secured at least two of the Certificates. As discussed in detail below, the Offering Documents contained serious material misstatements regarding specific characteristics of the loan pools securing this Certificate, including misstatements with respect to its weighted average LTV and the percentages of loans with LTVs in excess of 100%, 90% and 80%. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of Wells Fargo's failure to observe its stated underwriting standards. Wells Fargo's actual practices—including the use of unreliable appraisals, routine granting of

underwriting exceptions and reliance on unverified borrower-supplied information—caused it to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

464. Thus, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was the norm at Wells Fargo, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that Wells Fargo abandoned its underwriting guidelines.

c. Investigations, lawsuits and confidential witness testimony demonstrate that Wells Fargo engaged in predatory lending.

465. In July 2009, the Attorney General for the State of Illinois brought a lawsuit in Cook County Circuit Court alleging that Wells Fargo "steer[ed minority applicants] into high cost subprime or riskier mortgage loans while White borrowers with similar incomes received lower cost or less risky mortgages" and that Wells Fargo "engaged in deceptive practices by misleading Illinois borrowers about their mortgage terms, misrepresenting the benefits of refinancing, and repeatedly refinancing borrowers' mortgages, also known as loan flipping, without any real benefit to consumers."

466. The Illinois Attorney General's complaint in *People v. Wells Fargo & Co.*, No. 09-26434 (Ill. Cir. Ct.), details how borrowers were "plac[ed] into subprime mortgages, even though they qualified for prime mortgages with better terms," with the result that "[i]nstead of the affordable mortgages that these borrowers should have received, they were sold mortgages that were unaffordable and unsuitable." The complaint also details how Wells Fargo rewarded

its employees for steering borrowers away from prime mortgages and into subprime loans, creating an incentive to sell borrowers higher cost sub-prime loans even if they qualified for prime loans, and "failed to maintain proper controls to ensure that borrowers were not placed into mortgages that were riskier or more expensive than the mortgage loans for which they were qualified."

467. On April 7, 2010 the City of Memphis filed its First Amended Complaint in *City of Memphis v. Wells Fargo Bank*, No. 09-2857 (W.D. Tenn.), alleging violations of the Fair Housing Act and of the Tennessee Consumer Protection Act arising from Wells Fargo's discriminatory lending practices. The Complaint attaches sworn declarations from six former Wells Fargo employees providing evidence of discriminatory and predatory lending practices.

468. Doris Dancy, a former Wells Fargo credit manager explained how she was provided with lists of leads who were predominantly minorities despite her branch being "in an area where a lot of white people lived" and how she was required to present a misleading sales pitch that did not disclose that "we were actually just giving them a new more expensive loan that put their house at risk." She detailed how her "district manager pressured the credit managers . . . to convince our leads to apply for a loan, even if we knew they could not afford the loan or did not qualify for the loan." She stated that "I knew that Wells Fargo violated its own underwriting guidelines in order to make these loans to these customers." She was instructed by her district manager "to conceal the details of the loan." Eventually she resigned because she "decided that the practices were too unethical for me to participate any longer. I hated to go to work, and found myself crying at the end of the day." Another Wells Fargo credit manager, Mario Taylor, testified how:

> [B]ranch managers told us how to mislead borrowers. For example we were told to make "teaser rate" loans without informing the borrower that the rate was

> adjustable. . . . We were told not to tell the customer what was in the fine print. In many cases income documents were falsified in order to qualify a borrower for a loan. I know that some managers, including one of my branch managers, changed pay stubs and used white-out on documents to alter the borrower's income so it would look like the customer qualified for the loan. Borrowers were not told about prepayment penalties. [O]ne of my branch managers told me not to disclose . . . fees to borrowers.

469. Camille Thomas, a Wells Fargo loan processor, explained that "[i]t was the practice at the Wells Fargo offices where I worked to target African Americans for subprime loans. . . . Elderly African Americans were thought to be highly vulnerable and were frequently targeted for subprime loans with high interest rates." She confirmed Ms. Taylor's testimony that "credit managers and branch managers made 'teaser rate' loans without informing the borrower that the loan had an adjustable rate. . . . In many cases documents were actually falsified to inflate a borrower's income so that the borrower would appear to meet the debt-to-income requirements. I know that at least one branch manager engaged in this practice."

470. Tony Pashal, a Wells Fargo loan officer, described the case of one borrower who had a 2/28 adjustable rate mortgage and was seeking to refinance in 2006 before his "teaser rate" for the first two years expired. He explained that:

> I determined that the borrower qualified for a prime loan. The borrower had an excellent credit score and for this reason I suspected that he had previously qualified for a prime loan in 2004 but had been inappropriately placed by Wells Fargo into a subprime ARM at that time. In working with the borrower in 2006, I informed my branch manager, Dave Zolnak, that the borrower qualified to refinance into a prime fixed-rate loan. Mr. Zolnak told me I should instead refinance the borrower into another subprime ARM. I refused [and was written up with] a negative performance evaluation in my personnel folder.

471. Elizabeth Jacobson, who "was the top subprime loan officer at Wells Fargo" for many years testified about how:

> [T]he commission and referral system at Wells Fargo was set up to make it more profitable for a loan officer to refer a prime customer for a subprime loan than to make the prime loan directly to the customer. . . . When I got referrals it was my job to figure out how to get the customer into a subprime loan. I knew that many

> of the referrals I received could qualify for a prime loan. . . . [Loan officers] used their discretion to steer loan customers to subprime loans by telling the customer, for example, that this was the only way for the loan to be processed quickly; that there would be less paperwork or documentation requirements; or that they would not have to put any money down. Customers were not told about the added costs, or advised about what was in their best interest. . . . According to company policy, we were not supposed to solicit 2/28 customers for re-finance loans for two years after we made a 2/28 subprime loan. . . . [M]y area manager told his subprime loan officers to ignore this rule and go ahead and solicit 2/28 customers within the two year period, even though this violated our agreement with secondary market investors. The result was that Wells Fargo was able to cash in on the pre-payment penalty by convincing the subprime customer to refinance his or her 2/28 loan within the initial two-year period. . . . Wells Fargo qualified borrowers for subprime loans by underwriting all adjustable rate mortgage loans, including 2/28 loans, with the assumption that the borrower would pay the teaser rate for the full life of the loan even though this lower rate only applied during the first two or three years of the loan. . . . I learned of [loan officers] cutting and pasting credit reports from one applicant to another [and] subprime loan officers who would cut and paste W2 forms [to] increase the credit worthiness of the applicant so that Wells Fargo's underwriters would approve the loan. I reported this conduct to management. . . . Underwriters, like loan officers, had a financial incentive to approve subprime loans than [sic], even if the customer could qualify for a prime loan, because they got paid more . . . if a subprime loan went through.

472. Confidential witnesses confirmed that Wells Fargo engaged in predatory lending practices. For example, CW-21 mentioned that Wells Fargo's underwriters did not fully inform borrowers of the risks of the loans. In addition, as the above discussion shows, Wells Fargo routinely issued loans to borrowers who lacked the ability to repay the loans in violation of predatory lending restrictions.

6. Ameriquest Mortgage Company

473. Ameriquest Mortgage Company ("Ameriquest") originated underlying mortgage loans securing at least two of the Certificates purchased by the Bank: CMLTI 2005-9 1A1 and MLMI 2006-AF2 AV2A. Ameriquest abandoned sound underwriting practices.

a. Investigations and lawsuits demonstrate that Ameriquest abandoned underwriting guidelines and engaged in predatory lending.

474. Ameriquest was the wholly owned retail lending subsidiary of ACC Capital Holdings ("ACC"), one of the nation's largest subprime lenders. Ameriquest was the largest subprime lender in 2003, 2004, and 2005. In 2010, Ameriquest was identified by the OCC as the ninth worst mortgage originator in the country based on the delinquency rates of the mortgages it originated in the ten metropolitan areas with the highest rates of delinquency.

475. Ameriquest's management pressured employees to generate loan volumes at all costs: "Up and down the line, from loan officers to regional managers and vice presidents, Ameriquest's employees scrambled at the end of each month to push through as many loans as possible to pad their monthly production numbers, boost their commissions, and meet [founder] Roland Arnall's expectations. Arnall was a man 'obsessed with loan volume,' former aides recalled, a mortgage entrepreneur who believed 'volume solved all problems.'" Michael Hudson, *The Monster: How a Gang of Predatory Lenders and Wall Street Bankers Fleeced America—and Spawned a Global Crisis* 2 (2010). As a result of such pressures at Ameriquest, employees falsified documents, forged borrowers' signatures on government-required disclosure forms, and misrepresented the terms of loans in order to induce borrowers to take out loans they could not afford. *Id.* at 2-3. In fact, "Ameriquest's deals were so overpriced and loaded with nasty surprises that getting customers to sign often required an elaborate web of psychological ploys, outright lies, and falsified papers. 'Every closing that we had really was a bait and switch,' a loan officer who worked for Ameriquest in Tampa, Florida, recalled. ''Cause you could never get them to the table if you were honest.'" *Id.* at 3.

476. An August 2007 *Business Week* article discusses the case of Mary Overton of Brooklyn, New York. Without her knowledge or understanding, Ameriquest created false tax

returns, employment records, and a 401(k) to make her appear qualified for a loan as part of a scheme to coerce her to sign a loan which she could not afford.

477. A former Ameriquest loan officer interviewed on National Public Radio recalled how at her office in Tampa, Florida, in order to close a loan "at any cost," "managers encouraged loan officers to conceal the actual cost and interest rate on loans" and would "white out income numbers on W2s and bank statements and fill in bigger amounts basically to qualify people for loans that they couldn't afford." This practice was known as "taking the loan to the Art Department." The National Public Radio broadcast stated that other former Ameriquest employees confirmed this same conduct occurring around the country.

478. According to the 2011 FCIC Report, Christopher Cruise, a Maryland-based corporate educator who trained loan officers for companies that were expanding mortgage originations, coached about 10,000 loan originators a year, including at Ameriquest and Countrywide. Most of their newly hired loan officers were young, with no mortgage experience, fresh out of school and with previous jobs "flipping burgers," he told the FCIC. Given the right training, however, the best of them could "easily" earn millions.

479. As the FCIC Report quotes Cruise: "I was a sales and marketing trainer in terms of helping people to know how to sell these products to, in some cases, frankly unsophisticated and unsuspecting borrowers," he said. He taught originators, including originators at Ameriquest, the new playbook: "You had no incentive whatsoever to be concerned about the quality of the loan, whether it was suitable for the borrower or whether the loan performed. In fact, you were in a way encouraged not to worry about those macro issues." He added, "I knew that the risk was being shunted off. I knew that we could be writing crap. But in the end it was

like a game of musical chairs. Volume might go down but we were not going to be hurt." FCIC Report at 7-8 nn.26-27.

480. Ed Parker, the former head of Ameriquest's Mortgage Fraud Investigations Department, told the FCIC that fraudulent loans were very common at the company. "No one was watching. The volume was up and now you see the fallout behind the loan origination process," he told the FCIC. FCIC Report at 161 n.29. In fact, Parker detected fraud at the company within one month of starting his job there in January 2003, but senior management did nothing with the reports he sent. He heard that other departments were complaining he "looked too much" into the loans. In November 2005, he was downgraded from "manager" to "supervisor," and was laid off in May 2006. *Id.* at 12 n.52.

481. In late 2003, Prentiss Cox, then a Minnesota assistant attorney general, asked Ameriquest to produce information about its loans. He received about 10 boxes of documents. He pulled one file at random, and stared at it. He pulled out another and another. He noted file after file where the borrowers were described as "antiques dealers"—in his view, a blatant misrepresentation of employment. In another loan file, he recalled in an interview with the FCIC, an octogenarian disabled borrower who used a walker was described in the loan application as being employed in "light construction." As Mr. Cox testified to the FCIC, "It didn't take Sherlock Holmes to figure out this was bogus." As he tried to figure out why Ameriquest would make such obviously fraudulent loans, a friend suggested that he "look upstream." Cox suddenly realized that the lenders were simply generating product to ship to Wall Street to sell to investors. "I got that it had shifted," Cox recalled. "The lending pattern had shifted." *Id.* at 12 nn.53-54.

482. Marc S. Savitt, a past president of the National Association of Mortgage Brokers, told the FCIC that while most mortgage brokers looked out for borrowers' best interests and steered them away from risky loans, about 50,000 of the newcomers to the field nationwide were willing to do whatever it took to maximize the number of loans they made. He added that some loan origination firms, such as Ameriquest, were "absolutely" corrupt. *Id.* at 4 n.66.

483. Moreover, Ameriquest was among 14 lenders named by the NAACP in a complaint alleging "systematic, institutionalized racism in sub-prime home mortgage lending." According to the lawsuit, African American homeowners who received sub-prime mortgage loans from these lenders were more than 30 percent more likely to be issued a higher rate loan than Caucasian borrowers with the same qualifications. In January of 2009 the court denied a motion to dismiss, finding that the plaintiff had sufficiently pled a disparate impact claim.

b. The mortgages originated by Ameriquest and securitized in the PLMBS purchased by the Bank provide further evidence of Ameriquest's abandonment of sound underwriting guidelines.

484. As discussed in detail below, the Offering Documents contained serious material misstatements regarding specific characteristics of the loan pool securing Certificate CMLTI 2005-9 1A1, including misstatements with respect to the percentages of loans with LTVs in excess of 100%, 90% and 80%. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of Ameriquest's failures to observe their stated underwriting standards. Ameriquest's actual practices—including the use of unreliable appraisals, routine granting of underwriting exceptions and reliance on unverified borrower-supplied information—caused it to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

485. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was the norm at Ameriquest, and Ameriquest approved numerous loans with essentially little to no underwriting screens applied to the loans or effort to evaluate the borrowers' ability to repay.

486. Nowhere did any Offering Document apprise the Bank that Ameriquest abandoned its underwriting guidelines and the extent to which it engaged in predatory lending.

7. Aurora Loan Services LLC and Lehman Brothers Bank, F.S.B.

487. Aurora Loan Services LLC and Lehman Brothers Bank, F.S.B. (collectively, "Aurora") originated underlying mortgage loans securing at least four of the Certificates purchased by the Bank: LXS 2005-8 1A2, LXS 2006-15 A1, LXS 2007-9 1A1, and LXS 2007-11 A1. Aurora abandoned sound underwriting practices.

a. Evidence produced in the Lehman Brothers bankruptcy case demonstrates that Aurora abandoned sound underwriting practices.

488. The Examiner's Report issued in the Lehman Brothers bankruptcy case provided useful insight into—and disclosed numerous internal Lehman Brothers documents regarding—the mortgage origination practices of Lehman's subsidiary Aurora. *See* Report of Anton R. Valukas, Examiner, *In Re Lehman Brothers Holdings Inc.*, No. 08-13555 (S.D.N.Y. Bankr. March 11, 2010) ("Examiner's Report").

489. Among the Examiner's many findings was that, despite assertions that Lehman was reducing its subprime mortgage operations in favor of supposedly safer Alt-A mortgages, in reality Lehman and Aurora were continuing to originate loans that were as risky as subprime loans, but were doing so under the label "Alt-A." The Examiner summarized these findings as follows:

> Even as Lehman was tightening standards on its subprime originations through BNC, Lehman was also using its Aurora subsidiary to expand its Alt-A lending. Moreover, Aurora's Alt-A lending reached borrowers of lesser credit quality than those who historically had been considered Alt-A borrowers. The vehicle for that aspect of the Aurora business plan was the Mortgage Maker product. As Mortgage Maker expanded to more than half of Aurora's Alt-A production by February 2007, many of Aurora's loans denominated as Alt-A came more and more to resemble the subprime loans that Lehman was supposedly exiting by tightening origination standards at BNC.

Examiner's Report at 87.

490. Defendant Richard McKinney, who was the head of Lehman's Securitized Products Division in the United States, was aware of inconsistency between the "Alt-A" label and the subprime-like performance of many of Aurora's loans. In fact, in an email sent in February 2007 to the CEO of Aurora, Thomas L. Wind, McKinney expressed concern that "we are creating worse performance than subprime, while the rating agencies assume our performance should be substantially better." E-mail from Defendant Richard McKinney, Lehman, to Thomas L. Wind, Aurora, et al. (Feb. 12, 2007). In that same e-mail, McKinney noted that "[o]ur aggregate LXS (mostly Mortgage Maker) performance has worsened vs. largest competitor on '06 production." Defendant McKinney was particularly concerned about the "bucket" of limited documentation loans with greater than 95% LTV, which "is not only worse than [Countrywide Financial Corp.], but underperforms the aggregate subprime market." *Id.* Finally, McKinney remarked that the Lehman XS trust [LXS], which issued the PLMBS purchased by the Bank, "will take the bottom quality Mortgage Maker product." *Id.*

491. Similarly, Aurora Vice President Russell V. Brady suggested in January of 2007 that Aurora needed to "[d]etermine whether a segment of the [Mortgage] Maker population should be serviced similar to subprime." Russell V. Brady, Aurora, Response to LXS Performance Issues (Jan. 24, 2007), at p. 1. Moreover, as the Examiner's report noted, Lehman managers began referring to the Mortgage Maker product as "Alt-B," which "was not an

accepted term or categorization in the business" but was used "as a way of differentiating the riskier mortgages in the Mortgage Maker program from what had more traditionally been considered Alt-A mortgages . . . ." Examiner's Report at 88.

492. Numerous other documents revealed in the Examiner's Report demonstrate that Lehman Brothers was aware that the quality of its mortgage originations was deteriorating. A February 2007 presentation prepared by Lehman's residential mortgage analyst, Dimitrios Kritikos, warned that "[t]he product mix of Aurora Production has shifted substantially in the last 6 months from Alt-A to MortgageMaker (Alt-B)" and that "FICOs, LTVs, DTIs, and Documentation levels have deteriorated as the rest of the industry." Dimitrios Kritikos, Lehman, Selected trends from Aurora Risk Review (Feb. 2, 2007), at 2. The presentation further noted:

> While the industry is moving away from high CLTVs [combined loan-to-value ratios on multiple liens] and non-owner occupied properties, Aurora is gaining considerable share, especially during the last three months. On the non-owner occupied segment, there is a significant shift to the 100% CLTV product.

Id. A similar presentation from March 2007 discussed the previous month's loan originations as follows:

> Mortgage Maker production is at an all time high of 55%, while Alt-A has dropped to 40% . . . . Overall FICOs are at an all time low at 703, with DTIs and CLTVs to an almost all time high at 39.5% and 91.5% . . . . No Ratio loans . . . currently run at 14%, with more than half on the 100% financing. No Doc production runs at 11%, with one third of which is also 100% CLTV. Non Owner Occupied loans increased to 18%, with almost half of it in 100% CLTV (this segment has more than doubled in volume since Sept-06). Stated and No Ratio loans with low FICOs (<640) hit an all time high with 4.3% and 1.2% of the production, while Stated-Stated and No Doc with low FICOs (<660) remained flat at 2.3% and 0.8% respectively.

Dimitrios Kritikos, Lehman, Risk Review: Aurora and BNC February 2007 (Mar. 19, 2007), at 6-9.

493. Kritikos also sent numerous emails to Jeffery Goodman, Lehman's Managing Director of Risk Management, in early 2007 warning about the deteriorating quality of Aurora's mortgage originations:

- "I have pointed out in the past that Aurora's product is far from Alt-A anymore. The traditional Alt-A program is only 40% of Aurora's production, with half of it in 100% financing. This product generally performs well. My concern is the rest 60% of production, that has 100% financing in lower FICOs with non-full documentation and/or investment properties." E-mail from Dimitrios Kritikos, Lehman, to Jeffery Goodman, (Mar. 12, 2007).

- "I am really concerned with the dramatic change of the product mix, especially the last 3 months. While the rest of the industry is tightening credit and increasing pricing in these areas, we are moving in the opposite direction. Although I understand that we need to take risk to get > reward, the areas where Aurora is growing are not the right ones. To put things in perspective, more than 50% of Aurora's current originations are 100% financing - 80% of that is in non full documentation loans. Extensive analysis has been done on both first payment defaults and long term performance on a lot of these segments. My biggest concern is the high CLTV, stated-stated program which has double or triple "bad" performance compared to the other segments. This segment has really taken off the last 3 months and, in my opinion, needs to get shut down." Email from Dimitrios Kritikos, Lehman, to Jeffrey Goodman, Lehman (Feb. 2, 2007).

- "I can see performance for Aurora originated loans to become even worse in 2007. Looking at the trends on originations and linking them to first payment defaults, the story is ugly: The last 4 months, Aurora has originated the riskiest loans ever, with every month been riskier than the one before – the industry meanwhile has pulled back during that time. The proposed guideline changes that are on the table today are not sufficient to rein in the bad performance." E-mail from Dimitrios Kritikos, Lehman, to Jeffrey Goodman, Lehman (Jan. 31, 2007).

494. Finally, the Examiner's Report revealed the misalignment of incentives within Lehman that helped fuel the departure from sound underwriting practices. In his interview with the Examiner, Michael Gelband, Lehman's head of fixed-income products, stated that "in general, MCD [Lehman Mortgage Capital Division] had an incentive to continue to push for originations because it was rewarded when its origination volumes were high and the risk was

shifted to the Securitized Products Group after the mortgages were originated." Examiner's Interview of Michael Gelband, Aug. 12, 2009, at 11.

b. Confidential witnesses provide additional evidence of Aurora's abandonment of sound underwriting practices.

495. CW-26 worked for Aurora for almost five years, from 2002 through September 2007. From April 2004 through September 2007, he was a credit risk underwriter in Aurora's audit control department for its regional operations center in Gaithersburg, Maryland.

496. Aurora's regional operations center originally had five or six different teams who underwrote loans for Aurora's Wholesale Division. By September 2007, the number of underwriting teams had doubled to eleven teams. The regional operations center also had in-house loan officers who were in charge of about 10 to 15 independent brokers each.

497. CW-26 said that he worked in a high pressure environment at Aurora. "There was a lot of pressure to increase production," he said. His office was expected to close a greater number of loans each month. Indeed, Aurora was closing loans at such a fast pace that it had a hard time hiring enough underwriters. "There were people who became underwriters because they were a warm body in a vacant seat," CW-26 explained.

498. Because of the volume of loans coming into the office, CW-26 said that it was difficult for the underwriters to detect fraud. "None of us wanted to approve fraudulent loans, but it was so easy to do with no income, no assets loans," he said.

499. CW-26 explained that through his experiences working with various brokers while at Aurora, it was clear to him that borrowers did not fully understand what they were getting into with their loans. "There were plenty of brokers that did whatever they could to get someone's loan to go through." For example, CW-26 said, the brokers would tell borrowers not to worry about a high interest rate resetting on adjustable-rate mortgage loans. The brokers

would tell borrowers that by the time the interest rate adjusted upwards, they'd be able to either sell their property for a profit or refinance into a traditional mortgage. As a result of these practices, Aurora loan services was approving loans that were based on predatory lending—loans that were issued without regard to a borrower's ability to pay.

500. CW-27 worked as a Regional Operations Manager for Aurora in New Jersey from June 2004 through April 2005. CW-27 explained that the majority of loans Aurora underwrote were Alt-A loans, based on stated income and stated assets. She said that Aurora has systems in place to detect fraud and prevent underwriting bad loans. However, because Aurora put an emphasis on volume, and brokers "were trying to push anything they could," a lot of bad loans were approved by Aurora and pushed through its system anyway.

501. CW-27 said that that there were a lot of exceptions granted for the loans Aurora underwrote. "We had a lot of leeway to make exceptions," she said. "Exceptions were rampant." Aurora had internal guidelines that clarified which employees, in which position, could make which types of exceptions. For example, an underwriter could only grant exceptions on credit scores that were short two or three points from the required number in the underwriting guidelines for a specific product. Supervisors, however, were authorized to deviate five points from a required credit score, while managers, like CW-27, who worked at Aurora's regional operations center, could deviate up to ten points off the required credit score. Any deviation greater than ten points had to be approved by Aurora's Credit Policy Committee in Denver. CW-27 said that a similar system was in place for exceptions on LTVs.

502. CW-27 participated in monthly conference calls with all of the other managers of Aurora's regional operations centers. During these calls, each manager would go over projections for how many loans they expected to close in the coming month and explain why.

They would also discuss new loan products or changes to guidelines. Every quarter all of the managers for the regional operations centers would also meet at Aurora's offices in Denver. CW-27 estimates that exceptions were made on at least fifty percent of the loans that Aurora underwrote. Although exceptions were not as high in her New Jersey office ("because we were new"), she learned through conversations with managers of other regional Aurora offices that they granted more exceptions.

503. For example, when she made visits to Aurora's Gaithersburg, Maryland office for training, CW-27 noticed the high number of exceptions that office generated. CW-27 also learned through conversations with her colleagues and other managers that the manager of the Gaithersburg, Maryland office was compromising standards in order to push loans through. CW-27 said that the Gaithersburg managers was "pushing loans through and over-riding underwriters' decisions" to decline loans. "Sometimes the Quality Control results were swept under the rug if fraud was found because the branch was doing so well," she added.

504. CW-27 also explained that when Aurora utilized "compensating factors," the factor on which Aurora relied was supposed to be part of the loan file or related to borrower-supplied information. However, Aurora would count as a "compensating factor" not factual information originating from the borrower, but the amount of fees or costs it could extract from the transaction, based on the borrower's otherwise unlikely ability to meet underwriting guidelines. For example, Aurora would count as a "compensating factor" justifying approval of the loan whether it could count an extra quarter point for pricing for the loan, or add a prepayment penalty. CW-27 said that these types of "compensating factors" did not decrease the risk of the borrower defaulting. Rather, it made the loan more attractive for Aurora to sell to investors, because Aurora would make more money on the loan.

505. CW-27 said that although Aurora had good policies in writing, they did not work as well in practice. For example, the underwriting guidelines called for underwriters to perform a "reasonability test" for stated income, stated asset loans regarding a borrower's income. However, the guidelines never told the underwriters how to do this. CW-27 said that there should have been specific recommendations for underwriters to check salaries on websites such as Salary.com and the U.S. Department of Labor's website.

c. The mortgages originated by Aurora and securitized in the PLMBS purchased by the Bank provide further evidence of Aurora's abandonment of sound underwriting guidelines.

506. As discussed in detail below, the Offering Documents contained serious material misstatements regarding specific characteristics of the loan pools securing the Certificates for which Aurora originated loans, including misstatements with respect to the percentages of loans with LTVs in excess of 100%, 90% and 80%. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of Aurora's failures to observe their stated underwriting standards. Aurora's actual practices—including emphasis on loan quantity rather than quality, routine granting of underwriting exceptions, and reliance on unverified borrower-supplied information—caused it to originate loans whose characteristics were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

507. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, at Aurora variance from the stated standards was the norm, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Furthermore, Aurora manipulated the use of the term "compensating factors," approving

loans that did not otherwise meet underwriting guidelines by adding a financial penalty to the loan, in the form of extra points or prepayment penalties, thereby increasing Aurora's profit when it securitized the loan, while also penalizing borrowers with high costs and fees and increasing the likelihood of default.

508. Nowhere did any Offering Document apprise the Bank that Aurora abandoned its underwriting guidelines and that it engaged in predatory lending.

8. Chase Home Finance LLC and JPMorgan Chase Bank, N.A.

509. Chase Home Finance LLC ("Chase Home Finance") and/or JPMorgan Chase Bank, N.A. (collectively the "Chase Originators") originated underlying mortgage loans securing at least five of the Certificates purchased by the Bank: JPALT 2006-A1 1A1, JPALT 2006-A2 1A1, JPALT 2006-A3 1A1 and JPALT 2007-A2 12A1. The Chase Originators abandoned sound underwriting practices.

510. The Chase Originators' departure from sound underwriting standards has been confirmed by JP Morgan Chase & Co. ("JPMC") Chairman and CEO, Jamie Dimon. In his January 13, 2010 testimony before the FCIC, Dimon stated that "the underwriting standards of our mortgage business should have been higher." Dimon confessed that JPMC, the parent company of the Chase Originators, "misjudged the impact of more aggressive underwriting standards and should have acted sooner and more substantially to reduce the loan-to-value ratios."

a. Investigations and confidential witness testimony demonstrate that the Chase Originators abandoned sound underwriting practices.

511. In an undated internal memorandum that became public in March 2008, Chase Originator employees circulated tips for using "Cheats & Tricks" to allow Chase loan originators to circumvent the Chase Originators' in-house automated loan underwriting system to get risky

loans approved. The memo provides that the secret to getting risky loans approved is to inflate the borrower's income or to otherwise falsify their loan application.

512. The memo suggests that the Chase Originators' automated loan-origination system, called "Zippy," "can be adjusted" to "get the findings you need" by trying some of these "handy steps":

> (1) In the income section of your 1003, make sure you input all income in base income. DO NOT break it down by overtime, commissions or bonus.
>
> (2) NO GIFT FUNDS! If your borrower is getting a gift [to cover some or all of the down payment], add it to a bank account along with the rest of the assets. Be sure to remove any mention of gift funds on the rest of your 1003.
>
> (3) If you do not get Stated/Stated, try resubmitting with slightly higher income. Inch it up $500 to see if you can get the findings you want. Do the same for assets.

513. Thus, according to the memo, Chase Originator employees should "never fear" if they "do not get stated income / stated asset findings" on the first attempt because they can try and try again until they get their desired result. By lumping contingent income with base income, concealing the receipt of gifts (which are typically required to be specifically disclosed in loan applications), and artificially inflating income, Chase loan originators were able to approve countless loans that otherwise would not have satisfied Zippy's stated underwriting guidelines.

514. As the "Zippy Cheats & Tricks" memo reveals, "If you get a "refer" or if you DO NOT get Stated Income / Stated Asset findings. . . . Never Fear!! ZiPPY can be adjusted (just ever so slightly). Try these steps next time you use Zippy! You just might get the findings you need!!"

515. Confidential witnesses confirm this prevailing attitude of using "cheats and tricks" designed to game the system and approve loans that are not in accordance with stated

underwriting guidelines. These confidential witness statements provide evidence that (1) the Chase Originators' employees faced intense pressure to close loans at any cost; (2) the Chase Originators' employees manipulated loan data in order to close loans; (3) the Chase Originators approved loans based upon inflated appraisal values; and (4) the Chase Originators failed to adhere to sound underwriting guidelines.

516. CW-3 was a loan processor and assistant to the branch manager at a Florida branch of Chase Home Finance from April 2006 until August 2007.[12] She stated that Chase Home Finance employees faced enormous pressure to close loans because their salaries were dependent solely upon quantity. For example, loan officers only received a salary their first two months at the company. After the second month, their income was based upon commissions for the number of loans they closed; if they did not close loans, they did not receive a paycheck. CW-29 echoed similar comments, and said that staff underwriters at JPMorgan Chase received a salary plus bonus pay that was based on the quantity of funded loans.

517. According to CW-3, branch and regional managers pressured loan officers to meet monthly quotas. If a loan officer worked two months without closing a loan, he or she could be fired. Thus, "loan officers walked around on eggshells at month end" for fear of losing their job or not getting the commission that fed their families.

518. Underwriters at Chase Home Finance also received monthly bonuses based upon the volume of loans closed, and management pressured such underwriters to close loans. CW-3's regional manager would send the branch managers below him to Chase Home Finance's underwriting office in New Jersey "to work the magic" and close the loans.

[12] CW-3 had earlier worked for Countrywide. *See supra* ¶¶ 297, 306.

519. Due to the pressure that was placed upon Chase Home Finance employees to close loans at any cost, many employees inflated borrowers' income and modified loan files in order to push loans through. "It was very common to take stuff out of the loan file" in order to get a loan approved, said CW-3. For example, loan officers removed bank statements, paystubs, or other documents which showed the borrower's income so that the loans would not be hindered in closing.

520. According to CW-3, "loan officers knew [the borrowers] were making less income" than was stated on the loans because, acting on orders from the branch manager, the loan officers inflated the borrowers' income. As an example, CW-3 stated: "You'd see a guy that owned a pizzeria that was making millions and you knew there was just no way."

521. Knowledge of the inflated incomes flowed to management at Chase Home Finance because loan officers often brought their loans to the branch manager for help and instruction on how to make them close. In fact, said CW-3, "The branch manager often fixed the loan . . . [he] figured out what LTV [the borrower] needed to close the loan and inflated the income to make the loan work." Branch managers also called the regional managers above them to help close problem loans.

522. CW-3 summed up the overall attitude at the Chase Home Finance branch where she worked: "It's okay to do what you have to do to get the loans closed."

523. The statements of CW-28, a senior loan underwriter at Chase Home Finance from December 2004 to August 2005, illustrate similar problems, including that Chase Home Finance closed loans based upon stated incomes that were false and inflated. CW-28 recalled circumstances in which mortgage brokers changed applicants' stated incomes before they submitted the loan files to Chase Home Finance. Then, after the loans closed and weren't

performing, Chase Home Finance would contact the borrower and "hear the borrower say, 'I never said I make that much.'"

524. CW-28 also said that he commonly reviewed loan files that contained "questionable" statements of income. In fact, "[i]t happened daily," said CW-28, and "[y]ou'd see self-employed people, like a landscaper, who stated they made $10,000 a month," without an adequate savings history or FICO score. When CW-28 determined that the stated income was "not do-able," based upon his review of the website salary.com or an occupational jobs handbook, he notified his manager or other supervisors. "There was never any push-back. They wanted the loans booked and funded." However, he was always told that "it meets the FICO score and savings history guidelines so we do the loan." It was "one size fits all." According to CW-28, "It really wasn't common sense-based, but based on the FICO scores you could sell the loan to investors. They wanted quantity, not quality." Loans were issued based on "FICO and income. This was not common-sense underwriting. It was not based on risk, but almost like on the game show "Let's Make a Deal": they made a deal based on satisfaction of these two criteria" only.

525. In addition to approving loans based upon inflated incomes, CW-28 also said that Chase Home Finance employees approved loans based upon inflated appraisal values. According to CW-28, Chase Home Finance employees were "not allowed to contest appraisals that appeared to be inflated." As a result of the housing bubble, appraisers overadjusted and ensured that the appraisals came in at or above the sales price. For example, CW-28 said he recalled one subdivision in California in which homes sold in the second phase of the subdivision build-out doubled the value of those sold in the first phase, which had occurred just a few months earlier. In this regard, CW-28 said, "[t]he first phase appraisals were valued at

$200,000. The second phase, based on speculative investors buying and selling, pushed the values to $400,000. You'd look at the comps and there would be two inside the 'division' and one outside, but you couldn't contest the value."

526. CW-29, a senior underwriter at JPMorgan Chase Bank, N.A. from April 2001 to June 2008, stated that managers at JPMorgan Chase Bank, N.A. often overturned the decisions of lower-level underwriters to reject stated-income loans. According to CW-29, "If the manager felt the income made sense and the underwriter didn't, the manager could overturn it."

b. The mortgages originated by the Chase Originators and securitized in the PLMBS purchased by the Bank provide further evidence of abandonment of sound underwriting practices.

527. The Chase Originators originated mortgages that secured at least five Certificates in this action. As discussed in detail below, the Offering Documents contained serious material misstatements regarding specific characteristics of the loan pools securing these Certificates, including misstatements and omissions with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of the Chase Originators' failures to observe their stated underwriting standards. The Chase Originators' actual practices—including the use of unreliable appraisals, routine granting of underwriting exceptions, and reliance on unverified borrower-supplied information—caused them to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

528. In summary, far from following their underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was the norm at the Chase Originators, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that the Chase Originators abandoned their underwriting guidelines.

9. American Home Mortgage and American Home Mortgage Investment Corporation

529. American Home Mortgage Corporation and American Home Mortgage Investment Corporation (collectively, "AHM") originated underlying mortgage loans securing at least thirteen of the Certificates purchased by the Bank: AHM 2005-2 1A1, AHMA 2006-6 A1A, AHMA 2007-2 A1, AHMA 2007-5 A1, DBALT 2006-AR2 1A1, DBALT 2006-AR2 1A2, DBALT 2007-AR1 A1, HVMLT 2006-7 2A1A, JPALT 2007-A2 12A1, LUM 2006-7 2A1, MARM 2005-8 1A1, MSM 2006-16AX 2A1 and NAA 2007-3 A1. AHM abandoned sound underwriting practices.

a. Investigations, lawsuits and confidential witness testimony demonstrate that AHM abandoned sound underwriting practices.

530. In 2010, AHM was identified by the OCC as the eleventh worst mortgage originator in the country based on the delinquency rates of the mortgages it originated in the ten metropolitan areas with the highest rates of delinquency.

531. The *Wells Fargo* Complaint details how an internal AHM "Credit Update" presentation dated from October 2005 detailed revised credit factors to be used in making loans to high risk borrowers. The Credit Update sets forth the new "guideline interpretations" under a heading "Where We Are Now" which included:

- Not requiring verification of income sources on stated income loans;

- Reducing the time that need have passed since the homeowner was in bankruptcy or credit counseling;
- Reducing the documentation required for self-employed borrowers; and
- Broadening the acceptable use of second and third loans to cover the full property value.

These new guideline interpretations, which were not disclosed in the Offering Documents, relaxed substantially, or sometimes rendered meaningless, AHM's prior underwriting guidelines.

532. The *Wells Fargo* Complaint specifically identifies an internal AHM email sent on November 2, 2006, from Steve Somerman, an AHM Senior Vice President of Product and Sales Support in California, stating that AHM would make a loan to virtually anyone, regardless of the borrower's ability to verify income, assets or even employment. The email specifically urged loan officers to make stated income loans, no income loans, no asset loans, and "No Doc" loans.

533. Confidential witness testimony confirms this policy and practice at AHM. As these confidential witnesses attest, at AHM underwriting guidelines were benchmarks against which exceptions were routinely granted; they were not "strict rules."

534. CW-30 was a senior underwriter at AHM in New York from 2000 through 2007. As an underwriter at AHM, CW-30 handled a lot of "No Income, No Asset" loans, known as "NINAs," as well as No Doc loans, which required little documentation or verification. Under the company's underwriting guidelines, these loans were supposed to have certain credit scores, assets, and post-closing reserves in order to be approved.

535. Notwithstanding these supposed underwriting guidelines, CW-30 confirmed "it was a given" that AHM would make exceptions to the underwriting guidelines. The mortgage aggregators or Sponsors to whom AHM sold the loans were aware that these guidelines were being abandoned, and usually willing to accept the risk.

536. "If the file was creditworthy other than the exception, American Home Mortgage got it approved," CW-30 said. A required credit score, asset amount or reserve level could be waived by the company and those to whom it sold the loans. "They were guidelines at the end of the day; they weren't strict rules."

537. CW-30 said that loans he did not believe were creditworthy, and which he rejected, were passed on to his managers. His managers would frequently approve those loan files, too.

538. CW-31 worked as an underwriter at American Brokers Conduit, a wholesale originator that was a division of American Home Mortgage Investment Corporation, in its Charlotte, North Carolina office from June 2006 to August 2007.

539. CW-31 was expected every day to review five residential home loans originated by independent brokers. "There was a push in the wholesale office to get loans closed," CW-31 said.

540. CW-31 objected to closing loans that lacked documentation, such as documentation of sufficient income or asset verification. Her supervisor derided her for being such a stickler. "She felt like I over-scrutinized the loans," CW-31 said. "I thought that was what was needed." CW-31 also said that her supervisor did not like it when CW-31 rejected a loan because it failed to meet guidelines. Her supervisor sometimes would override her decisions.

541. CW-31 was verbally reprimanded for rejecting too many loans. "I was spoken to more than once because I would not approve loans that did not meet the guidelines."

542. CW-31 also saw appraisals on properties in Atlanta that she felt were inflated. However, she did not have an option to order a second appraisal. "We couldn't do anything

about it," she said. When CW-31 brought to her managers' attention a loan with what she thought was an inflated appraisal, they did not want her to do any further research. Instead, they usually approved it on the spot. "We could take it to the managers and if they felt it was okay, we went with it."

b. The mortgages originated by AHM and securitized in the PLMBS purchased by the Bank provide further evidence of AHM's abandonment of sound underwriting practices.

543. AHM originated mortgages that secured at least 12 Certificates in this action. As discussed in detail below, the Offering Documents contained serious material misstatements and omissions regarding specific characteristics of the loan pools securing these Certificates, including misstatements with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of AHM's failure to observe its stated underwriting standards. AHM's actual practices—including the use of unreliable appraisals and routine granting of underwriting exceptions —caused it to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

544. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was the norm at AHM, and many loans were made with essentially little to no underwriting or effort to evaluate ability to

repay. Nowhere did any Offering Document apprise the Bank that AHM abandoned its underwriting guidelines.

10. MortgageIT, Inc.

545. MortgageIT, Inc. ("MortgageIT") originated underlying mortgage loans securing at least twelve of the Certificates purchased by the Bank: CWALT 2006-OA16 A2, DBALT 2006-AR3 A2, DBALT 2006-AR4 A1, DBALT 2007-AR1 A1, DBALT 2007-AR3 2A1, LUM 2006-6 A1, MARM 2005-7 2A1, MHL 2005-5 A1, MHL 2006-1 1A2, MSM 2006-16AX 2A1, RALI 2006-QA2 1A1 and RALI 2006-QA3 A1. MortgageIT abandoned sound underwriting practices.

a. The Bank's review of loan files demonstrates that MortgageIT abandoned sound underwriting practices.

546. The Bank recently obtained access to and reviewed the loan files for numerous mortgage loans originated by MortgageIT and securitized in MHL 2006-1 1A2.[13] The Bank's review of these loan files demonstrates that MortgageIT abandoned its stated underwriting standards. On information and belief, MortgageIT's abandonment of underwriting practices and failure to properly conduct appraisals with respect to these mortgage loans was repeated with other mortgage loans also backing this security.

547. For example, the Bank's review of a mortgage loan (#40507819), secured by property in Las Vegas, Nevada, reveals irregularities in the origination of this loan demonstrating that MortgageIT did *not* originate this loan in accordance with stated underwriting standards. The loan was originated without appropriate approvals of employment or income, despite red flags in the loan file indicating that these representations were falsified. The loan was not

[13] MortgageIT's abandonment of underwriting guidelines with respect to four of these loan files is described here. By way of example only, an additional six loan files originated by MortgageIT, which also reflect its abandonment of underwriting guidelines, are described in the attached Appendix VIII.

originated through an arms-length transaction, and a disqualifying prior delinquency on a prior mortgage loan was overlooked, all in violation of MortgageIT's underwriting guidelines.

548. The mortgage loan application for this property lists the borrower's employment as the self-employed owner of SK Appraisals working out of the home in Las Vegas, Nevada for the past two years, and with three years working in the field. However, the borrower's credit report does not reference this line of work and refers only to Ryan, Inc., and lists the borrower's occupation as a construction foreman or superintendent. For loan approval, the borrower needed to provide either a letter from a certified public accountant ("CPA") to prove the borrower had been self-employed for two years, or an appraisal license showing employment for 2 years. The CPA letter in the file dated January 9, 2006 indicates that the CPA prepared the borrower's tax return for only the prior year. The CPA letter bears a handwritten note indicating the letter is not acceptable. The loan file also contains a copy of the appraiser report confirming the borrower had been licensed since June 30, 2005, which is less than the 2 years required according to MortgageIT 206 Gold ARM guidelines posted December 13, 2005.

549. The mortgage loan application lists stated earnings of $22,577 per month, or $270,924 annually. Additional red flags were present in the loan file to indicate the borrower's income was overstated. The borrower had minimal verified assets in relation to his stated monthly earnings, and had only $4,112 in the business bank account, with no average balance available. Furthermore, the borrower had only been licensed for a short period of time, which would not appear sufficient to build a clientele to command the higher income stated. There was also no evidence the borrower employed a staff that would create a greater earning potential.

550. The borrower filed Chapter 13 bankruptcy on January 17, 2008. The statement of financial affairs filed with the bankruptcy court discloses the borrower's 2005 income as

$69,030, or one-fourth of the amount stated when the loan was originated. Evaluating the borrower's 2005 income results in a DTI at the time of loan origination of 80.7%, which well exceeds the maximum allowed rate of 40%.

551. Considering the lack of evidence of the borrower's employment as stated for the required length of time, the excessive income stated for the length of time employed, and the subsequent evidence that the borrower's income was overstated, it is clear that the mortgage loan underwriter did not ensure that the borrower's income could support the monthly housing expense and all recurring monthly obligations.

552. In addition, the guidelines under which this mortgage loan was originated require a housing history with no delinquencies for the past 24 months. The credit report dated October 19, 2005 confirms a 30-day delinquency on another loan with another lender in February, 2004. The borrower wrote a letter of explanation indicating he was disputing the reporting. The borrower indicates the delinquency occurred during a refinance transaction in February 2004 and that the loan was paid in full in March 2004. The borrower indicates the loan officer recommended not paying the mortgage in February 2004 due to the impending loan payoff. Although the credit report confirms the delinquency occurred in February 2004, the loan was not paid in full until August 2004. Regardless of the specific circumstances of the payoff, the borrower's explanation confirms that the borrower did not make the February 2004 payment in a timely manner, making the approval of this loan a violation of the underwriter's guidelines.

553. Finally, this mortgage loan was not an arms-length transaction. Shelley Prather is listed as the agent for the broker on this loan. Ms. Prather completed the application, the request for verification of deposit, and ordered the appraisal. The borrower's bankruptcy filing confirms the borrower is married to Shelley Kinner, also known as Shelley Prather.

554. The Bank's review of the loan file (#40433485) relating to a property in Sacramento, California also reveals irregularities in the origination of this loan demonstrating that MortgageIT did *not* originate this loan in accordance with stated underwriting standards. For example, MortgageIT did not ensure that the borrower's income would support its total housing expense and all recurring monthly debt. The borrower misrepresented the real estate it owned and its related liabilities. Although MortgageIT lent this borrower funds for the subject property ("Property A"), which was indicated as the borrower's primary residence, and which transaction closed on October 20, 2005, public records reveal that on October 18, 2005 the same borrower purchased an additional property ("Property B") also in Sacramento, which transaction was a matter of public record as of October 19, 2005, but which was not reflected in the loan file. The borrower took out two loans on Property B totaling $308,000, neither of which were reflected in or accounted for in the loan file for Property A. Based on these underwriting failures, MortgageIT was unable to ensure the borrower's ability to repay its ongoing housing payment and all recurring debt, which is a breach of the MortgageIT Underwriting Guidelines as described in the Offering Documents for this security.

555. The Bank's review of a third mortgage loan (#40469047), secured by property in Columbus, Ohio, also reveals irregularities in the origination of this loan demonstrating that MortgageIT did *not* originate this loan in accordance with stated underwriting standards. For example, MortgageIT approved and closed this loan under program A36SI-3PIO with guidelines (ALT-A Ver. 06/21/05 Rev. 09/19/05) using Stated Income/Stated Asset documentation. The maximum LTV allowed under that program for cash out refinance transactions is 70%. However, MortgageIT allowed this loan to close at an LTV of 80%, exceeding the guidelines for

maximum LTV based on this loan's criteria. Based on these underwriting failures, MortgageIT did not adhere to its stated underwriting standards.

556. The Bank's review of a fourth mortgage loan (#40457227), secured by property in Los Angeles, California, also reveals irregularities in the origination of this loan demonstrating that MortgageIT did *not* originate this loan in accordance with stated underwriting standards. For example, the property value that MortgageIT reflects in the loan file is not well supported. The property transferred in June 2004 for $519,000 and for the subject transaction just over a year later in October 2005 for $850,000. Although the subject property had been refurbished, the appraiser did not use comparables that supported the stated value. The appraiser used six comparable properties—only one of which is acceptable (at five blocks east) based on distance from the subject property. The other five comparable properties are one to two miles south of the subject property, in a different marketing area. In addition, the value of this property, as determined by the AVM as of the date of the subject transaction, is $547,000. This appraisal did not meet MortgageIT's guidelines, which require compliance with the Uniform Standards of Professional Appraisal Practice.

557. In addition, with respect to this third property, the borrower's housing payment is increasing from pre-purchase rent of $1,250/month to $5,067/month, or an over ***400% increase*** on a monthly basis. This borrower reports its highest credit limit on its credit report as $11,000. The borrower's credit profile as reflected on the credit report in the loan file does not demonstrate any current or past credit history showing that this first time home buyer has the capacity to carry this amount of debt service. Accordingly, by failing to ensure that this borrower had the capacity to make its ongoing monthly payments to service its housing debt, MortgageIT failed to adhere to its stated underwriting guidelines.

b. The mortgages originated by MortgageIT and securitized in the PLMBS purchased by the Bank provide further evidence that MortgageIT abandoned sound underwriting practices.

558. MortgageIT originated mortgages that secured numerous Certificates. As discussed in detail below, the Offering Documents contained serious material misstatements and omissions regarding specific characteristics of the loan pools securing these Certificates, including misstatements with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of MortgageIT's failure to observe its stated underwriting standards. MortgageIT's actual practices—including the use of unreliable appraisals, routine granting of underwriting exceptions, and reliance on unverified borrower-supplied information—caused it to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

559. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was the norm at MortgageIT, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that MortgageIT abandoned its underwriting guidelines.

11. Silver State

560. Silver State Financial Services, Inc. and Silver State Mortgage (collectively, "Silver State") originated underlying mortgage loans securing at least five of the Certificates

purchased by the Bank: MLMI 2006-AF2 AV2A, NAA 2006-AR4 A2, NAA 2006-AF2 5A1, NAA 2007-1 2A1 and TMTS 2007-6ALT A1. Silver State abandoned sound underwriting practices.

a. Evidence from the Bank's review of loan files and a journalistic investigation indicates that Silver State abandoned sound underwriting practices.

561. The Bank recently obtained access to and reviewed the loan file for a mortgage loan on property in Las Vegas, Nevada (#1256031676), underwritten by Silver State Financial Services, Inc., and securitized in NAA 2006-AF2 5A1. On information and belief, Silver State's abandonment of its underwriting practices with respect to this mortgage loan was repeated by Silver State with other mortgage loans that also back securities the Bank purchased.

562. Further analysis regarding this borrower has uncovered debts that were not disclosed in the loan file, the disclosure of which would have placed the loan outside of the lender's underwriting guidelines. The loan application for this mortgage fails to reveal the borrower's ownership interest in a second home at a different address in Las Vegas, which obligation the borrower incurred one month prior. The borrower's obligation on the second property is substantial. The loan on the borrower's second property is for $400,000 with monthly payments of $2,625. In addition, the loan application fails to reveal a second lien that the borrower also originated a month prior, in the amount of $100,000, with a monthly payment of $1,175. In addition, the borrower has taxes and insurance obligations on this property of over $375/month. If these debts had been included in the borrower's loan application, it would have increased the borrower's DTI to 61%. The loan application misrepresented the outstanding obligations owed at the time of this transaction, the inclusion of which would have resulted in the DTI exceeding the lender's underwriting guidelines.

563. In May 2008, Public Radio International aired an episode of *This American Life* entitled "The Giant Pool of Money" exploring the relationship between the financial crisis and mortgage-backed securities. The episode included an interview with Mike Garner, who was hired to work at Silver State Mortgage straight from his previous job as a bartender, having no experience or knowledge of the mortgage industry. As Garner explained, he "was as green as you could be." Nonetheless, Silver State tasked Garner with purchasing mortgages from brokers, bundling two or three hundred of them together at a time, and selling them to Wall Street banks. When Garner started, the mortgages he bought and packaged were standard mortgages that required a down payment and proof of a steady income. However, Garner described that as the mortgage-backed-securities market began to take off, the guidelines governing his purchase of mortgages became looser and looser. He described the shift to "stated income, stated assets" loans, under which individual income is not verified, but rather "loan officers would have an accountant they could call up and say 'Can you write a statement saying a truck driver can make this much money?'" Garner stated that "[t]hen the next one came along, and it was no income, verified assets." Accordingly,

> You don't have to tell the people what you do for work. All you have to do is state you have a certain amount of money in your bank account. And then, the next one is just no income, no asset. You don't have to state anything. Just have to have a credit score and a pulse.

564. Garner further described the process by which Silver State accepted lower and lower quality loans. Silver State employees would complain to Garner about loans that some other mortgage company offered but that Silver State was not allowed to offer. Garner stated:

> Three of them would show up at your door first thing in the morning and say, I lost ten deals last week to Meridian Bank. They've got this loan. Look at the guidelines for this loan. Is there any way we can do this? We're losing deals left and right.

Garner would then "get on the phone and start calling all these [Wall S]treet firms or Countrywide and say 'Would you buy this loan?' Finally, you'd find out who was buying them." Moreover, according to Garner:

> [O]nce I got a hit, I'd call back and say, "Hey, Bear Stearns is buying this loan, I'd like to give you the opportunity to buy it too." Once one person buys them, all the rest of them follow suit.

b. The mortgages originated by Silver State and securitized in the PLMBS purchased by the Bank provide further evidence of Silver State's abandonment of sound underwriting practices.

565. Silver State originated mortgages that secured at least four Certificates in this action. As discussed in detail below, the Offering Documents contained serious material misstatements regarding specific characteristics of the loan pools securing these Certificates, including misstatements with respect to the weighted average LTVs of the mortgage pools and the percentages of loans with LTVs in excess of 100%, 90% and 80%. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of Silver State's failure to observe its stated underwriting standards. Silver State's practices caused it to originate loans whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

566. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, variance from the stated standards was the norm at Silver State, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that Silver State abandoned its underwriting guidelines.

12. Alliance Bancorp

567. Alliance Bancorp originated underlying mortgage loans securing at least one of the Certificates, NAA 2006-AF2 5A1. Alliance Bancorp abandoned sound underwriting practices.

568. The Bank has recently obtained access to and reviewed the loan files for nine mortgage loans underwritten by Alliance Bancorp and securitized in NAA 2006-AF2 5A1.[14] The Bank's review of these loan files demonstrates that: (1) the originator did not follow stated underwriting guidelines in determining the borrower's ability to pay; (2) the borrower had significant undisclosed debts that were not taken into account in the underwriting process; and (3) the appraised values on the properties were unsupported or inadequately supported and therefore did not adhere to stated underwriting guidelines. On information and belief, Alliance Bancorp's abandonment of underwriting practices and failure to properly conduct appraisals with respect to these mortgage loans were repeated with other mortgage loans also backing this security.

569. The Bank's review of the loan file (#1256031968) secured by property in Antioch, California, is a cash-out refinance underwritten by Alliance Bancorp. With respect to the borrower's ability to pay, in this cash out refinance of the borrower's primary residence, the loan was approved using "No Ratio" documentation. The loan application lists two employers, for which the borrower is a "radiologic tech" and an "x-ray technician." Although there are verbal verifications of employment, it is unclear if these are full-time positions. The borrower owns six investment properties, three of which he purchased in 2005. His total monthly debt service for his investment properties alone is $25,738. The credit report confirmed the borrower

[14] The abandonment of underwriting guidelines with respect to three of these loan files are described here. The other six are described in the attached Appendix VIII.

was 120 days delinquent on an account with OMAX/CBUSA in the amount of $1,081. The account was to have been paid in full at closing. The HUD-1 confirms the debt was not paid, but is marked as "Buyer $1,081 POC." Furthermore, the preliminary report shows that the borrower was delinquent on the property taxes for the subject property. The delinquent taxes were also to have been paid at closing and are marked "Buyer $4,436.79 POC." The monthly obligations excluding the investment properties are $9,406.62. The borrower would need to earn upwards of $15,677 per month, or over $188,000 per year, in his capacity as an x-ray or CT technician to maintain a 60% DTI for the subject transaction and consumer debt alone. No rental income is listed on the application for the rental properties. The borrower would have required income of $58,574 per month, or over $702,000 per year, in order to maintain a DTI of 60% when accounting for all obligations. The salary estimated for a radiological technician in Antioch, CA in the 75th percentile is $90,389. Even assuming both positions were full time and the borrower's salary was in this top range, the borrower would still be over a 60% DTI considering the subject transaction and consumer debt alone. Alliance Bancorp did not ensure the borrower's ability to manage the monthly obligations with the closing of this transaction.

570. With respect to the borrower's undisclosed debts, the loan application for this cash out refinance does not correctly reflect all of the borrower's investment properties. The borrower also owns another property in Antioch, California, which is not listed on the schedule of real estate owned. Alliance Bancorp did not include the debt for the property as it appears on the credit report. The loan application also fails to disclose the acquisition of a property in El Dorado Hills, California. The website www.MERSonline.org confirms the borrower became indebted on a first and second mortgage on this property in the amounts of $588,000 and $147,000, respectively, on March 13, 2006. The Real Estate Owned report also indicates the

borrower purchased a property located in Rancho, California on February 17, 2006, which was not disclosed in the loan application.

571. With respect to the unsupported value of this cash out refinance, although the property last sold on April 7, 2004 for $649,500, it was appraised at $1,050,000 less than two years later, on February 7, 2006. This represents an appreciation of 61% in less than two years. A field review completed on March 7, 2006 suggests that this appraisal is high, based on comparables supposedly within one mile of the subject property. However, a search of Google Maps confirms the distance to the first comparable is 1.8 miles, and the distance to the second comparable is 1.6 miles. The second comparable was a sale that is approximately 10 months old. Furthermore, all of the comparables are located on larger lots. A retro value was obtained from DataVerify which estimates the value at origination at $787,000, which is a variance of 25%.

572. The Bank's review of the loan file (#1256031472) secured by property in Henderson, New York was also underwritten by Alliance Bancorp and securitized in NAA 2006-AF2 5A1. Plaintiff's review of this loan file reveals irregularities in the origination of this loan demonstrating that the originator did not satisfy its guideline requirement of obtaining a full appraisal and a review appraisal. The transaction is a cash-out refinance of the borrower's primary residence. The first appraisal assigned a value to the property of $2,800,000 on December 12, 2005. An additional appraisal on the same date completed by Brian Hineline also values the property at $2,800,000. A review of the appraisals confirms that the appraisers used exactly the same comparable and adjustments in arriving at the appraised value. The appraisals are identical in almost every detail. Both confirm that the property was purchased on August 26, 2004 for $1,550,000, and therefore represent an increase of $1,250,000 in less than 16 months. The appraisers did not give any explanation for the increase in value, and list neighborhood

values as stable. The invoice on Brian Hineline's appraisal listed a cost of $1,200, which is high for a standard appraisal fee. Given the similarities in the two appraisals which suggest that they were simply copied, the lender did not adequately meet its guideline requirement of obtaining a full appraisal and review appraisal.

573. The Bank's review of the loan file (#1256032007) secured by property in Vallejo, California, was also underwritten by Alliance Bancorp and securitized in NAA 2006-AF2 5A1. The loan file for this property included only a final title policy and recorded mortgage. Without any credit documentation, the lender was not able to evaluate the borrower's creditworthiness or ability to repay the loan. This loan was not originated in accordance with the lender's stated underwriting guidelines.

574. In summary, far from following its underwriting guidelines and making occasional, targeted and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, these examples indicate that at Alliance Bancorp, variance from the stated standards was the norm, and many loans were made with inflated appraisals and essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that Alliance Bancorp abandoned its underwriting guidelines.

13. Morgan Stanley Mortgage Capital Inc.

575. Morgan Stanley Mortgage Capital Inc. ("Morgan Stanley Mortgage") originated mortgage loans securing at least seven of the Certificates purchased by the Bank: MSM 2006-13AX A1, MSM 2006-16AX 2A1, MSM 2006-8AR 1A2, MSM 2006-9AR A3, MSM 2007-2AX 2A2, MSM 2007-5AX 2A2 and MSM 2007-7AX 2A1. Morgan Stanley Mortgage abandoned sound underwriting practices.

576. Morgan Stanley Mortgage was a mortgage aggregator that purchased loans from correspondent lenders. According to a company press release, beginning in October 2007, Morgan Stanley Mortgage was combined with Morgan Stanley & Co.'s servicing and loan origination business.

a. An investigation by the Massachusetts Attorney General provides evidence that Morgan Stanley & Co. abandoned sound underwriting practices.

577. In 2010, the Massachusetts Attorney General came to an "Assurance of Discontinuance" with Morgan Stanley & Co. stemming from Morgan Stanley & Co.'s funding of unfair and defective loans originated by one of the entities from whom Mortgage Stanley & Co. purchased loans for aggregation into loan pools underlying PLMBS, New Century Financial Corporation ("New Century"). *See* Assurance of Discontinuance, *In re Morgan Stanley & Co.*, No. 10-2538 (Mass. Dist. Ct. June 24, 2010). These allegations were based on the results of an investigation into the financing, purchase, and securitization of residential mortgage loans by Morgan Stanley & Co. and its affiliates during the period of late 2005 through the first half of 2007.

578. Morgan Stanley provided funding to New Century for new loan originations through warehouse facilities, which were lines of credit that gave New Century access to cash and "enabled New Century to quickly convert loans into cash to make additional loans." *Id.* at ¶ 10. "This enabled New Century to make more loans than it could have using only its own capital." *Id.* Of the investment banks providing billions of dollars, in the aggregate, in financing to New Century, Morgan Stanley & Co.'s warehouse line of credit was the largest; it committed to provide up to $3 billion of funding during 2006 and 2007. *Id.* ¶ 12. Morgan Stanley subsequently acted as an Underwriter for New Century's securitizations and purchased New Century's loans.

579. With respect to certain unfair and risky ARM loans issued by New Century, the Massachusetts Attorney General found that "Morgan Stanley was aware that New Century typically qualified borrowers based on the teaser rate, and that New Century made no effort to qualify borrowers at the Fully Indexed Rate." *Id.* ¶ 19. Such policies and procedures are presumptively unfair under Massachusetts law because state laws require a mortgage lender to determine ability to repay in accordance with the terms of the loan. Morgan Stanley & Co. conducted an analysis in 2006, based on a 2005 internal research report that predicted that, upon reset, borrowers could expect an increase in their DTI by a factor of 1.36. *Id.* ¶ 20. Morgan Stanley & Co. found "[o]n this basis, a 2006 'teaser'-based DTI ratio of 41% converts into a DTI of 56% at reset, and a 2006 teaser-based DTI ratio of 43% converts into a reset DTI ratio of 58%." *Id.* According to the Massachusetts Attorney General, "Morgan Stanley considered borrowers with DTI ratios in excess of 55% to be unable to afford their loans . . . ." *Id.* However, if this same calculus had been performed to estimate the post-reset DTI of the loans purchased by Morgan Stanley & Co., 41% would have had fully indexed DTIs greater than 55%, and 29% would have had fully indexed DTIs over 60%. *Id.* All told, "about 45% of the borrowers would not have qualified [for purchase by Morgan Stanley] had the borrower's ability to pay been assessed using Morgan Stanley's reset DTI analysis." *Id.*

580. The Massachusetts Attorney General found that, as a result of Morgan Stanley & Co.'s due diligence process, it was aware of quality problems with the subprime loans it was purchasing from New Century by late 2005, including "sloppy underwriting for many loans and stretching of underwriting guidelines to encompass or approve loans not written in accordance with the guidelines." *Id.* ¶ 23. Although Morgan Stanley & Co. began rejecting greater numbers of New Century loans in late 2005 and early 2006, it reversed course by April of 2006 when

faced with the prospect of losing New Century's business. At that point, one of Morgan Stanley & Co.'s senior bankers purchased 228 loans that Morgan Stanley & Co.'s diligence team had initially rejected. *Id.* ¶ 25. According to the Massachusetts Attorney General, "Morgan Stanley's diligence teams began to be more responsive to New Century's desire to include additional loans in the purchase pools." *Id.*

581. Consequently, "the large majority" of the loans in Morgan Stanley & Co.'s 2006-2007 New Century pools "were identified by Clayton as having some type of exception. Most loans had multiple exceptions." *Id.* ¶ 26. Moreover, in instances where Clayton found "material exceptions" to the guidelines, Clayton found that only 9% had sufficient compensating factors to offset such exceptions. *Id.* ¶ 27. Nonetheless, Morgan Stanley & Co. "waived exceptions on and purchased a large number of the loans found by Clayton to violate guidelines without sufficient compensating factors."[15] *Id.* ¶ 28. In fact, in the last three quarters of 2006, Morgan Stanley & Co. "waived more than half of all material exceptions found by Clayton" and "purchased a substantial number of New Century loans found by Clayton to violate guidelines without sufficient compensating factors." *Id.* Moreover, the Massachusetts Attorney General found that "loans with certain exceptions such as high DTIs or high LTVs or CLTVs that were in excess of underwriting guidelines but within a tolerance found acceptable to Morgan Stanley were purchased without a review by Clayton for compensating factors." *Id.* ¶ 29.

582. The Massachusetts Attorney General also found significant defects in Morgan Stanley & Co.'s valuation diligence process. Morgan Stanley & Co. employed "broker price opinions" to confirm the value of properties securing loans purchased from New Century. Despite Morgan Stanley & Co.'s stated policy to not purchase and securitize loans where the

[15] Clayton is a third party due-diligence firm. *See infra* § V.D.4.

LTV or CLTV exceeded 100%, the Attorney General found that Morgan Stanley & Co. purchased and securitized "numerous loans where the LTV or CLTV based on the [broker-price-opinion]-checked value . . . exceeded that threshold." *Id.* ¶ 34. Overall, 31% of the New Century loans securitized by Morgan Stanley & Co. in 2006 and 2007 upon which broker price opinions were received had broker-price-opinion-based CLTVs greater than 100%. *Id.* Of those loans, 60% had CLTVs greater than 105%, and 19% had CLTVs greater than 120%. *Id.*

583. Finally, the Massachusetts Attorney General discovered misrepresentations of the stated income for mortgages purchased by Morgan Stanley & Co. from New Century. "As early as October 2005, Morgan Stanley & Co.'s diligence team determined, in reviewing and rejecting loans for purchase, that the stated income on a number of New Century loans was unreasonable." *Id.* ¶ 39. Clayton found that of the New Century loans it reviewed that were stated income loans, "[o]n average, the stated income of these borrowers was approximately 42% higher than the income of fully documented borrowers." *Id.*

b. The mortgages originated by Morgan Stanley Mortgage and securitized in the PLMBS purchased by the Bank provide further evidence that Morgan Stanley Mortgage abandoned sound underwriting practices.

584. Morgan Stanley Mortgage originated (or aggregated) mortgages that secured at least the seven Certificates set forth above. As discussed in detail below, the Offering Documents contained serious material misstatements and omissions regarding specific characteristics of the loan pools securing these Certificates, including misstatements with respect to their weighted average LTVs and the percentages of loans with LTVs in excess of 100%, 90% and 80%, and the failure to disclose the compounded high-risk mortgages that infected the loan pools. Moreover, as described in paragraph 723 below, these securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of Morgan Stanley

Mortgage's failure to perform adequate due diligence with respect to the mortgages it purchased for deposit in the mortgage pools to determine if the mortgages were originated in accordance with stated underwriting standards. Morgan Stanley Mortgage's failure to perform adequate due diligence caused the deposit into the mortgage pool of mortgages whose actual LTVs were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

585. In summary, far from assuring compliance with the underwriting guidelines described in the Offering Documents, Morgan Stanley Mortgage purchased and deposited in the mortgage pools loans that had been originated under practices where variance from the stated standards was the norm; many of the loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any Offering Document apprise the Bank that Morgan Stanley Mortgage's due diligence permitted this abandonment of stated underwriting guidelines and that it engaged in predatory lending.

14. Other Mortgage Originators Originating Loans Underlying the PLMBS Also Abandoned Sound Underwriting Practices and Engaged in Predatory Lending in Order to Issue Loans for Securitization

586. Other mortgage originators who originated loans underlying the Certificates in this action, including those whose origination practices are outlined in Appendix IX, also abandoned sound underwriting practices, did not conduct appraisals in conformance with applicable requirements, and engaged in predatory lending. The practices of these originators were not disclosed in the Offering Documents, rendering them materially false and misleading, as set forth in more detail below.

D. The Securitization Process Was Plagued by Conflicts of Interest and Misplaced Incentives

587. A handful of large financial institutions dominated every aspect of the mortgage securitization process. They owned many of the mortgage originators, and funded the lending activities of many of the originators they did not own outright. As a result, these financial institutions—and the Sponsors, Depositors and Underwriters that were divisions of these financial institutions—were in a position to scrutinize the practices of the originators and examine closely the mortgages placed in the pools. Indeed, they had the legal responsibility to do so and to provide investors with complete and accurate information.

1. The Vertical Integration of Many of the Firms Involved in the Issuance of the PLMBS Purchased by the Bank Provided the Securities Defendants with Access to Information Regarding the Abandonment of Underwriting Guidelines, the Manipulation of the Appraisal Process, and Predatory Lending Practices.

588. Many of the PLMBS purchased by the Bank were issued by vertically integrated firms which were involved in several if not all of the stages of the securitization of the PLMBS—loan origination, sponsoring, obtaining credit ratings, issuing, underwriting, and/or selling the securities. The following table summarizes the vertical integration of the entities involved in various stages of origination, securitization and sales of the PLMBS purchased by the Bank.

589. Between 2005 and 2007, the number of vertically integrated firms grew significantly because investment banks and other issuers of mortgage-backed securities sought to ensure a steady supply of mortgage loans for securitization and sale to investors. Yet, as a result of the direct involvement in the origination of the loans they securitized, the vertically integrated firms, and specifically, the Sponsor, Depositor/Issuer and Underwriter affiliates of the firms, had access to and ignored red flags raised by information regarding the underwriting abuses of the mortgage originators.

590. For example, in securitizing the SAMI, LUM, BSMF, BALTA, and GPMF Certificates, EMC Mortgage Corporation—as Sponsor of the issuances—should have known what its affiliates EMC Mortgage Corporation and Bear Stearns Residential Mortgage

Corporation were doing when they originated the underlying mortgage loans. The same is true for the other vertically integrated entities listed above, many of whom, like the EMC and Bear Stearns entities, had corporate affiliates that originated the substandard loans underlying the Certificates purchased by the Bank, or had corporate affiliates that served as Sponsors that purchased and assembled the substandard loans into securities that were sold to the Bank. Unfortunately, the vertical integration of these firms created enormous incentives for affiliated originators and Sponsors to loosen standards so that more loans could be issued and more securitizations sold. In this regard, the Sponsor, Depositor/Issuer, and Underwriter Defendants should have been aware of the quality of the loans they were bundling for securitization and selling to investors, like the Bank.

591. Rather than use their superior access to information about the underlying mortgage pools, the Sponsor, Depositor/Issuer and/or Underwriter Defendants at the vertically integrated firms accepted defective loans that their affiliates purchased or originated for securitization. The reason was straightforward. They made more money that way on the front end, when issuing the loans, and on the back end, when securitizing them. Adequate due diligence and exclusion of defective loans would have cut into their profits and slowed down the securitization machine.

592. Moreover, even those Securities Defendants that did not have corporate affiliates involved in concocting the risky PLMBS sold to the Bank still had corporate affiliates intimately involved in the creation and marketing of mortgage-backed securities. Given these corporate affiliations, all of the Securities Defendants should have known, and failed to disclose, the substantial risks associated with mortgage-backed securities.

2. Financial Ties Between the Investment Banks and Non-Bank Lenders Provided the Securities Defendants with Access to Information Regarding

the Mortgage Originators' Failure to Adhere to Underwriting Guidelines and Predatory Lending Practices.

593. Even where the parties involved in the securitization were not all affiliated under a single parent—for example, where a Sponsor purchased the loans from an unaffiliated mortgage originator—the Depositor/Issuer and Underwriter Defendants had access to abundant information about the mortgage originators' abandonment of underwriting guidelines and predatory lending practices. This was the result of the close financial ties between the unaffiliated mortgage lenders and the financial institutions that funded them.

594. Examples of this relationship are the credit facilities that mortgage originators maintained with the financial institutions involved in the securitization and underwriting of the PLMBS backed by those originators' loans. For example, Countrywide Financial Corp., collectively with its origination subsidiary, Countrywide Home Loans, Inc., had credit agreements with Bank of America, J.P. Morgan Chase, Citicorp USA (part of Citigroup), Barclays, and Deutsche Bank, which funded Countrywide's origination business. *See* John Dunbar & David Donald, *The Roots of the Financial Crisis: Who Is to Blame?* (May 6, 2009), http://www.publicintegrity.org/investigations/economic_meltdown/articles/entry1286 (noting that 21 of the 25 largest subprime lenders were financed by Wall Street banks).

595. Mortgage originators, including those that issued loans backing the PLMBS purchased by the Bank, depended on credit facilities of this sort to fund their operations. The originators borrowed from these credit facilities, pursuant to "warehouse agreements" so that they could continue to make loans to home buyers. When loans were sold, the originators repaid the warehouse agreements. When loans serving as collateral lost value, the financial institutions made margin calls requiring the originators to pay cash to the institutions. In connection with this process, the mortgage originators provided the financial institutions with documents about

the underlying loans, including performance characteristics and early warning signs of poor credit quality. The files were then passed to other divisions of the financial institutions for review and securitization. *See* Mortgage Bankers Association Warehouse Flowchart: Securitization, *available at* http://www.mbaa.org/files/ResourceCenter/WarehouseLending/FlowchartSecuritization.pdf (last visited Apr. 15, 2011).

596. The financial institutions also entered into purchase agreements with unaffiliated originators so that the financial institutions were assured access to batches of mortgage loans to securitize, and the originators were guaranteed a buyer for the mortgage loans they made. As part of the agreement, the financial institutions typically set the prices and quantities of the types of loans they wanted to buy, and also gained access to loan information prior to purchase.

597. The investment banks that operated credit facilities for non-bank lenders and entered into purchase agreements did not limit their activities to just funding the lenders. To the contrary, they funded the lenders so that the lenders could issue more loans for the investment banks to purchase and securitize. These inter-relationships are illustrated by the warehouse lines of credit that were extended to AHM, an originator of loans that backed many Certificates in this action:

Certificate	**Warehouse Line of Credit with:	Sponsor of the PLMBS	Depositor/Issuer of the PLMBS	Underwriter Defendant for the PLMBS
LUM 2006-7 2A1	Barclays Bank PLC			Barclays Capital Inc.

***Source:* American Home Mortgage Investment Corp., 2006 Annual Report (Form 10-K), at 57-58 (March 1, 2007).

598. As the chart shows, the same investment banks that offered warehouse lines of credit to AHM purchased the loans as Sponsor, deposited them into trusts as Depositor, securitized and issued them as Issuer, and as Underwriter underwrote the securities backed by the loans. Because the investment banks were involved in several if not all of the steps of securitization, they had access to information about the problems in the loan pools.

599. In addition, the Sponsor, Depositor/Issuer and Underwriter Defendants had access to knowledge about the mortgage originators' practices as a result of their direct role negotiating with the originators regarding the quality and characteristics of the loans in the mortgage pools they purchased.

3. Conflicts of Interest Undermined Adequate Due Diligence and Disclosure to Investors.

600. The multiple roles of large financial institutions in the securitization process created conflicts of interest that encouraged these institutions not to engage in adequate due diligence on the loan pools. For example, these financial institutions did not use their influence and control over the mortgage origination process to ensure that underwriting guidelines were

followed, because to do so might have jeopardized repayment of their warehouse lines of credit. By keeping the mortgage origination wheel turning, these financial institutions (by and through the Certificates' Sponsors, the Depositor/Issuer Defendants, and the Underwriter Defendants) not only ensured repayment on existing warehouse lines, but also paved the way for ever-increasing lines in the future, with additional short-term profits. While these financial institutions eventually shut down their lines of credit, they did so only after the originators' financial condition deteriorated to the point that the financial institutions faced the risk of non-payment on their lines of credit. Ironically, this risk was created by ever increasing numbers of repurchase demands by the financial institutions themselves for defective loans sold to the banks by the originators.

601. For example, Merrill Lynch Mortgage Capital, an affiliate of Underwriter Defendant Merrill Lynch, Pierce, Fenner & Smith, Inc., provided warehouse lines of credit to subprime originator OwnIt. Pleadings filed in OwnIt's bankruptcy reveal that Merrill Lynch Mortgage Capital was a secured creditor on its warehouse line of credit to OwnIt for $633 million.

602. Furthermore, papers filed in OwnIt's bankruptcy proceedings show that Merrill Lynch LP Holdings, Inc., another affiliate of Defendant Underwriter Merrill Lynch, Pierce, Fenner & Smith, Inc., holds an unsecured mortgage repurchase claim against OwnIt, arising from its right to compel repurchases of mortgage loans it purchased from OwnIt. The amount of such claim is estimated at $92.96 million, which is 20% of the principal balance of the mortgages loans subject to repurchase.

603. Similar conflicts prevented the investment banks from insisting on compliance with underwriting guidelines when they purchased loans at "loan auctions." At the loan

auctions, the mortgage originators set a date and time for the Sponsors to purchase a block of mortgage loans. In advance of the auction, the mortgage originator provided certain potential bidders with a bid stipulation sheet that described the general characteristics of the loan pool being auctioned and the variance rate of the pool. The investment banks depended on the auctions to feed loans into their securitization machines. But investment banks feared that they would lose access to the bid stipulations sheets and other information from mortgage originators if they conducted rigorous quality reviews of the subject mortgages and rejected loans as being non-compliant with the mortgage originators' stated guidelines. Thus, to curry favor with the mortgage originators and assure a continued pipeline of mortgages (however flawed) for securitization, the parties who should have protected the quality of the mortgages being deposited into the pools instead failed to conduct adequate due diligence.

604. Simply put, as a result of corporate affiliations and conflicted relationships in the industry, the investment banks, by and through the Securities Defendants, including the Sponsors and affiliated Depositor/Issuers, and Underwriters, failed to appropriately fulfill their due diligence function with respect to the mortgages placed in the pools. Rather than conducting the appropriate due diligence on the loan pools, and either rejecting loans that failed to meet underwriting standards or adequately disclosing the true risks of the Certificates, the Securities Defendants utilized the securitization process to pass the risk of default down the line to investors, such as the Bank, through the use of materially false and misleading Offering Documents.

605. Confidential witnesses confirmed the failings of the Securities Defendants' due diligence process, and their representations about the process. For example, CW-33, an associate

in RBS Greenwich Capital's[16] asset-backed finance modeling group from October 2004 to February 2006, explained that RBS Greenwich employees modeled the flow of funds for the PLMBS based upon superficial summary information even though more detailed information was available to RBS Greenwich. CW-33 also described how employees at RBS Greenwich turned a blind eye to red flags regarding the quality of the loans that were being packaged into mortgage-backed securities. For example, when CW-33 tried to discuss an article with his boss regarding an investigation into Ameriquest's lending practices, his boss told him: "You need to sit down and shut the f*** up." CW-33 explained that employees at RBS Greenwich ignored red flags because they stood to gain significant profits from securitization: "I knew we were destroying the economy. . . . But if you're making $40 million a year, do you care? No."

4. The Sponsor Defendants Limited Third-Party Firms' Due Diligence and Misused the Results of That Due Diligence.

a. The Sponsor Defendants directed the due diligence process and were provided with detailed reports describing the results of the process.

606. Information obtained from press reports, government investigations and confidential witnesses demonstrates that the Sponsor Defendants that retained third-party due diligence firms to conduct loan pool due diligence both limited the due diligence process and disregarded the results of the process.

607. The two firms that dominated the third-party due diligence market were Clayton Holdings, Inc. ("Clayton") and The Bohan Group ("Bohan"). Upon information and belief, both

[16] Until April 1, 2009, RBS Greenwich Capital was the marketing name which encompassed The Royal Bank of Scotland's North American broker-dealer entities, including: (1) Underwriter Defendant Greenwich Capital Markets, Inc., n/k/a RBS Securities Inc.; (2) Controlling Person Defendant Greenwich Capital Holdings, Inc., n/k/a RBS Holdings USA Inc.; and (3) Sponsor Defendant Greenwich Capital Financial Products, Inc., n/k/a RBS Financial Products Inc. *See* The Royal Bank of Scotland, "RBS Greenwich Capital Re-Name and Re-Brand FAQ's," Apr. 1, 2009, *available at* http://www.rbsbank.co.jp/gbmassets/documents/PDFs/gp1332/FAQ.pdf (last visited Apr. 15, 2011). As used herein, "RBS Greenwich" is meant to encompass all of these entities.

Clayton and Bohan were retained by the Sponsor Defendants to conduct third-party reviews of loans pools purchased by the Sponsors of the PLMBS. In 2006, Clayton monitored over $418 billion in loans underlying mortgage-backed Certificates, which represented 22.8% of the total outstanding U.S. non-GSE mortgage-backed Certificates at such date. During 2006, 2005, and 2004, Clayton worked with each of the ten largest non-GSE mortgage-backed securities Underwriters, as ranked by *Inside MBS & ABS* magazine, which accounted for 73%, 73%, and 78% of total underwriting volume during those respective periods.

608. Confidential witnesses, who worked at Clayton during the relevant time period and were familiar with the identity of Clayton's clients and the due diligence performed by Clayton during the relevant time period, named several different entities they knew had hired Clayton to perform due diligence on loan pools. These confidential witnesses include: CW-35, an underwriting consultant at Clayton from 1999 until 2006, who underwrote mortgage-backed securities for a "lot of investment banks" that hired Clayton; CW-36, an underwriter at Clayton from 2002 until 2008, who reviewed loans for financial institutions that hired Clayton; and CW-37, who worked as a valuation specialist at Clayton from January 2006 until March 2008 and reviewed appraisals and properties in loan files on behalf of investment banks that hired Clayton. Together, CW-35, CW-36, and CW-37 confirmed that Clayton was hired to perform due diligence on underlying loan pools by such Sponsors as Morgan Stanley, RBS Greenwich, Countrywide, Nomura, Washington Mutual, Deutsche Bank, and Lehman Brothers. Media reports also indicate that Clayton Holdings did work for Goldman Sachs and Merrill Lynch. Gretchen Morgenson, *Raters Ignored Proof of Unsafe Loans*, N.Y. Times, Sept. 26, 2010.

609. Less information is publicly available about Bohan's due diligence business because it is a privately held company. However, press reports and confidential witnesses

confirm that Bohan provided third-party loan pool due diligence to a large number of financial institutions. For example, CW-38, who worked as an underwriter at Bohan from 2003 to 2006 and reviewed loans that Bohan's clients were considering for securitization, said that Bohan's clients included Morgan Stanley, Chase, Deutsche Bank, J.P. Morgan, and others.

610. The Sponsors that retained Clayton and Bohan, and other third-party due diligence firms for loan pool review, maintained close contact with and influence over the process. As explained by Vicki Beal, Senior Vice President of Clayton Holdings in her September 23, 2010 written testimony before the FCIC:

> The loan review process is conducted as follows:
>
> - A client reviews a pool of loans and selects a sample of loans for diligence review. . . .
> - Client hires Clayton to perform diligence on the sample. Client gives Clayton's Client Services Manager instructions on the type and scope of review and the time frame for the deal.
> - Client sends or has sent to Clayton a tape containing loan information from the originator, which Clayton programmers "crack" and load into our CLAS system.
> - At the end of each day, the lead underwriter generates reports for the client that summarize Clayton's findings, including exception reports.

611. Numerous confidential witnesses confirm that due diligence reports are provided to the financial institutions that retained the third-party due diligence firms. According to CW-37, Clayton's clients "had access to our [Clayton's] databases," and "could see everything." CW-36 had similar experiences. CW-36 explained that Clayton's lead underwriters could consult with the Sponsor's representatives to determine if the Sponsor wanted particular loans "kicked out" of the mortgage pools.

612. As Ms. Beal reported to the FCIC: "The work product produced by Clayton is comprised of reports that include loan-level data reports and loan exception reports. Such reports

are "works for hire," the property of our clients and provided exclusively to our clients." Thus, on information and belief, the financial institutions that hired Clayton (including many of the Sponsor Defendants) should have known about the red flags that these third-party firms identified.

613. The Bank's recent review of certain loan files underlying the PLMBS, *see infra* ¶¶ 237-38, 546-57, 561-62, 568-573; Appx. VIII, makes clear that numerous red flags regarding the abandonment of stated underwriting guidelines and other material misstatements in the Offering Documents, which describe the loan pools on which the Bank's securities are based, were fully discoverable and should have been known by the Sponsor Defendants when they sold the securities to the Bank. Yet, despite their access to this information, the Sponsor Defendants neither disclosed these facts to the Bank in the Offering Documents, nor sought to substitute or replace the defective loans. Rather, they simply passed along the pools of loans to unsuspecting investors, like the Bank.

614. Similarly, Bohan employed "lead" underwriters who communicated directly with the financial institutions that retained them to review loan pools. As was the case with Clayton, CW-38 said that many of the Sponsors sent their own employees to the originator's sites to review the loans that were being considered for inclusion in a mortgage pool and subsequent securitization. CW-38 also explained that the PLMBS sponsors had access to Bohan's computer system and could view which loans were being approved or rejected. Thus, on information and belief, the investment banks (including the Sponsor Defendants) should have known about the red flags that the third-party firms identified.

b. The Sponsor Defendants both limited the due diligence performed on the loan pools and misused the results of the limited diligence that was performed.

615. As Ms. Beal testified with regard to Clayton, the client financial institutions determined the type and scope of review performed on the loan pools. According to confidential witnesses, third-party due diligence firms felt pressured to depart from the standards so that loans were not tagged as defective. For example, CW-36, a Clayton underwriter from 2002 to 2008, stated that one out of every four or five loans that he reviewed on behalf of client financial institutions did not meet the originator's guidelines. Although he felt many of the loans were "dead assets" (the lowest rating Clayton gave), he was required to provide "compensating factors," which were reasons why the loan should be considered for inclusion in the mortgage pool.

616. The FCIC Report confirms that the Sponsor financial institutions who hired Clayton "ineffectively sampled loans they were purchasing to package and sell to investors." FCIC Report at xxii.

617. Bohan employees felt pressured to leave information out of their reports that detailed non-compliant or predatory loans that should have been excluded from the pool. For example, CW-38, a Bohan underwriter, explained that many underwriters at Bohan did not include in their reviews the borrower's fee associated with rebates on wholesale loans. A rebate is negative points on a loan, whereby a borrower pays the lender for a higher interest rate in order to have lower up-front costs. The Bohan employees left such information out of their reports because if they mentioned it, the loans would often be considered predatory. CW-38 recalled one rebate situation in which the borrower refinanced a property three times over a one-year period. When she reviewed the loan on the third refinancing, she discovered that the borrower was seeking the loan to pay off $5,000 in bills and to obtain $8,000 cash, but the rebate

fees totaled $12,000. CW-38 thought the loan was ultimately included in the mortgage pool because nothing was wrong with the loan, except that the borrower was getting nothing out of it and was "an older person that was being taken advantage of."

618. Further compounding the problems, Clayton employees were instructed to review fewer loans in the loan pools as the securitization market grew. Frank P. Filipps, Clayton's chairman and CEO, stated that "[e]arly in the decade, a securities firm might have asked Clayton to review 25 to 40 percent of the sub-prime loans in a pool, compared with typically 10% in 2006." *See* E. Scott Reckard, *Sub-Prime Mortgage Watchdogs Kept on Leash; Loan Checkers Say Their Warnings of Risk Were Met with Indifference*, L.A. Times, March 17, 2008, at C1.

619. According to Ms. Beal's 2010 testimony before the FCIC, as the securitization markets grew even more frenzied and "lenders and securitizers were trying to sell off as much as they could before the market collapsed, that figure reached as low as 5 percent."

620. Bohan President Mark Hughes stated: "By contrast, loan buyers who kept the mortgages as an investment instead of packaging them into securities would have 50% to 100% of the loans examined." *See* Reckard, *supra*, at C1.

621. As explained by Paul Muolo and Matthew Padilla:

> There were two reasons the [Wall] Street firms reviewed only a small sample of the loans they were buying . . . . The most important reason was the relationship with the lender. "The lower the sample you requested [of the lender], the more likely it was that you'd win the bid." . . . . Lenders like Aegis and First Franklin had so many Street firms interested in buying their subprime and alt-A mortgages they could tell potential suitors that if they wanted to win the bid for the loan pool they should agree to review just a fraction of the mortgages.

Paul Muolo & Matthew Padilla, *Chain of Blame* 228 (2010).

622. Even though the third-party due diligence providers were instructed to review smaller samples of the mortgage pools over time, the demand for mortgage-backed certificates was so great that, in the aggregate, the third-party due diligence firms were reviewing staggering

quantities of loans. According to *Chain of Blame*, "[i]n 2006, rank-and-file clerks hired by Clayton vetted a million individual mortgages for Wall Street firms." *Id.*

c. The Sponsor Defendants should have known that they included defective loans in the pools.

623. The third-party due diligence process should have provided the Sponsor Defendants with extensive information about loan pool defects. As reported by the *Los Angeles Times*, Clayton and Bohan employees (including eight former loan reviewers who were cited in the article) "raised plenty of red flags about flaws so serious that mortgages should have been rejected outright—such as borrowers' incomes that seemed inflated or documents that looked fake—but the problems were glossed over, ignored, or stricken from reports." Reckard, *supra*, at C1.

624. Ironically, while third-party reviewers state that the sponsoring financial institutions pressured them to make exceptions for seemingly defective loans, these financial institutions often utilized information about these loans to negotiate a lower price for the pool of loans from the seller (*i.e.* originator of the loans).

625. CW-38, who worked as an underwriter at Bohan from 2003 to 2006, confirmed that Bohan's review was used in price negotiations between the Sponsor Defendants and the mortgage originators. The Sponsors could request a discount if Bohan's reviewers rejected a large number of the loans. This is not to say that the financial institutions actually eliminated all of the defective loans from the pools. To the contrary, they obtained a lower price for the pools from the originators because the defective loans *stayed in the pools*.

626. Recent testimony before the FCIC reveals the extent of this activity with regard to loans reviewed by Clayton. During 2006 and the first half of 2007, Clayton reviewed 911,039 loans issued by originators including Countrywide, Decision One, and New Century for

securitization by its clients (including Bank of America, JPMorgan Chase, Citigroup, Deutsche Bank, Goldman Sachs, Morgan Stanley, Bear, Stearns. and Lehman Brothers). Clayton determined that 28%, or 255,802, of the mortgages they reviewed did not satisfy applicable underwriting guidelines. Of this number, Clayton's Wall Street clients "waived" 39%, or 100,653, of those loans. *See* Testimony of Beal, Johnson, and supporting waiver reports documents, attached hereto at Appendix II.

627. Clayton provided the FCIC with documents showing the defect and waiver rate of the financial institutions that had retained Clayton to conduct loan pool due diligence. Clayton's documents reveal the following rejection and waiver rates for entities that were involved in the securitization of the PLMBS purchased by the Bank:

Client:	**Percentage of Mortgages Initially Rejected by Clayton:**	**Percentage of Rejected Mortgages Subsequently Waived by Client:**
Bank of America	30%	27%
Barclays	27%	28%
Bear Stearns EMC Mortgage Corporation	16%	42%
Citigroup	41%	31%
Countrywide	26%	12%
Credit Suisse	37%	32%
Citigroup	42%	31%
Deutsche Bank	35%	50%
Goldman Sachs	23%	29%
Greenwich	18%	53%
HSBC	27%	62%
JP Morgan Chase	27%	51%
Lehman	26%	37%
Merrill	23%	32%

Client:	Percentage of Mortgages Initially Rejected by Clayton:	Percentage of Rejected Mortgages Subsequently Waived by Client:
Morgan Stanley	37%	56%
Nomura	38%	58%
UBS	20%	33%
WaMu	27%	29%

628. The Offering Documents fail to state that: (1) Clayton had informed the Sponsor Defendants and Underwriters that a substantial percentage of loans in the loans pools backing PLMBS were defective; (2) that the Sponsor and Underwriter Defendants, nonetheless, waived the defects as to a substantial percentage of these loans; and (3) that the Sponsor Defendants used the due diligence reports to negotiate a lower price for the loans pools. As Keith Johnson, the former President of Clayton, testified to the FCIC, Clayton "looked at a lot of prospectuses" and the firm wasn't aware of any disclosure to investors of Clayton's "alarming findings." The 2011 FCIC Report concurs: the disclosures in the Offering Documents were "insufficient for investors to know what criteria the mortgages they were buying actually did meet." FCIC Report at 169.

629. The 2011 FCIC Report reveals that Clayton would approve no more than 54% of the loans it reviewed as satisfying stated underwriting standards. FCIC Report at 166. In testimony before the FCIC in September 2010, Keith Johnson said that "54% to me says there [was] a quality control issue in the factory" for mortgage-backed securities. Johnson concluded that Clayton's clients often waived in loans to preserve their business relationship with the loan originator, because a high number of rejections might lead the originator to sell the loans to a competitor. *Id.*

630. As set forth above, the Sponsor Defendants improperly used the purported "due diligence" review to waive loans that they should have known were defective.

5. The Sponsor Defendants' Own Due Diligence Identified Defective Loans in the Mortgage Pools Backing PLMBS.

631. Likewise, in its investigation into the "causes . . . of the current financial and economic crisis in the United States," the FCIC examined Citigroup's securitization practices. The FCIC heard testimony from Richard M. Bowen III, the former Senior Vice President and Chief Underwriter for Correspondent and Acquisitions for CitiFinancial Mortgage (Citigroup's subprime mortgage lending subsidiary from 2002-2005) and starting in 2006, Business Chief Underwriter for Correspondent Lending in Citigroup's Consumer Lending Group. In the latter position, Mr. Bowen supervised 220 professional underwriters and exercised direct oversight over the underwriting of more than $90 billion of mortgages annually.

632. Mr. Bowen testified that each year since 2005, Citigroup's mortgage operation systematically acquired tens of billions of dollars of risky loans that violated Citigroup's own underwriting criteria and were likely to default. He also testified that Citigroup's Wall Street Chief Risk Officer routinely overruled underwriters' rejections of pools of mortgages that did not satisfy Citigroup's underwriting criteria for purchase, causing Citigroup to purchase billions of dollars of loan pools that fell short of underwriting standards. Mr. Bowen testified that "[d]uring 2006 and 2007, I witnessed business risk practices which made a mockery of Citi credit policy."

633. Mr. Bowen reported that he discovered that of the $50 billion of prime mortgages purchased in 2006, "over 60% of these mortgages purchased and sold were defective." He testified further that he "started issuing warnings in June of 2006 and attempted to get management to address these critical risk issues. These warnings continued through 2007 and went to all levels of the Consumer Lending Group."

634. Mr. Bowen recommended that Citigroup not purchase Ameriquest, because his due diligence found that the loans originated by Ameriquest's affiliate, Argent, did not meet the standards they had represented to Citigroup. Specifically, Mr. Bowen testified that "we sampled the loans that were originated by [Ameriquest affiliate] Argent and we found large numbers that did not—that were not underwritten according to the representations that were there."

635. Mr. Bowen submitted with his testimony an email that he sent to Citigroup's then CEO, Robert Rubin, in late 2007 documenting his concerns. One email indicated, among abundant other information of abuses, that:

> During 2006-7 there were pools of mortgage loans aggregating $10 billion which were purchased from large mortgage companies with significant numbers of files identified as "exceptions" (higher risk and substantially outside of our credit policy criteria). These exceptions were approved by the Wall Street Channel Chief Risk Officer, many times over underwriting objections and with the files having been turned down by underwriting. These pools involved files aggregated and originated by Merrill Lynch, Residential Funding Corp, New Century, First NLC and others.

Available at http://fcic-static.law.stanford.edu/cdn_media/fcic-testimony/2010-0407-Bowen.pdf. Citigroup disregarded the red flags and completed the acquisition.

636. Citigroup's practices were not unique. For example, on June 24, 2010, the Massachusetts Attorney General announced that Morgan Stanley had agreed to pay $102 million to the Commonwealth and borrowers in the Commonwealth to settle charges related to "Morgan Stanley's role in facilitating predatory lending by New Century." The Attorney General reported that: "our investigation revealed that Morgan Stanley backed loans for homeowners that they knew, or should have known, were destined to fail and they failed to disclose the riskiness of those loans to investors." She noted as well that:

> Morgan Stanley funded, purchased and securitized New Century loans. Morgan developed an intimate knowledge of New Century's business over time. And they uncovered signals pretty early on that the lending practices of New Century

> were not sound. Morgan Stanley continued to fund and securitize subprime loans even as New Century's bad loans were causing the lender to collapse . . . .

Attorney General Martha Coakley, Transcript of Press Conference (June 24, 2010), *available at* http://www.mass.gov/Cago/docs/press/2010_06_24_ms_settlement_attachment4.pdf.

637. Upon information and belief, the Sponsor Defendants should have known as a result of the red flags generated by their own due diligence as well by third-party due diligence firms that the pools of loans they purchased and sold in securitizations were far riskier than was represented to investors, including the Bank.

E. The Vertical Integration of Many of the Firms Involved in the Issuance of the PLMBS Purchased by the Bank Enabled the Controlling Person Defendants to Control the Management and Policies of the Controlled Entities

638. The Controlling Person Defendants, which had a 100% or substantial majority direct or indirect ownership in the respective Sponsor Defendants, Depositor/Issuer Defendants, Underwriter Defendants, and/or originators, as well as the other entities identified herein, had the power to, and did, conduct and participate, directly and indirectly, in the management and control of all aspects of the management and policies of the Controlled Entities, as evidenced by the following facts, among others:

A. The Controlling Person Defendants created the respective Depositor/Issuer Defendants as their special purpose entities for the purpose of issuing the Certificates that are the subject of this action;

B. The Controlling Person Defendants played other vital roles regarding the structuring and administration of the issuing trusts and Certificates, which allowed them to exercise substantial control over many parties to the securitization, including the respective Sponsor, Depositor/Issuer, and/or Underwriter Defendants;

C. Revenue from the securitizations inured to the benefit of the Controlling Person Defendants;

D. Statements in the Controlling Person Defendants' SEC filings show control through comprehensive involvement with the Controlled Entities' operations;

E. The financial result of the Controlled Entities were often combined and reported as part of the Controlling Person's reported financial results;

F. The Controlling Person Defendants directly participated in the issuance of the Certificates that are the subject of this action, including touting their extensive activity and experience in the securitization market, particularly in initiating securitization of the residential mortgage loans they originated or acquired in the secondary mortgage market and transferring those loans to Depositor/Issuer Defendants, for sale through the trust to purchasers such as the Bank;

G. The Controlling Person Defendants frequently and prominently identified themselves in the Offering Documents; and

H. Officers and/or directors of the Controlling Person Defendants frequently signed the respective registration statements.

639. In addition, the Controlling Person Defendants were frequently parties to the agreements necessary to the securitizations, such as the Pooling and Servicing Agreement, Mortgage Loan Purchase Agreement, Servicing Agreement, Assignment, Assumption and Recognition Agreement, including amendments, restatements and exhibits thereto—agreements that frequently:

A. Were between vertically integrated entities;

B. Were signed by the same officer or director of the Controlling Person Defendant on behalf of the Controlled Entity;

C. For purposes of providing formal notice under the agreement, identified a single individual and/or address as the notice recipient for two or more parties to the agreement; and

D. Provided for indemnification by the Controlling Person Defendant.

640. Control over the vertically integrated firms in all aspects of the securitization is apparent in language in the Offering Documents that shows the relationship among the Controlling Person Defendants and the controlled entities. For example, the prospectus for the CMLTI 2005-9 1A1 Certificate states:

> [Depositor Defendant] Citigroup Mortgage Loan Trust Inc., as depositor, was incorporated in the State of Delaware on July 16, 2003 as an indirect wholly-owned subsidiary of [Controlling Person Defendant] Citigroup Financial Products Inc. and is an affiliate of [Underwriter Defendant] Citigroup Global Markets Inc.

CMLTI 2005-9 Pros. 39.

641. In sum, the Controlling Person Defendants controlled, influenced, or participated in essentially all material aspects relating to the acquisition, structure and sale of the Certificates purchased by the Bank identified herein.

642. The Controlling Person Defendants' control, position and influence over the Defendants they controlled gave them access to the material facts and omissions concealed from the Bank with regard to the underlying mortgage pools.

F. The Rating Agency Defendants Knew, and the Securities Defendants Should Have Known, That the Securitization Process Was Supported by Credit Ratings That Materially Misstated the Credit Risk of the PLMBS.

643. The triple-A credit ratings of the PLMBS played a crucial role in the Bank's purchase of PLMBS. Indeed, by policy and regulatory guidance, the Bank could only purchase

triple-A-rated tranches of the Certificates. Without the triple-A rating, no purchase would have occurred.

644. The Securities Defendants well understood (and banked on) the important role the credit ratings played in the PLMBS markets. They featured the ratings prominently in the Offering Documents and discussed at length the ratings received by the different tranches of the PLMBS, and the bases for the ratings. Yet, the Rating Agency Defendants knew, and the Securities Defendants should have known, that the ratings were not reliable.

1. The Rating Agency Defendants Knew That the Credit Ratings Were Unreliable, Based As They Were on Underwriting Standards That the Rating Agency Defendants Knew Had Been Abandoned.

645. The Rating Agency Defendants knew that many mortgage originators had abandoned their stated mortgage underwriting guidelines, and thus knew that the ratings were false when made.

646. The Senate Subcommittee on Investigations, for example, uncovered internal rating agency emails from the summer and fall of 2006 noting that "there has been rampant appraisal and underwriting fraud in the industry for quite some time"; that "underwriting fraud[,] appraisal fraud and the general appetite for new product among originators [are] resulting in loans being made that shouldn't be made"; and that "this is like another banking crisis potentially looming."

647. S&P became so concerned with underwriting standards that, when it was asked to rate certificates backed by subprime loans that Fremont Investment and Loan had originated, one analyst asked his supervisors whether he should treat Fremont collateral differently. "No," one of his supervisors responded, "we don't treat their collateral any differently." The other supervisor said that as long as there were current FICO scores for the borrowers, then the analyst was "good to go," no matter how little documentation the origination process required, and

regardless of any other characteristic of the mortgage loans. While Fremont Investment and Loan is not identified in the Offering Documents as a relevant originator in this case, its underwriting standards – in the documentation they required and otherwise – were typical of the underwriting standards of the relevant originators here. The concerns the analyst expressed about Fremont were just as applicable to other originators, whose underwriting standards the Rating Agency Defendants knew just as well as they did Fremont's.

648. Based on its investigation, the Senate Subcommittee on Investigations found that from 2004 to 2007, all three the Rating Agency Defendants knew of the increased risks caused by mortgage fraud and lax underwriting standards, but failed to factor those risks into their rating models. S. Subcomm. on Investigations, 112th Cong., *Wall Street and the Financial Crisis: Anatomy of a Financial Collapse* 311-12 (2011) (hereinafter S. Subcomm., *Anatomy of a Financial Collapse*).

649. In June 2005, for example, an outside mortgage broker wrote to Susan Barnes, the head of the S&P group that rated PLMBS, advising her that "attention to loan risk" had drastically deteriorated among mortgage originators. *Id.* at 269.

650. Here, just as in other cases, the Rating Agency Defendants did not factor the abandonment of underwriting standards into their analysis of the PLMBS that are the subject of this lawsuit. Instead, they based their ratings on underwriting standards they knew to have been abandoned in practice.

651. The problem, then, may be briefly stated: garbage in, garbage out. The Rating Agency Defendants based their ratings on underwriting standards they knew to have been abandoned. They thus knew those ratings to be unreliable.

2. The Credit Ratings Were Compromised by Conflicts of Interest, Manipulation and Misinformation.

652. The Rating Agency Defendants received enormous revenues from the Sponsor Depositors and Underwriters who paid them for rating the products they sold.

653. Because the desired rating of a securitized product was the starting point for any securities offering, the Rating Agency Defendants were actively involved in helping Depositors, Sponsors, and Underwriters structure the products to achieve the requested rating. As a result, the Rating Agency Defendants essentially worked backwards, starting with the clients' target rating and thereafter working toward a structure that could conceivably yield the desired rating.

654. A 2008 SEC Report entitled "Summary Report of Issues Identified in the Commission Staff's Examinations of Select Credit Rating Agencies" ("Summary Report") revealed that the Depositors, Sponsors, Underwriters and the Rating Agency Defendants worked together so that securities would receive the highest ratings:

> Typically, if the analyst concludes that the capital structure of the [PLMBS] does not support the desired ratings, this preliminary conclusion would be conveyed to the arranger. The arranger could accept that determination and have the trust issue the securities with the proposed capital structure and the lower rating or adjust the structure to provide the requisite credit enhancement for the senior tranche to get the desired highest rating. Generally, arrangers aim for the largest possible senior tranche, i.e., to provide the least amount of credit enhancement possible, since the senior tranche—as the highest rated tranche—pays the lowest coupon rate of the [PLMBS] tranches and, therefore, costs the arranger the least to fund.

655. As a result of this collaboration with the Rating Agency Defendants, Depositors/Issuers, Sponsors, and Underwriters were able to manipulate the system to achieve inflated ratings. For example, through repeated interactions with the Rating Agency Defendants, the Sponsors and Depositors/Issuers—and the Underwriters working with them—could effectively reverse engineer aspects of the ratings models and then modify the structure of a financing to improve its ratings without actually improving its credit quality. In this process, the

Depositors/Issuers, Sponsors, and Underwriters could change aspects of PLMBS very slightly—but without any real effect on the economic reality of the instruments—or simply present the same data in a different way, and get better ratings. Gretchen Morgenson & Louise Story, *Rating Agency Data Aided Wall Street in Deals*, N.Y. Times, Apr. 23, 2010.

656. This rating process was further compromised by "ratings shopping." The Securities Defendants did not pay for the Rating Agency Defendants' services until after the Rating Agency Defendants gave a preliminary rating to the clients. This practice created what were essentially bidding wars—contests in which the clients would hire the agency that provided the highest rating for the lowest price. The Rating Agency Defendants were paid only if they provided the desired ratings, and only if the transaction closed with those ratings. "Ratings shopping" jeopardized the integrity and independence of the rating process.

657. The Senate Subcommittee on Investigations has detailed numerous instances in which the Rating Agency Defendants' gave "special treatment" to investment bankers who complained about rating decisions. "In many instances," the Subcommittee concluded, this special treatment "cross[ed] over form the healthy give and take involved in complex analysis to concessions made to prevent the loss of business." S. Subcomm., *Anatomy of a Financial Collapse, supra*, at 280. Thus, even the *threat* of ratings shopping had a real effect on the Rating Agency Defendants' ratings.

658. Raymond McDaniel, Moody's CEO, realized that the market-share war had undermined the Ratings Agencies' work product. In an internal presentation to Moody's Board of Directors in 2007, he stated:

> The real problem is not that the market does underweights [sic] ratings quality but rather that . . . it actually penalizes quality by awarding rating mandates based on

> the lowest credit enhancement needed for the highest rating. Unchecked, competition on this basis can place the entire financial system at risk.[17]

659. McDaniel described to the board how Moody's has "erected safeguards to keep teams from too easily solving the market share problem by lowering standards" but then stated, **"This does NOT solve the problem."** Turning then to a topic he referred to as "Rating Erosion by Persuasion," McDaniel observed, "Analysts and [managing directors] are continually 'pitched' by bankers, issuers, investors" and sometimes "we 'drink the kool-aid.'"

660. As these examples illustrate, the Rating Agency Defendants were aware that clients were able to—and did—manipulate the system to receive the highest possible rating without actually structuring their deals so as to merit that rating.

3. The Credit Ratings Were Unreliable Due to the Use of Inaccurate, Outdated Models, and Inadequate Resources.

661. The outdated models used by the Rating Agency Defendants turned out PLMBS ratings that the Rating Agency Defendants knew to be inaccurate.

662. The models relied on pre-2000 data—reliance that, for a number of reasons, produced wildly inaccurate results. First, this pre-2000 data ignored the dramatic changes in the mortgage industry following 2000: increased lending to riskier borrowers, increased origination of riskier kinds of mortgage loans, and a dramatic rise in housing prices. Second, the pre-2000 data, as the Congressional Research Service reported in 2009, was based on a "benign period of economic moderation in financial markets and rising house prices." Congressional Research Serv., *Credit Rating Agencies and Their Regulation* 7 (2009); *accord*, S. Subcomm, *Anatomy of a Financial Collapse, supra*, at 288-89. They were useless in predicting the likelihood of default in a time of macroeconomic crisis and falling housing prices.

---

[17] Exhibit to October 22, 2008, hearing before the House Oversight Committee.

663. The models had other flaws too. The Rating Agency Defendants failed to account for any risk of a nationwide decline in home prices, and they miscalculated the interdependence among loan defaults—the likelihood that an economic storm would sink more than one financial ship.

664. The Rating Agency Defendants knew of these flaws, but did nothing to fix them.

665. In 2007, for example, Vickie Tillman, an S&P Executive Vice President, stated before the Senate Banking Committee: "We are fully aware that, for all our reliance on our historically rooted data that sometimes went as far back as the Great Depression, some of that data has proved no longer to be as useful or reliable as it has historically been."

666. In an April 27, 2008 article in the New York Times Magazine, Mark Adelson, a former Managing Director in Moody's structured finance division, criticized Moody's use of historical data about 30-year fixed mortgages to predict defaults and delinquencies in the new mortgage market—describing it as "observing 100 years of weather in Antarctica to forecast the weather in Hawaii."

667. In fact, the Rating Agency Defendants themselves did not believe the results their models turned out.

668. In an April 2007 electronic communication uncovered by the Senate Subcommittee on Investigations, two S&P analysts agreed that a particular mortgage-backed deal was "ridiculous," and that the model "definitely does not capture half the ris[k]." A month later, one of those analysts complained that "no body [sic] gives a straight answer about anything around here," and that there were no "clear cut parameters on what the hell we are supposed to do."

669. Eric Kolchinsky, a former managing director at Moody's, testified before the House Oversight and Government Reform Committee on September 30, 2009 that "[m]ethodologies produced by Moody's for rating structured finance securities are inadequate and do not realistically reflect the underlying credits. Rating models are put together in a haphazard fashion and are not validated if doing so would jeopardize revenues."

670. Compounding the inherent problems with the rating models was the fact that the Rating Agency Defendants simply did not commit the resources necessary to adequately rate residential-mortgage-backed financial products.

671. Frank L. Raiter, who from 1995 until 2005 was a Managing Director at S&P and head of its Residential Mortgage Rating Group, stated in prepared testimony before the Senate Subcommittee on Investigations that "in the residential ratings group[,] . . . between 1995 and 2005[,] rating volumes grew five or six fold without similar increases in staffing. Rating production was achieved at the expense of maintaining criteria quality."

672. This inadequate staffing had practical consequences: it meant that the Rating Agency Defendants were not able to improve the models that they knew produced inaccurate and misleading ratings. As Raiter testified, by early 2004 S&P had developed a model that took into account much more historical data than had been analyzed previously—a new model suggesting that the model then in use "was underestimating the risk of some Alt-A and subprime products." Due to inadequate staffing, this model "was never implemented." If S&P had implemented the new model, stated Raiter, it would have required much greater credit enhancement from PLMBS issuers in 2005, 2006, 2007—without which the PLMBS would have been assigned much less favorable ratings.

673. Similarly, Jerome Fons, a former Managing Director of Credit Policy at Moody's, testified before the House Oversight Committee on October 22, 2008 that when evidence arose that previously assigned ratings of PLMBS were inaccurate, the Rating Agency Defendants "did not update their models or their thinking."

674. As these examples illustrate, the Rating Agency Defendants knew that the unreliability of their models meant that their ratings of PLMBS did not accurately reflect the likelihood of payment.

4. The Rating Agency Defendants Knew That Their PLMBS Ratings Fundamentally Differed from Their Ratings of Corporate Bonds.

675. Neither the Rating Agency Defendants nor the Securities Defendants disclosed to investors that the ratings of PLMBS were materially different from, and less reliable than, standard corporate bond ratings.

676. Instead, the Rating Agency Defendants represented that the credit ratings were comparable to corporate bonds. Moody's stated in a 2004 presentation that, "The comparability of these opinions holds regardless of the country of the issuer, its industry, asset class, or type of fixed-income debt." A May 2007 S&P document on rating methodology stated: "Our ratings represent a uniform measure of credit quality globally and across all types of debt instruments. In other words, an 'AAA' rated corporate bond should exhibit the same degree of credit quality as an 'AAA' rated securitized debt issue."

677. In fact, however, the Rating Agency Defendants did not simply estimate expected loss and/or probability of default in determining the PLMBS ratings in this case, as they do with corporate bonds. Rather, they employed mathematical credit risk models based on random event simulations to determine the estimated loss distributions associated with the great many separate assets that back the PLBMS. These models required the Rating Agency Defendants to make

many estimates and assumptions regarding each of the various assets, including the degree to which losses or defaults on these assets would be correlated with each other.

678. The Rating Agency Defendants in this case knowingly made unreasonable assumptions about how frequently defaults on the assets would be correlated with each other. *See supra* § V.F.3. And, unlike the assumptions the Rating Agency Defendants use for rating other instruments, such as corporate bonds, the correlation assumptions used to rate the PLMBS in this case were based on dramatically incomplete historical data or on pure speculation.

679. In short, the Rating Agency Defendants knowingly misrepresented that their PLMBS ratings were as accurate as their ratings of other instruments.

5. Subsequent Downgrades Confirm that the Investment-Grade Ratings Reported in the Offering Documents Were Unjustifiably High and Misstated the True Credit Risk of the PLMBS Purchased by the Bank.

680. "Investment-grade" products are understood in the marketplace to be stable, secure and safe. Using S&P's scale, "investment-grade" ratings are AAA, AA, A and BBB, and represent, respectively, extremely strong credit quality, very strong credit quality, strong credit quality, and adequate credit quality. Any instrument rated below BBB is considered below investment-grade or "junk bond."

681. The Securities Defendants' Offering Documents stated that the issuance of the PLMBS was conditioned on the assignment of particular, investment-grade ratings, and listed the ratings in a chart.

682. As noted, the Bank purchased only triple-A-rated tranches of PLMBS. However, the triple-A ratings of the PLMBS misstated the credit quality of the underlying loans. The triple-A rating denotes extremely strong credit quality and is the same rating as those typically assigned to bonds backed by the full faith and credit of the United States Government, such as Treasury Bills.

683. On or about July 10, 2007, S&P publicly announced it was revising the methodologies used to rate numerous mortgage-backed securities because the performance of the underlying collateral "called into question" the accuracy of the loan data. S&P announced it was revising its methodology assumption to require increased "credit protection" for rated transactions. S&P reiterated that it would seek in the future to review and minimize the incidence of potential underwriting abuse given "the level of loosened underwriting at the time of loan origination, misrepresentation and speculative borrower behavior reported for the 2006 vintage" of mortgage-backed securities.

684. One day later, on July 11, 2007, Moody's announced it was also revising its methodology used to rate PLMBS, and anticipated downgrades of PLMBS. Moody's did in fact significantly downgrade many PLMBS, noting "aggressive underwriting" used in the origination of the collateral.

685. At the time these statements were made in July 2007, all of the PLMBS retained their investment-grade ratings.

686. Historically, investments with triple-A ratings had a very low expected default rate. The default rate on investment-grade corporate bonds from 1981 to 2008, for example, averaged about 0.08%, with no year's default rate higher than 0.51%.

687. Beginning in the summer of 2008, the PLMBS purchased by the Bank were downgraded. One hundred thirteen of the one hundred fifteen triple-A rated Certificates (originally valued at over $5.9 billion) now have been downgraded to non-investment-grade ratings, *i.e.* junk status. *See infra* ¶ 777.

688. The en masse downgrade of triple-A rated PLMBS indicates that the ratings set forth in the Offering Documents were false, unreliable and inflated. As the SEC has noted, "[a]s

the performance of these securities continued to deteriorate, the three rating agencies most active in rating these instruments downgraded a significant number of their ratings. The rating agencies[']' performance in rating these structured finance products raised questions about the accuracy of their credit ratings generally as well as the integrity of the ratings process as a whole." *Summary Report of Issues Identified in the Commission Staff's Examinations of Select Credit Rating Agencies by the Staff of the Securities and Exchange Commission* at 2 (July 2008). The Securities Defendants should have known the Offering Documents' statements with respect to these ratings were misleading because of their direct involvement in and manipulation of the rating process, and awareness of the poor credit quality of the underlying loan collateral.

6. The Bank Reasonably Relied on the Credit Ratings Reported in the Prospectuses.

689. The market—including both sophisticated and unsophisticated investors—has come to rely on the Rating Agency Defendants for accurate and unbiased assessments of credit quality.

690. Fitch; Moody's Investors Service, Inc.; and Standard & Poor's Ratings Services are "Nationally Recognized Statistical Rating Organizations," or NRSROs—a special status that the SEC created in 1975 to distinguish the most credible and reliable rating agencies and to ensure the integrity of the ratings process. According to the SEC, the "single most important criterion" in their granting of NRSRO status is that "the rating organization is recognized in the United States as an issuer of credible and reliable ratings by the predominant users of securities ratings." Further, in grating NRSRO status, the SEC determines that the rating organization is independent from the firms whose issuances it rates.

691. It was thus reasonable for the Bank to rely on the Rating Agency Defendants' ratings of the PLMBS.

692. The Bank did not know, and reasonably could not have known, that the credit ratings were flawed. The Bank did not know that the credit ratings were impaired by conflicts of interest and were susceptible to manipulation. Moreover, the Bank did not know that the ratings did not in fact address the risk of the Certificates and the likelihood of payment by borrowers on the underlying mortgage loans. Indeed, no disclosure informed the Bank that the rating was the unreliable result of inaccurate information and deficient modeling, as opposed to a legitimate evaluation of credit risk.

693. The Rating Agency Defendants continued to assure the market of the integrity of their ratings of mortgage-backed securities long after the PLMBS were purchased by the Bank. In a letter to the editor of The Wall Street Journal dated September 17, 2007, Vickie Tillman, then Executive Vice President of Credit Market Services at S&P, stated: "We have numerous safeguards in place that have helped us effectively manage" potential conflicts of interest. "Our credit ratings provide objective, impartial opinions on the credit quality of bonds." Tillman likewise testified before the Senate Committee on Banking, Housing and Urban Affairs on September 26, 2007:

> S&P maintains rigorous policies and procedures designed to ensure the integrity of our analytical processes. For example, analysts are not compensated based upon the amount of revenue they generate. Nor are analysts involved in negotiating fees. Similarly, individuals responsible for our commercial relationships with issuers are not allowed to vote at rating committees. These policies, and others, have helped ensure our long-standing track record of excellence.

694. The Rating Agency Defendants also assured the market that the ratings assigned to PLMBS were just as reliable as ratings assigned to corporate bonds. *See supra* ¶ 676.

695. At the time these statements were made in September 2007, all of the PLMBS retained their investment-grade ratings.

G. The Proper Steps Were Not Taken To Ensure That the Mortgage Loans Underlying the Trusts Were Enforceable.

696. For PLMBS to have any value, the issuing trust must own and be able to enforce the mortgage loans that back the PLMBS. If the trust cannot enforce the loans, they are effectively worthless—and so are the PLMBS secured by those loans.

697. It is not the issuing trust but the mortgage originator that originated the mortgage loans. If the trustee is to enforce the loans—and if PLMBS are to have any value—both the promissory note executed by the borrower and the mortgage itself must be validly transferred to the trust in the securitization process.

698. The promissory notes and mortgages are not transferred directly from the loan originator to the trust. Instead, they are typically transferred to a Depositor, or to a Sponsor and then to a Depositor, and then to the trust. *See supra* ¶¶ 172-79.

699. Whether a mortgage loan has been validly transferred to the issuing trust is determined by state law and the pooling and servicing agreement, indenture trust agreement, or other agreement under which the issuing trust operates. State law generally requires that the promissory note, a negotiable instrument, be transferred by endorsement, and that the party seeking to enforce the loan physically possess the originally executed note. *See* U.C.C. §§ 3-201, 3-301. Each of the transfers made, or purportedly made, in the securitization process must be valid before the trust may enforce a mortgage loan.

700. Pooling and servicing agreements usually add the further requirement that the transfers of the mortgage loans be made within a particular time after the trust is formed. Under the common law of trusts, failure to comply within this set time limit renders the loans unenforceable by the trust.

701. The Offering Documents for all of the PLMBS in this action represented that the issuing trust could legally enforce the mortgage loans in its loan pool.

702. A trust that issues PLMBS must be able to enforce not only the mortgage loans that back the PLMBS, but also the mortgages that secure the mortgage loans. If the mortgages cannot be enforced, then the properties that secure the mortgage loans cannot be foreclosed on if the borrower defaults. If the mortgages that secure the mortgage loans are not enforceable, PLMBS are to that extent worthless.

703. Before mortgages can be enforced by the trustee, however, they must be validly assigned to the issuing trust.

704. Before a purported mortgage holder can foreclose on a mortgaged property, state law generally requires that the purported holder—if it is not the original mortgagee—prove that it is a valid assignee of the mortgage. The assignment, or chain of assignment, must trace back without gaps to the original mortgagee, it must be in writing, and it must identify the mortgage that is assigned.

705. A material number of the promissory notes underlying the issuing trusts have not been validly transferred so as to be enforceable.

706. The best known example of this is *Kemp v. Countrywide Home Loans, Inc. (In re Kemp)*, No. 08-18700 (Bankr. D.N.J.), in which Linda DeMartini, whom Countrywide had employed for a decade and who testified that in her employment, she had been "involved in every aspect of the servicing," and "had to know about everything,"[18] testified—on direct

[18] *Kemp*, Hr'g Tr. 45:7, 45:9-10 (Aug. 11, 2009).

examination—that failure to deliver the promissory note to the trust was normal operating procedure for Countrywide.[19]

707. In *Kemp*, the U.S. Bankruptcy Court for the District of New Jersey, applying New Jersey law, held that because the debtor's mortgage loan had not been physically transferred to the issuing trust's trustee, or properly indorsed, it was enforceable by neither the issuing trust's trustee nor the trustee's agent. *Kemp v. Countrywide Home Loans, Inc. (In re Kemp)*, 440 B.R. 624, 630-34 (Bankr. D.N.J. 2010).

708. Similarly, a material number of the mortgages backing the PLMBS were not validly assigned to the issuing trusts, as recent months have revealed. *U.S. Bank N.A. v. Ibanez*, 941 N.E. 2d 40 (Mass. 2011), for example, consisted of two consolidated cases arising out of two different mortgages purportedly assigned to two different mortgage-backed trusts. In both, there was no evidence that, prior to the foreclosure sales, the mortgage had ever been assigned to the relevant Depositors. *See id.* at 52.

---

[19] As DeMartini testified:

> Q. [I]s it generally the custom . . . for [the trust] to hold the documents?
> A. No. They would stay with us as the servicer.
> . . .
> Q. So I believe you testified Countrywide was the originator of this loan?
> A. Yes.
> . . .
> Q. So the physical documents were retained within the corporate entity Countrywide or Bank of America?
> A. Correct.
> Q. . . . [W]ould you say that this is standard operating procedure in the mortgage banking business?
> A. Yes. It would be . . . the normal course of business . . . , as we're the ones that are doing all the servicing, and that would include retaining the documents.

Id. at 14:5-15:6.

709. These failures appear to be systemic in the industry. Even if they do not affect every mortgage underlying every issuing trust, the failures affect a sufficient number of the mortgages and materially impair the value of the PLMBS.

710. Multiple cases have been filed in courts across the country by homeowners challenging the right of financial institutions to foreclose on behalf of issuing trusts. *See, e.g.*, *In re Mims*, 438 B.R. 52 (Bankr. S.D.N.Y. 2010); *Deutsche Bank Nat'l Trust Co. v. Tarantola (In re Tarantola)*, No. 09-09703, 2010 WL 3022038 (Bankr. D. Ariz. July 29, 2010); *In re Weisband*, 427 B.R. 13 (Bankr. D. Ariz. 2010); *Wells Fargo Bank, N.A. v. Marchione*, 887 N.Y.S.2d 615 (App. Div. 2009); *IndyMac Bank F.S.B. v. Garcia*, 28 Misc. 3d 1202(A) (N.Y. Sup. Ct. 2010); *Deutsche Bank Nat'l Trust Co. v. McRae*, 894 N.Y.S.2d 720 (Sup. Ct. 2010); *Citigroup Global Markets Realty Corp. v. Bowling*, 25 Misc. 3d 1244(A) (N.Y. Sup. Ct. 2009); *HSBC Bank USA, N.A. v. Miller*, 889 N.Y.S.2d 430 (Sup. Ct. 2009); *Deutsche Bank Nat'l Trust Co. v. Abbate*, 25 Misc. 3d 1216(A) (N.Y. Sup. Ct. 2009); *In re Adams*, 693 S.E.2d 705 (N.C. Ct. App. 2010); *HSBC Bank USA v. Thompson*, No. 23761, 2010 WL 3451130 (Ohio. Ct. App. Sept. 3, 2010); *Bank of N.Y. v. Gindele*, No. C-090251, 2010 WL 571981 (Ohio Ct. App. Feb. 19, 2010).

711. According to the *New York Times*, the United States Trustee Program—the division of the Department of Justice responsible for overseeing the administration of bankruptcy cases—has taken the unusual step of intervening in bankruptcy proceedings to force the mortgage companies to prove that they own, or otherwise have the standing required to enforce, the mortgages on which they are seeking to foreclose. *See* Gretchen Morgenson, *Don't Just Tell Us. Show Us That You Can Foreclose*, N.Y. Times, Nov. 27, 2010. The *Times* article noted the

Trustee's intervention in two Atlanta bankruptcy cases, one involving Wells Fargo and the other involving J.P. Morgan Chase.

712. The failure to properly assign mortgages or mortgage loans is also shown by the recent drop in foreclosures system-wide, which is attributable to lack of necessary documentation. *See, e.g.*, Dan Levy & John Gittelsohn, *Foreclosure Filings Hit Three-Year Low As U.S. Servicers in "Dysfunction"*, Bloomberg News, Mar. 9, 2011, http://www.bloomberg.com/news/2011-03-10/foreclosure-filings-drop-to-3-year-low-as-u-s-servicers-in-dysfunction-.html. In addition, in the Fall of 2010, major financial institutions such as Bank of America (which acquired Countrywide) and J.P. Morgan Chase, both originators of mortgages underlying the Certificates purchased by the Bank, announced they were suspending mortgage foreclosures because they had discovered significant problems in their ability to locate and document the ownership of mortgage notes.

713. The evidence of misconduct in this regard has been so severe and pervasive that the Attorneys General of all fifty states have announced an investigation into the Defendants' practices. *See, e.g.*, Gretchen Morgenson, *New York Subpoenas 2 Foreclosure-Related Firms*, New York Times, Apr. 9, 2011 (at B1). In addition, major financial institutions have reserved hundreds of millions, if not billions, of dollars to address litigation and losses stemming from the financial crisis and foreclosure problems.

714. Also telling is a recent proposal by a group friendly to the mortgage industry to enact federal legislation to loosen the standards for foreclosure. Jason Gold & Anne Kim, Third Way, *Fixing "Foreclosure-gate"* (Jan. 2011), *available at* http://content.thirdway.org/publications/362/Third_Way_Memo_-_Fixing_Foreclosure-gate.pdf. The proposal would not be necessary if the industry's house were in order.

VI. DEFENDANTS' MATERIAL UNTRUE STATEMENTS AND OMISSIONS IN CONNECTION WITH THE SALE OF PLMBS TO THE BANK

715. As detailed above, the Sponsor Defendants purchased mortgage loans and deposited them into issuing trusts, from which the Depositor/Issuer Defendants issued Certificates, and the Underwriter Defendants and other Securities Defendants offered and sold the Certificates to the Bank through the Offering Documents for each securitization. The Depositor/Issuer and Underwriter Defendants drafted the Offering Documents. In addition, each Sponsor, Depositor/Issuer, and Underwriter Defendant was identified in these documents as the Sponsor, Depositor/Issuer or Underwriter, respectively, of the Certificates, and approved the versions of these documents that were delivered to the Bank.

716. The Offering Documents contained extensive material misstatements and omissions of material fact with regard to the underwriting guidelines and practices purportedly applied by the mortgage originators whose loans backed the PLMBS purchased by the Bank, the appraisal process underlying the loan-to-value ratios ("LTVs"), predatory lending abuses by the mortgage originators, and a number of key characteristics of the mortgage pools that pertain to the risk of the Certificates. These misstatements are not predictions of future events or subjective opinions. Rather, these misstatements constitute misrepresentations of material facts that were false when made. Moreover, the misstatements all concern information that the Bank did not have access to and could not independently verify—this information was only available to the Defendants, and thus the Bank relied upon the Securities Defendants to accurately present the information. Specifically, the misstatements and omissions of material fact are as follows:

A. The Securities Defendants Misrepresented Underwriting Guidelines Utilized by Mortgage Lenders

1. The Materiality of Underwriting Guidelines

717. As alleged above, an originator's underwriting standards, and the extent to which an originator departs from its standards, are key indicators of the risk of the mortgage loans made by that originator. And because mortgage loans back the PLMBS that are issued to investors such as the Bank, the loan underwriting standards are also material to assessing the risk of the PLMBS. For these reasons, the originators' underwriting standards as described in the Offering Documents were material to the Bank's decision to purchase the PLMBS.

2. Misstatements Regarding Underwriting Guidelines

718. The Offering Documents contained material untrue or misleading statements and omissions regarding the underwriting guidelines allegedly employed in the origination of the mortgage loans that secure the PLMBS. Appendix III attached hereto and incorporated herein sets forth those statements and omissions and the reasons each is misleading. The following are examples of these materially misleading statements and omissions regarding mortgages originated or acquired by Countrywide Home Loans, taken from the Banc of America Funding 2006-D Trust Prospectus Supplement (incorporated herein by this reference):

A. Countrywide's underwriting standards were used "to evaluate the prospective borrower's credit standing and repayment ability and the value and adequacy of the mortgaged property as collateral." BAFC 2006-D Pros. Sup. S-57.

B. "For all mortgage loans originated or acquired by Countrywide":

> Countrywide . . . obtains a credit report relating to the applicant from a credit reporting company. The credit report typically contains information relating to such matters as credit history with local and national merchants and lenders, installment debt payments and any record of defaults, bankruptcy, dispossession, suits or judgments. ***All***

> ***adverse information in the credit report is required to be explained by the prospective borrower to the satisfaction of the lending officer.***

BAFC 2006-D Pros. Sup. S-58 (emphasis added).

C. "[A] prospective borrower must generally demonstrate that the ratio of the borrower's monthly housing expenses . . . to the borrower's monthly gross income and the ratio of total monthly debt to the monthly gross income (the 'debt-to-income' ratios) are within acceptable limits," which vary "depending on a number of underwriting criteria, including the Loan-to-Value Ratio, loan purpose, loan amount and credit history of the borrower." BAFC 2006-D Pros. Sup. S-57-58.

D. Under its Standard Underwriting Guidelines, Countrywide "generally permits a debt-to-income ratio based on the borrower's monthly housing expenses of up to 33% and a debt-to-income ratio based on the borrower's total monthly debt of up to 38%." BAFC 2006-D Pros. Sup. S-59.

E. "Exceptions to Countrywide Home Loans' underwriting guidelines may be made if compensating factors are demonstrated by a prospective borrower." BAFC 2006-D Pros. Sup. S-58.

F. According to Countrywide's "Full Documentation Program," "the underwriter *verifies the information contained in the application relating to employment, income, assets or mortgages*." BAFC 2006-D Pros. Sup. S-58 (emphasis added),

G. "A prospective borrower ***may be eligible*** for a loan approval process that limits or eliminates Countrywide Home Loans' standard disclosure or verification requirements or both." BAFC 2006-D Pros. Sup. S-58 (emphasis added).

719. These statements were materially misleading for multiple reasons, which are described in detail on Appendix III hereto. Fundamentally, they grossly distort the underwriting

process that was actually employed by indicating that it was a principled process that followed stated standards and employed enumerated safeguards. Unfortunately, as described above, both Countrywide and the other originators of mortgage loans that secured the PLMBS purchased by the Bank effectively abandoned their stated underwriting standards in an effort to maximize their mortgage origination volume. Thus Countrywide and other originators did not follow the underwriting standards set forth or otherwise referred to in the Offering Documents. "Exceptions" to standards became the rule. Reduced documentation was employed not to streamline the process where the borrower met eligibility requirements or where otherwise warranted, but instead to mask the borrower's disqualification. Requirements for verification of borrower income, assets, or employment were routinely ignored. Measurements of LTV and DTI were meaningless because the appraised values were unreliable and the borrowers' income assertions were unverified and total debt obligations undisclosed.

720. In addition, the statements were materially misleading because they fail to disclose that Countrywide lacked any reasonable basis for its determination of "acceptable limits" for DTIs. Due to the industry's inexperience with lending to borrowers with increased credit risks, including the explosion in Alt-A, subprime and other nontraditional lending as described *supra*, § V.B.1, Countrywide lacked sufficient data regarding historical patterns of borrower behavior in relation to default experience for similar types of borrower profiles. Consequently, Countrywide's assignment of "maximum acceptable debt-to-income ratio" had no reliable connection to the actual risk of default presented by borrowers assigned to each classification. But Countrywide, and others in the industry, continued to use this data to construct "models" to justify their ever-less rigorous underwriting programs, and continued to

present these models and programs to investors as prudent, thoroughly tested and well-grounded in reliable and objective data.

721. The statements were further materially misleading because they fail to disclose that Countrywide, like the other originators of mortgages that secured the PLMBS purchased by the Bank, lacked adequate procedures and practices to monitor or evaluate their mortgage loan underwriters' exercise of judgment, or to provide appropriate training and education to their mortgage loan underwriters.

3. Evidence Demonstrating Misstatements in the Offering Documents Regarding the Originators' Underwriting Practices.

a. Government investigations, actions and settlements, confidential witnesses, and evidence developed in other private lawsuits demonstrate systematic and pervasive abandonment of stated underwriting practices by the originators.

722. As alleged in detail above, the failure of the mortgage originators who issued the loans backing the PLMBS purchased by the Bank to apply their stated underwriting guidelines, to ensure that compensating factors justified exceptions, and to obtain accurate appraisals is well documented in government investigations and lawsuits, press reports, and statements of confidential witnesses who are former employees of the mortgage originators. Additional evidence has been generated by the many other private lawsuits against many of the same Securities Defendants in connection with the sale of mortgage-backed securities and related Certificates. This evidence—and the allegations herein based on this evidence—demonstrates that the statements in the Offering Documents regarding the mortgage originators' underwriting and appraisal practices are false and misleading. Contrary to the representations in the Offering Documents, the mortgage originators did not genuinely attempt to determine the borrowers' ability to pay, or the adequacy of the collateral provided for the loans they issued, but instead abandoned these efforts in order to issue and sell for securitization as many loans possible.

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrates the abandonment of stated underwriting practices by the originators.

723. Analysis of the specific loans that remain in the mortgage pools show high rates of delinquency and foreclosure evidencing a pervasive disregard of sound underwriting practices in the origination of those loans. The following table shows the percentages of the loans in the mortgage pools as of March 31, 2011, as to which the borrower was at least 90 days delinquent, foreclosure proceedings were pending, or the mortgage holder had recovered title from the borrower. While the percentages on this table are stark evidence of the flawed underwriting employed in the origination of the mortgages in the pools, they in fact understate the problem because they do not include mortgages that were foreclosed prior to March 31, 2011, but as to which the mortgage holder no longer held title to the underlying property as of this date.

724. Analysis of three key metrics with respect to individual mortgage loans provides further evidence of the abandonment of stated underwriting guidelines. The LTV, DTI and credit score ("FICO") metrics are each key indicators of the riskiness of a loan and, according to the statements in the Offering Documents, were fundamental components of the underwriting process. Because the underwriting process as described in the Offering Documents was ostensibly aimed at assessing the risk of default on a mortgage, the mortgages should exhibit a balancing of these key risk indicators—for example, mortgages with higher LTVs or DTIs should tend to exhibit compensatingly higher FICO scores. But analysis of the underlying mortgages indicates otherwise. The Bank has been able to obtain individual loan FICO score and LTV information for 111 of the Certificates, and individual loan DTI information for 78 of the Certificates. The Bank has analyzed these loans to see how the data are *correlated*—that is, the extent to which changes in one metric are associated with changes in another. The Bank has also analyzed whether the loans exhibit *more than one* high-risk characteristic—also known as "compounded" high-risk characteristics.

725. Mortgage underwriting of the type described in the Offering Documents, which balances negative characteristics against compensating positive ones, should result in discernible correlation among the DTI, LTV and FICO metrics (*i.e.*, higher LTVs should correlate with higher FICO scores and lower DTIs, higher DTIs with higher FICO scores and lower LTVs, and lower FICO scores with lower LTVs and DTIs), and should result in the absence of compounded high-risk factors in individual mortgages.

726. However, the Bank's analysis of the individual loan level data indicates otherwise. For 63 of the Certificates, there is either no correlation between higher LTVs and higher FICOs, or the correlation is *negative* (*i.e.*, higher LTVs are associated with *lower* FICOs).

In addition, for 50 of the Certificates as to which the Bank has been able to obtain FICO and DTI information for individual loans, there is no correlation between higher DTIs and higher FICOs, or the correlation is *negative* (*i.e.*, higher DTIs are correlated with *lower* FICOs. Further, for 65 of the Certificates as to which the Bank has been able to obtain LTV and DTI information for individual loans, there is either no correlation between higher LTVs and lower DTIs, or the correlation is *negative* (*i.e.*, higher LTVs are correlated with *higher* DTIs). These results are summarized on the following table:

728. The absence of correlation among these important risk measures, and the presence of negative correlations among them, indicate that the risk factors present in a loan

application were *not* appropriately balanced. This is contrary to the assurances in the Offering Documents. Those assurances were thus demonstrably false and materially misleading.

B. The Securities Defendants Misrepresented the Appraisal Process and LTVs That Were Based Upon Those "Appraisals."

1. The Materiality of Representations Regarding Appraisals and LTVs

729. The LTV of a mortgage loan is the ratio of the amount of the mortgage loan to the value of the mortgaged property when the loan is made. For example, a loan of $200,000 secured by property valued at $500,000 has an LTV of 40%; a loan of $450,000 on the same property has an LTV of 90%. The LTV is one of the most important measures of the risk of a mortgage loan because it is a primary determinant of the likelihood of default. The lower the LTV, the greater the borrower's equity relative to the value of the house. Thus, when an LTV is low, it is less likely that a decline in the property's value will wipe out the owner's equity and give the owner an incentive to stop making mortgage payments and abandon the property (a "strategic default"). Additionally, lower LTVs indicate that the losses on loans that do default will be less severe—*i.e.*, loans with lower LTVs provide a greater equity "cushion" because there is an increased likelihood that the proceeds of foreclosure will cover the unpaid balance on the mortgage loan.

730. Because the numerator (the amount of the loan) is predetermined, the key to an accurate LTV is an accurate denominator (the value of the property). The key to an accurate denominator, in turn, is an accurate appraisal of the property. In a purchase of a property, the denominator in the LTV is usually determined by choosing the lower of the purchase price or the appraised value. In a refinancing or home equity loan, the denominator is always an appraised value because there is no purchase price. Accordingly, an inflated appraisal will inflate the denominator of the LTV. Here, as explained below, *see infra* ¶¶ 739-48, what the Offering

Documents refer to as "appraisals" are in fact not appraisals at all because they fail to satisfy the definition of an appraisal as set forth in controlling regulations. For example, it is not an "appraisal" as that term is defined in the regulations to conclude based on pressure from the mortgage underwriter that a home's value is equal to its purchase price. The originators accepted inflated valuations, whether based on appraisals performed without regard for applicable appraisal standards, or through alternative valuation processes aimed at producing the result necessary to permit the loan to be made.

731. A denominator that is too high will understate, sometimes greatly, the risk of a loan. In the example above, if the property's actual value is $500,000, but is valued incorrectly at $550,000, then the LTV of the $200,000 loan falls from 40% to 36.4%, and the LTV of the $450,000 loan falls from 90% to 81.8%. In either case, an LTV that is based upon an improperly inflated appraisal value understates the risk of the loan.

732. Additionally, it is important to note that at higher LTVs or higher loan amounts, even minor inflations in a property's value can translate into significantly riskier loans. In the example above, although the risk of a loan with an LTV of 40% is greater than the risk of one with an LTV of 36.4%, both imply a relatively safe loan because of the large equity cushions. By contrast, a loan with an LTV of 90% is much riskier than one with an LTV of 81.8%. In the case of a loan with an LTV of 81.8%, there is an equity cushion of 18.2% of the value of the property, while in the case of the 90% LTV loan, the equity cushion is only 10%—just over half as much. Thus, in the example in the preceding paragraph, the $50,000 overstatement in the appraisal has a far more dramatic effect on the risk profile of the $450,000 loan than on the $200,000 loan.

733. Because the riskiness of the underlying loans in the asset pool (including the risk of default and the severity of the losses on default) impacts the risk of the associated PLMBS, aggregate LTV metrics are material to an investor's decision to purchase PLMBS, and specifically, were material to the Bank. The sole source of payment on the Certificates is the cash flow from the mortgage loans that back them. If borrowers fail to make their payments, there is less cash to pay the investors in the Certificates. The safety of the Certificates consequently depends upon the quality of the loans, and a key indicator of loan quality is an LTV resulting from an appraisal conducted in accordance with governing standards. If the LTVs of the mortgage loans in the asset pool of the securitization are not based on appraisals conducted in accordance with governing standards, as the Bank alleges here, *see infra* ¶¶ 739-52, the ratings of the Certificates sold in that securitization will also be incorrect. Investors will therefore be misled about the risk of investing in a particular PLMBS.

734. LTVs also serve as indicators of prepayment patterns—that is, the number of borrowers who pay off their mortgage loans before maturity. LTVs thus predict the expected lives of the loans and the associated PLMBS that are backed by the loans. Prepayment patterns affect many aspects of the PLMBS that are material to the investors purchasing them, such as the life of the Certificate and the timing and amount of cash that the investor will receive during that life.

735. Even seemingly minor differences in the aggregate LTV metrics had a significant effect on both the risk and rating of each Certificate sold in the securitization. For example, assume the Offering Documents assert that the loan pool had a weighted average LTV (*i.e.*, the average of the LTVs for the mortgages in the pool, weighted by each mortgage's principal amount) of 80%. If that true weighted average LTV (after correcting flawed procedures in

"appraisals" that overstated the value of the properties securing the mortgages) were 82%, the Offering Documents' assertion would constitute a material misstatement of the risk profile of the mortgage pool—and the PLMBS it secured—because the equity cushion (and the borrowers' equity interest in the properties) would be eroded by 10 percent.

736. Finally, because an LTV is only as reliable as the appraisal used to determine the value of the collateral, individual and aggregate LTVs are meaningless to PLMBS investors unless the appraisals underlying the LTVs are done in accordance with governing standards. Thus statements regarding the valuation of collateral—including that "appraisals" were conducted in calculating the LTVs and that such appraisals conformed to uniform standards—are material to an investor's decision to purchase PLMBS, and specifically, were material to the Bank:

> Mortgage bankers and investors consider the property appraisal one of the most important documents contained in the loan file since it establishes the value of the property securing the mortgage loan. In fact, investors put review of the appraisal on the same level as the review of credit. The appraisal assists the mortgage banker in assessing the collateral risk . . . . Obviously, the ultimate investor wants to mitigate such risk and relies on the appraisal to ensure that the property falls within the investor's valuation parameters.

Handbook of Mortgage Lending 165 (Mortgage Bankers Ass'n of Am. 2003).

737. Furthermore, assertions that appraisals conformed to the applicable standards are material to PLMBS investors like the Bank because investors like the Bank have no reasonable means of verifying the LTVs asserted in the Offering Documents at the time of sale. When conducted in accordance with governing standards, appraisals and their resulting LTVs are based on knowledge of particular facts that are not available to investors in mortgage-backed securities—an investor simply does not have access to the data, let alone the time and resources, necessary to conduct an independent valuation of each piece of collateral underlying each Certificate.

738. Statements regarding appraiser independence and impartiality are important as they provide assurance that the LTVs were not artificially inflated due to mortgage originator manipulation. Likewise, statements in the Offering Documents that the appraisals conformed to USPAP or Fannie Mae and Freddie Mac standards, including requirements that appraisals be independently and impartially conducted, indicate that the appraisals and the aggregate data included in the Offering Documents based on the appraisals properly assess the value of the collateral, and provide a reliable measure of the risk of the loan pools.

2. Misstatements Regarding Appraisals and LTVs

a. The Offering Documents falsely state that the LTVs were based upon appraisals

739. The Offering Documents contained numerous material untrue or misleading statements regarding the valuation of collateral and the "appraisal" process conducted upon the origination of the mortgages underlying the PLMBS. The Prospectus or Prospectus Supplement for each Certificate states that the LTV represents a "ratio" or "fraction," the numerator of which is the "principal balance" or "principal amount" of the mortgage loan, and the denominator of which is the "lesser" or "least" of (1) the "sales price" or "purchase price" or "selling price" of the mortgaged property and (2) the "appraised value" or "appraisal" or "the appraised value determined in an appraisal" or "the appraised value . . . as established by an appraisal." *See* Appendix VII.

740. These are false statements of material fact because, contrary to the Securities Defendants' representations that the LTVs were based on "appraisals" or "appraised values," in reality the biased and coerced valuations of collateral that the Securities Defendants labeled as "appraisals" failed to meet the federally required definition of "appraisal" applicable to entities that are regulated by the Office of Thrift Supervision (OTS), the Office of the Comptroller of the

Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), or the Board of Governors of the Federal Reserve System (FRB) (collectively the "Bank Regulators"). Thus, the LTVs were not based on appraisals at all as that term is used and understood in the industry.

741. The following originators of the mortgages underlying the PLMBS were regulated by the Bank Regulators:

- Bank of America, National Association, First National Bank of Nevada, and Wells Fargo Bank, National Association, are "national banking associations" chartered with the OCC pursuant to 12 U.S.C. § 21. Therefore, under U.S.C. § 1813(q)(1), the OCC is the "appropriate Federal banking agency" with jurisdiction to regulate these banks.

- Downey Savings and Loan Association, F.A., First Federal Bank of California, IndyMac Bank, F.S.B., Ohio Savings Bank, and Washington Mutual Bank are "federal savings associations" within the meaning of 12 U.S.C. § 1813(b) and 12 U.S.C. § 1462(5). Pursuant to 12 U.S.C. § 1813(q)(4), the OTS is the "appropriate Federal banking agency" with jurisdiction to regulate these originators.

- First Republic Bank was a "state nonmember bank" within the meaning of 12 U.S.C. § 1813(e). Pursuant to 12 U.S.C. § 1813(q), the FDIC is the "appropriate Federal banking agency" with jurisdiction to regulate this originator.

- GreenPoint Mortgage Funding, Inc., was a subsidiary of North Fork Bank, which was a "state nonmember bank" within the meaning of 12 U.S.C. § 1813(e). Any subsidiary of such a "state nonmember bank" is regulated by the FDIC. *See* 12 U.S.C. § 1831a(d)(1); 12 C.F.R. § 362.4(a).

- Subsidiaries of "bank holding companies" are regulated by the FRB pursuant to 12 U.S.C. §§ 1813(q), 1841(n). *See also* 12 C.F.R. §§ 225.21-225.28. Countrywide Home Loans, Inc., Decision One Mortgage Company LLC, and OwnIt Mortgage Solutions were nonbank subsidiaries of the following "bank holding companies" within the meaning of 12 U.S.C. §§ 1841 and 1843, and thus were regulated by the FRB:

Originator	Controlling "Bank Holding Company"
Countrywide Home Loans, Inc.	Countrywide Financial Corporation[20]
Decision One Mortgage Company, LLC	HSBC North America
OwnIt Mortgage Solutions	Bank of America Corporation

742. Morgan Stanley Mortgage Capital, Inc., was a non-savings association subsidiary of Morgan Stanley, which was a "Thrift Holding Company" or "savings and loan holding company" within the meaning of 12 U.S.C. § 1813(w) and 12 U.S.C. § 1467a(a)(1)(D). A non-savings association subsidiary of a holding company is regulated by the OTS. *See* 12 U.S.C. § 1467a; 12 C.F.R. §§ 584.2, 584.2-1.

743. Credit Suisse Financial Corporation and DLJ Mortgage Capital, Inc., were subsidiaries of Credit Suisse Group, a foreign "financial holding company" pursuant to 12 U.S.C. § 3106(a). *See also* 12 C.F.R. § 225.90. Subsidiaries of "financial holding companies" are regulated by the FRB pursuant to 12 U.S.C. §§ 1813(q), 1841(n).

744. SunTrust Mortgage, Inc. is a subsidiary of SunTrust Bank, which is a "state member bank" within the meaning of 12 U.S.C. § 1813(d). Any subsidiary of a "state member bank" is regulated by the FRB. *See* 12 U.S.C. § 330; 12 U.S.C. § 1831a(d)(1); 12 C.F.R. § 362.4(a).

745. Subsidiaries of "national banking associations" are regulated by the OCC pursuant to 12 U.S.C. § 24a and 12 C.F.R. §§ 5.34, 5.39. Chase Home Finance LLC, First Horizon Home Loan Corporation, National City Mortgage Co., and Wachovia Mortgage

[20]Countrywide Financial Corporation was a "bank holding company" until March 12, 2007.

Corporation were subsidiaries of the following "national banking associations," and hence were regulated by the OCC:

Originator	Controlling "National Banking Association"
Chase Home Finance LLC	JPMorgan Chase Bank, National Association
First Horizon Home Loan Corporation	First Tennessee Bank National Association
National City Mortgage Co.	National City Bank[21]
Wachovia Mortgage Corporation	Wachovia Bank, National Association

746. Each of the Bank Regulators has issued regulations pursuant to Title XI of the Financial Institutions Reform Recovery and Enforcement Act of 1989, 12 U.S.C. § 1339, that govern the appraisal practices of the institutions they regulate. These regulations define an "appraisal" as a "written statement *independently and impartially prepared* by a qualified appraiser setting forth an opinion as to the market value of an adequately described property as of a specific date(s)." 12 C.F.R. § 564.2 (OTS); 12 C.F.R. § 34.42 (OCC); 12 C.F.R. § 323.2 (FDIC); 12 C.F.R. § 225.62 (FRB) (emphasis added). Therefore, by representing that the LTVs were based on "appraisals" of the collateral, the Securities Defendants represented that the LTVs were based on independent and impartial valuations of the collateral.

747. The Bank Regulators define appraiser independence as follows:

> (a) Staff appraisers. If an appraisal is prepared by a staff appraiser, that *appraiser must be independent of the lending, investment, and collection functions* and not involved, except as an appraiser, in the federally related transaction, and *have no direct or indirect interest, financial or otherwise, in the property* . . . .

[21] National City Bank was a national bank until it was acquired by PNC Bank, N.A., on November 11, 2009.

> (b) Fee appraisers. (1) If an appraisal is prepared by a fee appraiser, the appraiser shall be engaged directly by the regulated institution or its agent, and *have no direct or indirect interest, financial or otherwise, in the property or the transaction* . . . .

12 C.F.R. § 564.5 (OTS); 12 C.F.R. § 34.45 (OCC); 12 C.F.R. § 323.5 (FDIC); 12 C.F.R. § 225.65 (FRB) (emphasis added). In 2005 the Bank Regulators further elaborated on the standards for appraiser independence, stating that "[l]oan production staff should not select appraisers." Additionally, the Bank Regulators specified that although loan production staff may use a "revolving, board approved list to select a residential appraiser," the "[s]taff responsible for the development and maintenance of the list should be independent of the loan production process." *See "Frequently Asked Questions on the Appraisal Regulations and the Interagency Statement on Independent Appraisal and Evaluation Functions."* (Questions 3, 5).

748. The Securities Defendants' statements in the Offering Documents are materially misleading because the LTVs were not based on impartial and independent appraisals, but rather were the result of manipulation and coercion by loan production staff. As described above in sections V.B and V.C, the originators' loan production staff pressured and coerced appraisers to inflate values, demanded and obtained the ability to have "business managers" overrule staff and third party appraisers, and routinely fed improper information to appraisers in an effort to manipulate their valuations, all of which served to undermine the independence of the appraisal process. Contrary to the interagency guidance, the originators' lending departments constantly pressured appraisers to increase their valuations, made clear that their continued access to work from these originators depended upon the appraisers coming in "at value," and in some cases simply overruled appraisers that refused to cooperate. The originators ultimately resorted to using lists of approved appraisers that excluded appraisers whose appraisals in the past had come in "too low" and who were unwilling to increase their appraisals to satisfy the lending

departments. All of this resulted in appraisers having an indirect financial interest in each property they appraised, since their ability to obtain future work was impacted by their willingness to come in "at value" for each property they appraised. Simply put, as a result of this coercion, appraisers provided appraisals that they did not believe accurately reflected the value of the appraised property, but nevertheless was sufficiently high—i.e., "at value"—to enable the deal to close. Because these valuations were not "independently and impartially prepared" as required by the federal definition of "appraisal," the Securities Defendants made false statements of material fact in the Offering Documents by stating that the LTVs were based on "appraisals" or "appraised values."

b. Misstatements regarding the standards to which the purported "appraisals" conformed

749. In addition, the Offering Documents contained materially untrue or misleading statements and omissions regarding the standards to which the purported "appraisals" conformed. The underwriting guidelines for each of the following originators—as stated in the Offering Documents—state that the appraisals are required to conform to USPAP: American Home Mortgage Corp; Ameriquest Mortgage Company; Aurora Loan Services LLC; Lehman Brothers Bank, F.S.B.; Bear Stearns Residential Mortgage Corporation; Credit Suisse Financial Corporation; DLJ Mortgage Capital; Decision One Mortgage; Downey Savings and Loan Association, F.A., EMC Mortgage Corporation; First Horizon Home Loan Corporation; First National Bank of Nevada; GreenPoint Mortgage Funding, Inc.; IndyMac Bank, F.S.B.; Morgan Stanley Mortgage Capital, Inc.; MortgageIT, Inc.; National City Mortgage Co.; Silver State Mortgage; Silver State Financial Services, Inc.; and Washington Mutual Mortgage Securities Corp. *See* Appendix III.

750. Additionally, the underwriting guidelines for each of the following originators—as stated in the Offering Documents—state that the appraisals conformed to Fannie Mae and Freddie Mac appraisal standards: Countrywide; Just Mortgage, Inc.; Metrocities Mortgage LLC; PHH Mortgage Corporation; SouthStar Funding LLC; Thornburg Mortgage Home Loans, Inc.; and WinStar Mortgage Partners, Inc. *See* Appendix III. The Fannie Mae and Freddie Mac appraisal standards require that appraisals be conducted in accordance with USPAP. *See* 2006 Single Family Selling Guide, Part XI, 102.02.

751. These statements in the Offering Documents were materially misleading because the mortgage originators routinely accepted—and in fact overtly sought—valuations of collateral that were conducted in violation of the appraisal standards of USPAP, Fannie Mae and Freddie Mac. For example, as detailed above, the USPAP requires that an appraiser "perform assignments with impartiality, objectivity, and independence, and without accommodation of personal interests." Similarly, the Fannie Mae appraisal standards provide that "it is essential that a lender obtain an independent, disinterested examination." As alleged in paragraph 748 and further described in sections V.B and V.C, the appraisals used by the mortgage originators were the product of manipulation and coercion and thus were not impartial, objective, and independent as required by USPAP.

752. Additionally, USPAP precludes acceptance of an appraisal assignment where compensation is contingent upon "reporting a predetermined result" or "a direction in assignment results that favors the cause of a client." Similarly, it is an "unacceptable appraisal practice" under Fannie Mae standards to develop and report an appraisal "that favors either the cause of the client . . . [or] the attainment of a specific result . . . in order to receive compensation . . . and/or in anticipation of receiving future assignments." However, these are precisely the

conditions that loan production staff for the mortgage originators forced upon appraisers when they repeatedly pressured appraisers to increase their valuations, implicitly or explicitly linked the receipt of continued work to "at value" appraisals, and even threatened to place appraisers on a blacklist if they did not "come back at value."

c. Misstatements regarding aggregate LTVs

753. Because the LTVs were not based on "appraisals" conducted in conformance with applicable appraisal standards, the statements in the Offering Documents regarding the aggregate LTVs of the mortgage pools were materially untrue and misleading. These statements concern the extent to which loans in the pools underlying each Certificate had LTVs in excess of 100%, 90% or 80%, and the weighted average LTV of the pools. Section VI.B.3 below sets forth those materially untrue and misleading statements as well as the reasons each is misleading.

3. Evidence Demonstrating Misstatements about Appraisals and LTVs in the Offering Documents

a. Government investigations, press reports, and confidential witnesses demonstrate systemic and pervasive appraisal manipulation by the mortgage originators

754. As alleged in detail above, *see supra* §§ V.B and V.C, the mortgage originators' failure to obtain accurate appraisals for the loans backing the PLMBS has been well documented in government investigations and lawsuits, press reports, and statements of confidential witnesses. Furthermore, as alleged above, this evidence demonstrates that the mortgage originators manipulated the appraisal process and undermined the independence and impartiality of appraisers that is crucial to the determination of credible collateral valuations. This evidence—and the allegations herein based on this evidence—demonstrates that the statements in the Offering Documents regarding the appraisals and appraisal process are false and misleading.

755. The Offering Documents misrepresented that the LTVs were based upon appraisals conducted pursuant to governing standards. In fact, the "appraisals" underlying the LTVs were not appraisals at all—they were not independent assessments of a property's value, but rather were simply coerced or otherwise misleading statements from appraisers to enable loans to close.

756. As set forth above, many of the Depositor, Underwriter, and Sponsor Defendants, by virtue of being vertically integrated with the mortgage originators that originated the loans underlying the Certificates purchased by the Bank, *see supra* § V.D.1, should have known that the appraisals were inflated and were the product of manipulation and coercion in violation of the requirements of the USPAP.

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrate that appraisals were materially inflated and the LTVs were materially understated.

757. As part of its investigation of the claims asserted herein, the Bank has analyzed the LTVs of mortgage loans that secure each of the PLMBS that it purchased. The Bank has tested the LTVs as represented in the Offering Documents against the LTVs that would have been calculated had the properties been valued at the time of loan origination in accordance with accepted and reliable appraisal practices (as was represented in the Offering Documents). To perform this analysis, the Bank has employed an industry-standard automated valuation model ("AVM") that reliably calculates the values of the subject properties as of the date of mortgage loan origination. The AVM draws upon a database of 500 million sales covering ZIP codes that represent 98.7% of the homes, occupied by 99.8% of the population, in the United States, and calculates a valuation based on criteria including the type, condition, and location of the property, as well as the actual sale prices of comparable properties in the same locale shortly before the specified date. The extensive independent testing of the AVM confirms that the AVM

is highly reliable and accurate means of determining the value that would have been determined for a property as of a historical date had that property been valued in accordance with accepted and reliable appraisal practices.

758. This analysis demonstrates stark misstatements in the LTV information as represented in the Offering Documents. Because the LTV calculation is simply a ratio of loan amount to value, and because the loan amounts are unquestioned, the reason for the discrepancies is inescapable: the LTVs represented in the Offering Documents were the result of inflated and unreliable collateral valuations that were misleadingly labeled as "appraisals." Had the collateral valuation practices comported with the Bank Regulators' definition of "appraisal" and the interagency guidance on appraiser independence, as well as with and with the USPAP and Fannie Mae/ Freddie Mac standards as represented in the Offering Documents, the resulting aggregate LTVs would have been materially different from those represented in the Offering Documents and the Certificates would not have been triple-A rated.

759. The Offering Documents' misrepresentations about the aggregate LTV were material to the Bank's decision to purchase the PLMBS. Moreover, because they should have known of the manipulation of the appraisal process in the origination of mortgage loans as described herein, *see supra* § VI.B.3.a, the Securities Defendants should have known that the collateral valuations were unreliable and that statements made in the Offering Documents based in whole or in part on the collateral values, including statements regarding LTVs and credit ratings, were false and misleading.

760. The following summarizes four types of material LTV-related understatements contained in the Offering Documents: the percentage of loans with over 100% LTV; the percentage of loans with over 90% LTV; the percentage of loans with over 80% LTV; and the

weighted average LTV for the mortgage pool. Each is a distinct and significant representation in the Offering Documents.

761. The 100% LTV representation is obviously significant because loans with over 100% LTV afford the lender no equity cushion and leave the lender with inadequate collateral from the outset. The Offering Documents consistently assured the Bank that there were no such loans in the mortgage pools. As the following table indicates, the recalculated LTVs (which, based on the AVM, indicate what the reported LTV would have been had proper appraisal methods been employed) indicate that in each pool there was a material number of mortgage loans with LTVs in excess of 100%:

762. The following table compares the representations in the Offering Documents with respect to the percentage of the mortgages in the subject pools with LTVs greater than 90%, to the percentages of mortgages in the pools in which the LTV calculated using the AVM exceeds 90%. An LTV in excess of 90% represents an extremely risky mortgage for the investor, as the borrower has little equity in the property and there is a significant risk that upon foreclosure the collateral will be inadequate to pay the debt. Accordingly, for each of the Certificates listed in the following table, the statement regarding the mortgages in the subject pool with LTVs in excess of 90% was materially misleading.

Certificate	% of Loans with Greater than 90% LTV Per the Offering Documents	Recalculated % of Loans with Greater than 90% LTV	Offering Documents Understatement

763. The following table compares the representations in the Offering Documents with respect to the percentage of the mortgages in the subject pool with LTVs greater than 80%, to the percentages of mortgages in the pools in which the LTV calculated using the AVM exceeds 80%. The 80% LTV metric is very significant to a PLMBS investor such as the Bank, because in traditional mortgage underwriting an LTV in excess of 80% was generally considered as affording the lender little value cushion to protect against borrower default and loss upon foreclosure. Accordingly, for each of the Certificates listed in the following table, the statement regarding the percentage of mortgages in the subject pool with LTVs in excess of 80% was materially misleading.

764. The following table lists mortgage pools securing the PLMBS purchased by the Bank in which the representation contained in the related Offering Documents with respect to the weighted average LTV of the mortgage pool securing those PLMBS was materially understated. The weighted average LTV representation is significant because it provides the investor with an important gauge as to the overall riskiness of the mortgage pool.

C. The Offering Documents Were Materially Misleading Because They Failed to Inform Investors of the Presence of Compounded High-Risk Mortgages in the Loan Pools.

765. The Bank has analyzed the individual loan data it has been able to obtain to assess the extent to which the loan pools contained loans – referred to herein as "Compounded High-Risk Mortgages" – that exhibited multiple high risks (*i.e.*, above the 75th percentile in the pool) for two or more of the LTV, DTI or FICO metrics, which are the key quantitative metrics generally employed in the underwriting process, but which did not exhibit compensating low risk for the remaining metric. If risk balancing underwriting of the type described in the Offering Documents (*i.e.*, requiring that high risk factors in one or more areas be compensated for by low risk in one or more other areas) had been employed, the loan pools would be expected to contain few, if any, Compounded High-Risk Mortgages.

766. The Bank's analysis indicates that for the vast majority of the loan pools, the incidence of Compounded High-Risk Mortgages was much higher than what would be expected if risk balancing underwriting of the type described in the Offering Documents had been employed. For example, for the following 99 Certificates, the incidence of Compounded High-Risk Mortgages is greater than 80% of the rate that would be expected if the LTV, DTI and FICO metrics were independent measures. Risk balancing underwriting of the type described in the Offering Documents should produce an incidence much lower than 80% of the independent rate, however. Accordingly, the incidence of Compounded High-Risk Mortgages in the pools securing the following certificates indicates that the Offering Documents' statements regarding risk balancing underwriting were materially misleading:

767. Further, the Bank's analysis indicates that for 74 of the Certificates the incidence of Compounded High-Risk mortgages in the pool was *above 100% of* the rate that would be expected if the metrics were independent. This data indicates for these pools that not only was risk balancing underwriting of the type described in the Offering Documents not employed, but also that the underwriting process that was employed was so deeply flawed that it produced more mortgages at

extremely high risk of failure than would have resulted from a random process. For these pools, not only were the statements in the Offering Documents regarding the underwriting process misleading, but the failure to disclose the incidence of Compounded High-Risk Mortgages was itself a materially misleading omission. The following table lists the certificates for which the incidence of Compounded High-Risk mortgages in the pool was *above 100% of* the rate that would be expected if the metrics were independent, and lists the actual incidence of Compounded High-Risk Mortgages in the pool as a percentage of the rate that would be expected from a random distribution:

768. As the foregoing tables indicate, the risk profiles of the loans backing a substantial majority of the Certificates were seriously affected by the presence of Compounded High-Risk Mortgages. The number of compounded high-risk loans not only indicates that the statements in the Offering Documents regarding mortgage underwriting were materially misleading, but also indicates that the risk of default in the loan pools was materially higher than was indicated by the averages and other pool-level data provided in the Offering Documents. Omitting to disclose information with respect to the presence and extent of compounded high-risk mortgages caused the Offering Documents to be materially misleading.

D. Defendants' Statements Regarding the Triple-A Rating of the PLMBS Were False and Misleading.

1. The Materiality of the Credit Rating Process and Ratings

769. The Bank only was authorized to purchase investment-grade, triple-A-rated tranches of the Certificates. Hence, the ratings issued by the Rating Agency Defendants were manifestly material to the Bank's decision to purchase the PLMBS. The ratings were not mere subjective opinions. Rather, they were factual representations that purported to assess the risk of the Certificates based on factual information pertaining to the loans in the mortgage pools and modeling based on this factual information and the likelihood that the Bank would receive the payments contemplated by the Certificates. Thus, the ratings provided material information for investors, including the Bank.

2. False Representations That the Certificates the Bank Purchased Would Not Be Issued Unless They Earned Triple-A Ratings

770. As alleged above, the Rating Agency Defendants knew, and the Securities Defendants should have known, that the ratings were unreliable and substantially understated the riskiness of the mortgage loans which underlie the PLMBS. Consequently, the Rating Agency Defendants knew, and the Securities Defendants should have known, that the PLMBS did not in fact possess the characteristics necessary to qualify for accurate, bona fide triple-A ratings.

771. All the Offering Documents for the PLMBS in this action stated that it was "a condition to the issuance of the offered certificates" purchased by the Bank that those Certificates received triple-A ratings. *See* Appendix IV. The representation that the Certificates the Bank purchased would not have been issued unless they had received triple-A ratings was misleading because the Certificates had not received accurate, bona fide triple-A ratings. The triple-A ratings the Certificates received were fundamentally flawed because they were based on information about the underlying assets that was factually inaccurate.

3. Misstatements about the Credit Rating Process and Ratings

772. The Offering Documents misstated and omitted information about the ratings issued by the Rating Agency Defendants and the rating process. Each Prospectus contained disclosures regarding the ratings process, and the purpose and bases of the ratings. Appendix IV attached hereto and incorporated herein sets forth those statements and omissions. For example, the Prospectus Supplement for JPMMT 2005-ALT1, dated August 25, 2005, states:

> The ratings assigned to mortgage pass through certificates address the likelihood of the receipt of all payments on the mortgage loans by the related Certificate holders under the agreements pursuant to which such certificates are issued. Such ratings take into consideration the credit quality of the related mortgage pool, including any credit support providers, structural and legal aspects associated with such certificates, and the extent to which the payment stream on the mortgage pool is adequate to make the payments required by such certificates. Ratings on such certificates do not, however, constitute a statement regarding frequency of prepayments of the Mortgage Loans.

JPMMT 2005-ALT1 Pros. Sup. S-65-66.

773. These disclosures, however, were incomplete, inaccurate and misleading. Specifically, the Offering Documents misrepresented and omitted the following material information:

- The ratings did not "take into consideration the credit quality of the mortgage pool," because the credit ratings were based on false factual information about the underwriting standards, the "appraisals" and their resulting LTVs, and similar characteristics of the loan.
- The ratings did not "address the likelihood of the receipt of all payments on the mortgage loans by the related Certificate holders," because—for the reasons just given—the ratings did not take into consideration the true characteristics of the mortgage loans, and thus could not address the true likelihood of the receipt of distribution on those loans.
- The Offering Documents did not disclose the Rating Agency Defendants' conflicts of interest, which compromised the rating process;
- The Offering Documents did not disclose the manipulation of the credit rating process and "ratings shopping" by Depositors/Issuers and Underwriters;

- The Offering Documents did not disclose that the credit ratings were based on false and misleading information with respect to underwriting standards, LTVs and other matters pertaining to the mortgages that secured the PLMBS purchased by the Bank;

- The Offering Documents did not disclose the scope and limitations of the Rating Agency Defendants' rating models, including that they relied on outdated data and failed to adequately protect against misinformation provided by issuers and borrowers;

- The Offering Documents did not disclose that the investment-grade ratings given to the PMLBS were not, in fact, comparable to investment-grade ratings given to corporate bonds or other instruments;

- The Offering Documents did not disclose that the investment-grade ratings stated and discussed in Offering Documents failed to reflect the true credit risk of the PLMBS purchased by the Bank.

774. In sum, the ratings provided by the Rating Agency Defendants did not assess the likelihood of the receipt of all payments on the mortgage loans by the related Certificate holders under the agreements pursuant to which such Certificates are issued, the credit quality of the related mortgage pool, or the extent to which the payment stream on the mortgage pool was adequate to make the payments required by such Certificates. As a result, the statements in the Offering Documents regarding the ratings assigned by the Rating Agency Defendants and the rating process materially misled the Bank regarding the true risk of the Certificates it purchased.

4. Evidence Demonstrating Misstatements about the Ratings and Ratings Process

775. As alleged in detail above, *see supra* § V.F, the credit rating process was subject to false information about underwriting standards, conflicts of interest, Depositor and Underwriter manipulation, inflated appraisals, and faulty and outdated models. Furthermore, as alleged above, the Securities Defendants reverse-engineered the rating process through ratings shopping, and through their direct involvement in the rating process. As set forth above, these allegations are all well documented in government investigations, other litigation, and press

reports. This evidence—and the allegations herein based on this evidence—demonstrates that the statements in the Offering Documents regarding the ratings and the rating process are false and misleading.

776. In addition, the en masse downgrade of the PLMBS purchased by the Bank from triple-A to junk status indicates that the initial ratings were incorrect and without any legitimate basis. Likewise, delinquency and foreclosure rates indicate that the PLMBS were far riskier and more prone to loss than the initial ratings indicated. As explained above, the Securities Defendants, by virtue of their access to information held by their corporate affiliates and their intimate involvement in the securitization and due diligence process, *see supra* § V.D, had access to ample information about the quality of the loan pools and should have known that the bundled Certificates, even though tranched and credit-enhanced, did not possess the characteristics of a triple-A-rated investment; and that the rating was the direct product of inaccurate information about the underwriting standards actually used in originating the mortgages backing the PLMBS. No Defendant informed the Bank that the ratings were unreliable as a result of the Rating Agency Defendants' failure to take into account the actual underwriting standards being used by mortgage originators, that the models used to produce the credit ratings were inaccurate and outdated, that the ratings were the product of reverse-engineering and conflicts of interest, and that the ratings were not anywhere near as reliable as the ratings given to other financial instruments such as corporate bonds. As a result, the rating misrepresented the risk of the PLMBS purchased by the Bank.

777. The following table sets forth the original face amounts and ratings of the securities that are the subject of this action, and the first date on which such securities' ratings were downgraded to below investment-grade:

E. The Securities Defendants Misrepresented the Mortgage Originators' Compliance with Predatory Lending Restrictions.

1. The Materiality of Predatory Lending Practices and the Issuance of Loans that Violate Other State and Federal Lending Statutes.

778. By regulatory directive, the Bank was not permitted to purchase PLMBS backed by mortgage pools that contained predatory loans. The Federal Housing Finance Board Advisory Bulletin, 2005-AB-08 (August 25, 2005) states that:

> As Government Sponsored Enterprises (GSEs), the FHLBanks carry out their housing finance mission by serving as a source of liquidity for the nation's housing and community investment needs. Predatory lending practices that erode homeowners' equity in their homes or contribute to homeowners losing their homes are inconsistent with advancing homeownership and are incompatible with the FHLBanks' responsibility to carry out their housing finance mission in a safe and sound manner.
>
> . . . .
>
> Each FHLBank must have in place comprehensive anti-predatory lending policies to govern the FHLBank's purchasing of mortgages and calculating the level of advances that can be made to its members.
>
> In developing those policies, the FHLBanks must review the predatory lending policies of other large financial institutions, including other GSEs. The FHLBanks must also review HUD's regulation on the types of loans that may be used in meeting the GSE housing goals, as well as any predatory lending guidance developed by other federal and state regulators, including their members' primary federal regulators. *To ensure that the FHLBanks do not support predatory practices, the FHLBanks' policies must preclude purchasing mortgages that violate applicable federal, state, or local predatory lending laws or including such loans when calculating the level of advances that can be made to a member.*

(emphasis added).

779. On July 10, 2007, the OCC, FRB, FDIC, OTS and the National Credit Union Administration (collectively, "the Agencies") issued their Final Guidance – Statement on Subprime Mortgage Lending (72 Fed. Reg. 37569). The Agencies' Guidance required that "institutions should ensure that they do not engage in the types of predatory lending practices discussed in the Expanded Subprime Guidance," and explained:

Typically predatory lending involves at least one of the following elements:

- Making loans based predominantly on the foreclosure or liquidation value of a borrower's collateral rather than on the borrower's ability to repay the mortgage according to its terms;
- Inducing a borrower to repeatedly refinance a loan in order to charge high points and fees each time the loan is refinanced ("loan flipping"); or
- Engaging in fraud or deception to conceal the true nature of the mortgage loan obligation, or ancillary products, from an unsuspecting or unsophisticated borrower.

780. The same Guidance states that: "Institutions should develop strong control procedures to monitor whether actual practices are consistent with their policies and procedures." In addition to monitoring, the Guidance notes that, "[i]nstitutions also should design compensation programs that avoid providing incentives for originations inconsistent with sound underwriting and consumer protection principles, and that do not result in the steering of consumers to these products to the exclusion of other products for which the consumer may qualify."

781. In keeping with the regulatory guidance of the Federal Housing Finance Board, the Bank required that as to any security it purchased, the Offering Documents warrant that none of the underlying mortgages violated any state or federal law concerning predatory lending.

782. Thus, statements in the Offering Documents representing and warranting that the mortgage pools did not contain loans that violated state or federal predatory lending laws were material to the Bank's decision to purchase the PLMBS.

2. Misstatements about Predatory Lending Compliance

783. The Offering Documents contained material untrue or misleading statements and omissions regarding compliance with applicable predatory lending laws. For example, the Prospectus Supplement for BALTA 2006-3 1A1, dated April 27, 2006, states:

> On the closing date, the sponsor will represent that each mortgage loan at the time it was made complied in all material respects with all applicable laws and regulations, including, without limitation, usury, equal credit opportunity, disclosure and recording laws and all predatory lending laws . . . .

BALTA 2006-3 Pros. Sup. S-47. Appendix V attached hereto and incorporated herein sets forth the statements in the other Prospectus Supplements regarding compliance with applicable predatory lending laws.

3. Evidence Demonstrating Misstatements about Predatory Lending Practices of the Mortgage Originators

a. Government investigations, actions and settlements, confidential witnesses and evidence developed in other private lawsuits demonstrate predatory lending by the mortgage originators.

784. As alleged in detail above, predatory lending practices by mortgage originators, including those who issued the loans backing the PLMBS purchased by the Bank, is well documented in government investigations and lawsuits, press reports, and statements of confidential witnesses who are former employees of the mortgage originators. Additional evidence has been generated by the many other private lawsuits against many of the same Securities Defendants in connection with the sale of mortgage-backed securities and related Certificates. This evidence—and the allegations herein based on this evidence—demonstrates that the statements in the Offering Documents regarding compliance with state and federal predatory lending rules are false and misleading. Contrary to the representations in the Offering Documents, the mortgage originators underlying these PLMBS engaged in predatory lending, and often issued loans to borrowers who lacked the ability to make the required payments. Indeed, eight of the lenders classified by the OCC as the "worst of the worst" based on foreclosure rates in the ten hardest hit metropolitan areas issued loans that backed PLMBS purchased by the Bank.

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrate that loans in the mortgage pools were the result of predatory lending.

785. An examination of the underlying mortgage loans that back the PLMBS purchased by the Bank provides strong evidence of the violation of predatory lending restrictions by the mortgage originators. This evidence takes several forms. First, given that the issuance of a loan to a borrower who is not qualified for the loan is itself a form of predatory lending, delinquency in the mortgage pools suggest predatory lending. Hence the data presented in paragraph 723 provides strong evidence of predatory lending practices of the mortgage originators who issued loans that back the PLMBS purchased by the Bank.

786. For many of the securities purchased by the Bank the data is telling. For example, mortgage loans underlying the securities sponsored by Defendants Countrywide Home Loans, Inc. and EMC Mortgage Corporation reflected total delinquencies as of March 31, 2011 averaging over 49%. As of the same date, total delinquencies for mortgage loans underlying the securities sponsored by Defendant Nomura Credit & Capital, Inc. average over 45%.

787. This analysis demonstrates that the representation and warranty of no predatory lending or high cost loans made with respect to that pool are materially inaccurate and misleading.

F. The Securities Defendants Misrepresented the Due Diligence Performed on the Mortgage Pools that Backed the PLMBS Purchased by the Bank.

1. The Materiality of Due Diligence on the Mortgage Pools

788. As alleged in detail above, the Bank did not have access to the mortgage loan files when it purchased the Certificates; it was the Securities Defendants that had access to this information. Consequently, the Bank was dependent on representations made by the Securities Defendants regarding the quality of the mortgage loans backing the PLMBS it purchased.

789. The Securities Defendants made two types of representations regarding the acquisition of mortgages that were originated by third-party originators. First, the Securities Defendants represented that certain of the originators that are identified in the Offering Documents conducted post-purchase due diligence reviews of a sampling of mortgages they acquired from third-party originators. Second, with respect to certain PLMBS backed by mortgages acquired by Sponsors from unaffiliated originators, the Securities Defendants represented that the Sponsors conducted due diligence reviews of the mortgages prior to their acquisition and securitization. In both cases, these due diligence reviews allegedly were undertaken to ensure that the mortgages were of adequate credit quality and that they were underwritten in compliance with applicable underwriting standards.

790. The representations regarding the underwriting standards employed by the originators and those regarding the Sponsor's due diligence reviews of the mortgage loans provided the Bank with critical reassurances that the overall credit quality of the mortgage pools securing the PLMBS it purchased were as represented in the Offering Documents. The Bank relied on these representations in making its decisions to purchase these Certificates.

2. Misstatements about Due Diligence

791. The Offering Documents provided to the Bank contained material untrue or misleading statements and omitted material information regarding the due diligence purportedly conducted by the Sponsors and originators when they acquired mortgages from third-party originators. For example, Banc of America Funding 2006-D Trust Prospectus Supplement, provides the following with respect to mortgages acquired by Countrywide from third-parties:

> Countrywide Home Loans may acquire mortgage loans from approved correspondent lenders under a program pursuant to which Countrywide Home Loans delegates to the correspondent the obligation to underwrite the mortgage loans to Countrywide Home Loans' standards. Under these circumstances, the underwriting of a mortgage loan may not have been reviewed by Countrywide

> Home Loans before acquisition of the mortgage loan and the correspondent represents that Countrywide Home Loans' underwriting standards have been met. After purchasing mortgage loans under those circumstances, Countrywide Home Loans conducts a quality control review of a sample of the mortgage loans. The number of loans reviewed in the quality control process varies based on a variety of factors, including Countrywide Home Loans' prior experience with the correspondent lender and the results of the quality control review process itself.

BAFC 2006-D Pros. Sup. S-57. Substantially similar provisions regarding each mortgage originator's due diligence reviews of acquired mortgages were included in the Offering Documents for many of the PLMBS purchased by the Bank. Appendix VI attached hereto and incorporated herein sets forth those statements.

792. Additionally, as an example of the representations made regarding a Sponsor's due diligence reviews of acquired mortgages, the prospectus supplement for BALTA 2006-1 11A1, dated January 30, 2006, provides:

> Performing loans acquired by the Sponsor are subject to varying levels of due diligence prior to purchase. Portfolios may be reviewed for credit, data integrity, appraisal valuation, documentation, as well as compliance with certain laws. Performing loans purchased will have been originated pursuant to the Sponsor's underwriting guidelines or the originator's underwriting guidelines that are acceptable to the Sponsor.

BALTA 2006-1 Pros. Sup. S-47.

793. Substantially similar provisions were included in the Offering Documents for many of the PLMBS purchased by the Bank. Appendix VI attached hereto and incorporated herein sets forth those statements. These statements were materially misleading because they omit to state the following information:

- The Sponsors and originators skewed the due diligence process by limiting the type and scope of review performed and pressuring the third-party due diligence firms to ignore deviations from the applicable underwriting criteria if alleged "compensating factors" were present;
- The level of due diligence performed by Sponsors and originators of mortgages backing PLMBS deviated substantially from the level of due diligence performed by purchasers of mortgages who retained those mortgages as investments;

- Due diligence review conducted by third-party firms often overlooked questionable claims by borrowers in stated income and other reduced documentation loans;

- The third-party due diligence firms informed the Sponsors that a substantial percentage of loans in the loans pools backing PLMBS were defective;

- The Sponsors nonetheless waived the defects as to a substantial percentage of these loans;

- In many cases, these reportedly defective loans were not removed from PLMBS deals, but rather were used by the Sponsors to negotiate lower prices for the pools of mortgages they acquired and subsequently securitized; and

- Where defective loans in the sample were removed from the pool, the Sponsors conducted no further review to ensure that none of the remaining mortgages was plagued by similar defects as those in the sample.

3. Evidence of Misstatements about Due Diligence

794. As alleged in detail above, *see supra* §§ V.D.4 and V.D.5, the limitations that Sponsors and originators placed on the third-party due diligence process—and the extent to which they disregarded the results of that process—are documented by public testimony and press reports, as well as by confidential witness testimony. This evidence—and the allegations herein based on this evidence—demonstrates, and the Securities Defendants should have known, that the statements in and omissions from the Offering Documents regarding the due diligence review process were materially false and misleading.

G. The Securities Defendants Misrepresented That Mortgages and Mortgage Loans Were Validly Assigned and Transferred to the Issuing Trusts

1. The Materiality of Valid Assignment and Transfer

795. PLMBS have value because they are backed by both income streams from loans and by the collateral that secure the loans. If mortgage loans and mortgages are not enforceable by the trust that issues the PLMBS, then the PLMBS have no value. For that reason, the valid

assignment and transfer of mortgage loans and mortgages were material to the Bank's decision to purchase the PLMBS.

2. Misstatements Regarding Valid Assignment and Transfer

796. The Offering Documents misrepresented that all promissory notes had been or would be validly transferred to the trusts that issued the PLMBS.

797. By way of example, the Offering Documents for CWALT 2005-86CB state:

> [T]he depositor will sell, transfer, assign, set over and otherwise convey without recourse to the trustee in trust for the benefit of the certificateholders all right, title and interest of the depositor in and to all other assets included in Alternative Loan Trust 2005-86CB, including all principal and interest received on or with respect to the Closing Date Mortgage Loans . . . .
>
> In connection with the transfer and assignment of a mortgage loan, the depositor will deliver or cause to be delivered to the trustee, or a custodian for the trustee, . . . the original mortgage note . . . endorsed in blank without recourse . . . .
>
> The trustee will review each mortgage file relating to the Closing Date Mortgage Loans within 90 days of the closing date . . . , and if any document in a mortgage file is found to be missing or defective in a material respect and [the defect is not cured within 90 days of notice, the defective mortgage loan must be repurchased].
>
> . . . .
>
> At the time of issuance of the certificates of a series, the depositor will cause the mortgage loans comprising the related trust fund to be assigned to the trustee, together with all principal and interest received by or on behalf of the depositor on or with respect to the mortgage loans after the cut-off date, other than principal and interest due on or before the cut-off date and other than any retained interest specified in the related prospectus supplement. . . . In addition, the depositor will deliver or cause to be delivered to the trustee (or to the custodian) for each mortgage loan the mortgage note endorsed without recourse in blank or to the order of the trustee, except that the depositor may deliver or cause to be delivered a lost note affidavit in lieu of any original mortgage note that has been lost . . . .
>
> . . . .
>
> The trustee (or the custodian) will review the mortgage loan documents within [90 days] . . . . Generally, if the document is found to be missing or defective in any material respect, the trustee (or the custodian) will notify the master servicer and the depositor, and the master servicer will notify the related seller. If the seller

> cannot cure the omission or defect within [90 days], the seller will be obligated to purchase the related mortgage loan from the trustee at the purchase price or, if so specified in the related prospectus supplement, replace the mortgage loan with another mortgage loan that meets specified requirements.

CWALT 2005-86CB Pros. Sup. S-24; CWALT 2005-86CB Pros. 44-45.

798. As *Kemp* and other cases show, *see supra* § V.G, the procedures specified in the Offering Documents were not followed. Mortgage notes were not properly endorsed by the originators, such that the Depositor could in turn properly endorse the note. Possession of the notes was not transferred to the trustee, custodian, or agent of the trustee.

799. Further, where the procedure was not followed, the defective loans have not been repurchased or substituted, as represented in the Offering Documents.

800. The Offering Documents also misrepresented that all mortgages had been or would be validly assigned to the trusts that issued the PLMBS.

801. By way of example, the Offering Documents for CWALT 2005-86CB state:

> [T]he depositor will deliver or cause to be delivered to the trustee (or to the custodian) for each mortgage loan . . . the mortgage, deed of trust or similar instrument with evidence of recording indicated on it (except for any mortgage not returned from the public recording office, in which case the depositor will deliver or cause to be delivered a copy of the mortgage together with a certificate that the original of the mortgage was delivered to the recording office or some other arrangement will be provided for), [and] an assignment of the mortgage to the trustee in recordable form . . . .

CWALT 2005-86CB Pros. 44.

802. The procedures specified in the Offering Documents were not followed. The mortgages were not properly assigned and physical transfer of the mortgages was not effected.

803. Further, where the procedures were not followed, the defective loans were not repurchased or substituted, as represented in the Offering Documents.

3. A Material Number of Mortgages and Mortgage Loans Were Not Validly Transferred or Assigned to the Issuing Trusts.

804. As alleged above, *see supra* ¶¶ 705-07, a material number of the promissory notes backing the PLMBS were not validly transferred to the trust, as is necessary before those notes can be enforced under applicable state law.

805. As alleged above, *see supra* ¶ 708, a material number of the mortgages backing the PLMBS were not validly assigned to the trust, as is necessary before those mortgages may be enforced under applicable state law.

806. Thus, statements in relevant Offering Documents that mortgages and mortgage loans were validly assigned and transferred to the issuing trust were false and misleading.

VII. COUNTS

FIRST CAUSE OF ACTION
Primary Violations of the Massachusetts Uniform Securities Act

807. The Bank incorporates by reference and realleges each and every allegation in this Complaint as if set forth herein.

808. This cause of action is alleged against the following Defendants in connection with the sale of the following securities:

Corporate Defendant	As	Certificate(s)

809. Under Massachusetts General Laws, Chapter 110A, Section 410(a)(2), any person who "offers or sells a security by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading," is liable to the purchaser of the security.

810. The Sponsors, Depositors, Underwriters and/or Corporate Sellers, and Individual Seller Defendants are sellers of the Certificates because they issued, marketed, and/or sold the Certificates to the public for their own financial benefit.

811. In addition, the Individual Seller Defendants named in this First Count signed the registration statements for the Lehman Certificates, which registration statements are included as part of the Offering Documents for the Certificates.

812. The Defendants named in this First Count offered to sell and sold the Certificates to the Bank in the Commonwealth of Massachusetts, when they directed their offers to sell the securities to the Bank at its offices in the Commonwealth of Massachusetts.

813. The Defendants named in this First Count offered and sold the Certificates to the Bank by means of false and misleading statements of material fact and omissions of material facts necessary to make the statements made not misleading.

814. As set forth in more detail in Section VI above and Appendices III – VI referenced therein, the statements set forth in the Offering Documents were materially false and

misleading. The material misstatements and omissions pertain to the following non-exclusive list: (a) adherence to the originators' stated underwriting guidelines, and related matters; (b) the LTVs of the mortgage loans in the collateral pools of these securitizations; (c) the rating process by which triple-A ratings were assigned; (d) compliance with predatory lending restrictions; (e) the purported due diligence on the loan pools that backed the PLMBS; (f) the enforceability of the mortgages; and (g) the compounded high-risk of the mortgage loans within the underlying mortgage pools. As set forth above, the Defendants named in this First Count had access to the underlying loan files and the purported "due diligence" review on which these statements are based, and thus should have known of these untruths and omissions in the Offering Documents.

815. The Bank did not know, and in the exercise of due diligence could not have known, of these untruths and omissions. The Bank did not have access to the underlying loan files, or the purported "due diligence" review on which these statements were allegedly based.

816. The Bank did not and could not reasonably have known of the material misstatements and omissions alleged herein earlier than four years before the date of filing this action.

817. The Bank will elect its remedy before the entry of judgment. For each security, the Bank will seek statutory damages, including interest, or will make or arrange a tender before entry of judgment.

SECOND CAUSE OF ACTION

Joint and Several Liability under the Massachusetts Uniform Securities Act

818. The Bank incorporates by reference and realleges each and every allegation in this Complaint as if fully set forth herein.

819. This cause of action is alleged against the following Defendants in connection with the sale of the following securities:

820. Under Massachusetts General Laws, Chapter 110A, Section 410(b), "[e]very person who directly or indirectly controls a seller liable under subsection (a), every partner, officer, or director of such a seller, [and] every person occupying a similar status or performing similar functions" is liable jointly and severally with and to the same extent as the seller.

821. The Corporate Controlling Person Defendants named in this count are liable under Massachusetts General Laws, Chapter 110A, Section 410(b) because, as set forth *supra* in § III.E above and elsewhere herein, they directly or indirectly controlled the Sponsor, Depositor, Underwriter, or other Seller identified in the First Cause of Action above, each of which is liable as a seller under Massachusetts General Laws, Chapter 110A, Section 410. The Corporate Controlling Entity Defendants possessed, directly or indirectly, the power to direct or cause the direction of the management and policies of the primary violators, whether through the ownership of voting securities, by contract, or otherwise.

822. In addition, the Individual Controlling Person Defendants are jointly and severally liable to the same extent as the primary violators because each of them was an officer, director, partner, or occupied a similar status or performed similar functions of such officer, director or

partner, of Lehman Brothers entities Lehman Brothers, Inc., Lehman Brothers Holdings Inc. and/or Lehman subsidiary and Depositor/Issuer Structured Asset Securities Corporation (the "Lehman Entities"), which were primary violators of Massachusetts General Laws, Chapter 110A, Section 410(a), and directly or indirectly controlled the primary violators' operations, including the securitizations at issue here. The Individual Controlling Person Defendants possessed, directly or indirectly, the power to direct or cause the direction of the management and policies of the Lehman Entities, whether through the ownership of voting securities, by contract, or otherwise.

823. As controlling persons pursuant to Massachusetts General Laws, Chapter 110A, Section 410(b), the Corporate and Individual Controlling Person Defendants are jointly and severally liable with the controlled person or entity to the Bank for the violations of Massachusetts General Laws, Chapter 110A, Section 410(a) alleged herein.

824. The Bank did not and could not reasonably have known of the facts giving rise to this cause of action any earlier than four years before the date of filing this action.

825. The Bank will elect its remedy before the entry of judgment. For each security, the Bank will seek statutory damages, including interest, or will make or arrange a tender before entry of judgment.

THIRD CAUSE OF ACTION

Negligent Misrepresentation by Certain Securities Defendants

826. The Bank incorporates by reference and realleges each and every allegation in this Complaint as if fully set forth herein.

827. This cause of action is alleged against the following Defendants in connection with the sale of the following securities:

828. As set forth above, in the course of their business dealings, the Defendants named in this Third Count made numerous representations to the Bank regarding the collateral underlying the Certificates and the underwriting guidelines that were supposedly applied in originating the mortgage loans underlying those Certificates. These material misrepresentations pertain to the following non-exclusive list: (a) adherence to the originators' stated underwriting guidelines; and related matters; (b) the LTVs of the mortgage loans in the collateral pools of these securitizations; (c) the rating process by which triple-A ratings were assigned; (d) compliance with predatory lending restrictions; (e) purported due diligence on the loan pools that backed the PLMBS; (f) the enforceability of the mortgages; and (g) the compounded high-risk of the mortgage loans within the underlying mortgage pools.

829. The Defendants named in this Third Count made the representations in the Offering Documents with the intent to influence the Bank's decision to purchase the securities.

830. These Defendants should have known that those statements were false when made, and these Defendants failed to exercise reasonable care or competence in obtaining or verifying these representations.

831. The Defendants named in this Third Count were in a position of superior knowledge as to these representations because such Defendants had access to the loan files on which these statements were based, as well as the purported "due diligence" review of the loan files, and the Bank did not have access to either the loan files or the purported "due diligence" review. Accordingly, the Bank justifiably relied on these representations by these Defendants in making its decision to purchase the securities.

832. The Bank did not and could not reasonably have known of these Defendants' misrepresentations alleged herein earlier than three years before the date of filing this action.

833. As a result of these Defendants' misrepresentations alleged herein, the Bank has suffered damages in an amount to be proven at trial, plus interest, costs, and attorneys' fees.

FOURTH CAUSE OF ACTION

Violations of the Massachusetts General Law c. 93A by Certain Securities Defendants

834. The Bank incorporates by reference and realleges each and every allegation in this Complaint as if set forth herein.

835. This cause of action is alleged against the following Defendants in connection with the sale of the following securities:

836. Under Massachusetts General Laws, Chapter 93A, Section 11, "[a]ny person who engages in the conduct of any trade or commerce and who suffers any loss of money or property, real or personal, as a result of the use or employment by another person who engages in any trade or commerce of an unfair method of competition or an unfair or deceptive act or practice . . . may . . . bring an action in superior court" for relief.

837. In connection with their offer and sale of these securities to the Bank, the Defendants named in this Fourth Count made numerous documents available to the Bank at its office in Boston, Massachusetts. For issuances that were not private placement deals, the Offering Documents that such Defendants sent to the Bank included the prospectus and prospectus supplement filed with the SEC for each securitization, registration statements, summary term sheets, and other documents. For private placement deals, the Offering Documents included private placement memoranda. In these Offering Documents, such Defendants made misrepresentations and omissions of fact that a reasonable person would find deceptive, the truth about which facts was reasonably ascertainable by Defendants but not by the Bank.

838. Both the Bank and the Defendants named in this Fourth Count were engaged in trade or commerce at the time of the misrepresentations and omissions described above, and the interaction between the parties was commercial in nature, in that such Defendants were engaged in offering securities for sale.

839. Such Defendants' misrepresentations and omissions reached the Bank, and the Bank was deceived, in Massachusetts.

840. The actions and transactions that constitute such Defendants' deceptive acts occurred primarily and substantially within Massachusetts.

841. The Bank did not and could not reasonably have known of such Defendants' material misstatements and omissions alleged herein earlier than four years before the date of filing this action.

842. As a result of such Defendants' deceptive acts, the Bank suffered a loss of money or property in an amount to be proved at trial.

FIFTH CAUSE OF ACTION

Fraud by Rating Agency Defendants

843. The Bank incorporates by reference and realleges each and every allegation in this Complaint as if set forth herein.

844. The Bank alleges fraud against the Rating Agency Defendants. The following table specifies which ratings were fraudulent, what such ratings were, who issued such ratings, and the date on which the ratings were communicated to the Bank:

845. The ratings were communicated to the Bank by means of a preliminary term sheet, a prospectus supplement, a free writing prospectus, or through Bloomberg.

846. These ratings were material to the Bank's decision to purchase the above-named PLMBS because without the investment-grade ratings that the Rating Agency Defendants gave the PLMBS, the Bank, by policy, could not have purchased the PLMBS.

847. The Bank reasonably relied upon the ratings. As the U.S. District Court for the Southern District of New York recently noted: "[T]he market at large, including sophisticated investors, have come to rely on the accuracy of credit ratings and the independence of rating agencies because of their NRSRO status and, at least in this case, the Rating Agencies' access to non-public information that even sophisticated investors cannot obtain." *Abu Dhabi Commercial Bank v. Morgan Stanley & Co.*, 651 F. Supp. 2d 155, 181 (S.D.N.Y. 2009).

848. By providing ratings, the Rating Agency Defendants represented that they had a basis in fact to provide a rating. As alleged above in paragraphs 645-51, because the Rating Agency Defendants knew that the underwriting standards on which they based their ratings had been abandoned in practice, they knew that they lacked a basis in fact to provide the ratings that they did.

849. Further, the Rating Agency Defendants did not genuinely believe their own ratings. As alleged above in paragraphs 652-74, they knew that their models were inadequate to assess the risk of default of the underlying mortgages, and they knew that the ratings were compromised by conflicts of interest and manipulation. Thus, they did not believe that their

ratings indicated the likelihood that the Bank would receive the payments contemplated under the Certificates.

850. The Rating Agency Defendants also represented that their PLMBS ratings were as reliable as their ratings of other instruments, such as corporate bonds. As alleged above in paragraphs 675-79, however, they knew that this representation was not true.

851. The Rating Agency Defendants had a financial incentive to assign the PLMBS the fraudulent ratings that they assigned. *See supra* ¶¶ 652-60.

852. The Rating Agency Defendants knew that investors such as the Bank could buy only investment-grade-rated PLMBS, and knew that such a rating was a condition precedent to the offering of the PLMBS. Thus the Rating Agency Defendants had reason to expect the Bank to purchase the PLMBS in reliance on their misrepresentations and omissions.

853. By its reliance on, and as a result of, the Rating Agency Defendants' materially misleading misrepresentations and omissions, the Bank suffered damages in an amount to be proved at trial.

854. Those misrepresentations and omissions were the proximate cause of the Bank's injury.

855. The Bank did not and could not reasonably have known of the Rating Agency Defendants' material misstatements and omissions alleged herein earlier than three years before the date of filing this action.

SIXTH CAUSE OF ACTION

Violations of Massachusetts General Law c. 93A by the Rating Agency Defendants

856. The Bank incorporates by reference and realleges each and every allegation in this Complaint as if set forth herein.

857. Under Massachusetts General Laws, Chapter 93A, Section 11, "[a]ny person who engages in the conduct of any trade or commerce and who suffers any loss of money or property, real or personal, as a result of the use or employment by another person who engages in any trade or commerce of an unfair method of competition or an unfair or deceptive act or practice . . . may . . . bring an action in superior court" for relief.

858. In connection with their offer and sale of these securities to the Bank, the Rating Agency Defendants assigned ratings to the PLMBS—ratings that were communicated to the Bank at its office in Boston, Massachusetts. The Rating Agency Defendants that assigned those ratings, the PLMBS to which the ratings were assigned, what the ratings were, and when the ratings were communicated to the Bank are listed above in paragraph 844.

859. For the reasons given above, these ratings lacked a basis in fact and the Rating Agency Defendants did not believe their ratings were reliable. *See supra* ¶¶ 848-51. Accordingly, the ratings were deceptive.

860. The truth about the ratings was not, however, reasonably ascertainable by the Bank.

861. The ratings that the Rating Agency Defendants assigned to the PLMBS were an integral part of the issuance of the PLMBS. Without those ratings, the PLMBS would not have been issued.

862. Further, the Rating Agency Defendants played a role in structuring the PLMBS.

863. Both the Bank and the Rating Agency Defendants were engaged in trade or commerce at the time of the misrepresentations and omissions described above, and the interaction between the parties was commercial in nature, in that the Rating Agency Defendants were rating securities that were being offered for sale, and were assigning those ratings for pay.

864. The Rating Agency Defendants' misrepresentations and omissions reached the Bank, and the Bank was deceived, in Massachusetts.

865. The actions and transactions that constitute the Rating Agency Defendants' deceptive acts occurred primarily and substantially within Massachusetts.

866. The Rating Agency Defendants' unfair and deceptive acts and practices complained of here were willful or knowing, in that those acts and practices constituted fraudulent representations made in knowing disregard of the truth.

867. The Bank did not and could not reasonably have known of the Rating Agency Defendants' material misstatements and omissions alleged herein earlier than four years before the date of filing this action.

868. As a result of the Rating Agency Defendants' deceptive acts, the Bank suffered a loss of money or property in an amount to be proved at trial.

SEVENTH CAUSE OF ACTION

Negligent Misrepresentation by Moody's and S&P

869. The Bank incorporates by reference and realleges each and every allegation in this Complaint as if set forth herein.

870. The Bank alleges negligent misrepresentation against Moody's and S&P with respect to the following PLMBS, which were issued in private-placement deals:

Certificate	Rating by Moody's	Rating by S&P	Date of Communication of the Rating
CCMFC 2006-2A A1	Aaa	AAA	5/19/06
CCMFC 2007-1A A1	Aaa	AAA	3/13/07
CCMFC 2007-2A A1	Aaa	AAA	5/25/07
MARM 2007-R5 A1	Aaa	AAA	9/21/07
TMTS 2007-6ALT A1	Aaa	AAA	6/18/07

871. The ratings that Moody's and S&P assigned these PLMBS were false and misleading for the reasons given above in Sections V.F and VI.D.

872. These ratings were communicated to the Bank.

873. Moody's and S&P assigned these ratings in the course of their business as raters of equity and debt issuances. Moody's and S&P had a pecuniary interest in the ratings.

874. Moody's and S&P knew—and intended—that a limited number of institutional investors like the Bank would rely on their ratings for guidance in deciding whether to purchase the PLMBS at issue in this Seventh Cause of Action.

875. The Bank's reliance on the ratings was reasonable and justifiable. *See supra* ¶¶ 689-95.

876. Moody's and S&P held special expertise in rating PLMBS and had a duty to conduct a reasonable investigation of the truthfulness of their ratings—and of their representations regarding the ratings.

877. Moody's and S&P, however, failed to conduct a reasonable investigation of the truthfulness of their ratings and of their representations regarding the ratings. Moody's and S&P failed to exercise reasonable care in rating the PLMBS at issue in this Seventh Cause of Action.

878. The credit ratings were solicited and paid for by Sponsors, Depositors and/or Underwriters of the PLMBS at issue in this Seventh Cause of Action.

879. The ratings were not offered for free or as part of a report for a general-interest publication.

880. The ratings of the PLMBS at issue in this Seventh Cause of Action were not a matter of public interest or concern.

881. The Bank did not and could not reasonably have known of Moody's or S&P's material misstatements and omissions alleged herein earlier than three years before the date of filing this action.

882. As a result of the Rating Agency Defendants' deceptive acts, the Bank suffered a pecuniary loss.

VIII. PRAYER FOR RELIEF

883. WHEREFORE, the Bank prays for relief as follows:

884. On the first cause of action, for primary violations of the Massachusetts Uniform Securities Act, relief in the form of damages and/or statutory recovery upon tender, plus interest, attorneys' fees, and costs;

885. On the second cause of action, for joint and several liability under the Massachusetts Uniform Securities Act, relief in the form of damages and/or statutory recovery upon tender, plus interest, attorneys' fees, and costs; and

886. On the third cause of action, damages in an amount to be determined at trial;

887. On the fourth cause of action, damages in an amount to be determined at trial, plus attorneys' fees;

888. On the fifth cause of action, damages in an amount to be determined at trial;

889. On the sixth cause of action, three times the amount of damages determined at trial, plus attorneys' fees;

890. On the seventh cause of action, damages in an amount to be determined at trial;

891. Reasonable attorneys' fees and expenses or costs of suit, including expert witness fees; and

892. Such other and further relief as permitted by law or equity or as the Court may deem just.

IX. DEMAND FOR JURY TRIAL

893. The Bank demands a jury trial as to all issues and claims so triable.

Attorneys for Plaintiff Federal Home Loan Bank of Boston

****Pending admission pro hac vice***

GLOSSARY

Adjustable-rate mortgage:	See "ARM."
ARM:	*Adjustable-rate mortgage.* Also called a "variable rate mortgage." A mortgage loan whose interest rate changes periodically over time, rather than being fixed.
AUS:	*Automated Underwriting System.* A computer program that takes the data an employee enters about a prospective borrower, or data the program retrieves itself, and processes that data through an algorithm to determine whether the borrower qualifies for a credit product.
Automated Underwriting System:	See "AUS."
AVM:	*Automated valuation model.* An industry-standard valuation model that reliably calculates the value of real property.
Bank:	The Federal Home Loan Bank of Boston.
Board of Governors of the Federal Reserve System:	See "FRB."
CDO:	*Collateralized debt obligation.* A structured, asset-backed security often composed of portions of mortgage-backed securities.
Certificates:	Synonymous with "PLMBS" (see below).
CLTV:	*Combined loan-to-value ratio.* The ratio of all mortgage loans taken out on a real property to the total appraised value of that property.
Collateralized debt obligation:	See "CDO."
Combined loan-to-value ratio:	See "CLTV."
Corporate seller:	A corporate entity that sold a PLMBS directly to the Bank but that was not an Underwriter for that PLMBS.
Depositor (or	

Depositor/Issuer):	The entity that acquires mortgage loans and securitizes a pool of such loans. Interests in the pool are then issued by the Depositor through a trust in the form of securities.
DTI:	*Debt-to-income*. The ratio of a borrower's debt to his or her income—generally calculated as the ratio of a borrower's monthly debt payments to the borrower's monthly income.
FCIC:	*Financial Crisis Inquiry Commission*. A ten-member federal commission that investigated the causes of the financial crisis and issued a report on the crisis on January 27, 2011.
FDIC:	*Federal Deposit Insurance Corporation*. An independent federal agency that insures deposits at financial institutions, examines and supervises some of those institutions, and shuts down failing institutions.
Federal Deposit Insurance Corporation:	See "FDIC."
FGIC:	*Financial Guaranty Insurance Company*, a private insurer of mortgage-backed securities.
FICO:	A score developed by the Fair Isaac Corporation to assess consumer credit risk; the most widely used credit score in the United States.
FINRA:	*Financial Institutions Regulatory Authority*. A non-governmental, self-regulatory organization that performs financial regulation of member brokerage firms and exchange markets.
Flow of Funds:	Synonymous with "waterfall" (see below).
FRB:	*Board of Governors of the Federal Reserve System*.
GSE:	*Government-sponsored enterprise*. An entity such as the Federal National Mortgage Association (Fannie Mae) or the Federal Home Loan Mortgage Corporation (Freddie Mac).
Individual seller:	An individual who sold a PLMBS directly to the Bank but that was not an Underwriter for that PLMBS.
LTV:	*Loan-to-value*. The ratio of the amount of a mortgage loan to the total appraised value of real property.
Moody's:	Collectively, Moody's Investors Service, Inc. and Moody's Corporation.

Nationally Recognized Statistical Rating Organization:	See "NRSRO."
NINA:	*No income, no assets loan.* A loan whose underwriting requires no proof of income or assets.
NINJA:	*No income, no job or assets loan.* A loan whose underwriting requires no proof of income, employment or assets.
No doc:	A "no document" loan. The borrower is not required to submit proof of income, employment, and assets.
NRSRO:	*Nationally Recognized Statistical Rating Organization.* A special status that the SEC created in 1975 to distinguish the most credible and reliable rating agencies. The status of NRSRO has since been clarified and codified by the Credit Rating Agency Reform Act of 2006.
Office of the Comptroller of the Currency:	See "OCC."
Office of Thrift Supervision:	See "OTS."
OCC:	*Office of the Comptroller of the Currency.* Independent bureau within the U.S. Department of Treasury that charters, regulates and supervises all national banks and certain branches and agencies of foreign banks.
Offering Documents:	Registration statements, prospectuses, supplemental prospectuses, private placement memoranda and other written offering materials—the documents by means of which the securities at issue in this case were sold to the Bank.
Option ARM:	An *adjustable-rate mortgages* (q.v.) that typically permits borrowers to select from among a wide range of monthly payment choices. Because the borrower is allowed to make a monthly payment that is less than the accrued interest, the risk associated with Option ARMs is "negative amortization," in which the unpaid interest is added to the outstanding principal, thus increasing the overall loan balance.
OTS:	*Office of Thrift Supervision.* Independent bureau within the U.S. Department of Treasury that regulates all federally chartered and many state-chartered savings and loans ("thrifts") and their holding companies.

Overcollateralization:	The practice of ensuring that the aggregate principal balance of the mortgage pool that secures the PLMBS exceeds the aggregate principal balances of the PLMBS secured thereby.
PLMBS:	*Private Label Mortgage-Backed Securities*. Securities that are issued by private entities (rather than government-sponsored enterprises), and that entitle the security holder to income payments from pools of mortgage loans. As used in this Complaint, "PLMBS" usually refers to the specific PLMBS at issue in this action—those purchased by the Bank.
Rating Agency Defendants:	The three credit rating agencies that rated the PLMBS at issue in this case.
Reconsideration of Value:	A contractual arrangement that Washington Mutual Bank had with an appraisal management firm, eAppraiseIT. Under the arrangement, Washington Mutual could challenge an independent appraiser's conclusions by requesting a *Reconsideration of Value*—a second opinion from eAppraiseIT—if Washington Mutual disagreed with the appraisal.
S&P:	Collectively, The McGraw-Hill Companies, Inc. and Standard & Poor's Financial Services LLC.
Securities Defendants:	The Sponsors, Depositors/Issuers, Underwriters and individuals who packaged, marketed, offered and/or sold the PLMBS to the Bank.
Sponsor (or Seller):	An entity that originates mortgage loans itself or purchases loans from mortgage originators and then sells its loans to the Depositor.
Tranche:	The securities at issue in this case are divided into segments, or "tranches," with laddered payment priority and varying return potential.
Underwriter:	An entity that purchases the PLMBS from the issuing trust and resells them to investors such as the Bank.
USPAP:	*Uniform Standards of Professional Appraisal Practice*. A series of ethical rules promulgated by the Appraisal Standards Board designed to ensure the integrity of the appraisal process.
Waterfall:	Income from a PLMBS's underlying mortgage pool is allocated first to the most senior tranche, and then to the second-most senior, and so on. This hierarchy in the division of cash flows is called a *waterfall*.

Defendants.

TABLE OF CONTENTS

I. NATURE OF THE ACTION 1

II. JURISDICTION AND VENUE 9

III. THE PARTIES 10

A. Plaintiff 10

B. Defendants 12

C. Successor Liability Allegations Against Certain Defendants 32

1. Successor Defendant Bank of America Corporation 32

2. Successor Defendants American Enterprise Investment Services, Inc. and Ameriprise Financial Services, Inc. 37

3. Successor Defendant The PNC Financial Services Group, Inc. 38

D. Summary Charts of Defendants and Certificates 40

E. The John Doe Defendants 47

IV. FACTUAL BACKGROUND 48

A. Mechanics of Mortgage Backed Securities 48

1. The Securitization Process 48

2. The Rating Process for PLMBS 51

B. The Mortgage Originators Abandoned Underwriting and Appraisal Standards and Engaged in Predatory Lending. 52

1. The Shift from "Originate to Hold" to "Originate to Distribute" Securitization Incentivized Mortgage Originators to Disregard Loan Quality. 52

2. Mortgage Originators Abandoned Underwriting Guidelines in Order to Initiate High Cost Loans for Securitization. 59

3. Mortgage Originators Manipulated Appraisals of Collateralized Real Estate in Order to Initiate High Cost Loans for Securitization. 61

4. Mortgage Originators Engaged in Predatory Lending in Order to Initiate High Cost Loans for Securitization. 67

5. Widespread Delinquencies Reflected the Inevitable Consequence of Loans Issued Without Regard to Meaningful Underwriting. 72

C. Federal and State Investigations, Press Reports, Publicly Available Documents Produced in Other Civil Lawsuits, and Analysis of the Loan Pools Underlying the Certificates Identify Systematic Violation of Underwriting Guidelines, Appraisal Guidelines, and Predatory Lending by Mortgage Originators Whose Loans Back the PLMBS in this Case. 74

1. Countrywide Home Loans, Inc. and Countrywide Home Loans Servicing LP 75

a. Government actions against Countrywide and documents produced therein demonstrate Countrywide s failure to adhere to sound underwriting practices. 76

b. Private actions against Countrywide demonstrate Countrywide s failure to adhere to sound underwriting practices. 87

c. Confidential witnesses provide further evidence of Countrywide s failure to adhere to sound underwriting practices. 94

d. The mortgages originated by Countrywide and securitized in the PLMBS purchased by the Bank provide further evidence of Countrywide s failure to adhere to sound underwriting practices. 99

e. Press reports, government investigations and related litigation, and confidential witnesses demonstrate that Countrywide engaged in predatory lending. 100

f. Confidential witnesses provide further evidence of Countrywide s predatory lending practices. 102

2. New Century Mortgage Corp. 103

a. Government actions and related lawsuits and investigations demonstrate New Century s failure to adhere to sound underwriting practices. 104

b. Confidential witnesses provide further evidence of New Century's failure to adhere to sound underwriting practices. 106

c. The mortgages originated by New Century and securitized in the PLMBS purchased by the Bank provide further evidence of New Century's failure to adhere to sound underwriting practices. 110

d. Confidential witnesses also provide evidence of predatory lending. 111

3. IndyMac Bank, FSB 111

a. Government actions and related lawsuits and investigations demonstrate IndyMac's failure to adhere to sound underwriting practices, applicable appraisal standards, and predatory lending. 112

b. Private actions against IndyMac demonstrate IndyMac's failure to adhere to sound underwriting practices. 116

c. Confidential witnesses provide further evidence of IndyMac's failure to adhere to sound underwriting practices. 119

d. The mortgages originated by IndyMac and securitized in the PLMBS purchased by the Bank provide further evidence of IndyMac's failure to adhere to sound underwriting practices. 122

4. Fremont Investment & Loan 123

a. Government actions and related lawsuits and investigations demonstrate Fremont's failure to adhere to sound underwriting practices and its predatory lending. 123

b. The mortgages originated by Fremont and securitized in the PLMBS purchased by the Bank provide further evidence of Fremont's failure to adhere to sound underwriting practices. 127

5. GMAC and Residential Funding Corp. 128

6. Wells Fargo 132

a. Other investigations and lawsuits and confidential witness testimony demonstrate that Wells Fargo abandoned underwriting guidelines and applicable appraisal standards. 132

b. The mortgages originated by Wells Fargo and securitized in the PLMBS purchased by the Bank provide further evidence of Wells Fargo's failure to adhere to sound underwriting practices. 138

c. Other investigations and lawsuits and confidential witness testimony demonstrate that Wells Fargo engaged in predatory lending. 139

7. Decision One Mortgage Company, LLC 142

8. Ameriquest and Argent 145

9. Downey Savings & Loan 150

10. Option One Mortgage 151

11. First Franklin 155

12. WMC Mortgage Corp. 164

13. OwnIt Mortgage Solutions, Inc. 168

14. First Horizon Home Loan Corporation 169

15. Bank of America, N.A. 171

16. HomeComings Financial Network, Inc. 174

17. Other Mortgage Originators Also Abandoned Sound Underwriting Practices and Engaged in Predatory Lending in Order to Issue Loans for Securitization. 177

D. The Securitization Process Was Plagued by Conflicts of Interest and Misplaced Incentives. 177

1. The Vertical Integration of Many of the Firms Involved in the Issuance of the PLMBS Purchased by the Bank Provided the Defendants with Access to Information Regarding the Abandonment of Underwriting Guidelines, the Manipulation of the Appraisal Process, and Predatory Lending Practices. 178

2. Financial Ties Between the Investment Banks and Non-Bank Lenders Provided the Defendants with Access to Information Regarding the Mortgage Originators' Failure to Adhere to Underwriting Guidelines and Engagement in Predatory Lending Practices. 182

3. Conflicts of Interest Undermined Adequate Due Diligence and Disclosure to Investors. 185

4. Defendants Undermined and Misused Loan Pool Due Diligence Results Prepared by Third-Party Firms. 188

a. The Defendants directed the due diligence process and were provided with detailed reports describing the results of the process. 188

b. The Defendants manipulated and misused due diligence results. 191

c. The Defendants should have known that the sponsors included defective loans in the pools. 194

5. Defendants' Own Due Diligence Identified a High Number of Defective Loans in the Mortgage Pools Backing PLMBS. 196

E. The Vertical Integration of Many of the Firms Involved in the Issuance of the PLMBS Purchased by the Bank Enabled the Controlling Person Defendants to Control the Management and Policies of the Controlled Entities 200

F. The Securitization Process Was Supported by Credit Ratings that Materially Misstated the Credit Risk of the PLMBS. 202

1. The Credit Ratings Were Unreliable, Based As They Were on Underwriting Standards That the Rating Agencies Knew Had Been Abandoned. 203

2. The Credit Ratings Were Compromised by Conflicts of Interest, Manipulation and Misinformation. 204

3. The Credit Ratings Were Unreliable Due to the Use of Inaccurate, Outdated Models and Inadequate Resources. 206

4. The Rating Agencies Knew, and the Defendants Should Have Known, That the PLMBS Ratings in This Case

Fundamentally Differed from the Ratings of Corporate Bonds. 209

5. Subsequent Downgrades Confirm that the Investment Grade Ratings Reported in the Offering Documents Were Unjustifiably High and Misstated the True Credit Risk of the PLMBS Purchased by the Bank. 210

6. The Bank Reasonably Relied on the Credit Ratings Reported in the Prospectuses. 212

G. The Proper Steps Were Not Taken To Ensure That The Mortgages Underlying The Trusts Were Enforceable. 213

1. The PLMBS Have Value Only If the Mortgage Loans and Mortgages Have Been Validly Assigned and Transferred to the Issuing Trust Such That They Are Enforceable 213

2. Failure to Validly Assign and Transfer the Mortgages or Mortgage Loans to the Issuing Trust Has Been Systemic, Thus Materially Affecting the Value of the PLMBS Certificates 215

V. DEFENDANTS' MATERIAL UNTRUE STATEMENTS AND OMISSIONS IN CONNECTION WITH THE SALE OF PLMBS TO FHLBC 218

A. Defendants Misrepresented Underwriting Guidelines Utilized by Mortgage Lenders 219

1. The Materiality of Underwriting Guidelines 219

2. Misstatements Regarding Underwriting Guidelines 219

3. Evidence Demonstrating Misstatements in the Offering Documents Regarding the Originators' Underwriting Practices. 223

a. Government investigations, actions and settlements, confidential witnesses and evidence developed in other private lawsuits demonstrate systematic and pervasive abandonment of stated underwriting practices by the originators. 223

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrates the

abandonment of stated underwriting practices by the originators. 224

B. Defendants Misrepresented the Appraisal Process and Loan-to-Value Ratios ("LTV") That Were Based Upon Those "Appraisals" 228

1. The Materiality of Representations Regarding Appraisals and LTVs 228

2. Misstatements Regarding Appraisals and LTVs 232

a. The Offering Documents falsely state that the LTVs were based upon appraisals 232

b. Misstatements regarding the standards to which the purported "appraisals" conformed 237

c. Misstatements regarding aggregate LTVs 238

3. Evidence Demonstrating Misstatements about Appraisals and LTV Ratios in the Offering Documents 239

a. Government investigations, press reports, and confidential witnesses demonstrate systemic and pervasive appraisal manipulation by the mortgage originators 239

b. Analysis of loans that backed the PMLBS purchased by the Bank demonstrate that appraisals were materially inflated and the LTV ratios were materially understated. 241

C. Defendants Misrepresented the Occupancy Status Rates. 250

1. The Materiality of Occupancy Status Rates 250

2. Evidence Demonstrating Misstatements about the Occupancy Status Rates 251

D. Defendants' Statements Regarding the AAA Rating of the PLMBS Were False and Misleading 253

1. The Materiality of the Credit Rating Process and Ratings 253

2. False Representations That the Certificates the Bank Purchased Would Not Be Issued Unless They Earned AAA Ratings 254

3. Misstatements about the Credit Rating Process and Ratings 254

4. Evidence Demonstrating Misstatements about the Ratings and Ratings Process 256

E. Defendants Misrepresented the Mortgage Originators Compliance with Predatory Lending Restrictions. 259

1. The Materiality of Predatory Lending Practices and the Issuance of Loans that Violate Other State and Federal Lending Statutes 259

2. Misstatements about Predatory Lending Compliance 260

3. Evidence Demonstrating Misstatements about Predatory Lending Practices of the Mortgage Originators 261

a. Government investigations, actions and settlements, confidential witnesses and evidence developed in other private lawsuits demonstrate predatory lending by the mortgage originators. 261

b. Analysis of loans that backed the PLMBS purchased by the Bank demonstrate that loans in the mortgage pools were the result of predatory lending 261

F. Defendants Misrepresented the Due Diligence Performed on the Mortgage Pools that Backed the PLMBS Purchased by the Bank. 262

LOAN-TO-VALUE RATIO DEFINITIONS AS REPRESENTED IN THE OFFERING DOCUMENTS ..... APPX. VII

Plaintiff, FEDERAL HOME LOAN BANK OF CHICAGO (hereinafter the "FHLBC" or the "Bank") alleges the following based upon personal knowledge with regard to its own acts, and upon public information as well as information and belief as to all other matters. The Bank's information and belief is based on, among other things, the investigation by its counsel. The investigation included but was not limited to: (1) review and analysis of the Offering Documents for the certificates that are the subject of this action; (2) interviews with individuals with first hand knowledge of the events alleged herein; (3) examination of relevant SEC filings, press releases and other public statements; (4) review and analysis of pleadings in other civil actions involving certain Defendants; (5) review and analysis of investigations of and complaints filed by state and federal authorities against certain Defendants; (6) published materials, media reports, congressional testimony, and additional related materials; and (7) analysis of the performance and composition of the loan pools underlying the certificates. Many of the facts related to Plaintiff's allegations are known only by the Defendants, or are exclusively within their custody or control. Plaintiff believes that substantial additional evidentiary support for the allegations set forth below will be developed after a reasonable opportunity for discovery.

I. NATURE OF THE ACTION

1. This is an action for rescission and damages under: (a) Illinois State Securities Law, 815 ILCS § 5, *et seq.*; (b) North Carolina State Securities Law, N.C.G.S.A. § 78A-1, *et seq.*; (c) New Jersey Uniform Securities Law, N.J.S.A. § 49:3-47 *et seq.*; and (d) applicable common law.

2. The certificates are "securities" within the meaning of 815 ILCS § 5/2.1, N.C.G.S.A. § 78A-2(11) and N.J.S.A. § 49:3-49(m). Under these statutes, and as set forth in

Counts One through Four below, the Bank is entitled to rescind its purchase of the certificates and/or to be paid damages for its losses on the certificates.

3. The action arises from the sale of over $3.3 billion in Private Label Mortgage Backed Securities ("PLMBS"), a type of Residential Mortgage Backed Security ("RMBS") by the Defendants to the Bank. The Defendants include the depositors/issuers, underwriters/dealers, and certain entities controlling these parties, who offered and sold the PLMBS to the Bank. These Defendants' roles are described in detail below.

4. Accompanying Defendants' sales or offers of these PLMBS to the Bank were registration statements, prospectuses, supplemental prospectuses, and other written offering materials (collectively, "Offering Documents") that Defendants wrote, signed, and/or circulated, and which contained untrue statements of material facts and omitted to state material facts necessary in order to make the Offering Documents not misleading. Attached as Appendix I is a list of the PLMBS certificates purchased by the Bank that are the subject of this Action due to the Defendants' material misstatements in and omissions from the Offering Documents described herein.

5. PLMBS are mortgage pass-through certificate securities entitling the holder to income payments from pools of mortgage loans.[1] The securities are referred to as "private label" because they are issued by private entities instead of the Federal National Mortgage Association ("Fannie Mae") or the Federal Home Loan Mortgage Corporation ("Freddie Mac"), which are U.S. government-sponsored enterprises ("GSEs"). Mortgage securities issued by Fannie Mae and Freddie Mac are referred to as "agency" mortgage securities.

[1] The terms "PLMBS" and "certificate(s)" are used interchangeably herein. Plaintiff identifies the PLMBS certificates herein using the ticker symbols for each certificate as created by Bloomberg.

6. Traditionally, the GSEs provided liquidity for the residential mortgage market by buying loans that conformed to their underwriting standards and dollar limits. In the early 2000s, PLMBS became an increasingly important adjunct to the GSEs, forming a capital market for mortgages that could not be sold to the GSEs. Certain PLMBS were secured by "prime/alt-a" mortgages. These were mortgages that allegedly met the credit score and other underwriting criteria of the GSEs, but were ineligible for GSE purchase either because the mortgages exceeded the applicable GSE dollar limit, were supported by reduced documentation, or contained disqualifying terms, such as certain types of adjustable rates. Other PLMBS were secured by "subprime" mortgages. These were mortgages that did not meet the GSE criteria for creditworthiness of the borrower but purportedly satisfied loan underwriting criteria developed by their originators.

7. Fundamentally, the value of a mortgage pass-through certificate depends on the ability of borrowers to repay the principal and interest on the underlying loans and the adequacy of the collateral the borrowers provide in the event of default. In the event that borrowers fall behind or default, the investor is exposed to loss. For this reason, rigorous and effective loan underwriting by the mortgage originators, performed in accordance with stated underwriting criteria, is of paramount importance; the absence of it – as demonstrated by this case – renders unreliable any credit rating or other attempt to assess the credit risk of the certificates.

8. PLMBS are segmented into "tranches" with laddered payment priority and varying return potential for certificate holders. Interests in each tranche are issued in the form of certificates identified by a CUSIP code unique to that tranche. Mortgage payments are collected by the servicing agent and provided to a trustee, who then distributes payments to the investors who hold the certificates in accordance with the priority scheme among the various tranches.

The most senior tranches enjoy the highest payment priority and lowest risk of default. Thus, if mortgage payments are not made, the losses are allocated first to the most junior tranches and move upward as the junior tranches are wiped out.

9. By policy, and in order to minimize the risk of loss, for the certificates at issue the Bank purchased only the most senior, triple-A rated PLMBS tranches. These tranches were backed by pools of prime/alt-a as well as subprime mortgage loans. Unfortunately, as detailed herein, the Offering Documents contained material misstatements and omitted to disclose material information with respect to the mortgage pools, the creditworthiness of the borrowers, and quality of the collateral. As a result, despite their original AAA ratings and the abundant representations and warranties regarding the underlying mortgage pools, the Bank has incurred massive losses on these securities.

10. In general, each senior tranche of a PLMBS is primarily secured by an interest in a particular pool of mortgages, although other tranches of that PLMBS may be primarily secured by interests in separate pools of mortgages. Often, however, PLMBS trusts provide for cross-collateralization, in which a mortgage pool that is not the primary security for a particular senior tranche may provide additional security for that senior tranche under certain circumstances. As a result, the holders of certificates in a senior tranche may be adversely affected by defaults in mortgages in pools that, while not the primary collateral for the senior tranche, provide additional security for that tranche. In fact, the failure of mortgages in one segment of a collateral pool often results in a ratings downgrade for many, if not all, of the certificates that were part of the offering.

11. Though the securities themselves are complex, the abuses by the Defendants can be put in simple terms. *The Defendants' Offering Documents did not provide truthful, accurate*

and complete information about the loans that comprised the mortgage pools securing the PLMBS. The Bank believed it was buying safe and secure securities with an extremely low risk of default – equivalent, from an investment quality standpoint, to other AAA rated investments – but in fact, the Bank purchased a toxic stew of doomed mortgage loans.

12. It is not happenstance that the PLMBS failed to perform, plunged in value, and were ultimately severely downgraded. To the contrary, the PLMBS purchased by the Bank collapsed because they are not what the Defendants' Offering Documents claimed they were. Contrary to what Offering Documents represented, the PLMBS at issue in this case are simply not pools of loans issued to borrowers based on the application of stated underwriting standards or considerations and the performance of a valid appraisal. The ability of the borrowers to pay was not genuinely taken into account by the mortgage originators for loans that were to be securitized. Instead, the primary motivation was the desire to issue and securitize as many loans as possible in order to receive substantial fees. As a result, exceptions to underwriting standards became the norm, and, contrary to Defendants' representations, were not based on the presence of "compensating circumstances." Likewise, legitimate efforts to appraise the value of homes that served as collateral for the loans in the pools through application of governing appraisal standards were abandoned, and, instead, appraisers provided values that they knew to be inflated. In sum, Defendants packaged and sold these certificates without regard to whether the underlying mortgage pools comported with the detailed descriptions contained in the Offering Documents.

13. The sale of each PLMBS purchased by the Bank was effected through the Offering Documents which include a registration statement, prospectus, prospectus supplement, and other documents that were provided to the Bank in connection with the offer and sale of the

PLMBS that are the subject of this action. The Offering Documents contained extensive statements regarding underwriting guidelines purportedly used by the mortgage originators, and extensive data supporting the credit quality of the mortgage loans. However, the statements and data and the omissions pertaining to them were materially false and misleading. Had the Bank been provided with truthful, complete and accurate information, it would not have purchased the PLMBS, and would not have suffered hundreds of millions of dollars of losses.

14. Defendants untrue statements and omissions of material fact went to the heart of the risk of the mortgage pools underlying the PLMBS. Specifically, Defendants failed to accurately describe key characteristics of the mortgages and the securitization of the mortgages, including, but not limited to:

a. **The Mortgage Originators' Underwriting Guidelines**. The Offering Documents contained material misstatements and omitted to disclose material information regarding the underwriting guidelines purportedly utilized by the mortgage originators. The Defendants represented that the mortgage originators applied their stated underwriting guidelines and standards when issuing loans to borrowers. However, as set forth in more detail below, in pursuit of their goal to securitize as many loans as possible, mortgage originators routinely disregarded their own guidelines and granted exceptions without proper justification. Consequently, the statements in and omissions from the Offering Documents regarding the mortgage originators underwriting guidelines rendered the Offering Documents materially false and misleading.

b. **The Loan-to-Value Ratios of the Mortgage Loans and the Appraisal Standards Used to Determine the Ratios**. The Offering Documents contained material misstatements and omitted to disclose material information regarding the loan-to-value (LTV) ratios of the loans in the mortgage pools underlying PLMBS, and the appraisal standards that were purportedly applied to determine the home values. The LTV ratios were purportedly based on appraisals but in fact were based on valuations of collateral that were inflated as a result of conflicts of interest and inappropriate influence by the mortgage originators who sought to ensure that the valuations came back at a high enough level to support the loan amount. But the severe flaws in the collateral valuation process were not disclosed in the Offering Documents. Consequently, the statements in and omissions from the Offering Documents regarding the LTV ratios, the use of appraisals, and standards applied in conducting the purported appraisals rendered the Offering Documents materially false and misleading.

c. **Primary Residency**. The Offering Documents contained material misstatements and omitted to disclose material information regarding the primary residency status of the mortgage properties – another key characteristic of the risk of the mortgage loans. The Defendants represented that certain specified percentages of the mortgage loan properties were primary residences of the borrower, instead of "second homes" or "investment properties," which carry more risk. However, in truth, the data provided by Defendants overstated the percentage of homes that were primary residences. Consequently, the statements in and omissions from the Offering Documents regarding the occupancy rates of the homes in the mortgage pools rendered the Offering Documents materially false and misleading.

d. **The Ratings Process**. Many of the Offering Documents contained material misstatements and omitted to disclose material information regarding the bases for the bonds' triple-A ratings and the ratings processes. The Defendants represented that the Credit Rating Agencies conducted analysis that was designed to assess the likelihood of delinquency and defaults in the underlying mortgage pools. However, in truth, the Ratings Agencies knew, and the Defendants should have known, that the ratings were based on unreliable data and faulty assumptions—all which caused the ratings to vastly understate the true risk of the PLMBS and overstate their creditworthiness. Consequently, the statements in and omissions from the Offering Documents regarding the PLMBS ratings rendered the Offering Documents materially false and misleading.

e. **Predatory Lending Representations and Warranties**. The Offering Documents contained material misstatements and omitted to disclose material information regarding the mortgage originators' compliance with state and federal predatory lending prohibitions. By policy, the Bank, was not permitted to purchase any mortgage backed securities that were secured by mortgage loans that violated these prohibitions. The Defendants represented that the mortgage pools did not contain any mortgage loans that violated state and federal predatory lending prohibitions. However, in truth, the mortgage originators engaged in predatory lending, and, thus, the mortgage pools contained many loans that violated state and federal predatory lending restrictions. Consequently, the statements in and omissions from the Offering Documents regarding predatory lending rendered the Offering Documents materially false and misleading.

f. **Due Diligence**. Many of the Offering Documents contained material misstatements and omitted to disclose material information regarding the due diligence on the mortgage loans in the PLMBS mortgage pools. The Offering Documents stated that the underlying mortgage loans were inspected for compliance with the mortgage originators' underwriting and appraisal guidelines, and documentation requirements. However, the Offering Documents omit to state that the third-party due diligence firms retained to conduct the due diligence were pressured to ignore deviations from the applicable underwriting criteria, and that

even with regard to loan defects identified through the due diligence process, the sponsors nonetheless waived the defects as to a substantial percentage of these loans and, in many cases, used this information about defective loans to negotiate lower prices for the loan pools. Consequently, the statements in and omissions from the Offering Documents regarding the due diligence performed on the mortgage loans in the PLMBS mortgage pools rendered the Offering Documents materially false and misleading.

g. Enforceability of Mortgages. Many of the Offering Documents contained material misstatements regarding the measures taken to ensure the enforceability of the mortgages and mortgage loans transferred to the trusts. In order for a mortgage to be enforced, basic steps need to be taken to validly assign the mortgage and mortgage loan to the trust and ensure that the trustee has the proper papers. These basic steps, and the representations made about these steps, were critical to investors (including the Bank), because if a mortgage cannot be enforced, then the mortgage loans, and the certificates dependent on these loans, are ultimately worthless. The Offering Documents fail to disclose that in fact basic steps regarding the transfer of mortgages and mortgage loans were not followed mortgage loans were not validly assigned, and papers necessary to ensure enforceability of the mortgages were never transferred to the trustee.

15. The untrue, incomplete and materially misleading statements summarized above and discussed in detail below were made with respect to the certificates purchased by the Bank that are the subject of this lawsuit. The Bank reasonably relied on these statements and was misled by the omissions when deciding to purchase the certificates, and the statements and omissions have caused them significant losses.

16. As a result of these untrue statements in and omissions from the Offering Documents, the Bank purchased certificates that were far riskier than represented by the Defendants, and that were not in truth highest investment grade as stated in the Offering Documents, but, instead, were low-quality, high-risk certificates. All but three of the certificates at issue in this case have been downgraded to below investment grade, *i.e.*, junk, indicating a high probability of default. Furthermore, the Bank has already experienced losses on all certificates in this action, including the three certificates which the Credit Rating Agencies, for whatever reason, have not yet downgraded below investment grade.

17. The value of these certificates has declined dramatically. Moreover, as a result of the current and anticipated future poor performance of the mortgages underlying these certificates, the Bank has had to impair the value of these assets, which has caused the Bank's earnings performance to decline. The Bank has taken significant write-downs on these certificates in the form of "other than temporary impairment" or OTTI charges, on these bonds.

II. JURISDICTION AND VENUE

18. This Court has jurisdiction over the claims alleged in this action.

19. This is an action for rescission and damages in an amount exceeding $30,000.

20. The Illinois Securities Law of 1953, 815 ILCS §§ 5/12 and 5/13 applies because the Bank's claims arise from its transaction of business with Defendants within this State. The offer and sale to the Bank of the Certificates that are the subject of this action, including certain Defendants' making of materially false and misleading statements and omission of material facts alleged herein, took place in Illinois when the Bank, from its offices in Illinois, accepted Defendants' offer to purchase these securities.

21. In addition to the Illinois Securities Law and the applicable common law, the North Carolina Securities Act, N.C.G.S.A. § 78A-1 *et seq.*, also applies to the ten certificates identified in Appendix IA because the offer of sale for these certificates took place in North Carolina in that the offers originated from North Carolina. The acceptance of the offer of sale took place in North Carolina in that the Bank (based in Illinois) communicated its acceptance to a dealer in North Carolina, reasonably believing the dealer to be in North Carolina, and the Bank's acceptance was received in North Carolina.

22. In addition to the Illinois Securities Law and the applicable common law, the New Jersey Uniform Securities Law, N.J.S.A. § 49:3-47 *et seq.*, also applies to Certificate CBASS

2006-CB4 because the offer of sale for this certificate and its acceptance occurred in New Jersey. The offer of sale took place in New Jersey in that the offer originated from New Jersey. Under the New Jersey Uniform Securities Law, the acceptance of the offer of sale took place in New Jersey in that the Bank (based in Illinois) communicated its acceptance to a dealer in New Jersey, reasonably believing the dealer to be in New Jersey, and the Bank's acceptance was received in New Jersey.

23. The Defendants are subject to personal jurisdiction in this State pursuant to the Illinois Long-Arm Statute, 735 ILCS § 5/2-209, because the Bank's claims arise from the transaction of business with Defendants within this State.

24. Venue is proper in this County pursuant to 735 ILCS § 5/2-101 and 815 ILCS § 5/13G(1). The Bank resides and has its principal office in this County, and the transactions that are the subject of this action took place in this County, including certain Defendants' making of materially false and misleading statements and omission of material facts alleged herein.

25. The Bank asserts no claims against any entity that has filed for bankruptcy protection.

III. THE PARTIES

A. Plaintiff

26. Plaintiff is a bank created by the Federal Home Loan Bank Act. The headquarters of the Bank are in the city of Chicago, County of Cook. Under its Organization Certificate, the Bank is to operate in Federal Home Loan Bank District 7, which comprises the states of Illinois and Wisconsin. The Bank does conduct business in each of those states. From time to time, the Bank also conducts business with the other 11 Federal Home Loan Banks. It also operates the Mortgage Partnership Finance Program®, a national mortgage purchase program.

27. The public policy mission of the Federal Home Loan Bank system is to support residential mortgage lending and related community investment. The individual Federal Home Loan Banks fulfill this role in housing finance by providing their member financial institutions with access to reliable, economical funding, technical assistance, and special affordable housing programs so that they can provide affordable housing and economic development in their communities.

28. The Bank's operations are funded solely by its earnings and funds raised by issuing debt instruments (bonds and notes) in the capital markets through the Office of Finance, a joint Federal Home Loan Bank Office located in Virginia.

29. The Bank is capitalized solely by the capital-stock investments of its members and by its retained earnings.

30. The Bank's members are all private financial institutions, including savings banks, savings and loan associations, cooperative banks, credit unions, and insurance companies.

31. The Bank is not a federal agency, and the Bank is not a citizen of any state. The Bank is federally chartered, but privately capitalized and independently managed. The federal government is not involved in the day-to-day management of the Bank's operations. Management of the Bank is vested by law in the Bank's board of directors, all of whom are either elected by the Bank's shareholder members or appointed by the board of directors. No tax dollars are involved in the operation of the Bank, and the federal government does not own any of the Bank's stock.

32. Members of the Bank's board of directors reside in both Wisconsin and Illinois.

33. Employees of the Bank routinely travel to the offices of the Bank's members. In 2009, employees of the Bank made more than 110 business trips to members outside of Illinois.

B. Defendants

34. The Banc of America Entities

A. Depositor Defendant Banc of America Funding Corporation is a Delaware corporation that was and is registered to do business in North Carolina. On information and belief, Banc of America Funding Corporation was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Banc of America Funding Corporation was the depositor for Certificates BAFC 2006-C 2A1, BAFC 2006-E 2A2, BAFC 2006-E 3A1, BAFC 2006-F 2A1, and BAFC 2006-F 3A1.

B. Underwriter Defendant Banc of America Securities LLC was a Delaware limited liability company that maintained a securities broker-dealer FINRA registration in Illinois during the relevant period and that was registered to do business in Illinois. Banc of America Securities LLC also maintained a securities broker-dealer FINRA registration in North Carolina during the relevant period and was registered to do business in North Carolina. Banc of America Securities LLC underwrote the following Certificates that the Bank purchased: ARSI 2005-W5 A2C, BAFC 2006-C 2A1, BAFC 2006-E 2A2, BAFC 2006-E 3A1, BAFC 2006-F 2A1, BAFC 2006-F 3A1, FHASI 2006-AR1 2A1, OOMLT 2005-5 A3, OOMLT 2006-2 2A3, RASC 2005-KS12 A2, SEMT 2006-1 2A1, and SEMT 2006-1 3A1, and sold Certificates BAFC 2006-C 2A1, BAFC 2006-E 2A2, BAFC 2006-E 3A1, BAFC 2006-F 2A1, BAFC 2006-F 3A1, OOMLT 2005-5 A3, OOMLT 2006-2 2A3, RASC 2005-KS12 A2, SEMT 2006-1 2A1, and SEMT 2006-1 3A1 directly to the Bank. Effective November 1, 2010, Banc of America Securities LLC merged with and into Successor Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated, a Delaware corporation. All references herein to Banc of America Securities LLC are also to Merrill Lynch, Pierce, Fenner & Smith Incorporated, which is liable as a matter of law as successor to Banc of

America Securities LLC by virtue of its status as the surviving entity in its merger with Banc of America Securities LLC.

C. Sponsor Defendant Bank of America, National Association is a nationally chartered bank, regulated by the Office of the Comptroller of the Currency, Department of the Treasury that operates branches throughout Illinois and North Carolina. Bank of America, National Association was the sponsor of Certificates BAFC 2006-C 2A1, BAFC 2006-E 2A2, BAFC 2006-E 3A1, BAFC 2006-F 2A1, and BAFC 2006-F 3A1, and also originated loans for the offerings in which the Bank purchased Certificates BAFC 2006-C 2A1, BAFC 2006-E 2A2, and BAFC 2006-E 3A1.

D. Controlling Person Defendant Bank of America Corporation is a Delaware corporation that was and is registered to do business in Illinois. Additionally, Bank of America Corporation was and is registered to do business in North Carolina. Bank of America Corporation is the parent company, with 100% direct or indirect ownership, and a controlling entity of Banc of America Funding Corporation. Bank of America Corporation is also the parent company, with at least 75% indirect ownership, and a controlling entity, under at least North Carolina law, of Banc of America Securities LLC. Bank of America Corporation is also the parent company, with at least 100% indirect ownership, and a controlling entity under at least North Carolina law, of Bank of America, National Association.

E. Defendant Bank of America Corporation is also named as a Successor Defendant to Underwriter Defendant Countrywide Securities Corporation and Controlling Person Defendant Countrywide Financial Corporation. *See infra* § III.C. As set forth below, on or about July 1, 2008, Successor Defendant Bank of America Corporation acquired Countrywide

Financial Corporation and all of its subsidiaries, including Underwriter Defendant Countrywide Securities Corporation.

F. Defendant Bank of America Corporation is also named as a Successor Defendant to Merrill Lynch, Pierce, Fenner & Smith Incorporated and Merrill Lynch Mortgage Investors, Inc. *See infra* § III.C. As set forth below, on or about January 1, 2009, Successor Defendant Bank of America Corporation acquired Merrill Lynch & Co., Inc and all of its subsidiaries, including, including Merrill Lynch, Pierce, Fenner & Smith Incorporated and Merrill Lynch Mortgage Investors, Inc.

35. The Barclays Entities

A. Depositor Defendant Securitized Asset Backed Receivables, LLC is a Delaware Limited Liability Company. On information and belief, Securitized Asset Backed Receivables, LLC was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Securitized Asset Backed Receivables, LLC was the depositor for Certificates SABR 2006-FR3 A2 and SABR 2006-NC3 A2B.

B. Underwriter Defendant Barclays Capital Inc. is a Connecticut corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. Barclays Capital Inc. underwrote the following Certificates: AMSI 2005-R10 A2B, ARSI 2005-W5 A2C, FHLT 2005-E 2A3, SABR 2006-FR3 A2, SABR 2006-NC3 A2B, and WFHET 2006-3 A2, and sold Certificates ARSI 2005-W5 A2C, SABR 2006-FR3 A2, SABR 2006-NC3 A2B, and WFHET 2006-3 A2 directly to the Bank.

36. The Citigroup Entities

A. Depositor Defendant Citigroup Mortgage Loan Trust Inc. is a Delaware corporation. On information and belief, Citigroup Mortgage Loan Trust Inc. was formed and

exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Citigroup Mortgage Loan Trust Inc. was the depositor for Certificates CMLTI 2006-NC1 A2C, CMLTI 2006-WFH2 A2B, CMLTI 2006-WFH4 A3, and CMLTI 2006-NC2 A2B.

B. Underwriter Defendant Citigroup Global Markets Inc. is a New York corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. Citigroup Global Markets Inc. has also, at all relevant times, maintained a securities broker-dealer FINRA registration in North Carolina and was and is registered to do business in North Carolina. Citigroup Global Markets Inc. underwrote the following Certificates: CMLTI 2006-NC1 A2C, CMLTI 2006-WFH2 A2B, CMLTI 2006-WFH4 A3, CMLTI 2006-NC2 A2B, NHELI 2006-WF1 A3, and OOMLT 2005-5 A3, and sold Certificates CMLTI 2006-NC1 A2C, CMLTI 2006-WFH2 A2B, CMLTI 2006-WFH4 A3, CMLTI 2006-NC2 A2B, and FHASI 2006-AR1 2A1 directly to the Bank.

C. Controlling Person Defendant Citigroup Financial Products, Inc. is a Delaware corporation. Citigroup Financial Products, Inc. is the parent company, with 100% direct ownership, and a controlling entity of Citigroup Mortgage Loan Trust Inc. Citigroup Financial Products, Inc. is also the parent company and a controlling entity, under at least North Carolina law, of Citigroup Global Markets Inc. Citigroup Financial Products, Inc., is also the parent company of Citigroup Global Markets Realty Corp. (sponsor of Certificates CMLTI 2006-NC1 A2C, CMLTI 2006-WFH2 A2B, CMLTI 2006-WFH4 A3, and CMLTI 2006-NC2 A2B).

D. Controlling Person Defendant Citigroup Inc. is a Delaware corporation that was and is registered to do business in Illinois. Citigroup Inc. is the parent company, with 100% direct or indirect ownership, and a controlling entity of Citigroup Mortgage Loan Trust Inc., as

well as Citigroup Financial Products, Inc. Citigroup Inc. is also the parent company and a controlling entity, under at least North Carolina law, of Citigroup Global Markets Inc. Citigroup Inc. is also the parent company of Citigroup Global Markets Realty Corp. (sponsor of Certificates CMLTI 2006-NC1 A2C, CMLTI 2006-WFH2 A2B, CMLTI 2006-WFH4 A3, and CMLTI 2006-NC2 A2B).

37. The Countrywide Entities

A. Underwriter Defendant Countrywide Securities Corporation is a California corporation that was registered to do business in Illinois at the time of the transactions at issue. Countrywide Securities Corporation underwrote the Certificates: HVMLT 2006-2 2A1A, HVMLT 2006-2 3A1A, MSAC 2006-HE6 A2C, SEMT 2006-1 2A1, and SEMT 2006-1 3A1.

B. Controlling Person Defendant Countrywide Financial Corporation is a Delaware corporation and is the parent company, with 75% or more indirect ownership, and controlling entity under at least North Carolina law, of Countrywide Securities Corporation. At the time the Bank acquired the relevant Certificates, Countrywide Financial Corporation was a holding company which, through its subsidiaries, was engaged in mortgage lending and other real estate finance-related businesses, including mortgage banking, banking and mortgage warehouse lending, dealing in securities and insurance underwriting.

C. Defendant Bank of America Corporation is named as a Successor Defendant to Countrywide Securities Corporation and Countrywide Financial Corporation. *See infra* § III.C. As set forth below, on or about July 1, 2008, Successor Defendant Bank of America Corporation acquired Countrywide Financial Corporation and all of its subsidiaries, including Underwriter Defendant Countrywide Securities Corporation.

38. Underwriter Defendant Credit Suisse First Boston LLC is a Delaware limited liability company which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. Credit Suisse First Boston LLC underwrote the following two Certificates: FHLT 2005-E 2A3 and INABS 2005-D AII3, and sold Certificate FHLT 2005-E 2A3 directly to the Bank. On January 23, 2006, Credit Suisse First Boston LLC changed its name to Credit Suisse Securities (USA) LLC, effective January 16, 2006. All references herein to Underwriter Credit Suisse First Boston LLC are also to Credit Suisse Securities (USA) LLC.

39. The First Horizon Entities

A. Depositor Defendant First Horizon Asset Securities, Inc. is a Delaware corporation. On information and belief, First Horizon Asset Securities, Inc. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. First Horizon Asset Securities, Inc. was the depositor for Certificate FHASI 2006-AR1 2A1.

B. Controlling Person First Horizon Home Loan Corporation, a Kansas corporation, was the parent company, with 100% direct ownership, and a controlling entity of First Horizon Asset Securities, Inc., as well as sponsor of, and an originator of loans for, the offering in which the Bank purchased Certificate FHASI 2006-AR1 2A1. During 2001, First Horizon Home Loan Corporation merged with and into its parent corporation First Tennessee Bank National Association, a nationally chartered bank, and continues, through its divisions, to do business as divisions of First Tennessee Bank National Association. First Tennessee Bank National Association is therefore named herein as a Controlling Person Defendant, controlling both First Horizon Asset Securities, Inc. and First Horizon Home Loan Corporation.

C. First Tennessee Bank National Association, d/b/a FTN Financial Capital Markets (hereafter "First Tennessee Bank National Association") also underwrote Certificate FHASI 2006-AR1 2A1 and is therefore named as an Underwriter Defendant herein.

40. The GMAC Entities

A. Depositor Defendant Residential Asset Mortgage Products, Inc. is a Delaware corporation. On information and belief, Residential Asset Mortgage Products, Inc. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Residential Asset Mortgage Products, Inc. was the depositor for Certificates GMACM 2006-AR2 2A1 and GMACM 2006-AR2 4A1.

B. Depositor Defendant Residential Asset Securities Corporation is a Delaware corporation. On information and belief, Residential Asset Securities Corporation was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Residential Asset Securities Corporation was the depositor for Certificate RASC 2005-KS12 A2.

C. Depositor Defendant Residential Funding Mortgage Securities I, Inc. is a Delaware corporation. On information and belief, Residential Funding Mortgage Securities I, Inc. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Residential Funding Mortgage Securities I, Inc. was the depositor for Certificate RFMSI 2006-SA2 2A1.

D. Underwriter Defendant Residential Funding Securities Corporation, now known as Residential Funding Securities, LLC and also known at times relevant hereto as GMAC RFC Securities (hereafter together referred to as "Residential Funding Securities Corporation") is a Delaware corporation or limited liability company, respectively. Residential Funding Securities

Corporation underwrote Certificates GMACM 2006-AR2 2A1, GMACM 2006-AR2 4A1, and RASC 2005-KS12 A2, and sold Certificates GMACM 2006-AR2 2A1 and GMACM 2006-AR2 4A1 directly to the Bank.

E. Sponsor and Controlling Person Defendant Residential Funding Corporation, now known as Residential Funding Company, LLC (hereafter, together referred to as "Residential Funding Corporation") is a Delaware corporation that was and is registered to do business in both Illinois and North Carolina. Residential Funding Corporation was the sponsor of Certificates RFMSI 2006-SA2 2A1 and RASC 2005-KS12 A2 and originated loans for the offering in which the Bank acquired Certificate RASC 2005-KS12 A2. Residential Funding Corporation is also the parent company, with at least 100% indirect ownership, and a controlling entity under at least North Carolina law, of Residential Funding Securities Corporation.

F. Controlling Person Defendant GMAC Mortgage Group, Inc., now known as GMAC Mortgage Group LLC (hereafter, together referred to as "GMAC Mortgage Group, Inc."), is a Delaware corporation or limited liability company, respectively, that was and is registered to do business in Illinois. Additionally, GMAC Mortgage Group, Inc. was and is registered to do business in North Carolina. GMAC Mortgage Group, Inc. was the parent corporation, with 100% direct or indirect ownership, and controlling entity of Residential Asset Mortgage Products, Inc., Residential Asset Securities Corporation, and Residential Funding Mortgage Securities I, Inc. GMAC Mortgage Group, Inc. was also the parent corporation of, and a controlling entity under at least North Carolina law of, Residential Funding Corporation and Residential Funding Securities Corporation. GMAC Mortgage Group, Inc. was also the parent corporation of GMAC Mortgage Corporation (an originator of loans for the offering in which the Bank purchased Certificates GMACM 2006-AR2 2A1, GMACM 2006-AR2 4A1, and RFMSI

2006-SA2 2A1 and sponsor of Certificates GMACM 2006-AR2 2A1 and GMACM 2006-AR2 4A1), and HomeComings Financial Network, Inc. (originator of loans for the offering in which the Bank purchased Certificate RFMSI 2006-SA2 2A1).

G. Controlling Person Defendant GMAC Inc., also known at times relevant hereto as GMAC LLC (hereafter, together referred to as "GMAC Inc."), is a Delaware corporation or limited liability company, respectively, that was and is registered to do business in Illinois. Additionally, GMAC Inc. was and is registered to do business in North Carolina. In addition to automobile financing, GMAC Inc. offers mortgage services, including originating, purchasing, selling, and securitizing residential mortgage loans; servicing residential mortgage loans; and providing collateralized lines of credit to other mortgage originators. GMAC Inc. is the parent corporation and controlling entity of Residential Asset Mortgage Products, Inc., Residential Asset Securities Corporation, Residential Funding Mortgage Securities I, Inc., and GMAC Mortgage Group, Inc. GMAC Inc. is also the parent corporation and a controlling entity, under at least North Carolina law, of Residential Funding Corporation and Residential Funding Securities Corporation. GMAC Inc. is also the parent corporation of GMAC Mortgage Corporation (an originator of loans for the offering in which the Bank purchased Certificates GMACM 2006-AR2 2A1, GMACM 2006-AR2 4A1, and RFMSI 2006-SA2 2A1 and sponsor of Certificate GMACM 2006-AR2 2A1 and GMACM 2006-AR2 4A1), and HomeComings Financial Network, Inc. (originator of loans for the offering in which the Bank purchased Certificate RFMSI 2006-SA2 2A1).

H. On May 10, 2010, GMAC Inc. changed its corporate name to Ally Financial Inc. All references herein to GMAC Inc. are also to Ally Financial Inc.

41. The Goldman, Sachs Entities

A. Depositor Defendant GS Mortgage Securities Corp. is a Delaware corporation. On information and belief, GS Mortgage Securities Corp. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. GS Mortgage Securities Corp. was the depositor for Certificates FFML 2006-FF13 A2C and GSAMP 2006-NC2 A2C.

B. Underwriter Defendant Goldman, Sachs & Co. is a New York corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. Goldman, Sachs & Co., underwrote the following three Certificates: FFML 2006-FF13 A2C, GSAMP 2006-NC2 A2C, and RFMSI 2006-SA2 2A1, and sold Certificates FFML 2006-FF13 A2C, GSAMP 2006-NC2 A2C, and RFMSI 2006-SA2 2A1 directly to the Bank.

C. Controlling Person Defendant Goldman Sachs Mortgage Company, a New York limited partnership, was the parent company, with 100% direct ownership, and a controlling entity of GS Mortgage Securities Corp. at the time the Bank purchased the Certificates, as well as the sponsor of Certificates FFML 2006-FF13 A2C and GSAMP 2006-NC2 A2C.

D. Controlling Person Defendant The Goldman Sachs Group Inc. is a Delaware corporation that was and is registered to do business in Illinois. The Goldman Sachs Group Inc. is the parent company, with at least 99% direct or indirect ownership, and a controlling entity of Goldman Sachs Mortgage Company and GS Mortgage Securities Corp. The Goldman Sachs Group Inc. is also the parent corporation of Goldman, Sachs & Co.

42. The Greenwich Entities

A. Depositor Defendant Financial Asset Securities Corp., is a Delaware corporation. On information and belief, Financial Asset Securities Corp. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Financial Asset Securities Corp. was the depositor for Certificate FFML 2006-FF8 IIA3.

B. Depositor Defendant Greenwich Capital Acceptance, Inc. is a Delaware corporation. On information and belief, Greenwich Capital Acceptance, Inc. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Greenwich Capital Acceptance, Inc. was the depositor for Certificates HVMLT 2006-2 2A1A and HVMLT 2006-2 3A1A. Pursuant to its Restated Certificate of Incorporation, dated July 8, 2009, Greenwich Capital Acceptance, Inc. legally changed its name to RBS Acceptance Inc. All references herein to Greenwich Capital Acceptance, Inc. are also to RBS Acceptance Inc.

C. Underwriter Defendant Greenwich Capital Markets, Inc. is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. Greenwich Capital Markets, Inc. has also, at all relevant times, maintained a securities broker-dealer FINRA registration in North Carolina. Greenwich Capital Markets, Inc is a registered broker-dealer engaged in the U.S. government securities market and related capital markets business, and underwrote the following Certificates: AMSI 2005-R10 A2B, ARSI 2005-W5 A2C, FFML 2006-FF8 IIA3, FHLT 2005-E 2A3, HVMLT 2006-2 2A1A, HVMLT 2006-2 3A1A, INABS 2005-D AII3, OOMLT 2005-5 A3, OOMLT 2006-2 2A3, and RASC 2005-KS12 A2, and sold Certificates FFML 2006-FF8 IIA3, HVMLT 2006-2 2A1A, and HVMLT 2006-2 3A1A directly

to the Bank. Pursuant to its Restated Certificate of Incorporation, dated April 1, 2009, Greenwich Capital Markets, Inc. legally changed its name to RBS Securities Inc. All references herein to Greenwich Capital Markets, Inc. are also to RBS Securities Inc.

D. Controlling Person Defendant Greenwich Capital Holdings, Inc., a Delaware corporation, is the parent company, with 100% direct or indirect ownership, and a controlling entity of Financial Asset Securities Corp. and Greenwich Capital Acceptance, Inc. Greenwich Capital Holdings, Inc. is also the parent company, with 100% direct ownership, and a controlling entity, under at least North Carolina law, of Greenwich Capital Markets, Inc. Greenwich Capital Holdings, Inc., is also the parent company, with 100% direct ownership, of Greenwich Capital Financial Products, Inc. (sponsor of Certificates FFML 2006-FF8 IIA3, HVMLT 2006-2 2A1A, and HVMLT 2006-2 3A1A; now known as RBS Financial Products, Inc.). Greenwich Capital Holdings, Inc. legally changed its name to RBS Holdings USA Inc. All references herein to Greenwich Capital Holdings, Inc. are also to RBS Holdings USA Inc.

43. The H&R Block Companies

A. Depositor Defendant Option One Mortgage Acceptance Corporation is a Delaware corporation. On or about July 24, 2008, Option One Mortgage Acceptance Corporation legally changed its name to Sand Canyon Acceptance Corporation. All references herein to Option One Mortgage Acceptance Corporation are also to Sand Canyon Acceptance Corporation. On information and belief, Option One Mortgage Acceptance Corporation was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Option One Mortgage Acceptance Corporation was the depositor for Certificates OOMLT 2005-5 A3 and OOMLT 2006-2 2A3.

B. Underwriter Defendant H&R Block Financial Advisors, Inc. was a Michigan corporation that was registered to do business in Illinois at the time of the transactions at issue. Additionally, H&R Block Financial Advisors, Inc. was registered to do business in North Carolina at the time of the transactions at issue. H&R Block Financial Advisors, Inc. underwrote Certificates OOMLT 2005-5 A3 and OOMLT 2006-2 2A3. H&R Block Financial Advisors, Inc. was acquired by Ameriprise Financial, Inc. during 2008 as a wholly-owned subsidiary. That same year, H&R Block Financial Advisors, Inc. legally changed its name to Ameriprise Advisor Services, Inc. Thereafter, in October 2009, portions of Ameriprise Advisor Services, Inc. were combined with Ameriprise Financial, Inc.'s subsidiaries Successor Defendant American Enterprise Investment Services, Inc., a Minnesota corporation that, at all relevant times, has maintained securities broker-dealer FINRA registrations in both Illinois and North Carolina, and Successor Defendant Ameriprise Financial Services, Inc., a Delaware corporation that, at all relevant times, has maintained securities broker-dealer FINRA registration in both Illinois and North Carolina and was and is registered to do business in both Illinois and North Carolina, which are jointly liable as successors in interest to Ameriprise Advisor Services, Inc. (f/k/a H&R Block Financial Advisors, Inc.). All references herein to H&R Block Financial Advisors, Inc. are also to Ameriprise Advisor Services, Inc., American Enterprise Investment Services, Inc. and Ameriprise Financial Services, Inc.

C. Sponsor and Controlling Person Defendant Option One Mortgage Corporation is a California corporation that was and is registered to do business in Illinois. Additionally, Option One Mortgage Corporation was registered to do business in North Carolina at the time of the transactions at issue. Option One Mortgage Corporation is the parent corporation, 100% direct or indirect owner, and controlling entity of Option One Mortgage Acceptance Corporation.

Option One Mortgage Corporation was also the sponsor of Certificates OOMLT 2005-5 A3 and OOMLT 2006-2 2A3 and an originator of loans for the offerings in which the Bank purchased Certificates OOMLT 2005-5 A3 and OOMLT 2006-2 2A3. During 2008, Option One Mortgage Corporation legally changed its name to Sand Canyon Corporation. All references herein to Option One Mortgage Corporation are also to Sand Canyon Corporation.

D. Controlling Person Defendant H&R Block, Inc. is a Missouri corporation that was and is registered to do business in Illinois. Additionally, H&R Block, Inc. operates branches throughout North Carolina. H&R Block, Inc., through its subsidiaries, provides tax, retail banking, accounting, and business consulting services and products. H&R Block, Inc. is the parent corporation, with 100% direct or indirect ownership, and controlling entity of Option One Mortgage Corporation and Option One Mortgage Acceptance Corp. At the time the Bank purchased the relevant securities, H&R Block, Inc. was also the parent and a controlling entity, under at least North Carolina law, of H&R Block Financial Advisors, Inc.

44. Underwriter Defendant HSBC Securities (USA) Inc. is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. HSBC Securities (USA) Inc. has also, at all relevant times, maintained a securities broker-dealer FINRA registration in North Carolina and was and is registered to do business in North Carolina. Incorporated.

49. The National City Entities

A. At all relevant times, Underwriter Defendant NatCity Investments, Inc. was an Indiana corporation. NatCity Investments, Inc. underwrote the following five certificates: FFML 2006-FF13 A2C, FFML 2006-FF12 A3, FFML 2006-FF12 A4, FFML 2006-FF14 A5, and FFML 2006-FF10 A7. On November 7, 2009, NatCity Investments, Inc. merged with and into Successor Defendant PNC Investments LLC, a Delaware limited liability company which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois. All references herein to NatCity Investments, Inc. are also to PNC Investments LLC, which is liable as the successor in interest to NatCity Investments, Inc.

B. National City Capital Markets was a trade name under which corporate and investment banking services of National City Corporation, a Delaware corporation, operated. National City Capital Markets was not a separate legal entity from National City Corporation. National City Capital Markets underwrote Certificate FFML 2006-FF8 IIA3. National City Corporation was also the parent corporation of NatCity Investments Inc.

C. Defendant PNC Financial Services Group, Inc., a Pennsylvania corporation that was and is registered to do business in Illinois, is named as a Successor Defendant to National City Corporation, including National City Corporation d/b/a National City Capital Markets, and those that National City Corporation controlled, including Underwriter Defendant NatCity Investments, Inc. *See infra* § III.C. Defendant PNC Financial Services Group, Inc. is a

Pennsylvania corporation that was and is registered to do business in Illinois. As set forth below, pursuant to an Agreement and Plan of Merger dated October 24, 2008, on or about December 31, 2008, National City Corporation and all of its subsidiaries, including NatCity Investments, Inc., merged with and into Successor Defendant The PNC Financial Services Group, Inc.

50. The Nomura Entities

A. Depositor Defendant Nomura Home Equity Loan, Inc. is a Delaware corporation. On information and belief, Nomura Home Equity Loan, Inc. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Nomura Home Equity Loan, Inc. was the depositor for Certificate NHELI 2006-WF1 A3.

B. Underwriter Defendant Nomura Securities International, Inc. is a Delaware corporation which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. Nomura Securities International, Inc. underwrote and sold Certificate NHELI 2006-WF1 A3 directly to the Bank.

C. Controlling Person Defendant Nomura Holding America, Inc., a Delaware corporation, is the parent company, with 100% direct ownership, and controlling entity of Nomura Home Equity Loan, Inc. Nomura Holding America, Inc. is also the parent corporation of Nomura Securities International, Inc., and Nomura Credit & Capital, Inc. (sponsor of Certificate NHELI 2006-WF1 A3).

51. The Sequoia Entities

A. Depositor Defendant Sequoia Residential Funding, Inc. is a Delaware corporation. On information and belief, Sequoia Residential Funding, Inc. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Sequoia

Residential Funding, Inc. was the depositor for Certificates SEMT 2006-1 2A1 and SEMT 2006-1 3A1.

B. Sponsor Defendant RWT Holdings, Inc. is a Delaware Corporation. RWT Holdings, Inc. was the sponsor for the offerings in which the Bank acquired Certificates SEMT 2006-1 2A1 and SEMT 2006-1 3A1.

C. Controlling Person Defendant Redwood Trust, Inc., a Maryland corporation, is the parent company, with 100% indirect ownership, and a controlling entity of Sequoia Residential Funding, Inc. Defendant Redwood Trust, Inc. is also the parent company, with 100% indirect ownership, and a controlling entity under at least North Carolina law of RWT Holdings, Inc.

52. The UBS Entities

A. Depositor Defendant Mortgage Asset Securitization Transactions, Inc. is a Delaware corporation. On information and belief, Mortgage Asset Securitization Transactions, Inc. was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Mortgage Asset Securitization Transactions, Inc. was the depositor for Certificate MABS 2006-NC1 A3.

B. Underwriter Defendant UBS Securities LLC is a Connecticut limited liability company which, at all relevant times, has maintained a securities broker-dealer FINRA registration in Illinois and was and is registered to do business in Illinois. UBS Securities LLC underwrote the following four Certificates: FHLT 2005-E 2A3, INABS 2005-D AII3, MABS 2006-NC1 A3, and SARM 2005-21 3A1, and sold INABS 2005-D AII3, MABS 2006-NC1 A3, and SARM 2005-21 3A1 directly to the Bank.

C. Controlling Person Defendant UBS Americas Inc. is a Delaware corporation that was and is registered to do business in Illinois. UBS Americas Inc. is the parent company, with 100% direct ownership, and controlling entity of Mortgage Asset Securitization Transactions, Inc. UBS Americas Inc. is also the parent of UBS Real Estate Securities Inc. (sponsor of Certificate MABS 2006-NC1 A3) and the parent company (owner of the preferred members interest) of UBS Securities LLC.

53. The Wells Fargo Entities

A. Depositor Defendant Wells Fargo Asset Securities Corporation is a Delaware corporation. On information and belief, Wells Fargo Asset Securities Corporation was formed and exists solely for the purpose of receiving and depositing loans into trusts for PLMBS securitization. Wells Fargo Asset Securities Corp. was the depositor for Certificates WFHET 2006-3 A2 and WFMBS 2006-AR3 A4.

B. Controlling Person Defendant Wells Fargo Bank, National Association, a nationally chartered bank that was and is registered to do business in Illinois, is the parent corporation and controlling entity of Wells Fargo Asset Securities Corporation. Wells Fargo Bank, National Association was also the sponsor of Certificates WFHET 2006-3 A2 and WFMBS 2006-AR3 A4 and an originator of loans for the offering in which the Bank purchased Certificates BAFC 2006-F 2A1, BAFC 2006-F 3A1, CMLTI 2006-WFH2 A2B, CMLTI 2006-WFH4 A3, NHELI 2006-WF1 A3, WFHET 2006-3 A2, and WFMBS 2006-AR3 A4.

C. Controlling Person Defendant Wells Fargo & Company, a Delaware corporation that was and is registered to do business in Illinois, is the parent corporation, with 100% direct or indirect ownership, and controlling entity of Wells Fargo Asset Securities Corporation and Wells Fargo Bank, National Association. Wells Fargo & Company is a financial services company that

provides retail, commercial and corporate banking services. It has banking stores located in 39 states and the District of Columbia. Wells Fargo & Company provides additional financial services through subsidiaries that are engaged in various businesses, including: wholesale banking, mortgage banking, consumer finance, commercial finance, securities brokerage and investment banking, and mortgage-backed securities servicing.

C. Successor Liability Allegations Against Certain Defendants

1. Successor Defendant Bank of America Corporation

54. On July 1, 2008, Successor Defendant Bank of America Corporation acquired Countrywide Financial Corporation and those it controlled, including Countrywide Securities Corporation, through an all-stock merger. In this transaction, Countrywide Financial Corporation merged with and into Bank of America Corporation, which acquired substantially all Countrywide Financial Corporation assets and responsibility for all pre-merger liabilities. As consideration for the merger, Countrywide Financial s shareholders received stock in Bank of America. *See* Agreement and Plan of Merger, dated as of January 11, 2008, by and among Countrywide Financial Corporation (the Company), Bank of America Corporation, and Red Oak Merger Corporation.

55. At the time of the transaction, Bank of America announced that it intended to combine Countrywide s operations with its own and re-brand those combined operations with the Bank of America name. Bank of America further announced that Barbara Desoer would run the combined mortgage and consumer real estate operations from Calabasas, California, where Countrywide Financial had its headquarters, and that Countrywide Financial s incumbent president, David Sambol, would remain for at least some time to work on the transition.

56. On October 16, 2008, Bank of America announced that Countrywide Financial would no longer publicly report its own financial results and that Bank of America was transferring "substantially all of the assets and operations of Countrywide Financial Corporation and Countrywide Home Loans, Inc. to other subsidiaries of Bank of America."

57. On November 10, 2008, Bank of America publicly filed an 8-K announcing the integration of Countrywide Financial (and it subsidiaries) with Bank of America's other businesses and operations. That filing once again disclosed that Bank of America had transferred substantially all of Countrywide Financial's assets to Bank of America.

58. On April 27, 2009, Bank of America announced that it was retiring the Countrywide name and that the combined operations of Countrywide and Bank of America would do business as Bank of America Home Loans. Many former Countrywide locations, employees, assets, and business operations now continue under the Bank of America Home Loans name. Upon information and belief, Bank of America Home Loans is a brand name that Bank of America now uses for the Countrywide Financial mortgage origination and securitization operations that Bank of America has absorbed and consolidated with its own operations. The Form 10-K that Bank of America filed on February 26, 2010 lists both Underwriter Defendant Countrywide Securities and its direct parent corporation Countrywide Capital Markets, LLC as Bank of America subsidiaries.

59. Bank of America entered into this transaction with full knowledge that it was assuming substantial Countrywide liabilities. In a February 22, 2008 interview, Bank of America spokesman Scott Silvestri told Corporate Counsel that Bank of America had not overlooked Countrywide's legal expenses and liabilities when it decided to merge with Countrywide:

> Handling all this litigation won't be cheap, even for Bank of America, the soon-to-be largest mortgage lender in the country. Nevertheless, the banking giant says that Countrywide's legal expenses were not overlooked during negotiations. "We bought the company and all of its assets and liabilities," spokesman Scott Silvestri says. "We are aware of the claims and potential claims against the company and have factored these into the purchase."

60. A January 23, 2008 *New York Times* article similarly quotes former Bank of America Chairman and CEO Kenneth D. Lewis acknowledging that Bank of America had thought long and hard about acquiring Countrywide's liabilities:

> We did extensive due diligence. We had 60 people inside the company for almost a month. It was the most extensive due diligence we have ever done. So we feel comfortable with the valuation. We looked at every aspect of the deal, from their assets to potential lawsuits and we think we have a price that is a good price.

61. On November 16, 2010, Bank of America's Chief Executive Officer, Brian Moynihan, publicly admitted that Bank of America had accepted liability for investors' claims concerning Countrywide's mortgage-backed securities: "There's a lot of people out there with a lot of thoughts about how we should solve this [investor demands for refunds over faulty mortgages], but at the end of the day, we'll pay for the things that Countrywide did."

62. And in a December 12, 2010 *New York Times* profile, Moynihan again publicly admitted that Bank of America would be responsible for Countrywide's liabilities:

> <u>But what about Countrywide?</u>
>
> "A decision was made; I wasn't running the company," Mr. Moynihan says, although he was obviously a top bank official at the time. "Our company bought it and we'll stand up; we'll clean it up."

63. Bank of America's securities filings echo this position. In addition to significantly increased revenues due to Countrywide's contributions, Bank of America has reported its

payment on claims for defective legacy Countrywide mortgages and announced a $4.4 billion reserve fund to pay for similar claims in the future.

64. In October 2008, Bank of America agreed to pay $8.4 billion to settle predatory lending lawsuits that various state Attorneys General had filed against Countrywide. Although Countrywide originated the mortgages and was alleged to have committed the misconduct in question long before Bank of America's acquisition, Bank of America assumed financial responsibility for the settlement.

65. On January 3, 2011, Bank of America similarly announced that it had agreed to pay $2.8 billion to settle claims to repurchase mortgage loans that Fannie Mae and Freddie Mac had purchased from Countrywide Financial or its subsidiaries. In its press releases and presentation concerning the settlement, Bank of America admitted that it was paying to resolve claims concerning "alleged breaches of selling representations and warranties related to loans sold by legacy Countrywide."

66. Bank of America has completed a de facto merger with Controlling Person Defendant Countrywide Financial Corporation and its subsidiaries, including Underwriter Defendant Countrywide Securities, by absorbing Countrywide Financial and those entities controlled by it into Bank of America's own operations. Bank of America Corporation is the successor in liability to Countrywide Financial Corporation and Countrywide Securities Corporation, and is jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants alleged herein, including the liability with respect to the Certificates at issue in this case. Accordingly, the Bank seeks to recover any damages it recovers against Countrywide Financial Corporation and Countrywide Securities Corporation from Bank of America.

67. On January 1, 2009, Successor Defendant Bank of America Corporation, through a wholly owned subsidiary formed solely for the purpose of the merger, acquired Merrill Lynch & Co., Inc. and those it controlled, including Merrill Lynch, Pierce, Fenner & Smith Incorporated and Merrill Lynch Mortgage Investors, Inc., through an all-stock merger. In this transaction, Merrill Lynch & Co., Inc. merged with and into Bank of America Corporation, and Bank of America Corporation acquired substantially all Merrill Lynch & Co., Inc. assets and responsibility for all pre-merger liabilities. *See* Agreement and Plan of Merger by and between Merrill Lynch & Co., Inc. and Bank of America Corporation dated as of September 15, 2008; *see also* Bank of America Proxy Statement, Schedule 14A (describing the terms of the "strategic business combination"). The merger was intended to qualify as a "reorganization" within the meaning of Section 368(a) of the Internal Revenue Code of 1986.

68. Bank of America has completed a de facto merger with Merrill Lynch & Co., Inc. and its subsidiaries, including Underwriter Defendant Merrill Lynch, Pierce, Fenner & Smith Incorporated and Depositor Defendant Merrill Lynch Mortgage Investors, Inc. by absorbing Merrill Lynch & Co., Inc. and those entities controlled by it into Bank of America's own operations. Bank of America Corporation is the successor in liability to Merrill Lynch, Pierce, Fenner & Smith Incorporated and Merrill Lynch Mortgage Investors, Inc., and is jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants alleged herein, including the liability with respect to the Certificates at issue in this case. Accordingly, the Bank seeks to recover any damages it recovers against Merrill Lynch, Pierce, Fenner & Smith Incorporated and Merrill Lynch Mortgage Investors, Inc. from Bank of America.

2. Successor Defendants American Enterprise Investment Services, Inc. and Ameriprise Financial Services, Inc.

69. Defendants American Enterprise Investment Services, Inc. and Ameriprise Financial Services, Inc., also referred to herein as "Successor Defendants," are liable as the successors in liability to H&R Block Financial Advisors, Inc., as set forth below.

70. On August 12, 2008, H&R Block, Inc. entered into a Stock Purchase Agreement with Ameriprise Financial, Inc., to sell all of the outstanding shares of capital stock of HRB Financial Corporation, which included ownership of HRB Financial Corporation subsidiary H&R Block Financial Advisors, Inc., to Ameriprise Financial, Inc., a Michigan corporation. The sale was completed and became effective November 1, 2008.

71. According to a Form 8-K filed with the SEC by H&R Block, Inc., on November 6, 2008, H&R Block, Inc.:

> completed the sale of all the outstanding shares of capital stock of HRB Financial Corporation ("HRB Financial") to Ameriprise Financial, Inc. pursuant to a Stock Purchase Agreement dated August 12, 2008. HRB Financial owns H&R Block Financial Advisors, Inc., the Company's former securities brokerage business. Pursuant to the terms of the sale, Block Financial received sales proceeds of approximately $312 million in cash and repayment of approximately $48 million in intercompany liabilities, subject to post-closing adjustments.

72. By virtue of this agreement, HRB Financial Corporation, including subsidiary H&R Block Financial Advisors, Inc. merged into Ameriprise Financial, Inc. and HRB Financial Corporation and H&R Block Financial Advisors, Inc. were wholly owned subsidiaries of Ameriprise Financial, Inc. H&R Block Financial Advisors, Inc. thereafter did business as Ameriprise Advisor Services, Inc. As noted in Section III.B, above, in October 2009, portions of Ameriprise Advisor Services, Inc. were combined with Ameriprise Financial, Inc.'s subsidiaries Successor Defendants American Enterprise Investment Services, Inc. and Ameriprise Financial Services, Inc., which are jointly liable as successors in interest to Ameriprise Advisor Services,

Inc. (f/k/a H&R Block Financial Advisors, Inc.). Ameriprise Advisor Services, Inc. filed a certificate of dissolution with the Michigan Department of Energy, Labor & Economic Growth on January 5, 2011, and withdrew its active status from the Illinois Secretary of State on January 7, 2011.

73. American Enterprise Investment Services, Inc. and Ameriprise Financial Services, Inc., are the successors in liability to H&R Block Financial Advisors, Inc., including with respect to activities alleged herein involving H&R Block Financial Advisors, Inc., and are jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants alleged herein, including the liability with respect to the Certificates at issue in this case. American Enterprise Investment Services, Inc. and Ameriprise Financial Services, Inc. are named as a successors-in-interest to H&R Block Financial Advisors, Inc.

3. Successor Defendant The PNC Financial Services Group, Inc.

74. Defendant PNC Financial Services Group, Inc., is liable as the successor in liability to National City Corporation, as set forth below.

75. Pursuant to an Agreement and Plan of Merger dated October 24, 2008, on or about December 31, 2008, National City Corporation and its subsidiaries, including National City Capital Markets and NatCity Investments, Inc., merged with and into The PNC Financial Services Group, Inc., (also referred to herein as □PNC□) a Pennsylvania corporation with its principal executive offices located at One PNC Plaza, 249 Fifth Avenue, Pittsburgh, Pennsylvania.

76. Under the terms of the agreement, PNC acquired all outstanding shares of common stock in a stock-for-stock merger transaction. PNC also advised its shareholders and the public that □PNC [was] to acquire 100% of National City resulting in 5th largest U.S. deposit

franchise. *See* The PNC Financial Services Group, Inc. Form 8-K, dated October 24, 2008, and exhibits thereto. The PNC Financial Services Group, Inc., thus acquired National City Corporation's assets, responsibilities, and liabilities, including those relating to the Certificates at issue in this case.

77. The merger also resulted in combined company leadership. For example, upon closing, the chairman, president and chief executive officer of National City Corporation was to be appointed as a PNC Financial Services Group, Inc. vice chairman, and one National City Corporation director was to "join the board of the combined company." *Id.* To its shareholders and the public, the PNC Financial Services Group, Inc. also touted the synergies to be obtained from the transaction, estimated at $1.2 billion in annual expense reduction, and its success in integrating National City Corporation's balance sheets into its business model. *Id.* The PNC Financial Services Group, Inc. Chairman and chief executive officer stated that "[w]e believe this strategic combination will continue PNC's efforts to build capital strength and shareholder value." *Id.*

78. The merger became effective December 31, 2008. National City Corporation ceased filing its own financial statements in 2008. The merger was intended to qualify, and on information and belief, qualified as a "reorganization" within the meaning of Section 368(a) of the Internal Revenue Code of 1986, and its assets and liabilities are now set forth in the financial statements of The PNC Financial Services Group, Inc.

79. As the successor to National City Corporation, PNC Financial Services Group, Inc. assumed the obligations of National City's outstanding securities. The transaction included the integration of National City Corporation's business and operations (including those of its divisions and subsidiaries, including National City Capital Markets, which now does business as

the PNC Financial Services Group, Inc.), which includes the assets, responsibilities, and liabilities with respect to the Certificates at issue in this case. Therefore, The PNC Financial Services Group, Inc. is the successor in liability to National City Corporation, and is jointly and severally or otherwise vicariously liable for the misstatements, omissions, and other wrongful conduct of these Defendants alleged herein, including the liability with respect to the Certificates at issue in this case. PNC Financial Services Group Inc. is named as a successor-in-interest to National City Corporation, including with respect to activities alleged herein involving National City Corporation, NatCity Investments, Inc., and National City Capital Markets.

D. Summary Charts of Defendants and Certificates

80. In sum, the "**Depositor/Issuer Defendants**," listed below, received or purchased and transferred or sold pools of assets to the issuing trusts identified below, and securitized in the bonds listed below, and were the "issuers" of the securities:[2]

Depositor/Issuer Defendants	Issuing Trust	Securities
Banc of America Funding Corporation	Banc of America Funding 2006-C Trust	BAFC 2006-C 2A1

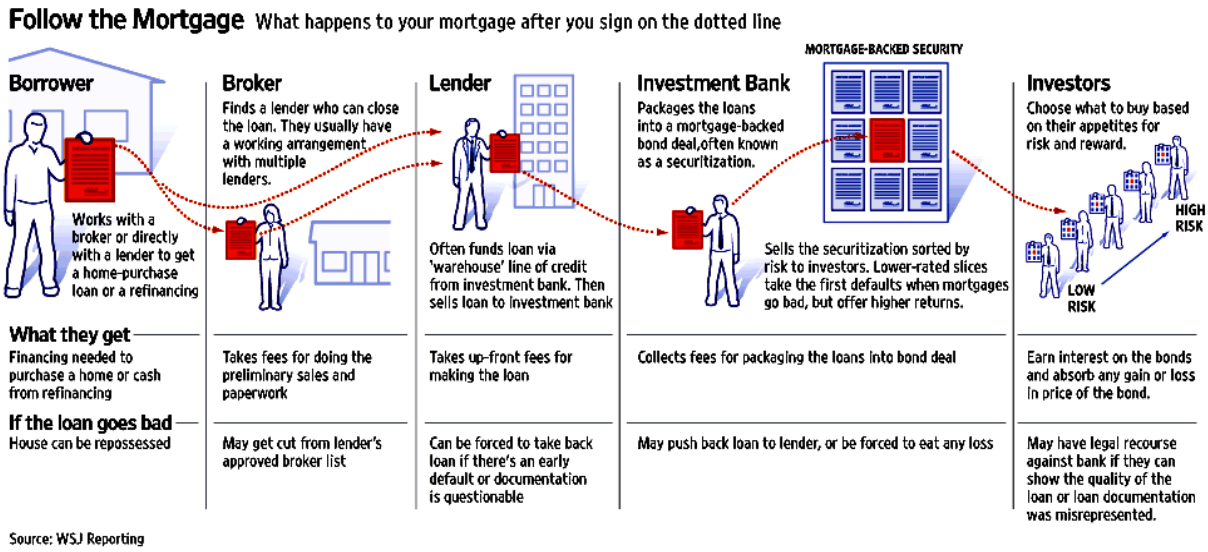
E. The John Doe Defendants

84. Defendants John Doe 1-50 are other Depositor/Issuers, Underwriters, Controlling Persons, Successor Liability Defendants, and/or others who are jointly and severally or otherwise liable for the misstatements, omissions, and other wrongful conduct alleged herein, including the liability with respect to the Certificates at issue in this case. The John Doe Defendants may include persons or entities that are not named as Defendants at this time because Plaintiff has insufficient information as to the extent, if any, of their involvement in and liability for the matters alleged herein. Plaintiff will amend this Complaint to allege the true names and capacities of these Defendants when ascertained.



IV. FACTUAL BACKGROUND

A. Mechanics of Mortgage Backed Securities

1. The Securitization Process

85. The PLMBS purchased by the Bank were created in a process known as "mortgage securitization." Mortgage securitization is a process by which mortgage loans are acquired from "mortgage originators," pooled together, and certificates constituting interests in the cash flow from the mortgage pools are then sold to investors. The certificates are referred to as "mortgage pass-through certificates" because the cash flow from the pool of mortgages is "passed through" to the securities holders when payments are made by the underlying mortgage borrowers.

86. The following graphic illustrates the securitization process:

87. Securitization involves several entities who perform distinct tasks, though, as was the case here, many or all of the entities in a securitization may be subsidiaries or affiliates of a single parent or holding company. The first step in creating a mortgage pass-through security such as the PLMBS purchased by the Bank is the acquisition by the "**depositor**" (referred to

herein as "depositor" or "depositor/issuer") of an inventory of loans from a "**sponsor**" or "**seller**" which either originates the loans or acquires the loans from other mortgage originators in exchange for cash. The depositor/issuer is often a subsidiary or other affiliate of the sponsor.

88. The depositor then securitizes the pool of loans by forming one or more mortgage pools with the inventory of loans, and creating tranches of interests in the mortgage pools with various levels of seniority. Interests in these tranches are then issued by the depositor (who then serves as the "**issuer**") through a trust in the form of bonds or certificates.

89. Each tranche has a different level of purported risk and reward, and, often, a different rating. The most senior tranches often receive the highest investment grade rating, triple-A. Junior tranches, which usually have lower ratings, are more exposed to risk, but offer higher potential returns. The most senior tranches of certificates are entitled to payment in full before the junior tranches. Conversely, losses on the underlying loans in the asset pool – whether due to default, delinquency, or otherwise – are allocated first to the most subordinate or junior tranche of certificates, then to the tranche above that. This hierarchy in the division of cash flows is referred to as the "**flow of funds**" or "**waterfall**."

90. The depositor/issuer works with one or more of the nationally recognized credit rating agencies – Fitch Ratings, Standard & Poor's Rating Services (S&P), and Moody's Investor Services, Inc. (collectively, the "Credit Rating Agencies" or "Rating Agencies") – to ensure that each tranche of the mortgage pass-through certificate receives the rating desired by the depositor/issuer (and underwriter). For PLMBS, this meant a triple-A rating for the senior tranche, and lower ratings for the subordinated tranches Once the asset pool is securitized, the certificates are issued to one or more "**underwriters**" (typically Wall Street banks or other large financial institutions), who resell them to investors, such as the Bank.

91. Because the cash flow from the loans in the mortgage pool of a securitization is the source of funds to pay the holders of the certificates issued by the trust, the credit quality of the certificates depends largely on the credit quality of the loans in the mortgage pool. The collateral pool for PLMBS often includes thousands of loans. Detailed information about the credit quality of the loans is contained in the "loan files" developed and maintained by the mortgage originators when making the loans. For residential mortgage loans, such as the loans that backed the PLMBS purchased by the Bank, each loan file normally contains documents including the borrower's application for the loan, verification of income, assets, and employment, references, credit reports, an appraisal of the property that will secure the loan and provide the basis for other measures of credit quality, such as loan-to-value ratios, and occupancy status. The loan file also generally includes notes from the person who underwrote the loan describing the loan's purported compliance with underwriting guidelines and documentation of "compensating factors" that justified any departure from those standards.

92. Investors in RMBS, such as the Bank, do not have access to the loan files. Instead, the sponsors, depositors/issuers, and the underwriters are responsible for gathering and verifying information about the credit quality and characteristics of the loans that are deposited into the trust and presenting summaries of this information in prospectuses or other offering documents that are prepared for potential investors. This due diligence process is a critical safeguard for investors and a fundamental legal obligation of the sponsors, the depositor/issuers, and the underwriters. Accordingly, the due diligence process supposedly performed by Defendants was critical to the Bank's decision to purchase the certificates at issue.

2. The Rating Process for PLMBS

93. Because, like many institutional investors, the Bank was permitted to buy only triple-A rated tranches of these certificates, the credit rating of the tranches of PLMBS it purchased was also material to its investment decision.

94. In any PLMBS, the credit rating of each tranche is negotiated between the depositor/issuer of the certificates and the credit rating agencies. In this process, the depositor/issuer and/or the sponsor and underwriters provide the credit rating agency with information about the credit quality and characteristics of the loans that are deposited into the trust. The credit rating agency is then supposed to evaluate, among other things:

a. The credit quality of the collateral □*i.e.*, the underlying obligor□s ability to pay and the obligor□s equity in the asset;

b. The experience and underwriting standards of the originators of the underlying loans;

c. The loan characteristics reported by the depositor/issuer as underlying a particular transaction;

d. The default rates, historic recovery rates, and concentration of the loans;

e. The ability of the servicer to perform all the activities for which the servicer will be responsible; and

f. The extent to which the cash flow from the collateral can satisfy all of the obligations of the PLMBS transaction. The cash flow payments which must be made from the asset pool are interest and principal to investors, servicing fees, and any other expenses for which the depositor/issuer is responsible. The rating agencies are supposed to stress-test the flow of funds to determine whether the

cash flows match the payments that are required to be made to satisfy the depositor/issuer's obligations.

95. After evaluating these objective and verifiable factors, the credit rating agency issues a rating for the security. This rating is not a subjective opinion; rather it constitutes a factual representation regarding the risk of the security with reference to the above objective factors, and should therefore be a reflection of both the riskiness of the loans in the asset pool and the seniority of the tranche. If the rating that the credit rating agency assigns to the tranche is not in accord with the issuer's target, then the depositor/issuer may "**credit enhance**" the structure. Such credit enhancement may include overcollateralization (*i.e.*, including in the pool mortgages whose aggregate principal balance exceeds the aggregate principal balances of the certificates secured thereby), cash reserve accounts, excess spread (scheduled cash inflows from the mortgages in excess of the interest service requirements of the secured certificates), or third-party contracts (whereby losses suffered by the asset pool are absorbed by an insurer or other counter party). By using credit enhancement, a depositor/issuer may be able to elevate a bond to the highest credit rating.

96. All of the certificates that the Bank purchased were senior certificates that were rated triple-A when the Bank purchased them.

B. The Mortgage Originators Abandoned Underwriting and Appraisal Standards and Engaged in Predatory Lending.

1. The Shift from "Originate to Hold" to "Originate to Distribute" Securitization Incentivized Mortgage Originators to Disregard Loan Quality.

97. As noted above, the fundamental basis upon which mortgage pass-through certificates are valued is the ability of the borrowers to repay the principal and interest on the underlying loans and the adequacy of the collateral for those loans. If the borrowers cannot pay,

and the collateral is insufficient, the cash flow from the certificate diminishes, and the investors are exposed to losses. For this reason, the underwriting standards and practices of the mortgage originators who issued loans that back MBS, and the representations in the Offering Documents regarding those standards, are critically important to the value of the certificates and the investors decisions to purchase the certificates.

98. Yet, unbeknownst to the Bank, during the time frame that the Bank purchased the PLMBS at issue in this case, mortgage originators: (a) effectively abandoned their stated underwriting standards as part of the securitization process; (b) allowed pervasive and systematic exceptions to their stated underwriting standards without proper justification; (c) adopted practices such that variance from their stated underwriting practices was the norm; (d) disregarded credit risk and quality controls in favor of generating loan volume; (e) pressured and coerced appraisers to inflate their collateral valuations in order to permit loans to close; and (f) engaged in predatory lending practices. As has become clear recently, this was the result of a fundamental shift in the mortgage securitization markets.

99. In the 1980s and 1990s, under the traditional model, mortgage originators held the mortgage loans they provided to borrowers through the term of the loan. They would therefore profit from the obligor s payment of interest and repayment of principal, but also bear the risk of loss if the obligor defaulted and the property value was insufficient to repay the loan. As a consequence of this arrangement, the originator was economically vested in establishing the creditworthiness of the obligor and the true value of the underlying property by appraising it before issuing the mortgage loans.

100. Additionally, the mortgage securitizations that took place in the 1980s and 1990s generally fell within the domain of GSEs Fannie Mae and Freddie Mac. These GSEs purchased

the loans from the originators, securitized them, and sold them to investors. Investors in the early GSE securitizations were provided protection because the underlying loans were originated pursuant to strict underwriting guidelines, and the GSEs guaranteed that the investors would receive timely payments of principal and interest. Because the GSEs were perceived as being backed by the federal government, investors viewed the guarantees as diminishing credit risk, if not removing it altogether.

101. Between 2001 and 2006, however, Wall Street banks moved aggressively into the securitization markets, taking market share away from the GSEs. Unlike the GSEs, the Wall Street banks focused primarily on Alt-A, subprime, and jumbo prime mortgage pools because of the higher fees that were available. Likewise, investors sought higher returns offered by non-agency MBS. As a result, non-agency loan originations and securitizations grew dramatically as shown by the following table:

	2001	**2006**
GSE Loan Originations	**$1.433 trillion**	**$1.040 trillion**
GSE Securitizations	**$1.087 trillion**	**$904 billion**
Non-GSE Loan Originations	**$680 billion**	**$1.480 trillion**
Non-GSE Securitizations	**$240 billion (including $87 billion of subprime and $11 billion of Alt-A securitizations)**	**$1.033 trillion (including $449 billion of subprime and $366 of Alt-A securitizations)**

Source: Inside Mortgage Finance (2007).

102. Thus, from 2001 to 2006, non-GSE loan originations more than doubled and non-GSE securitizations more than quadrupled, while GSE loan originations and securitizations

contracted. Moreover, during this time the non-GSE Alt-A and subprime securitization activity skyrocketed, increasing eight-fold during the period from $98 billion to $815 billion.

103. As the Financial Crisis Inquiry Commission (often "FCIC") reported in April 2010, "[t]he amount of all outstanding mortgages held in non[Agency] MBS rose notably from only $670 billion in 2004 to over $2,000 billion in 2006." This statistic demonstrates the dramatic growth of the PLMBS market during this time. FCIC, "Preliminary Staff Report: Securitization and the Mortgage Crisis," April 7, 2010.

104. This enormous increase in PLMBS securitization is reflected in the securitization volume of the sponsors of the PLMBS purchased by the Bank. For example, between 2003 and 2006, Citigroup reported that its Prime/Alt-A securitization nearly quintupled, from $2.2 billion to $10.9 billion, and its subprime securitization increased from $306 million to $10.3 billion (an over 3000% increase). Other sponsors "primarily Wall Street banks "similarly expanded their securitization business during the same time period.

105. This shift was fueled by the complex interaction between record-high global savings, referred to by Federal Reserve Chairman Ben Bernanke as the "global savings glut," and exceedingly low interest rates. Low interest rates made it easier and more appealing for consumers to take out home mortgage loans. But the low Federal Reserve rate also meant that the global pool of investors received only marginal returns on traditional low-risk investments, in particular, U.S. Government Bonds. This created an incentive for Wall Street banks to create seemingly low-risk investment options that produced returns in excess of those of government bonds. PLMBS securitization was their answer. Thus, following the model created by the GSEs, the Wall Street banks began buying pools of mortgages from mortgage originators, securitizing the pools, and selling the bonds to global investors. Because mortgage interest rates

(and even more so Alt-A and subprime rates) generally exceeded those of U.S. Government bonds, the resulting PLMBS could provide investors with the higher rate of return they were seeking.

106. The one complication that the Wall Street banks needed to solve was the rating of the certificates. Debt securities secured by pools of mortgages made to lower credit quality borrowers would generally fail to meet the investment grade requirements of most institutional investors. The Wall Street banks solution was to structure the financings through the creation of tranches as discussed above. As a general rule, the result was that up to 80% of any particular PLMBS would receive an investment grade rating. The remaining 20% was often purchased by hedge funds and other entities that were able to buy non-investment grade certificates. The development opened the floodgates for the securitization and sale of PLMBS.

107. To ensure that the flood of securitizations and sale of PLMBS did not abate, the Wall Street banks bankrolled the lenders (both the ones they owned and those that were independent) so that the lenders had ample capital to issue loans. A recent study by The Center for Public Integrity found that 21 of the top 25 subprime lenders (in terms of loan volume) were either owned outright by the biggest banks or former investment houses, or had their subprime lending hugely financed by those banks, either directly or through lines of credit. *See* Who Is Behind The Financial Meltdown: The Top 25 Subprime Lenders and their Wall Street Backers, The Center for Public Integrity (May 6, 2009), *available at* http://www.publicintegrity.org/investigations/economic_meltdown/ (visited Sept. 20, 2010).

108. As the PLMBS market expanded, the traditional originate to hold model morphed into the originate to distribute model. Under the new originate to distribute model, mortgage originators no longer held the mortgage loans to maturity. Rather, mortgage

originators sold the loans to Wall Street banks and other major financial institutions and shifted the risk of loss to the investors who purchased an interest in the securitized pool of loans.

109. The new distribution model was highly profitable for the mortgage originators in the short-term. By securitizing and selling the mortgages to investors through underwriter/dealers, the mortgage originators shifted loans off their books, earned fees, and, thus, were able to issue more loans. Additionally, the securitization process enabled the originators to earn most of their income from transaction and loan-servicing fees, rather than (in the traditional model) from the spread between interest rates paid on deposits and interest rates received on mortgage loans. This created an unchecked incentive to originate more and more loans to feed into the securitization machine.

110. In testimony before the FCIC, Sheila C. Bair, Chair of the Federal Deposit Insurance Corporation, explained both the misalignment of incentives arising from the sale of loans and the misalignment created by flawed compensation practices within the origination industry:

> The standard compensation practice of mortgage brokers and bankers was based on the volume of loans originated rather than the performance and quality of the loans made. From the underwriters perspective, it was not important that consumers be able to pay their mortgages when interest rates reset, because it was assumed the loans would be refinanced, generating more profit by ensuring a steady stream of customers. The long-tail risk posed by these products did not affect mortgage brokers and bankers incentives because these mortgages were sold and securitized.

111. The Attorney General for the Commonwealth of Massachusetts came to the same conclusion when she issued the results of her investigation into the subprime mortgage industry, THE AMERICAN DREAM SHATTERED: THE DREAM OF HOMEOWNERSHIP AND THE REALITY OF PREDATORY LENDING (The AG Report). This report explained:

> Historically, the vast majority of home mortgages were written by banks which held the loans in their own portfolios, knew their borrowers, and earned profit by writing good loans and collecting interest over many years. Those banks had to live with their "bad paper" and thus had a strong incentive to avoid making bad loans. In recent years, however, the mortgage market has been driven and funded by the sale and securitization of the vast majority of loans. Lenders now frequently make mortgage loans with the intention to promptly sell the loan and mortgage to one or more entities. . . . The lenders' incentives thus changed from writing good loans to writing a huge volume of loans to re-sell, extracting their profit at the front end, with considerably less regard to the ultimate performance of the loans.

112. An internal memorandum drafted by the former Credit Risk Officer at Countrywide Financial demonstrates how originators recognized the link between reduced underwriting standards and the ability to pass the resultant associated risks on to third parties. The Credit Risk Officer explained that "[Underwriting] Guidelines have become more aggressive. . . . Furthermore, the portion of our nonconforming loans that are expanded criteria has increased. Because the sub holders bear most of the credit risk we are not directly exposed to the expansion of guidelines or change of mix." Declaration of Paris Wynn In Support of Plaintiff SEC's Ex Parte Application for Relief from Deposition Duration Limit for Deposition of John P. McMurray, *SEC v. Mozilo, et al*., No. 09-3994 (C.D. Cal.), Ex. 1.

113. As far as lenders were concerned, their profits were generated by origination of as many loans as possible, and once these loans were packaged and securitized, repayment risk was someone else's problem. According to the FCIC, Wall Street's approach to securitization was reflected by its embrace of a new term—"IBGYBG," standing for "I'll be gone, you'll be gone." FCIC Majority Report at 8. This term referred to deals that brought in big fees up front for the financial institutions involved in securitization, while risking much larger losses in the future for the investors that purchased the securities. As the FCIC noted, "for a long time, IBGYBG worked at every level." *Id.*

114. As Ben Bernanke, Chairman of the Federal Reserve Bank, explained in Congressional testimony:

> When an originator sells a mortgage and its servicing rights, depending on the terms of the sale, much or all of the risks are passed on to the loan purchaser. Thus, originators who sell loans may have less incentive to undertake careful underwriting than if they kept the loans. Moreover, for some originators, fees tied to loan volume made loan sales a higher priority than loan quality. This misalignment of incentives, together with strong investor demand for securities with high yields, contributed to the weakening of underwriting standards.

2. Mortgage Originators Abandoned Underwriting Guidelines in Order to Initiate High Cost Loans for Securitization.

115. The misalignment of incentives following the shift to the "originate to distribute model," noted by Mr. Bernanke and others following the collapse of the mortgage market, caused mortgage originators to systematically violate their stated underwriting and appraisal standards, and to accept, encourage, and even fabricate their own untrue information from loan applicants. As recent studies and reports have shown, this was not a problem limited to one or a few mortgage originators, but, rather, was pervasive among mortgage originators, including those that issued the loans that backed the PLMBS purchased by the Bank. Mortgage originators and the financial institutions that bankrolled them sought loan volume, not loan quality, in order to profit from the securitization market. As the FCIC concluded, "there was a systematic breakdown in accountability and ethics." FCIC Majority Report, Conclusions of the Financial Crisis Inquiry Commission, at xxii. According to the FCIC, "major financial institutions ineffectively sampled loans they were purchasing to package and sell to investors. They knew a significant percentage of the sampled loans did not meet their own underwriting standards or those of the originators. Nonetheless, they sold those securities to investors. The Commission's review of many prospectuses provided to investors found that this critical information was not disclosed." *Id.*

116. In addition, coincident with the widespread transfer to MBS purchasers of the default risk attached to mortgage loans, mortgage originators expanded the practice of originating highly risky nontraditional loans. In a marked departure from traditional mortgage origination procedures, originators offered a variety of reduced documentation programs in which the verification or substantiation of the applicants statements as to income, assets, and employment history was limited or non-existent. Although these programs were touted as providing for streamlined but nonetheless effective underwriting, unbeknownst to the Bank, the programs were engineered to enable originators to make loans to borrowers who otherwise never would have qualified. When these loans were securitized, investors were assured that reduced documentation programs were available only where the borrower satisfied certain FICO criteria, such as minimum FICO scores, or loan-to-value and debt-to-income ratios. In fact, the originators lacked any principled basis on which to evaluate the increased credit risk posed by such loans, notwithstanding representations to the contrary in the offering documents. Moreover, the widespread granting of exceptions to underwriting standards without legitimate compensating factors meant that the minimal safeguards associated with the reduced documentation programs were often abandoned in the headlong rush to maximize origination volume. Additionally, mortgage underwriters would often begin the underwriting of an applicant s loan under full documentation procedures, only to transfer the loan applicant to a No Doc program upon learning of information that would disqualify the applicant under the full documentation procedures.

117. Indeed, the President s Working Group on Financial Markets concluded in its Policy Statement on Financial Market Developments that, [t]he turmoil in financial markets

clearly was triggered by *a dramatic weakening of underwriting standards for U.S. subprime mortgages* beginning in late 2004 and extending into early 2007. (emphasis in original).

118. As John C. Dugan, Comptroller of the Currency testified to the FCIC on April 8, 2010, following his description of poor underwriting practices:

> The combination of all the factors I have just described produced, on a nationwide scale, the worst underwritten mortgages in our history. When house prices finally stopped rising, borrowers could not refinance their way out of financial difficulty. And not long after, we began to see the record levels of delinquency, default, foreclosures, and declining house prices that have plagued the United States for the last two years both directly and through the spillover effects to financial institutions, financial markets, and the real economy.

3. Mortgage Originators Manipulated Appraisals of Collateralized Real Estate in Order to Initiate High Cost Loans for Securitization.

119. Accurate appraisals prepared in accordance with established appraisal standards are essential for MBS investors to evaluate the credit risk associated with their investment. An accurate appraisal is necessary to calculate an accurate loan-to-value (LTV) ratio, which is the ratio of the amount of the mortgage loan to the value of the collateral determined by the lower of the appraised value or the sale price of the mortgaged property when the loan is made. The LTV ratio is strongly indicative of the borrowers likelihood of defaulting. As a borrower s equity decreases (and the corresponding LTV ratio increases), particularly to where equity is less than 10% and LTV ratios are greater than 90%, the borrower s incentive to keep the mortgage current, or the collateral in good condition, decreases dramatically. Consequently, aggregate LTV calculations are among the most significant characteristics of a mortgage pool because LTV ratios both define the extent of the investor s equity cushion (*i.e.*, the degree to which values may decline without the investor suffering a loss), and are strongly indicative of a borrower s incentive to pay. But in the absence of properly prepared appraisals, the value component of the LTV ratio is unreliable, and the aggregate LTV metrics become meaningless. The appraisal

practices of the mortgage originators who issued loans that back PLMBS, and the accuracy of the representations in the Offering Documents regarding those practices, therefore, were critically important to the value of the certificates, and to the investors decisions to purchase the certificates.

120. Appraisers are governed by the Uniform Standards of Professional Appraisal Practice (USPAP), which are promulgated by the Appraisal Standards Board. The USPAP contain a series of ethical rules designed to ensure the integrity of the appraisal process. For example, the USPAP Ethics Conduct Rule provides: An appraiser must perform assignments with impartiality, objectivity, and independence, and without accommodation of personal interests.

121. The USPAP Ethics Conduct Rule states: An appraiser must not accept an assignment that includes the reporting of predetermined opinions and conclusions.

122. The USPAP Ethics Management Rule states:

> It is unethical for an appraiser to accept an assignment, or to have a compensation arrangement for an assignment, that is contingent on any of the following:
>
> 1. the reporting of a predetermined results;
>
> 2. a direction in assignment results that favors the cause of a client;
>
> 3. the amount of a value opinion;
>
> 4. the attainment of a stipulated results; or
>
> 5. the occurrence of a subsequent event directly related to the appraiser s opinions and specific to the assignment s purpose.

123. The USPAP Scope of Work Acceptability Rule states: An appraiser must not allow the intended use of an assignment or a client's objectives to cause the assignment results to be biased.

124. The Appraisal Standards Board also issues Advisory Opinions regarding appropriate appraisal conduct. For example, Advisory Opinion 19 states in part:

> Certain types of conditions are unacceptable in any assignment because performing an assignment under such condition violates USPAP. Specifically, an assignment condition is unacceptable when it:
>
> - precludes an appraiser□s impartiality because such a condition destroys the objectivity and independence required for the development of credible results;
>
> - limits the scope of work to such a degree that the assignment results are not credible, given the intended use of the assignment; or
>
> - limits the content of a report in a way that results in the report being misleading.

125. The USPAP Scope of Work Rule states: □For each appraisal . . . an appraiser must . . . determine and perform the scope of work necessary to develop credible assignment results.□

126. Additionally, USPAP Standard 1 states: □In developing a real property appraisal, an appraiser must identify the problem to be solved, determine the scope of work necessary to solve the problem, and correctly complete research and analyses necessary to produce a credible appraisal.□

127. USPAP Standards Rule 2-1 states that □[e]ach written or oral real property appraisal report must:

(a) clearly and accurately set forth the appraisal in a manner that will not be misleading;

(b) contain sufficient information to enable the intended users of the appraisal to understand the report properly; and

(c) clearly and accurately disclose all assumptions, extraordinary assumptions, hypothetical conditions, and limiting conditions used in the assignment.□

128. Despite the importance of accurate appraisals and the requirements that are designed to ensure them, during the time frame that the Bank purchased the PLMBS at issue in this case, mortgage originators routinely manipulated the process for appraising the collateralized real estate properties. They did so by pressuring and coercing appraisers and blacklisting those that would not "come back at value." The prevalence of this problem and its impact on the financial crisis has been extensively investigated and examined in the aftermath of the market collapse.

129. According to his statements submitted in connection with his April 7, 2010 testimony before the FCIC, Richard Bitner, a former executive of a subprime lender for 15 years and author of the book *Confessions of a Subprime Lender*, explains:

> [T]he appraisal process [was] highly susceptible to manipulation, lenders had to conduct business as though the broker and appraiser couldn't be trusted . . . .[and] either the majority of appraisers were incompetent or they were influenced by brokers to increase the value. . . . Throwing a dart at a board while blindfolded would've produced more accurate results.
>
> "
>
> If the appraisal process had worked correctly, a significant percentage of subprime borrowers would've been denied due to lack of funds. Inevitably, this would have forced sellers to drop their exorbitant asking price to more reasonable levels. The rate of property appreciation experienced on a national basis from 1998 to 2006 was not only a function of market demand, but was due, in part, to the subprime industry's acceptance of overvalued appraisals, coupled with a high percentage of credit-challenged borrowers who financed with no money down.
>
> "
>
> [T]he demand from Wall Street investment banks to feed the securitization machine couple[d] with an erosion in credit standards led the industry to drive itself off the proverbial cliff.

The Financial Crisis Inquiry Commission, Official Transcript, Commission Hearing, Apr. 7, 2010, Session 2, at 9-10.

130. In her testimony before the FCIC, Patricia Lindsay, a former New Century Financial Corporation wholesale lender, described widespread appraisal fraud and abuse:

> The role and practices of appraisers in subprime mortgage origination:
>
> Properly valuing a property . . . is one of the most important components in a loan. In my experience at New Century, fee appraisers hired to go to the properties were often times pressured into coming in "at value", fearing if they didn't, they would lose future business and their livelihoods. They would charge the same fees as usual, but would find properties that would help support the needed value rather than finding the best comparables to come up with the most accurate value. Some appraisers would take boards off boarded up windows, to take the needed photos, then board the properties back up once the shots were taken. Or they would omit certain important elements of a property by angling the camera a certain way or zooming close in to make the property look the best possible. This level of appraiser activism compromises their objectivity.

131. Alan Hummel, Chair of the Appraisal Institute, testified before the Senate Committee on Banking that the dynamic between mortgage originators and appraisers created a "terrible conflict of interest" where appraisers "experience[d] systemic problems with coercion" and were "ordered to doctor their reports or else never see work from those parties again."

132. In his testimony before the House Financial Services Committee, Subcommittee on Financial Institutions and Consumer Credit, Jim Amorin, President of the Appraisal Institute, testified similarly that:

> In recent years, many financial institutions have lost touch with fundamental risk management practices, including the separation between loan production and risk management. Unfortunately, parties with a vested interest in a transaction are often the same people managing the appraisal process within many financial institutions: a flagrant conflict of interest. Appraisers are ordered to doctor their reports or else never receive work from those parties again. This was evident in a recent case involving nearly all state Attorneys General against Ameriquest, which resulted in an out-of-court settlement imposing new standards to prevent unfair and deceptive practices.
>
> "
>
> Another coercion tactic is the threat of being placed on a "blacklist" (aka "exclusionary appraiser list"), commonly used to blackball appraisers. It is one

> thing to maintain a list of reputable businesses to work with, or to maintain a list of firms to avoid as a result of poor performance. However, [it] is another to place an appraiser on a blacklist for refusal to hit a predetermined value.

133. Confirming the extent of the problem, a survey of 1,200 appraisers conducted by October Research Corp. found that 90% of appraisers reported that mortgage brokers and others pressured them to raise property valuations to enable deals to go through during the relevant period. The study also found that 75% of appraisers reported negative ramifications if they did not cooperate, alter their appraisal, and provide a higher valuation.

134. In 2010, as a result of widespread appraisal abuse, Congress enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act, § 1472, which amended Chapter 2 of the Truth in Lending Act, 15 U.S.C. § 1631, *et seq*., to specifically prohibit actions that violate appraisal independence. Under the new Act, acts or practices that violate appraisal independence include:

> (1) any appraisal of a property offered as security for repayment of the consumer credit transaction that is conducted in connection with such transaction in which a person with an interest in the underlying transaction compensates, coerces, extorts, colludes, instructs, induces, bribes, or intimidates a person, appraisal management company, firm, or other entity conducting or involved in an appraisal, or attempts, to compensate, coerce, extort, collude, instruct, induce, bribe, or intimidate such a person, for the purpose of causing the appraised value assigned, under the appraisal, to the property to be based on any factor other than the independent judgment of the appraiser;
>
> (2) mischaracterizing, or suborning any mischaracterization of, the appraised value of the property securing the extension of the credit;
>
> (3) seeking to influence an appraiser or otherwise to encourage a targeted value in order to facilitate the making or pricing of the transaction; and
>
> (4) withholding or threatening to withhold timely payment for an appraisal report or for appraisal services rendered when the appraisal report or services are provided for in accordance with the contract between the parties.

135. All of the abuses targeted by the amended Truth in Lending Act were widespread during the time frame that the Bank purchased the PLMBS at issue, causing the appraisals of the collateralized real estate backing the PLMBS to be inflated. As the FCIC noted:

> [a]s the housing market expanded, another problem emerged, in subprime and prime mortgages alike: inflated appraisals. For the lender, inflated appraisals meant greater losses if a borrower defaulted. But for the borrower or for the broker or loan officer who hired the appraiser, an inflated value could make the difference between closing and losing the deal. Imagine a home selling for $200,000 that an appraiser says is actually worth only $175,000. In this case, a bank won't lend a borrower, say, $180,000 to buy the home. The deal dies. Sure enough, appraisers began feeling pressure. One 2003 survey found that 55% of the appraisers had felt pressed to inflate the value of homes; by 2006, this had climbed to 90%. The pressure came most frequently from the mortgage brokers, but appraisers reported it from real estate agents, lenders, and in many cases borrowers themselves. Most often, refusal to raise the appraisal meant losing the client.

FCIC Majority Report at 91.

4. Mortgage Originators Engaged in Predatory Lending in Order to Initiate High Cost Loans for Securitization.

136. Under state and federal predatory lending laws, predatory loans are characterized by excessively high interest rates or fees, and abusive or unnecessary provisions that do not benefit the borrower, including balloon payments, and underwriting that ignores a borrower's repayment ability. Moreover, according to the Office of the Comptroller of the Currency ("OCC"), "a fundamental characteristic of predatory lending is the aggressive marketing of credit to prospective borrowers who simply cannot afford the credit on the terms being offered." OCC Advisory Letter, Guidelines for National Banks to Guard Against Predatory and Abusive Lending Practices, AL 2003-2, at 2 (Feb. 21, 2003). The Defendants represented and warranted that the mortgage pools that backed the PLMBS purchased by the Bank did not contain predatory loans. This was false.

137. Predatory lending was part of the mortgage lenders effort to increase volume at any cost. The Wall Street banks and other financial institutions that issued and underwrote PLMBS depended on a steady stream of higher interest subprime loans, which often were the result of predatory lending practices. As Federal Reserve Bank Chairman Bernanke explained: [a]lthough the high rate of delinquency has a number of causes, it seems clear that unfair or deceptive acts and practices by lenders resulted in the extension of many loans, particularly high-cost loans, that were inappropriate for or misled the borrower. Written statement by Federal Reserve Bank Chairman Bernanke, July 14, 2008.

138. The truth is that many of us in the industry were deeply distressed by the growing practice of pushing high risk loans on borrowers who had no reasonable expectation of being able to repay the mortgage. Disclosures were often less than adequate, and faced with a bewildering array of loan terms, borrowers tended to trust their mortgage banker or broker. . . . In our industry, we have frankly seen too much mortgage malpractice. Scott Stern, CEO of Lenders One, in Testimony before the Senate Banking Committee, Apr. 10, 2008.

139. Too often, mortgage loans were issued to a borrower who ha[d] little or no ability to repay the loan from sources other than the collateral pledged, a predatory practice explicitly identified by the Expanded Guidance for Subprime Lending Programs issued by the OCC, the Board of Governors of the Federal Reserve System, the FDIC, and the Office of Thrift Supervision. Expanded Guidance for Subprime Lending Programs at 10 (Jan. 31, 2001). The Expanded Guidance stated:

> Loans to borrowers who do not demonstrate the capacity to repay the loan, as structured, from sources other than the collateral pledged are generally considered unsafe and unsound. Such lending practices should be criticized in the Report of Examination as imprudent.

Id. at 11. Additionally, the OCC warned:

> When a loan has been made based on the foreclosure value of the collateral, rather than on a determination that the borrower has the capacity to make the scheduled payments under the terms of the loan, based on the borrower's current and expected income, current obligations, employment status, and other relevant financial resources, the lender is effectively counting on its ability to seize the borrower's equity in the collateral to satisfy the obligation and to recover the typically high fees associated with such credit. Not surprisingly, such credits experience foreclosure rates higher than the norm.
>
> [S]uch disregard of basic principles of loan underwriting lies at the heart of predatory lending . . . .

OCC Advisory Letter, Guidelines for National Banks to Guard Against Predatory and Abusive Lending Practices, AL 2003-2, at 2 (Feb. 21, 2003).

140. Numerous state, federal, and private investigations have revealed the extent of predatory lending conduct amongst almost every significant mortgage originator, including those responsible for originating many of the loans underlying the securities at issue here.

141. In November 2007, the Office of the Attorney General for the Commonwealth of Massachusetts issued *The American Dream Shattered: The Dream of Homeownership and the Reality of Predatory Lending* (the "AG Report"). The AG Report explained how:

> Subprime ARM loans typically carry an artificially low, fixed interest rate for two or three years, sometimes called a "teaser" rate. That initial rate eventually adjusts to a higher, variable rate for the remaining term of the loan, causing monthly payments to increase, often dramatically. In recent years, many subprime lenders qualified borrowers based only on their ability to make payments during the "teaser" rate period, ignoring the fact that the borrowers would not be able to make payments when the rate adjusted upwards. As a result, many borrowers had to continually refinance. Borrowers were forced to obtain new loans, each one higher than the last, at increasingly high loan to value (LTV) ratios. . . . Exacerbating the effects of serial refinancing, subprime mortgages often carry burdensome prepayment penalties, as well as high transaction costs including lender and broker commissions and other fees. . . . [T]his cycle could continue only so long as home valuations continued to increase[]. As soon as real estate prices flattened, however, homeowners "especially those who used high LTV loans "no longer had the same options when monthly payments began to adjust upward.

142. The AG Report also notes that "lax or sometimes nonexistent underwriting . . . fueled bad subprime loans."

143. The AG Report specifically lists numerous types of novel, risky mortgage loan features and explains that "[t]he collection of layers of risk, however, into a single loan product – for instance, a stated income, 100 percent LTV loan with a 2/28 ARM, qualified only on the "teaser" rate – is usually so structurally unsound and so contrary to the borrower's ability to repay the loan over time, that *it can only be viewed as designed to fail*, resulting in widespread harm to the borrower and public alike." (emphasis added).

144. Singling out one specific common practice, the AG Report notes that "[w]hen lenders qualify borrowers for ARM loans based only on the "teaser" rate period that reflects an utter lack of diligence in determining whether the borrower could actually pay back the loan. This problem is systemic." According to the AG Report, this practice was permitted by lax underwriting standards that apparently reached its peak in 2006 (although it was continued into 2007), and was directly in violation of the Interagency Guidance on Nontraditional Mortgage Product Risks issued in 2006, which stated that for "nontraditional" loans, "analysis of a borrower's repayment capacity should include an evaluation of their ability to repay the debt by final maturity at the fully indexed rate, assuming a fully amortizing repayment schedule." 71 Fed. Reg. 58,609, 58,613 (Oct. 4, 2006).

145. The Massachusetts Attorney General specifically identified Countrywide as a lender which employed this practice of qualifying borrowers based only on their ability to pay based on "teaser" rates. *Massachusetts v. Countrywide Fin. Corp. et al.,* No. 10-1169 (Suffolk County Sup. Ct.)

146. Among the "Principal Findings" of the Massachusetts Office of Attorney General was that "[t]oo often lenders made loans where they knew or should have known that the borrower could not repay the loan."

147. The AG Report includes specific examples of such conduct. In one instance, a single mother with three children who worked two jobs was "put into a loan where the lender knew, based on all the information she provided at the inception of the loan, that she could not afford the loan once the low 'teaser' rate [of 5 percent] expired and monthly payments increased . . . when the higher interest rate of almost 13 percent kicked in . . . ." As another example, an unemployed woman just out of a homeless shelter whose partner made less than $30,000 a year was approved for a $300,000 mortgage with a teaser rate of 4.95 percent adjustable with a cap over 15 percent. She defaulted within a year.

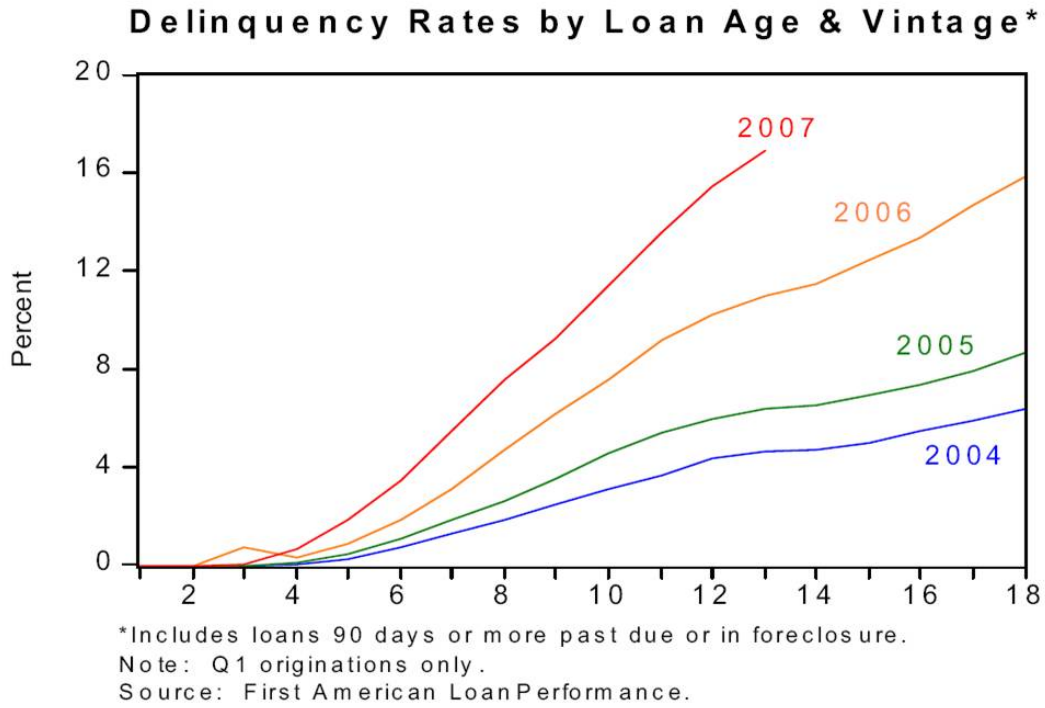
148. The AG Report also details multiple examples of how "some lenders and brokers steer borrowers into loans that are more expensive than ones for which they qualify based on their credit scores and financial picture."

149. As FDIC Chairman Sheila C. Bair explained in testimony before the FCIC:

> The well-publicized benefits associated with legitimate rate-reducing mortgage refinancing and rising housing prices conditioned consumers to actively manage their mortgage debt. An unfortunate consequence of this favorable environment for refinancing was fraud. Many consumers have only a limited ability to understand details of standard mortgage contracts let alone the complex mortgages that became common during this period. In this environment, unscrupulous mortgage providers capitalized on the widely advertised benefits associated with mortgage refinance, and took advantage of uniformed consumers by refinancing them into mortgage loans with predatory terms that were not readily transparent to many borrowers.

5. Widespread Delinquencies Reflected the Inevitable Consequence of Loans Issued Without Regard to Meaningful Underwriting.

150. High delinquency rates are reflective of a systematic disregard for underwriting guidelines by mortgage issuers. When effective underwriting occurs, poor credit risks are screened out. This is the purpose of underwriting. In the absence of effective underwriting, loans are made to unqualified borrowers and fraud is not detected. When borrowers are loaned money without regard to their ability to repay it, loan delinquencies (and foreclosures) ensue. Hence, high delinquency rates in loans issued by an originator provides evidence that the originator failed to adhere to prudent underwriting practices.



151. Numerous studies and analyses have traced the effect of poor underwriting on delinquency rates. For example, the Federal Bureau of Investigation Mortgage Fraud Reports of 2006 and 2007 reported on the results of a BasePoint Analytics study of three million residential mortgage loans which found that between 30% and 70% of early payment defaults were linked to significant misrepresentations in the original loan applications. The BasePoint Analytics study found that loans containing egregious misrepresentations were five times as likely to default in the first six months as loans that did not.

152. An analysis of the same BasePoint Analytics study by FitchRatings concludes that "[h]igh risk products, which require sound underwriting and which are easy targets for fraud, account for some of the largest variances to expected default rates." Fitch notes that "[i]n addition to the inherent risk in . . . [issuing loans with] the high-risk "affordability" features in subprime mortgages . . . , evidence is mounting that in many instances these risks were not controlled through sound underwriting practices. Moreover, in the absence of effective underwriting, products such as "no money down" and "stated income" mortgages appear to have

become vehicles for misrepresentations or fraud by participants throughout the origination process.

153. Academic studies as well have shown that the departure from sound underwriting practices which accompanied the explosion in securitizations contributed to substantial increases in early payment defaults and delinquencies. *See* Benjamin Keys et al., *Did Securitization Lead to Lax Screening? Evidence from Subprime Loans*, 125 Q. J. Econ. 307 (2010) ("[W]e show that a doubling of securitization volume is on average associated with about a 10%-25% increase in defaults . . . within two years of origination . . .[and] a decline in screening standards . . . .").

154. Data collected on the performance of loans over the past several years and analyzed in these studies show that early payment default and delinquency rates have in fact soared as a result of faulty underwriting:

155. Moreover, economic analysis of recent mortgage default rates has confirmed that increased delinquency rates during this period were not the result of deterioration in the credit

characteristics of the borrowers that were disclosed to MBS investors □for example their FICO scores □but rather from deterioration in credit characteristics of the borrowers that were *not* disclosed to investors. Research by University of Michigan economists indicates that increased use of low documentation underwriting □with its higher potential for borrower fraud and other abuses not discernible by MBS investors □correlates to excessive default rates. In other words, even where disclosed characteristics are the same, the low-doc loans exhibit higher default rates, suggesting flaws in the underwriting process.

156. Review of current performance data of loan pools backing the PLMBS purchased by the Bank similarly show significantly increased incidence of default, delinquency, and foreclosure, indicating pervasive underwriting failures.

C. Federal and State Investigations, Press Reports, Publicly Available Documents Produced in Other Civil Lawsuits, and Analysis of the Loan Pools Underlying the Certificates Identify Systematic Violation of Underwriting Guidelines, Appraisal Guidelines, and Predatory Lending by Mortgage Originators Whose Loans Back the PLMBS in this Case.

157. There have been numerous investigations into the practices of the mortgage originators who issued loans backing the PLMBS purchased by the Bank. A review of these investigations and related litigation, as well as confidential witness testimony obtained during the Bank□s investigation, demonstrate that mortgage originators in general, and those that issued loans that backed the PLMBS purchased by the Bank in particular, systematically violated and ignored their stated underwriting standards, rendering the statements in the Offering Documents with regard to underwriting standards of the mortgage originators misleading. This evidence is reinforced further by the analysis of the performance of the actual loan pools backing the PLMBS purchased by the Bank.

158. Many of the mortgage originators who issued loans backing the PLMBS purchased by the Bank have been specifically identified as problem lenders. In materials presented to the FCIC on April 8, 2010, the OCC presented a list of the "Worst of the Subprime Lenders" based on their mortgage foreclosure rates in the hardest hit metropolitan areas of the country. *See* Activities of the National Banks Related to Subprime Lending, Attachment 2 "Worst Ten of the Worst Ten: Update." Eleven of the originators of mortgage loans that back the PLMBS purchased by the Bank were included on the list, with the following rankings:

1. New Century Mortgage Corp.
3. Argent Mortgage Co.
4. WMC Mortgage Corp.
5. Fremont Investment & Loan
6. Option One Mortgage Corp.
7. First Franklin Corp.
8. Countrywide
9. Ameriquest Mortgage Co.
12. IndyMac Bank, FSB
14. Wells Fargo
15. Ownit Mortgage Solutions, Inc.

159. Abundant additional information now available reveals the extent to which these and other mortgage originators abandoned sound underwriting practices and engaged in predatory lending, as follows.

1. Countrywide Home Loans, Inc. and Countrywide Home Loans Servicing LP

160. Countrywide Home Loans, Inc. and Countrywide Home Loans Servicing LP ("Countrywide"), under the direction of parent Countrywide Financial Corporation ("CFC," collectively "Countrywide") originated underlying mortgage loans securing at least 5 of the PLMBS purchased by the Bank. Countrywide was the nation's largest subprime loan originator between 2005 and 2007. In 2010, Countrywide was identified by the OCC as the eighth worst

subprime lender in the country based on the delinquency rates of the mortgages it originated in the ten metropolitan areas with the highest rates of delinquency.

a. Government actions against Countrywide and documents produced therein demonstrate Countrywide's failure to adhere to sound underwriting practices.

161. On June 4, 2009, the SEC filed a complaint against certain senior Countrywide executives, including CFC President, David Sambol, Chairman and CEO, Angelo Mozilo, and CFO Eric Sieracki. *See SEC v. Mozilo, et al.,* No. 09-3994 (C.D. Cal.). In the Complaint, the SEC alleged that these three senior officers committed securities fraud by hiding from investors "the high percentage of loans originated that were outside its already widened underwriting guidelines due to loans made as exceptions to guidelines." That SEC complaint detailed how Countrywide was aware internally that its own underwriting guidelines were being ignored and that borrowers were lying about their income in the reduced-documentation application process.

162. According to the SEC:

> [T]he actual underwriting of exceptions was severely compromised. According to Countrywide's official underwriting guidelines, exceptions were only proper where "compensating factors" were identified which offset the risks caused by the loan being outside the guidelines. In practice, however, Countrywide used as "compensating factors" variables such as FICO and loan to value which had already been assessed [in determining the loan to be outside the guidelines].

163. Countrywide's top-down involvement in the securitization process and complete abandonment of underwriting standards are confirmed by the documents produced in the SEC action, including internal emails, memos, minutes, presentations, and deposition testimony, which only became publicly available as part of the briefing on the Countrywide Defendants' unsuccessful motion for summary judgment.

164. For example, Countrywide's Chief Risk Officer John McMurray testified as to Countrywide's adoption of a "matching" strategy, pursuant to which Countrywide matched

whatever product was being offered by other originators in the marketplace. [Exh. 267] However, Countrywide's adoption of its competitors' guidelines (without adoption of corresponding credit risk mitigants) rendered Countrywide's origination practices "the most aggressive in the country." June 24, 2005 e-mail from McMurray to Sambol (stating that "because the matching process includes comparisons to a variety of lenders, our [guidelines] will be a composite of the outer boundaries across multiple lenders[,]" and that because comparisons are only made to lender guidelines where they are more aggressive and not used where they are less aggressive, CFC's "composite guides are likely among the most aggressive in the industry.") [Exh. 106].

165. As part of that matching strategy, Countrywide adopted a policy of underwriting even more loans based on exceptions to their underwriting guidelines. As Sambol explained in a February 13, 2005 email to Countrywide management, Countrywide "should be willing to price virtually any loan that we reasonably believe we can sell/securitize without losing money, even if other lenders can't or won't do the deal." [Exh. 220] Similarly, an internal Countrywide email to McMurray and Countrywide's Credit Risk Officer, Clifford Rossi, dated June 2, 2006 states that "[w]e should originate whatever we can sell to investors." [Exh. 118]

166. Ever in pursuit of the next deal, Countrywide routinely went beyond and around its publicly touted automated underwriting system, the Countrywide Loan Underwriting Expert System ("CLUES"). If CLUES rejected an applicant, Countrywide subjected the loan application to a process of manual underwriting whereby the loan would be sent up the chain for approval, first to a loan officer, then to the Structured Loan Desk (also referred to as the "exception desk"), and if still not approved, the loan would be referred to Secondary Marketing where applications were routinely granted exceptions to stated underwriting guidelines, all in

furtherance of Countrywide's matching strategy. As former Countrywide Managing Director for Secondary Marketing Nathan "Josh" Adler testified in the SEC action:

> Q. Do you know whether Countrywide sometimes originated loans that were considered to be exceptions to its underwriting guidelines?
>
> A. We did.
>
> Q. To your knowledge, was there a process by which such loans were approved?
>
> * * *
>
> THE WITNESS: There generally was, yes.
>
> Q. And what is your understanding of that process?
>
> A. Well, I was -- I was at the tail end of that process. There was -- we had guidelines, we had kind of core guidelines, and then we had these shadow guidelines, which were the kind of the second tier guideline, if you will. And then there was this third tier which would come to me. But essentially there were -- the tiering of guidelines related to the kind of the exception process. And there was an underwriting, they called it, Structured Loan Desk process in the divisions where loans would get referred to the Structured Loan Desk if they were outside, I believe, of kind of the core guidelines. And then if those loans were outside of even the shadow guidelines, then they would be referred to Secondary Marketing to determine if the loan could be sold given the exception that was being asked for.
>
> [Exh. 234]

167. As the SEC alleged: "The elevated number of exceptions resulted largely from Countrywide's use of exceptions as part of its matching strategy to introduce new guidelines and product changes." SEC Complaint (citing July 8, 2008 testimony of John P. McMurray at 373:25-375:6) [SOF 285/Exh. 267]. In order to boost revenue from securitizations, Countrywide was willing to approve virtually any loan, regardless of deviation from stated underwriting standards, so long as it could package and re-sell the loan in a securitization. While not publicly disclosed, these facts were well-known within Countrywide, including by Countrywide's highest levels of management.

168. For example, in a May 22, 2005 email to Sambol, McMurray, after noting that "exceptions are generally done at terms even more aggressive than [Countrywide] guidelines," identified a number of concerns regarding credit risk associated with Countrywide's exception loans, including the following:

(a) "Use of 2nds Liens as Credit Enhancement." Because many exceptions loans are structured as piggy-back transactions, Countrywide was taking on much of the loan's credit risk through the second lien, which is not sold into the secondary market;

(b) "R&W [representation and warranty] Exposure." Although Countrywide sold "much of the credit risk associated with high risk transactions away to third-parties," Countrywide "will see higher rates of default on the riskier transactions and third parties coming back to us seeking a repurchase or indemnification" for losses due to the defaults;

(c) "Security Performance. To the extent our securities contain a greater concentration of higher risk transactions than those issued by our competitors, our security performance may be adversely impacted. The issue here is the extent our concern over security performance drives what we will or won't do on an exception."

169. McMurray also noted in his email that Countrywide's pricing models were inherently limited because they "are often used to price transactions (e.g., exceptions) beyond the scope of the data used to estimate the models." [SOF 288/Exh. 84]

170. At a June 28, 2005 Credit Risk Committee meeting, Countrywide senior executives received a presentation informing the attendees that nonconforming exceptions loans accounted for a staggering 40% of Countrywide's loan originations. [SOF 289]

171. On April 13, 2006, CEO Mozilo issued an email noting that he had "personally observed a serious lack of compliance with our origination system as it relates to documentation and generally a deterioration in the quality of loans originated versus the pricing of those loan[s]." Specifically, in his email, Mozilo explained that Countrywide was originating home mortgage loans "through our channels with disregard for process [and] compliance with guidelines."

172. During June 2006, a Credit Risk Leadership package reported that Countrywide underwrote, on an exceptions basis, 44.3% of its Pay-Option ARMs, 37.3% of its subprime first liens, 25.3% of its subprime second liens, and 55.3% of its standalone home equity loans. [SOF 293/Exhs. 4, 117]

173. During December 2006, the Credit Risk Leadership package reported similar percentages of loans underwritten on an exceptions basis: 45.4% of Pay-Option ARMs, 35.3% of subprime first liens, 24.1% of subprime second liens, and 52.6% of standalone home equity loans [SOF 294/Exh. 5].

174. Countrywide's Quality Control group performed a "4506 Audit" for the 10-month period ended on April 30, 2006, comparing the stated income from loan applications to the income reported by that borrower to the Internal Revenue Service [SOF 427/Exhs. 115, 117, 119], and concluded that 50.3% of the stated income loans audited by the bank showed a variance in income from the borrowers' IRS filings of greater than 10%. Of those, 69% had an income variance of greater than 50%. [SOF 428/Exh. 117] Now-available documents confirm

that the audit results were widely known within Countrywide, having been distributed to Countrywide management, including its highest ranking officers, and were discussed at the April 24, 2006 Credit Risk Management Committee meeting [SOF 431/Exhs. 115, 117], where McMurray stated that the income discrepancies revealed in the audit were also being seen at Countrywide Home Loans. [SOF 432, Exhs. 115, 117] Rossi testified that the "vast majority" of the income discrepancies revealed in the 4506 Audit were the result of fraud and misrepresentation. [SOF 434/Exh. 275]

175. By February 2007, internal risk management at Countrywide "noted that the production divisions continued to advocate for, and operated pursuant to, an approach based upon the matching strategy alone. . . . . Additionally, [a senior risk manager] warned [Sambol] that 'I doubt this approach would play well with regulators, investors, rating agencies etc. To some, this approach might seem like we've simply ceded our risk standards and balance sheet to whoever has the most liberal guidelines.'" McMurray email to Sambol dated Feb. 11, 2007. [Exh. 109]

176. The deterioration of Countrywide's internal quality control process was noted by Countrywide's management and Corporate Credit Risk Committee. At the March 12, 2007 meeting, it was reported that of the loans reviewed through Countrywide's internal quality control process, 30.3% had deficiencies or were rated high risk, and 11.9% were rated severely unsatisfactory, and that one of the principal causes for such ratings included inadequate debt-to-income or LTV ratios, missing income or appraisal documentation, or failure to meet minimum FICO scores. Similarly, at the May 29, 2007 meeting, attendees were informed that loans were being made "outside of any guidelines." A presentation made at the May 29, 2007 meeting notes that "loans continue to be originated outside guidelines primarily via the Secondary SLD desk,

and that there is no formal guidance or governance surrounding SLD approvals. [Exhs. 133, 55, 176]

177. A December 2007 internal Countrywide memorandum quoted by the SEC states that "a Countrywide review of loans issued in late 2006 and early 2007 resulted in . . . the finding that borrower repayment capacity was not adequately assessed by the bank during the underwriting process. . . . More specifically, debt-to-income ratios did not consider the impact of principal [negative] amortization or any increase in interest." SEC Complaint ¶56 (quoting Mozillo memo dated Dec. 13, 2007).

178. In employing its "matching" strategy and thereby making as many loans as possible, regardless of exceptions, Countrywide was able to enjoy tremendous profits from securitization of the loans, which also shifted the risk of the loans from Countrywide to investors:

> As indicated in a previous note, when we first started the SLD, the intent was to be able to offer at least one option for borrowers who wanted exceptions to our underwriting guides. The thought was that we would offer borrower exceptions in our two major loan programs: 30-year fixed rate and 5/1 ARMs. In addition, both of these programs were set up for Alt A and as such we could price and sell under these programs. *While this process seemed to have worked well in the past, we have been recently seeing increased demand from Production for exceptions on all products in general and Pay Option loans in particular.* In addition, Production has been expressing frustration that we were only offering major exceptions for 5/1 ARMs and 30-year fixed rates. As such, *to the widest extent possible, we are going to start allowing exceptions on all requests, regardless of loan program, for loans less than $3 million effective immediately.*
>
> The pricing methodology we will use will be similar to that which we use for 30-year fixed rates and 5-1 Hybrids. *We will assume securitization in all cases.*
>
> * * *
>
> The methodology from a saleability point of view will also be similar to that used for 30-year fixed rates and 5-1 Hybrids. *We will view the exception assuming securitization and will no longer take into account whole loan buyers. In the past, this has caused some exceptions to be declined for Ratios, Balances and*

> *LTV/CLTV combinations. Provided we can sell all of the credit risk (i.e. not be forced to retain a first loss place due to a 80% LTV, 60 Back-end ratios $3 million loan) we will approve the loan as a salable loan. Finally, we will not be reviewing loans from an underwriting point of* view but will rather be relying on Production to make certain that the loan[s] meet all other underwriting Guideline and w[i]ll have been reviewed for compliance acceptability and fraud.

July 28, 2005 email from David Spector, Managing Director, to Countrywide Managing Directors and Ssecondary Marketing management (emphasis added).

179. As Nathan Adler, Managing Director of Secondary Markets, testified in the SEC action,

> Q. Was one of the criteria for granting exceptions at the Secondary Loan Desk in Secondary Marketing whether or not the loan could be sold into the secondary market?
>
> A. That was the only criteria that we followed.

180. Countrywide's widespread use of exceptions to its underwriting guidelines were well-known within the Company, but permitted because, as recognized by John McMurray in his May 22, 2005 email discussed above, "CW's approach to exceptions has been lucrative over the past several years."

181. Yet Countrywide did not publicly disclose the amount of loans it was underwriting on an exception basis for any loan product or division. [SOF 296] Paul Liu, a Countrywide attorney who participated in the preparation of the Offering Documents, testified in the SEC Action that while the Prospectus Supplements stated that "some of those mortgage loans may have . . . been originated with exemptions that have compensating factors," the Offering Documents did not disclose the number or percentage of loans included in each securitization that were underwritten pursuant to exceptions, or even in many cases whether any loans within that securitization were underwritten pursuant to exceptions at all. [Exh. 262]

182. Countrywide assured investors that the level of exceptions was low. Christopher Brendler, a Stifel Nicholas analyst who initiated coverage of Countrywide in early 2006, testified that Countrywide repeatedly advised conference call and investor presentation participants that it kept its "exceptions low." Brendler also testified that a low exception rate in the mortgage industry would have been 5% to 10% of total loans "not the extreme number of exceptions that Countrywide made. Brendler confirmed that such a disclosure would have been material:

> That's -- that would have been a very disturbing disclosure, I believe, to know that you're basically seeking out the most aggressive policies and underwriting guidelines of your competitors without consideration for other factors. You're essentially creating a worst of the worst.
>
> [Exh. 242]

183. On November 3, 2009, the District Court for the Central District of California denied a motion to dismiss the SEC complaint. Judge Walter specifically noted that "neither Countrywide's disclosures nor a careful review of the context of the statements convince this Court that the alleged omissions or misstatements were immaterial or not misleading as a matter of law." *SEC v. Mozilo, et al.*, No. 09-3994, slip op. at 10 (C.D. Cal. Nov. 3, 2009).

184. Subsequently, on September 16, 2010, Judge Walter denied Countrywide's motion for summary judgment. Among other key determinations, the court found:

> [The] SEC has also presented evidence that Countrywide routinely ignored its official underwriting guidelines to such an extent that Countrywide would underwrite *any* loan it could sell into the secondary mortgage market. According to the evidence presented by the SEC, Countrywide typically made four attempts to approve a loan. Countrywide first used an automated underwriting system known as "CLUES", which applied Countrywide's underwriting guidelines as set forth in Countrywide's technical manuals and loan program guides. SF 279. . . . CLUES would either approve the loan or "refer" it to a loan officer for manual underwriting. SF 280. If that loan officer lacked the authority to make an exception to Countrywide's underwriting guidelines, the loan was referred to the Structured Lending Desk, where yet another underwriter, with even more authority to waive guideline requirements, attempted to make the loan. Adler Dep. 31:23-33:4, July 15, 2010. If that attempt failed, the loan was referred to

> Countrywide's Secondary Markets Structured Lending Desk. SF 282, Adler Dep. 32:9-33:4. According to the testimony of the Managing Director of Countrywide Home Loans' Secondary Marketing Division, once the loan was referred to Countrywide's Secondary Markets Structured Lending Desk, the sole criterion used for approving the loan was whether or not the loan could be sold into the secondary market. SF 282. As a result of this process, a significant percentage (typically in excess of 20%) of Countrywide's loans were issued as exceptions to its official underwriting guidelines. SF 293-294. As reported in one Corporate Credit Risk Committee meeting, one third of the loans referred from CLUES missed "major guidelines" and another one third missed "minor" guidelines. SF 289. In light of this evidence, a reasonable jury could conclude that Countrywide all but abandoned managing credit risk through its underwriting guidelines, that Countrywide would originate any loan it could sell, and therefore that the statements regarding the quality of Countrywide's underwriting and loan production were misleading.

SEC v. Mozilo, et al., No. 09-3994, slip op., at 11–12 (C.D. Cal. Sept. 16, 2010).

185. In short, evidence presented to the court supported the claim that "*Countrywide routinely ignored its official underwriting guidelines, and in practice, Countrywide's only criterion for approving a loan was whether the loan could be sold into the secondary market.*" *Id.* at 12 (emphasis added).

186. The Attorneys General from many states also filed complaints against Countrywide based on its abusive and predatory lending practices. Among them, the Attorney General of California alleged based on its extensive investigation of Countrywide that the company "viewed borrowers as nothing more than the means for producing more loans, originating loans with little or no regard to borrowers' long-term ability to afford them." Complaint at 5, *People v. Countrywide Fin. Corp.*, No. LC083076 (Cal. Super. Ct.) ("Cal. AG Countrywide Complaint"). Countrywide, the California Attorney General found, "did whatever it took to sell more loans, faster "including by . . . disregarding the minimal underwriting criteria it claimed to require." Cal. AG Countrywide Complaint at 20.

187. For example, the Cal. AG Countrywide complaint quotes one former California loan officer explaining how stated income loans were sold, with a loan officer telling the borrower "with your credit score of X, for this house, and to make X payment, X is the income that you need to make"; after which the borrower would state that his or her income was X. *Id.* at 21.

188. A similar lawsuit instituted by the Illinois Attorney General, *People v. Countrywide Financial Corporation,* No. 08-22994 (Cook County Ch. Ct.), detailed how (a) one Countrywide employee estimated that approximately 90% of all reduced documentation loans sold out of the Chicago office had inflated incomes; and (b) one of Countrywide's mortgage brokers, One Source Mortgage, Inc., routinely doubled the amount of the potential borrower's income on stated income mortgage applications.

189. The Illinois complaint also detailed how Countrywide created incentives for its employees to increase the number of loans without concern for ability of the borrower to repay the loan. The *New York Times* described the allegations in the complaint as "paint[ing] a picture of a lending machine that was more concerned with volume of loans than quality."

190. Among the many other abuses described in the Illinois complaint, the Attorney General found that:

> [t]hrough the securitization process, Countrywide extracted hefty over-head charges, then shifted the risk of the failure of these non-traditional loans to investors. Moreover, securitization allowed Countrywide to tap those investors for much needed capital to fuel its origination process and reach its goal of capturing more and more market share. To facilitate the increase in loan origination volume, Countrywide relaxed its underwriting standards even more and sold risky, unaffordable and unnecessarily more expensive mortgage loans to millions of American homeowners.

Testimony of Illinois Attorney General Lisa Madigan before the FCIC, Jan. 14, 2010.

191. Similar allegations appear in a complaint filed by the Connecticut Attorney General, *Connecticut v. Countrywide Fin. Corp.*, No. 08-40390945 (Hartford Sup. Ct.).

192. On October 6, 2008, Countrywide entities settled lawsuits brought by *eleven* State Attorneys General and potential claims by 28 other states, including all of the States in which loans backing the PLMBS purchased by the Bank were issued. The settlement valued at $8.4 billion resolved charges of violations of predatory lending, unfair competition, false advertising, and violations of banking laws, and required Countrywide to implement a program to modify certain existing loans, particularly high risk loans and pay-option mortgages that were the subject of the Attorneys Generals' investigations.

b. Private actions against Countrywide demonstrate Countrywide's failure to adhere to sound underwriting practices.

193. A multitude of private class action and individual cases raise further challenges to Countrywide's underwriting practices—and substantiate the challenges with witness testimony and documentary evidence. For example, Mark Zachary, a former Regional Vice President of Countrywide's joint venture with KB Home, Countrywide Mortgage Ventures, LLC, detailed in the complaint filed in *Zachary v. Countrywide Financial Corporation*, No. 08-0214 (S.D. Tex.), how Countrywide blatantly ignored its underwriting policies and procedures. Mr. Zachary states that in September of 2006 he informed Countrywide executives that there was a problem with appraisals performed on KB Homes being purchased with Countrywide loans. Mr. Zachary raised concerns again in November of 2006 to Countrywide executives and described how loan officers would help loan applicants to submit applications with false income amounts.

194. Zachary's observations about problems with appraisals at KB Homes are confirmed by documents reflecting internal correspondence within and between KB Homes and Countrywide filed in *Johnson v. KB Homes, et al.*, No. 09-972 (D. Ariz.).

195. For example, on June 8, 2005, Christina Nickerson, a KB Home salesperson wrote: "We have an appraisal issue at IMR Mesa . . . the [lender's] appraiser can not obtain value. . . . I have asked the [lender] for a copy of the appraisal, and I requested that she try a more aggressive appraiser. . . . My suggestion is that we have KBHMC order an appraisal from a KB friendly appraiser and see what happens." KB Home Director of Sales McLaury responds: "I agree, we need to order an appraisal from our KB friendly appraiser[.]" On June 16, the salesperson heard back: "Here's our appraisal at purchase price[,]" but McLaury complains: "It's $1,966 short isn't it? Can Ernie Carver bump it up?" Soon after, McLaury confirms that the maneuvering has worked: "Christina and the Mesa Team, the appraisal will come in at the total sales price . . . ."

196. In another instance, in July 2006, KB Home Phoenix Vice President Stacie McDonald asked a KB Home salesman about a home for which an appraisal was low. The salesman responded: "It was approved at $290,000 with a VC of 38%, however, we were able to push appraisal to $300,000 and the addendum for $300,000 was done yesterday."

197. Similarly, in October 2007, KB Home Director of Sales McLaury instructs "friendly" appraiser Scott Dugan: "Please base your appraisal on today's base sales price, the options/upgrades the buyer purchased ($40,777), and comps in the neighborhood/area, particularly the one lot 44 (66 Lions Den Avenue) that closed at $248,643." On 10/11/07, Dugan responds: "ok."

198. When KB Home salesperson, Peter Manesiotis, reported to his manger, Gregory Victors: "Appraisal came in low. This is a CW deal. How should we proceed?", Victors responded: "Have Countrywide order a second appraisal. KB will pay for it. Speak to [loan officer] or processor to get someone who knows area. This process just worked at Mesquite.

Buyer did not know about first appraisal. Manesiotis then instructed that a new appraisal be ordered and do not notify the buyer about the first appraisal.

199. Countrywide senior executives were apparently not just aware but actively involved in this conduct. In an August 9, 2006 email sent after an appraisal was below contract price and below the level that KB Home's hand-picked appraiser, Harry, could reach, Countrywide/CWKB Vice President, Tim Ryan writes: Eric Sanford the western regional VP of landsafe is reviewing the appraisal he is as high as it gets at landsafe. . . . As soon as I hear I will let you know. We are fighting all the way to the top for you . . . . Ryan later reports: We were just informed the original appraisal will be amended to Harry's appraisal. . . . So CW will be able to use the $687,000.00 value. On another occasion Ryan explained one scheme for generating self-perpetuating excessive appraisals: Going forward I have asked ops to request Harry on homes that are decked out this way we know max value has been given. Under the new rules we cannot do it often, however once a few closing occur we have comps!

200. More information is provided by the Consolidated Complaint filed in *In re Countrywide Financial Corporation Derivative Litigation*, 07-6923 (C.D. Cal.) on February 15, 2008. The suit against certain Countrywide officers, Board members, and others alleged claims based upon, *inter alia*, a failure of oversight of Countrywide's lending practices, financial reporting, and internal controls. That complaint details how, as to the specific mortgage backed securities at issue all originated by Countrywide or affiliated entities over 50% of the total mortgage loan balance in the underlying loans was severely delinquent, in default, repossessed, in bankruptcy, or in foreclosure. Consistent with the findings of the BasePoint Analytics study previously discussed and this 50% failure rate, the complaint quoted multiple former employees

of Countrywide who detailed how Countrywide routinely ignored its own underwriting standards when the company needed to book loans to maintain earnings.

201. Countrywide's representations regarding its loan origination practices have also been challenged by the leading insurance companies that insured MBS sold by Countrywide. On September 30, 2008, MBIA Insurance, one of the largest providers of bond insurance, filed its complaint in *MBIA Insurance Corp. v. Countrywide Home Loans, et al.* (N.Y. Sup. Ct.). This complaint explains how MBIA "provide[d] credit enhancement on the [MBS]—in the form of guarantee of repayment of principal and interest for the [MBS] notes in each securitization," and claims MBIA issued such insurance on the basis of fraudulent representations by Countrywide.

202. MBIA explains that:

> MBIA's re-underwriting review has revealed that 91% of defaulted or delinquent loans in these fifteen Countrywide securitizations show material discrepancies from underwriting guidelines. . . . For example the loan documentation may (i) lack key documentation such as verification of borrower income or assets; (ii) include an invalid or incomplete appraisal; (iii) demonstrate fraud by the borrower on the face of the application; or (iv) reflect that any of the borrower income, FICO score, debt, DTI ["debt-to-income"] or CLTV ratios, fails to meet stated Countrywide guidelines (without any permissible exception).

MBIA specifically notes that "the Defective Loans run across Countrywide's securitizations from 2004-2007, demonstrating the consistency of Countrywide's disregard for its underwriting guidelines during this period." On April 27, 2010, the Court denied Countrywide's motion to dismiss MBIA's fraud claims.

203. The September 28, 2010 Complaint filed by monoline insurer Ambac in *Ambac Assurance Corporation v. Countrywide Home Loans, et al.* (N.Y. Sup. Ct.) alleges:

> Because Countrywide [Financial Corporation, Countrywide Home Loans, Inc. and Countrywide Securities Corporation] was the nation's leading mortgage originator, its many public pronouncements that its underwriting practices were the industry's gold standard carried significant weight. Countrywide repeatedly asserted that the loans in its portfolio, from which the loans in the transactions at

> issue were drawn, were originated pursuant to Countrywide's strict underwriting standards that allowed "exceptions" only if compensating factors were present. But what Countrywide concealed is that, contrary to its representations, approval of "exceptions" became the rule. Countrywide failed to disclose that its business model was premised on the perpetual origination and refinancing of loans to borrowers who did not have the ability to make the required payments.

204. Ambac alleges that Countrywide made numerous false and misleading statements and omitted material facts about the quality of Countrywide's loan origination procedures and the collateral underlying the transactions. Specifically, "[t]he Prospectus Supplements contained false and misleading statements concerning the quality of Countrywide's loan origination procedures and, in particular, failed to disclose that Countrywide had adopted a practice of making loans to borrowers who had little or no ability to repay their loans."

205. The falsity of Countrywide's representations is evidenced by the performance of the underlying loans, which have defaulted at extraordinary rates (as of September 2010, more than 35,000 loans insured by Syncora with an aggregate principal balance of more than $1.95 billion hade defaulted or have been charged-off. Further, by September 2010, Ambac had reviewed the origination files for 6,533 loans for conformance with Countrywide's loan-level representations and warranties and discovered that 6,362 of the loans—more than 97%—materially breached Countrywide's loan-level representations and warranties.

206. In *Financial Guaranty Insurance Company v. Countrywide Home Loans, Inc., et al.* (N.Y. Sup. Ct.), Countrywide MBS insurer FGIC alleges that, with respect to securitizations it insured in 2006 and 2007, Countrywide and its corporate affiliates made multiple false misrepresentations and omissions, including that Countrywide: (a) failed to disclose an increase in its exceptions to and expansion of its mortgage-underwriting guidelines, including exceptions for which there were no compensating factors; (b) failed to disclose and deliberately concealed changes to its underwriting standards and procedures from those used for mortgage loans

included in prior securitizations; (c) engaged in "adverse selection" whereby poor quality loans would be securitized while loans that were expected to perform better were retained on Countrywide's books; (d) failed to disclose mortgage-loan-origination fraud in which Countrywide and its corporate affiliates were participants or complicit; (e) misrepresented to FGIC the nature of key delinquency information; and (f) made numerous false and misleading public statements concerning the quality of Countrywide's mortgage origination process and securitized mortgage loans.

207. According to FGIC, beginning in early 2006, at the latest, Countrywide made continuing undisclosed changes in its mortgage loan origination practices and started originating and securitizing lower-quality, poorly underwritten loans. These changes resulted in an undisclosed expansion of Countrywide's underwriting guidelines by making increased exceptions in originating mortgage loans, and making these exceptions without adequate, and in many cases any, compensating factors. Moreover, FGIC alleges that Countrywide admitted to it that Countrywide not only expanded the exception process, but also Countrywide also engaged in "adverse selection" by retaining fewer exception mortgage loans for its portfolio while securitizing (for sale to investors) those loans with exceptions.

208. FGIC's allegations and Countrywide's purported admissions are supported by the analysis of professional residential mortgage loan review experts that were retained by FGIC to review statistically significant samples of mortgage loans from FGIC insured securitizations. These reviews determined that approximately *70%* of the mortgage loans in these securitizations significantly violated one or more of Countrywide's underwriting guidelines or standard mortgage underwriting practices. Unsurprisingly, the loss rate for mortgage loans found to be in

breach of underwriting standards was two-and-a-half to three times the loss rate on non-breaching loans.

209. Similarly, in *Syncora Guarantee Inc. v. Countrywide Home Loans, Inc., et al.* (N.Y. Sup. Ct.), Countrywide MBS insurer Syncora alleges that, with respect to Countrywide securitizations it insured between 2004 and 2006,

> in originating the loans in these portfolios, Countrywide, *consistent with its business practices at the time, systematically ignored its own underwriting guidelines* and made imprudent loans that no reasonable underwriter would have made in a single-minded pursuit of generating ever-greater volumes of new loans. As a result, thousands of non-performing loans in the securitized portfolios violated Countrywide's own published guidelines should never have been made. (Emphasis added.)

210. Syncora alleges that the Countrywide offering documents, including the Prospectuses and Prospectus Supplements, were replete with misrepresentations regarding Countrywide's underwriting process and failed to disclose its routine, material deviations from sound underwriting practices. Countrywide is also alleged to have materially misrepresented the accuracy of data, including debt-to-income ratios and combined loan to value ratios, provided to Syncora for each securitized loan (commonly referred to as the "loan tape").

211. Syncora's review of underlying files for 3,700 defaulted loans in two of the securitizations it insured revealed that 2709 of the loans—almost 75%—have severe underwriting defects. The majority of these loans exceeded or ignored one or more Countrywide underwriting guidelines regarding excessive debt-to-income ratio; excessive combined loan to value ratios; excessive loan amounts; improper calculation of first-lien debt; improper calculation of property values; patently unreasonable stated incomes; borrower fraud;

indiscriminate availability of stated income loans; inflated appraisals;[3] insufficient borrower credit; insufficient cash reserves; and/or missing documents. In fact, Countrywide frequently breached a combination of underwriting guidelines for a given loan, which created a "layered risk," greatly increasing the likelihood of default.

c. Confidential witnesses provide further evidence of Countrywide's failure to adhere to sound underwriting practices.

212. Confidential witnesses provide additional evidence of Countrywide's failure to adhere to sound underwriting practices and guidelines. For example, Confidential Witness ("CW")-A, a loan officer who worked at Countrywide from 1997 through 2007, CW-B, a former branch manager and regional vice president for Countrywide Home Loans from September 2005 through November 2008, CW-C, a loan specialist at Countrywide Home Loans' subprime lender, Full Spectrum Lending, from 2004 to 2005, and CW-EE, a former Countrywide branch operations manager from 2005 to 2010 (after Countrywide was taken over by Bank of America), all confirm that: (a) Countrywide employees faced intense pressure to close loans at any cost; (b) Countrywide increasingly approved risky, low- or no-documentation loans without adequate review; (c) Countrywide failed to adhere to underwriting guidelines; (d) Countrywide routinely approved loans that contained exceptions for which there were no reasonable

[3] With respect to inflated appraisals, Syncora alleges in part:

> In a review of non-performing loans in the 2005-K and 2006-D Securitizations, Syncora has found that Countrywide's appraisals of properties secured by non-performing loans show a clear pattern of inflation compared to sales prices achieved for comparable properties in the locale at the time of Countryside obtained its appraisals. Moreover, despite Countrywide's promise in the contractual documents and the Prospectuses to obtain "independent third party" appraisals, the properties underlying the vast majority of the loans in the Securitizations were appraised by Countrywide's own affiliated appraisal company, Landsafe, Inc. ("Landsafe"). Landsafe, like Countrywide Home Loans, is a subsidiary of Countrywide Financial [Corp.].

compensating factors; (e) Countrywide employees pressured appraisers to inflate home values; and (f) Countrywide employees manipulated loan data in order to close loans.

213. Specifically, CW-A stated that employees at Countrywide always faced pressure to produce and close more loans. Because CW-A's performance was judged only on how many loans he closed each month, and not on long-term performance, he used to joke to friends, "I'm fired every month, and then every month they re-hire me."

214. CW-A stated that from 2004 to 2006, Countrywide's underwriting guidelines became "looser and looser and looser." During this period, the minimum credit scores required for prime or Alt-A mortgages fell repeatedly, such that a borrower with a FICO score of 680 could get a mortgage with a 100% LTV ratio based upon stated income/stated assets documentation. CW-A also stated that Countrywide offered no income/no asset ("NINA") loans, whereby a borrower could obtain a loan without providing any employment, income, or asset documentation, and did so without any effort, or for that matter any way, to determine whether the borrower had an ability to repay the loan. CW-A further stated that Countrywide frequently offered loans to borrowers who had been rejected by other mortgage providers. In fact, Countrywide loan officers often emphasized to prospective borrowers that Countrywide could do loans that other lenders could not.

215. According to CW-A, Countrywide had an "Exception Desk," whose purpose was to review loans which did not strictly meet the underwriting guidelines. During the 2004-2006 time period, CW-A stated that, "[i]t got to where loan approvals with exceptions were the norm."

216. According to both CW-A and CW-B, Countrywide loan officers pressured appraisers to return values which would allow the loans to be approved. For example,

Countrywide loan officers would tell the appraisers that if they did not provide the value the loan officers needed, Countrywide would not send any more work to the appraiser.

217. Both CW-A and CW-B described that, even in circumstances where the appraisers were not directly threatened, Countrywide influenced their appraisal values by telling appraisers exactly what value they needed in order to approve the loan. CW-B also explained that in other instances, Countrywide provided appraisers with the purchase price of the home and the loan amount so that the appraisers could extrapolate the minimum value needed for the appraisal. CW-B noted that Countrywide also sent appraisers additional comparables that were higher than those the appraiser initially relied upon.

218. CW-B stated as well that Countrywide's underwriting guidelines became "way too easy" to meet. As a consequence, many of Countrywide's loans ended up in default. Numerous times, he recalled thinking to himself, "people making this kind of money shouldn't qualify for a $400,000 loan." For example, he recalled seeing loan applications for $350,000 homes, with $1,900/month loan payments, when the borrowers were making only $3,000/month. The DTI ("debt-to-income") ratio on such a loan was approximately 63%. He said such situations were "absurd, but I saw it all the time."

219. Additionally, CW-B said that most approved mortgages at Countrywide had 95-100% LTV ratios, and most borrowers only put down zero to five percent of the purchase price. Consequently, borrowers had "no skin in the game," and when home values started to drop and the borrowers' loans were for more than the homes were worth, they had no incentive to continue making their mortgage payments. Moreover, CW-B said that Countrywide granted numerous mortgages to borrowers with 65% DTI ratios, and that Countrywide did not require

borrowers to have any "reserve" (*i.e.*, cash in their bank accounts)—or, at most, they only had to have one month's reserve—in order to be approved.

220. CW-B also stated that Countrywide offered a "Fast and Easy" loan program, which required minimal documentation and thereby allowed mortgages to be approved more quickly. It was Countrywide's version of the stated income/stated asset mortgage. In order to determine borrowers' eligibility for the Fast and Easy loan program, Countrywide employees entered data into Countrywide's internally developed automated underwriting system, called CLUES. CLUES had a flagging mechanism whereby loan officers could not change borrower information and attempt to re-run it through CLUES in order to qualify borrowers for the Fast and Easy loan program. If a loan officer did change such information, CLUES would immediately flag it, decline it for the program, and require full documentation. However, CW-B stated that Countrywide employees bypassed this flagging mechanism by entering inflated borrower information in the first place. For example, they would report a higher monthly income than the borrower actually reported in his or her application. By entering such inflated information, there was no way for the CLUES system to know that the information was falsified. Thus, the loan would not be flagged.

221. CW-B had "no doubt" that there was a lot of upward manipulation of borrower income in order to qualify borrowers for a Fast and Easy loan. In fact, CW-B reported one employee to Countrywide's Fraud Department when he caught the employee repeatedly entering fraudulently high income. However, the Countrywide human resources department said that such reported incidents were not enough to fire the employee, and the employee was simply suspended. While the employee was suspended, CW-B examined the employee's loan files and

found four to five different applications in which the employee had nearly doubled the borrowers reported income in order to get the loans approved.

222. CW-C also saw a practice of inflating incomes on stated-income loans when she worked at Countrywide s Full Spectrum Lending division. On instruction from the branch manager, CW-C said that loan officers recalculated income and removed [any documents] they didn t want the underwriters to see in order to push the loans through. In addition, CW-C knew that loan officers at Countrywide cut and pasted false information into loan documents in order to get loans approved. It was a pretty common practice, she said.

223. Like CW-A, CW-EE was aware that her bosses were under a lot of pressure to produce a high volume of loans, and she noted that there was a big push on volume back then, and bonuses were tied to volume. In fact, CW-EE was admonished that she was being too difficult with respect to the underwriting rules, and was told that she had to find a way to make the loans, and not try to find a way to not make them. CW-EE recalls many times during her tenure when she did not believe a loan should be made, but it nevertheless was pushed through. By way of example, CW-EE recalls a Countrywide loan officer in her branch who was allowed to originate loans for his family members, notwithstanding that this violated Countrywide policy, and despite the fact that the applications only contained names and addresses and no other information. In fact, it was only after several of these loans closed, and CW-EE complained to her regional manager, that her colleague was told he could no longer make loans to family.

224. CW-EE also recalls instances in which she spoke with a customer over the telephone regarding missing or questionable information, and was informed by the customer that they just put down what the loan officer told them to write. When CW-EE expressed her concerns to the loan officer involved, she was told *not* to contact any customers. CW-EE recalls

a lot of tension between the loan officers and loan processors in the branch, with the loan officers insisting that loans be processed quickly and without questions and becoming angry when loan processors attempted to verify and validate the information on the loan.

225. CW-FF, a loan officer and branch manager for Countrywide, stated that verification of income under Countrywide's Fast and Easy loan program was "a joke." Moreover, if the CLUES system—Countrywide's automated underwriting system—did not approve a loan at first, loan officers would often simply inflate the numbers until there was an approval. There was no limit to how many times the numbers could be re-entered. In CW-FF's experience, loan officers were unlikely to seek exceptions to the underwriting guidelines from the branch manager, since they could simply commit fraud on the "front end"—i.e., by inflating the numbers.

226. CW-FF also said that 50% of mortgage loans were made without formal appraisals. When appraisals were done, the appraiser was told that if the property did not "come back at value," Countrywide would simply go to another appraiser from then on. CW-FF said when an appraised property had zoning violations, or other features that would bring down the valuation, the appraiser was told to make sure their photographs of the property didn't include those features.

d. The mortgages originated by Countrywide and securitized in the PLMBS purchased by the Bank provide further evidence of Countrywide's failure to adhere to sound underwriting practices.

227. Countrywide originated mortgages that secured at least Securities HVMLT 2006-2 2A1A, HVMLT 2006-2 3A1A, SEMT 2006-1 2A1, SEMT 2006-1 3A1, and SARM 2005-21 3A1. As discussed in detail below, the Offering Documents contained serious material misstatements regarding specific characteristics of the loan pools securing these Securities,

including misstatements with respect to their weighted average LTV ratio, the percentages of loans with LTV ratios in excess of 100%, 90%, and 80%, and the percentage of loans secured by property not the primary residence of the borrower. Moreover, as described below, *see infra* ¶¶591-592, these Securities have exhibited excessive delinquency and foreclosure rates. These circumstances are strong evidence of Countrywide's failure to observe its stated underwriting standards. Countrywide's actual practices—including the use of unreliable appraisals, routine granting of underwriting exceptions, and reliance on unverified borrower-supplied information—caused it to originate loans whose actual LTV ratios and primary residence rates were far different from that reported in the Offering Documents, and whose likelihood of default was much higher than that of loans issued under underwriting standards of the type described in the Offering Documents.

e. Press reports, government investigations and related litigation, and confidential witnesses demonstrate that Countrywide engaged in predatory lending.

228. The *New York Times* detailed Countrywide's abusive lending practices in a story entitled "Inside the Countrywide Lending Spree":

> On its way to becoming the nation's largest mortgage lender, the Countrywide Financial Corporation encouraged its sales force to court customers over the telephone with a seductive pitch that seldom varied. "I want to be sure you are getting the best loan possible," the sales representatives would say.
>
> But providing "the best loan possible" to customers wasn't always the bank's main goal, say some former employees. Instead, potential borrowers were often led to high-cost and sometimes unfavorable loans that resulted in richer commissions for Countrywide's smooth-talking sales force, outsize fees to company affiliates providing services on the loans, and a roaring stock price that made Countrywide executives among the highest paid in America.
>
> Countrywide's entire operation, from its computer system to its incentive pay structure and financing arrangements, is intended to wring maximum profits out of the mortgage lending boom no matter what it costs borrowers, according to interviews with former employees and brokers who worked in different units of

> the company and internal documents they provided. One document, for instance, shows that until last September the computer system in the company's subprime unit excluded borrowers' cash reserves, which had the effect of steering them away from lower-cost loans to those that were more expensive to homeowners and more profitable to Countrywide.

229. According to the *New York Times*, "Countrywide was willing to underwrite loans that left little disposable income for borrowers' food, clothing and other living expenses." The Company's incentive compensation system encouraged such loans "regardless of the inevitability that the borrower would default and the Company (and the borrower) would be severely harmed.

230. According to Mark Zachary, a former Regional Vice President of Countrywide's joint venture with KB Home (Countrywide Mortgage Ventures, LLC), the appraiser, as known to Countrywide executives, was strongly encouraged to inflate appraisal values by as much as 6% to allow the homeowner to "roll up" all closing costs. Mr. Zachary explained that this resulted in the homeowner being "duped" as to the value of the home. According to Mr. Zachary, this inflated value put the buyer "upside down" on the home immediately after purchasing it, *i.e.*, the borrower owed more than the home's worth. Thus, the buyer was set up to be more susceptible to defaulting on the loan. *See supra* ¶¶193-194 (citing to complaints filed in *Zachary v. Countrywide Fin. Corp.*, No. 08-0214 (S.D. Tex.), and *Johnson v. KB Homes, et al.*, No. 09-972 (D. Ariz.)).

231. Countrywide's incentive compensation system encouraged brokers and sales representatives to place borrowers into the subprime category even if they in fact qualified for other loans. As reported in *Bloomberg*, Senator Charles Schumer urged that "Countrywide, the biggest U.S. mortgage lender, should stop paying higher commissions to brokers who steer borrowers to high-cost loans that 'are designed to fail.'"

232. The Attorney General for the State of Massachusetts has detailed Countrywide's indifference to its borrowers' inability to repay its loans. For example, while "[o]n its website, Countrywide's successor Bank of America suggests when obtaining a mortgage to purchase a home that a borrower have a maximum back-end [debt-to-income ("DTI")] ratio of 36%[,] Countrywide routinely approved loans for borrowers with back-end DTI ratios exceeding 50%."

233. The Massachusetts Attorney General's complaint in *Commonwealth v. Countrywide Financial Corporation*, No. 10-1169 (Mass. Super. Ct.), details Countrywide loan practices that allegedly violated Massachusetts' Consumer Protection Law by "originat[ing] loans in such a manner that would lead predictably to a borrower's default and foreclosure," such as negative amortization loans, hybrid ARMs where borrowers were not qualified based on the post-teaser rate, stated income loans, and loans with these features plus prepayment penalties.

234. Among the conduct alleged and resolved in Countrywide's above-noted settlement with 39 states Attorney Generals were violations of state predatory lending laws by (a) making loans it could not reasonably have expected borrowers to be able to repay; (b) using high pressure sales and advertising tactics designed to steer borrowers toward high-risk loans; and (c) failing to disclose to borrowers important information about loans, such as refinancing costs, the availability of lower cost products, the existence of prepayment penalties, and that advertised rates would adjust upwards sharply as soon as one month after closing.

f. Confidential witnesses provide further evidence of Countrywide's predatory lending practices.

235. Confidential witnesses also confirmed that Countrywide engaged in predatory lending practices. For example, CW-A said he knew a lot of Countrywide loan officers who misrepresented to borrowers how a negative amortization loan worked. On a negative amortization loan, the monthly payment covered an amount that was less than the total accrued

interest on the loan; any unpaid interest was added on to the end of the loan. The interest rate on the negative amortization loans then adjusted upward periodically. Consequently, if a borrower continued to make monthly payments that were below the amount of the accrued interest, the amount of the unpaid interest would skyrocket. In approximately three years, the amount due would hit a "ceiling" of 110% to 115% of the original principal balance. Then Countrywide would "recast" the loan balance and adjust the required monthly payment so that it would cover all of the previously deferred interest. As a result, the borrower's monthly payment could rise to as much as two-and-a-half times the original monthly payment. Many borrowers fell into problems with such loans.

236. CW-A said he knew that Countrywide loan officers misrepresented how these types of loans worked because he used to make calls to Countrywide workers posing as a prospective borrower. When the Countrywide officers explained the loans to him, their explanations were not accurate.

237. In summary, far from following its underwriting guidelines and making occasional, targeted, and justified exceptions when other evidence of ability to repay justified a deviation from the guidelines, in fact, at Countrywide, variance from the stated standards was the norm, and many loans were made with essentially little to no underwriting or effort to evaluate ability to repay. Nowhere did any of the Offering Documents inform the Bank that Countrywide effectively abandoned its underwriting guidelines and engaged in predatory lending in order to issue and securitize as many loans as possible.

2. New Century Mortgage Corp.

238. New Century Mortgage Corp. originated underlying mortgage loans securing at least seven of the PLMBS purchased by the Bank. New Century, which filed for bankruptcy on
